10. Course equivalency information can be checked using the MyList (http://lucweb.luc.edu/courseEq/) tool in LOCUS or Transferology (https://www.transferology.com/login.htm).

[1] This policy applies to students admitted during the Fall of 2013 or later.
[2] Credit **not** eligible for transfer includes:
- Trade school, job training, or adult/continuing education courses
- Developmental courses (below 100-level)
- English as a Second Language (ESL) course credit
- Courses from institutions that are not regionally accredited

Undergraduate Attendance Policy

The undergraduate attendance policy specifies the role of students, instructors and university administrators in cases when students are absent from one or more classes.

The university does not require faculty to take attendance; however, if faculty use participation/ attendance in their grading rubric, they must include this policy on the course syllabus which must clearly define the consequences for non-attendance. If participation/attendance is identified as a portion of the students' final grade, faculty must maintain a record of students' attendance throughout the term.

Excused Absences

The university recognizes there are times when students must miss class due to extenuating circumstances. Regardless of the attendance policy of the faculty, the following are considered excused obligations and are not to be counted as absences in the class. Excused absences do not preclude the need to fulfill specific program requirements.

1. Jury duty, with appropriate documentation.
2. Short Term Military Obligation - Veterans Current Students (https://www.luc.edu/veterans/currentstudents/reservistsguardsmen/)
   a. (https://www.luc.edu/veterans/currentstudents/reservistsguardsmen/)This activity must be documented and provided to the faculty in advance of the activity.
   b. The documentation must be verified by the director or assistant director in the Military Veteran Student Services Office, who has confirmed that the student has orders to report for a short-term military obligation.
3. Day(s) for Religious Observances (https://www.luc.edu/campusministry/faithprograms/interfaith/religiousobservances/)

4. Participation in Division-1 athletics or other university-sanctioned events: Travel & Competition Policy (https://www.luc.edu/athleteadvising/travelcompetitionpolicy/)
    1. This activity must be documented and provided to the faculty in advance of the activity.
    2. The documentation must be verified by an administrator who is directly related to the activity (e.g. Division-1 athletics representative; musical group director; student development representative, etc.).
5. Absences resulting from legally mandated accommodation requirements (e.g., Title IX, ADA, etc.).
6. In the event of a state or national pandemic, the institution retains the right to amend this attendance policy.

Making Up Work from a Missed Class

The excused absences outlined above require the faculty to facilitate alternative means for students to make up classwork and/or get notes from a lecture. Labs, clinical hours, group work, performance, studio art, and other field-based classes are the exceptions to this because it may be impossible to make up classwork.

Unexcused Absences

Absences not listed above are unexcused. The ability to make up class work because of an unexcused absence is at the discretion of the faculty, as outlined in the faculty's attendance policy noted on syllabi. Note that the Loyola University Chicago Wellness Center does not provide documentation for absences.

University Core Curriculum

Every Loyola Undergraduate, regardless of college or school, will complete the University Core Curriculum.

The Core Curriculum consists of 16 courses (48 credit hours) distributed over 10 Core Knowledge Areas. Students will complete coursework in:

Required Core Areas	Required Courses	Credit Hours
Artistic Knowledge and Inquiry (p. 1407)	1	3
College Writing Seminar (p. 1407)	1	3
Ethical Knowledge and Inquiry (p. 1408)	1	3
Historical Knowledge and Inquiry (p. 1408)	2	6
Literary Knowledge and Inquiry (p. 1408)	2	6
Philosophical Knowledge and Inquiry (p. 1409)	2	6
Quantitative Knowledge and Inquiry (p. 1410)	1	3
Scientific Knowledge and Inquiry (p. 1410)	2	6
Societal and Cultural Knowledge and Inquiry (p. 1411)	2	6
Theological & Religious Knowledge and Inquiry (p. 1411)	2	6
Total	**16 courses**	**48 hours**

Each course that has been approved for the University Core Curriculum will reinforce one or more of the following six Skills: communication, critical thinking, ethical awareness and decision making, quantitative and qualitative analysis and research methods, and technological literacy.

These courses also integrate the understanding and promoting of four Values essential to a Loyola education: understanding diversity in the US or the world; understanding and promoting justice; understanding spirituality or faith in action in the world; and promoting engaged learning.

Students' majors and minor may fulfill one or more areas of the Core Knowledge component. See here (p. 1413) for specifics.

For more information on the University Core Curriculum and to see the list of approved core courses by Core Knowledge Area go here (p. 1405).

University Core Curriculum Grade Requirements

Students must earn grades of at least D in approved Core courses to have that course count for Core credit, with the exception of the College Writing Seminar, which requires a minimum of C- for credit. Students must have an overall grade point average of 2.00 in all courses they apply to the Core Curriculum.

Required Hours and Grade Point Average for Graduation

Students must complete 120 hours to graduate. Student must have a minimum cumulative 2.00 GPA. They must also have a minimum cumulative 2.00 GPA in their Core Curriculum.

Most departments require a minimum 2.00 GPA in their major(s) and minor(s). Students must check with their department(s) for policy on the minimum GPA in the major and/or minor.

Withdrawal From a Class

After the last day to drop without a "W", students may withdraw from a class or classes with the grade of "W" based on calendar dates noted for each term on the official university academic calendar.

Most students do not need permission to withdraw from a class or classes during any term. Students that are blocked from dropping a class or classes during an academic term should meet with their academic advisor, program director, or associate/assistant dean.

Students who stop attending a class but have not officially withdrawn will not earn a grade of "W". A student in this situation will earn a grade based on coursework completed minus any work, including a final exam, that is not completed. This includes students that make the decision to stop attending after the final date to earn a "W".

The bursar maintains the withdrawal schedule for any tuition credit for a class or classes that a student withdraws from during any term. This schedule is posted on the Bursar website.

Students contemplating withdrawal from a class and receiving or expecting to receive financial assistance should consult with the Office of Student Financial Assistance.

Withdrawal From the University

An enrolled student who wishes to completely withdraw from the university during any term must notify their academic advisor, academic program director, or assistant/associate dean of their college/school of their intent. Please complete the Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104) form. The form will be routed to your academic advisor, program director, or assistant/associate dean. A student is considered to be in attendance until such notice has been received by the academic advisor, program director, or assistant/associate dean and appropriate steps have been taken to completely withdraw a student from a term. The last date of class activity is the date utilized for both the "W" or "WE" grade and the Office of the Bursar's withdrawal refund calendar (https://www.luc.edu/bursar/withdrawalschedulechangecalendars/).

A student may be required to withdraw from the university because of academic deficiency, lack of sufficient progress toward completion of degree requirements, failure to adhere to university requirements and/or degree requirements, failure to adhere to university requirements and regulations for conduct, or failure to meet financial obligations to the university.

Complete Emergency Withdrawal

Students facing a significant emergency circumstance (see "Definitions" section below) that prevents them from continuing in or completing an academic term may submit an Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104) form to their primary academic advisor, program director or assistant/associate dean. All requests must be supported by appropriate documentation. The form is reviewed by the academic dean's office of the student's primary college/school for approval and processing.

Requests for complete emergency term withdrawals are considered after the last day of a term to drop a course or courses without a grade of "W." In cases where the student is incapacitated (see "Emergencies Resulting in Student Incapacitation" below for more details), the requests for complete emergency term withdrawals may be submitted by a parent, spouse or legal guardian.

Complete emergency term withdrawals constitute a withdrawal from all classes and may result in final grades of "WE" in all classes for the given academic term. The University does not grant partial withdrawals (i.e., requests to withdraw from some classes but not others) for emergencies. Grades of "WE" have no impact on a student's cumulative GPA. The "WE" grade has no earned or attempted hours associated with the grade; however, "WE" counts towards attempted hours when determining Satisfactory Academic Progress (https://www.luc.edu/finaid/aid-process/responsibilities/academic-progress/) for continued financial aid eligibility. This policy does not apply in cases where the student has completed final exams or final projects for classes in the term impacted by the significant emergency circumstance. When final grades have posted, students should also utilize the Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104) form, and it will be routed to their primary academic advisor, program director or assistant/associate Dean.

The Office of the Bursar will determine the impact of the Withdrawal on the students account balance in LOCUS. The Student Account Balance will be determined by the University withdrawal calendar Loyola Withdrawal Schedule (https://www.luc.edu/bursar/withdrawalschedulechangecalendars/). The Bursar will not assess any late payment fees after the date of Withdrawal.

Emergencies Resulting in Student Incapacitation

It is required that a complete emergency term withdrawal request be submitted by the student. However, if an emergency situation has resulted in the student's temporary or long-term incapacitation for a period that may extend beyond the one-calendar-year deadline of this policy, the student's college/school academic dean's office, the Office of the Dean of Students, a parent (for minors), emergency contact person, or other legally assigned designee may submit a request on the student's behalf. In such cases, the student's college/school academic dean's office may require additional documentation (e.g., letter from medical doctor, hospitalization forms, power of attorney).

Potential Implications

The section below provides a non-exhaustive list and general information on the potential implications of a complete emergency term withdrawal. While the University offers a number of considerations that help support students who are facing emergencies, there are other important factors that should be taken into consideration before submitting a request for a complete emergency term withdrawal. Whenever possible, it is strongly recommended that a student discuss all possible options, including the potential implications of a complete emergency withdrawal with their primary academic advisor.

Financial Implications: Tuition and Financial Aid

Students are strongly encouraged to purchase tuition insurance (e.g., A.W.G Dewar, Inc.) prior to the start of the academic term.

Note that a complete emergency withdrawal does not automatically result in tuition credit. Please refer to the withdrawal schedule on the Office of the Bursar's website.

Complete Emergency Withdrawal Procedures During an Academic Term

1. Initial Step- Submit Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104)

Although it is recommended that the student submit as much information as possible, documentation does not need to specify details of the emergency that may be protected by law or considered private. Documentation must come from a verifiable authority (e.g., community/licensed healthcare provider, police agency, court of law, US military etc.) and minimally confirm the following:

- general description
- date (or time span)
- time, and
- location (if appropriate) of significant emergency circumstance
- Review and Decision

Requests for a complete emergency withdrawal will be reviewed and decided by the student's college/school academic dean's office. Other areas, such as the Office of the Dean of Students, the Office for Equity & Compliance, or Student Accessibility Center, may be consulted in cases where the student was either referred or is being supported by said office. Additional documentation and/or information may be requested of the student before a final decision is made.

The student will receive a written decision notification no later than 14 business days after receipt of original request via LUC email. If the school is unable to meet the 14 business-days deadline, the student will be notified in writing of the new deadline. If the request is approved, the effective date and further instructions before returning to campus (if necessary) will be provided. The date of the complete emergency withdrawal will be determined by the primary college/school dean's office based on the date of the last academically related activity.

Post-Emergency Complete Withdrawal Re-Entry Process

Unless otherwise indicated in the approval notification or by the Office of the Dean of Students in lieu of the Loyola University Chicago Behavior Concerns Team (BCT), the process for returning to the university will follow standard policies and procedures for re-enrollment. Students who were being supported by BCT before withdrawing or are returning because of a mental health hospitalization are required to consult the Office of the Dean of Students for instructions on potential re-entry requirements.

Definitions

Significant Emergency Circumstance – an unforeseen emergency situation that prevents a student from continuing in or completing an academic term. Some examples include but are not limited to:

- Chronic illness of withdrawing student
- Death of parent/legal guardian or medical issue of a family member and the withdrawing student must become a part-time or full-time caretaker of family member
- Extreme financial hardship
- Mental health condition, serious injury or illness of withdrawing student
- Sudden or consistent lack of transportation which affected the withdrawing student's ability to meet in-person attendance requirements
- Other situations, at the University's sole discretion, which are deemed to result in significant hardship to the withdrawing student

This list includes examples of emergency situations that directly affect the student.

Graduate and Professional

Graduate and Professional Academic Standards and Regulations are published within each academic unit. Students should be familiar with these regulations as they apply to their degree program. The academic unit which confers the degree holds the policies that are relevant to a particular degree. Questions should be directed to the office of the Dean of school or institute.

SCPS Graduate Academic Policies

Academic Advising

Upon admission, graduate students are required to meet with their primary academic advisor and discuss the overview of their academic plan. Throughout their time, students may schedule advising appointments with their academic advisor regarding any registration or enrollment questions.

The University uses LOCUS and particularly the Academic Requirements Report (ARR) as an official record of all courses completed and to be completed by the student. The Microsoft Excel electronic audit is also used as a tool to assist students in devising a graduation plan.

A file review and graduation audit are completed for all graduate students when they apply for graduation to ensure that the classes necessary for graduation have been or will be completed.

Academic Grievance Procedure

SCPS graduate students are held to the academic grievance policies and procedures outlined within the University's undergraduate academic standards and regulations: https://catalog.luc.edu/undergraduate-academic-standards-regulations/.

Academic Integrity

SCPS graduate students are held to the academic integrity policies and procedures outlined within the University's undergraduate academic standards and regulations: https://catalog.luc.edu/undergraduate-academic-standards-regulations/.

Academic Standing

A graduate student is in good academic standing if they:

1. Meet the standards of quality of their academic program and SCPS;
2. Makes satisfactory progress toward completion of degree requirements within the established time limit; and
3. Fulfills SCPS' requirement regarding grade-point average. Students who are not in good academic standing are not eligible to receive a degree and cannot hold an award.

A cumulative GPA of at least 2.8 is required for a student to be considered in good academic standing. Students must be in good academic standing to graduate and have their degree and/or certificate conferred.

Academic Probation

The review for academic standing is completed at the end of the term (fall and spring 16-week semester and 12-week summer semester) and not at the end of each 8-week session. When a student's cumulative GPA falls below 2.8 at the end of the term, they will be placed on academic probation and are required to complete an Academic Improvement Plan, and, may be restricted in enrollment.

Students will have one semester on academic probation. During this semester on academic probation, students must either:

a. Raise their Loyola cumulative GPA to at least 2.80 (i.e., return to good standing), or
b. Achieve a semester GPA of at least 3.00 to continue on probation for one additional semester.

If students do not satisfy either (a) or (b), they may be dismissed from the University (i.e., dropped for poor scholarship). For the semester on academic probation, students may not request "Incompletes" or withdraw from a course without permission from their academic advisor.

Dismissed For Poor Scholarship

Students who do not meet the requirements of academic probation and do not return to good academic standing will be dismissed for poor scholarship.

Admission

Admission on Condition (Unofficial Transcripts)

Conditional admission may be offered to those who have submitted unofficial (self-submitted) or in-progress transcripts (applicant is still enrolled at previous institution at the time of admission). These admitted students must request that official transcripts be submitted to gradapp@luc.edu before the end of the first term of enrollment, or a hold will be placed on their account so that they may not register for future terms.

Admission on Probation

Admission on probation may be offered to students who do not meet the academic requirements for admission. These students will have the opportunity to demonstrate their ability to succeed academically while on academic probation.

For **undergraduate students**, the terms for admission on probation are as follows:

- Students must pass CPST 200 Introduction to Degree Completion in their first session.
- Students must earn a cumulative grade point average of 2.5 in their first 12 credit hours of coursework.

At the completion of their first 12 credit hours, the student's record will be reviewed to determine if the GPA and CPST 200 requirements have been met and their status updated to one of the following:

- Good academic standing. If the student achieves the required 2.5 GPA on the 12 credit hours and their cumulative GPA is 2.0 or higher.
- Continued on probation. If the student achieves the required 2.5 GPA on the 12 credit hours but still needs to bring their cumulative GPA to 2.0 or higher, they will be given the opportunity to continue to improve their GPA with future enrollment.
- Dismissal for poor scholarship. If the student fails to earn a 2.5 GPA on the 12 credit hours, they will be dismissed from the university.

For **graduate students**, the terms of admission on probation are as follows:

- Students must earn a cumulative grade point average of 2.8 (good academic standing) by the end of their first semester.

At the completion of their first semester, the student's record will be reviewed to determine if the GPA requirement has been met and their status updated to one of the following:

- Good academic standing. If the student achieves the required 2.8 cumulative GPA or higher.
- Dismissal for poor scholarship. If the student fails to earn a 2.8 cumulative GPA, they will be dismissed from the university.

Admission on Probation (Paralegal Studies Certificate Students)

Students who do not meet the 2.5 minimum undergraduate GPA requirement for the post-baccalaureate certificate programs maybe conditionally admitted if the admission committee agrees that the student has the potential for success in paralegal studies at this level. These students will have the opportunity to demonstrate their abilities by achieving a 2.5 minimum GPA in the first two sessions of study. At that point, their files will be reviewed for a change in status to either good academic standing or dismissal for poor scholarship.

Auditing a Course

All degree and non-degree seeking students auditing a course must first receive approval from the SCPS Assistant Dean. Course auditing will be allowed only in rare and special circumstances. Students auditing a course will be assessed tuition on a per-credit basis at 50% of the normal tuition rate.

Students must complete the University's graduate audit request form, email it to the Assistant Dean, and on approval it will be submitted to the Office of Registration & Records. This form is found on the Registration & Records website here: https://www.luc.edu/regrec/aboutus/forms/

Completion of this form does not constitute registration for the course; the student is responsible for registering for the course via the university's registration system and must do so prior to the late registration deadline to avoid a late registration fee. The completed form must be received by the SCPS Dean's office before the audit deadline as stated on the academic calendar on the SCPS website.SCPS will not approve a request received after the deadline.

Class attendance is required, and auditors have a right to participate in class discussions. A grade of AU indicates satisfactory attendance; a grade of W will be assigned in cases of unsatisfactory attendance. Auditors do not complete course papers, examinations, or other assigned projects.

A course that is audited does not count as hours attempted, and therefore is not considered in determining a student's enrollment status

(i.e., whether the student is classified as full or part-time) and is not eligible for coverage by a tuition scholarship.

Class Attendance/Student Accountability

Expectations of Students

Students are expected to treat their classroom and SCPS community obligations as they would treat any serious professional engagement. The following expectations apply to all students within the SCPS community at all times:

- Students are expected to behave ethically and respectfully within the SCPS community, and according to the Academic Integrity policy and Community Standards as found in the Academic Catalog.
- Students must use and check Loyola email and Sakai for all correspondence with SCPS faculty and staff.
- Students are responsible for reviewing and understanding University and SCPS policies and calendars.
- Students should meet regularly with their academic advisor

Students should also adhere to the following expectations before and during their courses:

Before classes:

- Complete Mastering Learning Tools (new degree-seeking students).
- Attend the SCPS orientation, when applicable.
- Purchase books or obtain course materials prior to the start of the course.
- Review the syllabus carefully prior to the start of the course and contact instructor with questions.
- Enroll prior to the session/term start date. Late enrollment is highly discouraged. Instructors are not required to make accommodations or accept late assignments due to late enrollment.
- Students who have accessibility needs must work with the Student Accessibility Center (SAC) prior to the start of class. Students should start the process with SAC at least two months prior to the start of the 8-week session.

During Classes:

- Adhere to deadlines and timetables established by the instructor and submit work on time. Any variations/conflicts must be communicated in advance and approved by the instructor.
- Proactively communicate with instructors and academic advisor about any concerns, difficulties, or scheduling conflicts or missed sessions of the course.
- Prepare thoroughly for each session in accordance with the instructor's request.
- Arrive promptly for the start and remain until the end of each synchronous class meeting.
- Participate fully and constructively in all class activities and discussions.
- Display appropriate courtesy to all involved in the class sessions. Courteous behavior specifically entails communicating in a manner that respects, and is sensitive to, the cultural, religious, sexual, and other individual differences in the University community.
- Provide constructive feedback to faculty members regarding their performance, through the university's formal course evaluation, administered at the end of each 8-week session.

Class Attendance/Student Accountability

Due to the intensive nature of each course, students' success in SCPS courses will heavily depend on their attendance and participation in the course. The choice to pursue a degree or certificate will likely involve adjusting one's schedule to avoid conflicts whenever possible. The value placed on class participation as a component of the final grade in any course is at the discretion of the individual instructor and will be stated in the syllabus.

Courses may include both synchronous and asynchronous components. Asynchronous coursework is independent coursework students complete within a certain time frame, but students are not required to be online at a specific day or time. Synchronous coursework refers to online meetings that occur at a designated date and time as set by the course instructor. Required synchronous meetings will be communicated in advance of a student registering for a course and are included within the SCPS course schedule and are held in the evening (6-9pm, CST) or on Saturdays (9am-Noon, CST).

Students are expected to be present for every required synchronous meeting of the course. If they are unable to attend a class meeting or if they will be late for a class, they must notify the instructor in advance of the absence. Requests for missed class meetings should only occur for circumstances that are truly unavoidable and students are responsible for reaching out to their instructor in advance of the start of the session.

Each course's instructor reserves the right to make judgment on accepting and/or making up assignments missed because of class absence for a required meeting. That policy will be clearly expressed in the course syllabus. Unexcused absences may result in failing the course. Please understand, if an instructor allows an excused absence, even with an approved modification to the required meetings for a course, any change to the required components of a course will impact the student's experience and can impact a student's learning and performance.

Understanding When a Class Begins

All classes start with the start of the 8-week session and not when the first required meeting date is scheduled for the course. Any required meeting a class has, whether it is a synchronous meeting for an online class or an on-campus meeting, will be clearly listed within the SCPS course schedule for the semester.

Non-Participation in Class and Withdrawal

Students must withdraw from a course within LOCUS to be considered withdrawn. Non-participation in a class, without formal withdrawal in LOCUS, does not constitute a withdrawal from a course. Students who do not withdraw from a course in LOCUS will have their grade computed on the basis of the work completed and may receive an 'F' grade.

Paralegal Studies Attendance and Participation Policy

Regular class attendance is required for Paralegal Studies (PLST) classes. Absences in PLST courses are excused only for serious, unavoidable situations, and you are expected to notify the instructor in advance of your absence. Absences from classes rescheduled because

of public holidays are not excused, as these dates are provided at the time of registration. If you stop attending a class but do not officially withdraw from it, your grade will be computed on the basis of what work you did complete; you may receive an F if that is the resulting grade.

This accelerated program of paralegal studies requires a heavy commitment of time and energy. We are all balancing personal and professional demands. Our responsibility to you is specifically to prepare you for a paralegal career. When you miss a class, you lose the benefit of our knowledge and experience in the legal workplace, as well as our personal interest in your progress. Your absence may also be unfair to a group project.

In particular, your absence from class generally cannot be excused because of your job responsibilities. You are expected to register for a reasonable course load in light of other demands on your time.

Your success in this program will depend heavily on your attendance and participation in the classroom. The instructor has the discretion to decide whether to accept a late assignment or allow a makeup assignment, and if so to impose a deduction in the grade for that assignment. Also, the value placed on class participation as a component of the final grade in any course is at the discretion of the individual instructor.

Any student who has more than two absences, excused or unexcused, in a single 8-week session course will not be allowed to continue in that course without the Director's permission. The student will receive a final course grade calculated on the basis of zero scores on all subsequent tests and assignments.

The student must petition the Director for this permission in writing within three business days of the third absence. Relevant factors will include the student's performance in the class, the teacher's assessment of the student's ability to master the missed classes and assignments, and the reason for the absences. As noted above, absences from classes rescheduled because of holidays are not excused, as these dates are provided at the time of registration.

If some of the student's absences are excused, the student will have the opportunity to withdraw from the course, as long as the deadline for dropping a course has not yet passed. The student's grade will then be recorded as W. However, the student is still responsible for the course tuition in accordance with the University's official withdrawal schedule.

Please note that teachers may continue to use class attendance as part of the grading criteria. Also, it is at the teacher's discretion to consider absent a student who arrives late to class or leaves early.

If you cannot attend a class, you are expected to make arrangements to obtain notes and assignments from other students, and to submit any assignments due by the appropriate deadline. It is not appropriate to expect your teacher to give you his or her class notes; this would be unfair to the students who attended the class. Nor is it appropriate to ask the teacher to review or summarize the class for you. Of course, you may ask the teacher questions after you have reviewed the material.

Students who miss exams or quizzes in a PLST course must immediately send a message requesting a makeup to both the instructor and the Director. The makeup will be allowed only on agreement of the Director and instructor that a serious, unavoidable situation (such as illness, family emergencies, or religious holidays) caused the absence. The Director and instructor have the discretion to impose a deduction in the grade for that exam or quiz.

The makeup exam or quiz must then be taken as soon as possible, before the next class meeting, and during regular office hours, 8:30 am to 5 pm. You will be expected to rearrange your work or personal schedule to accommodate the makeup. To schedule a makeup exam or quiz, please contact the Institute Office, 312-915-6820.

You may be asked to provide documentation of the reason for your absence before you will be allowed to make up any quiz or exam. A request to make up more than one missed quiz or exam within two 8-week sessions generally will not be approved by the Director.

Course Registration

Students register for courses via the University's LOCUS system. Registering for a course is the only way to guarantee a place in a course. Registration after the session start date will incur a late registration fee. SCPS does not operate waitlists for any of its courses.

When registration opens for a semester, SCPS students are advised to enroll in all sessions within that semester. For example, for fall and spring 16-week semesters, students should enroll in both 8-week session I and session II. Students who do not enroll in all available sessions may encounter billing and/or financial aid issues for the semester.

A student must be registered in a course before attending any classes or participating in the course. No student may register for a course after the late registration period.

Late Enrollments

Students may enroll in a course after it has begun only during the add/drop period in Week 1 of each 8-week session during the fall and spring semesters. The add/drop period for summer session courses are shorter, about 1-2 days. Late registration fees apply to enrollment completed during the add/drop period. Students should consult the academic calendar on the SCPS website to learn the dates for add/drop.

Students are strongly discouraged from enrolling after the start of an 8-week session as late enrollment may lead to missed class sessions and assignments. Students are responsible for informing instructors immediately of their late enrollment. Instructors are not required to make accommodations or accept late assignments due to late enrollment. Additionally, students should be aware that it takes up to 24 hours for a student to be uploaded into a course's Sakai site after enrollment in LOCUS.

Double Dipping

Students are permitted to complete multiple programs (i.e. certificates, degrees), even if program requirements overlap. For students completing multiple programs, conferral of your degree or certificate will not be done until program requirements for all programs have been completed. Please understand, while certificate requirements may be completed prior to finishing degree requirements, we cannot confer the certificate earlier in a student's time at Loyola. Conferral for all programs is completed at the same time.

Full-Time Status/Registration Limits

To be considered a full-time student, SCPS students must be enrolled for 12 credit hours per 16-week semester.

Students are not required to meet or maintain full-time status to be in good standing. However, some financial aid (student loans and scholarships), employer tuition reimbursement policies, and other

situations may require full-time status in an educational program. It is recommended that students confirm the number of courses they are enrolled in for a given semester with Financial Aid to adjust their budgets accordingly.

SCPS students may register for no more than 9 credit hours in any one 8-week session. Students wanting to take more than the 9 credit hours must receive approval from the Assistant Dean.

Grading and Grading Policies

The University uses letter grades and plus/minus indicators to indicate the quality of a student's achievement in a course. The chart below shows the standardized grading scale used by all SCPS faculty for converting numerical scores into letter grades. No "A+" or "D-" grade is available.

Grade	Grade Points
A	4.0
A-	3.67
B+	3.33
B	3.0
B-	2.67
C+	2.33
C	2.0
C-	1.67
D+	1.33
D	1.0
F	0

Minimum Grade Requirement

Students must earn a C- or higher in all required graduate courses. Any grade less than C- will not satisfy program requirements.

No Record (NR) Grade

The notation "NR" is assigned in LOCUS for any course in which the student is enrolled but has not participated. Criteria for determining participation includes, but is not limited to:

- Physically attending a class where there is an opportunity for direct interaction between the instructor and students.
- Submitting an academic assignment.
- Taking an exam, an interactive tutorial, or computer-assisted instruction.
- Attending a study group that is assigned by the institution.
- Participating in an online discussion about academic matters.
- Initiating contact with a faculty member to ask a question or discuss a matter related to the course.
- For online or blended course, participation and attendance is defined as any class activity, including logging into the course on Sakai and accessing any of the course materials.

Pass/No-Pass Option

The Pass/No Pass option is not available for graduate courses or to SCPS graduate students.

Incomplete (I) Grade

SCPS expects students to complete all coursework by the end of the session or term during which a course is taken. However, if a student and the instructor make arrangements in advance, a student may receive a grade of Incomplete (I) at the end of the session/term. The student is to complete the outstanding work and submit it to the instructor according to a schedule approved by the instructor, subject to the following SCPS policies.

A grade of Incomplete for a course is assigned at the instructor's discretion, when justified by unexpected, disruptive situations or circumstances beyond the student's control. These may include personal illness or injury, a death in the immediate family, a natural disaster, or other such emergency. Documentation may be required, at the instructor's discretion.

Incomplete requests should only be submitted where a student has completed a significant portion of the course, and required coursework, and circumstances prevent the student from finishing remaining requirements by the end of the class. For example, if a student has been actively participating in and keeping up with coursework and they encounter life circumstances within the final few weeks of a course that prevents them from completing successfully, they should contact the instructor to request an incomplete. This request is not meant to be used in those situations where students have been non-participatory throughout the course and need additional time to make up missed assignments from the bulk of the course. In those cases, the student should contact their primary academic advisor to discuss their options.

For any incomplete request, the student must initiate the request by submitting the Incomplete form, found on the Registration and Records website, to the instructor. The instructor will then complete and submit the form according to its instructions and, if approved, enter the grade of Incomplete for the student in LOCUS.

The student must comply with all conditions specified on the form. The latest deadline permitted for submitting the missing work is six weeks after the start of the subsequent semester, but the instructor may specify an earlier due date. If the student does not submit the missing work by the deadline, the instructor enters a grade based on the work completed.

Grading Criteria & Late Assignments

Instructors include an explanation of the grading criteria for each course on the syllabus. Late assignments (if accepted) and exams or quizzes taken late (if permitted) may be marked down, at the instructor's discretion.

Graduation/Commencement

The University awards degrees and certificates four times within each academic year, after every semester: fall semester (December), J-term (January), spring semester (May), and summer semester (August).

Prospective graduates must submit a graduation application in LOCUS. Deadlines for the LOCUS graduate application are as follows:

- Fall graduation: August 1
- Spring graduation: November 1
- Summer graduation: December 1
- J-term graduation: February 1

All financial obligations to the University must be satisfied before the diploma or certificate can be mailed.

Laudatory Status/Honors

No SCPS graduate programs consist of the credit hours required for students to be considered for laudatory status upon graduation. Laudatory status is only available to eligible undergraduate students.

Commencement

The School of Continuing and Professional Studies has a commencement ceremony each year at the end of the spring semester in May on the Lake Shore Campus. Information can be found online at the University's Commencement website: http://www.luc.edu/commencement

The May Commencement ceremony includes graduates from the fall, spring, and summer semesters within that academic year.

Honor Societies

Alpha Sigma Nu (ASN)

Alpha Sigma Nu inductees rank in the top 15%, academically, of students in the School of Continuing & Professional Studies. Loyola University Chicago inducts fewer than 5% of its students each year, so it considers Alpha Sigma Nu to be one of the highest honors the University can bestow.

Eligible students are sent an invitation to apply and must meet the following criteria:

- Actively enrolled at time of induction
- Undergraduate students must be juniors or seniors at the time of induction.
- Undergraduate transfers must have completed 1-1/2 semesters at a Jesuit institution.
- Graduate students must have completed 1/2 of their credit requirements at the time of induction.
- Must be in the top 15% of their class
- Demonstrated participation in service activities

SCPS Dean's List

For the fall and spring semesters, students who complete 12 credit hours during the semester and achieved a minimum semester GPA of 3.7 or higher are named to the SCPS Dean's List at the end of the semester.

Leave of Absence

Stop-Out Definition

A stop-out student is a student who has not enrolled for one semester/term or more. Students who do not enroll in a single 8-week session within the semester but enroll in the other 8-week session will not be considered a stop-out student.

Time to Completion Policy

Students have up to three (3) years to complete all program requirements and should consult with their advisor when making any adjustments to their schedule.

Leave of Absence Policy

Given that courses are only offered once an academic year, we recommend that students remain continuously enrolled and complete courses within the time frame set within your initial advising appointment. However, we understand circumstances may require you to step away from classes.

Students who need to stop-out of enrollment for anywhere from one semester up to one year, may request a leave of absence. Students should request a leave of absence before the start of the fall or spring semester, and no later than the start of the 8-week second session for the semester. Students choosing not to enroll in the summer semester do not need to request a leave of absence.

Students must submit the leave of absence form to their primary academic advisor to request a leave.

Returning From Leave/Extending Leave

Students on leave should contact their primary academic advisor when they are prepared to return to classes. Ideally, students should allow at least one month prior to the start of the semester to prepare for a return from leave.

If students need to extend their leave of absence, they should contact their primary academic advisor with this request. Extensions can only be provided to students who have requested a leave of less than one year, or three consecutive semesters.

Discontinuation & Readmission

Students who do not return from a leave of absence or who have exceeded their three (3) year time limit to complete all program requirements will be withdrawn from the university.

Withdrawn students may apply for admission to SCPS if they wish to return to classes. Students will be held to the degree requirements of the catalog year in which they are readmitted.

Applicants for readmission who have been dropped from Loyola for poor scholarship may apply for readmission only after complying with all terms outlined in their dismissal letter.

Applicants for readmission who have been dropped from Loyola for disciplinary reasons must have their applications for readmission reviewed by the Dean of Students Office. If the Dean approves readmission, the application will be reviewed according to the regulations stated above.

Non-Degree Student Status

Non-degree seeking students must submit a 'Non-Degree' application for admission for each semester where they will be taking classes. Students must meet any prerequisite requirements for a course they wish to complete. Non-degree students interested in taking graduate-level classes must provide an official transcript reflecting the completion of a bachelor's degree.

The non-degree-seeking option is for students who wish to sample classes before applying to a degree program, transfer credit to another institution, or obtain professional or personal enrichment.

Non-degree-seeking students may complete a maximum of 9 credit hours (3 courses) of graduate classes total. This is inclusive of all semesters where a non-degree student may request access to enroll. Admission

as a non-degree-seeking student does not guarantee admission to a formal program. Should you decide to pursue a degree program, a new application and all supporting materials are required.

Non-degree seeking students are not eligible for Federal Financial Aid or the Returning Ramblers Scholarship.

Non-Traditional Credit

SCPS does not accept non-traditional sources of credit towards graduate program requirements.

Registration Changes and Withdrawals

A grade of "W" indicates official withdrawal from a course during the withdrawal period (see academic calendar on SCPS website for dates). The grade of "W" is not counted in computation of academic standing as either attempted or earned credit hours, nor calculated in the grade point average.

The financial impact of changes after the late/change registration period is determined in accordance with the University's withdrawal schedule, available on the Bursar's website. The website provides the official schedule for each term, but generally, the schedule for fall and spring semester 8-week sessions is as follows:

First week of session - *100% of tuition credit*

Second week of session - *80% of tuition credit*

Third week of session - *40% of tuition credit*

Fourth week of session and after - *0% of tuition credit*

The effective date of withdrawal is determined by the date the course is dropped in LOCUS, not by class attendance. In an online or blended course, participation and attendance are defined as any class activity, including logging into the course on Sakai and accessing any of the course materials. A student who does not officially withdraw from a course will receive a grade based only on the work completed and will remain responsible for all charges for that course.

Students may not withdraw after the withdrawal deadline and, after the deadline date, will be assigned the grade earned based on work completed. For students dealing with extenuating circumstances preventing participation in a course, they may submit an appeal for change in academic record.

Students may work with their primary academic advisor to learn more about the appeal process and find further information in the university's academic catalog under Academic Appeals (https://catalog.luc.edu/academic-standards-regulations/undergraduate/].SCPS). SCPS graduate students follow the standards and practice for appeals as found in the undergraduate catalog.

The Financial Aid Office is required to recalculate financial aid eligibility for students who withdraw from classes before 60% of the course has been completed. This includes a recalculation for withdrawals where the effective date of withdrawal is adjusted after an approved appeal.

Repeated Courses

If a student, with the authorization of the SCPS Dean's office and graduate program director, repeats a course, only the most recent grade earned for the course will be used when evaluating whether all degree requirements have been met. In factoring a student's GPA, a repeated course grade does not replace the grade for a previous attempt. The average of all grades from all attempts is used in calculating a student's cumulative GPA.

Residency Requirement

It is expected that all work towards a graduate degree will be completed with academic credit earned at Loyola University Chicago. However, up to six (6) credit hours of graduate work completed at another institution may be applied toward a graduate degree with permission of the SCPS Dean's office.

If transfer credit is approved this does not mean that the credit hours required to earn a degree or certificate may be reduced. A student may be required to take another program course or elective to fulfill the credit hour requirements for a program.

Students may request transfer of credit during their first semester. The SCPS Dean's office maintains responsibility for approving all transfer credit. To ensure that each student is well prepared for undertaking scholarship in the student's current field of study, SCPS's decision regarding transfer credit will be based on the quality of the student's work, the time interval since its completion and its relevance to the student's program of study at Loyola. Coursework below a B grade will not be accepted. Students may not be able to transfer coursework that has been awarded as part of a conferred or completed graduate degree program.

For certificates consisting of 18 credit hours or more, up to six (6) credits may be accepted in transfer, and all other required credits must be earned at Loyola. For certificates consisting of fewer than 18 credit hours, transfer credit will not be accepted, and all courses must be completed entirely with Loyola academic credit.

Students completing a certificate first can apply these courses toward the completion of a degree in the same area, where program requirements overlap. The time interval since completion of a certificate to application for a degree in the same area must be less than five (5) years.

Transfer Credit

It is expected that all work towards a graduate degree will be completed with academic credit earned at Loyola University Chicago. However, up to six (6) credit hours of graduate work completed at another institution may be applied toward a graduate degree with permission of the SCPS Dean's office.

Students may request transfer of credit during their first semester. The SCPS Dean's office maintains responsibility for approving all transfer credit. To ensure that each student is well prepared for undertaking scholarship in the student's current field of study, SCPS's decision regarding transfer credit will be based on the quality of the student's work, the time interval since its completion and its relevance to the student's program of study at Loyola. Coursework below a B grade will not be accepted. Students may not be able to transfer coursework that has been awarded as part of a conferred or completed graduate degree program.

For certificates consisting of 18 credit hours or more, up to six (6) credits may be accepted in transfer, and all other required credits must be earned at Loyola. For certificates consisting of fewer than 18 credit hours,

transfer credit will not be accepted, and all courses must be completed entirely with Loyola academic credit.

If transfer credit is approved this does not mean that the credit hours required to earn a degree or certificate may be reduced. A student may be required to take another program course or elective to fulfill the credit hour requirements for a program.

Students completing a certificate first can apply these courses toward the completion of a degree in the same area, where program requirements overlap. The time interval since completion of a certificate to application for a degree in the same area must be less than five (5) years.

School of Education

Graduate School of Education M.ED., ED.S. and ED.D. Academic Policies

For M.A. and Ph.D. policies, click here (p. 2312).

Academic Advising

A member of the faculty will be assigned as academic advisor to each student accepted for a graduate degree. Students may retain the same faculty advisor throughout their programs or they may select a different faculty member to serve as their dissertation director. Students are expected to confer with their advisors as often as may be necessary. It is the student's responsibility to seek conferences with the advisors, to secure supervision of the dissertation, and to keep the dissertation director informed of progress in the research and writing. It is important that students confer with their advisors prior to initial registration. Most programs in the School of Education also provide email groups and electronic advisory newsletters. Each student is responsible for participation in those services provided within his or her program.

Academic Grievance Procedures [1]

In instances where a student has concerns about an academic process, students are strongly encouraged to meet and hold informal discussions with the faculty member; such discussions can be effective in resolving problems encountered in the academic process. If the discussion between the student and faculty member does not resolve the problem(s), the faculty member(s) and student should (a) document measures proposed and/or taken to attempt to resolve the problem, and (b) contact the corresponding program chair to initiate the Informal Process. In cases where a faculty member has concerns regarding the performance of dispositions of students, program-specific procedures regarding academic review or dispositions should be followed.

Informal Process

The Informal Process is initiated in the event the above referenced documented meeting between the student and faculty member does not resolve the problem. To begin the process, the corresponding program chair should initiate a meeting with all involved parties to review the program's policies regarding the issue in dispute. At this meeting, attempts to resolve the problem at the program level are documented using the Informal Process Form (https://sakai.luc.edu/access/lessonbuilder/item/30161575/group/093bb87f-8722-45ea-897f-6e3379935dab/Concerns%20and%20Grievances/Grievance%20_Informal-process-form.docx). In the event of a grievance, this form will be submitted to the School of Education Grievance Committee to document attempts to resolve the issue at the program level.

Formal Process

In cases where direct discussions and Informal Process have failed to resolve the problem(s) from the student's perspective, he or she may file a formal grievance using of the School of Education's Grievance Procedure.1 The following procedure governs specifically academic matters such as ethical questions as well as those of scholarly competence. Thus, controversies arising from charges of, e.g., cheating in examinations, falsification of research data, plagiarism, evaluation of students, failure of the institution to recommend certification, and dismissal from programs are included within the meaning of "academic matters" that are "grievable" under these procedures.

With regard to the evaluation of students, the academic grievance procedures apply only to those cases in which the evaluation of the student is alleged to be capricious, in significant violation of clearly established written school policies, a result of improper procedures, or improperly discriminatory. An evaluation of a student is capricious if the evaluation is:

1. based partially or entirely on criteria other than the student's performance;
2. based on standards different from those standards of evaluation applied to other students; or
3. based on a substantial departure from announced standards of evaluation.

In cases other than those noted above, an evaluation of a student is not a basis for an academic grievance. In the event a student is disputing the application of a policy or decision as improper, the student must cite the specific criteria upon which he or she believes the decision properly should have been based.[2]

Steps in Filing a Grievance Petition with the Associate Dean of Academic Services

1. If the student is unable to achieve a satisfactory solution to the problem at the informal level and wishes to formally grieve the matter, the student must submit a written request within 30 days of the documented program meeting by filing a Statement of Grievance Form (https://sakai.luc.edu/access/lessonbuilder/item/30161576/group/093bb87f-8722-45ea-897f-6e3379935dab/Concerns%20and%20Grievances/Grievance-Formal-Form.docx), with the Associate Dean of Student Academic Services (ADSAS.) The request for a hearing must specify the nature of the dispute and include the student's copies of the documented attempts to resolve the matter (including the Informal Process Form) Specifically, a student who believes that he or she has valid grounds for a grievance under these procedures should submit a written and signed statement of grievance (Statement of Grievance Form), setting forth the specific allegations, including time line of events with dates, persons involved and outcome, relevant university policies, and desired outcome of the grievance. If any other University personnel are involved, the student will include the role of these parties in the student's grievance, unless such disclosure would violate the student's right to confidentiality. Should the student need assistance in putting the grievance into an appropriate format, the student may seek the assistance of the ADSAS, who will provide assistance regarding format and procedures, but who may not comment substantively on the merits of the grievance.
2. The ADSAS will refer the dispute to the School of Education Grievance Committee (SEGC), which is a standing committee of the

Academic Council and consists of three faculty members from the School of Education, other than the ADSAS. If any of the three faculty members comprising the committee are involved in the dispute, replacement committee members will be appointed from the School of Education at the recommendation of the Dean.

3. The Chairperson of the Grievance Committee will establish a time and date for the hearing and notify the student and faculty involved, along with the other members of the Committee.
4. An effort will be made to schedule the hearing within 30 days of the receipt by the SEGC Chairperson of the materials filed by the student in support of the formal grievance.
5. The SEGC may request information from other sources as needed.
6. Upon receipt of the formal grievance, the Chairperson of the SEGC shall give those faculty member(s) relevant to the grievance and the program director a copy of the student's grievance documents.

Conduct of the Hearing

The hearing will be private and all persons present at the hearing will consider and treat all information presented to be confidential. If, however, the student disseminates information disclosed during the hearing, the student's interest in the confidentiality of the hearing will be deemed waived. Both the student and the faculty member involved may request assistance in presenting their case at the hearing by any person other than an attorney. The student and faculty member(s) must inform the Chairperson of the SEGC of the name(s) of their representative and any witnesses five working days before the hearing date. Prior to the hearing, copies of all written information to be considered by the SEGC shall be provided to all parties and will include:

- An explanation of committee procedure;
- An exchange of all documentation developed prior to the hearing that was not previously released and a list of student and faculty representatives (if any) and the names of witnesses for both the student and faculty member(s);
- Any University rules and policies relevant to the content of the grievance

At the hearing, the SEGC shall provide all parties the opportunity to present written and oral information relevant to the grievance. Individuals appearing before the committee have the responsibility of presenting truthful information. The committee in reaching its decision will evaluate the credibility of the witnesses. Presentation of evidence will be made only during the hearing. Any party may present witnesses or other evidence. The conduct of the hearing is informal, and the committee is not bound by rules of evidence or court procedures. Matters of procedure will be decided by the Chairperson of the SEGC. All decisions of the committee will be determined by a majority vote of the SEGC members present. The student and faculty member(s) will be informed in writing of the Committee's decision within two weeks of the hearing.

A copy of the decision will be forwarded to the Dean of the School of Education who then will subsequently inform the Chairperson of the SEGC and the relevant Program chair(s) of his or her disposition of the decision.

GROUP ACTIONS

Two or more students with substantially the same grievance may join in a group action. A single statement of grievance shall be submitted and processed in the manner described herein for individual grievances, but all those joining in such a group action must sign the statement.

APPEAL PROCESS

The student may appeal the decision of the SEGC in writing to the Dean of the School of Education within 30 days of receiving the SEGC's decision. The appeal should clearly indicate the alleged errors that occurred in the SEGC hearing. The Dean may approve, modify, or reverse the decision of the SEGC and will notify the student, the faculty members(s), the Chairperson of the SEGC, and the relevant Program chair(s) of her/his decision within two weeks of receiving the appeal, if practicable. The decision of the Dean is final in all cases.

WITHDRAWAL OF GRIEVANCE

A grievant may withdraw his or her grievance from further consideration at any time by submitting a written request to the ADSAS who will inform the Chairperson of the SEGC. No reason needs to be given for such a request to withdraw.

[1] These procedures are intended for use in the management of controversies in academic matters involving students in the School of Education, i.e. those in undergraduate Education minors and B.S.Ed. programs, M.Ed., Ed.S., and Ed.D. programs. Students in Ph.D. or M.A. programs should consult the grievance procedure in use at The Graduate School (p. 2312).

[2] Controversies arising from clearly non-academic matters fall within the jurisdiction of the Division of Student Affairs. Such cases may include: allegations of discriminatory treatment arising from the student complainant's age, race, gender, sexual orientation, disability, national origin, or religion. In cases in which jurisdiction is unclear or mixed, the Dean of the School of Education, in consultation with the Vice President for Student Affairs, will determine the correct jurisdiction.

Academic Integrity

In general, a violation of academic integrity occurs when the nature or source of academic work is misrepresented. This occurs in incidents such as, but not limited to, claiming work as one's own when it is not (e.g., plagiarism and cheating on tests) and/or falsifying data. It's the responsibility of the student to review the full policy (p. 2283).

Academic Standing

Good Standing

A degree-seeking student is in good academic standing if he or she:

1. meets the standards of quality of his or her academic program and the School of Education;
2. makes satisfactory progress toward completion of degree requirements within the established time limit;
3. fulfills the School of Education's requirement regarding continuous registration; and
4. fulfills the School of Education's requirement regarding grade-point average.

Students who are not in good academic standing are not eligible to receive a degree and may not hold a merit award.

Continuous Enrollment

Students are to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in a least one course. Once a student has completed all coursework and is still considered a degree-seeking student in good standing in a graduate program, he/she must continue to maintain his/her registration during the regular academic year until all degree requirements are completed. In most instances, this will be accomplished by enrolling in an appropriate

internship, practicum course or dissertation supervision. Registration must be completed on the dates listed in the academic calendar and class schedules for each semester.

Students who do not meet the requirement of continuous registration are considered inactive and not in good academic standing.

To request reinstatement to active status:

1. One to two semesters: email the Associate Dean of Student Academic Services to request re-activation. If enrollment for dissertation supervision was appropriate, back registration must also occur for the terms missed.
2. One to five years: complete a reapplication (https://sakai.luc.edu/access/lessonbuilder/item/30614907/group/093bb87f-8722-45ea-897f-6e3379935dab/Student%20Forms/Re-Application_Form.pdf) and a statement justifying request for readmission (for students at the dissertation level, back registration must also occur for the terms missed).
3. Beyond the time limit for degree completion: Full application and a statement justifying request for readmission. Students are reviewed for admission following the standard admission process.
4. If permitted to resume studies, the student must meet the program requirements in effect at the time of readmission. This may include new requirements for the degree, prerequisites, and/or state licensure requirements.

Reinstatements are not automatic, and students whose requests are denied will not be permitted to continue in their programs. Repeated failure to maintain continuous registration is, itself, grounds for denying a request for reinstatement.

Grade Point Average

Graduate students are expected to maintain an average of "B" or better. Not more than two grades of "C" may be counted for a degree. Some programs require students to repeat particular key courses if they receive grades of C in such courses. No grades of "D" or "F" may be counted as fulfilling degree requirements (such grades, however, will be calculated into the grade point average). No student will be graduated with less than a 3.0 average for all graduate and undergraduate courses taken as part of the degree program.

All students are subject to annual review of progress. Students who earn more than two grades of "C" or show other aspects of insufficient progress may be subject to withdrawal from the program. Students who fail to maintain at least a 3.0 GPA will be placed on academic probation. If the GPA is not raised to a 3.0 during the next two consecutive terms in which the student registers, the student will be dismissed for poor scholarship. If a student is dropped from degree candidacy, he or she may be readmitted only under exceptional circumstances.

Dismissal from the Graduate School of Education

1. *Failure to maintain a cumulative grade point average of 3.0 or better*. Students whose cumulative grade point average falls below 3.0 are considered to be on academic probation. Students may continue on academic probation for no more than two semesters, in which enrolled (the summer sessions are considered in this instance as a single semester); failure to raise, within that period of time, the cumulative grade point average to 3.0 or better results in dismissal from graduate study. *Academic Dishonesty*. In general, academic dishonesty occurs when the nature or source of academic work is misrepresented. This occurs in incidents such as, but not limited to, claiming work as one's own when it is not (e.g., plagiarism and cheating on tests) and/or falsifying data. For incidents of academic dishonesty occurring in a course, the professor may assign a grade of "F"; the standard grievance procedures are (see Academic Grievance Procedure (p. 2283)) available to students in these instances.
2. *Failure to pass the required comprehensive examinations*. Students pursuing the M.Ed. will, as a matter of course, be allowed two attempts at passing the comprehensive examination. If they fail the second examination, a third examination will be permitted only after completion of four additional courses. Failure to pass the examination after three attempts will result in no M.Ed. degree being conferred. Students pursuing the Ed.D. will be allowed a second attempt at the examination only if the student's advisor and program chair so recommend.
3. *Failure to successfully sustain annual progress evaluations*. The performance of each student is reviewed annually by his or her program faculty. Students may be terminated from their programs if found substantially deficient in their knowledge, skills, or dispositions for the field. If a student is dropped from degree candidacy, he or she may be readmitted only under exceptional circumstances.
4. Failure to pass 610 – Doctoral Studies. a) If a candidate receives a NP in two consecutive semesters, the Graduate Program Chair will recommend to the Associate Dean of Academic Affairs that the student be dismissed from the program; b) If a candidate receives three NPs during their enrollment in 610 and 600, the Graduate Program Chair will recommend to the Associate Dean of Academic Affairs that the student be dismissed from the program.
5. *Failure to pass 600 – Dissertation Supervision*. a) Candidates are expected to make adequate progress each semester. If a candidate receives two consecutive NPs, the Graduate Program Chair will recommend to the Associate Dean of Academic Affairs that the student be dismissed from the program; b) If a candidate receives three NPs during their enrollment in 610 and 600, the Graduate Program Chair will recommend to the Associate Dean of Academic Affairs that the student be dismissed from the program.
6. Students dismissed for any of the above reasons may appeal, in writing, to the Dean of the School of Education, within two weeks (14 calendar days) of the date of letter/email notification of academic dismissal. The Dean of the School of Education will review the matters pertinent to this appeal and will provide a written decision of the candidate within 30 calendar days of the receipt of the written student request for an appeal. The decision by the Dean of the School of Education is considered final.

Accessibility

Students who have disabilities which they believe entitle them to accommodations under the Americans with Disabilities Act should register with the Services for Students with Disabilities (SSWD) office. To request accommodations, students must schedule an appointment with an SSWD coordinator. Students should contact SSWD at least four weeks before their first semester or term at Loyola. Returning students should schedule an appointment within the first two weeks of the semester or term. The University policy on accommodations and participation in courses is available at: http://www.luc.edu/sswd/.

Attendance

All graduate students are expected to attend classes and laboratories regularly. Specific regulations are subject to program decision. Certain programs also require attendance at professional seminars and special program meetings. Consult each program for information.

Communication from Academic Deans

Official notices are presented to students through the deans' office, Loyola emails, and LOYOLA FOCUS for Graduate Students. Students are individually responsible for this information and should check their e-mail regularly. For reasons of confidentiality, as well as efficiency, communications to students will be sent to students' Loyola email accounts and not to any other email address. Students are responsible for checking this account and/or setting up a forwarding system. The Dean's Office may refuse to provide confidential information using a non-Loyola email account.

Comprehensive Assessments

Most programs require the completion of written and/or oral examinations, portfolios or final projects to assess the student's knowledge of the field and at the doctoral level to determine competency to undertake independent research. The comprehensive assessment, if required, is to be completed successfully before the student prepares a dissertation proposal for review by her or his committee.

Failure to pass the required comprehensive assessment

Students pursuing the M.Ed. will, as a matter of course, be allowed two attempts at passing the comprehensive assessment. If they fail the second assessment, a third attempt will be permitted only after completion of four additional courses. Failure to pass the assessment after three attempts will result in no M.Ed. degree being conferred. Students pursuing the Ed.D will be allowed a second attempt at the major assessment only if the student's advisor and program chair so recommend. Students who are dismissed for failing the major assessment twice may appeal in writing to the dean of the School of Education whose judgment is final.

Course Unit

Unless otherwise specified, graduate courses normally provide three semester hours of credit. Each semester hour implies a lecture period of at least fifty minutes or a laboratory period of at least one hundred minutes a week.

Degree Conferral (Graduation)

While the commencement ceremony is every May, degrees can be conferred May, August, and December. Students must apply for graduation/degree conferral. Students should apply for graduation in the semester they anticipate completing all degree requirements. Failure to meet application deadlines may result in a delay of the conferral of the degree to the following semester.

Applications for Degree (https://www.luc.edu/education/) Conferral are due:

- December Degree Conferral – August 1
- May Degree Conferral – December 1
- August Degree Conferral – February 1

Dissertation

It is the student's responsibility to become familiar and adhere to the dissertation policies and procedures (https://sakai.luc.edu/access/lessonbuilder/item/30614881/group/093bb87f-8722-45ea-897f-6e3379935dab/Student%20Forms/FINAL%20Directions%20for%20Student-Managed%20Submission%20of%20EdD%20Dissertation_Redacted.pdf) found on the SOE Student Community Site under "Forms". The student-managed submission of dissertations gives the student control over the process of preparing and submitting the dissertation. The process contains four parts. Please read the directions carefully. Do not submit the material for any part listed in the directions until it is accurate and complete; if the material is inaccurate or incomplete, the School of Education will not accept it.

Doctoral Candidacy

The requirements for doctoral candidacy are:

1. successful completion of all specifically required coursework;
2. successful completion of all comprehensive examinations;
3. approval of the dissertation proposal by the approved dissertation committee and the Institutional Review Board (IRB).

Electronic Communication Policies

The School of Education faculty, students and staff respect each other's rights, privacy and access to electronic resources, services, and communications while in the pursuit of academic and professional growth, networking and research. All members of the university community are expected to demonstrate the highest standards of integrity, communication, and responsibility while accessing and utilizing technology, information resources, and computing facilities.

- In-Person and Cyberbullying Policy (https://www.luc.edu/osccr/communitystandards/physicaloremotionalharm/)
- University Policies for Information Technology Services (https://www.luc.edu/its/aboutus/itspoliciesguidelines/)

Enrollment Status

Fall and Spring Semesters

Students are considered full time if they are either:

1. enrolled in at least eight credit hours of coursework;
2. enrolled in Dissertation Supervision (#600), Doctoral Study (#610), or a full-time clerkship, internship or practicum course; or
3. enrolled in and hold a full graduate assistantship or fellowship.

Students are considered half-time if they are enrolled in at least four but less than eight credit hours of coursework.

Summer Sessions

Students are considered full-time if they are either:

1. enrolled in at least six credit hours of coursework;
2. a full-time clerkship, internship or practicum course; or
3. enrolled in and hold a full graduate assistantship or fellowship.

Students are considered half-time students if they are enrolled in at least three but less than six credit hours of coursework.

Full and Part-Time Status (as defined above)

Full- and part-time status is reported to loan companies and to the U.S. government, including the INS. Full- and part- time status are not necessarily related to eligibility for health insurance, or to Loyola's fees.

Number of Courses Allowed

Typically, full-time graduate students take a maximum of nine semester hours in each regular semester session, and six semester hours in the summer sessions. Specific programs may exceed the maximum hours.

Grades

The grades in the School of Education are as follows unless otherwise indicated in a course syllabus:

Grade	Grade Points
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
F	0.0
I	Incomplete
W	Withdrawal
P/NP	Pass/No Pass
CR	Credit
AU	Audit
NR	No Credit

The notation of NR is assigned in instances where the student is registered at Loyola by never attended the course in question and never complete any work for the course.

Incomplete Grades

Students enrolled in courses offered by the School of Education are to complete all coursework by the end of the term in which the course is offered. However, if a student and the instructor make arrangements in advance, a student may receive a grade of I (Incomplete) at the end of the term. The student is to complete the outstanding work and submit it to the instructor according to a schedule approved by the instructor.

For Incompletes assigned in Fall 2014 and later, the student must complete and submit all outstanding work to the instructor by the last day of the semester following the term in which the I grade was assigned (For purposes of incomplete grades, the summer sessions are counted together as one term). If the student does not turn in the work by the deadline, the Incomplete grade will automatically become an F. The instructor will not approve a change of grade if the student does not complete and submit the work to the instructor within one term of the assignment of an incomplete grade. The student must submit the Graduate Student Request for an Incomplete form to the instructor of the class before the last day of the term for consideration and possible approval.

Withdrawal from Courses

Students may withdraw from courses on LOCUS with the grade of “W” until the University posted deadline (https://www.luc.edu/academics/schedules/). Students who withdraw after the deadline are assigned the grade of “WF”.

Pass/No Pass

Used for Doctoral Study (610), Dissertation Supervision (600), and those courses for which no semester hours ordinarily are awarded. The grade Pass (P) may be assigned for these courses. In cases where, in the judgment of the adviser, substantial progress has not been made, a grade of No Pass (NP) may be assigned.

Audit

Arrangements to audit a course must be made during registration periods. Tuition is charged for audited classes. Class attendance is required; if a student does not attend class, a final grade of "W" will be recorded. Assignments, including examinations and term papers, are not required, but the student has a right to participate in class discussions. Because a course which is audited does not count as hours attempted, it is not considered in determining a student's academic full-time or part-time status; however, tuition is charged at the full rate. After late and change of registration, students must have the course instructor's approval to convert a course from “credit” to “audit.” After midterm, the student must have the approval of the dean as well as the instructor to convert a course from "credit" to "audit." Prior to the term starting, students must submit a “Request to Audit a Class (https://www.luc.edu/media/lucedu/gradschool/pdfs/Audit%20Request%20Updated.pdf)”.

Graduate Credit

Graduate students may receive credit from:

1. Courses numbered 400-600.
2. Certain courses in the 300 group. Program approval is required for the inclusion of such courses in the graduate program. No more than three such courses will ordinarily be accepted for the master’s degree, no more than six for the doctoral degree, but programs may accept fewer. Students may not apply the same course to fulfill requirements for both undergraduate and graduate degrees, or for both professional and graduate degrees, or for two undergraduate or graduate degrees. However, transfer credit may be recommended by the appropriate program, subject to the approval of the Associate Dean of Student Academic Services.

Harassment (Bias Reporting)

It is unacceptable and a violation of university policy to harass, discriminate against or abuse any person because of his or her race, color, national origin, gender, sexual orientation, disability, religion, age or any other characteristic protected by applicable law. Such behavior threatens to destroy the environment of tolerance and mutual respect that must prevail for this university to fulfill its educational and health care mission. For this reason, every incident of harassment, discrimination or abuse undermines the aspirations and attacks the ideals of our community. The university qualifies these incidents as incidents of bias.

In order to uphold our mission of being Chicago's Jesuit Catholic University - a diverse community seeking God in all things and working to expand knowledge in the service of humanity through learning, justice and faith, any incident(s) of bias must be reported and appropriately addressed. Therefore, the Bias Response (BR) Team was created to assist members of the Loyola University Chicago community in bringing incidents of bias to the attention of the university. If you believe you are subject to such bias, you should notify the Bias Response Team at this link (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=9).

Responsible Conduct in Research & Scholarship

For more information on Responsible Conduct in Research & Scholarship visit their website (https://www.luc.edu/ors/RCRHome.shtml/).

Time-Limit for Degree Completion

M.Ed. students must complete their program within five years. The period may be extended by special permission of the Associate Dean of Student Academic Services. Students should ask their advisor to submit the form for extension of time (https://sakai.luc.edu/access/lessonbuilder/item/30614908/group/093bb87f-8722-45ea-897f-6e3379935dab/

Student%20Forms/Request%20for%20Extension%20of%20Time%20to%20Complete%20Degree%20Requirements%20-%20NEW.pdf).

Ed.D. students have a maximum of seven years to complete the degree. Each program area specifies ways in which residency requirements are satisfied. If students are unable to work on the degree for a period of more than one semester, they should request an official leave from the program. Furthermore, if students need more time to complete the degree, they must file an extension of time. Upon recommendation of the program chair, the Associate Dean of Student Academic Services will grant a leave of absence or extension of program time. However, more than one extension of program time will be granted only under extraordinary circumstance.

Extension of Time

An extension of time (https://sakai.luc.edu/access/lessonbuilder/item/30614908/group/093bb87f-8722-45ea-897f-6e3379935dab/Student%20Forms/Request%20for%20Extension%20of%20Time%20to%20Complete%20Degree%20Requirements%20-%20NEW.pdf) to complete the degree requires approval of the Program Chair, Dissertation Director (if appropriate) and the Associate Dean for Student Academic Services. Time extensions are typically restricted to one year.

Leave of Absence

Official leaves of absence are intended for students who wish to discontinue temporarily their graduate studies due to special circumstances (e.g., medical, personal, or professional reasons). A leave of absence postpones all deadlines concerning completion of degree requirements for the duration of the leave of absence. A student requesting a leave of absence is to complete a Leave of Absence form (https://sakai.luc.edu/access/lessonbuilder/item/30614906/group/093bb87f-8722-45ea-897f-6e3379935dab/Student%20Forms/Leave%20of%20Absence%20Form%20-%20NEW.pdf) and contact the program's graduate program chair.

Transcripts and Records

Students request official transcripts (https://transcriptrequest.luc.edu/alumni/pages/jsp/) of records through the Office of Registration and Records (https://www.luc.edu/regrec/). Transcripts will be issued only after the student has met all financial obligations to the university. Transcripts will include the record of work completed at Loyola University only and the amount of advanced standing, if any, allowed toward the graduate degree from institutions previously attended.

The Office of Registration and Records also handles verification of directory information including dates of attendance, attendance full-time or part-time, degree earned, the date a degree was conferred and major field of study. It is your right to deem this information strictly confidential. If you do not want the information released, notify the Office of Registration and Records. Students may use LOCUS, the online service of the Office of Registration and Records to:

- Add and drop classes
- Get information about classes
- See or print your class schedule
- Get your grades
- Confirm or change your permanent or local addresses
- Check out your financial aid award package(s)
- View or print your (unofficial) transcript
- Access your account balance

The School of Education respects the confidentiality of student records and adheres to the provisions of the Family Educational Rights and Privacy Act of 1974. See the office of the School of Education dean for details concerning access to student records.

University Code of Conduct

All members of Loyola University Chicago are expected to uphold Community Standards (https://www.luc.edu/osccr/communitystandards/) (LUC's Student Code of Conduct). Students are expected to abide by all university policies which include, but are not limited to, the policies outlined in the Community Standards. This document provides a baseline for acceptable student conduct.

Rights Reserved: Loyola University Chicago reserves the right to change the policies and procedures announced in this document, and to change the schedules, fees charged, and regulations affecting students. It the responsibility of each student to acquire an active knowledge of all policies and procedures set forth in this document.

Withdrawal from the University

An enrolled student who wishes to withdraw from the university during any semester must notify his or her graduate program chair in writing (email is sufficient). A student is considered to be in attendance until such notice has been received by the Program Chair. Financial obligations regarding withdrawals are based on university policies (https://www.luc.edu/bursar/additionaldetailsregardingwithdrawalpolicies/).

A student may be required to withdraw from the university because of academic deficiency, lack of sufficient progress toward completion of degree requirements, failure to adhere to university requirements, degree requirements and/or regulations for conduct or failure to meet financial obligations to the university.

The Graduate School

Graduate School Academic Policies

Academic Advising

Each degree-seeking student is to have a faculty academic advisor throughout the period of graduate study. The faculty academic advisor plays a major role in working with the student to ensure a planned, disciplined, and well-supervised approach to graduate study. Depending on the program, this advisor may be the Graduate Program Director, a faculty member in the student's area of concentration, the thesis/dissertation advisor, or some combination of these individuals.

The relationship between advisor and advisee is reciprocal and requires mutual effort in the planning and execution of all aspects of the student's progress. The faculty academic advisor, as a mentor, is to be diligent in providing guidance by being available for regular consultation and by working with the student in scheduling regular meetings of the thesis/dissertation committee should this type of written work be required for the degree.

The student is responsible for actively seeking the guidance of the faculty advisor and, when appropriate, the thesis/dissertation committee members, for all matters pertaining to the student's progression through the program including degree completion.

Academic Appeals

The University's commitment to the care of the individual person is the foundation for an appeals process that affords students the opportunity

to have a review of circumstances that impact their academic standing or progress at the University.

Student Rights in an Academic Appeal Process When a Hearing Will Take Place

All students have the right to be treated with dignity and respect throughout any interaction with the academic appeal process and have the following procedural rights during hearings:

- Right to Participate: To be present throughout the hearing but not during the deliberation process of the hearing board
- Right to an Advisor: To be accompanied by an advisor, if desired (see section on rights of an advisor)
- Right to Review: To review all documentation concerning the potential policy violations during the hearing
- Right to Refute: To refute information provided by witnesses

The Graduate School recognizes three types of appeals.

1. Appeal of Course Grade

Students who wish to contest a final course grade may initiate a course grade appeal. This form is the only approved process to submit this request.

Link to: Appeal of Course Grade Form (https://www.luc.edu/media/lucedu/gradschool/pdfs/I.a.%20TGS%20Academic%20Appeal%20Course%20Grade%20FORM.pdf)

1. Appeal of Non-Coursework Evaluation

Students who wish to contest an evaluation of their non-course academic performance may initiate an of non-coursework evaluation. This form is the only approved process to submit this request.

Link to: Appeal of Non-Coursework Evaluation Form (https://www.luc.edu/media/lucedu/gradschool/pdfs/II.a.%20TGS%20Academic%20Appeal%20NonCoursework%20Evaluations%20FORM.pdf)

1. Appeal of Finding of Academic Misconduct

Students who wish to contest a finding of academic misconduct may review the Academic Integrity Policy and submit an appeal of a finding of academic misconduct.

Link to: Academic Misconduct Appeal Form (https://www.luc.edu/media/lucedu/gradschool/pdfs/III.a.%20Academic%20Misconduct%20Appeal%20Form.pdf)

Academic Appeal of Course Grade

Purpose of the Course Grade Appeal

With very rare exceptions, the final decision on all grades rests with the professor. Students have the right to protection, through fair processes, against arbitrary and capricious academic evaluations. Arbitrary and capricious means that there is no relation between the grade given and the student's performance in the class and that a reasonable person could not find that the grade was deserved. Mere disagreement or dissatisfaction with a grade thus does not constitute a basis for an appeal.

In order to provide a forum for the fair resolution of academic disputes involving individual student complaints of the appropriateness of course grades and accusations of academic misconduct the following processes have been developed and will be applied to all cases involving students in the Graduate School.

Appeals

1. Students retain the right to appeal the determination made at any stage of the process outlined above using the Academic Appeal Procedure described below.
2. The decision of the academic Dean's office is final in all cases except expulsion.

Academic Appeal Procedure:#Course Grade Appeal

1. The student's first step in the event of a grade dispute is to confer directly with the instructor.
2. If the grade dispute is not resolved, a student must submit a formal request using the Academic Appeal Form: Course Grade Dispute for a grade change no later than 30 days into the following semester explaining in detail why the grade is arbitrary and capricious. This form is the only approved process to submit such a request.
    a. If the final grade is assigned in spring or summer semester, the student must submit the appeal no later than 30 days into the fall semester.
    b. If the final grade is assigned in fall or J-term, the student must submit the appeal no later than 30 days into the spring semester.
    c. For a course offered by the School of Continuing and Professional Studies, the student must submit the appeal no later than 30 days after the final grade is officially posted.
3. The Department Chair and/or Dean's designee determines whether or not there are grounds for an appeal.
    a. When the Department Chair and/or Dean's designee determines there are no grounds for an appeal, the student will be notified via Loyola email that a hearing board will not be convened.
        i. If the student disagrees with the determination by the Department Chair and/or Dean's designee, the student may appeal to the appropriate academic Dean. In cases where the student is enrolled in a school other than the one in which the course is taught, the academic Deans of the two schools will review the appeal together. The student's academic Dean's office will notify the student of the final decision via Loyola email.
    b. When the Department Chair and/or Dean's designee determines there are grounds for an appeal, the student will be notified via Loyola email that a hearing board will be convened.
    c. It is up to the discretion of the Dean or his/her designee if a student may continue taking courses in a sequence where the course grade under review is a pre-requisite.
4. Each department will have a standing hearing board or have the means to constitute a hearing board for each dispute. Board members are chosen by the Department Chair and/or Dean's designee and will consist of three to five faculty members other than the faculty member involved or Department Chair. In smaller departments or interdisciplinary programs, board members may be members of different departments.
5. The chairperson of each hearing board will be selected by the person who appoints the hearing board. The chairperson of the hearing board receives all requests for hearings from the department, sets the calendar, notifies all involved parties of the dates and times of hearings via Loyola email, and informs students by written notice of the decisions of the board.

6. The hearing will be held within 10 business days of the receipt of the request for a hearing, if practicable. Hearings may be held virtually to accommodate committee members or parties to the appeal.
7. The hearing will be private.
8. Hearings for a grade dispute generally proceed according to the following format:
    a. Introduction of all parties present (including witnesses, when applicable) and an overview of the hearing process.
    b. Review of the Student Rights in the Academic Appeal Process.
    c. Students should complete the electronic appeal form in advance of the hearing.
    d. Hearing board chairperson reviews the nature of the grade dispute and the University policy potentially violated.
    e. Witnesses are excused until statements are needed (if applicable).
    f. Student(s) (and Instructor(s) when applicable) provide a personal account of the reported incident.
    g. Student(s) (and Instructor(s) when applicable) have the opportunity to review all documentation relevant to the case that will be used by the hearing board to make a decision.
    h. Hearing board members ask any remaining investigative questions to the parties present (including witnesses, if applicable).
    i. Student(s) are provided a final opportunity to make any closing comments.
    j. Instructor(s) are provided a final opportunity to make any closing comments.
    k. Hearing board chair may excuse all parties for deliberation if needed
    l. Student(s) (and Instructor(s) when applicable) are notified of the decision and any related outcomes either immediately after deliberation or, when further deliberation is needed, typically within 5 business days in writing via Loyola email.
9. Both the student and the faculty member involved may be accompanied by one advisor of their choice throughout the hearing process. The individual must inform the chairperson of the hearing board via Loyola email of the name of the advisor at least 2 business days before the hearing date.
    a. The role of an advisor is to provide a comforting presence for the student and/or instructor. An advisor may only speak to the advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee. Even if an advisor is an attorney, the advisor may not function as legal counsel or "represent" an advisee during the hearing process.
    b. If any advisor conducts themselves in a manner inconsistent with these guidelines, or if the advisor's behavior obstructs or interferes with the hearing process, the advisor will be warned by the board.
    c. If the advisor's interfering behavior continues or if the advisor engages in a manner that harasses, abuses, or intimidates any other participant, the advisor will be excused from the hearing immediately.
10. The student and/or instructor have the option of submitting relevant materials to the hearing board prior to or at the time of the hearing. Individuals in the hearing process have the responsibility of presenting truthful information.
11. The Board may address questions to any party.
12. The chairperson of the hearing board determines the hearing processes (e.g. location, order of proceedings, determining what evidence is relevant, determining if additional information is needed, etc.). The standard of evidence required for a board to determine that arbitrary and capricious academic evaluation occurred is known as a "preponderance of the evidence." This means the board must determine that it is more likely than not that arbitrary and capricious academic evaluation occurred based on the totality of available evidence.
13. All decisions of the board must be determined by a majority vote of the hearing board members. A final decision must be rendered by the board by the end of the hearing process.
14. The student and instructor will be informed in writing via Loyola email by the chairperson of the board's decision within 5 business days of the hearing. The decision is also shared with the Department Chair and/or Dean's designee.
    a. If the hearing board determines that a grade change is not warranted, the chair of the hearing board will notify the student and the instructor involved of the decision.
    b. If the hearing board determines that a grade change is warranted, the Dean and/or Dean's designee submits a grade change request to the Office of Registration and Records. The Department Chair and/or Dean's designee will notify the student and the instructor involved of the decision vial Loyola email.

Should the student or instructor wish to contest the hearing board's decision, an appeal letter to the Dean and/or Dean's designee within 30 days of notice of the hearing board's decision may be sent to the Graduate School.

1. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
2. The grounds to appeal the board's decision must include one or more of the following criteria:
    a. New substantive information is available that was not reasonably available at the time of the hearing and could substantially impact the original findings or outcomes of the case.
    b. A substantive procedural error or error in the interpretation of University policy occurred that denied the student or instructor the right to a fair hearing and decision.
    c. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or the established Graduate School Academic Standards and Regulations.

Academic Appeal of Non-Coursework Evaluation of Research and Scholarship

Students, faculty members, and administrators are strongly encouraged to attempt to resolve informally problems arising from academic matters. The Graduate School hopes that open communication between all parties and mutual confidence in one another's good will will lead to the resolution of problems in this manner. When informal attempts at resolution fail, the management of an academic appeal by a student in the Graduate School of an evaluation of research and scholarship outside of coursework is to proceed according to the formal procedures set forth below.

Jurisdiction

Evaluation of the quality of graduate student research and scholarship, including the student's successful completion of academic degree requirements outside of coursework including but not limited to qualifying or comprehensive exams, the thesis or dissertation defense proposal, and the thesis or dissertation, is entrusted to Graduate Faculty.

In cases where the student believes that the faculty or faculty concerning evaluation was arbitrary and/or capricious, the following Academic Appeal policy will determine whether the student has the right to appeal the results of the evaluation.

This policy does not apply to:

- An appeal of a course grade (including a grade of NP on a graduate study or supervision course) shall be handled through the Graduate School's policy on Course Grade Appeal.
- An appeal of a charge of academic misconduct shall be handled through the Graduate School's policy on Academic Integrity.
- An appeal of a charge of concerning an allegation of misconduct in the design, conduct or reporting of research supported by federal funds shall be handled through the procedures described in theuniversity's policy concerning misconductin scholarship published by the Office of University Research Services.
- Problems arising from clearly non-academic matters fall within the jurisdiction of the University'sOffice of StudentConduct & Conflict Resolution.

In cases in which the jurisdiction of a matter is unclear or mixed, the Dean of the Graduate School the Vice President for StudentDevelopment, and or the Office of Research Services when appropriate will determine the appropriate jurisdiction.

This academic appeal procedure applies only to those cases in which the evaluation of the student in the accomplishment of a required milestone (comprehensive examination, research tool, thesis or dissertation defense) in their academic degree progress outside of coursework, is alleged by the student to be arbitrary and capricious.

A decision is arbitrary and capricious if it is:

- In significant violation of clearly established written department, program, and/or school policies, and/or
- The result of improper procedures and/or
- Based partially or entirely on criteria other than the student's academic performance or quality of academic work and/or
- Based on standards different from those standards of evaluation applied to other students;
- Based on a substantial departure from announced standards of evaluation.

In cases other than those listed above, an evaluation of a student is not the basis for an academic appeal.

Process

When informal efforts at resolution fail, students must first address the issue at the departmental or programmatic level. Each university unit has an appeal (or grievance) procedure, and this procedure guides the process. If a complainant wishes to appeal the decision reached at the departmental/program level, the complainant can request a Graduate School hearing.

Graduate School Hearing

Request for a Hearing: The complainant is to make a written request for a hearing to the Dean of the Graduate School. Using the Academic Appeal-Non-Course Evaluation form, the request must specify the nature of the appeal and outline prior attempts to resolve the matter. The request must be made within thirty days of a decision reached at the departmental/programmatic level. If, upon review by the Graduate School, the appeal is deemed inappropriate for a hearing because it does not fall within the above standards, the process will not move forward. If the process moves forward, the Graduate School will request copies of all materials generated at the departmental/programmatic level, all materials deemed salient by the student, and all materials generated by the Graduate School as an intermediary between the parties.

Hearing Board

The Graduate School will convene a hearing board, appointed by the Dean, consisting of at least three members, including one student. Only members of the Graduate School faculty or Graduate School students are eligible to serve on the hearing board. The hearing board will have a chairperson, appointed by the Dean, who is responsible for managing all procedures related to the hearing.

Hearing Procedure

The purpose of the hearing is to ensure that all parties have full opportunity to present facts and their views to the hearing board and to allow the hearing board to assure itself that it fully understands the parties' views. The conduct of the hearing is informal. It is not bound by rules of evidence or court procedures. All matters of procedure are to be decided by the chairperson of the hearing board in accordance with the following guidelines.

The chairperson of the hearing board is to set the date, time, and location of the hearing. The hearing is to take place within 30 days of the request for a hearing, if practicable. All parties involved are to receive timely written notice of the hearing and the matters to be considered. All supporting documentation relating to the matter must be submitted to the Graduate School's Associate Dean for Student Academic Services at least three weeks before the hearing. The Associate Dean will distribute it in a timely manner to all involved parties prior to the hearing.

The hearing and material submitted to the hearing board are private and all parties involved in the appeal are to consider their contents confidential. However, if a party disseminates their contents, the party's interest in confidentiality is deemed waived. Electronic recording of the hearing is prohibited.

A party may obtain the assistance of members of the university community (including, but not limited to, faculty, a Graduate Program Director, and/or staff of the Graduate School) in preparing written documentation or in presenting information to the hearing board, provided that the assistants are not attorneys. Individuals from outside the university, including attorneys, are not permitted to serve as assistants. The party must notify the chairperson of the hearing board of the names of the assistants at least one day prior to the hearing.

Each party may present information, both orally and in writing, to the hearing board. The Graduate School, if it has provided guidance to one or both parties and/or has served as an intermediary between the two parties prior to the filing of the appeal, also may present information to the hearing board. All parties are to be available throughout the hearing. Two formats for the hearing exist and are determined by the chairperson

of the hearing board: all parties are present together during the hearing or the parties are heard separately at the hearing. Hearings may be held virtually to accommodate committee members or parties to the appeal. Each party may call witnesses at the hearing. The party is to submit to the chairperson of the hearing board the witnesses' names at least one week prior to the hearing; the hearing board will notify all parties of the names of witnesses in a timely manner prior to the hearing. The board may direct questions to any party or witness. All individuals presenting information to the hearing board have the responsibility of presenting truthful information.

After the hearing board has gathered all information necessary to understand fully the parties' views, the board will deliberate in private. In reaching its decision, the board will examine all documents and other exhibits and fully consider statements of all parties and witnesses. The decision of the board will be determined by a majority vote of participating board members.

The committee will provide their decision and justification to the Associate Dean within two weeks of the hearing. The Associate Dean of the Graduate School will notify the parties in writing of the board's decision within two weeks of receiving the committee's decision.

Appeal of the Hearing Board Decision

A party may appeal the decision of the hearing board to the Dean of the Graduate School. The party is to request an appeal in writing within 30 days of notification of the hearing board's decision. The request must include an explanation of the basis for the appeal according to the following:

1. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
2. The grounds to appeal the board's decision must include one or more of the following criteria:
    a. New substantive information is available that was not reasonably available at the time of the hearing and could substantially impact the original findings or outcomes of the case.
    b. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or the established Graduate School Standards and Regulations.

The Dean will notify all parties of the request for an appeal and will provide an opportunity for a response. The Dean will obtain from the parties and the hearing board information necessary to consider fully the parties' views and the hearing board's decision.

The Dean may affirm, modify or reverse the hearing board's decision. The Dean will notify the parties of the disposition of the appeal within 30 days of receiving the appeal, if practicable. The Dean's decision is final in all cases (including dismissal from a Graduate School program), except those involving possible expulsion from the university (i.e., a permanent prohibition of enrollment at the university); the penalty of expulsion may be imposed only by the university's provost or senior vice president for health sciences.

The Graduate School retains copies of all documentation related to the management of appeals under its jurisdiction in accordance with the university's record retention policy.

Academic Integrity Policy and Processes

Academic integrity is the pursuit of scholarly activity in an open, honest, and responsible manner. Academic integrity is a guiding principle for all academic activity at Loyola University Chicago, and all members of the University community are expected to act in accordance with this principle.

Standards

Failing to meet the following standards is a serious violation of personal honesty and the academic ideals that bind the University into a learning community. These standards apply to both individual and group assignments. Individuals working in a group may be held responsible if one of the group members has violated one or more of these standards.

1. Students may not plagiarize. Plagiarism involves taking and using specific words, phrases, or ideas of others without proper acknowledgement of the sources. Students may not:
    a. Submit material copied from a published or unpublished source.
    b. Submit material that is not cited appropriately.
    c. Use another person's unpublished work or examination material.
    d. Allow or pay another party to prepare or write an assignment.
    e. Purchase, acquire, or use a pre-written assignment for credit.
    f. Use generative artificial intelligence to assist or write assignments without prior permission of the faculty.
    g. Students may not submit the same work for credit for more than one assignment (known as self-plagiarism).
    h. If a student plans to submit work with similar or overlapping content two or more times for any purpose, the student should consult with all instructors prior to submission of the work to make certain that such submission will not violate this standard.
2. Students may not fabricate data. All experimental data, observations, interviews, statistical surveys, and other information collected and reported as part of academic work must be authentic. Any alteration, e.g., the removal of statistical outliers, must be clearly documented. Data must not be falsified in any way.
3. Students may not collude.
    a. Students may not work with others on any exam, assignment or portion of an assignment without permission from the faculty.
    b. Students' work with one another on an exam or assignments may not exceed the terms of their instructors' directions for collaboration as part of the assignment.
    c. Students may not use work submitted by another student in a previous semester of a course.
4. Students may not cheat.
    a. Students may not obtain, distribute, or communicate examination materials prior to the scheduled examination without the consent of the faculty.
    b. Students may not take an examination by proxy. Taking or attempting to take an exam for someone else is a violation by both the student enrolled in the course and the proxy.
    c. Students may not attempt to change answers after an examination or an assignment has been submitted.
    d. Students may not falsify medical or other documents for any reason.
    e. Students may not use unauthorized study aids in an exam. Examples include, but are not limited to:
        i. Bringing notes into an exam that does not allow outside materials.

ii. Programming equations into a calculator when the faculty has indicated that students are to be tested on the recall of those same equations.
iii. Using any electronic device that allows students to look up, translate, calculate, or communicate information with someone else.

5. Students may not facilitate academic misconduct.

Graduate student responsibilities regarding academic integrity extend outside the classroom to scholarship, research, and teaching. As such, graduate students are also subject to the following standards:

1. Original Research. Thesis and dissertation work is guided by the expectation of making an original contribution to the field. The determination of what constitutes "original research" is made by the thesis/dissertation committee and the academic unit.
2. Research Procedures. Data misrepresentation or fabrication are clearly unethical. Ownership of data and programs and privileged information and confidentiality of data need to be clarified and respected by all those involved in the research process.
3. Authorship. In all cases of joint authorship, individuals working together should establish ahead of time the criteria for their co-authorship. Final determination of authorship should reflect effort and contribution, not rank or status. Dissertations and theses may not be co-authored.
4. Copyright. Laws of the United States and the university need to be respected. Faculty and students are responsible for knowledge and implementation of university policy in this area.
5. Teaching. Intellectual honesty characterizes the teaching endeavor. Instructors have the responsibility of clearly stating at the beginning of a course any and all responsibilities of the course and specifying in percentages how the final grade is to be calculated. Furthermore, instructors will inform themselves of appropriate university guidelines for the composition of course syllabi and ground rules.

Sanctions

Faculty are responsible for determining the sanctions for academic misconduct in the course sections they teach and students they mentor. Sanctions are assigned on a case-by-case basis while considering precedent and the following standards below. Academic deans may add to or elevate the initial sanctions assigned by faculty based on the student's prior academic misconduct history:

- the context and seriousness of the violation
- the student's demonstrated commitment not to engage in the same behavior in the future; and
- sanctions that appropriately foster accountability for one's behavior and prevent recurrence of similar behaviors

Below is a list of commonly assigned sanctions and faculty members may choose from this entire list:

1. Educational Experiences
   Educational experiences provide space for students to reflect upon their conduct; to identify how their action harmed themselves, others, and the community; and/or to explore why such conduct is unacceptable.

   Educational experiences or projects may include:
   1. Attendance and participation at a required meeting, workshop, special project, or other initiative.
   2. Completing an online tutorial focused on academic integrity.
   3. A written reflection about a specific topic or issue.
   4. Resubmission of the assignment or exam for partial credit.
   5. A required meeting with the appropriate dean to discuss the misconduct and the consequences.
   6. Completing restorative service hours and/or a Values Workshop.

   Deadlines for educational experiences may vary.
2. Failing Grade on the assignment
   A letter grade of F or zero points will be issued for the assignment or examination.
3. Failing Grade in a course, comprehensive examination, proposal or final defense of thesis or dissertation.
   A letter grade of F will be issued for the course or milestone where academic misconduct occurred.
4. University Suspension - may only be determined by the student's academic dean's office.
   University suspension involves the temporary removal of the student from the University for a specified period of time with the understanding the student may be allowed to return to the University at the completion of the suspension period after having satisfied any accompanying conditions. The Academic Dean's office may consider suspension as an elevated sanction.

   Suspension from the University further entails being withdrawn from all enrolled courses (resulting in "W" grades) restriction from visiting the University premises except when engaged in official business approved by the Office of the Provost. Visiting the University premises without gaining approval may result in arrest. Students suspended from the University remain responsible for tuition and fees. Students suspended from the University also must forfeit their Loyola ID (Campus Card) and turn it in to Campus Safety. University suspension may also include any other disciplinary action that is judged to be of value to the student.

   Persons notified of a student's suspension may include The Office of the Provost, the Office of Registration and Records, the Bursar, the Office of the Dean of Students and their designees, Campus Safety, or other appropriate personnel at the discretion of the Office of the Provost. Suspended students may not study abroad or travel with the University and may not be approved to study abroad until 90 days after their suspension period has ended. University suspension is typically assigned for a minimum of the rest of the semester and may last any number of years.

   When a suspension is over and the student has completed any conditions accompanying the suspension, the student must contact their academic dean's office requesting reinstatement and providing documentation demonstrating that the student has satisfied the terms of the suspension (if applicable). The Academic Dean's office may require a meeting with the student before permitting re-enrollment. The student may re-enroll at the University only after the academic dean's office has made an affirmative decision, notified the student, and released the registration hold on the student's University account. If the suspension is for a period of one fall or spring semester, the student will return under the same catalog requirements that were in place for their declared degree plan at the time of suspension. If the suspension is for a period longer than

one fall or spring semester, the student will need to reapply to the university through the appropriate admission's office.

5. University Expulsion
   An academic dean may recommend a sanction of University Expulsion to the Provost. Expulsion from the University is the most serious University disciplinary action and means the permanent exclusion of the student from the University. Only the Provost may impose the sanction of expulsion as recommended by a Dean. The Provost's decision is final. A student is not eligible to reapply or be readmitted to any other programs at Loyola University Chicago following expulsion.

   Expulsion may include: forfeiture of all rights and degrees not actually conferred at the time of the expulsion; permanent notation of the expulsion on the student's academic record; withdrawal from all courses (resulting in "W" grades). Students expelled from the University remain responsible for tuition and fees. Students expelled from the University also must forfeit their Loyola ID (Campus Card) and turn it in to Campus Safety. Any student expelled from the University are not permitted to visit the University premises except when engaged in official business approved in advance and in writing by the Office of the Provost or Campus Safety. Visiting the University premises without gaining approval in advance may result in arrest.

   Persons notified of a student's expulsion may include, the Office of the Dean of Students and their designees, the Office of Registration and Records, the Bursar, Campus Safety, or other appropriate personnel at the discretion of the Office of the Provost.

Process

1. Faculty will gather the appropriate information and documentation when they suspect an instance of academic misconduct has occurred. The standard of evidence required to determine responsibility is known as a "preponderance of the evidence." This means the faculty member(s) must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
2. If faculty conclude an instance of academic misconduct has occurred, then they will determine the appropriate sanction(s) as it relates to the charge and in accordance with the procedures in Graduate School's Academic Standards and Regulations.
3. Faculty will notify the student of their findings and sanction. Faculty should allow the student an opportunity to respond before reporting the incident.
4. If after talking with the student or the student fails to respond to the faculty's outreach within two business days and faculty have determined that academic misconduct has occurred, faculty will then report the instance of academic misconduct, including supporting documentation, to the Graduate Program Director, Department Chair and the student's Academic Dean's office.
5. The student's academic Dean's office will notify the student that the instance of academic misconduct has been reported. This instance will also be documented in the University's centralized database.
   - The initial sanction(s) determined by the faculty may be reviewed by the academic Dean's office.
   - The final sanction(s) will be included in the notification.
6. Incident reports and supporting materials regarding the academic misconduct are part of the student's academic record.

Appeals

Students retain the right to appeal the determination made at any stage of the process outlined above using the Appeal Procedure described below. The decision of the Academic Dean's office is final in all cases except expulsion.

Appeal Procedure:#Finding of Academic Misconduct

1. If a student chooses to contest a finding of academic misconduct, the student's first step is to confer directly with the faculty.
2. If a student and faculty are unable to resolve the issue relating to academic misconduct and the student still chooses to contest the finding, the student may appeal by submitting a formal appeal request (see form) via Loyola email to the Department Chair/ Associate Dean (when applicable) no later than 30 days into the following semester.
   a. If the dispute occurs within a class in the spring or summer semester, the student must submit the appeal no later than 30 days into the fall semester.
   b. If the dispute occurs within a class in the fall or J-term, the student must submit the appeal no later than 30 days into the spring semester.
   c. For a course offered by the School of Continuing and Professional Studies, the student must submit the appeal no later than 30 days after the final grade is officially posted.
3. The Department Chair and/or Dean's designee determines whether or not there are grounds for an appeal.
   a. When the Department Chair and/or Dean's designee determines there are no grounds for an appeal, the student will be notified that a hearing board will not be convened.
      - If the student disagrees with the determination by the Department Chair and/or Dean's designee, the student may appeal to the appropriate academic Dean. In cases where the student is enrolled in a school other than the one in which the course is taught, the academic Deans of the two schools will review the appeal together.
   b. When the Department Chair and/or Dean's designee determines there are grounds for an appeal, the student will be notified that a hearing board will be convened.
4. The academic Dean's office will notify the student of the final decision.
5. Each department will have a standing hearing board or have the means to constitute a hearing board for each dispute. Board members are chosen by the Department Chair and/or Dean's designee and will consist of three to five faculty members other than the faculty member involved or Department Chair. In smaller departments or interdisciplinary programs, board members may be members of different departments.
6. The chairperson of each hearing board will be selected by the person who appoints the hearing board. The chairperson of the hearing board receives all requests for hearings from the department, sets the calendar, notifies all involved parties of the dates and times of hearings and informs students by written notice of the decisions of the board.
7. The hearing will be held within two weeks of the receipt of the request for a hearing, if practicable. Hearings may be held virtually as necessary to accommodate members of the committee as well as parties to the appeal.
8. The hearing will be private and all information will be held confidential.

9. Hearings for refuting a charge of academic misconduct generally proceed according to the following format:
    1. Introduction of all parties present (including witnesses, when applicable) and an overview of the hearing process.
    2. Review the Student Rights in the Academic Appeal Process.
    3. Students should complete the electronic form in advance of the hearing.
    4. Hearing board chairperson reviews the nature of the alleged conduct and the University policies potentially violated.
    5. Witnesses are excused until statements are needed (if applicable).
    6. Student(s) (and Instructor(s) when applicable) provide a personal account of the reported incident.
    7. Student(s) (and Instructor(s) when applicable) have the opportunity to review all documentation relevant to the case that will be used by the hearing board to make a decision.
    8. Hearing board members ask any remaining investigative questions to the parties present (including witnesses, if applicable).
    9. Student(s) are provided a final opportunity to make any closing comments.
    10. Instructor(s) are provided a final opportunity to make any closing comments.
    11. Hearing board chair may excuse all parties for deliberation if needed.
    12. Student(s) (and Instructor(s) when applicable) are notified of the decision and any related outcomes either immediately after deliberation or, when further deliberation is needed, typically within five business days in writing, via Loyola email.
    13. Both the student and the faculty member involved may be accompanied by one advisor of their choice throughout the hearing process. The individual must inform the chairperson of the hearing board of the name of the advisor before the hearing date.
        i. The role of an advisor is to provide a comforting presence for the student and/or faculty. A faculty may only speak to the advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee. Even if an advisor is an attorney, the advisor may not function as legal counsel or "represent" an advisee during the hearing process.
        ii. If any advisor conducts themselves in a manner inconsistent with these guidelines, or if the advisor's behavior obstructs or interferes with the hearing process, the advisor will be warned by the board.
        iii. If the advisor's interfering behavior continues or if the advisor engages in a manner that harasses, abuses, or intimidates any other participant, the advisor will be excused from the hearing immediately.
    14. The student and/or faculty have the option of submitting relevant materials to the hearing board prior to or at the time of the hearing. Individuals in the hearing process have the responsibility of presenting truthful information.
    15. The board may address questions to any party.
    16. The chairperson of the hearing board determines the hearing procedures (e.g. location, order of proceedings, determining what evidence is relevant, determining if additional information is needed, etc.). Hearings may be held virtually to accommodate committee members or parties to the appeal. The standard of evidence required for a board to determine responsibility is known as a "preponderance of the evidence." This means the board must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
    17. All decisions of the board must be determined by a majority vote of the hearing board members. A final decision must be rendered by the board by the end of the hearing process.
    18. The student and faculty will be informed in writing by the chairperson of the board's decision within two weeks of the hearing. The decision is also shared with the Department Chair and/or Dean's designee.
    19. Should the student or faculty member wish to contest the hearing board's decision, they must submit in writing (via Loyola email) an appeal letter to the Dean and/or Dean's designee within 30 days of notice of the hearing board's decision.
        1. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
        2. The grounds to appeal the board's decision must include one or more of the following criteria:
            1. New substantive information is available that could not have been discovered by a diligent respondent at the time of the hearing and that would have likely changed the outcome of the case.
            2. A substantive procedural error or error in the interpretation of University policy occurred.
            3. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or the established Graduate School Academic Policies.
    20. Upon receipt of the appeal letter, the Dean and/or the Dean's designee will review the appeal to determine whether or not to uphold the decision of the hearing board.

The student and the faculty will be notified by the Dean's office of the final decision. This Dean and/or the Dean's designee decision is final and binding.

Academic Misconduct Records and Privacy

Academic misconduct records are maintained at the University for seven years from the date of the incident, with the exception of cases resulting in University expulsion (such files are retained indefinitely). Such files may contain contact information, correspondence, decisions, assigned outcomes, reports, and other information pertaining to any case in which a student was found responsible. These files are maintained by the Graduate School Academic Dean's Office.

Students have a right to view a redacted copy their academic misconduct file that falls within the seven-year period or resulted in University expulsion, with any protected information about other students removed, during regular business hours. A minimum of five business days' notice is required to prepare files for review. In order to request to view a redacted copy of their academic misconduct file, students must complete the Permission to Release Education Record Information form found on the Office of the Dean of Students website. Forms are reviewed in the order they are received and the ODOS office will contact you to schedule a time for your meeting once your form is processed.

In order to request a release of your academic misconduct file information to another person or school/organization, students must complete the Permission to Release Education Record Information form

found on the ODOS website and if applicable, submit any associated form from the school/organization they want to receive their academic misconduct file information. Forms are reviewed in the order they are received and are typically processed within 5-7 business days.

Privacy applies to affected parties, respondents, complainants, witnesses, advisors, Conduct Administrators, and members of Hearing Boards. All individuals are expected to adhere to the regulations set forth by the Family Educational Rights and Privacy Act of 1974 as Amended ("FERPA") regarding the dissemination of information pertaining to the academic misconduct process. All proceedings are private and unauthorized recording by any means is prohibited. The University reserves the right to share information regarding a case with other appropriate parties on a need-to-know basis. More information about FERPA can be found here (https://www.luc.edu/ferpa/).

Academic Standing

Good Standing

A degree-seeking student is in good academic standing if he or she: 1) meets the standards of quality of his or her academic program and the Graduate School; 2) makes satisfactory progress toward completion of degree requirements within the established time limit; 3) fulfills the Graduate School's requirement regarding continuous registration; and 4) fulfills the Graduate School's requirement regarding grade-point average. Students who are not in good academic standing are not eligible to receive a degree and cannot hold an award.

Continuous Registration

All students, including those who have completed all coursework, are required to register during the regular academic year (not including summer sessions) until all degree requirements are met, unless they have received a leave of absence (see below (http://www.luc.edu/gradschool/academics_policies.shtml/#leave_of_absence)).

Students who have completed all coursework and are preparing for comprehensive examinations and/or preparing a thesis/dissertation proposal are to register for Doctoral/Master's Study. Registration in doctoral study is normally limited to two semesters; after this, students must enroll in thesis/dissertation supervision.

Students working on a dissertation or thesis are to register for Dissertation or Thesis Supervision, even if they are registered for other courses.

Failure to remain continuously enrolled at the thesis or dissertation stage of a student's career carries a financial penalty as well. Doctoral students engaged in dissertation supervision and master's students at the thesis supervision stage face a reinstatement fee should they fail to maintain continuous registration. For doctoral students, the fee will be based on the dissertation fee for the terms missed plus an additional penalty of $100. For master's students in a program with a thesis requirement (or who have opted to write a thesis in a program where this is a choice), the fee will be based on the thesis supervision fee for the terms missed plus an additional penalty of $100.

Inactive Status

Students who do not meet the requirement of continuous registration are considered inactive and not in good academic standing. To request reinstatement to active status, the inactive student should discuss the matter with the graduate program director (GPD) and complete the Reinstatement Request Form (found on the Graduate School website). The form requires multiple levels of approval and the students should complete the required supporting material with care. Reinstatements are not automatic and students whose requests are denied will not be permitted to continue in their programs. Repeated failure to maintain continuous registration is, itself, grounds for denying a request for reinstatement.

The program may require additional information of the student as it reviews her/his request. In addition, the program may recommend completion of additional requirements (e.g., coursework or examinations) as a condition of reinstatement because of the time that has elapsed since discontinuation of studies at Loyola.

Given the continuous creation of new knowledge and new technologies within academic disciplines, and in order to ensure that students have adequate knowledge of the current state of the field and the specialty, if a PhD student who has been inactive (i.e., not registered) for more than two years applies for reinstatement in a program, the Graduate School will require the student to retake and complete successfully the program's doctoral comprehensive examination requirement if more than five years have elapsed since the student initially completed the requirement. The program may recommend to the Graduate School an alternative to the comprehensive examination as a means of satisfying the requirement that the student demonstrate currency in the field.

The graduate program director will forward to the Graduate School the student's written request for reinstatement and the program's recommendation regarding the request. The Graduate School will notify the student and the program of its decision regarding reinstatement.

Advanced Standing Toward the Doctoral Degree

A student who has been awarded a relevant master's degree by another institution may petition for advanced standing toward the coursework required for a doctoral degree program. A maximum of thirty credits of advanced standing may be awarded. Some doctoral programs may impose a lower limit or may not permit advanced standing at all. Requests for advanced standing should be made during the student's first year of enrollment in the Graduate School. Requests for advanced standing must be made to the Graduate Program Director (GPD) of the student's doctoral program, who will make a recommendation to the Graduate School for final review and approval. This recommendation will include both the number of advanced standing credits to be awarded and the number of credits of coursework that remain to be completed for the degree through registration in the Graduate School. Advanced standing does not alter a student's doctoral degree requirements outside of coursework (such as comprehensive exams) or confer candidacy. The number of approved credits of advanced standing will be recorded on the student's transcript but will not contribute to the student's Grade Point Average (GPA). Students entering their doctoral program with Advanced Standing should refer to Graduate School policy on time limit for completion of degree requirements for students.

Also see Transfer Credit Policy.

Appeal for Change of Academic Record

A student's appeal to change an academic record (e.g., withdrawal date) must be submitted using the **Appeal for Change of Academic Record** form to describe mitigating circumstances as to why the academic record should be changed. An appeal to change an academic record must be submitted within one calendar year after the last day of the academic term in question. Appeals for summer terms must be received by June 1 of the following calendar year.

Computation of Academic Grade Point Averages

The transcript reflects a student's actual academic record and the GPA includes all grades earned during the pursuit of the degree. Students must maintain at least a 3.0 or higher GPA for all courses taken while in graduate career.

If a student, with the authorization of the Dean and graduate program director, retakes a course, only the most recent grade earned for the course will be used when evaluating whether or not all degree requirements have been met.

No more than two courses for which a student receives a final grade of C+ (2.33) or C (2.00), and no course for which a student receives a final grade of less than a C (2.00), may be applied toward the fulfillment of degree or certificate requirements. Such grades, however, will be used in the calculation of a student's overall grade point average.

Communication from Academic Deans

Official notices are presented to students through the Dean's website or via Loyola e-mail account. Students are individually responsible for this information and should check their college's board and e-mail regularly.

For reasons of confidentiality, as well as efficiency, communications to students will be sent to students' Loyola email accounts and not to any other email address. Students are responsible for checking this account and/or setting up a forwarding system. The Dean's Office may refuse to provide confidential information using a non-Loyola email account.

Comprehensive Examinations

Most programs require the completion of written and/or oral comprehensive (or qualifying) examinations to assess the student's knowledge of the field and competency to undertake independent research. The comprehensive examinations, if required, are to be completed successfully before the student prepares a thesis/dissertation proposal for review by her or his committee. If a student fails all or a portion of the examinations, reexamination may be permitted, but only once. Failure of the reexamination will result in dismissal from the program. Students who have not completed the coursework for their programs, including outstanding Incomplete grades, will not be permitted to sit for comprehensive exams, nor will students on academic probation.

Coursework Requirements

Course Levels

Graduate students may only receive credit toward a degree or certificate from courses at the 400-level and above.

Undergraduate courses, including all 100, 200, and 300-level courses, do not apply toward fulfillment of graduate coursework requirements; such courses may, however, be used to fulfill prerequisite or research tool requirements (e.g., a 100-level language course may be used to fulfill a program's language requirement).

Degree Requirement Term

The degree requirements for the graduate or professional program pursued by a student will be consistent with the term of admission for the graduate or professional program noted in the admission letter. If a student leaves and is readmitted to a program, they will be held to the requirement term of re-admission. However, if a student changes their plan within a department and does not require a separate admission, they may retain their requirement term.

Degree Conferral/Graduation

Students are to apply to receive a PhD, MA or MS degree through LOCUS. The should select a degree conferral term at the end of which they expect to complete all degree requirements. Deadlines for degree conferral application are:

Conferral Term Deadline to Apply for Graduation

- FALL (December) - August 1
- SPRING (May) - December 1
- SUMMER (August) - February 1

Please note that students submitting a thesis or dissertation must fulfill all degree requirements, including defense and submission of final copies, prior to degree conferral.

The Graduate School's commencement ceremony is held once per academic year, in May. For more information, see Loyola's Commencement website: http://www.luc.edu/commencement/ (https://www.luc.edu/commencement/).

Dissertations and Theses

Several master's programs require the completion of a thesis; all PhD programs require the completion of a dissertation. To ensure that standards of quality are maintained consistently across programs, the Graduate School oversees matters relating to dissertations and theses.

The student has primary responsibility for preparing and submitting the dissertation or thesis to the Graduate School. The Graduate School's website provides information for establishing a thesis/dissertation committee, submitting an approved proposal and documenting approval of the text and oral defense. The Graduate School's Format Manual for Theses and Dissertations (https://www.luc.edu/media/lucedu/gradschool/pdfs/LUC Formatting Manual for Dissertations and Theses (revised Aug 2022)[91].pdf) contains information on the preparation and submission of the final copies to the Graduate School.

Committees

Thesis and dissertation committees have official standing only upon approval by the Graduate Program Director and the Dean (or their designee).

Affiliate Graduate Faculty and faculty from other universities may be recommended to serve as thesis or dissertation readers. In some departments or programs, Affiliate Graduate Faculty may direct theses upon approval by the Graduate Program Director and the Dean (or their designee).

The minimum number of voting members on a Lakeside Campuses committee is as follows: two for a thesis and three for a dissertation. The practice of the Health Sciences Campus is to have three and five respectively. In specific cases, other programs may wish to recommend one or two additional members for the committee. In those cases where a committee exceeds the minimum number, the additional members may be added as "non-voting." Each case will be handled separately. For a thesis committee of two members or a dissertation committee of either three or four members, a vote of "pass" must be unanimous. For a thesis committee of three members or a dissertation committee of five members, there may be one dissenting vote. Graduate Faculty are expected to provide timely and thoughtful feedback to students according to the timelines established by the department or program. Since all official members of a committee are to be present at the final oral defense, non-Loyola scholars who can reasonably be foreseen

not to be able to attend the final defense should be included on the committee as extra, non-voting members. Graduate School policy allows for defenses to be held virtually.

To change the composition of their committee, the student creates a new committee form in GSPS, and the approval process is repeated. It is recommended that the committee chair or the Graduate Program Director inform the committee member/s who is to be removed and/or added of the rationale for this decision prior to submitting the material. All previous iterations of the committee remain on file.

Proposals

Thesis and dissertation proposals should include: 1) a discussion of the purpose or end of the proposed research; 2) a review of the related literature and 3) a discussion of the project's research methodology/procedure. Committee members are allowed one month to vote on a proposal. To secure committee approval of the proposal, the student must receive unanimous, unqualified approval from all committee members by written ballot.

As noted below, a student proposing to conduct research involving the use of human and/or vertebrate animal subjects must secure approval of the university's Institutional Review Board for Protection of Human Subjects (IRB) and/or the Institutional Animal Care and Use Committee (IACUC) after the dissertation/thesis committee approves the proposal and prior to undertaking the research.

Upon committee and (if necessary) IRB and/or IACUC approval of the proposal, and after paying the thesis/dissertation registration fee, the student is to submit to the Graduate School a copy of the proposal, the committee ballot and a copy of the approval letter from the IRB and/or the IACUC. The Graduate School will not record final approval of your proposal until all required documentation is received.

Text and Oral Defense

A public oral defense is required of all dissertations and most theses (see individual programs' requirements). The committee must indicate approval of the text to the student before the date of the oral defense is established; no oral defense may take place without the prior agreement among the committee members that the text is substantially in its final state, with no major revisions necessary.

All voting members of the committee must participate in the oral defense. In all cases the director of the committee must be present at the oral defense, and ordinarily all readers must be present as well. However, in exceptional circumstances and upon the approval of the director of the committee, readers may participate in the oral defense via telephone or video conference. The Graduate School will not accept a committee's approval of a thesis or dissertation if one or more voting members does not participate in the oral defense. The only exception to this policy is in the case of non-participation due to an emergency; in such cases, the Graduate School will accept the result of the oral defense only after consultation with all non-participating committee members.

In the case of a two-member thesis or three-member dissertation committee, approval of the text and oral defense must be unanimous. In the case of a lakeside thesis committee with more than two members, and in the case of all four- and five-member committees, approval of the text and oral defense must be with no more than one dissenting vote.

The committee may award "Distinction" to designate outstanding work on both the text and oral defense; this designation should be made only on rare occasions of truly exceptional work. Votes of "Distinction" must be unanimous. This designation will appear on the student's transcript.

The results of the committee's evaluation of the text and oral defense are noted on a written ballot, which the student is to submit to the Graduate School as soon as possible after the oral defense.

Final Copies of the Text

Students are required to submit to the Graduate School a final, approved electronic copy of the text and other necessary material in proper format. Deadlines for format check and final copy submission are published on the Graduate School website. In addition, in order to ensure that all theses and dissertations are accessible to the academic community and the interested public, all dissertations and theses must be published through ProQuest.

Students must submit final copies with approved revisions within one semester of a successful defense (e.g., if a student's defense falls within a Fall semester, their final copies must meet the Spring semester submission deadlines). After one full semester a student may be discontinued and be required to apply for reinstatement.

Doctoral Candidacy

The requirements for doctoral candidacy are: 1) successful completion of all specifically required coursework; 2) fulfillment of all research tool requirements; 3) successful completion of all comprehensive examinations; 4) approval of the dissertation proposal by the approved dissertation committee, the IRB and/or the IACUC (if necessary) and the Graduate School.

Students have five years after admission to doctoral candidacy to complete all of their remaining degree requirements, including all dissertation requirements.

Please see below for details about time limits for degree requirements.

English Language Requirement

The Graduate School's English-language requirement is intended to further students' academic success and allow them to attain a level of proficiency expected of students completing a graduate program at a U.S. university. As stated in letters of admission, the requirement applies to degree-seeking students who have not received a bachelor's degree from an institution where English is the language of instruction. The requirement includes assessment of students' English skills and, depending on the results of the assessment, coursework. The English-language requirement is a degree requirement; students who have not fulfilled the requirement will not receive a degree. In addition, students must complete the requirement in their first term in order to be eligible for continued enrollment in the Graduate School and for renewal of awards.

The Graduate School may grant a student an exemption from the English-language requirement if the student has written and orally defended a thesis or dissertation as part of completing a graduate program at an institution where English is the language of instruction. All requests for exemption must be in writing and include appropriate supporting documentation. Requests must be sent first to the student's graduate program director, who is to then send it to the Graduate School with a written recommendation regarding the request. The Graduate School will not grant an exemption without receiving a positive recommendation from the graduate program director. Requests for exemption must be received by the Graduate School: at least one week before the placement test preceding the student's first semester as a degree-seeking student. The Graduate School will determine whether the student qualifies for an

exemption and will notify the student and the graduate program director of its decision.

Assessment

As indicated above, the English-language requirement includes a placement test to assess students' English skills. This placement test is administered by Loyola University Chicago's Department of English as a Second Language (ESL) and is not the same as either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS), taken before admission.

Students entering a Graduate School program as a degree-seeking student during the Summer or Fall Semesters must take the placement test scheduled prior to the beginning of their first Fall Semester. Students entering a Graduate School program as a degree-seeking student during the Spring Semester must take the placement test scheduled prior to the beginning of their first Spring Semester.

The ESL department will notify students of the results of the test. Students whose score on the placement test indicates they have attained acceptable English proficiency will have fulfilled the English-language requirement. Students whose scores indicate they are in need of additional English instruction will be required to complete coursework. Students who take the placement test will not subsequently be eligible for an exemption from the English-language requirement.

Coursework

As noted above, students whose score on the placement test indicates they are in need of additional English instruction will be required to complete coursework in Loyola's ESL department to improve their English reading, writing and speaking skills. This coursework will be in addition to the courses required in the student's graduate program and must be taken immediately following the placement test.

Students are expected to attend all classes and complete all assignments. Students must receive a grade of CR (credit) for each required course; courses for which students receive a grade of NC (no credit) will not apply toward fulfillment of the English language requirement.

If extraordinary circumstances prevent one from taking required coursework in the first semester, the student may request to defer coursework for one semester. Requests for deferrals must be in writing and sent first to the student's graduate program director, who is to then send it to the Graduate School with a written recommendation regarding the request. Requests for deferrals must be received by the Graduate School within one week of notification of placement test results. The Graduate School will notify the student and the graduate program director of its decision.

Additional Information

Students with questions regarding the Graduate School's English-language policies should contact their graduate program director or the Graduate School. Students with questions regarding the nature of the placement test or coursework should visit the ESL department's Website

Enrollment in Courses

While academic advising is available from the student's program or department, each student is responsible for developing an accurate and appropriate schedule of classes each term. Students are allowed to change their registrations in conformity with the guidelines established by the Office of Registration and Records and the Bursar's office. Students are responsible for maintaining the accuracy of their enrollment and understanding the academic and financial consequences of adding or withdrawing courses.

STUDENT ENROLLMENT STATUS

Fall and Spring Semesters

Students are considered full time if they are either: 1) enrolled in at least eight credit hours of coursework; or 2) enrolled in Thesis Supervision (course #595), Master's Study (#605), Dissertation Supervision (#600), Doctoral Study (#610), or a full-time clerkship, internship or practicum course.

Summer Sessions

Students are considered full-time if they are either: 1) enrolled in at least six credit hours of coursework; 2) enrolled in Thesis Supervision (course #S59), Master's Study (#S65), Dissertation Supervision (#S60), Doctoral Study (#S61), or a full-time clerkship, internship or practicum course; or 3) enrolled in and hold a full graduate assistantship or fellowship. Students are considered half-time students if they are enrolled in at least three but less than six credit hours of coursework.

Full- and part-time status are reported to loan companies and to the U.S. government, including the INS. Full- and part- time status are not necessarily related to eligibility for health insurance, or to Loyola's fees.

Final Examinations

Final examinations are given during the scheduled examination period in each session. Students are expected to take no more than three final examinations in one day. Tests or examinations may be given during the semester or summer sessions as often as deemed advisable by the instructor. Students who miss a final examination should contact their instructor.

Grades

The grades (and associated grade-point values) in the Graduate School are as follows:

Grade	Grade Points
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
F	0.00
I	Incomplete
W	Withdrawal
WE	Emergency Withdrawal
P	Pass/Credit
NP	Non-Pass/No Credit
AU	Audit

Incomplete Grades

The Graduate School expects students to complete all coursework by the end of the term during which the courses were taken. However, if a student and the instructor make arrangements in advance, a student may receive a grade of I (Incomplete) at the end of the term. The student

is to complete the outstanding work and submit it to the instructor according to a schedule approved by the instructor, subject to the following Graduate School policies.

The student must complete and submit all outstanding work to the instructor by the last day of the semester following the term in which the I grade was assigned. (For purposes of incomplete grades, the summer sessions are counted together as one term.) If the student does not turn in the work by the deadline, the I will automatically become an F. The Graduate School will not approve a change of grade if the student does not complete and submit the work to the instructor within one term of the assignment of an I grade.

Withdrawal from Courses

If a student withdraws from a course before the published withdrawal deadline, the student's transcript will show no record of the course. Students contemplating official withdrawal from a class and receiving or expecting to receive financial assistance should consult with the Office of Student Financial Assistance. A grade of "W" indicates official withdrawal from a course through the allowed withdrawal period (see academic calendar for dates). The grade "W" is not counted in computation of academic standing as either attempted or earned credit hours, nor calculated in the grade point average. With a complete emergency term withdrawal, the grade of "WE" does not count towards attempted credit hours or in GPA (effective Fall 2022). However, both the "W" and the "WE" count towards attempted hours when determining Satisfactory Academic Progress for continued financial aid eligibility.

Credit/No Credit

Thesis Supervision (course #595), Master's Study (#605), Dissertation Supervision (#600), Doctoral Study (#610) and certain other graduate courses are graded on a credit/no credit basis. A grade of P (pass) indicates that the student made satisfactory progress toward completion of course or degree requirements. A grade of NP (no pass) indicates that the student did not make satisfactory progress toward completion of course or degree requirements.

Audit

Auditors are not required to complete course assignments, including examinations and term papers. Class attendance is required, and auditors have a right to participate in class discussions. A grade of AU indicates satisfactory attendance; students who do not meet the attendance requirement will receive a grade of W. Auditors are assessed one-half tuition.

Pass/Fail

The Pass/Fail option is not available for courses taken for graduate credit. The Pass/Fail option is available for other courses (e.g., foreign-language courses taken to fulfill a research-tool requirement).

International Travel

Graduate Student's traveling internationally on university-related business (including research and conference attendance/participation) are expected to abide by university travel policies. The Graduate School provides financial assistance through travel awards, including support for the Insurance for International Travel fee.

Inter-University Visitation

Loyola University Chicago is a member of the Midwest Catholic Graduate Schools Consortium. Through an agreement with Marquette University, University of Notre Dame, and Saint Louis University, students matriculated in the Graduate School may, with approval, take course work at one of the partner schools to apply to their degree requirements at Loyola. This is not transfer credit, but rather consider in-residence credit earned in visitation to a partner school. The student is enrolled in a degree program at their home university (Loyola), and all financial arrangements are made through the home university, but the student attends the host university on a short-term basis with prior approval. Students who are interested in learning more should contact the Graduate School.

Long-Term Leaves of Absence

Official long-term leaves of absence are intended for students who wish to discontinue temporarily their graduate studies due to special circumstances (e.g., medical, personal or professional reasons). Students who are on a long-term leave of absence may not use University resources, including faculty time. A long-term leave of absence postpones all deadlines concerning completion of degree requirements for the duration of the leave of absence.

The Leave of Absence request form is available through the Graduate Student Progress System at https://gsps.luc.edu/. Please log in to create this form for approval.

Decisions regarding the approval of leaves of absence rest with the Graduate School; when reviewing requests for a leave of absence, the Graduate School may require additional information or documentation from the student and the graduate program director. In cases where the graduate program director recommends that the leave of absence not be granted, the student may petition the Graduate School to consider her/his request. International students admitted to the United States on temporary visas must also receive approval from the university's Office of International Programs for information regarding eligibility for a leave of absence.

Leaves of absence are limited to a period of one full academic year. If a student is not prepared to return to active status after one year, the student may request a renewal of the leave of absence for a period of up to one year; in such cases, the graduate program director and the Graduate School will review the student's record and future plans to determine whether an additional leave is in the best interests of the student, the program and the Graduate School.

In order to be reinstated to active status, the student must notify the Graduate School in writing upon returning from a leave of absence. Unless the student is granted a renewal of a leave of absence, the student must return to active status in the semester following the expiration of a leave of absence; failure to do so may result in dismissal from the program. If a student does not return from a leave of absence after two consecutive years, s/he must reapply for admission to the program.

Military Service

Students who have been called into the armed services of the United States and who are consequently withdrawing from the university before the end of the withdrawal period will receive a refund of all tuition and fees paid for the period in question but no academic credit. If they withdraw after the end of the withdrawal period, they will receive full academic credit for the semester with grades as of the date of withdrawal but no refund of tuition.

Probation and Dismissal

This policy outlines the conditions under which a student may be placed on probation or dismiss from their graduate program for academic performance reasons. Students should review the Academic Policy on Time Limit for Completion of Degree Requirements and be aware of

departmental timelines. Please note that individual programs may have more stringent rules regarding probation and students should be aware of those policies as listed in their program handbook. Students may be placed on probation or dismissed from their graduate program in one of two cases:

1) Minimum GPA: Students who fail to maintain a grade-point average of at least a 3.00 will be placed on academic probation. In such cases, if the student does not raise the grade-point average to at least 3.00 during the next two consecutive terms in which the student registers, the student will be dismissed for poor scholarship.

Students who are near the end of their programs must raise their cumulative GPA to 3.00 in order to receive a degree. Students will require permission from their program and the Graduate School to continue taking courses after they have completed their program hours in the hope of raising their cumulative GPA above 3.00 in order to graduate.
2) Satisfactory degree progress post coursework: After completion of their coursework, students who are writing a thesis or dissertation must continue to make satisfactory, timely progress towards the degree. The determination of a student's failure to make satisfactory academic progress must be based on:

- Failure to meet one of the milestones according to the timeline for satisfactory academic progress set by the student's program
- Number of NPs: Master's and Doctoral Study and Supervision courses are graded on a P/NP (Pass/No Pass) basis. Students who are not making satisfactory progress should receive an NP, which will prompt the student to be on academic probation. Students who receive two NP grades may face dismissal.
- The outcome of the graduate program's annual graduate student review based on the quality or pace of the student's progress.

In each of these cases, the student must be provided with sufficient feedback and an opportunity to address the problem. The department or program should notify the student and the Graduate School, and the student will be placed on probation. Failure to complete the requirement or make the required progress during the probationary period will result in the case being forwarded to the appropriate faculty committee or unit for a vote on terminating the student from the degree program. While on probation, the student is expected to meet other program deadlines on schedule.

If the committee votes to terminate the student in the program, a program should submit a request for the student's dismissal to the Graduate School. Following the program's communication to the student of the dismissal and its rationale, the Dean will then send a letter of dismissal to the student. A student who is dismissed for failure to maintain satisfactory progress may appeal the decision to the Dean of the Graduate School following the procedure outlined in the Graduate School's Academic Grievance Policy.

Program-Specific Requirements

Because of the diversity of graduate work in different branches of knowledge, individual graduate programs have varying requirements about undergraduate prerequisites, graduate coursework, research tool requirements, comprehensive examinations, theses and dissertations and other matters. Please consult your department's website for individual program requirements listed in this catalog. In cases where there is a conflict between a program's publications and this catalog, the catalog governs.

Protection of Human and Animal Subjects in Research

A graduate student preparing to conduct research involving the use of human or vertebrate animal subjects, whether or not such research is pursued in connection with a thesis or dissertation, must secure approval of the university's Institutional Review Board for Protection of Human Subjects (IRB) or the Institutional Animal Care and Use Committee (IACUC) prior to undertaking the research.

Please consult the IACUC website (http://www.luc.edu/ors/iacuc/index.shtml/) for complete information.

Registration

In order to be certified as active students and to have access to university resources, both new and continuing students are to register before each term in which they are taking courses, working on a thesis or dissertation, completing a practicum or internship or otherwise engaged in graduate study. Applicants must be officially admitted to the Graduate School before they will be permitted to register. Students are responsible for registering for courses in a timely manner through the university's registration system.

No one is permitted to attend any class without first officially registering for that class. Students may not register for classes after the late registration period. A fee is charged for late registration.

Registration at Loyola University Chicago is done through the LOCUS on-line registration system. For specific information on registration, please visit the Office of Registration and Records (http://www.luc.edu/regrec/) website.

Registration for Directed Study, Directed Readings and Independent Study

Individual programs/departments may require students to receive approval prior to registering for these types of courses. Students may request notation on of a specific title on the transcript by submitting to the Graduate School a completed Request for Course Title (https://www.luc.edu/media/lucedu/gradschool/pdfs/Request for Course Title.pdf) form.

Cross-Registration

Students intending to take a course outside the academic unit that includes their program must obtain approval from the course instructor and the "host" unit. Students should contact the host unit for information about registration procedures. They should also consult with their home program to see if these courses will count toward the degree.

Auditing a Course

The decision as to whether to designate particular graduate courses as open to auditors is made by the academic unit offering the course. In order to audit a course, a Graduate School student must 1) complete the Audit Request (https://www.luc.edu/gradschool/academics/forms/) form and 2) receive approval from the academic unit offering the course and the Graduate School. The completed form must be received by the Graduate School by the end of the second week of the semester or by the end of the first week of the summer or intersession term. The Graduate School will not approve a request received after the deadline. Once a course is converted to "audit" for a student, it will not be re-classified as a "for credit" course (i.e., a course that is being audited may not at anytime be counted as credit hours completed toward degree requirements). Completion of the form does not constitute registration for the course; the student is responsible for registering for the course

via the university's registration system and must do so prior to the late registration deadline to avoid a late registration fee.

Class attendance is required, and auditors have a right to participate in class discussions. A grade of AU indicates satisfactory attendance; a grade of W will be assigned in cases of unsatisfactory attendance. Auditors do not complete course papers, examinations or other assigned projects. A course that is audited does not count as hours attempted and therefore is not considered in determining a student's enrollment status (i.e., whether the student is classified as full- or part-time) and is not eligible for coverage by a tuition award.

Withdrawal from a Course

Students can withdraw from a class until the last day to receive a W. Once the system switches to assigning WF's student can only withdraw from a class with the permission of the Dean and according to the procedure for change in registration. Please see our Key Dates and Deadlines (https://www.luc.edu/gradschool/key_dates.shtml/) page for specific withdrawal deadlines, which are maintained by the Office of the Bursar.

Students who stop attending a class but have not officially withdrawn will receive the final grade of "WF," which is a penalty grade and equivalent to a grade of "F". Students will incur full financial obligation to the university. Voluntary and repeated unofficial withdrawals from class may result in the student being barred from further attendance in the university. Students may withdraw from class with the final grade of "W" through the first ten weeks of the semester or first four weeks of a summer term.

Students contemplating official withdrawal from a class and receiving or expecting to receive financial assistance should consult with the Office of Student Financial Assistance.

Adding a Course

Students who would like to add a course after the regular registration period must complete a Change of Registration form and obtain the approval of their graduate program director. The form is then submitted to the Graduate School for approval. Such requests are approved only in extraordinary circumstances; forgetting to enroll or enrolling in the wrong course do not constitute adequate grounds for a late add.

Number of Courses Allowed

Registration for nine credit hours per semester is considered the normal full-time courseload. The maximum courseload for Graduate School students is 12 credit hours per semester and six credit hours per summer session.

Registration of Undergraduate Students in Graduate Course

Undergraduates who are judged capable of pursuing graduate studies may be admitted to graduate courses with the approval of the course instructor and the chairperson of the department offering the course. Such courses are ordinarily applicable only toward the student's undergraduate degree; however, under certain circumstances such courses may be applied towards a graduate degree (see the policy on transfer credit below).

Repetition of Course

Students may repeat a course in which they previously received a passing grade only with the specific authorization of the graduate program and the Graduate School Dean. Authorization to repeat courses merely to improve the grade will rarely be given.

In an authorized repetition of a course the student will not receive credit hours toward graduation for both courses. The student will only receive credit hours toward graduation for the most recent attempt.

A student who repeats a course without permission of the Dean and graduate program earns neither credit hours nor quality points for the repeated course.

Research Tool Requirement

Several programs have established a "research tool" requirement (e.g., knowledge of a foreign language, proficiency in statistics) to ensure that students are adequately prepared to conduct research in their field. Students in these programs must meet the program's deadline for completing the requirement (i.e., prior to sitting for comprehensive examinations or prior to completing a thesis/dissertation proposal).

Responsible Conduct of Research and Scholarship Training

In support of the University Mission (http://luc.edu/mission/mission_vision.shtml/) and in accordance with federal regulations effective January 2010, Loyola University Chicago has implemented a Responsible Conduct in Research and Scholarship (https://www.luc.edu/ors/RCRHome.shtml/) program that incorporates ethics education into the curriculum for all students.

The Graduate School requires RCRS training for all matriculating PhD students and for master's students who are writing a thesis. Graduate Program Directors in non-thesis master's programs may recommend RCRS training for their students.

All PhD students and Master's students who are writing a thesis must successfully complete the Responsible Conduct in Research and Scholarship training as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Students on the Lakeside campuses take UNIV 370, offered at least twice per academic year on campus, to complete this requirement. Students at the Health Sciences Campus, and in the Marcella Niehoff School of Nursing receive separate RCRS training, and students in some School of Education programs complete this requirement with their methods coursework.

Students with Disabilities

At times, students with disabilities may wish to avail themselves of the university's ancillary services. Students who would like to seek accommodations at the university for their coursework or merit award (teaching and research assistantships) need to contact the Coordinator of Services for Students with Disabilities. Contact information is available at www.luc.edu/depts/lac/disabilities.

Time Limit for Completion of Degree Requirements

PhD Degree

Students must complete all PhD degree requirements, including the dissertation, within eight years of beginning the first course at Loyola University Chicago applicable toward the doctoral degree. However, students who completed a relevant master's degree (or a significant amount of relevant graduate coursework) at another institution prior to entering the doctoral program must complete all Ph.D. requirements, including the dissertation, within six years of beginning the first course at Loyola University Chicago applicable toward the doctoral degree.

In addition to these limits, Ph.D. students must also make good progress at the dissertation stage. If a doctoral candidate does not successfully defend and submit the dissertation within five years after becoming a doctoral candidate (by approval of the dissertation proposal), the student will be dropped from candidacy. The student must then pass a second comprehensive examination or program-specific equivalent to be reinstated as a doctoral candidate, and the time limit for submitting the dissertation will be determined by the Dean of the Graduate School and the candidate's committee. Exceptions to the five-year time limit require a petition to the dissertation chair, who forwards the petition to the Graduate Program Director and then the Graduate School. This policy will become effective for students achieving candidacy in the fall 2006 semester or later.

Master's Degree

Students must complete all master's degree requirements within five years of beginning the first course at Loyola University Chicago taken as a degree-seeking student.

Extensions of Time Limits

A student may request an extension of the time limit for completion of degree requirements due to special circumstances (e.g., medical, personal, professional, or research related reasons). A student requesting an extension shall complete an Extension of Time Limit for Completion of Degree Requirements form, which can be accessed by logging into GSPS (https://gsps.luc.edu/Secure/Login.aspx), attach required information, and contact the dissertation/thesis director (if applicable) and the graduate program director. These faculty members are to then make a recommendation on the student's behalf to the Graduate School. Decisions regarding the approval of extensions rest with the Graduate School; when reviewing requests for an extension, the Graduate School may require additional information or documentation from the student or the graduate program. In cases where the graduate program recommends that the extension not be granted, the student may petition the Graduate School to consider her/his request.

Extensions are ordinarily limited in duration to one full academic year. If a student has not completed all degree requirements by the extended deadline, the student may request an additional extension for a period of up to one year; in such cases, the graduate program and the Graduate School will review the student's record and future plans to determine whether an additional extension is in the best interests of the student, the program and the Graduate School. Students who do not complete all degree requirements within the required time limit are subject to dismissal from the program.

Transcripts of Graduate Work

All courses taken by the student and other relevant academic information are included on the student's official academic transcripts, which are maintained by the university's Office of Registration and Records.

Transfer Credit

It is ordinarily expected that all work towards a master's degree will be completed in the program at Loyola University Chicago. However, up to six credit hours of graduate work completed in another Loyola program or at another institution may be applied toward a master's degree with permission of the program's Graduate Program Director (GPD) and the Graduate School. Students may request transfer of credit, and the program can make its recommendation to the Graduate School during the student's first semester in the Graduate School. The Graduate School maintains responsibility for approving transfer credit. To ensure that each student is well prepared for undertaking scholarship in the student's current field of study, the Graduate School's decision regarding transfer credit will be based on the quality of the student's work, the time interval since its completion and its relevance to the student's program of study at Loyola. Coursework below a B grade will not be accepted. Students may not transfer coursework that has been awarded as part of a conferred or completed degree program. If a course fulfills the learning outcomes of a requirement in the student's master's program, and upon department recommendation, a specific required course may be substituted with an elective chosen in concert with the student's program director.

For students entering a PhD program with prior graduate work completed in another Loyola program or at another institution, up to one-half of the total number of semester hours required by the doctoral program at Loyola may be applied toward the PhD degree. It may be possible for a completed relevant master's degree to be applied towards the PhD, and this is further elaborated in the Advanced Standing policy (Approved May 4, 2021).

Withdrawal from the University

An enrolled student who wishes to withdraw from the university during any semester must notify the Dean's office and his or her graduate program director in writing. A student is considered to be in attendance until such notice has been received by the Dean or the Graduate Program Director. All financial refunds or obligations are dated from the date of the formal notice of withdrawal and not from the date of the last class attended; see the Bursar's website for more information. It is the student's obligation to inform the Graduate School promptly of the intention to withdraw. Telephone messages or non-attendance in class are not official notification.

A student may be required to withdraw from the university because of academic deficiency, lack of sufficient progress toward completion of degree requirements, failure to adhere to university requirements, degree requirements and/or regulations for conduct or failure to meet financial obligations to the university.

Complete Emergency Withdrawal

Students facing a significant emergency circumstance (see "Definitions" section below) that prevents them from continuing in or completing an academic term may submit an Intent to Withdraw (https://www.luc.edu/media/lucedu/registrationrecords/provostpdfformsasof2022/Notice%20of%20Intent%20to%20Withdraw.pdf) form to their program director or the Graduate School. All requests must be supported by appropriate documentation. The Intent to Withdraw form is reviewed by the academic dean's office of the student's primary college/school for approval and processing.

Requests for complete emergency term withdrawals are considered after the last day of a term to drop a course or courses without a grade of "W." In cases where the student is incapacitated (see "Emergencies Resulting in Student Incapacitation" below for more details), the requests for complete emergency term withdrawals may be submitted by a parent, spouse or legal guardian.

Complete emergency term withdrawals constitute a withdrawal from all classes and may result in final grades of "WE" in all classes for the given academic term. The University does not grant partial withdrawals (i.e., requests to withdraw from some classes but not others) for emergencies. Grades of "WE" have no impact on a student's cumulative GPA. The "WE" grade has no earned or attempted hours associated with the grade; however, "WE" counts towards attempted hours when determining Satisfactory Academic Progress (https://www.luc.edu/

finaid/aid-process/responsibilities/academic-progress/) for continued financial aid eligibility. This policy does not apply in cases where the student has completed final exams or final projects for classes in the term impacted by the significant emergency circumstance. When final grades have posted, students should utilize the Appeal for Change of Academic Record (https://www.luc.edu/media/lucedu/registrationrecords/provostpdfformsasof2022/Appeal%20for%20Change%20of%20Academic%20Record.pdf) form and submit to their primary academic advisor, program director or assistant/associate Dean.

The Office of the Bursar will determine the impact of the Withdrawal on the students account balance in LOCUS. The Student Account Balance will be determined by the University withdrawal calendar Loyola Withdrawal Schedule (https://www.luc.edu/bursar/withdrawalschedulechangecalendars/). The Bursar will not assess any late payment fees after the date of Withdrawal.

EMERGENCIES RESULTING IN STUDENT INCAPACITATION

It is required that a complete emergency term withdrawal request be submitted by the student. However, if an emergency situation has resulted in the student's temporary or long-term incapacitation for a period that may extend beyond the one-calendar-year deadline of this policy, the student's college/school academic dean's office, the Office of the Dean of Students, a parent (for minors), emergency contact person, or other legally assigned designee may submit a request on the student's behalf. In such cases, the student's college/school academic dean's office may require additional documentation (e.g., letter from medical doctor, hospitalization forms, power of attorney).

POTENTIAL IMPLICATIONS

The section below provides a non-exhaustive list and general information on the potential implications of a complete emergency term withdrawal. While the University offers a number of considerations that help support students who are facing emergencies, there are other important factors that should be taken into consideration before submitting a request for a complete emergency term withdrawal. Whenever possible, it is strongly recommended that a student discuss all possible options, including the potential implications of a complete emergency withdrawal with their primary academic advisor.

FINANCIAL IMPLICATIONS: TUITION AND FINANCIAL AID

Students are strongly encouraged to purchase tuition insurance (e.g., A.W.G Dewar, Inc.) prior to the start of the academic term.

Note that a complete emergency withdrawal does not automatically result in tuition credit. Please refer to the withdrawal schedule on the Office of the Bursar's website.

COMPLETE EMERGENCY WITHDRAWAL PROCEDURES DURING AN ACADEMIC TERM

Although it is recommended that the student submit as much information as possible, documentation does not need to specify details of the emergency that may be protected by law or considered private. Documentation must come from a verifiable authority (e.g., community/licensed healthcare provider, police agency, court of law, US military etc.) and minimally confirm the following:

Requests for a complete emergency withdrawal will be reviewed and decided by the student's college/school academic dean's office. Other areas, such as the Office of the Dean of Students, the Office for Equity & Compliance, or Student Accessibility Center, may be consulted in cases where the student was either referred or is being supported by said office. Additional documentation and/or information may be requested of the student before a final decision is made.

The student will receive a written decision notification no later than 14 business days after receipt of original request via LUC email. If the school is unable to meet the 14 business-days deadline, the student will be notified in writing of the new deadline. If the request is approved, the effective date and further instructions before returning to campus (if necessary) will be provided. The date of the complete emergency withdrawal will be determined by the primary college/school dean's office based on the date of the last academically related activity.

POST-EMERGENCY COMPLETE WITHDRAWAL RE-ENTRY PROCESS

Unless otherwise indicated in the approval notification or by the Office of the Dean of Students in lieu of the Loyola University Chicago Behavior Concerns Team (BCT), the process for returning to the university will follow standard policies and procedures for re-enrollment. Students who were being supported by BCT before withdrawing or are returning because of a mental health hospitalization are required to consult the Office of the Dean of Students for instructions on potential re-entry requirements.

DEFINITIONS

Significant Emergency Circumstance – an unforeseen emergency situation that prevents a student from continuing in or completing an academic term. Some examples include but are not limited to:

- Chronic illness of withdrawing student
- Death of parent/legal guardian or medical issue of a family member and the withdrawing student must become a part-time or full-time caretaker of family member
- Extreme financial hardship
- Mental health condition, serious injury or illness of withdrawing student
- Sudden or consistent lack of transportation which affected the withdrawing student's ability to meet in-person attendance requirements
- Other situations, at the University's sole discretion, which are deemed to result in significant hardship to the withdrawing student

This list includes examples of emergency situations that directly affect the student.

Clinical Psychology PhD Program

Professional License Disclosures

In the table below, an asterisk (*) indicates that earning a doctoral degree from a program accredited by the American Psychological Association (APA) is deemed to meet the educational requirements for licensure in that State. The Clinical Psychology PhD Program in the Department of Psychology at Loyola University Chicago is currently – and has been continuously – accredited by APA since 1959 (see: https://accreditation.apa.org/). Please note that this table does not include an evaluation of state-specific requirements beyond that of educational or curricular requirements. State requirements are subject to change. These statements and program completion do not guarantee licensure. Students should review licensure requirements – including non-educational requirements such as certification/examination work experience, background checks, etc. – for the states in which they intend to see certification/licensure, and students who intend to change states should review their new states' requirements.

State or Territory	Program Satisfies Curricular Requirements?	State Professional Association or License Authority and Notes
Alabama - AL	Yes*	http://www.psychology.alabama.gov/default.aspx
Alaska - AK	Yes*	https://www.commerce.alaska.gov/web/cbpl/ProfessionalLicensing/BoardofPsychologists.aspx
Arizona - AZ	Yes*	https://psychboard.az.gov/
Arkansas - AR	Yes*	https://psychologyboard.arkansas.gov/
California - CA	No	https://www.psychology.ca.gov/; Although a doctoral degree in Clinical is required, additional coursework or experience beyond what is routinely offered at the Clinical Psychology PhD Program at Loyola University Chicago may be required in California, including pre-license curriculum or training in: human sexuality (10 contact hours); alcoholism/chemical dependency detection and treatment (one semester or quarter); child abuse assessment (7 hours); spousal/partner abuse, detection and intervention strategies (15 contact hours); aging and long-term care (10 contact hours).
Colorado - CO	Yes*	https://dpo.colorado.gov/Psychology (https://dpo.colorado.gov/Psychology/)
Connecticut - CT	Yes*	https://portal.ct.gov/DPH/Public-Health-Hearing-Office/Board-of-Examiners-of-Psychologists/Board-of-Examiners-of-Psychologists (https://portal.ct.gov/DPH/Public-Health-Hearing-Office/Board-of-Examiners-of-Psychologists/Board-of-Examiners-of-Psychologists/)

School Social Worker Professional License Disclosures

State requirements are subject to change. These statements and program completion do not guarantee licensure. Students should review licensure requirements – including non- educational requirements such as certification/examination work experience, background checks, etc. – for the states in which they intend to see certification/licensure, and students who intend to change states should review their new states' requirements.

School Social Worker Licensure disclosure information for each state can be found at https://www.luc.edu/education/academics/illinoisstatelicensure/schoolsocialworklicensure/

FACULTY

A

Abbadi, Sawsan. Senior Lecturer. Ed.D, College of Arts and Sciences, Literature in Translation, Modern Languages & Literatures

Abbasi, Rasha. Assistant Professor. Ph.D, College of Arts and Sciences, Physics

Abdalla, Widad. Lecturer. Ph.D, College of Arts and Sciences, Mathematical Sciences

Abdul-Rahim, Omar M. Lecturer. Ph.D, College of Arts and Sciences, Biology

Abegaz, Brook W. Associate Professor. Ph.D, College of Arts and Sciences, Engineering Science, Engineering, Engineering Science, Honors Program

Abouelazm, Ayesha. Instructor. M.F.A, School of Communication, Communication

Abraz, Osman. Lecturer. Quinlan School of Business, Business Administration, Info Sys and Supply Chain Mgmt

Abuhamad, Mohammed. Assistant Professor. Ph.D, College of Arts and Sciences, Computer Science, Digital Humanities, Mathematical Sciences

Abuzayyad, Tareq. Lecturer. Ph.D, College of Arts and Sciences, Physics

Acosta Navas, Diana. Assistant Professor. Ph.D, Quinlan School of Business, Management

Adams, Bill H. Assistant Professor. Grad Schl at Medical Center, Schl of Health Sci & Pub Hlth, School of Nursing, Biomedical Sciences, Public Health Sciences, General Nursing

Adler, Shifra. Clinical Asst Professor Ft. M.A., M.S., Arrupe College, Mathematics, Statistics

Aftab, Aqdas. Assistant Professor. M.A., Ph.D, College of Arts and Sciences, English

Ahumada, Minerva. Clinical Assoc Professor Ft. Ph.D, Arrupe College, Philosophy

Akchurin, Maria. Assistant Professor. Ph.D, College of Arts and Sciences, Sociology

Akelian, Lena. Instructor. School of Nursing, General Nursing, Maternal/Child Nursing

Akers, Robert T. Instructor. B.A., School of Communication, Communication

Alexander, Katherine. Assistant Professor. M.B.A, Quinlan School of Business, Business Honors, Management

Ali, Sarah. Clinical Asst Professor Ft. Ph.D, College of Arts and Sciences, Engineering Science, Engineering, Engineering Science, Honors Program, Mathematical Sciences

Allen, Jonathan. Assistant Professor. Grad Schl at Medical Center, Microbiology and Immunology

Alley, Charles. Instructor. Ph.D, College of Arts and Sciences, Mathematical Sciences

Alsip, Mike. Instructor. M.B.A, Quinlan School of Business, Info Sys and Supply Chain Mgmt, Info Systems & Operations Mgmt

Alvarez, René Luís L. Clinical Assoc Professor Ft. Ph.D, Arrupe College, History

Amouamouha, Maryam. Clinical Asst Professor. Ph.D, College of Arts and Sciences, Engineering

Anderson, Emily. Professor. College of Arts and Sciences, Grad Schl at Medical Center, Graduate School Programs, Biomedical Sciences

Anderson, Matthew M. Associate Professor. Schl of Health Sci & Pub Hlth, Healthcare Administration, Schl of Health Sci & Pub Hlth

Andrejevs, Olegs. Lecturer. College of Arts and Sciences, Theology

Andreoni, Ann A. Clinical Assistant Professor. School of Nursing, Comm Mental Hlth Admin Nurs, General Nursing, Maternal/Child Nursing

Andress, Reinhard. Professor. Ph.D, College of Arts and Sciences, School of Communication, Literature in Translation, Modern Languages & Literatures, Communication

Andrews, Michael F. Associate Professor. Ph.D, College of Arts and Sciences, Philosophy

Apostolopoulos, Dimitris. Assistant Professor. Ph.D, College of Arts and Sciences, Philosophy

Arias, Robert A. Assistant Professor. Ph.D, Quinlan School of Business, Marketing Department

Armstrong, Jennifer. Clinical Associate Professor. Ph.D, Arrupe College, Communication

Attie, Mario. Assistant Professor. Ph.D, College of Arts and Sciences, Philosophy

Avdeyeva, Olga. Associate Professor. Ph.D, College of Arts and Sciences, Political Science

Axelrod, Howard. Advanced Lecturer. M.F.A, College of Arts and Sciences, English

Azimi, Shabnam. Assistant Professor. Ph.D, Quinlan School of Business, Marketing Department

B

Bachmeier, Patti A. Clinical Asst Professor. School of Nursing, Medical/Surgical Nursing

Bacic, Dinko. Assistant Professor. Ph.D, Quinlan School of Business, Business Honors, Info Sys and Supply Chain Mgmt, Info Systems & Operations Mgmt

Bacidore, Vicki A. Clinical Assistant Professor. School of Nursing, General Nursing, Medical/Surgical Nursing

Baker, Aaron. Associate Professor. M.F.A, College of Arts and Sciences, English

Baker, Nicholas. Assistant Professor. Ph.D, College of Arts and Sciences, Psychology

Baker, Susan C. Professor. Grad Schl at Medical Center, Microbiology and Immunology

Bakowska, Joanna. Associate Professor. Grad Schl at Medical Center, Pharmacology

Balasubramanian, Savina. Assistant Professor. Ph.D, College of Arts and Sciences, Sociology

Balija, Amy. Lecturer. Ph.D, College of Arts and Sciences, Chemistry and Biochemistry

Ballicora, Miguel A. Professor. Ph.D, College of Arts and Sciences, Chemistry and Biochemistry

Banerjee, Swarnali. Associate Professor. Ph.D, College of Arts and Sciences, Biology, Mathematical Sciences

Barcus, Courtney. Clinical Assistant Professor. Ph.D, School of Education, Curr Instr & Educ Psyc, Teaching Learning & Leading

Barefield, David Y. Assistant Professor. Grad Schl at Medical Center, Physiology

Barnes, Bobby. Sr Lecturer. Ph.D, Quinlan School of Business, Economics

Basner, Andrew D. Lecturer. College of Arts and Sciences, Chemistry and Biochemistry

Bauer, Brittney. Assistant Professor. Ph.D, Quinlan School of Business, Marketing Department

Baura, Gail. Professor. Ph.D, College of Arts and Sciences, Engineering Science, Engineering, Engineering Science

Bayley, Elisabeth. Sr Lecturer. Ph.D, College of Arts and Sciences, English, Philosophy

Beach, Jordan. Assistant Professor. Grad Schl at Medical Center, Physiology

Beatty, Christine M. Advanced Lecturer. Ph.D, College of Arts and Sciences, Biology

Becker, Daniel. Professor. B.A., Ph.D, College of Arts and Sciences, Chemistry and Biochemistry, Philosophy, Theology

Becker, Mary Ann A. Clinical Professor Ft. J.D., School of Law, Law Department

Becklenberg, Amy. Clinical Associate Professor. School of Nursing, General Nursing

Beischel, William J. Assistant Professor. Ph.D, College of Arts and Sciences, Psychology

Bell, Jeannine. Professor. J.D., Ph.D, School of Law, Law Department

Beltran, David. Lecturer. M.A., College of Arts and Sciences, Latin American Studies, Modern Languages & Literatures

Berg, Bjorn K. Clinical Instructor. Ph.D, Quinlan School of Business, Accounting, Business Honors

Berg, Martin B. Professor. Ph.D, College of Arts and Sciences, Biology

Bergeron, Peter E. Lecturer. Ph.D, College of Arts and Sciences, Philosophy

Bergman, William. Clinical Instructor Ft. Quinlan School of Business, Economics, Finance

Bertozzi, Alberto. Lecturer. Ph.D, College of Arts and Sciences, Philosophy

Biderbost, Kate. Advanced Lecturer. M.F.A, College of Arts and Sciences, Dept of Fine & Performing Arts

Billingsley, Kelvin. Associate Professor. Ph.D, College of Arts and Sciences, Chemistry and Biochemistry

Binaku, Katrina. Advanced Lecturer. Ph.D, College of Arts and Sciences, Chemistry and Biochemistry

Bindrich, Cortney. Clinical Asst Professor Ft. Ed.D, School of Education, Curr Instr & Educ Psyc

Blackmond Larnell, Twyla. Associate Professor. Ph.D, College of Arts and Sciences, Political Science

Blajer De La Garza, Yuna. Assistant Professor. Ph.D, College of Arts and Sciences, Political Science

Blanke, Insa. Dir For & Intl Llm Prg-Instr. J.D., School of Law, Law Department, School of Law

Bloom, Michael P. Clinical Assoc Professor - Ft. College of Arts and Sciences, Honors Program

Bninski, Julia L. Clinical Assoc Professor Ft. Ph.D, Arrupe College, English, Writing and Composition

Bobay, Kathleen. Professor. Schl of Health Sci & Pub Hlth, School of Nursing, Health Informatics & Data Sci, Public Health Sciences, Schl of Health Sci & Pub Hlth, Comm Mental Hlth Admin Nurs, General Nursing

Bocchetta, Maurizio. Associate Professor. Grad Schl at Medical Center, Biochem & Molecular Biology, Oncology Research Institute

Bohanon, Hank M. Professor. Ph.D, School of Education, Counseling Psychology, Curr Instr & Educ Psyc, Teaching Learning & Leading

Bohnert, Amy. Professor. Ph.D, College of Arts and Sciences, Psychology

Booker, Danielle. Assistant Professor. Ph.D, Quinlan School of Business, Accounting

Bost, Suzanne M. Professor. Ph.D, College of Arts and Sciences, English, Women Studies

Bougie, Jon L. Professor. B.A., Ph.D, College of Arts and Sciences, Physics

Bourque, Matthew. Advanced Lecturer. Ph.D, College of Arts and Sciences, Mathematical Sciences

Boychenko, Leanna. Associate Professor. Ph.D, College of Arts and Sciences, Classical Studies

Boyer, Bruce. Clinical Professor Ft. J.D., School of Law, Law Department

Boyle, Jennifer R. Clinical Professor Ft. Ph.D, Arrupe College, Political Science

Boyle, Patrick. Associate Professor. Ph.D, College of Arts and Sciences, Political Science

Bradshaw, Melissa. Senior Lecturer. Ph.D, College of Arts and Sciences, Digital Humanities, English, Interdisciplinary Studies

Brauninger, Jason E. Clinical Assistant Professor. School of Nursing, General Nursing

Brecht, Mara. Associate Professor. Ph.D, College of Arts and Sciences, Theology

Breen, John M. Professor. J.D., School of Law, Law Department

Breen, Katherine M. Assistant Professor. School of Nursing, General Nursing

Brendel, Jennifer M. Clinical Professor Ft. J.D., School of Law, Law Department

Brentner, Laura. Advanced Lecturer. Ph.D, College of Arts and Sciences, Inst of Environmntl Sustainabl, Inst of Environmntl Sustainabl

Breslin, Peter W. Clinical Assoc Professor Ft. Ph.D, College of Arts and Sciences, Biology

Brito-Millan, Marlene. Assistant Professor. Ph.D, Inst of Environmntl Sustainabl, Inst of Environmntl Sustainabl

Bronsteen, John M. Professor. J.D., School of Law, Law Department

Brooks, Byron. Assistant Professor. Ph.D, College of Arts and Sciences, Psychology

Brown, Jessica R. Sr Professional In Residence/Lecturer. M.A., School of Communication, Communication

Bruder, Matthew. Clinical Assistant Professor. School of Nursing, General Nursing

Brunson, Samuel. Professor. J.D., School of Law, Law Department

Bucholz, Robert O. Professor. DPhil, College of Arts and Sciences, History

Buechele, Susan E. Clinical Assistant Professor. School of Nursing, Comm Mental Hlth Admin Nurs, General Nursing, Maternal/Child Nursing

Buitrón Vera, Gabriela A. Lecturer. Ph.D, College of Arts and Sciences, Literature in Translation, Modern Languages & Literatures

Buldak, Gerald L. Senior Lecturer. B.A., Ph.D, College of Arts and Sciences, Biology

Burgo, Clara. Associate Professor. Ph.D, College of Arts and Sciences, Modern Languages & Literatures

Burke, Daniel E. Clinical Assoc Professor Ft. Ph.D, Arrupe College, English, Writing and Composition

Burkhart, Elizabeth E. Professor. School of Nursing, General Nursing

Burkhart, Theresa M. Assistant Professor. Schl of Health Sci & Pub Hlth, Healthcare Administration, Schl of Health Sci & Pub Hlth

Burns, Michael B. Associate Professor. Ph.D, College of Arts and Sciences, Biology, Cmun Tech & Public Service, Graduate School Programs, Philosophy

Butler, Noah. Advanced Lecturer. Ph.D, College of Arts and Sciences, Anthroplogy Department

Byrn, Mary A. Associate Professor. School of Nursing, General Nursing, Maternal/Child Nursing

C

Cafferty, Siobhan M. Clinical Asst Professor Ft. Ed.D, School of Education, School of Law, Curr Instr & Educ Psyc, Education Leadership & Policy, Law Department

Cain, Emily R. Associate Professor. M.A., Ph.D, College of Arts and Sciences, Honors Program, Theology

Calpino, Teresa J. Lecturer. Ph.D, College of Arts and Sciences, Theology

Camacho, Ricardo. Clinical Asst Professor. Ed.D, School of Education, Counseling Psychology, Curr Instr & Educ Psyc

Campbell, Edward. Professor. Grad Schl at Medical Center, Microbiology and Immunology

Campbell Deem, Brian. Lecturer. Ph.D, College of Arts and Sciences, Physics

Canaris, Michael M. Associate Professor. Ph.D, Grad Schl at Medical Center, Institute of Pastoral Studies, Graduate School Programs, Pastoral Studies

Cannon, Brian L. Associate Professor. Ph.D, College of Arts and Sciences, Biology, Physics

Cantwell, Christopher. Assistant Professor. Ph.D, College of Arts and Sciences, Digital Humanities, History

Casebolt, Tara T. Assistant Professor. Schl of Health Sci & Pub Hlth, Public Health Sciences

Castellanos, Jose M. Clinical Assoc Professor Ft. Ph.D, Arrupe College, English, Writing and Composition

Cavallo, Susana A. Professor. Ph.D, College of Arts and Sciences, Honors Program, Modern Languages & Literatures

Cavanaugh, Daniel J. Associate Professor. Ph.D, College of Arts and Sciences, Biology, Neuroscience

Cejovic, Vesna. Clinical Associate Professor. Ed.D, School of Education, Curr Instr & Educ Psyc, Teaching Learning & Leading

Ceko, Theresa C. Clinical Professor Ft. J.D., School of Law, Law Department

Chakraborti, Lopamudra. Assistant Professor Of Economics. Ph.D, Inst of Environmntl Sustainabl, Quinlan School of Business, Inst of Environmntl Sustainabl, Economics

Chamberlin, Julie. Lecturer. College of Arts and Sciences, English

Chan-Tin, Eric. Associate Professor. Ph.D, College of Arts and Sciences, Computer Science, Digital Humanities

Chang, Eric. Lecturer. Ph.D, College of Arts and Sciences, Mathematical Sciences

Chee, Florence M. Associate Professor. Ph.D, School of Communication, Communication

Chen, Angela X. Instructor. M.B.A, Quinlan School of Business, Business Administration, Info Sys and Supply Chain Mgmt, Info Systems & Operations Mgmt

Chen, Hong. Senior Lecturer. B.A., B.S., College of Arts and Sciences, Modern Languages & Literatures

Chen, Vincent C-F. Associate Professor. Ph.D, College of Arts and Sciences, Engineering Science, Engineering, Engineering Science

Chen, Xiangpei. Assistant Professor. Ph.D, Quinlan School of Business, Accounting

Chen, Yanan. Assistant Professor. Ph.D, College of Arts and Sciences, Biology

Cheverud, Jim. Professor. Ph.D, College of Arts and Sciences, Biology

Chin, Emily. Clinical Assistant Professor. School of Nursing, General Nursing, Maternal/Child Nursing

ACCT 201 Introductory Accounting I (3 Credit Hours)
Pre-requisites: Minimum 15 earned hours
The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process, and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include: preparation and use of financial statements; the accounting process; and the measurement and reporting of income, assets, liabilities, and owner's equity.
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
The student will be able to understand the underlying principles, design, concepts, limitations, and the necessity of accounting systems; The student will gain an appreciation of the uses of financial data and financial statements and their impact on business decisions

ACCT 201H Introductory Accounting I - Honors (3 Credit Hours)
Restricted to SBA honors students. The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process, and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include: preparation and use of financial statements; the accounting process; and the measurement and reporting of income, assets, liabilities, and owners' equity.
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
The student will be able to understand the underlying principles, design, concepts, limitations, and the necessity of accounting systems; The student will gain an appreciation of the uses of financial data and financial statements and their impact on business decisions

ACCT 202 Introductory Accounting II (3 Credit Hours)
Pre-requisites: A minimum grade of "C-" in ACCT 201
This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.
Course equivalencies: ACCT202/ACCT202H/ACACT201
Outcomes:
The student will be able to understand the differences between cash and accrual accounting, the use of ratio analysis in investing and managing decisions, the value and importance of identifying and allocating costs, and the methods involved in the budgeting process

ACCT 202H Introductory Accounting II - Honors (3 Credit Hours)
Pre-requisites: C- or better grade in ACCT 201 or ACCT 201H; Restricted to SBA honors students
This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.
Course equivalencies: ACCT202/ACCT202H/ACACT201
Outcomes:
The student will be able to understand the differences between cash and accrual accounting, the use of ratio analysis in investing and managing decisions, the value and importance of identifying and allocating costs, and the methods involved in the budgeting process

ACCT 303 Intermediate Accounting I (3 Credit Hours)
Pre-requisites: Sophomore Standing and ACCT 202 with grade of C- or higher; ACCT 202 may also be taken as a corequisite
The first in a series of courses designed to provide in-depth coverage of the generally accepted principles underlying financial statements and financial reporting, from conceptual framework to application. Topics include alternatives for measurement of revenue and asset valuation, and presentation of financial statements. Lectures, discussions, and technical readings are supplemented with extensive problem and written assignments.
Outcomes:
Students will demonstrate their understanding of the accounting process leading to financial reports; Furthermore students will also develop the ability to apply critical thinking and analytical skills toward the solution of problems concerning valuation of assets, and revenue and expense recognition

ACCT 304 Intermediate Accounting II (3 Credit Hours)
Pre-requisites: Sophomore standing, a minimum grade of "C-" in ACCT 303 or Graduate Business student
This course is an extension of Intermediate I where students use the conceptual framework to consistently evaluate and explain accounting practice. This allows the student to not only understand the accounting methodologies but also recognize why these approaches are generally superior to alternative accounting treatments. Topics include concepts of present and future value, investments in financial instruments (debt and equity), leases, pensions, income taxes, earnings per share, and the statement of cash flow.
Outcomes:
Students will be able to demonstrate an understanding of the professional pronouncements as they relate to the measurement, recognition, and reporting of financial information; Students will also be able to demonstrate an understanding of how to research relevant accounting issues to better prepare for professional certification

ACCT 306 Advanced Financial Accounting (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of C- in ACCT 304
Topics include accounting for business combinations, cost & equity method investments, consolidated financial statements, governmental & not-for-profit, & accounting for multinational entities. Course includes extensive problem assignments.
Interdisciplinary Option: International Business
Outcomes:
Students will understand the accounting for corporate acquisitions, corporate consolidations including intercompany transactions, governmental and not-for-profit and international accounting issues

ACCT 307 Adv Accounting: Not-For-Profit Entities & Adv Financial Accounting Topics (3 Credit Hours)
Pre-requisites: Sophomore standing, a minimum grade of "C-" in ACCT 303
Topics include accounting concepts as applied to state and local government, along with financial reporting for other not-for-profit entities including hospitals, universities, and voluntary health and welfare organizations. Class may be taken prior to ACCT 306.
Outcomes:
Students will gain a comprehensive knowledge of the reporting requirements of not-for-profit entities

ACCT 308 Accounting Information Systems and Sustainability Reporting (3 Credit Hours)
Pre-requisites: Minimum grade of "C-" in ACCT 303 & INFS 247; Sophomore standing
Enrollment is open to Graduate Business Students. Included among the topics covered in this course are the primary accounting cycles, accounting information system internal controls, and selective fraud issues. Students will also build flowcharting skills and gain experience working on an enterprise resource planning system (ERP) with real-world company data.
Outcomes:
Students develop an application and analysis level of learning regarding the function of an accounting information system in business with specific emphasis on risk management, along with the ability to work with and deploy ERP tools

ACCT 311 Auditing & Internal Control Systems (3 Credit Hours)
Course involves an in-depth investigation of internal control structure and systems and the theory of audit evidence. Theoretical principles and practical issues involved in planning and executing an audit are explored. Internal control policies and procedures and principal evidence techniques for major transaction cycles or account groups are studied in depth. Study of appropriate AICPA professional standards is an integral part of this course.
Outcomes:
Students who successfully complete this course will be able to: understand the role of professional standards in the audit of financial statements; demonstrate their ability to research those standards; and demonstrate their understanding of the audit process in particular the roles of evidence and internal control

ACCT 317 Managerial Accounting (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ACCT 303
This course critically evaluates product cost for inventory valuation and income determination, with an emphasis on budgeting and control procedures. Topics discussed include job order costing, process costing, activity-based costing, full absorption and direct costing, overhead allocation, and more. The course incorporates computer applications to managerial accounting analysis.
Course equivalencies: ACCT 317/ACCT 301

ACCT 323 Advanced CPA Topics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ACCT 311
Topics include: audit and other reports, statistical sampling in auditing, attestation standards, reporting on future-oriented information, accountant's legal liability, Securities & Exchange Commission practice, professional ethics and using technology in auditing.
Outcomes:
Students will be familiar with issues under the AICPA Code of Professional Conduct, pronouncements of the Public Companies Accounting Oversight Board, the Sarbanes-Oxley Act, federal securities laws, and cases relating to CPA malpractice; Students will have a thorough professional knowledge of CPA reports on financial statements and special reports; Students will also learn how to apply statistical sampling in auditing

ACCT 326 Fraud Investigation (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ACCT 311
Theoretical principles and practical issues involved in planning and executing an investigation are explored including internal control structure and evidence.
Outcomes:
Understand fraud investigation and the role it plays in the legal process; Understand and be able to apply investigative techniques in solving financial crimes

ACCT 328 Concepts in Taxation (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ACCT 201 and 202
This course provides a thorough exposure to federal income tax concepts and planning principles, with particular reference to individual taxpayers.
Outcomes:
Students will be able to demonstrate a basic core of technical knowledge concerning the federal income tax as it applies to individuals, an understanding of the conceptual and tax policy issues that underlie tax legislation, and fundamental skills in tax compliance, tax planning, and tax research

ACCT 331 Introduction to the Business of Applied Artificial Intelligence (3 Credit Hours)
Pre-requisites: ISSCM 241 or STAT 103
This course provides a concise introduction to Artificial Intelligence (AI) with a focus on applied business applications of machine learning and generative AI. Through engaging lectures, interactive labs, and exposure to real-world use cases, students will gain a deep understanding of the key concepts and practical business applications of AI. Students will also gain a fundamental understanding of how AI models are built and deployed to enhance their skills and career advancement. The latest applications of AI in marketing, accounting, finance, and retail will also be explored.
Outcomes:
Students will develop an understanding of how AI is executed in business settings, from ideation to deployment, and the tools and frameworks applied; Students will gain an understanding of core AI concepts, including machine learning and generative AI; Students will discover how models are built and evaluated to analyze data for prediction and generative AI to deliver actionable insights; Students will gain insights into ethical AI practices to be able to recognize and address ethical and social considerations to deploy AI responsibly; Students will explore business use cases to understand AI solutions applied to business challenges across domains such as accounting, finance, and retail; This course will foster collaboration and communication skills development by having students present AI-driven solutions effectively, translating solutions into impactful business narratives

ACCT 341 Advanced Studies in Taxation (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ACCT 328
This course provides a thorough exposure to the federal income tax concepts and planning principles applicable to business entities, trusts, and estates and to federal transfer taxes.
Outcomes:
Students will be able to demonstrate a basic core of technical knowledge concerning the federal income tax as it applies to business entities and to the federal gift, estate, and generation-skipping-transfer taxes, an enhanced understanding of the conceptual and tax policy issues that underlie tax legislation, and enhanced skills in tax compliance, tax research, and tax planning

ACCT 350 Accounting Full Time Winter Internship (6 Credit Hours)
Department Chair permission is required for registration. Students enrolled in this course are participating in a full time internship experience with an accounting firm.
Outcomes:
Students will work 40+ hours for an accounting firm during the spring semester

ACCT 395 Independent Study in Accounting (1-3 Credit Hours)
Pre-requisites: Junior standing, Instructor and Dean permission required
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of accounting not otherwise covered by department course offerings. Variable credit is allowed for the course. This course will not count toward major requirements. Permission of dean required.
Outcomes:
Students will demonstrate an in-depth understanding of a technical accounting topic

ACCT 399 Special Topics in Accounting (1-3 Credit Hours)
Pre-requisites: Sophomore standing or above
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ACCT 400 Financial Accounting for Business Decisions (3 Credit Hours)
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400B Financial Accounting for Business Decisions (3 Credit Hours)
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400E Financial Statement Analysis and Decision Making (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the development and application of financial statement information. Students will focus on basic concepts, standards, and practices of financial reporting to serve decision-making needs. Students will also work with financial ratio analysis software.
Course equivalencies: ACCT600E/ACCT400E

ACCT 402 Issues in Financial Reporting (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course stresses research of selected accounting issues and uses the authoritative pronouncements to better understand financial accounting and reporting. The course structure includes lectures, class discussion, case analysis, and research of timely accounting issues. Group interaction is heavily emphasized.
Outcomes:
Students will be able to demonstrate an understanding of the professional pronouncements as they relate to the recognition and measurement of selected accounting topics; Students will also be able to work as a team to research an accounting issue and professionally communicate their research findings

ACCT 404 Financial State Analysis (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course evaluates the information contained in the financial statements, footnotes, and management discussion and analysis for its usefulness in making investment and credit decisions. Students will synthesize these assessments via a comprehensive financial statement analysis project.
Outcomes:
Students will be able to assess the appropriateness of asset valuation, liability measurement, and equity values for judging the performance of an enterprise

ACCT 405 Accounting Theory I (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent with a grade of C- or better
The course involves a detailed study of the theory, concepts, and procedures of financial accounting. The course focuses on applications involved in accounting for assets, equities, and the valuation and measurement of related income items. It also focuses on the accounting model with emphasis on applying the accounting framework to revenue and asset valuation. Time is spent discussing the theory and logic behind the accounting model and how it impacts financial statements. Restricted to Graduate School of Business Students.

ACCT 406 Accounting Theory II (3 Credit Hours)
A continuation of ACCT 405, the course focuses on valuation issues related to liabilities and other special topics. Complex problems involving investments, earnings per share, pensions, leases, income taxes, bond valuation, and fair value accounting are studied.

ACCT 407 Tax Principles Applied to Individuals (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course provides detailed coverage of the key Federal income tax concepts and planning principles applicable to individual taxpayers.

ACCT 408 Tax Principles Applied to Entities (3 Credit Hours)
This course provides detailed coverage of the key Federal income tax concepts and planning principles applicable to various business entities and an overview of Federal transfer taxes.

ACCT 409 Audit I -Audit and Assurance (3 Credit Hours)
This course introduces the student to the environment in which Public Accounting exists as well as the standards, both AICPA and PCAOB, which firms must follow in rendering audit and assurance services. The course covers both the theoretical and practical issues involved in planning an engagement, risk assessment and the audit risk model, evidence gathering and internal control policies and procedures. The audit of major transaction cycles (i.e. the revenue cycle) and account groups (i.e. Cash) are then covered highlighting internal specific control policies, testing of controls and substantive audit procedures to gather evidence. Study of appropriate AICPA and PCAOB professional standards is an integral part of this course.

ACCT 410 Audit II-Advanced Audit and Professional Ethics (3 Credit Hours)
This course consists of an in-depth study of specific topics related to both attest and non-attest services rendered by public accounting firms. Topics include: Professional ethics and a study of the AICPA Code of Professional Conduct; Accountants legal liability, federal securities laws and cases related to CPA malpractice; The use of technology and sampling in an audit; Securities & Exchange Commission practice, the integrated audit and the Sarbanes-Oxley Act; and Audit and other reports. Study of appropriate AICPA and PCAOB professional standards is an integral part of this course.

ACCT 411 Business Law and Accountants (3 Credit Hours)
This course is designed to familiarize the student with aspects of the legal environment of special concern to accountants. With emphasis on the legal aspects of commercial transactions, the course examines the laws governing sales transactions and the instruments for financing those transactions. Topics include contract law, the Uniform Commercial Code (sale of goods, negotiable instruments, secured transactions), and creditor-debtor relations.

ACCT 412 Special Topics in Accounting (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ACCT 424 Managerial Accounting (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
Topics include product costing and activity based costing concepts, development and analysis of information for short-run and long-run decision making, the impact of accounting information on divisional performance, cost estimation and cost-volume-profit analysis, segment analysis, transfer pricing, budgeting concepts, and behavioral issues associated with accounting information.
Outcomes:
Develop and use managerial accounting information for operational and strategic decision making

ACCT 424E Strategic Cost Accounting (3 Credit Hours)
Pre-requisites: Restricted to students in the Executive MBA Program
Explores the application of internal accounting information. Students will focus on traditional and contemporary managerial accounting practices. Students will work to (1) understand cost behavior, (2) conduct activity analysis, and (3) predict cost under different business decisions.
Course equivalencies: ACCT 424E/ACCT 601E

ACCT 425 International Accounting (3 Credit Hours)
This course explores the similarities and differences of accounting principles and procedures between the United States and other countries. Topics include consolidation of foreign subsidiaries, performance evaluation of foreign operations, translation issues, inflation accounting, and efforts at standardization of accounting rules.
Outcomes:
Students will become familiar with international accounting issues including accounting harmonization, pronouncements of the International Accounting Standards Board, transfer pricing, foreign currency financial statements, foreign exchange, and international taxation

ACCT 431 Tax Research (3 Credit Hours)
This course will provide graduate business students with the basic techniques of conducting federal tax research, and enable them to apply those techniques to a variety of research cases and communicate their research results in both written and oral formats. Includes establishing relevant facts; identifying tax issues; developing & communication conclusions and recommendations in writing and orally.

ACCT 432 State, Local and International Tax (3 Credit Hours)
Pre-requisites: ACCT 408 with a grade of C- or better or its equivalent; Department Consent Required
This course will provide graduate business students with a basic understanding and familiarity with the principles of U.S. multi-jurisdictional taxation. The first half of the course will focus on the various types of state and location taxation and their common themes and differences. The second half will address Federal income taxation of cross-border transactions, both inbound and outbound.
Outcomes:
Demonstrate the ability to properly allocate taxable income between different taxing jurisdictions; Understand the basic principles and policies underlying state, local, and international taxation; Develop a working knowledge of the different types of taxes

ACCT 433 International Tax (3 Credit Hours)
Pre-requisites: ACCT 341 or ACCT 408
This course will provide graduate business students with a basic understanding and familiarity with the principles of U.S. International taxation. The course will primarily focus on US companies with foreign subsidiaries ("outbound transactions") but will also discuss foreign companies with US subsidiaries ("inbound transactions") and individual taxation. Topics include; Sources of income, foreign tax credits, controlled foreign corporations (CFCs), Subpart F provisions, US treaties, and BEPS initiatives.
Outcomes:
Develop an understanding of International taxation and how it impacts operational and strategic decision making

ACCT 435 Internal Audit (3 Credit Hours)
This course will expose students to the fundamentals of internal auditing with an emphasis on internal controls. Topics covered will include an overview of internal auditing theory and internal audit in practice. After these overviews, an in depth review of internal controls will be examined, including internal controls best practices, risk assessment, control identification, audit design, testing of controls and audit reporting. Finally, the class may include a hands-on internal audit engagement in a real life setting. Student must have completed 9 hours of undergraduate accounting or 6 hours of graduate accounting courses.
Outcomes:
Students should have a clear understanding of how internal controls are used throughout a company and how auditors help design, test and report on their effectiveness

ACCT 436 Forensic Accounting and Fraud (3 Credit Hours)
The purpose of the course is to familiarize students to the field of Forensic Accounting and sensitize them to: the prevalence of fraud in all forms of business activity; the methods people use in initiating/perpetuating fraud scheme; ways of staying out of or getting out of a fraud conspiracy. Students are presumed to have strong accounting and auditing skills. This course will be covering ethics, accounting, auditing, misappropriation of assets, fraudulent financial reporting, electronic fraud and other fraud investigation/forensic accounting topics.
Outcomes:
Students who successfully complete this course will be able to demonstrate: knowledge of the nature and magnitude of economic fraud as it affects a variety of entities; understanding of the role of the accounting profession in fraud prevention and detection; technical knowledge of forensic accounting, forensic investigations and research

ACCT 437 Advanced Forensic Accounting (3 Credit Hours)
This course will focus on fraud audits of private entities. In the course of financial reviews questions arise about complex financial transactions, employee dishonesty, collusion, and breakdowns in internal controls. Normal audit procedures may discover the issue but additional steps are necessary to quantify and detect the extent of the fraud.
Outcomes:
Students in this course will develop basic forensic skills via analytical training

ACCT 439 Independent Study (1-3 Credit Hours)
Independent study is in-depth research and/or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of accounting not otherwise covered by department course offerings. Student is typically expected to develop a manuscript worthy of publication. The project should require the workload associated with a graduate level course. Normally, this course may be taken one time for credit.
Outcomes:
Student must demonstrate a detailed understanding of the selected accounting topic

African Studies and the African Diaspora (AFR)

Discover, search, courses (p. 2953)!

AFR 102 Introduction to Black World Studies (3 Credit Hours)
Introduction to Black World Studies examines several cultures within the Black world, across various countries and regions around the globe. Students will be familiarized with the impact of tradition, religion, oppression, popular culture, art, memory and specific aspects of trans-generational practices on these cultures as well as the influences of colonialism upon African peoples and the latter upon the former.
Interdisciplinary Option: African Studies and the African Diaspora

AFR 295 Directed Readings in Black World Studies (3 Credit Hours)
This course allows students to engage in a directed self-study of a topic in the realm of African Studies and the African Diaspora that is not covered in other courses offered in the program. Students will work with the AFR Director or another advisor to develop their own class readings and research assignment. Director approval is required for this course.

AFR 397 Capstone/Internship (3 Credit Hours)
This capstone course may be completed in a variety of ways. This includes an internship at a business or organization that is related to the program, or a study abroad semester related to the program. Internships require a minimum of 10 hours/week verified service hours over the 15 week semester, amounting to 3 credit hours. Students may also make a 300 level AFR course into a "Capstone" by adding an additional, in-depth research assignment approved by the course instructor and the program director. Director approval is required for this course.
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.

American Sign Language (ASL)

Discover, search, courses (p. 2953)!

ASL 101 American Sign Language I (3 Credit Hours)
ASL 101 is the first class in the American Sign Language series at Loyola. It presents the basic skills and use of ASL and basic knowledge of Deaf & Hard of Hearing Culture.
Outcomes:
Students will: 1) demonstrate the basic abilities to comprehend and communicate in ASL; 2) demonstrate an understanding of Deaf & Hard of Hearing communities

ASL 102 American Sign Language II (3 Credit Hours)
Pre-requisites: ASL 101 or equivalent
This course is designed for students who have completed a college level ASL I course and have a basic knowledge of ASL. It is the second course in the ASL series at Loyola and presents intermediate skills and use of ASL and continued working knowledge of Deaf & Hard of Hearing culture.
Outcomes:
Students will: 1) demonstrate abilities to comprehend and communicate in ASL at an intermediate level; 2) demonstrate an understanding of Deaf & Hard of Hearing communities

ASL 103 American Sign Language III (3 Credit Hours)
Pre-requisites: Completion of ASL 102, or prior to enrolling in ASL 103, students must consult ASL professors for language placement, ensuring readiness based on prior experience
This course includes vocabulary-building and mastery of grammar through rigorous receptive and expressive activities. ASL skills development applied to complex grammatical structures. Topics include location and description of items in rooms and buildings, complaints, making suggestions, and making requests. Depicting /Indicating verb grammatical structures introduced. Discussions of Deaf culture. 2) Acquire adequate speed in expressive and receptive signing skills. 3) Expand sign terminology in areas such as classifiers, sentence types, numbers, NMS
Outcomes:
1) Demonstrate fluency in expressive, receptive fingerspelling/numbering in ASL

ASL 104 American Sign Language IV (3 Credit Hours)
Pre-requisites: Completion of ASL 103, or prior to enrolling in ASL 104, students must consult ASL professors for language placement, ensuring readiness based on prior experience
This intermediate ASL course refines students¿ expressive and receptive skills. Advanced linguistic structures introduced and put into practice. Vocabulary-building in specific challenging areas: academics, occupations, computer technologies, and abstract nouns. Current events discussed in ASL, giving students opportunities to apply linguistic-cultural knowledge while participating in open discussions. 2) Narrate and describe events in connected, paragraph-length ASL discourse. 3) Exchange information and perspectives in group settings at intermediate level.
Outcomes:
1) Comprehension and expression with intermediate ASL vocabulary and correct grammar

Anthropology (ANTH)

Discover, search, courses (p. 2953)!

ANTH 100 Globalization and Local Cultures (3 Credit Hours)
This course examines anthropological approaches to social and cultural changes associated with globalization, particularly how global patterns of inequality profoundly impact people's lives.
Knowledge Area: Foundational Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, Global Studies, Human Services, International Business
Course equivalencies: ANTH100/271/INTS271
Outcomes:
Students will demonstrate an understanding of relationships between historic and contemporary global processes, especially ways globalization influences inequality and peoples' social, symbolic, material, political, and economic existence

ANTH 101 Human Origins (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the biocultural evolution of our species, Homo sapiens. It addresses the basic human desire for self-understanding. We explore what it means to be human through the use of genetics, non-human primates, and the fossil record. Each section of the course contributes to an overall understanding of human origins and the process of evolution.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics
Outcomes:
By the end of the semester students will have a better understanding of human nature, our relationship to the world around us, and our interactions with each other

ANTH 102 Culture, Society, and Diversity (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, PSYC 100, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the anthropological study of living people, or cultural anthropology, with particular focus on how people understand, act in, and transform their worlds. Students will also consider how anthropology can help us think about our own society and what it means to be human in different times and places.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Human Services, International Business
Outcomes:
Students will be able to demonstrate ways that central concepts of cultural anthropology help us understand cultural diversity; learn how to think critically about various cultures (including their own); and be aware of the ethical dimensions of research with living people

ANTH 103 Biological Background Human Social Behavior (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines possible biological bases of modern human behavior, from a scientific and multi-disciplinary perspective, to explore questions regarding what comprises "human nature".
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics
Outcomes:
Students will demonstrate an understanding of how science is conducted, as well as interactions between science and culture, in the context of how evolutionary approaches to animal behavior may be applied to the study of human behavior

ANTH 104 The Human Ecological Footprint (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to global human ecology and concentrates on how we as humans affect global ecosystems and how these changes can impact our behavior, health, economics, and politics.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Global Studies, Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: X-ANTH104ESP104PAX104INTS102
Outcomes:
Students will be able to draw connections between basic ecological processes and the global patterns of human population growth, health and disease, inequality and poverty, subsistence strategies, and land use and technology

ANTH 105 Human Biocultural Diversity (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines human variation through a biocultural approach, with specific attention paid to historical and contemporary ideas of race.We explore genetics and how evolution by natural selection has favored important adaptations, how those specific adaptations have helped humans migrate and survive across the planet's habitats, and socio-cultural and scientific ideas about race that have resulted in inequalities.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Bioethics, Neuroscience, Race and Ethnicity
Course equivalencies: X-BIET 105/ANTH 105
Outcomes:
Students will gain an understanding of how biocultural approaches help us understand human variation, with specific attention paid to skin color and the idea of race; Students will learn how scientific racism in anthropology contributed to our ideas of race, and how that can be seen in contemporary US society

ANTH 106 Sex, Science and Anthropological Inquiry (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines sex utilizing a scientific and anthropological lens. Anthropology brings a unique perspective to the study of sex by examining it across cultures and through an evolutionary perspective. In this class, we will travel around the world and through deep time to examine how sex is shaped by biological, cultural, and political factors. Topics include sex, sexuality, sexual orientation, gender, evolution, reproductive biology, parenting, sex work, and sexually transmitted infections.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Women & Gender Studies
Course equivalencies: X-ANTH 106/WOST 106/WSGS106
Outcomes:
Students will be able to demonstrate an understanding of the intersection of sexology and anthropology, an evolutionary perspective on sex, the physiological and anatomical aspects of male and female sexual systems, a comparative view of human sexuality across the life course, and how globalization is influencing sex and gender

ANTH 107 Ancient Worlds (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores societies in the near and distant past, with an emphasis on examining cultures left out of standard US and world history textbooks.
Knowledge Area: Tier 2 Historical Knowledge
Outcomes:
Students will be able to: 1) describe the early history and scientific foundations of archaeology; 2) explain important developments in human history; 3) apply their knowledge to decolonize world history

ANTH 203 Violence, Social Suffering, and Justice (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, PSYC 100, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This class investigates violence, suffering and justice through an ethnographic and cross-cultural perspective. It asks, how are overt forms of violence related to larger social structures which produce less visible forms of suffering? How are violence and suffering related to other socio-cultural phenomena such as race, gender, sexuality and identity?
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies, Race and Ethnicity, Women & Gender Studies
Outcomes:
Students will understand: the ethnographic analysis of violence and social suffering; political and economic contexts of violence, including colonialism, globalization, racism, and poverty; movements for justice and safety

ANTH 205 Gender in Cross-Cultural Perspective (3 Credit Hours)
This course explores a broad range of cultural expectations for gender diversity and the experiences of women in different cultures.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ANTH205/WOST205/WSGS205
Outcomes:
Students will be able to demonstrate understanding of how categories and concepts of sex and gender are culturally constructed and reflect wide variation both historically and cross-culturally

ANTH 207 Economies, Culture, and Development (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
The course explores different types of and ideas about exchange, economies, and development in cross-cultural perspective and through ethnography.
Interdisciplinary Option: Global Studies
Outcomes:
The course will help students learn about (1) the development of social thought about non-Western economic activity; (2) the key theories from and debates within Economic Anthropology; (3) contemporary ethnography about economies and development; and (4) ways to think critically about and apply course concepts

ANTH 208 Language and Identity (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, PSYC 100, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course will examine how language both reflects and helps constitute identity in social and linguistic interaction. Presenting a broad introduction, this course will address complex and often intersecting relationships between language and gender, race, class, place, age, and social practice, using case studies from around the world.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Students will learn how language is central to the expression and interpretation of social and cultural identities, and to human experiences of diversity

ANTH 210 Visual Representation of Culture (3 Credit Hours)
The course deals with how human cultural identities are represented through the construction of both moving and static visual images.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-ANTH210/IFMS210
Outcomes:
Students will gain critical skills resulting in greater visual literacy regarding how constructed visual images are used to represent cultures

ANTH 211 Peoples of Latin America (3 Credit Hours)
This course offers an anthropological overview of the major cultures and cultural regions of contemporary Latin America.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Latin American Studies, Race and Ethnicity
Course equivalencies: X-ANTH211/INTS211/LASP211
Outcomes:
Students will understand the basic cultural processes that led to the formation of the socio-political landscape of contemporary Latin American

ANTH 212 Peoples of Native North America (3 Credit Hours)
This course considers post-contact ethnography including key contemporary issues among indigenous North American peoples including Indian-white relations, assimilation, genocide, revitalization movements, sovereignty, environmentalism, urbanization, and native identity.
Outcomes:
Students will be able to describe the pattern and basis of cultural diversity among native North American peoples and their historical relationships with Euro-American colonists

ANTH 213 Culture in Africa (3 Credit Hours)
This course takes an interdisciplinary perspective, and includes discussion of African history, political economy, and contemporary forms of social life and culture. It also examines intellectual and historical trajectories informing how knowledge about Africa was and is produced.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Race and Ethnicity
Course equivalencies: X-ANTH213/BWS 213/INTS214
Outcomes:
Students will acquire a comprehensive grasp of significant issues in contemporary Africa, their historical relevance, and social and cultural impacts

ANTH 214 African-American Anthropology (3 Credit Hours)
This course offers an historical and contemporary exploration of various efforts undertaken by African Americans and their supporters to achieve racial parity, social justice and equality with other Americans, from the early presence of Africans in the Americas to the present period.
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-ANTH214/BWS 214
Outcomes:
Students will understand landmark legal cases brought to US courts of law by African Americans and their supporters and strengthen their critical thinking and writing skills on these and related topics

ANTH 215 Contemporary Japanese Culture (3 Credit Hours)
This course critically evaluates popular and scholarly characterizations and theories about Japan through investigation of ethnicity, gender roles, language, demographic change, and the impact and role of popular culture.
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: ANTH215ASIA361INTS215ASIA215
Outcomes:
Students will be able to demonstrate an awareness of how Japanese values and behavior are influenced by culture and history, an understanding of the relationships among cultural, economic, and social forces, and of contemporary social diversity

ANTH 216 Cultures of Migration (3 Credit Hours)
Using theoretical, ethnographic, and autobiographical literature from different world regions, we will explore three central questions: 1) How do people make the decision to move? 2) How do political policies structure the life chances of im/migrants in the "global north"? 3) How do im/migrants transform their own life situations and communities?
Interdisciplinary Option: Global Studies, Italian American Studies, Latin American Studies, Race and Ethnicity
Outcomes:
Students will understand: an anthropological approach to the study of migration; leading theories of migration; contemporary migration patterns; im/migrant labor; factors that shape the formation of im/migrant communities

ANTH 217 Mexican Culture & Heritage (3 Credit Hours)
In this class, students become familiar with Mexico and its people as we explore Mexican history, contemporary Mexico, and Mexican migration to the United States. At each juncture, we consider how sociocultural developments shaped Mexican society in the context of the region and the world.
Interdisciplinary Option: Global Studies, Latin American Studies, Race and Ethnicity
Course equivalencies: X-ANTH217/INTS217/LASP217
Outcomes:
Students will be able to explain concepts such as colonialism, neocolonialism, globalization, and migration through their application to Mexican culture and history

ANTH 220 Contemporary Cultures of the Middle East (3 Credit Hours)
Focusing on the culturally diverse region of the Middle East, the course considers historical dynamics, diversity of religious orientations, gender and ethics relations, nation-building strategies, and expressive arts (architecture, film, literature and media), from the Middle East.
Interdisciplinary Option: Arabic Language and Culture, Global Studies, Islamic World Studies
Course equivalencies: X-ANTH220/IWS220/INTS222
Outcomes:
Students will be able to demonstrate an understanding of the history, geography, religious, cultural and ethnic diversity of the Middle East as well as the major ethnographic themes and scholarly debates concerning the area

ANTH 222 Culture in Contemporary Europe (3 Credit Hours)
This course explores culture in contemporary Europe from an ethnographic perspective. Topics include recent developments in European nationalisms; the EU and Europeanization; (im)migration and integration; family and gender; production and branding; international tourism; and the politics of language in both 'old' and 'new' Europe.
Interdisciplinary Option: European Studies, Global Studies, European Studies, Global Studies
Outcomes:
Students will understand the role of culture in European current events, appreciate the challenges facing the European Union, and articulate connections between European history and contemporary European and global politics

ANTH 224 Social Movements, Culture, and Activism (3 Credit Hours)
This class examines social movements and activism from an ethnographic perspective. Case studies will examine movements across the globe. Topics to analyze include: what socio-cultural contexts shape, and are shaped by, social movements? How do social movements organize themselves, and what meanings or belief systems do they appeal to?
Outcomes:
familiarizing students with the ethnographic analysis of social movements; analyzing the socio-cultural effects of global commodity flows, secularization, environmental pollution, corporate power, migration and other political issues; examining how people resist, reproduce and alter relations of power; and introducing students to the broader field of political anthropology

ANTH 225 Museum Cultures (3 Credit Hours)
This course explores the museum as a dynamic site of cultural production and consumption. It examines the historical and contemporary relationships between museums, anthropology, and material culture, particularly the broader socio-cultural context of collecting from and representing cultures. Students will visit, discuss, and critique exhibitions in Chicago-based museums.
Outcomes:
Students will gain knowledge of museums as sites of anthropological study and practice, particularly the formation, history, and use of anthropological collections, and cultural representations

ANTH 231 Linguistic Anthropology (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
This course introduces the subfield of linguistic anthropology through a survey of topics, including linguistic relativity, linguistic patterning and structure, nonverbal communication, indexicality, and linguistic diversity and inequality.
Outcomes:
Students will demonstrate knowledge of the historical, scientific, methodological, and analytical foundations of linguistic anthropology

ANTH 241 Principles of Archaeology (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104
Introduction to the ethical principles and scientific methods used to investigate the archaeological record, including issues of stewardship, community collaboration, research design, fieldwork strategies, materials analysis, and archaeological interpretation.
Outcomes:
Students will able to explain the basic methods and theory of the archaeological process; Students will also be to apply their knowledge to craft an archaeological research design

ANTH 242 Mesoamerican Archaeology and Survivance (3 Credit Hours)
This course explores the cultures and peoples of Mesoamerica (Mexico, Guatemala, Belize, Honduras, El Salvador) in long-term perspective, with emphasis on Indigenous survivance and heritage. Cultures examined include the Mayas, Olmecs, Teotihuacanos, Zapotecs, and Mexicas (Aztecs).
Interdisciplinary Option: Latin American Studies, Race and Ethnicity
Course equivalencies: ANTH242/LASP216
Outcomes:
Students will be able to: 1) define what is meant by Mesoamerica; 2) identify how Mesoamerican heritage connects to contemporary nations and descendants; 3) explain key themes in Mesoamerican archaeology

ANTH 243 North American Archaeology (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104
This course surveys archaeological evidence in North America with focus on regional patterns of indigenous adaptation and explanations for prehistoric culture change.
Outcomes:
Students will be able to describe the chronological pattern and regional diversity in the cultural evolution of prehistoric societies in North American from ice-age colonization to European contact

ANTH 244 Historical Archaeology (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104; Recommended: ANTH 241
Historical archaeology merges the study of documentary records with material remains to understand the overlaps, gaps, and contradictions in narratives about the human experience. This course is an introduction to the methods of historical archaeology, including issues of perspective, coloniality, and silencing that shape our understanding of history.
Outcomes:
Students will be able to 1) describe how archaeology and anthropology complement documentary analysis; 2) identify sources of bias in historical analysis; 3) apply intersectional and community-based methods to archaeology

ANTH 245 Gender in Deep Time (3 Credit Hours)
Students will critically reflect on gender in cross-cultural and long-term perspective. From an anthropological perspective, they will also deconstruct their own cultural biases and assumptions. With a deep and critical understanding of contemporary norms, students will apply evidence-based reasoning to examine the construction of gender in the past.
Interdisciplinary Option: African Studies and the African Diaspora, Women & Gender Studies
Outcomes:
1) Describe Western ideas of gender and sexuality; 2) identify connections between feminist movements and gender archaeology; 3) apply an intersectional approach to the study of gender both past and present

ANTH 246 Ancient Human-Animal Interactions (3 Credit Hours)
Pre-requisites: For BIOL-BS, BIOL-MINR, and BIOE-BS students: BIOL 102; for all others: ANTH 101, ANTH 104, BIOL 102, ENVS 101, or ENVS 137
This course focuses on human-animal interactions in the past and covers how humans have shaped the geographic ranges and behaviors of animals today. Questions on whether humans caused prehistoric animal extinctions and how animal domestication occurred will be explored using evidence from archaeological and paleontological records around the world.
Course equivalencies: X - ANTH 246 / BIOL 246
Outcomes:
Students will demonstrate an understanding of how archaeologists use empirical data to answer questions about prehistoric human-animal interactions

ANTH 247 Aliens, Atlantis, and Archaeology (3 Credit Hours)
Students will examine the foundations of archaeological knowledge claims to distinguish science from pseudoscience. Students will also examine ways of knowing that go beyond Western science (i.e., Indigenous epistemologies). In the end, students will understand why academic archaeologists do or do not accept claims about ancient aliens or mythical moundbuilders. 2) Differentiate science from pseudoscience in popular media. 3) Construct an evidence-based argument about an archaeological controversy.
Outcomes:
1) Identify logical arguments and their supporting evidence

ANTH 258 Medical Anthropology & Global Health (3 Credit Hours)
This course examines how society and health are intertwined using medical anthropology and global health. Medical anthropology is the study of how health and illness are shaped, experienced, and understood cross-culturally, while global health is dedicated to improving the health of populations worldwide. Students will apply their knowledge to develop a research proposal.
Interdisciplinary Option: Bioethics
Outcomes:
Students will learn how medical anthropologists and global health scientists work in varying cultural contexts to understand health and illness

ANTH 280 Evolution of Human Disease (3 Credit Hours)
The complex interaction between humans and pathogens is explored throughout time, with particular emphasis on the role and impact of human biology, human culture, and changing environments.
Interdisciplinary Option: Bioethics
Course equivalencies: X-ANTH280/BIOL280/BIET280
Outcomes:
Students will be able to demonstrate understanding of the human immunological system, competing paradigms of human health, the processes and mechanisms of biological evolution, the pathogeneses of specific diseases, and the archaeological, paleopathological, paleodemographic, and historical data used to explore the evolution of disease

ANTH 281 Evolution of the Human Diet (3 Credit Hours)
Pre-requisites: For BIOL-BS, BIOL-MINR, and BIOE-BS students: BIOL 102; for all others: ANTH 101 or BIOL 102
This interdisciplinary course explores the evolution of the human diet utilizing a biocultural perspective. The complex interplay between our diet, biology, and culture is examined through energy acquisition, primate and hominin nutrition, the Agricultural Revolution and Industrialization on human health, food sustainability, and nutritional inequality through socioeconomic and gender lenses.
Course equivalencies: X-BIOL 281/ANTH 281
Outcomes:
Students will identify the role food has played throughout the 6-7 million years of human evolution, and its significance in terms of climate change variability, evolutionary adaptations and contemporary inequality

ANTH 300 Anthropology Career Development (3 Credit Hours)
Pre-requisites: Restricted to ANTH/SANT majors and minors
This course empowers students to translate their undergraduate anthropology education into a professional portfolio that communicates their knowledge, skills, and experiences to graduate schools and future employers.
Outcomes:
Through personal reflection exercises, the preparation of professional and scholarly application documents, and proposal writing, students will gain insight into how their anthropological education informs their future professional interests

ANTH 303 People and Conservation (3 Credit Hours)
This course considers the interplay between indigenous peoples and environmental resources utilizing current perspectives from evolutionary and community ecology, conservation biology, anthropology, political ecology and economics.
Interdisciplinary Option: Bioethics, Global Studies
Course equivalencies: ANTH303/INTS303A/BIET303
Outcomes:
Students will demonstrate an understanding of factors influencing this interplay, including environmental ethics, traditional environmental knowledge, resource management, community-based conservation, property rights, common-pool resources, sustainable development, land tenure, indigenous movements, and eco-tourism

ANTH 304 Anthropological Theory (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
In this course, we review major works of anthropological theory that have influenced anthropology over the course of the past two centuries. We attend to dynamic conversations that occur within the discipline, the geopolitical diversity (and lack thereof) of anthropological theorists, and we consider how these factors have shaped the trajectory of anthropological research over time.
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Students will: Demonstrate in-depth knowledge of major paradigms and concepts in anthropology; apply anthropological theory to contemporary topics and debates; critically discuss ethical and political implications of anthropological research; demonstrate familiarity with main points of agreement and disagreement in the discipline

ANTH 305 Violence and Culture (3 Credit Hours)
This course examines the complex relationships between violence and culture using the ethnographic method as practiced by anthropologists and other social scientists.
Interdisciplinary Option: Global Studies, Sociolegal Studies
Course equivalencies: ANTH305/INTS303/PAX305
Outcomes:
Students will demonstrate an understanding of the ways violence destroys, alters or produces forms of cultural meaning and social action and the ways in which cultural difference impacts patterns of violence

ANTH 306 Anthropology and Human Rights (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
This course examines the concept of universal human rights, and the social movement that has developed to promote human rights, from an anthropological perspective.
Interdisciplinary Option: Global Studies, Sociolegal Studies
Course equivalencies: ANTH306/INTS308/PAX306
Outcomes:
Students will be able to demonstrate an understanding of the social and historical origins of the concept of human rights and analyze the debates that arise out of applying the concept of human rights in cross-cultural contexts

ANTH 307 The Body and Culture (3 Credit Hours)
This course examines how culture shapes how the human body is understood, categorized and used, and it also examines how bodily experiences shape culture and society. Drawing on cultural anthropology, it analyzes diverse cross-cultural examples, possibly ranging from body decoration among Amazonian indigenous people, to plastic surgery, childbirth, or sports.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will learn how socio-cultural forces shape human bodies; understand how cultural anthropology examines the body; and examine classic social theories about bodies, gender, social class and subjectivity

ANTH 309 Urban Anthropology (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
This course is focused on defining characteristics of city life across a variety of societies It particularly considers urban complexity in the context of the globalization of cities.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will gain a cross-cultural and global outlook on the defining features of urbanism

ANTH 314 Applied Anthropology (3 Credit Hours)
Pre-requisites: ANTH 304 or Instructor approval
This course offers a hands-on introduction to the application of anthropological principles and methods to non-academic, "real world" problems. Course sessions will be dedicated to situating applied anthropology within the broader discipline, learning methods, and practicing applied cultural techniques. Students will also develop and carry out an applied cultural anthropology project.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will: situate applied anthropology in the broader discipline; practice a variety of applied methodological techniques; work with a community partner to design a project; prepare a comprehensive and clearly written report

ANTH 316 Anthropology of Religion & Ritual (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
The course considers religion as a form and part of culture. The innovative as well as conservative features of religion in culture change are addressed. Religion's role as both a belief-system and ritual practice are underscored.
Outcomes:
Students will develop the capacity to view religion in a broad perspective and to understand it as a significant factor of belief and practice in cultural systems

ANTH 317 Ethnographic Methods (3 Credit Hours)
This course is designed to offer an introduction to qualitative methods in anthropology. Students will learn methodologies such as participant observation, interviewing, and document analysis, and we will also address ethical issues in field research. Students will design and carry out an ethnographic research project. Instructor permission required.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will: demonstrate in-depth knowledge of qualitative research techniques; critically discuss ethical implications of ethnographic research; undertake original ethnographic fieldwork; prepare a comprehensive, theoretically informed, and clearly written report based on original ethnographic data

ANTH 319 Anthropology of Tourism (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
This course explores the phenomenon of tourism from an anthropological perspective, addressing the social, cultural, economic, and environmental impact of tourism on host communities and nations.
Interdisciplinary Option: Global Studies
Course equivalencies: X-ANTH319/INTS319
Outcomes:
Students will demonstrate an understanding of the strengths/limitations of various theoretical models for understanding tourism dynamics; tourism's role in national development; the interplay between tourism and cultural imagery; gender dynamics in tourism; the role of tourism institutions (museums, souvenirs, travel literature) in the construction of "exotic others"

ANTH 321 Human Rights in Latin America (3 Credit Hours)
This course examines human rights in Latin America from a multidisciplinary perspective. It asks: what are human rights? Why have human rights abuses occurred and how have Latin Americans responded?
Interdisciplinary Option: Catholic Studies, Global Studies, Latin American Studies, Peace, Justice, and Conflict Studies, Sociolegal Studies
Course equivalencies: X-ANTH 321/LASP 398
Outcomes:
Students will understand the international human rights legal framework, be able to analyze why abuses have occurred, and understand how Latin Americans have mobilized by studying specific cases

ANTH 324 Human Evolution (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 103
The course examines the discipline of paleoanthropology, including the techniques and methods, evolutionary framework, and detailed analysis of skeletal and archaeological material that form our current understanding of human evolution. Students will develop critical thinking skills in how to interpret the human fossil and archaeological records.
Interdisciplinary Option: Forensic Science, Neuroscience
Outcomes:
Students will be able to discuss the interdisciplinarity of paleoanthropology, including the use of specific geology, chemistry, and archaeological techniques

ANTH 325 Primatology-Behavior & Ecology (3 Credit Hours)
Pre-requisites: ANTH 101 or any 100-level Biology course
This course examines primate behavior and ecology from a comparative and evolutionary perspective. Students will be introduced to the diversity across taxonomic groups within the Order Primates. Through class discussion and observation, students will explore key issues in primate studies. Students will develop and apply skills in primate observation.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-ANTH325/BIOL325/ESP 325
Outcomes:
Students will be able to describe the taxonomic diversity of non-human primates and explain the impact of biological, evolutionary, and ecological factors on primate behavior

ANTH 326 Human Osteology Lec/Lab (4 Credit Hours)
Pre-requisites: ANTH 101, or ANTH 103, or background in Biology
This course focuses on developing a deep understanding of the human skeleton and ways in which biological anthropologists and forensic anthropologists use this knowledge to explore human biological diversity. Through hands-on exercises and class discussion, students will build analytical skills that are foundational to many techniques used by professionals and will appreciate the complex ethical considerations inherent to the fields of biological and forensic anthropology.
Interdisciplinary Option: Forensic Science
Course equivalencies: X-ANTH326/BIOL326
Outcomes:
Students will be able to demonstrate superior knowledge of skeletal anatomy, analyses of skeletal remains from archaeological contexts, and apply current techniques designed to understand and explore human variation, stature, ancestry, age-at-death, sex, and pathological conditions

ANTH 327 Dental Anthropology (3 Credit Hours)
Pre-requisites: ANTH 101 or any 100-level Biology course
This course examines teeth with an anthropological perspective. By using evolution by natural selection as our theoretical framework, students will learn dental anatomy, morphology, and variation. The course then focuses on embryology, dental development and eruption, and the biocultural ways humans use their teeth.
Course equivalencies: X- ANTH 327/BIOL 378
Outcomes:
Students will gain factual knowledge of teeth from an evolutionary perspective and will develop specific hands-on skills needed by dental anthropologists, dentists, and oral biologists including dental molding, casting, and wear scoring

ANTH 328 Pompeii and Herculaneum (3 Credit Hours)
The two best known Roman towns - Pompeii and Herculaneum - whose remains were preserved by the eruption of Mt. Vesuvius in 79 CE - will serve as a microcosm for understanding Roman society.
Interdisciplinary Option: European Studies
Course equivalencies: HIST328/CLST328/ANTH328
Outcomes:
Students will gain an understanding of how recent archaeological discoveries have changed our view of Pompeii and Herculaneum and learn to "read" such things as dining and bathing rituals, gladiator games, and public and private architecture to gain insight into the structures of Roman social and cultural life

ANTH 330 Language in Popular Culture (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102 or ANTH 208
This course presents a critical approach to understanding language and linguistic innovation in popular culture, including entertainment and news media, digital communication, and political discourse.
Outcomes:
Students will 1) identify linguistic patterns and language ideologies in mass media and digital discourse, 2) critically assess linguistic evaluations and (mis)representations of social groups, 3) apply linguistic anthropological insights to their own experiences with language in pop culture

ANTH 332 Language, Race, and Inequality (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102 or ANTH 208
This course addresses how and why languages and speakers are associated with racialized stereotypes, and how linguistic discrimination operates in U.S. culture today. In-depth case studies examine language and race in education, mass media, material culture, and everyday interaction. Critical perspectives on sociolinguistic norms and relationships between language, Whiteness, and power are also included. Critical thinking and writing are emphasized.
Interdisciplinary Option: African Studies and the African Diaspora, Latin American Studies, Race and Ethnicity
Outcomes:
Students will identify relationships between language and race in everyday life, recognize and analyze instances of linguistic discrimination, stereotypes, and covert racism

ANTH 334 Intro to Classical Archaeology (3 Credit Hours)
Refer to CLST 334
Interdisciplinary Option: European Studies
Course equivalencies: X-ANTH334/CLST334

ANTH 334R Introduction to Classical Archaeology - Rome/Italy Focus (3 Credit Hours)
This course focuses on the main explorations and achievements in the recovery of monuments of the ancient Greco-Roman world, particularly in Rome and Italy, and on the methodologies involved with the recoveries.
Course equivalencies: X-ANTH334/CLST334
Outcomes:
Students should be able to recognize and interpret selected sites and monuments of the Greco-Roman world; They should be able to demonstrate knowledge of methodologies and the technical vocabulary of classical archaeology

ANTH 340 Classical Archaeology: Greek Temple (3 Credit Hours)
Refer to CLST 340
Course equivalencies: X-ANTH340/CLST340

ANTH 342 Rise & Fall of Civilizations (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104
This course examines the socio-cultural process that produced complex societies in the past, particularly the contrasting trajectories of Old World and New World civilizations. Emphasis is on the material manifestations of status differences, power relations, and ideological control.
Outcomes:
Students will appreciate the complicated dynamics that underwrite increasing socio-cultural differentiation and will understand the archaeological methods used to chart that differentiation through time

ANTH 346 Biology of Women (3 Credit Hours)
The biology of women at pivotal points in the lifespan, along with the biological changes that occur from one life stage to another. The interaction of society (e.g., medical field) with women at each of these points in time. Topics to be discussed include the evolution of sex and gender, gender differentiation and diversity, reproductive processes, disease, detection and treatment, and violence against women.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: BIOL346/WOST346/ANTH346/WSGS

ANTH 348 Museum & Material Culture Research (3 Credit Hours)
This course offers direct experience with anthropological research methods and analysis using material culture and archival holdings from the May Weber Ethnographic Study Collection. Grounded in object-based studies and using examples from the collection, this course will examine collecting contexts, formal and technical analyses, operational sequences, cultural contexts, and interpretation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain knowledge of research techniques for working with museum-held objects while contributing to the permanent documentation and interpretation of the May Weber Ethnographic Study Collection through object research

ANTH 353 Epidemics and Pandemics (3 Credit Hours)
Pre-requisites: ANTH 101 or BIOL 101
This interdisciplinary course tracks how scientists from multiple disciplines have come together to understand and combat epidemics, such as Ebola, HIV, Zika, SARS, MERS, and COVID-19. From the molecular pathways underlying disease to the cultural contexts shaping public health responses, students will understand epidemics and pandemics from a biological and social perspective.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to demonstrate understanding of the biological, epidemiological, clinical, and social aspects of key epidemics/pandemics; Students will develop critical thinking skills by using this information to develop locally-relevant public health recommendations

ANTH 356 Bioanthropological Lab Work (1-3 Credit Hours)
Pre-requisites: permission of department chairperson or instructor
Individualized opportunity to learn about and engage in the main laboratory methods used in bioanthropological research
Outcomes:
Students will gain detailed knowledge of the main bioanthropological lab methods

ANTH 359 Paleopathology (3 Credit Hours)
Pre-requisites: ANTH 101 or Instructor permission; Recommended: ANTH 326
This course introduces advanced students to the exploration of the history of human disease through the analysis of human skeletal remains.
Interdisciplinary Option: Forensic Science
Course equivalencies: X-ANTH359/BIOL359
Outcomes:
Students will have command of biological anthropological approaches towards the understanding of human disease and will be familiar with theoretical issues germane to the field of paleopathology, biases and ethical issues, and the role that disease has played throughout human history

ANTH 360 Issues in Archaeology (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104
Specific theoretical, methodological, and research problems in archaeology with focus on current research in the discipline. Topics include but are not restricted to: environmental archaeology; ethnoarchaeology and experimental archaeology; the study of prehistoric craft specialization, trade, demography, and urbanism.
Outcomes:
Students will be able to draw connections between contemporary archaeological method and theory and current research issues in anthropology

ANTH 361 Issues Cultural Anthropology (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
The course is a vehicle for topics of particular interest to the instructor or an issue of contemporary relevance. It may be a trial run for a course later added to the official list.
Outcomes:
Students will be able to demonstrate how cultural anthropology is relevant to contemporary issues or how a problem can be structured around a cultural anthropological viewpoint

ANTH 362 Issues in Biological Anthropology (3 Credit Hours)
Pre-requisites: ANTH 101 or BIO 101
This course considers specific topics pertinent to the discipline of physical or biological anthropology.
Outcomes:
Students will master theoretical perspectives and current information pertinent to the specific issues covered in each specific course

ANTH 362B Bioethics Minor Capstone: Anthropological Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This course number will only be used when ANTH 362 is tagged with the Bioethics Minor Capstone course.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and anthropological issues with regard to the special topic in anthropology

ANTH 363 Issues in Linguistic Anthropology (3 Credit Hours)
Pre-requisites: ANTH 208 or ANTH 231
This course focuses on a current research question or area within linguistic anthropology.
Outcomes:
Students will be able to demonstrate appropriate knowledge and application of methods and findings from aspects of linguistic anthropology pertinent to the specific topic of the course

ANTH 365 Archaeology Lab Methods (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104
Practicum in analysis techniques for common archaeological materials, such as lithics, ceramics, faunal and floral remains, and historic debris. Topics include transformation processes; classification techniques; data recording and analysis standardization; curation; and computerized strategies of data management and analysis.
Outcomes:
Students will be able to identify, describe, and classify basic archaeological materials and relate these analyses with traditional techniques of material fabrication and processing

ANTH 366 Lithic Technology (3 Credit Hours)
This course is a laboratory analysis of archaeological stone tools through experimentation and ethno-archaeology.
Outcomes:
Students will demonstrate an understanding of causes of variability in raw material procurement, manufacturing techniques, use wear, discard, recycling, methodological and theoretical considerations of artifact classification and strategies of data management and analysis

ANTH 375 Archaeology of Early Greece (3 Credit Hours)
Refer to CLST 375
Course equivalencies: X-CLST375/ANTH375

ANTH 396 Internship in Anthropology (3-6 Credit Hours)
Pre-requisites: Students must receive instructor permission prior to enrolling and must complete (with signatures) the Course Contract Form Enrollment is limited to Undergraduate Anthropology Majors/Minors.
This course is designed to enhance student engagement by facilitating internship experiences within the department or in museums, service-oriented organizations, businesses, and non-profit organizations. Experiential learning is combined with rigorous academic work. This course may serve, if appropriate, as a capstone experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will produce a research paper, project, proposal, or assessed piece that reflects the application and integration of anthropological theory, methods, or techniques, to the internship experience

ANTH 396A Internship: Bioarchaeology & Forensic Anthropology (3 Credit Hours)
This course is designed to enhance student engagement by facilitating internship experiences in forensic anthropology and bioarchaeology, working in collaboration with community partner organizations. Experiential learning is combined with rigorous academic work. This course may serve, if appropriate, as a capstone experience. Instructor permission required.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-FRSC 390/ANTH 396A
Outcomes:
Students will produce a research paper, project, proposal, or assessed piece that reflects the application and integration of forensic-anthropological theory, methods, or techniques, to the internship experience

ANTH 396M Internship: Museum Collections Management (3 Credit Hours)
Pre-requisites: Instructor permission required
Through a 100-hour internship in the May Weber Ethnographic Study Collection on the Lakeshore campus, students will contribute to the ongoing professional management of a museum collection.

ANTH 397 Directed Readings-Anthropology (1-3 Credit Hours)
Pre-requisites: Permission of chairperson and faculty member
Individualized readings in varied topics within anthropology.
Outcomes:
Students will gain detailed knowledge of the specific topic of their directed readings subject

ANTH 398 Independent Study-Anthropology (1-3 Credit Hours)
Pre-requisites: Permission of chairperson and faculty member
Individualized program of independent study of anthropological problems and/or issues.
Outcomes:
Students will gain detailed knowledge of the specific study program they undertake

ANTH 399 Fieldwork in Anthropology (1-6 Credit Hours)
Pre-requisites: Permission of chairperson and faculty member
Application of anthropological concepts and methods to a specific field situation under the supervision of a faculty member.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn field techniques and data recovery and analysis techniques pertinent to the specific nature of their field experience

Applied Criminal Justice Leadership (ACJL)

Discover, search, courses (p. 2953)!

ACJL 310 Organizational Leadership in Criminal Justice (3 Credit Hours)
This course provides an introduction to the study of criminal justice organizations and leadership practices. It includes a review of leadership styles, budgeting, communication with members, personnel problems, maintaining organizational accountability, promoting and responding to internal and externally-imposed reforms, and other leadership challenges. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Discuss leadership challenges in criminal justice organizations and institutions; Describe best leadership practices for continuing improvement and effectiveness; Research and review the academic literature associated with police leadership and management; Critically assess the strengths and weaknesses of the major theories of police leadership and management

ACJL 320 Ethics, Justice, Leadership (3 Credit Hours)
Study of ethical obligations of criminal justice personnel and the meaning of justice, with emphasis on law enforcement and corrections components; includes management strategies and accountability for ensuring ethical conduct, civilian review and discipline, civil liability, and importance of leadership in promoting and maintain an ethical and just work environment. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Apply basic principles of moral theory and concepts of justice to ethical issues, moral dilemmas, and other challenges facing actors working within the criminal justice system; Use methods and strategies for effective leadership skills to promote an ethical environment in criminal justice organizations; Foster an ethical organizational environment, including ethics training, development of codes of ethics and rules of professional responsibility; Adopt methods of promoting accountability, including technological and civilian review of accountability systems, and effective disciplinary mechanisms; Identify strategies for investigating systemic criminal justice system misconduct

ACJL 330 Community Policing in the 21st Century (3 Credit Hours)
This course examines the history and development of police community relations and its importance for crime control. Topics covered include community policing, problem oriented policing, and the effect of aggressive patrol strategies on community relations. The recommendations of the President's Task Force on 21st Century Policing are also examined. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Examine the history and development of effective police community relations and its importance for crime control; Recognize the role of racial, class, and cultural identities in a diverse American society and the effect of racial profiling and unconscious bias on community relations; Describe community policing, problem-solving policing, and other emerging strategies; Research and review the academic literature associated with the study of community policing; Critically assess the strengths and weaknesses of the major theories of community policing; Discuss the recommendations of the President's Task Force on 21st Century Policing, including the adoption of internal and external procedural justice, a guardian culture, and less than lethal force standards

ACJL 340 Effective Communication in Criminal Justice (3 Credit Hours)
Effective written and oral communication for CJ personnel; includes grammar, spelling, punctuation, chronological articulation, and writing style in investigative reports and other documentation, public speaking, active listening skills, conducting interviews, providing oral witness testimony in criminal prosecutions, and managing media relations and communications. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Develop effective written and oral communication for rank and file and supervisory criminal justice personnel; Use proper grammar, spelling, punctuation, chronological articulation, and writing style in investigative notes, reports, and other documentation; Practice effective public speaking; Employ active listening skills and positive personal interactions with citizens; Practice conducting interviews, providing oral witness testimony in criminal prosecutions, and managing media relations and communications

ACJL 350 Conflict Management and Communication (3 Credit Hours)
Study of challenges confronting police and correctional personnel in conflict situations arising from order maintenance and other forms of social control; the role of systemic social problems such as mental illness, family violence, and substance abuse in conflict situations; strategies and best practices for violence avoidance and de-escalation. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Discuss the challenges confronting police and correctional personnel in conflict situations arising from order maintenance, arrests, supervision of offenders, and other forms of social control; Describe the role of systemic social problems, mental illness, family violence, elder abuse and neglect, and substance and alcohol abuse in conflict situations; Identify strategies and best practices for violence avoidance and de-escalation; Apply theories of how conflict happens; Practice the essential skills of effective listening, negotiating, mediating, and leading others to resolve conflicts

ACJL 360 Cyber-Crime Detection and Investigation (3 Credit Hours)
Reviews computer-based criminal activities and criminal investigative methods used for investigation, apprehension, and prevention; includes hacking, identity theft, bitcoins, stalking, human trafficking, and other forms of computer fraud and crime; reviews digital security methods, cell phone tracking, social media, and other means of investigating such crimes. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Describe contemporary, computer-based criminal activities, including hacking, identity theft, bitcoins, stalking, human trafficking, and other forms of computer fraud and crime; Identify modern criminal investigative methods used for investigation, apprehension, and prevention; Evaluate digital security methods, cell phone tracking, social media, and other means of investigating such crimes

ACJL 370 Crime Analysis (3 Credit Hours)
This course provides an overview of the analytical methods used by criminal justice agencies including crime analysis, mapping, and program evaluation. The class will focus on best practices and the application of current technology. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Discuss issues in crime analysis and crime mapping; Critique current practices; Identify technologies used in crime analysis; Describe the techniques of crime analysis and crime mapping and how they are practiced in everyday policing; Apply social science research methods and data analysis to crime analysis

ACJL 380 Investigation Management (3 Credit Hours)
A review of best practices in the management of investigative personnel, resources, and strategies in major and routine criminal investigation including proactive and reactive tactics for crimes against property, persons, vice, and narcotics. Traditional versus intelligence-led policing, COMPSTAT, and state versus federal investigations are also covered. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Describe best practices in management of investigatory personnel, resources, and strategies in major and routine criminal investigation; Assess proactive and reactive tactics for crimes against property, persons, and vice and narcotics, traditional versus intelligence-led policing, COMPSTAT, and state versus federal investigations; Research and analyze the academic literature associated with managing criminal investigations; Critically assess the practices used to manage criminal investigations

ACJL 385 Advanced Criminal Procedure (3 Credit Hours)
This course reviews basic 4th Amendment search and seizure law, including exceptions to the general warrant requirement, and exceptions to the exclusionary rule. It proceeds to study individual and agency liability for excessive force by law enforcement and correctional officers, unauthorized eavesdropping, digital information gathering, and related topics. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Define the legal principles governing law enforcement emanating from the 4th, 5th, and 6th Amendments to the Constitution of the US; Describe the manner in which those principles have been derived from both the text and the interpretations of those constitutional amendments; Practice the language of criminal law practitioners and others in the courthouse "workgroup"; Identify legal issues arising from law enforcement criminal investigations and methods in different factual circumstances; Apply constitutional law principles for the resolution of criminal procedure issues

ACJL 395 Special Topics in Criminal Justice Leadership (3 Credit Hours)
This course focusses on different relevant, special topics in criminal justice. These include criminal profiling, terrorism, private security, new constitutional developments in search and seizure law, gang intelligence, militarization of police, and other timely topics. Restricted to Applied Criminal Justice Leadership majors only.
Outcomes:
Students will learn about a specific, timely topic critical to contemporary criminal justice functions

Arabic (ARAB)

Discover, search, courses (p. 2953)!

ARAB 101 Arabic I (3 Credit Hours)
This course is designed for beginners and those with modest acquaintance to Arabic. Through a culturally rich context, it focuses on functional articulation of Modern Standard Arabic with a limited exposure to Damascene (Shaami) dialect.
Interdisciplinary Option: Arabic Language and Culture, Islamic World Studies
Course equivalencies: ARAB101/IWS101A
Outcomes:
Students will be able to write simple sentences, understand selected principles of basic grammar and vocabulary, and will be introduced to Modern Standard Arabic as well as to a modern spoken dialect; Students will learn aspects of Arab culture

ARAB 102 Arabic 102 (3 Credit Hours)
Pre-requisites: ARAB 101 completed with C- or higher
This course continues focusing on active functional use of Modern Standard Arabic and Damascene dialect to help students develop speaking, listening, reading comprehension, and writing skills in diverse sociocultural contexts. Students with equivalent preparation must be assessed for placement.
Interdisciplinary Option: Arabic Language and Culture, Islamic World Studies
Course equivalencies: X-ARAB102/IWS102A
Outcomes:
Students are expected to be able to sustain conversations on daily life topics, to comprehend and compose simple authentic multimodal texts, and integrate interdisciplinary knowledge of the Arab world (language, religion, history, geography, or cultures) through a project

ARAB 103 Arabic 103 (3 Credit Hours)
Pre-requisites: ARAB 102 completed with C- or higher
This course continues focusing on active functional use of Modern Standard Arabic and Damascene dialect in familiar topics reflecting the behavior of native speakers. Students are expected to reach low-mid intermediate proficiency levels. Students with equivalent preparation must be assessed for placement.
Interdisciplinary Option: Arabic Language and Culture, Islamic World Studies
Course equivalencies: ARAB103/IWS103A
Outcomes:
Students are expected to be able to initiate and sustain simple social interactions about self and immediate environment; Students will be able to comprehend and compose simple authentic multimodal texts and apply such interdisciplinary knowledge of the Arab world (language, religion, history, geography, or cultures) through a final project

ARAB 104 Arabic 104 (3 Credit Hours)
Pre-requisites: ARAB 103 completed with C- or higher
The course help students build an active learning solid foundation in the intermediate level of functional use of Arabic. Students are expected to learn how to own their learning process and engage critically in representations of self and others. Students with equivalent preparation must be assessed for placement.
Interdisciplinary Option: Arabic Language and Culture, Islamic World Studies
Course equivalencies: X-ARAB104/IWS104A
Outcomes:
Students are expected to be able to compose and comprehend more complex authentic multi modal texts in topics of relevance to student, investments and fields of study; They will articulate their integrative interdisciplinary knowledge of the Arab world through a final project

ARAB 250 Advanced Composition And Conversation (3 Credit Hours)
Pre-requisites: ARAB 104 or equivalent; Students' self-assessment is not sufficient for placement in an appropriate level of Arabic class
The focus of the course assignments is to connect classroom work and community-based service learning into a constructive coordinated dual relationship. Bedsides classroom language learning, students will complete 20 hours in community-based work at an organization of service to Arab and Muslim immigrants and refugees. Some readings may be in English.
Interdisciplinary Option: Arabic Language and Culture, Islamic World Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: ARAB250/IWS250A
Outcomes:
Students will synthesize classroom and community-based learning contexts to reflect on collective and individual explorations of concepts of civic engagement with Arab/Muslim communities; They will demonstrate awareness of self and community through learning portfolios and public presentations

ARAB 251 Advanced Composition and Conversation II (3 Credit Hours)
This course emphasizes the development of advanced Arabic speaking and writing skills and examines grammar and vocabulary in relation to advanced skill development. Conducted entirely in Arabic.
Interdisciplinary Option: Arabic Language and Culture, Islamic World Studies
Course equivalencies: X-ARAB251/IWS251A
Outcomes:
Students will be able to demonstrate advanced reading, writing, listening, and speaking skills in Arabic; Students will also be able to demonstrate knowledge of significant aspects of the Arab world and culture in relation to their major field of study

Arrupe Accounting (ACACT)

Discover, search, courses (p. 2953)!

ACACT 201 Introductory Accounting I (3 Credit Hours)
Co-requisites: ACMAT 117
The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process, and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include preparation and use of financial statements, the accounting process, and the measurement and reporting of income, assets, liabilities, and owners' equity.
IAI code: BUS 903
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
The student will be able to understand the underlying principles, design, concepts, limitations, and the necessity of accounting systems; The student will gain an appreciation of the uses of financial data and financial statements and their impact on business decisions

ACACT 202 Introductory Accounting II (3 Credit Hours)
Pre-requisites: ACACT 201
This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.
IAI code: BUS 904
Course equivalencies: ACCT202/ACCT202H/ACACT201
Outcomes:
The student will be able to understand the differences between cash and accrual accounting, the use of ratio analysis in investing and managing decisions, the value and importance of identifying and allocating costs, and the methods involved in the budgeting process

Arrupe Biology (ACBIO)

Discover, search, courses (p. 2953)!

ACBIO 101 General Biology I (3 Credit Hours)
Co-requisites: ACBIO 111
General Biology I is a 3-credit lecture course that introduces the fundamental principles of Biology focusing the fields of cell structure and function, molecular genetics, and evolution. Topics covered in the course include introductory chemistry, cell structure and function, cellular communication, metabolic processes, cellular reproduction, and introductory genetics. Students will be able to demonstrate an understanding of matter, energy, and organization in living systems. 2. Students will be able to demonstrate an understanding of the biochemistry and metabolism of organisms. 3. Students will be able to demonstrate and understand the fundamental concepts of cell structure, function, and processes. 4. Students will be able to explain the major concepts of molecular genetics, including the flow of genetic information from DNA to RNA to proteins and how changes in genes impact cellular function, organismal health, and evolutionary trajectories.
Course equivalencies: ACBIO 101 / BIOL 101
Outcomes:
1

ACBIO 102 General Biology II (3 Credit Hours)
Pre-requisites: ACBIO 101 and ACBIO 111 with grade of C- or better
Co-requisites: ACBIO 112
General Biology II is a 3-credit lecture course that introduces the fundamental principles of Biology focusing the fields of evolution and evolutionary history, plant structure and function, animal form and function. Topics covered in the course include evolutionary processes, speciation, history of life on earth, plant biology, soils, homeostasis, animal biology, mammalian organ systems, community ecology, and environmental challenges as scientific and social problems. Students will be able to demonstrate an understanding of biological evolution and differentiate between the processes of evolution. 2. Students will be able to demonstrate an understanding of the evolutionary history of life on Earth. 3. Analyze the functions and interrelationships of various organismal systems including plant structure and function, and animal form and function. 4. Explain major concepts of ecology including nutrient cycling, trophic levels, population dynamics, and biodiversity.
Course equivalencies: ACBIO 102 / BIOL 102
Outcomes:
1

ACBIO 111 General Biology I Lab (1 Credit Hour)
Co-requisites: ACBIO 101
General Biology 1 Lab is a 1-credit laboratory course that introduces students to the fundamental principles of organismal biology. Differentiate between the major taxonomic groups. 2. Make comparisons in cell structure and function among selected organisms. 3. Identify characteristics of selected organisms and understand the evolutionary and ecological relationships among taxonomic groups. 4. Demonstrate the ability to use current research techniques and instruments to study the diversity of organisms at the microscopic and macroscopic level.
Course equivalencies: BIOL 111/ACBIO 111
Outcomes:
1

ACBIO 112 General Biology II Lab (1 Credit Hour)
Pre-requisites: ACBIO 101 and ACBIO 111 with a grade of C- or better
Co-requisites: ACBIO 102
General Biology lab is a 1-credit laboratory course that introduces the fundamental principles of Biology focusing on evolutionary principles and processes, cell structure and function, plant and animal biological processes, and ecological principles. Differentiate between the major taxonomic groups. 2. Make comparisons in cell structure and function among selected organisms. 3. Identify characteristics of selected organisms and understand the evolutionary and ecological relationships among taxonomic groups. 4. Demonstrate the ability to use current research techniques and instruments to study the diversity of organisms at the microscopic and macroscopic level.
Course equivalencies: ACBIO 112 / BIOL 112
Outcomes:
1

Arrupe Chemistry (ACCHM)

Discover, search, courses (p. 2953)!

ACCHM 100 Introductory Chemistry (3 Credit Hours)
A course emphasizing the general principles and theories of chemistry, including fundamentals of inorganic chemistry, atomic structure and states of matter, bonding, stoichiometry, acid-base concepts, periodicity and solution chemistry.
Outcomes:
Understand the structure of matter and the chemical changes it undergoes, and predict those changes based on the periodic nature of the elements; Solve problems using chemical calculations concerning mass or concentration; Describe strong and weak acids and bases, and carry out related calculations; Develop the academic skills needed for future science courses including problem-solving, taking and reviewing notes, and multiple choice exams

ACCHM 101 General Chemistry I (3 Credit Hours)
Pre-requisites: ACMAT 117 (C- or higher); Corequisite: ACCHM 111
This course focuses on building a conceptual understanding of fundamental chemical principles. Topics include the periodic table of the elements, atomic structure, nuclear chemistry, basic concepts of quantum theory, bonding, stoichiometry of compounds and reactions, thermochemistry, solutions, acids and bases, and the gaseous state.
Course equivalencies: ACCHM / CHEM 101
Outcomes:
Build conceptual understanding of fundamental chemical principles

ACCHM 102 General Chemistry II (3 Credit Hours)
Pre-requisites: ACCHM 101 and ACMAT 118; Corequisite of ACCHM 112
Topics include the basic concepts of the liquid and solid states, solutions, reaction kinetics, equilibria, acid-base equilibria, solubility equilibria, reaction thermodynamics, and electrochemistry.
Course equivalencies: ACCHM / CHEM 102
Outcomes:
Continue building on conceptual understanding of fundamental chemical principles

ACCHM 111 General Chemistry Lab I (1 Credit Hour)
Co-requisites: ACCHM 101
This laboratory course translates theory and topics covered in the lecture (ACCHM 101) to application. Students will be introduced to basic chemical laboratory skills and techniques. Topics include lab safety, measurements and calculations, basic statistics, pH and titration, calorimetry, spectrophotometry, and a variety of chemical reactions.
Course equivalencies: ACCHM / CHEM 111
Outcomes:
Students will be able to apply proper lab safety and proper procedures for handling and disposal of chemicals, demonstrate proper manipulation of common equipment, as well as use and understand selected instrumentation

ACCHM 112 General Chemistry Lab II (1 Credit Hour)
Co-requisites: ACCHM 102
The second semester of general chemistry laboratory exposes students to qualitative analysis and continues the process of experimenting and collecting data to test the validity of theories and models presented in lecture, including the liquid and solid states, solutions, equilibrium, acid-base equilibria, solubility equilibria, kinetics, thermodynamics, and electrochemistry.
Course equivalencies: ACCHM / CHEM 112
Outcomes:
Formulate or evaluate hypotheses, plan and conduct experiments, make systematic observations, interpret and analyze data, draw conclusions, and communicate results

Arrupe Communication (ACCOM)

Discover, search, courses (p. 2953)!

ACCOM 101 Public Speaking & Critical Thinking (3 Credit Hours)
This course is designed to supply students with an understanding of critical thinking practices, foundational tenets of communication theory, the skills of public address and persuasion, the role of visual aids in effective presentation, and a sense of the social responsibility that comes with the capacity for communication.
IAI code: C2 900
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students gain skills in public speaking, preparing a presentation, including visual aids, and critical listening, thinking, and speaking

ACCOM 103 Business and Professional Speaking (3 Credit Hours)
Through theory and practice, the course will explore oral presentation in business and professional situations, including message design and audience analysis of organizations. Students will examine expectations for communication in business; after studying and analyzing professional context, students will complete three substantive presentations. Finally, students will gain a sense of social responsibility that comes with the capacity for communication.
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students gain skills in public speaking, preparing a presentation, including visual aids, and critical listening, thinking, and speaking with a focus on professional environments

ACCOM 200 Communication and New Media (3 Credit Hours)
This course explores the way technology affects personal, cultural, and mass communication through examining the historical, societal, and ethical implications of new and interactive forms of media.
Course equivalencies: COMM200 / IFMS200 / ACCOM 205
Outcomes:
Students use audio, video and digital tools to research and produce essays, projects and presentations that analyze the impact of technology on communication

ACCOM 201 Introduction to Communication (3 Credit Hours)
This course gives a general and theoretical overview of communication. By approaching communication through a critical and historical lens, students will acquire a foundation for further study and practice in communication.
Course equivalencies: COMM 175 /COMM 160 /ACCOM 201
Outcomes:
Students will have an understanding of the nature and structure of communication and be able to critically evaluate oral and written communications

ACCOM 274 Introduction to Cinema (3 Credit Hours)
This course introduces students to cinema as an artform and a mode of mass communication. By developing a film vocabulary and studying film aesthetics, students will learn how to evaluate film and create written formal analyses of film texts. Students will also consider the historical and cultural impact of films and begin to explore film theory and criticism.
Course equivalencies: ACCOM / COMM 274
Outcomes:
Understand film aesthetics and form; Develop basic filmic vocabulary related to production, distribution, and analysis; Develop critical standards for film evaluation; Critically evaluate films verbally and in written form; Recognize scholarly approaches to film studies and criticism; Analyze film texts considering historical and social context

Arrupe Computer Science (ACCOMP)

Discover, search, courses (p. 2953)!

ACCOMP 150 Introduction to Computing (3 Credit Hours)
This course provides a broad survey introducing the many layers of the computer science discipline, emphasizing the computer's role and limitations as a toll for describing, organizing, and manipulating information applicable to many disciplines.
Course equivalencies: ACCOMP 150/COMP 150
Outcomes:
Binary logic expressed in electronic circuitry, machine architecture, basic programming in Python, data organization, machine capacity, and useful tools

Arrupe Criminal Justice (ACCRJ)

Discover, search, courses (p. 2953)!

ACCRJ 201 The Criminal Justice System (3 Credit Hours)
This course provides an overview of the development and operations of the US criminal justice system. Attention will be focused on law enforcement, judicial organization, and correctional processes. The course will also consider the nature and extent of crime and will survey main theories of criminal behavior.
IAI code: CRJ 901
Course equivalencies: ACCRJ 201 / CJC 101
Outcomes:
Students will be able to demonstrate an understanding of the structure and challenges facing the criminal justice system from historical, interdisciplinary, and inter-agency relationship perspectives

ACCRJ 204 Corrections (3 Credit Hours)
This course examines the history, functions, and processes of corrections. The primary focus is institutional corrections and its evolution based on philosophies of retribution, deterrence, incapacitation, and rehabilitation. The role and influence of community correctional practices and policy on institutional corrections are also covered.
Course equivalencies: ACCRJ 204 / CJC 204
Outcomes:
Students will be able to identify and describe the role of institutional corrections in society and the criminal justice system and articulate the connection between theories regarding criminality and the purposes of incarceration that have historically guided and continue to guide American correctional practice historically and currently

Arrupe Economics (ACECO)

Discover, search, courses (p. 2953)!

ACECO 201 Microeconomics (3 Credit Hours)
This course is an introduction to demand and supply, consumer choice, price analysis in alternative industrial organizations, and the distribution of income.
IAI code: S3 902
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
Students will be able to think critically about price formation in different market structures, and how prices, household incomes and income distribution in a diverse society are determined with interpretations based on the concepts of opportunity costs and decision making under uncertainty

ACECO 202 Macroeconomics (3 Credit Hours)
This course is an introduction to national product, its components, money and the real sectors and business fluctuations.
IAI code: S3 901
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
The students will be able to think critically about the economic environment of the nation and to measure growth, unemployment, inflation, fiscal and monetary policies of the government, to ultimately understand economic stability and the welfare of the individual citizen

Arrupe English (ACENG)

Discover, search, courses (p. 2953)!

ACENG 110 Interpreting Literature (3 Credit Hours)
This is a foundational course in literary studies requiring students to read closely and analyze carefully a representative variety of prose, poetry, and drama, master key literary and critical term, and explore a variety of core critical approaches to the analysis and interpretation of literature.
Course equivalencies: ACENG 110 / UCLR 100
Outcomes:
Students will understand the structure and techniques of different literary forms and will be able to analyze the content of literary works with respect to the authors' purposes and meaning

ACENG 220 Introduction to Rhetoric: Classical & Contemporary (3 Credit Hours)
This course emphasizes the relevance of classical disputes for understanding current controversies over the nature and function of discourse. We will study several definitions of rhetoric, including rhetoric as "the art of persuasion," as the available means of persuasion, as identification, and others. Enrollment Conditions: Practical tools and theoretical methods will strengthen your skills in critical thinking, persuasive reasoning, and logical reasoning.
Course equivalencies: ACENG 220 / COMM 220

ACENG 271 Exploring Poetry (3 Credit Hours)
This class offers you the opportunity to become proficient in close reading and critical analysis of poetry with different styles, and from several different periods.
Course equivalencies: ENGL 271/ACENG 271
Outcomes:
1) practicing the skill of close reading & developing annotation strategies for literary texts, 2) mastering key literary terms and integrating them into your own analyses of literature, 3) placing the poems we read in conversation with their historio-political contexts, 4) using different literary theoretical lenses to ask new questions of our texts, and 5) articulating [explaining/stating] your interpretations: in class, on tests, and for written assignments

ACENG 273 Exploring Fiction (3 Credit Hours)
Exploring Fiction focuses on reading and analysis of fiction, especially short stories and novels, from a variety of periods, while examining and applying key approaches to determining literary meaning, form and value.
Course equivalencies: ENGL 273/ACENG 273
Outcomes:
1) Critically analyze fiction, especially short stories and novels, from a variety of periods, and apply a narrative theory approach to literary interpretation; 2)Interpret literary texts within various contexts - biographical, social, political, aesthetic, etc

ACENG 274 Exploring Shakespeare (3 Credit Hours)
This course focuses on the dramatic works of Shakespeare as literature and as theatre, covering at least three of the four genres (comedy, history, tragedy, romance). The class experience includes attendance at and discussion of performances of the Chicago Shakespeare Theater.
IAI code: H3 905
Course equivalencies: ACENG 274 / ENGL 274
Outcomes:
Students will be able to demonstrate understanding of the theatrical works of Shakespeare, such elements of drama as plot, character, theme, imagery, and verse forms, and the personal, political and theatrical world in which Shakespeare lived and worked

ACENG 276 Writing the Self (3 Credit Hours)
In this course, we will study nonfiction prose from a range of times and places. To focus our studies, we will investigate how a wide variety of authors have used writing to express, explore, and create a sense of self. When sharing their lives with an audience of readers, how do these authors navigate the territory between the private and public spheres, between internal experience and external reality, between self and environment? To answer this question, we will read a variety of nonfiction forms including diaries, essays, autobiographies, and graphic memoirs. Throughout the course, we will discuss issues of literary meaning, form and value.
IAI code: H3 904
Course equivalencies: ACENG 276 / ENGL 290
Outcomes:
Upon completion of this course, students will have demonstrated inquiry and pursue self-directed learning, mastered key literary terms, read for comprehension, read for analysis, and argued for literary interpretation

ACENG 282 African American Literature (3 Credit Hours)
This course focuses on the development of the African American literary tradition, including analysis of historic and contemporary themes. Readings may cover any time period in African American literature through the present.
Course equivalencies: ENGL 282 / ACENG 282
Outcomes:
Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods

Arrupe Fine Arts (ACFNA)

Discover, search, courses (p. 2953)!

ACFNA 100 Art and Visual Culture (3 Credit Hours)
A survey of the visual arts (painting, drawing, printmaking, sculpture and architecture) as they transmit cultural traditions and humanistic and aesthetic values. Examines historical, social and technological factors that contribute to understanding the function and meaning of works of art.
IAI code: F2 900
Course equivalencies: FNAR199/ICVM199/IFMS199/ACFNA1
Outcomes:
1) Introduce students to an appreciation of the visual arts through an inter cultural, social/historical approach; 2) Emphasize the nature of the creative process, integrating a study of the conceptual principles, with methods and materials which influence artistic critical thinking, problem solving, exploration, and discovery

ACFNA 105 Western Art: Renaissance to Modern (3 Credit Hours)
A general survey which explores the development of art in Western culture from the Renaissance to modern art in the twentieth century.
IAI code: F2 901
Course equivalencies: ACFNA 105 / FNAR 201
Outcomes:
Students will be able to demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of art in relation to their cultural, social, and historical contexts; Students acquire the skills to critically analyze the relationships between various art forms and their relation to historical cultures

ACFNA 112 Foundation Studio: Two Dimensional Design (3 Credit Hours)
This course explores the fundamental organizational systems of intentional visual expression through purposeful making of, and critical response to, traditional design concepts. The elements of art and the principles of design will be experienced through a range of media both tactile and digital, with emphasis on spatial perception, color theory, and visual communication. Students will recognize and experience the core concepts and practices of visual communication through hands-on exercises and projects addressing observation and perception, composition, transformation and manipulation of the picture plane, sequence and narrative, and the physical and communicative properties of pigment and color. Students will further engage these concepts through critical examination of images, texts, and objects representing a wide array of contemporary and historical visual culture.
IAI code: ART 907
Course equivalencies: FNAR112/ACFNA112

Arrupe History (ACHIS)

Discover, search, courses (p. 2953)!

ACHIS 101 Western Civilization to the 17th Century (3 Credit Hours)
This course traces the early development of Western civilization from the ancient Near East, Greece and Rome, the medieval civilization(s), and the European Renaissance and Reformation.
IAI code: S2 902
Course equivalencies: X-HIST101/CATH101/ACHIS101
Outcomes:
Students will gain an understanding of history as a discipline, be able to place Judaism, Christianity, and Islam in historical context, explain the expansion of the West, and develop critical thinking and communications skills

ACHIS 102 Western Civilization from the 17th Century (3 Credit Hours)
This course traces the development and of western civilization and its global impact from the seventeenth century to the present.
IAI code: S2 903
Course equivalencies: ACHIS 102 / HIST 102
Outcomes:
Students will gain an understanding of history as a discipline and develop critical thinking skills based on historical knowledge about the key people, places, and events that shaped the modern world

ACHIS 104 Introduction to Global History since 1400 (3 Credit Hours)
This course surveys the history of the world since 1400 by introducing students to the origins of diverse people and the intellectual, social, political, and economic developments of their societies to the present.
Course equivalencies: HIST / ACHIS 104
Outcomes:
Students will gain an understanding of history as a discipline; differentiate intellectual, social, political, and economic aspects between and among diverse people and their societies; place contemporary global issues within their historical contexts; and develop critical thinking and communications skills

ACHIS 201 US History to 1865 (3 Credit Hours)
This course is an introduction to the history of the United States from the colonial era through the Civil War.
IAI code: S2 900
Course equivalencies: HIST201/HIST111/ACHIS201
Outcomes:
Students will demonstrate an understanding of Native American societies, the impact of European colonization, the creation and evolution of democratic institutions in a multicultural society, the geographic expansion of the United States, and the impact of slavery

ACHIS 202 US History since 1865 (3 Credit Hours)
This course is an introduction to the history of the United States from the Civil War to the present.
IAI code: H2 905
Course equivalencies: HIST202/HIST112/ACHIS202
Outcomes:
Students will demonstrate an understanding of how the United States became a modern industrial society, the emergence and evolution of the modern welfare state, the rise of the United States as a global power, and the impact of controversies over civil rights and liberties on American society

ACHIS 220 Introduction to Mexican American History (3 Credit Hours)
This course surveys of the history of Mexicans and Mexican Americans in the United States, examining their social, political, and economic contributions to the history of the U.S. from the 15th century to the present.
IAI code: S2 923D
Outcomes:
Analyze pre-Columbian societies, European colonization, and Mexican migration; synthesize various interpretations and sources; situate Mexican American history past, present, and future

Arrupe Information Systems (ACINF)

Discover, search, courses (p. 2953)!

ACINF 247 Introduction to Information Systems (3 Credit Hours)
This course is an introduction to using information technology to support business processes.
Course equivalencies: INFS247/ISOM/MGSC247/ACINF247
Outcomes:
Students will understand the purpose and composition of information systems and develop expertise in the use information technology to develop business spreadsheets and database applications

Arrupe Interdisciplinary Science (ACISC)

Discover, search, courses (p. 2953)!

ACISC 101 Interdisciplinary Science: Scientific Basis of Environmental Issues (3 Credit Hours)
The foundational course in science is predicated on the view that understanding environmental issues and their underlying scientific principles will occupy a central role in our students' lives and will be critical in their development as informed and participating members of society. The overarching strategy of the course will be to frame environmental science in terms of a series of interacting systems to allow students to analyze a variety of environmental issues.
IAI code: LP 900
Course equivalencies: ENVS137/UCSF137/ENVS101
Outcomes:
1) Exhibit knowledge of the nature of the four Earth systems; 2) Draw inferences from evidence, constructing testable and falsifiable hypotheses and analyzing data; 3) Understand the role of energy and thermodynamics in ecosystems; 4) Understand and describe important cycles in nature

ACISC 102 Environmental Processes, Challenges, and Methods (4 Credit Hours)
This course examines scientific issues underlying a series of significant threats to the planet. These include the loss of biodiversity, ensuring access to a stable supply of food and water for all of the Earth's inhabitants, climate change, and the demands for energy and other resources. Students will also investigate possible responses to these planetary threats.
IAI code: LP 901L
Outcomes:
Students will understand the nature of contemporary environmental challenges, both as scientific and social problems

ACISC 102L Environmental Processes, Challenges, & Methods Lab (1 Credit Hour)
Co-requisites: ACISC 102
This course provides students with the opportunity to learn basic and intermediate lab skills commonly used in environmental science, including measuring properties of matter, analyzing soil, water and atmospheric samples, as well as the mathematics needed to analyze data and draw inferences from evidence.
IAI code: LP 901L
Outcomes:
Students will master basic scientific techniques related to the study of the environment

Arrupe Mathematics (ACMAT)

Discover, search, courses (p. 2953)!

ACMAT 100 Fundamentals of Math (3 Credit Hours)
This course focuses on the foundations of algebra. Topics include the real number system operations, variable expressions, linear equations and inequalities, graphing linear equations in two variables, slope and equations of a line, exponents and polynomials, applications of proportion, percent and the use of formulas to develop problem solving skills.
Course equivalencies: ACMAT100/MATH100
Outcomes:
Students will evaluate variable expressions; Students will solve and graph linear equations in two variables; Students will apply ratios and proportions

ACMAT 117 Precalculus I (3 Credit Hours)
Pre-requisites: "C-" or better in ACMAT 100 or by test placement
This course covers algebraic topics ranging from functions and their applications to complex numbers to inverse functions to the fundamental theorem of algebra.
Course equivalencies: ACMAT 117/MATH 117
Outcomes:
Students who plan to study calculus will obtain the algebraic background needed to enroll in precalculus

ACMAT 118 Precalculus II (3 Credit Hours)
Pre-requisites: "C-" or better in ACMAT 117 or required score on placement test
This course is a continuation of MATH 117 focusing on exponential, logarithmic, trigonometric, and inverse trigonometric functions, their graphs, and their properties. Techniques for solving equalities involving these functions are examined. Trigonometric identities, sum and difference formulas, double and half-angle formulas, the Laws of Sines and Cosines, and polar coordinates are also considered.
Course equivalencies: MATH 118/ ACMAT 118
Outcomes:
Students will build and improve their skills in algebra and pre-calculus topics in order to be able solve a variety of problems; The content and the strategies students will learn will prepare them to be successful in Calculus and courses beyond; Students will frequently be asked to express their mathematical thinking orally and in writing by working in groups and explaining their work

ACMAT 161 Calculus I (4 Credit Hours)
A traditional introduction to differential and integral calculus. Functions, limits, differentiation, the Intermediate Value Theorem, curve sketching, optimization problem, related rates, definite and indefinite integrals, the Fundamental Theorem of Calculus, logarithm and exponential functions, applications to the natural and social sciences. Restricted to Arrupe students. Students are eligible to enroll in the course upon successful completion of ACMAT 118 or by math placement exam.
Course equivalencies: ACMAT 161/MATH 161
Outcomes:
Students will obtain the background needed to enroll in Calculus II; This course satisfies the quantitative literacy requirement of the core curriculum

ACMAT 162 Calculus II (4 Credit Hours)
This course is a continuation of ACMAT 161, Calculus I.
Course equivalencies: ACMAT 162/MATH 162
Outcomes:
1) Select and apply appropriate models and integration techniques to solve problems involving algebraic and transcendental functions; these problems will include but are not limited to applications involving volume, arc length, surface area, force and work; 2) Recognize and implement appropriate techniques to integrate trigonometric functions and apply trigonometric substitutions to solve integrals; 3) Decompose a rational integrand using partial fractions; 4) Evaluate proper and improper integrals using various integration techniques: 5) Determine convergence of improper integrals with discontinuities in their domain or infinite limits of integration; 6) Apply basic anti-differentiation techniques to selected problems arising in various fields such as physical modeling, economics and population dynamics; 7) Find general solutions to basic differential equations and analytical solutions to separable differential equations; 8) Find solutions of various kinds of differential equations using Direction Fields and Euler's Method; 9) Develop the algebra associated with vectors in both two and three dimensions and define two fundamental operations for vectors: the dot product and the cross product; 10) Develop equations for lines and planes in space and explore their properties and uses; 11) Apply familiar single-variable function properties (domain, graphs, limits, continuity and derivatives) to multivariable functions; 12) Find maximum and minimum values of multivariable functions using partial derivatives; 13) Identify the Directional Derivatives and the gradient of a multivariable function

Arrupe Philosophy (ACPHI)

Discover, search, courses (p. 2953)!

ACPHI 130 Philosophy and Persons (3 Credit Hours)
This course examines the way philosophy looks for fundamental characteristics that identify life as a properly human life, asks about its ultimate meaning or purpose, and raises questions about what counts as a good life.
IAI code: H4 900
Course equivalencies: PHIL120/130/180/ACPHI130
Outcomes:
Students will be able to explain a claim to truth, to explain theories of value in human life, and to describe theories of the metaphysical nature of human persons

ACPHI 205 The Person and Society (3 Credit Hours)
A contemporary look at the origins of social problems, democracy movements (both domestic and international), and the role of government in society.
IAI code: H4 901
Course equivalencies: PHIL162/182/262/282/ACPHI205
Outcomes:
Students will understand the moral bases of social activity and have the ability to relate individual responsibilities with life in a society

ACPHI 274 Logic (3 Credit Hours)
Study of the rules of judging and reasoning, both inductive and deductive, in a traditional, language-centered context rather than a symbolic context. Logical analysis of both formal and informal fallacies and of the consistency and logical consequences of a given set of statements is included. Logical analysis is applied to problems dealing with knowledge of reality.
IAI code: H4 906
Course equivalencies: PHIL 174/PHIL 274/ACPHI 274
Outcomes:
Students will be able to formally analyze, evaluate, and demonstrate the various aspects of argumentation

ACPHI 281 Ethics (3 Credit Hours)
This course is a general introduction to ethics and moral philosophy.
IAI code: H4 904
Course equivalencies: PHIL 181 / PHIL 281 /ACPHI 281
Outcomes:
Students will be able to demonstrate understanding of criteria for choosing between conflicting ethical theories, moral disagreement, the justification of moral judgments, and the application of ethical standards to practical decision-making and ethical questions that arise in everyday life

ACPHI 284 Society, Justice, and Health Care (3 Credit Hours)
A study of the role of ethics and moral reasoning in healthcare contexts. Emphasis is placed on identifying ethical issues that arise in a variety of contemporary healthcare settings, and in critically applying ethical theories and concepts to respond to health care and medical issues.
Course equivalencies: PHL184/284BIET184PHL164BIET164
Outcomes:
Students will gain skills in ethical questioning, reasoning, and application, with an emphasis on the intersection of healthcare practice and broader social, political, and legal issues

Arrupe Political Science (ACPOL)

Discover, search, courses (p. 2953)!

ACPOL 101 American Government and Citizenship (3 Credit Hours)
This course examine American national government and politics, including institutions, group and electoral processes, and public policy. An underlying theme throughout the course identifies the rights and responsibilities of citizens within the American political system.
IAI code: S5 900
Course equivalencies: ACPOL 101 / PLSC 101
Outcomes:
Students will be able to demonstrate an understanding of the American political system, the patterns of political participation and behavior of diverse individuals and groups in American society, and evaluate the roles and processes of U.S. political institutions

ACPOL 200 Introduction to Political Thought (3 Credit Hours)
An introduction to political thought, covering the principal ideas, controversies and institutions of political society. Authors covered include Plato, Machiavelli, Locke, Hobbes, and Marx.
Course equivalencies: ACPOL 200 / PLSC 100
Outcomes:
Students will be able to demonstrate an understanding of major approaches to the normative study of politics, to identify the assumptions underlying philosophical arguments, and to critically assess different theories of political justice

ACPOL 202 International Relations (3 Credit Hours)
Competing perspectives on international politics and global issues such as North-South relations, human rights, war and peace, population growth, and environmentalism.
IAI code: S5 904
Course equivalencies: PLSC/PAX/ACPOL102/AFR110/INTS2
Outcomes:
Students will be able to demonstrate an understanding of the main approaches to the study of international politics and to analyze and assess such major substantive issues as interstate war, terrorism, arms control, international political economy and sustainable development

ACPOL 205 Power, Rap Music, and Urban America (3 Credit Hours)
By focusing on rap music and urban American society since the 1960s, this course delves into the social scientific analysis of race, gender, socioeconomic status, and other identities.

Arrupe Psychology (ACPSY)

Discover, search, courses (p. 2953)!

ACPSY 201 General Psychology (3 Credit Hours)
Introduction to concepts, theories, and methods in psychology. Emphasis is given to the scientific study of consciousness and human behavior. Topics include: human development, learning, thinking, perception, personality, testing, mental illness and mental health, biological and social aspects of behavior.
IAI code: S6 900
Course equivalencies: ACPSY 201 / PSYC 101
Outcomes:
Students will master basic concepts and key theories and learn to apply them to real-world situations

ACPSY 273 Developmental Psychology (3 Credit Hours)
Survey of theory and research relevant to human growth and development with emphasis on physical, cognitive, and social development from infancy through adolescence.
IAI code: S6 902
Course equivalencies: ACPSY273/PSYC273
Outcomes:
Students will demonstrate understanding of basic theory and research in human development, and will develop skills in critical examination of psychological research as applied to current issues in human development

ACPSY 275 Social Psychology (3 Credit Hours)
Pre-requisites: ACPSY 201
This course is an introduction to the field of social psychology, which seeks to understand human behavior by viewing it within its social and cultural context.
Course equivalencies: ACPSY 275 / PSYC 275
Outcomes:
Students will be able to demonstrate understanding of cultural and social group differences, which is critical to the development of inter-cultural understanding and the reduction of inter-group (or inter-cultural) conflict

ACPSY 280 Abnormal Psychology (3 Credit Hours)
Pre-requisites: ACPSY 201 General Psychology
Nature and causes of maladjustment and mental disorders. History of mental illness, diagnosis, research, and treatment of mental disorders.
Course equivalencies: X-CPSY333/PSYC331/ACPSY280
Outcomes:
Students will demonstrate understanding of current approaches to researching maladaptive behavior, current views of maladaptive behavior, major categories of mental disorders, factors contributing to development of problems, different types of intervention strategies, and appreciation of social, ethical, and legal issues

Arrupe Statistics (ACSTA)

Discover, search, courses (p. 2953)!

ACSTA 101 Statistics (3 Credit Hours)
Pre-requisites: D or better in ACMAT 100 or ACSTA ready as determined by ALEKS placement exam or standardized test score
This course provides an introduction to statistical reasoning and techniques in descriptive and inferential statistics and their applications in economics, education, genetics, medicine, physics, political science, and psychology.
IAI code: M1 902
Course equivalencies: ISSCM/H/241/STAT103/ACST101/03
Outcomes:
Students will obtain a background in the fundamentals of descriptive and inferential statistics along with an understanding of their uses and misuses

ACSTA 103 Introduction to Statistics (4 Credit Hours)
This course provides an introduction to statistical reasoning and techniques in descriptive and inferential statistics and their applications. All foundational mathematics topics necessary for college level Statistics will be reviewed and reinforced throughout the course. Topics will include: data collection processes (observational studies, experimental design, sampling techniques, bias), descriptive methods using quantitative and qualitative data, bivariate data, correlation, least squares regression, probability theory, probability distributions (normal distributions and normal curve, binomial distribution), confidence intervals, hypothesis tests using p-values.
Course equivalencies: ISSCM/H/241/STAT103/ACST101/03
Outcomes:
Students will develop the skills necessary to compute, compare and analyze numbers; obtain a background in the fundamentals of descriptive and inferential statistics; develop the skills necessary to analyze graphs and data sets; develop the algebra skills necessary to calculate descriptive statistics measurements; and explain the use of data sets and statistics as tools to reach reasonable conclusions

Arrupe Theology (ACTHE)

Discover, search, courses (p. 2953)!

ACTHE 101 Introduction to Christian Theology (3 Credit Hours)
This course is an introduction to reflection on and analysis of the Christian theological tradition.
Course equivalencies: ACTHE 101 / THEO 100
Outcomes:
Students will be able to demonstrate understanding of the tasks of Christian theology in its efforts to understand the human situation from the perspective of faith, various challenges to theology in the contemporary world, and will focus on one or more current theological issues

ACTHE 107 Introduction to Religious Studies (3 Credit Hours)
This course is an introduction to the contemporary field of religious studies.
IAI code: H5 900
Course equivalencies: THEO170 / THEO270 / ACTHE 107
Outcomes:
Students will be able to analyze and interpret various ways in which religious traditions intersect with contemporary issues

Arrupe University Course (ACUNI)

Discover, search, courses (p. 2953)!

ACUNI 101 First Year Seminar (1 Credit Hour)
This course introduces students to college life, especially that of an Arrupe student. The course focuses on Ignatian spirituality, community building, goal setting and attainment, academic success strategies, and task initiation.
Course equivalencies: UNIV101 / ACUNI 101

ACUNI 102 Academic Success Strategies (1 Credit Hour)
Designed to strengthen students' academic skills so that they can become more effective learners. By completing class readings and participating in class discussions and activities, students will learn and practice relevant and productive study strategies. Additionally, students will reflect on the motivations, achievements, and obstacles they encounter while working to become more successful students.
Outcomes:
Time management, motivation maintenance, study skills, and college resources

ACUNI 103 Career Exploration and Attainment (0 Credit Hours)
This course focuses on career exploration, development, and attainment. Students will identify their professional aptitudes and interests, develop their professional network, and hone their interviewing skills.
Outcomes:
1) Identify and evaluate career options based on aptitude and interests; 2) Identify and prioritize short-term and long-term steps for pursuing one or more careers of interest; 3) Use standard resume format; select and describe relevant educational, employment, and extracurricular experiences to demonstrate suitability for a specific position; 4) Develop an elevator pitch; 5) Use the STAR method to answer interview questions (STAR = Situation; Task; Action; Result)

ACUNI 104 College Transfer Seminar (0 Credit Hours)
This course is designed to help prepare first year students in identifying appropriate transfer institutions to apply to in the following fall and spring.
Outcomes:
Students will identify transfer institutions; understand direct and indirect costs of attending college; prepare their transfer applications; identify support services at the senior institution

ACUNI 201 A Journey in the Spirit of Ignatius (1 Credit Hour)
The purpose of the sophomore seminar is to provide students with the opportunity to utilize Ignatian values and reflective practices to identify their values, accomplishments and future personal, academic and or professional goals. Restricted to Arrupe Sophomores.
Outcomes:
Students will reflect upon how Ignatian values connect to their personal experiences and how they see themselves becoming persons for others

Arrupe Writing and Composition (ACWRI)

Discover, search, courses (p. 2953)!

ACWRI 105 College Writing I (3 Credit Hours)
College Writing I is designed to help first-year Arrupe students understand and meet college expectations for writing. Students will complete at least four polished papers during this course. Activities will also include informal writing, invention exercises, and responding to peer and instructor feedback. At least 60% of the final grade will be based on formal, graded writing assignments.
Outcomes:
Students will demonstrate an effective process for invention, drafting, and revision to produce polished academic work; communicate using written modes appropriate to audience and purpose; and analyze, synthesize, and evaluate texts

ACWRI 110 College Writing II (3 Credit Hours)
College Writing II is designed to help first-year Arrupe students understand and meet college expectations for writing. Students will complete at least three polished papers, including a long final paper that requires documented, multi-source writing. Activities will also include informal writing, invention exercises, information literacy instruction, and responding to peer and instructor feedback. At least 60% of the final grade will be based on formal, graded writing assignments.
Course equivalencies: SCPS200/ENGL106/UCWR/ACWR110
Outcomes:
In College Writing II, students will continue to practice and strengthen their writing process, including invention, drafting, and revision; Additionally, students will demonstrate skills needed in the research process, including finding, evaluating, and integrating material from reliable sources

Arts (ARTS)

Discover, search, courses (p. 2953)!

ARTS 200 Introduction to Teaching Artistry (3 Credit Hours)
Introduction to teaching artistry with an emphasis on art education, art integration and community-based arts practices.
Outcomes:
Students will identify and describe the practice of teaching artistry, reflect on a direct experience with an art organization, and create a lesson plan

ARTS 201 Grant Writing for the Arts (2 Credit Hours)
Introduction to grant writing for the arts. The course concludes with a completed grant proposal.
Outcomes:
Students will identify how to find grants that support the arts and engage in the process of applying for a grant or other arts funding

ARTS 397 Fieldwork in Arts Education (3 Credit Hours)
Credit given for arts education work outside the university undertaken under the guidance professional arts educators. Students keep an hour and activity log and write reflective evaluative papers. Permission of the Department of Fine and Performing Arts Specific outcomes and credit hours assigned to be determined by the student in consultation with the Teaching Artistry Faculty Coordinator and the project supervisor

Asian Studies (ASIA)

Discover, search, courses (p. 2953)!

ASIA 101 Explorations in Asian Studies (3 Credit Hours)
This course introduces the histories and cultures of East, Southeast, and South Asia from early modern times to the present.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-ASIA101/INTS202

ASIA 130 Introduction to Martial Arts (3 Credit Hours)
This course introduces the student to Chinese Wushu. Two forms of Wushu will be selected for in depth study each semester. Students will explore the origins of the sports studied and their importance to Chinese culture and philosophy while learning the specific physical techniques.
Course equivalencies: THTR130/ASIA130
Outcomes:
Students will improve their balance, flexibility and coordination while learning the basic moves of two forms of Wushu; They will develop a reference for appreciating the place of Wushu in Chinese culture and create a foundation for further Wushu training

ASIA 152 Drawing China (3 Credit Hours)
This is an introductory drawing course. There are no pre-requisites nor prior experience need to succeed in this course. Beijing is our laboratory and the topic of all class drawings.
Course equivalencies: FNAR152/ASIA152
Outcomes:
Students will be able to draw trees, buildings, automobiles, vegetables, human beings in real life situations and in perspective

ASIA 160 The Crafts of China (3 Credit Hours)
This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historical trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.
Course equivalencies: FNAR160/ASIA160
Outcomes:
Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China; Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture

ASIA 167 Religions in China (3 Credit Hours)
This course is a survey of various religions in China that may include, not only Confucianism and Taoism, but also Buddhism, Christianity, Islam, Judaism, Zoroastrianism, Manicheism and popular or "folk" religion. The course will consider the function of these various religions in the development of Chinese society and their significance in Chinese civilization from ancient mythology to contemporary practices and developments."
Course equivalencies: X-THEO167/ASIA167/INTS167
Outcomes:
Students will be able to demonstrate knowledge of the beliefs, practices, and institutions in varied contexts and historical periods in China, of various religions, both indigenous and "foreign

ASIA 168 Sacred Texts of China (3 Credit Hours)
Through the study of primary sacred texts of China (in translation), this class will provide a basic understanding of Chinese thought and its historical development. Interconnections among the various periods and different schools of Chinese philosophy such as Confucianism, Taoism, Buddhism and Neo-Confucianism will be demonstrated and discussed from ancient through the medieval and modern periods.
Course equivalencies: X-THEO168/ASIA168/INTS168
Outcomes:
Students will be able to demonstrate knowledge of the major Chinese sacred texts and teachings of various religious and philosophical traditions, and how they developed and interacted historically

ASIA 169 Taoism (3 Credit Hours)
Students will study the history and main ideas and practices of Taoism, meet the sages who wrote the Taoist texts, be introduced to the various schools of Taoist philosophy, and get a feel for what it means to practice Taoism today. The course will illustrate how religious Taoism established a relationship with Confucian thought and practice as well as how at each stage of its historical development, Taoism exerted a profound influence on Chinese politics, economy, culture, art, natural sciences, and social life.
Course equivalencies: X-THEO169/ASIA169/INTS169
Outcomes:
Students will be able to demonstrate knowledge of philosophical and religious Taoist beliefs, practices, and institutions in varied contexts and historical periods

ASIA 191 Traditional Chinese Philosophy (3 Credit Hours)
Students will investigate Chinese ancient philosophy in a way to let its own tendencies be sensed and appreciated. Topics include Confucianism, Mencius, Sunzi, Taoism, Legalism, Yin-Yang School, Tung Chung-shu, Chinese Buddhism and Neo-Confucianism. In addition, students learn about the relations among different schools or different thinkers in the same school. Comparisons between Chinese philosophies and western ones are encouraged.
Course equivalencies: X-PHIL191/ASIA191

ASIA 192 Chinese Ethics and Asian Values (3 Credit Hours)
This course offers an overview of the spirit of Chinese ethics, covering sacred and secular as well as intellectual and practical elements.
Course equivalencies: X-PHIL192/ASIA192/INTS192

ASIA 193 Contemporary Chinese Philosophy (3 Credit Hours)
Students will analyze the development of Chinese contemporary thought in its different stages: rejection of the tradition and its recent reevaluation.
Course equivalencies: X-PHIL193/ASIA193/INTS193

ASIA 252 Peoples of China (3 Credit Hours)
This class introduces China's cultural diversity and unity as a whole. It provides a general overview of cultural mappings in China, and a detailed study of significant ethnic minorities.
Course equivalencies: SOCL251/ASIA252/INTS251
Outcomes:
Students will gain the ability to perceive cultural phenomena in a comparative framework and understand cultural differences more deeply

ASIA 263 Political and Social Movements in China (3 Credit Hours)
This course examines historical and contemporary movements pursuing political, economic and social reforms in China. It studies both state-sponsored and voluntary movements.
Course equivalencies: SOCL263/INTS263
Outcomes:
Students will gain a deeper understanding of China's ongoing transformation, and will learn how to develop their own scholarly analysis of such social change

ASIA 266 Development and Social Change in Modern China (3 Credit Hours)
This course examines change and development in modern China from the late Qing period to the present, focusing on the movement from a planned economy to a market-based economy.
Course equivalencies: SOCL266/ASIA266/INTS266WSGS297
Outcomes:
Students will gain knowledge of China's economic development path, and will apply gender and/or class-based analysis to patterns of social change

ASIA 272 Environment of China (3 Credit Hours)
This course provides a systematic introduction to major environmental issues in the context of recent social and economic development in China
Course equivalencies: X-NTSC270/ASIA272/INTS270

ASIA 292 Modern Chinese Fiction (3 Credit Hours)
This course introduces selected fictional works by some of the most insightful writers of modern China. The course focuses on significant aspects of these works with an objective to enhance students' fascination with and skill in the reading and analysis of modern Chinese fiction. Knowledge of modern Chinese fiction will enable students to understand central aspects of 20th century Chinese culture.
Course equivalencies: X-LITR292/ASIA292/INTS290
Outcomes:
Students will be able to analyze literary texts of a particular historical period and write critical essays on works read in the course

ASIA 297 Topics in Asia (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course may be used to fulfill the Asian minor requirement for a 300-level course in Asia-related topics. Students may repeat the course for credit when the topic changes.
Interdisciplinary Option: Asian Studies
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

ASIA 302 Discovering China Through Film (3 Credit Hours)
This course will give an overview of major films produced in mainland China since 1949. Students will examine the genres of Chinese film better known in contemporary China and consider them a major source of reflection upon, and critique of, contemporary Chinese society and culture.
Course equivalencies: CMUN301/ASIA/INTS/AIFMS302
Outcomes:
All films chosen for the course will help inform students' understanding of modern China in terms of its material conditions and ideology

ASIA 314 Modern Chinese Literature in Chinese (3 Credit Hours)
This course is a survey of modern Chinese literature from 1918 to the present. It requires the close reading of famous Chinese writers and poets as well as some of the avant-garde writers. Students will have the opportunity to explore their own ideas of the aesthetic characteristics of the Chinese literature in the 20th century, as well as its historical and social background and learn about one of the important aspects of modern Chinese culture.
Course equivalencies: X-CHIN341/ASIA314/INTS341A
Outcomes:
Students will demonstrate knowledge of principal, genres, themes and forms of modern Chinese literature through analytical oral and written arguments

Association of Catholic Theological Schools (ACTS)

Biochemistry & Molecular Biology (BMB)

Discover, search, courses (p. 2953)!

BMB 400 Special Topics: Molecular Biology (1-3 Credit Hours)
Courses of half a semester to a semester on different topics of molecular biology, treated in depth with readings of the current literature.
Outcomes:
To learn about diverse areas of Molecular Biology which are not treated in regular courses

BMB 417 Molecular Biology (3 Credit Hours)
The Biochemistry and Molecular Biology course will cover diverse subjects of importance to modern cell an organismal biology from a molecular biology perspective.

BMB 471 Comp Molecular Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

BMB 490 Special Topics in Molecular Biology (1-3 Credit Hours)
This course covers a specific topic in molecular biology. The topics can vary among different special topics courses.

BMB 499 Research in Molecular Biology (1-9 Credit Hours)
The students do mentored work in a laboratory on a research project. Their performance is evaluated by their mentor at the end of the year, and is given a pass/not pass grade.
Outcomes:
To develop the ability to organize a research project proposing hypotheses and testing them in the laboratory and against the current literature

BMB 501 Molecular Biology Journal Club (0-1 Credit Hours)
This is a weekly course where students take turns to present a scientific paper. Following the presentation there is a discussion by students and faculty. Students prepare the presentation under the supervision of a faculty mentor.
Outcomes:
To develop the ability to read and analyze a scientific paper and to develop oral presentation skills and appropriate visual aids

BMB 502 Seminar in Molecular Biology (0 Credit Hours)
Biweekly seminars where invited speakers from outside the institution present their work. The presentation is followed by a discussion by students and faculty.
Outcomes:
To become familiar with current research in different molecular biology areas by listening to the actual scientist developing the work

BMB 524 Molecular Biology & Genetics of Development (2 Credit Hours)
This is a weekly course on Molecular aspects of Developmental Biology, with a mixture of lectures, discussions of original papers and presentations by external speakers.
Course equivalencies: X-BICH524/MBIO524
Outcomes:
An understanding of the principles of developmental biology with emphasis in the molecular genetics of development

BMB 526 DNA Repair & Recombination (2 Credit Hours)
This is a weekly course on mechanisms of mutagenesis, genetic repair and recombination. The course uses a mixture of lectures and discussions of original scientific papers.
Course equivalencies: X-MBIO526/BICH526
Outcomes:
An understanding of the basic mechanisms of mutagenesis, genetic repair, homologous recombination, and non-homologous end joining

BMB 590 Molecular Biology of Oncogenesis (3 Credit Hours)
The course will cover different subjects in cancer molecular biology with a combination of lectures and discussions of original scientific papers.
Outcomes:
A basic knowledge about mechanisms of oncogenesis and the biology of cancer, and an ability to search and understand the classic as well as modern literature on the subject

BMB 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

BMB 600 Dissertation Supervision (0 Credit Hours)
The students work on their dissertation under the supervision of their mentor and of their dissertation committee. Their progress is evaluated by their mentor and is given a letter grade.
Outcomes:
Development of the dissertation project, writing and defense of the dissertation

Bioethics & Health Care Leadership (BEHL)

Discover, search, courses (p. 2953)!

BEHL 401 Clinical Topics in Bioethics (3 Credit Hours)
This course will provide an overview of the major areas of clinical biomedical ethics. Issues will be examined and analyzed including problem-solving, theory and practice, end-of-life decision making, etc. Extensive use of case discussion and analysis will help to develop participants' ethical problem-solving skills.
Course equivalencies: IPS 651/BEHP 401/BEHL 401
Outcomes:
Participants will gain familiarity with terminology, resources, and major frameworks of ethical analysis in biomedical ethics

BEHL 402 Justice & Health Care (3 Credit Hours)
This course provides an overview of justice and health care with a special emphasis upon the developing world by examining prevailing theoretical frameworks and how justice is played out in various health care systems.
Outcomes:
Participants will gain a better understanding of what justice means with regard to health care

BEHL 403 Ethics Care Continuum (3 Credit Hours)
This course prepares students to identify biomedical ethical issues in settings such as long-term care, rehabilitation care, mental health, and hospice, and to develop moral frameworks for addressing these issues.
Outcomes:
Participants will be able to analyze cases and issues regarding health-care delivery and adapt principle frameworks of biomedical ethics to these settings

BEHL 404 Biomedical Ethics and Law (3 Credit Hours)
This course serves as an introduction to biomedical ethics and the law and will introduce the history of bioethics and the US legal system by surveying a number of seminal legal cases.
Outcomes:
Participants will have a better understanding of how bioethics has been shaping legal decisions and legislation throughout history

BEHL 405 Research Ethics (3 Credit Hours)
This interactive seminar will explore the responsible conduct of science with a focus on ethical issues in clinical research involving human participants. We will review federal research policies related to investigator responsibilities and institutional review board (IRB) function.
Outcomes:
Students will become familiar with the history, terminology, and resources of research ethics as well as key debates that have occurred/are occurring in the research ethics literature

BEHL 406 Principles of Health Care Ethics (3 Credit Hours)
This course provides an overview of important ethical theories in bioethics. We will mainly examine major works in the field by leading bioethics scholars to become better familiar with different approaches in the field.
Outcomes:
Students should be able to identify and analyze ethical theories and become familiar with various ethical approaches

BEHL 407 Social Determinants of Health and Bioethics (3 Credit Hours)
This course will review the theoretical work on social science (anthropology, sociology) and moral reasoning as it pertains to the discipline of bioethics, its philosophical roots, and the body of social science works in bioethics.
Outcomes:
Students will learn how to use the technique of self-reflexivity to understand cultural values

BEHL 408 Ethics, Genetics and Health Policy (3 Credit Hours)
This course will provide an introduction to genetic ethics and a survey of topics that constitute the professional and popular literature in the field. Topics to be considered include, but are not limited to, gene patenting, human cloning, and race and genetics.
Outcomes:
Students will have an understanding of ethical questions that genetic technological advances pose to our understanding of human identity and social justice

BEHL 409 Religion and Bioethics (3 Credit Hours)
This course is a thematic exploration of religion and bioethics with a specific concentration on its implications at the end of life.
Outcomes:
Students will better understanding of suffering and death, and meaning that underlie these issues in bioethics, and the practice of healthcare at the end of life

BEHL 410 Ethics Consultation Simulation Seminar (1-3 Credit Hours)
This is a two-month course of online learning (June-July) including a 3-day on-campus intensive experience for students including didactic sessions and ethics consultation skills development.
Outcomes:
Students will improve communication and interaction skills while doing ethics consultation

BEHL 411 Systems Ethics Frameworks (3 Credit Hours)
The course introduces current ethical issues in public health research, practice, and policy. Public health frameworks and approaches will be used to explore prevention, social justice, and health equity.
Outcomes:
Participants will be familiar with key readings, ethical frameworks, and practical tools for assessing public health challenges

BEHL 412 Organizational Ethics I: Business, Professionalism, and Justice (3 Credit Hours)
This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians within a group practice, administrators within a health system, or advocates within a community.
Course equivalencies: IPS 652/BEHP 412/BEHL 412
Outcomes:
Participants will understand responsibilities social justice entails to self, one's profession, various institutions which a healthcare profession is a member, one's patients, and the underserved

BEHL 413 History of Medicine and Bioethics (3 Credit Hours)
This course seeks to situate and examine the emergence and development of the field of bioethics within the history of medicine and the ethical concerns embodied in medicine¿s practice.
Outcomes:
Participants will have an understanding of how bioethics emerged within the broader history of medicine and and continues today as a distinct discipline

BEHL 414 Moral Theology for Bioethics (3 Credit Hours)
This course provides an introduction to Catholic moral theology through a historical review of its development and a consideration of key documents, events, arguments and concepts beginning with the scriptural witness of Christ and concluding with the moral teaching of John Paul II as it bears upon contemporary Catholic moral theology.
Outcomes:
Its goal is to assist in establishing an historical and theoretical foundation for those who are interested in bioethics as it is considered and practiced in the Catholic tradition

BEHL 415 Ethical & Religious Directives for Catholic Healthcare Leadership (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics

BEHL 416 Catholic Bioethics and Social Justice (3 Credit Hours)
This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context

BEHL 417 Narrative Ethics (3 Credit Hours)
This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.
Outcomes:
This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics

BEHL 418 Advancing Health Equity Practice (3 Credit Hours)
This course introduces the frameworks and practice of health equity as it pertains to the field of bioethics. The tools and materials help students more effectively incorporate health equity into all aspects of their work. Topics include: community health, multi-sector community engagement, and innovative approaches to clinical and community work to improve populations health.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Effectively incorporate health equity into all aspects of bioethics practice

BEHL 419 Organizational Ethics II: Ethical Leadership Changing Healthcare Envrnmnt (3 Credit Hours)
This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined. Questions of leadership style and theories of what constitutes effective leadership are considered.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Key focus on communication strategies and methods of organizational change

BEHL 420 Advanced Topics in Bioethics and Law (3 Credit Hours)
This class will explore the historical relationship between law and bioethics and examine how law and bioethics come together or may be at odds. Recognize/discuss changing nature of physician-patient relationship, continuing evolution of informed consent, intersection of commerce and science, changing definition of death, growing complexity of reproduction.
Outcomes:
Resolve dilemmas raised by changing biotechnology

BEHL 421 Practicum in Clinical Ethics (3 Credit Hours)
Pre-requisites: Department Consent Required
The goal of the clinical ethics practicum is to provide doctoral students on the clinical ethics track the opportunity to use knowledge and skills acquired in the academic program in a clinical setting (e.g. community hospital or academic medical center), under the direction of a preceptor at that setting.
Outcomes:
This practicum will expose students to the practical applications of clinical ethics

BEHL 422 Practicum in Organizational/Public Health Ethics (3 Credit Hours)
Pre-requisites: BEHL 419
The practicum will enable the student to work on a project which translates both general and discipline-specific information into organizational ethics or public health practice. Students must demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding these topics, and exhibit leadership, creativity, and the ability to work well with others.
Outcomes:
Goal of the practicum is to provide students the opportunity to use knowledge and skills acquired in the academic program in a professional setting under the direction of a preceptor

BEHL 423 Doctoral Capstone I (3 Credit Hours)
Pre-requisites: Oral and Written Qualifying Exams
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Publishable peer-reviewed paper

BEHL 424 Doctoral Capstone II (3 Credit Hours)
Pre-requisites: BEHL 423
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Students will be required to appear on campus for a capstone presentation with faculty

BEHL 425 Empirical Bioethics (3 Credit Hours)
Provides an overview of empirical research in the increasingly interdisciplinary field of bioethics. Will examine the relationship between empirical data and normative claims and potential pitfalls that may arise when using information about what (is) to determine what (ought) to be done.
Outcomes:
Students will gain familiarity with the range of quantitative and qualitative research methods used in bioethics as well as academic disciplines, understanding of empirical studies on ethical problems in medicine, public health policy, and clinical research; Discussions will be relevant to a range of professional settings

BEHL 426 Ignatian Spirituality and Medicine (3 Credit Hours)
This course in will explore the roots of Ignatian Spirituality as presented in the Spiritual Exercise and other writings of Ignatius Loyola and the early Jesuits. From this historical starting point, the course will shift to explore key themes that have emerged from this spiritual tradition as it relates to medicine, paying special attention to the Spiritual Exercises.
Outcomes:
This course aims to assist students in establishing a substantive understanding of Ignatian spirituality and the tradition of Jesuit education in which they participate as a means for leading faithful, joyful, and hopeful lives as physicians

BEHL 427 Professionalism and Professional Ethics (3 Credit Hours)
This course will review and critically examine the professional codes of ethics of a variety of health-related professions: medicine, nursing, dentistry, social work, chaplaincy, risk management, and allied health. We will examine the growth of professionalism as a movement and answer questions related to this topic.
Outcomes:
Understand what is a profession, what are professional ethics; Difference between common morality and professional ethics, and difference between applied ethics and professional ethics; We will also discuss whether a pan-professional ethics code is needed for the health care professions

BEHL 428 Writing and Scholarship Skills (3 Credit Hours)
Writing skills are an essential form of communication not only between the instructor and students but also among and between the students themselves. Topics covered: Academic Integrity; Grammar; Resource Development/Citation; Clarity/Formality; Development of a Thesis and Writing of a Thesis Statement; Organization and Outlining; Critical Thinking/ Analysis/Reasoning; and Development of a Conclusion.
Outcomes:
This course will provide a review of basic writing skills as well help students develop analytical and communication skills that are critical to scholarly writing in the multidisciplinary field of bioethics

BEHL 429 Pediatric Ethics (3 Credit Hours)
This course will introduce ethical topics in the areas of pediatric medicine and research. Topics to be addressed may include decision making, neonatal issues, teens and decisional authority, research with minors.
Outcomes:
Discover aspects of the pediatric population that raise unique concerns, create novel moral environments, and thus require nuanced and sensitive attention to and tools of ethical inquiry

BEHL 430 Advanced Clinical Ethics Skills (3 Credit Hours)
Pre-requisites: BEHL 410 Ethics Consult Simulation Seminar
Two-month blended course of online learning and two-day intensive experience on Health Sciences Campus in Maywood. Course provides an opportunity for advanced graduate students to improve and refine clinical ethics skills. Participants will practice consultation skills, evaluate performance of others, and receive feedback from faculty reviewers.
Outcomes:
Students will develop their own portfolio for quality attestation

BEHL 431 Current Debates in Research Ethics (3 Credit Hours)
Pre-requisites: BEHL 405 or permission from instructor
This course will focus on unique ethical issues that arise in research with special populations. Included but not limited to children; women, fetuses, and embryos; prisoners; indigenous and racial/ethnic minority communities; healthy volunteers. Research in emergency and international settings as well as research at the end-of-life will be discussed.
Outcomes:
Material covered in this course will be relevant for ethicists, IRB members, and clinical investigators

BEHL 432 Global Bioethics (3 Credit Hours)
This course will survey major topics in global bioethics. Students will be introduced to global bioethics frameworks, practices, and governance bodies in order to place bioethical problems in a global context. Attention will be given to how the global realities of health disparities and neoliberal economic policies impact bioethical questions. Guest lecturers will share experiences working in clinical ethics, public health, social justice, health care policy, and research across the globe.
Outcomes:
Students will gain knowledge regarding clinical ethics, public health, social justice, health care policy, and research across the globe

BEHL 433 Mastering Clinical Ethics Consultation (3 Credit Hours)
Pre-requisites: BEHL 410 and BEHL 430
This 2 week on-campus course provides an opportunity for advanced bioethics doctoral students in the clinical ethics concentration to refine their clinical ethics skills to a mastery level. Students will participate in simulated ethics consultations, practice communication and interpersonal skills and receive feedback on their performance. With access to LUHS, students will participate in clinical rounds, case discussions, and active ethics consultations and debriefing sessions. This course will require students to reach a predefined mastery level of skill in simulated ethics case consultations using the Assessing Clinical Ethics Skills (ACES) evaluation tool. They will also be required to write chart notes for ethics consultations.
Outcomes:
Students will achieve mastery of clinical ethics consultation skills, written chart notes, and improve communication and interpersonal skills

BEHL 434 Oral Health Ethics (3 Credit Hours)
According to the CDC, "Oral health affects our ability to speak, smile, eat, and show emotions. It also affects self-esteem, school performance, and attendance at work and school. Oral diseases - which range from cavities to gum disease to oral cancer - cause pain and disability for millions of Americans." As with other areas of healthcare, ethical issues arise in oral health. Issues to be addressed in this course will include access to care, confidentiality, professional obligations of dentists, informed consent, treatment planning, and the importance of oral health to overall health and well-being.
Outcomes:
Participants will have a better understanding of ethical issues that arise within oral health care

BEHL 491 Special Topics (1-3 Credit Hours)
Provides an opportunity to introduce new courses.

BEHL 492 Master's Research - Capstone (3 Credit Hours)
The capstone course is the final course which provides an opportunity for the student to develop a paper of publishable quality.

BEHL 493 Independent Study (1-3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 500 Introduction to Healthcare Mission Leadership (3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 501 Church and Mission (3 Credit Hours)
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II and contemporary times

BEHL 502 Christian Doctrine (3 Credit Hours)
This course surveys the historical evolution of Christian doctrine and its theological interpretations from the early church through the 21st century. It assists students in understanding how theological doctrines apply to contemporary ministry contexts, particularly the work of Catholic health care. The course explores the early Christological controversies, the Trinity, Grace, liberationist theologies, and the role of dialogue as a fundamental feature of the development of doctrine.
Outcomes:
Students will understand theological doctrine and apply to contemporary ministry contexts in Catholic health care

BEHL 503 Foundations of Christian Spirituality (3 Credit Hours)
Christian spirituality (the 'lived experience of Christian faith') is a separate but partnered academic field with theology today. Key issues are: defining 'spirituality', methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

BEHL 504 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

BEHL 505 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

BEHL 506 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

BEHL 510 Integrated Doctoral Seminar in Ethics, Theology, and Healthcare (3 Credit Hours)
The Integrated Seminars in Ethics, Theology and Healthcare (ISETH) are the core of the Doctorate in Healthcare Mission Leadership (D.HMCL) degree program. Students in the DHCML program are required to complete three of these seminars, which will be offered every Fall and Spring term with variable topics, as part of their degree program. These courses will be primarily theoretical and methodological in focus, rather than practical.
Outcomes:
This course is designed to build on and integrate students' prior graduate coursework in theology and bioethics with their ongoing work in Catholic healthcare

BEHL 511 Mission, Leadership, and Spiritual Formation Seminar (3 Credit Hours)
This course explores the theology, traditions, and current practices foundational for understanding and achieving formation as an essential offering of Catholic health care ministries. By examining a Face to Face Online Hybrid (greater than 75% online) Blended (30%-70% online) variety of methods and models of formation programs of Catholic healthcare in the United States, students will cultivate personal practices that enhance their ability to design and operationalize experiences for persons in various roles within the ministries they serve - from new associate orientation to senior leadership.
Outcomes:
Gain an understanding and practical ability to ensure the programs, resources, and encounters they design and facilitate are grounded in tradition of Catholic ministry, inviting to diverse participant populations, and support the achievement of specified outcomes; In so doing, understand and develop skills necessary to implement integrative, professional, and valued programs of formation

BEHL 512 Canon Law, Sponsorship, and Church Relations (3 Credit Hours)
This two-month course explores the theology, traditions, and practical applications of canon law in the context of Catholic health care. The course will provide an overview of canon law, the emerging theology of sponsorship and ministerial juridic persons, and review a variety of models of church relations current in contemporary Catholic health care.
Outcomes:
Students will gain fluency in canon law, gain knowledge of the particular canons in Catholic health care, and develop a deeper understanding of sponsorship in order to understand the specific sponsorship model applicable to their own healthcare context

Bioethics (BIET)

Discover, search, courses (p. 2953)!

BIET 395 Special Topics (3 Credit Hours)
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgement (concepts, theories, methods) to discuss the topic

BIET 395A Bioethics Minor Capstone: Philosophical & Anthropological Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 395B Bioethics Minor Capstone: Philosophical & Biological Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 395C Bioethics Minor Capstone: Philosophical and Chemical Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 395E Bioethics Minor Capstone: Philosophical & Environmental Science Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 396A Bioethics Minor Capstone: Theological & Anthropological Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 396B Bioethics Minor Capstone: Theological and Biological Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 396C Bioethics Minor Capstone: Theological and Chemical Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 396E Bioethics Minor Capstone: Theological & Environmental Science Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

Bioinformatics (BIOI)

Discover, search, courses (p. 2953)!

BIOI 300 Directed Readings (1-3 Credit Hours)
Readings from the scientific literature in any focused area of bioinformatics agreed upon by the student and the supervising faculty member.
Outcomes:
Students will gain knowledge, journal reading expertise, and scientific writing skills

BIOI 365 Exploring Proteins (3 Credit Hours)
Pre-requisites: Bioinformatics Majors only and CHEM 361
Computational tools are essential for the prediction of protein structures, protein interactions, and structure based drug design. This class will introduce fundamental concepts in the field of computational protein biology.
Outcomes:
Students will obtain a general understanding of the principles of proteomics in addition to theoretical and practical experience with protein-based databases and bioinformatics tools to explore protein structure and function

BIOI 395 Special Topics: Bioinformatics (1-3 Credit Hours)
Special areas of bioinformatics outside the usual curriculum that vary each time the course is offered.
Outcomes:
Students will gain knowledge in and master a unique topic in bioinformatics

BIOI 397 Bioinformatics Survey (1-4 Credit Hours)
Pre-requisites: BIOL 101 and Instructor consent
This course trains students in conducting collaborative bioinformatics research as well reading and presenting scientific research.
This course satisfies the Engaged Learning requirement.
Outcomes:
Provides an alternative to individual research; reflects trends in the field for collaborative, group research

BIOI 398 Bioinformatics Internship (1-4 Credit Hours)
An independent research experience involving laboratory experiments, computer program development, or statistical analysis or any combination of these performed off-campus under the mentorship of a Bioinformatics scientist not affiliated with Loyola.
Interdisciplinary Option: Bioinformatics
This course satisfies the Engaged Learning requirement.
Outcomes:
All students will acquire skills to perform and report on independent research and to be intellectually responsible for evaluating their own and related work; Other outcomes will include at least one of the following: Experimental expertise, statistical evaluation of data sets, design and use of computational tools

BIOI 399 Bioinformatics Research (1-4 Credit Hours)
An independent research experience involving laboratory experiments, computer program development, or statistical analysis or any combination of these performed under the mentorship of one or more Bioinformatics faculty members.
Interdisciplinary Option: Bioinformatics
This course satisfies the Engaged Learning requirement.
Outcomes:
All students will acquire skills to perform and report on independent research and to be intellectually responsible for evaluating their own and related work; Other outcomes will include at least one of the following: Experimental expertise, statistical evaluation of data sets, design and use of computational tools

BIOI 400 Programming Biology (1 Credit Hour)
This is a 6-week course introduction to scripting programming languages within the framework of biological data analysis. Graduate-level standing required. Students will learn foundational methods and algorithms for analysis of biological data.

BIOI 494 Bioinformatics Research Design (1 Credit Hour)
Course Restricted to Bioinformatics MS students Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement experimental design practices in bioinformatics

BIOI 495 Special Topics in Bioinformatics (1-12 Credit Hours)
The field of bioinformatics is ever evolving. As new technologies develop, demand arises for new methods and tools. Courses will focus on emerging trends in bioinformatics. Restricted to Bioinformatics Graduate Students. Student will learn about emerging topics in the field.

BIOI 498 Bioinformatics Internship (1 Credit Hour)
Pre-requisites: BIOI 500
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning. Limited to MS Bioinformatics Non-Thesis track students only.
Outcomes:
Students can apply foundational principles in bioinformatics into practice

BIOI 499 Bioinformatics Research (1-12 Credit Hours)
Pre-requisites: Prerequisite: BIOI 494
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis. Limited to MS Bioinformatics Thesis track students only.
Outcomes:
Students can develop and utilize techniques for bioinformatics research

BIOI 500 Advanced Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOI 501 Bioinformatics Seminar (1-2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.
Course equivalencies: X-BIOI501/BIOL451
Outcomes:
Students can summarize, critique, and present bioinformatics research

BIOI 565 Exploring Proteins (3 Credit Hours)
Pre-requisites: Biochemistry, restricted to Bioinformatics Graduate Students
Proteins are polymer chains of amino acids that fold into compact states that differ in structure, size, shape, and dynamics. Computational tools are essential for the prediction of protein structures, protein interactions, and structure-based drug design.
Outcomes:
Students will learn the concepts of building blocks of protein structure, and protein folding

BIOI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: BIOI 499
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

BIOI 605 Master's Study (0 Credit Hours)
This course provides FT status for a student who needs to meet the continuous enrollment requirement of the Graduate School while completing program requirements.

Biology (BIOL)

Discover, search, courses (p. 2953)!

BIOL 101 General Biology I (3 Credit Hours)
Fundamental principles of Biology including: introduction to the scientific method, basic biological chemistry; cell structure and function; energy transformations; mechanisms of cell communication; cellular reproduction; and principles of genetics.
Interdisciplinary Option: Bioethics, Bioinformatics, Forensic Science
Course equivalencies: ACBIO 101 / BIOL 101
Outcomes:
Students will be able to demonstrate understanding of the historical foundations, methodologies employed, general architecture and functioning of the cell - the basic unit of life

BIOL 102 General Biology II (3 Credit Hours)
Pre-requisites: BIOL 101 and 111
A continuation of BIOL 101. Fundamental principles of Biology including: evolutionary theory; general principles of ecology; study of plant structure and function; and comparative animal physiology.
Interdisciplinary Option: Bioethics, Forensic Science
Course equivalencies: ACBIO 102 / BIOL 102
Outcomes:
Students will be able to demonstrate an understanding of the fundamental principles of ecology and evolution, as well as the anatomy and physiology of representative plant and animal phyla

BIOL 110 Liberal Arts Biology (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; No requirement for students with a declared major or minor in the Department of Anthropology, Department of Biology, Department of Chemistry, Department of Environmental Science, Department of Physics, Bioinformatics, Forensic Science or Neuroscience
Liberal Arts Biology is a second tier core course in the area of Scientific Literacy. It covers fundamental principles of biological sciences at a level for non-science majors. The focus of the course will vary depending on expertise of the instructor. All instructors will address the same fundamental principles.
Knowledge Area: Tier 2 Scientific Knowledge
Outcomes:
Students understand the scientific method, diversity of life, classification of organisms, cell structure and function, the chromosomal and molecular basis of inheritance, and organ systems of the human body

BIOL 111 General Biology I Lab (1 Credit Hour)
Complements General Biology I lecture material through observation, experimentation, and when appropriate, dissection of representative organisms. Physical and chemical phenomena of life as well as systematics and comparative anatomy and physiology of selected organisms will be examined.
Interdisciplinary Option: Bioethics, Forensic Science
Course equivalencies: BIOL 111/ACBIO 111
Outcomes:
Students will be able to demonstrate an understanding of the diversity of living organisms, including comparisons in cell structure and function, and comparative organismal evolution and ecology

BIOL 112 General Biology II Lab (1 Credit Hour)
Pre-requisites: BIOL 101 and BIOL 111
Complements General Biology II lecture material through observation, experimentation, and when appropriate, dissection of representative organisms. Physical and chemical phenomena of life as well as systematics and comparative anatomy and physiology of selected organisms will be examined.
Interdisciplinary Option: Bioethics, Forensic Science
Course equivalencies: ACBIO 112 / BIOL 112
Outcomes:
Students will be able to demonstrate an understanding of the diversity of living organisms, including comparisons in cell structure and function, and comparative organismal evolution and ecology

BIOL 195 Special Topics in Biology (1-4 Credit Hours)
Special Topics - Specific areas of study in the biological sciences.

BIOL 205 Plant Biology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 102 and BIOL 112
Lecture and laboratory. Survey of the principles of botany including development and reproduction, structure, phylogeny and metabolism."
Outcomes:
Students will understand the basic morphology of plants; utilize morphology in the identification of local plants; understand the anatomy of plants; understand the relationship between anatomy and basic physiology; recognize that differences in physiological function allow different plants to be found in specific environments; appreciate the diversity of organisms called "plants

BIOL 210 Laboratory Techniques (2 Credit Hours)
Lab sessions designed to prove a firm foundation in basic techniques and procedures, use of equipment and apparatus; keeping a lab notebook and in data collection and treatment.
Outcomes:
Students will acquire basic skills needed to work in a research laboratory

BIOL 215 Ornithology (3 Credit Hours)
An introduction to the biology of birds including the topics of anatomy, physiology, behavior, ecology and evolution. Includes some field trips to learn how to identify species and to collect behavioral information.
Course equivalencies: BIOL 215/ENVS 215
Outcomes:
Students will demonstrate an understanding of the biology of birds and be able to identify some of the commoner species of birds in our area

BIOL 240 Psychology & Biology of Perception (3 Credit Hours)
Pre-requisites: PSYC 101; For Biology majors: BIOL 102, BIOL 112, and PSYC 101 Introduction to the study of sensory systems, especially vision and audition, emphasizing historical development of the field, multi-disciplinary scientific approaches; recent research and theory on the mechanisms of seeing and hearing; and applications of research to real-world problems
BIOL 240 is cross-listed with PSYC 240.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-PSYC240/BIOL240

BIOL 242 Anatomy and Physiology I (4 Credit Hours)
Pre-requisites: BIOL 102, BIOL 112, and [(CHEM 102 and 112) or CHEM 106 or CHEM 180]
Lecture, laboratory, and demonstrations. Organization of the human body from the cellular to the organismal level. Anatomy of body systems and their physiology related to 1) support and movement (integumentary, skeletal and muscular systems) and integration and control (nervous and endocrine systems). Dissection of representative organs is required.
Outcomes:
Students will be able to demonstrate knowledge of human anatomy at the microscopic and gross levels; Students will be able to correlate structure and function and will have a firm understanding of the organizing principle of human physiology, homeostasis and explain the role of the nervous and endocrine systems in its maintenance

BIOL 243 Anatomy and Physiology II (4 Credit Hours)
Pre-requisites: BIOL 242
Lecture, laboratory and demonstrations. A continuation of BIOL 242. Anatomy of body systems and their physiology related to 1) regulation and maintenance (cardiovascular, lymphatic respiratory, digestive and urinary systems) and reproduction and development (male and female reproductive systems.) Dissection of representative organs is required. Prerequisites are BIOL 101, 102, 111, 112, BIOL 242 and CHEM 101, 102, 111, 112.
Outcomes:
Students will be able to demonstrate a comprehensive integrated knowledge and understanding of human anatomy and physiology at all levels

BIOL 246 Ancient Human-Animal Interactions (3 Credit Hours)
Pre-requisites: For BIOL-BS, BIOL-MINR, and BIOE-BS students: BIOL 102; for all others: ANTH 101, ANTH 104, BIOL 102, ENVS 101, or ENVS 137
This course focuses on human-animal interactions in the past and covers how humans have shaped the geographic ranges and behaviors of animals today. Questions on whether humans caused prehistoric animal extinctions and how animal domestication occurred will be explored using evidence from archaeological and paleontological records around the world.
Course equivalencies: X - ANTH 246 / BIOL 246
Outcomes:
Students will demonstrate an understanding of how archaeologists use empirical data to answer questions about prehistoric human-animal interactions

BIOL 251 Cell Biology (3 Credit Hours)
Pre-requisites: Biophysics majors ONLY: (BIOL 101 and 111) and (CHEM 102 or CHEM 106 or CHEM 160); All other majors: BIOL 102 and 112) and [(CHEM 102 and 112) or CHEM 106 or CHEM 160]
This course covers basic molecular and cellular studies of living organisms, emphasizing the relationships between subcellular structures and biochemical and physiological functions of cells.
Outcomes:
Students will become familiar with a wide range of cell biological principles and experimental approaches that led to important discoveries, gain an appreciation of the scientific method, and learn about the goals of modern cell biology research

BIOL 252 Cell Biology Laboratory (1 Credit Hour)
Co-requisites: BIOL 251
Pre or Laboratory experiences designed to explore relationships between structure and function of subcellular components.
Outcomes:
Working knowledge of a variety of techniques utilized in the cell biology laboratory

BIOL 265 Ecology (3 Credit Hours)
Pre-requisites: BIOL 102, BIOL 112, and (CHEM 102 or CHEM 106 or CHEM 160)
Relationships of organisms to their environment and to each other at the organism, population, community, and ecosystem levels.
Outcomes:
Students will understand the fundamental principles governing the interactions of organisms and their environment at the population, community, and ecosystem levels

BIOL 266 Ecology Laboratory (1 Credit Hour)
Co-requisites: BIOL 265
Pre or Laboratory and field experience designed to illustrate the principles of ecology and to give students experience in collecting, processing, and analyzing data. Field trips required.
Course equivalencies: BIOL266/ESP 266
Outcomes:
Students will understand the methodology and use techniques in studying interactions of organisms to the environment and to each other at the organism, population, community, and ecosystem levels

BIOL 280 Evolution of Human Disease (3 Credit Hours)
Pre-requisites: BIOL 102
The complex interaction between humans and pathogens is explored throughout time, with particular emphasis on the role and impact of human biology, human culture, and changing environments.
Interdisciplinary Option: Bioethics
Course equivalencies: X-ANTH280/BIOL280/BIET280
Outcomes:
Students will be able to demonstrate understanding of the human immunological system, competing paradigms of human health, the processes and mechanisms of biological evolution, the pathogeneses of specific diseases, and the archaeological, paleopathological, paleodemographic, and historical data used to explore the evolution of disease

BIOL 281 Evolution of the Human Diet (3 Credit Hours)
Pre-requisites: For BIOL-BS, BIOL-MINR, and BIOE-BS students: BIOL 102; for all others: ANTH 101 or BIOL 102
This interdisciplinary course explores the evolution of the human diet utilizing a biocultural perspective. The complex interplay between our diet, biology, and culture is examined through energy acquisition, primate and hominin nutrition, the Agricultural Revolution and Industrialization on human health, food sustainability, and nutritional inequality through socioeconomic and gender lenses.
Course equivalencies: X-BIOL 281/ANTH 281
Outcomes:
Students will identify the role food has played throughout the 6-7 million years of human evolution, and its significance in terms of climate change variability, evolutionary adaptations and contemporary inequality

BIOL 282 Genetics (3 Credit Hours)
Pre-requisites: For Bioinformatics and Biophysics Majors ONLY: BIOL 101; CHEM 102 or CHEM 106 or CHEM 160; For all other majors: BIOL 102, 112; CHEM 102 or CHEM 106 or CHEM 160
This course surveys principles and processes of genetic inheritance, gene expression, molecular biology, developmental, quantitative, population and evolutionary genetics.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will develop knowledge and awareness of the genetic bases of modern biology; Students will understand Mendelian principles of inheritance, chromosome and DNA structure and replication, gene expression, molecular biology, genetic bases of development and other biological processes, and quantitative, population and evolutionary genetics

BIOL 283 Genetics Laboratory (1 Credit Hour)
Pre-requisites: BIOL 282; Or corequisite: BIOL 282
Experiments and demonstrations to illustrate chromosomal structures and transmission, molecular biology, gene linkage, gene frequencies and variation.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will develop technical skills and ability to interpret data from a variety of types of genetics experiments

BIOL 284 Behavioral and Cognitive Neuroscience (3 Credit Hours)
Pre-requisites: For BIOL-BS, BIOL-MINR, and BIOE-BS students: BIOL 102 and NEUR 101; For all others: NEUR 101
Overview of topics and methodologies used in behavioral and cognitive neuroscience including: attention, learning and memory, language, reasoning, decision making, intelligence, emotions, social cognition, and consciousness. BIOL 284 is cross-listed with PSYC 382.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-PSYC 382/BIOL 284
Outcomes:
Students will understand theories regarding brain mechanisms, underlying mental events and the technologies used for studying these mechanisms

BIOL 296 Introduction to Research (1 Credit Hour)
Pre-requisites: BIOL 102, 112; Permission of the instructor; Biology Core highly recommended
Students will begin reading the literature in the field of their mentor, conduct experiments designed by the mentor, and give a presentation on their work or studies, in preparation for upper level undergraduate research.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop critical reading skills and become familiar with basic lab techniques in the area of their mentor

BIOL 302 General Microbiology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282 Lecture and laboratory
Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 303 Seminar in Neuroscience (1 Credit Hour)
Pre-requisites: NEUR 101 with a grade of C- or better
The seminar introduces students to the interdisciplinary nature of modern neuroscience with an emphasis on the various neuroscience research activities that take place at Loyola University Chicago, and reviews current neuroscience research topics. BIOL 303 is cross-listed with NEUR 300.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-BIOL303/NEUR300
Outcomes:
Students will demonstrate understanding of the interdisciplinary and multidisciplinary nature of modern neuroscience, and the research questions and experimental approaches used at the Lakeshore and Medical Center campuses

BIOL 304 Intro to Developmental Biology (3 Credit Hours)
Pre-requisites: BIOL 251
The analysis of developmental processes such as; fertilization, embryonic cleavage, cell determination and cell differentiation in selected species. Emphasis will be on experiments that reveal how these processes are controlled at the molecular and cellular levels.
Outcomes:
Students will become familiar with a wide range of developmental biology principles and experimental approaches that led to important discoveries, gain an appreciation of the scientific method, and learn about the goals of modern developmental biology research

BIOL 307 Biology of Stem Cells (3 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
Stem cell research represents an exciting area of biology. This course will cover the early discoveries that launched the field of stem cell biology, the different types of stem cells that exist, potential therapeutic uses of stem cells, and the ethical implications of these discoveries and therapies.
Outcomes:
Students will be able to read primary research articles, describe different stem cell types and therapeutic uses, and consider the ethical implications of stem cell research and therapies

BIOL 310 Categorical Data Analysis (3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335
An introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modelling techniques based on generalized linear models. Methods for matched-pair, small datasets, ordinal and multi-category data also discussed. This course focuses on applications using real-life data sets, and uses popular software packages.

BIOL 313 Lab in Psychobiology (3 Credit Hours)
Pre-requisites: (BIOL/STAT 335 or PSYC 304) and (NEUR 101, PSYC/BIOL 240, or PSYC 382/BIOL 284); OR for PSYC-BS and Cognitive/Behavioral Neuroscience majors: PSYC 306 and (NEUR 101, PSYC/BIOL 240, or PSYC 382/BIOL 284) Minimum grades of C-
A 'hands on' experience with the instrumentation, measurement techniques and experimental designs used in electrophysiological studies of nervous system function. BIOL 313 is cross-listed with PSYC 311.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-PSYC311/BIOL313

BIOL 315 Introductory Immunology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
The study of the nature and molecular basis of immune responses. History and vocabulary of immunology; experiments involving immune recognition and destruction; theories regarding self-tolerance and immunological diseases.
Outcomes:
Students will learn the morphology and histology of the cells involved in an immune response, as well as how the cells develop and the molecular mechanisms used to recognize and eliminate non-self material; Students will become familiar with the evasion strategies of pathogens and the consequences associated with either hyper or hypo-responsiveness

BIOL 316 Limnology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 265 and CHEM 102 or CHEM 106 or CHEM 180
An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions; Students will learn to evaluate the trophic status and health of a lake by the end of the course

BIOL 317 Models of Human Disease (3 Credit Hours)
This course explores approaches used to study human diseases from in vitro to in vivo levels and examines their strengths and weaknesses. Discussions will cover historical experiments and cutting-edge research to learn about the techniques used to generate data and how to interpret the results.
Outcomes:
Students will gain knowledge about human diseases and techniques used to model aspects of those diseases in the laboratory

BIOL 318 General Virology (3 Credit Hours)
Pre-requisites: BIOL 251 & BIOL 282
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Course equivalencies: BIOL 318 / BIOL 218
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 319 Evolution (3 Credit Hours)
Pre-requisites: BIOL 282; BIOL 265 recommended
This course focuses on analysis of processes and patterns of evolution. Topics include population genetic principles, fossil patterns and geologic ages, phylogenetic analysis of relationships of species, experimental approaches to evolutionary questions, and evolutionary perspectives on human biology and relationships.
Outcomes:
Students will develop knowledge and awareness of evolutionary processes and patterns, the evidence for them, and how evolutionary hypotheses are tested experimentally; They will develop an appreciation of the primary literature through reading and discussing research articles

BIOL 320 Animal Behavior (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 103; or BIOL 102 & BIOL 112
This course examines the biological basis of animal behavior including function and evolution of behavior patterns. Mechanisms and the adaptive significance of behaviors are examined and analyzed. BIOL 320 is cross-listed with ANTH 320.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-ANTH320/BIOL320/ESP 320
Outcomes:
Students will have an understanding of both proximate and ultimate causes of a broad array of behaviors in animals and their implications for the life histories of those animals

BIOL 321 Great Transitions in Vertebrate History (3 Credit Hours)
Pre-requisites: BIOL 265
The major vertebrate groups-fish, amphibians, reptiles, birds, and mammals-arose through great transitions in size and form. These transitions opened up previously inaccessible habitats for those groups to radiate throughout, creating the remarkable diversity we observe today. In this class, students will learn about the major transitions that occurred in vertebrate history within the context of Earth's geological history. Students will also learn about the adaptive changes in anatomy and life history that have allowed those radiations to successfully radiate in those habitats. Students will also learn about species whose unique attributes allow them to occupy the most extreme habitats on earth, such as the deep sea, arctic, and high elevation habitats.
Outcomes:
Learn the major radiations of vertebrates and their evolutionary relationships, the general characteristics of the major organ systems in those radiations, the major evolutionary transitions that occurred during vertebrate history, and how changes in ecology, life history, and anatomy change during organismal evolution

BIOL 323 Comparative Anatomy Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 251, BIOL 282
A study of homologous systems and vertebrate phylogeny in both lecture and lab.
Outcomes:
Students will understand the evolutionary relationships and processes that are involved in the development of vertebrate anatomy

BIOL 325 Primatology-Behavior & Ecology (3 Credit Hours)
Pre-requisites: ANTH 101 or any 100-level Biology course
This course examines primate behavior and ecology from a comparative and evolutionary perspective. Students will be introduced to the diversity across taxonomic groups within the Order Primates. Through class discussion and observation, students will explore key issues in primate studies. Students will develop and apply skills in primate observation.
Course equivalencies: X-ANTH325/BIOL325/ESP 325
Outcomes:
Students will be able to describe the taxonomic diversity of non-human primates and explain the impact of biological, evolutionary, and ecological factors on primate behavior

BIOL 326 Human Osteology Lec/Lab (4 Credit Hours)
This course focuses on developing a deep understanding of the human skeleton and ways in which biological anthropologists and forensic anthropologists use this knowledge to explore human biological diversity. Through hands-on exercises and class discussion, students will build analytical skills that are foundational to many techniques used by professionals and will appreciate the complex ethical considerations inherent to the fields of biological and forensic anthropology. Pre-requisites: BIOL 102 and BIOL 112; ANTH 101 or ANTH 103.
Interdisciplinary Option: Forensic Science
Course equivalencies: X-ANTH326/BIOL326
Outcomes:
Students will be able to demonstrate superior knowledge of skeletal anatomy, analyses of skeletal remains from archaeological contexts, and apply current techniques designed to understand and explore human variation, stature, ancestry, age-at-death, sex, and pathological conditions

BIOL 327 Wetland Ecology (4 Credit Hours)
Pre-requisites: BIOL 265
An introduction to the study of wetlands habitats. This course includes discussion of physical and chemical factors, biota, production and community dynamics. Laboratories include several field trips to regional wetland habitats.
Course equivalencies: BIOL327/ESP 327
Outcomes:
Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants

BIOL 328 Conservation Biology (3 Credit Hours)
Pre-requisites: BIOL 265
This course explores species diversity, natural and human induced extinctions, environmental ethics, and conservation practices being developed at the population, community, and ecosystem levels.
Course equivalencies: X-BIOL328/ESP 330
Outcomes:
Students will be able to describe conservation strategies being used by institutions around the world and understand the ecological theory that supports those strategies

BIOL 329 Winter Ecology (3 Credit Hours)
Pre-requisites: BIOL 265 or permission of instructor
The goal for Winter Ecology is to teach you about ecosystems in winter by immersing you in the winter environment at LUREC during J-term. Topics include the habitats on, in, and under snow, the morphological, physiological, life cycle modifications of temperate plants, and the winter adaptations of birds.
Course equivalencies: X-ENVS 319/BIOL 329
Outcomes:
Students will gain understanding of habitats and organisms present during winter in temperate ecosystems and gain experience with field techniques employed when studying these ecosystems

BIOL 330 Global Change Biology (3 Credit Hours)
Pre-requisites: BIOL 265 or ENVS 280
Human activities are changing our planet to such an extent that scientists have proposed we are in a new geological epoch, the 'Anthropocene'. Through lectures, discussions, and group projects we will examine key elements of global change including biodiversity loss, land-use alterations, climate change, and pollution.
Outcomes:
Learn global element cycles that drive biological processes; Read, critique, and discuss primary scientific literature

BIOL 335 Intro to Biostatistics (3 Credit Hours)
Pre-requisites: BIOL 102, MATH 132 or MATH 162 (as pre-requisite or co-requisite) or MATH 162A; Students may take MATH 162 as a prerequisite for STAT/BIOL 335 or take it concurrently as a corequisite with STAT/BIOL 335; For Bioinformatics Majors: only BIOL 101, MATH 132 or MATH 162 (as pre-requisite or co-requisite) or MATH 162A
An introduction to statistical methods used in designing biological experiments and in data analyses. Topics include probability and sampling distribution, designed biological experiments and analysis of variance, regression and correlation, stochastic processes, and frequency distributions. Computer laboratory assignments with biological data.
Interdisciplinary Option: Forensic Science
Course equivalencies: X-BIOL335/STAT335

BIOL 336 Advanced Biostatistics (3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335
This course provides an overview of advanced topics in applied statistics with particular application in biology and medicine, including the interpretation of Minitab, SAS and S-Plus computer output.
Course equivalencies: X-STAT336/BIOL336
Outcomes:
Students interested in applied statistical methods will obtain skill in experimental design, linear regression, categorical data analysis and logistic analysis, nonlinear regression, bioassay and drug synergy methods, as well as multivariate and survival statistical methods

BIOL 337 Quantitative Methods in Bioinformatics (3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335
This course develops the mathematical and statistical methods necessary to analyze and interpret genomic and proteomic data, including signal analysis, sequence alignment methods, data-base search methods useful in bioinformatics and data mining.
Interdisciplinary Option: Bioinformatics
Course equivalencies: XSTAT337/BIOL337/BIOI337
Outcomes:
Students will obtain the quantitative skills used in BLAST, including inference, stochastic processes and hidden Markov models, random walks, microarray analysis and biological sequence analysis

BIOL 340 Natural History of Belize (3 Credit Hours)
This Study Abroad field course is designed to build on the foundations learned in Ecology, Environmental Science, and Anthropology classes by examining the biodiversity and tropical ecosystems of Belize, by exploring the cultural traditions of some of its peoples, particularly the Mayans; and learn how local communities are involved in protecting and sustaining ecological and natural sites through community based conservation and sustainability practices Enrollment Conditions: For Environmental Science or Environmental Studies Majors/Minors: ENVS 137 For Biology Majors/Minors: BIOL 102 & 112 For Anthropology or International Studies Majors/Minors: Junior or Senior Standing
Course equivalencies: X - ENVS 340 /BIOL 340
Outcomes:
Provide a working understanding of the structure, function, and ecology of tropical ecosystems; their importance to local communities; and the social dimensions of environmental issues, especially those related to justice

BIOL 341 Histology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
This course examines the microscopic anatomy of the four basic adult tissue types and how they are arranged and utilized in the construction of the major vertebrate organ systems.
Outcomes:
The major learning objectives for this course are (1) to become familiar with the gross and microscopic anatomy of cells, tissues and organs and (2) to understand how these anatomical features correlate with specific physiological functions

BIOL 342 Human Anatomy (4 Credit Hours)
Pre-requisites: BIOL 242, BIOL 243, BIOL 251, BIOL 282; CHEM 222 or CHEM 224 or (CHEM 240 pre-req and CHEM 260 co-req)
A mixed lecture and laboratory course providing an in-depth look at the human body at the level of gross anatomy.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will acquire an advanced understanding of the structure and relationships of major organ systems in the human body

BIOL 344 Microbial Evolution and Human Well-being (3 Credit Hours)
Pre-requisites: BIOL 282
The course explores the many ways, both positive and negative, that the evolution of bacteria, viruses, and other microbes affects humans. Topics include infectious disease, the human microbiome, food production, and environmental microbes. The course is centered around reading and analyzing primary literature.
Outcomes:
Students will apply fundamental evolutionary principles to microbes, understand the broad relevance of microbial evolution to human life, and read and communicate about primary literature on the topic

BIOL 346 Biology of Women (3 Credit Hours)
This course focuses on the anatomy and physiology of women at different and critical times in their life span. This course also addresses social issues that effect women at different points in their life. Topics include the evolution of sex, gender differentiation, and reproduction.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: BIOL346/WOST346/ANTH346/WSGS
Outcomes:
Students will learn about the biology of the female system, and how it changes with age; Students will also learn through discussions and guest lectures the interplay between society, medicine and gender

BIOL 347 Bird Conservation and Ecology (3 Credit Hours)
Pre-requisites: ENVS 137 or BIOL 102
This engaged-learning course provides an introduction to the theory and practice of avian conservation, ecology and management. Field trips for viewing birds in the wild, observing behavior and collecting data on habitat assessments are highlighted. Students participate in a community service project to gather data for avian conservation and management.
Course equivalencies: X-ENVS 267/BIOL 347
Outcomes:
Students will become skilled in critical reasoning and some bird monitoring techniques, and demonstrate an understanding of the many facets of bird conservation

BIOL 348 Field Ornithology (3 Credit Hours)
Pre-requisites: ENVS 280 & ENVS 286 or BIOL 265 & BIOL 266 (BIOL 215 recommended but not required)
Field ornithology is an intensive 3-week engaged-learning course at the Loyola University Retreat and Ecology Campus during the peak of the migratory season intended to provide an introduction to the theory and practice of field ornithology. Emphasis will be on field identification and song recognition, census techniques, and avian behavior.
Course equivalencies: X- ENVS 369/BIOL 348
Outcomes:
Students will become skilled in critical reasoning, field techniques, and scientific investigation that demonstrate an understanding of knowledge and techniques used in field ornithology

BIOL 349 Conservation and Sustainability of Neotropical Ecosystems (3 Credit Hours)
This course provides an introduction to conservation ecology in Neotropical ecosystems via classroom sessions and experiential learning activities during a Spring-Break field trip to Belize. Students will gain experience in environmental monitoring and biological survey methods. Ecosystems studied: coral reefs, mangrove forests, subtropical rain and dry forests, savannas, rivers, wetlands. Enrollment Conditions: For Biology Majors/Minors: BIOL 265; For Environmental Science Majors: ENVS 280
Course equivalencies: X- ENVS 345/ BIOL 349
Outcomes:
Students will gain an understanding of tropical climates, neotropical terrestrial/aquatic ecosystems and applied conservation and environmental practices such as nature reserve design and management, community-based resource management, ecotourism, and ecoagriculture

BIOL 350 Vertebrate Physiology (3 Credit Hours)
Pre-requisites: BIOL 251, BIOL 282, and (CHEM 180 or CHEM 102 or CHEM 106)
This is an introduction to the physiology of marine, freshwater, and terrestrial vertebrates. Understanding how physiological concepts are manifested by animals facing different environmental challenges is emphasized. Topics to be covered include metabolism and energy balance, nervous and endocrine function, respiration, circulation, water balance and ionic regulation, and excretion.
Outcomes:
Compare and contrast how various vertebrates utilize major organ systems to maintain homeostasis; Describe how common physiological principles are manifested through vertebrates' adaptation to their environments

BIOL 351 Sleep/Circadian Rhythms (3 Credit Hours)
Pre-requisites: BIOL 251, BIOL 282, NEUR 101
We will cover circadian rhythms one very prominent circadian-regulated behavior: sleep. We will investigate these topics at several different levels, spanning from cellular and molecular mechanisms to systems and behavioral approaches, and finally will look at pathologies of these systems that lead to human disorders.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will become familiar with a variety of model systems used to study circadian rhythms, and learn how to critically read primary literature and lead discussions of this reading

BIOL 352 Neurobiology of Feeding in Health and Disease (3 Credit Hours)
Pre-requisites: NEUR 101, BIOL 251
Multiple interconnecting systems, coupling the brain with the rest of the body, signal the need to consume food and when to stop. The overall aim of the course is to understand what drives us to eat and how dysregulation within these brain circuits underlies the contemporary obesity crisis.
Outcomes:
By completing this course, students will achieve an advanced understanding of the fundamental principles that govern the brain's control of energy homeostasis

BIOL 353 Natural History of Vertebrates (4 Credit Hours)
Pre-requisites: BIOL 265
The objective of the course is to provide an in-depth study of the vertebrates in the Midwestern U.S. Topics will include the origin and evolution of vertebrates, and their ecology, behavior and specializations. The lab will focus on identification of vertebrate taxa and learning wildlife sampling techniques.
Outcomes:
Understand specifics of ecology, behavior, life history, evolution and conservation of all vertebrate taxa; Read, analyze, interpret, and discuss peer-reviewed literature

BIOL 354 Mammalian Reproduction (3 Credit Hours)
Pre-requisites: BIOL 251
Anatomy and physiology of male and female reproductive systems, fertilization, implantation, pregnancy, and birth; immunological aspects of reproduction.
Outcomes:
Students will understand structure/function relationships in reproductive biology and how reproductive systems are regulated at cellular levels

BIOL 355 Parasitology Lec/Lab (4 Credit Hours)
A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.
Outcomes:
Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation

BIOL 356 The Evolution of Animal Sex (3 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
Among animals, sex cannot be simplified down to X's and Y's, or even males and females. Sex is diverse and dynamic. The class will discuss modern research around three themes: 1) sexual differentiation, 2) animal weapons and ornaments, and 3) reproduction and mating systems.
Outcomes:
Students will gain a deeper appreciation of the sexual diversity among animals at genetic, physiological, morphological and behavioral levels

BIOL 357 Neural Disease, Degeneration, and Regeneration (3 Credit Hours)
Pre-requisites: BIOL 251, BIOL 282, NEUR 101
This course offers an overview of cellular and molecular mechanisms underlying common neurodegenerative disorders. Mechanisms of neuronal cell death and application of stem cells in CNS regeneration will also be covered. Students will learn by reading assigned background materials and research articles, and participating in class discussions.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will understand current advances of genetic, developmental, molecular, and cellular mechanisms underlying the neurodegenerative diseases; Students will also learn how disease mechanisms affect neural function, cognition, and behavior

BIOL 358 Developmental Neurobiology (3 Credit Hours)
Pre-requisites: BIOL 251, BIOL 282, NEUR 101
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles; Students will also learn how to critically read primary research papers and present these papers to the class

BIOL 359 Paleopathology (3 Credit Hours)
Pre-requisites: BIOL 251 and ANTH 326 or BIOL 326
Normal bone tissue and normal bone alterations and the impact of various disease processes on skeletal tissue. Students will be taught to assess and interpret patterns of human disease in processual rather than typological terms.
Course equivalencies: X-ANTH359/BIOL359
Outcomes:
Students will have command of biological anthropological approaches towards the understanding of human disease and will be familiar with theoretical issues germane to the field of paleopathology, biases and ethical issues, and the role that disease has played throughout human history

BIOL 360 Field Biology (3 Credit Hours)
Pre-requisites: BIOL 265 and permission of chair
Ecological study of an area in North America outside Midwest. Includes a field trip to a specific region. Trip is at student expense."
Outcomes:
Students will become familiar with an ecosystem outside the Chicago Region; gain a first-hand understanding of the interrelationships of living things and their environment; develop a loving appreciation of "wilderness

BIOL 362 Neurobiology (3 Credit Hours)
Pre-requisites: NEUR 101 and BIOL 251
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Interdisciplinary Option: Neuroscience
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 363 Entomology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 265
An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience.
Outcomes:
Students will learn to identify major insect groups in the field and in the laboratory; They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental

BIOL 365 Writing a Scientific Manuscript (3 Credit Hours)
Pre-requisites: BIOL 102, BIOL 112
A Process from Data Collection to Writing a Scientific Manuscript. This course is designed for upper level students interested in practicing the scientific process; including hypothesis construction, experimental design, data collection, and writing of a scientific paper detailing Introduction, Methods, Results and Discussion.
Outcomes:
Students would learn to develop hypotheses, design experiments based on those hypotheses, analyze data, and learn to construct and peer-review a scientific manuscript

BIOL 366 Cell Physiology & Biochemistry (3 Credit Hours)
Pre-requisites: Bioinformatics majors: CHEM 224 or CHEM 222 or (CHEM 240 pre-req and CHEM 260 co-req); All other majors: BIOL 251 & CHEM 224 or CHEM 222 or (CHEM 240 pre-req and CHEM 260 co-req)
An introduction to biochemical principles as they relate to major biological themes such as the relationship between cellular structure and function, metabolism, thermodynamics, regulation, information pathways, and evolution. BIOL 366 is cross-listed with CHEM 361.
Interdisciplinary Option: Forensic Science
Course equivalencies: X-BIOL366/BIOI366/CHEM361
Outcomes:
Students will study the basic concepts of biochemistry and will understand how thermodynamics govern biochemical processes; Catalytic strategies, as well as the major pathways of both anabolism and catabolism, will also be learned

BIOL 366L Cell Physiology & Biochemistry Lab (3 Credit Hours)
Introduction to modern techniques and instrumentation with an emphasis on cellular metabolism and protein biochemistry including purification and quantitation methods and enzyme kinetics.
Interdisciplinary Option: Forensic Science
This course satisfies the Engaged Learning requirement.
Outcomes:
Proficiency in performing a variety of biochemical assays and the ability to write up results as a formal lab report

BIOL 367 Bioimaging (4 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282; PHYS 112 or PHYS 114; Instructor Permission
This course focuses on light microscopy but also includes a section on Electron Microscopy. Topics include basic optical theory, history, sample preparation, microscope operation, digital image acquisition and analysis.
Outcomes:
Students will become adept at producing publication quality images using a variety of imaging techniques; Students will also learn how to correctly interpret results and properly present their data

BIOL 368 Plant Ecology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 265
Focuses on plant population dynamics; plant-animal interactions, including herbivory, pollination, dispersal; plant community dynamics, such as the processes of succession; and the effect of global climate on the distribution of major vegetation types. The laboratory is divided between weekend field trips to local forests, prairies and bogs, and laboratory studies.
Outcomes:
Students will achieve familiarity with major vegetation types and especially with local vegetation and natural areas; understand the dynamics of plant communities; understand the nature of research in plant ecology and gain familiarity with the primary literature; understand environmental issues as they relate to plant ecology

BIOL 369 Invertebrate Biology (3 Credit Hours)
Broad survey of invertebrates including morphology, physiology, ecology, evolution, and systematics.

BIOL 370 Ichthyology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 265
Lecture and laboratory and/or field trips. Systematics, phylogeny, anatomy, physiology, behavior, functional morphology and ecology of fishes. Includes field collecting trips in Lake Michigan and local streams and lakes and individual projects/research papers.
Outcomes:
Students will develop a detailed understanding of a range of topics in fish biology, with special emphasis on evolutionary relationships

BIOL 373 Laboratory in Neuroscience I (4 Credit Hours)
Pre-requisites: NEUR 101, BIOL 251; and students must be either a Molecular/Cellular Neuroscience Major, a Cognitive/Behavioral Neuroscience major, or a Neuroscience Minor
Students will be trained in various anatomical, physiological, behavioral, and neurobiological modeling techniques used to study the nervous system and the brain in the laboratory. This course is cross-listed as NEUR 301 & PSYC 388.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-NEUR301/PSYC388/BIOL373
Outcomes:
Students will demonstrate understanding of several research designs and methodologies of use in neuroscience research and will gain experience with basic neuroscience laboratory techniques

BIOL 375 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Pre-requisites: BIOL 265
This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 376 Seminar in Molecular/Cellular Neuroscience (3 Credit Hours)
Pre-requisites: BIOL 282 and BIOL 362
This lecture/discussion will span synaptic plasticity, modern approaches to studying neural circuits, and the therapeutic potential of neural stem cells. Students become familiar with principles of molecular/cellular approaches to the study of the nervous system through review articles and the primary literature.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will become familiar with principles of molecular/cellular approaches to the study of the nervous system; Students will also learn how to evaluate primary literature

BIOL 377 Molecular Pathogenesis (3 Credit Hours)
Introduction to the molecular mechanisms of disease pathology and therapeutic and control strategies, using a particular disease as model.
Outcomes:
Students will be able to explain the molecular basis for particular disease symptoms, understand therapeutic strategies, and use experimental results to form conclusions about disease molecular mechanisms

BIOL 378 Dental Anthropology (0 Credit Hours)
Pre-requisites: ANTH 101 or any 100-level Biology course
This course examines teeth with an anthropological perspective. By using evolution by natural selection as our theoretical framework, students will learn dental anatomy, morphology, and variation. The course then focuses on embryology, dental development and eruption, and the biocultural ways humans use their teeth.
Course equivalencies: X- ANTH 327/BIOL 378
Outcomes:
Students will gain factual knowledge of teeth from an evolutionary perspective and will develop specific hands-on skills needed by dental anthropologists, dentists, and oral biologists including dental molding, casting, and wear scoring

BIOL 378B Biological Topics for Bioethics Minor Capstone (3 Credit Hours)
Pre-requisites: Two prior science courses and two prior ethics courses required
The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include bio-technologies, concepts of race and gender, the environment, reproduction, and others. This course number provides an elective for Biology students when the Bioethics capstone's topic is biological.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and biological issues with regard to the special topic in biology

BIOL 379B Biological Topics for Bioethics Minor Capstone (3 Credit Hours)
Pre-requisites: Two prior science courses and two prior ethics courses
The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include biotechnologies, concepts of race and gender, the environment, reproduction, and others. This course number provides an elective for Biology students when the Bioethics capstone's topic is biological.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and biological issues with regard to the special topic in biology

BIOL 380 Genetics and Evolution of Development (3 Credit Hours)
This course explores the evolution of the embryo and the patterns of gene regulation and morphogenesis that drive early development. Topics include evolution of nervous system patterning, shared human, mouse and frog regulatory systems and evolution of human genetic syndromes.
Outcomes:
Students will master the stages and regulation of development in a number of organisms through use of primary literature; Evidence of their mastery will be seen through grant writing exercises, in class presentations and conventional exams

BIOL 381 Epigenetics (3 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282; CHEM 222 or CHEM 224 or (CHEM 240 pre-req and CHEM 260 co-req)
This course will introduce students to epigenetic mechanisms operating throughout life, which include chromatin regulation, DNA methylation, histone modifications and non-coding RNAs. Students will gain an appreciation of how different cell types can maintain drastically different gene expression patterns yet share the exact same DNA sequences.
Outcomes:
Students will understand epigenetic mechanisms, apply insights gained to evaluate the effect of epigenetic changes in development, disease and aging, and learn how to lead a class discussion

BIOL 382 Molecular Genetics (3 Credit Hours)
Pre-requisites: BIOL 251 and 282; CHEM 222 or CHEM 224 or (CHEM 240 pre-req and CHEM 260 co-req)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 383 Population Genetics (3 Credit Hours)
Pre-requisites: BIOL 282 and MATH 132 or MATH 162; BIOL 235 is recommended
Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations.
Outcomes:
Students develop knowledge and awareness of population genetic theory and information; They learn how to apply basic tools of population genetic analysis

BIOL 384 Microbial Pathogenesis of Infectious Disease (3 Credit Hours)
Pre-requisites: BIOL 251 (Cell Biology) and BIOL 282 (Genetics) each with a C or higher
The course is focused on teaching students the way bacteria, viruses, fungi, and pathogens, can adhere, invade, replicate, and cause damage and disease in their hosts. The course focuses on the techniques used by researchers to ask questions about these processes.
Outcomes:
Students will understand the ways pathogens cause disease, read and review primary literature, and apply techniques used in a grant proposal on a topic of their interest

BIOL 385 Prin Electron Microscopy Lec/Lab (4 Credit Hours)
Pre-requisites: Permission of instructor, BIOL 341 recommended
This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs; Students will also learn how to correctly interpret their results, and properly present their data

BIOL 386 Human Genetics (3 Credit Hours)
Pre-requisites: BIOL 282
Students will learn the foundations of human complex trait genetics in this course-based undergraduate research experience. They will analyze and discuss primary literature in human genetics, understand how our genes do and do not influence human differences, apply software tools used in the field, and gain experience in oral and written presentation of research.
This course satisfies the Engaged Learning requirement.
Outcomes:
Learn the foundations of human complex trait genetics; Analyze and discuss primary literature in human genetics; Begin applying the scripting and software tools used in the field; Design, implement, and evaluate a guided genome-wide analysis of a human phenotype; Gain experience in oral and written presentations of research

BIOL 387 Genomics (3 Credit Hours)
Genomics is the compilation, characterization, and evaluation of DNA sequence information and its integration with established methods and genetic knowledge. This course will introduce the students to the study of genome structure and function and its application to biomedicine, agriculture, and evolution.
Interdisciplinary Option: Bioinformatics
Course equivalencies: X-BIOL387/BIOI387
Outcomes:
Students will acquire an in-depth knowledge of the nature of gene and genome structure, function, and evolution as well as the methods used to obtain and evaluate this knowledge; Students will be able to create meaningful web-based database search strategies and interpret the significance of results

BIOL 388 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Interdisciplinary Option: Bioinformatics
Course equivalencies: X-BIOL388/COMP381/BIOI388
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 389 Introduction to Pharmacology (3 Credit Hours)
Pre-requisites: BIOL 243, BIOL 251, BIOL 282; CHEM 222 or CHEM 224 or (CHEM 240 pre-req & CHEM 260 co-req)
Principles and mechanisms of drug action. Topics discussed include drug-receptor interaction, pharmacokinetics, drug distribution, metabolism, and neuro-transmission, blood-brain barrier, and toxicology.
Outcomes:
Students will be able to describe the cellular and molecular mechanisms of action for a variety of the most commonly used drugs in current medical use

BIOL 390 Molecular Biology Laboratory (4 Credit Hours)
Pre-requisites: Bioinformatics majors: BIOL 282 & BIOL 283 and CHEM 222 or CHEM 224 or (CHEM 240 pre-req and CHEM 260 co-req); All other majors: BIOL 251, BIOL 282, BIOL 283 and CHEM 222 or CHEM 224 or (CHEM 240 pre-req and CHEM 260 co-req)
This course is an intensive laboratory course in the basic principles and techniques of molecular biology, including bacterial cloning, polymerase chain reaction, restriction mapping, agarose gel electrophoresis, and DNA sequencing.
Interdisciplinary Option: Bioinformatics, Neuroscience
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-BIOL390/BIOI390
Outcomes:
Students will be able to demonstrate basic molecular biology skills including manipulation of bacterial cultures and DNA, plasmid minipreps, gel electrophoresis, cloning, polymerase chain reaction, and other molecular techniques that may be specific to their chosen independent projects

BIOL 391 Forensic Molecular Biology Lecture and Lab (5 Credit Hours)
Pre-requisites: BIOL 282, BIOL 283 & FRSC-BS Major
This course prepares students to work in forensic DNA analysis. The lectures cover the basic aspects of DNA structure and function while the laboratory gives students experience with the techniques and instruments used in forensic DNA analysis.
Interdisciplinary Option: Forensic Science
Course equivalencies: BIOL 391/FRSC 371
Outcomes:
Students will have a strong theoretical understanding of STR marker origin, population biology, and legal uses, and will be able to isolate and process DNA for STR scoring

BIOL 392 Metagenomics (3 Credit Hours)
Pre-requisites: BIOL 282
Exploration of next-generation sequencing technologies for assessing microbial diversity in ecological niches.
Interdisciplinary Option: Bioinformatics
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain hands-on experience with metagenomic methodologies while working in an interdisciplinary, collaborative setting

BIOL 394 Special Topics in Biology Laboratory (1-4 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 394E Special Topics in Biology Laboratory (Ecology Emph) (1-4 Credit Hours)
Laboratory. Special areas of study related to ecology outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology related to ecology

BIOL 394M Special Topics in Biology Laboratory (Molecular Emph) (1-4 Credit Hours)
Laboratory. Special areas of study related to molecular biology outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology related to molecular biology

BIOL 395 Special Topics in Biology (3 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 395E Special Topics in Biology (Ecology Emph) (3 Credit Hours)
Special areas of study related to ecology outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology related to ecology

BIOL 395L Special Topics Laboratory (1-4 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 395M Special Topics in Biology (Molecular Emph) (3 Credit Hours)
Special areas of study related to molecular biology outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology related to molecular biology

BIOL 396 Research (3 Credit Hours)
Pre-requisites: BIOL 296 (minimum 1 credit), Permission of Instructor; Contract Required
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Interdisciplinary Option: Neuroscience
This course satisfies the Engaged Learning requirement.
Course equivalencies: BIOL299/BIOL396
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 396E Research (Ecology Emph) (3 Credit Hours)
Pre-requisites: BIOL 296 (minimum 1 credit), Permission of Instructor; Contract Required
Laboratory or field research related to ecology under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn the full set of research skills required in doing an independent project related to ecology and reporting the results

BIOL 396M Research (Molecular Emph) (3 Credit Hours)
Pre-requisites: BIOL 296 (minimum 1 credit), Permission of Instructor; Contract Required
Laboratory or field research related to molecular biology under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn the full set of research skills required in doing an independent project related to molecular biology and reporting the results

BIOL 397 Course-Based Undergraduate Research Experience in Biology (1-4 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered. Students will be working on research contributing to current scientific questions in the noted special topic area.
This course satisfies the Engaged Learning requirement.
Course equivalencies: Biol 397H /Biol 397
Outcomes:
Students will plan and execute appropriate experimental or observational methods, and evaluate the results to address a research question or explore a biological phenomenon; Students will review the scientific literature, and then use the appropriate language and style to communicate their findings effectively to targeted audiences

BIOL 397E Course-based Undergraduate Research Experience in Biology (Ecology Emph) (1-4 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum related to ecology, that vary each time the course is offered. Students will be working on research contributing to current scientific questions in the noted special topic area.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will plan and execute appropriate experimental or observational methods, and evaluate the results to address a research question or explore a biological phenomenon related to ecology; Students will review the scientific literature, and then use the appropriate language and style to communicate their findings effectively to targeted audiences

BIOL 397M Course-based Undergraduate Research Experience in Biology (Molecular Emph) (1-4 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum related to molecular biology, that vary each time the course is offered. Students will be working on research contributing to current scientific questions in the noted special topic area.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will plan and execute appropriate experimental or observational methods, and evaluate the results to address a research question or explore a biological phenomenon related to molecular biology; Students will review the scientific literature, and then use the appropriate language and style to communicate their findings effectively to targeted audiences

BIOL 398 Internship in Biology (1-3 Credit Hours)
Pre-requisites: Permission of Instructor; Contract required
A supervised field placement intended to give students training or work experience in aspects of biology that cannot be obtained on campus.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in biology-related job settings

BIOL 398E Internship in Biology (Ecology Emph) (1-3 Credit Hours)
Pre-requisites: Permission of Instructor; Contract required
A supervised field placement intended to give students training or work experience in aspects of biology related to ecology that cannot be obtained on campus.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in ecology-related job settings

BIOL 398M Internship in Biology (Molecular Emph) (1-3 Credit Hours)
Pre-requisites: Permission of Instructor; Contract required
A supervised field placement intended to give students training or work experience in aspects of biology related to molecular biology that cannot be obtained on campus.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in molecular biology-related job settings

BIOL 399 Individual Study (1-3 Credit Hours)
Directed study of a specific topic by an individual student studying with a single faculty member.
Outcomes:
Students will master a unique topic in biology

BIOL 399E Individual Study (Ecology Emph) (1-3 Credit Hours)
Directed study of a specific topic related to ecology by an individual student studying with a single faculty member.
Outcomes:
Students will master a unique topic in biology related to ecology

BIOL 399M Individual Study (Molecular Emph) (1-3 Credit Hours)
Directed study of a specific topic related to molecular biology by an individual student studying with a single faculty member.
Outcomes:
Students will master a unique topic in biology related to molecular biology

BIOL 401 Medical Literature and Ethics (3 Credit Hours)
The course will include lectures on the foundational concepts of modern ethics, in class discussions of ethics primarily centered on discussion of cases from different ethical perspectives, quizzes to assess reading mastery and familiarity with material to qualify students on how to discuss cases and formal case presentations by student working groups.
Outcomes:
Understand and articulate the philosophical basis for different ethical frameworks; Have a firm command of the "four principles" of Benevolence, Non-maleficence, Justice and Autonomy and their clinical applications; Be able to resolve clinical ethical issues and back up your reasoning

BIOL 402 Microbiology (3 Credit Hours)
Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 405 Advanced Development (3 Credit Hours)
Developmental Biology draws from Genetics, Molecular Biology, Genomics, and Embryology and is a foundational science for understanding problems in Humans ranging from birth defects to cancer. Because of its multidisciplinary foundation, Developmental Biology is best thought of as a SYSTEM OF IDEAS, EXPERIMENTS AND OBSERVATIONS, as such you will greatly expand your scientific vocabulary and problem solving abilities during the course of this semester. Often you will need to draw on your stored knowledge from many disciplines to understand the topics we will cover. The course will comprise lectures on general development, evolution and developmental genetics, followed by discussions of papers on particular topics, and student presentations.

BIOL 408 Writing for the Medical Professions (3 Credit Hours)
This course will be required for the Master of Arts in Medical Sciences (MAMS) program. It will include readings related to developing the student's physician persona, and writings that are required for the medical school application process. Pre-requisites: Admission to the MA in Medical Sciences program.
Outcomes:
Students will be prepared to write effective primary and secondary essays for their medical school applications; communicate clearly their motivation to pursue a career in medicine and the relevance of their experiences to their pre-medical preparation

BIOL 409 Advanced Genetics (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program (Note: MAMS = MSCI-MA)
The course will comprise formal discussions on the molecular basis of information storage and retrieval in the cell, the role of genetics in human development and homeostasis, the mapping of human genes in familial or population contexts, and modern understanding of the connection between genotype, phenotype and human traits.

BIOL 410 Advanced Cell Biology (3 Credit Hours)
This course explores, in depth, the life cycle and activities of a typical eukaryotic cell. Some of the topics covered are cell polarity, cytoskeleton, plasma membrane, protein modifications and trafficking, extracellular matrix and cell death. Competencies to be gained in this course: To develop the skill of reading and analyzing the primary literature on topics pertaining to cell biology. Judging whether a conclusion is supported by sufficient data. Identifying the controls in published experiments. Exam-taking skill improvement using short reading passages from the scientific literature as topics.

BIOL 413 Advanced Immunology (3 Credit Hours)
Introduces innate and adaptive immunity, lymphocyte development, T-cell and B-cell mediated immunity, leukocyte trafficking, immunological memory hyperimmune reactions, autoimmunity, tumor and transplant immunity. Must be enrolled in the Master of Arts in Medical Sciences (MAMS) program.
Outcomes:
Students will acquire an overview of the human immune system that prepares them for success in a medical school immunology class

BIOL 415 Advanced Parasitology (4 Credit Hours)
Lecture and laboratory. A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.
Outcomes:
Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation

BIOL 416 Limnology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Students will learn to evaluate the trophic status and health of a lake by the end of the course.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions

BIOL 417 Wetland Ecology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the study of wetlands habitats. This course includes discussion of physical and chemical factors, biota, production and community dynamics. Laboratories include several field trips to regional wetland habitats.
Outcomes:
Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants

BIOL 418 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Lecture and laboratory. This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 422 Research (1-6 Credit Hours)
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 426 Entomology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.
Outcomes:
Students will learn to identify major insect groups in the field and in the laboratory

BIOL 430 Virology (3 Credit Hours)
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 450 Advanced Bioinformatics (2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOL 451 Bioinformatics Seminar (1 Credit Hour)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills. Students can summarize, critique, and present bioinformatics research.
Course equivalencies: X-BIOI501/BIOL451

BIOL 452 Human Anatomy and Physiology I (3 Credit Hours)
The course objectives are to learn the gross anatomical structures of the human body. To organize the relationships between these structures and systems using patterns of innervation and development. To be able to apply anatomical knowledge in ways pertinent to clinical issues.

BIOL 453 Human Anatomy and Physiology II (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program
This is the second semester of a 2 semester course. We will cover the physiology of the cardiovascular, respiratory, digestive, renal, reproductive, and endocrine systems, in addition to acid-base and fluid balance, temperature regulation, and exercise physiology. Functioning will be discussed from a systems level to a molecular level.

BIOL 455 Advanced Neuroscience (3 Credit Hours)
This course will focus on the cellular, anatomical, and functional organization of the human nervous system that range in topics from ion channel physiology to cognition. Students will survey the elements of the nervous system necessary for a foundation for medical school. An understanding of pathologies presented in disease, dysfunction, and injury will be included.
Outcomes:
Learn foundational neurological concepts presented to first year medical students; Learn the pathology of neurological disease, dysfunction, and injury through clinical cases; Understand the neurological basis of higher-order functions

BIOL 458 Developmental Neurobiology (3 Credit Hours)
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis. Students will also learn how to critically read primary research papers and present these papers to the class.
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles

BIOL 461 Advanced Neurobiology (3 Credit Hours)
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 466 Advanced Biochemistry (3 Credit Hours)
Life is based on four principle cellular components: proteins, lipids, carbohydrates, and nucleic acids. Biochemistry is concerned with the structure, function, and interactions of these compounds with one another and their environment. As such biochemistry plays a vital part in all aspects of the medical sciences since it not only helps us to understand how the (human) cell works on a molecular level but also how to decipher and possibly counter pathogenic conditions. Consider that almost all drugs used in medical treatment target proteins or groups of proteins to modulate their biochemical properties.

BIOL 470 Biostats & Exp Design Lec/Lab (4 Credit Hours)
This course is designed for students who are in, or plan to attend, graduate or professional school, and thus, will be working with their own data or critically analyzing existing data. This course will emphasize the theory and application of commonly used statistics in biology.

BIOL 479 Biology AP Workshop (3 Credit Hours)
No course description is available

BIOL 482 Advanced Molec Genetics (3 Credit Hours)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 483 Pop Genetics (3 Credit Hours)
Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations. They learn how to apply basic tools of population genetic analysis.
Outcomes:
Students develop knowledge and awareness of population genetic theory and information

BIOL 485 Prin Electron Microscopy Lec/Lab (4 Credit Hours)
Lecture and laboratory. This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques. Students will also learn how to correctly interpret their results, and properly present their data.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs

BIOL 488 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 493 Directed Reading (1-4 Credit Hours)
Student investigates a current topic in biology.

BIOL 495 Special Topics (1-4 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 495L Special Topics Lab (0 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered. Outcome: Students will master a unique topic in biology.

BIOL 500 Scientific Logic (3 Credit Hours)
The Scientific Logic course is designed to teach scientific literacy in terms of writing grant proposals, reading scientific literature, scientific presentations and debate. The course is framed within an evolutionary foundation.
Outcomes:
Students will gain knowledge in advanced evolutionary topics, while preparing a grant proposal and developing skills with respect to critical thinking and scientific inquiry

BIOL 501 Seminar (1 Credit Hour)
Students present specific, current research topics including their own research to the class and faculty.

BIOL 502 Department Seminar (1 Credit Hour)
Students meet and discuss the research presented by seminar speakers.

BIOL 510 Instructions in Teaching Biology (1 Credit Hour)
Introduction to the fundamentals of teaching biology.

BIOL 511 Biology Teaching Practicum (2 Credit Hours)
Students gain firsthand teaching experience by assisting in undergraduate courses.

BIOL 595 Thesis Supervision (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

BIOL 605 Master's Study (0 Credit Hours)
Students conduct thesis research under the direction of their Thesis Director.

Biomedical Sciences (BMSC)

Discover, search, courses (p. 2953)!

BMSC 402 Statistical Methods for Biomedical Science (2-3 Credit Hours)
This course covers a broad array of statistical methods for the biological and medical sciences. Topics include descriptive statistics, non-parametric methods, categorical data analysis, and regression methods for normal, non-normal, and repeated measures data. The course focuses on the analysis of real datasets using RStudio, although no previous programming experience is assumed.
Course equivalencies: CRME420/BMSC402/MPBH404

BMSC 405 Ethics in Biomedical Sciences (1 Credit Hour)
This is an interactive seminar course where students discuss and debate ethics in biomedical sciences to foster integrity, professional character, and ethical problem solving skills.

BMSC 406 Special Topics (1-3 Credit Hours)
This course covers a specific topic in biomedical sciences. The topics can vary among different special topics courses.

BMSC 410 Biochemistry and Molecular Biology (4 Credit Hours)
This course will give students a broad understanding of the synthesis and functions of the major macromolecules that comprise a cell, and the biochemical mechanisms by which these molecules interact to contribute to cellular function.

BMSC 412 Cell Biology (4 Credit Hours)
This course will provide students with knowledge of the structure and function of cells, including the experimental foundations of cell and molecular biology.

BMSC 414 Systems Biology (3 Credit Hours)
This course will provide first year graduate students with an introduction to human physiology. Emphasis is placed on the major organ systems including the nervous, cardiovascular, pulmonary, renal, gastrointestinal and endocrine systems. Basic physiology of blood, skin and bone, as well as introductory concepts in immunology and pharmacology are also covered.

BMSC 416 Methods Biomedical Science (1 Credit Hour)
This course will familiarize first year graduate students with various methods that are used in contemporary biomedical research. It will introduce methods relevant to molecular biology, tissue culture, transgenic model systems, imaging, biochemistry, bioinformatics, electrophysiology, and immunology.

BMSC 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

BMSC 499 Research (0-2 Credit Hours)
Pre-requisites: First year PhD students will register for one research rotation in the Fall semester (2 credit hours), and two research rotations in the Spring semester (3 credit hours)
Research rotation course for first year students in the Integrated Program in Biomedical Sciences.
Outcomes:
Research course will provide laboratory experience during the first year of study, expected to culminate in the selection of a dissertation research laboratory and mentor at the end of the first year

BMSC 600 Dissertation Supervision (0 Credit Hours)
Following completion of the required 48 credit hours in the first 2 years, IPBS PhD students maintain registration via BMSC 600.
Course equivalencies: BMSC600/MIIM600/PIOL600
Outcomes:
IPBS PhD students will complete their degree work while registered for BMSC 600

Business Administration (BSAD)

Discover, search, courses (p. 2953)!

BSAD 400E Business Foundations (1.5 Credit Hours)
Enrollment limited to students enrolled in the EMBA or EMBA Health Care Management Programs. Introductory course delivered during initial residency/orientation week to lay foundation for business education in the EMBA and EMBA Health Care Management Programs. Course coverage includes: Jesuit traditions/values, Quantitative Methods, Business Communications, and current topical lecture.

BSAD 401E Effective Business Writing Workshop (0.75 Credit Hours)
Enrollment is restricted to the Executive MBA or Executive MBA Health Care Management program. This course introduces the fundamentals of good written and oral business communications. Course topics include: communicating strategically; making a business case (argumentation and persuasion); presenting data effectively; producing and delivering compelling PowerPoint presentations; and delivering a powerful presentation.

BSAD 402E Effective Business Presentation Skills Workshop (0.75 Credit Hours)
This course introduces the fundamentals of good oral business communications. Course topics include: presenting data effectively; producing and delivering compelling PowerPoint presentations; and delivering powerful presentations. Restricted to students enrolled in EMBA or MBA Health Care Management cohort

BSAD 409E Integrative Strategy (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Integrates functional area considerations with strategic decision-making at the end of the program.

BSAD 499E Special Topics (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Offers students opportunity to gain additional understanding on a special business topic not otherwise covered in the standard EMBA curriculum. The subject and content vary and are offered on an ad hoc basis.
Outcomes:
Students will demonstrate understanding of specialized topics not otherwise covered in EMBA curriculum

BSAD 601E Special Topics (1.5 Credit Hours)
Restricted to Executive MBA students. Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

BSAD 609E Integrative Strategy (1.5 Credit Hours)
Restricted to Executive MBA students. Integrates holistic and humanistic concepts (social justice, sustainability, greater good, Jesuit perspectives, etc.) into scientific business management and one's individual lifestyle. Students apply these perspectives by addressing recent developments in emerging topics. In addition, students will present final Capstone project.

Business Ethics (ETHC)

Discover, search, courses (p. 2953)!

ETHC 341 Ethics in Business (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of C- in MGMT 201 or HSM 368 and ECON 202
This course focuses on ethical issues in the world of business and commerce. This course will address a number of interrelated questions: What are the rights and obligations of business in society? Can businesses "do good" and "do well"? Is business ethics a viable goal or an unachievable ideal?
Course equivalencies: PHIL185/283/MGMT341/H/BHNR341

ETHC 341H Ethics in Business - Honors (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of "C-" in MGMT 201 or MGMT 201H and ECON 202 or ECON 202H; restricted to SBA honors students
This course focuses on ethical issues in the world of business and commerce. This course will address a number of interrelated questions: What are the rights and obligations of business in society? Can businesses "do good" and "do well"? Is business ethics a viable goal or an unachievable ideal?
Course equivalencies: PHIL185/283/MGMT341/H/BHNR341

ETHC 399 Special Topics in Business Ethics (3 Credit Hours)
Pre-requisites: Junior standing
Special topics are scheduled classes offered on an ad hoc basis. Specific titles and content will vary.
Outcomes:
Varies with topic

ETHC 441E Business Ethics and Values (1.5 Credit Hours)
Pre-requisites: Restricted to students in the Executive MBA Program
This course combines Quinlan's core business ethics course with contemporary instruction in leadership. Students will develop a framework for ethical decision making and the leadership strength needed to advance business decisions.
Course equivalencies: ETHC 600E/ETHC 441E

ETHC 441N Business Ethics (3 Credit Hours)
Students are introduced to theories about social and political institutions, and how they affect our ability to make moral decisions. Topics may include social psychology, capitalism and its critics, democratic theory, labor relations, and social inequalities. Classes are dedicated to understanding and engaging with social and political theory on this topic. Assignments will involve students using these theories to critically assess corporate practices and contexts. School of Business graduate degree students
Outcomes:
Global Perspective & Awareness of Diversity: developing a global perspective and appreciating diversity, including class, culture, race, religion, and gender; Communication Skills: communicating complex moral and philosophical ideas effectively and appropriately in an oral and written manner

ETHC 499 Special Topics in Business Ethics (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Business Honors (BHNR)

Discover, search, courses (p. 2953)!

BHNR 300 Business Honors Seminar-Required (0 Credit Hours)
Pre-requisites: Restricted to students in the Quinlan Business Honors program
This seminar is a non-graded program requirement providing honors students with opportunities to learn from and network with leaders at major companies and organizations. Seminar is primarily a speaker series presenting honors students with opportunities to attend corporate and organizational site visits, social activities, and other events. Through seminar, honors students are able to network with each other and build community.
Outcomes:
Encourage bonding, stimulate thoughtful interaction, provide connections with the faculty, and connect to the broader business and alumni community

BHNR 343 Integrated Analytical Decision Making (3 Credit Hours)
Pre-requisites: Enrollment is restricted to Business Honors students; Junior Standing; C- or better in ISSCM 241 or ISSCM 241H or STAT 103
This course will focus on the analysis of data, with applications of techniques to business problems. Students will conduct original research and create both a written analysis and presentation. This course satisfies the Engaged Learning requirement.
This course satisfies the Engaged Learning requirement.
Outcomes:
At the end of this course, the student will know how to formulate a business problem, then collect and analyze data, and interpret results that address the problem

BHNR 353 Research Practicum (3 Credit Hours)
This course introduces students to the process of business research, including research ethics as well as implications of research outcomes in the broader business and social context. Good research helps business managers understand issues and make informed decisions.
This course satisfies the Engaged Learning requirement.

BHNR 395 Independent Study in Business Honors (3 Credit Hours)
Pre-requisites: Sophomore standing, Department Consent Required
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member into a specialized area as determined between student and faculty member.
Outcomes:
Students will be able to demonstrate an in-depth understanding of a specialized area or topic of research

Catholic Studies (CATH)

Discover, search, courses (p. 2953)!

CATH 100 Introductory Topics in Catholic Studies (3-6 Credit Hours)
Introductory level course for topics cross-listed with other courses that focus on areas of Catholic studies but are not included among the courses listed in the Catholic Studies Program.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will master a topic in Catholic Studies not addressed in other courses

CATH 101 Evolution Western Ideas & Institutions to the 17th Century (3 Credit Hours)
This course traces the early development of Western civilization from the ancient Near East; Greece and Rome; the medieval civilization(s); to the European Renaissance and Reformation.
Course equivalencies: X-HIST101/CATH101/ACHIS101
Outcomes:
Students will gain an understanding of history as a discipline; be able to place Judaism, Christianity, and Islam in historical context; explain the expansion of the West; and develop their critical thinking and communications skills

CATH 101D Development of Western Thought Honors Discussion (3 Credit Hours)
Pre-requisites: Catholic Studies students must be enrolled in the Honors Program and must be completing the first section of the course HONR 101 (cross-listed with CATH 102)
This course is the second half of the Freshmen Honors program protocol of HONR 101, where students receive 6 credit hours for intensive reading, lectures, and discussion groups with professors.
Course equivalencies: X-HONRD101/CATH101D

CATH 102 Western Traditions Honors-Antiquity to Middle Ages (3 Credit Hours)
This course is restricted to Catholic Studies Minors enrolled in the Honors Program. This foundational course in the history of Western culture from antiquity to the Middle Ages discusses such writers ranging from Homer all the way to Augustine. Students will pose questions and comments about some of the ideas and texts that helped shaped Western culture, including many that come out of the western Christian tradition.
Course equivalencies: X-HONR10/CATH102

CATH 104 Jesus Christ (3 Credit Hours)
The study of the person of Jesus Christ.
Course equivalencies: THEO104/CATH104
Outcomes:
Students will be able to demonstrate understanding of the nature of Jesus Christ as both human and divine, what this might mean, how this formulation was derived, and the varieties of understanding of Christ within the Scriptures, the church, and modern scholarship

CATH 105 The Church in the World (3 Credit Hours)
How does Christian Theology inform how Christians act in the world? This is the central question that we will seek to answer throughout this course. Examining the intersection between theoretical and practical theology, we will explore the Church's engagement in the world at large, both in global cultures and political movements. Each class will focus on the sources of Christian doctrine, Biblical and Traditional, with an emphasis on Catholic teaching since Vatican II and on the lived reality of these teachings in a variety of historical and geographical contexts. Using contemporary examples of global issues, we will explore the practicality and potential benefits and drawbacks of doing theology in the public sphere.
Course equivalencies: X-THEO105/CATH105

CATH 106 Theology of The Sacraments (3 Credit Hours)
This course studies the realities of Christian faith life as expressed in the concrete rituals of Christian communities. Sacraments are more than just mechanical ways in which to experience God in Christian liturgy - defined traditionally as "visible signs of invisible realities." Certainly, the seven sacraments of the Catholic tradition perform the central mysteries of God's gracious self communication; however, as importantly, they also introduce and articulate a way of interpreting reality. This course will not only examine the historical development, central beliefs and communal practices of the sacraments, but will also explore the "sacramental principle" as a way to illuminate the theological dynamics that are such an essential component of Catholic liturgy and Christian spirituality. Students will investigate the nature of the sacramental system in Catholic worship, identify the key concepts of "sacramentality" and explore the religious practices that are part of the living tradition of sacramental theology. Finally, students will explore how, in the end, the sacramental principle affects everything and cannot be contained. Sacramentality is a way of being, an "eventing" that reminds us how dynamic and transcendent (as opposed to static and insulated) life is. So, we will follow the clues where they lead and assess current relationships among sacramental theology, liturgy, artistic reflection, cross-cultural expression, and daily life.
Course equivalencies: X-THEO265/CATH106

CATH 112 New Testament (3 Credit Hours)
The study of the New Testament.
Course equivalencies: X-THEO112/CATH112
Outcomes:
Students will be able to demonstrate understanding of the various literary genres found in the New Testament

CATH 179 Roman Catholicism (3 Credit Hours)
James Joyce famously called Roman Catholicism the "Here comes everybody" tradition, offering an apt description for a faith community made up of both sinners and saints, martyrs and missionaries, defenders and detractors all. This course on Roman Catholicism begins from the assumption that it is fundamentally a tradition of paradox, which establishes constancy through change and firmness through fluidity. Students will explore Roman Catholicism less as a set of definite beliefs and moral precepts, and more as a world-shaping perspective that forms Catholics to see and to be in distinctive ways. Finally, the course will address head-on a range of serious challenges confronting Roman Catholicism today, including widespread disaffiliation, clergy abuse, Magisterial teaching on gender and sexuality, women's ordination, and racism and anti-Judaism in the tradition.
Course equivalencies: THEO179/THEO279/CATH179

CATH 181 Christianity Through Time (3 Credit Hours)
This course will introduce you to the history and missionary movements of the Christian religion, from the early church to the present day. While the course is set up thematically in chronological order, you will read case studies based on primary sources, social history, and material culture that will give you an overview of Christian revelation, theological differences, community and controversies, circulation of ideas and counter-ideas, missionary tactics, power struggles, and people's experiences in ecclesial (liturgy and sacrament), para ecclesial, and personal ways. You will also visit the Art Institute of Chicago and the Newberry Library to see objects and manuscripts from the Christian tradition. The story this course seeks to reveal is how the Christian religion has defined the relationship between the divine and the human world.
Course equivalencies: THEO181/ THEO281/CATH181

CATH 193 Christian Marriage (3 Credit Hours)
Examination of the historical development of marriage within the Christian tradition as well as an investigation and evaluation of its condition in contemporary American society.
Course equivalencies: THEO193/THEO293/CATH193
Outcomes:
Students will be able to demonstrate understanding of ethical principles used to evaluate particular issues relevant to the understanding of the Christian tradition of marriage

CATH 200 Intermediate Topics in Catholic Studies (3-6 Credit Hours)
Intermediate level course for topics cross-listed with courses that focus on areas with Catholic studies but are not included among the courses listed in the Catholic Studies Program.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will master a topic in Catholic Studies not addressed in other courses

CATH 255 Music in Catholic Worship (3 Credit Hours)
This course will explore the relationship between music and the liturgies of the Roman Catholic Church. Theologies of liturgical music will be compared and contrasted using the official documents of the Church, theological perspectives and from pastoral experience.
Course equivalencies: X-MUSC255/CATH255
Outcomes:
For students seeking greater knowledge of sacred music, they will be introduced and become familiar with different styles of music, reflect upon and access the application and performance of sacred works within the course as well as in onsite experiences in Catholic parishes in Chicago

CATH 278 Medieval Culture (3 Credit Hours)
Europe in the Early Middle Ages was an unstable world, with its collapsing imperial framework, migrating peoples, contrary cultures, insecure economic structures and clashing political strategies. From that a new balance was struck, through the blending of Roman, Germanic, Celtic and Christian orders, and a Medieval Synthesis was forged. The readings emphasize primary sources and their interpretation while modern secondary sources will further inform our exploration into the phenomenon of cultural synthesis and its place in history.
Course equivalencies: X-ENGL279/CATH278/MSTU304

CATH 296 All Things Ignatian: Living and Learning in the Jesuit Trad (3 Credit Hours)
This course explores the founder of the Jesuits, St. Ignatius Loyola and considers his historical context and that of the Jesuits from Renaissance Europe to today. Second, the course will introduce "The Spiritual Exercises," a highly refined and adaptable method of prayer, contemplation and action. Finally, the course will examine Ignatian spirituality as a practical resource for addressing critical issues in the Church and world today. Identify and explain the chief characteristics and major themes of Ignatian spirituality. Locate, analyze, and demonstrate Jesuit apostolate of scholarship and teaching; identify the global contribution to education, particularly to university life. Experience direct service.
Interdisciplinary Option: Catholic Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CATH 296/THEO 296
Outcomes:
Describe the life and history of Ignatius of Loyola and the Society of Jesus

CATH 297 The Jesuits: Life and History (3 Credit Hours)
This course examines the history of the Society of Jesus from its founding by Ignatius Loyola in the 16th century to its activities in the contemporary world.
Course equivalencies: X-HIST297/CATH297
Outcomes:
Students will gain a sense of the characteristics of Jesuit spirituality and the contribution of Jesuits to various fields of human endeavor such as evangelization, education, politics, literature, and the visual arts

CATH 300 Advanced Topics in Catholic Studies (3-6 Credit Hours)
Advanced level course for topics cross-listed with courses that focus on areas with Catholic studies but are not included among the courses listed in the Catholic Studies Program.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will master a topic in Catholic Studies not addressed in other courses

CATH 301 Catholics in America (3 Credit Hours)
This course uses canonization, the process by which the Catholic Church recognizes saints, to explore change over time in the history of both the Catholic Church and the United States. Drawing upon a cast of characters that includes saints and sinners, martyrs and missionaries, patriot priests and unruly women, we will explore how conceptions of sanctity and holiness have been shaped by popular devotion, papal power, gender, race, sexuality, nationalism, and commercialization.

CATH 302 Religion & Pop Culture: Europe (3 Credit Hours)
In this course, we will explore how religion is lived by ordinary people in the contexts of everyday life through various popular culture forms and genres. We will consider how religion animates popular culture, how popular culture itself does religious work, and how religious and non-religious groups and individuals approach popular culture at various times and in certain circumstances as both sacred and profane.

CATH 303 Topics in the Catholic Philosophical Tradition (3 Credit Hours)
Pre-requisites: One class in philosophy or permission of instructor
This course examines some aspect(s) of the Catholic philosophical tradition, drawing from various eras: its roots in ancient Greek philosophy, through the medieval period in the work of figures such as St. Augustine and St. Thomas Aquinas, and up to and including contemporary Catholic philosophy.
Course equivalencies: X-CATH 303 / PHIL 342
Outcomes:
Students will be conversant and familiar with some central features of the Catholic philosophical tradition, demonstrating proficiency in operating within the philosophical framework of this tradition

CATH 305 Medieval Philosophy (3 Credit Hours)
This course deals with selected works from such authors as Augustine, Anselm, Aquinas, Bonaventure, Scotus, and Ockham. The course may be on a particular author, or on a theme or issue characteristic of medieval thought.
Course equivalencies: X-PHIL305/CATH305/MSTU344

CATH 307 13th & 14th Century Philosophy (3 Credit Hours)
Modern thinkers of the 13th and 14th centuries, including at least some of the following: Albertus Magnus, Thomas Aquinas, Dun Scotus, William of Ockham, Roger Bacon. This course will focus on Thomas Aquinas, John Duns Scotus, and William of Ockham. In doing so we will try to get a sense of how they carried out the practice of philosophy, especially given the fact that each of them was a theologian by profession. Thus, the main theme of the course will be the relation of philosophy to theology - more broadly, faith and reason - as it was understood in this period. We will also look at a range of other issues that were of concern to the scholastics--chiefly questions of metaphysics and epistemology.
Course equivalencies: X-PHIL307/CATH307

CATH 309 History of Primitive Christianity (3 Credit Hours)
This course treats the history of Christian communities and beliefs from their emergence in cities of the early Roman Principate to the legalization of that religion in the Late Antique period.
Course equivalencies: X-HIST309/CATH309
Outcomes:
Students gain familiarity with messianism and eschatology in Second Temple Judaism, evangelization and growth of urban Christian churches, interaction with Roman Imperial government, and the flourishing of monasticism in the period of legalization

CATH 310 The Early Middle Ages 600-1150 (3 Credit Hours)
This course examines European society and culture in the early Middle Ages.
Course equivalencies: X-HIST310/MSTU328/CATH310
Outcomes:
Students will demonstrate an understanding of reasons behind the transformation of classical civilization; the so-called fall of Rome and the barbarian invasions; early Germanic kingdoms; Charlemagne and Carolingian Europe; the Vikings; and church and society in the eleventh century

CATH 311 Medieval World 1100-1500 (3 Credit Hours)
This course examines European society and culture in the later Middle Ages.
Course equivalencies: HIST311/MSTU332/CATH311
Outcomes:
Students will demonstrate understanding of new forms of schools and learning; the origins of national monarchies; the crusades; chivalry; courtly love and the role of women; the rise of towns; church and state relations; the Black Death and the Hundred Years War

CATH 312 Dante-The Divine Comedy (3 Credit Hours)
Refashioning the conventions of poetry, Dante (1265-1321) used the account of his presumed journey through the three realms of the Christian afterlife - Hell, Purgatory and Paradise - to explore the world at the close of the Middle Ages. The poem is both an adventure story and an exhaustive, assessment of the state of politics, society, religion, literature, philosophy, and theology at the beginning of the fourteenth century. This course examines a selection of cantos Dante's Inferno, Purgatorio, Paradiso in its cultural, theological, social and political context. In particular we will explore how the underground world imagined by the poet relates to late medieval urban life and culture. A guiding concern of the discussion is to assess the ways in which Dante changed our understanding of the relationship between the human and the divine, justice and love, will and reason, happiness and knowledge, literature and the Bible. Political turmoil, philosophical and theological paradigms social and religious conflict all converge in the making of the Comedy and will thus form crucial elements of our investigation.
Course equivalencies: X-ITAL312/CATH312/MSTU364

CATH 315 Mary and The Church (3 Credit Hours)
The course is structured as a chronological sweep through the history of ideas on Mary and her importance for understanding the God revealed in Jesus Christ. We will examine Mary's place throughout the seven major ages of Christianity with particular attention to the Early Church Age. After exploring the Mariologies of the Early Church Age, we will explore the continued development of Mariology, spending significant time thinking about Mariology in the Post-Modern Age through your papers and presentations.
Course equivalencies: THEO315/CATH315

CATH 316 The Reformation (3 Credit Hours)
This course examines the birth and progress of the Reformation in Europe from Luther's protest in 1517 to the conclusion of the Thirty Years War in 1648.
Course equivalencies: X-HIST315/CATH316
Outcomes:
Students gain familiarity with the social, religious, intellectual, and political background of the Reformation; Luther's personal religious experience and his theological convictions; the Swiss Reformation of Zwingli and Calvin; the nature and spread of Calvinism; the elements of the Radical Reformation; and the efforts for Catholic Reform culminating at the Council of Trent

CATH 317 Christian Thought: Ancient to Medieval (3 Credit Hours)
Early and medieval Christian Thought focuses upon the development of Christian thinking from the apostolic times to the eve of the Protestant Reformation. It centers on those individuals of the period who influenced thinking and practice in their as well as subsequent times. It also focuses upon important historical, social and political events that interacted with Christian doctrines throughout the centuries.
Course equivalencies: X-THEO317/CATH317/MSTU360

CATH 318 Christian Thought: Reformation to Modern (3 Credit Hours)
The development of various Christian doctrines in light of their historical milieu during the last six centuries of Christian thought.
Course equivalencies: X-THEO318/CATH318
Outcomes:
Students will be able to assess how various configurations of theological perspectives can both expand and foreshorten the way human thinking has gone on

CATH 320 The Philosophy of St Augustine (3 Credit Hours)
This course is a study of the principal works of Augustine, such as the Confessions, City of God.
Course equivalencies: X-PHIL320/CATH320/MSTU346
Outcomes:
Students will be able to understand and articulate philosophical problems and answers found in the works of Augustine

CATH 321 English Literature: Medieval Period (3 Credit Hours)
This course provides a survey of Old and Middle English Literature, studied partly in translation and partly in the original. Students will receive training in the understanding, appreciation, and criticism of works of medieval culture.
Course equivalencies: X-ENGL320/CATH321/MSTU308

CATH 322 Chaucer (3 Credit Hours)
This course introduces students to the life and writings of Chaucer through the reading of a representative selection (but not necessarily all) of The Canterbury Tales and through considering a variety of critical perspectives on them. Students will be able to demonstrate knowledge of Chaucer's poetry, the ability to read Middle English, and familiarity with some critical perspectives on Chaucer's works.

CATH 345 Roman Catholic Social Thought (3 Credit Hours)
An introduction to the social documents of the Catholic Church in the modern era. This course presents a synthesis of the methodology, the anthropology, and the principles used by the Church in its moral reflection on the various social problems of our day.
Course equivalencies: X-THEO345/CATH345

CATH 361 St Augustine Works (3 Credit Hours)
Pre-requisites: LATN 101 and LATN 102 or their equivalents
This course focuses on translation and understanding of the works of Saint Augustine.
Course equivalencies: LATN361/CATH361
Outcomes:
students should be able to translate these works with proficiency, and be able to demonstrate knowledge in detail about the author and his works, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

CATH 379 Ecumenism in The 20th Century (3 Credit Hours)
Investigation of the principles of ecumenism as formulated in Vatican II. Study of the agreed statements of bilateral discussions between Christian communities.
Course equivalencies: X-THEO379/CATH379
Outcomes:
Students will be able to assess how various configurations of a religious worldview can both expand and foreshorten the way human thinking has gone on

CATH 383 Theology Arts & Literature (1-3 Credit Hours)
Study of theological and religious symbols and themes in modern literature and/or in the arts.
Course equivalencies: X-THEO383/ENGL383/CATH383
Outcomes:
The student who successfully completes this course will be able to demonstrate knowledge about religion and its intersections with selected contemporary ethical, social, political, economic, or cultural issues

CATH 393 Seminar Theology (3 Credit Hours)
An undergraduate seminar course in theology with variable content, addressing topical issues that are not covered by the regular offerings at the 300 level.
Outcomes:
Students will gain an in-depth understanding of a selected topic

CATH 395 Directed Readings in Catholic Studies (3-6 Credit Hours)
An independent program of reading and research developed in consultation with either the Catholic Studies Program director or a supervising faculty member that teaches in Catholic Studies, culminating in a major project or paper.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will master a topic in Catholic Studies not addressed in other courses

CATH 396 Seminar in Medieval Phil (3 Credit Hours)
This course will study selected issues from medieval philosophy.
Outcomes:
Students will develop a more advanced understanding of medieval philosophy, through direct student participation in an interactive seminar environment

CATH 400 Catholicism in the Americas (3 Credit Hours)
This course examines social, political, and religious developments in the Americas from the colonial era with a particular focus on the years following the Second Vatican Council through the present day in order to explore a range of issues regarding the nature of religion, politics, and the role of the Catholic Church.

CATH 402 Catholic Church in Modern World (3 Credit Hours)
This course will examine the Church in the modern world-- with an emphasis on the relationship between Catholicism and democracy, placing particular stress on their relevance to contemporary American public life. In this context, Catholicism will be understood not only as a religious institution, but as the source of a tradition of communitarian social and political thought, while democracy will be understood not only as a form of government, but also as an ethos shaping American society. Authors and texts will include Alexis de Toucqueville, Orestes Brownson, Dorothy Day, John Courtney Murray, and relevant documents from Vatican II and the American hierarchy. The historic tension between Catholicism and democracy will be the subject of our conversation as will the possibilities for greater harmony between them. In particular, we will explore the possibility that Catholicism's communitarian orientation might serve as a corrective to American individualism and consumerism, while democratic institutions and practices might have something to offer Catholicism.

CATH 498 Integrative Project (3 Credit Hours)
This is a synthesis course in which the student, in consultation with a faculty member, will independently research and develop a project that integrates subject-mastery and skills that they have developed over the course of their studies.

CATH 499 Independent Study (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Catholic Studies not otherwise covered by course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in Catholic Studies

Cellular and Molecular Oncology (CMO)

Discover, search, courses (p. 2953)!

CMO 499 Research (1-9 Credit Hours)
Pre-requisites: Restricted to students enrolled in CMO MS program
CMO 499 is designed to give credit for laboratory research efforts that will result in a M.S. thesis. Students will learn theoretical and laboratory technical tools to investigate and test a hypothesis. Students will search the literature for background, rationale, and protocols for their research project. Students will communicate results and knowledge through written and oral communications.
Outcomes:
1) Clearly communicate, describe, and implement techniques used for a research problem; 2) Describe results-obtained; 3) Draw conclusions based on data-obtained; 4) List future directions; and 5) Understand the significance of the work

CMO 502 Seminar (0 Credit Hours)
A seminar will be held on a rotating basis once per week. CMO M.S. students will be required to attend seminars as part of the CMO 502 course. This course is designed to help students stay abreast of current topics in oncology. Students will attend weekly seminars, and are encouraged to interact with both invited and current faculty speakers by asking questions and contributing to group discussions. Upon completion of this course CMO 502, students will have gained a better understanding of current oncology research. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar, 3) Question new data or their interpretation

CMO 503 Special Topics in Oncology (0-1 Credit Hours)
CMO 503 will be a new journal club course-discussing and analyzing papers from presenters in CMO 502 Seminar Series one week in advance of their seminar. CMO 503 and CMO 502 will be aligned to expose students to oncology-focused scientists presenting a seminar the following week. Students will read an article by the seminar speaker, participate in discussion sessions, and ask questions during the seminars. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe cutting edge research in the particular area of investigation covered by the course; 2) Discuss limitations to experimental approaches; 3) Discuss real-world application of the research topic being studied; and 4) Critically read scientific literature on cancer biology

CMO 595 Thesis Supervision (0 Credit Hours)
Pre-requisites: Completion of required coursework
Thesis supervision course for CMO MS students who have completed the required credit hours.
Outcomes:
Allows completion of thesis research and defense, required for degree

Chemistry (CHEM)

Discover, search, courses (p. 2953)!

CHEM 101 General Chemistry A Lecture/Discussion (3 Credit Hours)
Pre-requisites: MATH 117 or equivalent
Co-requisites: CHEM 111 and MATH 118
A year of high school chemistry is recommended; This non-majors course deals with the development of basic chemical principles. Multiple perspectives of matter will be used to describe and explain characteristics, properties, and relationships across the following topics: atomic structure, nuclear chemistry, periodicity, molecular structure, chemical bonding, chemical reactions, thermochemistry, aqueous solutions, gases
Interdisciplinary Option: Bioinformatics, Forensic Science
Course equivalencies: ACCHM / CHEM 101
Outcomes:
Students will learn the foundational concepts of chemistry in these topic areas and develop skills in scientific problem solving and critical thinking

CHEM 102 General Chemistry B Lecture/Discussion (3 Credit Hours)
Pre-requisites: CHEM 101 or CHEM105; MATH 118 or equivalent
This non-majors course further develops principles from CHEM 101 & requires in-depth integration of concepts. Multiple perspectives of matter will be used to describe/explain characteristics, properties, & relationships across the following topics: liquids & solids, solutions, reaction kinetics, equilibria, acids & bases, reaction thermodynamics, electrochemical reactions.
Interdisciplinary Option: Bioinformatics, Forensic Science
Course equivalencies: ACCHM / CHEM 102
Outcomes:
Students will deepen their understanding of foundational concepts of chemistry and advance their skills in scientific problem solving, critical thinking and synthesis of concepts

CHEM 102D General Chemistry B Discussion (0 Credit Hours)
Discussion to accompany the CHEM 102 lecture section.

CHEM 105 Chemical Principles (4 Credit Hours)
Pre-requisites: Math Placement Test or Math 117
Lecture, discussion and laboratory course for majors covering stoichiometry, reactions in aqueous solution, states of matter, electronic structure, thermodynamics, chemical bonding, molecular geometry and intermolecular forces. Emphasis given to writing electron configurations and Lewis diagrams, predicting molecular geometry and properties, mass/mole conversions and solving thermodynamic and gas law problems.
Outcomes:
Students will learn basic chemical principles in these areas

CHEM 106 Basic Inorganic Chemistry (4 Credit Hours)
Pre-requisites: CHEM 105 AND MATH 118 or equivalent
Laboratory course designed to illustrate fundamental models and theories in chemistry with an emphasis on significant digits, calculations, and analysis and discussion questions.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will be able to use equipment properly and demonstrate correct laboratory technique

CHEM 111 General Chemistry Lab A (1 Credit Hour)
Pre-requisites: MATH 117 or placement test equivalent
Laboratory course designed to illustrate fundamental models and theories in chemistry with an emphasis on significant digits, calculations, and analysis and discussion questions.
Interdisciplinary Option: Bioinformatics, Forensic Science
Course equivalencies: ACCHM / CHEM 111
Outcomes:
Students will be able to use equipment properly and demonstrate correct laboratory technique

CHEM 112 General Chemistry Lab B (1 Credit Hour)
Pre-requisites: CHEM 101 and 111 (or CHEM 105) and MATH 118 (or equivalent)
The second semester of general chemistry laboratory exposes students to qualitative analysis and continues the process of experimenting and collecting data to test the validity of theories and models presented in lecture.
Interdisciplinary Option: Bioinformatics, Forensic Science
Course equivalencies: ACCHM / CHEM 112
Outcomes:
Students will demonstrate success in lab by making perceptive qualitative observations and accurate quantitative measurements

CHEM 160 Chemical Structure and Properties (3 Credit Hours)
Pre-requisites: MATH 117 or equivalent
Lecture and discussion course designed to create foundational knowledge and proficiency in essential chemistry concepts and skills. Topics include atomic structure, periodic properties, bonding and properties of molecules, solid states, interactions and connections of light and matter, quantum and molecular mechanics models of atoms and molecules.
Outcomes:
Students will use multiple perspectives of matter to describe and explain how atomic, molecular and interparticle structure determines the properties of common materials

CHEM 161 Chemical Structure and Properties Laboratory (1 Credit Hour)
Pre-requisites: MATH 117 or equivalent
Laboratory course designed to create foundational knowledge and proficiency in essential chemistry lab skills including developing the knowledge and use of PPE, MSDS, and Chemical labels, basic statistical analysis and graphing, proper usage of common laboratory equipment and instrumentation, and keeping a laboratory notebook and writing reports.
Outcomes:
Students will learn essential chemistry lab skills, including best practices for chemical safety and hygiene, laboratory equipment, instrumentation, writing techniques, and measurements

CHEM 171 General Chemistry for Engineering Science Majors (3 Credit Hours)
Pre-requisites: MATH 118 or Math Placement Test; Co-requisite CHEM 173; Restricted to Engineering Science Students; A good background in high school chemistry is recommendation
This course is designed to acquaint students in engineering science with fundamental concepts of chemistry as well as their applications in the field of engineering. Students will survey topics in atomic structure, periodicity, chemical bonding, chemical reactions and reaction stoichiometry, gases, chemical thermodynamics, chemical kinetics, chemical equilibrium, and electrochemistry. A good background in high school chemistry is recommendation.
Outcomes:
Students should demonstrate proficient understanding of fundamental concepts and skills of general chemistry as well as their applications in the field of engineering

CHEM 173 General Chemistry Lab for Engineering Science Majors (1 Credit Hour)
Pre-requisites: MATH 118 or equivalent; Co-requisite: CHEM 173; Enrollment is restricted to declared ENGR majors; A good background in high school chemistry is recommendation
This lab course is a companion course to CHEM 171 General Chemistry for Engineering Science and is designed to support the development of chemistry concepts within the following topics: atomic structure, periodicity, chemical bonding, chemical reactions and reaction stoichiometry, gases, chemical thermodynamics, chemical kinetics, chemical equilibrium, and electrochemistry.

CHEM 180 Chemical Reactivity I (3 Credit Hours)
Pre-requisites: CHEM 160 and MATH 118 or equivalent
Lecture and discussion course designed to create foundational knowledge and proficiency in essential chemistry concepts and skills. Topics include acids and bases, buffers, chemical equilibrium, molecular thermodynamics and kinetics, nucleophilic substitutions, elimination reactions, carbonyl compounds and reactions with applications to biochemical pathways.
Outcomes:
Students will use qualitative and quantitative representations of matter to describe, explain, and predict how molecular structure and stability changes over time in chemical reactions

CHEM 181 Chemical Reactivity I Lab (1 Credit Hour)
Pre-requisites: CHEM 160, CHEM 161, and MATH 118 or equivalent
Laboratory course designed to utilize experiments to illustrate the relationships between the structures of compounds and their resulting properties Topics include identification of compounds using chromatography, mass spectrometry, infrared spectroscopy, and NMR, separation methods. Additional skills in analytical reasoning and information literacy will also be developed.
Outcomes:
Students will establish best practices for working safely in lab, analyzing compounds, interpreting spectra, and purification of reaction products

CHEM 195 Foundational Concepts in Chemistry (1-3 Credit Hours)
Foundational Chemistry seminar/topics course, 1-3 credit hours. Chemical topics vary by section and are selected from the CHEM 100- and/or 200-level Departmental curriculum. Departmental consent required.
Outcomes:
Students will use multiple perspectives of matter to describe and explain characteristics, properties, and relationships of chemical systems

CHEM 212 Quantitative Analysis Lecture (3 Credit Hours)
Pre-requisites: CHEM 106 or 102 and 112
This lecture course provides an introduction to modern analytical quantitative chemistry. Topics include chemical equilibrium, statistical analysis of data as well as modern and classical methods of chemical analysis.
Interdisciplinary Option: Forensic Science

CHEM 214 Quantitative Analysis Laboratory (1 Credit Hour)
Pre-requisites: CHEM 106 or 102 and 112; Pre or co-requisite: CHEM 212
This laboratory course introduces students to classical and modern methods of chemical analysis and teaches wet chemical laboratory techniques.
Interdisciplinary Option: Forensic Science

CHEM 221 Organic Chemistry I Lec/Disc (4 Credit Hours)
Pre-requisites: CHEM 106; Chemistry and Biochemistry majors only
A lecture, discussion and laboratory course for chemistry majors covering structure and bonding in organic molecules; nomenclature, chemical and physical properties and reactions of non-aromatic hydrocarbons, alkyl halides, alcohols, ethers; stereochemistry and conformational analysis; and spectroscopy.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will understand the chemical behavior of organic molecules and the mechanisms of reactions

CHEM 222 Organic Chemistry II Lec/Disc (4 Credit Hours)
Pre-requisites: CHEM 221; Chemistry & Biochemistry majors only
A lecture, discussion and laboratory course for chemistry majors continuing from 221 covering nomenclature, properties, reactions, syntheses, and spectroscopy of further classes of aliphatic and aromatic compounds, carbohydrates and other polyfunctional compounds.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will be able to assign IUPAC names, spectroscopically identify, prepare, and propose reactions for these groups

CHEM 223 Organic Chemistry A Lec/Disc (3 Credit Hours)
Pre-requisites: (CHEM 102 or CHEM 106) and MATH 118 (or equivalent)
Lecture and discussion course for non-chemistry majors surveying nomenclature, structures, properties, stereochemistry, reactions, mechanisms, and syntheses of aliphatic hydrocarbons, alkyl halides, alcohols, and ethers.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will identify classes of organic compounds and typical reactions, discriminate amongst intermediate stabilities, postulate reaction mechanisms, plan multi-step syntheses, and analyze/interpret spectroscopic data

CHEM 224 Organic Chemistry B Lec/Disc (3 Credit Hours)
Pre-requisites: CHEM 223 or 221
The second semester lecture and discussion course of a two semester sequence, a continuation of CHEM 223 for non-chemistry majors emphasizing the organic chemistry of conjugated systems, aromatic compounds, carbonyl compounds, amines, carboxylic acids and their derivatives, carbohydrates, lipids, and proteins.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will identify classes of organic compounds and typical reactions, discriminate amongst intermediate stabilities, postulate reaction mechanisms, plan multi-step syntheses, and analyze/interpret spectroscopic data

CHEM 225 Organic Chemistry Lab A (1 Credit Hour)
Pre-requisites: CHEM 102 and 112 (or CHEM 106) and MATH 118 (or equivalent)
A laboratory course for non-chemistry majors designed to reinforce lecture topics from CHEM 223 and to expose students to the safe handling of organic chemicals.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will acquire basic laboratory techniques and practices for working with organic chemicals

CHEM 226 Organic Chemistry Lab B (1 Credit Hour)
Pre-requisites: CHEM 223 and CHEM 225 (or CHEM 221)
A laboratory course for non-chemistry majors designed to reinforce lecture topics from 224 and to expose students to organic synthesis.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will perform reactions to prepare known organic compounds and then isolate and characterize the reaction products

CHEM 240 Chemical Reactivity II (3 Credit Hours)
Pre-requisites: CHEM 180 and CHEM 181; Bioinformatics majors have Pre-requisite: CHEM 180 Outcomes: Students will increase their ability to use qualitative and quantitative representations of matter to describe, explain, and predict how molecular structure and stability changes over time in chemical reactions
Lecture and discussion course designed to create foundational knowledge and proficiency in essential chemistry concepts and skills. Topics include the reactivity of: alkenes, arenes, alkynes, and polyfunctional organic molecules. These topics will expand and enhance the ability to use chemical principles to explain natural phenomena.

CHEM 241 Chemical Reactivity II Laboratory (1 Credit Hour)
Pre-requisites: CHEM 180 and CHEM 181
Laboratory course designed to teach students how to perform chemical synthesis reactions and to evaluate and report the results.
Outcomes:
Students will utilize best practices for working safely in lab and for synthesizing, purifying, and characterizing chemical compounds

CHEM 242 Chemical Synthesis Laboratory (2 Credit Hours)
Pre-requisites: CHEM 180 and CHEM 181
Laboratory course designed to teach students how to perform chemical synthesis reactions and to evaluate and report the results. Students will also learn how to search the chemistry literature for existing synthesis laboratory procedures.
Outcomes:
Students will utilize best practices for working safely in lab and for synthesizing, purifying, and characterizing chemical compounds

CHEM 260 Quantitative Methods in Chemistry (3 Credit Hours)
Pre-requisites: CHEM 180, CHEM 181 and MATH 131 (or MATH 161); BIOI-BS majors, Pre-requisite: CHEM 180 and MATH 131 (or MATH 161)
Lecture and discussion course designed to create foundational knowledge and proficiency in essential chemistry concepts and skills. Topics include quantitative description of gases, liquids, and solutions, kinetics of chemical reactions, chemical equilibria, acids and bases, the thermodynamics of chemical reactions, electrochemistry, and spectroscopy.
Outcomes:
Students will deepen their understanding of foundational concepts of chemistry and advance their skills in scientific problem solving, critical thinking, and synthesis of concepts

CHEM 261 Quantitative Methods in Chemistry Laboratory (1 Credit Hour)
Pre-requisites: CHEM 180 and CHEM 181 and MATH 131 (or MATH 161)
Laboratory course designed for non-majors. The course provides students continued laboratory and chemical safety topics, scientific writing, peer review, and importance of articulating lab results in content. It will teach students how to perform chemical analysis using a variety of techniques including titration, kinetics, and spectrophotometry. Students also learn about the peer review process.
Outcomes:
Students will utilize best practices for working safely in lab during experiments designed to include kinetics, acids & bases, buffers, and spectrophotometry

CHEM 272 Analytical Chemistry Laboratory (2 Credit Hours)
Pre-requisites: CHEM 180, CHEM 181, and MATH 131 (or MATH 161)
This course continues exposure to laboratory and chemical safety topics, scientific writing, and articulating experiment results. The course utilizes hands-on lab experiments to teach a variety of analytical methods for quantifying a diverse set of chemical species. Data analysis, calibration methods, peer review are also of focus.
Outcomes:
Students will utilize best practices for lab safety, demonstrate application of analytical methods in chemical analysis, articulate results through scientific writing, and explain importance of accuracy & precision of data

CHEM 280 Environmental & Chemical Analysis (3 Credit Hours)
Pre-requisites: CHEM 240 and CHEM 260; Pre- or Co-requisite: CHEM 272
Lecture and discussion course designed to create foundational knowledge and proficiency in essential chemistry concepts and skills. Topics include the chemical analytical process, sample preparation, quantitative analysis, and data evaluation and validation. These topics will expand and enhance the ability to use chemical principles to analyze various types of environmental samples.
Outcomes:
Students will increase their ability to use both qualitative and quantitative reasoning to follow the chemical analytical process for various types of samples encountered in the Environment, Life Sciences, and Industry

CHEM 300 Undergraduate Research (1-6 Credit Hours)
Pre-requisites: Prior consultation with the instructor and a completed agreement form; Agreement forms for this directed study course are obtained from the department office, and the completed form (signed by the student, instructor, and chairperson) must be deposited in the chemistry office before the student can register for the course
This course gives undergraduate students an opportunity to participate in research in a selected area.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will accomplish the research task defined in the contractual arrangement between the student and the instructor

CHEM 300P Introduction to Chemistry Research (1 Credit Hour)
Pre-requisites: CHEM 101 and 111 (or CHEM 105)
This two week course will focus on issues of chemical safety, research protocols, data recording, and instrumentation use. Typical course meetings will involve in-class presentations, group discussions, and hands-on experience.
Outcomes:
Expose students to of essential and important issues of chemical safety, research protocols, data recording, and instrumentation use for students preparing for undergraduate and graduate chemistry research

CHEM 301 Physical Chemistry I (3 Credit Hours)
Pre-requisites: (CHEM 240 and CHEM 260) or CHEM 222 or CHEM 224; and MATH 162 or 263A; and PHYS 112 or 122
Lecture and discussion course covering principles and applications of thermodynamics and kinetic theory and emphasizing the laws of thermodynamics and statistical theory and their ramifications for equilibrium and non-equilibrium systems.
Outcomes:
Students will acquire fundamental knowledge of work, heat, their interconversions and the relationships between entropy, free energy and heat capacity

CHEM 302 Physical Chemistry II (3 Credit Hours)
Pre-requisites: (CHEM 240 and CHEM 260) or CHEM 222 or CHEM 224; and MATH 162 or 263A; and PHYS 112 or 122
Lecture and discussion course covering principles of quantum mechanics with the applications to chemical properties and spectroscopy of atoms and molecules.
Outcomes:
Students will acquire fundamental knowledge of the physical laws that govern chemical processes, and learn how to apply these laws to predict the structure and properties of chemical systems

CHEM 303 Physical Chemistry Lab I (2 Credit Hours)
Co-requisites: CHEM 302
Pre or This course covers principles and techniques of experimental physical chemistry including the practice of numerical data analysis, solid-state electronics, and vacuum technology along with their applications to magnetic resonance, high-resolution spectroscopy, and chemical thermodynamics. Outcome: Students will acquire broad-based knowledge of laboratory skills central to experimental physical chemistry.

CHEM 305 Physical Biochemistry for the Biological Sciences (3 Credit Hours)
Pre-requisites: (CHEM 240 and 260) or CHEM 222 or CHEM 224, and PHYS 112, and MATH 132 or equivalent; Restricted to Biochemistry and Forensic Science majors
Lecture course covering principles and biological applications of thermodynamics, kinetics, quantum mechanics and molecular spectroscopy.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will learn how fundamental concepts in physical chemistry can be used to understand biological processes

CHEM 306 Physical Biochemistry Lab (1 Credit Hour)
Pre-requisites: CHEM 305
This laboratory course will introduce apparatus, and analysis used in experimental physical chemistry for biochemistry students.
Outcomes:
Students will acquire broad-based knowledge of laboratory skills central to biophysical chemistry

CHEM 307 Inorganic Chemistry (3 Credit Hours)
Pre-requisites: (CHEM 240 and CHEM 242 and CHEM 260) or CHEM 222 or (CHEM 224 and CHEM 226); Restricted to Biochemistry majors
Lecture course covering atomic structure, chemical bonding, and transition metal, solid state, organometallic and bioinorganic chemistry.
Outcomes:
Students will learn chemical principles in important areas of inorganic chemistry

CHEM 314 Instrumental Analysis (4 Credit Hours)
Pre-requisites: (CHEM 272 and CHEM 280) or (CHEM 212, CHEM 214, and (CHEM 222 or (CHEM 224 and CHEM 226); and PHYS 112 or PHYS 122; Restricted to Chemistry majors
This course discusses and demonstrates how instrumental techniques such as atomic spectroscopy, molecular spectroscopy, mass spectrometry and chemical separations can be used to identify the chemical composition of a sample. The hands-on approach will enable students to perform instrumental analysis independently.
Outcomes:
Students will be able to select the most suitable analytical method to identify a sample

CHEM 323 Medicinal Chemistry (3 Credit Hours)
Pre-requisites: CHEM 361 or CHEM 370
This course examines how medicinal chemists design and synthesize drug candidates to meet FDA requirements of efficacy and safety, and how a testing strategy measures efficacy vs. toxicity comprising the therapeutic index. Topics include drug-receptor/enzyme binding, PK, ADME, patenting of IP, and the ethical aspects of pharmaceuticals.
Outcomes:
Students will be able explain the strategy of drug candidate analog design, synthesis, binding and inhibition constants, drug testing strategies, pharmacokinetics, structure-activity relationships (SAR), and the therapeutic index of drugs

CHEM 340 Advanced Inorganic Chemistry (3 Credit Hours)
Pre-requisites: CHEM 302
Lecture course covering modern theories of atomic and molecular structure as applied to inorganic chemistry with discussion of acid-base theories, the chemistry, spectra and reaction mechanisms of coordination and organometallic compounds. Symmetry is used to develop molecular orbital diagrams, predict geometry, hybridization schemes and interpret electronic spectra.
Outcomes:
Students will learn chemical principles in these areas

CHEM 341 Advanced Inorganic Laboratory (1 Credit Hour)
Pre- or co-requisites: CHEM 340
A laboratory course illustrating topics and techniques used in modern inorganic chemistry; coordination and organometallic compounds are prepared and characterized by IR, UV-Vis and NMR spectroscopy, and magnetic susceptibility measurements. All experimental work is recorded in a laboratory notebook and includes a formal written report.
Outcomes:
Students will demonstrate success in lab by making perceptive qualitative observations and accurate quantitative measurements

CHEM 361 Principles of Biochemistry (3 Credit Hours)
Pre-requisites: CHEM 222 or CHEM 224 or (CHEM 240 pre-req and CHEM 260 co-req)
This course examines the structural' functional relationships in proteins, nucleic acids, carbohydrates and lipids as well as their metabolic pathways. CHEM 361 is cross-listed with BIOL 366. CHEM 361 may not count towards CHEM-BS, BIOC-BS, or BIOC-BA degrees. These students must take CHEM 370.
Interdisciplinary Option: Bioinformatics
Course equivalencies: X-BIOL366/BIOI366/CHEM361
Outcomes:
Students will be able to demonstrate an understanding of biological molecules and how they are metabolized

CHEM 365 Proteomics (3 Credit Hours)
Pre-requisites: CHEM 361 or CHEM 370
Proteomics describes and deciphers the protein structures that are the result of biochemical interactions encoded in a genome. To understand these processes, proteins have to be identified, sequenced, categorized, and classified with respect to their function and interaction in a protein network. This course will teach students how to characterize functional protein networks, examine their dynamic alteration during physiological and pathological processes. The course will also cover techniques to analyze and identify proteins using protein databases and study protein to protein interactions in the discover of drugs for diseases.
Interdisciplinary Option: Bioinformatics
Course equivalencies: CHEM365/BIOI386

CHEM 370 Biochemistry I (3 Credit Hours)
Pre-requisites: CHEM 222 or (CHEM 224 and CHEM 226) or (CHEM 240 and CHEM 242 pre-req, and CHEM 260 co-req); Restricted to Chemistry and Biochemistry majors
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways. Chemistry and Biochemistry majors must take CHEM 370. CHEM 361 may not count towards CHEM-BS, BIOC-BS, or BIOC-BA degrees.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate an understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 371 Biochemistry II (3 Credit Hours)
Pre-requisites: CHEM 370
This is the second part of a two-semester Biochemistry lecture series that emphasizes important biochemical concepts on lipid, amino acid and nucleotide metabolic pathways as well as the structure and function of nucleic acids. Special topics on sensory systems, motility, immunology and drug development will also be discussed.
Outcomes:
Students will be able to demonstrate an understanding of metabolic pathways and of current research topics in biochemistry

CHEM 372 Biochemistry Laboratory I (2 Credit Hours)
Pre-requisites: CHEM 242 or CHEM 222 or CHEM 226; and (CHEM 260 and CHEM 272) or (CHEM 212 and CHEM 214); and CHEM 370; Restricted to Biochemistry majors
This laboratory is designed to simulate a research experience and to teach basic techniques utilized in a biochemistry laboratory. The course theme involves a comparative investigation of the enzyme glyceraidehyde-3-phosphate dehydrogenase (GAPDH) from various animal sources. All procedures required in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on GAPDH from either an aquatic or land animal source, e.g., trout, tuna, pork beef or chicken.
Outcomes:
Students will be able to purify and characterize an enzyme in a research context

CHEM 373 Biochemistry Laboratory II (2 Credit Hours)
This laboratory course is designed to simulate a research project in which molecular biology techniques and biochemistry are integrated. Those techniques are used as important tools to help solve questions in enzyme structure and function. he course theme involves an investigation on the relationship between protein structure and function of the ADP-glucose pyrophosphorylase (ADP-Glc PPase) from Escherichia coli. All procedure required in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on a specific ADP-Glc PPase that has been previously obtained in a recombinant form. Their genes will be provided in a plasmid form. The student will learn strategies to produce and test a hypothesis in this area. Additionally, the student will learn how to integrate molecular biology techniques and biochemistry.
Outcomes:
Students will study the basic concepts of enzyme structure relationships and how to investigate them

CHEM 380 Chemistry Seminar (1 Credit Hour)
Pre-requisites: CHEM 240 or CHEM 222 or CHEM 224
A weekly seminar course with presentations, generally given by outside speakers, covering topics in chemistry usually not encountered in the classroom.
Outcomes:
Students will demonstrate their understanding by writing a one page summary of each presentation

CHEM 385 Advanced Enzyme Kinetics and Mechanisms (3 Credit Hours)
Pre-requisites: CHEM 370
The major themes in this course will be topics that are related to modern enzymology. The structure of this course will involve lectures by Dr. Ballicora for each topic, and discussion with the students.
Outcomes:
Students will be able to understand enzyme mechanisms and be able to make oral presentations on recently published articles

CHEM 386 The Chemistry of Enzymes (3 Credit Hours)
Pre-requisites: CHEM 370, restricted to Biochemistry majors
The course describes the chemical strategies employed by enzymes to accelerate reactions combined with an examination of the specialized methods employed to study enzyme chemistry. The course is lecture based with concurrent problems sets. The course content will focus on deductive reasoning to understand what is observed how best analyze data obtained from the study of enzymes.
Outcomes:
Students will gain an understanding of transient state chemical kinetics as it pertains to the study of enzymes

CHEM 387 Plant Biochemistry (3 Credit Hours)
Pre-requisites: CHEM 370
The major themes in this course will be about topics that are related to plant biochemistry and metabolism. The structure of the course will involve lectures for each topic, with discussion with the students. Students will learn how plants and photosynthetic organisms acquire and process energy. Plant metabolism will constitute a central part of the course, focusing on the main differences from other living organisms. A solid understanding of plant metabolism will inspire the student to think about all the possibilities that plant biochemistry and biotechnology offer to solve critical problems, such as malnutrition, global climate change, drug discovery, and infectious diseases.
Outcomes:
Students will be able to understand how knowledge of plant biochemistry is important in many areas, including medicine, nutrition and climate change

CHEM 388 Biophysical Chemistry (3 Credit Hours)
Pre-requisites: CHEM 361 or 370
Survey of experimental methods for the physicochemical characterization of biomolecules. Topics include electrophoresis, mass spectrometry, calorimetry, optical spectroscopy, NMR, and X-ray crystallography.
Outcomes:
Students will have a conceptual understanding of different experimental methods for the physicochemical characterization of biomolecules and will be able to evaluate utility and limitations of the different approaches

CHEM 395 Special Topics in Chemistry (0-3 Credit Hours)
Pre-requisites: Satisfactory progress toward completion of the core chemistry courses, and junior or senior status
Course content varies from semester to semester and has included advanced topics in analytical, inorganic, organic, physical, and biochemistry.
Outcomes:
Students will acquire an advanced understanding of a selected topic in chemistry

CHEM 395B Bioethics Minor Capstone: Chemical Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This course number will only be used when CHEM 395 is tagged with the Bioethics Minor Capstone course.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and chemical issues with regard to the special topic in chemistry

CHEM 396 Special Topics in Biochemistry (1-3 Credit Hours)
1) Course content varies from semester to semester and includes advanced topics in biochemistry. 2) Satisfactory progress toward completion of the core chemistry courses, and junior or senior status. 3) Students will acquire an advanced understanding of a selected topic in biochemistry.

CHEM 399 Internship in Biochemistry or Chemistry (2-3 Credit Hours)
A supervised field placement to give students training or work experience in aspects of biochemistry or chemistry that are not commonly available on campus. Students will work outside the classroom (e.g. industrial setting or national lab) applying and extending their biochemistry or chemistry skills, typically for at least 150 hours to receive 3 credits or for more than 100 hours for 2 credits. Permission of faculty advisor Students must complete a total of 3 credits to receive engaged learning credit. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in biochemistry or chemistry related job settings

CHEM 400 Chemistry Seminar (1 Credit Hour)
This weekly seminar series on current topics in Chemistry is presented by experts from outside Loyola.

CHEM 401 Chemistry Methodology and Communication (3 Credit Hours)
Pre-requisites: Graduate Standing
This is the common preparatory course providing all chemistry graduate students with the necessary skills to navigate towards their respective degrees and success post-degree. Topics include: notebooks, design of experiment, safety, ethics, effective communication of science, conflict resolution, and professional conduct.
Outcomes:
Students are prepared with the soft skills and formal training in research methodology and compliance expectations expected of a graduate student and a professional chemist in a senior role

CHEM 415 Special Topics in Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester.

CHEM 420 Advanced Organic Chemistry I: Struct-Stereo (3 Credit Hours)
Important organic chemical concepts. Includes discussion of the stereochemistry of carbon, organic quantum mechanics, chemical kinetics and related mechanistic concepts, and an introduction to synthetic methodology.

CHEM 422 Advanced Organic Chemistry III: Mechanism (3 Credit Hours)
This is an intensive review of the more general types of organic chemical mechanisms, such as electrophilic and nucleophilic additions, substitution reactions, elimination processes, and hemolytic processes. The experimental approach to mechanisms is emphasized.

CHEM 423 Medicinal Chemistry (3 Credit Hours)
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.
Outcomes:
1) Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window; 2) Summarize interactions of drugs with receptors, enzymes, or nucleotides; 3) Analyze structure-activity relationships given potency data

CHEM 424 Molecular Characterization Part A (3 Credit Hours)
Pre-requisites: Graduate Students Only
This course will include a closer look at the theory and applications of several spectroscopic methods used for analysis of organic as well as inorganic compounds, including 1D and 2D methods employing 1H and 13C NMR, in addition to other elements; UV/Vis, combined with mass spectrometry.
Outcomes:
Students will be able to identify a compounds molecular structure based of spectroscopic means and understand the working principles behind those spectroscopies

CHEM 425 Special Topics in Organic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are: natural products, free radicals, molecular rearrangements, photochemistry, heteronuclear NMR, carbocyclic chemistry, medicinal chemistry, synthetic organic methodology, pericyclic reactions, heterocycles.

CHEM 429 Research in Organic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 430 Physical Chemical Survey (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Covers chemical thermodynamics, molecular structure and spectra, and chemical kinetics. It includes review and survey of some recent research.

CHEM 431 Chemical Thermodynamics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
An extended study of the principles of the thermodynamic laws followed by applications to real and ideal systems of gases, liquids, and solids; partial molal properties; principles and applications of quantum statistical thermodynamics to gaseous equilibria

CHEM 433 Chemical Kinetics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Description of rates of chemical reactions and interpretations thereof; principal theories of bimolecular and unimolecular processes; chain reactions; development of absolute reaction rate theory and application to a number of chemical systems; potential energy surfaces; includes heterogeneous kinetics, solution phenomena, isotopic effects, flow systems, empirical kinetic relations.

CHEM 435 Special Topics in Physical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are NMR spectroscopy, photophysical processes, molecular spectroscopy, computational chemistry, molecular modeling, and spectroscopy of surfaces.

CHEM 436 Statistical Thermo Dynamics (3 Credit Hours)
Methods of classical and quantum statistical mechanics applied to thermodynamic problems; calculation of thermodynamic quantities from spectral data; properties of real gases; selected problems in the solid sate.

CHEM 437 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: CHEM 302 or equivalent; strong courses in calculus and modern physical chemistry, and some knowledge of computer programming
A thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 438 Quantum Mechanics II (3 Credit Hours)
Pre-requisites: CHEM 437
This course is a continuation of CHEM 437, which is a thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 439 Research in Physical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 441 Advanced Inorganic Chemistry (3 Credit Hours)
The important topics in inorganic and organometallic chemistry are surveyed.

CHEM 445 Special Topics in Inorganic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are organometallic chemistry and catalysis, bioinorganic chemistry, physical methods in inorganic chemistry, inorganic reaction mechanisms, non-metal chemistry, transition metal clusters and X-ray crystallography.

CHEM 449 Research in Inorganic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 451 Chemical Methods of Analysis (3 Credit Hours)
Topics covered include the statistical evaluation of analytical results and sources of errors, sampling and significance of proper samples, optimization of experiments, review of acid-base theory, chelometry and its applications, theory of precipitation, oxidation and reduction reactions and applications.

CHEM 452 Electrochemistry (3 Credit Hours)
Fundamentals of electrochemistry, the application of electrochemical techniques and current literature.

CHEM 454 Analytical Separations (3 Credit Hours)
Topics include aspects of chromatography, partition, thin layer, gas and liquid chromatography, mass spectroscopy and other techniques.

CHEM 455 Special Topics in Analytical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. This course may involve a lab. Some courses are analytical absorption and emission spectroscopy, electroanalytical methods, environmental chemistry, lasers in analytical spectroscopy, and mass spectroscopy.

CHEM 456 Analytical Spectroscopy (3 Credit Hours)
We will discuss photometric instrumentation, absorption, emission and fluorescence spectroscopy and types of analytical laser spectroscopy.

CHEM 459 Research in Analytical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 460 Biophysical Chemistry (3 Credit Hours)
This class will cover the role of molecular interactions in determining the structure and reactivity of complex biological molecules. Modern experimental techniques are used in studying these interactions in biological systems.

CHEM 461 Biochemistry (3 Credit Hours)
The conformation, dynamics and biological activities of macromolecules, generation and storage of metabolic energy, and genetic information and biosynthesis will be discussed.

CHEM 465 Special Topics in Biochemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are protein chemistry, sequence and 3D structure, magnetic resonance spectroscopy, protein crystallography, bio-inorganic chemistry, molecular biology, molecular dynamics of proteins, and current developments in biochemistry and related areas.

CHEM 469 Research in Biochemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 470 Biochemistry I (3 Credit Hours)
Pre-requisites: Completion of undergraduate organic chemistry
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 479 Research in Chemical Education (1-9 Credit Hours)
Co-requisites: RMTD 400 and CIEP 229; This course is restricted to Chemistry Ph.D. students
Prerequisites or This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills.
Outcomes:
Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field; *describe and apply methods for preparing research data collected for publication; *describe and apply methods for analyzing chemical education research projects & manuscripts

CHEM 480 Chemistry for Teachers I (3 Credit Hours)
This course focuses on aspects specific to the teaching and learning of chemistry at post- secondary levels. Geared towards graduate students, undergraduate seniors, or current educators who plan on instructing college students, it explores principles surrounding how people learn chemistry and how to align pedagogies and environments to optimize learning opportunities for students. Course activities and assignments are designed to initiate the building of an instructional portfolio to prepare enrolled students for potential academic careers.

CHEM 491 Laboratory Investigations in Chemistry C (1 Credit Hour)
A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts.
Outcomes:
Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district

CHEM 497 Organic and Bio Chemistry for Teachers (3 Credit Hours)
Pre-requisites: Must be enrolled in M.Ed. in Chem Ed program
A course designed for urban high school teachers to enhance knowledge of chemistry and chemistry teachers.
Outcomes:
Increased chemistry content knowledge, ability to teach inquiry based chemistry

CHEM 500 Graduate Student Seminar (1 Credit Hour)
This gives students an opportunity to prepare and present a professional chemistry seminar for other professional chemists. The presenter is trained in organizing materials for the 500 Graduate Student Seminar (1)presentation and has the experience of conveying high level technical information to a friendly audience in preparation for subsequent professional presentations in the industrial, academic, and/or scientific meeting arena. The topics of the seminar should not be related to the student's research. The course should be taken at least once by all degree-seeking students.

CHEM 501 Directed Study (1-6 Credit Hours)
A special reading project is undertaken by qualified students and directed by a faculty member of the department with chairperson's approval.

CHEM 509 Doctoral Research (0-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 595 Thesis Supervision (0 Credit Hours)
The course is for master's degree candidates after completion of course requirements.

CHEM 600 Dissertation Supervision (0 Credit Hours)
The course is for Ph.D. degree candidates after completion of courses, cumulative examinations, and research tool requirements.

CHEM 605 Master's Study (0 Credit Hours)
This course is for MS students in the (up to two) intervening semesters between completing coursework/research credits and beginning their thesis supervision.

CHEM 610 Doctoral Study (0 Credit Hours)
This course is for PhD students in the intervening two semesters (pre-candidacy) between completing coursework/research credits and beginning their dissertation supervision.

Chinese (CHIN)

Discover, search, courses (p. 2953)!

CHIN 101 Chinese I (3 Credit Hours)
This is an introductory course in Modern Standard Chinese (Mandarin) for students with none or little prior experience in Chinese. This course introduces the four basic communicative skills in Chinese: listening, speaking, reading and writing, and emphasizes on conversation. They will be able to understand and respond to greetings, as well as talk about family members, time, hobbies and friends. They will learn nearly 200 characters.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN101/ASIAC01
Outcomes:
Students will achieve active control of Chinese sound system and writing system

CHIN 102 Chinese II (3 Credit Hours)
Pre-requisites: CHIN 101
CHIN 102 is a continuation of CHIN 101. Students will expand their knowledge of Chinese characters, vocabulary and grammar, improve their skills on listening, speaking, reading, and writing skills, and learn more cultural knowledge. Aside from dialogues, they will also read a short dairy and a letter. They will learn some 200 new characters.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN102/ASIAC02
Outcomes:
Students will be able to make appointments, talk about Chinese learning experience, school life, shopping, weather and transportation

CHIN 103 Chinese III (3 Credit Hours)
Pre-requisites: CHIN 102
CHIN 103 builds on the knowledge and skills gained in CHIN 101-CHIN 102. This course develops conversational skills by using fundamental grammatical patterns and vocabulary in functional contexts.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN103/ASIAC03
Outcomes:
Students will learn dialogues used in the contexts of dinning out, studying in library, asking directions, attending birthday party, seeing a doctor, and dating

CHIN 104 Chinese IV (3 Credit Hours)
Pre-requisites: CHIN 103
CHIN 104 is the continuation of CHIN 103. This course further extends students' knowledge of Chinese vocabulary and grammar, and improves their skills in listening, speaking, reading, and writing.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN104/ASIAC04
Outcomes:
Students will learn expressions in the contexts of renting an apartment, mailing a letter and traveling in both mainland China and Taiwan, talking about hometown and sports, and checking in at the airport

CHIN 190 Business Chinese I (3 Credit Hours)
Pre-requisites: CHIN 101
Business Chinese I is primarily intended for students who are interested in pursuing a career that may involve working in China or doing business with Chinese corporate partners. Examples of topics include meeting with a manager, being introduced to colleagues, and attending social events.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
1) An expanded vocabulary (500-600 characters in total); 2) deeper knowledge of Chinese grammar; and 3) a multi-faceted introduction to Chinese business culture

CHIN 191 Business Chinese II (3 Credit Hours)
As a follow-on course to Business Chinese I (CHIN 190), this course is primarily intended for students who are interested in pursuing a career that may involve working in China or doing business with Chinese corporate partners. In CHIN 191, all the topics are practical for a "real world" business environment, for instance, making an appointment, visiting a company, introducing production facilities and products, dining etiquette, and socializing with colleagues after work.
Outcomes:
Upon completion of Business Chinese II, the student should have 1) an expanded vocabulary frequently encountered in a business environment, 2) deeper knowledge of Chinese syntax (sentence patterns and habitual usages), morphology (character construction and combinations), and other aspects of grammar (eg, verb tense markers, positioning of prepositional phrases and adverbials), and 3) a multifaceted introduction to Chinese business culture

CHIN 250 Composition and Conversation (3 Credit Hours)
Pre-requisites: CHIN 104
This course focuses on different aspects of Chinese life and society, enhancing students' ability to understand Chinese culture and Chinese ways of socializing, thinking, lifestyle, etc.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will increase their vocabulary and improve their ability to compose formal speech and carry on discussions

CHIN 251 Advanced Composition & Conversation (3 Credit Hours)
Pre-requisites: CHIN 250
This course focuses contemporary aspects of Chinese life and society.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will increase their vocabulary and improve their ability to compose formal speech and carry on discussions

CHIN 252 Advanced Composition and Conversation II (3 Credit Hours)
Pre-requisites: Students must have completed CHIN 251 or equivalent
In this course students will further expand their vocabulary, acquire more-advanced grammatical structures and usage patterns, learn to communicate in Chinese both in the classroom and in social settings and deepen their understanding of Chinese culture.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will be able to further enhance their listening, reading, speaking and writing skills as well as appreciate the cultural nuances of the Chinese language

CHIN 253 Advanced Composition and Conversation III (3 Credit Hours)
Pre-requisites: Students must have completed CHIN 252 or equivalent
In this course students will further expand their vocabulary, acquire more-advanced grammatical structures and usage patterns, learn to communicate in Chinese both in the classroom and in social settings and deepen their understanding of Chinese culture.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will be able to further enhance their listening, reading, speaking and writing skills as well as appreciate the cultural nuances of the Chinese language

CHIN 260 Intensive Advanced Chinese I (3 Credit Hours)
This course is for those who have taken three year of Chinese at the college level. The student will gain advanced skills in speaking, reading, and writing Chinese and explore a broad range of topics related to Chinese culture.
Interdisciplinary Option: Chinese Language & Culture

CHIN 261 Intensive Advanced Chinese II (3 Credit Hours)
This is a follow-on course to CHIN 260. The student will continue to gain advanced skills in speaking, reading, and writing Chinese and explore a broad range of topics related to Chinese culture.
Interdisciplinary Option: Chinese Language & Culture

CHIN 314 Modern Chinese Literature in Chinese (3 Credit Hours)
This course is a survey of modern Chinese literature from 1918 to the present. It requires the close reading of famous Chinese writers and poets as well as some of the avant-garde writers. Students will have the opportunity to explore their own ideas of the aesthetic characteristics of the Chinese literature in the 20th century, as well as its historical and social background and learn about one of the important aspects of modern Chinese culture.
Outcomes:
Students will demonstrate knowledge of principal, genres, themes and forms of modern Chinese literature through analytical oral and written arguments

CHIN 340 Modern Chinese Fiction (3 Credit Hours)
This course introduces Chinese literature from historical and modern periods. Readings will be in Chinese and may include novels, short stories, poems, and folklore.

CHIN 341 Modern Chinese Literature in Chinese (3 Credit Hours)
This course is a survey of modern Chinese literature from 1918 to the present. It requires the close reading of famous Chinese writers and poets as well as some of the avant-garde writers. Students will have the opportunity to explore their own ideas of the aesthetic characteristics of the Chinese literature in the 20th century, as well as its historical and social background and learn about one of the important aspects of modern Chinese culture.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Global Studies
Course equivalencies: X-CHIN341/ASIA314/INTS341A
Outcomes:
Students will demonstrate knowledge of principal, genres, themes and forms of modern Chinese literature through analytical oral and written arguments

CHIN 360 Advanced Conversational Chinese I (3 Credit Hours)
This course focuses on advanced conversational skills for those who have taken a minimum of three years of Chinese.

CHIN 361 Advanced Conversational Chinese II (4 Credit Hours)
This is a follow-on course to CHIN 360 for those wishing to gain more advanced conversational skills in Chinese.
Interdisciplinary Option: Chinese Language & Culture

CHIN 395 Tutorial (1-6 Credit Hours)
This independent study course provides an opportunity to explore a topic of interest to the student related to Chinese language and culture under the guidance of a faculty member.

Classical Civilization (CLST)

Discover, search, courses (p. 2953)!

CLST 206 Art of Ancient Greece (3 Credit Hours)
This course is an introduction to the art of the ancient Greek world from the Bronze Age through the Hellenistic period (to c. 50 B.C.E.), focusing on major trends and developments in Classical Greek architecture, sculpture, pottery and painting through close study of individual examples.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: European Studies, Italian Studies
Course equivalencies: X-CLST206/FNAR336
Outcomes:
Students should be able to recognize and interpret selected examples of ancient Greek art, including painting, sculpture, architecture, and other types; they should be able to apply their art-critical and appreciation skills to other types of art

CLST 207 Art of the Roman World (3 Credit Hours)
This course is an introduction to the art of the Roman world from c. 3000 B.C.E. to c. the fifth century CE. It focuses on major trends and developments in Etruscan, Roman and later Greek art, including architecture, painting, mosaic, and sculpture through close study of individual examples.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: European Studies, Italian Studies
Course equivalencies: X-CLST207/FNAR337/ROST307
Outcomes:
Students should be able to recognize and be able to interpret selected examples of ancient Roman art, including painting, mosaic, sculpture, architecture, and other types; they will be able to apply their art-critical and appreciation skills to other types of art

CLST 241 Religions of Ancient Greece (3 Credit Hours)
This course examines the beliefs and practices in ancient Greek religion by studying the written, artistic, and archaeological evidence for their forms and functions and the environment in which they flourished.
Interdisciplinary Option: European Studies
Course equivalencies: CLST241/CLST371
Outcomes:
Students will be able to demonstrate understanding of ancient Greek religions

CLST 267 Medical and Scientific Terminology in Context (3 Credit Hours)
This course focuses on the ancient Greek and Latin roots of terminology relating to the sciences, specifically, medical science. The development and changes in the scientific paradigm are explored through readings in translation of a variety of ancient Greek and Roman thinkers.
Outcomes:
Students should be able to demonstrate knowledge and better understanding of the language of modern science

CLST 271 Classical Mythology (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on Greek and Roman literature involving myth and how ancient and modern peoples use traditional narratives, characters, images and conceptions to explore, explain, and experiment with ideas about themselves and their surroundings in their historical, social, cultural and intellectual contexts.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Shakespeare Studies
Course equivalencies: CLST271/CLST271G
Outcomes:
Students should be able to demonstrate knowledge of the fundamental myths of the ancient Greek and Roman world, their language and possible meanings, and how myth reflected important collective and individual concerns, values, beliefs, and practices then, even as modern myth does now

CLST 271G Classical Mythology - Women/Gender Focus (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines Greek and Roman literature involving myth and how peoples use traditional narratives and characters to explain and experiment with ideas about themselves and their surroundings in their historical, social, cultural and intellectual contexts. CLST 271G focuses, within this field, on concerns of women's studies and gender studies.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Shakespeare Studies, Women & Gender Studies
Course equivalencies: CLST271/CLST271G
Outcomes:
Students should be able to demonstrate knowledge of the fundamental myths of the ancient Greek and Roman world, their language and possible meanings, and how myth reflected important collective and individual concerns, values, beliefs, and practices then, even as modern myth does now

CLST 271R Classical Mythology - Rome Focus (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on Greek and (especially) Roman literature involving myth and how ancient and modern peoples use traditional narratives, characters, images and conceptions to explore, explain, and experiment with ideas about themselves and their surroundings in their historical, social, cultural and intellectual contexts. Students should be able to demonstrate knowledge of the fundamental myths of the ancient Greek and Roman world, their language and possible meanings, and how myth reflected important collective and individual concerns, values, beliefs, and practices then, even as modern myth does now.
Interdisciplinary Option: European Studies
Course equivalencies: CLST271/CLST271G
Outcomes:
Students will gain factual knowledge of the essential characters and basic narratives of the most important myths of ancient Greece and Rome; Students will gain a broader understanding and appreciation of intellectual and cultural activity through Classical myth as simultaneously fixed and mutable narrative, one which depends on unchanging elements as it is refracted through different genres, authors, and time periods; Students will gain basic knowledge of modern myth theory as well as awareness of both its broad categorization and the difficulty of a universal definition of myth; Students will be able to analyze and evaluate critically particular versions of myths in their cultural and historical context as well as in reference to other versions of the same stories from different contexts; Students will be able to interpret myths using modern myth theories and to recognize the use of myth as consciousness-raising in religious contexts; Students will learn to apply course material to improve thinking by contextualizing their own moral sensibilities and aesthetic preferences by comparing the archetypes of ancient myths with modern archetypes

CLST 272 Heroes & the Classical Epics (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course centers upon the epics of the ancient Mediterranean world, their nature and significance, and, especially, the concepts of heroes and heroism.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate knowledge of ancient epic as a literary genre, what heroes are and why they are featured in epics, and how epics began and evolved to reflect audiences and their social, cultural, political and other concerns, values (such as leadership) beliefs and practices

CLST 273 Classical Tragedy (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to extant Greek tragic drama, especially through the works of Aeschylus, Sophocles and Euripides.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Shakespeare Studies
Course equivalencies: CLST273/CLST273G
Outcomes:
Students should be able to demonstrate knowledge of plot, characters and themes in Greek drama; understanding of the historical, social and cultural conditions implicated with each work; comprehension of concerns and values contained in them, such as justice, and how these are mirrored in modern literature and drama

CLST 273G Classical Tragedy - Women/Gender Focus (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to extant Greek tragic drama, especially through the works of Aeschylus, Sophocles and Euripides. CLST 273G focuses, within this field, on concerns of women's studies and gender studies.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Shakespeare Studies, Women & Gender Studies
Course equivalencies: CLST273/CLST273G

CLST 274 World of Archaic Greece (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course investigates the history, literature, art, culture and society of Archaic Greece (c. 750-480 B.C.E.), the precursor of Classical Greece and western civilization.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate knowledge about the significant political, cultural and social accomplishments, events, institutions, trends, questions, and concerns, and the major figures of the age

CLST 275 World of Classical Greece (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
The course investigates the history, literature, art, culture and society of Classical Greece (c. 480 B.C.E. to c. 300 B.C.E.), the origin of so much that has impacted western civilization; its primary focus is Athens in the fifth and fourth centuries B.C.E.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students should be able to demonstrate knowledge about the significant political, cultural and social accomplishments, events, institutions, trends, questions, concerns, and the major figures of the age

CLST 276 World of Classical Rome (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course investigates the historical development of the Roman people through study of their history, politics, society and culture especially in the 1st centuries B.C.E. and C.E., the turning points of Republican and Imperial Rome.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: European Studies, Italian Studies, Shakespeare Studies
Course equivalencies: CLST276/ROST276
Outcomes:
Students should be able to demonstrate knowledge about the significant political, cultural and social accomplishments, events, institutions, trends, questions, and concerns, and the major figures of the age

CLST 277 World of Late Antiquity (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course investigates the historical development of the Roman Empire in the 3rd to 5th centuries C.E. when the Mediterranean basin and Europe re-evaluated their classical past and decisively set their course toward Medieval and later governmental, religious and cultural history.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: European Studies, Italian Studies
Outcomes:
Students should be able to demonstrate knowledge about the significant political, cultural and social accomplishments, events, institutions, trends, questions, and concerns, and the major figures of the age

CLST 278 Experiencing Mesopotamia (3 Credit Hours)
This course introduces daily life in Ancient Mesopotamia. Students will become acquainted with the ways in which individuals experienced family, government, sports, art, and societal interaction in the "cradle of civilization."
Interdisciplinary Option: Islamic World Studies
Outcomes:
Students will understand the emergence of certain aspects of daily life in the world's first civilizations and be able to contextualize these developments within the Mesopotamian political and social sphere

CLST 279 Classical Rhetoric (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores how ancient Greeks and Romans practiced and interrogated the 'craft of speech' (rhetorike techne), specifically persuasive speech, especially as it would be delivered in public settings.
Knowledge Area: Tier 2 Literary Knowledge
Outcomes:
Students will learn to assess the relationship of Classical rhetorical literature to the world that produced and used it

CLST 280 Romance Novel in Ancient World (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to the ancient masterworks of Greek and Roman fiction in the form of the novel.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to appreciate and explain the ancient romance novel, including the components of structure, characterization, theme, narrative technique, style, and meaning

CLST 281 War and War Experience, Ancient and Modern (3 Credit Hours)
This course focuses upon the institution of war and its effects upon individuals, especially in ancient Greece and modern times.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students should be able to understand better and demonstrate knowledge of the many levels of active and passive war experience, including participant/observer, combatant/non-combatant, and various groups in and out of war, ancient and modern

CLST 283 Classical Comedy & Satire (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
In this course, students engage with great literary works of the ancient world that combine social criticism with humor.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to demonstrate knowledge of such authors as Aristophanes, Menander, Terence, and Petronius, and their works, including the components of plot, characters and themes in the main works of ancient comedy and satire; as well as understanding of the historical, social and cultural conditions implicated with each work

CLST 288 Greek Literature in Translation (3 Credit Hours)
Students study a selected range of masterworks in ancient Greek literature. (This is a special topics course.)
Outcomes:
Students should be able to demonstrate deeper knowledge and understanding of selected Greek literature and its possible interpretations

CLST 289 Latin Literature in Translation (3 Credit Hours)
Students study a selected range of masterworks in Latin literature. (This is a special topics course.)
Course equivalencies: X-CLST289/ROST289
Outcomes:
Students should be able to demonstrate deeper knowledge and understanding of selected Latin literature and its possible interpretations

CLST 295 Women in the Classical World (3 Credit Hours)
This course investigates the social roles available to women in the ancient Greek and Roman worlds, together with beliefs, behaviors, and cultural expressions supporting ancient Greek and Roman constructions of womanhood.
Interdisciplinary Option: Italian Studies, Women & Gender Studies
Course equivalencies: X-CLST295/WOST295/WSGS295
Outcomes:
Students should be able to identify and discuss distinctive Classical patterns of thought and behavior regarding women and gender

CLST 304 History of Ancient Philosophy (3 Credit Hours)
See PHIL 304: The History of Ancient Philosophy
Interdisciplinary Option: European Studies
Course equivalencies: X-PHIL304/CLST304

CLST 305 Ancient Political Thought (3 Credit Hours)
See Ancient Political Thought. (PLSC 304)

CLST 306 Science in Ancient Greece and Rome (3 Credit Hours)
This course will focus on the origins of scientific thought and the scientific method in the Classical world and broader Mediterranean. We will survey the attitudes of Greeks and Romans towards physics, biology, evolution, medicine, and animal behavior, and ask why science emerged in Greece and Rome in the first place.
Outcomes:
Students will learn about the history of ideas of nature, physics, biology, medicine, and animal behavior in Ancient Greece, Rome, and the broader Mediterranean

CLST 308 History of Rome to Constantine (3 Credit Hours)
See HIST 308A: Roman History to Constantine
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: X-CLST308/HIST308/ROST308

CLST 309 Greece to Alexander the Great (3 Credit Hours)
See HIST 307: Greece to Alexander the Great
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST309/HIST307

CLST 315 Alexander & Hellenistic World (3 Credit Hours)
This course centers on the history, literature, art, culture and society of the Hellenistic world from 336 to c. 31 B.C.E. and assays the impact of Alexander the Great particularly in the eastern Mediterranean, the site of the kingdoms established by the successors of Alexander; a particular focus is Egypt and its capital, Alexandria.
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate knowledge about the significant political, cultural and social events, institutions, questions, and concerns, and the major figures of the age

CLST 316 Western Patristic Thought (3 Credit Hours)
This course centers on first-hand study of the leading voices of early Christianity in the western portion of the Roman Empire, from the first century C.E. to Augustine.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST316/THEO316
Outcomes:
Students should be able to demonstrate detailed knowledge about the western Church fathers, their works, and the impact of these upon the Church and its teachings

CLST 318 Transformations of Rome in Late Antiquity (3 Credit Hours)
This course focuses on the City of Rome itself from the third century up to the reign of Charlemagne. It demonstrates that this period was a time of gradual transformation and continuity. Both literary sources and the archaeology and epigraphy of the City shall be combined to show that barbarian invasions did not destroy the walls of Rome, and that the arrival of Christianity did not cause the fall of classical culture.
Interdisciplinary Option: European Studies, German Studies
Course equivalencies: HIST 339/CLST 318
Outcomes:
Students will be able to demonstrate an understanding of the working of historical mechanisms, evaluate and critically analyze this historical period

CLST 324 Shipwreck Archaeology (3 Credit Hours)
Students study how the technology of scuba diving combined with scientific archaeology has created a new discipline of shipwreck archaeology since the 1960s. They follow the history of the discipline and explore shipwrecks from Bronze Age Greece to nineteenth-century Chicago.
Course equivalencies: XHIST324MSTU330ANTH347CLST324
Outcomes:
Students understand the importance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant; They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum

CLST 328 Pompeii and Herculaneum (3 Credit Hours)
The two best known Roman towns - Pompeii and Herculaneum - whose remains were preserved by the eruption of Mt. Vesuvius in 79 CE - will serve as a microcosm for understanding Roman society.
Interdisciplinary Option: European Studies
Course equivalencies: HIST328/CLST328/ANTH328
Outcomes:
Students will gain an understanding of how recent archaeological discoveries have changed our view of Pompeii and Herculaneum and learn to "read" such things as dining and bathing rituals, gladiator games, and public and private architecture to gain insight into the structures of Roman social and cultural life

CLST 334 Intro to Classical Archeology (3 Credit Hours)
This course focuses on the main explorations and achievements in the recovery of monuments of the ancient Greco-Roman world and on the methodologies involved with the recoveries.
Interdisciplinary Option: European Studies
Course equivalencies: X-ANTH334/CLST334
Outcomes:
Students should be able to recognize and interpret selected sites and monuments of the Greco-Roman world; They should be able to demonstrate knowledge of methodologies and the technical vocabulary of classical archaeology

CLST 334R Introduction to Classical Archaeology - Rome/Italy Focus (3 Credit Hours)
This course focuses on the main explorations and achievements in the recovery of monuments of the ancient Greco-Roman world, particularly in Rome and Italy, and on the methodologies involved with the recoveries.
Interdisciplinary Option: Italian Studies
Course equivalencies: X-ANTH334/CLST334
Outcomes:
Students should be able to recognize and interpret selected sites and monuments of the Greco-Roman world; They should be able to demonstrate knowledge of methodologies and the technical vocabulary of classical archaeology

CLST 340 Classical Arch-Greek Temples (3 Credit Hours)
This course centers on the art and architecture of selected ancient Greek temples and upon the methodologies involved with their study and understanding.
Course equivalencies: X-ANTH340/CLST340
Outcomes:
Students should be able to recognize and interpret selected Greek temples and demonstrate knowledge of the methodologies and technical vocabulary associated with them

CLST 342 Geography of The Ancient World (3 Credit Hours)
This course focuses on the history of, ideas relating to, and expressions about the geography of the ancient Greco-Roman world as a background for the study of the ancient Mediterranean world.
Outcomes:
Students should be able to demonstrate knowledge of the significant authors, texts, and concepts relating to ancient Mediterranean geography; They should be able to demonstrate good comprehension of technical terms associated with that geography

CLST 344 Ancient Greek and Roman Coins (3 Credit Hours)
This course centers on the numismatics of the ancient Mediterranean world and upon coins as sources for the history, art, epigraphy and mythology of ancient Greece and Rome.
Outcomes:
Students should be able to recognize, assess and interpret various types of Greek and Roman coins; They should be able to demonstrate good comprehension of technical terms associated with ancient Mediterranean numismatics

CLST 348 Introduction to Museum Studies (3 Credit Hours)
In collecting, preserving, interpreting, and presenting items of material cultures, as the 20th century recognized and reconsidered, museums function as mass-media, social "tracers" as well as "objects-subjects" for economic and political elaboration. This course introduces students to relevant concerns of objects, conceptualization and communication, scholarship, cultural property, and identity.
Outcomes:
Students will gain understanding of how museums conserve cultural artefacts, serve academic research, educate specialist and non-specialist audiences, and focus social energy in local and touristic communities

CLST 361 Roman Political Theory & Practice (3 Credit Hours)
This course investigates the history, scope, principles and components of ancient Roman political institutions from earliest times to that of Justinian., as well as the legal appurtenances of those constituents.
Interdisciplinary Option: European Studies, Sociolegal Studies
Course equivalencies: X-CLST361/ROST361
Outcomes:
Students should be able to explain constituents of Roman civil and legislative procedure, including assemblies, magistracies, courts, etc

CLST 362 Roman Law (3 Credit Hours)
This course investigates the history, scope, principles, and components of Roman civil and private law from the archaic period to Justinian's codification.
Interdisciplinary Option: European Studies, Sociolegal Studies
Course equivalencies: X-CLST362/PLSC371/ROST362
Outcomes:
Students should be able to explain Roman legal and civil procedure, including the legal concepts of property, the person, family law, and legal obligations and issues, including contracts, civil wrongs, etc

CLST 363 Law & Legislature-Ancient Greece (3 Credit Hours)
This course investigates the history, scope, principles and components of ancient Greek law and legislation from Homeric times through the Classical Period., especially in Classical Athens.
Interdisciplinary Option: European Studies, Sociolegal Studies
Outcomes:
Students should be able to explain Greek legal, civil and legislative procedure, including concepts of justice and due process, as well as legal issues such as inheritance, homicide, etc

CLST 373 Daily Life in Ancient Greece (3 Credit Hours)
This course constitutes an investigation of the lives of individuals amidst the societies of ancient Greece, including, among other topics, their involvement in religion, politics, education, and their gender-relations.
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate knowledge of what it was like to be alive and active in ancient Greece, what important issues and concerns affected the ancient Greeks and how these are to be compared and contrasted with their own life issues and concerns

CLST 374 Private Life of Ancient Romans (3 Credit Hours)
This course constitutes an investigation of the lives of individuals amidst the society of ancient Rome (and the Roman Empire), including, among other things, their involvements in religion, politics, education, and their gender-relations.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST374/ROST374
Outcomes:
Students should be able to demonstrate knowledge of what it was like to be alive and active in ancient Rome, what important issues and concerns affected the ancient Romans (and subjects of Rome) individually, and how these are to be compared and contrasted with their own life issues and concerns

CLST 375 Archaeology of Early Greece (3 Credit Hours)
This course surveys archaeological research in Greece covering the Paleolithic Age through the early Iron Age (c. 700 B.C.E.).
Course equivalencies: X-CLST375/ANTH375
Outcomes:
Students should be able to demonstrate knowledge of the main archaeological sites and their contents and the importance of archaeological material for reconstructing knowledge about the period; students should also be able to demonstrate knowledge of archaeological methodology and how evidence is gathered, classified and interpreted

CLST 376 Homeric Questions (3 Credit Hours)
Pre-requisites: CLST 272 is recommended
An advanced course in the Iliad and/or Odyssey enriched by study of Homeric scholarship from the time of Wolf's Prolegomena (1795) to the present day. Concentrations can include such key issues as "the Homeric question," the Parry-Lord theory, narratology, rhetorical criticism, and the psychiatric interpretations of Dr. Jonathan.
Outcomes:
Students will be able to place the Homeric poems into their historical and literary context

CLST 378 Sport in Ancient Greece & Rome (3 Credit Hours)
This course focuses on the practices of and attitudes toward athletics of the ancient Greeks and Romans.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST378/PHED202
Outcomes:
Students should be able to demonstrate knowledge about the educational, philosophical, and political significance of athletics from Homeric times through the Roman Empire; They should be able to assess and interpret written, artistic and archaeological evidence relating to ancient athletics

CLST 380 Research in Classical Studies (3 Credit Hours)
Students complete a semester-long research project on a topic in Classical Studies.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will improve research methods and produce a research paper that engages with both primary sources and secondary scholarship

CLST 381 Directed Study (1-3 Credit Hours)
This course is centered on extensive and in-depth study of a selected author or topic involving ancient Greece or Rome. (This is a special study course, carried on by students usually under the direction of a faculty member of the department.)
Outcomes:
Students should be able to demonstrate deeper understanding of the selected author or topic

CLST 382 Internship in Classical Studies (3 Credit Hours)
Students complete a semester-long internship (100 hours minimum) that builds on their training in Classical Studies.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain practical experience while applying theories and techniques gained from coursework

CLST 383 The Humanism of Antiquity I (3 Credit Hours)
This course centers on extensive readings of pertinent classical authors from Homer to Plato, tracing the evolution of aspects of human belief. (This is a capstone course for majors in Classical Studies.)
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate deeper understanding of the nature of the human individual and the relationship of the human person both to the material and spiritual world; They should be able to assess and interpret ancient Greek texts concerned with these issues and topics

CLST 384 The Humanism of Antiquity II (3 Credit Hours)
This course centers on extensive readings of pertinent classical authors from early Rome to the High Empire, tracing the evolution of aspects of human belief. (This is a capstone course for majors in Classical Studies.)
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate deeper understanding of the nature of the human individual and the relationship of the human person both to the material and spiritual world; They should be able to assess and interpret ancient Latin texts concerned with these issues and topics

CLST 385 Historical Classic Greek Literature to 200 A.D (3 Credit Hours)
This courses surveys important authors and works of Greek literature in a chronological and topical fashion from Homer to the Hellenistic period.
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate detailed knowledge of authors and works; they should be able to assess and interpret texts covered

CLST 386 History of Classical Roman Lit (3 Credit Hours)
This courses surveys important authors and works of Roman (i.e., Latin) literature in a chronological and topical fashion from the 2nd cent. B.C.E.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST386/ROST386
Outcomes:
Students should be able to demonstrate detailed knowledge of authors and works; they should be able to assess and interpret the texts covered

CLST 388 Classical Backgrounds I (3 Credit Hours)
This course explores various environments of Greek literature, art, religion, etc., or other aspects of Greek civilization. (This is a special topics course.)
Outcomes:
Students should be able to demonstrate deeper understanding of the nature of these environments or aspects

CLST 389 Classical Backgrounds II (3 Credit Hours)
This course explores various environments of Latin literature, Roman art, religion, etc., or other aspects of Roman civilization. (This is a special topics course.)
Outcomes:
Students should be able to demonstrate deeper understanding of the nature of these environments or aspects

CLST 390 Fieldwork Greek Sites/Museums (1-4 Credit Hours)
This course comprises a study Greek or Roman art, monuments, topography or other cultural or historical artifacts or areas of interest on site. This study is accomplished through illustrated lectures or (when on-site) on-site lectures. (This is a special topics course.)
Outcomes:
Students should be able to demonstrate detailed knowledge of the material remains of ancient Mediterranean civilizations and the cultures within them

CLST 391 Topics in Comp Literature (3 Credit Hours)
This course centers on a comparison of ancient Greek or Roman literature with literatures of other times and other cultures. (This is a special topics course.)
Course equivalencies: X-LITR391/CLST391/ENGL391
Outcomes:
Students should be able to demonstrate detailed knowledge of the authors and works chosen for it

CLST 392 Theories of Myth (3 Credit Hours)
This course surveys important theoretical models used to interpret the mythology of Classical Greece and Rome and other cultures.
Course equivalencies: X-CLST392/LITR392
Outcomes:
Students should be able to demonstrate a sophisticated understanding of different interpretive theories applicable to mythology, their advantages and limitations; They should be able to apply these theories and to demonstrate what learning may be derived from them

CLST 395 Topography of Rome (3 Credit Hours)
The subject of this course is the topography and monuments of ancient Rome, from the city's beginnings through the Republican and Imperial periods to the time of Constantine. This study is accomplished through illustrated lectures or (when taught in Rome) on-site lectures.
Interdisciplinary Option: European Studies
Course equivalencies: CLST395/ROST395
Outcomes:
Students should be able to demonstrate detailed knowledge of the history of the buildings and monuments of ancient Rome

CLST 499 Directed Study (1-3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving the ancient Mediterranean world, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Clinical & Applied Mass Spectrometry (CAMS)

Discover, search, courses (p. 2953)!

CAMS 401 Theory and Physics of Mass Spectrometry (4 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the fundamental physical principles that are used in mass spectroscopy, with a primary focus on basic electricity and magnetism theory. This course will not be calculus based.
Outcomes:
At the end of this course students will be able to: 1) Describe the fundamental principles of Newton's Laws and Conservation of Energy; 2) Describe basic interactions between charged particles and electric fields; 3) Define electric potentials; 4) Describe the relationship between electric and magnetic fields; 5) Identify the direction a charged particle will move in a magnetic field; and 6) Derive the relationship between charge, mass and velocity

CAMS 402 Chemistry of Protein Separation (4 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the fundamentals of separating biological agents in solution for analysis by mass spectrometry.
Outcomes:
At the end of this course students will be able to: 1) Describe the composition of typical biological collections including blood and waste; 2) Describe best-practices for preparing collections for mass spectrometry; 3) Describe fundamentals of separating biomolecules according to size, charge and other physiochemical factors; and 4) Describe mechanisms and tradeoffs behind common approaches for separating biological samples via chromatography (liquid and gas)

CAMS 403 Introduction to Mass Spectrometry Instrumentation (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will introduce the mass spectrometry instrumentation that is utilized in clinical, pharma, and academia, including HPLC and other sample preparation instrumentation.
Outcomes:
At the end of this course students will be able to: 1) Describe the basic technologies and instrumentation currently used for mass spectrometry; 2) Understand the basics in how to operate this instrumentation (theory, no hands on); 3) Appreciate the similarities and differences in the different technologies, and in what situation each instrument would be most appropriate; and 4) Describe the instrumentation used in sample preparation

CAMS 411 Computation and Bioinformatics for Proteomics (3 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover the governing principles of analyzing proteomics data, with a special emphasis on data derived from mass spectrometry (MS). Computational methods and tutorials will complement the theoretical material.
Outcomes:
At the end of this course students will be able to: 1) Describe key approaches for matching MS spectra to known proteins, as well as identifying and quantifying protein content in analyzes samples; 2) Describe methodologies and limitations thereof for labeling and quantifying proteins of interest; 3) Perform routine computational analyses of MS data using python; and 4) Describe best-practices for objective data analysis and reproducibility

CAMS 412 Clinical Considerations and Biomarker Development (3 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover fundamental concepts about the criteria for something to qualify as a biomarker and how they are analyzed by mass spectrometry from a variety of biological fluids and/or tissues. We will also discuss the broader uses of mass spectrometry in a clinical or hospital setting.
Outcomes:
At the end of this course students will be able to: 1) Compare and contrast aspects of good vs bad biomarkers and the utility of mass spectrometry for their detection in biological samples; 2) Describe best practices for sample collection and the limitations of using biological samples; 3) Describe current regulations and standards for biomarker use in the clinic; 4) Identify and describe biohazard safety issues when working with biological samples; 5) Describe analytical approaches for quantification of biomarkers; and 6) Describe the type of mass spectrometry assays typically used in a clinical or hospital setting

CAMS 413 Advanced Mass Spectrometry Approaches (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will cover advanced MS approaches to address specialized needs. These approaches will frequently require specific instrumentation, and bioinformatics approaches, but sometimes only involve changes to sample preparation and interpretation.
Outcomes:
At the end of this course students will be able to: 1) Understand the need for specialized mass spec approaches; 2) Appreciate the theory behind specialized mass spec approaches; 3) Describe the technical and practical considerations when utilizing specialized MS approaches; and 4) Be able to choose the correct advanced MS approach for a particular situation

CAMS 491 Mass Spectrometry Lab Rotation A (5 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will be a hands-on intensive laboratory rotation. Students will learn how to prepare samples that are "mass spec ready" from a variety of liquid and solid tissue biological samples. Students will learn quality control parameters and will produce high quality samples for use in the HPLC and mass spectrometer.
Outcomes:
At the end of this course students will be able to: 1) Process liquid and tissue biological samples for analysis by mass spectrometry; 2) Perform gel electrophoresis on prepared samples and excise selected gel bands; 3) Perform in in-gel digestions using standard enzymatic approaches; 4) Perform in-solution digestions using standard enzymatic approaches; 5) Quantify protein samples before and after digestion; and 6) Use column chromatography to generate high purity samples

CAMS 492 Mass Spectrometry Lab Rotation B (5 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
This course will be a hands-on intensive laboratory rotation. Students will learn how to perform normal LC-mass spectrometer general upkeep including HPLC setup, mass spectrometer calibration, quality control, etc. Students will then learn the process of running mass spectrometers for two types of approaches: discovery and targeted mode.
Outcomes:
At the end of this course students will be able to: 1) Setup HPLC, mass spectrometer and software; 2) Perform normal instrument upkeep including calibration, quality control, solution changes; 3) Be able to troubleshoot common instrument issues; 4) Analyze sample on mass spectrometer for discovery (two group comparison); 5) Analyze sample on mass spectrometer for targeted quantification (in simple solution); 6) Use bioinformatics software packages to analyze data from mass spectrometers; and 7) Understand how to present mass spectrometry data

CAMS 493 Capstone Design - Applications in Mass Spectrometry A (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
During the course students will develop a written research proposal using mass spectrometry as the primary experimental approach to test their hypotheses. Students can choose from any relevant topic of interest such as the analysis of clinical biomarkers in disease, environmental endocrine disruptors, industrial pollutants, waste water contamination, etc. The topic must be approved by the student's advisor in advance.
Outcomes:
At the end of this course students will be able to: 1) Design quantitative experiments using mass spectrometry; 2) Describe and identify appropriate experimental positive and negative controls; 3) Describe statistical analyses relevant for their experimental design; 4) Discuss limitations and pitfalls of their research approach and describe alternatives; and 5) Critically evaluate the current literature and describe the rationale for their research study

CAMS 494 Capstone Design - Applications in Mass Spectrometry B (2 Credit Hours)
Pre-requisites: Enrollment in CAMS-MS program
During the course students will develop a written research proposal using mass spectrometry as the primary experimental approach to test their hypotheses. Students can choose from any relevant topic of interest such as the analysis of clinical biomarkers in disease, environmental endocrine disruptors, industrial pollutants, waste water contamination, etc. The topic must be approved by the student's advisor in advance.
Outcomes:
At the end of this course students will be able to: 1) Design quantitative experiments using mass spectrometry; 2) Describe and identify appropriate experimental positive and negative controls; 3) Describe statistical analyses relevant for their experimental design; 4) Discuss limitations and pitfalls of their research approach and describe alternatives; and 5) Critically evaluate the current literature and describe the rationale for their research study

CM/MH/AD Nursing (CMAN)

Discover, search, courses (p. 2953)!

CMAN 272 Mental Health Patterns (3 Credit Hours)
Co-requisites: CMAN 272L
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 272L Mental Health Patterns: Lab (3 Credit Hours)
Co-requisites: Must also enroll in CMAN 272
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 375 Community Health Nursing (3 Credit Hours)
Pre-requisites: NURS-BSN R & GNRS students
This course integrates nursing and public health concepts to provide a theoretical base for the care of families, aggregates, communities, and populations.
Course equivalencies: CMAN380/CMAN380A/CMAN375

CMAN 375L Community Health Nursing (3 Credit Hours)
This clinical course provides the student with an opportunity to apply nursing and public health concepts to families, aggregates, communities, and populations. Opportunities to apply epidemiology and risk assessment strategies in a community assessment are provided. The role of the community health nurse as educator is addressed.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN375L/CMAN380C/CMAN380L
Outcomes:
Upon completion of this course the student will be able to: 1) Apply nursing and public health concepts to community assessment utilizing databases and community engagement; 2) Evaluate the provision of health education and/or health information in the community

CMAN 380 Community Health (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 294, and GNUR 290 with a C- or better; Must also enroll in CMAN 380L
Nursing and public health concepts provide theoretical basis for care of families, aggregates, and communities outside institutional settings. Role of community health nurses in caring for specific aggregates is described. Clinical experiences are provided for application of concepts and implementation of nursing interventions in a variety of community settings.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN380/CMAN380A/CMAN375

CMAN 380L Community Health: Lab (3 Credit Hours)
Must also enroll in CMAN 380.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN375L/CMAN380C/CMAN380L

CMAN 403 Health Care Delivery and Organization (3 Credit Hours)
This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the healthcare system is structured, how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on quality, patient safety and information technology as center pieces of the modern health care environment.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Distinguish the roles, functions and responsibilities of healthcare system components (ie, delivery, financing and regulation); 2) Analyze the interaction of social; political and economic forces shaping healthcare delivery and their impact on cost, quality and access; 3) Compare the organization of multiple healthcare delivery structures to the effectiveness of meeting population health needs; 4) Analyze factors influencing trends in healthcare quality and patient safety

CMAN 407 Population Health Informatics (3 Credit Hours)
This course focuses on informatics in health care, with an emphasis on information systems and the use of information technology (IT) applications to support population health. Basic epidemiologic concepts of health are addressed. The key concepts of feasibility, usability and adaptability are addressed. This course includes evaluation of IT applications for healthcare administration, clinical practice, research, and education.
Outcomes:
1) Apply principles of health care informatics for population health; 2) Apply basic concepts of epidemiology for population health; 3) Analyze the role of population health informatics in understanding data, information, & knowledge; 4) Apply population health informatics in surveillance, interoperability and big data contexts; 5) Evaluate quality in electronic health records, mobile applications, and personal health records; 6) Identify the economic value and potential for sustainability in population health technologies

CMAN 410 Epidemiology (1 Credit Hour)
The course covers the basic principles of epidemiology including descriptive epidemiology, causation, basic epidemiologic designs and interpretation.

CMAN 417 Nursing and Health Care Administration Practicum (1-6 Credit Hours)
The practicum course guides the student in a synthesis of content from nursing and related sciences and the application of this knowledge to the role of the nurse in leadership and management experiences. Emphasis will be placed on the student's clinical engagement in management initiatives requiring critical assessment, planning, intervention, and evaluation activities using theoretical models and management tools. Students in the practicum experience are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent.
Outcomes:
1) Apply knowledge of selected concepts, models, and theories from nursing and management sciences to achieve high quality nursing care and effective healthcare team coordination in a variety of settings; 2) Apply knowledge of healthcare policy, finance and regulatory environments to identify clinical questions, implement safety initiatives, and monitor patient outcomes; 3) Incorporate effective communication techniques to deliver evidence-based, patient-centered care; 4) Analyze and evaluate healthcare organization structure, mission, and philosophy as they relate to the standards of care, staffing and performance, development and marketing of programs and projects; 5) Evaluate the use of information technology to improve patient care outcomes and create a safe care environment; 6) Apply legal, ethical principles to the nursing role of leadership and management

CMAN 425 Advanced Quality and Safety in Health Care (3 Credit Hours)
This course focuses on managing the continuum between safety and quality and the strategic importance of these concepts to healthcare organizations and clients. Trends in patient safety and healthcare quality, practices in different healthcare environments, and practices related to improving safety and quality will be examined. The course is designed to provide students with knowledge and skills in systems thinking and in preventing, learning from and resolving error and addressing adverse events. Interprofessional teamwork, the use of information technology and data are emphasized in promoting safer healthcare and improved outcomes.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain the forces driving the focus on safety and quality in health care; 2) Evaluate strategies for improving safety and quality in health care; 3) Explain the influence of systems (environmental, organizational, provider, technological and task) on healthcare outcomes; 4) Analyze the role of various systems and factors in creating safe environments of care; 5) Explain the impact of just culture thinking on safety and quality improvement in health care; 6) Develop a plan for improvement of a safety and/or quality issue

CMAN 430 Leadership and Administration in Health Care (3 Credit Hours)
This course focuses on the integration of core knowledge in leadership, administration, human resources and communication in health care organizations. Special emphasis is placed on leadership styles, the roles of the leader, human resources management and communication. The course is designed to provide the student with knowledge to practice the leadership skills necessary to positively impact healthcare systems. Selected Topics May Include: Leadership theory and style and professional practice a) leader competencies b) Influencing behaviors c) Relationship management d) Culture e) Nimble flexibility f) Professional accountability g) Motivation for high performance h) Strategic leadership and tactical leadership (Administration vs management) Human resource management a) Communication b) Difficult conversations c) Conflict resolution d) Coaching e) Performance evaluation f) Onboarding Power politics a) Development and management of partnerships/relationships/networks b) Strategic negotiation c) Power.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Relate essential nurse leadership competencies for effective management in healthcare organizations; 2) Evaluate the impact of leadership styles on organizational culture and effectiveness; 3) Generate strategies to optimize human resource performance in healthcare settings; 4) Identify strategies to address interpersonal and intraorganizational conflict

CMAN 436 Advanced Practice Concepts in Community Health (2 Credit Hours)
This course provides a framework for advanced practice in a variety of specialty areas through analysis of essential concepts and methodologies.

CMAN 445 Health Care Outcomes (3 Credit Hours)
This course focuses on the theory and methods to measure and evaluate healthcare outcomes. Concepts of population health will guide the comparison and analysis of health outcomes and measures. Current political, legal, regulatory, and ethical issues will be explored as these relate to health outcomes. Interprofessional teamwork, the use of information technology and data are emphasized in promoting safer healthcare and improved outcomes.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Analyze the political, legal, regulatory, and ethical influences in the development and current status of outcomes management; 2) Apply methods and processes for improving outcomes; 3) Utilize data-driven decision making for health outcomes; 4) Develop leadership and interprofessional competence in analyzing healthcare outcomes; 5) Generate data-driven change strategies to improve health outcomes

CMAN 448 Program Planning and Marketing in Health Care (3 Credit Hours)
This course presents an integrated approach to strategic planning, program planning, and marketing in nursing and health care organizations. Key models, elements and processes associated with strategic planning are presented with an emphasis on the leadership role in leveraging information, environmental scanning, and competitive analysis. Theories, models, tools, and processes for program planning, implementation, and evaluation and the marketing of nursing and healthcare services are addressed. The integration of strategic planning, program planning, and marketing with the mission, goals, and objectives of organizations and services is emphasized. 6. Relate the strategic planning, program planning, and marketing processes to nursing leadership competencies.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Analyze models and theories of strategic planning, program planning, and marketing; 2) Explain the relation between organization mission, goals, and objectives and the strategic planning, program planning, and marketing processes; 3) Apply tools of strategic planning to an organization; 4) Create a comprehensive plan focused on the needs, design, implementation and evaluation of a program that derives from an organizational strategic plan; 5) Evaluate marketing strategies

CMAN 460 Health Care Policy (3 Credit Hours)
This course is designed to introduce key policy issues and processes in public policy development. The impact of health care policy on management and health system improvement is discussed. The student is provided with advanced policy knowledge, frameworks, and skills required to assume a leadership role in health care. Emphasis is placed on using evidence to develop an understanding of the effect of health care policy on practice.
Outcomes:
1) Identify key policy issues in contemporary health systems; 2) Analyze the effect of health policy on practice; 3) Analyze strategies for health system improvement through public policy; 4) Advocate for policy adoption to a health care decision maker; 5) Identify the effects of government regulation on education and practice

CMAN 533 Fiscal Management in Health Care Organizations (3 Credit Hours)
This course prepares the graduate student to develop a framework for understanding key issues in financial management in health care from two perspectives. First, the course explores the relationship between the national economic environment and the financial context for current models of health care delivery. Second the course introduces a variety of fiscal concepts and techniques as applied to nursing and healthcare administration. Emphasis is placed on the way cost data influences operational decision making in healthcare administrative practice.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Upon successful completion of the course, the student will: 1) Analyze the impact of political, social and economic factors on the cost of patient care delivery; 2) Examine cost behavior concepts as they relate to nursing and other health care models in healthcare organizations; 3) Apply cost accounting techniques in health care; 4) Analyze ethical and legal issues surrounding fiscal management

CMAN 569 Comparative Effective Research in Healthcare (3 Credit Hours)
Pre-requisites: GNUR 450 or equivalent required; CMAN 439 and 440 recommended
Comparative effective research (CER) is a central tenet of health care reform. This course offers an overview of policy implications and rationale for CER and explores different approaches of developing, analyzing and communicating CER. Research comparing the clinical and economic merits of different treatments, devices and procedures will be explored.
Outcomes:
Apply political, social and ethical perspectives to uses of CER, Demonstrate effective retrieval of CER reviews from public sources, Demonstrate knowledge of major CER methods and tools, Evaluate quality of evidence from CER reports, Assess treatment options in defined patient population

College Writing Seminar (UCWR)

Discover, search, courses (p. 2953)!

UCWR 109 University Core Writing Seminar: Writing Responsibly Writing Lab (3 Credit Hours)
Writing Lab for UCWR 110 Writing Responsibly. This workshop-based course supports the academic writing students are working on in UCWR 110. Will cover steps of brainstorming, peer review, revision and final editing in order to articulate, organize, and support positions. The course will promote grammatical, compositional, methodological and rhetorical skills in service of effective communication. Enrollment Conditions: Students placed in this course by WPA score of 109/110.
Outcomes:
Students will develop writing strategies including generating ideas, peer review, and revision; They will gain a fuller understanding of grammar, compositional and rhetorical skills, and how these benefit their success in the core UCWR 110 Writing Responsibly course

UCWR 110 Writing Responsibly (3 Credit Hours)
Writing Responsibly instructs students in the conventions of academic writing. Students will develop flexible strategies for generating, revising, editing their writing and will receive instruction in how to write clear, error free prose. Students will learn responsibility to their readers, responsibility to their sources, and responsibility to themselves as writers.
Knowledge Area: Writing Seminar
Course equivalencies: SCPS200/ENGL106/UCWR/ACWR110

Communication (COMM)

Discover, search, courses (p. 2953)!

COMM 100 SOC Career Prep Seminar (1 Credit Hour)
This is a professional development course to help students expand their knowledge of communication fields and to begin career preparation for those fields.
Outcomes:
Develop and polish professional communication tools (resume, cover letters, LinkedIn, etc); prepare for professional interactions (interviews, etc); and make connections within the SOC and beyond

COMM 101 Public Speaking & Critical Thinking (3 Credit Hours)
This introductory course is designed to supply students with the skills of public address, a fundamental understanding of critical thinking practices, foundational tenets of communication theory, a grasp of the relationship between context and communication, and a sense of the social responsibility that comes with the capacity for communication. Students can take one course from COMM 101 and 103, but not both.
Interdisciplinary Option: Forensic Science
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students gain skills in public speaking and an understanding of critical thinking

COMM 103 Business & Professional Speaking (3 Credit Hours)
This class examines the theory and practice of audience analysis, message design, and oral presentation for professional speakers, with an emphasis on communication in organizational settings.
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students will demonstrate presentation skills in simulated organizational settings

COMM 130 Intro to Audio Production (3 Credit Hours)
This class offers a study of basic audio production methods across new media platforms. Topics include acoustics, recording methods, digital editing, and sound as an industry and art form.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM130/ICVM238/IFMS238
Outcomes:
Students will produce creative projects using the skills they have learned

COMM 135 Intro to Video Production (3 Credit Hours)
This course is a hands-on introduction to video field production. By designing and executing a series of short, creative production projects of varied forms, students explore how video techniques are used to structure meaning in media messages.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM135/ICVM235IFMS235
Outcomes:
Student will be able to demonstrate an understanding of basic video production skills, such as preproduction planning, lighting, filming and editing, by producing several video texts

COMM 140 Intercollegiate Debate (1 Credit Hour)
This course offers students active participation in Loyola Debating Society. A maximum of six hours in intercollegiate debate credit allowed.
Outcomes:
Students will gain experience in debate

COMM 145 Video for Journalists (3 Credit Hours)
Pre-requisites: MJRN majors and minors may enroll, as well as EVCM minors
Entry-level course that will serve as an introduction to basic video/audio journalism. The goal of the course is for the student to develop the ability to capture great video images and audio, and to be able to edit those two elements together to tell a non-fiction video story. For MJRN majors and minors only An understanding of how to operate a video camera; how to capture/edit video; how to tell a journalistic story with video, and the differences between journalistic videos and fictional videos.
Course equivalencies: X-COMM135/ICVM235IFMS235
Outcomes:
An understanding of how to operate a video camera; how to capture/edit video; how to tell a journalistic story with video, and the differences between journalistic videos and fictional videos

COMM 175 Introduction to Communication (3 Credit Hours)
This course gives a general historical and theoretical overview of communication. By looking at communication through a critical, historical and theoretical lens, students will acquire an intellectual framework for further study and practice in communication.
Course equivalencies: COMM 175 /COMM 160 /ACCOM 201
Outcomes:
Students will increase communication literacy

COMM 200 Digital Communication and Society (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course explores the ways technology affects personal, cultural and mass communication through examining the historical, societal and ethical implications of newer and interactive forms of media.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: COMM200 / IFMS200 / ACCOM 205
Outcomes:
Students use audio, video and digital tools to research and produce essays, projects and presentations that analyze the impact of technology on communication

COMM 201 Media Theory and Criticism (3 Credit Hours)
This course is an introduction to the study of traditional mass media and new media from a critical and interpretive perspective. Students taking the course should be able to understand and apply textual analysis methods to specific media texts, such as films, TV shows or videogames.
Course equivalencies: X-IFMS201/COMM201
Outcomes:
This course reviews semiotics and other methods of textual analysis of media

COMM 202 Story for Film and Television (3 Credit Hours)
Pre-requisites: COMM 274
An introduction to visual writing, story structure and character development for film and TV. Through in-class exercises, analysis of scripts, and assignments focused on storytelling fundamentals, students will learn what makes a compelling concept, where great ideas come from, and effective ways to build a narrative for the screen.
Outcomes:
Story will: write pitches, synopses, loglines and titles for the screen; create original characters; learn 3-act storytelling structure; develop original story treatments, outlines and pitches for film, TV or webseries

COMM 203 Topics in Cinema History (3 Credit Hours)
The course examines the aesthetic, social, technical, and theoretical evolution of cinema offered as specific topics that include, but are not limited to: war and revolution, social history and cinema, the role of women, Indian cinema, musicals, technology and style, and the realistic impulse.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM203/ICVM260IFMS260
Outcomes:
Students are offered a variety of topics, broadening their view of the film industry

COMM 204 Community as Story (3 Credit Hours)
This course uses children's literature as a means of understanding urban community and individual identities within that community. Students will though, community service, interaction with local experts and ethnographic research, explore communities surrounding Loyola's lake shore campus and create their own children's picture books in collaboration with experienced student artists.
This course satisfies the Engaged Learning requirement.

COMM 205 Reporting Basics I: Writing and Interviewing (3 Credit Hours)
Pre-requisites: UCWR 110
This course examines current issues in U.S. journalism with strong emphasis on developing skills in news reporting, interviewing, and writing.
Outcomes:
News Judgment; Writing Concisely and Clearly; Writing on Deadline; AP Style; Interviewing Techniques; Grammar, Spelling & Punctuation; Ethics & Legal Issues; Basic Research Methods

COMM 206 Hip Hop Culture and Social Change (3 Credit Hours)
Pre-requisites: COMM 175 or 201
Grounded in Black studies, communication studies, critical cultural studies, political advocacy, popular culture, and the growing field of hip hop studies, we will investigate hip hop's evolving relationship with social change in the U.S. and beyond. Particular attention will be paid to Chicago's hip hop scene and its community building.
Outcomes:
1) Gaining a basic understanding of the subject; 2) Developing knowledge and understanding of diverse perspectives, global awareness, or other cultures; 3) Gaining a broader understanding and appreciation of intellectual/cultural activity (music, etc)

COMM 207 Photojournalism (3 Credit Hours)
Photojournalism introduces students to the art of photographic storytelling.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM207/IFMS207
Outcomes:
Students learn to distinguish journalistic photography from self-expressive photography through editing, critique and digital manipulation, and also understand the ethics of photojournalism through graphic concepts and page design

COMM 208 Reporting Basics II: Technology for Journalists (3 Credit Hours)
This course teaches 21st century journalism skills and how to use the equipment and software to report and edit across platforms, including radio, television and the Internet. Instruction will include how to use audio and video recording equipment, basic Web design, use of audio and video editing software, blogging and social media programs.
Outcomes:
News Judgment; Writing Concisely and Clearly; Writing on Deadline: AP Style; Interviewing Techniques; Grammar, Spelling & Punctuation; Ethics & Legal Issues; Basic Research Methods

COMM 210 Principles of Public Relations (3 Credit Hours)
Pre-requisites: COMM 175; PCOM and EVCM minors may enroll without pre-requisite
This course introduces the theory and practice of public relations in communicating and establishing relationships with diverse publics. Topics include professional roles and ethical responsibilities, strategies and tools, media resources, and public relations writing.
Outcomes:
Students will be able to demonstrate an understanding of the roles and practices of the public relations professional, develop PR plans, and create a portfolio or writing samples

COMM 211 Principles of Advertising (3 Credit Hours)
Pre-requisites: COMM 175; PCOM and EVCM minors may enroll without prerequisite
This course provides an overview of the theory and hands-on practice of advertising including planning, strategy, creative development, and media planning. Elements of direct response, promotion, internet, and public relations are also presented.
Outcomes:
Students will be able to demonstrate an understanding of the principles of advertising and practice creative and decision-making skills in developing an advertising campaign

COMM 212 International Advertising (3 Credit Hours)
This course will build an understanding of the cultural, language, social, national and business factors that drive international markets. A key outcome is to broaden student perspectives on how organizations communicate with Italian and other European audiences.
Interdisciplinary Option: Global Studies

COMM 213 Digital Foundations (3 Credit Hours)
Pre-requisites: COMM 175 or 201; EVCM minors are waived from pre-requisite
Students will be introduced to digital media tools, including online content creation, SEO, website management, email marketing, social media engagement, digital advertising, analytics and emerging technologies that are used to create and build integrated digital campaigns for advertising and public relations.
Outcomes:
Ability to demonstrate elementary knowledge of digital communication tools; Practical understanding and capabilities for creating content across a wide range of media platforms; Knowledge of digital media platform technical requirements

COMM 214 Introduction to Creative Concepts (3 Credit Hours)
Pre-requisites: COMM 211
This course introduces students to the creative process and idea generating techniques. Students explore what constitutes strong advertising concepts through exposure to award-winning ads and work in teams to create ads for assigned products.
Outcomes:
The emphasis is on conceptual development with students expected to express their ideas in rough rather than tightly finished layouts; The course focuses on print advertising but also provides opportunities to work across various other media

COMM 215 Ethics & Communication (3 Credit Hours)
Pre-requisites: COMM 175
COMM 215 does not meet Core Ethics. This course explores various approaches to ethical decision-making and applies that process to diverse aspects of every day, contemporary life.
Outcomes:
Students learn to discern a wide variety of ethical issues concerning communication behavior, apply systematic ethical analysis to various communication situations, and clearly explain their analyses

COMM 220 Introduction to Rhetoric (3 Credit Hours)
This course introduces theories of rhetoric, emphasizing the relevance of classical disputes for understanding current controversies over the nature and function of discourse. A central theme is the tension between rhetoric's promise for constructing a rich and meaningful civic life and the dangers of its descent into demagoguery and irrationality.
Course equivalencies: ACENG 220 / COMM 220
Outcomes:
Students will work through theoretical issues, by examining speeches, films, and other rhetorical artifacts

COMM 227 Social Justice & Communication (3 Credit Hours)
Pre-requisites: COMM 175; EVCM minors are waived from the pre-requisite
This course examines the implications of communication processes and practices for democracy and social justice.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Course equivalencies: X-COMM227/PAX 227
Outcomes:
Students will be able to articulate and defend their conception of the role of communication in achieving a just society and demonstrate an understanding of how existing communication institutions, laws, and norms impede or assist movement towards that goal

COMM 230 Argumentation & Advocacy (3 Credit Hours)
Pre-requisites: COMM 175; PCOM minors may enroll without pre-requisite
This course is an introduction to analyzing and critiquing arguments, and inventing extended arguments to advocate positions.
Outcomes:
Students will be able to analyze and critique both individual arguments and extended cases; demonstrate understanding of the relationship of argumentation to audience and context; and invent arguments and develop cases for advocacy

COMM 231 Conflict Management and Communication (3 Credit Hours)
Pre-requisites: COMM 175; PCOM minors may enroll without pre-requisite
This course explores the role of communication in conflict resolution. Special attention is paid to mediation and other forms of alternative dispute resolution.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Course equivalencies: X-COMM231/PAX 231
Outcomes:
Students will acquire methods of analyzing the nature of conflict and applying appropriate communicative strategies for managing conflict

COMM 232 Cinematography I (3 Credit Hours)
In this course, students will demonstrate their ability to apply aesthetic and theoretical principles and cinema production skills. Topics include pre-visualizations, preproduction planning, digital cameras system, cinematography and lighting. Students work on individual and group projects involving project development, filming and editing.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM232/ICVM232/IFMS232

COMM 234 Interviewing for Communication (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201; PCOM minors may enroll without pre-requisite
This course explores the crucial skill of interviewing necessary for many aspects of professional and daily life. Students will learn different ways of interviewing depending on communication context.
Outcomes:
These approaches will enhance students' interviewing ethics as they gain practical experience

COMM 236 Persuasive Presentations (3 Credit Hours)
Pre-requisites: COMM 220 or COMM 230 or COMM 268; EVCM minors are waived from pre-req
This class focuses on the creation and delivery of persuasive messages to develop a variety of persuasive strategies and implement them in both individual and group presentations.
Outcomes:
Students engage in situation analysis and message critique

COMM 237 Small Group Communication (3 Credit Hours)
Pre-requisites: COMM 175; PCOM minors may enroll without pre-requisite
This class is an introduction to theory, research, and practice of communication that contribute to effective task-group discussion and decision making.
Outcomes:
The development of personal leadership skills and observational/analytic skills through guided, structured group activities

COMM 239 Moving China (3 Credit Hours)
This course offers a unique opportunity to film and document China as it changes virtually before our eyes.
Interdisciplinary Option: Asian Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Outcomes:
Students will have an intimate knowledge of China and Chinese culture and the talent and skill to produce a 15-minute documentary video in digital format

COMM 256 Broadcast Newswriting (3 Credit Hours)
This course introduces basics of broadcast news and broadcast writing style. Students learn script writing and formatting, an introduction to radio and TV reporting, standard terms and basic newscast production, and an introduction to the studio. This course also provides a foundation for more advanced courses in the broadcast curriculum.
Outcomes:
Students gain experience writing for radio and TV news, as well as basic knowledge of the broadcast news industry and contemporary issues pertinent to the field

COMM 258 Game Studies (3 Credit Hours)
This course examines games and their complex role within contemporary culture. Games are approached as "texts" that can be "read" using a variety of theoretical lenses. Students will explore what games say about the nature of identity, community presence, learning, and communication and reflect on their own experience in a blog.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM258/IFMS258

COMM 259 News Editing (3 Credit Hours)
This course examines the skills needed to act as a newsroom leader and manager, including copy editing, researching, photo and visual editing, working as an assignment, project and online editor. This course will benefit those who want to be an editor, manage people, shape newsroom culture and build community trust.
Outcomes:
Students will gain experience with production skills in the print medium

COMM 260 Environmental Journalism (3 Credit Hours)
The mission of environmental journalism is to raise public awareness about environmental news and issues. It is about being ethical, accurate, fair, and clear, whether reporting, investigating, or advocating for change.
Course equivalencies: X-ENVS 260/ COMM 260
Outcomes:
Students will be able to find, report, and present challenging stories around this topic, in print and in broadcast writing

COMM 261 Social Media (3 Credit Hours)
Pre-requisites: COMM 200
Starting from the foundation of traditional offline business and social communities and communication, this course will show how the real relationships of online business and social communities use content to build personal and business success at the speed and reach of the Internet.
Outcomes:
Articulate how the Internet and social media has changed the way we produce and consume content and how social media has affected the way we work, shop, and interact online and off

COMM 262 Feature & Opinion Writing (3 Credit Hours)
This course examines methods of researching and writing editorials, commentaries, and features for print media.
Outcomes:
Students will broaden their research and writing skills

COMM 263 Editorial Design I: Newspaper & Online (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
Editorial Design I is an introduction to information processing and readership, and basic principles of layout and editing.
Outcomes:
Students experiment with a variety of printed formats and practice copy fitting, typography, and photo-editing

COMM 265 Sports Broadcasting (3 Credit Hours)
This course will teach students how to report and produce broadcast stories about athletes and athletic events. Students will have access to players and coaches on the professional and collegiate levels, attending games, practices and training. Students will learn to produce stories for radio and television, as well as sound broadcast presentation skills.
Outcomes:
Students will learn to conduct journalistic research, interviewing techniques, public speaking skills and how to produce stories for radio and television

COMM 266 Advertising Copywriting (3 Credit Hours)
This course will focus on the art of copywriting for advertising, be it for TV, print, outdoor, social media and the ever changing landscape of digital media. Students will learn to craft their words to make creative advertising based on strategies and insights.
Outcomes:
Through a series of creativity building exercises, short lectures, and readings, learners develop both an understanding of creativity and increase their own ability

COMM 268 Persuasion (3 Credit Hours)
Students will get practical experience in the analysis, criticism, and application of persuasive discourse across a wide variety of contexts. This course is designed to explore theories related to persuasion, social influence, and compliance-gaining.

COMM 269 Observing China (3 Credit Hours)
This course is about street-level China, as it is seen and as it happens. This course is a practicum, in which students, through a mix of lectures, briefings and discussions, will delve into nature of observation and engagement with and in China.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will have a deeper understanding of how journalists and documentarians observe and write (or film) China, and over the course of the semester will make some efforts of their own to do original journalism and essay writing

COMM 271 Media Culture and Communication (3 Credit Hours)
This course examines contemporary U.S. American culture from a critical-theoretical standpoint while examining popular icons and social practices with particular attention to their influence on individual and collective identities.
Outcomes:
Students will learn critical cultural theories and do projects where they reflect upon the influences of contemporary cultural texts and practices with an eye for their economic, social and political influence on individual and collective identities

COMM 272 Intercultural Communication (3 Credit Hours)
This course introduces students to intercultural communication theory and research. Students explore how differences in ethnic, religious, economic, and geographical experiences produce social biases and engender conflict. Students are expected to explore their own cultural histories to understand how they create meaning and adopt attitudes.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Latin American Studies, Peace, Justice, and Conflict Studies
Course equivalencies: X-COMM272/INTS213/PAX 218

COMM 273 Interpersonal Communication (3 Credit Hours)
Pre-requisites: COMM 175; PCOM minors may enroll without pre-requisite
Students study speech to understand its role in human relationships. This course focuses on self-exploration of communication patterns by asking life's big questions about self and other. Students will gain competence in interpersonal communication through the development of perceptual accuracy, and clarification of values with regard to relational goals.

COMM 274 Introduction to Cinema (3 Credit Hours)
This course is an introduction to the study of cinema as a complex medium of communication. This course will provide students with the basic terminology, observational skills and theoretical background for the study of film aesthetics, language, cultural analysis, history and the production of cinematic texts.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: ACCOM / COMM 274
Outcomes:
Students will be able to demonstrate an understanding of the basic approaches to film studies such as formal analysis; critical practices, and narrative studies

COMM 275 Web Design and Usability (3 Credit Hours)
Pre-requisites: COMM 200; PCOM and EVCM minors may enroll without pre-requisite; For FNVC majors/minors, pre-requisite is FNAR 383
This course will explore the design and usability of websites from several perspectives: how they look (aesthetics), how they work (navigability and usability), and how they are made (tools and software). Lectures, demonstrations, and in-class lab time will introduce students to the creative tools and software that power contemporary web design and usability. Emphasis will be on using a variety of tools and resources to meet one's own goals, rather than achieving the level of expert in any one piece of software.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies

COMM 277 Organizational Communication (3 Credit Hours)
Pre-requisites: COMM 175; PCOM minors may enroll without pre-requisite
This course is an introduction to theory and practice of organizational communication, with an emphasis on organization contexts, culture, and systems, and the role of communication in building relationships with internal and external stakeholders.
Outcomes:
Students will be able to analyze organizational communication, and understand the impact of technology, globalization, community and diversity on organizational systems

COMM 278 International Public Relations (3 Credit Hours)
This course explores the growing impact of globalization on public relations. As multinationals grow and social, economic, and environmental issues become worldwide in focus, PR professionals work in increasingly interconnected world. Students will explore the growth of international public relations by comparing countries, analyzing and discussing cases, and learning best practices.
Interdisciplinary Option: Global Studies

COMM 279 Critical Issues in Journalism (3 Credit Hours)
This course examines different approaches to understanding the role of journalism in contemporary society, emphasizing the historical development of issues that surround journalism today.
Outcomes:
Students explore varied critical perspectives on news and news-gathering to gain a broader understanding of the role of journalism in society

COMM 280 Media Technology & Society (3 Credit Hours)
Pre-requisites: COMM 175 or 201
Through lectures, discussions, and assignments, learn the evolutionary history of media technologies from the telegraph through film, television, and digital media, and review contemporary theories about how technology shapes society.

COMM 281 Communication, Language & Gender (3 Credit Hours)
This course explores the role of communication practices in the production, reinforcement and transformation of gendered identities. Students will learn how gender expectations within cultural contexts are created. They will also learn some of the ways that deeply-rooted assumptions limit social change and guide communication.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CMUN254/WOST208/WSGS208

COMM 282 Media Law (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201; EVCM minors are waived from pre-requisites
This course examines cases and issues in constitutional, statutory, and regulatory law affecting print and electronic media including First Amendment rights, libel, privacy, copyright and trademarks, Freedom of Information, and telecommunication regulations.
Course equivalencies: COMM282/CMUN252
Outcomes:
Students will be able to understand major legal precedents affecting current media communication and recognize their impact on professional practices in print, electronic media and the Internet

COMM 290 Branding and Positioning (3 Credit Hours)
Pre-requisites: COMM 210 or COMM 211
Examines the theory and practice of branding, target segmentation, and how the digital space and the rapid rise of consumer-generated content have impacted brand management. The course explores each stage of the communication planning process and introduces students to the way audience research, and the competitive sets are used to develop brand positions and benefits.

COMM 296 Themes in Advertising/Public Relations (3 Credit Hours)
Pre-requisites: COMM 175 or 201
Intermediate-level Advertising/Public Relations lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in AD/PR.

COMM 297 Themes in Communication Studies (3 Credit Hours)
Intermediate-level Communication Studies lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in COMM.

COMM 298 Themes in Multimedia Journalism (3 Credit Hours)
Pre-requisites: COMM 175
Intermediate-level multimedia journalism lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in MJRN.

COMM 299 Themes in Film and Digital Media (3 Credit Hours)
Beginner to Intermediate-level Film and Digital Media course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major.
Outcomes:
Students will gain access to a wide variety of topics in Film and Digital Media

COMM 300 Persuasive Campaigns (3 Credit Hours)
Pre-requisites: COMM 175
This course analyses the structure, development, and role of communication in political and advertising campaigns, with a focus on theories of media effects, message construction, and audience analysis.
Outcomes:
Students will use their analytic and research skills to broaden their understanding of the use and effects of communication as a means of public persuasion

COMM 301 Discovering China Through Film (3 Credit Hours)
This course will give an overview of major films produced in mainland China since 1949. Students will examine the genres of Chinese film better known in contemporary China and consider them a major source of reflection upon, and critique of, contemporary Chinese society and culture.
Interdisciplinary Option: Asian Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Course equivalencies: CMUN301/ASIA/INTS/AIFMS302
Outcomes:
All films chosen for the course will help inform students' understanding of modern China in terms of its material conditions and ideology

COMM 303 Media, Politics, & Propaganda (3 Credit Hours)
Pre-requisites: COMM 175 or 201, and COMM 200
This course will enable students to understand the relationship between media and politics as well as be able to identify strategies used in propaganda, disinformation and misinformation campaigns, and the impact of technology on its history and evolution.
Interdisciplinary Option: Global Studies
Course equivalencies: X-CMUN330/INTS331/PAX 331
Outcomes:
Students will be able to articulate the media's impact on the circulation of propaganda as well as be able to identify disinformation/misinformation and understand its significance in the political process

COMM 304 Rhetorics of Utopia & Revolution (3 Credit Hours)
Pre-requisites: UCWR 110
This reading-intensive course will examine rhetorics of utopia, revolution, and strategies of change. Students will read a variety of texts from activists, scholars, and revolutionary thinkers to understand the ways (historically and presently) that utopias and revolutions are imagined and created through communication, media texts, and discourse.
Interdisciplinary Option: Global & International Studies, Peace Studies, Global & International Studies, Peace Studies
Course equivalencies: X-COMM304/PLSC/PAX336/INTS310
Outcomes:
By the end of this course, students will have a better understanding of utopia and revolution, how ideology operates and solidifies via discourse, and ways to enact social change

COMM 305 Animation (3 Credit Hours)
Pre-requisites: COMM 135; For FNVC majors/minors, FNAR 233 is the required pre-requisite in lieu of COMM 135
This course will focus on animation with specific emphasis on the creation, refinement, and publishing of a visual story. Students will learn 2D and 3D techniques, cameras, CGI and other software and equipment to create animated works.
Course equivalencies: COMM 305/COMM 455
Outcomes:
theories of visual and image-based storytelling; script writing; character development; storyboarding; creating visual stories from images; animation enhancement/manipulation; graphic design; and contemporary animation design options for visual storytelling/promotion

COMM 306 Environmental Advocacy (3 Credit Hours)
Pre-requisites: Sophomore standing; For SES undergrads and EVCM minors, pre-req is waived
This course explores the rhetorical means by which citizens influence the policies and practices affecting our natural and human environments. The focus is on current controversies.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: XCOMM306/ESP 329/PAX 329
Outcomes:
The course seeks to provide an understanding of the history and range of communication styles in the U.S. environmental movement and to help students develop practical skills relevant to entering into environmental debates

COMM 307 Communication & Social Movements (3 Credit Hours)
Pre-requisites: COMM 175; EVCM minors are waived from pre-requisites
This course explores the communication strategies used to promote and/or resist significant socio-political change. Students will demonstrate an understanding of how communication is used in particular societal struggles to effect socio-cultural change at an individual, community, institutional or global level.
Interdisciplinary Option: Peace, Justice, and Conflict Studies

COMM 308 Screen Directing (3 Credit Hours)
Pre-requisites: COMM 135 and 274
This advanced course in screen directing is designed to further students' narrative filmmaking skills. Geared toward creating fiction films, the course focuses primarily on blocking for the camera, directing actors for the screen, and structuring dramatic scenes. Students should have a working knowledge of basic videography, nonlinear editing, shot composition and film grammar.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM308/IFMS309

COMM 309 Designing Media for Social Change (3 Credit Hours)
Pre-requisites: COMM 220, 227, 230, 231,237, 268, 272,277, or 281; GSCM-MS or DMST-MC or ECVM-MINR students may enroll with no prerequisites
This course examines media and social change at the intersection of theory and practice. The class will be dedicated to analyzing the way social change is catalyzed and communicated through various media platforms. Students will gain a historical and multi-media perspective on a variety of design and communication strategies tied to a range of social and cultural issues.
Outcomes:
Grounded in theories of media power, communication networks, political advocacy, engaged scholarship, and the digital, materials in this course will explore the past, present, and future of designing media and communication practices

COMM 310 Production Design (3 Credit Hours)
Pre-requisites: COMM 274 or COMM 135 or THTR 252; Or instructor permission; MC in DMST students may enroll without pre-requisites
Students develop an understanding for the evolution and history of production design, as it relates to film production, from its inception to the present. Students will pre-visualize and implement art direction--sets, costumes, makeup, color palettes--for student films in production. They learn pre-visualization techniques, script breakdowns and build-out processes for art direction on film sets.
Outcomes:
Students acquire the visual language and historical precedents for production design in film and television

COMM 311 Health Communication (3 Credit Hours)
Pre-requisites: COMM 205 or COMM 210
This course focuses on the growing field of health communication. Building on students' knowledge of public relations, advertising, communication and marketing, this class aims to help students develop an area of specialization that offers career opportunities in many settings. Through guest speakers and field trips, the class is designed to provide an overview of what health communicators do and where they work.
Course equivalencies: COMM 311/COMM 461
Outcomes:
Provide a foundation of knowledge about the US healthcare system and acquaint students with how communications can play a vital role in accomplishing public health objectives

COMM 312 Special Events Planning (3 Credit Hours)
Pre-requisites: COMM 210
Students will gain hands-on experience in event planning. They will learn to anticipate and execute the needs of an organization or community planning special events.

COMM 313 Corporate and Organizational Communication (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 210; PCOM minors may enroll without pre-requisites
Students will learn the theory and practice of responsive and strategic organizational communication in developing corporate identity and image.
Outcomes:
Students understanding of the theory and practice of responsive and strategic organizational communication, public relations and advertising will be enhanced

COMM 314 Public Relations Cases (3 Credit Hours)
Pre-requisites: COMM 210
The course focuses on issues, strategies, and solutions in creating and maintaining relationships with key publics including media relations, internal communications, community relations, public affairs, investor relations, and crisis communications.
Outcomes:
Students will gain experience analyzing, formulating and applying case-specific solutions and developing an integrated campaign

COMM 315 Advanced Reporting Topics (3 Credit Hours)
Pre-requisites: COMM 205, 362 , and Junior Standing and above
This course offers in-depth attention to the challenges of writing complex stories characterized by careful research, use of sources, interviewing, and reporting and writing. Students examine writing for a "lay" audience in such areas as science and technology, finance, government, and religion. Can be repeated once with a different topic. Second completion can count as major elective in MJRN.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will broaden their writing and research experience

COMM 317 Media Planning (3 Credit Hours)
Pre-requisites: COMM 211
This course examines the advertising and marketing processes required to research, develop and implement an effective media plan for budgeting appropriate advertising time and space.
Course equivalencies: COMM 317/COMM 417
Outcomes:
Student teams will develop competencies in decision-making processes and tools, including research methods, objectives, strategies and tactics to construct an advertising media plan

COMM 318 Public Relations Writing (3 Credit Hours)
Pre-requisites: COMM 210
This course focuses on strategic public relations, writing for publics including print, broadcast and digital media with understanding of objectives, news values and formats.
Outcomes:
Students develop competency writing and editing news releases, pitch letters, fact sheets, public service announcements, newsletters, and Web content to develop a portfolio of individual writing samples

COMM 320 Public Service Communication (3 Credit Hours)
Pre-requisites: COMM 210 and 211
This course examines public relations strategies and applications in cause-related campaigns, public service initiatives, and community relations activities for corporate and nonprofit organizations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to analyze current issues and advocacy campaigns, define ethical communication and social responsibility, and develop a public service campaign for an organization

COMM 321 Advertising Campaigns (3 Credit Hours)
Pre-requisites: COMM 211
This is an advanced advertising course in a simulated agency environment to provide practical experience in the campaign planning process.
Outcomes:
Student teams develop competencies in creating and producing a professional advertising campaign that includes market research, development of creative and media recommendations, and an integrated marketing communication strategy

COMM 322 Guerilla Media (3 Credit Hours)
Pre-requisites: COMM 200
This course covers provocative, unexpected, and alternative methods for distributing media and gaining new audiences. It includes the history, theories and ethics behind the appropriation of "guerrilla" strategies as found in artistic, civic, commercial and political media work. SES majors and EVCM minors are waived from pre-requisites.
Interdisciplinary Option: Film & Digital Media Studies
Outcomes:
Students gain experiences with understanding, creating and distributing media work with guerrilla strategies around environmental, journalistic and commercial themes of their choice

COMM 323 Remixing Culture (3 Credit Hours)
Pre-requisites: COMM 200
This course explores the remix culture as cultural exchange. While studying about remix culture and collaborative process, students will manifest projects that involve mashing up media using various web-based and mobile media creation, web-based editing, live online broadcasting and sharing and techniques of online presentation.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM323/ICVM323/IFMS323
Outcomes:
Students will learn about the intermixing of cultures through individual projects in which they will combine different types of media

COMM 324 Film Genre (3 Credit Hours)
Pre-requisites: COMM 274
Traces the evolution of independent filmmaking in the U.S, from the pioneering cinema of Maya Deren and John Cassavetes to seminal works of Spike Lee, Kelly Reichardt, and Barry Jenkins.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM324/ICVM324/IFMS324
Outcomes:
Students will be able to demonstrate knowledge what constitutes a genre and the varied approaches used to analyze films within the context of genre studies

COMM 326 Screenwriting (3 Credit Hours)
Pre-requisites: COMM 202
This course introduces students to the process of writing for the screen. Through exercises and analysis of structure and storytelling fundamentals, students will develop a working sense of the art of crafting a screenplay, learning how to build a script, step by step, from an original and compelling idea.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM326/THTR209/IFMS209
Outcomes:
Extensive writing requirements cover all aspects of screenwriting, from creating a treatment and character bios to writing action and dialogue, culminating in the development of a detailed step outline and polished first act of a feature-length script (20+ pages); Students are required to bring an original movie idea to the first class

COMM 327 Mastering Video Reporting and Storytelling (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
This course prepares students to report and produce video stories for broadcast and other similar media distribution. It emphasizes information gathering, source development and visual storytelling, and builds on the video and editing skills students learn in the beginning video production class. COMM 256 is encouraged before taking this class but not required.
Outcomes:
Students will learn how to capture great video and audio, research, write, produce, edit complex, effective video stories and present in a variety of ways

COMM 328 Editorial Design II: Magazine & Interactive (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205
This course gives advanced instruction in multi-page editorial layout and design by incorporating writing and photography into a complete, full-color magazine. Students will work as editors and designers in applying principles of design and production to existing articles; and understand ethical issues in serving the readers of the magazine.

COMM 329 Advertising and Public Relations Design (3 Credit Hours)
Pre-requisites: COMM 210 or COMM 211
This course is for AD/PR majors who want to understand the creative and design discipline of the fields. Students will learn the fundamentals of print-based messages used in advertising and public relations. Students will employ various design programs applied in today's industry to develop visual communications projects, which will culminate in a final portfolio.
Course equivalencies: COMM 329/COMM 429
Outcomes:
Students will learn and become competent in the following: Current design programs including InDesign and Photoshop; Basic design principles, such as color, space, and typography; Common formats for designing integrated marketing communication print materials

COMM 330 Intermediate Advertising Design (3 Credit Hours)
Pre-requisites: COMM 214
Builds on the creative skills and understanding acquired in the introductory advertising creative courses to enhance students' conceptual abilities. Utilizing Adobe InDesign and Photoshop, students learn to design for various advertising formats including digital, print and for client presentations.
Course equivalencies: COMM 330/COMM 463
Outcomes:
The best work is finished on computers and reviewed by advertising professionals at the end of the semester

COMM 331 Social Media Advertising (3 Credit Hours)
Pre-requisites: COMM 211 and COMM 213
This course covers the latest theories and practices of social media advertising. Students will be exposed to 1) evolving concepts and theories related to social media advertising, 2) case studies that discuss the strategies of social media campaigns, and 3) hands-on practices of digital technologies to implement social media campaigns.
Course equivalencies: COMM 331/COMM 444
Outcomes:
Knowledge of theories relating to social media advertising, ability to create strategic plans on social media, skills for digital technologies in social media advertising campaigns, and understanding social media advertising ethics

COMM 332 Investigative & Public Affairs Reporting (3 Credit Hours)
Pre-requisites: COMM 205, COMM 362, and Junior Standing and above
This course will teach you how to do Investigative and Public Affairs Reporting with a data journalism approach. Through discussion of examples and our own work, we will explore how to find, request, and use data that can reveal important information about society.
Outcomes:
Students will learn how to conduct their own data-driven Investigative and Public Affairs Reporting; They will also be able to critically assess this type of journalism

COMM 333 Cinematography II (3 Credit Hours)
Pre-requisites: COMM 232, or instructor permission
Students learn and demonstrate techniques and roles for advanced cinematography: virtual production, assistant directing, sound stages, and location lighting.
Outcomes:
Camera/lighting setups for commercial spaces, virtual locations, lens/cameras for advanced aesthetic choices, assistant directing role/practices, drones, cranes, Steadicams, and other mobile camera framing techniques

COMM 334 Mobile Advertising (3 Credit Hours)
Pre-requisites: COMM 211 and COMM 213
Mobile is one of the most valued investments for advertisers. This course covers the latest practices and trends of mobile advertising which includes 1) branded mobile application design and development; 2) advanced mobile experiences with AR/VR experiments; and 3) various practices, tactics, and ethical concerns for native mobile advertising experiences.
Course equivalencies: COMM 334/COMM 464
Outcomes:
Knowledge of relevant human-computer interaction theories and branded mobile design/development; Ability to use digital tools to create mobile advertising campaigns; Understanding of importance and implications of ethics in mobile advertising

COMM 335 AI in Advertising (3 Credit Hours)
Pre-requisites: COMM 211 Outcomes: Students will learn the fundamental of logics of AI technologies, and its implicaitons in various aspects of advertising
This course explore what is AI, how it¿s been applied in various stages and aspects of advertising, and be creative in using artificial intelligent technologies to create better advertisement and consumer experiences.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X - COMM 335 / COMM 445

COMM 336 Search & Display Advertising (3 Credit Hours)
Pre-requisites: COMM 211 and COMM 213
This course covers search engine optimization and advertising practices through lectures and hands-on practices. Students will learn technical terms and tactics involved in optimizing the search result and user experience with brand websites. Google AdWords, search network campaigns, display network campaigns and Google merchandiser set-up training will be included. (Consider scheduling to coincide with Google Challenge.)
Outcomes:
Understand the major concepts in search engine optimization; Working knowledge of the structure and terms used in Google AdWords; Be able to develop effective search engine and display advertising campaigns

COMM 337 AD/PR Multimedia Commercial Production (3 Credit Hours)
Pre-requisites: COMM 135, COMM 145, or COMM 211
This is an advanced video and advertising course designed to give students an introduction to various types of multimedia commercials as well as practical considerations of producing branded content and television spots, including for real clients.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 337/COMM 437
Outcomes:
Build experience in effective multi-tasking and teamwork, gain skills with technology and strategy, creative, and application process of broadcast production, and practice engaging with the community in media development efforts

COMM 338 Narrative Production (3 Credit Hours)
Pre-requisites: Junior standing and either COMM 232, COMM 308, OR COMM 359; Graduate students majoring in Digital Media Storytelling are also eligible to enroll
Students work in teams to create short-subject narrative films taking their projects from preproduction to exhibition. Students will experience working as a part of a film production crew, be exposed to a variety of jobs, and produce and exhibit original films.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies

COMM 339 Video Documentary (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-COMM339/439/ICVM339/IFMS339
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 342 Human Rights Reporting (3 Credit Hours)
In this course, Students will study the history of the concept of human rights and the legal mechanisms for enforcing human rights law, and they will read work by reporters covering human rights worldwide.
Outcomes:
Students will learn how to report on international conflicts by finding local angles of interest to Chicago readers and how to approach articles on domestic human rights issues

COMM 344 Portfolio I (3 Credit Hours)
Pre-requisites: COMM 266; and (COMM 329 or COMM 330)
Builds on skills acquired in intermediate creative courses to help students enhance their conceptual abilities and generate both print and integrated multimedia campaigns. Students work in teams to develop an extensive body of work that's exhibited in an awards show judged by advertising professionals.

COMM 345 Student Agency (3 Credit Hours)
Pre-requisites: COMM 175 and Instructor Consent
COMM 210 or 211 strongly recommended. Open to undergraduate students only. A 3.0 GPA is required. Course involves actual client work in Inigo, the student-run communications agency. Students gain skills/put theory into action as they provide public relations, digital communication, strategy and other services to companies and non-profits. Students apply prior semester. Contact instructor at cmcphil@luc.edu for details. All majors encouraged.
This course satisfies the Engaged Learning requirement.
Outcomes:
A fundamental understanding of what agencies are and how they function; A heightened sense of professionalism; Advanced-level teamwork; Increased written and verbal communication skills

COMM 350 Producing for Film & Digital Media (3 Credit Hours)
Pre-requisites: COMM 135 OR COMM 274; COMM 405 (for DMST students); OR Instructor Consent
Aesthetic choices meet the ethics and business of filmmaking in COMM 350. Producing covers how to develop story ideas from conception to writing, financing, production and distribution. Relevant issues in script breakdowns, safety, communication and contracts are covered. Students create pitch decks, basic budgets and a longer prospectus for potential investors.
Outcomes:
Understanding DEI issues while choosing stories to produce, hiring performers or crew; templates for budgets; best practices for safety on the set; creating engaging pitch decks and treatments

COMM 357 Programming Film & Media: Festivals, TV & Digital (3 Credit Hours)
Pre-requisites: COMM 200
This course examines programming and curating (selecting) media for film festivals, museums, streaming services and other platforms. Through work on a festival or similar project, students examine how audiences are identified, learn about distribution, and explore the challenges facing media outlets in selecting, reviewing and archiving media.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM357/IFMS369
Outcomes:
Evaluate, curate and present media work; improve critical thinking and writing about media; learn legal, creative and financial implications of programming and curating media

COMM 358 Newscasting and Producing (3 Credit Hours)
Pre-requisites: COMM 145 and COMM 256 This is designed as a capstone course for the broadcast journalism emphasis
It covers all aspects of TV (or web) newscasts, including producing, anchoring, reporting, photography and editing, as well as studio production. The class produces and delivers newscasts, designed to prepare students for work in the TV news industry.
Course equivalencies: COMM 358/COMM 458
Outcomes:
This class is designed to produce news content on multiple platforms: not only television but also audio (podcast-style) and social media, and to that end, you will gather information, write, shoot and edit stories to present in these various formats; In addition to learning the technical aspects of producing content on these platforms, to do well in the class you will need to keep up with the news -- what's happening at Loyola and in Chicago, in the state, nation, and world; In addition, you will be expected to produce news that represents diverse perspectives and avoids misrepresentation or harm to individuals, groups, or alternative viewpoints

COMM 359 Advanced Post Production (3 Credit Hours)
Pre-requisites: COMM 135 and COMM 274
This course combines advanced editing theory and practice, aimed at providing students with the skills required for editing motion pictures of all genres and for all platforms.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM359/459/IFMS359
Outcomes:
Students will learn how to edit for motion pictures of all forms

COMM 360 Digital Media Ethics (3 Credit Hours)
Pre-requisites: COMM 200
This course is designed to familiarize students with a new set of ethical dilemmas that have sprung up in the last decade with the rise of new media. Using classical ethical theories, students will formulate appropriate and responsible solutions to ethical dilemmas emerging in a new/digital media context.
Outcomes:
Students will learn about current ethical issues and solve these issues using classical ethical theories

COMM 361 New Media Criticism (3 Credit Hours)
Pre-requisites: COMM 200 and UCWR 110
Wikipedia, Google, YouTube, Twitter and mobile applications are complex designed objects. Students will learn a critical language for thinking of new media as art, narrative, culture, and code. This course is Writing Intensive.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies

COMM 362 Multimedia Journalism Research Methods (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205; EVCM minors are waived from the pre-requisite
This course advances student knowledge of resources, methods, and credibility standards for gathering and reporting news stories.
Outcomes:
Students will learn how to conduct research that is both accurate and balanced

COMM 363 Research Methods in Advertising/Public Relations (3 Credit Hours)
Pre-requisites: COMM 210 or 211
Course will introduce majors to sound and effective social science research methods used in Ad/PR, including surveys, focus groups, content analysis, and audience analyses. It will also give students a chance to apply for the national PR student Bateman Competition that would continue in a designated course the following spring.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn the research process and how to apply it to establish, build, and evaluate Ad/PR strategies, goals, and campaigns

COMM 365 Naturalistic Methods Communication Research (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course examines how communication research is conducted in naturalistic settings using qualitative methods associated with observation and in-depth interviewing.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become familiar with the reading and evaluation of communication research, and apply the concepts studied in class to the design and development of a research project

COMM 366 Observing/Measuring Cmun Behavior (3 Credit Hours)
This course examines how communication processes and behaviors are studied, using the social-scientific techniques of observation and measurements. It also looks at the limitations of these methods; appropriate methodologies and ways of analyzing quantitative (numerical) data.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will become familiar with the analysis of quantitative data, and apply their knowledge to the design of a research project

COMM 367 Rhetorical Criticism (3 Credit Hours)
Pre-requisites: UCWR 110 and (COMM 175 or COMM 201)
This course examines theory, research, and application of critical methods for analyzing historical and contemporary persuasive discourse.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will be able to analyze rhetorical situations and critically assess efforts to respond to them

COMM 368 Ethnographic Research Methods in Communication (3 Credit Hours)
Pre-requisites: (COMM 175 or COMM 201) and Junior standing
This course teaches principles of participant-observation research as a critical practice to produce a 'thick description' of meanings, values, hierarchies of interests, power structures and ideals of a particular cultural group or community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students learn to conduct ethnographic research and its procedures - taking field notes, conducting interviews, examination of data and artifacts, and producing research results to a public audience

COMM 370 Special Topics in Advertising & Public Relations (3 Credit Hours)
These are advanced courses in specialized AD/PR areas. Titles and content vary and prerequisites are established according to course content. May be repeated with different topics for a total of 9 credit hours, but only 6 may count toward the major.
Course equivalencies: COMM 370/COMM 470

COMM 371 Special Topics Communication Studies (3 Credit Hours)
Pre-requisites: COMM 175; DMST-MC and GSCM-MS students may enroll without prerequisites
These courses offer in-depth reading, research, and discussion in specialized areas dealing with current social issues and communication practices. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.

COMM 372 Special Topics: Multimedia Journalism (3 Credit Hours)
Pre-requisites: COMM 175, or DMST student
These courses offer in-depth reading, research, and discussion in specialized areas dealing with current issues in multimedia journalism. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.

COMM 373 Digital Storytelling Abroad (3 Credit Hours)
Pre-requisites: COMM 135 or 145
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography and editing skills within another country and cultural context.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 373/COMM 473
Outcomes:
The course will require students to enterprise and execute a range of multimedia skills that help participants tell stories; The course will have an emphasis on community engagement and social justice; The course will give students an opportunity to apply technical knowledge and skills to a uniquely-designed study abroad experience

COMM 374 Special Topics: Film & Digital Media (3 Credit Hours)
These courses offer in-depth experiences in the production, design, writing and development of film and digital media. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.

COMM 375 Media Relations (3 Credit Hours)
Pre-requisites: COMM 210 or 211
Students learn to develop influence through earned media. Skills taught include identifying news values, writing/creating multimedia press releases and media alerts, AP style, media training, creating media lists using Cision, working with syndication services, search engine optimization for news releases, creating a social presence and working with social influencers.
Outcomes:
Students learn to develop influence through earned media and how to build relationships with the media and other influencers in order to amplify stories for clients

COMM 378 Advertising/Public Relations Practicum (3 Credit Hours)
Pre-requisites: COMM 100; GSCM-MS students may also enroll; Restricted to Juniors and Seniors in the Advertising and Public Relations major; Department consent is required to enroll
Students will gain advanced practical experience advertising/public relations projects.

COMM 379 Digital Sustainability (3 Credit Hours)
Pre-requisites: Sophomore standing; SES undergrads can also enroll
Digital Sustainability explores the environmental impact of digital media. Mining precious metals to manufacture devices, burning fossil fuels to run data centers, global black market trading of e-waste are points where the digital world meets the physical world. Students will explore digital sustainability problems, and work toward creative solutions.
Course equivalencies: COMM 379 / COMM 479
Outcomes:
Learn about environmental issues stemming from digital media infrastructure; Critically evaluate different disciplinary perspectives to gain a broader understanding; Develop ethical reasoning regarding environmental impact resulting from digital media ecology

COMM 380 Debate Practicum (3 Credit Hours)
Pre-requisites: Instructor Consent
Students gain advanced practical experience in the Loyola Debate Society.

COMM 381 Communication Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students gain advanced practical experience in service experiential learning projects. Student must develop a project with a full-time faculty member in COMM Studies. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf.
This course satisfies the Engaged Learning requirement.

COMM 382 Multimedia Journalism Practicum (1-3 Credit Hours)
Students gain hands-on practical experience in developing multimedia journalism projects. Student must develop a project with a full-time faculty member in Multimedia Journalism. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf. Pre-requisites: Department Consent.
This course satisfies the Engaged Learning requirement.

COMM 383 Radio Practicum (3 Credit Hours)
Students will work with WLUW radio station under the supervision of a faculty member participating in one or several of the following activities: generating story ideas, booking guests, interviewing guests, doing promotions using social networking and on-air productions, recording, editing and producing audio segments, learning several facets of what it takes to produce a radio show.
This course satisfies the Engaged Learning requirement.

COMM 384 Film & Digital Media Practicum (1-3 Credit Hours)
Pre-requisites: Requires Instructor Consent for all majors; DMST may also enroll with instructor consent
Students will gain advanced practical experience creating digital cinema projects. They may choose to focus on a certain role and section--director/producer, writer, cinematographer, editor, production designer, sound designer, publicist.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: ICVM384/IFMS384/COMM384
Outcomes:
Students will gain advanced practical experience producing and collaborating on digital cinema projects

COMM 386 Advertising/Public Relations Capstone (3 Credit Hours)
Pre-requisites: Senior Standing (90 credits earned); Restricted to ADPR majors
Students focus on integrating and applying knowledge and skills related to advertising and public relations. They will research a career interest area, interview working professionals, and create strategic communication portfolio materials. Students gain specialized industry knowledge, improve professional communication competence, and build contacts.

COMM 387 New and Digital Media Capstone (3 Credit Hours)
Students focus on integrating and applying knowledge and skills related to new and digital media applications. They will gain specialized research and industry knowledge and skills, improve professional communication competencies, and build digital industry contacts.

COMM 388 Film and Digital Media Capstone (3 Credit Hours)
Pre-requisites: Instructor Consent and Senior Standing; Restricted to FDMD majors: Students must complete the COMM 388 form, describing your project, any participants/support materials/technology needed, and submit to Instructor; Form: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/COMM388Form.pdf
Project proposal must be approved by the program director and course supervisor by the end of the first week of the semester. A Public presentation of the project is required. Examples of appropriate capstone projects include, assisting in the development of a film festival or presentation of a significant research project.
Outcomes:
Synthesize previous course work into a public presentation in the students' area of interest

COMM 389 Advertising Creative Capstone: Portfolio II (3 Credit Hours)
Pre-requisites: COMM 266 and COMM 344; Must be an ADCR major, senior standing
Gives students an opportunity to develop new campaigns and refine existing work. Students receive feedback from advertising professionals throughout the semester to help them edit and develop their portfolios. Each member of the class creates a portfolio website and develops a job search plan. Final portfolios are critiqued by faculty and professionals. Have a plan for pitching work to potential employees.
Outcomes:
Develop a portfolio of innovative ideas and creative ads across multiple platforms; Learn skills to critique and edit portfolio material

COMM 391 Advertising/Public Relations Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Completed 18 credit hours in COMM courses; Restricted to ADPR majors; Instructor Consent; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 392 Multimedia Journalism Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to MJRN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 393 Communication Studies Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to CMAS and CMUN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 394 Film & Digital Media Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to FDMD majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

COMM 398 Directed Study (1-3 Credit Hours)
Pre-requisites: Department Consent; Student must develop a project with a full-time faculty member in their SOC major; Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf
Course may be taken for variable credit (1-3 hours). Student will work independently in their area of interest with a supervising faculty member whose expertise is in that area. Projects may include, but are not limited to: a reading course, where the student contracts to read and create an annotated bibliography of research materials; a writing course, where a student has developed a strong paper for a course and wants to refine it for possible conference presentation and/or publication, etc.

COMM 400 Designing for Digital Environments (3 Credit Hours)
Students will learn about the design and usability of websites from several perspectives: how they look, how they work, and how they are made. Students must be enrolled in the graduate program for MC in Digital Storytelling.
Outcomes:
Students will how stories are told through new media, understand how to analyze and critique them and create digital artifacts that demonstrate their role as effective and ethical producers and users of new media

COMM 401 Foundations of Global Strategic Communication (3 Credit Hours)
This course delves into two areas impacting communicators' success in the global arena: new media and culture. Through a blend of class discussions, interactive activities and guest speakers, students will study frameworks for strategic communication in a global environment and then apply these lessons in group and individual projects. Enrollment limited to students in GSCM-MS Program. Students are expected to understand fundamental concepts in strategic communication, be able to identify and explain the role of strategic communication in the global business context, understand the importance of dialogue and engagement, and have the ability to construct effective messages.

COMM 402 Organizational Leadership and Change Management (3 Credit Hours)
Students will examine best practices in organizational leadership and change management. Students will also be introduced to major economic, financial and business principles and the terms, concepts and values that guide organizations. Finally, will gain insights that will enable them to work more effectively as communicators and organizational leaders. Enrollment limited to students in GSCM-MS Program. Students are expected to gain knowledge and leadership skills needed to help organizations chart a successful course through change. They are also expected to understand the major drivers of organizational change; the role leadership plays in anticipating, planning and navigating organizational change.

COMM 403 Strategic Communication Research Methods (3 Credit Hours)
This course is designed to provide students with a critical framework for evaluating communication research and first-hand experience in the research process. Specifically, we will examine how research questions, originating from client-specific interests, are translated into a research project. Enrollment limited to students in the GSCM-MS Program. Students are expected to know how to read and evaluate a research study, select appropriate research questions, develop measurements, draw a sample, collect and analyze data and interpret the results.

COMM 405 Story Development and Production (3 Credit Hours)
This course will give students a basic understanding of narrative theory and its evolution. It will also emphasize the idea that telling a good story begins with having something to say and a purpose for telling it to someone. Students must be enrolled in SOC Professional Degree Program MC in Digital Storytelling.
Outcomes:
Students will read, write and practice narrative techniques on electronic modes of communication while learning about narrative structure, content and form of delivery

COMM 406 Environmental Advocacy (3 Credit Hours)
Pre-requisites: COMM 100 and sophomore standing; Digital Media & Storytelling (DMST* Masters students and any students majoring in SES may also enroll
This course explores the rhetorical means by which citizens influence the policies and practices affecting our natural and human environments. The focus is on current controversies.
Course equivalencies: XCOMM306/ESP 329/PAX 329
Outcomes:
The course seeks to provide an understanding of the history and range of communication styles in the U.S. environmental movement and to help students develop practical skills relevant to entering into environmental debates

COMM 409 Video Production Lab (3 Credit Hours)
This six-week graduate course is designed as an entry-level introduction to the foundational concepts and techniques in video, audio, and editing production. This class prepares students with little to no prior experience in video and audio production to readily participate in the Digital Media and Storytelling (DMST) master's program. Students with some or greater knowledge in this field will also have the opportunity to expand their prior knowledge as the course focuses on developing practical skills to effectively capture and edit video and audio elements to create compelling visual narratives. Students will be provided access to industry- standard tools while learning how to shape stories using best practices in media production. Throughout the course, students will explore the fundamentals of video production, including camera operation, sound recording, and editing software using Adobe software. Emphasis will be placed on hands-on experience, with each student producing and editing short video projects that integrate both visual and audio storytelling techniques.
Outcomes:
Demonstrate proficiency in operating digital video cameras and audio recording equipment to capture high-quality footage and sound for storytelling purposes; Apply fundamental techniques of video composition, including framing, lighting, and shot sequencing, to create visually compelling narratives; Utilize industry-standard editing software, such as Adobe Premiere Pro, to edit and assemble video and audio elements into coherent short-form productions; Implement basic audio post-production techniques, including dialog editing, sound effects creation, and mixing, to enhance the overall quality of video projects; Develop and execute a complete video production workflow, from pre-production planning to final delivery, demonstrating an understanding of storytelling principles and best practices in digital media production

COMM 410 Media Law for Inclusive Digital Storytelling (3 Credit Hours)
This course addresses how courts and lawmakers have addressed legal issues presented by digital media. Students must be enrolled in Professional Degree Program MC in Digital Storytelling.
Outcomes:
Students will learn some of the ways that blogger's rights, intellectual property, libel, privacy and threats pose challenges to internet legal regulations and social ethics

COMM 411 Strategic Communication Ethics and Law (3 Credit Hours)
This course explores various approaches to ethical decision-making and applies them to diverse aspects of strategic communication in professional settings. Students will learn to discern a wide variety of ethical issues concerning communication behavior, apply systematic ethical analysis to various business situations, and clearly explain their analyses. Enrollment is limited to students in the GSCM-MS Program. Students will have learned fundamental ethical principles and decision-making processes, examined some of the most pressing ethical issues facing strategic communicators and applied course material to specific strategic communication decisions.

COMM 412 Communication Content Mining and Analytics (3 Credit Hours)
This course is for students interested in learning practical data analysis/data mining techniques in strategic communication. A useful takeaway from the course will be the ability to perform powerful data analysis using popular statistic packages (e.g., R, SPSS, Excel) and web analytics (e.g., Google Analytics). Enrollment limited to students in the GSCM-MS Program. Students are expected to increase their critical thinking ability to assess the quality of consumer information and the limitations of online data. They will become familiar with frequently used data analysis tools.

COMM 413 Writing for Strategic Communication (3 Credit Hours)
This advanced writing intensive course engages students in the strategic process of professional-level writing by focusing on communication objectives, cultural differences among audiences, techniques, style and mechanics. Students will learn the importance of planning, research, pre-writing, editing and rewriting in the writing process. Restricted to Global Strategic Communication Students
Outcomes:
The course also provides practical, real world writing experience in diverse formats for a wide range of audiences, including memos, proposals, creative briefs, executive speeches, op-eds, fact sheets, news releases, blogs and other social media

COMM 414 Advertising Campaigns (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
In this Advertising Campaigns class, students will explore the profound impact of rapidly evolving technologies on modern advertising practices. The course examines how changing media consumption behaviors have transformed consumer journeys from linear patterns to complex, interconnected experiences driven by micro-moments and personal intents. Students will critically analyze traditional advertising agency models, identifying why many long-standing practices are becoming obsolete in today's digital landscape. The class will challenge participants to rethink creative processes and develop innovative approaches that align with current market demands and communication goals. Through collaborative projects and discussions, students will work to bridge the gap between conventional advertising wisdom and the realities of the digital age. The course emphasizes the need for original thinking and adaptability in crafting effective campaigns that resonate across various touchpoints in consumers' lives.
Outcomes:
Analyze the impact of changing technologies on consumer behavior and media consumption patterns; Evaluate traditional advertising models and identify areas for innovation in the digital age; Develop strategies to engage consumers across multiple touchpoints throughout their non-linear consumer journey; Create data-driven, intent-based advertising campaigns that resonate with target audiences in their micro-moments; Design integrated campaigns that seamlessly blend traditional and digital advertising approaches; Apply critical thinking skills to assess and adapt campaign strategies in response to rapidly changing market conditions

COMM 415 Data-Powered Digital Storytelling (3 Credit Hours)
This course focuses on how and where to discover compelling story ideas utilizing investigative methods to cultivate original points of view for digital presentations.
Outcomes:
Students learn to use records and data mining techniques to analyze information and cultivate stories to be told in digital formats

COMM 417 Media Planning (3 Credit Hours)
This course examines the advertising and marketing processes required to research, develop and implement an effective media plan for budgeting appropriate advertising time and space. Only BASD-ADPR and MS-GSCM students may enroll.
Course equivalencies: COMM 317/COMM 417
Outcomes:
Student teams will develop competencies in decision-making processes and tools, including research methods, objectives, strategies and tactics to construct an advertising media plan

COMM 420 Digital Production: Storytelling with Impact (3 Credit Hours)
This lab-based course will introduce students to production techniques for digital storytelling. Students will acquire knowledge of videography, sound recording, video and audio editing, web design and interactivity.
Outcomes:
Students will find compelling stories, set scenes and use narrative techniques to craft influential stories designed for professional purposes in advertising, journalism or documentary production

COMM 421 Topics in Global Strategic Communication (3 Credit Hours)
This course will offer in-depth reading, case studies, and discussion in specialized areas dealing with current issues in global strategic communication. Enrollment limited to students in the GSCM-MS Program. Students will develop in-depth knowledge of a current issue or opportunity in global strategic communication, become acquainted with how and where local strategic communicators work, and examine the differences and similarities in how strategic communication is defined and practiced in different countries.

COMM 422 Global and Multicultural Audiences and Stakeholders (3 Credit Hours)
In this course students will investigate various audiences in today's global marketplace that organizations need to consider to remain relevant. The course will explore the concept of globalization and how, as a dynamic and uneven process, it requires practitioners to understand global and local audiences and those influenced by multiple cultures. Restricted to ADPR-BASD, GSCM-MS, and DMST-MC students.
Outcomes:
The goals of the course are to learn to be sensitive to a variety of cultures; recognize particular values, needs, and behaviors; and craft messages that connect and engage

COMM 425 Digital Marketing and Analytics (3 Credit Hours)
This course will explore online audience behavior and measurement. Students will use analytics to understand user activities and to drive improvements in distribution performance. In the course of their development, students will come to understand intellectual property protection, self-publication, bandwidth issues, usability, file formats, social sharing, security, syndication and mobile delivery.
Outcomes:
Analyze digital audience behavior using analytics tools to inform marketing strategies and content distribution decisions; Evaluate the legal, marketing, and economic factors affecting digital content distribution and audience targeting; Implement data-driven strategies to improve digital content performance and audience engagement across various platforms; Design digital marketing materials that comply with intellectual property laws and address security and usability concerns; Optimize digital content for multi-platform delivery, with a focus on mobile and social media channels, considering bandwidth and file format implications

COMM 426 Strategic Business Communication for Social Impact (3 Credit Hours)
The strategic simulation class setting will engage the students in the imaginary leadership role to exercise how to make an ethical decision on the issues and challenges. This incorporates a mix of lectures, case discussions, role-playing, and group projects in real-world applications.
Outcomes:
Apply fundamental principles of communication in different organizational contexts\\n; Demonstrate ability to write and present effectively, considering audience and purpose; Understand and address critical challenges during crises; Identify communication solutions to foster a positive team culture through employee communication; Leverage ethical communication in decision-making and problem-solving; Navigate cross-cultural and global communication issues and differences

COMM 429 Advertising and Public Relations Design (3 Credit Hours)
This course is for students who want to understand the creative and design discipline of the fields. Students will learn the fundamentals of print-based messages used in advertising and public relations. Students will employ various design programs applied in today's industry to develop visual communications projects, which will culminate in a final portfolio. Restricted to GSCM-MS students.
Course equivalencies: COMM 329/COMM 429
Outcomes:
Students will learn and become competent in the following: Current design programs including InDesign and Photoshop; Basic design principles, such as color, space, and typography; Common formats for designing integrated marketing communication print materials

COMM 430 2D Design for Print and the Web (3 Credit Hours)
This course will focus on visual theory, graphic design, photo editing, and web design. Restricted to Masters students enrolled in the Digital Media & Storytelling Masters program.

COMM 431 Campaign for Social Impact (3 Credit Hours)
This course empowers students to design, implement, and evaluate digital campaigns using Integrative Marketing Communication (IMC) principles with a strong emphasis on community service and engaged learning. Students will work on hands-on projects that address real-world community needs, applying research, planning, implementation, and evaluation strategies. Through case studies, client campaigns, and community-based initiatives, students will build a portfolio of projects that not only enhance their professional skills but also contribute positively to the community and society.
Outcomes:
Develop and manage online content promotion and branded digital campaigns to promote community-based initiatives and social causes; Apply critical thinking and research skills to craft clear messages and digital materials for social good; Execute social media engagement and user-oriented content strategies; Evaluate campaign success by setting the key performance indicators (KPIs) to assess the effectiveness of campaigns and their impact on community improvement; Engage in a cycle of practice, feedback, and refinement to develop transferable skills while making meaningful contributions to community projects

COMM 432 Public Interest Communication (3 Credit Hours)
This course explores the principles and best practices of strategic communication aimed at achieving lasting, positive social change in various areas, including climate change, racial justice, healthcare access, and housing policy. This interdisciplinary program draws from practice and scholarship in public relations, journalism, advertising, psychology, sociology, political science, anthropology, and neuroscience. This course is custom-tailored for current and future communications directors at a nonprofit organization or a media relations officer at a foundation being an account executive at a strategic communications firm.
Outcomes:
Identify and target issues that can be addressed with public interest communications; Conduct research to underpin strategic communications aimed at driving social change; Use systems thinking to identify a specific approach to driving change; Develop strategic communication initiatives that can drive positive social change; Advocate and advise in the use of visual collateral that can best reach the target community

COMM 433 Corporate Communication (3 Credit Hours)
Pre-requisites: For GSCM-MS students, COMM 401; DMST-MC students may also enroll without pre-requisite
This course develops a multiple stakeholder approach to managing the communication function in corporations. Management topics include developing a communication plan, budgeting, creating a communications calendar, working with agencies and other external resources, project management and evaluation.
Outcomes:
At the end of the course, students are expected to understand how the communication function is organized in corporations and non-governmental organizations (NGOs)

COMM 434 Business-to-Business Communication (3 Credit Hours)
The robust business-to-business (B2B) sector provides enormous opportunity in the global marketplace. This course will explore B2B's unique set of challenges that strategic communicators need to consider in developing and delivering effective messages. Restricted to Global Strategic Communication Students.
Outcomes:
Students are expected to gain a working knowledge of the theories, concepts, and issues of in B2B communication

COMM 435 Public Affairs and Issues Management (3 Credit Hours)
The course explores how to predict and identify emerging issues, which can proliferate rapidly through digital and social media; accurately assess the potential threat posed by issues; and plan and implement effective response to prevent issues from growing into crises. Restricted to Global Strategic Communication Students.
Outcomes:
At the end of the course, students will understand the role of the public affairs function in organizations, know how to monitor for and identify emerging issues and to build a firewall to make organizations less vulnerable to attack

COMM 436 Social Media Crisis Communication (3 Credit Hours)
This course focuses on realistic social media issues and crisis cases and students' practices on how to respond to fast-paced information on multiple social media channels and to create effective responses. This course is custom-tailored for current and future PR managers, digital specialists, community managers, and others who need to have a high degree of public visibility and responsibility.
Outcomes:
Master crisis communication theories; Identify different types of crises; Successfully manage social media during a crisis; Develop key messages and identify and implement the preemptive and responsive strategies; Train yourself as a spokesperson

COMM 437 Advertising/PR Multimedia Commercial Production (3 Credit Hours)
This is an advanced video and advertising course designed to give students an introduction to various types of multimedia commercials as well as practical considerations of producing branded content and television spots, including for real clients. Only students in the BASD-ADPR, MC-DMST, and MS-GSCM programs can enroll. Build experience in effective multi-tasking and teamwork, gain skills with technology and strategy, creative, and application process of broadcast production, and practice engaging with the community in media development efforts.
Course equivalencies: COMM 337/COMM 437

COMM 438 Search & Display Advertising (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This course covers the enduring foundation of digital advertising --- Search Advertising and Display Advertising, which is a part of the bigger scope called programmatic advertising. Students will be exposed to 1) fundamental concepts in search and display advertising, 2) hands-on practices on creating both search and display advertising campaign, and 3) evaluation skills in optimizing search & display advertising campaigns. This course is mostly built upon Google's advertising products. However, the fundamental logics, once acquired, can be applied to all forms of paid ads in digital space.
Outcomes:
Knowledge of the key terms and development process of search & display advertising; Knowledge of the various factors that could influence the success of search & display campaigns; Ability to develop and implement search & display advertising campaigns; Ability to evaluate and optimize for search & display advertising campaigns; Analyze and interpret complex campaign data using industry-standard analytics tools to drive performance improvements; Integrate search and display advertising strategies with broader digital marketing efforts for cohesive brand messaging and improved customer journey mapping

COMM 439 Video Documentary (3 Credit Hours)
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods. Restricted to students in the DMST-MS program.
Course equivalencies: X-COMM339/439/ICVM339/IFMS339
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 441 Global Strategic Communication Capstone (3 Credit Hours)
Students will synthesize & apply knowledge and skills from previous courses to demonstrate competence in a specialized area of strategic communication of greatest interest to them. Students will submit a comprehensive work, research project, media artifact, business plan, or any other comparable work approved by the instructor. In addition, students will develop fully annotated & professional quality final presentation. Enrollment is restricted to students in the GSCM-MS Program. Students are expected to become more knowledgeable in an area of specialization by exploring a specific type of strategic communication, engaging in research, building relationships with professionals and developing creative applications to demonstrate professional-level knowledge, understanding of practices, skills & competencies.

COMM 444 Social Media Advertising (3 Credit Hours)
This course covers the latest theories and practices of social media advertising. Students will be exposed to 1) evolving concepts and theories related to social media advertising, 2) case studies that discuss the strategies of social media campaigns, and 3) hands-on practices of digital technologies to implement social media campaigns. Only students in the BASD-ADPR and MS-GSCM programs can enroll.
Course equivalencies: COMM 331/COMM 444
Outcomes:
Knowledge of theories relating to social media advertising, ability to create strategic plans on social media, skills for digital technologies in social media advertising campaigns, and understanding social media advertising ethics

COMM 445 AI in Advertising (3 Credit Hours)
Pre-requisites: COMM 211 or enrollment in the Global Strategic Communication (MS) program
This course explore what is AI, how it¿s been applied in various stages and aspects of advertising, and be creative in using artificial intelligent technologies to create better advertisement and consumer experiences.
Course equivalencies: X - COMM 335 / COMM 445
Outcomes:
Students will learn the fundamental of logics of AI technologies, and its implications in various aspects of advertising

COMM 448 Advanced Storytelling (3 Credit Hours)
Pre-requisites: Restricted to MC-DMST students only
This course enhances students' abilities to craft compelling non-fiction, longform narratives. Building on foundational storytelling skills, students learn advanced techniques of topic selection, story structure, and character development. The course emphasizes a self-directed approach, encouraging students to manage projects from initial ideation through completion. By the end of the course, students will have developed original content that reflects their personal interests and creativity.
Outcomes:
Produce a longform, non-fiction narrative that demonstrates advanced storytelling techniques, including effective topic selection and story structure; Create multi-dimensional characters that enhance the narrative and engage the audience, employing advanced character development strategies; Plan and execute a self-directed storytelling project from initial ideation through to completion, demonstrating effective project management skills; Articulate the creative process behind their original content, including the challenges faced and solutions implemented during project development; Evaluate and critique both their own work and that of peers, identifying strengths and areas for improvement in non-fiction storytelling techniques

COMM 449 Capstone Seminar (3 Credit Hours)
Pre-requisites: COMM 400
Capstone Seminar is designed to equip students with the necessary skills, knowledge, and strategies to successfully complete their culminating capstone project. This course focuses on project planning, development and execution. Students will develop a clear project proposal, enhance their research and critical thinking skills. Through workshops, peer feedback, and faculty guidance, students will develop their capstone project idea and establish timelines. By the end of this course, students will have a solid foundation to confidently begin their capstone project.
Outcomes:
Students will develop skills in project planning and time management, including setting timelines, defining objectives, and coordinating resources for their capstone project; Students will analyze and critique various forms of digital media, understanding their impact on audiences and the techniques used to create them; Students will conduct research relevant to their capstone project, utilizing academic and industry sources to inform their work; Students will understand and apply ethical principles in digital media production, including copyright, privacy, and representation; Students will complete a proposal or preliminary work that prepares them for successful execution of their capstone project; Students will engage in self-assessment and reflection on their learning experiences, identifying strengths and areas for improvement as they prepare for their capstone

COMM 450 Capstone II (3 Credit Hours)
Pre-requisites: COMM 400, 405, 410, 415, 420, 425, and 430
This course involves integration of new media tools and storytelling, culminating in a professional project that is conveyed to public audiences and widely distributed.

COMM 455 Animation (3 Credit Hours)
This course will focus on animation with specific emphasis on the creation, refinement, and publishing of a visual story. Students will learn 2D and 3D techniques, cameras, CGI and other software and equipment to create animated works. Only DMST-MC students may enroll. All pre-requisites are waived.
Course equivalencies: COMM 305/COMM 455
Outcomes:
Theories of visual and image-based storytelling; script writing; character development; storyboarding; creating visual stories from images; animation enhancement/manipulation; graphic design; and contemporary animation design options for visual storytelling/promotion

COMM 458 Newscasting and Producing (3 Credit Hours)
This is designed as a capstone course for the broadcast journalism emphasis. It covers all aspects of TV (or web) newscasts, including producing, anchoring, reporting, photography and editing, as well as studio production. The class produces and delivers newscasts, designed to prepare students for work in the TV news industry. Restricted to students in the DMST-MC program.
Course equivalencies: COMM 358/COMM 458

COMM 459 Advanced Post Production (3 Credit Hours)
This course combines advanced editing theory and practice, aimed at providing students with the skills required for editing motion pictures of all genres and for all platforms. Restricted to students in the DMST-MC program.
Course equivalencies: X-COMM359/459/IFMS359
Outcomes:
Students will learn how to edit for motion pictures of all forms

COMM 461 Health Communication (3 Credit Hours)
This course focuses on the growing field of health communication. Building on students' knowledge of public relations, advertising, communication and marketing, this class aims to help students develop an area of specialization that offers career opportunities in many settings. Through guest speakers and field trips, the class is designed to provide an overview of what health communicators do and where they work. Only MS-GSCM and ADPR BASD students may enroll.
Course equivalencies: COMM 311/COMM 461
Outcomes:
Provide a foundation of knowledge about the US healthcare system and acquaint students with how communications can play a vital role in accomplishing public health objectives

COMM 462 Health Literacy & Digital Technology (3 Credit Hours)
This course explores a deeper understanding of the potential of digital communication tools to improve health literacy and contribute to better health outcomes across the full spectrum of healthcare. This course prepares these students to enter a local health department, community organization, or government agency, and global health communication PR consultancy, which contributes to health communication research, patient counseling, materials design, and program management.
Outcomes:
Be skilled in analyzing, interpreting, and communicating complex health concepts across a wide range of media platforms, equipping them to effectively manage health communication in a digital landscape; Describe and assess the ecological factors that affect health literacy; Assess the potential for digital technologies to either bridge or deepen health inequities based on factors such as age, education, socio-economic status, and geographic location; Evaluate the role of digital health interventions in addressing health system deficiencies, particularly in underserved or remote areas, and understand the challenges related to infrastructure and accessibility; Monitor and evaluate the utilization and impact of digital health technologies across different social groups to ensure that the benefits of digital health are equitably distributed; Develop communication interventions that leverage digital technologies to improve health equity, ensuring that these innovations do not reinforce existing social and health inequities

COMM 463 Intermediate Advertising Design (3 Credit Hours)
Builds on the creative skills and understanding acquired in the introductory advertising creative courses to enhance students' conceptual abilities. Utilizing Adobe InDesign and Photoshop, students learn to design for various advertising formats including digital, print and for client presentations. Only students in the BASD-ADPR , MC-DMST, and MS-GSCM programs can enroll.
Course equivalencies: COMM 330/COMM 463
Outcomes:
The best work is finished on computers and reviewed by advertising professionals at the end of the semester

COMM 464 Mobile Advertising (3 Credit Hours)
Mobile is one of the most valued investments for advertisers. This course covers the latest practices and trends of mobile advertising which includes 1) branded mobile application design and development; 2) advanced mobile experiences with AR/VR experiments; and 3) various practices, tactics, and ethical concerns for native mobile advertising experiences. Only students in the BASD-ADPR, MC-DMST, and MS-GSCM programs can enroll.
Course equivalencies: COMM 334/COMM 464
Outcomes:
Knowledge of relevant human-computer interaction theories and branded mobile design/development; Ability to use digital tools to create mobile advertising campaigns; Understanding of importance and implications of ethics in mobile advertising

COMM 465 Advertising & Public Relations Research Methods (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This course empowers students with the essential skills to conduct and evaluate business research, a critical component of informed decision-making in today's dynamic market environment. Students will master a diverse array of research methodologies and techniques, learning to design and execute professional-grade projects, analyze complex market dynamics, and utilize both qualitative and quantitative methods. By the course's conclusion, participants will be adept at conducting rigorous, actionable research tailored to specific business objectives, as well as critically assessing the validity and applicability of existing studies. Through hands-on projects and interactive learning experiences, students will develop the analytical prowess to transform raw data into strategic assets, cultivating a research mindset that is indispensable for driving business growth, innovation, and evidence-based decision-making in the modern, data-driven business world.
Outcomes:
Understand market research basics and importance; Develop research objectives and questions; Distinguish research types: exploratory, descriptive, causal; Create research plans/proposals; Conduct secondary research effectively; Perform qualitative primary research (focus groups, observation, mystery shopping); Develop effective surveys; Apply proper sampling techniques; Implement various survey distribution methods; Organize data and perform statistical analysis; Communicate research results through appropriate reporting tools; Create comprehensive primary research reports

COMM 466 Advanced Quantitative Research Methods (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This course is students to get familiar with sophisticated statistical techniques and data analysis procedures in conducting academic research in the field of advertising. The course will cover topics such as experimental design, survey design, regression analysis, moderation analysis, mediation analysis, structural equation modeling, and longitudinal data analysis. Hands-on sessions using statistical software (e.g., SPSS) will be integral, allowing students to gain practical experience with real datasets. The course will culminate in a final project where students will apply learned methods to a research question of their choice, fostering skills in research design, data analysis, and scholarly communication.
Outcomes:
Understand and apply advanced statistical methods in research; Proficiently use statistical software for data analysis; Design and execute quantitative research studies; Interpret and critically evaluate quantitative research findings; Communicate research findings effectively through written and oral presentations; Develop a research project proposal using advanced quantitative methods

COMM 467 Advanced Digital Analytics (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This is an intense course designed for students who have a foundational understanding of digital data analysis and are looking to deepen their expertise. This course will explore the advanced techniques and tools used in the analysis of digital data, with a strong emphasis on SQL and its applications in digital analytics. The course integrates theoretical knowledge with practical skills, offering hands-on sessions where students will work with real data sets. Students will learn to extract, transform, and analyze data from various digital sources to make informed business decisions. The course culminates in a capstone project where students apply their skills to solve a real-world digital analytics problem.
Outcomes:
Demonstrate advanced understanding of digital data sources and structures; Proficiently use SQL for complex data queries and analysis; Apply statistical methods to analyze and interpret digital data; Integrate data from multiple sources for comprehensive analytics; Develop and execute a digital analytics project from conception to completion; Effectively communicate analytical findings to both technical and non-technical audiences

COMM 468 Consumer Psychology (3 Credit Hours)
This is a course designed for students who wants to explore the psychological principles and theories underlying consumer behavior, offering insights into how consumers think, feel, and make decisions. In a format of seminar discussion, students will be exposed to a blend of theoretical exploration and practical applications. They will also examine various aspects of consumer psychology to analyze real-world examples, and concludes with a project where students apply their understanding to a consumer behavior problem or opportunity.
Outcomes:
Understand key psychological theories relevant to consumer behavior; Analyze how consumer perception, motivation, and decision-making processes influence buying behavior; Apply consumer psychology principles to marketing and business strategies; Evaluate the impact of social and cultural factors on consumer behavior; Conduct research and analyze data to inform consumer psychology insights; Develop and present a comprehensive project that applies consumer psychology concepts to a real-world problem

COMM 469 Human-Computer Interaction in Persuasion (3 Credit Hours)
This is a course designed for students who wants to explore the vital role of human-computer interaction (HCI) in creating effective and engaging digital communication strategies. Students will learn to apply principles of design thinking, user interface (UI) and user experience (UX) system design, and human-centered design to advertising contexts. The course will also delve into the ethics of HCI in advertising and public relations, including considerations around user data and privacy. A unique aspect of the course is the focus on virtual agent design, examining how AI, in the forms of chatbots and bots can enhance advertising efforts and consumer experience.
Outcomes:
Understand the principles of HCI and their application in persuasion; Apply design thinking to create innovative solutions; Design effective UI and UX systems for digital communication campaigns; Implement human-centered design approaches in digital strategies; Recognize and address ethical considerations in HCI for diverse audiences; Develop skills in virtual agent design for persuasion purpose; Create and evaluate a comprehensive project that integrates HCI, UI/UX, and ethical considerations

COMM 470 Special Topics in Advertising & Public Relations (3 Credit Hours)
These are advanced courses in specialized AD/PR areas. Titles and content vary and prerequisites are established according to course content. May be repeated with different topics for a total of 9 credit hours, but only 6 may count toward the major. Restricted to students in the ADPR-BASD and GSCM-MS programs.
Course equivalencies: COMM 370/COMM 470

COMM 473 Digital Storytelling Abroad (3 Credit Hours)
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography and editing skills within another country and cultural context. Restricted to students in the DMST-MC program.
Course equivalencies: COMM 373/COMM 473

COMM 479 Digital Sustainability (3 Credit Hours)
Pre-requisites: DMST and SES grad students can enroll
Digital Sustainability explores the environmental impact of digital media. Mining precious metals to manufacture devices, burning fossil fuels to run data centers, global black market trading of e-waste are points where the digital world meets the physical world. Students will explore digital sustainability problems, and work toward creative solutions.
Course equivalencies: COMM 379 / COMM 479
Outcomes:
Learn about environmental issues stemming from digital media infrastructure; Critically evaluate different disciplinary perspectives to gain a broader understanding; Develop ethical reasoning regarding environmental impact resulting from digital media ecology

COMM 480 Project I (3 Credit Hours)
This first phase of the MS Advertising final project focuses on idea generation, research, and strategic planning. Students will choose between a data-driven research project or a production-focused advertising project, working closely with a supervisor to develop a comprehensive project proposal. For research-oriented projects, students will conduct a thorough literature review, identify research gaps, and formulate hypotheses or research questions. Those pursuing production projects will analyze market trends, extract consumer insights, and create a detailed creative brief for a real-world client. Both tracks emphasize critical thinking, strategic planning, and the development of a solid foundation for project execution. Through weekly meetings with supervisors and structured modules, students will refine their project concepts, ensuring they are well-prepared for the execution phase.
Outcomes:
Conduct comprehensive background research, including literature reviews or market analysis, to inform project direction; Formulate clear research questions, hypotheses, or creative briefs that guide the project's development; Develop a thorough project proposal, including objectives, methodologies, and expected outcomes; Demonstrate critical thinking in identifying research gaps or market opportunities; Apply ethical considerations in research design or advertising strategy development; Articulate complex ideas clearly in both written proposals and oral presentations

COMM 481 Project II (3 Credit Hours)
Building on the foundation laid in Phase 1, this course guides students through the execution, analysis, and presentation of their capstone projects. Students pursuing data-driven research will collect and analyze data, interpret findings, and prepare a comprehensive research paper. Those engaged in production projects will create tangible advertising materials based on their creative briefs, such as integrated campaigns, digital content, or other innovative advertising solutions. Both tracks emphasize practical application of skills, problem-solving, and the ability to adapt to challenges that arise during project execution. The course maintains a focus on weekly supervision meetings and structured modules to support students through data analysis or creative production, culminating in a final presentation of their completed projects. This phase prepares students to deliver high-quality, professional-grade work that demonstrates their readiness for advanced roles in the advertising industry or further academic pursuit.
Outcomes:
Execute the designed research methodology or creative strategy effectively; Analyze and interpret data or consumer insights to drive decision-making in research findings or creative execution; Create professional-quality deliverables, such as research papers or advertising materials, that meet industry or academic standards; Utilize technical skills relevant to their chosen project type, such as statistical analysis software or creative design tools; Manage a long-term project effectively, adhering to timelines and adapting to challenges as they arise; Demonstrate problem-solving skills in addressing unexpected challenges during project execution

COMM 491 Advertising/Public Relations Internship (3 Credit Hours)
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Restricted to students in the ADPR-BASD and GSCM-MS programs. Students must attend an internship orientation and submit application packet to instructor. If approved, student is enrolled in course.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 492 Multimedia Journalism Internship (3 Credit Hours)
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Restricted to students in the DMST-MC program.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 494 Film & Digital Media Internship (3 Credit Hours)
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting. Restricted to students in the DMST-MC program.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

COMM 498 Directed Study for Graduate Students (1-3 Credit Hours)
Students may sign up for a one to three credit hour course to work independently in the student's area of interest with a supervising faculty member whose expertise is in that area. Projects may include, but are not limited to: a reading course, where the student contracts to read and create an annotated bibliography of research materials, a writing course, where a student has developed a strong paper for a course and wants to refine it for possible conference presentation and/or publication. Restricted to students in the DMST-MC, ADPR-BASD, and GSCM-MS programs.

COMM 700 Certificate: Digital Media Ethics (0 Credit Hours)
Loyola's Center for Digital Ethics and Policy certificate course explores codes of ethics and ethical decision making, legal limits of online speech, strategies to spot and deal with fake content, intellectual property and user generated content, understanding privacy concerns, ethical issues with big data, the ethics of deception online, among other topics.
Outcomes:
Participants will be able to understand ethical issues that are most likely to come up in their particular professional contexts and be able to take this knowledge back to their organization to help guide policy and procedure

COMM 701 Organizational Leadership and Change Management (0 Credit Hours)
Loyola's School of Communication offers a new certificate course custom-tailored for managers who want to accelerate the pace of successful change in their organizations. This course combines online learning with a focused 3-day program at Loyola, plus personalized coaching afterward. Participants will be able to shape their learning around their organization's needs.
Outcomes:
This course will help managers who want to accelerate the pace of successful change in their organizations, leading change on the front lines and managers whose supervisors have identified them as emerging leaders

Computer Science (COMP)

Discover, search, courses (p. 2953)!

COMP 102 Web Design and Multimedia Publishing (3 Credit Hours)
This course introduces foundations of the world wide web technology, HTML, and multimedia publishing techniques. Topics include HTML syntax, CSS, XML, RSS, and various multimedia formats.
Outcomes:
An understanding of the technologies behind web sites and the ability to use them effectively

COMP 104 Computer Animation (3 Credit Hours)
The course introduces techniques for understanding and developing dynamic and interactive media by using sound, motion, images, and text. Relevant software knowledge areas are covered.
Outcomes:
Ability to publish created animated media projects to the web in a process that involves understanding human interface design

COMP 111 History of Computing (3 Credit Hours)
The social and organizational history of humanity is intricately entangled with the history of technology in general and the technology of information in particular. Advances in this area have often been closely involved in social and political transformations. While the contemporary period is often referred to by such names as the Computing and Information Age, this is the culmination of a series of historical transformations that have been centuries in the making. This course will provide a venue for students to learn about history through the evolution of number systems and arithmetic, calculating and computing machines, and advanced communication technology via the internet.
Course equivalencies: X - COMP 111 / HIST 279C

COMP 112 Loyola University Technology Ensemble (1 Credit Hour)
Loyola University Technology Ensemble (LUTE) is a performing ensemble with a composition & engineering component. Its primary instrumentation is electronic or electroacoustic, encompassing digital and analogue electronic instruments, live coding, circuit bending, and repurposing of devices or objects, etc. LUTE will appear in public at least once during each semester.
Course equivalencies: X-COMP 112/MUSC 112
Outcomes:
Collaborate to compose, engineer, and perform unique technology-driven musical experiences; design interface modules for electroacoustic performance; encode musical ideas in software or digital musical instruments; perform publicly

COMP 122 Introduction to Digital Music (3 Credit Hours)
Computers and digital tools have been seeping into the world of music, this course aims to explore this newly formed territory. This course is intended for students who wish to learn more about electronic music, signal processing, and algorithmic music composition.
Knowledge Area: Quantitative Knowledge
Course equivalencies: X-COMP 122/MUSC 122
Outcomes:
Understanding of the physics of musical sound and digital audio, facility with hands-on applications of algorithmic music composition and musicology, and ability to design and render digital instruments

COMP 125 Visual Information Processing (3 Credit Hours)
This course, intended primarily for non-majors, provides an introduction to computer programming using a language well-suited to beginning programmers and practical applications, e.g., Visual Basic.Net. Restricted to Freshman or Sophomore standing OR majors other than COMP-BS AND CSEC-BS AND SWEN-BS.
Knowledge Area: Quantitative Knowledge
Outcomes:
Understanding of computer mechanisms for representing and analyzing numerical and logical information and the power of programmability; practical ability to implement useful computing tools

COMP 141 Introduction to Computing Tools and Techniques (3 Credit Hours)
This course introduces students to the Unix shell environment and essential tools for succeeding in computer science degrees. Students who complete this course will develop fluency in the Unix (Linux) environment, which is essential for solving problems in academic, research, and professional computing disciplines.

COMP 144 Cybersecurity for All (3 Credit Hours)
This course will cover cybersecurity fundamentals, including how to think like an adversary, general awareness of cybersecurity and privacy, and cybercrime. This course is intended for any student who wants to know more about general cybersecurity and privacy issues in the "cyber" world.
Outcomes:
Ability to quantitatively and qualitatively assess cybersecurity and privacy risks, and understanding fundamentals of protecting security and privacy in a cyberworld and connections to cybercrime and other real-life scenarios

COMP 150 Introduction to Computing (3 Credit Hours)
The world overflows with electronic data. This course introduces programming in a simple, powerful language like Python, with selection, repetition, functions, graphical effects, and dynamic interaction with the Internet, plus connections to lower level computer organization and computer implications in the wider world. Restricted to Freshman or Sophomore standing OR majors other than COMP-BS AND CSEC-BS AND SWEN-BS.
Knowledge Area: Quantitative Knowledge
Course equivalencies: ACCOMP 150/COMP 150
Outcomes:
Empowerment to manage and transform masses of data; understanding of technical, societal, and ethical issues involved

COMP 163 Discrete Structures (3 Credit Hours)
Pre-requisites: MATH 110 or MATH 117 or placement into MATH 118 or higher
This course covers the mathematical foundations of computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Course equivalencies: COMP211/COMP163
Outcomes:
The student will be prepared for the study of advanced ideas in computer science, from cryptography to databases to algorithms to computer architecture

COMP 170 Introduction to Object-Oriented Programming (3 Credit Hours)
Pre-requisites: MATH 110 or MATH 118 or Placement into a higher MATH course, or COMP 125 or COMP 141 or COMP 150 or COMP 180 or permission or SCPS student; Prior experience with a procedural programming language is sufficient to obtain permission to enroll
This programming intensive course with its weekly lab component introduces basic concepts of object-oriented programming in a language such as Java.
Interdisciplinary Option: Bioinformatics
Course equivalencies: COMP170/ISOM/INFS370
Outcomes:
Ability to take a problem, break it into parts, specify algorithms, and express a solution in terms of variables, data types, input/output, repetition, choice, arrays, subprograms, classes, and objects; Ability to judge a good program

COMP 171 Scripting Languages (1 Credit Hour)
Scripting languages are rapid prototyping languages that are used extensively. This course covers the principles, syntax and semantics of widely used scripting languages.
Outcomes:
Students will learn how a program can be put together quickly and efficiently to solve problems

COMP 180 Computing and Data Analysis for the Sciences (3 Credit Hours)
Pre-requisites: MATH 110 or MATH 117 (or any higher MATH course such as 118, 131, 132, 161, 162) with grade of at least C- or placement into MATH 118
Scientific computing emphasizes data analysis and visualization in a scientific context - analyzing data quickly for understanding by the individual, sharing automated workflows with collaborators, and preparing results for later publication. This course will emphasize rapid, interactive, and reproducible collaborative analysis of data for scientific contribution.
Interdisciplinary Option: Neuroscience
Outcomes:
At the end of this course, students will be well versed in the use of a specific, interactive environment for data analysis (likely Python, R, or MATLAB as indicated in the course notes) for analyzing data and sharing results

COMP 215 Object Oriented Programming with Mathematics (3 Credit Hours)
Pre-requisites: MATH 132 or MATH 162 or MATH 162A
This is an introductory programming course for students interested in mathematics and scientific computing. Students will program primarily in a general object-oriented language such as Python, with supplementary exercises in a computer algebra system. Examples will be drawn primarily from applications of calculus, elementary number theory, and cryptography.
Course equivalencies: X-COMP215/MATH215
Outcomes:
Students will learn basic scripting and object-oriented programming, with the goal of being able to solve mathematical and scientific problems

COMP 231 Data Structures & Algorithms for Informatics (3 Credit Hours)
Pre-requisites: (MATH/COMP 215 OR COMP 170) AND (COMP 141 OR AMTH-BS OR MATH-BS) Advisory: MATH/COMP 215 preferred
This course introduces data structures and algorithms that are essential for data science and informatics. Here we will focus on identifying the right method for storing data and using the most efficient algorithm for analysis. A subset of data structures and algorithms fundamental to computer science will be covered.
Outcomes:
Students will learn fundamental data structures and algorithms frequently used in informatics and data science; Students will be able to apply this knowledge for data analysis

COMP 250 Introduction to Scientific and Technical Communication (3 Credit Hours)
Pre-requisites: A minimum grade of C- in COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215
This course trains students in writing clear, readable, and well-organized technical communications, including presentations, end-user documentation, internal project documentation, and scientific papers.
Outcomes:
Students will learn to write clear technical documentation

COMP 251 Introduction to Database Systems (3 Credit Hours)
Pre-requisites: COMP 125 or COMP 150 or COMP 170 or COMP 180 or COMP/MATH 215
This course explores ways in which data collections are organized, stored, analyzed, and manipulated. Topics include relational databases, the SQL query language, and the basics of XML and web interfaces to data sets. Applications from a variety of domains illustrate the course's key concepts.
Course equivalencies: COMP 251 / COMP 368
Outcomes:
Students will organize data in ways to emphasize relationships, write simple programs to process, visualize and graphically display data, mine data for patterns, and design web interfaces to data

COMP 264 Introduction to Computer Systems (3 Credit Hours)
Pre-requisites: COMP 141 and (COMP 170 or MATH/COMP 215) and (coreq or prereq of COMP 163 or MATH 201); COMP 163 coreq or prereq and COMP 170 prereq preferred
This course studies the hierarchy of abstractions and implementations that constitute a modern computer system, with a particular focus on issues of interest to programmers, typically including some systems programming instruction.
Outcomes:
Understanding of system issues that affect the performance, correctness, or utility of user-level programs

COMP 266 Digital Electronics Lab (3 Credit Hours)
Combinatorial and sequential logic devices, oscillators and timers, microprocessor components, CPU operation, computer architecture and digital/analog conversion.
Course equivalencies: X-PHYS266/COMP266
Outcomes:
Students will gain a working knowledge of digital electronics design and its application to computers, an understanding of CPU design and operation and the ability to document and report experimental results

COMP 271 Data Structures I (3 Credit Hours)
Pre-requisites: COMP 141 and COMP 170 and (co-requisite or pre-requisite of COMP 163 (preferred) or MATH 201); For Bioinformatics majors, pre-requisite of COMP 141 and COMP 170; For SCPS students, pre-requisite of COMP 170
This course studies basic data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations, study of recursion, applications of data structures, and simple analysis of algorithms are covered.
Outcomes:
Students learn linear data structures and the performance of their operations, and they learn to solve simple computational problems by designing suitable algorithms and efficient data structures

COMP 272 Data Structures II (3 Credit Hours)
Pre-requisites: COMP 271 and (COMP 163 or MATH 201) and (MATH 131 or MATH 161)
This course studies advanced abstract data types, such as sets, maps, and graphs, and their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also studies the performance of the data structures built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students learn non-linear data structures and runtime performance of their operations, solve computational problems by choosing suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 301 Introduction to Computer Security (3 Credit Hours)
Pre-requisites: COMP 170
This is an introductory course on computer security covering a broad range of topics, including basic security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The course teaches both the principles and concepts of computer security as well as some of the tools and technologies. Students will learn to think like an adversary, find and exploit vulnerabilities in computer and network systems, understand cryptography and security goals, and learn about some of the commonly-used tools.

COMP 305 Database Administration (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 251 or COMP 271
Business and scientific institutions increasingly use large commercial data base systems. This course teaches the theory and practice for the definition, security, backup, tuning, and recovery of these systems.
Outcomes:
Students will be able to use theory and pragmatic approaches to define and implement realistic solutions for large database administration environments

COMP 306 Data Mining (3 Credit Hours)
Pre-requisites: (COMP 251 or COMP 353) and (STAT 103 or STAT 203 or STAT 335 or ISSCM 241 or PSYC 304 or instructor permission) and (COMP 150 or COMP 170)
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 309 Numerical Methods (3 Credit Hours)
Pre-requisites: (COMP 170 or MATH/COMP 215), and [(MATH 212, and MATH 264) or MATH 266]
This course offers an introduction to topics such as error analysis, interpolation and approximation, and the numerical solution of problems involving differentiation, integration, and ordinary and partial differential equations. Students will obtain an understanding of how numerical methods can be used in a variety of areas of mathematics.
Course equivalencies: X-COMP309/MATH309

COMP 310 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 271
This course introduces principles of operating systems and how they are designed. Various important parts of operating systems such as memory addressing, file structures, processes, and threads are covered.
Outcomes:
Students will learn the different parts of an operating system at a functional level and how they interact with each other

COMP 312 Open Source Software Practicum (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271 or instructor permission
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn to implement projects involving Free and Open Source software and learn how to participate in open-source projects effectively

COMP 313 Object-Oriented Design (3 Credit Hours)
Pre-requisites: COMP 272
Object-orientation continues to be a dominant approach to software development. This intermediate programming-intensive course studies the use of classes and objects with an emphasis on collaboration among objects.
Outcomes:
A thorough understanding of the principles of object-orientation: abstraction, delegation, inheritance, and polymorphism; exposure to basic design patterns; programming experience in mainstream object-oriented languages such as C++ and Java

COMP 314 Problem Solving Strategies I (1 Credit Hour)
Pre-requisites: COMP 271
Corequisite or This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week.
Course equivalencies: COMP281/COMP314
Outcomes:
Ability to work in small groups, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge

COMP 315 Problem Solving Strategies II (2 Credit Hours)
Pre-requisites: COMP 314
This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week.
Outcomes:
Ability to lead a small group, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge

COMP 317 Social, Legal, and Ethical Issues in Computing (3 Credit Hours)
Pre-requisites: Any COMP course and Ethics Core
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 319 Introduction to UNIX (1 Credit Hour)
Pre-requisites: COMP 170 and COMP/MATH 215
An introduction to the UNIX operating system. Topics include files and directories, electronic mail, security, advanced file systems, network utilities, network file sharing, text utilities, shell programming, UNIX internals, UNIX system administration (essentials), the X windowing system, systems programming, and secure shell (SSH).
Course equivalencies: COMP219/COMP319
Outcomes:
After taking this course, students will develop working knowledge of Unix and be able to use modern Unix operating systems such as Linux, OS X, or Solaris

COMP 321 Computational Aspects of Modeling and Simulation (3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335
This course uses SAS and R languages to address statistical modelling and to conduct statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs.
Course equivalencies: X-STAT356/COMP321/STAT321
Outcomes:
Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or intractable

COMP 322 Software Development for Wireless and Mobile Devices (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
This course will focus on the unique challenges, methods, tools, and technologies for developing software applications for wireless and mobile devices, smart mobile phones, and the growing world of mobile connected devices.
Outcomes:
1) Understand challenges of software design for resource limited devices; 2) Know the architecture of one or more state-of-the-art mobile operating systems; 3) Gain experience designing, developing, testing embedded software

COMP 323 Game Design and Development (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
This course studies design, development, and publication of games and game-based applications. This includes example games and designers, industry practices, and team-based project development.
Outcomes:
Students will acquire an awareness of different game design and development methods, technologies, and techniques suitable for the development of a variety of game based environments

COMP 324 Client-Side Web Development (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
This course covers the design and implementation of the presentation layer of dynamic web applications. Topics include visual design and usability, multi-channel and multi-modal applications, markup of static and dynamic content, and client-side executable content. HTML/CSS/JavaScript are introduced quickly, followed up with the stack of current JavaScript frameworks and libraries used in practice.
Outcomes:
Familiarity with the most common effective tools for creating responsive, dynamic, and interactive web content with client-side tools

COMP 325 Rapid Application Development Methodology (3 Credit Hours)
Pre-requisites: COMP 271 with a grade of C- or above
This course will teach students how to effect rapid application development using a software framework such as the .NET Framework. Particular emphasis will be placed on enhancing object-oriented programming skills using a language such as C#.NET.
Outcomes:
Students will gain enhanced skill in object-oriented programming and development of such applications as database applications, web applications, Microsoft .NET services, Silverlight applications, and WCF Services

COMP 326 Digital Music Programming (3 Credit Hours)
Pre-requisites: One of: COMP/MUSC 122, MUSC 201, COMP 125, COMP 150, COMP 170, permission of instructor
This course is an exploration of coding for music applications. Topics include digital audio and synthesis theory and basic, musical data structures, and principles of computer music composition and interactivity. Students will design synthesis and sampling instruments, algorithmic music generators, signal processors, and interactive control systems using one or more music programming languages.
Course equivalencies: X-COMP 326/MUSC 326
Outcomes:
Create software modules for processing digital audio, MIDI, and generative music; develop interactive interfaces; export applications or modules; produce a portfolio of creative projects in areas of real-time audio/MIDI processing

COMP 328 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, and other cyclic codes with algebraic structure and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-MATH328/COMP328

COMP 329 Natural Language Processing (3 Credit Hours)
Pre-requisites: (COMP 231 or COMP 271) and (MATH 131 or MATH 161) and (STAT 103 or STAT 203 or STAT 335 or ISSCM 241 or PSYC 304 or instructor permission)
This course provides an introduction to the field of natural language processing (NLP). NLP is concerned with computational approaches to analyzing, generating, and understanding human language. This course will introduce the students to the problems, methods, and applications of NLP.
Outcomes:
Students will become familiar with such areas of natural language processing as information retrieval, sentiment analysis, machine translation, document classification, and question answering

COMP 330 Software Engineering (3 Credit Hours)
Pre-requisites: COMP 271
Students learn real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 331 Mathematical Foundations of Cryptography (3 Credit Hours)
Pre-requisites: Theoretical Foundations: MATH 201 or COMP 363; Programming Foundations: COMP125 or COMP150 or COMP170 or COMP 180 or COMP/MATH 215
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP331/MATH331
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 332 Requirements Engineering (3 Credit Hours)
Pre-requisites: COMP 330
This course aims to equip students with techniques for successful requirements analysis and requirements engineering (RE) of software-intensive systems. Students will learn a systematic process of developing requirements through co-operative problem analysis, representation, and validation.
Outcomes:
Students will learn and apply the current state of the art in requirements engineering and a systematic method for engineering high-quality requirements on realistic large-scale projects

COMP 333 Web Services Programming (3 Credit Hours)
Pre-requisites: COMP 313 Outcomes: An understanding of the design space of software architecture; Proficiency in designing, implementing, deploying and composing systems from web services
Web services are building blocks for enterprise applications that use open data exchange standards and transport protocols to exchange data with calling clients. This course studies the architectures, frameworks, and tools required to develop and compose web services and clients, as well as integrate service-oriented systems with legacy systems.

COMP 335 Formal Methods in Software Engineering (3 Credit Hours)
Pre-requisites: COMP 272
As embedded and networked systems are becoming ever more ubiquitous, we depend increasingly on the correctness of the software that controls such systems. This course studies the formal specification, verification, and synthesis of software.
Outcomes:
An understanding of the role of formal methods in the construction of software systems; proficiency in representative methods and tools, such as UML and ESC

COMP 336 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 337 Concurrent Programming (3 Credit Hours)
Pre-requisites: COMP 313
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 338 Server-based Software Development (3 Credit Hours)
Pre-requisites: COMP 313
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 339 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 313 or COMP 363 or COMP 310
This course covers topics in modern distributed systems. This course places special emphasis on scalability (performance), reliability/fault tolerance, and security.
Outcomes:
After taking this course, students should understand the essential ingredients of distributed systems and how to build distributed systems that are resilient to transient network failures and other potential anomalies

COMP 340 Computer Forensics (3 Credit Hours)
Pre-requisites: (COMP 150 or COMP 170 or COMP/MATH 215) and (COMP 264 or COMP 317 or COMP 343)
The course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 341 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
Limitations in human-computer interaction are as much due to human factors, cognitive limits, expectations, motivations, and inertia as technological capabilities. Systematic methods will be used to evaluate and improve designs through both qualitative feedback and statistical, hypothesis-driven testing on web pages, GUIs, mobile apps and many non-traditional interfaces.
Outcomes:
Students will be exposed to a wide array of non-traditional computing interfaces, and be able to evaluate, design and develop better human-computer interfaces using research-based, systematic approaches

COMP 342 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: COMP 170
An introduction to webpage development using JavaScript, jQuery and associated client-side tools.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Students will be able to create webpages using JavaScript and related tools and protocols, and interface a webpage with a database

COMP 343 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 264 or COMP 271 or instructor permission
This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. Some programming may be required.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 344 Hands-on Approach to Security & Privacy (3 Credit Hours)
Pre-requisites: COMP 301
This course will introduce students to privacy, cybersecurity competitions, and how computers can be compromised and secured. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate knowledge and competency in the cybersecurity and privacy fields by participating in competitions, capture the flag, cybersecurity challenges, cybersecurity certifications, and other cybersecurity events/activities; Students will apply what they know in a realistic professional setting, usually working in a team

COMP 345 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 301
It introduces the Internet of Things (IoT) comprising embedded devices and cloud-based resources. The course studies concepts and techniques used in designing and implementing IoT systems providing valuable functionality to consumers and valuable data to organizations. The course discusses methods for addressing related safety, security, reliability, and privacy concerns.
Outcomes:
Ability to design and implement secure software and establish safety, security, reliability, and privacy goals for embedded and IoT-based systems; Ability to visualize and analyze data from an IoT system

COMP 346 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 264 or COMP 271
This course introduces the fundamental concepts of telecommunication networks, including requirements of voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system.
Outcomes:
Students will understand how modern telephone systems work

COMP 347 Intrusion Detection and Security (3 Credit Hours)
Pre-requisites: COMP 301
This course covers techniques and algorithms for detecting unusual usage patterns that typically signal a break-in, including techniques for detecting evasive or stealthy attacks. Also covered are differences in detecting local versus network intruders. Additional topics: computer viruses, computer security management, computer forensics.
Outcomes:
Students will learn to configure ID systems (eg SNORT) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 348 Network Security (3 Credit Hours)
Pre-requisites: COMP 301
This course involves a discussion of network security through the following areas which lead to an overall security posture: Security Frameworks, Implementation Security, System Best Practices, a Case for Centralized Configuration Management, Network Security Architecture, Standards Adherence, Risk Assessments, Testing and Review and Application Security.
Outcomes:
An understanding of how to secure networks using encryption, authentication, perimeter protection, restricted access policies, intrusion detection/prevention and other security frameworks

COMP 349 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 301 Outcomes: Students will gain an understanding of wireless networking, protocols, and standards and security issues
This course will explore the wireless standards, authentication issues, and common configuration models for commercial versus institutional installations and analyze the security concerns associated with this ad-hoc method of networking.

COMP 351 Network Management (3 Credit Hours)
Pre-requisites: COMP 264 or COMP 271
This course introduces the current state of the art in automated management of computer networks, including protocols such as SNMP and its attendant naming conventions, network management systems, and important issues in administrative network configuration.
Outcomes:
Students will become familiar with the SNMP protocol, with how large-scale Network Management Systems operate and are configured, and with advanced network configuration

COMP 352 Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 301
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities at the machine-code level and how they can be leveraged into an attack; Run a virus in a virtual-machine sandbox with appropriate monitoring

COMP 353 Database Programming (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 251 or COMP 271
This course introduces relational and object databases to support database creation and application development. Use of commercial database products will give a practical orientation.
Course equivalencies: COMP353/BIOI353
Outcomes:
Students will learn SQL, database design and application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 358 Big Data Analytics (3 Credit Hours)
Pre-requisites: ((Database experience: COMP 251 OR COMP 305 OR COMP 353) AND (Analytics experience: COMP 306 OR COMP 379 OR STAT 338 OR STAT 308)) OR permission of instructor
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 362 Computer Architecture (3 Credit Hours)
This course covers computer design from the level of digital logic and circuit design to high-level computer organization.
Course equivalencies: COMP 260 / COMP 275 / COMP 362
Outcomes:
A basic understanding of how computers work at many levels and how to use various analytical tools and techniques to design computer components

COMP 363 Design and Analysis Computer Algorithms (3 Credit Hours)
Pre-requisites: COMP 272 and (MATH 132 or MATH 162)
Theoretical design and analysis of computer algorithms may be supplemented by small amounts of programming.
Interdisciplinary Option: Bioinformatics
Course equivalencies: X-COMP363/BIOI363
Outcomes:
The ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 364 High Performance Computing (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 272 Outcomes: Students will learn how to engineer solutions to practical problems in multiprocessor architectures and using large physical memories
This course covers parallel architectures and parallel models of computation. Algorithms for achieving high performance in various computational contexts are discussed. Models such as shared memory, message passing, and hybrid modes of computing are introduced.

COMP 366 Microcomputer Design & Interfacing (3 Credit Hours)
Pre-requisites: COMP 271 Outcomes: Students will gain a working knowledge of interfacing techniques and design, hands-on experience with professional interfacing hardware and software, and the ability to document and report experimental results
This course covers computer architecture, CPU logic, data acquisition, signal conditioning, analog/digital conversion and computer interfacing.
Course equivalencies: X-PHYS366/COMP366

COMP 367 Robotics Software Development (3 Credit Hours)
Pre-requisites: COMP 271; COMP 313 recommended
This course is an introduction to robotics and robotic software development using humanoid robots. The course will use modern robot platforms and provide hands on experience with robotic sensor systems, motion and navigation, robot behavior planning and implementation.
Outcomes:
Students will explore the history of robotics, overview the theory of autonomous robotic systems, and develop complete robot projects

COMP 369 Product Invention and 3D Printing (3 Credit Hours)
This course explores the role of products in the economy and how things are made, including: product conceptualization and design, physical design vs. design of things that are not physical, rapid prototyping, 3D printing, 2D conceptualization and sketching, 3D modeling, and design reviews.
Outcomes:
Students will be able to visualize ideas via sketching basic shapes, create 3D models using 3D modeling software, use a 3D Printer, and give constructive feedback in peer review sessions

COMP 370 Software Quality (3 Credit Hours)
Pre-requisites: COMP 330
The course teaches software testing and quality control concepts, principles, and techniques including black box and white box testing, coverage testing, test case development, and regression testing.
Outcomes:
Students will learn how to prevent errors, how to get 'bugs' out of software, and be able to apply this knowledge in other courses and projects

COMP 371 Programming Languages (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 272
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.
Outcomes:
An understanding of key principles and paradigms underlying the design and implementation of commonly used programming languages; exposure to formal mechanisms for describing language syntax and semantics; programming experience in several representative languages

COMP 373 Advanced Object-Oriented Programming (3 Credit Hours)
Pre-requisites: COMP 313 Outcomes: Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.

COMP 376 Formal Languages & Automata (3 Credit Hours)
Pre-requisites: COMP 163 or MATH 201 or MATH 212 or MATH 266
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP376/MATH376
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 377 IT Project Management (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 251 or COMP 271
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure and responsibilities, a written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 378 Artificial Intelligence (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
This course introduces artificial intelligence theory and programming.
Outcomes:
Student will learn basic theory of artificial intelligence and be able to build small applications based on it

COMP 379 Machine Learning (3 Credit Hours)
Pre-requisites: (COMP 231 or COMP 271) and (MATH 131 or MATH 161) and (STAT 103 or STAT 203 or ISSCM 241 or STAT 335 or PSYC 304 or instructor permission)
Machine learning is the process of making predictions and decisions from data without being explicitly programmed. Topics include a variety of supervised learning methods. Ensemble approaches are used to combine independent models efficiently. Unsupervised and semi-supervised methods demonstrate the power of learning from data without an explicit training goal.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 380 Computer Graphics (3 Credit Hours)
Pre-requisites: COMP 271
This course introduces modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 381 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Interdisciplinary Option: Bioinformatics
Course equivalencies: X-BIOL388/COMP381/BIOI388
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

COMP 382 Compiler Construction (3 Credit Hours)
Pre-requisites: COMP 264 and 272
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn how a compiler is built

COMP 383 Computational Biology (4 Credit Hours)
Pre-requisites: (COMP 231 or COMP 271) and COMP 381 (Equivalencies: BIOI/BIOL 388)
This course presents an algorithmic focus to problems in computational biology. It is built on earlier courses on algorithms and bioinformatics. Problems and solutions covered in this course include gene hunting, sequence comparison, multiple alignment, gene prediction, trees and sequences, databases, and rapid sequence analysis.
Interdisciplinary Option: Bioinformatics
Course equivalencies: COMP383/BIOI383
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 386 Methods in Computational Neuroscience (3 Credit Hours)
Pre-requisites: NEUR 101; (MATH 131 or MATH 161); and (COMP 150, COMP 170, COMP 180, or DSCI 101) This course introduces the methods necessary to work with computational models of neural processing in the brain
These methods include differential equations for neuroscience, Simulink programming, linear algebra for neural networks, MATLAB coding, and probability theory for neuroscience. For each method, classes will include lectures, and computer exercises or illustrations.
Interdisciplinary Option: Neuroscience
Course equivalencies: X - COMP 386/PSYC 383
Outcomes:
Appreciation of the mathematical and computational techniques used to understand the brain, specially differential equations to model neurons, linear algebra used for neural networks, and probability theory capturing brain performance

COMP 387 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 379 or STAT 338 or STAT 308 This course covers key concepts of neural network algorithms as well as their applications in computer vision and natural language processing
The topics will include popular building blocks of neural networks including fully-connected, convolutional, recurrent, attention, and transformer layers.
Outcomes:
Learn how to build and analyze popular modern neural network architectures; Learn how to design, build, and evaluate their models in the context of practical applications related to fields such as computer vision and natural language processing

COMP 388 Topics in Computer Science (1-6 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 389 Computational Modeling of the Brain (3 Credit Hours)
Pre-requisites: PSYC 383/COMP 386 or instructor permission This course uses a mix of lectures and computer labs to introduce computational models of the neural processing in the brain
These models capture single neurons and synapses, biological neural networks, and high-level computational theory. Each class will cover the models with lectures and computer labs, the latter using MATLAB and Simulink.
Interdisciplinary Option: Neuroscience
Course equivalencies: X - COMP 389/PSYC 384
Outcomes:
Appreciation that brain function cannot be understood without proper mathematical and computational frameworks, and ability to apply these frameworks adeptly in the various domains of neuroscience from neurons to cognition

COMP 390 Broadening Participation in STEM (Computing, Math & Science) (1-3 Credit Hours)
Students will learn about underrepresentation of various population groups in STEM fields (science, technology, engineering, mathematics), as well as some of the reasons and negative effects of this situation. They will learn about techniques and educational materials for ameliorating this situation and will engage in relevant service learning activities.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain first-hand experience with broadening STEM participation and seeing how they can make a difference in the lives of other students and contribute to national needs

COMP 391 Internship in Computer Science (1-6 Credit Hours)
Students work outside the classroom applying and extending their computer science skills, typically for at least 150 hours for 3 credits. A memorandum of understanding is required between a student, his or her employer, and the Undergraduate Program Director, followed by final reports from the student and the employer.
This course satisfies the Engaged Learning requirement.
Outcomes:
Application of classroom skills to real-world situations

COMP 392 Metagenomics (3 Credit Hours)
Pre-requisites: BIOL 282
Exploration of next-generation sequencing technologies for assessing microbial diversity in ecological niches.
Interdisciplinary Option: Bioinformatics
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-COMP 384/BIOL 392/COMP 392
Outcomes:
Students will gain hands-on experience with metagenomic methodologies while working in an interdisciplinary, collaborative setting

COMP 395 Professional Development & Career Growth in CompSci/IT (1 Credit Hour)
Pre-requisites: Sophomore standing and any COMP course
This course is designed specifically for students pursuing a degree in computing-related fields, for example, Computer Science, Information Technology, Software Engineering, and Cybersecurity. They will learn about ways to develop themselves professionally, communicate their strengths, expand their contacts, and advance their careers. Students should acquire skills to professionally brand themselves, successfully network in technical circles, perform an effective job/internship search, and conduct themselves well in interviews.

COMP 397 Research Methods in Computer Science (1 Credit Hour)
Supplements CS Seminar by targeting students directly engaging in research and facilitating contributions in ongoing projects. Progress in outside projects tracked through milestones such as abstracts, small fellowship-style proposals, informal updates, and outcome-oriented goal setting. Emphasizes creating lasting impacts through establishing project continuity and presenting posters, papers, and slide shows.
Outcomes:
Regular progress on research projects and final presentations of results for demonstration to department faculty and students, and potential use at professional conferences

COMP 398 Independent Study (1-6 Credit Hours)
The student and a sponsoring faculty member will determine an advanced topic for the student to work on.
This course satisfies the Engaged Learning requirement.
Outcomes:
Knowledge of an advanced topic

COMP 399 Computer Science Seminar (1 Credit Hour)
The department seminar is designed to bring together students interested in understanding and engaging in extracurricular applications of computer science, with a focus on ongoing research. Speakers will include department faculty, research students, and invited outside speakers. Students will be asked to read relevant literature and participate in discussions.
Course equivalencies: COMP 399H / COMP 399
Outcomes:
Students will be exposed to a wide range of topics in computer science, participate in discussions, and provide feedback to assess their general understanding of the presented material

COMP 400A Object-Oriented Programming (3 Credit Hours)
This programming intensive course with its weekly lab component provides an exploration in problem solving for graduate-level courses, using object-oriented programming in a language such as Java.
Outcomes:
To analyze and decompose problems, specify algorithms, and construct solutions by synthesizing classes, objects and other components of object

COMP 400B Data Structures I (3 Credit Hours)
Pre-requisites: COMP 400A
This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.
Outcomes:
Students describe linear data structures and analyze the performance of their operations

COMP 400C Data Structures II (3 Credit Hours)
Pre-requisites: COMP 400B and COMP 400D
This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 400D Computing Tools and Techniques (1 Credit Hour)
This course introduces students to the Unix shell environment and essential tools.
Outcomes:
Students who complete this course will develop fluency in the Unix (Linux) environment

COMP 400E Discrete Structures (3 Credit Hours)
This course provides the mathematical foundations for graduate-level study in computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Outcomes:
To analyze properties of functions, relations, graphs, trees, paths; evaluate Boolean Expressions; apply induction towards proving correctness of algorithm and classifying resource usage; synthesize finite-state machines and logic circuits

COMP 401 Computer Security (3 Credit Hours)
Pre-requisites: COMP 400A or instructor permission
This is a foundations course on computer security, covering a comprehensive range of concepts and technologies, including security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The final project requires a presentation and technical report where the students will show and describe what they accomplished.
Outcomes:
Students will find and exploit vulnerabilities in computer and network systems; articulate cryptography and security goals, and synthesize the knowledge of different tools and techniques by applying them to an intensive real-world project

COMP 403 Operations Management (3 Credit Hours)
Pre-requisites: COMP 400A
Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support.
Outcomes:
Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making

COMP 404 Organizational Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course focuses on the manager's role in leading Organization Development and Change to maximize organization and individual effectiveness with a focus on Information Technology. The class explores Organization Development and Change theory, change practices, and discusses considerations a manager will face as a change agent in today's computing ecosystem.
Outcomes:
To understand the dynamics of change in organizations; learn techniques and strategies in managing change; develop skills that will enable a change agent mentality within the context of IT leadership

COMP 405 Database Administration (3 Credit Hours)
Pre-requisites: COMP 400B
Knowledge of the configuration and management skills needed for successful administration of a database server. The database administrator manages hardware, backup, security, tables and indexes, performance monitoring, query performance and optimization, and transaction performance. This course takes a user through the stages of maximizing the performance of a database server.
Outcomes:
Students will learn how to manage database performance, including topics such as the query optimizer, SQL EXPLAIN, table statistics, concurrency and transaction isolation levels, and security

COMP 406 Data Mining (3 Credit Hours)
Pre-requisites: COMP 400B
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP/MATH 215), MATH 212, and MATH 264
An introduction to advanced numerical analysis. Introduction to error analysis, numerical solution of equations, interpolation and approximation, numerical differentiation and integration, matrices, and solution of systems of equations, numerical solution of ordinary and partial differential equations.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will have an understanding of advanced numerical analysis and its applications

COMP 410 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 271 and COMP 264
The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes.
Outcomes:
Students will learn important topics in advanced operating systems and be able to make presentations on the topics

COMP 412 Open Source Computing (3 Credit Hours)
Pre-requisites: COMP 400B
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Outcomes:
Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively

COMP 413 Intermediate Object-Oriented Development (3 Credit Hours)
Pre-requisites: COMP 400B
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Outcomes:
Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development

COMP 417 Social and Ethical Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 418 Combinatorial Mathematics (3 Credit Hours)
Pre-requisites: MATH 313 or COMP 163
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Course equivalencies: X-COMP418/MATH418
Outcomes:
Students will learn mathematical techniques in discrete mathematics and applied combinatorics

COMP 420 Software Systems Analysis (3 Credit Hours)
Pre-requisites: COMP 400B or instructor permission
This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design.
Outcomes:
Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation

COMP 421 Math Models & Simulation (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
This course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered.
Course equivalencies: X-COMP421/MATH421/STAT421
Outcomes:
Student will learn foundations of discrete event simulation

COMP 422 Software Development for Wireless and Mobile Devices (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcomes:
Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming

COMP 424 Client-Side Web Design (3 Credit Hours)
Pre-requisites: COMP 400B
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.
Outcomes:
Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems

COMP 425 Rapid Applications Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.
Outcomes:
Students will create database applications and web applications using server-side technologies

COMP 428 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or Permission
In this course, major types of error-correcting codes, encoding and decoding , and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes.
Course equivalencies: X-COMP428/MATH428
Outcomes:
Students will learn both the theory and application of error-correcting codes

COMP 429 Natural Language Processing (3 Credit Hours)
Pre-requisites: ((COMP 400B or COMP 271) and (MATH 131 OR equivalent) and (STAT 103 OR equivalent)) OR instructor permission
In this course, students examine in depth the problems, methods, and applications of NLP. Topics will include information retrieval, sentiment analysis, machine translation, document classification, and question answering. We will also cover the underlying theory from probability, statistics, and machine learning that are crucial for the field.
Outcomes:
Students will explain areas of NLP such as information retrieval, sentiment analysis, machine translation, document classification, question answering; Students will apply tools of NLP to a domain of their choice

COMP 431 Cryptography (3 Credit Hours)
Pre-requisites: COMP 271 and (Comp 163 or MATH 313 or MATH 201) or Permission
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP431/MATH431
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 433 Web Services Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP.
Outcomes:
Students will learn the standards and protocols for deploying web services

COMP 434 Enterprise Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors.
Outcomes:
Students will learn the architecture of EJB, entity and message and session beans

COMP 436 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 437 Intro Concurrent Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 439 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 400D or equivalent and (COMP 400C or equivalent or COMP 413)
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.
Outcomes:
Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems

COMP 440 Computer Forensics Investigations (3 Credit Hours)
Pre-requisites: COMP 401
This course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 441 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.
Outcomes:
Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces

COMP 442 Server-Side Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264 and COMP 413
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 443 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
Students should also have completed COMP 400D or equivalent. This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 445 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course considers the safety, security, reliability, and privacy concerns of the embedded devices and cloud-based resources of the Internet of things. The course discusses methods for addressing these concerns.
Outcomes:
Design/implement secure software for embedded systems and the IoT; Establish safety, security, reliability, privacy goals for IoT-based systems; Understand security and privacy concerns of embedded systems and the IoT

COMP 446 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.
Outcomes:
Students will learn how telephone and data networks work; They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system

COMP 447 Intrusion Detection and Computer Forensics (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.
Outcomes:
Students will learn to configure ID systems (eg, snort) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 448 Network Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.
Outcomes:
Students will gain an understanding of how to secure computers and network environments

COMP 449 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 451 Enterprise Networking (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent, and COMP 443, and COMP 400D or equivalent
Management of complex, high-speed, heterogeneous computer networks. Device management using SNMP and related protocols. Configuration and use of Network Management Systems. Data-flow management using LARTC and similar tools.
Outcomes:
Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms

COMP 452 Introduction to Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities; Describe how vulnerabilities can be leveraged into an attack; Describe a vulnerability or attack at the machine-code level

COMP 453 Database Programming (3 Credit Hours)
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.
Outcomes:
Students will learn application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 458 Big Data Analytics (3 Credit Hours)
Pre-requisites: At least a C in the following courses (COMP 405 or COMP 453) AND (COMP 406 or COMP 479 or STAT 408 or equivalent)
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 460 Algorithms & Complexity (3 Credit Hours)
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.
Outcomes:
Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 462 Advanced Computer Architecture (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.
Outcomes:
Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems

COMP 464 High-Performance Computing (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcomes:
Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems

COMP 468 Database System Design (3 Credit Hours)
The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases.
Outcomes:
Students learn the theory and practice of advanced database design and implementation; They will also gain an understanding of using commercial database environments such as Oracle

COMP 469 Physical Design and Fabrication (3 Credit Hours)
This course explores how things are made, including: physical design vs. design on non-physical things; rapid prototyping; 3D printing; 2D conceptualization and sketching; modeling.
Outcomes:
Student will be able to: Visualize ideas via sketching basic shapes; Create 3D models using 3D modeling software; Use a 3D Printer; Give constructive feedback in peer review sessions

COMP 470 Software Quality and Testing (3 Credit Hours)
In this programming intensive course, students will learn effective automation, testing, and use of software metrics through the practices of Test Driven Development and Continuous Deployment.
Outcomes:
Students will be able to perform rigorous testing techniques that contribute to operational reliability, and identify programming practices that both contribute to software maintainability and help to avoid errors

COMP 471 Theory of Programming Languages (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

COMP 472 Compiler Construction (3 Credit Hours)
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn the theory and practice of how to build a compiler

COMP 473 Advanced Object Oriented Programming (3 Credit Hours)
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 474 Software Engineering (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP476/MATH476
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 477 IT Project Management (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 479 Machine Learning (3 Credit Hours)
Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 480 Computer Graphics (3 Credit Hours)
This course introduces advanced topics in modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 483 Computational Biology (4 Credit Hours)
Pre-requisites: BIOL 488
This course presents an algorithmic focus to problems in computational Biology. As such it is built on earlier courses on algorithms and bioinformatics. Current algorithmic approaches, software tools, and scientific literature are discussed.
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 484 Artificial Intelligence (3 Credit Hours)
This course advanced artificial intelligence concepts including theory, search techniques and programming.
Outcomes:
Student will learn the theory of artificial intelligence, search techniques, and be able to build small applications based on it

COMP 486 Computational Neuroscience (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques.
Outcomes:
Students will be able to adeptly apply mathematical and computational frameworks in the various domains of neuroscience

COMP 487 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 479
Deep learning is part of a broader family of machine learning methods based on artificial neural networks. This course will include key concepts of neural network algorithms as well as their applications in computer vision and natural language processing.
Outcomes:
Students will analyze popular modern neural architectures such as convolutional and recurrent neural networks, design and evaluate their own neural networks, and apply neural network models to a practical task

COMP 488 Computer Science Topics (1-4 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 490 Independent Project (1-6 Credit Hours)
Pre-requisites: Approval of the Computer Science faculty member supervisor
An independent project in computer science or related disciplines, under the supervision of a member of the faculty.

COMP 499 Internship (1-6 Credit Hours)
An opportunity to obtain experience in software development, design, networks, or related activities in computer science in a professional setting. The student must obtain the approval of the Graduate Program Director and the student's work supervisor. A final report from the student and the supervisor are required.

COMP 501 Equitable and Inclusive Computer Science Pedagogy (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers the design of computer science courses through an equity and inclusion lens, and covers evidence-based best practices as applied to specific student concerns. Includes basics of teaching and learning theory and pedagogical techniques, and equity, diversity, and justice concerns.
Outcomes:
Ability to explain justice-centered CS education; understand pedagogical frameworks; understand assessment approaches; understand Active Learning and Peer Instruction

COMP 502 Structure of Research Management and Funding (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers grant-proposal development, University compliance regulations, and laboratory and research management.
Outcomes:
Ability to create successful grant proposals and to understand research management

COMP 503 Technology Entrepreneurship (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This course provides aspiring researchers with the skills to pursue new ventures and technology commercialization. Students learn how to transition an innovation from the lab to the marketplace.

COMP 590 PhD Independent Study (3 Credit Hours)
Independent study for PhD research, for students who have not yet completed the required credit hours.
Outcomes:
This will depend on the exact study or research project the student engages in, but generically the outcome is to gain expertise in a study topic or obtain research results

COMP 595 Thesis Supervision (0 Credit Hours)
Supervision for students working on a thesis while not for other classes. Restricted to students enrolled in the MS in Computer Science.

COMP 600 Dissertation Supervision (0 Credit Hours)
Dissertation work under the supervision of a faculty member.
Outcomes:
This course is an independent study course supervised by a research advisor, the purpose of the course is to enable PhD students to maintain full-time status while they prepare their dissertation proposal, and specific goals will vary for individual students, but in general, PhD students should be maturing as researchers

COMP 605 Master of Science Study (0 Credit Hours)
Course for continuing master's degree students engaged in study.

COMP 610 Doctoral Study (0 Credit Hours)
Dissertation preparation course, for when student has completed coursework but before student has defended their dissertation proposal. Can be taken only twice during a doctoral student's career at LUC.
Outcomes:
This course is an independent study course supervised by a research advisor; The purpose of the course is to enable PhD students to maintain full-time status while they complete their dissertation; Specific goals will vary for individual students, but in general, PhD students should be maturing as researchers and beginning to establish intellectual independence

Computer Science and Education (CSED)

Discover, search, courses (p. 2953)!

CSED 301 Introduction to Programming/Computer Science (3 Credit Hours)
This course provides an introduction to programming with an overview of other topics in computer science.
Outcomes:
Basic programming skills in a computer language such as VB.NET or Logo that may be suitable for teaching to young programmers; understanding of other fundamentals of how computer hardware and software tools work

CSED 317 Social Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

CSED 330 Technical Administration PC Clusters (3 Credit Hours)
This course covers technical knowledge and practical skills needed to administer a PC cluster in a school or similar environment, focusing on security issues such as firewalls, viruses, and external and internal attacks, and also covers server and LAN configuration and storage management.
Outcomes:
Students will be familiar with the procedures and design tradeoffs involved in configuring a computer lab

CSED 331 Management of PC Cluster (3 Credit Hours)
Further topics in management of school-based PC clusters are covered: purchasing, staffing, troubleshooting, configuration, copyright and software licensing, facilities and resource management, use of IT outsourcing, acceptable-use policies, account management, content filtering, and reliability.
Outcomes:
Students will be familiar with issues and conflicts, both technical and social, that arise in school lab management, and with ways of addressing them

CSED 343 Introduction to Computer Networks (3 Credit Hours)
How a computer network is put together, from lowest to highest levels. TCP/IP protocols and the construction of the internet; LAN protocols such as Ethernet and ATM; internetworking protocols such as IP; transit protocols such as TCP and UDP; congestion and security issues.

CSED 401 Intro to Programming & Computer Science (3 Credit Hours)
This course provides an introduction to programming with an overview of other topics in computer science.
Outcomes:
Basic programming skills in a computer language such as VB.NET or Logo that may be suitable for teaching to young programmers; understanding of other fundamentals of how computer hardware and software tools work

CSED 430 Technical Administration of PC Cluster (3 Credit Hours)
This course covers technical knowledge and practical skills needed to administer a PC cluster in a school or similar environment, focusing on security issues such as firewalls, viruses, and external and internal attacks, and also covers server and LAN configuration and storage management.
Outcomes:
Students will be familiar with the procedures and design tradeoffs involved in configuring a computer lab

CSED 431 Management of PC Cluster (3 Credit Hours)
Further topics in management of school-based PC clusters are covered: purchasing, staffing, troubleshooting, configuration, copyright and software licensing, facilities and resource management, use of IT outsourcing, acceptable-use policies, account management, content filtering, and reliability.
Outcomes:
Students will be familiar with issues and conflicts, both technical and social, that arise in school lab management, and with ways of addressing them

Computer Science and Information Systems (CSIS)

Discover, search, courses (p. 2953)!

CSIS 484 Project Management (3 Credit Hours)
The art and science of project management as applied to a variety of large and small project situations, in commercial, public, and private sectors. Coverage includes project life cycle management, project organization and leadership, proposals and contracts, and techniques for project planning, estimating, scheduling, and control.
Course equivalencies: X-CSIS484/ISOM484

CSIS 498 Telecommunications for Managers (3 Credit Hours)
This course introduces the basic concepts of data communications, telecommunications networks, and business applications of telecommunications technology, from a managerial perspective. Basic concepts covered include data communications hardware and software, transmission media, and network topology, with an emphasis on local area networks (LANs) and client server applications. Issues related to the management of LANs, wide area networks, and international telecommunications networks will be presented. The course will address technical and managerial issues related to the use of telecommunications for strategic advantage and its role in business organizations. Business cases involving the planning, designing, implementation, and management of communications networks in business organizations will be discussed.
Course equivalencies: X-CSIS498/ISOM498

Continuing Professional Studies (CPST)

Discover, search, courses (p. 2953)!

CPST 165 Special Topics (1-3 Credit Hours)
Course titles and content vary from term to term. Permission is required to enroll.

CPST 195 Special Topics in Management (3 Credit Hours)
Introductory course focusing on specialized areas in management leadership.
Outcomes:
The student will become familiar with the practices of the specific discipline under each subheading, as well as the technical and theoretical means to accomplish the goals of each topic

CPST 200 Introduction to Degree Completion (3 Credit Hours)
Enrollment is restricted to SCPS degree students only. CPST 200 exists to give newly admitted adult students a chance to ease themselves back into the academic environment while highlighting all of the tools and services available through the university. Improved academic writing through use of multiple drafts.
Outcomes:
Exposure to/familiarity with LUC resources

CPST 201 Civic Identity and Development (3 Credit Hours)
Pre-requisites: CPST 200; Co-requisite: UCWR 110; Enrollment is restricted to students in the School of Continuing and Professional Studies
In this course, students will examine their interconnected identities as engaged professionals in their communities using a variety of frameworks. They will learn to leverage the assets of their communities to enact positive change while also leveraging their own assets to grow as individuals. This course will also prepare students for the design and execution of the SCPS capstone project later on in their academic program.
Outcomes:
Students will develop civic awareness through examination of their identities and meaningful engagement with their communities

CPST 205 Prior Learning Assessment Portfolio (1 Credit Hour)
In the course, students will learn to develop a PLA Portfolio and document their prior learning by reflecting on relevant prior experiential learning and identifying college level learning outcomes.
Outcomes:
Submission of draft portfolio with resume, autobiographical essay, proposed learning essays, and at least one completed section that demonstrates learning and evidence of relevant professional and/or personal experience

CPST 210 Introduction to Leadership Studies (3 Credit Hours)
This course begins the Leadership certificate program and the Bachelor of Arts in Leadership. This course consists of the SCPS Assessment Center experience, a 2-day leadership assessment. At the conclusion of the Assessment Center experience, students will receive an assessment of the skills and knowledge in each of six domains. These are Problem Solving and Decision Making, Organizing and Planning, Relationship Building, Influence, Communications, and Intra-personal Leadership. These are equated to the 6 courses in the Leadership certificate/major. A credit award toward the course satisfied will be posted to the student's transcript. The student will then enroll in the remaining courses and will have one year from first enrollment to complete the remaining courses. Students in CPST 210 will subsequently meet with the advisor and develop a plan for completion of the certificate/major. Students who complete the SCPS Assessment Center and develop their plan for completion of the certificate or major will have successfully completed the course. Restricted to students in SCPS.

CPST 215 Individual Finance & Planning (3 Credit Hours)
This course focuses on the methods, features and techniques for personal financial planning. Tools applicable for financial decision-making, such as marginal analysis, opportunity cost, and the balancing or risk and return will be covered in this class. The course will also discuss the aspects of such topics as budgeting, credit cards, insurance 401k-investments and portfolio investments. The course will concentrate on personal finance topics with an emphasis on planning (budgeting, tax and insurance coverage), financing large asset purchases, money management, investing strategies and retirement planning. Restricted to students in the School of Continuing & Professional Studies. At the end of the course the student will be able to 1. Develop a financial plan and create personal financial statements 2. Evaluate present/future value of a dollar/annuity 3. Describe components of interest rates 4. Identify risks associated with money market investments and identity theft tactics 5. Manage credit scores and financing options for personal loans (car/house) 6. Protect wealth with insurance (auto, home, medical, life) 7. Assess common types of investments, risk and rate of return 8. Analyze a stock, bond value, diversification, retirement plans and social security 9. Utilize different financial tools such as budgeting, managing liquidity, personal loans, insurance, and investing fundamentals (stocks, bonds, mutual funds, asset allocation and retirement planning).

CPST 242 Design for the Web (3 Credit Hours)
This course prepares students to develop webpages through a study of Hypertext Markup Language (HTML), Cascading Style Sheets (CSS), Usability principles and Design principles. This course will teach students to plan, design, and construct webpages to work properly in modern web browsers, conforming to web standards while following best practices. Students will be able to: identify graphic design principles that relate to web design, develop webpages with HTML; style webpages with CSS; design and implement wireframes and mockups for websites.

CPST 243 Microeconomics (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Introduction to economic analysis of the smaller components of the economy, household, firm and industry. Topics include economic, socio-economic, and political economic issues; includes a focus on behavioral economics; and provides students with an opportunity to analyze real world economic and public policy decisions that have been influenced by non-economic factors included within its field.
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
1) Explain the law of supply and demand; 2) Distinguish characteristics of different market structures; 3) Analyze how consumers maximize utility; 4) Apply behavioral theory to economic decision-making; 5) Analyze real world microeconomic decisions; 6) Research a topic and present recommendations

CPST 245 Macroeconomics (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Introduces economic analysis that studies system wide phenomena including inflation, economic growth and development and unemployment. Includes a focus on behavioral economics, and provides students with an opportunity to analyze real world economic and public policy decisions that have been influenced by non-economic factors included within its field.
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
1) Explain the law of supply and demand; 2) Describe the nature of macroeconomic issues and problems; 3) Articulate the objectives of monetary and fiscal policies and the function of the two principal policy makers; 4) Analyze historical macroeconomic crises; 5) Discuss basic macroeconomic goals such as GDP, CPI and unemployment; 6) Assess public policy decisions from a behavioral economic perspective

CPST 247 Computer Concepts and Applications (3 Credit Hours)
An introduction to computer and internet resources and skills with an emphasis on effective use of technology in the work place. Students will learn to identify and provide recommendations for technology-based issues in business using industry standard language, identify changes in information technologies and assess the impact on business and society. Restricted to students in the School of Continuing and Professional Studies.
Outcomes:
Understand the purpose and composition of information systems in business, and receive hands on experience developing business applications with tools such as Microsoft Office, social media, basic website construction

CPST 248 User Experience Design Fundamentals (3 Credit Hours)
Students are introduced to UX research and learn techniques of how to effectively evaluate and compare designs objectively. Students will be able to read and draw actionable conclusions from UX studies. Students will understand the UX Design process, including the use of personas, task models, and user journey mapping. Students will be able to: evaluate UX Design using objective metrics; conduct UX studies to derive actionable conclusions from UX Research; Understand personas, task models, and user journey mapping.

CPST 249 User Experience Design Tools and Techniques (3 Credit Hours)
Pre-requisites: CPST 248 with C- or better
The course focuses on user and task analysis (goal setting and problem framing), field research (interviews, personas, planning, etc.), usability testing, the UX process (from wireframes through user journey mapping). These topics are explored through Design assignments that utilize the complete UX Design process. Students will be able to: apply the UX Prototyping process and UX Design Tools; apply the UX Design process, including the use of personas, task models, and user journey mapping.

CPST 250 Foundations of Organizations (3 Credit Hours)
Pre-requisites: CPST courses are restricted to students in the School of Continuing and Professional Studies
An introduction to contemporary management with emphasis on organizational culture, decision making, organizational structure and design, planning, communication and information technology.
Course equivalencies: MGMT201/201H/301/CPST250/ACMGT
Outcomes:
Students will demonstrate an understanding of the managerial roles in organizations, the four levels at which behavior is examined in organizations and will develop a framework for basic business operations

CPST 265 Special Topics (1-3 Credit Hours)
Course titles and content will vary from term to term. Permission is required to enroll.

CPST 273 Building and Leading an Effective Workforce (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Coordinating operational aspects, overseeing employee functions, and directing marketing efforts are components within this survey of leadership skills. Course content to include: Hiring effectively, Developing talent, Supervising the workforce, Maximizing resources Define and implement the various stages of the hiring process. Identify leadership styles and attributes relevant to small group effectiveness. Coordinate systems and resources in a broad-based organization.

CPST 275 Successful Small Business Ventures (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Business development through case studies and best practices in successful small businesses, incorporating risk assessment and management. Dynamic roles and challenges of small businesses in today's competitive global marketplace. Survey of financial relationships in small business development. Identify and discuss the role of small business in U.S. economic development. Analyze components of successful small business development and management. Discuss the impact and changing potentials of small business at the local and the global level.

CPST 277 Writing the Business Proposal (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Students will develop their own business proposal, incorporating their vision as the proposal's foundation. The proposal will include business description, product or service, organization, market analysis, marketing strategies, financial plan and projections. Course content includes: - Technical Writing - Small Business Research Streams and Techniques - Integration of Small Business functions in proposal design - Presentation (graphic and oral) Techniques
Outcomes:
Develop a viable start-up plan for a desired small business; Create a document that reflects the needed components within the business proposal; Present a comprehensive business proposal with real-life application

CPST 279 Tactical Communications for Small Businesses (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Students focus on emerging contemporary communications formats as they build upon marketing knowledge and communication skills. Networking skills, promotional writing, and sales strategies are integrated into written and oral constructs. Course content to include: - Strategic marketing - Networking best practices and formats - Social media applications - Presentation skills Implement best practices in strategic communications relevant to small business and organizational promotion and sustainability. Develop networking and social media skills in promoting product and services within appropriate industry and marketplace.

CPST 290 World Geography (3 Credit Hours)
Restricted to current SCPS BA students. This course introduces the four main themes of the study of geography: physical, cultural, economic, and historical. Using two basic approaches for the discipline: regional and spatial, this course studies not only geographic locations, but also provides an overview of modern globalization and the human impact on the geographical world.
Outcomes:
Geographical knowledge of different continents, awareness of social-political trends globally

CPST 291 Dynamic Programming Languages (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Introduction to programming in dynamically typed languages, sometimes known as scripting languages. The primary language example will be Python; the course will cover Python data types, control structures, function definitions, objects and lambda expressions. A second language may be Ruby, PHP, Scheme or a similar language. The course will also briefly address how Javascript fits into the category of dynamic languages. - Ability to create a dynamic web page using Python or some other language
Outcomes:
Ability to write short programs in Python, using loops, lists and dictionaries; Ability to create graphical effects using Python; Familiarity with the software-development process, and how software can be organized using classes and functions; Familiarity with the advantages and disadvantages of dynamic languages, versus static typing; Ability to compare Python to some other dynamic language, such as Ruby or PHP

CPST 295 The Internship Experience (3 Credit Hours)
Pre-requisites: CPST 200 and CPST 201 (minimum grade of C+); Enrollment is restricted to SCPS degree seeking students; Minimum 2.5 GPA is required
This course provides an opportunity to broaden work and experiential base through immersion within a selected organization. Students spend approximately 8 hours a week interning with their chosen company, institution, nonprofit, small business or other professional setting. Optional to extend the internship a second term.
Outcomes:
To gain real-world professional experience within a targeted work environment; To apply skills and knowledge within context of selected environment; To develop networking opportunities within new professional workplace

CPST 310 Accounting Principles and Application (3 Credit Hours)
CPST courses are restricted to students in the School of Continuing and Professional Studies. This course introduces major concepts in the areas of financial and managerial accounting and develops understanding of accounting process and principles. Students will gain a deeper understanding of financial statements, accounting mechanics, accrual accounting, financial planning, variance analysis, internal controls and financial and financial analysis.
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
Students will gain a deeper understanding of financial statements, accounting mechanics, accrual accounting, financial planning, variance analysis, internal controls and financial and financial analysis; The students will complete a final course project that demonstrates their ability to manage the financial data of a fictional organization

CPST 314 Problem Solving and Decision Making in Leadership (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
Problem solving and decision making call on critical thinking skills. Using decision making formats, whether in teams or individually, provides a roadmap to strategic, ethical, and well-analyzed decisions, in both usual and crisis situations. Through a systematic approach which involves root- cause analysis, creative thinking and risk analysis, problems are delineated, information is gathered, ethical ramifications are analyzed, alternative actions are evaluated, and follow-through is planned. At the end of this course, the student will be able to 1. Apply techniques of logic and problem analysis to organizational situations. 2. Assemble tools used to identify and select the best decisions among alternatives. 3. Review standards of ethics and quality control for decision-making. 4. Develop implementation techniques and methods of follow-through.

CPST 315 Professional Technical Writing (3 Credit Hours)
Pre-requisites: UCWR 110; Restricted to students in the School of Continuing and Professional Studies
Technical Writing prepares students to design effective technical documents for both written and digital media, with particular emphasis upon technical memos, problem-solving and decision-making reports, and organizational, product-support, and technical-information webs.
Outcomes:
Students able to write standard prose with appropriate citations, use a range of current online platforms and technology

CPST 320 Program Evaluation (3 Credit Hours)
Enrollment is restricted to students in the School of Continuing and Professional Studies. Conceptual frameworks and methods related to program evaluation will be covered including process, developmental, outcome, and impact evaluation. Students will be exposed to best practices to measure and document change on the individual, organizational, and macro level including the use of logic models. Quantitative, qualitative, and mixed methods design will be presented. Students will be exposed to analytical tools to interpret qualitative and quantitative data. The use of Big Data will be explored including the implications for behavioral change. Ethical issues in real world evaluation will be addressed. Course Objectives 1. Describe the main conceptual frameworks used in program evaluation including process(formative), developmental, outcome and impact. 2. Compare and contrast quantitative, qualitative, and mixed methods design for program evaluation. 3. Evaluate best practices in relation to the measurement and documentation of change (individual, organizational, and macro-level). 4. Develop process and outcome objectives and logic models. 5. Interpret data including Big Data to make judgements about the efficacy of program activities and intervention. 6. Describe ethical dilemmas with real world research.

CPST 322 Strategic Communication Tools for Applied Psych (3 Credit Hours)
Communication tools commonly employed in the behavioral sciences will be covered: interview development and implementation; best practices for conflict management, negotiation, consultation and persuasion; group facilitation best practices; change facilitation communication techniques including motivational interviewing; the impact of computer mediated communication on interpersonal dynamics; and cultural norms and interpersonal communication. Students interested in counseling and other helping professions, Human Resources, organizational development and the persuasion sciences will benefit from these tools. Enrollment is restricted to students in the School of Continuing and Professional Studies. Course Objectives 1. Identify best practices for core communication tools used in applied psychology (and behavioral sciences). 2. Develop skills in interview development and implementation, group facilitation, and motivational interviewing. 3. Evaluate techniques for conflict management, negotiation, consultation and persuasion. 4. Critique the impact of computer mediated communication of interpersonal dynamics. 5. Describe culturally agile communication techniques.

CPST 324 Organizing and Planning Techniques for Leaders (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
This course provides the framework for setting and maintaining priorities and setting efficiencies throughout the organization, balancing priorities and time, and establishing team and individual roles. Integration of ethical practices is reviewed within the processes of organizing and planning high performance functions. At the end of this course, the student will be able to 1. Identify best practices for large and small group project organizing and planning. 2. Develop techniques for prioritizing competing priorities and individual work responsibilities. 3. Establish methods for building tactical and operational plans. 4. Differentiate team roles and individual roles and required organizational structures.

CPST 325 Data Processing, Analysis, and Visualization (3 Credit Hours)
Pre-requisites: STAT 103; CPST 291 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course studies the concepts, methods, and tools required to infer meaningful information and generate useful visualizations from large data sets. Visualize and analyze structured data using appropriate statistical data mining and visualization tools. Analyze distributed computing frameworks for processing large data sets.
Outcomes:
Implement scripting to convert raw data to structured data

CPST 334 Relationship Building for Organizational Leaders (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
Relationship building calls on the critical skill set of emotional intelligence. This course develops the framework for productive leader-follower relationships. Reflecting on intra-personal leadership skill and building on inter-personal leadership capabilities is of primary focus. Personal assessment and active assignments provide opportunity to develop the important ability to perceive needs of followers in order to ethically motivate towards accomplishment of organizational goals. At the end of this course, the student will be able to 1. Identify and apply skills of emotional intelligence. 2. Develop best practices for building trust and motivation within teams. 3. Recognize the importance of internal as well as external networking. 4. Differentiate between formal and informal communication approaches.

CPST 335 Law and Regulations for Organizational Leaders (3 Credit Hours)
The role of the organization (for profit, non-profit and governmental) from the dual perspective of private and public law. Includes foundations of law and judicial process; contracts, torts, and property law; intellectual property rights; legal, securities and employment regulations; ethical considerations and policy issues.
Outcomes:
-Differentiate ethics and law/private and public law -Discuss Constitutional Law and government's role to regulate business -Apply basic legal principles to the private market -Explain legal principles of contracts

CPST 340 Marketing Concepts and Strategies (3 Credit Hours)
Pre-requisites: CPST 250; Restricted to SCPS
Students will demonstrate an understanding of the fundamental principles of marketing identifying organizational goals, marketing objectives, and variables that affect marketing. Students will examine the roles of advertising, public relations, and sales; integrated and strategic marketing within an organization.
Course equivalencies: MARK201/201H/301/CPST340
Outcomes:
Students will develop a comprehensive marketing plan analyzing a real marketing problem, determining strategies, developing sample materials and devising metrics to evaluate success for an organization

CPST 341 User Experience Design to Drive Business (3 Credit Hours)
Pre-requisites: CPST 249 with C- or better
In this course students will learn how to connect and align business objectives with UX Design goals. Students will learn how to bring high-level planning into concrete actionable steps. Students learn Strategy for continuously Developing Brand and Identity through Design. Students will be able to: Understand how effective UX is a strategic advantage for business; Connect and align business objectives with UX Design goals; Apply Design Thinking to create good UX.

CPST 342 Introduction to Web Application Development (3 Credit Hours)
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications. Specific topics include presentations, business, and data access layers, as well as integration with database systems. An introduction to webpage development using JavaScript, jQuery and associated client-side tools.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks; Familiarity with database integration and deployment environments; Create webpages using JavaScript and related tools and protocols, and interface a webpage with a database

CPST 343 Software Development for Mobile Devices (3 Credit Hours)
Pre-requisites: COMP 170 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course introduces software development for the Android environment, using the App Inventor framework. The course also introduces the basics of user-interface design and mobile architecture. Development work may be done on either an Android device or on an Android emulator running on a Windows/Mac/Linux laptop.
Outcomes:
Be able to develop simple Android applications using the App Inventor framework; Be able to explain the basics of mobile-application architecture and design; Be familiar with the basics of user-interface design; Understand the role of mobile-device sensors, such as the touchscreen, the accelerometer and GPS; Understand the use of Wi-Fi versus mobile wireless, and the use of the cloud in mobile applications; Be able to work with developers to create applications

CPST 344 Influence and Leadership (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
Influence allows leaders to motivate follower movement towards organizational goals. This course establishes methods for leveraging expertise, communicating skillfully, and functioning with integrity. It integrates general management skills with the motivation to assume responsibility over others and create a positive and ethical organizational climate. At the end of this course, the student will be able to 1. Differentiate between the roles of leaders and managers, and various sources of power. 2. Identify ethical influencing principles that guide teams toward accomplishment of goals. 3. Develop a plan for leadership identity and ethical application of personal influence. 4. Recognize best practices for influencing others in situations of crisis.

CPST 345 Introduction to IT: Networking, Cloud & Security (3 Credit Hours)
Pre-requisites: COMP 170 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course covers the fundamentals of IT systems, networking, and security. The course will cover fundamental computer networking concepts and principles, including the basics of the TCP/IP model and packet-based networking. Other topics include an overview of Wireless Networking, Cloud Computing, and an introduction to Cybersecurity.
Course equivalencies: CPST 345 / ITLS 445
Outcomes:
Students will be able to: Describe how the Internet works; Make connections between devices Assess how data is transferred end to end; Perform basic Cloud Computing implementation and deployment; Describe essential features of Mobile Computing; and, identify and assess Cybersecurity threats and describe solutions to those threats

CPST 349 Project Management (3 Credit Hours)
Pre-requisites: CPST 250; Restricted to students in the School of Continuing and Professional Studies
The art and science of project management as applied to a variety of business, commercial, and public management situations. Covers all phases of the project life-cycle; techniques for planning, scheduling and control of projects; project organizations; and techniques for building effective project teams. Student will gain a working knowledge of the fundamental principles and techniques of effective project management, and how to apply these principles and techniques in the business environment.

CPST 350 Human Resources Principles & Practices (3 Credit Hours)
Pre-requisites: CPST 250; Students must be enrolled in the School of Continuing and Professional Studies
Students will gain understanding human of resource management functions including the legal environment, equal employment opportunities requirements; job design and analysis; recruiting, orientation and training; performance appraisal; compensation systems; labor relations; collective bargaining and grievance processes; and health and safety.
Course equivalencies: MGMT201/201H/MGMT 301/CPST 350
Outcomes:
Students will make a presentation about human resource components for an organization including job description, recruiting plan, hiring procedures, performance evaluation and collective bargaining considerations

CPST 354 Communications for Organizational Leaders (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
Communicating clearly and persuasively is at the core of this topic. Individuals can leverage their unique leadership style to effectively communicate and inspire action. By developing practices for formal as well as informal communication, students learn to manage frequency, volume and medium chosen in order to construct messages that reach various audiences. Practicing clear and effective oral communication is established through multiple exercises in this course. At the end of this course, the student will be able to 1. Identify leadership style and use for connecting in verbal presentations. 2. Develop the ability to communicate simply and effectively through written communication. 3. Evaluate communication forms for inspiration and motivation. 4. Recognize the importance of ethical communication and technology.

CPST 355 Introduction to Global Trade Compliance (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201; Restricted to students in the School of Continuing & Professional Studies
Understanding the principles of global trade compliance helps personnel in compliance and other key functional areas (e.g., accounting, logistics, talent, purchasing, R&D) understand the opportunities and risks associated with international trade. Topics include key principles of import and export compliance, the government's role in the regulatory framework, and common risk areas that impact business activities.
At the end of the course, the student will be able to 1. Identify the basic regulatory framework for import compliance (e.g., customs valuation, tariff classification and country of origin) 2. Identify the basic regulatory framework for export compliance 3. Explain and understand the role of voluntary cargo security programs (e.g., Customs-Trade Partnership Against Terrorism) 4. Identify and analyze actual import/export compliance risk areas (e.g., free trade agreements and associated eligibility issues) 5. Create and implement a team project that identifies a compliance risk area and presents a cross-functional response to the regulatory risk.

CPST 356 Environmental Economics & Resource Management (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201; Restricted to students in the School of Continuing & Professional Studies
The purpose of this course is to help students understand the role of economics in analyzing natural resource management and the role of economics in the development of environmental policy. An understanding economic models of efficiency is integral to any discussion of innovative ways to approach our natural resource constraints in the 21st century and beyond. The focus of the course will be on energy, energy efficiency and renewable energy sources, and the cost of pollution and climate change. The renewed interest in innovative technologies that reduce emissions, waste and improve bottom lines provides a new impetus for investment in renewables and new technologies. The second part of the course will be devoted to highlighting opportunities for companies, citizens and entrepreneurs to create jobs and improve communities. By the end of the course, it is hoped that students will find that as citizens, entrepreneurs or corporate executives, they can do well financially by doing good environmentally. By the end of the course, the student will be able to 1. Apply supply and demand models to natural resource management 2. Evaluate the role of economics in the development of environmental policy 3. Identify methods used in the economic valuation of the environment 4. Discuss the transition from depletable to renewable energy resources 5. Connect sustainable environmental practices with economic growth

CPST 360 Development and Change in Organizations (3 Credit Hours)
Pre-requisites: CPST 250
Students will investigate the theory and practice of organizational development, examine assumptions, strategies, models, intervention techniques for organizational development and change processes. Students will also study the formation of collaborative relationships, overcoming resistance, gaining commitment and realigning culture.
Outcomes:
Students will provide case studies that integrate data; design interventions, change strategies and an evaluation for diagnosing organizations, groups and jobs

CPST 364 Intra-personal Leadership (3 Credit Hours)
Pre-requisites: CPST 210; Restricted to Leadership majors only
Intra-personal leadership principles highlight the drive, energy and motivation one has toward leading effectively. Exploring what it means to bring positive organizational energy to the leadership role in a way that ethically supports organizational mission is at the foundation of this course. Effectively leading through complexity begins at the individual level and requires the ability to develop, motivate, and support the accomplishment of others. At the end of this course, the student will be able to 1. Examine personal goals for growth, challenge, achievement, and success 2. Develop requirements for fulfilling relationships and balancing work and life. 3. Establish personal parameters and professional practices for ethical leadership. 4. Develop methods for supporting goals and accomplishments of individuals and teams.

CPST 365 Advanced Special Topics (1-3 Credit Hours)
Course titles and content vary. Variable (1-3) credit hours. Permission required to enroll. Restricted to students in the School of Continuing & Professional Studies. SCPS permission required to enroll.

CPST 370 Leadership Theories and Applications (3 Credit Hours)
Pre-requisites: CPST 250
Students will study leadership theory, concepts and the practical application of leadership at all levels. Students will analyze historical approaches to leadership and focus on influential contemporary leadership perspectives such as servant leadership, situational leadership, transformational leadership, and principle-centered leadership.
Outcomes:
Students will complete a leadership development plan and apply leadership theories to workplace situations through reflection, real-life examples, and case studies

CPST 371 Organizational Finance (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201; Restricted to students in the School of Continuing & Professional Studies
Management involves the allocation and distribution of resources as well as an ongoing knowledge of the financial impact of the local, regional and national economies. This course offers an overview of the inter-relations of money and markets, investment, and financial management. It will focus on financial analysis, design and reporting from a managerial perspective, as well as organizational issues which have a financial impact on the entity. It will concentrate on organizational finance topics with an emphasis on financial analysis, fixed income securities, stocks, projects and their valuations, corporate valuation and governance and cash distribution.
Course equivalencies: FINC332/FINC 334/CPST271
Outcomes:
At the end of this course, the student will be able to 1) Read, develop and write financial analyses for managerial roles; 2) Develop concrete skills in regard to fiscal leadership; 3) Analyze cash flow and financial statements; 4) Describe the time value of money, bonds, and bond valuation regarding changes in interest rates; 5) Evaluate risk and return, valuation of stocks and corporations, and financial options in corporate finance; 6) Apply the cost of capital and cash flows to capital budgeting; 7) Describe how local, regional and national economies impact the success of the allocation of financial resources

CPST 372 Banking & Financial Intermediaries (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201; Restricted to students in the School of Continuing & Professional Studies
This course is designed to provide the student with a knowledge of banking and financial intermediaries. Concepts covered in the course will include the following: an overview of financial markets and interest rates; the functions and structure of the Federal Reserve System; the role of the Federal Reserve system in setting monetary policy; commercial banking operations and regulations; non-bank financial intermediaries, including thrift and finance companies; the role of insurance and pension fund operations. As a result of taking this course, students will understand the role that financial institutions play in developing and implementing monetary policies, as well as the inter-relationships between financial institutions and capital markets. At the end of this course, the student will be able to 1. Describe the types of financial markets, as well as the role played by the various institutions comprising those markets. 2. Recognize the market and institutional forces that contribute to the determination of short and long -term interest rates. 3. Explain the function and structure of the Federal Reserve system, as well as the role played by the Federal Reserve in determining monetary policy. 4. Analyze the nature and function of commercial banking including the sources and uses of funds by banking operations, the regulatory environment in which commercial banks operate, and the management of banking assets to achieve desired management strategies. 5. Discuss the interrelationships among commercial banks and other financial intermediaries. 6. Identify various non-bank financial intermediaries, including thrifts, credit unions, finance companies and mutual funds and explain how these institutions interact with commercial banking operations, as well as with end consumers. 7. Examine the role that pension and insurance funds play in providing liquidity and security to consumers and businesses. 8. Discuss interrelationships among pension and insurance funds and other financial intermediaries

CPST 373 Capital Markets (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201,CPST 372 Banking and Financial Intermediaries; Restricted to students in the School of Continuing & Professional Studies
This course is designed to provide the student with a knowledge of capital markets, banking, and measures of money supply. The course will include an overview of financial markets and interest rates; the functions and structure of the Federal Reserve System; the role of debt securities markets; the role played by equity securities markets; the nature and function of derivative markets. As a result of taking this course, students will understand the role played by capital markets, the Federal Reserve system, debt, equity and derivative markets as well as the inter-relationships between financial institutions and capital markets.
Outcomes:
At the end of this course, the student will be able to 1) Analyze the nature and function of the market for debt instruments, as well as the various types of debt instruments currently in use, including Treasury bills, commercial paper, CDs, repurchase agreements, federal funds, mortgages and banker's acceptances; 2) Assess the valuation of debt securities, pricing, and yields; 3) Describe the market for equity securities and the types of equity securities available for investment; stock market transactions, trading, and securities regulations; 4) Employ valuation methods to evaluate equity securities and performance measures related to them; 5) Explain the role that derivatives play in attempting to mitigate risk, as well as the speculative nature of some derivative products and the role of regulatory agencies in attempting to reduce speculative transactions

CPST 377 Data in Management Decision-Making (3 Credit Hours)
Pre-requisites: CPST 250, STAT 103
Data, technology, and analytics capabilities have a direct impact on decision making. The integration of Financial/Enterprise Resource Planning (ERP) Systems and business analytics drives the ability to turn data into insights and action. This course will prepare students to understand, manage and visualize data, while also focusing on effective ways to communicate for decision-making. The course will introduce ERP systems and technology and the use of analytical tools in organizational decision-making.
Outcomes:
Utilize common enterprise systems and analytical tools in decision-making; Evaluate the use of databases in data management and data wrangling; Develop the ability to apply analytical techniques to data through mining; Practice important data visualization techniques and summary measures; Write to communicate insights gained from data analysis

CPST 380 Leadership, Culture and Ethics (3 Credit Hours)
Pre-requisites: CPST 250
Students examine organizational ethics, values, strategy, culture, leadership and coaching. Students self-assess and refine their own concept of leadership and decision-making in the context of attitudes, environments, cultures, and issues faced by leaders in organizations.
Outcomes:
Students will analyze descriptive and normative models of ethical decision making in business, leadership strengths and management style using real life situations, self-assessment and cases studies

CPST 381 Cybersecurity Governance (3 Credit Hours)
Effective Cybersecurity Leadership requires that there is a cogent Governance structure. Students in this course will learn how to manage Cybersecurity processes while meeting the needs of the Enterprise. Students will learn how to establish a Governance program, Cybersecurity management frameworks, how to develop and implement a Cybersecurity strategy. Students will be able to: Explain the strategic importance of effective, interdisciplinary, and multifunctional enterprise information security governance and information security management program and its execution.

CPST 382 Cybersecurity Incident Response Management (3 Credit Hours)
Students in this course learn key aspects of Cybersecurity Incident Response Management (CIRM). Students in this course will learn how to plan for, respond to, investigate, and report on Cybersecurity Incidents. Students in this course will learn from case studies of past cyber incidents. Skills developed include the developing of an Incident Response Plan; ethical, best practices on handling communications/ disclosures after an incident; incident investigation techniques (forensics); interfacing with law enforcement; and post-incident recovery.

CPST 383 Cloud Security Strategy and Architecture (3 Credit Hours)
This course leverages cloud computing security guidelines set forth by the International Organization for Standardization (ISO), National Institute of Standards and Technology (NIST), European Union Agency for Network and Information Security (ENISA), and Cloud Security Alliance (CSA) to develop a Strategic perspective for the Cybersecurity practitioner. Skills developed include knowing best practices and standards; the ability to design and implement a cloud security architecture; and carefully working with 3rd party cloud infrastructure providers and other stakeholders.

CPST 390 Organizational Theory and Practice (3 Credit Hours)
Pre-requisites: CPST 380
This course extends knowledge of organizations by examining organizational behavior at the macro-level. Students will gain a deeper understanding of organizational theory and research including historical and modern era approaches. Students will also analyze organizational behavior and settings including an in-depth case study of a single company.
Outcomes:
Students will be able to explain and apply concepts within the main areas of organizational structure, culture, communication and process

CPST 395 Advanced Special Topics in Management (1-3 Credit Hours)
Permission required to enroll.

CPST 397 Capstone (3 Credit Hours)
This course must be taken by SCPS students during the last semester prior to graduation. Students will collaborate with a community organization of their choosing to design and execute a capstone project that fulfills the University Engaged Learning requirement. This includes completing at least 20 hours of civic engagement, all necessary Center for Engaged Learning, Teaching, and Scholarship (CELTS) documentation, and a capstone project report. Grounded in Ignatian pedagogy, the course emphasizes reflection, discernment, and action, guiding students through individual and group exercises to deepen their learning and refine their project. By integrating knowledge from their SCPS coursework, students will develop their capstone projects while preparing for life after graduation as Civic-Minded Professionals.
This course satisfies the Engaged Learning requirement.
Outcomes:
Design and execute a capstone project with a community partner organization of their choosing; Complete a minimum of 20 hours of civic engagement with a community partner to satisfy the University Engaged Learning requirement; Present a capstone project report

CPST 398 Professional Studies Internship Seminar (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 398 must take CPST 399 the following session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Applied experience in a professional setting

CPST 399 Professional Studies Internship Seminar II (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 399 must first take CPST 398 the previous session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Outcomes:
Applied experience in a professional setting

CPST 465 Special Topics (1-3 Credit Hours)
Pre-requisites: Limited to students in the Graduate SCPS Programs
Course titles and content vary from term to term. Permission is required to enroll.

Counseling Psychology (CPSY)

Discover, search, courses (p. 2953)!

CPSY 100 Intro Var Chd Dev&Impl Sp Educ (3 Credit Hours)
No course description is available

CPSY 200 Psyc Acad & Persnl Effect (3 Credit Hours)
No course description is available

CPSY 220 Speech & Language Development (3 Credit Hours)
No course description is available

CPSY 224 Career and Life Planning Seminar (3 Credit Hours)
Because most students will make several career or job changes during their lives, the purpose of this course is to teach students a decision-making process that can be used when making career-related decisions. planning; and planning an effective job search campaign.
Course equivalencies: CPSY 224/UNIV 224
Outcomes:
Students will be able to apply the decision-making process to a decision they are trying to make (eg, choosing a major, choosing a career)

CPSY 273 Developmental Psychology (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY273/PSYC273

CPSY 323 Theories of Counseling and Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Course equivalencies: X - CPSY 323 / 423
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice, and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 324 Career Counseling and Development (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Course equivalencies: X - CPSY 324 / 424
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed, major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 332 Multicultural Counseling (3 Credit Hours)
The course provides an overview of the experiences of various cultural groups with the United States, concerning issues of oppression, identity development, and acculturation, for instance. The course aims to develop multicultural competence by increasing students' awareness, knowledge and skill base.
Course equivalencies: X - CPSY 332 / 433
Outcomes:
Students will increase their awareness of their own cultural background, biases, and world view and their knowledge of the world view of culturally diverse clients and will begin to develop appropriate interventions strategies to work effectively with diverse populations

CPSY 333 Abnormal Psychology (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY333/PSYC331/ACPSY280

CPSY 334 Child, Family, and Community (3 Credit Hours)
No course description is available

CPSY 335 Attitudes, Values & Sexual Behavior (3 Credit Hours)
No course description is available

CPSY 337 Adolescent Development (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. This course introduces students to developmental processes, social context, variance (diversity), and psychological/educational implications of the life stage called "adolescence".
Outcomes:
Students will be expected to demonstrate an understanding the stages of normal adolescent development within a variety of cultural contexts as well as situations which compromise adolescent mental health and well being

CPSY 338 Psychology of Personality (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY338/PSYC338

CPSY 341 Principles of Guidance (3 Credit Hours)
No course description is available

CPSY 342 Identity and Pluralism (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. A critical examination of theory and research on the role of culture in identity development. Particular emphasis will be given to such concepts as racism, sexism, ethnicity, culture, class prejudice, and ethnocentrism and how these help shape an individual's identity and society's conceptualization of culture.
Outcomes:
Students will demonstrate ability to think critically about issues of race, class, culture, and gender, and to analyze how these issues play themselves out in our schools and school systems

CPSY 400 Research Fundamentals: Family Studies (3 Credit Hours)
No course description is available

CPSY 406 Professional, Ethical, Legal Issues: Family & School (3 Credit Hours)
No course description is available

CPSY 407 Professional Field Experience: Family Studies (0 Credit Hours)
No course description is available

CPSY 417 Intro to Family Studies (3 Credit Hours)
No course description is available

CPSY 418 Theories of Family (3 Credit Hours)
No course description is available

CPSY 419 Family Communications (3 Credit Hours)
No course description is available

CPSY 420 Counseling Skills (3 Credit Hours)
This course provides an introduction to counseling skills as they apply to the helping professions.
Outcomes:
Students will be able to demonstrate clinical attending, observing, and responding behaviors in one-to-one counseling interviews

CPSY 421 Professional Issues Counseling (3 Credit Hours)
The course will provide students with an overview of the current ethical, legal, and professional issues in the practice of counseling. The course will use American Counseling Association's Codes of Ethics and Standards of Practice as a foundation for examining ethical decision making.
Outcomes:
Students will demonstrate knowledge about the ethical standards of the counseling profession and will develop the ability to apply the knowledge base of their discipline in an ethical and reflective manner

CPSY 422 Group Dynamics: Theory/Practice (3 Credit Hours)
No course description is available

CPSY 423 Theory Counseling & Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Course equivalencies: X - CPSY 323 / 423
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice, and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 424 Career Development & Counseling (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Course equivalencies: X - CPSY 324 / 424
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed, major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 425 Assessment in Counseling (3 Credit Hours)
This course provides an introduction to the basic principles involved in using tests, inventories, observational procedures, and other forms of assessment in counseling.
Outcomes:
Students will be able to demonstrate an understanding of the conceptual underpinnings of reliability, validity, and the use of norms and score transformations and how these apply to the professional and ethical use of assessment information in counseling

CPSY 426 Group Counseling: Theory and Practice (3 Credit Hours)
Pre-requisites: CPSY 423
This course provides an overview of prevailing group counseling models and theories and their application to conducting group counseling in various settings.
Outcomes:
Students will be able to understand and integrate various properties of groups into a meaningful theoretical framework, and develop and demonstrate an understanding of group process through participation in a group experience

CPSY 427 Clinical Mental Health Counseling (3 Credit Hours)
The first purpose is to conduct an in-depth examination of Community Counseling as a helping profession. Specifically, we will examine (a) historical, philosophical, and social/political influences on contemporary community counseling practices, (b) professional organizations to which community counselors belong, the settings in which they practice, and the roles of community counselors in those settings, (c) credentialing and licensing for community counseling practice, and (d) knowledge bases critical to community counseling. The second purpose is to provide students with an opportunity to develop their skills at presenting to professional audiences. Thus, students will have an opportunity to develop in-depth knowledge on a substantive topic relevant to the work of community counselors and present their findings to the class.
Outcomes:
Students will know the history of the counseling profession and current issues involved in the professional practice of counseling

CPSY 428 Foundations of Professional School Counseling (3 Credit Hours)
This course is designed to introduce students to the philosophy of a comprehensive, developmental K-12 school-counseling program and to the national standards for school counseling. The emphasis will be on school counselors' roles and functions as defined by the American School Counselor Association.
Outcomes:
Participants in this course will be able to develop and implement a school counseling program according to the American School Counselors Association's National Standards and the Illinois Developmental Counseling Model

CPSY 431 Advanced School Counseling & Consultation (3 Credit Hours)
Pre-requisites: CPSY 428 Intro to School Counseling
This course introduces the attitudes, concepts, and skills of indirect service delivery through consultation. This course is designed to produce consultation and organizational development skills that will facilitate effective professional school counseling practice. Reflection on the practice of consultation is also developed, as well as competencies for practice within a multiculturally diverse society.
Outcomes:
Students will understanding of the school culture and organizational and contextual factors to the consultation/intervention process and understand the consultative process

CPSY 433 Multicultural Counseling (3 Credit Hours)
The course provides an overview of the experiences of various cultural groups with the United States, concerning issues of oppression, identity development, and acculturation, for instance. The course aims to develop multicultural competence by increasing students' awareness, knowledge and skill base.
Course equivalencies: X - CPSY 332 / 433
Outcomes:
Students will increase their awareness of their own cultural background, biases, and world view and their knowledge of the world view of culturally diverse clients and will begin to develop appropriate interventions strategies to work effectively with diverse populations

CPSY 435 Selected Topics in Counseling (3 Credit Hours)
This is an advanced seminar on selected topics in counseling. Topics vary, but typically have included the following: school counseling, community counseling, psychology of oppression, prevention and outreach, and supervision.
Outcomes:
Outcomes vary with topic

CPSY 437 Addiction Counseling (3 Credit Hours)
This course is designed to provide an introduction to the fundamentals of addiction counseling. This course will supply students with the requisite knowledge relevant in this area.
Outcomes:
Students will demonstrate knowledge of the etiology and diagnosis of substance abuse problems and their treatment from major theoretical perspectives

CPSY 438 Program for Addicted Personality (3 Credit Hours)
No course description is available

CPSY 440 Practicum (3 Credit Hours)
Pre-requisites: Consent of Instructor
This course is a supervised experience in counseling taken for two semesters by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the ACA ethical standards of conduct, and participate in other professional roles required in their field placement

CPSY 441 Internship (3 Credit Hours)
This course is a supervised experience in counseling taken in a two semester sequence with CPSY 440 by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, and understand the APA code of ethics

CPSY 442 Doctoral Practicum (3 Credit Hours)
Pre-requisites: CPSY 441 and consent of instructor
This is an advanced doctoral-level supervised experience for counseling psychology students and is a continuation of CPSY 441.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the APA code of ethics, and participate in other professional roles related to the doctoral-level practice of counseling psychology

CPSY 443 Clerkship (0 Credit Hours)
Pre-requisites: CPSY 441 and 442
This is an elective supervised clinical experience in assessment or psychotherapy for doctoral students in counseling psychology. A field placement is required and all supervision is provided on site by a qualified supervisor employed by the agency in which the field work is taking place.
Outcomes:
Varies with goals of student and agreement with field site

CPSY 444 Family Therapy I (3 Credit Hours)
This course is designed to introduce students to foundational approaches and theories of family therapy.
Outcomes:
Students will be able to apply foundational theories and their corresponding interventions to clinical problems in a family context

CPSY 445 Family Therapy II (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 446 Marital/Couples Therapy (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 450 Research Methods in Counseling Psychology (3 Credit Hours)
The course is structured so that major quantitative research methods can be grasped by the student so that they can critically read and evaluate the professional literature and design their own study. The primary goal is for students to understand the fundamental ideas (i.e., big pictures of research methods) involved in each analytic tool and to be able to choose appropriate analyses for their research question. Added training/exercises might be needed for students to be able to apply analytic tools in a technically appropriate manner (i.e., technical procedures of research methods) but the focus of this course is to help students develop a strategic sense of research methods, based on which students can absorb detailed tactical procedures of research methods later.

CPSY 452 Educational Implication Social Psych (3 Credit Hours)
No course description is available

CPSY 453 Affective Development (3 Credit Hours)
No course description is available

CPSY 454 Human Development: Cognitive, Aff & Phys Bases (3 Credit Hours)
Restricted to Graduate Students. This course is a graduate-level survey of human development across the lifespan.
Course equivalencies: CPSY 454/454
Outcomes:
To build the students' foundational knowledge of lifespan developmental theories and research and to critically examine the extent to which cultural variation is included and/or excluded from developmental theories

CPSY 455 Interpersonal Relations & Sexuality (3 Credit Hours)
No course description is available

CPSY 456 Personality Theory & Education (3 Credit Hours)
No course description is available

CPSY 457 Child Development and Counseling (3 Credit Hours)
Pre-requisites: CPSY 454
This course provides in-depth study of psychological theories and research relevant to child development
Outcomes:
Students will be able to apply relevant theories to promote well-being and academic success in children and prevent the development of psychological and academic problems

CPSY 458 Adolescent Development and Counseling (3 Credit Hours)
Pre-requisites: CPSY 454
This course provides in-depth study of psychological theories and research relevant to adolescent development.
Outcomes:
Students will be able to apply relevant theories to promote well-being and academic success in adolescents and prevent psychological and academic problems

CPSY 461 Neuropsychology (3 Credit Hours)
This course is a survey of neuroanatomy and brain-behavior relationships.
Outcomes:
Students will be able to demonstrate knowledge of neuroanatomy and brain-behavior relationships

CPSY 464 Adult Development & Counseling (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY464/PSYC450

CPSY 480 Mental Tests:School Age& Adult (3 Credit Hours)
No course description is available

CPSY 481 Mental Tests: Preschool (3 Credit Hours)
No course description is available

CPSY 482 Personality and Intellectual Assessment (3 Credit Hours)
This is a course in which students acquire basic proficiency in the administration and interpretation of objective and projective personality tests.
Course equivalencies: X-CIEP482/CPSY482
Outcomes:
Students will demonstrate skills with the administration, interpretation, and presentation of personality assessment results

CPSY 483 Advanced Projectives (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP483/CPSY483

CPSY 484 Neuropsychological Assessment (3 Credit Hours)
Pre-requisites: CPSY 461
This course introduces students to the administration and interpretation of neuropsychological tests.
Outcomes:
Students will be able to demonstrate knowledge of major neuropsychological assessment tools and their application to the assessment of neuropsychological conditions

CPSY 485 Career Assessment (3 Credit Hours)
This course introduces the career assessment process from theoretical, empirical and practical perspectives. The appraisal of aptitudes, interests, values, needs, and work environments will be studied.
Outcomes:
Students will be able to demonstrate knowledge of the nature, structure, function, and cross-cultural generality of work-related aptitudes, interests, needs, and values and prominent tools to assess each

CPSY 487 Tests & Measurements (3 Credit Hours)
This is a course overview of the history, purposes and uses of various types of tests along with a survey of available tests and criteria used to select assessment measures.
Course equivalencies: X-CIEP487/CPSY487
Outcomes:
Students will demonstrate an understanding of the basic purposes of various psychometric tests and will understand statistical criteria that are used to select tests

CPSY 489 Achievement Tests (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP493/CPSY489

CPSY 490 Advanced Educational Statistics (3 Credit Hours)
No course description is available
Course equivalencies: RMTD481 / CPSY490

CPSY 495 Research Methods (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEP495/CPSY495

CPSY 496 Computers in Educational Research (3 Credit Hours)
No course description is available

CPSY 497 Microcomputer Applications School or Agency (3 Credit Hours)
No course description is available

CPSY 498 Independent Study (1-3 Credit Hours)
Topics chosen for individual study. Must be approved by an instructor and department chairperson.

CPSY 499 Independent Research (1-3 Credit Hours)
Research projects selected by the individual student, with the approval of the research supervisor and the department chairperson.
Outcomes:
Outcomes are chosen between the instructor and the student during the semester the student takes the course

CPSY 527 Prevention, Advocacy, and Outreach: Community-Based (3 Credit Hours)
This course will introduce students to the fundamentals of prevention, advocacy, and outreach work, components of a community counseling model. The course will integrate theory, practice, and evaluation research in its methods and will involve designing and implementing an actual community-based intervention program. A critical component of this course will be learning about the nuances of developing relationships with community systems.
Outcomes:
Students will be able to think critically about the conceptual and theoretical philosophies that underlie prevention practice and will be able to develop preventative interventions for use in school and community contexts

CPSY 528 Clinical Appraisal and Treatment Planning (3 Credit Hours)
This course focuses on developing intake interviewing skills, writing intake reports, conducting diagnoses, and developing treatment plans. Interviewing styles including social history interviews, mental status examinations, and behavioral interviews are explored.
Outcomes:
Students will be able to demonstrate the ability to collect useful information from clients through diagnostic interviews and mental status examinations, assign diagnoses, write treatment plans, and formulate treatment recommendations

CPSY 529 Psychology of Immigration (3 Credit Hours)
This course will cover such topics as the current status of U.S. immigrants, major theories and literature on immigration and acculturation, ethnic identity, social relationship issues, language issues, immigrant family issues, migratory loss, general and special topics for Latino/a immigrants, general and special topics for Asian immigrants, and special populations.
Outcomes:
1) develop skills, competencies, and points of view; 2) learn to analyze and critically evaluate ideas, arguments, and points of view; 3) acquire an interest in learning more by seeking answers

CPSY 530 Research Seminar in Counseling Psychology (3 Credit Hours)
Pre-requisites: consent of instructor
This doctoral seminar provides in depth coverage of important methodological issues involved in conducting research in counseling psychology and provides the student to develop a research proposal.
Outcomes:
Students will be able to demonstrate knowledge of methodological issues involved in conducting research in counseling psychology, including understanding and controlling threats to validity, understanding the limits of null hypothesis significance testing and the importance of effect size estimates to the interpretation of the results of individual experiments and to the accumulation of evidence across experiments; Students will also demonstrate the ability to translate a research interest into a researchable question and design a study to address the question

CPSY 531 Ethical and Legal Issues in Counseling Psychology (3 Credit Hours)
The course uses the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct as a framework, to examine representative ethical, professional and legal issues commonly encountered in the exercise of our professional responsibilities as clinicians, teachers, supervisors, and researchers.
Outcomes:
Students will be able to demonstrate knowledge about the contemporary ethical, professional and legal issues relevant to the practice of professional psychology and will be able think critically about ethical dilemmas to make ethical decisions,

CPSY 532 Advanced Theories in Psychotherapy (3 Credit Hours)
This is an advanced course in reading, understanding, and applying theories of counseling and psychotherapy. It was designed to stimulate multiple aspects of learning experiences: introduction to contemporary theories, review of empirical evidence, session role-play, and development of theoretical orientation. Through the course, students are expected to synthesize theoretical, empirical, practical, and personal information about change to further formulate their theoretical orientation. Therefore, this course has two learning goals, including: (1) gaining knowledge of counseling theories, and (2) learning to apply knowledge and experiences to formulate personal theoretical orientation.

CPSY 533 Proseminar (0 Credit Hours)
CIEP 533 is a seminar class intended to provide supervision to first year School Psychology students enrolled in CIEP 477 for the Fall term. CIEP 533 focuses on the completion of a long-term academic case study and intervention within a 5-step problem solving framework. The case study requires candidates, working in teams, to complete all steps of a problem-solving process: Problem Identification; Problem Analysis; Plan Development; Plan Implementation and Monitoring; and Plan Evaluation. Candidates will collect individual student academic data, determine the nature and magnitude of a student's academic difficulty using appropriate comparison standards, develop an intervention plan, implement the plan, collect progress-monitoring and implementation fidelity data, evaluate the outcome of the intervention, and share the outcomes in written and oral formats.

CPSY 535 Seminar in Supervision & Consultation (3 Credit Hours)
Pre-requisites: permission of instructor
This seminar exposes students to theory and research on clinical supervision relevant to training mental health professionals.
Outcomes:
Students will be able to apply theoretical and research knowledge to conceptualize the development of clinicians-in-training and generate interventions to promote their growth

CPSY 536 Supervision Practicum (3 Credit Hours)
This course is an advanced graduate-level course in supervision practicum. You will be asked to apply your knowledge of supervision process, theory, and counselor development to your supervision of entry-level counseling professionals in a practicum setting.
Outcomes:
Students will demonstrate clinical supervisory skills based on appropriate theory and the ability to conceptualize counselor trainee development

CPSY 551 Writing for Publication (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY551/GNUR506

CPSY 552 Research in Self Esteem (3 Credit Hours)
No course description is available

CPSY 553 Language & Communication Devel (3 Credit Hours)
No course description is available

CPSY 554 Moral Development (3 Credit Hours)
No course description is available

CPSY 555 Seminar Human Development (3 Credit Hours)
No course description is available

CPSY 595 Thesis Supervision (0 Credit Hours)
To be registered for while working on an approved thesis project.

CPSY 600 Dissertation Supervision (0 Credit Hours)
To be registered for while working on an approved dissertation project.

CPSY 605 Master's Study (0 Credit Hours)
To be registered for while preparing a thesis proposal.

CPSY 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career while preparing a dissertation proposal. Restrict enrollment to CPSY PhD students and allow students to complete twice in a career.

CPSY 615 Internship: Counseling Psychology (0 Credit Hours)
Please consult the Counseling Psychology Graduate Program Handbook for the complete description of the internship.

CPSY 620 Dissertation Research (3 Credit Hours)
The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation or capstone research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421) or RMTD 406, CIEP 448, and RMTD 400 and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods. Students are well positioned to complete culminating project for doctoral candidacy upon completion of this course.

Criminal Justice & Criminology (CJC)

Discover, search, courses (p. 2953)!

CJC 101 Criminal Justice in a Global Context (3 Credit Hours)
This course introduces students to the study of the causes and control of crime from a global perspective. The course considers: the way crime and criminal justice reflects social, political, and cultural forces; the complex intersection between social inequalities and state responses to crime; and the diffusion of criminal justice reforms based on concepts of equality and
Interdisciplinary Option: Forensic Science, Psychology of Crime and Justice
Course equivalencies: ACCRJ 201 / CJC 101
Outcomes:
Students will be able to demonstrate an understanding of the structure and challenges of state responses to crime from global, historical, and interdisciplinary perspectives

CJC 201 Theories of Criminal Behavior (3 Credit Hours)
This course will provide a detailed examination of past and present theories of criminal behavior, placing them in a socio-historical context and exploring their policy and practical implications.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Students will be able to demonstrate an understanding of how the specific theories of criminal behavior can be compared and evaluated, how the theories evolved over time, and how they can be applied to criminal justice policy and practice

CJC 202 Criminal Courts (3 Credit Hours)
This course provides students with an overview of state and federal criminal courts and case processing, including the study of prosecutors, defense attorneys, judges, jury decision-making, plea bargaining, and sentencing.
Interdisciplinary Option: Psychology of Crime and Justice, Sociolegal Studies
Outcomes:
Students will be able to understand the functions of the state and federal criminal courts, the actors working in those courts and their respective roles, and the procedures for processing of criminal cases

CJC 203 Policing (3 Credit Hours)
This course examines the nature and purpose of policing in American society. Topical areas include the urban police function, contemporary U.S. police systems, principles of police organization and administration, basic operational methodology, and efforts to professionalize police agencies.
Outcomes:
Students will be able to demonstrate an understanding of changing role of police in modern society and articulate the role and challenges faced by police as it relates to the overall operation and goals of the criminal justice system

CJC 204 Corrections (3 Credit Hours)
This course examines the history, functions, and processes of corrections. The primary focus is institutional corrections and its evolution based on philosophies of retribution, deterrence, incapacitation, and rehabilitation. The role and influence of community correctional practices and policy on institutional corrections are also covered.
Interdisciplinary Option: Psychology of Crime and Justice
Course equivalencies: ACCRJ 204 / CJC 204
Outcomes:
Students will be able to identify and describe the role of institutional corrections in society and the criminal justice system and articulate the connection between theories regarding criminality and the purposes of incarceration that have historically guided and continue to guide American correctional practice historically and currently

CJC 205 Research Methods (3 Credit Hours)
An introduction to the logic and basic concepts of social research, with an emphasis on both basic and applied research within criminal justice and criminology. The course provides a basic conceptual framework for designing, conducting, interpreting, and evaluating social research.
Interdisciplinary Option: Human Services, Urban Studies
Outcomes:
Students will be able to demonstrate the capacity to effectively design, review and interpret research to answer questions within the field of criminal justice and other social science disciplines

CJC 206 Statistics (3 Credit Hours)
An introduction to the basic concepts and techniques of statistical analysis, with an emphasis on the study of delinquency, crime, and program evaluation within the criminal justice system.
Knowledge Area: Quantitative Knowledge
Interdisciplinary Option: Human Services
Course equivalencies: X-CRMJ206/SOWK391
Outcomes:
Students will be able to effectively perform and interpret statistical analyses and identify the appropriate use of these statistics in the analysis of crime and criminal justice system performance

CJC 302 Juvenile Justice System (3 Credit Hours)
This course will examine the history, theories, policies, and practices of the juvenile justice system. It will also include a discussion of diversion programs, child maltreatment, and gang behavior.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Outcomes:
Students will be able to demonstrate an understanding of the structure and challenges facing the juvenile justice system as it responds to delinquency and abuse/neglect from an historical, interdisciplinary, and inter-agency relationship perspective, and how this differs from the adult (criminal) justice system

CJC 310 Contemporary Police Issues (3 Credit Hours)
This course provides an in-depth examination of specific contemporary issues in policing related to recruitment and training, education and retention, innovations in policing strategies, police policies and practices, professionalism and ethics.
Outcomes:
Students will be able to identify and discuss the impact that current issues in policing have on police operations, effectiveness, and police-community relations

CJC 312 Popular Culture and the Criminal Justice System (3 Credit Hours)
This course will examine the interrelationship among crime, the media, the criminal justice system, and other forms of popular culture. Topics include media representations of crime and criminal justice, social media, and the social construction of myths about crime and the criminal justice system.
Outcomes:
Students will be able to (1) know the meaning of the social construction of deviance; (2) know and be critical of the manner in which crime and criminal justice are portrayed in the media, and their effect on public opinions and images of the latter; and (3) analyze and evaluate the effects of popular culture

CJC 322 Criminal Law (3 Credit Hours)
This course is an introduction to the principles underlying the definition, constitutionality, and application of criminal laws. It includes the analysis of court decisions regarding various state and federal crimes, and the rules of individual responsibility and accountability for those crimes.
Interdisciplinary Option: Psychology of Crime and Justice, Sociolegal Studies
Outcomes:
Students will be able to demonstrate an understanding of the constitutional limitations on the construction of statutory crimes, the elements of different crimes, and the principles governing individual responsibility and accountability for those crimes

CJC 323 Criminal Procedure (3 Credit Hours)
This course provides an in-depth, sophisticated coverage of criminal procedures surrounding investigations, stops, searches and seizure, arrests, interrogations, and procedural remedies.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to identify and articulate the origin, interpretation and application of legal procedures as they relate to matters involving the police, and how these relate to the overall operation and effectiveness of the criminal justice system

CJC 336 Political Violence and Crime (3 Credit Hours)
This course offers a thematic approach to the study of different forms of political violence and crime, their causes and consequences, how different types of violence and crime manifest in the present day, and how violence is represented in popular culture.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
Outcomes:
Students will learn to evaluate the ways in which violence and crime are used for political ends and assess the countermeasures taken by various international and government agencies to combat political violence

CJC 337 Terrorism (3 Credit Hours)
An analysis of different types of terrorist organizations across the globe and of the efforts by governments to combat terrorism.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
Course equivalencies: X-PLSC337/INTS337/CJC337
Outcomes:
Students will be able to explain what motivates the turn to terror as a method of struggle and to assess the morality and effectiveness of the counterterrorism tactics adopted by various governments

CJC 338 Community-Based Corrections (3 Credit Hours)
This course examines the history, purpose, and functioning of probation and parole as well as other aspects of community-based supervision, including: pre-trial supervision, electronic monitoring, house arrest/home detention, day reporting centers, and other programs that provide both supervision and treatment of offenders in the community.
Outcomes:
Students will be able to articulate the organizational structure of community corrections programs, the roles community corrections play in the criminal justice system, and the effectiveness and challenges facing community corrections agencies

CJC 345 Social Justice and Crime (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, PSYC 100, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the social injustices in the criminal justice system's naming and sanctioning of harmful behaviors as crimes. Discussions will unpack the values, ethics, and ideologies underlying the current retributive system of sanctioning compared to social justice responses to crime.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Psychology of Crime and Justice, Race and Ethnicity, Sociolegal Studies
Outcomes:
Articulate the meaning of social justice; Discuss restorative and retributive justice

CJC 346 Mental Illness and Crime (3 Credit Hours)
This course explores the relationship of mental illness to crime and violence. Topics include the nature, prevalence, and consequences of mental disorder, substance use, and violence among criminal offenders, violence risk assessment, and the institutional and other treatments for the mentally ill offender.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Students will know (1) the history and development of research on mental illness and crime, (2) the various mental disorders endemic in the criminal justice system and their relationship to crime and violence, (3) assessment measures of the risk for violence, and (4) management and treatment of mentally ill offender

CJC 351 Organized Crime (3 Credit Hours)
This course offers an introduction to the study of organized crime in U.S. society. Emphasis is given to the history and development of traditional organized crime in Chicago. Emerging organized crime groups are also studied. In addition, this course offers an introduction to the concept of transnational organized crime.
Interdisciplinary Option: Italian American Studies, Italian Studies
Outcomes:
Students will articulate the extent and nature of organized crime, how it relates to other forms of criminal behavior, and the effectiveness of the justice system's response to it

CJC 352 Gangs (3 Credit Hours)
This course examines the historical development of urban street gangs with a view toward understanding their structure, characteristics, purposes, and activities. Particular emphasis is given to the history and development of street gangs in Chicago.
Interdisciplinary Option: Urban Studies
Course equivalencies: CRMJ352/URB352
Outcomes:
Students will demonstrate an understanding of the causes and history of street gangs, the methods used to control them, and their impact on society and the criminal justice system

CJC 353 White Collar Crime (3 Credit Hours)
This is a study of non-traditional crime engaged in by governmental and corporate entities, and persons in the "white collar" professions. It includes state political crimes, corporate violence and abuse of power, as well as occupational, financial, and environmental crimes, and enforcement of laws against such crimes.
Outcomes:
Students will be able to describe the nature and extent of white collar crime, how it differs from traditional crime, and the manner in which laws against such crimes are enforced

CJC 354 Cybercrime (3 Credit Hours)
This course examines the theory, practice, and prevention of cybercrime. It considers how advances in technology have led to the creation of cybercrime and new avenues for deviance. The course centers on various forms of cybercrimes and how theories of crime can be applied to explain and prevent cybercrime.
Outcomes:
Define the nature and scope of cybercrime, Analyze national and global digital law enforcement efforts, Critically consider laws and policies governing cybercrime detection and prosecution

CJC 360 Substance Use and Crime (3 Credit Hours)
This course will explore whether substance use is related to crime, the effect of drug trafficking on communities, the policies aimed at controlling drug use and their effectiveness, as well as the implications of current drug policies and practices on communities and on the criminal justice system itself.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Students will describe the relationship between substance use and crime, the effects of substance use and abuse on communities, and the implications of currents drug policies and practices

CJC 365 Guns and Crime (3 Credit Hours)
This course provides a comprehensive overview of issues associated with firearms, including their historical and contemporary use in the commission and prevention of crime, patterns of ownership and acquisition, and the form and effectiveness of attempts to control access to firearms and gun-related violence in the U.S.
Outcomes:
Students will be able to apply critical thought, scientific research, and a full understanding of the laws regulating access to firearms to objectively assess the nature of, and governmental response to, gun violence

CJC 366 Crime Prevention (3 Credit Hours)
This course examines the theory and practice of crime prevention. The course will review theories of crime and justice with specific implications for crime prevention efforts. Students will trace the evolution of crime prevention efforts. Most importantly, the course will review crime prevention strategies, ranging from those designed to protect the individual to those designed to protect society at large.
Outcomes:
Define and explain crime prevention, as an idea and as a practice; Define and explain the three broad categories of crime prevention; Know and explain how theories of crime and justice provide the foundation for particular methods of crime prevention; Describe and understand the importance of evaluation in judging the effectiveness of crime prevention techniques; Differentiate between crime prevention techniques pitched at different levels (individual, household, business, neighborhood)

CJC 370 Women in The Criminal Justice System (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, PSYC 100, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines four areas relative to women in the criminal justice system: the historical view of female criminality; women as defendants in criminal cases and women in prison; women as victims of domestic violence and sexual assault; and women as professionals in the criminal justice system.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-CRMJ370/WOST395/WSGS395
Outcomes:
Students will be able to describe the extent, nature and theories of female criminality and victimization and how this is consistent with and different from male criminality and victimization

CJC 371 Victimology (3 Credit Hours)
This course examines the scientific study of victimization, the relationships between victims and offenders, the interactions between victims and the criminal justice system, and the connections between victims and other social groups and institutions.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Psychology of Crime and Justice
Course equivalencies: X-CRMJ371/PAX 369
Outcomes:
Students will be able to describe the legal, social and psychological issues related to crime victimization, and current knowledge about the victim-offender and victim- criminal justice system relationships

CJC 372 Race, Ethnicity, and Criminal Justice (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, PSYC 100, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines current research and theoretical perspectives related to race and ethnicity in crime and in criminal justice processing. It will cover such issues as racial profiling, the effects of drug laws on people of color, minority disenfranchisement from the criminal justice system, and crime and immigration.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Human Services, Peace, Justice, and Conflict Studies, Psychology of Crime and Justice, Race and Ethnicity, Sociolegal Studies, Urban Studies
Course equivalencies: X-CJC/BWS/AFR/PLSC372/PAX373
Outcomes:
Students will demonstrate an understanding of contemporary issues relating to - and current research and theory about - race and ethnicity and their relationship to crime and criminal case processing

CJC 373 Intimate Partner Violence (3 Credit Hours)
This course will address the nature and scope of intimate partner violence, the factors that contribute to it as well as the theories that have been developed to explain it. Attention will be paid to society's responses to intimate partner violence.
Interdisciplinary Option: Human Services, Peace, Justice, and Conflict Studies, Psychology of Crime and Justice, Women & Gender Studies
Course equivalencies: CJC373/PAX374/WSGS392
Outcomes:
Students will be able to describe the theory, extent, nature, and impact of intimate partner violence, and how the community and criminal justice system respond to this problem

CJC 374 Miscarriages of Justice (3 Credit Hours)
This course takes an interdisciplinary approach to the study of criminal justice system error, drawing from criminology, psychology, and law, to examine wrongful conviction and acquittal, official misconduct, and discrimination. The course examines the rate of error, institutional responses to error, and how policies exacerbate, or minimize, miscarriage of justice.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Critically evaluate criminal justice practices for their ability to administer justice; identify hallmarks of miscarriages of justice; analyze policy for its potential to prevent, or contribute to, miscarriages of justice

CJC 375 Punishment and Society (3 Credit Hours)
This course explores the dominant sociological approaches to understanding punishment in modern society. The course also focuses on punishment as practiced in the United States in light of these theoretical approaches, examining the collateral consequences of punishment and the importance of racial, gender, and sexual identities in relation to punishment.
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Understand the philosophical justifications for punishment; understand social theories of punishment; critically assess the role punishment plays in modern society; understand the consequences of punishment for individuals, communities, and society

CJC 376 Childhood Exposure to Violence (3 Credit Hours)
This course examines the definitions, scope, and impact of violence and abuse in childhood. In particular, this course introduces students to the theoretical and empirical literatures relating to family violence, including child physical abuse, child sexual abuse, and child neglect, as well as child victimization in neighborhoods and schools.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Outcomes:
To understand, critically analyze, and apply a variety of theories, conceptual frameworks, and empirical research to explain child victimization and the impact of exposure to violence on children

CJC 377 Psychology and Law (3 Credit Hours)
Pre-requisites: PSYC 101
Introduction to the areas of overlap between psychology and the law. Topics include roles of psychologists in legal settings, accuracy of eyewitness testimony, jury processes, accuracy of polygraph examinations, and issues surrounding the insanity defense.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Sociolegal Studies
Course equivalencies: X- CJC 377 / PSYC 372
Outcomes:
Students will learn to analyze biases in the U.S. jury system, elucidate the weaknesses of eyewitness testimony, outline the issues in the insanity defense, understand the issues in Rape Trauma Syndrome and Battered Spouse Syndrome, understand the methods and effects of scientific jury selection, understand the complex issues surrounding confessions, and view the US justice system in a social justice context

CJC 378 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, and the emerging legal framework for its prevention and control. It includes the history of the internationalization of crime control and measurement, and international trends in law enforcement, victim assistance, courts, sentencing, and corrections.
Interdisciplinary Option: Global Studies
Outcomes:
Students will examine globalization of crime; learn about international crime statistics; understand the prevalence of common crimes internationally; identify emerging crime threats; and understand international trends in criminal justice

CJC 379 Leaving Crime Behind (3 Credit Hours)
Pre-requisites: CJC 201
This course provides students with an examination of desistance from crime and the potential for rehabilitation in the criminal justice system. The course discusses theories of desistance, empirical research on desistance, and the extent to which the criminal justice system contributes to individuals' ability to desist from crime.
Outcomes:
Students will be able to: 1) analyze desistance theories; 2) describe crime patterns across the life course; 3) identify individual and community-level factors associated with desistance; and 4) critique rehabilitation approaches grounded in desistance theories

CJC 380 Introduction to Forensic Science (3 Credit Hours)
This course provides an overview of the basic principles and uses of forensic science within the field of criminal justice. The course is designed for criminal justice majors emphasizing the application of the forensic sciences in the criminal justice system.
Outcomes:
Students will be able to identify the uses and limitations of the existing forensic science techniques used within the field of criminal justice

CJC 390 Capstone Experience Internship (1-6 Credit Hours)
Pre-requisites: CRMJ Majors and Minors, Psychology of Crime and Justice Minors, Forensic Science Majors
The purpose of this course is to enhance the student's development and learning through observational and participatory experience in criminal justice agencies.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency and be able to identify and describe the link between their field experience and prior courses

CJC 391 Capstone Experience Research (3 Credit Hours)
Pre-requisites: Instructor approval required; major in criminal justice; junior or senior standing; Students must complete CJC 205: Research Methods (or equivalent) and four additional CJC courses
The course will allow students to be actively engaged in a faculty member's research project, providing the student with an opportunity to apply the research skills that they already have and to acquire additional skills and knowledge about research design, statistical analysis, and writing research presentations, briefs, or papers.
This course satisfies the Engaged Learning requirement.
Outcomes:
increasing knowledge about the research process from design, analysis, presentation, writing and policy implications

CJC 395 Special Topics (3 Credit Hours)
Special topics courses provide students with an opportunity to examine various criminal justice topics not normally offered as part of the Department's regular curriculum.
Outcomes:
Students will be able to gain an understanding of new issues confronting the criminal justice system, or an advanced understanding of traditional subjects covered in basic courses

CJC 396 Independent Study (1-6 Credit Hours)
This course provides students with the opportunity to examine a specific topic in the field of criminal justice that is currently not offered or available.
Outcomes:
Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study

CJC 399 Senior Capstone (3 Credit Hours)
Pre-requisites: 6 courses in Criminal Justice and Criminology and senior-standing only
This course is for CJC majors slated to graduate within two semesters. This course is a culmination of the student's study of crime and criminal justice issues. It consists of projects aimed at integrating theory, knowledge, and research in the context of a variety of contemporary criminal justice problems, issues, and policies.
Outcomes:
Students will apply all that they have learned throughout their criminal justice courses and apply this knowledge to demonstrate a sophisticated understanding of criminal justice professions, practices, and policy

CJC 401 Politics and Policies in the Criminal Justice System (3 Credit Hours)
This course examines the interactional processes within and among the criminal justice system's components and their relationships to other public and private institutions. The role of politics in policy formulation, the policy making process, and the consequences of current policies on the operation of the criminal justice system are discussed.
Outcomes:
Students will understand the CJ policy-making process, including which factors facilitate/inhibit effective policy development and implementation, and how CJ research is used to formulate, implement, and evaluate CJ policies

CJC 402 Theories of Criminal Behavior (3 Credit Hours)
This is a comparative review of dominant contemporary theories and research on the causes of crime and delinquency. Competing theories on the causes of crime are analyzed, and their empirical support and implications for prevention programs and interventions are discussed.
Outcomes:
To analyze and discuss contemporary theories of criminal behavior

CJC 403 Research Methods and Program Evaluation (3 Credit Hours)
This course provides students with the substantive knowledge to be critical consumers of research studies and program evaluations. Students learn how to critique the internal, construct, and external validity of program evaluations and data collection efforts that seek to understand criminal behavior or the operation of the criminal justice system.
Outcomes:
To analyze and critique program evaluations and research designs

CJC 404 Applied Data Analysis and Interpretation (4 Credit Hours)
Students learn the skills and knowledge necessary to be critical consumers of statistical information often present in everyday criminal justice practice. Students learn which statistical tools are appropriate for specific measures and research questions, as well as how to generate and interpret statistical output using a statistical software package.
Outcomes:
Students will be able to select the correct statistical tools to use for conducting statistical analyses, use a statistical software package to analyze data, and interpret statistical output

CJC 408 Applied Research in Criminal Justice & Criminology (2 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404
In their final semester of the CJC graduate program, students complete a semester-long research project. This culminating experience is student-initiated and supervised by a member of the graduate faculty. This project encourages advanced students to approach the multifaceted problem of research as a set of interrelated issues ranging from tasks of concept formation and theory construction through research design and data collection to the assessment and analysis of the generated data.
Outcomes:
Students should be able to synthesize criminological theory, criminal justice policy, research methods, and data analysis into a final applied research project

CJC 410 Advanced Topics in Criminology (3 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on theories or contemporary issues concerning criminal and victim behavior. Examples of topics include: Drugs and Violence; Gender and Crime; Intimate Partner Violence; Sexual Violence; Human Trafficking; Environmental Crime; Victimology; International Criminology; Advanced Criminology; Race, Ethnicity, and Crime.
Outcomes:
Students will understand a contemporary issue in criminology with a special emphasis on research and theory developments

CJC 411 Advanced Topics in Policing (3 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of policing, including community- and problem-oriented policing, situational crime prevention, crime analysis, and Comp-Stat approaches to policing practice and management.
Outcomes:
Students will understand a contemporary issue in policing with a special emphasis on research and theory developments

CJC 412 Advanced Topics in Courts (3-6 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on contemporary issues in courts. Examples of topics include: International Criminal Law and Anti-Terrorism Enforcement, The American Jury; Death Penalty; International Criminal Law; Public Views of Justice; Media, Culture, and Criminal Law; Legal Rights of Children.
Outcomes:
Students will understand a contemporary issue in the court system with a special emphasis on research and theory developments

CJC 413 Advanced Topics in Corrections (3-6 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of corrections. Examples of graduate courses that will be offered as special topics courses under CJC 413 include: Principles of Punishment, Sentencing Policy, Restorative Justice, Risk Assessment, Re-Entry, What Works in Corrections, Mass Incarceration, and Juvenile Corrections.
Outcomes:
Students will understand a contemporary issue in corrections with a special emphasis on research and theory developments

CJC 414 General Special Topics (3 Credit Hours)
Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System.
Outcomes:
To analyze and discuss topics in criminal justice

CJC 415 Mental Illness and Crime (3 Credit Hours)
Pre-requisites: Graduate students only
This course explores the relationship of mental illness to crime and violence, the policies and programs concerning the treatment of individuals with mental illness in the criminal justice system, including the nature, prevalence and consequences of mental disorder among criminal offenders.
Outcomes:
Students will understand the history and development of research on mental illness and crime, assessments of risk for violence, as well as legal issues surrounding mentally disordered victims and offenders

CJC 416 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control.
Outcomes:
Students will understand how international legal and criminal justice systems interact to investigate, measure, and prosecute transnational crimes including trafficking, human rights violations, and war crimes

CJC 431 Criminal Victimization (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course critically explores the physical, emotional, and financial harm people suffer because of illegal criminal activities. The focus of the course is on the nature and extent of victimization, the estimation of risk, theories about the causes of victimization, and the consequences of victimization experiences. In addition, students will also study the emergence of special victims' groups, the implications of a victim-orientated perspective for the administration of justice, and system alternatives such as restitution and restorative justice.; Describe the theoretical underpinnings of victimization and current research on the risk and protective factors of criminal victimization; Differentiate the legal and social responses to criminal victimization; Describe the primary and secondary impact of criminal victimization on victims, their families, friends, and communities; Analyze data to examine trends and patterns of criminal victimization; Analyze data to examine the causes and correlates of criminal victimization; Identify which interventions and strategies offer the most promise for effective implementation and impact on preventing criminal victimization.
Outcomes:
Articulate the history, nature, and magnitude of criminal victimization in the U.S

CJC 432 Firearm Violence (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course will provide a comprehensive overview of the extent and nature of firearm violence, existing laws related to the acquisition, ownership and use of firearms, patterns and reasons for firearm ownership and acquisition, the various attempts to control access to firearms, and the effectiveness of such efforts. This course will explore both the criminal justice and public health perspectives and approaches to reducing firearm violence. Each discipline's framework, strategies, and challenges will be examined, with a focus on the opportunities and challenges of implementing interdisciplinary approaches in a "real world" setting. The class will emphasize the application of objective and rigorous scientific methods and research to understanding the extent and nature of firearm violence and evaluating interventions within the context of what is oftentimes a politically and emotionally charged debate.
Outcomes:
Articulate the extent and nature of firearm violence in the U.S. in a sophisticated way that illustrates an understanding of existing measures of firearm violence; Describe the strengths and limitations of existing data to measure the extent and nature of firearm violence, patterns and levels of firearm ownership, and firearm markets; Differentiate between the criminal justice and public health frameworks, and how each approaches firearm violence; Describe the importance and challenges of responding to complex issues like firearm violence from a multidisciplinary/intersectional/collaborative approach; Analyze data to examine trends and patterns of firearm violence; Analyze data to examine the correlates and causes of firearm violence; Describe evidence-based interventions and strategies to reduce firearm violence; Identify which interventions and strategies offer the most promise for effective implementation and impact on firearm violence

CJC 433 Wrongful Convictions and the Law (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
Wrongful convictions often include two types of errors, an innocent person is punished, and a guilty person escapes justice. In this class, we will explore how such errors occur by focusing on both investigation and adjudication practices. We will then apply what we have learned about criminal procedure to analyze individual wrongful conviction cases. This is an interactive course. Students will review case intake documents from a cooperating legal organization and help inform their case decisions. We will also work with the National Registry of Exonerations to draft case profiles for people who have already been exonerated. Ultimately, we will weigh the challenges of upholding defendants' rights without compromising public safety or producing additional errors.
Outcomes:
Evaluate criminal cases for potential errors, both episodic and systemic; Describe defendants' due process rights particularly under the 5th and 6th amendments and how these rights relate to criminal procedure in practice; Explain judicial opinions and their ability to remedy wrongful convictions; Identify the limitations of the appellate process and post-conviction review; Produce written content of publishable quality, with a special focus on accuracy and fact checking

CJC 499 Independent Study (1-6 Credit Hours)
Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic. Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

CJC 501 Thesis Research (2 Credit Hours)
Pre-requisites: Approval of Graduate Program Director and Grade of A- or better in CJC 403 and CJC 404
Supervision and guidance are given as students conduct their independent Masters' thesis research.
Outcomes:
Master's Thesis

CJC 502 Practicum in Criminal Justice (3-6 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404 Outcomes: Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency, and identify/describe the link between their field experience and prior courses through a research paper
This course enables the student to apply their knowledge (conceptual, theoretical, and methodological) in a practical agency setting.

CJC 595 Thesis Supervision (0 Credit Hours)
This is a non-credit course. Students who are working on approved master's thesis research and are not registered for any course are required to register for thesis supervision.

CJC 605 Master's Study (0 Credit Hours)
Pre-requisites: Completion of the graduate core courses
This course is a non-credit means of permitting students to be formally enrolled at Loyola while completing their culminating experience (i.e., 408 project or thesis).

Culinary Topics (CECT)

Discover, search, courses (p. 2953)!

CECT 87 Sake (0 Credit Hours)
Students will learn about Sake.

CECT 89 Slow Food Movement (0 Credit Hours)
Students will learn about the slow food movement from various viewpoints.

Curriculum, Instruction & Educational Psychology (CIEP)

Discover, search, courses (p. 2953)!

CIEP L359 Reading - Elementary Lab (1 Credit Hour)
No course description is available

CIEP L362 Literacy Instruction in the Content Area-Lab (1 Credit Hour)
No course description is available

CIEP L414 Instructional Methods Lab (1 Credit Hour)
No course description is available

CIEP L421 Literacy Instruction Elementary Lab (1 Credit Hour)
No course description is available

CIEP L423 Advanced Literacy Instruction in Content Area-Lab (1 Credit Hour)
No course description is available

CIEP LM60 Secondary Methods: Social Studies Lab (1 Credit Hour)
No course description is available

CIEP LM61 Secondary Methods: English Lab (1 Credit Hour)
No course description is available

CIEP LM62 Secondary Methods: Mathematics Lab (1 Credit Hour)
No course description is available

CIEP LM63 Secondary Methods: Modern Languages Lab (1 Credit Hour)
No course description is available

CIEP LM64 Secondary Methods: Science Lab (1 Credit Hour)
No course description is available

CIEP LM83 Teaching Science in Elementary School-Lab (1 Credit Hour)
No course description is available

CIEP M03 Student Teaching: Infants, Toddlers and PreSchoolers (6 Credit Hours)
This course (along with the related field experiences) serves as a continuation of the Methods courses and meets the requirements of a preprimary student teaching experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Teacher candidates will be provided with supervised applied experience in assessment and instruction with children in early childhood special education and will be prepared to work in an early childhood special education setting

CIEP M04 K-3 Student Teaching (9 Credit Hours)
Pre-requisites: CIEP M03
This course is the culminating experience of the Early Childhood Special Education Teacher Education Program. Candidates are placed in a classroom with an experienced cooperating teacher.
This course satisfies the Engaged Learning requirement.
Outcomes:
In addition to their planning and teaching responsibilities, student teachers also are expected to reflect on their experience, develop their planning and instructional skills, and compile a teaching portfolio

CIEP M13 Techniques of Teaching in Secondary Schools (3 Credit Hours)
This course introduces the secondary education student to the realities of the public, urban middle or high school setting. It provides students with an initial experience to the actual teaching of adolescents within their major discipline. Supervision and feedback are provided by the university course instructor and a subject specific high school teacher in the field. Students enroll concurrently in CIEP M14.
Outcomes:
Students will be able to demonstrate principles of lesson design in a specific subject content, create instruction designed for students in a diverse urban setting, analyze and apply "best practices" pedagogy, and develop a personal philosophy of teaching

CIEP M14 Secondary School Teaching in Context: Clinical Seminar (1 Credit Hour)
Directed classroom experiences that consist of a minimum of 30 clinical hours that include lesson planning and teaching related to the course content. The seminar meets only during the clinical field experience. Co-register with CIEP M13.
Outcomes:
Students will be able to observe exemplary practices in selected urban high school classrooms, create and deliver instruction to students in that setting, and analyze and reflect on those experiences

CIEP M15 Methods Teaching Art & Sec (3 Credit Hours)
No course description is available

CIEP M16 K-2 Literacy Methods for EC (2 Credit Hours)
This course is to introduce the preservice teacher candidate to the teaching and learning processes associated with research based comprehensive literacy instruction in K-2 elementary classrooms and will emphasize the scientific foundations of reading instruction: phonics, vocabulary, text comprehension and fluency.
Outcomes:
A student enrolled in CIEP M16 will demonstrate beginning competence in the knowledge base, skills, and strategies stated in the Illinois Professional Teaching Standards and ECE standards

CIEP M17 Early Childhood Math Methods (2 Credit Hours)
Two credit hour math methods course specifically for early childhood special education majors. this course is designed to reflect current ISBE standards, and best practices in early math. It addresses mathematical thinking, concepts, and skills across the birth to grade 2 continuum.
Outcomes:
It addresses mathematical thinking, concepts, and skills across the birth to grade 2 continuum

CIEP M20 Methods-Materials Elementary Science-Social Studies (1 Credit Hour)
No course description is available

CIEP M21 Methods-Materials Mathematics (3 Credit Hours)
No course description is available

CIEP M22 Problems-Materials Teaching Reading & Language Arts (3 Credit Hours)
No course description is available

CIEP M23 Introduction to Teaching and General Elementary Methods (3 Credit Hours)
This course is designed to help students examine the complex role of the teacher and to understand principles and methods of curriculum, instruction, and evaluation in the elementary school.
Outcomes:
Students will be able to design an instructional plan, analyze the characteristics of an effective classroom, and articulate major challenges facing school systems

CIEP M24 Practice in Instruction-Elem (1 Credit Hour)
No course description is available

CIEP M30 Academic Assessments and Interventions (3 Credit Hours)
In this course, students will learn about psychological and educational assessment with a special focus on issues related to non-biased assessment and the link between assessment and intervention in the instructional consultative process.
Outcomes:
Students will develop and administer appropriate intervention plans related to the instructional needs of students with disabilities

CIEP M31 Behavior Interventions: Assessments and Supports (3 Credit Hours)
The purpose of this course is to develop the students ability to provide positive support to learners whose behavior(s) impedes their learning or the learning of others.
Outcomes:
The student will be able to plan and develop school wide group and individual supports, make adjustments as needed to IEPS, and assess the on-going progress being made by students for whom behavioral interventions have been planned

CIEP M32 Exceptional Learner II (3 Credit Hours)
This course provides in depth understanding of the ethical and professional issues related to collaborative service provision for children with disabilities.
Outcomes:
By viewing ability within the broader context of human diversity, students will learn instructional strategies that foster a student's meaningful participation in heterogeneous classrooms as well as the larger communities in which they live

CIEP M33 Accessing and Adapting the General Education Curriculum (3 Credit Hours)
Within this course, candidates explore methods to adapt the general education curriculum in order to meet the individual needs of students with disabilities. Issues of differentiating student needs, long and short-term planning, technology-assisted learning, and vocational and social skills curricula will be addressed along with behaviors and modification related to low incidence exceptionalities.
Outcomes:
Candidates will demonstrate an understanding of adapting the general education curriculum for students with special needs through the design of a universalized lesson plan, a synthesis of relevant literature, and researching assistive technology

CIEP M34 Family, Community and School-Based Consultation (3 Credit Hours)
Within this course, candidates explore how members of families affected by disability and school/community professionals can enter into productive partnerships and create positive outcomes for students in elementary and secondary schools. Different approaches to work on school or community based teams, the different aspects of planning and implementing team process, and the challenges and threats to that process, are examined.
Outcomes:
Candidates will demonstrate an understanding of collaborative relationships, and design and evaluate a wraparound plan for a student with a disability based on case study information and research

CIEP M35 Methods of Instruction: Infants, Toddler and Preschoolers (3 Credit Hours)
This course is designed to prepare candidates to develop curriculum and assessment strategies for working with infants, toddlers, and preschool children.
Outcomes:
Candidates will develop a strong foundation of so that they are able to make more successful accommodations and modifications for children with exceptionalities

CIEP M36 Methods of Teaching K-3: Social Studies (3 Credit Hours)
The purpose of this course is to provide an overview of teaching social studies to student in Kindergarten through third grades.
Outcomes:
Teacher candidates will become prepared to develop social studies curriculum appropriate for students in the primary grades including the development of a classroom management philosophy (and the necessary skills for implementing it), as well as the development of instructional techniques in preparation for student teaching

CIEP M37 Methods of Teaching K-3: Math and Science (3 Credit Hours)
This course focuses on math and science content and methods for teachers in kindergarten through grade three.
Outcomes:
Candidates will learn, design, and teach curriculum and lesson plans in math and science, as well as formal and informal assessment strategies

CIEP M38 Methods of Teaching K-3: Reading and Literacy (3 Credit Hours)
This course prepares candidates to guide young children from diverse cultural backgrounds in learning to read and write.
Outcomes:
Teacher candidates will become familiar with and learn to 1) recognize and describe the development stages of learning to read and write for 4-8 year olds, 2) identify factors that influence this learning process, and 3) develop curricula for reading and writing

CIEP M42 K-2 Special Education Methods for ECSE (2 Credit Hours)
In this context, methods to adapt the curriculum to individualize instruction to meet the needs of students with special needs will be discussed. Issues of differentiating student needs, long and short-term planning, technology-assisted learning, and social skills curriculum will be addressed. Students will also learn how to actively create learning environments which promote positive learning results in general and special curricula by modifying the learning environment, using direct motivational and instructional interventions.
Outcomes:
Demonstrates current knowledge of integrated learning experiences for children from birth through grade three and understands the central concepts and tools of inquiry in each of the following content area: language and literacy (English language arts); mathematics; science; health, safety, nutrition, and movement (physical development and health); art, music, and drama (fine arts); and social science; understands how to plan developmentally and culturally appropriate curriculum; understands how to use and integrate appropriate technological resources into classroom instruction

CIEP M43 Special Education Methods: Infants, Toddlers and Preschoolers (3 Credit Hours)
This course provides an overview in curricular adaptations and instructional strategies that address the needs of young children.
Outcomes:
Candidates will gain experience in developing strategies for meeting the educational and developmental needs of infants and young children with disabilities, as well as those who experience circumstances and conditions that potentially interfere with optimal growth and development

CIEP M44 Special Education Methods K-3 (3 Credit Hours)
This course is designed to meet the needs of future general and special education teachers in diverse and inclusive classrooms with particular focus being given to whole-class models for addressing student diversity and disabilities, followed by specific instructional strategies and interventions for students with particular types of special needs.
Outcomes:
Candidates will become familiar with inclusive strategies and methods for monitoring performance during pre-referral interventions

CIEP M47 Choral Conducting (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEPM47/MUSCM47

CIEP M48 Art in the Elementary School (1 Credit Hour)
This course presents students with an overview of the elements and principals of visual art, reviews arts materials and explores methods of integrating arts with core curriculum: Language Arts, Math, Science and Social Studies.
Outcomes:
Students will be able to identify the elements and principles of art and create visual art projects incorporating core curriculum with the knowledge of art materials

CIEP M60 Secondary Methods: Social Studies (3 Credit Hours)
In this course students examine teaching and learning in the social studies in grades 9-12. Students explore a variety of methods for teaching each discipline within the social studies as distinct subjects and as elements of interdisciplinary courses. The course emphasizes curriculum planning, practice teaching in the social studies and fieldwork in schools and social studies-related organizations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will design curricula and demonstrate instructional strategies in the social studies that meet the needs of diverse learners and focus on deep engagements with social studies content

CIEP M60L Secondary Methods: Social Studies Lab (0 Credit Hours)
No course description is available

CIEP M61 Secondary Methods: English (3 Credit Hours)
This course provides an intensive examination of the methods utilized in the teaching of language arts in grades 9-12. The course allows opportunities for students to synthesize their philosophy, content knowledge, and practice, in preparation for student teaching. In addition, students will be able to design and implement meaningful literacy experiences and curricula.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CIEPM61/ENGL396
Outcomes:
Students will be able to implement methods of teaching language, composition, and literature, in grades nine through twelve

CIEP M61L Secondary Methods: English Lab (0 Credit Hours)
No course description is available

CIEP M62 Secondary Methods: Mathematics (3 Credit Hours)
This course is designed to provide students with the knowledge and methods necessary for success in teaching in today's secondary mathematics classroom.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to implement methods of teaching mathematics and methods of assessment in grades sixth through twelve

CIEP M62L Secondary Methods: Mathematics Lab (0 Credit Hours)
No course description is available

CIEP M63 Secondary Methods: Foreign Language (3 Credit Hours)
This course is designed to prepare students to enter their student teaching experience with having created a standards-based curricular unit including assessments, goals, objectives, and activities/ assignments.
Outcomes:
Students will be able to implement methods of teaching a foreign language and methods of assessment in grades sixth through twelve

CIEP M63L Secondary Methods: Modern Languages Lab (0 Credit Hours)
No course description is available

CIEP M64 Secondary Methods: Science (3 Credit Hours)
This course is designed to help pre-service teachers develop the theoretical background, practical knowledge, and skills essential for successful science teaching at the high school level.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to draw Teaching Science in the Elementary/Middle School connections among instructional planning, implementation, and assessment of student learning through a field experience as well as the practice of instructional skills in peer teaching lessons

CIEP M64L Secondary Methods: Science Lab (0 Credit Hours)
No course description is available

CIEP M65 Methods in Secondary School Music (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEPM65/MUSCM65

CIEP M77 Bilingual/Bicultural Methods and Materials (3 Credit Hours)
This course is designed to provide participants with the knowledge, skills, and competencies needed to meet the needs of English Language Learners in bilingual contexts.
Outcomes:
Students will understand the theoretical basis, methods, and techniques needed for effective teaching in bilingual bicultural classrooms and will be able to develop materials to put bilingual theory and methods into practice

CIEP M78 Methods/Materials Teaching English as a Second Language (3 Credit Hours)
This course is designed as a practical hands-on course that explores best practice in teaching in English with linguistic minority students.
Outcomes:
Students will learn methods of teaching listening, speaking, reading, and writing in English and methods of integrating the teaching of language and academic content, tailored to meet the needs of individual English Language Learners

CIEP M80 Materials and Methods for Middle School Math Instruction (1-3 Credit Hours)
This course provides students with a broad range of instructional materials and activities for teaching standards-based mathematics in the middle school.
Outcomes:
Students will be able to teach mathematics in departmentalized programs in the elementary schools, utilizing a wide range of manipulatives and technologies

CIEP M80L Mtls & Mthds Math Instr Gr 6-8 Lab (0 Credit Hours)
No course description is available

CIEP M83 Teaching Science in the Elementary/Middle School (3 Credit Hours)
This course is designed to help students develop the theoretical background, practical knowledge, and skills essential for successful science teaching at the elementary and middle school levels.
Outcomes:
Students will be able to draw connections among instructional planning, implementation, and assessment of student learning through a field experience as well as the practice of instructional skills in peer teaching lessons

CIEP M83L Advanced Instruction Subject Specific Lab (0 Credit Hours)
No course description is available

CIEP M86 Middle School Science Methods (3 Credit Hours)
This course will be paired with one of the CAS science courses; it emphasizes various advanced Instructional models such as inductive, deductive, inquiry role development, technology integration, and cooperative learning.
Outcomes:
Students will be able to understand and practice instructional models to effectively teach ALL students and assess their learning

CIEP M96 Teaching Theatre in Secondary School (3 Credit Hours)
No course description is available
Course equivalencies: X-THTR303/CIEPM96

CIEP M99 Methods Teaching Speech Secondary School (3 Credit Hours)
No course description is available
Course equivalencies: X-CIEPM99/CMUN308

CIEP MU1 Student Teaching: Special Education (9 Credit Hours)
No course description is available
This course satisfies the Engaged Learning requirement.

CIEP MU2 Practicum (Student Teaching) BD II (8 Credit Hours)
No course description is available

CIEP MU3 Student Teaching-Early Childhood (9 Credit Hours)
No course description is available

CIEP MU4 Student Teaching in Music (9 Credit Hours)
No course description is available

CIEP MU5 Student Teaching: Elementary School (9 Credit Hours)
This capstone course engages the student in the actual activity of teaching in the elementary school all day, every day, during the semester. Those engaged in student teaching are closely monitored by an experienced cooperating teacher at the school site and supervised by university faculty who have had extensive classroom experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching

CIEP MU6 Student Teaching: Secondary School (9 Credit Hours)
This capstone course engages the student in the actual activity of teaching in the secondary school all day, every day, during the semester. Those engaged in student teaching are closely monitored by an experienced cooperating teacher at the school site and supervised by university faculty who have had extensive classroom experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching

CIEP 104 Mathematics for Teachers I (3 Credit Hours)
This course provides the foundation for teaching standards based mathematics in the elementary school classroom. In this first course, students study geometry, measurement, data analysis and probability and fulfill the civic engagement value of core by tutoring in the Chicago Public Schools.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CIEP104/MATH147
Outcomes:
Students will broaden their understanding of elementary school mathematics instruction and tutor elementary-aged students

CIEP 105 Mathematics for Teachers II (3 Credit Hours)
This course provides the foundation for teaching standards based mathematics in the elementary school classroom. In this second course, students study algebra and numbers and operations.
Course equivalencies: X-CIEP105/MATH148
Outcomes:
Students will broaden their understanding of elementary school mathematics instruction and teach math lessons in middle school classrooms

CIEP 106 Math for Teachers III-Computer (3 Credit Hours)
No course description is available

CIEP 112 Strategies for Learning (1 Credit Hour)
This course is designed primarily for first and second year students to strengthen their academic skills. This course provides an opportunity for students to evaluate their goals and motivation for studying at Loyola and to develop effective strategies for academic success.
Course equivalencies: CIEP 112/UNIV 112
Outcomes:
Students will have a clearer view of their goals and the steps and strategies needed for achieving academic success

CIEP 113 First Year Seminar (1 Credit Hour)
This one-credit seminar course is open to incoming first-year STEP students only. Students will complete assignments related to personal and academic goals, and strategies for achieving academic success.
Course equivalencies: UNIV 113/CIEP 113

CIEP 113A First Year Seminar I (0 Credit Hours)
No course description is available

CIEP 113B First Year Seminar II (1 Credit Hour)
No course description is available

CIEP 114 Critical Skills (1 Credit Hour)
This course will focus on concepts and strategies for academic success and critical thinking. We will explore models for developing skills that will aid in success in educational, career, and personal endeavors. This course will also focus on learning how to evaluate goals and on motivation for studying at Loyola and how to develop effective strategies for continued academic success. Students will participate in class discussions, class projects, and service projects that are particularly aimed at teaching each student a variety of skills that they will apply to academic areas, the university community, and other critical areas. Students will study critical thinking, societal pressures, problem solving, and personal issues that may affect college success.
Outcomes:
This course will offer students a series of learning support, academic success skills and specialized advising; The skills for academic achievement and life-long learning are covered; Various aspects of transitional and other motivational issues that traditionally impede student success will also be explored; This course will also provide students with a framework where they will be able to set personal goals and develop strategies to succeed

CIEP 185 Understanding Science for PK-12 Educators (3 Credit Hours)
The course explores the following questions: What is science? How does it work? Why is it important? What challenges and threats does it face in the 21st century? The course also addresses fundamental principles of topics from the physical sciences and engineering within the context of and for the purpose of extending PK-12 education. Alignment with the respective National Science Teaching Association Standard is as follows NSTA Standard 1: Content Knowledge.
Outcomes:
Students who take this course will understand the nature of scientific knowledge; engage in scientific and engineering practices in order to enhance their knowledge and understanding of the natural world and of foundational concepts within the physical sciences and engineering disciplines; make meaningful connections within and between science disciplines; articulate core challenges and threats to science in the 21st century; develop critical thinking and reasoning skills; develop strategies to promote science acceptance and confront mis- and disinformation and science denial; and develop strategies to promote equity and inclusion within science and science education

CIEP 201 Seminar in Teaching I (0-1 Credit Hours)
The purpose of the Seminar in Teaching 1 is to provide a mechanism for the development of a learning community composed of teacher candidates and teacher educators. Teacher candidates enroll as freshmen and meet formally, as a cohort, four times during each semester throughout their senior year. The seminar serves to prepare future teachers through a mentoring process by connecting teacher candidates with each other and with the university faculty and 2 professional teacher practitioners through shared learning experiences, which include opportunities to observe and reflect on model teaching strategies. The Seminar in Teaching 1 focuses on the development of critical thinking and problem-solving skills that define the teacher in both urban and suburban classrooms. Academic advising sessions will be scheduled to monitor academic progress and to encourage professional development.

CIEP 202 Seminar in Teaching II (1 Credit Hour)
This seminar along with 201, 203, 204 prepares future teachers by offering a monitoring process that connects teacher candidates to each other and with university faculty and professional teacher practitioners through shared learning experiences. Freshman has taken educational psychology in this cohort, which meets weekly throughout the semester. As a cohort, they discuss and relate their own cultural education and backgrounds to understand how beliefs and experiences influence decision-making or educations and how these experiences impact teaching careers. Teacher candidates experience various teaching strategies, address current and historical educational issues, and reflect on modeling skills. Development of critical thinking and problem solving skills revolve around curriculum issues such as beliefs and philosophies, historical events that have helped to shape our current educational system, schools in society, current social problems and how schools are addressing these issues, partnerships in the school arena, and state and federal regulations. Discussion based on outside work will be part of the course agenda. Various technologies will be used to assist candidates during the course.

CIEP 203 Seminar in Teaching III (1 Credit Hour)
The purpose of the Seminar in Teaching III is to provide a mechanism for the development of a learning community composed of teacher candidates and teacher educators. This seminar was specifically designed for transfer students to assist with their transition into the Teachers for the 21st (T21C) program. The seminar also serves to prepare future teachers through a mentoring process by connecting teacher candidates with each other, with the university faculty, and with the professional teacher practitioners through shared l earning experiences that include opportunities to work with students and teachers in Chicago Public Schools.

CIEP 204 Seminar in Teaching IV (1 Credit Hour)
The Seminar in Teaching IV continues an exploration of the challenges and rewards of teaching. The purpose of the Seminar in Teaching IV is to provide an on-going mechanism for the development of a learning community composed of teacher candidates and teacher educators. Teacher candidates meet formally, as a cohort, four times during each semester throughout the teacher preparation program. The seminar serves to prepare future teachers through a mentoring process by connecting teacher candidates with each other and with university faculty and professional teacher practitioners through shared learning experiences.

CIEP 206 Children's Literature (3 Credit Hours)
This course is designed to explore the genres of children's literature. Coursework involves reading and responding to various genre and engaging in professional book discussions to learn key strategies for teaching.
Course equivalencies: X-CIEP206/ENGL206
Outcomes:
Students will read and respond to multiple texts written for the adolescent reader, design instructional strategies to encourage reader response in classroom settings, and create a thematic literature-based teaching unit

CIEP 210 Early Childhood Development: Typical and Atypical (3 Credit Hours)
This course provides a framework for studying the process of human development and explores the physical, cognitive, social, and emotional development of children birth through age eight.
Outcomes:
Candidates learn milestones in each area of development in the first eight years of life and learn to recognize typical and atypical development in young children

CIEP 211 Introduction to the Profession: Early Childhood/Special Education (3 Credit Hours)
In this course, candidates will investigate the profession of early childhood special education, including a historical overview of early education, a review of theoretical program models and types of early childhood programs, discussion of available community resources, professional organizations, and exploration of contemporary trends and issues in programs for children with special needs ages birth to eight.
Outcomes:
Candidates will interpret and analyze trends in early care and education, including diversity, early intervention and special education legislation, public policy, and educationally appropriate practice

CIEP 229 Introductions of Educational Psychology (3 Credit Hours)
Students will learn basic to apply psychological principles in varied instructional settings, including theories of learning and development.
Outcomes:
Students will demonstrate an understanding of basic educational psychological principles and their application to learning and instruction in the classroom

CIEP 260 Interdisciplinary Wrkshp: Sqnc Two-Intro Responsive & Inclusive Classrooms (1-4 Credit Hours)
The modules in Sequence Two explore how the school is itself a community and how the organization and environment of a school influence student learning. exploration of the local communities that schools are situated in. This course builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning, The sequence addresses TLLSC Enduring Understandings 1, 3, 7, and 9.
Outcomes:
TLSC 140: Teaching, Learning and Leading for Social Justice: This module builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; TLSC 150: Constructive Learning Environments for Diverse Students: This module deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; TLSC 160: Analyzing Culturally Responsive Classroom Instruction: This module builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning

CIEP 261 Computer Application to Education I (1 Credit Hour)
No course description is available

CIEP 290 Fact, Fiction, or Somewhere In Between? (3 Credit Hours)
The course investigates misconceptions about science, math, humanities, and social sciences through the lens of learners¿ varied social identities, prior knowledge and lived experiences, and research about how people learn. Students will identify misconceptions commonly learned in K-12 classes, reflect on how those misconceptions may shape ones¿ current understandings, and explore approaches for uncovering and confronting misconceptions and false beliefs in productive ways. - Effective instruction is guided by research-based principles of how people learn - Student learning is facilitated through effective instruction and assessment - Instruction that promotes intellectual virtues including open-mindedness and intellectual humility, courage, and diligence can help prepare students to better resist misinformation and also promote empathy, caring, and responsibility
Outcomes:
Students who take this course will understand that: - Misconceptions are derived from a variety of sources including information environments, prior experiences, peers, culture, language, teachers¿ explanations, and instructional materials and are often resistant to change

CIEP 304 History of Math for Teachers (3 Credit Hours)
No course description is available

CIEP 305 Reading Teacher Practicum (3 Credit Hours)
This course is the culminating experience in the reading teacher endorsement minor.

CIEP 311 Seminar in Teaching V (1 Credit Hour)
No course description is available

CIEP 312 Seminar in Teaching VI (1 Credit Hour)
The purpose of the Seminar in Teaching is to provide a mechanism for the development of a learning community composed of teacher candidates. The Seminar will provide an opportunity for teacher candidates to acquire a foundational knowledge base focusing on the tenets of good teaching and effective teaching strategies. Teacher candidates will also have the opportunity to reflect on their personal philosophies and beliefs about teaching, learning, and expectations about the students they will encounter. The Seminar serves to prepare future teachers through a mentoring process by connecting teacher candidates with each other and with the university faculty and professional teacher practitioners through shared learning experiences, which include opportunities to observe and reflect on model teaching strategies and to explore research-based concepts that focus on helping students to become successful in their academic, personal, and social lives. The Seminar in Teaching focuses on the development of critical thinking and problem-solving skills that define the teacher in both urban and suburban classrooms.

CIEP 313 Seminar in Teaching VII (1 Credit Hour)
No course description is available

CIEP 314 Seminar in Teaching VIII (1 Credit Hour)
The purpose of the Seminar in Teaching VIII is to provide a mechanism for the development of a learning community composed of teacher candidates. This course provides an opportunity for teacher candidates to refine and further develop a foundational knowledge base focusing on the tenets of good teaching and effective teaching strategies. Teacher candidates will also have the opportunity to reflect and refine their personal philosophies and beliefs about teaching, learning, and expectations about the students they will encounter. The Seminar serves to prepare future teachers by connecting teacher candidates with each other and with the university faculty and professional teacher practitioners through shared learning experiences. Teacher candidates will be encouraged to grow professionally through membership and participation in professional meetings and conferences.

CIEP 315 Language Development and Literacy (3 Credit Hours)
This course develops candidates' understanding of typical and atypical language development and principles that govern the process.
Outcomes:
Candidates learn how quality children's literature in early childhood programs can be used to maximize language and literacy development through authentic group experiences and activities

CIEP 327 Teaching English Language Arts in the Middle Grades (3 Credit Hours)
This course is based on the fundamental beliefs that people learn to write by writing; writing is a process; writing is a tool for thinking, and that writing is a social process. Candidates will be introduced to research based strategies, design effective writing lessons, develop a philosophy of teaching writing based on best practices, and recognize elements of valid writing assessment.
Outcomes:
Teacher candidates will recognize the significance of their role as writing models and will recognize and create connections to literacy instruction across the curriculum; Teacher candidates will become familiar with developmental issues related to learning to write across grades K -12, and issues related to struggling writers and students with culturally and linguistically diverse backgrounds

CIEP 328 Assessment and Diagnosis of Reading Problems (3 Credit Hours)
This assessment and diagnosis course provides the foundation knowledge and experiences in reading assessment and diagnosis that would be necessary for elementary or secondary classroom reading teachers.
Outcomes:
Reading teachers will recognize that reading is an active and complex process that involves skills, strategies, prior knowledge and purposes for reading within a goal-oriented process

CIEP 329 Materials, Resources, & Strategies for Reading Teacher (3 Credit Hours)
The purpose of this course is to provide teacher candidates in the reading teacher endorsement minor with an in depth knowledge and understanding of materials, resources, and strategies available to teachers whose primary teaching responsibility is the teaching of literacy.

CIEP 330 Typical and Atypical Development (3 Credit Hours)
The purpose of this course is to study the stages of psychological and cognitive development in children and adolescents with special attention to the similarities and differences among individuals with and without disabilities.
Outcomes:
Students will use their knowledge of typical/atypical development to design lessons, arrange learning environments, and select instructional strategies to promote their students' learning and social/emotional development

CIEP 332 School Wide Applications (3 Credit Hours)
This course focuses on the needs of a school as it develops and implements a LRE plan. It examines the planning involved in the development of comprehensive, school wide positive behavior support programs, the application of universal design to curriculum development, and the on-going evaluation of progress made by students for whom intervention is needed Outcome: Students will develop and school-wide behavior support plan.
Course equivalencies: CIEP 341 / CIEP 331 / CIEP 332

CIEP 333 Education of The Urban Child (3 Credit Hours)
No course description is available
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-CIEP333/BWS 333

CIEP 334 Child, Family & Community (3 Credit Hours)
No course description is available

CIEP 336 Child Development and Implications for Education (3 Credit Hours)
Survey of theory and research relevant to the cognitive, emotional and social development of children.

CIEP 337 Assessment of Infants and Preschool Children (3 Credit Hours)
The purpose of this course is to provide an overview of assessment practices for young children and their families.
Outcomes:
Candidates will become familiar with developmental screening, diagnostic evaluations, play-based assessment, curriculum/criterion-referenced assessments (including work sampling and portfolios), and ecological assessment of social and family contexts

CIEP 338 Theories of Learning (3 Credit Hours)
The purpose of this course is to investigate the factors that influence how students access, process, store, retrieve, and make use of experiences to (1) increase their understanding of academic content; (2) establish appropriate personal-social interactions; and (3) make transitions into the broader community.
Outcomes:
Students will apply theory strengthened by documented research findings to (1) design lesson plans consistent with the students' developmental levels and ways of knowing (learning styles) and (2) develop strategies to assess students' learning

CIEP 339 The Exceptional Child (3 Credit Hours)
This course is an introduction to the concept of exceptionality dealing with the educational implications of atypical child growth and development. Focus is given to the psychology and teaching of culturally diverse and atypical children including those with learning disorders.
Outcomes:
Students will have an increased understanding and demonstrate skills in: the connection between civil-rights issues and people with exceptionalities, and where the field of education has been, is now, and is going with regard to providing supports for people with special needs, their teachers, and family members

CIEP 340 Professional Applications in Special Education (3 Credit Hours)
This course will introduce candidates to research-based, hands-on teaching and learning tools to be implemented in the classroom. Designed to be taken during the special education student teaching experience, candidates will create appropriate learning tools to meet students' abilities and needs. Course
Outcomes:
Candidates will 1) develop competencies in the collaborative and consultative roles of special educators in the integration of individuals with disabilities into the general curriculum as well as educational and alternative settings; 2) reflect on their own practice to improve instruction and guide professional growth

CIEP 342 Transition Planning (3 Credit Hours)
The purpose of this course is to provide a background for transition education services-from childhood to adulthood- for individuals with disabilities. Students will look at legal mandates for transition planning and service provision, as well as how the People First movement has led to changes in our thinking and talking about people with disabilities and the specific challenges faced by adolescents with disabilities as they transition to adulthood. Students will examine instructional strategies for teaching functional, occupational, and career identification skills in The purpose of this course is to provide a background for transition education services-from childhood to adulthood- for individuals with disabilities. Students will look at legal mandates for transition planning and service provision, as well as how the People First movement has led to changes in our thinking and talking about people with disabilities and the specific challenges faced by adolescents with disabilities as they transition to adulthood. Students will examine instructional strategies for teaching functional, occupational, and career identification skills in secondary school and community settings. Current perspectives on self-determination and quality of life issues as they relate to individuals transitioning to adulthood will be introduced.

CIEP 343 Adaptive and Assistive Technology (3 Credit Hours)
In this course, students will learn how to make all physical and virtual aspects of school fully accessible for their students, other faculty, and family members. They will have hands-on experience with a wide range of assistive and adaptive technologies (low, medium, and high tech) and become familiar with the A/A terminology and the most recent legislation related to AAT.
Outcomes:
Students will be able to integrate AAT into assessment plans, the IEP process, lesson planning and review, and daily classroom routines; Keeping in mind the specific characteristics of individual students, they will choose and then make use of appropriate technology to accomplish specific instructional/academic, physical, and social/emotional objectives

CIEP 350 Adolescent Literature (3 Credit Hours)
This course introduces the languages arts education student to the relevance and need for incorporating adolescent literature in the middle/secondary classroom and to the development and strengthening of literacy.
Outcomes:
Students will have broad and detailed understanding of the realities and intellectual context of middle/secondary language arts education and the role of adolescent literature within this context

CIEP 351 Curriculum and Teaching in the Middle School (3 Credit Hours)
The purpose of the course is to help students construct a conceptual framework within which they can effectively respond to the needs of middle school students.
Course equivalencies: X - CIEP 351 / CIEP 455
Outcomes:
Students will learn the middle level philosophy and will examine how those beliefs and values affect both teaching and learning

CIEP 354 Classroom Management (3 Credit Hours)
This course is designed to help teachers develop a classroom environment conducive to quality instruction and optimal student learning by helping them establish classroom procedures, rules, and consequences; teach the social skills; unite the student teams; and solve behavior problems.
Outcomes:
Students will learn ways to take proactive steps to prevent many discipline problems before they happen as well as ways they can address those problems quickly and effectively when they do occur

CIEP 359 Teaching Reading (3 Credit Hours)
This course introduces the student to the teaching and learning processes associated with balanced literacy instruction in the elementary school. Developmental stages of learning to read and write, interactive teaching methods and materials are the focus of this course.
Outcomes:
Students will be able to make informed decisions regarding literacy instruction; They will be able to apply curriculum knowledge and instructional strategies in the development and teaching of literacy lessons

CIEP 359L Teaching Reading-Elementary Lab (0 Credit Hours)
No course description is available

CIEP 360 Interdisciplinary Workshop: Culture & Identity TLSC 140/150/160 Rome, Italy (3 Credit Hours)
The modules in Sequence 2 explore how the school is itself a community and how the organization and environment of a school influence student learning. This sequence builds off of Sequence 1's exploration of the local communities that schools are situated in. The sequence addresses TLLSC Enduring Understandings 1, 3, 7, and 9.
Outcomes:
TLSC 140: Teaching, Learning and Leading for Social Justice: This module builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; TLSC 150: Constructive Learning Environments for Diverse Students: This module deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; TLSC 160: Analyzing Culturally Responsive Classroom Instruction: This module builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning

CIEP 361 Computer Application to Education II (2 Credit Hours)
In this course students will become familiar with concept mapping techniques, constructing web quests, and organizing classroom gradebooks and records. The purpose of these activities is to prepare students to meet the nine technology standards mandated by the Illinois content standards for teaching.

CIEP 362 Literacy Instruction in the Content Area (3 Credit Hours)
This course emphasizes reading and writing instruction as it applies to the subject areas taught in most elementary and secondary schools.
Outcomes:
Students will be able to plan lessons, create materials, and integrate the teaching of reading/writing in content areas (language arts, mathematics, science, social studies)

CIEP 362L Reading & Writing Content Areas Lab (0 Credit Hours)
No course description is available

CIEP 363 Workshop in the Individualization of Instruction (3 Credit Hours)
A workshop designed to assist elementary and secondary teachers, supervisors and administrators to implement instruction based on individual differences in learning styles and abilities.
Outcomes:
Individualized based on student's instructional needs

CIEP 364 Classroom Assessment (2 Credit Hours)
This course is designed to prepare teacher students to address the assessment and evaluation of student progress towards meeting targeted objectives, competencies, goals and standards.
Outcomes:
Students will be able to provide an accurate report of student achievement

CIEP 365 Health/Fitness Education (2 Credit Hours)
Through course readings, discussions, and assignments, issues related to health education in K-8, ideas and resources associated with maintaining a healthy lifestyle will be explored. The importance of nutrition and exercise as part of wellness and prevention of disease in the K-8 student locally & globally will frame course topics.
Outcomes:
Candidates will be able to: 1) demonstrate an understanding of human body systems and the importance of nutrition and exercise as part of wellness and prevention of disease; 2) Reflect on their roles as citizens in local and global societies, in health and wellness interactions and in advocacy roles involving health promotion for children

CIEP 366 Special Topic Seminar (3 Credit Hours)
This course is a seminar for Special Topics for SOE undergraduate students. This seminar will allow SOE to pilot newly developed and approved courses. This seminar will be used by SOE - ADSU, TL, and SPSY - programs covering various educational subjects and interdisciplinary topics.
Outcomes:
Seminar outcomes will be specific to the topic and program

CIEP 375 Theoretical Foundations of Teaching English ELL and Bilingual (3 Credit Hours)
This course is designed to introduce students to an understanding of the historical, political, philosophical, socioeconomic, and educational issues that led to the formation of ESL/BE (English as a Second Language/ Bilingual Education) educational policies, programs, and services for culturally diverse populations.
Outcomes:
Students will understand aspects of language learning and acquisition theories as they pertain to ESL/BE as well as contemporary issues in linguistic and cultural revitalization through bilingual education; Students will discuss current state and national educational legislation that impacts English Language Learners

CIEP 376 Assessment of ELLs (3 Credit Hours)
This course is designed to focus on recent developments and trends in the assessment of first and second language learning and content area learning for English Language Learners.
Outcomes:
Students will be able to use, analyze, and evaluate assessments in current use in K-9 schools systems with an emphasis on the use of assessment in planning instruction

CIEP 390 Field Study in Education (3 Credit Hours)
This course provides an opportunity to work with a small group of 8th graders from underserved Chicago public schools to improve their math achievement.
This course satisfies the Engaged Learning requirement.

CIEP 398 Independent Study (1-3 Credit Hours)
The student and a sponsoring faculty member will determine an advanced topic for the student to work on. Independent study of selected topics in Education under the supervision of a faculty member.

CIEP 400 Fundamentals of Research: Special Education (3 Credit Hours)
No course description is available

CIEP 401 The Exceptional Child (3 Credit Hours)
This course is designed to provide a psychological and educational examination of exceptionality as related to school- age children and youth.
Outcomes:
Students will articulate defining characteristics of a range of disabilities as well as knowledge of a range of educational modifications made for students with special needs

CIEP 409 Evidence Based Interventions (3 Credit Hours)
This course is designed to provide students with an introduction to evidence-based interventions used in school psychological service delivery. Course content includes definitions of evidence-based interventions, process for identifying evidence-based interventions in school psychology, and a review of well-established evidence-based academic and behavioral interventions used in school based settings. Restricted to EDS students.
Outcomes:
Upon completion of the course, students will be able to: Define "evidence-based intervention" and differentiate this concept from similar concepts (eg, empirically-supported intervention, evidence-based practice, etc); Identify organizational websites that collect, evaluate, and disseminate evidence-based academic and behavioral interventions for children and adolescents that can be used in school-based settings (eg, What Works Clearinghouse, Doing What Works, Johns Hopkins Best Evidence Encyclopedia, and SAMHSA's National Registry of Evidence-Based Programs and Policies); Interpret the foundational criteria that are used to evaluate the quality of research to determine the strength of an intervention's evidence; Identify several well-established academic and behavioral evidence-based interventions for children and adolescents in school-based settings; Understand the strengths and limitations of developing and implementing evidence- based interventions with minority populations

CIEP 410 Legal Issues - Educating Exceptional Children (3 Credit Hours)
Legal issues relevant to the education of persons with disabilities are examined.
Outcomes:
Students will demonstrate and understanding of legal issues that pertain to students with disabilities as well as other relevant case law in education

CIEP 411 Inquiry Based Science Teaching (3 Credit Hours)
This course examines the theoretical background, practical knowledge, and skills essential for successful inquiry teaching. Candidates will be introduced to the teaching and learning about inquiry. Candidates will also be provided with opportunities to practice inquiry skills in peer teaching lessons. Focus will also be on inquiry in the curriculum and assessment of student learning. This course will also focus on the research findings about the teaching and learning of scientific inquiry in the middle and high school grades.
Outcomes:
Use his/her understanding of scientific inquiry as a guiding framework for the development of classroom demonstrations, laboratory activities, and instructional materials

CIEP 412 Special Topics in Special Education (3 Credit Hours)
Seminar in Special Topics in Special Education. Topics will vary from term to term.

CIEP 413 Psychopathology & School Mental Health (3 Credit Hours)
Enrollment is limited to Graduate Students in the School Psychology Program The purpose of this course is to develop a working knowledge of childhood/adolescent psychopathology from multiple theoretical perspectives. The interactions of individuals, families, communities, schools and mental health providers in either etiology and/or treatment planning will be considered.
Outcomes:
Students will gain knowledge of child/adolescent psychopathology in terms of diagnosis, prevention and intervention

CIEP 414 Instructional Methods-Diverse Population (3 Credit Hours)
This course provides an analysis of and experimentation with various instructional strategies. Students learn how to develop strategies that are appropriate for their content area(s) and meet the needs of diverse learners.
Outcomes:
Students will design curriculum, practice instructional strategies, develop assessment tools, and examine school and community relationships for diverse settings

CIEP 414L Instructional Strategies Lab (0 Credit Hours)
No course description is available

CIEP 415 Models of Instruction (3 Credit Hours)
This graduate course provides an analysis of and experimentation with various instructional strategies. Students learn how to develop strategies that are appropriate for their content area(s) and meet the needs of diverse learners.
Outcomes:
Students will design curriculum, practice instructional strategies, develop assessment tools, and examine school and community relationships for diverse settings

CIEP 416 SPED Administrator: Assessment of Atypical Child (3 Credit Hours)
This course is an introductory course in assessment principles and practices. It is designed to provide students obtaining certification as an administrator the foundation to understand the proper uses of assessment and data. Students will acquire a broad introduction to the topic of assessment. The introduction covers the knowledge of assessment principles and practices. This course will provide students the foundation to understand and discern the proper uses of assessment and data to make individual decisions and broad organizational decisions.

CIEP 417 Scientifically Based Research (3 Credit Hours)
No course description is available

CIEP 420 Multivariate Aspects of Research (3 Credit Hours)
No course description is available

CIEP 421 Reading Literacy Instruction-Elementary (3 Credit Hours)
This course focuses on the theoretical and practical applications of teaching reading to diverse populations in the elementary school. Emphasis will be on children's literature and research-based teaching strategies that are effective in developing literacy within a literate classroom environment.
Outcomes:
Students will be able to make informed decisions regarding the appropriate children's literature, materials, and instructional approaches to implement in elementary school literacy classrooms

CIEP 422 Assessing Literacy (3 Credit Hours)
This course emphasizes a wide range of assessment tools and practices that can be used to plan and evaluate effective reading instruction. Assessments may range from standardized tests to informal assessments and also include technology-based assessments.
Outcomes:
Students will be able to compare and contrast, use, interpret, and recommend appropriate assessment tools and practices to meet the needs of students in the literacy classroom

CIEP 423 Advanced Literacy Instruction in the Content Area (3 Credit Hours)
This course focuses on the theoretical foundations of content instruction in the context of reading and writing to learn in the content areas. Current research on reading, writing, and thinking as well as topical issues related to teaching practices and state and professional guidelines and standards will be examined.
Outcomes:
Students will develop a knowledge base of current reading/writing/thinking theories which can be applied to the teaching of content areas in either elementary or secondary classrooms

CIEP 424 Assessment, Diagnosis, and Evaluation in Reading (3 Credit Hours)
This course provides the research and practical applications of literacy assessment instruments to assess, diagnose, plan, evaluate, and revise effective instruction that meets the needs of all students, including those at different developmental stages and those from different cultural and linguistic backgrounds. Emphasis is on the communication of results of assessments to stakeholders.
Outcomes:
Students will be able to competently assess and diagnose the reading/literacy abilities of students experiencing some difficulties and provide and communicate a plan for effective instruction

CIEP 425 Theory and Practice in Assessment (3 Credit Hours)
This course addresses the purposes, methods, creation, and uses of assessments in a variety of learning contexts (e.g., classrooms, informal learning settings, workplace settings). The course will examine multiple assessment practices (e.g., testing, performance based, self-assessment, work based assessment). The course will also provide an introduction to the psychometrics of assessment.
Outcomes:
Candidates will be able to describe and explain the purposes, theories, and components of various assessment practices; Develop a variety of assessment practices to evaluate learning outcomes across different learning contexts; describe and explain the foundational aspects of psychometrics as it relates to assessment

CIEP 426 Analysis of Reading Materials (3 Credit Hours)
This course is designed to introduce the materials which are available for developmental, corrective and remedial literacy instruction with particular emphasis on the selection of appropriate materials to meet specific instructional needs.
Outcomes:
Students will be able to select materials that match the reading levels, interests, and cultural and linguistic background of their students

CIEP 428 Seminar: Development/Administration of Reading Program (3 Credit Hours)
This is an advanced course for reading professionals and administrators to study, discuss, and evaluate the most effective reading programs. Emphasis is on the developmental processes that support effective programs as well as the guidelines that administrators can implement to encourage best practice in literacy classrooms.
Outcomes:
Students will design a reading program that meets the needs of the students in a school setting

CIEP 429 Teaching Child and Adult Literature (3 Credit Hours)
This course introduces the English/language arts education student and the reading specialist student to the relevance and need for incorporating children's and young adult literature in the classroom and to the development and strengthening of literacy.
Outcomes:
Students will be knowledgeable about a wide range of children's and young adult literature to use in reading instruction for learners at different stages of reading development and from different cultural and linguistic backgrounds

CIEP 430 Practicum: Reading Disabilities (3 Credit Hours)
The focus of this course will be on the effective implementation of a school's literacy and reading improvement research action plan. Emphasis will be placed on the implementation of effective teaching strategies and support systems that will result in the development of literate learners and dynamic learning environments.
Outcomes:
Students will diagnose reading difficulties that exist at a school and develop an action plan to address them; Students will apply reading content, methodology, diagnosis and assessment strategies to create an effective plan

CIEP 431 Three Tier Prevention: Advanced Primary Supports (3 Credit Hours)
This course focuses on universal preventions, which serve as the first tier of three levels of intervention.
Outcomes:
Candidates will learn skills to assist them in (a) identifying and assessing problem behaviors; (b) designing and implementing behavior interventions; (c) designing learning environments that prevent and remediate problem behaviors, and (d) involving key stakeholders to develop agreed upon expectations and strategies to facilitate success for all students

CIEP 432 Three Tier Prevention: Secondary and Tertiary Supports (3 Credit Hours)
This course will focus on the use of secondary and tertiary supports/interventions to enhance the capacity of schools, families, and communities to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will learn skills to assist them in designing and implementing evidenced-based behavior interventions to targeted groups or individuals that improve lifestyle results (personal, health, social, family, work, recreation) for all children and youth by making problem behavior less effective, efficient, and relevant, and desired behavior more functional

CIEP 433 Self-Determination: Self-Management and Transition Planning (3 Credit Hours)
This course will focus on increasing student self-determination through the use of behavioral principles to understand and address problems in self-management. In addition, the course will introduce current perspectives on self-determination and quality of life issues as they relate to individuals transitioning through the life-span.
Outcomes:
Candidates will learn how to apply behavioral principles to develop and implement an individual self-management plan to reach a particular short-term goal

CIEP 434 Practicum I: Consultation and Collaboration-School Personnel (3 Credit Hours)
This course will provide candidates with the opportunity to practice the use of primary supports/interventions to enhance the capacity of schools to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will demonstrate leadership when planning and implementing primary preventions strategies at the school-wide level across all students and will involve appropriate key stakeholders (school personnel, students, families, community members) to develop agreed upon school-wide expectations and strategies to facilitate success for all students

CIEP 435 Practicum II: Consultation and Collaboration-Family and Community (3 Credit Hours)
This course will provide candidates with the opportunity to practice the use of secondary and tertiary supports/interventions to enhance the capacity of schools, families, and communities to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will demonstrate leadership by providing guidance and modeling to school personnel, family, and community member in the use of behavior interventions to improve the quality of life for all children

CIEP 437 Strategies Teaching Social Studies & Arts (3 Credit Hours)
This course is designed to help students examine the complex role of the teacher and to understand principles and methods of curriculum, instruction, and evaluation in schools. Class activities are organized within the content areas of social studies and an appreciation for the arts and include lesson planning, teaching models, the roles and responsibilities of teachers, and educational issues which impact the teaching profession.
Outcomes:
Students will be able to design an instructional plan, demonstrate effective teaching strategies, and articulate current issues in teaching and learning

CIEP 438 Math Elementary & Middle School Teacher (3 Credit Hours)
This course provides the foundation for teaching standards based mathematics in the elementary school classroom. Students study geometry, measurement, data analysis and probability, algebra and number and operations.
Outcomes:
Students will broaden their understanding of elementary school mathematics instruction and teach math lessons in elementary school classrooms

CIEP 439 Teaching Science in Elementary & Middle Schools (3 Credit Hours)
This course is designed to help teacher students develop the theoretical background, practical knowledge, and skills essential for successful science teaching.
Outcomes:
Students will understand and practice instructional models to effectively teach science to ALL students and assess their learning

CIEP 440 Critical Investigations in the Field of Curriculum (3 Credit Hours)
This course critically examines the foundations of curriculum from a critical lens on the field of curriculum. Students study controversial curriculum issues across schools and communities drawing from curriculum theory and policy in lived and specific historical contexts. It starts with the discussion of the history of the field, multiple definitions of curriculum, paradigms, and philosophies and then moves on to wonder about the prospects for the future. Students examine a broad range of historical documents and theoretical essays as they consider essential curriculum questions both in schools and communities.
Outcomes:
This course will educate students in historical and philosophical curriculum inquiry across schools and communities; Students explore curriculum issues in real and particular historical, philosophical contexts and apply them to contemporary curriculum discourses

CIEP 442 Culturally Sustainable Curriculum Development & Implementation (3 Credit Hours)
This course provides the basis for curriculum development and implementation in schools or other professional learning settings. Students will learn theories and practices of developing curriculum based on culturally responsive and sustainable frameworks and practice how to apply these principles in curriculum development. Students will design and implement social justice-oriented curriculum for schools and/or professional settings.
Outcomes:
Students will understand key curriculum development frameworks that integrate culturally sustainable pedagogy

CIEP 443 Evidence-Based Practices in Mathematics and Science Teaching (3 Credit Hours)
This course examines a variety of current theories and recent literature on Evidence-Based Practices in teaching and learning, while best practices will be discussed, analyzed, applied, compared and critiqued. Through a critical examination and analysis of the literature, candidates will learn how to implement best practices that focus on the developmental needs of young adolescents and provide them with effective educational instruction.
Outcomes:
Candidates will become researchers of their own practice and instructional content, which will lead them to become positive change agents for their own classrooms, and by extension, for the larger school community

CIEP 444 Social Justice, Service, Quality (3 Credit Hours)
No course description is available

CIEP 446 Middle School Theory and Practice (3 Credit Hours)
This course focuses on middle level philosophy and structure; student development and diversity; curriculum, instruction, assessment, and planning for the middle school classroom; and the creation of a positive learning environment for the graduate student in teacher certification.
Outcomes:
Students will develop knowledge of middle level philosophy as it applies to education, examine how these beliefs and values affect both teaching and learning, participate in observation studies and research analysis with early adolescents, and design a simulated interdisciplinary thematic unit based on the above understandings

CIEP 447 Technology Enhanced Instruction & Online Teaching (3 Credit Hours)
This course presents the practices for using technology as a tool for instruction and learning. This includes the integration of technology into classroom s and organizations for instruction al and learning purposes, the development of digital learning (e.g., videos, webinars, reusable learning objects), practices for online instruction and use of Learning Content Management Systems (LCMSs)
Course equivalencies: CIEP492/CIEP447
Outcomes:
Candidates utilize technology as a tool to promote learning outcomes; The candidates will learn to practice using various forms of technology enhanced instruction (eg videos, webinars, reusable learning objects); Candidates will also utilize effective practices for online instruction and use of learning content management systems

CIEP 448 Technology Enhanced Instruction II (3 Credit Hours)
This course presents models for instructionally sound use of various technologies including computer technology for K-12 settings. (Part II)
Outcomes:
The student will develop an instructional program based on local, State, and national standards for the use of computers and other associated learning technologies, integrating these plans across subject and content areas

CIEP 449 Practicum: School Technology (3 Credit Hours)
This course is designed to provide the opportunity for students to apply their knowledge and skills in instructional design, technology development, technology planning, evaluation, and professional development within a K-12 environment. Learners participate in monthly sessions with the practicum director and are required to contribute to the threaded discussion designed for this practicum.
Outcomes:
Learners will be able to work as a consultant within a school setting to provide a variety of support to administrators in developing a technology plan; Learners will be able to work as a consultant within a school setting to provide a variety of support to administrators in developing a technology plan; Learner will be able to provide professional development workshops to increase the technology knowledge and skills of teachers, staff and administrators

CIEP 450 Educational Psychology (3 Credit Hours)
The psychological bases of educational theories and practices related to human learning, development and psychological research are studied and critically examined.
Outcomes:
Students will demonstrate knowledge of leading learning theories, human development and assessment of learning as it pertains to evidence-based instruction and practice

CIEP 451 Psychology of Learning (3 Credit Hours)
The dual study of theory and research in human learning is presented, with an emphasis on behavioral and cognitive science models, as well as memory and retrieval systems.
Outcomes:
Students will demonstrate knowledge of validated learning theories in the behavioral and cognitive science domains

CIEP 452 Literacy Theory and Foundations (3 Credit Hours)
This is an advanced course in literacy research and theory, providing historical, cognitive, cultural, and technological foundations for teaching reading and related communication systems in elementary, middle, and secondary schools, and to adult populations of developing readers. The purpose of this course is to acquaint students with the most current research and theory that underlie best practices in literacy education.
Outcomes:
Students will be able to explain, compare, contrast, and critique the major theories and research related to the psychological, sociological, and linguistic foundations of reading and writing processes and instruction

CIEP 453 Emergent Literacy (3 Credit Hours)
This course focuses on the most current understanding of young children's literacy acquisition and development and on the best instructional strategies for teaching young children to read and write successfully.
Outcomes:
Students will be able to apply their understanding of current literacy acquisition research to make appropriate instructional decisions when teaching young children to read and write

CIEP 454 Writing as Literacy (3 Credit Hours)
This course introduces the concept of writing as literacy. It is designed to acquaint students with the most current understanding of writing in a variety of expressive and informative genres.
Outcomes:
Students will demonstrate an understanding of the idea of writers who can then be teachers of writing

CIEP 455 Advanced Curriculum & Teaching in the Middle School (3 Credit Hours)
This graduate level course examines middle school (MS) education (grades 6-8), emphasizing the need to respond in appropriate educational ways to the developmental characteristics of diverse young adolescents (ages 10-14).
Course equivalencies: X - CIEP 351 / CIEP 455
Outcomes:
Effective middle school teacher candidates understand the needs of their students and attend to the development of the whole child, including social and emotional learning; Effective middle school teacher candidates will understand the importance of culturally sustaining teaching; Candidates understand middle school philosophy outlines key components of culture, community, and curriculum that are needed in effective middle schools teaching; Candidates understand effective instruction for middle school students is responsive to their developmental needs and growing cognitive abilities

CIEP 456 Leadership in Reading/Professional Development (3 Credit Hours)
Leadership and learning center this advanced practicum around opportunities for K-12 reading specialist candidate's professional literacy development and training based on school literacy goals, personal literacy interests, and ways to teach others about complex literacy processes.
Outcomes:
Students will be able to plan, implement, and evaluate professional development activities at their grade, school, and/or district level as well as support their own professional development and assist other teachers in identifying, planning, and implementing personal professional development plans

CIEP 457 Implementation Strategies, Planning, and Practices (3 Credit Hours)
Implementing innovations in schools, community and business organizations requires individuals to possess the knowledge and skills to work successfully as change agents. This course is a study of the science, theories, models and strategies that can be used across organizational settings to facilitate the implementation of innovative practices.
Outcomes:
Students will be able to utilize theories, models and strategies to facilitate the planning and implementation of innovations within organizational settings

CIEP 458 Classroom Management (3 Credit Hours)
This course is designed to help teacher candidates develop a classroom learning environment conducive to quality instruction and optimal learning. Topics include: establishing classroom procedures, rules and consequences; teaching social skills; facilitating student teams; and solving behavior problems. Students will design a classroom environment that encourages learning.
Outcomes:
Students will be able to demonstrate a variety of classroom management strategies appropriate to the needs of the students

CIEP 461 Practicum in School Psychology I (3 Credit Hours)
This pre-internship, field-based course deals with supervised experience in assessments, interventions, counseling, and consultation.
Outcomes:
Students will demonstrate initial proficiency in individualized behavioral, academic, learning assessments, interventions, counseling and consultation under supervision

CIEP 462 Ethics and Professional School Psychology (3 Credit Hours)
Enrollment is limited to Graduate Students in the School Psychology program. The course focuses on the professional, legal, and societal context in which school psychology practice takes place and the major functions and competencies of school psychologists.
Outcomes:
The expected outcomes of the course are an enhanced understanding of the roles and functions of school psychologists and models of service delivery

CIEP 463 Practicum Schl Psychology II (3 Credit Hours)
This pre-internship, field-based course deals with supervised experience in assessments, interventions, counseling, and consultation.
Outcomes:
Students will demonstrate initial proficiency in individualized behavioral, academic, learning assessments, interventions, counseling and consultation under supervision

CIEP 466 School Psychology Special Topics (3 Credit Hours)
This course is designed to provide students with the information on constructing a school-based, action-research project that addresses a problem of practice within a school system. Students will learn the fundamentals of defining a problem of practice in a school setting, developing a robust literature review, designing an evidence-based implementation plan to address the problem of practice, and designing data organization tools to evaluate the implementation plan. While much of the information provided can be used to develop any kind of action research or systems change project, there will be a focus on developing the Capstone Project. Through this course you will learn skills to address problems in schools and districts, as well as address the requirements for the Capstone. Students will receive primary assistance on their own Capstone Project with their project chair.

CIEP 469 Issues that Shape Teaching and Learning in Urban Schools and Communities (3 Credit Hours)
This course examines the social, economic, political, cultural and historical factors that impact communities and shape teaching and learning in urban settings. A field experience with a local community organization working on an educational initiative will provide students with the opportunity to participate in, research, and develop understandings around the relationship among organizations, communities, and schools.
Outcomes:
Students will be able to demonstrate a complex understanding of issues that face urban schools, their relationship to local communities and the educational resources that can be generated by partner ships between schools and communities

CIEP 470 Principles of Instructional Design (3 Credit Hours)
Through the development of an instructional product candidates will engage in the activities associated with each step of the ADDIE process. Emphasis is placed on a cognitive model of learning; however, other models/theories of learning may be applied. In addition candidates will use theories of instructional motivation, principles of instruction as well as instructional strategies relevant to the type of knowledge and cognitive domain level of their product to in order to enhance learning. Analysis, Design, Development, Implementation, Evaluation (ADDIE) process to develop an instructional product.
Outcomes:
Candidates will use the steps involved in systematic instructional design process

CIEP 471 Theoretical Foundations of ESL-Bilingual Education (3 Credit Hours)
This course introduces the integral theoretical, historical, political frameworks and ideological constructs that shape the contemporary educational practices for culturally and linguistically diverse students. Content delves into key principles, policies, and practices of language education, including the various models of bilingual education, English as a second language (ESL), English as a foreign language (EFL), and sheltered content instruction. The course builds background of language acquisition theories, key legal precedents, and educational and language policies that influence school programming, assessment, instruction, teaching, and learning.
Outcomes:
Participants will explain how students develop and maintain languages, describe the research basis for bilingual education, and demonstrate how various school stakeholders implement language policies and programs with bilingual students

CIEP 472 Methods and Materials for Teaching ESL/Bilingual Education (3 Credit Hours)
This course provides a comprehensive framework for teaching bilingual students across a range of educational settings and explores the various theories of language teaching and learning that have been promoted at different times. The content delves into various approaches to teaching in monolingual and bilingual instructional settings, as well as pedagogical strategies to support disciplinary learning, language development, and bilingualism/biliteracy. Course topics include instructional planning and implementation, as well as the selection of culturally, linguistically, and developmentally appropriate materials to enhance instruction, understanding, and achievement.
Outcomes:
Participants will design and implement instruction that responds to students' cultural and linguistic backgrounds, supports language development, fosters meaningful interaction with peers, and maintains rigorous expectations for disciplinary learning

CIEP 473 Instructional Leadership for Multicultural Schools (3 Credit Hours)
This course focuses on building capacity in schools to promote the learning, development, and achievement of students from diverse linguistic, cultural, and racial backgrounds, particularly framed within the context of a society faced with issues of poverty, discrimination, racism, and sexism. The course probes important topics such as teacher expectations, student identity construction, and utilization of the rich resources that students bring to educational settings from their homes and communities.
Course equivalencies: X- CIEP 473/ ELPS 465
Outcomes:
Participants will critically analyze their school settings for issues of race, class, culture, language, and gender and then design professional development efforts to promote change with teachers, leaders, families, and communities

CIEP 474 Assessment of Bilingual Students (3 Credit Hours)
This course prepares educators to utilize assessment to inform classroom instruction, specifically focused on authentic assessment of language and content. Targeting educators of bilingual students, the course emphasizes theoretical and practical study of instruments and procedures for assessing culturally and linguistically diverse students. Educators collect data and make instructional decisions based on students' abilities in English and other languages, which involves distinguishing between learning exceptionality and second language acquisition.
Course equivalencies: X-CIEP474/CIEP526
Outcomes:
Participants will design and utilize formal and informal methods of evaluation to assess students' social, emotional, cultural, linguistic, and academic development and achievement, including critical analyses of existing assessment tools for validity, reliability, and bias

CIEP 475 Curriculum Workshop (1-3 Credit Hours)
The course is designed to contextualize, introduce and/or deepen the understanding and appropriation of Ignatian/Jesuit Education/Pedagogy for people who are already engaged in it or planning to engage in it. The course is designed as a philosophy of education course emphasizing the philosophical approach and roots of Jesuit Education. The course can also assist people in the field of education that want to know about Ignatian Pedagogy or are looking for ways of recreating their pedagogical practice from the perspective of Jesuit Education. However, the course can also be accommodated to those looking for an applied approach to enrich and improve a specific pedagogical practice. In this case please indicate this intention to the instructor to make the necessary adjustments.

CIEP 476 Research in the Teaching of Literacy (3 Credit Hours)
In this course, students will survey recent research in the field of reading theory, reading instruction, and reading strategies, as well as research related to the reader, children's literature, and effective reading programs that will cover the scope of primary, elementary, middle school, and secondary schools levels of instruction.
Outcomes:
Students will identify an instructional need within the classroom and develop an action research plan that will address that need

CIEP 477 Prevention, Assessment & Intervention: Academic (3 Credit Hours)
Enrollment is restricted to Graduate students in School Psychology. To provide candidates with the knowledge, skills, and dispositions necessary to assist school-aged students experiencing academic difficulties. They will utilize and evaluate evidence based interventions and learn to effectively communicate this information orally and in writing to help teachers and parents develop, modify academic intervention plans.
Outcomes:
Candidates will be able to evaluate and utilize appropriate academic interventions and identifying evidence based practices

CIEP 478 Behavioral Intervention: Assessment & Support (3 Credit Hours)
The aim of this course is to familiarize students with the professional literature in consultation and to employ data-based decision-making in the design and delivery of consultative interventions.
Outcomes:
Students will be able to design and evaluate two consultation cases; one at the individual level and the second on a classwide-level

CIEP 479 School-Based Consultation (3 Credit Hours)
This course will provide an overview of the knowledge and skills necessary for school psychologists to engage in consultation, collaborative problem solving, and systems level intervention in educational settings. Course content will focus on the collaborative consultation processes, theory and issues related to these processes, as well as relevant research. Content will include adopting a systems level perspective with change being viewed from a preventative framework. Consultation from a cross-cultural view will also be emphasized. This course will also include the opportunity to observe, practice and evaluate the skills required to engage in school-based collaborative consultative services through applied case work, practice, role play, self-reflection, feedback and class discussion.

CIEP 480 Assessment School-Age Students & Adults (3 Credit Hours)
The emphasis of the course is on assessment skills and interpretation of individual cognitive measures with school-age children and adults.
Outcomes:
Students will be able to demonstrate proficiency in the administration and interpretation of a wide variety of commonly used measures of cognitive functioning

CIEP 481 Prevention, Assessment & Intervention: Early Childhood (3 Credit Hours)
Enrollment is restricted to Graduate Students in the School Psychology program. This course provides insight into the developmental assessment of infants & preschool children, and the planning and development of intervention goals.
Outcomes:
Students will gain proficiency in standardized and authentic assessment of language and social-emotional development, cognitive ability, motor skills, achievement, and adaptive behavior in young children

CIEP 482 Prevention, Assessment & Intervention: Behavior (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology. This course is designed to provide students with an introduction to strategies for promoting positive behavior in the context of instructional environments through the use of applied behavior analysis principles and procedures. Course content includes multiple methods of behavioral assessment linked to intervention planning.
Course equivalencies: X-CIEP482/CPSY482
Outcomes:
The students will be able to use strategies for promoting positive behaviors for students in the schools and link their assessments to interventions

CIEP 484 Biological Foundation: Behavior in Schools (3 Credit Hours)
This is a seminar course on cognitive neuropsychological foundations in school psychology. The cognitive neuropsychological basis of educational theories and practices are studied and critically examined. Emphasis is given to current brain research, assessment based on the Cognitive Hypothesis Testing model (Hale & Fiorello, 2004) and resultant neuropsychological process assessment and how medications impact learning, social interactions, and behavioral functioning within the school setting. The course is for nonmedical professionals and provides a basic knowledge of cognitive neuropsychological principles of brain functioning, medications and psychopharmacological treatment.
Outcomes:
Students will demonstrate an understanding of the biological basis for behavior and how these issues relate to academic and behavioral challenges faced in schools

CIEP 485 Prevention, Assessment & Intervention: Social-Emotional (3 Credit Hours)
Enrollment is restricted to graduate students in School Psychology. The students will have an understanding of the theoretical foundations of emotional and behavioral disorders; the diagnostic/eligibility criteria for emotional and behavioral disorders; and the social and emotional assessment instruments and procedures. Students will be introduced to early identification and intervention strategies with regard to social/emotional/behavioral functioning.
Outcomes:
Students will be able to assess and link interventions to help students with social emotional needs in the schools

CIEP 486 Internship: School Psychology (3 Credit Hours)
This course provides university-based supervision for school psychology students completing a nine-month full-time experience conducted in an approved public school setting under a state-approved internship plan.
Outcomes:
Student apply skills in assessing students, consulting with school personnel and parents, counseling students as part of a state-approved internship plan

CIEP 487 Tests & Measurements (3 Credit Hours)
This is a course overview of the history, purposes and uses of various types of tests along with a survey of available tests and criteria used to select assessment measures.
Course equivalencies: X-CIEP487/CPSY487
Outcomes:
Students will demonstrate an understanding of the basic purposes of various psychometric tests and will understand statistical criteria that are used to select tests

CIEP 488 Participatory Action Research (PAR) in Schools and Communities (3 Credit Hours)
This course will provide candidates with the knowledge and skills to use participatory action research (PAR) practices and approaches. Candidates will develop theoretical and practical knowledge related to a collaborative approach to research. The theoretical framework situates stakeholders in schools and community organizations as experts in their field and sees collaborative research between institutions of higher learning and schools and communities as an opportunity to authentically address germane problems and issues while promoting shared learning.
Outcomes:
This course emphasizes valuing the epistemic assets that local stakeholders bring to identifying and working toward solutions that benefit their missions and finding ways to bring attention to their work through research and publications

CIEP 489 Intro School-Based Network (3 Credit Hours)
No course description is available

CIEP 496 Educational Evaluation (3 Credit Hours)
This course provides students with an overview of program evaluation, particularly as it relates to the field of education. Throughout the course, students will be able to practice program evaluation. An assumption of this course is that "the pursuit of professional practice in evaluation requires developing a life of the mind for practice" (Schwandt, 2015, p. 143). Evaluation practices include considering the ethical issues surrounding the role of the evaluator, understanding the social and political dynamics of an evaluation context, determining which evaluation approach to use in a given context, identifying the various roles of the evaluator, developing an evaluation plan, generating and collecting data, valuing and making value judgments, and facilitating use of the evaluation.
Course equivalencies: RMTD406 / CIEP496

CIEP 498 Independent Study (1-3 Credit Hours)
In preparation for advanced degree writing and research, candidates will utilize readings, discussions, and appropriate computer applications to interpret, organize, display, and summarize quantitative study results. Course concepts include probability, normal distribution, tests of significance and correlation, simple regression, and multiple regression are among the tests that may be utilized.

CIEP 499 Directed Research (1-3 Credit Hours)
This course is Directed Research. Course Content, Course Objectives and Outcomes are collaboratively constructed with Research Student and Supervising FT SOE Faculty member. The Directed Research Projects are approved by SOE Program Area faculty and SOE Associate Dean of Academic Affairs.
Outcomes:
Outcomes chosen between the instructor and the student during the semester the course is taken

CIEP 500 Child Development and Cognition (3 Credit Hours)
The purpose of this course is to provide students with a graduate level overview of the key theories of development and cognition. Students will learn about critical issues in development and learning that they will encounter and need to deal with working as psychologists in applied settings. Throughout the course students will be asked to analyze, reflect upon, and critique how theories learned may apply, or not, to those learners whose primary culture may be different from the majority through case studies, online discussion boards (or in-class discussions), and a critical analysis of comparative field site visits.

CIEP 501 Exceptional Learner II (3 Credit Hours)
The purpose of this course is to provide in depth understanding of ethical, professional, and collaborative service provision for children with special needs within a multicultural framework.
Outcomes:
Students will understand the current trends in service delivery for students with low incidence/significant disabilities (eg, partial participation, natural proportions) and the need to expand curriculum, instruction, and assessment strategies to meet individual learning styles and instructional needs

CIEP 502 Trauma Sensitive Schools (3 Credit Hours)
Students will explore literature on trauma sensitive schools and the intersection with race and discrimination. They will use Multi-Tiered systems of support to support students at each tier and support staff and families.
Outcomes:
Gaining a basic understanding of the subject (eg, factual knowledge, methods, principles, generalizations, theories); Learning to apply course material (to improve thinking, problem solving, and decisions); Developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course; Learning to apply knowledge and skills to benefit others or serve the public

CIEP 503 Culturally Relevant Literature for Children & Adolescents (3 Credit Hours)
This course introduces participants to texts and classroom materials that authentically portray and reflect the cultural and linguistic diversity of classrooms and communities. The course focuses on analyzing materials for relevance and authenticity, learning about bilingual students through diverse stories, and using culturally relevant texts to support students' learning and development in classrooms.
Outcomes:
Participants will find, select, and utilize culturally relevant and authentic literature to support students' learning and development in culturally and linguistically diverse classrooms

CIEP 504 Applied Linguistics for Teachers (3 Credit Hours)
This course emphasizes the complex and dynamic role of language in teaching and learning, including implications for effective policy and practice in culturally and linguistically diverse classrooms. The course prompts participants to engage in applied linguistics research to solve problems of practice in the teaching of bilingual students.
Outcomes:
Participants will apply in-depth understandings of language acquisition and development to make informed decisions in practice with the goal to support the learning and language development of linguistically diverse students

CIEP 505 Literacy and Numeracy for Principals (3 Credit Hours)
Pre-requisites: ELPS 481; CIEP 442
The purpose of this course is to introduce principal candidates to the foundations of numeracy and literacy development across PK - 12 settings. Included will be a focus on the development of knowledge and skills required to provide leadership in PK - 12.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

CIEP 506 English Language Learning Practicum (3 Credit Hours)
The practicum experience serves to integrate learning from across the Masters program within authentic teaching and learning environments spanning PK-20 settings. The course involves formal observation, support, and evaluation during classroom teaching with bilingual students, guided by specific practicum assignments that center on backward design via data analysis, classroom environment, and instructional units of study.
Outcomes:
Participants will demonstrate competence, effectiveness, and responsiveness in daily classroom practice with bilingual students

CIEP 507 Language Demands and Development in Disciplinary Classrooms (3 Credit Hours)
Everything we do in classrooms and schools requires language, yet the nuances and complexities of language are rarely explored in educator-preparation programs. As the population diversifies and more students come to schools with competencies in languages other than English, teachers must understand how language works so that they can support students in developing language spanning grades and disciplines. In this course, teachers will explore the language demands within and across academic disciplines and enact scaffolds to support multilingual students' language development by attending to these demands. Course understandings and related pedagogical practices emphasize the value of students' multilingual repertoires and competencies with foci on building metalinguistic awareness and encouraging translanguaging with languages and language varieties. Pedagogical practices will focus primarily on building classroom environments to support students' language development, including contextual features, scaffolds, and procedures.
Outcomes:
Participants will: Describe the role of language(s) in teaching and learning, including how it develops; Distinguish the components of language (eg, phonology, morphology, syntax); Apply knowledge of language components in support of language development; Describe the language functions, features, and domains of disciplinary classrooms; Apply knowledge of language demands to support students' language development; Explain the interplay of home and school languages (eg, metalinguistic awareness); Apply knowledge of metalinguistic awareness in support of language development

CIEP 508 Social Justice for Multilingual Learners (3 Credit Hours)
This course introduces educators to foundational principles and practices for promoting social justice and educational equity while teaching multilingual learners in today's classrooms. A central component to teaching for social justice for students labeled as English learners (ELs), this course prompts educators to deconstruct their identities, experiences, and perspectives on cultural and linguistic diversity as a means to recognize and deconstruct language ideologies, deficit-based perspectives, personal biases, and institutionally driven assumptions. Framed by larger sociolinguistic and sociopolitical themes in the field of EL/bilingual education, educators explore students' diversity in their classrooms and schools and reflect upon current practice with that lens. Participants then draw from the literature to develop personal philosophy statements for serving multilingual learners with goals for their own professional learning.
Outcomes:
Participants will: Discern the central and active role of teachers as language policy actors and language decision makers in classrooms, schools, and communities; Reflect upon previous experiences with and perspectives on language learners, language education, and language diversity; Probe the role of language ideologies in institutional practices in education as a means to examine and deconstruct biases and assumptions; Explore the diversity of classrooms, schools, and communities, including cultural, linguistic, familial, academic, social, emotional, behavioral, and sociopolitical factors; Analyze historical and current practices in schools for multilingual students in line with research and theory of supporting and promoting equity for multilingual students; Define personal philosophies and professional goals for teaching multilingual students

CIEP 509 Literacy Teaching for Bilingual & Multilingual Students (3 Credit Hours)
Literacy is widely seen as one of the most important skills that children need in order to be successful in school and beyond, however the teaching of reading and writing are largely still approached from a monolingual paradigm even though the vast majority of classrooms have students who speak (and are often literate to varied degrees in that language) in at least one other language beyond the language of instruction. Therefore, it is essential that educators acquire the knowledge and skills to consider the development of literacy from a broader, less restrictive linguistic paradigm in order to engage and effectively teach reading and writing to their students who are bi/multilingual. Regardless of teaching context (e.g., grade level; bilingual or monolingual instructional setting, etc.) educators in this course are supported to move away from a monolingual paradigm in relation to literacy development in order to make strong and effective use of their students' literacy knowledge across languages. Participants will apply new learning to implement strategies (such as contrastive analysis, reading and writing opportunities in both languages, etc.) that supports the development and transference of literacy learning across languages.
Outcomes:
Participants will: Explain the relationships between oral language and literacy development and first and second literacy acquisition; Describe the relationships between literacy development, identity and motivation; Describe the different paths to literacy development specifically in relation to oracy and literacy in another language; Identify the ways in which knowledge of different orthographic systems can be beneficial to learning a new one; Apply knowledge of different orthographic systems to support students' literacy development through teaching strategies such as contrastive analysis; Apply knowledge of bilingualism to support students' literacy development across languages; Design strategies for teaching reading and writing that build on students' linguistic and cultural funds of knowledge; Identify the components of knowledge needed to become literate in another language and distinguish between those aspects of literacy that are common across all languages and those that are unique to certain languages; Create classroom environments and materials that support students' bi- or multilingual literacies and engage them in shared literacy events

CIEP 510 Accessing & Adopting General Education Curriculum (3 Credit Hours)
This course provides a review of standards for K -12 student learning with special emphasis on reading and mathematics.
Outcomes:
The student will be able to Assess the curricular, social-emotional/behavioral needs of students with diverse learning and curriculum needs, and develop pedagogical skills to address those differences

CIEP 511 Development Theory & Disabilities (3 Credit Hours)
The purpose of this course is to study the stages of physical, cognitive, social, and emotional development of infants, toddlers, young children, and adolescents with special attention to the similarities and differences among individuals with and without disabilities. The influence of sensory, cultural, and environmental issues on the developmental needs of children and adolescents will be explored. The Council for Exceptional Children (CEC) Ethical Standards for Special Educators and Teacher Preparation Standards will also be addressed.

CIEP 512 Special Education: The Profession (3 Credit Hours)
The purpose of this course is to examine, test, and clarify the student's commitment and understanding of the teaching profession.
Outcomes:
Students will reflect on their role in the classroom through journaling and sharing

CIEP 513 Ethics & Law for Administrators (3 Credit Hours)
This course will deal in depth with current and timely legal and ethical issues in the education of children with disabilities, diverse learners and other children identified as having additional needs in any area of instruction and development, focusing on the administration of special education services in public schools. The approach to and focus on these topics is designed for candidates seeking endorsement as Illinois State-approved Director of Special Education. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and the provision of a free appropriate public education in the least restrictive environment. The delivery of services to special needs children from early childhood through post-secondary transition will be addressed.
Outcomes:
The course will concentrate on statutory and regulatory compliance; fostering effective and productive relationships among administration, professional personnel, service providers and families in serving students with special needs; and timely, efficient, positive-focused dispute resolution

CIEP 514 Advanced Systems Consultation (3 Credit Hours)
As school psychologists who attend to issues of social justice, we sometimes find ourselves in positions where changes to systems need to be made in order to ensure that students' needs are being met. The purpose of this course is to explore systems change from the role of the school psychologist, including conducting a needs assessment and data-based decision-making, and the role of supervisors within school settings to support P-12 students and the professionals who serve them in evolving schools and districts.
Outcomes:
Gaining a basic understanding of the subject (eg, factual knowledge, methods, principles, generalizations, theories); Learning to apply course material (to improve thinking, problem solving, and decisions); Developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course; Learning to apply knowledge and skills to benefit others or serve the public

CIEP 518 Theories and Practices of Partnerships (3 Credit Hours)
This course explores current issues, literature bases, and practical examples related community-based and practice-oriented partnerships focused on improving learning opportunities for youth, their parents/guardians, and various stakeholders in the community.
Outcomes:
Teachers are vital to the success of the students in their classrooms, but we must recognize that teaching and learning happen across many time and spaces, and are influenced by a multitude of factors, beyond the classroom

CIEP 519 Data-based Decision Making (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology. The purpose of this course is for students to gain knowledge in universal behavioral and academic behavior data-based decision-making skills and ways to use these data to make informed curricular and intervention decisions that are of use to schools. The students will be able to use data-based and evidence-based decision-making in working with children and teachers in the schools.

CIEP 520 Doctoral Seminar (1 Credit Hour)
This course will provide doctoral students with an introduction and orientation to the Curriculum and Instruction EdD program as well as an introduction to the dissertation process. This course will focus on the methods and processes involved in developing a prospectus and review of the literature for a dissertation.
Outcomes:
Students will develop a plan of study for their degree as well as a prospectus for their dissertation

CIEP 521 Curr Theory & Rsrch Schools & Cmty:Positionalities,Prspctives,&Trnsformtns (3 Credit Hours)
The purpose of this course is to advance students' understanding of contemporary theoretical underpinnings of curriculum. In this course, the curriculum is understood as both the explicit planned course of learning put before students, and the hidden or latent experiences that students encounter in school and community settings. Students become familiar with the theoretical orientation of research on curriculum and to be able to evaluate the worth of research related to curriculum issues.
Outcomes:
Students will pose a problem, a question or a series of questions that would address the problem, collect data to facilitate answering some or all of the questions, analyze the data, and produce a series of reports on the state of their research in school and community settings

CIEP 522 Curriculum Policy Across Schools and Communities (3 Credit Hours)
This course offers a critical examination of the intersections of curriculum politics, policy, and practice in schools and communities. The goal is to increase students' understanding of the complexities of educational policy in practice as a means to assist them in becoming effective leaders and practitioners who influence and implement curricular policy in service of social justice.
Outcomes:
Students will examine historical and current trajectories of curricular policy spanning educational contexts, using various theoretical frameworks to probe how policy layers, locales, and actors influence the design and implementation in practice

CIEP 523 Curriculum Improvement and School-Community Change (3 Credit Hours)
Recognizing that the growth and development of schools and communities are inextricably linked, this course develops candidates' understanding of curriculum and school reform as well as community improvement. It examines historic school reform and contemporary school change models in addition to school-based reform strategies intended to improve teaching and learning in schools. The course further examines contemporary community development strategies such as community organizing, community economic development, and social service approaches in order to grant insights into the role communities play as potential partners in school improvement.
Outcomes:
Students will assess current research on curriculum reform and community development and their implications for improving student learning and achievement in school settings; Students will work with a local community organization or community schools' site in order to gain insights into how school and community organizations partner together to strengthen learning and developmental outcomes

CIEP 524 Prvlg, Power, & Possibilities: Teaching Soc Justice Schools & Communities (3 Credit Hours)
This course examines social justice issues through a critical lens. Readings focus on the role of race, ethnicity, and cultural contexts in the development of curriculum over time. The course emphasizes teaching for social justice through culturally and linguistically responsive and sustainable instructional and assessment practices.
Outcomes:
This course has been designed for graduate students who want to explore frameworks, perspectives, contexts, and strategies that will help them translate social justice in instruction and assessment practices

CIEP 525 Leading for Social Justice in School Psychology (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course provides an overview of individual, school-level, and national perspectives on leadership and systems change in school psychology, with an emphasis on strategies for bringing about socially just changes in schools.
Outcomes:
The intended outcome is the enhanced ability to lead for social justice as a school psychologist

CIEP 526 Assessment Culturally & Linguistically Diverse Populations (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course focuses on the socio-political issues that under-represented groups face in society including the historical misuses of tests in the placement of ethnic minority youth, and current legal and ethical standards for assessment and intervention with under-represented youth.
Course equivalencies: X-CIEP474/CIEP526
Outcomes:
To produce school psychologists who are aware of multicultural and diversity issues

CIEP 527 Ethics and Law for School Psychologists (3 Credit Hours)
Enrollment is restricted to Ed.D. Students in School Psychology This course focuses on the ethical standard for school psychologists. Students will explore the connection between the psychologist's vulnerabilities, ethical missteps and the development of ethical resilience.
Outcomes:
Students will identify and resolve ethical dilemmas and ethical violations in the practice of school psychology

CIEP 532 Seminar: Essential Curr Readings (3 Credit Hours)
In this course the students will read and discuss a number of books which have had a major influence on the K-12 curriculum in American schools, with an emphasis on Social Justice.
Outcomes:
The student will understand and apply the lessons of the authors to their own situations; The students will consider the various aspects of social justice in completing assignments and discussing readings

CIEP 533 Proseminar: Educational Psychology/School Psychology (0 Credit Hours)
A required two-semester series of seminars designed for all students pursuing the Ph.D. degree in educational psychology or school psychology which focuses on critical issues in the field and the planning of a colloquium series
Outcomes:
Students will have an enhanced knowledge base of critical topic that drive the school psychology and educational psychology literature

CIEP 535 System Consultation in School Discipline Reform (2 Credit Hours)
Pre-requisites: Degree in Education or Law Related Field
The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and technical assistance and rooted beliefs and biases).
Course equivalencies: LAW 684 / CIEP 535
Outcomes:
Students will analyze system level factors and data

CIEP 537 School Discipline Reform: Linking Law Policy and Practice (2 Credit Hours)
Pre-requisites: Degree in Education or Law-Related Field
The course will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy and practice (e.g. racial and special education disparities, juvenile/criminal justice linkages and teacher).
Course equivalencies: CIEP 537 / LAW 686
Outcomes:
Participants will develop a three to five year action plan for school discipline reform

CIEP 540 Seminar Research Curriculum & Instruction (3 Credit Hours)
This course focuses on how current research in curriculum and instruction addresses key curricular questions such as, Does it work? For whom and under what conditions does it work? How does it work? Does a given theory hold?
Outcomes:
Students will be able to: 1) Understand key curricular questions and major areas of research in curriculum and instruction; 2) Evaluate a variety of professional articles and studies in terms of validity, methodology, findings, conclusions, alignment of various components with research question; 3) Synthesize research articles and studies into a coherent and appropriate literature review

CIEP 541 Seminar: Curriculum Issues (3 Credit Hours)
In this course students will study one aspect of current literature in the field of curriculum with intensity.
Outcomes:
Students will be able to apply the current research in an advanced curriculum situation; Students will be cognizant of current areas of curriculum research and be able to find references electronically

CIEP 542 Seminar Theories of Curriculum & Instruction (3 Credit Hours)
This seminar introduces advanced theories and theorists. The process of instruction is applied to a project or problem in an area of the students' choice.

CIEP 543 Seminar School Improvement (3 Credit Hours)
The course focuses on the theories, models, strategies and practices that are germane to school reform.
Outcomes:
The student will understand the dynamics of organizational change, reform, self -organizing systems, and continuous quality improvement

CIEP 544 Prevention, Assessment & Intervention: Advanced Skills (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology. This course will provide students with in-depth hands on introduction to evidence-based cognitive behavioral treatments. The course will also focus on adaptations to match client presentation, ethnicity, culture, and socioeconomic status.
Outcomes:
The course will involve the modeling and practicing treatments such as CBT, which students will learn and demonstrate competently

CIEP 545 Systems Consultation (3 Credit Hours)
This is an advanced course for doctoral level students. The course has two separate but related prongs. First, the students will develop a working understanding of Organizational Development Consultation, demonstrating the skills necessary to perform the role of organization development consultant and in determining when and how to carry out this role.

CIEP 546 School Psychology Advanced Practicum (1-3 Credit Hours)
Enrollment is limited to Doctoral Students in School Psychology The purpose of this course is for students to complete a supervised advanced practicum in a clinical setting that can include schools, clinical or hospital environments.
Outcomes:
Supervised clinical experience in applied school psychology practice

CIEP 547 Clerkship: School & Educational Psychology (0 Credit Hours)
This is a non-credit doctoral level course that provides advanced experience in university teaching, research or direct service to children/adolescents.
Outcomes:
Students will demonstrate proficiency in an advanced area of academic training, based on supervised experience and evaluation by a site supervisor

CIEP 548 Family, School and Community Collaboration (3 Credit Hours)
Enrollment is restricted to students in the Graduate Education program. Blending leading consultation approaches and ecological theory, this course provides an overview of the conceptual frameworks undergirding family/school community collaboration in schools.
Outcomes:
Students who take this course will leave with an enhanced ability to work effectively with families and communities across a wide spectrum of topics and opportunities

CIEP 550 Seminar Educational & School Psychology (3 Credit Hours)
This course is an overview of current topics in school and educational psychology with an emphasis given to the development of a plan for a program of scholarly activity.
Outcomes:
Students will write a research proposal as an entry point for a research program in a particular domain

CIEP 556 Seminar: Problem Solving Thinking & Creativity (3 Credit Hours)
This course focuses on the knowledge base related to human problem-solving, thinking and creating through the presentation of a variety of approaches as they relate to instructional design.
Outcomes:
Students will demonstrate an advanced theoretical understanding of current models of human problem-solving, thinking and creativity along with an understanding of how these approaches drive instructional interventions

CIEP 557 Seminar Learning Theory & Teaching (3 Credit Hours)
This course focuses on the analysis of advanced readings in behavioral and cognitive instructional technology.
Outcomes:
Students will have an enhanced ability critically examine the literature in behavioral and cognitive instructional technology

CIEP 558 Seminar Theories of Intelligence (3 Credit Hours)
No course description is available

CIEP 559 Seminar Theories of Learning (3 Credit Hours)
This course connects current learning theories with curriculum development, instruction, and assessment practices in the schools. Candidates examine school-based implications of theory and research in such areas as multiple intelligences, developmental stages, and ethical/moral development. This course is neither a methods course (focused on developing a repertoire of teaching and learning activities) nor an educational psychology course (focused on applying experimental research to instruction). It is a seminar in which students read the work of current theorists and practitioners in human learning and explore how knowledge of current of current research can impact educational decisions and instructional practice.

CIEP 561 Practicum in Curriculum (3 Credit Hours)
This practicum is intended to help students integrate theoretical and research coursework with practice and to reflect on their own development as researchers and practitioners. Students are encouraged to reflect on their experiences in their programs and use this to examine how they have changed as researchers, practitioners, and people. This course format is hybrid and seminar based, meaning course activities will occur both as a class, and one on one with the instructor. Practicum/seminar meetings will help further develop students' personal and professional philosophy and vision that guide their work as a researcher and practitioner.

CIEP 562 Student Teaching-Graduate Level (6 Credit Hours)
Student teaching is the culminating experience of the Loyola University Teacher Education Program. This capstone course engages the student in the actual activity of teaching all day, everyday, during the semester. Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching.
Outcomes:
Students will demonstrate a basic level of competency in all aspects of full-time teaching including but not limited to lesson and curriculum planning, teaching, classroom management, formal and informal assessment, subject matter competency, and differentiated instruction

CIEP 563 Graduate Special Education-Student Teaching (6 Credit Hours)
Student teaching is the culminating experience of the Loyola University Teacher Education Program. This capstone course engages the student in the actual activity of teaching all day, everyday, during the semester. Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching.
Outcomes:
Students will demonstrate a basic level of competency in all aspects of full-time teaching including but not limited to lesson and curriculum planning, teaching, classroom management, formal and informal assessment, subject matter competency, and differentiated instruction

CIEP 564 Student Teaching Graduate (1-3 Credit Hours)
Student teaching is the culminating experience of the Loyola University Teacher Education Program. This capstone course engages the student in the actual activity of teaching all day, everyday, during the semester. Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching.
Outcomes:
Students will demonstrate a basic level of competency in all aspects of full-time teaching including but not limited to lesson and curriculum planning, teaching, classroom management, formal and informal assessment, subject matter competency, and differentiated instruction

CIEP 571 School Discipline Workshop: Anti-Racism (0 Credit Hours)
As part of the Restorative Justice course, you must participate in an intensive on-campus weekend seminar on equity, anti-racism, and restorative justice. This seminar offers you the opportunity to network with other professionals and engage in exercises and skills-building related to the core principles and practices of restorative justice.
Outcomes:
Apply the principles of restorative practices to address challenges your school or district is facing; Develop an action plan to implement prevention-oriented alternatives to exclusionary school discipline practices in your respective setting

CIEP 586 Doctoral Internship: School Psychology (1 Credit Hour)
In collaboration with ISPIC and APPIC, the student will complete an advanced doctoral level 12 month supervised internship of 2000 hours.
Outcomes:
Students will follow a prescribed doctoral level internship plan to show advanced competencies as a school psychologist under the direction of a licensed clinical psychologist and certified school psychologist

CIEP 590 School Psychology - Supervision (0 Credit Hours)
The purpose of this course is to provide supervised teaching or field based experiences to SPYCH GRAD students. Students will learn to apply essential skills effectively to serve children in a school based setting.
Outcomes:
Develop specific school-based skills, competencies and points of views needed by professionals in the field of School Psychology

CIEP 595 Thesis Supervision (0 Credit Hours)
To be registered for while working on an approved thesis project.

CIEP 600 Dissertation Supervision (0 Credit Hours)
To be registered for while working on an approved dissertation project.

CIEP 605 Master's Study (0 Credit Hours)
To be registered for while preparing a thesis proposal.

CIEP 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career while preparing a dissertation proposal.

CIEP 620 Legal Issues in School Discipline (2 Credit Hours)
The course will address the Constitutional implications of school discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about "zero tolerance" policies, the role that school discipline plays in the "school-to-prison pipeline," and the discriminatory impact of school discipline policies.
Course equivalencies: X-CIEP 620/LAW 683
Outcomes:
Develop a solid understanding of the fundamental legal principles and law that guide school discipline practices in public elementary and secondary schools, including constitutional law, federal and state statutory law and administrative regulations, and case law; Enhance understanding of the policy concerns that have arisen regarding school discipline practices and develop knowledge of alternative approaches

CIEP 625 Restorative Justice in Schools (2 Credit Hours)
This course begins with an immersion experience where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the immersion and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, connections between racial and restorative justice, and systems and structures to accommodate restorative practice within school life. Through additional online seminars, students will strengthen their knowledge of the history, theory, research, and practice of Restorative Justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.
Outcomes:
Distinguish between restorative and punitive motivations, techniques, strategies, and outcomes; Define a restorative mindset within a trauma framework by explaining the components of repairing harm between individuals and within communities; Plan, facilitate, and reflect on proactive and responsive circles (including those focused on: community building, healing, understanding, peace and mediation, celebration); Plan, facilitate, and reflect on effective restorative conversations; Plan, facilitate, and reflect on generating effective restorative consequences through a restorative conversation; Describe the connection between anti-racism and racial justice with principles of Restorative Justice; Identify systems, structures, and stakeholders to support the implementation of restorative justice principles to achieve school or district wide culture change

Dance (DANC)

Discover, search, courses (p. 2953)!

DANC 111 Ballet I: Introduction to Ballet Theory and Technique (3 Credit Hours)
Ballet I is designed to introduce the concepts and vocabulary of ballet with a focus on developing student's body awareness and control. Students will learn about the art form of ballet in relationship to theatre, music and other forms of dance.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: THTR111/DANC111
Outcomes:
Students will improve their posture, flexibility and coordination; They will develop a reference for enjoying ballet performances and create a foundation for further dance training

DANC 121 Modern Dance I: Theories and Techniques (3 Credit Hours)
Modern Dance I is designed to increase student's body awareness, strength, flexibility and musicality. The course studies the technique and theory of Fall and Recovery developed by Doris Humphrey.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: THTR121/DANC121
Outcomes:
Students will develop a basic dance technique and be able to describe and demonstrate the differences between modern dance and ballet; They will understand the history of the development of modern dance as a uniquely American art form

DANC 131 Jazz Dance I: Theories and Techniques (3 Credit Hours)
Jazz I is designed to increase the student's body awareness, enjoyment of movement and appreciation of Jazz dance in theatrical productions. May be repeated once for credit.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: THTR131/DANC131
Outcomes:
Students will improve their strength, coordination, flexibility and correct posture; They will develop basic skills and vocabulary for performing Jazz movements and a framework to view dance in theatrical productions

DANC 212 Ballet Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Students should be familiar with the five feet and arm positions and be able to work in 5th position of the feet. Dancers should demonstrate correct alignment of the pelvis and spine in plie and releve and while working at the barre. Dancer must be able to execute correct articulation of the feet and leg in tendu. They should be familiar with basic petite allegro and action of the feet, hips and legs while jumping. This is a continuing ballet class designed to build on established vocabulary and movement fundamentals with emphasis on ballet as a theatrical art form.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR212/DANC212
Outcomes:
This class further develops strength, posture, flexibility and coordination; Progressions include more work en relev at the barre, development of leg extensions, single leg jumping and more complex movement combinations; Students will develop awareness of a dancer's role in a ballet production

DANC 213 Ballet III: Advanced Continuing Ballet (2 Credit Hours)
Pre-requisite skills: Student must demonstrate correct alignment and articulation at the barre and in the center when standing in first or fifth position. Student should have introductory proficiency in pirouettes en dehors and en dedans as well as petit allegro. This course serves students who have achieved proficiency in the basic elements of Continuing Ballet, but need to develop skills to meet the Intermediate level. Course focuses on reinforcing foundational technique in alignment and articulation and provides opportunities to develop strength, coordination and vocabulary required to advance to 311 Intermediate Ballet.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will increase their awareness of overall dance alignment and articulation; They will develop strength, coordination and vocabulary preparing them for Intermediate Ballet; Students will enhance their ability to travel across the floor as well as conduct pirouettes; Adagio work in the center and grand allegro is introduced

DANC 222 Modern Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Dancers should be able to maintain correct alignment of the legs, back and pelvis standing and shifting their weight. Must be familiar with 1st and 2nd position of the legs and demonstrate basic articulation of the legs in tendu and jumping. This course is designed to further increase student's body awareness, strength, flexibility and musicality. We will study the technique and theory of Fall and Recovery developed by Doris Humphrey as well as learn short excerpts of repertory to be analyzed. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR222/DANC222
Outcomes:
Students will further develop their modern dance technique and be able to execute more physically challenging falls and longer and more complex movement combinations

DANC 224 Majors Modern II (1 Credit Hour)
This course is designed for Dance majors to increase their body awareness, strength, flexibility and musicality through the study the technique and theory of Fall and Recovery developed by Doris Humphrey. Restricted to Dance Majors.
Outcomes:
Students will develop their modern dance technique including falls and longer and more complex movement combinations; They will further their understanding of spatial patterns and musicality

DANC 232 Jazz Dance II: Theories and Techniques (2 Credit Hours)
Prerequisite Skills: Dancers should demonstrate correct placement of the legs, back and pelvis standing and in plié. They should be able to demonstrate basic jazz turns, jazz runs and pas de bourée. Dancers need to use correct position and opposition of the arms in combinations. Jazz II is designed to further develop student's technical ability and awareness of Jazz dance in theatrical productions. Students will learn about professional Jazz dance in Chicago and improve their strength, coordination, flexibility and correct posture in increasingly complex combinations applying the vocabulary and principles of jazz dance. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR232/DANC232
Outcomes:
Students will improve their dance technique, performance skills and appreciation of Chicago's rich tradition of Jazz dance performance

DANC 240 Dance Practicum (1 Credit Hour)
Pre-requisites: THTR 253
Students apply stagecraft for dance in a variety of domains: costuming, lighting, electrics and sound. They will work as running crew for a mainstage dance production.
Outcomes:
Students will acquire a variety of skills necessary for producing dance; including collaboration and organization skills and will gain appreciation for the complexity dance production

DANC 250 Historical Contexts in Contemporary Dance Practice (3 Credit Hours)
Pre-requisites: Must be a Dance major or Dance minor
This course surveys historical flashpoints in the evolution of American contemporary dance. It provides a critical framework for interrogating cultural and sociopolitical influences on concert dance practice and performance. Students will analyze intersecting aesthetics originating from the French courts of Catherine de Medici and Louis XIV, the Atlantic slave trade and Asian theatrical dance forms such as kabuki and bharatanatyam in the development of ballet, modern, tap, jazz and musical theater dance.
Outcomes:
Students will be able to identify historical figures and events that have significantly influenced American theatrical dance; This course gives students the ability describe and interpret dance history by contextualizing sociopolitical and cultural influences on the evolution of dance aesthetics while applying critical race, queer and feminist theoretical frameworks to their understanding of contemporary dance in America

DANC 260 Topics in Dance (2 Credit Hours)
This course is a studio course that explores the theories and techniques of various dance forms. A specific dance genre will be selected each time the course is offered. The course may be repeated two times for credit.
Outcomes:
The student will gain a historical perspective on the dance form presented, as well as demonstrate specific skills required of the dance form

DANC 261 Topics in Applied Dance (1-2 Credit Hours)
This is an all-inclusive heading for courses rarely offered that serve under the Applied Technique designation for the Dance Minor.
Outcomes:
Each offering will provide discipline-specific vocabulary and applied skill acquisition

DANC 270 Dance Kinesiology (3 Credit Hours)
Pre-requisites: Must be an enrolled Dance Major or Dance Minor
The purpose of this class is to present dancers with basic knowledge of the anatomy, physiology, and biomechanics of human movement in dance and non-dance applications.
Outcomes:
Students participate in lecture, physical practice, group and individual projects to understand the mechanisms for dance movement and how movement patterns contribute to the presence or absence of dance injuries

DANC 275 Global Influences on Contemporary Dance Practice (2 Credit Hours)
Pre-requisites: Must be Dance Major or Dance Minor or have instructor approval
This seminar-styled course provides essential experience and knowledge through applied study of diverse lenses and movement styles contributing to contemporary dance practice.
Outcomes:
Identify, Demonstrate and Discuss non-western influences on contemporary dance choreography and practice

DANC 280 Dance & Disability: Interdisciplinary Theory & Applied Movement Practices (3 Credit Hours)
This course explores interdisciplinary theory and applied innovation at the intersection of movement, science, and community engagement.
Outcomes:
Students will demonstrate a working knowledge of best interdisciplinary practices in disability dance practices, and will develop strategies that address the physical, social, and cultural implications of physically integrated dance in multiple settings

DANC 312 Pointe I: Theory and Techniques (1 Credit Hour)
Co-requisites: DANC 213 or 341
This course is practice-oriented and builds on dancers' knowledge of ballet vocabulary, alignment, and strength. Pointework is geared towards the development of a higher level of articulation in classical footwork.
Outcomes:
The student will gain a deeper understanding of ballet technique en pointe, as well as demonstrate specific skills required of the dance form

DANC 314 Pointe II: Continuing Pointework (1 Credit Hour)
This is a studio class that explores ballet technique en pointe. This course is to be taken concurrently with DANC 313 Ballet V Advanced Ballet or 343 Advanced Majors Ballet. Students must be enrolled in Advanced Ballet to be eligible for enrollment in Pointe II. This course explores continuing ballet technique en pointe. It requires students to apply and synthesize all aspects of pointework studies including technique, spatial awareness, dynamics and group forms by preparing and presenting a public performance. It must be taken concurrently with DANC 313 Ballet V or 343 Advanced Majors Ballet. May be taken 8 times for credit.
Outcomes:
Students gain a deeper understanding of pointe technique, as well as demonstrate specific advanced skills required of the dance form; Students apply and synthesize material in a public performance

DANC 323 Rehearsal and Performance (1 Credit Hour)
Pre-requisites: Permission of the department
Dancing, choreographing, or stage managing, in a campus production. Completion of a journal or paper is required. May be repeated up to 12 times.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique into production practice

DANC 324 Modern III: Theory and Techniques (1 Credit Hour)
This studio course develops core strength, coordination and musical, spatial and performance skills through the study the technique and theory developed by Martha Graham as well as contemporary dance practices.
Outcomes:
Dancers will improve coordination, phrasing, physical power, shift of weight, anatomical awareness, performance, projection, flexibility and placement

DANC 331 Jazz Dance III: Intermediate Jazz Dance Theories and Techniques (2 Credit Hours)
Pre-requisites: Permission of the Instructor
This course develops students' ability to execute Jazz dance technique at an intermediate level. Students improve their dance technique, dynamic, spatial and performance skills. Students apply and synthesize all aspects of jazz dance technique in public performance. This course may be taken six times for credit.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve core strength, coordination, flexibility and correct posture at the intermediate level, in increasingly complex combinations applying and synthesizing all concepts and technique in public performance

DANC 341 Ballet IV: Anatomical Foundations and Cultural Context (1 Credit Hour)
This applied studio technique course emphasizes contemporary scientific anatomical research and cultural context in the study of ballet. Course skills and concepts are applied and synthesized through presentation of a public performance.
Outcomes:
Students will improve strength, alignment, and ensemble skills, develop knowledge and apply anatomical principles, connect the study of ballet to cultural and artistic context

DANC 343 Ballet V: Advancing Ballet: Contemporary Methodologies in Applied Ballet (1 Credit Hour)
This applied studio technique course emphasizes contemporary best practices in the study of Ballet in performance and theory in order to advance artistic and technical proficiency. Course skills and concepts are applied and synthesized through presentation of a public performance.
Outcomes:
Students will improve strength, alignment, and ensemble skills, develop knowledge of universal dance principles and advance their proficiency in contemporary ballet practice; Course skills and concepts are applied and synthesized through presentation of a public performance

DANC 360 Dance Pedagogy (3 Credit Hours)
Pre-requisites: Dance major or dance minor
The study child development, sequential dance pedagogy, biomechanics, nutrition and classroom management techniques as it relates to the teaching of dance. Coursework includes lecture, readings, model teaching, and research. Students observe master teachers instructing children of all ages and create sequential lesson plans consisting of all elements of dance pedagogy.
Outcomes:
Students will demonstrate a working knowledge of child development in relationship to age-appropriate dance skills as well as behavioral expectations; They will develop strategies that address the sequences of skill acquisition as well as concrete strategies for classroom management

DANC 370 Dance Composition (3 Credit Hours)
Pre-requisites: Must be a Dance Major or Dance Minor to enroll; Placement in Level III or higher dance technique courses; Permission of the department required
This course takes students from an introduction to dance composition theory and techniques through the process of creating a group work for the stage. Course work includes lecture, discussion, selected readings, viewing of masterworks of dance composition, creation of several dance studies on various themes and culminates in the creation of a work for performance in the Student Choreographic Showcase.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through the development of short dance students learn the principles of dance composition and then apply them to their own creation performed for a public audience

DANC 380 Senior Showcase Capstone (1 Credit Hour)
Restricted to Senior Dance Majors. This course serves as the capstone of the Dance major and creates a platform for dancers to apply technical skills, theory and practice from many required courses for the Bachelor of Arts including DANC 341/DANC 343 Majors Ballet, DANC 321 Majors Modern, DANC 323 Rehearsal and Performance and DANC 370 Dance Composition.
Outcomes:
Dance majors will apply and synthesize all applied technique courses taken for their dance majors as well as integrate their knowledge of the choreographic and performance process

DANC 394 Internship in Dance (1-12 Credit Hours)
Dance students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a dance organization while reflecting on their work experience and applying theories and techniques acquired from their first dance courses

DANC 395 Independent Study (1-12 Credit Hours)
Pre-requisites: Written permission of chairperson
Independent study projects may be of various kinds and in any recognized area of the dance. Such projects should be done under the close supervision of a dance faculty member.
Outcomes:
To be determined by the student in consultation with the chairperson and dance faculty supervisor

DANC 397 Fieldwork in Chicago - Dance (1-12 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional dance organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Dance and the project supervisor

DANC 398 Research in Dance (1-12 Credit Hours)
Pre-requisites: DANC 323
Faculty serve as mentors for dance students pursuing research opportunities. Platforms cross various domains in cognitive, psychomotor, and artistic development. Students and faculty work together to generate qualitative and quantitative data documented in multiple modalities including: dancemaking, regression analyses, interviews, correlational and case studies. This course satisfies the Engaged Learning-Undergraduate Research requirement.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn discipline-specific language skills, research ethics and methodologies; Students will gain valuable skills disseminating research through performances, scholarly articles, conference presentations and research symposia

Data Science (DSCI)

Discover, search, courses (p. 2953)!

DSCI 101 Fundamentals of Modern Data Science with R (3 Credit Hours)
This course is designed to be an introduction to the basics of data science with R. Students will learn the very basics of data science and introductory programming skills for working with data.
Outcomes:
Students will learn basic programming skills for working with different types of data as well as data visualization, data wrangling, and data management practices

DSCI 399 Data Science Internship (1-3 Credit Hours)
Pre-requisites: DSCI internship coordinator and DSCI program director consent required
This course provides data science students with an opportunity to apply the knowledge obtained through their previous coursework as well as obtain course credits by working on data science projects through paid or unpaid internships. All projects for this course must be accompanied by a written form to be filled out by the student and their internship supervisor, and approved by the data science internship coordinator (DSIC). Students will receive 1 credit hour for every 50 hours worked at the approved internship for a maximum of 3 credit hours. Students taking this course will fulfill their data science capstone requirement.
This course satisfies the Engaged Learning requirement.
Outcomes:
The ability to manage large data sets in preparation for data science analysis; The ability to perform a data science analysis from beginning to end while adhering to the principles of reproducible research; The ability to program in both the R and Python programming languages

DSCI 401 Introduction to Data Science (4 Credit Hours)
Pre-requisites: Restricted to Graduate students
This course provides students with an introduction to data science using the R programming language covering such topics as data wrangling, data visualization, interacting with databases, principles of reproducible research, building simple statistical models/machine learning and data science ethics.
Outcomes:
Students will obtain an extensive background in the basic tools used in the field

DSCI 470 Data Science Consulting (2 Credit Hours)
Pre-requisites: STAT 408
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
Outcomes:
Students will apply methods learned in prior classes to address a real-world problem, gain oral and written presentation skills, and improve collaboration skills

DSCI 494 Data Science Research Design (2 Credit Hours)
Restricted to DSCI Graduate students. Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement research design practices in data science

DSCI 499 Data Science Research (1-8 Credit Hours)
Restricted to DSCI Graduate students. Students will conduct independent hypothesis-driven data science research under faculty guidance. Research efforts will include literature surveys, research design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for data science research

DSCI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: DSCI 499
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

Digital Humanities (DIGH)

Discover, search, courses (p. 2953)!

DIGH 400 Introduction to Digital Humanities Research (3 Credit Hours)
Enrollment in DIGH 400 is the prerequisite for DIGH 401, 402, 500, 595. An introduction to the digital humanities, work in a variety of humanities disciplines--literature, art, philosophy, theology, and history--that involves computer assistance in conducting or presenting research. This includes, for example, digitizing, markup, editing, publishing, archiving, analyzing, visualization, modeling, interpretive gaming, and instructional and interface design. This course will emphasize research questions and methods from a range of humanities disciplines--not computer technology per se but ways that computing can further humanities research agendas.
Outcomes:
Knowledge of how computing affects research in humanities, critical thinking about technology and humanities, awareness of broad social and ethical questions surrounding old and new, print and digital, media in contemporary culture

DIGH 401 Introduction to Computing (3 Credit Hours)
Pre-requisites: DIGH 400 co-enrollment
Primarily for DH students, the course combines historical study with a hands-on approach to computers their growing role in academic research, publishing, libraries, and the arts. Topics will include the structure of computers, the relation of hardware and software, text and image markup and publishing, database theory and design, modeling and visualization, text analytics, procedural logic, and the basic concepts of programming, artificial intelligence, and the social, ethical, and intellectual contexts for computing.
Outcomes:
Procedural literacy, historical knowledge of hardware and software platforms, ability to be a scholar-programmer or to collaborate fruitfully with scholar-programmers

DIGH 402 Digital Humanities Design (3 Credit Hours)
Introduces students to design and human computer interaction.
Outcomes:
Students gain practical experience with design, testing, and building ethical digital projects

DIGH 403 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: DIGH 400, DIGH 401, DIGH 402
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks

DIGH 405 Special Topics in Digital Humanities (3 Credit Hours)
Special topics in Digital Humanities or new approaches of current interest to the instructor.
Outcomes:
Dependent upon course topic; must be approved by GPD

DIGH 499 Independent Study in Digital Humanities (1-3 Credit Hours)
Students work under the direction of a faculty member on a particular area of interest within Digital Humanities.
Outcomes:
Students advances their research projects with direct and regular input from a faculty member

DIGH 500 Digital Humanities Practicum (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.
Outcomes:
A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

DIGH 501 Digital Humanities Project (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
In this capstone, students will apply skills they've learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.
Outcomes:
A working, practical final digital humanities project published online

DIGH 605 Master's Study (0 Credit Hours)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up any MA requirements, such as their field examinations and research project.
Outcomes:
Advancement to degree completion

Doctor of Nursing Practice (DNP)

Discover, search, courses (p. 2953)!

DNP 510 Capstone Seminar (1-3 Credit Hours)
The DNP scholarly project demonstrates an in-depth knowledge of each student's area of specialization in nursing practice. This project relates to advanced practice in the nursing specialty and benefits a group, population, or community rather than an individual patient. The DNP Scholarly project is a synthesis of the student's work and lays the groundwork for future scholarship with the goal of a tangible and deliverable academic product derived from the practice courses and immersion experience. The DNP scholarly project, unlike that of PhD level research, may take a number of forms such as: practice change initiative; pilot study; program evaluation; quality improvement project; evaluation of a new practice model; or a consulting project. This course addresses the unique needs and challenges second year DNP students face while completing their projects. Seminar content focuses on skills necessary for successful clinical project completion through: presentations, selected readings and online forums. The seminar operates at the group level and is designed to work in concert with and support individual students' DNP Faculty Director and external mentor (often the student's preceptor at the project site). Course content parallels the three overall stages of a DNP Scholarly Project: the design, proposal submission and proposal approval (First semester); project implementation (second semester); and, final presentation and dissemination (third semester). Students are expected to have a Faculty Director for their project and a tentative external mentor in place prior to course entry. This seminar is completed sequentially over a minimum of three semesters. Students are expected to be enrolled in this course each semester that they are working on the DNP Scholarly Project.

DNP 511 Practicum (1-6 Credit Hours)
Theory, evidence, and the systematic translation of research into practice serve as the foci for DNP practicum experiences across the program of study. Students investigate clinical problems and refine their clinical translational capabilities within the context of the broader health care system. Clinical learning is directed toward systematic application of knowledge and scientific discovery in resolving new or persistent problems affecting the safety and quality of patient care. Mentored clinical application of evidence-based knowledge and skills, as well as independent investigation and evaluation of outcomes, supports integration of the DNP role into the complex circumstances of contemporary nursing practice. Leadership, consultation, advocacy, fiscal accountability and interdisciplinary collaboration serve as core competencies to effect organizational change.

Economics (ECON)

Discover, search, courses (p. 2953)!

ECON 201 Principles of Microeconomics (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, PSYC 100, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to demand and supply, consumer choice, price analysis in alternative industrial organizations, and the distribution of income.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
Students will be able to think critically about price formation in different market structures, and how prices, household incomes and income distribution in a diverse society are determined with interpretations based on the concepts of opportunity costs and decision making under uncertainty

ECON 201H Principles of Microeconomics - Honors (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. Restricted to SBA honors students or Honors students. This course is an introduction to demand and supply, consumer choice, price analysis in alternative industrial organizations, and the distribution of income.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
Students will be able to think critically about price formation in different market structures, and how prices, household incomes and income distribution in a diverse society are determined with interpretations based on the concepts of opportunity costs and decision making under uncertainty

ECON 202 Principles of Macroeconomics (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, PSYC 100, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to national product, its components, money and the real sectors and business fluctuations.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
The students will be able to think critically about the economic environment of the nation and to measure growth, unemployment, inflation, fiscal and monetary policies of the government, to ultimately understand economic stability and the welfare of the individual citizen

ECON 202H Principles of Macroeconomics - Honors (3 Credit Hours)
Restricted to SBA honors students or Honors students. This course is an introduction to national product, its components, money and the real sectors and business fluctuations.
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
The students will be able to think critically about the economic environment of the nation and to measure growth, unemployment, inflation, fiscal and monetary policies of the government, to ultimately understand economic stability and the welfare of the individual citizen

ECON 303 Intermediate Microeconomics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of C- in ECON 201 or 201H; ECON 202 or 202H; and one of the following: MATH 130, MATH 131, or MATH 161
This course is a detailed study of consumer and firm behavior, market structures, and the elementary propositions concerning welfare economics.
Course equivalencies: ECON303/303H
Outcomes:
The students will develop analytical skills to understand and predict consumer and firm behavior, understand the underlying pinning of antitrust legislation and dynamic market strategies

ECON 304 Intermediate Macroeconomics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of C- in ECON 201 or ECON 201H; ECON 202 or ECON 202H; and one of the following: MATH 130, MATH 131, or MATH 161
This course develops the framework used by economists in government, business and academia to analyze the key determinants of economic growth, the business cycle, unemployment, inflation, the level of interest and exchange rates, as well as explaining how all these variables are influenced by monetary and fiscal policy.
Outcomes:
The students are able to understand and critically analyze business cycles, financial market fluctuations, and to study inflation and unemployment policies

ECON 320 Urban Economics (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
This course analyzes the economic role and functioning of cities and examines urban issues such as real estate markets, transportation, economic development, and crime.
Interdisciplinary Option: Urban Studies
Course equivalencies: X-ECON320/URB320
Outcomes:
Students will understand the economic forces that shape urban agglomerations; Students will understand the economic and ethical trade-offs of various urban economic policies; They will be able to think critically about the economic forces that make a city grow and contract over time

ECON 323 International Economics (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
This course analyzes microeconomic and macroeconomic theories of global trade; balance of payments, adjustment problems and the international monetary system.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-ECON323/INTS323
Outcomes:
Students will be able to demonstrate the ability to critically apply microeconomic and macroeconomic concepts to the understanding of international economic phenomena/problems; This course emphasizes the role of economic leadership to promote peace and justice in a global diverse world

ECON 324 International Monetary Relations (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
Examination of the operation of the international monetary system and an analysis of the determination of currency flows between countries, with topics of balance of payments statements, currency flows between countries, determination of exchange rates, and international liquidity problems.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-ECON324/INTS324
Outcomes:
Student will be able to demonstrate an understanding of the operation of the international currency market and be able to analyze exchange rates with an emphasis on international liquidity and currency problems, and risk management of currency fluctuations

ECON 325 Economics of Growth & Development (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
This course describes and analyzes the problems and policy issues facing developing countries and the third world with respect to their economic and social policies and programs.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-ECON325/INTS325
Outcomes:
The students are trained to evaluate the economic conditions that are conducive to economic growth and critically assess ethical arguments as they relate to growth, trade, and poverty in emerging countries; The role of leadership is emphasized

ECON 327 American Economic & Business History (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
This course emphasizes the evolution and the role of past business leaders of the American economy from the colonial times to the present, emphasizing the entrepreneurs and the environments in which they operated. Economic and business change in the period 1865-1914 receives particular attention, as do the enterprises of Chicago-area entrepreneurs.
Outcomes:
Students learn the skills required of entrepreneurs and business leaders and their contribution to society; Students will develop an awareness of the historical dynamics that produced the current economy, and how its institutions evolved and the importance of markets in allocating resources

ECON 328 Environmental Economics (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201
This course applies economic theory to environmental and natural resource problems and policies, investigates the role economic incentives play, and discusses externalities, property rights, common property problems, pollution and pollution control, and renewable and non-renewable resource management.
Course equivalencies: X-ECON328/ESP 328
Outcomes:
Students will understand that environmental problems are fundamentally economic problems that come about because there is a market failure (eg, an externality or public good) and that environmental problems have economic solutions

ECON 329 Health Economics (3 Credit Hours)
Pre-requisites: Sophomore standing and a minimum grade of "C-" in ECON 201
This course provides an understanding of the unique economic complexities of the health care industry and individual health behaviors. Relying on economic principles of scarcity, efficiency, productivity, and market behavior, demand and supply of health care, the role of government in determining health care policy, and medical practices are explored.

ECON 334 Economics of Government Expenditures & Taxation (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 303 and 304
This course is an analysis of taxation and expenditure, instruments and policies as they relate to the allocative, distributive, and stabilization functions of government and society and ethical responsibilities of each.
Outcomes:
The student are able to understand and analyze public policy issues, specifically as it relates to the voting process, size of government, tax policy debates, and long-term problems of transfer payments in an aging society

ECON 336 Monetary and Fiscal Policy (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201, 202 and 304
This course uses macroeconomics to critically analyze the evolution of monetary and fiscal policy from the late 19th century to the present as well as current trends and topics relating to monetary and fiscal policy.
Outcomes:
Students will develop critical economic thinking skills as they apply macroeconomic theory to historical events and discuss the potential future paths of the world economy and for assessing the leadership role of the government and Federal Reserve System in stabilizing the domestic and world economy

ECON 346 Econometrics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ISSCM 241 or ISSCM 241H or STAT 103; ECON 202; ECON 303; and MATH 130 or MATH 131 or MATH 161
This course teaches students how to use statistical tools to evaluate hypotheses about economic models.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to interpret and critically analyze quantitative information related to economics; Students will understand regression analysis and understand how to use it to test economic models and to measure important economic parameters, and to predict economic relationships

ECON 360 Labor Economics (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 303
This course is an intensive examination of the market for labor services, and discusses wage determination, occupational and earnings differentials, diversity, investments in education, collective bargaining, and the ethical implications of labor market inequality.
Outcomes:
Students will gain a broad understanding of how economists study labor market issues and outcomes, and be able to use critical economic reasoning to better appreciate such issues as labor force participation decisions, human capital, and the variation in wages across individuals

ECON 370 Pricing & Industrial Organization (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 303
This course investigates firm behavior, strategies and market outcomes in settings of less than perfect competition.
Outcomes:
Students learn to evaluate various strategies both in terms of firm profitability as well as consumer surplus

ECON 395 Independent Study in Economics (1-3 Credit Hours)
Pre-requisites: Sophomore standing, instructor and dean permission required
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Economics not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in Economics

ECON 399 Special Topics in Economics (1-3 Credit Hours)
Pre-requisites: Sophomore standing
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ECON 420 Managerial Economics (3 Credit Hours)
Pre-requisites: ISSCM 400 OR ISSCM 400N
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420B Managerial Economics (3 Credit Hours)
Pre-requisites: ISSCM 400 or ISSCM 400N
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions. Restricted to students in the Baumhart Scholars Program.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420E Managers, Markets and Decision Making (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. The purpose of this course is to guide students in recognizing, analyzing, and solving managerial problems related to firms and markets under conditions of uncertainty. The course uses economic analysis to understand demand, supply, profit, production, competition, pricing policies and business criteria for investments. Strategic decisions using economic laws influenced by FED will also be examined.
Course equivalencies: ECON 420E/ECON600E

ECON 421 Business Fluctuations (3 Credit Hours)
Pre-requisites: ECON 420
This course studies the economic environment's impact on the firm where topics include national income accounting, factors in economic fluctuations and growth, fiscal and monetary policies, economic forecasting, the relationship of foreign trade and balance of payments on economic activities, economic indicators and measures, and problems of public policy.
Outcomes:
Students learn to recognize the macro environment and the business cycles in which to operate in and to make learned forecasts

ECON 424 International Business Economics (3 Credit Hours)
Pre-requisites: ECON 420
This course analyzes topics in international economics, specialization and comparative advantage, balance of payments and foreign exchange, elements of commercial policy, and international investment.
Outcomes:
The students develop skills in this course in analytical and creative thinking, Communication and team-work in evaluating trade policies and opportunities, comparative advantage, exchange rate dynamics and fluctuations and risk management

ECON 424E Global Issues in Economics (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Examines the role of prices, incomes, interest rates, exchange rates, trade policy, and the global monetary system in determining the movement of outputs and inputs across national boundaries. The gains from trade and the conflicts created by the manner in which those gains are distributed provide a foundation for examining current issues.
Course equivalencies: ECON 424E/ECON 602E

ECON 429 Independent Study in Business Economics (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of economics not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in economics

ECON 522 Game Theory & Strategy (3 Credit Hours)
Pre-requisites: ECON 420
This course studies cooperative and non-cooperative games and winning strategies and discusses prisoners dilemma, tragedies of common resources, executive compensation and auctions as applied to mergers and acquisitions.
Outcomes:
Students learn to think systematically to set strategy for the modern corporate firm in both cooperative and non-cooperative situations and to solve conflicts arising from principal agent problems

ECON 599 Special Topics (3 Credit Hours)
Pre-requisites: ECON 420; Restricted to Graduate School of Business students
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ECON 602E Global Issues in Economics (1.5 Credit Hours)
Examines the role of prices, incomes, interest rates, exchange rates, trade policy, and the global monetary system in determining the movement of outputs and inputs across national boundaries. The gains from trade and the conflicts created by the manner in which those gains are distributed provide a foundation for examining current issues.
Course equivalencies: ECON 424E/ECON 602E

ECON 622 Derivative Securities (3 Credit Hours)
Pre-requisites: FINC 450
This course is a comprehensive introduction to the theory, use, and valuation of derivative securities, with particular emphasis on options and forward/futures contracts. A sound understanding of the intuition underlying option pricing is critical to a thorough understanding of modern finance and financial risk management. We may also look at other types of derivatives as well as some extensions of the most fundamental models.

ECON 625 Applied Econometrics (3 Credit Hours)
Pre-requisites: ECON 420 and ISSCM 491
The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects.
Course equivalencies: X-ECON625/FINC625

Educational Leadership and Policy Studies (ELPS)

Discover, search, courses (p. 2953)!

ELPS 125 Introduction to Leadership Studies (3 Credit Hours)
This course is designed to provide an introduction to foundational theory and perspectives related to leadership. This includes an exploration of contemporary leadership knowledge and skills that are transferable to a variety of disciplinary contexts.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to describe various historical and contemporary perspectives on leadership as well as recognize critical knowledge and skills associated with leadership practice across various disciplines

ELPS 219 History of American Education (3 Credit Hours)
Pre-requisites: HIST 101 or HIST 102
No requirement for students with a declared major or minor in History. This course examines the history, aims, organization, and control of public and private schools in the United States. Emphasis is placed on the historical examination of issues of diversity, inclusion and exclusion as they relate to education.
Outcomes:
Students will demonstrate the ability to evaluate and explain the forces of historical continuity and change in American education

ELPS 222 Foundations of Ethics and Social Justice in Leadership (3 Credit Hours)
Pre-requisites: ELPS 125
This course introduces theories of ethics and social justice as critical frameworks through which to interpret leadership. Attention toward the process of ethical decision-making, using critical reflection as a tool for understanding complex leadership issues, and strategies for advancing leadership focused on social responsibility.
Outcomes:
Students will demonstrate competence in applying ethical and social justice frameworks in the interpretation and analysis of complex leadership issues as well as in the practice of leadership across a variety of disciplines

ELPS 223 Contextual Influences in Applied Leadership: Internship (3 Credit Hours)
Pre-requisites: ELPS 125 and ELPS 222; Leadership Minor
This online and experiential course provides a platform for students to apply learning associated with leadership theory, ethics, and social justice in practice through an applied internship experience. The internship site will provide a discipline specific experience through which to integrate and refine core skills and competencies associated with socially responsible leadership.
Outcomes:
Students will increase their capacity to engage effectively in socially responsible leadership in a discipline specific work context

ELPS 224 Cross Cultural Leadership: Lessons from Rome (3 Credit Hours)
Pre-requisites: ELPS 125; Leadership Minor
This course is designed to examine global and cultural influences on the manifestation of leadership using Rome as a historical and contextual reference point and learning laboratory. The course will examine cultural influences in the understanding of power, authority, and social justice as they relate to leadership and the development of cross-cultural competence.
Outcomes:
Students will be able to identify and describe cultural and global influences associated with power, authority, and social justice on leadership in social contexts

ELPS 230 Globalization, Education and Childhood (3 Credit Hours)
This course examines contemporary global shifts and transformations in how schools and other educational settings are set up and operate. In tandem with this the course examines the experience of childhood and notions of what it means to be a child both in terms of how this varies culturally, socioeconomically, and regionally, as well as how these experiences and conceptualizations are presently being transformed.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate an understanding of how global and local issues are interwoven with regard to education; Students will be able to articulate a nuanced understanding (as regards schooling and education) of the ways that social justice concerns are being both advanced and hindered in our contemporary globalized world

ELPS 240 Urban Education: Policy and Practice (3 Credit Hours)
This course introduces students to some of the central policy questions currently afoot in American public education through consideration of one particular field of concern, Urban Education. Explores the sociological dimensions of schooling, the important questions of how race, social class and ethnicity impact American education, and the relationship between resources and outcomes at the heart of arguments about schools. Students will be able to demonstrate an understanding of the ways that policy is connected to practice in urban education.
Outcomes:
Students will be able to analyze the multiple and contested factors that influence urban education in the US

ELPS 265 Cultural and Educational Policy Studies Internship (3 Credit Hours)
The Internship in Cultural and Educational Policy Studies course is intended to help students integrate theoretical and research coursework with a practical field-based experience to reflect on their own development as professionals working in the field of education.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students develop and refine their professional skills and competencies; Students will be able to identify key education issues domestically and/or internationally and critically analyze them in terms of the relationship(s) between policy and practice

ELPS 300 History of Education (3 Credit Hours)
This course introduces students to the history of education in the United States, exploring the ideologies and theoretical frameworks that have been paramount in different historical periods and the ways they have shaped the social, cultural, economic, and political dimensions of educational institutions in America.

ELPS 301 History of Western Education (3 Credit Hours)
A historical analysis of the rise and development of educational movements, trends, institutions, and policies in the multicultural context of American society.
Course equivalencies: X-ELPS301/HIST302
Outcomes:
Students will be able to demonstrate a historical understanding of the development of educational policy and schooling institutions, and demonstrate a knowledge of the historiographic approaches and debates in the history of education

ELPS 302 Philosophy of Education (3 Credit Hours)
Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. Study of major philosophical theories about educational practice, especially as these relate to pedagogical practice, curriculum development, and the response of schools to particular individual, community, and societal interests.
Outcomes:
The student will become adept at identifying philosophical issues embedded in current educational practice and controversies, especially as these relate to promoting the values of a democratic society, accommodating the interests of the society and particular groups within it, and the realization of social justice

ELPS 310 Leadership: Group Dynamics and a Mission Centered Approach (1 Credit Hour)
This course is designed to familiarize Resident Assistants/Managers with a variety of topics that have been formulated to assist them in building community, developing interpersonal relationships, creating intentional programs, and improving their crisis intervention skills. Topics may include, but are not limited to: identity formation, counseling, ethics, diversity, health, and current events in higher education.
Outcomes:
To inform and therefore improve students performance within university housing through reflection exercises and solution-based problem solving skills

ELPS 311 Student Leadership: Using Social Justice in Developmental Models (1 Credit Hour)
This class will examine social justice as it relates to building communities and creating positive interpersonal relationships between both the Resident Assistant/Manager and hall residents as well as among residents themselves. Topics may include, but are not limited to: program planning, the use of technology, service learning, vocation, career development, and the RA/RM impact on students.
Outcomes:
To inform and therefore improve students performance within university housing through reflection exercises and solution-based problem solving skills

ELPS 325 Leadership Studies Capstone (3 Credit Hours)
Pre-requisites: ELPS 125; ELPS 222; ELPS 223; and enrollment in the Leadership Minor
This course will explore topics such as social change and globalization, creative conflict resolution, the nature of power, oppression and influence, and systemic leadership.
Outcomes:
Students will understand the role of and capacities associated with leading personal and social transformation within their career fields and communities

ELPS 350 Finding Jesuit Jesus:Preparing Prof Life-Live Sprtual Exercise St. Ignatius (3 Credit Hours)
An adapted version of the Spiritual Exercises of St. Ignatius of Loyola, founder of the Jesuits, this 14-day course in Rome, Italy@JFRC provides students the structured time and study to reflect more deeply on faith, the power of God's love and relationships with others as they frame their professional life design. Time for personal prayer, reflection, liturgies, thematic walks and talks are embedded in this course and all of which will help assist students in their faith journey and as they discern, plan and prepare for a professional life. The course intends to advance opportunity for student exploration and understanding of Jesuit history, values and principles - what does it mean to walk, live, discern and work, as people of Ignatius regardless of faith origin. This course is an invitation to imagine and to plan to live a life of service regardless of profession or career choice.
Course equivalencies: ELPS 350/ELPS 450
Outcomes:
To further student understanding of diversity of ideas and beliefs in the world; To enhance student knowledge of concepts and designs of social justice while exploring the ancient history of Rome; To better understand Ignatian spirituality and faith in action in our global and diverse world; To engage in service learning to better understand the plight of refugees around the world and expand student knowledge in the service of humanity through learning, discerning and faith; To advance opportunity for student discernment and understanding of personal and professional vocation; what does it mean to walk, and work as people of and with Ignatius - regardless of faith origin

ELPS 398 Independent Study (1-3 Credit Hours)
This course is an independent study under the supervision of a faculty member.
Outcomes:
The outcome for this course is an independent project, paper or other product that demonstrates advanced knowledge of a topic

ELPS 400 Inquiry Into Educational Policy (3 Credit Hours)
No course description is available

ELPS 401 Documentary Research in Education (3 Credit Hours)
Documentary research in the field of education introduces graduate students to archival research and addresses issues related to the role and use of documents and public and private records.
Course equivalencies: RMTD401 / ELPS401

ELPS 402 Mission and Catholic School Leadership (3 Credit Hours)
This course explores how mission must be central to leadership and how all activities must align with that mission. Students will explore inputs, transformation processes and outputs as they relate to Catholic Ed leadership and school improvement.
Course equivalencies: RMTD402 / ELPS402

ELPS 403 Qualitative Research Methods in Education (3 Credit Hours)
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Course equivalencies: RMTD405 / ELPS403
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

ELPS 404 Entrepreneurial Approaches to Catholic Education (3 Credit Hours)
Mark Casson in his book The Entrepreneurs: An Economic Theory, says that the theory of entrepreneurship rests upon the following definition: "An entrepreneur is someone who specializes in making judgmental decision about the coordination of scarce resources." This could also be the definition of a Catholic school leader! Catholic education is the largest non-public education system in America. But it is also half the size it was in 1960. To stay relevant and thriving, Catholic education must become more innovative and entrepreneurial. We will investigate the process by which innovations are designed and will critically assess the efficacy of a wide range of innovations. What leads to innovation and how is it scaled effectively? We will read and talk to educators, entrepreneurs, and policy makers about design innovations, and will critically assess the efficacy and scalability of a wide range of innovations targeting students, teachers, and schools.

ELPS 405 Introduction to Educational Policy Analysis (3 Credit Hours)
This course is an introduction to educational policy analysis that allow students to critically access the underlying assumptions and politics that guide particular policy choices and evaluate their design, implementation, and impacts.
Outcomes:
Students will demonstrate the ability to critically examine and conceptualize policies, design alternatives and argue persuasively for these alternatives while gaining fluency in the current policy debates

ELPS 406 Foundations Using Data for Continuous Improvement (3 Credit Hours)
This is the foundation course for data-based decision making within the principal preparation series. This graduate course provides skill sets to help future school leaders and administrators to access, interpret, and encourage the use of data to improve student educational outcomes. Restricted to graduate students in the School of Education. Students will learn how to organize, analyze, and synthesize data in order to interpret student and teacher assessment results.

ELPS 407 Leading for Data-based Decision Making (3 Credit Hours)
The primary purpose of this course is to provide candidates with the knowledge, skills, and dispositions necessary to assist school-aged students to accomplish educational outcomes. Restricted to graduate students in the School of Education.
Outcomes:
Candidates will examine data and the use of data in making decisions on several different levels

ELPS 408 Leading for Diversity (3 Credit Hours)
This course focuses on meeting the needs of children from diverse linguistic, cultural, and racial backgrounds within the context of a society faced with issues of poverty, discrimination, racism, and sexism. This course explores issues of second language and second culture acquisition and consider the relationship between identity construction and school success.

ELPS 409 Fundamentals of Instructional Coaching (3 Credit Hours)
The instructional coach provides instructional leadership by supporting evidence-based instructional practices with classroom teachers. This course focuses on developing the elements of instructional coaching: assessment for learning, delivery of effective curriculum, enhancing classroom instruction, and effective classroom management. In developing the role of the instructional coach, candidates will develop skill in building trusting relationships, facilitating support from administrators, and providing confidential, non-evaluative job-embedded professional development for faculty. Models of coaching will be explored as well as a focus on conferencing and facilitation skills.

ELPS 410 Sociology of Education (3 Credit Hours)
This course introduces students to the field of the sociology of education. It examines the societal role of education and the enactment of education using macro-historical, meso-institutional and micro-interactional perspectives, and exposes students to major theoretical traditions in the discipline.
Outcomes:
Knowledge of theories and empirical research that can guide critical evaluation of 1) conditions and problems in K-12 schools 2) ideas, arguments, and points of view regarding K-12 schools

ELPS 411 Special Education in the Catholic School (3 Credit Hours)
This course will examine moral and practical foundations of developing special education programs with the Catholic schools setting. This course will also explore the connection between Church documents and serving students with disabilities in This course is restricted to those enrolled in the Leading Inclusive Catholic Schools

ELPS 412 Urban Education Policy (3 Credit Hours)
This course uses a range of theoretical perspectives, theories and empirical research to analyze urban education policy. This course explores urban schools' and urban educational policy's evolution in response to changes in U.S. cities, urban teaching and school governance, and contemporary educational policies that are prevalent in urban school districts.
Outcomes:
1) Improved ability to critically evaluate ideas, arguments, and points of view regarding urban education policy; 2) Expanded knowledge of contemporary events, issues, movements and policies in urban education settings

ELPS 413 Critical Social Theories (3 Credit Hours)
This survey course examines the foundations, applications, and practice of critical social theories in U.S. education. Through rigorous texts, engaged discussion, and reflective assignments, this course aims to address the following central questions: What is theory and who gets to define that?; What is social theory?; What is critical about critical social theories?; How is theory pertinent to practical, everyday educational practices?; How can and does education contribute to either reinforcing or challenging relations of power and domination in the modern era?; and What is your relationship to critical social theory?
Outcomes:
This course has been designed to meet the following objectives: Students will: 1) Use prior knowledge to make real-word connections to critical social theories; 2) Understand and apply critical social theories to their personal and professional contexts; 3) Increase their reflexivity with regards to critical social issues; 4) Engage in aesthetic educational practices; 5) Embrace conflict as a necessary part of the learning process; 6) Examine the hidden curriculum of higher education through the application of critical social theories; 7) Explore with "play" as a necessary aspect of authentic learning; 8) Experience multimodal approaches to engaging the course content

ELPS 419 Leadership in Higher Education (3 Credit Hours)
This course is designed to provide foundational grounding in leadership theory and research. Specific attention is paid to the evolution of leadership theory, interdisciplinary conceptualizations, administrative applications, pedagogy for teaching and learning, and the leadership development process of college students.
Outcomes:
Students will be able to describe various historical and contemporary perspectives on administrative leadership and their application in higher education, including the influence of gender and culture on leadership development

ELPS 420 Philosophy of Education (3 Credit Hours)
This course examines the philosophical questions embedded in teaching, learning, and schooling.
Outcomes:
Students acquire familiarity with the history of philosophic thinking about education and develop an ability to formulate valid arguments about the fundamental issues in teaching, learning, and schooling

ELPS 421 Theories of Knowledge and Education (3 Credit Hours)
This course examines theories of knowledge and their implications for educational practice from a philosophic.
Outcomes:
Students understand different philosophic explanations of learning and knowledge and acquire the ability to interpret educational practices according to these explanations

ELPS 422 Modern Theories of Education (3 Credit Hours)
An examination of modern theories of education from a series of philosophical perspectives.
Outcomes:
Students develop a critical understanding of modern theories of education

ELPS 423 Value Theory and Education (3 Credit Hours)
Using various value theories, the course examines the practices of teaching, learning, and schooling.
Outcomes:
The student acquires familiarity with theories of value and is able to use them in critically examining the practices of teaching, learning, and schooling

ELPS 424 Jesus the Teacher: A Theology of Education (3 Credit Hours)
The course develops a theology of education based on the account of Jesus provided in the New Testament.
Outcomes:
The student is able to interpret the task of education in light of the life of Jesus

ELPS 425 Foundations in Student Affairs (3 Credit Hours)
This course provides an introduction to the college student affairs profession. Special attention is focused on historical and philosophical foundations, organizational structures, professional roles, functions, and services, and challenges, opportunities, and issues faced by professional staff.
Outcomes:
Students will be able to describe factors contributing to America's diverse system of higher education and its impact on the design and delivery of student affairs programs and services

ELPS 426 Student Affairs Administration Higher Education (3 Credit Hours)
No course description is available

ELPS 427 Foundations in Higher Education (3 Credit Hours)
The purpose of this new course is to provide a comprehensive examination of the foundations of higher education in the United States.
Outcomes:
This course is designed to help students critically engage with central features of higher education institutions, policies, and constituents; Of special interest is the evolution of policies, ideologies and practices that have a direct impact on social justice concerns

ELPS 428 The Junior and Community College (3 Credit Hours)
This course introduces the two-year college and its role in American higher education, including a focus on historical origins, characteristics of students and faculty, curriculum development, governance and collective bargaining, and contemporary issues.
Outcomes:
Students will be able to describe factors influencing the development of the two-year college within the broader system of higher education in the United States, and understand the special role that the two-year institution serves in American society

ELPS 429 Selected Topics in Higher Education (3 Credit Hours)
This course will discuss special topics in higher education policy and practice.
Outcomes:
Students will be able to identify, review and critically analyze significant higher education policy and practice issues

ELPS 430 Curriculum and Pedagogy in Higher Education (3 Credit Hours)
This course examines the notion of curriculum. This course will allow you to consider the following central questions: What are curriculum and pedagogy?; What has curriculum and pedagogy looked like in your schooling experiences?; What roles do curriculum and pedagogy play in the context of higher education & student affairs?; What are the explicit and implicit curricula of higher education & student affairs?; How is higher education & student affairs curriculum created, by whom, and for what purpose?; What is your own understanding and experiences with curriculum and pedagogy in your own life?
Outcomes:
This course aims to model effective curricular design course activities, assignments, readings, and relationships; While the explicit nature of such items is critical, the implicit framings of this course should prove even more impactful

ELPS 431 Evaluation in Higher Education (3 Credit Hours)
This course examines evaluation and assessment philosophy, approaches, models, and practice in higher education with focus on institutional accountability and assurance of quality programs.
Outcomes:
Students will gain an appreciation for the importance of evaluation and assessment of educational programs in higher education and understand strategies employed by institutions to achieve their goals and objectives; Students will also gain an understanding of the range of quantitative and qualitative tools available to measure student learning and developmental outcomes

ELPS 432 Multiculturalism for Social Justice in Higher Education (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course provides an introduction to theory and research related to multiculturalism and social justice. Learning is targeted at increasing students' multicultural awareness, knowledge, and skills in the context of higher education practice.
Outcomes:
Understand social justice conceptual foundations and the various ways in which oppression influences individuals, institutions, and the broader society

ELPS 433 Student Development in Higher Education (3 Credit Hours)
This course introduces cognitive and psychosocial research and theory focused on the maturation and development of traditional aged college students, particularly in the domains of identity, cognition, and moral reasoning.
Outcomes:
Students will demonstrate an understanding of key theories of college student development and their application in improving plans and policies implemented in the context of administration and/or teaching

ELPS 434 American College Student (3 Credit Hours)
This course explores who goes to college, and the affects of cultural background and campus environments on college student experiences.
Outcomes:
Students will be able to explain how campus environments influence student learning and identity including analyzing the experiences of different students and student groups using anthropological and sociological constructs

ELPS 435 Enrollment Management in Higher Education (3 Credit Hours)
This course examines research and theory focusing on student demand for higher education, college choice, recruitment and marketing, public aid policy, retention and student success, and best practices related to enrollment management.
Outcomes:
Students will demonstrate factors influencing both demand for higher education and student choice of institutions, with focus on the role of public financial aid policy in access and choice

ELPS 436 Women in Higher Education (3 Credit Hours)
This course explores issues unique to women as academic leaders and administrators in higher education. It examines the history and challenges that women have faced as students in higher education institutions, exploring the factors that have affected their participation, matriculation, and completion of programs, over time and today. Last, this course will explore gender and expanding issues around identification and sexual orientation, as related to institutional inclusiveness and student supportive services.

ELPS 437 Today's Community College Students (1 Credit Hour)
No course description is available

ELPS 438 Designing Effective Community College Courses (1 Credit Hour)
No course description is available

ELPS 439 Assessing Student Learning in Community Colleges (1 Credit Hour)
No course description is available

ELPS 440 Community College Students as Learners (1 Credit Hour)
No course description is available

ELPS 441 Community College Teaching (3 Credit Hours)
This course examines the curriculum and programs offered within community colleges and the instructional philosophies and strategies used to encourage student success. It will examine the heterogenous population of students who attend these institutions and their learning needs and preferences. The course will also require students to understand the curricular issues faced in today's colleges including elimination of developmental education, use of early college courses, articulation agreements and expanding offerings to include topics germane to diverse students.

ELPS 442 Humanistic Foundations of Education (3 Credit Hours)
No course description is available

ELPS 443 Educational Classics (3 Credit Hours)
Analysis of selected works of major importance in the development of educational theory.
Outcomes:
Student acquires an advanced understanding of the thinking of some persons who have made a major contribution to educational theory

ELPS 444 American Schooling and Social Policy: A Historical Perspective (3 Credit Hours)
A historical analysis of the economic, political, cultural and social factors that helped to shape educational policy and schooling in the United States.
Course equivalencies: X-ELPS444/HIST454
Outcomes:
Students will be able to demonstrate a historical understanding of the development of educational policy and schooling institutions, and demonstrate a knowledge of the historiographic approaches and debates in the history of education

ELPS 445 US and Canadian Education 20th Century (3 Credit Hours)
A historical analysis of US education in the twentieth century with special emphasis on the forces and movements affecting American education examined through comparison with educational change in selected other countries.
Course equivalencies: X-ELPS445/HIST456
Outcomes:
Students will be able to explain changes in educational practice and educational knowledge over the twentieth century

ELPS 446 Historical Foundations of Western Education and Social Policy (3 Credit Hours)
This course examines the development of Western education through an examination of changing concepts of what it means to be an educated person and the intellectual movements and socio-cultural contexts within which such notions have emerged.
Course equivalencies: X-ELPS446/HIST437
Outcomes:
Students will be able to demonstrate a historical understanding of the development of Western education

ELPS 447 History of Modern European Education (3 Credit Hours)
An examination of the development of national systems of education across Europe since the nineteenth century and an analysis of the development of cross-European educational initiatives in the context of the European Union.
Course equivalencies: X-ELPS447/HIST438
Outcomes:
Students will be able to demonstrate a historical understanding of the development of nationally specific and regionally focused educational policies and schooling systems

ELPS 448 International Higher Education (3 Credit Hours)
This course introduces students to the higher education systems of countries around the world, placing a particular emphasis on how each system is confronting the challenges of globalization.
Outcomes:
Students will understand how IHE's respond to challenges of internationalization, massification, scholar & student exchange, access challenges, accountability demands, was well as international trade agreements on the exchange of educational goods & services

ELPS 450 Finding Jesuit Jesus:Preparing Prof Life-Live Sprtual Exercise St. Ignatius (3 Credit Hours)
An adapted version of the Spiritual Exercises of St. Ignatius of Loyola, founder of the Jesuits, this 14-day course in Rome, Italy @JFRC provides students the structured time and study to reflect more deeply on faith, the power of God's love and relationships with others as they frame their professional life design. Time for personal prayer, reflection, liturgies, thematic walks and talks are embedded in this course and all of which will help assist students in their faith journey and as they discern, plan and prepare for a professional life. The course intends to advance opportunity for student exploration and understanding of Jesuit history, values and principles - what does it mean to walk, live, discern and work, as people of Ignatius regardless of faith origin. This course is an invitation to imagine and to plan to live a life of service regardless of profession or career choice.
Course equivalencies: ELPS 350/ELPS 450
Outcomes:
To further student understanding of diversity of ideas and beliefs in the world; To enhance student knowledge of concepts and designs of social justice while exploring the ancient history of Rome; To better understand Ignatian spirituality and faith in action in our global and diverse world; To engage in service learning to better understand the plight of refugees around the world and expand student knowledge in the service of humanity through learning, discerning and faith; To advance opportunity for student discernment and understanding of personal and professional vocation; what does it mean to walk, and work as people of and with Ignatius - regardless of faith origin

ELPS 453 Legal Aspects of American Higher Education (3 Credit Hours)
This course examines complex sources of law that impact higher education with a special focus on the student-institution and faculty-institution legal relationship.
Outcomes:
Students will demonstrate a heightened awareness of the key role that the law serves in its relationship with higher education administration and policy; Students will critically evaluate and implement preventative legal strategies on the campus and understand the ethical and social justice implications of such work

ELPS 454 Budgeting and Finance in Higher Education (3 Credit Hours)
This course examines finance-related issues and trends in higher education and reviews budgeting techniques used by colleges and universities.
Outcomes:
Students will demonstrate skills in analyzing higher education financial statements and other fiscal documents, and understand current patterns of higher education finance and their strengths and limitations

ELPS 455 Comparative Education (3 Credit Hours)
The application of historiographic and social scientific theories and methods to understanding international issues of education.
Outcomes:
Students will demonstrate a sound grasp of the field's major issues and perspectives, the nature of comparativist research, and the work of major figures

ELPS 456 Education & Democratization (3 Credit Hours)
This course will explore some of the conceptual underpinnings of democracy as they relate to contemporary education policy. Texts read include books by Richard Rorty, John Dewey, Cornell West Claudia Rankine and other contemporary writers who work on democracy and education. Themes to be addressed include citizenship education, identity politics, hyper-partisanship, and new nationalisms.

ELPS 457 Comparative Theory (3 Credit Hours)
Pre-requisites: ELPS 455 or consent of instructor
A course in the philosophy and sociology of comparative education knowledge.
Outcomes:
Students will demonstrate a sound grasp of the field's major epistemological issues and a sense of how their own work and that of others fit into the theoretical landscape of comparative education

ELPS 458 International Education (3 Credit Hours)
This Advanced Seminar, which is both theoretical and applied, introduces students to issues and institutions involved in international educational development. This course will provide students with a deep understanding of the changing role of educational development projects in light of the post-2015 development agenda, post-financial crisis and global recession, post-Ebola epidemic, and post-Arabic Spring periods. Students will spend time exploring and understanding how these many `post-contexts and settings¿ are changing the nature of development and the educational responses that are now coordinated across different scales and spaces (national, regional, and global levels). With the aid of class readings and paying particular attention to endogenous and exogenous challenges that Africa and the Middle East confront, discussions will be framed through a comparative and international educational perspective that exposes students to how different theories of education and development influence policy, priorities, and programs of international, national, and local institutions in these regions.

ELPS 459 Organization & Governance in Higher Education (3 Credit Hours)
This course examines the organizational and governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 460 School Administration (3 Credit Hours)
This course serves as an introduction to the administration and governance of American public schools. The course provides an overview of educational administration and the systemic forces that impact upon its functioning.
Outcomes:
Students will be able to apply a systems model approach to school leadership; Students will be able to articulate how to transform school inputs into successful school outputs that build positive will and capacity in order to accomplish the school's vision and mission

ELPS 461 Issues in School Law (3 Credit Hours)
An in-depth examination of current legal issues and their educational implications for district leaders. Emphasis is given to legal issues in personnel practices and district-wide compliance with state and federal laws and regulations. State standards affecting school administration are also examined.
Outcomes:
Students will become familiar with and be able to address school law decisions within the context of school leadership; Students will be able to lead district-wide compliance with state and federal laws and regulations

ELPS 462 The Principalship (3 Credit Hours)
Study of the leadership and administrative responsibilities of elementary and secondary school principals. Topics include: creating a learning community, team-building, school improvement planning, budgeting, staffing, scheduling, and ethical and operational issues in decision-making.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to the ethical and operational issues in decision-making inherent in the leadership role of the school principal as they pertain to various leadership tasks

ELPS 463 School Leadership and the Law (3 Credit Hours)
Provides prospective administrators with an overview of the legal system as it impacts school operations. Intended as a first course in school law, topics include: constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations, and implications for administrative practice.
Outcomes:
Students will be able to demonstrate understanding of an overview of the legal system as it impacts school operations including constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations from the lens of the educational leader

ELPS 464 Workshop: Superintendency (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences in District Leadership offices. This course provides students with the opportunity to develop skills, understandings, and dispositions required of a superintendent - collaborating with boards of education, citizens of the community, and other relevant stakeholders. Restricted to LUC Graduate students.
Outcomes:
Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate and engage in activities that utilize data gathering techniques and analysis to inform programmatic decisions; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs; Understand and can monitor and evaluate district management and operational systems

ELPS 465 Workshop (Variable Topics) (3 Credit Hours)
These workshops focus on specific areas of educational leadership such as: Instructional Leadership, Equity and Justice; Collective Bargaining; Research in Educational Leadership; Instructional Leadership, Cultural Context for Informed Decision Making; The Superintendency.
Course equivalencies: X- CIEP 473/ ELPS 465
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the relevant workshop area

ELPS 466 School Finance and Budgeting (3 Credit Hours)
Study of the processes by which financial decisions are made by local school districts, with special emphasis on the roles of building and district administrators in the budgeting process. Included are the techniques of constructing and managing the budget, while addressing issues of need and equity in the school community. Also covered are the sources of school revenues and an introduction to the process and principles of facility planning. This course is intended as a first course in school finance.
Outcomes:
Students will be able to demonstrate understanding of and competencies pertinent to the school leader's role in building, maintaining, and managing the school budget while addressing issues of need and equity

ELPS 467 School Law & Government (3 Credit Hours)
The legal basis of public education in the United States, with special reference to Illinois major court decisions and statutes are reviewed through the lens of the district-wide leader. Due process, special education, multi-cultural differences, school board relations and other related legal matters will be examined through the role of the superintendent. This course is intended as a second course for a law minor.
Outcomes:
Students will be able to demonstrate an understanding of due process, special education, multi-cultural differences, school board relations and other related school legal matters through the lens of the superintendent

ELPS 468 Problems in Finance and Business Management (3 Credit Hours)
Examination of the social justice issues inherent in developing and evaluating state and local school finance policy, including equity, adequacy, the social and ethical issues associated with allocating resources and relating school costs to achievement. Selected problems of school district financial management are studied, including central office organization, financial management and control, securing and accounting for grant funds, debt financing, insurance and support services management. This course covers topics especially pertinent to district administrators and superintendents.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to district level leadership in financial management, control, and allocation through the lens of social justice issues

ELPS 469 Human Resources in Educational Organizations (3 Credit Hours)
This course explores various facets of human resource administration in educational organizations. Topics covered include organizational equity in strategic planning and compensation, employment justice in recruitment, selection, staff development, performance appraisal, discipline, and an introduction to unionism.
Outcomes:
Students will be able to create a strategic plan from recruitment through continual employment for both certified and classified personnel that supports the school's mission and promotes educational excellence for all

ELPS 470 School Supervision (3 Credit Hours)
This course is designed to examine school formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Students will be able to demonstrate understanding of the nature of teaching and learning, develop the skills for conducting the pre-conference, classroom observation, and post-conference of the clinical supervision model, and develop the capacity to facilitate action research, study teams and cooperative supervision

ELPS 471 MTSS for Instructional Leaders (3 Credit Hours)
The purpose of this course is to provide candidates with the skills to (a) identify and assess the universal level of academic and behavior programming (b) create and sustain secondary and tertiary systems of support (targeted group or individual interventions) (c) develop continuous improvement plans to support the development of the necessary MTSS systems, practices, and processes.

ELPS 472 Administration of Special Education and Pupil Services (3 Credit Hours)
An exploration of legal provisions governing the most current legal issues related to special education and No Child Left Behind, including state rules, regulations and case law. Also examined are the practical issues, such as administering fiscally and ethically responsible service delivery models at the local level. Leadership dimensions necessary to enhance the learning process in an inclusive setting are a special concern.
Outcomes:
Students will be able to demonstrate an understanding of legal provisions of special education and No Child Left Behind, as well as the practical issues, such as administering fiscally and ethically responsible inclusive service delivery models at the local school building level

ELPS 473 Problems in School Supervision (3 Credit Hours)
This course focuses on the critical skills of leading supervision for school leaders within districts and schools. Upon completion of this course, candidates will practice supervision and evaluative skills related to the delivery of curriculum and student outcomes.

ELPS 474 Curriculum Development for Instructional Leaders (3 Credit Hours)
This course focuses on the critical skills of leading curriculum development within schools. Upon completion of this course, candidates will practice leadership skills related to the delivery of curriculum.

ELPS 475 Human Resource Administration for the School District Leader (3 Credit Hours)
Within this course, students explore various facets of human resource administration in educational organizations at the district/macro level. Human resource leadership, as it specifically relates to promoting district vision and mission, will be researched and simulated to develop preferred professional practice that promotes integrity and social justice for the entire educational community.
Outcomes:
Students will demonstrate an understanding of: strategic planning, human resources' system auditing, supervision and evaluation of educational administrators, unions, and collective bargaining

ELPS 476 Technology in School Administration (3 Credit Hours)
A laboratory-based course on the issues and uses of technology and the related skills of applying technology to problem solving in school administration. This includes design of information systems, networks and data bases, software selection and use, instruction, student testing and program evaluation, scheduling, communications and managing school support services. This course includes examining issues with an emphasis on data based decision-making.
Outcomes:
Students will be able to examine school leadership issues through the use of technology in order to make data-driven decisions

ELPS 480 Residency Seminar for MEd Administration & Supervision (0-3 Credit Hours)
This course is part of a sequence of courses for students in the Master's Principal Preparation Program. Restricted to students in M.Ed. Administration and Supervision. Students will meet with their assigned university coach to make progress in completing the electronic onboarding plan.

ELPS 481 Mission Driven Leadership for Principals (3 Credit Hours)
This course will provide the basis for making sound theoretical, ethical, and practical administrative decisions with particular attention given to data-driven decision making to improve student outcomes.
Outcomes:
Candidates will gain an understanding of various leadership theories, adult learning theory and professional practice, and applying leadership theory to improve student outcomes

ELPS 482 School Supervision for Principals (3 Credit Hours)
This course is designed to examine the broad concept of supervision as well as formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions for supervision of teaching that supports the ongoing growth and professional learning of teachers, leading to improved student outcomes for every student

ELPS 483 Human and Fiscal Resource for Principals (3 Credit Hours)
This course explores various facet of human and fiscal resource management in educational organizations through theory and practical application.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to take a strategic approach to resource management in educational organizations

ELPS 484 School Law, Policy Formation, and Community Involvement (3 Credit Hours)
This course covers school law and policy formation designed for candidates seeking to become building leaders in schools.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to understand school law and ethical decision making with particular attention given to building safety, current legal "hot topics," understanding the governance of the local school board and working with the various communities associated with a school

ELPS 485 Instructional Leadership: Equity and Justice (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences. Students study community engagement, board relations development, cultural and community context through the lens of district instructional leadership. Scope: Access, equity and ethical leadership. Restricted to LUC Graduate students.
Outcomes:
Develop appropriate procedures and relationships for working with local governing boards; Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs

ELPS 490 Introduction to Educational Policy Studies (3 Credit Hours)
This policy analysis course examines the general conceptual, ethical, and empirical issues related to educational policy-making at both the macro (national, regional, and state) and micro (local and institutional) levels.
Outcomes:
Students will be able to demonstrate a knowledge of educational policy analysis strategies

ELPS 491 Issues in Educational Policy (3 Credit Hours)
Analysis of selected case studies of important policy issues from various levels of education.
Outcomes:
Students will be able to identify, review, and critically analyze significant educational policy issues

ELPS 498 Independent Study (1-3 Credit Hours)
Pre-requisites: consent of instructor
No course description is available

ELPS 499 Directed Research (1-3 Credit Hours)
Pre-requisites: Consent of instructor
In-depth independent research developed jointly by the student and a faculty director. The topic should be one with which the student has some familiarity so that the research can be an examination of it in-depth.
Outcomes:
Learning outcomes are created individually for each Independent Study

ELPS 500 Seminar in Current Educational Literature (3 Credit Hours)
Overview of methods and techniques of bibliographic research related to students' research material.

ELPS 501 Leadership / Capacity Building Organizations (3 Credit Hours)
M.Ed. IEPE Cohort: Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy. Emphasis will be placed on organizational cultures and organizational learning. Restricted to IEPE Cohort.
Outcomes:
Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy; Emphasis will be placed on organizational cultures and organizational learning

ELPS 502 Fundamentals in College Teaching and Course Design (3 Credit Hours)
Students will assess their experiences in the IHE program based on the tenets of the Jesuit Examen. Students will write a culminating final capstone paper which they will present at a School of Education mini-conference. Students will write a final culminating paper that identifies experiences, people, and places in the program that have impacted them personally and professionally; Students will analyze their successes, failures, and mediocrity as students in the program and articulate the major takeaways from their learning.
Outcomes:
Students will reflect upon their IHE program experience utilizing the principles of the Jesuit Examen

ELPS 503 Critical Perspectives on the Internationalization of Higher Ed (3 Credit Hours)
In this course, students will examine the following question, "What does meaningful, socially responsible internationalization look like?" The course will expose students to a diversity of approaches to internationalization and to prepare them to make informed decisions about internationalization strategies that are 1) congruent with their institutions' mission, constituencies, resources, and values; 2) informed by best practices and empirical research; and 3) rooted in principles of equity and inclusiveness.
Outcomes:
Upon completion of this course, students will be able to articulate the different modalities of internationalization and the main geopolitical, societal, and economic forces shaping the internationalization of higher education worldwide; reflect on how these forces translate into concrete strategies, expectations, and challenges surrounding internationalization at the institutional level; critically analyze the impact that internationalization can have on students, faculty, and other institutional actors, especially in terms of perpetuating inequitable, discriminatory, and exclusionary societal structures; and integrate this knowledge into empirically-supported recommendations for internationalization strategic planning in real-world settings

ELPS 504 Advanced Financial Strategies in Higher Education (3 Credit Hours)
The purpose of this course is to build on a basic understanding of program budgeting to examine institutional financial strategies; state, and federal institutional funding; and public and financial aid polices that effect who has access to higher education. Apply higher education budget fundamentals to gain insight on institutional financial challenges. 2. Identify and assess the impact of the macro-dimensions of finance and how they inform campus level dynamics (e.g., budgeting, planning, equity) that complicate institutional financial decision-making
Outcomes:
Students should be able to demonstrate observable growth in their ability to: 1

ELPS 505 Seminar in Leadership Theory (3 Credit Hours)
This course is designed to provide grounding in leadership theory and research. Critical perspectives will be used to examine the evolution of leadership theory, interdisciplinary conceptualizations of the topic, administrative applications of theory, and pedagogy for teaching and learning about leadership.
Outcomes:
Students will be able apply critical perspectives to the deconstruction and reconstruction of leadership in professional practice

ELPS 506 Strategic Executive Leadership in Higher Education (3 Credit Hours)
This course examines strategic executive leadership in higher education and in particular leader role performance in complex organizational structures. This exploration is grounded in the rich, interdisciplinary body of knowledge on leadership theory and complemented by the infusion of critical perspectives.
Outcomes:
Students will be able apply and engage in executive leadership from a perspective grounded in social justice

ELPS 507 Advanced Governance in Higher Education (3 Credit Hours)
This course examines the governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 508 Equity and Justice in Higher Education (3 Credit Hours)
his workshop/course focuses on diversity, equity, inclusion, and justice in higher education, providing a learning environment for advanced discussions, as well as opportunities for EdD doctoral students to apply learning to practice.
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the area of diversity, equity, inclusion and justice in higher education

ELPS 509 Introduction to Analytics in Higher Education (3 Credit Hours)
This course is designed to help students leverage data sets and systems in applied ways to improve their leadership. The course will cover key education data portals (e.g., IPEDS, Census data, proprietary systems) as well as introduce students to different data visualization techniques (e.g., geospatial mapping, infographics, etc.). Students will produce reports or grant proposals relevant to their career trajectory as a key deliverable.
Outcomes:
After taking a class on data analytics, students should have acquired a range of technical and nontechnical skills, as it relates to higher education as well as gained an understanding of the key concepts and methods used in data analytics

ELPS 510 Seminar in the Sociology of Education (3 Credit Hours)
This course is an advanced seminar that will focus on a specific topic in education that incorporates sociological perspectives and research literature. Students will read in depth on the course topic (reading both theoretical literature and case material), will develop their understanding of texts and the topic through intensive seminar discussion, and will conduct independent research leading to a thorough literature review or empirically-based research paper on a topic related to the course theme.
Outcomes:
Students who complete this course will greatly expand their familiarity with and command of research literature, theory and contemporary cases related to the course theme

ELPS 512 Sociology of Teaching (3 Credit Hours)
This course investigates the practice and profession of teaching of teaching from a sociological perspective. Empirical data and social theory will guide students' learning about the practice and profession of teaching and how different demographic, professional, organizational, and political factors shape them. Students will expand their factual knowledge about the historical and contemporary topics related to the sociology of teaching, and will develop their ability to investigate, analyze and communicate effectively about topics related to the practice and profession of teaching.

ELPS 514 The School as Organization (3 Credit Hours)
This course will expose students to organization theory and its application to understanding the operation, performance, and effectiveness of educational organizations.
Outcomes:
Students will become familiar with foundational literature in organization theory and organizational behavior, and will develop their ability to apply concepts from organization theory and organizational behavior to their analysis to educational organizations

ELPS 515 Seminar in Education Policy (3 Credit Hours)
This course is an advanced seminar that will focus on a specific education policy topic. Students will read in-depth on the course topic (reading both theoretical literature and case material) and will develop their understanding of texts and the topic through intensive seminar discussion. Student develops an advanced understanding of the seminar topic and knowledge of the research literature related to it.

ELPS 520 Seminar in the Philosophy of Education (3 Credit Hours)
An in-depth examination of a topic in educational theory.
Outcomes:
Student develops an advanced understanding of the ways in which an educational issue can be analyzed

ELPS 525 Practicum Higher Education I (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 526 Practicum Higher Education II (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 527 Higher Education Capstone (3 Credit Hours)
ELPS 527 will be offered in both Fall and Spring semesters for all Higher Ed students. This course is a culminating seminar course that facilitates broad conversations, audits and guidance about values discernment, job search process, critical considerations for job fit and placement -successful transition to Higher Ed job market and Higher Ed work communities.

ELPS 528 Internship Higher Education II (1-3 Credit Hours)
Required Internship Experience for graduate Higher Education programs.

ELPS 529 Seminar in Higher Education (3 Credit Hours)
Pre-requisites: consent of instructor
This course is a topical seminar, typically for doctoral students, addressing one or more historical and/or contemporary topics or issues within higher education.
Outcomes:
Students will demonstrate a deepened understanding of one or more topics or issues and the ability to critically analyze these topics/issues using research and theory

ELPS 530 Proseminar: Higher Education (3 Credit Hours)
This course is restricted to Higher Education Doctoral Students

ELPS 540 Seminar in the History of Education (3 Credit Hours)
Pre-requisites: Previous history of education coursework, or permission of instructor
An in-depth examination of a selected topic or area of research in the history of education.
Course equivalencies: X-ELPS540/HIST560
Outcomes:
Student develops an advanced understanding of the seminar topic, knowledge of the scholarly literature on it, and the methods of historical inquiry that can be used to study it

ELPS 550 Seminar on Globalization and Education (3 Credit Hours)
This advanced comparative education seminar examines globalization (economic, social and cultural) both as something that has a profound impact on schooling and as something that education produces. The course will focus on how globalization can be productively theorized and studied by social scientists.
Outcomes:
Students in the course will understand and be able to critically evaluate the diverse range of approaches used by comparative and international education scholars to study education and globalization

ELPS 555 Seminar Comparative Education (3 Credit Hours)
In-depth, cross-national analysis of a special topic in Comparative Education. As topics change, ELPS 555 is repeatable as long as a repeat is not on a topic covered previously.
Outcomes:
Students will demonstrate a sound grasp of the social, economic, and political forces shaping educational systems as they relate to the topic

ELPS 560 Seminar in School Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course provides specific practical recommendations for those leaders who seek to transform their schools into professional learning communities. Students will analyze their current organizational culture and core beliefs through the reframing process.
Outcomes:
Using Wiggins and McTighe (2005 backwards-design model, students will create a needs assessment to gather data on one of their current organization's core beliefs; From this data, students will create a school improvement plan for the change process to close the gaps between the current and desired reality of their organization

ELPS 561 Seminar in Current Issues in Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is intended to provide future and practicing administrators with a mindful framework for raising the questions to realize the moral/ethical dimensions that are currently at stake in our educational institutions with an emphasis on ethical dilemmas involving human resource administration.
Outcomes:
Using professional obligations as a framework for dialogue, students will examine the philosophies of utilitarianism, deontology and ethic of care as they pertain to human resource management in schools; Based on these three ethical lenses, students will create their own professional code of conduct and apply it to resolve multiple ethical dilemmas surrounding human resource management and leadership in schools

ELPS 562 Practicum School Administration (3 Credit Hours)
Pre-requisites: consent of program director and must be either the last course or next to last course of a student's program
Required of all students seeking administrative certification, i.e. Illinois Type 75 Principal or Superintendent. This course involves students in leadership activities to be carried out at a work site under the supervision of the university instructor and a cooperating administrator at the work site. Students must complete a minimum of 100 hours of approved leadership activities. Students are required to attend an orientation session during the semester prior to the semester in which they enroll in the practicum. Practicum is offered only in the fall and spring semesters.
Outcomes:
Students will be able to demonstrate competencies in a myriad of leadership and administrative areas relevant to the leadership role appropriate to the certification sought, the school principal or the school superintendent

ELPS 563 Administrative Internship (3-6 Credit Hours)
This course is designed as a supervised internship to provide aspiring teacher leader an on-the-job leadership experience in an elementary, middle, or secondary school. The on-site administrative mentor will have appropriate credentials and experiences for the level and department in which the internship is scheduled and experienced. The internship provides the opportunity for teacher leader candidates to relate knowledge and skills acquired through formal course work, readings, research, and simulations to actual teacher leadership experiences. The internship is both an active and a reflective experience designed to encourage the intern to examine the potential role of teacher leaders and functions of schooling and education in light of changing demographics, current local and national trends, and global issues.

ELPS 564 Education Policy Internship (3 Credit Hours)
Pre-requisites: ELPS 405 & ELPS 410
This course provides Cultural & Educational Policy Studies graduate students with an engaged learning opportunity that integrates coursework with professional practice in the context of education policy information, analysis, implementation and/or evaluation and research. Students develop and refine professional skills as well as identify and reinforce connections between graduate coursework and professional experiences.

ELPS 565 International Education Internship (3 Credit Hours)
Supervised experience with an international governmental or non-governmental agency approved by the Director or Associate Director of the Center for Comparative Education.
Outcomes:
Students will demonstrate working knowledge of an internationally oriented organization whose activities are related to their area of scholarship

ELPS 566 Principal Internship One (3 Credit Hours)
This is the first of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 567 Principal Internship Two (3 Credit Hours)
This is the second of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.

ELPS 568 Principal Internship Three (3 Credit Hours)
This is the third of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 569 Principal Internship Four (3 Credit Hours)
This is the fourth of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 570 Supervision Seminar (3 Credit Hours)
Provides students with an in-depth examination into a special topic. Topics vary by section. Course may be repeated.

ELPS 571 Seminar in Current Issues in School Supervision (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is designed to examine current issues in supervision and their impact on providing instructional leadership directed toward school improvement and reform.
Outcomes:
Students will be able to demonstrate a critical examination of issues in the differentiated model of supervision, develop the skills for developing collaboratively a learning organization that frames, analyzes, and resolves problems in instructional improvement, and develop the capacity to work with faculty and other stakeholders to identify needs for professional development, to organize, facilitate, and evaluate professional development, and to ensure that professional development activities focus on improving student outcomes

ELPS 580 Residency Seminar for Students in Educational Leadership (0-4 Credit Hours)
A seminar taken to address the interests and needs of students during Ed Leadership studies. The topics include preparation for the comprehensive examination, Writing Workshop, Internship planning and on-boarding, planning and writing the capstone or dissertation and other topics planned by the EDLD faculty.
Outcomes:
EDLD Students will be able to demonstrate understanding of the various seminar topics presented - internships, dissertation, comprehensive exams

ELPS 595 Thesis Supervision (0 Credit Hours)
This course is a Thesis Research and Writing course. Student is engaged in thesis writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and thesis student. Culminating project is Thesis and thesis defense. Completion of all forms required for thesis completion are the responsibility of SOE graduate student.

ELPS 600 Dissertation Supervision (0 Credit Hours)
This course is a Dissertation Research and Writing course. Student is engaged in dissertation writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and dissertation student. Culminating project is Dissertation and Dissertation defense. Completion of all forms required for Dissertation completion are the responsibility of SOE graduate student.

ELPS 601 Capstone Supervision (0 Credit Hours)
This course is to develop a Capstone project. Students are engaged in planning and writing of the capstone project; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and capstone student. Culminating project is the Capstone Project and Capstone defense. Completion of all forms required for Capstone completion are the responsibility of SOE graduate student.
Outcomes:
School of Education students will complete and defend their required capstone project for an EdD degree; Students will research, write and defend their capstone project under the supervision of a Capstone Chair and Capstone committee

ELPS 605 Master's Study (0 Credit Hours)
This is Master's study course designed for in-depth study, writing and research.

ELPS 610 Doctoral Study (0 Credit Hours)
Restricted to School of Education Doctoral students (PhD & EdD). This course can only be taken two times during a doctoral student's career.

ELPS 620 Dissertation Research (3 Credit Hours)
Conducting research is a complex, demanding, and time-consuming task. The instructor suggests that while one can be familiar with different paradigms of inquiry, one may not necessarily know how to actually undertake the task of planning and effectively proposing an investigation (Locke, et al, 1987). Others assert that what is important and might be challenging is to frame a valid problem and a specific purpose, in addition to ask the right questions which will give direction to relevant research activities (McEwan & McEwan, 2003). Given the challenge and complexity of designing proposals and conducting research activities, it is anticipated that doctoral students may benefit from additional learning experiences that may lead to the successful completion of their research projects (Ovando, 2010) including a support team to facilitate the task of planning a dissertation proposal. As others note, "Having access to a group of peers who are also engaged in the doctoral studies journey provides an excellent source of moral support. In addition, cohort members provide empathetic listening, share resources and offer honest and constructive feedback" (Ovando, Ramirez & Shefelbine, 2008, p. 45). In the spirit of the writing workshop (Calkins, 1986) and the professional learning community (Kanold, 2010), it is expected that all students will engage in literature searches, scholarly writing, and collaborative inquiry in a respectful and productive way in order to enhance their research capacity (conceptual, technical and interactive skills), attitudes and dispositions. Such engagement will lead to the development of a sound dissertation proposal, CITI research approval as a researcher, and to the preparation for the rigor of conducting investigations The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421), and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods.

ELPS 621 EdD Capstone Research (3 Credit Hours)
This course focuses on the application of research understandings, knowledge, concepts and terminology so this is an opportunity for students to incorporate research information, foundational knowledge and conceptual understanding of research methods. While the nature of the capstone project is more personal, this scholarly work is a culmination of student learning. 2) Learn, design, and write the initial chapters of their capstone project. 3) Provide meaningful feedback to their peers regarding specific areas of their capstone project development and writing. 4) Understand the importance of the capstone committee chairperson and other members of the committee.
Outcomes:
1) Enhance their research inquiry capacity and ability to critically analyze research proposals, research reports and reviews of literature

ELPS 661 Internship in School Business Management I (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional capacities related to ethical school business management. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

ELPS 662 Internship in School Business Management II (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional related to ethical school business management. This course completes the state's required two semesters of CSBO Internship. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

Engineering (ENGR)

Discover, search, courses (p. 2953)!

ENGR 100 Engineering Design Fundamentals (1 Credit Hour)
Restricted to students transferring into Engineering. This course provides an introduction to engineering design for students transferring into Engineering, who have completed an external Engineering Graphics course. Major topics include engineering estimation, 2k factorial design, teamwork, engineering ethics, and requirement specifications.
Outcomes:
Demonstration of proficiency in engineering design

ENGR 101 Introduction to Engineering Design (4 Credit Hours)
Restricted to Engineering students. This course is the first of four engineering design courses in the Engineering curriculum. Major topics in this course include engineering estimation, three dimensional computer-aided design, 2k factorial design, teamwork, engineering ethics, requirement specifications, and design iteration.
Outcomes:
1) Demonstration of proficiency in engineering design; 2) Application of teamwork principles to an open-ended design project

ENGR 102 Engineering Freshman Seminar (1 Credit Hour)
This seminar offers a shared learning experience with an assignment of a service project and exposure to Industrial Advisory Board members and Loyola administrators and faculty. In addition to providing intellectual enhancement to the program, these seminars give us a time and place to regularly interact. This class is restricted to Engineering freshman.
Outcomes:
Encourage bonding through a service project, stimulate thoughtful interaction, provide connections with the faculty, and connect to the broader industry community

ENGR 201 Experiential Engineering (3 Credit Hours)
Pre-requisites: COMP 170 and (PHYS 112K or PHYS 122) (each with minimum C-); Corequisite: CHEM 171
This course introduces students to environmental, biomedical and computer engineering-based sensors and signal analysis techniques. Major topics in this course include an introduction to common biomedical sensors, electronics, signals, sampling, analog-to-digital conversion, c programming, microcontroller system architectures, and microcontroller programming.
Outcomes:
Provide an experiential environment to learn about instrumentation and sensors in biomedical, computer and environmental engineering; Introduce complex devices and systems to understand, measure and analyze signals

ENGR 311 Engineering Systems I (3 Credit Hours)
Pre-requisites: ENGR 201 with a minimum grade of C-; Restricted to Applied Mathematics and Engineering majors; Concurrent enrollment in MATH 266 (Engineering majors only)
ENGR 311 covers the fundamentals of signal and system analysis, focusing on representations of discrete-time and continuous-time signals and representations of linear, time-invariant systems. Major topics in this course include convolution, Fourier series, Fourier Transform, and unit impulse and unit step functions. Applications are drawn broadly from engineering and physics.
Outcomes:
Understand basic concepts of discrete and continuous time signals; Employ Fourier analysis to analyze simple LTI systems; Proficiently use MATLAB as a numerical analysis tool

ENGR 312 Engineering Systems II (3 Credit Hours)
Pre-requisites: ENGR 311, ENGR 321, (MATH 264 or MATH 266), and COMP 170
Introduces numerical methods and control systems theory. Students are exposed to root finding, numerical integration and differentiation, numerical solutions to ODEs, curve fitting and regression techniques, classical control system theory methods (Laplace transforms and transfer functions, root locus design, Routh-Hurwitz stability analysis, Bode and Nyquist plots) and the state variable method (controllability and observability). Employ the state variable method.
Outcomes:
Understand the concepts of numerical methods, their strengths and weaknesses; Use MATLAB as a numerical analysis tool; Apply Laplace transforms and transfer functions

ENGR 313 Engineering Systems III (3 Credit Hours)
Pre-requisites: ENGR 312 with a minimum grade of C-; Restricted to Applied Math and Engineering majors
This course is an introduction to discrete-time signal processing and system identification. Major topics include the z-transform, infinite/finite impulse response filters, discrete/fast Fourier transform, models of linear time-invariant systems, and parameter estimation methods.
Outcomes:
Reinforce fundamental knowledge of signal processing concepts; Execute discrete-time signal processing techniques; Solve real-world problems through use of modeling, prediction, and estimation methods

ENGR 321 Electronic Circuits & Devices (2 Credit Hours)
Pre-requisites: PHYS 112K or PHYS 122 (minimum C-); Corequisites: ENGR 311 and (MATH 266 or MATH 264)
This course is an introduction to electronic circuits and devices. Major topics in this course include an introduction to Ohm's Law, Kirchhoff's Current Law, Kirchhoff's Voltage Law, Nodal and Loop analysis, Thevenin's and Norton's Theorems, and alternating current steady-state analysis.
Outcomes:
Define and explain the terminology associated with linear circuit theory; Identify and solve linear circuits utilizing the most appropriate method for the analysis

ENGR 322 Chemical & Thermal Processes (3 Credit Hours)
Pre-requisites: (CHEM 171 or CHEM 102), (PHYS 111 or PHYS 121), (PHYS 112K or PHYS 122), and MATH 162 (each with minimum C-)
This course provides an introduction to basic chemical and thermal processes. Major topics include open and closed systems, control volumes, microscopic vs. macroscopic, mass and energy balances, first and second laws of thermodynamics, entropy balance, exergy balance, thermodynamic cycles, thermodynamic property relations, gas laws, and chemical thermodynamics.
Outcomes:
Describe engineering systems and cycles using mass and energy conservation laws, quantify chemical and thermodynamic properties of pure substances, and analyze thermodynamics cycles and processes

ENGR 323 Digital Electronic & Computer Engineering (3 Credit Hours)
Pre-requisites: (PHYS 112K or PHYS 122) and COMP 170 (each with minimum C-); Corequisite: ENGR 324L
This course is an introduction to digital design. Major topics in this course include, but is not limited to, binary conversions, logic gates, combinational logic design, sequential logic design, microprocessor architecture, and an introduction to hardware description languages.
Outcomes:
Understand the fundamental building blocks of digital systems; Understand and apply knowledge in the implementation and design of digital circuits

ENGR 324 Mechanics (3 Credit Hours)
Pre-requisites: (PHYS 111 or PHYS 121), (PHYS 112K or PHYS 122), and (MATH 264 or MATH 266) (each with minimum C-)
Mechanics covers the fundamentals of modeling continuous media. Major topics include stress, strain, and constitutive relations; elements of tensor analysis; basic applications of solid and fluid mechanics; and application of conservation laws to control volumes.
Outcomes:
Construct free-body diagrams to undertake structural analysis; Apply the laws of conservation to solve engineering problems

ENGR 324L Core Engineering Lab (1 Credit Hour)
Pre-requisites: ENGR majors only; Corequisites: ENGR 322, ENGR 323, and ENGR 324
This lab course enables students to experiment with concepts learned in concurrently taken core engineering courses ENGR 322, ENGR 323, and ENGR 324.
Outcomes:
Understand, apply and create an assembly-based program for ARM-based microprocessors; Apply Thermodynamic and Flow principles in an experimental context

ENGR 325 Materials Engineering (3 Credit Hours)
Pre-requisites: ENGR 322 and ENGR 324 (minimum of C-)
This course introduces concepts related to the structure, properties, and processing of materials commonly used in engineering applications. Major topics include material structure, bonding, crystalline and non-crystalline structures, imperfections, properties of metals, metal alloys, ceramics and polymers, phase transformation, and material failures.
Outcomes:
Describe the microscale structure of metals, ceramics, polymers, and composites; quantify and describe relationships among structure, processing, and properties; understand the role of material selection in contemporary engineering design applications

ENGR 341 Medical Device Systems (3 Credit Hours)
Pre-requisites: MATH 266, ENGR 321, ENGR 323, ENGR 324, BIOL 101, and CHEM 171; ENGR majors only; Corequisites: ENGR 325, ENGR 341L, and ENGR 313
The relevant physiology, clinical need, history, and system descriptions of eighteen fundamental medical devices are discussed and analyzed. Students are also introduced to several medical device systems, including medical instruments, electrical stimulators, and combination products. These topics provide a foundational background for medical device product development and regulation.
Outcomes:
Understand and analyze the clinical need and common subsystems underlying eighteen fundamental medical devices; Evaluate the battery requirements for commonly implantable medical devices

ENGR 341L Medical Device Systems Laboratory (1 Credit Hour)
Introduction to the graphical user interface, data acquisition, and sensors of common medical devices. The lab experiments are synchronized with the presentation of medical device topics in ENGR 341. Students also create a software application for a Sponsor from the School of Nursing. Restricted to Engineering majors. Concurrent enrollment in ENGR 341. Apply FDA design control principles for creation of a nursing software application and accompanying requirement and design specifications.
Outcomes:
Use common medical devices subsystems

ENGR 342 Medical Device Software Development I (3 Credit Hours)
Pre-requisites: ENGR 341 and ENGR 341L, each with a minimum grade of C-
This is the second semester of a three-semester Specialty course series for students specializing in Biomedical Engineering. During the first four weeks, students increase their programming skills through exposure to recurrence solving, sorting, and data structures. They then learn how design and verify medical device software using model-based engineering. Restricted to Engineering majors. Concurrent enrollment in ENGR 381.
Outcomes:
Design a medical device through model-based engineering concepts

ENGR 343 Medical Device Software Development II (3 Credit Hours)
Pre-requisites: Restricted to Engineering majors
This is the third semester of a three-semester Specialty course series for students specializing in Biomedical Engineering. During four weeks, students increase their programming skills through exposure to advanced data structures and graph algorithms. Separately, software issues that the Food and Drug Administration considers during medical device submissions are highlighted. ENGR 342 with a minimum grade of C-, concurrent enrollment in ENGR 391.
Outcomes:
Analyze software issues that the FDA considers during medical device submissions; Create user interface and cybersecurity code, according to Requirements Specifications provided by the instructor

ENGR 351 Electronic Circuit Analysis and Design (3 Credit Hours)
Pre-requisites: ENGR 201, ENGR 312, and ENGR 321 (each with minimum of C-); Corequisite: ENGR 351L
A course for engineering students (computer engineering) that introduces advanced topics in the design and analysis of analog and digital electronic circuits. Areas of emphasis include an introduction to semiconductor physics, diodes, BJT transistors, CMOS devices, advanced operational amplifier circuits and frequency response fundamentals.
Outcomes:
Understand and apply fundamental concepts of semiconductor physics; Understand and apply complex models to analyze analog and digital microelectronic circuits

ENGR 351L Circuit Design Laboratory (1 Credit Hour)
Co-requisites: ENGR 351
A lab for engineering students (in the computer engineering specialization) to provide a first experience working with semiconductor devices (such as diodes, BJTs, MOSFETs, and Operational Amplifiers) for the design, creation and analysis of microelectronics using lab instruments.
Outcomes:
Identify integrated circuit design issues and develop applicable solutions; Apply advanced principles in analog circuit design, creation and analysis

ENGR 352 Methods and Algorithms for Computer Engineers (3 Credit Hours)
Pre-requisites: ENGR 351 and ENGR 351L (each with minimum of C-)
ENGR 352 is the second semester course of a three-semester Specialty course series for students specializing in Computer Engineering. The areas of emphasis are the analysis of the methods and algorithms used in computer engineering. The course includes hands-on experiments and a design project related to the computing performance and efficiency improvement of engineering systems
Outcomes:
Evaluate the design and implementation of methods and algorithms in computer engineering; Analyze the performance, efficiency and computational complexities of algorithms using the time-and-space tradeoff

ENGR 353 Programmable Systems (3 Credit Hours)
Pre-requisites: ENGR 352 (minimum C-)
ENGR 353 is the third semester course of a three-semester Specialty course series for students specializing in Computer Engineering. The course consists of an introduction to programmable logic controllers, relays, timers, counters, shift registers, human-machine interfaces and programmable embedded systems. The course includes hands-on experiments and a design project to evaluate the performance and efficiency of programmable systems, related safety issues and hardware troubleshooting for control and automation systems.
Outcomes:
Evaluate the performance and efficiency of programmable controllers, embedded systems and processors; Design modern engineering tools to integrate hardware and software components, and input-output devices used in industries

ENGR 361 Fundamentals of Environmental Engineering (3 Credit Hours)
Pre-requisites: MATH 266, ENGR 322, ENGR 324, and ENGR 325 (each with minimum C-); ENGR majors only; Corequisite: ENGR 361L
This is the first of three Specialization courses in Environmental Engineering. Topics include aquatic chemistry, chemical thermodynamics and kinetics, environmental soil and biogeochemistry, environmental organic chemistry, surface and groundwater hydrology, atmospheric processes, and fate and transport modeling of contaminants in natural and engineered systems.
Outcomes:
Apply principles of environmental engineering to describe and quantify key physical, biological and chemical phenomena in natural and engineered systems

ENGR 361L Fundamentals of Environmental Engineering Lab (1 Credit Hour)
Pre-requisites: ENGR majors only; Corequisite: ENGR 361
This laboratory course introduces students to the analytical techniques such as mass spectrometry and titration, relevant to environmental engineering practice. This course emphasizes the design of field sampling campaigns of water and soil environments and the statistical data analysis of experimentally estimated water and soil parameters.
Outcomes:
Quantify fundamental environmental parameters with emphasis on water quality; Design and conduct a field sampling campaign

ENGR 362 Water & Wastewater Engineering (3 Credit Hours)
Pre-requisites: MATH 266, ENGR 324, and CHEM 171 (each with minimum C-)
Theoretical and conceptual design of systems for treating municipal wastewater and drinking water which include reactor theory, process kinetics, and models. Physical, chemical, and biological processes are presented, including sedimentation, filtration, biological treatment, disinfection, and sludge processing. Re-use of water and waste products are also covered.
Outcomes:
Undertake calculations related to unit processes and undertake the required calculations to design a municipal water and wastewater treatment facility

ENGR 363 Contemporary Environmental Engineering Challenges (3 Credit Hours)
Pre-requisites: MATH 266 and ENGR 324 (minimum C-)
This is the third semester of a three-semester Specialty course series for students specializing in Environmental Engineering. Overview of engineering solutions to present day environmental issues. Technologies focused on the mitigation and adaptation to climate change, the modeling and design of best management practices Overview of engineering solutions to present day environmental issues. Technologies focused on the mitigation and adaptation to climate change, the modeling and design of best management practices for stormwater management, an exploration of conventional and renewable energy technologies and the design of green infrastructure.
Outcomes:
Make aware of present and future environmental challenges; Understand the current methods being employed to tackle current environmental issues

ENGR 381 Biomedical Engineering Capstone Design I (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 341
A major design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group is assigned an industry-sponsored medical device software problem to solve. Each week, a medical device product development or regulation topic is also introduced.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce medical device solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 382 Computer Engineering Capstone Design I (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 351
First part of the team-based Capstone Design series for Computer Engineering students. Students focus on the design of an industry-sponsored project with practical, economic, and ethical constraints. They learn the fundamentals of product development, quality, reliability, ethics and project management as it relates to the field of computer engineering.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce microelectronic solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 383 Environmental Engineering Capstone Design I (4 Credit Hours)
Pre-requisites: MATH 266, ENGR 324, and ENGR 322 (each with minimum C-); ENGR majors only
A major design experience based on the knowledge and skills acquired in earlier course work and incorporating engineering standards and multiple realistic constraints. Each group is assigned an environmental engineering industry-sponsored design problem to solve. During the semester, specific environmental design and regulation case studies will be introduced.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce environmental engineering solution that meet specified needs with consideration for public health, safety, environmental and other factors

ENGR 391 Biomedical Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 381 during the same academic year, ENGR 342, concurrent enrollment in ENGR 343
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored medical device projects assigned in ENGR 381. Medical device product development or regulation topics are also introduced.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce medical device solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 392 Computer Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 382 during the same academic year, ENGR 352, concurrent enrollment in ENGR 353
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored design projects assigned in ENGR 382. Computer engineering or professional development topics are also introduced.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce computer engineering solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 393 Environmental Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: ENGR 383 (minimum C-)
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored design projects assigned in ENGR 383. Environmental engineering or professional development topics are also introduced. ENGR majors only.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce environmental engineering solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 398 Independent Study (1-3 Credit Hours)
The course enables independent study of selected topics in Biomedical, Computer, and Environmental Engineering, under the supervision of a faculty member. It may be repeated for credit. Restricted to Engineering majors. Permission of Director.
Outcomes:
Application of engineering concepts, and analysis of Biomedical, Computer, or Environmental Engineering systems

English (ENGL)

Discover, search, courses (p. 2953)!

ENGL 100 Developmental Writing (3 Credit Hours)
English 100 is a basic writing course that provides instruction in fundamental composition skills to prepare the student for UCWR 110. The course emphasizes mastery of grammar, usage, and punctuation. Placement required.
Outcomes:
Students will develop skill in: writing with a clear audience and purpose in mind; developing a clearly stated thesis which acts as the governing idea of an essay; writing coherent paragraphs and well-organized longer essays using various invention strategies; using transitions to link ideas; exhibiting a working knowledge of basic grammar, usage, and punctuation conventions

ENGL 102 College Composition ESL 1 (3 Credit Hours)
English 102 is the first of a two-course sequence designed to improve the linguistic abilities of those for whom English is a second language. This course provides grammar and writing instruction for students who require more focused work in revising language usage and composing than English 103 can provide. Placement required.
Outcomes:
Students will develop skill in: writing essays that develop a clearly-stated governing idea and that provide relevant support for that idea; proceeding through all stages of the writing process: prewriting, drafting, and revising, with emphasis on improving language usage; editing their own compositions, and working with other students in peer-editing groups; consistently employing English-language grammar, usage, and punctuation

ENGL 103 College Composition ESL 2 (3 Credit Hours)
English 103 is the second of two courses intended to improve the linguistic abilities of those for whom English is a second language. English 103 stresses the acquisition of necessary language skills in the areas of grammar and usage, comprehension and critical reading, and writing at a level appropriate to university study in an English-speaking country. Placement required.
Outcomes:
Students develop skill in: writing with a clear audience and purpose in mind; developing a clearly stated thesis which acts as the governing idea of an essay; writing coherent paragraphs and well-organized longer essays using various invention strategies; using transitions to link ideas; exhibiting a working knowledge of grammar, usage, and punctuation

ENGL 210 Business Writing (3 Credit Hours)
English 210 provides training and practice in various forms of writing (such as memos, instructions, letters, resumes, proposals, and reports) relevant to students who are considering careers in business.
Outcomes:
Students will demonstrate familiarity with genres and styles of writing commonly used in business, with the stages of the writing process, and with individual and collaborative methods of composing

ENGL 211 Writing for Pre-Law Students (3 Credit Hours)
Pre-requisites: successful completion of UCWR 110
Studies in argument and exposition from a lawyer's perspective for students considering the study of law.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will gain an understanding of the principles involved in writing clear and effective prose for a variety of legal purposes, and be able to apply these principles to their own writing in the field

ENGL 220 Theory and Practice of Tutoring Writing (3 Credit Hours)
This seminar explores Writing Center pedagogical theory and practice. It includes a community-based service-learning component that involves community-service, professional development, leadership development, civic engagement, and cross-curriculum collaboration on a daily basis to continually improve the quality of the writing tutoring services.
This course satisfies the Engaged Learning requirement.

ENGL 271 Exploring Poetry (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
The course will survey British and American poetry, especially from the Romantic movement on, especially of lyric kinds. Class discussion will generally focus on the form and sense of individual poems, and will in general be about poetic ways of meaning, and individual poets' understandings of what poetry is and what it is to do.
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ENGL 271/ACENG 271
Outcomes:
Students will be able to demonstrate an understanding of significant poems by selected British and American poets, demonstrate an understanding of basic critical terminology, and demonstrate an understanding of relevant critical perspectives on poetry

ENGL 272 Exploring Drama (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the understanding, appreciation, and criticism of drama; extensive readings and several critical analyses are required. Students will also be able to demonstrate understanding of how plays are constructed in different ways to serve different purposes.
Knowledge Area: Tier 2 Literary Knowledge
Outcomes:
Students will be able to demonstrate understanding of drama's ability to express the deepest and most complex feelings and concerns of human beings as individuals, as family members, and as members of society: the individual's place in the universe, in relation to others, and in relation to the socio-political system that he or she inhabits

ENGL 273 Exploring Fiction (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the understanding, appreciation, and criticism of prose fiction.
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ENGL 273/ACENG 273
Outcomes:
Students will be able to demonstrate understanding of fiction as a means of exploring human experience and understanding the creative process, and be able to use the technical vocabulary necessary for understanding fiction

ENGL 274 Exploring Shakespeare (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the works of Shakespeare as literature and as theatre, covering at least three of the four genres (comedy, history, tragedy, romance).
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ACENG 274 / ENGL 274
Outcomes:
Students will be able to demonstrate understanding of the theatrical and poetic works of Shakespeare, such elements of drama as plot, character, theme, imagery, and verse forms, as well as the personal, political and theatrical world in which Shakespeare lived and worked

ENGL 282 African-American Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the development of the African American literary tradition from the emergence of the slave narrative to the contemporary present.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: ENGL 282 / ACENG 282
Outcomes:
Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods

ENGL 282B African-American Literature 1700-1900 (3 Credit Hours)
This course focuses on the development of the African American literary tradition from the emergence of slave narrative to the contemporary present. This particular version of the course focuses on material within the time period 1700-1900.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Race and Ethnicity
Outcomes:
Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods

ENGL 282C African-American Literature since 1900 (3 Credit Hours)
This course focuses on the development of the African American literary tradition from the emergence of slave narrative to the contemporary present. This particular version of the course focuses on material since 1900.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods

ENGL 283 Women in Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the representation of women in literature, as discussed in a variety of literary works.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: ENGL283/WOST283/WSGS283
Outcomes:
Students will be able to demonstrate understanding of the representations of women in various periods of literary history and diverse cultural contexts

ENGL 284 Asian American Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the range of Asian American literature from its earliest works around the turn of the 20th century to its proliferation in contemporary literature.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies, Race and Ethnicity, Film & Digital Media Studies, International Film & Media Studies, Race and Ethnicity
Course equivalencies: X-ENGL284/ICVM284/IFMS284
Outcomes:
Students will trace major developments in Asian American literature, recognize the diversity of Asian American identities and histories, and apply key concepts and historical contexts from Asian American culture

ENGL 287 Religion and Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the study of literature and religion as a contemporary field of inquiry. It aims to explain and illustrate the nature and theoretical strategies of a religious literary criticism, and to encourage an appreciation of this valuable and productive way of reading.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Catholic Studies, Catholic Studies, Catholic Studies, Catholic Studies
Outcomes:
Students will be able to use the technical vocabulary necessary for discussing literary representations of religious and spiritual experience

ENGL 288 Nature in Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the relationship of human beings and the environment in which they function, as represented in a variety of literary works.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Course equivalencies: X-ENGL288/ESP 288/PAX 288
Outcomes:
students will be able to demonstrate understanding of the representations of ""nature"" in various periods of literary history and diverse cultural contexts

ENGL 290 Human Values in Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This variable topics course focuses on a perennial psychological or philosophical problem facing the individual as exemplified in literary works, e.g., the passage from innocence to experience, the problem of death, and the idea of liberty.
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ACENG 276 / ENGL 290
Outcomes:
Students will be able to demonstrate understanding of the ability of literature to express the deepest and most abiding concerns of human beings, and how literary works come to be

ENGL 292 South Asian Literature and Civilizations (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
An introduction to South Asian literatures and civilizations, from ancient to contemporary times, with attention to social institutions, religious practices, artistic achievements, literature, and modern challenges.
Interdisciplinary Option: Global Studies
Outcomes:
Students will gain an understanding of the cultures and civilizations of South Asia

ENGL 293 Advanced Writing (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent (grade of C- or higher)
This advanced writing course will focus on scholarly theories about the practice and process of writing. Course work will center on students' reconsiderations of their own writing processes in the context of scholarly composition theory.
Outcomes:
Students will develop and demonstrate theoretical knowledge of advanced strategies for producing academic writing

ENGL 294 Writing in/with New Media (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent, grade of C- or higher
This advanced writing course will consider how communication is mediated and remediated in the digital age, and draw connections between historical moments of print culture with that of contemporary technological advancement. Writing will engage emerging digital genres (websites, blogs, memes), digital storytelling, multimodal composition, and social media.
Outcomes:
Learn terms/theories/concepts of new media historically and in the present; identify interactions between new media, writing, and other disciplines; effectively move a piece of writing from concept to revision

ENGL 295 Writing Toward Social Justice: Eloquentia Perfecta (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent, grade of C- or better
Course will address problems of community concern through Jesuit rhetorical practice, with basis in thinking, acting and reflecting. Students will learn how to write and speak in a variety of outward-facing modalities. They will work in partnership with a local community organization, applying techniques and practices learned in the classroom.
Outcomes:
Reflection: personal concerns and values; Community organization collaboration: writing and presentation projects; Peer review and group writing; Proficiency in modalities: op-ed pieces, funding requests, promotional writing, multimodal presentations, grant writing

ENGL 299 Topics in Advanced Writing (3 Credit Hours)
Pre-requisites: UCWR 110
This is a course in writing clear and effective prose in whatever form/genre is being studied; the subtitle will define the form/genre more precisely.
Outcomes:
Students will gain an understanding of the principles involved in writing clear and effective prose in whatever form/genre is under study, and be able to apply these principles to their own writing in this form/genre

ENGL 300 History of English Language (3 Credit Hours)
Study of the origin and development of English: its sounds, word-forms, and syntax.
Outcomes:
Students will demonstrate knowledge of the history of English and some understanding of linguistic theory

ENGL 303 Grammar: Principles & Pedagogy (3 Credit Hours)
A study of English grammar focusing on linguistic applications such as the teaching of Standard American English to native and non-native speakers, to speakers of Ebonics, and other classroom applications. Required for students planning to teach high school English, but open to others.
Outcomes:
Students will demonstrate understanding of grammar and sentence structure sufficient to teach them

ENGL 306 Studies in Women Writers (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry from any literary period.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 306A Studies in Women Writers Before 1700 (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry from before 1700.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 306B Studies in Women Writers 1700-1900 (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry within the period from 1700-1900.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 306C Studies in Women Writers Since 1900 (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry since 1900.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 307 Topics in Feminist and Gender Studies (3 Credit Hours)
This course is an intensive study of selected issues in women's studies or gender studies in relation to literature.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL307/WOST307/WSGS307

ENGL 311 U.S. Latino/a Literature (3 Credit Hours)
Pre-requisites: UCWR 110 plus one 200-level ENGL course
Students will study literature by U.S. Latino and Latina writers (esp. Mexican American, Puerto Rican, Dominican American, and Cuban American). Readings will highlight the variety of aesthetic styles and cultural points of view that characterize this rapidly growing field. Issues like language (bilingualism, translation, and code-switching), immigration, nationalism, transnationalism, and citizenship will be especially important.
Interdisciplinary Option: Latin American Studies
Outcomes:
Students will develop analytical tools, culturally-specific terms, and critical questions to help them to interpret and to write about Latino/a literature

ENGL 312 Studies in World Literature in English (3 Credit Hours)
Pre-requisites: UCWR 110 and a 200-level English course
This course adopts a transnational, trans-historical approach to Anglophone world literatures. Readings may include global, postcolonial, and/or diasporic literatures in English.
Interdisciplinary Option: Global Studies
Outcomes:
Students will develop analytical tools, culturally-specific terminology, and critical questions to enable them to interpret and formulate arguments about global English-language literatures

ENGL 312A Studies in World Literature in English Before 1700 (3 Credit Hours)
This course will introduce students to a range of critical and theoretical approaches to the study of world literatures in English. Authors studied may include leading theorists like Frantz Fanon, Edward Said, Gayatri Spivak, Homi Bhabha, Paul Gilroy, and Arjun Appadurai; and literary writers before 1700.
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about world literatures in English

ENGL 312B Studies in World Literature in English 1700-1900 (3 Credit Hours)
This course will introduce students to a range of critical and theoretical approaches to the study of world literatures in English. Authors studied may include leading theorists like Frantz Fanon, Edward Said, Gayatri Spivak, Homi Bhabha, Paul Gilroy, and Arjun Appadurai; and literary writers within the period of 1700-1900.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about world literatures in English

ENGL 312C Studies in World Literature in English Since 1900 (3 Credit Hours)
This course will introduce students to a range of critical and theoretical approaches to the study of world literatures in English. Authors studied may include leading theorists like Frantz Fanon, Edward Said, Gayatri Spivak, Homi Bhabha, Paul Gilroy, and Arjun Appadurai; and literary writers since 1900.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about world literatures in English

ENGL 313 Border Literatures (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The study of border literatures will vary, and may include Hispanic-American writers, the Caribbean poet, Derek Walcott, and other literatures that move between disparate locations (England, India, Africa, Burma, etc.).
Interdisciplinary Option: Global Studies, Race and Ethnicity
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 313A Border Literature Before 1700 (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The focus of the study of border literatures before 1700 will vary, and may include various writers in literatures that move between disparate locations (England, the Americas, India, Africa, Burma, etc.).
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 313B Border Literature 1700-1900 (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The study of border literatures from within this period will vary, and may include various writers in literature that move between disparate locations (England, the Americas, India, Africa, Burma, etc.).
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 313C Border Literature Since 1900 (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The focus of the study of border literatures from within this period will vary, and may include various writers in literatures that move between disparate locations (England, the Americas, India, Africa, Burma, etc.).
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 315 South Asian Literatures in English (3 Credit Hours)
This course focuses on the study of literature written in English from South Asia and the South Asian diaspora. Authors studied may include Narayan, Naipaul, Desai, Sidhwa, and Rushdie.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will be able to demonstrate understanding of the personal, cultural, and political experiences of South Asia's diverse populations as they are reflected in the literature of the modern and contemporary period

ENGL 315C South Asian Literature Since 1900 (3 Credit Hours)
This course focuses on the study of literature written in English from South Asia and the South Asian diaspora, focusing on the period since 1900. Authors studied may include Narayan, Naipaul, Desai, Sidwa, and Rushdie.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will be able to demonstrate understanding of the personal, cultural, and political experiences of South Asia's diverse populations as they are reflected in the literature of the modern and contemporary period

ENGL 316C Caribbean Literature in English Since 1900 (3 Credit Hours)
This course will introduce students to the study of literature written in English from the Caribbean in this period. Authors studied may include Lamming, Rhys, Walcott, Cliff, Lovelace, and Brathwaite.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Outcomes:
Students will be able to demonstrate understanding of the different genres of Caribbean literature, as well as the personal, political, and cultural contexts of the literature

ENGL 317 The Writing of Poetry (3 Credit Hours)
This course provides extensive practice in both the reading and the writing of poetry.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate understanding of the critical skills necessary for discussing, analyzing and formulating arguments about poetry, and will produce a portfolio of original poems

ENGL 318 The Writing of Fiction (3 Credit Hours)
This course will discuss the techniques of fiction writing and will offer guidance in writing some works of original short fiction.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate understanding of the critical skills necessary for discussing, analyzing and formulating arguments about fiction, and will produce original short stories

ENGL 318R The Writing of Fiction: Writing Rome (3 Credit Hours)
By exploring the city of Rome through reading, writing, and on-site classes, students will be provided with an interdisciplinary approach to the generation of written work. This course will discuss the techniques of fiction writing, drawing inspiration from the city of Rome as a backdrop. On-site classes will enrich the fiction writing process, while in-class workshops will offer guidance in writing works of short original fiction.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Italian Studies
Outcomes:
Students will be able to demonstrate understanding of the critical skills necessary for discussing, analyzing and formulating arguments about fiction, and will produce original works of fiction in the form of writing portfolio

ENGL 319 Writing Creative Nonfiction (3 Credit Hours)
A workshop in writing and critiquing original creative nonfiction in several representative sub-genres.
Outcomes:
Students will learn to apply both traditional fictional techniques (eg, in-depth characterization, dramatic plot development, specific concrete detail) and more innovative ones (eg, shifting chronology, genre mixing, eccentric voices, multiple points-of-view) in their nonfiction writing

ENGL 320 English Literature: Medieval Period (3 Credit Hours)
This course provides a survey of Old and Middle English Literature, studied partly in translation and partly in the original.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-ENGL320/CATH321/MSTU308
Outcomes:
Students will receive training in the understanding, appreciation, and criticism of works of medieval culture

ENGL 321 Intro to Anglo-Saxon (3 Credit Hours)
This course introduces students to the fundamentals of the Old English language (c. 600-1150), surveying poetry and prose in the original.
Interdisciplinary Option: European Studies, Medieval Studies
Course equivalencies: X-ENGL321/MSTU312
Outcomes:
Students will be able to read Old English and to demonstrate a knowledge of literary works written during the Anglo-Saxon period

ENGL 322 Chaucer (3 Credit Hours)
This course introduces students to the life and writings of Chaucer through the reading of a representative selection (but not necessarily all) of The Canterbury Tales and through considering a variety of critical perspectives on them.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-ENGL322/MSTU316
Outcomes:
Students will be able to demonstrate knowledge of Chaucer's poetry, the ability to read Middle English, and familiarity with some critical perspectives on Chaucer's works

ENGL 323 Studies in Medieval Literature (3 Credit Hours)
Intensive study of specific topics in the field of Medieval literature and culture.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-ENGL323/MSTU320
Outcomes:
Students will be able to demonstrate an understanding of significant works of the Medieval period, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 325 British Literature-The Renaissance (3 Credit Hours)
This course is a study of selected literature of the Tudor, Stuart, and Cromwellian periods, excluding Shakespeare, by authors such as Sidney, Spenser, Lanyer, Donne, Wroth, and Milton.
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students will become familiar with: the texts of significant authors of the period; how to read these texts in relation to the intellectual and social contexts in which they were produced; the literary genres, traditions, and conventions they employed and transformed

ENGL 326 Shakespeare: Selected Major Plays (3 Credit Hours)
This course is an advanced study of selected plays as theatre and as literature. Topics may include Shakespeare's life, sources, and influence; background of Early Modern literature and drama; Shakespeare's theatre; the tradition of Shakespeare criticism.
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students will be able to demonstrate understanding of, to analyze, and to defend interpretations of the plays of Shakespeare

ENGL 327 Studies in Shakespeare (3 Credit Hours)
Pre-requisites: ENGL 274 or 326
Intensive reading of selected Shakespeare plays.
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students will be able to demonstrate understanding of, to analyze, and to defend interpretations of a particular body of plays by Shakespeare, chosen by genre, theme, etc

ENGL 328 Studies in The Renaissance (3 Credit Hours)
The course will be a highly selective survey of late Renaissance literature, from John Donne and Ben Jonson to Andrew Marvell.
Interdisciplinary Option: Catholic Studies, European Studies, Shakespeare Studies
Outcomes:
Students will be able to: 1) demonstrate an understanding of significant works by selected Renaissance authors; 2) demonstrate an understanding of historical, political, social, and intellectual backgrounds as they provide a context for the poems; 3) demonstrate an understanding of relevant theoretical and critical perspectives

ENGL 329 Milton (3 Credit Hours)
This course will cover Milton's early poetry, one or two of his prose works, and his late, major poems: Paradise Lost, Paradise Regained, and Samson Agonistes.
Interdisciplinary Option: Catholic Studies, European Studies
Outcomes:
Students will be able to: 1) demonstrate an understanding of Milton's major works, and a knowledge of his career; 2) demonstrate an understanding of social, political, and cultural backgrounds as they provide a context for Milton's poems; 3) demonstrate an understanding of relevant theoretical and critical perspectives

ENGL 335 British Literature - The Romantic Period (3 Credit Hours)
This course focuses on the study of literature of the Romantic movement in its historical context; authors may include Blake, Wordsworth, Coleridge, Smith, Byron, P.B. Shelley, M.W. Shelley, Keats, Hemans, Hazlitt, and Austin.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of major works of the Romantic movement, and of its relationship to historical developments of the period

ENGL 338 Studies in The Romantic Movmnt (3 Credit Hours)
Students will engage in intensive consideration of selected Romantic period texts. The focus of the course will vary according to the instructor's choice of topic.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to discuss and analyze the texts studied in this course, and to articulate diverse positions on the issues related to the course's central topic

ENGL 340 British Literature - The Victorian Period (3 Credit Hours)
This course provides a survey of important works of prose, poetry, and fiction from the Victorian period (1832-1901). Authors may include Tennyson, the Brownings, Arnold, the Brontës, Hopkins, Hardy, Newman, Dickens, Thackeray, and George Eliot.
Interdisciplinary Option: European Studies
Outcomes:
Students will demonstrate their ability to analyze and interpret a variety of works studied in the course, and to articulate an awareness of the social, political, and historical contexts that inform an understanding of these works

ENGL 343 Studies in the Victorian Period (3 Credit Hours)
This course provides an opportunity for intensive consideration of selected Victorian texts that centers on a particular theme or genre or author. The course will vary each time it is taught.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of the subject of the course and an appreciation of that particular aspect of Victorian life, art, and thought

ENGL 344 Studies in Modernism (3 Credit Hours)
Pre-requisites: UCWR 110 and a 200-level English course
The course focuses on selected issues in current critical discussions of modernism. The issues may concern competing conceptions of modernism and individual writers associated with modernism.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to articulate diverse positions on the issues of the course

ENGL 345 British Literature Since 1900 (3 Credit Hours)
Pre-requisites: UCWR 110 and one 200-level English course
This course focuses on selected examples of British poetry, fiction, drama, film, and non-fiction written in the 20th century. The principle of selection may be cultural, theoretical, or formal.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of assigned texts and will be able to explain the relationship among assigned texts in relation to the themes of the course

ENGL 348 Studies in British Literature Since 1900 (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level English course
This course focuses intensively on selected twentieth century British texts in relation to social and literary issues of the period. The selection may focus on cultural, theoretical, or formal issues.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate detailed knowledge of particular texts and will be able to describe the relation of the assigned texts to a particular set of critical questions

ENGL 350 Studies in Postmodernism (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level English course
Postmodernism, as an aesthetic response to postmodernity, is an interdisciplinary concept, originating in architecture and encompassing literature, art in various media, digital media, and literary and cultural theory. Focusing primarily on Western literature and theory after WWII, this course investigates postmodernism as a literary period, an aesthetic style, an historical moment, and a cultural problematic.
Outcomes:
Students will learn how the term "postmodernism" functions as a literary period, an aesthetic style, an historical moment, a cultural problematic, as well as a theoretical imperative

ENGL 351 Contemporary Literature (3 Credit Hours)
Contemporary literature is most often defined as literature produced after WWII. This course explores the challenge of defining "contemporary" literature by reading a range of texts from the period in their aesthetic, social, historical, and cultural contexts.
Outcomes:
Students will learn critical and analytical tools for reading contemporary literature

ENGL 354 Contemporary Critical Theory (3 Credit Hours)
This course, which is required of all English majors, introduces students to critical terminology and to issues in contemporary criticism and theory. Readings may include critical works that have informed and established formalist, feminist, psychoanalytic, and Marxist approaches to literary analysis, as well as those associated with gender studies, cultural studies, postcolonialism, and deconstruction.
Outcomes:
Students will be able to demonstrate knowledge and understanding of significant texts and theories relating to issues in contemporary criticism

ENGL 355 Studies in Literary Criticism (3 Credit Hours)
Intensive study of specific topics in the field of literary criticism and theory.
Outcomes:
Students will be able to demonstrate an understanding of significant works in the designated field, and will be able to discuss relevant theoretical and critical perspectives

ENGL 357 Literature from a Writer's Perspective (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level English course
This course examines literature from various periods in poetry and/or prose for technical innovation and genre development, with particular emphasis on applications to the creative process.
Outcomes:
Students will gain a deeper understanding of the technical innovations and/or genre developments being studied, and will be able to apply these to their own creative works of fiction and/or poetry

ENGL 358 Cultural Theory (3 Credit Hours)
This course provides an introduction to the theory informing the field of Cultural Studies and to the history of theoretical writings about "culture."
Outcomes:
Students will be able to demonstrate knowledge and understanding of significant theoretical texts in the field of cultural studies

ENGL 359 High and Low Culture (3 Credit Hours)
Students will study the interactions between elite and popular culture, possibly focusing on a historical period or on a conceptual issue such as the framing of "canons." Students will review and assess the assumptions and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 359A High and Low Culture Before 1700 (3 Credit Hours)
Students will study the interaction between elite and popular culture, focusing on the material and issues relating to the period before 1700. Students will review and assess the assumption and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 359B High and Low Culture 1700-1900 (3 Credit Hours)
Students will study the interaction between elite and popular culture, focusing on the material and issues relating to the period from 1700-1900. Students will review and assess the assumption and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 359C High and Low Culture Since 1900 (3 Credit Hours)
Students will study the interaction between elite and popular culture, focusing on the material and issues relating to the period after 1900. Students will review and assess the assumption and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 361 Modernist Poetry (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course is a study of poetry written in response to the conditions of modernity from the late 19th century to the middle of the 20th. The course focuses on poetic style and technique as well as on historical and cultural contexts.
Outcomes:
Students will be able to demonstrate knowledge and understanding of significant texts, techniques, and concepts in modernist poetry, and to situate these in relation to important literary and historical contexts

ENGL 362 Studies in Poetry (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries.
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 362A Studies in Poetry Before 1700 (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on poetry written before 1700.
Course equivalencies: ENGL362/362A/362B/362C
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 362B Studies in Poetry 1700-1900 (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on poetry written between 1700 and 1900.
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 362C Studies in Poetry Since 1900 (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on poetry written since 1900.
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 363A Major Author, Before 1700 (3 Credit Hours)
Intensive study of the works and contexts of a major author, before 1700. Students will be able to demonstrate an understanding of the texts and contexts of a major author, before 1700.

ENGL 363B Major Author, 1700-1900 (3 Credit Hours)
Intensive study of the works and contexts of a major author, 1700-1900. Students will be able to demonstrate an understanding of the texts and contexts of a major author, before 1700.

ENGL 363C Major Author, After 1900 (3 Credit Hours)
Intensive study of the works and contexts of a major author, after 1900. Students will be able to demonstrate an understanding of the texts and contexts of a major author, after 1900.

ENGL 367 Modern Drama (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course is a study of dramatists and dramatic forms, techniques, and innovations from the late-nineteenth century to the present.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to recognize and define major modern dramaturgical techniques and to demonstrate understanding of, to analyze, and to defend interpretations of a variety of plays

ENGL 368 Studies in Drama (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 368A Studies in Drama Before 1700 (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on drama written before 1700.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 368B Studies in Drama 1700-1900 (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on drama written between 1700 and 1900.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 368C Studies in Drama Since 1900 (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on drama written since 1900.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 369A Women in Drama Before 1700 (3 Credit Hours)
This course focuses on women as playwrights, actors, directors, spectators, and subjects of drama before 1700.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will be able to demonstrate understanding of the ways in which women and issues important to women have been presented on the stage; they will be able to analyze and defend interpretations of a variety of plays

ENGL 369B Women in Drama 1700-1900 (3 Credit Hours)
This course focuses on women as playwrights, actors, directors, spectators, and subjects of drama between 1700 and 1900.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will be able to demonstrate understanding of the ways in which women and issues important to women have been presented on the stage; they will be able to analyze and defend interpretations of a variety of plays

ENGL 371 The Modern Novel (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course covers novels since the late 19th century and explores formal and cultural influences on the form.
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about the novel in the modern world

ENGL 372 Studies in Fiction (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 372A Studies in Fiction Before 1700 (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on fiction written before 1700.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 372B Studies in Fiction 1700-1900 (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on fiction written between 1700-1900.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 372C Studies in Fiction Since 1900 (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on fiction written since 1900.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 375 American Literature to 1865 (3 Credit Hours)
This course is a study of selected works of American Literature of this period against the background of historical events, political and social changes, moral and cultural traditions. Authors may include Bradford, Bradstreet, Franklin, Poe, Hawthorne, Melville, Emerson, and Thoreau.
Outcomes:
Students will be able to demonstrate understanding of the distinctive historical conditions that inform American literature of this period, and will be able to identify and discuss some of its ideological and generic characteristics

ENGL 376 American Literature 1865-1914 (3 Credit Hours)
This course is a study of the rise of American Literature of this period. Authors may include Whitman, Dickinson, Twain, James, and Dreiser.
Course equivalencies: ENGL 376 / ENGL 380
Outcomes:
Students will be able to demonstrate understanding of the distinctive historical conditions that inform American literature of this period, and will be able to identify and discuss some of its ideological and generic characteristics

ENGL 377 American Literature 1914-1945 (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course is a study of literature of early twentieth-century America. Authors may include Cather, Eliot, Frost, Hemingway, Fitzgerald, Faulkner, O'Neill, Miller and Williams.
Course equivalencies: ENGL 377 / ENGL 385
Outcomes:
Students will be able to demonstrate knowledge of the literature of this period in American history, and familiarity with critical perspectives on the works studied

ENGL 379 Studies in American Literature (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement, period, or theme.
Outcomes:
students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 379A Studies in American Literature Before 1700 (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement or theme before 1700.
Outcomes:
Students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 379B Studies in American Literature 1700-1900 (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement or theme in the period from 1700-1900.
Outcomes:
Students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 379C Studies in American Literature Since 1900 (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement or theme in the period since 1900.
Outcomes:
Students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 381 Comparative American Literature (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 381A Comparative Literature Before 1700 (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures, with a focus on the period before 1700.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 381B Comparative American Literature 1700 - 1900 (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures, with a focus on the period before 1700.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 381C Comparative American Literature Since 1900 (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures, with a focus on the period since 1900.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 382 Studies in American Culture (3 Credit Hours)
Intensive study of specific topics in the field of American culture.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 382A Studies in American Culture Before 1700 (3 Credit Hours)
Intensive study of specific topics in the field of American culture before 1700.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 382B Studies in American Culture 1700-1900 (3 Credit Hours)
Intensive study of specific topics in the field of American culture between 1700 and 1900.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 382C Studies in American Culture Since 1900 (3 Credit Hours)
Intensive study of specific topics in the field of American culture since 1900.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 383 Theology and Literature (1-3 Credit Hours)
Study of theological and religious symbols and themes in modern literature and/or in the arts.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-THEO383/ENGL383/CATH383
Outcomes:
The student who successfully completes this course will be able to demonstrate knowledge about religion and its intersections with selected contemporary ethical, social, political, economic, or cultural issues

ENGL 384 Studies in African American Literature (3 Credit Hours)
Intensive study of texts written by African American authors. The course varies in topic and may concentrate on a selection of works by a major African American writer or a particular African American literary movement, period, or theme.
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to demonstrate an understanding of African American literature and culture with specialized attention to a major or distinctive feature of the African American literary tradition

ENGL 384B Studies in African American Literature, 1700-1900 (3 Credit Hours)
Intensive study of texts written by African American authors. The course varies in topic and may concentrate on a selection of works by a major African American writer or a particular African American literary movement or theme, 1700-1900.
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to demonstrate an understanding of African American literature and culture with specialized attention to a major or distinctive feature of the African American literary tradition, 1700-1900

ENGL 384C Studies in African American Literature Since 1900 (3 Credit Hours)
Intensive study of texts written by African American authors. The course varies in topic and may concentrate on a selection of works by a major African American writer or a particular African American literary movement or theme since 1900.
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to demonstrate an understanding of African American literature and culture with specialized attention to a major or distinctive feature of the African American literary tradition since 1900

ENGL 390 Advanced Seminar (3 Credit Hours)
Pre-requisites: Junior standing
This course is required of all English majors. It offers an advanced, intensive study of a period, author, genre, theme or critical issue in a seminar setting. Topics are announced when the course is offered.
Outcomes:
Students will be able to recognize the ways that the subject matter of the seminar relates to the production, representation, and interpretation of artistic culture

ENGL 392 Advanced Creative Nonfiction Workshop (3 Credit Hours)
Pre-requisites: ENGL 319 Writing Creative Nonfiction
This is a workshop in writing creative nonfiction, furthering work done in ENGL 319, Writing Creative Nonfiction. Students will write in different genres (e.g., memoir, travel writing, speculative essay, nature writing, the spiritual essay), and will further their study in using both traditional and experimental literary techniques in nonfiction.
Outcomes:
Students will deepen their learning of traditional and innovative methods of writing creative nonfiction, applying them to their original creative nonfictions and discussing and critiquing them in fellow students' work

ENGL 393 Teaching English to Adults: Internship (1-3 Credit Hours)
Pre-requisites: Sophomore Standing or above
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program at Loyola University. Students examine literacy issues and write a research paper. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills

ENGL 394 Internship (3 Credit Hours)
Pre-requisites: Junior standing, six English courses
This course provides on-the-job experience for majors in adapting their writing and analytical skills to the needs of such fields as publishing, editing, and public relations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to analyze their experience in terms of the skills they brought to their jobs, what they learned about the fields they worked in, and what new skills they developed as a result of their experiences

ENGL 395 Honors Tutorial (3 Credit Hours)
Content will vary each time the course is offered, but in general will entail in-depth study of a literary genre or a major author or theme in literature.
Course equivalencies: ENGL 395H / ENGL 395
Outcomes:
Students will strengthen their capacity to analyze literature and to discuss it, both orally and in writing, and will be able to demonstrate understanding of the materials studied and of relevant theoretical and critical perspectives

ENGL 397 Advanced Writing Workshop: Poetry (3 Credit Hours)
Pre-requisites: ENGL 317
Students will read master poets as models and will write and revise poems of their own, which will be discussed by the class in a workshop format.
Outcomes:
Students will produce original poems, building upon skills honed in ENGL 317; They will also be able to demonstrate a deepening understanding of the critical skills necessary for analyzing and discussing original poetry, theirs and their fellow students'

ENGL 398 Advanced Writing Workshop: Fiction (3 Credit Hours)
Pre-requisites: ENGL 318
This course allows students to develop further their skills in writing and analyzing original fiction begun in ENGL 318, in a supportive workshop atmosphere.
Outcomes:
Students will produce original short stories, building upon skills honed in ENGL 318; They will also be able to demonstrate a deepening understanding of the critical skills necessary for analyzing and discussing original fiction, theirs and their fellow students'

ENGL 399 Special Studies in Literature (3 Credit Hours)
Subject matter of this course will be designated by a subscript whenever the course is offered. Usually taken as an independent study.
Outcomes:
Students will be able to demonstrate understanding of the topic of the course, and of the research and critical skills necessary to analyze and discuss it; Usually students will work independently and produce a research paper, under the direction of a faculty member

ENGL 400 Intro to Graduate Study (3 Credit Hours)
The course serves as an introduction to the profession of literary studies for students new to the graduate programs in English. It offers a review of current critical theories and methodologies, research techniques, bibliographic methods, and issues in textual criticism.

ENGL 402 Teaching College Composition (3 Credit Hours)
The course deals with practical matters related to the teaching of college composition. It is organized around an examination of recent theories, methods, and materials used in the teaching of writing.

ENGL 403 Composition Theory (3 Credit Hours)
This course examines major and current advances in composition theory and reviews current scholarship in the teaching of writing, with some attention to the relationship between composition and literary theory.

ENGL 404 Pedagogy: Theory and Practice (3 Credit Hours)
Pre-requisites: ENGL 402
This course is designed to help students integrate theory and practice in teaching literature and cultural studies courses at the college level.
Outcomes:
Students will demonstrate an understanding of pedagogical theories by writing a teaching philosophy in which they explain and defend their theoretical approach; students will put their theory into practice by preparing a course proposal for a literature course, which includes a description and goals, syllabus and guidelines, classroom format, and assignments and evaluations procedures

ENGL 406 History of the English Language (3 Credit Hours)
The course is a study of the causes, mechanisms and consequences of language variation over time, with prominent examples taken from the history of English and its parent languages. All major areas of linguistic theory are considered: phonology, lexis, morphology, syntax, and semantics.
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 410 Contemporary Literary Criticism (3 Credit Hours)
This course presents studies in major contemporary theoretical and critical issues through a survey of major types of critical analysis, such as formalism, structuralism, semiotics, reader-response, deconstruction, psychoanalysis, and feminist criticism.

ENGL 412 History of the Book to 1800 (3 Credit Hours)
Pre-requisites: Graduate status
This course will examine the history of written and printed texts from their beginnings to 1800, including such topics as book production and distribution, early ideas about textual editing, literacy, copyright, and censorship.
Outcomes:
Students will be able to relate textual forms to cultural practices

ENGL 413 Textual Criticism (3 Credit Hours)
An introduction to major textual theories and their history. Topics may include such issues as analytic and descriptive bibliography, theories of copy-text, theoretical and practical issues in editing, and forms of textuality, including manuscript, print and digital.

ENGL 415 Media and Culture (3 Credit Hours)
This course examines the important and evolving roles that media plays in the construction, reformulation, and critique of contemporary culture. Topics will vary but may include digital textuality; visual culture studies; information technologies; postcoloniality and globalization; and web-based communities.

ENGL 419 Contemporary Issues in Literature and Culture (3 Credit Hours)
The course is an intensive study of a particular cultural issue in relation to literature.

ENGL 420 Topics in Critical Theory (3 Credit Hours)
Focused study of a particular problem or movement within critical theory–for example, globalization; the "new aesthetics"; high and low culture; psychoanalytic theory; whiteness studies.

ENGL 422 Postcolonial Theory (3 Credit Hours)
This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said, Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

ENGL 423 Marxist Literary Theory (3 Credit Hours)
Intensive study of selected writers and issues within the Marxist tradition of literary and cultural criticism.

ENGL 424 Cultural Studies (3 Credit Hours)
An examination of the theory and practice of cultural studies, with special attention to the role of literary and critical theory in its development.

ENGL 426 Feminist Theory and Criticism (3 Credit Hours)
An intensive study of recent feminist theory in a range of disciplines--including literature, philosophy, history, and law--and covering a variety of approaches, such as psychoanalysis, post-structuralism, post-colonialism, queer theory, and cultural studies.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 427 Dramatic Theory (3 Credit Hours)
This course presents selected theoretical approaches to drama from the Greeks to the present. Readings may include both theoretical works and plays. Topics may include genre, dramaturgies such as realism, epic theatre, and theatre of the absurd, reception, semiotics, feminist dramatic theory, and performance theory.

ENGL 428 Postmodernism (3 Credit Hours)
Pre-requisites: Graduate status
This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.
Outcomes:
Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams

ENGL 430 Topics in Literature Studies (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in literature.

ENGL 433 Seminar in Individual Authors (3 Credit Hours)
Intensive study of a single author. Includes a comprehensive reading of the author's major works, and a review of the critical reception.

ENGL 436 Women Writers in English (3 Credit Hours)
This course focuses on significant issues raised in and by women-authored works, including representations of gender roles and sexualities, and the cultural status and uses of women's literature. Authors from any period(s) in British, American and World literature may be included.

ENGL 437 Topics in Drama (3 Credit Hours)
This course may deal with topics that cut across historical and national boundaries, such as dramatic genres, women in drama, modern reappropriations of earlier drama; with more specialized topics such as performance or feminist dramatic theory; or with historical movements in drama.

ENGL 440 Topics in Medieval Literature (3 Credit Hours)
Studies in a range of Middle English writing serve as a focus for special topics, including mysticism and historical prose from the thirteenth to the fifteenth centuries.

ENGL 441 Old English Language & Literature (3 Credit Hours)
This course introduces Old English language and literature through readings in poetry and prose, with attention, as time allows, to major critical issues in texts of the period.

ENGL 443 Middle English Literature (3 Credit Hours)
This course may address texts that bridge the Old and Middle English periods or texts (excluding Chaucer) that date from the fourteenth-century, such as Langland, Malory, the Gawain-poet, Gower, and women writers.

ENGL 444 Medieval Drama (3 Credit Hours)
The course focuses on English drama from its beginnings to the early Renaissance, including liturgical drama, saints' plays, miracle plays, the cycles, and interludes.

ENGL 447 Chaucer (3 Credit Hours)
This course may focus on the Canterbury Tales or Troilus and Criseyde and the dream visions, and may include some of Chaucer's less frequently studied texts (e.g., his translation of the Consolation of Philosophy).

ENGL 450 Topics in Early Modern Literature & Culture (3 Credit Hours)
This course presents selected studies in poetry and prose of the English Renaissance.

ENGL 455 Shakespeare (3 Credit Hours)
The philosophical, esthetic, and historical problems of Shakespeare's plays are covered in this course, which also focuses on Shakespearean scholarship.

ENGL 456 Early Modern Drama (3 Credit Hours)
This course presents English drama of the period 1550 to 1642. Among the topics to be covered are the rise of the permanent theaters; Elizabethan and Jacobean contemporaries of Shakespeare; Caroline plays and masques. Historical background, theatrical developments, and critical approaches are also studied.

ENGL 457 Seventeenth-Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in seventeenth-century literature. Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 458 Milton (3 Credit Hours)
Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 460 Topics in Restoration & 18th Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in Restoration and eighteenth-century literature.

ENGL 470 Topics in Romanticism (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in Romantic literature.

ENGL 471 Poetry of Romantic Period (3 Credit Hours)
The poetry of major and minor Romantic figures is studied in this course, which includes a critical study of their esthetics, philosophical concepts, and critical standards.

ENGL 475 Topics in Victorian Literature (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme, or body of work in Victorian literature.

ENGL 476 Victorian Poetry (3 Credit Hours)
This course presents the historical, political, social, and intellectual influences on Victorian poetry and examines its artistic and formal innovations and achievements. The authors studied include: Tennyson, Browning, Arnold, Swinburne, and the Rossettis.

ENGL 477 Victorian Prose (3 Credit Hours)
The course examines the major critical and philosophical prose writers of the years 1837-1900: Macaulay, Carlyle, Arnold, Ruskin, Newman, and Pater. It also explores the intellectual, social, and political backgrounds of the period, and identifies Victorian prose styles.

ENGL 478 Victorian Novel (3 Credit Hours)
The course examines the major Victorian novelists: Dickens, Thackeray, the Brontes, Trollope, Eliot, Meredith, and Hardy; religious, social, scientific, historical, and philosophical influences on the novel are also explored.

ENGL 480 Topics in Modernism (3 Credit Hours)
Topics include modernism, the Symbolist movement, Edwardian Period, and other contextual issues that transcend genre boundaries and address larger concerns of social and intellectual history.

ENGL 481 Modern Poetry (3 Credit Hours)
The course examines tradition and experiment in modern poetry and includes English, Irish, and American poets.

ENGL 482 Modern Drama (3 Credit Hours)
This course presents selected studies in dramatists from Ibsen on, including British, American, Continental, and Irish dramatists.

ENGL 483 Modern Novel (3 Credit Hours)
The course concentrates on selected studies in Conrad, Galsworthy, Bennett, Wells, Joyce, Lawrence, Huxley, Woolf, Maugham, Forster and other novelists, but may include additional American, Irish, and Continental novelists.

ENGL 484 Literature and Culture of the Jazz Age (3 Credit Hours)
Taking an interdisciplinary approach to a crucial era, this course will consider such topics as the construction of race in literature and popular culture, the rise of the New Woman, the Harlem Renaissance, and the relationship of jazz to aesthetic modernism.

ENGL 485 Contemporary Literature (3 Credit Hours)
This course concentrates on literature and literary movements of the second half of the twentieth century. Possible topics include postcolonialism (Achebe, Jhabvala, Naipaul, Soyinka, Walcott), postmodernism (Acker, Calvino, Pynchon, Reed), and African-American writing (Baldwin, Morrison, Walker).
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in contemporary literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 487 Postcolonial Literature (3 Credit Hours)
This course examines the issues of modern-day colonization as depicted in selected fiction, drama, and poetry from Africa, South Asia, the West Indies, and Australia.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in postcolonial literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 488 20th Century Literature in English (3 Credit Hours)
Focusing on the relation between texts and their literary and cultural contexts, this course may include any twentieth-century text written in English and may address a particular theme, literary movement, period, nation, or historical event. We may also interrogate the foundation of such categories.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in 20th-century literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 489 Magic Realism (3 Credit Hours)
Fusing realistic and symbolic forms, "Magic Realism" raises boundary issues of many kinds, between history and myth, empirical and non-empirical experience, objective and subjective knowledge. This course examines magic realism from its modernist origins to contemporary postmodern and postcolonial fiction in many countries.

ENGL 490 Topics in American Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme, or body of work in American literature.

ENGL 491 Early American Literature (3 Credit Hours)
This course examines Hispanic, native American, Puritan, colonial, and early nationalist literature in the United States, and explores its American and European backgrounds.

ENGL 492 American Romanticism (3 Credit Hours)
The course includes selected studies in Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and others.

ENGL 493 American Realism (3 Credit Hours)
The course features selected studies in American realism, tracing its origins and development as a national literary movement, and reviewing its regional variations and sub-genres, with special attention to Twain, Howells, and James.

ENGL 494 American Literature Since 1914 (3 Credit Hours)
The course is composed of selected studies in representative American writers of poetry, fiction, drama, and prose in the twentieth century.

ENGL 495 Latino/a Literature (3 Credit Hours)
Pre-requisites: Graduate standing and consent of the GPD in English
Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a Literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 496 African American Literature (3 Credit Hours)
This course focuses on African-American literature over a range of periods and genres including 19th-century slave narratives (Douglass, Jacobs), the fiction and poetry of the Harlem Renaissance (Hurston, Hughes, McKay) and contemporary literature (Ellison, Shange, Morrison).

ENGL 501 Directed Readings (3 Credit Hours)
An independent study course supervised by a faculty member with the approval of the program director. Readings are initiated by the student.

ENGL 502 Independent Study-Doctoral Qualification (3 Credit Hours)
The course is composed of special readings in the field of the student's specialization under the supervision of a faculty member with the approval of the chair. Normally the director will be the professor with whom the student plans to write the dissertation. The written outcome of the course will be a draft of a proposal for the dissertation. The course is graded on a credit/no-credit basis.

ENGL 540 Newberry Seminar (3 Credit Hours)
Special topics in literary study offered by the Newberry Library.

ENGL 595 Thesis Supervision (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 600 Dissertation Supervision (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

ENGL 605 Master's Study (0 Credit Hours)
Directed studies for students working toward a master's thesis.

ENGL 610 Doctoral Study (0 Credit Hours)
Directed studies for students working toward a doctoral dissertation.

English as a Second Language (ESL)

Discover, search, courses (p. 2953)!

ESL 20 Special Topics (1-6 Credit Hours)
This course may be customized to fit the needs of student groups. Specialized courses may focus on reading, writing, listening, speaking, pronunciation and subject-specific vocabulary, along with U.S. culture and history.

ESL 50 English for Specific Purposes (0-6 Credit Hours)
Pre-requisites: ESL Placement Test or Equivalent
This course is designed to meet the needs of a specialized ESL group. Some needs may be, but are not limited to listening, speaking, reading, writing, and grammar.

ESL 55 Graduate Preparation (3 Credit Hours)
This course addresses the needs of graduate students at the Intermediate/Low Advanced level. Students will study grammatical and syntactic structures necessary for clear communication in English for academic purposes and will produce a variety of texts.

ESL 60 Low-Intermediate Reading & Vocabulary (0-6 Credit Hours)
This course focuses on developing reading skills with an emphasis on building vocabulary, literal comprehension, and fluency. Students will read graded materials and appropriate ESL books from library resources.

ESL 61 Low-Intermediate Listening & Speaking (0-6 Credit Hours)
This course will provide further instruction in academic listening and speaking for English language learners. Instruction focuses on basic listening and speaking strategies for a variety of situations, including listening for main ideas and details, and giving informal presentations. Students will work on word and stress patterns.

ESL 62 Low-Intermediate Writing & Grammar (0-6 Credit Hours)
In this course students will expand control of English sentence and paragraph structures. Students will develop mastery of simple present and simple past verb tenses, subject verb agreement, singular and plural nouns, and compound and complex sentence structures.

ESL 70 Intermediate Reading & Vocabulary (0-6 Credit Hours)
This course focuses on the development of academic reading skills, with an emphasis on vocabulary development, literal comprehension, and dictionary skills. Students will continue to develop critical thinking skills to understand, analyze, discuss, and write responses to ideas expressed in graded materials and appropriate ESL texts.

ESL 71 Intermediate Listening & Speaking (0-6 Credit Hours)
This course prepares English language learners for the academic listening, note-taking, and discussion skills necessary to be successful in college classes. Students develop academic note-taking skills by listening to real academic lectures and develop discussion skills by responding to lectures, agreeing/disagreeing, supporting opinions, and connecting ideas.

ESL 72 Intermediate Writing & Grammar (0-6 Credit Hours)
In this course students will continue to develop their writing skills through the writing process to create focused, fully developed and well-organized essays. Essays will incorporate outside sources as well as personal experience. Students will also learn to develop mastery of adjective clauses, gerunds and infinitives, and conditional statements.

ESL 80 High-Intermediate Reading and Vocabulary (0-6 Credit Hours)
High Intermediate Reading Skills exposes students to a variety of non-fiction and fiction materials. Fiction materials include short stories and simple novels. Non-Fiction materials will include news reports, scholarly journals and other intermediate level non fiction texts. Attention to reading comprehension including an awareness of main ideas, supporting details, fact/opinion and author's purpose is emphasized. Timed readings are included. Vocabulary development includes advanced

ESL 81 High-Intermediate Listening and Speaking (0-6 Credit Hours)
The Intermediate course focuses on listening and presentation skills that are necessary for university students. Students build listening skills in and out of class through excerpts from lectures, documentaries, radio and TV programs. These skills include predicting and connecting ideas in a lecture, note-taking strategies, listening for cause and effect, key terms, and examples. Students build presentation skills by giving short PowerPoint speeches.

ESL 82 High-Intermediate Writing and Grammar (0-6 Credit Hours)
Students will build upon the skills learned in the prior courses and recognize and produce effective five paragraph essays. Furthermore, students will develop the skills to effectively and accurately write using these rhetorical patterns, to name a few: compare/contrast and cause and effect.

ESL 90 Advanced Reading and Vocabulary (0-6 Credit Hours)
Pre-requisites: ESL Placement Test
Students will develop strategies for managing advanced reading assignments. Students will also increase their vocabulary from reading in general and specialized subject areas.

ESL 91 Advanced Listening and Speaking (0-6 Credit Hours)
Pre-requisites: ESL Placement Test
No course description is available

ESL 92 Advanced Writing and Grammar (0-6 Credit Hours)
Pre-requisites: ESL Placement Test
Students will advance their academic writing skills and communicate more clearly and accurately with an in-depth study of advanced English grammar. Students will effectively write using the rhetorical patterns most commonly used in universities. Students will also learn how to make citations of research sources and examine the cultural/ethical issues related to plagiarism.

ESL 94 English Pronunciation (0-6 Credit Hours)
Students will be able to speak clearly and be understood by others. Students will learn about and practice phonemic awareness and accuracy, stress patterns, intonation, and rhythm with extensive practice. Students will also be able to identify and improve their individual pronunciation issues.

ESL 95 TOEFL Preparation (2-4 Credit Hours)
Pre-requisites: ESL Placement Test
Students will be able to sharpen their test-taking skills and improve your TOEFL score. Students will become familiar with TOEFLLiBT and learn strategies for achieving the score they need.

ESL 96 Graduate Preparation (1.5-3 Credit Hours)
Pre-requisites: ESL Placement Test
Designed as a support for current non-native graduate students, this course focuses on refining the language components - listening, speaking, reading and writing - for success in one's current graduate classes at Loyola. Some of the objectives are doing research, reading and responding to journal articles; editing one's writing for content, organization, grammar, and creating effective presentations and using PowerPoint. NOTE: only open to Graduate students.

ESL 98 American English Pronunciation (3 Credit Hours)
This course assists students in improving phonemic accuracy, stress patterns, intonation, and rhythm. Students will develop class participation and group discussion skills as well as the fundamentals of public speaking. Students are required to practice with pronunciation software in the language resource center.

ESL 101 Graduate Reading and Critical Thinking (0-6 Credit Hours)
This course is intended for current or future graduate level international students and is designed to improve their overall comprehension of college/graduate level texts and critical thinking skills

ESL 102 Graduate Research and Writing (0-6 Credit Hours)
This course is intended for current or future graduate level international students and is designed to improve their academic writing skills and ability to synthesize and critique information from outside sources.

ESL 105 Skill-Building for TOEFL/IELTS (2-4 Credit Hours)
This course is for students with intermediate level language skills. This course will strengthen students' language skills while also familiarizing students with the content, questions, and tasks on the TOEFL iBT and IELTS exams.

Entrepreneurship (ENTR)

Discover, search, courses (p. 2953)!

ENTR 201 Essentials of Entrepreneurship (3 Credit Hours)
Introduces students to the process of entrepreneurship and how to think like an entrepreneur. Students will learn how new entrepreneurial opportunities are conceived, vetted, and acted upon. Course knowledge and skills are presented through a combination of theory and application that will prepare students to move to next level of entrepreneurial studies.
Course equivalencies: MGMT381/ENTR310/ENTR201
Outcomes:
Students will gain insight into the process of entrepreneurship and entrepreneurial mindset; Students will learn to identify problems in the marketplace and discover how to turn these ideas into viable products and services

ENTR 311 Social Entrepreneurship (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ENTR 201 or ETHC 341
Explore how innovative solutions can address social issues and create sustainable impact. Learn to design, implement, and scale ventures that combine business principles with social change. Engage with case studies, develop entrepreneurial skills, and build a framework for launching ventures that contribute to societal well being.
This course satisfies the Engaged Learning requirement.
Outcomes:
An understanding of what is social entrepreneurship and how it differs from traditional entrepreneurship and non-profit organizations; An understanding of how to build and manage a successful social venture

ENTR 313 Entrepreneurship - Global Opportunity Scan (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ENTR 201 or IBUS 201
With the power of the Internet, entrepreneurs can quickly research, find, and reach new markets. However, successfully and profitably engaging in a global marketplace requires understanding conflicting and changing business dynamics, barriers to entry into the international arena, and challenging management practices.
Outcomes:
An understanding of the characteristics of international markets, including the critical challenges of global expansion and the barriers that exist; Ability to apply the appropriate frameworks to scan for international business opportunities

ENTR 345 Entrepreneurial Marketing (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ENTR 201 or MARK 201
This course will explore the whole marketing concept, starting with understanding the customer and how the customer changes over the product lifecycle. The course will then explore common marketing channels and sales methods entrepreneurs use and debate their effectiveness at each stage of business.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate an understanding of marketing of entrepreneurial ventures, the various channels and tactics entrepreneurs use to attract customers and changes over time, and product lifecycle management and customer engagement

ENTR 390 Entrepreneurship Strategies - Capstone (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in ENTR 201 or ENTR 310
Students will understand how to build a product/service that is attractive to customers yet differentiates it from its competitors. The students will learn how to grow the venture using sales and marketing channels, strong team building, and the financial implications of their decisions.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate understanding of the importance of core business operational areas, how to launch and grow a new venture, and problem¿solving and critical thinking skills through case analysis, experiential activities, and team¿based project work

ENTR 395 Independent Study (1-3 Credit Hours)
Pre-requisites: Junior standing; Instructor and Dean permission
Independent Study is an in¿depth research or reading project initiated by the student and jointly developed with a faculty member into a specialized area of entrepreneurship not otherwise covered by the department course offerings.
Outcomes:
Varies with topic

ENTR 399 Selected Topics in Entrepreneurship (3 Credit Hours)
Pre-requisites: Junior standing
Special Topics are scheduled classes offered on an ad hoc basis. Specific titles and content will vary.
Outcomes:
Varies with topic

ENTR 480 Recognizing Entrepreneurial Opportunities (3 Credit Hours)
This course will focus on the very early stages of the entrepreneurial process. We will discuss how new opportunities are discovered and how societal value is created throughout this process. In its approach, the course will be based on classic theoretical readings, the insights of economics, strategic management, organizational studies, psychology and cognitive science.
Course equivalencies: X-ENTR 480/MGMT 480
Outcomes:
Apply analytical and critical thinking skills to identify untapped entrepreneurial opportunities

ENTR 481 Entrepreneurship (3 Credit Hours)
Pre-requisites: MGMT 480 or ENTR 480, or Instructor Consent
This course enables the students to develop their new venture ideas. We discuss how to cultivate new business ideas, form venture teams, evaluate the opportunities, and design a firm to bring the ideas to life. At the end, each venture team produces a business plan.
Course equivalencies: X-ENTR 481/MGMT 481
Outcomes:
The students learn how all major functions of a business come together in a new venture; This course will help those who might want to start their own business in the future; It will also help those who will work for existing companies by encouraging them to think more strategically and creatively about business

ENTR 482 Entrepreneurial Marketing (3 Credit Hours)
Pre-requisites: Graduate School of Business student
This course is about the marketing challenges in an entrepreneurial firm. Entrepreneurship is the discovery, enactment and pursuit of new business opportunities. Successful execution of an entrepreneurial idea requires a sound marketing plan. In this course, we will investigate how marketing tools can enable entrepreneurs to realize the full potential of their ideas.
Course equivalencies: X-MGMT 482/ENTR 482

ENTR 483 Strategic Entrepreneurship & Innovation Management (3 Credit Hours)
Pre-requisites: Graduate School of Business student
This course will focus on the application of strategic management tools to entrepreneurial situations with an emphasis on the early stages of new venture creation. We will discuss how new opportunities are discovered, how inventions are turned into innovations, and how societal value is created throughout this process.
Course equivalencies: X-MGMT 483/ENTR 483
Outcomes:
At the end of this course, you will be able to: Recognize and discover entrepreneurial opportunities; Manage the creation and appropriation of the value generated by innovations; Apply analytical and critical thinking skills in an uncertain business environment; Apply your learning in a real-life project

ENTR 499 Special Topics in Entrepreneurship (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Environmental Science (ENVS)

Discover, search, courses (p. 2953)!

ENVS 101 The Scientific Basis of Environmental Issues (3 Credit Hours)
The foundational course in science is predicated on the view that understanding environmental issues and their underlying scientific principles will occupy a central role in our students' lives and will be critical in their development as informed and participating members of society. The overarching strategy of the course will be to frame environmental science in terms of a series of interacting systems to allow students to analyze a variety of environmental issues. This is a foundational Tier I class; it is prerequisite to all Tier II science core classes.
Knowledge Area: Foundational Scientific Knowledge
Course equivalencies: ENVS137/UCSF137/ENVS101
Outcomes:
1) Exhibit knowledge of the nature of the four Earth systems; 2) Draw inferences from evidence, constructing testable and falsifiable hypotheses and analyzing data; 3) Understand the role of energy and thermodynamics in ecosystems; 4) Understand and describe important cycles in nature

ENVS 137 Foundations of Environmental Science I (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability
This course will introduce concepts that form the basis of environmental science, including elemental cycling, energy flow/transformation, and the interconnectivity among atmosphere, lithosphere, hydrosphere and biosphere, and within ecosystems. Ways in which knowledge of these concepts informs policy, management and social perception to produce positive change will also be examined.
Course equivalencies: ENVS137/UCSF137/ENVS101
Outcomes:
Recognize interconnections among scientific disciplines and how their principles are used to investigate and address environmental issues; understand physical, chemical and ecological principles underlying environmental science and how these interact

ENVS 200 Environmental Careers and Professional Skills (1 Credit Hour)
Pre-requisites: ENVS 101 or ENVS 137; Restricted to Majors and Minors in the School of Environmental Sustainability
Introduction to environmental professions and determining skills and individual traits best suited for professions in policy, science, business, community organizing, etc. Begin developing a professional network.
Outcomes:
Select appropriate internships, curriculum, projects to enhance knowledge, skills and experience; develop job hunting and communication skills specific to environmental fields, including resumes, cover letters, presentations

ENVS 203 Environmental Statistics (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability
This course introduces basic statistics from probability through multiple regression, employing computer programs with ecological, environmental, and relevant social science examples and data sets.
Outcomes:
Programming/spreadsheet skills; data structure practices and diagnosis; data visualization; appropriate test selection; test execution and interpretation; introduction to qualitative data analysis

ENVS 204 Gender, Health & Environment (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Exploration of connections between social justice and environmental health using scientific tools of analysis. Focus on experiences of those at intersection of marginalized social locations. Issues include impacts of modern disposable culture and how socially constructed gender roles affect exposure to environmental health risks while biological sex shapes their impacts.
Interdisciplinary Option: Bioethics
Outcomes:
Understanding the web of causality (relationships among scientific, medical, ecological, cultural, behavioral, economic, political, and ethical dimensions) of environmental health problems and how to ameliorate the disproportionate burden of risk

ENVS 207 Plants and Civilization (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Examines the structure, function, ecology, and diversity of plants, their importance to human civilization, and the impact of societal decisions regarding their use and exploitation.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will demonstrate an understanding of the critical role of plants in the biosphere, their physiological processes, adaptations for specialization, and linkages to humans including agriculture, pest control, and extraction/use of plant-derived products

ENVS 215 Ornithology (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
An introduction to the biology of birds including the topics of anatomy, physiology, behavior, ecology, and evolution. Includes some field trips to learn how to identify species and to collect behavioral information.
Course equivalencies: BIOL 215/ENVS 215
Outcomes:
Students will demonstrate an understanding of the biology of birds and be able to identify some of the commoner species of birds in our area

ENVS 218 Biodiversity & Biogeography (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course covers the creation and maintenance of biodiversity across taxonomic, temporal and spatial scales. It will provide an overview of the history of biogeography, increase understanding of the evolutionary processes that create biodiversity, the influence of biodiversity on ecosystem services, and the rapid biodiversity loss resulting from human actions.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will gain knowledge of and appreciation for the biodiversity of life, its formation through the process of evolution, and the importance of biodiversity to ecosystem function and human welfare

ENVS 223 Soil Ecology (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the properties, functions, and conservation of soil. Topics include belowground ecosystem services, soil biodiversity, biogeochemical cycles, and conservation, human impacts to soils, and the socioeconomic implications of soil degradation. Lectures, laboratory/field soil testing, field trips, and presentations by experts in sustainable soil management are employed.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will understand the properties, functions and methods of conservation/remediation of soils, learn how human activities affect soils and associated socioeconomic consequences, and develop analytical skills to assess soil health

ENVS 224 Climate & Climate Change (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to basic principles and knowledge to explain climate change. Students will learn about natural and anthropogenic causes of climate change, the interactions between earth-atmosphere-ocean systems, climate feedback mechanisms, and impacts of climate change on the natural physical environment.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will develop cognitive and mathematical skills to draw valid, logical conclusions regarding various observed phenomena such as observed changes in the climate system and observed impacts of climate change

ENVS 226 Science & Conservation of Freshwater Ecosystems (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Freshwater ecosystems are threatened by water extraction, pollution, invasive species, and many other pressures. This course covers physical, chemical, and biological processes in freshwaters, and the benefits that humans derive from these ecosystems. Major issues for conservation will be covered at global and Great Lakes scales.
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will gain understanding of different types of freshwater ecosystems, their functioning and importance for human societies, and the range of pressures they currently face

ENVS 227R Ecology of the Mediterranean Sea (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
This course examines the ecology of the Mediterranean Sea and how human activity has shaped the present-day ecosystem. Students will learn fundamental ecological concepts including ecosystem functioning, energy flow, matter transformation, and elemental cycles and the human impacts on the Mediterranean environment, including discussion of impact reduction and remediation.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Italian Studies
Outcomes:
Students will gain understanding of ecological processes/ interconnections within the Mediterranean Sea ecosystem, of historical & current human-induced changes therein

ENVS 230 Feeding the Planet: Global Perspectives on Sustainability, Culture and Food (3 Credit Hours)
Cross-cultural policies, practices, and beliefs about the production, preparation, consumption, and distribution of food vary widely. This course examines food in historical, political, social, and cultural contexts around the globe. It is divided into four sections that require students to apply concepts in food studies to international case studies and global examples: Cross-Cultural & Global Perspectives on Food; Culture, Identity, and Food; The Political Economy of Food; and Social, Cultural, Political, and Economic Responses to Hunger. Course topics include subsistence patterns and cultural patterns of food preparation and consumption; cultural practices involving food preferences and taboos; the globalization of foods and cuisines; labor practices in industrial agriculture; alternative economies of food; global policies and practices developed to eliminate hunger and malnutrition; the use/misuse of global food aid, and others.
Outcomes:
Explain the rationales of cross-cultural beliefs and practices of our own and others' foodways; Apply interdisciplinary perspectives to analyze the historical, cultural, and political roots of social phenomena and world problems involving food and society; Assess various dimensions of the forms and mechanisms of oppression, discrimination, or privilege in global and local food systems; Investigate coalitions and key ideas, past and present, which address and advocate for economic and social justice in the food system

ENVS 237 Foundations of Environmental Chemistry (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; Restricted to BA majors in the School of Environmental Sustainability
This course is the second in a three-course sequence required of all ENVS BA majors. These courses provide the basic scientific grounding needed to intelligently discuss environmental issues and to prepare students for more advanced study on the environment. ENVS 237 focuses on the physical and chemical science needed to understand environmental processes. Students will build their quantitative skills in evaluating energy and chemical transactions that impact our environment.
The course will also work on building skills in interpreting scientific information, including using academic peer-reviewed journal articles.
Outcomes:
Be able to quantitatively assess environmental systems and anthropogenic processes that impact the environment; Gain understanding of the physical and chemical processes of environmental systems to be able to describe global climate dynamics, chemical reactions that contribute to environmental issues, the energetics of different energy sources, and technological aspects of alternative energy sources; Appreciate the importance of chemistry and physics as applied to different environmental issues and used by different environmental fields

ENVS 238 Foundations of Environmental Science Lab (1 Credit Hour)
Pre-requisites: ENVS 237 (pre- or co-requisite); Restricted to BA majors in the School of Environmental Sustainability
A lab course designed to be associated with ENVS 237, this course is designed to introduce all ENVS majors to lab safety, basic lab techniques such as use of balances and microscopes, data analysis, and the application of these techniques to the study of environmental science.
Outcomes:
Students will understand and demonstrate safe lab practices and learn to use basic lab equipment to take and analyze environmental science data

ENVS 260 Environmental Journalism (3 Credit Hours)
Pre-requisites: Department Consent Required
The mission of environmental journalism is to raise public awareness about environmental news and issues. It is about being ethical, accurate, fair, and clear, whether reporting, investigating, or advocating for change.
Course equivalencies: X-ENVS 260/ COMM 260
Outcomes:
Students will be able to find, report, and present challenging stories around this topic, in print and in broadcast writing

ENVS 267 Bird Conservation and Ecology (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 102
This engaged-learning course provides an introduction to the theory and practice of avian conservation, ecology and management. Field trips for viewing birds in the wild, observing behavior and collecting data on habitat assessments are highlighted. Students participate in a community service project to gather data for avian conservation and management
Course equivalencies: X-ENVS 267/BIOL 347
Outcomes:
Students will become skilled in critical reasoning and some bird monitoring techniques, and demonstrate an understanding of the many facets of bird conservation

ENVS 273 Energy and the Environment (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
The concept of energy developed from antiquity through the present day and applied to national and worldwide energy use patterns, the technologies supporting their use, as well as the societal impact and environmental consequences of energy usage.
Interdisciplinary Option: Bioethics, Peace, Justice, and Conflict Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning and methods of inquiry, demonstrate an understanding of critical concepts and knowledge: heat and energy, the laws of thermodynamics, and current and future technologies and their impact

ENVS 274 Chemistry of the Natural Environment (3 Credit Hours)
Pre-requisites: ENVS 137, MATH 118 and CHEM 160; Restricted to Majors and Minors in the School of Environmental Sustainability
Environmental Chemistry is the study of how materials move through the environment and interact within different environmental systems, including the atmosphere, hydrosphere, lithosphere, and biosphere. In this course, we will use this approach to better understand the chemical and physical reactions taking place and their equilibrium in the natural environment on Earth. The course will investigate these chemical and physical interactions in the three unique environmental compartments of the atmosphere, hydrosphere, and the soil environment, where the lithosphere and biosphere overlap, as we learn more about the materials and reactions that make up the natural environment. Students will utilize problem solving to explore the materials and reactions of the major compartments.
Interdisciplinary Option: Bioethics
Outcomes:
Apply key equations, concepts, and physical laws relevant to environmental chemistry to analyze how materials move through the environment between different environmental compartments (atmosphere, hydrosphere, lithosphere, biosphere); Quantitatively assess materials in air, water, soil, and cells across a range of scales appropriate in environmental science, from the microscopic to the global range; Describe underlying ecosystem functions that establish the chemistry of natural waters, air, and soil

ENVS 275 Chemistry of the Environment Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and (CHEM 112 or CHEM 181); ENVS 274 as pre- or co-requisite; Restricted to Majors and Minors in the School of Environmental Sustainability
Basic techniques for chemical analysis of environmental samples, including air, water and soil. Learn to use electronic data acquisition systems and further develop scientific writing skills.
Outcomes:
Plan experiments, develop good lab techniques, conduct accurate chemical analyses on environmental samples, interpret chemical data, short and long reports describing work and interpreting significance of results

ENVS 276 Chemistry of Environmental Pollution (3 Credit Hours)
Pre-requisites: ENVS 137, CHEM 160, MATH 118, and SES Major
Environmental Chemistry is the study of how materials move through the environment and interact within different environmental systems, including the atmosphere, hydrosphere, lithosphere, and biosphere. In this course, we will use this approach to better understand the chemical and physical reactions that influence the transport and fate of chemical pollutants in our environment. This course will identify major sources of environmental pollutants and technologies for source pollution control as well as understanding how pollutants move through the environment to potentially impact ecosystems and human health. The course will cover pollutants in all environmental compartments including air pollution from combustion sources, water quality issues and water treatment, and soil pollutants with a focus on agrochemicals and their impact on both soil environments and groundwater.
Outcomes:
Apply key equations, concepts, and physical laws relevant to environmental chemistry to analyze how pollutants move through and between different environmental compartments (atmosphere, hydrosphere, lithosphere, biosphere); Describe underlying chemistry of technologies and policies that would address key sources of major pollutants; Be able to utilize physical chemical properties of pollutants as a tool for assessing their persistence and potential to do harm in natural ecosystems

ENVS 278 Hydrology (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Study of processes which cycle water between oceans, atmosphere, and land surface. This course examines precipitation, evaporation, infiltration, transpiration, groundwater and surface water flow. Understanding these processes is fundamental to managing our resources in the face of mounting environmental challenges and natural resource pressures.
Outcomes:
Understanding of key physical processes and multidirectional complex interactions between different components of the water cycle; ability to apply fundamental equations of conservation to quantify flows

ENVS 279 Climate and History (3 Credit Hours)
Pre-requisites: Department Consent Required
Explores the role of climate in history, from the emergence of homo sapiens to recent anthropogenic climate change. Major topics include the social impact of climate variability, sources of resilience, origins of scientific knowledge, and the use of historical knowledge in the present.
Course equivalencies: X-HIST279E/ ENVS279
Outcomes:
Students will analyze examples of climate shaping history, learn different ways that scholars have treated this relationship, and reflect on how this knowledge might be useful today

ENVS 280 Principles of Ecology (3 Credit Hours)
Pre-requisites: (ENVS 101 or ENVS 137) and (ENVS 237 or CHEM 101 or CHEM 160); Restricted to Majors and Minors in the School of Environmental Sustainability
The purpose of this course is to foster an in-depth understanding of ecology, the study of relationships between organisms and the environment at organizational scales ranging from genes, individuals, and populations to communities, ecosystems, and landscapes. Topics include population dynamics, species interactions, community dynamics, food webs, ecosystem functions, and landscape ecology with a strong emphasis on scientific inquiry and data interpretation.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand key concepts and principles concerning ecological processes in nature at the gene, individual, population, community, ecosystem and landscape scales and apply knowledge of ecological concepts to current environmental challenges

ENVS 283 Environmental Sustainability (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Examines the impact of humans as consumers on the environment and how these interactions affect the probability of establishing sustainability for human and non-humans on Earth.
Interdisciplinary Option: Bioethics, Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning and methods of inquiry, and demonstrate an understanding of knowledge critical to the field including current human consumptive practices and their effects on the health and well-being of living organisms

ENVS 284 Environmental Justice (3 Credit Hours)
This course examines how policy interacts with race and class to affect differentially people's access to a clean, safe, productive environment; Reviews history of the environmental justice movement, and community, policy, and legal responses; Develops students' ability to work across diverse social groups to advance environmental justice and sustainability.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand forces that have led to people of different race and class being differentially affected by environmental benefits, and the burdens and strategies for addressing environmental injustices

ENVS 285 Eco-spirituality (3 Credit Hours)
Eco-spirituality is an emerging field in ecology, conservation, and religion that recognizes the spiritual component of environmentalism and Earth stewardship. This course explores how ecological efforts are enhanced by including a spiritual dimension and spirituality and religion must include awareness and engagement with ecology and ecological issues.
Outcomes:
1) Draw connections between ecology, spirituality, and Loyola¿s mission; 2) Implement tools and practices that foster personal awareness and reflection; 3) Demonstrate how reflection leads to necessary action

ENVS 286 Principles of Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 203 and (ENVS 238 or CHEM 111 or CHEM 161) and ENVS 280 (pre- or co-requisite); Restricted to BA Majors in the School of Environmental Sustainability
This course will allow students to develop experience and skills employed in ecological studies, with an emphasis on field work, laboratory analysis, and hypothesis testing. Topics for lab exercises will correspond closely with material from Ecology (ENVS 280) lecture. Course does not satisfy requirements for BIOL major.
Outcomes:
Students will understand basic ecological principles, apply these to design experiments, develop skills in data analysis and interpretation, and learn techniques used to characterize ecosystem properties and human environmental impacts

ENVS 286S Principles of Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 203 and (CHEM 111 or CHEM 161) and ENVS 280 (pre- or co-requisite); Restricted to BS Majors in the School of Environmental Sustainability
Course content includes lab skills and analytical techniques commonly employed in ecological studies; emphasizes sampling, research design, field work, laboratory technique, data analysis, project development, hypothesis testing, and scientific report writing.
Outcomes:
Understand ecological principles, apply knowledge to ecological experiments, observational studies, and entry-level mathematical models; assess biotic responses to the abiotic environment and to anthropogenic impacts

ENVS 288 Applied Interdisciplinary Data Analysis (3 Credit Hours)
Pre-requisites: (ENVS 280 or BIOL 265) and (STAT 103 or STAT 203)
Restricted to students in SES majors. This course teaches students to approach environmental problem-solving from a systems perspective by understanding the complex adaptive nature of socio-ecological. It introduces analytic techniques used in the natural/social sciences, and provides opportunity to analyze and connect data from various disciplines (e.g., ecology, economics, sociology) to address pressing environmental concerns.
Outcomes:
Students will be able to describe characteristics of complex adaptive systems, become familiar with analytical approaches suited to different sub-disciplines, and apply numerous analytical techniques to real data sets

ENVS 297 North American Environmental History (3 Credit Hours)
Pre-requisites: Department Consent Required
This course surveys the environment and environmentalism in United States history, from the transformation of New England into a farm ecology, the expansion of the cotton South, the settlement of the West, to the rise of industrial cities, suburban sprawl, and the globalization of the economy.
Course equivalencies: X-ENVS297/HIST297E
Outcomes:
Students will be able to demonstrate historical knowledge of environmental thought and ecological science, to draw links between environmental concerns and public policies, and to develop critical thinking and communication skills

ENVS 298 Special Topics (1-12 Credit Hours)
Specific titles and contents vary from semester to semester. Variable credit hours.

ENVS 298L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes lab component.

ENVS 300 Introduction to Public Health (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
Public health is the science of preventing disease and protecting and promoting the health of populations and communities. Through interactive exercises and application of concepts, this course considers its history; ethical principles; scientific foundation and tools; biomedical bases; socioeconomic and behavioral factors; environmental issues; and relationship to medical care.
Course equivalencies: X -PUBH 300/ ENVS 300
Outcomes:
Describe the history, core concepts, functions, and methods of public health; Define health disparities and explain how they are produced; Synthesize public health information and communicate it effectively

ENVS 301 Environmental Health (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
This course is designed as an introduction to the field of environmental health, including regulations, research, disease prevention, and advocacy.
Interdisciplinary Option: Bioethics
Course equivalencies: X-ENVS301/PUBH301/MBPH401
Outcomes:
Students will be able to outline approaches for assessing and controlling environmental hazards that affect community health and discuss major local, national, and global health challenges

ENVS 303 Introduction to Epidemiology (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.
Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403

ENVS 310 Introduction to Environmental Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137
This introduction to environmental law surveys some critical federal environmental statutes, rules, and regulations in the United States; important case law decided under those statutes; interaction between federal, state, and local jurisdictions; and impacts on air, land, water, and natural resources.
Outcomes:
Understands how the natural environment is controlled, managed and promoted through the legal system

ENVS 311 Natural Resources and Land Use Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
Focus on legal and policy processes used to govern pollution, water use, endangered species, toxic substances, and environmental impact and risk.
Outcomes:
Students will understand how the natural environment is controlled, managed and promoted through the legal system and how land use laws and policy impact social and economic issues

ENVS 312 Water Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
This course looks at how the law allocates and protects one of our most crucial natural resources -- water. Understanding development and regulation of water ownership and use and how those decisions impact current environmental and socio-economic issues.
Outcomes:
Understand how key laws and policies impact protection and use of water in the United States; understand key legal concepts that shape the management of our water resources

ENVS 313 Energy Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy.
Outcomes:
Understand how key laws and policies impact production and use of energy; and how energy is controlled by federal and local regulations and policies

ENVS 316 Energy and Power Systems (3 Credit Hours)
Pre-requisites: Junior or Senior standing; MATH 118
This course introduces the fundamental concepts of energy and power systems, covering essential principles, grid components, and generation technologies through a multidisciplinary lens. Students will explore current and future challenges in energy systems by applying mathematical tools, software, and programming to analyze the topics covered.
Outcomes:
Comprehend Basic Energy and Electrical Concepts: Explain the fundamental principles of electricity, energy, power, voltage, current, and resistance; Differential Generation Technologies: Compare and contrast conventional and renewable generation technologies, and assess their environmental, economic, and social impacts; Understand Grid Operations: Explain the basics of power flow analysis, load balancing, and grid operation; Analyze Energy Markets and Pricing: Discuss how electricity markets function, how electricity is priced, and how the grid is managed; Assess Further Grid Challenges: Evaluate the challenges of integrating renewable energy sources, managing load shifting, and electrifying other sectors, while considering social and equity implications; Apply Long-Term Grid Planning Tools: Identify and apply tools and methodologies used in generation expansion planning, and assess strategic considerations for achieving long-term goals in energy systems

ENVS 320 Conservation Biology (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266
Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.
Outcomes:
Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems

ENVS 321 Conservation Biology Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266; and ENVS 320 (pre- or co-requisite)
Students will apply principles learned in ENVS 320 to conservation problems in the Chicago region and elsewhere, through visits to conservation sites and discuss concerns/initiatives with land managers and policy makers. They will develop skills in species identification, ecosystem delineation and description, and the use of field equipment and methods.
Outcomes:
This course will provide practical field and lab experience in population, community and ecosystem conservation; Students will learn how the principles of Conservation Biology are applied, and the associated challenges

ENVS 322 Invasive Species (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause.
Outcomes:
Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem

ENVS 323 Environmental Microbiology (3 Credit Hours)
Pre-requisites: BIOL 101, BIOL 102, CHEM 101, and (CHEM 102 or ENVS 274)
This course introduces the significant role of microorganisms in numerous environmental and human-engineered processes. It covers microbiology and its basic methods to orient students to this field of science and the importance of microbial diversity relevant to agriculture, public health, and ecological restoration.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ENVS 323/ENVS 423
Outcomes:
Students will learn to isolate and characterize environmental microorganisms; Students will investigate the role of microorganisms in nutrient cycling, remediation of soils, and transmission of existing and emerging pathogens

ENVS 324 Climate Science (3 Credit Hours)
Pre-requisites: ENVS 224 and MATH 118
The focus of this course is Earth's climate system, including the role of the atmosphere, ocean, cryosphere and land-atmosphere interaction. This course digs deeper into the physical principles underlying climate processes, energy balance, feedback mechanisms, climate variability and climate dynamics, including large-scale atmospheric and ocean circulation. This course will discuss recent climate change, and projections for future climate scenarios. Students will have hands-on experience with practicing climate modelling tools, analyzing climate data, and exploring current research in climate science. Thus, this course will involve quantitative analysis and will reinforce students' reading, writing, and public-speaking skills through the class project on climate change.
Outcomes:
Understand Earth's Climate Systems: Students will gain an in-depth understanding of Earth's climate system, including the atmosphere, ocean, cryosphere, and land-atmosphere interactions, as well as the physical principles underlying climate processes such as energy balance, feedback mechanisms, and climate variability; Develop Quantitative Analysis Skills: Students will engage in quantitative analysis through climate modeling tools and data interpretation, enabling them to critically analyze climate data and understand large-scale climate dynamics like atmospheric and ocean circulation; Evaluate Climate Change Impacts and Projections: Students will explore recent scientific developments in climate change, assess current climate change impacts, and understand projections for future climate scenarios, preparing them to engage in informed discussions and decision-making related to climate policy and research; Enhance Communication and Research Skills: Through scientific paper reviews and presentations, students will enhance their ability to critically evaluate research, improve their public-speaking skills, and effectively communicate scientific findings to peers, fostering collaboration and scientific literacy

ENVS 325 Sustainable Agriculture (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored.
Outcomes:
Students will be able to explain the characteristics of the US agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system

ENVS 326 Agroecosystems (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266; and ENVS 223 (recommended)
In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad.
Outcomes:
Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating scientific information to diverse audiences

ENVS 327 Food Systems Analysis (3 Credit Hours)
Pre-requisites: ENVS 203
This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change.
Outcomes:
Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis

ENVS 330 Restoration Ecology (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266
This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types.
Outcomes:
Students will apply knowledge from ecology and other disciplines to the practice of ecosystem restoration, and learn to integrate information from multiple disciplines, and stakeholder input, to design/manage restoration projects

ENVS 331 Restoration Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and 286/s; or BIOL 265 and 266; and ENVS 330 (pre- or co-requisite)
Students will apply principles learned in ENVS 330 to restoration sites in Chicago and beyond. They will visit restoration sites and discuss strategies and initiatives with land managers and policy makers. Students will develop skills in ecological-site description, and in the analytical methods required to determine success of restoration projects.
Outcomes:
Students will gain an understanding of how the science of restoration ecology is applied in practical settings and learn methods used in restoration and assessment of actual restoration projects

ENVS 333 Introduction to the Circular Economy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
This course introduces principles and concepts of a circular economy that can support a more sustainable future. The course reviews circular design, materials management, business models, supply chains, policy, financing, metrics, and applications. This course may include speakers and/or field trips to learn about companies with circular business practices.
Outcomes:
Explain circular economy; identify applications of circularity; understand role of policy, finance, and design in system-wide change; understand social, environmental, economic impacts of linear economic system

ENVS 335 Ecological Economics (3 Credit Hours)
Pre-requisites: ECON 201 or ECON 202
Ecological Economics is a trans disciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges. Topics include sustainable scale, just distribution, efficient allocation and relationships between economic and ecological systems.
Outcomes:
Understanding of ecological economics history, conceptual foundations, principles, tools, indicators, and applications

ENVS 336 Design for Circular & Sustainable Business (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. Understand and apply: (1) circular design methods (2) biomimicry design methods; and (3) human-centered design (design thinking) methods.
Outcomes:
Understand the role of design in creating a sustainable future

ENVS 338 Climate Change and Human Health (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing.
Outcomes:
1) Outline fundamental public health concerns that have been associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

ENVS 340 Natural History of Belize (3 Credit Hours)
Pre-requisites: For SES majors and minors, ENVS 101 or ENVS 137; For BIOL majors and minors, BIOL 102 and BIOL 112; For ANTH or GLST majors and minors, Junior or Senior Standing
This Study Abroad field course is designed to build on the foundations learned in Ecology, Environmental Science, and Anthropology classes by examining the biodiversity and tropical ecosystems of Belize, by exploring the cultural traditions of some of its peoples, particularly the Mayans; and learn how local communities are involved in protecting and sustaining ecological and natural sites through community based conservation and sustainability practices.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X - ENVS 340 /BIOL 340
Outcomes:
Provide a working understanding of the structure, function, and ecology of tropical ecosystems; their importance to local communities; and the social dimensions of environmental issues, especially those related to justice

ENVS 345 Conservation and Sustainability of Neotropical Ecosystems (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265; Instructor Consent Required
This course provides an introduction to conservation ecology in Neotropical ecosystems via classroom sessions and experiential learning activities during a Spring-Break field trip to Belize. Students will gain experience in environmental monitoring and biological survey methods. Ecosystems studied: coral reefs, mangrove forests, subtropical rain and dry forests, savannas, rivers, wetlands.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X- ENVS 345/ BIOL 349
Outcomes:
Students will gain an understanding of tropical climates, neotropical terrestrial/aquatic ecosystems and applied conservation and environmental practices such as nature reserve design and management, community-based resource management, ecotourism, and ecoagriculture

ENVS 350A Solutions to Environmental Problems: Water (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Water' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to water and then develop and implement projects that address the problem on campus and in the local community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop understanding of water-related environmental problems, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 350B Solutions to Environmental Problems: Biogas (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Biogas' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to biogas production, processing and transport and then develop and implement projects that address the problem on campus and in the local community.
Outcomes:
Students will develop understanding of environmental problems related to biogas, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 350C Solutions to Environmental Problems: Climate Action (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; and ENVS 224 (recommended)
Consideration of environmental, political, economic, historical, and cultural contexts of climate change. Examination of actions occurring at varying geographic scales to mitigate and/or adapt to climate change impacts. Problem- and solution-based learning of how to invest resources effectively to deal with a changing climate and its consequences.
This course satisfies the Engaged Learning requirement.
Outcomes:
Develop understanding of environmental problems related to climate change, demonstrate skills/knowledge needed to address those problems and recognize/articulate future possibilities for environmental leadership/civic engagement

ENVS 350F Solutions to Environmental Problems: Food Systems (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Food Systems' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to food production, processing and transport and then develop and implement projects that address the problem on campus and in the local community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop understanding of environmental problems related to food systems, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 351 Introduction to Sustainability Concepts & Impacts (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Examines environmental, economic, social and political impacts of sustainable practices on general public and global and local organizations. Provides students with understanding of importance to corporations and other entities of measuring, monitoring, and reporting resource use to customers and stakeholders.
Outcomes:
Explaining basic concepts of sustainability and how they relate to operations and goals of institutions and organizations; interaction of social, economic, and ecological systems to influence sustainability challenges and solutions

ENVS 352 Sustainability Assessment & Reporting I (3 Credit Hours)
Pre-requisites: ENVS 351
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of energy, air, buildings and transportation.
Outcomes:
Ability to assess and report sustainability metrics related to energy, air, buildings, and transportation

ENVS 353 Sustainability Assessment & Reporting II (3 Credit Hours)
Pre-requisites: ENVS 351
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of water, land, food and waste. Environmental and social impacts of water use and sources, land use practices, food sourcing and production, and waste production and recovery.
Outcomes:
Ability to assess and report sustainability metrics related to water, land, food, and waste

ENVS 354 Sustainability Plan Development & Reporting (3 Credit Hours)
Pre-requisites: ENVS 351, ENVS 352, and ENVS 353
Capstone course in the four course sequence on Sustainability Assessment & Planning. Using concepts and methodology to create a comprehensive sustainability plan including stakeholder engagement, life cycle analyses, set resource baselines, short- and long-term sustainability goals, budgets and draft sustainability plan for a representative entity.
Outcomes:
Learn best practices to inspire and engage partners and stakeholders to advance environmental sustainability in different types of organizations; Ability to create a comprehensive sustainability plan for organizations and institutions

ENVS 363 Sustainable Business Management (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
Course introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, ethical, and business cases for adopting sustainability. This course fulfills a MGMT elective.
Course equivalencies: ENVS 363/ENVS 463
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

ENVS 367 Mammalogy (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
This course will focus on the ecology, evolution, behavior, and conservation of the class, Mammalia. Students will gain insight how this unique group evolved over time and became the dominate lineage over the Tertiary period. Furthermore, we will investigate how mammals hold special social and cultural relationship with humans, and why we have such complicated relationships with mammals, from revering them in religious contexts, to keeping them in our homes, to consuming them as nutrition.
Outcomes:
Working knowledge and mastery of the traits, evolutionary timescale, ecology, and conservation of mammals; Students will also gain experience collecting data (on museum samples as well as observations of living samples) to learn current techniques scientists and conservationists use to advance our understanding of this group

ENVS 369 Field Ornithology (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266; and BIOL 215 (recommended)
Field ornithology is an intensive 3-week engaged-learning course at the Loyola University Retreat and Ecology Campus during the peak of the migratory season intended to provide an introduction to the theory and practice of field ornithology. Emphasis will be on field identification and song recognition, census techniques, and avian behavior.
Course equivalencies: X- ENVS 369/BIOL 348
Outcomes:
Students will become skilled in critical reasoning, field techniques, and scientific investigation that demonstrate an understanding of knowledge and techniques used in field ornithology

ENVS 380 Introduction to Geographic Information Systems (3 Credit Hours)
Pre-requisites: Restricted to Junior and Senior standing
Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations.
Interdisciplinary Option: Urban Studies
Course equivalencies: ENVS380/ENVS480
Outcomes:
Describe the conceptual/theoretical and practical/technological background of GIS; Describe ethical issues germane to GIS; Prepare/analyze GIS data in research; Apply GIS in community-service projects

ENVS 381 Advanced GIS Applications (3 Credit Hours)
Pre-requisites: ENVS 380 and Restricted to Junior and Senior standing
Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data.
Outcomes:
Understand various spatial relationship concepts and their applications; identify and address common methodological challenges; understand how to use spatial data to make sound arguments in spatial problem solving and planning/policy

ENVS 382 Remote Sensing (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; Restricted to Juniors and Seniors
Science of obtaining information about objects or areas using data from remote sensors on satellites or mounted on aircraft that can detect energy reflected from Earth. Topics include data collection; digital image processing, assessment, evaluation, and enhancement; display alternatives and visualization; electromagnetic radiation principles and radiometric correction; and geometric correction.
Outcomes:
Understand concepts, data, and methods of remotely sensed geographic data; Learn how to obtain and analyze remote sensing data, produce thematic maps, learn landscape patterns, and methods to decipher them

ENVS 383 Human Dimensions of Conservation (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
This course will increase student knowledge of the social, political, economic, psychological, and cultural dimensions that influence the success of conservation projects and develop skills in conducting human dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute to preparation for employment in the conservation field and/or graduate study.
Outcomes:
Students will understand the importance of treating the human dimensions of conservation problems with the same scientific rigor customarily given to the ecological dimensions

ENVS 384 Conservation Economics (3 Credit Hours)
Pre-requisites: ECON 201
Explores resource conservation issues using economic principles. Topics include management of forests, wildlife and mineral resources; the demand for parks and outdoor recreation; the debate between environmental preservation and conservation; valuation of ecosystem services; the economics of biodiversity and endangered species; and policies to promote conservation in agriculture.
Outcomes:
Students will learn how natural resource use is affected by economic values, how to critically evaluate natural resource management problems, and evaluate models of dynamic resource extraction and user preferences

ENVS 385 Introduction to Global Health (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
This course introduces students to epidemiological and policy aspects of global health with a focus on health disparities at the international level.
Interdisciplinary Option: Bioethics
Course equivalencies: X-HSM210/PUBH314/ENVS385
Outcomes:
Understand approaches to existing and emerging health problems and the relationships between health, poverty, and development

ENVS 386 Python Programming for GIS (3 Credit Hours)
Pre-requisites: Junior or Senior Standing
This course aims to provide students with a comprehensive understanding of Python programming for Geographic Information Systems. Through a combination of lectures, hands-on exercises, and projects, students will develop the skills necessary to leverage Python in GIS applications, automate geospatial workflows, and analyze spatial data. ENVS 380 pre- or co-requisite
Outcomes:
Understand Python programming language, loops and conditional statements; acquire a foundation knowledge of GIS; apply Python programming skills to perform spatial analysis; develop Python scripts to automate common GIS tasks

ENVS 387 Principles of Ecotoxicology (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265; and ENVS 274
This course will provide information on how pollutants affect ecosystems and how we might ameliorate their negative effects in our world. The emphasis of this course will be the fate and effects of pollutants in the ecosystem. The effects will be from molecular level to individual organism, community, and ecosystem levels.
Interdisciplinary Option: Bioethics
Outcomes:
This course will provide students with scientific knowledge in the cause and effects of pollutants in ecosystems and to prepare them for graduate study/future career

ENVS 389 Ecological Risk Assessment (3 Credit Hours)
Pre-requisites: ENVS 274 and ENVS 275
This course covers the area of potential effects of pollutants to ecosystems and practices on risk assessment for pollutants based on exposure and effect data in the literature. Different approaches for assessing the potential ecological impacts and risks of pollutants in support of environmental management will be discussed and practiced.
Outcomes:
Learn toxic effects of pollutants, acquire, organize, and synthesize monitoring and effect data using advanced analysis methods and skills in support of environmental impact and risk assessment via case studies

ENVS 390 Integrative Seminar (3 Credit Hours)
This course requires students to focus on a specific environmental issue or theme, integrating multidisciplinary perspectives, through individual or group presentations, discussion, and analysis of presentations by outside speakers.
Outcomes:
Students will demonstrate an understanding of the multi-faceted and interdisciplinary nature of environmental issues

ENVS 391 Environmental Research (1-3 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. Enrollment Conditions: Administrative Permission.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to design and carry out the research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 391C Independent Environmental Research (Capstone) (3 Credit Hours)
Pre-requisites: Senior standing and Instructor Consent
Fulfills capstone requirement for SES majors. Through independent research experience, examine how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts. Research projects must use a multi-disciplinary perspective in analysis and interpretation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Design and carry out research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 391L Independent Environmental Research-Lab (1-3 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. This version is used when funds must be drawn from a 'lab fees' budget line to conduct the research. Requires Administrative Permission to enroll.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to design and carry out research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 395 Environmental Internship (3 Credit Hours)
Students seek out and engage in a semester- or summer-long internship with a civic, business, governmental, or academic group providing hands-on experience in work on environmental issues.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ENVS395/ESP395/NTSC395
Outcomes:
Students will demonstrate, through daily activity logs and a comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience

ENVS 395C Environmental Internship (Capstone) (3 Credit Hours)
Pre-requisites: Senior standing and Department Consent
Fulfills capstone requirement for SES majors. Through internship experience, students reflect upon academic and extra-curricular activities in their degree program and learn how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts.
This course satisfies the Engaged Learning requirement.
Outcomes:
Guided reflection on relationship between coursework and internship experience, relate learning to specific activities and experiences in the internship, assess value of internship to future career plans

ENVS 398 Special Topics (3 Credit Hours)
Specific titles and contents vary from semester to semester.

ENVS 398B Environmental Science Topics for BIET Minor Capstone (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include biotechnologies, concepts of race and gender, the environment, reproduction, and others. This course number provides a cross-listed elective for Environmental Science students when the Bioethics capstone's topic is environmental.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and environmental science issues with regard to the special topic in environmental science

ENVS 398L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes lab component.

ENVS 399 Directed Readings (1-3 Credit Hours)
Pre-requisites: Instructor Consent
Directed by an ESP faculty member, students will read, analyze, and discuss a publications focusing on different aspects of a specific environmental issue or theme.
Outcomes:
Students will demonstrate comprehension of, and the ability to apply information from, scientific literature and be able to synthesize information to produce a cogent, synthetic analysis of their topic based on these readings

ENVS 401 Sustainable Systems - Natural Science Perspectives (3 Credit Hours)
This required core course provides an integrated overview of environmental science and sustainability which connect to sustainable development and ecological economics goals to define a just and safe space for the equitable distribution of life's essential re-sources that does not exceed the Earth's capacity to provide and replenish them. Restricted to GRAD students.
Outcomes:
Students will be able to make logical connections between environmental science and sustainability and evaluate data and primary literature in learning best practices for making evidence-based decisions

ENVS 402 Sustainable Systems - Social Science Perspectives (3 Credit Hours)
This required core course examines theoretical perspectives on and practical examples of sustainable development at both global and local/regional scales. Restricted to GRAD students.
Outcomes:
Students learn concepts of sustainable development and system ,resilience, including history, contested meanings, strengths, and limitations of each; How change towards sustainability occurs at multiple scales using social sciences research

ENVS 410 Introduction to Environmental Law & Policy (3 Credit Hours)
This introduction to environmental law surveys some critical federal environmental statutes, rules, and regulations in the United States; important case law decided under those statutes; interaction between federal, state, and local jurisdictions; and impacts on air, land, water, and natural resources. Restricted to GRAD students.
Outcomes:
Understand how the natural environment is controlled, managed and promoted through the legal system

ENVS 411 Natural Resources and Land Use Law & Policy (3 Credit Hours)
Focus on legal and policy processes used to govern pollution, water use, endangered species, toxic substances, and environmental impact and risk. Restricted to GRAD students.
Outcomes:
Students will understand how the natural environment is controlled, managed and promoted through the legal system and how land use laws and policy impact social and economic issues

ENVS 412 Water Law & Policy (3 Credit Hours)
This course looks at how the law allocates and protects one of our most crucial natural resources -- water. Understanding development and regulation of water ownership and use and how those decisions impact current environmental and socio-economic issues. Restricted to GRAD students.
Outcomes:
Understand how key laws and policies impact protection and use of water in the United States; understand key legal concepts that shape the management of our water resources

ENVS 413 Energy Law & Policy (3 Credit Hours)
This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy. Restricted to GRAD students.
Outcomes:
Understand how key laws and policies impact production and use of energy; and how energy is controlled by federal and local regulations and policies

ENVS 420 Conservation Biology (3 Credit Hours)
Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change. Restricted to GRAD students.
Outcomes:
Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems

ENVS 422 Invasive Species (3 Credit Hours)
Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause. Restricted to GRAD students.
Outcomes:
Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem

ENVS 423 Environmental Microbiology (3 Credit Hours)
This course introduces the significant role of microorganisms in numerous environmental and human-engineered processes. It covers microbiology and its basic methods to orient students to this field of science and the importance of microbial diversity relevant to agriculture, public health, and ecological restoration. Restricted to Graduate Students in the ENSS-MS program.
Course equivalencies: ENVS 323/ENVS 423
Outcomes:
Students will learn to isolate and characterize environmental microorganisms; Students will investigate the role of microorganisms in nutrient cycling, remediation of soils, and transmission of existing and emerging pathogens

ENVS 425 Sustainable Agriculture (3 Credit Hours)
This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored. Restricted to GRAD students.
Outcomes:
Students will be able to explain the characteristics of the US agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system

ENVS 426 Agroecosystems (3 Credit Hours)
In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad. Restricted to GRAD students.
Outcomes:
Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating scientific information to diverse audiences

ENVS 427 Food Systems Analysis (3 Credit Hours)
This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change. Restricted to GRAD students.
Outcomes:
Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis

ENVS 430 Restoration Ecology (3 Credit Hours)
This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types. Restricted to GRAD students.
Outcomes:
Students will apply knowledge from ecology and other disciplines to the practice of ecosystem restoration, and learn to integrate information from multiple disciplines, and stakeholder input, to design/manage restoration projects

ENVS 433 Introduction to the Circular Economy (3 Credit Hours)
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. Restricted to graduate students.
Outcomes:
Understand role of design in creating a sustainable future; Understand and apply: (1) circular design methods; (2) biomimicry design methods; and (3) human-centered design (design thinking) methods

ENVS 435 Ecological Economics (3 Credit Hours)
Ecological Economics is a trans disciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges. Restricted to GRAD students.
Outcomes:
Understanding of ecological economics history, conceptual foundations, principles, tools, indicators, and applications; Topics include sustainable scale, just distribution, efficient allocation and relationships between economic

ENVS 436 Design for Circular & Sustainable Business (3 Credit Hours)
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. ENVS 436 Restricted to graduate students.
Outcomes:
Understand the role of design in creating a sustainable future; Understand and apply: (1) circular design methods (2) biomimicry design methods; and (3) human-centered design (design thinking) methods

ENVS 438 Climate Change and Human Health (3 Credit Hours)
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing. Restricted to GRAD students.
Outcomes:
1) Outline fundamental public health concerns associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

ENVS 451 Introduction to Sustainability Concepts & Impacts (3 Credit Hours)
Examines environmental, economic, social and political impacts of sustainable practices on general public and global and local organizations. Provides students with understanding of importance to corporations and other entities of measuring, monitoring, and reporting resource use to customers and stakeholders. Restricted to GRAD students.
Outcomes:
Explaining basic concepts of sustainability and how they relate to operations and goals of institutions and organizations; interaction of social, economic, and ecological systems to influence sustainability challenges and solutions

ENVS 452 Sustainability Assessment & Reporting I (3 Credit Hours)
Pre-requisites: ENVS 451; GRAD students
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of energy, air, buildings and transportation.
Outcomes:
Ability to assess and report sustainability metrics related to energy, air, buildings, and transportation

ENVS 453 Sustainability Assessment & Reporting II (3 Credit Hours)
Pre-requisites: ENVS 451; GRAD students
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of water, land, food and waste. Environmental and social impacts of water use and sources, land use practices, food sourcing and production, and waste production and recovery.
Outcomes:
Ability to assess and report sustainability metrics related to water, land, food, and waste

ENVS 454 Sustainability Plan Development & Reporting (3 Credit Hours)
Pre-requisites: ENVS 451, 452, and 453; GRAD students
Capstone course in the four course sequence on Sustainability Assessment & Planning. Using concepts and methodology to create a comprehensive sustainability plan including stakeholder engagement, life cycle analyses, set resource baselines, short- and long-term sustainability goals, budgets and draft sustainability plan for a representative entity.
Outcomes:
Learn best practices to inspire and engage partners and stakeholders to advance environmental sustainability in different types of organizations; Ability to create a comprehensive sustainability plan for organizations and institutions

ENVS 463 Sustainable Business Management (3 Credit Hours)
Pre- or co-requisites: ENVS 410
To introduce students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, moral, business, & economic cases for adopting sustainability. This course fulfills a MGMT elective.
Course equivalencies: ENVS 363/ENVS 463
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

ENVS 467 Mammalogy (3 Credit Hours)
Pre-requisites: Graduate students only
This course will focus on the ecology, evolution, behavior, and conservation of the class, Mammalia. Students will gain insight how this unique group evolved over time and became the dominate lineage over the Tertiary period. Furthermore, we will investigate how mammals hold special social and cultural relationship with humans, and why we have such complicated relationships with mammals, from revering them in religious contexts, to keeping them in our homes, to consuming them as nutrition.
Outcomes:
Working knowledge and mastery of the traits, evolutionary timescale, ecology, and conservation of mammals; Students will also gain experience collecting data (on museum samples as well as observations of living samples) to learn current techniques scientists and conservationists use to advance our understanding of this group

ENVS 469 Field Ornithology (3 Credit Hours)
Field ornithology is an intensive 3-week engaged-learning course at the Loyola University Retreat and Ecology Campus during the peak of the migratory season intended to provide an introduction to the theory and practice of field ornithology. Emphasis will be on field identification and song recognition, census techniques, and avian behavior. Restricted to GRAD students.
Outcomes:
Students will become skilled in critical reasoning, field techniques, and scientific investigation that demonstrate an understanding of knowledge and techniques used in field ornithology

ENVS 480 Introduction to Geographic Information Systems (3 Credit Hours)
Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations. Restricted to GRAD students.
Course equivalencies: ENVS380/ENVS480
Outcomes:
Describe the conceptual/theoretical and practical/technological background of GIS; describe ethical issues germane to GIS; prepare/analyze GIS data in research; apply GIS in community-service projects

ENVS 481 Advanced GIS Applications (3 Credit Hours)
Pre-requisites: ENVS 480
Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data.
Outcomes:
Understand various spatial relationship concepts and their applications; identify and address common methodological challenges; understand how to use spatial data to make sound arguments in spatial problem solving and planning/policy

ENVS 482 Remote Sensing (3 Credit Hours)
Science of obtaining information about objects or areas using data from remote sensors on satellites or mounted on aircraft that can detect energy reflected from Earth. Topics include data collection; digital image processing, assessment, evaluation, and enhancement; display alternatives and visualization; electromagnetic radiation principles and radiometric correction; and geometric correction. Restricted to GRAD students.
Outcomes:
Understand concepts, data, and methods of remotely sensed geographic data; Learn how to obtain and analyze remote sensing data, produce thematic maps, learn landscape patterns, and methods to decipher them

ENVS 483 Human Dimensions of Conservation (3 Credit Hours)
This course will increase student knowledge of the social, political, economic, psychological, and cultural dimensions that influence the success of conservation projects and develop skills in conducting human dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute to preparation for employment in the conservation field and/or graduate study. Restricted to GRAD students.
Outcomes:
Students will understand the importance of treating the human dimensions of conservation problems with the same scientific rigor customarily given to the ecological dimensions

ENVS 484 Conservation Economics (3 Credit Hours)
Explores resource conservation issues using economic principles. Topics include management of forests, wildlife and mineral resources; the demand for parks and outdoor recreation; the debate between environmental preservation and conservation; valuation of ecosystem services; the economics of biodiversity and endangered species; and policies to promote conservation in agriculture. Restricted to Grad students.
Outcomes:
Students will learn how natural resource use is affected by economic values, how to critically evaluate natural resource management problems, and evaluate models of dynamic resource extraction and user preferences

ENVS 486 Python Programming for GIS (3 Credit Hours)
Pre-requisites: Graduate Student Standing
This course aims to provide students with a comprehensive understanding of Python programming for Geographic Information Systems. Through a combination of lectures, hands-on exercises, and projects, students will develop the skills necessary to leverage Python in GIS applications, automate geospatial workflows, and analyze spatial data. ENVS 480 pre- or co-requisite
Outcomes:
Understand Python programming language, loops and conditional statements; acquire a foundation knowledge of GIS; apply Python programming skills to perform spatial analysis; develop Python scripts to automate common GIS tasks

ENVS 487 Principles of Ecotoxicology (3 Credit Hours)
This course will provide information on how pollutants affect ecosystems and how we might ameliorate their negative effects in our world. The emphasis of this course will be the fate and effects of pollutants in the ecosystem. The effects will be from molecular level to individual organism, community, and ecosystem levels. Restricted to GRAD students.
Outcomes:
This course will provide students with scientific knowledge in the cause and effects of pollutants in ecosystems

ENVS 489 Ecological Risk Assessment (3 Credit Hours)
This course covers the area of potential effects of pollutants to ecosystems and practices on risk assessment for pollutants based on exposure and effect data in the literature. Different approaches for assessing the potential ecological impacts and risks of pollutants in support of environmental management will be discussed and practiced. Restricted to Graduate students.
Outcomes:
Learn toxic effects of pollutants, acquire, organize, and synthesize monitoring and effect data using advanced analysis methods and skills in support of environmental impact and risk assessment via case studies

ENVS 490B Integral Ecology First Studies Program: Biodiversity (1 Credit Hour)
This course explores the environmental crisis of the loss of biodiversity. It covers the evolutionary origin of biodiversity, the importance and glory of biodiversity, and how ecosystem structure and function collapses when we reach the tipping point of species extinction. The course is intended for Jesuit men in formation in the First Studies Program, and is limited to them. No prerequisites are required.
Outcomes:
First Studies men will grasp the scientific concepts of biodiversity, explore the ethical and spiritual dimensions of biodiversity loss, and take actions to lessen the loss of biodiversity

ENVS 490C Integral Ecology First Studies Program: Climate Change (1 Credit Hour)
This course covers the science of climate change including the physical and chemical underpinnings of fossil fuels and greenhouse gases and their impact on trapping solar infrared radiation within the Earth's atmosphere and causing subsequent warming of the land and oceans. Warming of the planet increases the frequency and intensity of storms like hurricanes, cyclones, typhoons, it melts glaciers and causes sea levels to rise. Climate change is modifying the planetary distribution of precipitation which can produce water scarcity in some parts of the world, and leads to flooding and poor water quality in other locations. This course will study the scientific drivers of climate change, and the social and ethical ramifications of how the marginalized are disproportionately impacted. It will touch on environmental justice, water, land and food insecurity, and solutions to the climate crisis in first world countries as well as in developing countries. The course is intended for Jesuit men in formation in the First Studies Program, and is limited to them. No prerequisites are required.
Outcomes:
Understand the chemical composition of the three main classes of fossil fuels and connect the chemistry to greenhouse gases and the greenhouse effect; Explore the many ways in which climate change is impacting the planets' hydrologic cycle, the melting of polar ice caps and glaciers, rising sea levels, increased frequency and intensity of droughts, floods, wildfires and storm events worldwide; Understand the benefits and challenges of clean energy technologies, and where solar, geothermal, wind, biofuels and hydro are good solutions, and the geopolitical environment around clean energy technologies; Analyze key ethical challenges arising from climate change that human beings are confronting with in the world today and understand the moral principles, goals, and virtues important for guiding decisions about making a just transition to a clean energy economy; Discover ways in which spirituality has influenced the human understanding and use of fossil fuels, and recognize the importance of spirituality for responding constructively to today's climate crisis

ENVS 490W Integral Ecology First Studies Program: Water (1 Credit Hour)
This course covers the science of water - physical and chemical properties of water, how the hydrologic cycle distributes water across the planet, how climate change is modifying the distribution of water which can produce water scarcity in some parts of the world, and leads to flooding and poor water quality in other locations, and how the marginalized are disproportionately water insecure. It will touch on environmental justice and water insecurity, and some technologies for cleaning waste water and finishing drinking water in first world countries as well as in developing countries. The course is intended for Jesuit men in formation in the First Studies Program, and is limited to them. No prerequisites are required.
Outcomes:
First Studies men will explore the structure of the water molecule, the water cycle, and the changing water content in the atmosphere; Understand the sources of water, the distribution of water on Earth, and the effect of human activities on distribution cycles; Explore wastewater treatment plants and/or drinking water finishing plants in the city of Chicago to learn how water can be cleaned and reused for human consumption; Analyze key ethical challenges about water that human beings are confronting in the world today and understand the moral principles, goals, and virtues important for guiding water decisions; Discover ways in which spirituality has influenced the human understanding and use of water, and recognize the importance of spirituality for responding constructively to today's water crisis

ENVS 491 Independent Environmental Research (1-4 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. Post-baccalaureate students only.
Outcomes:
Dependent on the specific research project and goals

ENVS 495 Environmental Internship (3 Credit Hours)
Students seek out and engage in a semester -or summer-long internship with a civic, business, governmental, or academic group providing hands on experience in work on environmental issues. Post-baccalaureate students only.
Outcomes:
Students demonstrate, through daily activity logs and comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience

ENVS 496 Research (3-12 Credit Hours)
Restricted to GRAD students.

ENVS 498 Special Topics (1-12 Credit Hours)
Pre-requisites: Post-baccalaureate students only
Specific titles and contents vary from semester to semester. Variable credit hours.
Outcomes:
Dependent on the specific course content and goals

ENVS 498L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes a lab component. Variable credit hours. Post-baccalaureate students only.
Outcomes:
Dependent on the specific course content and goals

ENVS 499 Directed Readings (1-3 Credit Hours)
Directed by an SES faculty member, students will read, analyze, and discuss a publications focusing on different aspects of a specific environmental issue or theme. Post-baccalaureate students only.
Outcomes:
Students demonstrate comprehension, ability to apply information from scientific literature and synthesize information to produce cogent, synthetic analysis of their topic based on these readings

ENVS 595 Thesis Supervision (0 Credit Hours)
Students will make supervised progress towards completion of their theses. Restricted to SES, GRAD students.

ENVS 605 Master's Study (0 Credit Hours)
Restricted to GRAD students.

Erikson Institute (ERIK)

Discover, search, courses (p. 2953)!

ERIK E421 Social and Emotional Development I (3 Credit Hours)
This course focuses on the study of social and emotional development in children from birth through age eight. It primarily considers how children experience themselves and others; the role of relationships in development; and the interaction of biological, psychological and social forces. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE121 / ERIKE21 /ERIKE421

ERIK E426 Cognitive Development (3 Credit Hours)
This course provides students with a basic knowledge of cognitive development in children from birth through age eight and fosters awareness of the application of this knowledge to children with diverse abilities and varying cultural and linguistic backgrounds. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE126 / ERIKE26 / ERIKE426

ERIK E477 Seminar Children-At-Risk (3 Credit Hours)
This course examines the concept of risk and how it impacts child development. We will use multiple frameworks to examine risk, including public health, developmental psychopathology, and education. Attention will be focused on biological/genetic (such as prematurity and temperament), family (such as parent mental health and child maltreatment), and environmental (such as poverty and neighborhood violence) factors. The consequences of growing up in the context of chronic adversity will be explored, as well as the factors that lead some children to cope with and show resilience in these circumstances. The challenges of understanding risk in current research, as well as the implications of this research for programs and policy will also be discussed.
Course equivalencies: ERIKE477 / ERIKE77

ERIK E479 Teaching & Learning: Linking Theory & Research to Practice (3 Credit Hours)
An understanding of the two domains of learning and teaching is fundamental to the field of child development and education. This course examines these issues through investigating and analyzing exemplary models of recent and influential theory and research. A dialogue-based approach to learning will be used throughout the course to encourage personal involvement in exploring and explaining the science of learning and teaching. Students will also engage in fieldwork, such as on-site observations, conversations with practitioners, and a research project, to gain first-hand experience of these issues.
Course equivalencies: ERIKE479 / ERIKE79

ERIK E481 Seminar Social & Cultural Contexts (3 Credit Hours)
Through an examination of current theory and multidisciplinary social science research, this course explores the influence of contextual factors on the development of children. Socially and culturally constructed factors (such as gender, race, ethnicity and social class) and institutions (such as family, schools, and organized child care) will be discussed in terms of their influence on child rearing and child development. Through course lectures, discussion, and assignments, students will gain an understanding of the variability of child rearing strategies and outcomes across cultural communities; the role of historical and ecological factors in child rearing and family functioning; identity development in complex societies; and sources of possible tensions between different cultural communities and societal institutions (such as schools, social service providers, and child care programs).
Course equivalencies: ERIKE481 / ERIKE81

ERIK E482 Program Evaluation and Implementation Science (3 Credit Hours)
This course provides an advanced introduction to evaluating social services and education programs, including the study of factors leading to better program outcomes (i.e., implementation science). Restricted to Erikson graduate students.
Course equivalencies: ERIKE482 / ERIKE82

ERIK E485 Research Internship (3 Credit Hours)
The student will work either with an Erikson faculty member, research scientist, or research associate, or on a research project at another institution.
Course equivalencies: ERIKE485 / ERIKE85

ERIK E486 Teaching Internship (3 Credit Hours)
The student will teach or assist in teaching a college course in child development or a related topic.
Course equivalencies: ERIKE486 / ERIKE86

ERIK E489 Special Topics in Child Development (3 Credit Hours)
Enrollment for this course should be considered in close consultation with the faculty advisor. This course allows doctoral students to select from a range of applied child development courses at Erikson Institute that are taught by a member of the doctoral program faculty. Examples include Physical Growth and Development; Language Development; and Working with Adults. Students will gain deep understanding of the theories, research, and issues with regard to a special content area in child development and early education.

ERIK E497 Doctoral Study (0 Credit Hours)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations.
Course equivalencies: ERIKE497 / ERIKE97

ERIK E499 Dissertation Supervision (0 Credit Hours)
Course for continuing students engaged in dissertation research under advisor's supervision.
Course equivalencies: ERIKE499 / ERIKE99

ERIK E501 First Year Doctoral Seminar (0 Credit Hours)
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; and 5) Explore various career paths both in academia and non-academia

ERIK E502 First Year Doctoral Seminar (1 Credit Hour)
Pre-requisites: Graduate students only
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; 5) Explore various career paths both in academia and non-academia

ERIK E503 Scholarship Skills I (1 Credit Hour)
This course is designed to help graduate students develop their skills in finding, collating, and summarizing scholarly literature in relation to a topic of interest/future research. AI tools will also be explored and interrogated. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E504 Scholarship Skills 2 (1 Credit Hour)
Pre-requisites: Graduate Students only
This course is designed to help graduate students develop their skills in synthesizing and critiquing others' research, thereby providing support to their comprehensive exam milestone as well as helping prepare them for the literature review sections of their thesis or dissertation. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E505 Scholarship Skills 3 (1 Credit Hour)
Pre-requisites: Grad Students only
This course is designed to help graduate students develop their skills in writing, publishing, and disseminating their own research. This will include conference submissions and presentations, grant proposals, manuscripts and articles for peer review. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

European Studies (EURO)

Discover, search, courses (p. 2953)!

EURO 101 Introduction to European Studies (3 Credit Hours)
This course serves as an introduction to the interdisciplinary field of European studies. It provides an overview of the major disciplines represented in the program, introduces the main approaches covered in the program, and discusses some of the most important topics involving European states, regions, and the European Union. Restricted to European Studies minors.
Interdisciplinary Option: European Studies
Outcomes:
Students will gain a basic understanding of how different disciplines contribute to the study of Europe at the state, sub-state and supra-state levels

EURO 301 European Studies Capstone (3 Credit Hours)
This capstone class is intended to provide seniors a chance to reflect on what they have learned as European Studies minors by focusing on a particular theme. The class takes an interdisciplinary and cross-national approach. Students develop a major research project. Restricted to Juniors and Seniors minoring in European Studies.
Interdisciplinary Option: European Studies
Outcomes:
Through this course students will gain an understanding of the ways in which various fields and their approaches to European Studies can help answer specific important questions about the region

Executive Education (EXED)

Discover, search, courses (p. 2953)!

EXED 101 High-Impact Leadership: Maximizing Your Leadership Potential (0 Credit Hours)
High-Impact Leadership: Maximizing Your Leadership Potential combines the best practices and principles behind the art and science of leadership, decision-making, problem solving and organizational effectiveness.
Outcomes:
Gain an understanding of your leadership style, explore the discipline of leadership, learn the best practices for improving individual and organizational decision making, gain the strategies to build successful teams, manage conflict more effectively and link individual performance to organizational strategy

EXED 102 Project Management Certificate Program (0 Credit Hours)
This program will improve participants' performance by providing industry-standard tools approved by the Project Management Institute (PMI®) to help successfully manage any type of project regardless of scope or industry.
Outcomes:
Gain a comprehensive, formal training in project management, based on the industry-standard body of knowledge; Learn the fundamental tools to effectively manage any project; Learn how to manage projects from initiation, to planning, control and closeout; Learn how to communicate more effectively to project sponsors and team members

EXED 103 mini-MBA Certificate Program (0 Credit Hours)
The Loyola mini-MBA is a comprehensive management development program that provides cutting-edge business skills, coaching and leadership training to help propel your organization and your career forward.
Outcomes:
Strengthen overall business acumen and gain a better understanding of the key functional areas of business, including the frameworks, models and levers that drive organizational success; Develop the skills needed to think strategically and cross-functionally

EXED 104 Digital Marketing Strategy Certificate Program (0 Credit Hours)
This program provides a thorough foundation in the rapidly changing world of digital marketing and prepare you to strategically choose, measure, and implement the right digital marketing components into your overall marketing plan.
Outcomes:
This program provides a thorough foundation in the rapidly changing world of digital marketing and prepare you to strategically choose, measure, and implement the right digital marketing components into your overall marketing plan

EXED 105 Baumhart Center Learning Institutes (0 Credit Hours)
Professional Development skills in Social Enterprise Responsibility

EXED 107 Practical Finance and Accounting (0 Credit Hours)
Participants will learn a comprehensive approach to financial analysis. This program provides a grounding in basic managerial finance, including terminology like valuation, capital investment, financing, and capital structure.
Outcomes:
Develop comfort with the terminology and techniques used in managerial accounting and financial analysis; Learn to confidently read and analyze corporate financial statements; Understand the role of capital budgeting

EXED 108 Strategic Business Communications (0 Credit Hours)
This program teaches techniques to communicate fluently in a variety of situations. Participants learn simple and effective methods to become a more powerful communicator with peers, subordinates, and supervisors.
Outcomes:
Learn to present ideas at face-to-face and virtual meetings; Gain tools to confidently express yourself; Learn to gain support for ideas and suggestions; Understand how to use technology to support communication; Reduce conflict

EXED 109 Supply Chain Management Essentials (0 Credit Hours)
Participants learn the fundamentals of effective supply chain management across the end-to-end supply chain. The certificate program addresses a wide spectrum of supply chain techniques designed to reduce cost, improve profitability, and maximize the customer experience while balancing social, environmental, and economic concerns.
Outcomes:
Learn techniques to create a more efficient and effective supply chain and understanding of key trends, opportunities, and challenges in supply chain management

EXED 110 Lean Certification (0 Credit Hours)
Loyola will offer a new, online platform Lean Certification.
Outcomes:
To have more knowledge on Lean practices in Supply Chain and Logistics areas

EXED 111 Six Sigma Certification (0 Credit Hours)
Loyola will offer a new, online platform for Six Sigma Certifications.
Outcomes:
To have more knowledge on Six sigma for managers

EXED 151 Sysmex America mini-MBA (0 Credit Hours)
Customized mini-MBA that includes Accounting/Finance, Strategy, Marketing, Project Management and Management.
Outcomes:
The mini-MBA is intended for employees across various Sysmex functional areas, from both the home office as well as field operations; The content will be delivered electronically for two cohort groups

EXED 152 Sysmex America Birth of a Customer (0 Credit Hours)
Sysmex Birth of a Customer provides participants with an in-depth look at the internal strategy at Sysmex.
Outcomes:
Panels of senior executives assisted by a faculty moderator talk about how the various elements of organizational strategy combine to meet client needs; Participants complete a related case study

EXED 153 Presence Healthcare Ministry Leadership Program (0 Credit Hours)
Providing training in the basics of Catholic mission, identity, ethics, and leadership, the Certificate in Heath Care Ministry Leadership will prepare Presence Health staff to carry out its mission of providing compassionate, holistic care in the spirit of healing and hope to the communities it serves.
Outcomes:
This program is designed to build a community of leaders with shared formation experience, explore authentic paths to spirituality, develop an understanding of how vacation and call relates to Catholic healthcare, and strengthen overall leadership acumen and strategic thinking abilities

EXED 165 Barilla Leadership & Management Development Program (0 Credit Hours)
This custom program is designed to support the development of a leadership pipeline at Barilla. The program consists of 3 learning modules and integrated capstone projects and covers leadership and business acumen topics.
Outcomes:
Strengthen overall business acumen and gain a better understanding of the key functional areas of business, including the frameworks, models and levers that drive organizational success; Develop strategy skills

EXED 170 McShane Companies Leadership Emphasis (0 Credit Hours)
Formal leadership training provided as a component of the McShane Future Leaders Program.
Outcomes:
Improved leadership and strategy acumen

EXED 173 American College of Surgeons - Leadership (0 Credit Hours)
Customized leadership training for the executive leadership team at American College of Surgeons, includes Leadership Legacy and Decision-Making.
Outcomes:
Provide senior leaders with ongoing leadership skill development

EXED 174 The Cradle (0 Credit Hours)
Participants will learn Leadership Development and Change Management Essentials.
Outcomes:
To have more leadership team at The Cradle

EXED 175 Yaskawa America Inc. (0 Credit Hours)
Participants will learn Negotiation Skills for their Supply Chain team.
Outcomes:
To have more knowledge on negotiations skills for their sales team

EXED 176 MorrisAnderson (0 Credit Hours)
Participants will learn Leadership skills in a 3 hour workshop.
Outcomes:
To assist their team with new managers getting up to speed on their leadership soft skill

EXED 177 Family Business Center Learning Institutes (0 Credit Hours)
Three institutes from FBC are moving their education to EE. This includes Family Business Stewardship Institute, Next Generation Leadership Institute and Governance Institute.
Outcomes:
To assist family business staff with challenges they face within their family organization

EXED 178 Cook County State's Attorney's Office Leadership (0 Credit Hours)
Participants will learn leadership skills during their 3-hour seminar.
Outcomes:
to have more knowledge on managing their teams with the CCSAO

EXED 179 C.H. Robinson Professional Development Programs (0 Credit Hours)
Participants will learn negotiations and sales training.
Outcomes:
To have more knowledge for their team on sale tactics

EXED 180 World's Finest Chocolate Anti Harasssment Training (0 Credit Hours)
The entire staff of WFC will participate in a Loyola created and moderated Anti-Harassment Training.
Outcomes:
To have more knowledge to speak up against harassment in the workplace

EXED 181 Campus Brasil MBA International Program (0 Credit Hours)
Campus Brasil is partnering with a University in Brazil to send 40 MBA students to Loyola this summer.
Outcomes:
To have more knowledge on business global affairs in America vs Brazil

EXED 182 Centene Corporation (0 Credit Hours)
Participants will learn Strategy skills for the management team.
Outcomes:
To have more knowledge on negotiations skills for their sales team

EXED 183 Litera Microsystems (0 Credit Hours)
Participants will learn leadership development skills during an off-site three-day program for their team.
Outcomes:
To have more knowledge of leadership skills for their sales team

EXED 184 Medline Industries (0 Credit Hours)
Participants will learn negotiation skills during an off-site two-day program for their engineering team.
Outcomes:
To have more knowledge of negotiation skills for their team

EXED 185 Anthony Marano Company (0 Credit Hours)
Participants will learn leadership development skills during a two month program for their Executive Team and Sales Team.
Outcomes:
To have more knowledge of leadership and negotiation skills for their team

EXED 186 Box Studio (0 Credit Hours)
Participants will learn project management skills during a two day program for executive team of their small business.
Outcomes:
To have a company wide understanding for a project management model

EXED 187 Triple S (0 Credit Hours)
Participants will learn business soft skills for their family owned businesses who are identified as "emerging leaders" via an association called Triple S.
Outcomes:
To have a good business background when finishing the program

EXED 188 Real Estate Investment Strategy (0 Credit Hours)
Participants will learn from industry experts on how to invest smartly in real estate.
Outcomes:
To have more knowledge of the real estate industry and the Chicago market

EXED 189 Edelman Procurement 101 Program (0 Credit Hours)
Participants will learn best practices in procurement.
Outcomes:
To have more knowledge of the real estate industry and the Chicago market

EXED 190 FBC Peer Advisory Group (0 Credit Hours)
FBC Peer Advisory Group for Family Business Center Members.
Outcomes:
Resolution of family business issues thru discussion

EXED 191 Fundraising for Good (0 Credit Hours)
Baumhart Center Fundraising Sessions.
Outcomes:
Social Impact Fundraising Seminar

EXED 192 Ciena 1 - Day Negotiations Conference Program (0 Credit Hours)
Participants will learn negotiations strategies and skills.
Outcomes:
To have more knowledge on negotiation skills for their sales team

EXED 193 Cook County Sheriff's Office - Executive Leadership Management Program (0 Credit Hours)
Participants will learn management / leadership strategies and skills.
Outcomes:
To have more knowledge on negotiation skills for their sales team

EXED 194 Next Generation Leadership Institute (0 Credit Hours)
Next generation leadership class for family businesses.

EXED 195 Chicago Community Trust (0 Credit Hours)
Participants will learn leadership development skills during a two day program for their Executive team.
Outcomes:
To have more knowledge of leadership skills for their team

EXED 196 Lumberman Leadership Summit 2019 (0 Credit Hours)
Participants will learn leadership development skills during a two day program for their Executive team.
Outcomes:
To have more knowledge of leadership skills for their team

EXED 197 Open Enrollment: SHRM Certification Prep Class (0 Credit Hours)
Participants will learn HR principals for prep for the SHRM Certification Classes.
Outcomes:
To have more knowledge of human resource practices

EXED 198 Custom Program: The Northern Trust Company (0 Credit Hours)
Participants will learn how to be professional advisors for their clients.
Outcomes:
To have more knowledge of business skills in cultivation

EXED 199 Custom Program: Peco Foods Supply Chain and Coms. (0 Credit Hours)
Participants will learn more supply chain skills and how to communicate these skills to their groups.
Outcomes:
To have more knowledge of business skills in cultivation

EXED 200 Custom Program: Bish Creative Display Leadership (0 Credit Hours)
Participants will learn more skills in executive presence via leadership training courses.
Outcomes:
To have more knowledge of business skills leadership, management and communication

EXED 201 FBC Goverence Institute (0 Credit Hours)
Participants will learn Gov. Institute Skills for the alumni of FBC.
Outcomes:
To have more knowledge of business skills leadership, management and communication

EXED 202 Custom Program - Invenergy (0 Credit Hours)
Participants will learn leadership, management, presentation and communication skills.
Outcomes:
To have more knowledge of business skills leadership, management and communication

EXED 203 Custom Program - BluJay (0 Credit Hours)
Participants will learn negotiation skills.
Outcomes:
To have more knowledge communication skills via negotiations

EXED 204 Executive Education Master Classes - Open Enrollment Classes (0 Credit Hours)
These 2-3 classes are designed to pipeline to additional paid programming at LUC.

EXED 205 Diversity, Equity and Inclusion (0 Credit Hours)
Classes for Baumhart Center.
Outcomes:
Business Acumen skill sets

EXED 206 Executive Education - Custom Program - Palo Alto Networks (0 Credit Hours)
These 10 classes are designed to pipeline to additional paid programming at LUC.
Outcomes:
Business Acumen skill sets

EXED 207 Executive Education Custom Program - PNC Bank (0 Credit Hours)
5 - 1.5 hour lecturette series for professional development for the PNC Bank team.
Outcomes:
Business Acumen skill sets

EXED 208 Executive Education Custom Program - Allstate (0 Credit Hours)
3 month long professional development skills for the Allstate procurement officer.
Outcomes:
Business Acumen skill sets

EXED 209 Executive Education Custom Program-Mother McAuley Liberal Arts High School (0 Credit Hours)
3 month long professional development skills for the Mother McAuley leadership team on strategic planning.
Outcomes:
Business Acumen skill sets

EXED 210 Executive Ed Custom Prog-ILSBDC partnership with Loyola Limited & InQbate (0 Credit Hours)
3 month long professional development skills small business owners, in partnership with ILSBDC and Loyola Limited/InQbate
Outcomes:
Professional Marketing Skills Sets

EXED 211 Executive Education Custom Program-Transunion Women in Ldrshp (0 Credit Hours)
A 15-18 month long professional development program with customized case studies related to TU projects and business.
Outcomes:
Business Accument and Leadership Development skills

EXED 212 Executive Education Custom Program - Topco Associates (0 Credit Hours)
A 12 month, professional development program with customized classes focused on Leadership.
Outcomes:
Business Accument and Leadership Development skills

EXED 213 Executive Education Custom Program - National Concierge Association (0 Credit Hours)
A 1 day project management webinar. 90 minutes.
Outcomes:
Project Management Essentials

EXED 214 Executive Education Custom Prog-Alliance for Strong Families & Connections (0 Credit Hours)
A 10 day program, broken up over two weeks, non-profit managers learning about putting good business skills, merging profit and purpose.
Outcomes:
Non-profit management skills

EXED 215 Executive Education Custom Program-Cristo Rey Network DEI Strategy Program (0 Credit Hours)
Six sessions program for non-profit managers learning about DEI Strategy.
Outcomes:
Non-profit management skills

EXED 216 Executive Education Custom Program-Dog Tag Fellows Business Acumen Program (0 Credit Hours)
Six-month program for Dog Tag Fellows (veterans) for small business skill sets.
Outcomes:
Non-profit management skills

EXED 217 Executive Executive Custom Program - City of Chicago Leadership program (0 Credit Hours)
Three session program for the City of Chicago's IG office. on leadership and management skills sets.
Outcomes:
Non-profit management skills

Exercise Physiology (EXCM)

Discover, search, courses (p. 2953)!

EXCM 101 Introduction to Exercise Physiology (3 Credit Hours)
Introduction to the major; also includes a lab component covering Emergency Procedures and Safety Skills, introduction to common safety principles, predisposing factors and common causes of accidents, injuries and illnesses.
This course satisfies the Engaged Learning requirement.

EXCM 110 Soccer Skill and Strategy Activity Lab (1 Credit Hour)
Soccer, the most popular sport played worldwide, is a team game that requires skill, communication, and strategy to maximize success. This course is designed to provide students with a comprehensive understanding of the fundamental skills, techniques, and strategic aspects of soccer. Through practical training sessions and tactical discussions, students will develop individual and team-based competencies necessary for success on the soccer field. This course is suitable for students of all skill levels, from beginners with minimal soccer experience to those with prior playing backgrounds. 2) Understand physical fitness components of playing soccer. 3) Perform drills to train a soccer player.
Outcomes:
1) Describe the technical and tactical skills needed to play a soccer match

EXCM 111 Weight Training and Conditioning Activity Lab (1 Credit Hour)
This course combines practical training sessions with theoretical knowledge to help students understand the principles of developing strength, endurance, and overall physical fitness through weightlifting and conditioning exercises. Throughout the semester, students will engage in resistance training exercises using free weights and bodyweight exercises. Emphasis will be placed on proper form, technique, and safety to ensure a foundation for long-term success in weight training. Additionally, students will learn how to set realistic fitness goals, and track their progress over time. 2) Understand implementation of weightlifting and aerobic conditioning exercise to improve health outcomes. 3) Perform training exercises with proper technique.
Outcomes:
1) Describe proper technique for weight training and conditioning exercises

EXCM 112 Yoga and Mindfulness Activity Lab (1 Credit Hour)
This course offers students an opportunity to explore the transformative practices of yoga and mindfulness, fostering physical well-being, mental clarity, and emotional balance. The course integrates yoga-based practices with contemporary mindfulness techniques, providing a holistic approach to enhancing overall health and wellness. The classes will focus on developing flexibility, strength, and balance through yoga postures (asanas), breath control (pranayama), and meditation. 2) Understand yoga-based postures to counteract movement deficiencies associated with modern living. 3) Perform yoga postures with proper technique.
Outcomes:
1) Describe yoga philosophy and its relevance in modern day living

EXCM 113 Fitness Boxing Activity Lab (1 Credit Hour)
This is an activity-based course that provides students the opportunity to learn and perform boxing techniques. Stances, punching, combinations, blocks, and non-contact sparring drills will be presented. The rules of boxing are introduced. Engage in boxing while observing safety guidelines. 2. Perform offensive and defensive techniques. 3. Demonstrate proper non-contact sparring techniques.
Outcomes:
1

EXCM 114 Basics of Power Lifting Activity Lab (1 Credit Hour)
This is an activity-based course that provides students with the opportunity to learn and perform powerlifting exercises. The focus is on teaching competition rules and standards on the back squat, bench press and deadlift as well as variations that may improve performance. Understand the physiological adaptations that occur because of Powerlifting. 2. Perform proper technique for Powerlifting lifts and variations of those lifts. 3. Identify competition rules and stipulations of the Powerlifting lifts.
Outcomes:
1

EXCM 115 NCCA Personal Training Elective (1 Credit Hour)
This course encompasses an overview of key Exercise Science, training methodology and health behavior change principles. Students will then apply each principle into practice through screening and evaluation, exercise program design, and ethical, legal and professional responsibilities and guidelines.
Outcomes:
Upon successful completion of the course, the student will be able to: Apply key exercise science, training methodology and health behavior change principles in context to the provision of exercise; Apply the practice of exercise and fitness screening and assessment, health appraisal and risk stratification, while simultaneously integrating ethical considerations and client preferences

EXCM 117 NCCA Group Fitness (1 Credit Hour)
This course encompasses an overview of group exercise; to include cardiovascular exercise, strength training and stretching. Students will learn how to lead, instruct and motivate individuals or groups in exercise activities.
Outcomes:
Upon successful completion of the course, the student will be able to: Apply effective, exercise science-based group sessions for different fitness levels; Explain proper technique, demonstrate exercise, and teach appropriate methods to strengthen and stretch certain muscles

EXCM 125 Faith, Sports, and Fitness (3 Credit Hours)
Explore the relationship between faith and sports through a historical context, develop a theological model for engaging in sports and physical activity, and discover ways to improve the mind-body-spirit connection through fitness. Through examination of books, articles, podcasts, documentaries, and current events, this course will discuss topics such as Muscular Christianity, spirituality, athlete identity, sports ministries, cura personalis, and faith-based physical activity.
Outcomes:
1) Identify basic terminology and knowledge about faith, sports, and fitness; 2) Examine the history of Catholicism, Christianity, and other religions, and how they impact sports and human well-being; 3) Interpret sports and religion through the five areas: social, historical, cultural, theological and ethical

EXCM 155 Anatomy and Physiology I (3 Credit Hours)
Pre-requisites: Restricted to Undergraduate Exercise Science Majors
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms

EXCM 155L Anatomy and Physiology I Lab (1 Credit Hour)
Pre-requisites: Restricted to Undergraduate Exercise Science Majors
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms

EXCM 156 Anatomy and Physiology II (3 Credit Hours)
Pre-requisites: Restricted to Undergraduate Exercise Science Majors
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms

EXCM 156L Anatomy and Physiology II Lab (1 Credit Hour)
Pre-requisites: Restricted to Undergraduate Exercise Science Majors
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms

EXCM 170 Women's Health and Exercise (1 Credit Hour)
This course presents perspectives on physical activity and exercise science specific to women. It will include the identification of issues during various stages of development in the female body and barriers and benefits of exercise unique to women. Students will apply these perspectives to exercise program design and health care interactions with all clients.
Outcomes:
1) Understand the unique circumstances and outcomes of working with women in the field of wellness and fitness; 2) Identify preventative strategies (such as exercise prescription and nutrition guidance) that can compensate for health risks, issues, and deficiencies that female clients and patients may experience throughout their life; 3) Explain exercise modifications and varied benefits during specific periods in a woman's life (adolescents, pregnancy, postpartum, menopause)

EXCM 201 Physiology of Exercise (4 Credit Hours)
Pre-requisites: EXCM 101 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
The physiological functions of the body and the effect of exercise on these functions.

EXCM 210 Program Design in Exercise (2 Credit Hours)
Pre-requisites: EXCM 201
This course focuses on the design, implementation and evaluation of exercise programs through case-based application and classroom activities. Health-related components of fitness and fitness assessments are reviewed. Individual and group exercise program designs within community-based settings for individuals through the life cycle are discussed. Evidence-based content is identified to critically analyze and develop conditioning programs and techniques for a broad range of sports and activities. Important elements of program design are used to emphasize desired client program outcomes.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Lead designed group exercises and activities which consider individual needs and differences; 2) Apply training principles and program variables to increase strength, endurance, power, or hypertrophy for the identified client or population; 3) Evaluate the designed exercise prescribed over time for an individual and/ special population; 4) Integrate cognate materials necessary to support the full development of physical performance including nutrition, environment, mobility, clothing and equipment; 5) Design individualized exercise programs for individuals and special groups; 6) Adjust exercise programs based on individual performance and safety considerations

EXCM 301 Advanced Physiology of Exercise (3 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
An advanced course in exercise physiology covering exercise metabolism, temperature regulation and fluid balance.

EXCM 342 Physical Growth, Development and Nutrition (3 Credit Hours)
Pre-requisites: EXCM 101
A survey of the various components involved in personal health and wellness, such as personal fitness, sexuality, mental health, and environmental health as related to the stages of life development.

EXCM 345 Therapeutic Exercise and Rehabilitation (3 Credit Hours)
Pre-requisites: (EXCM 101 & 201) and (BIOL 243 or GNUR 156 &156L)
Explanation and demonstration of the use of therapeutic modalities in the healing process. This will include discussion of the use of therapeutic modalities to enhance the rehabilitation process after athletic injury.

EXCM 350 Sports Nutrition (3 Credit Hours)
Pre-requisites: EXCM 201, CHEM 102 & CHEM 112
This course introduces the essentials of human nutrition for health and emphasizes the roles of key nutrients for athletic performance. This foundational material will be applied to athletic performance including adaptation and recommendations for training and competition. Nutrient recommendations will be reviewed for specific types of sports, exercise and other athletic concerns. The metabolic basis for sports nutrition recommendations is examined.

EXCM 352 Musculoskeletal Assessment and Strength Training (4 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
This course will present the general principal and foundational skills for each component of the injury examination. These general principles will be applied to the recognition and examination of injuries/conditions specific to each body region. Address general medical conditions will likely encounter with patients.

EXCM 364 Intro to Clinical Exercise Testing and Prescription (3 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
This class summarizes recommended procedures, including EKG and other stress testing modalities, for exercise testing and exercise prescription in healthy and diseased individuals.

EXCM 368 Advanced Clinical Testing and Prescriptions (3 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
This course focuses on physiological implications of metabolic conditions such as diabetes, cardiac and pulmonary disease on exercise. The course includes modifications to exercise testing and in-depth preparation for exercise prescription based on diseases and special conditions. The course reviews contraindications and considerations for exercise, EKG interpretation and implications of physiological responses to exercise. Behavioral strategies to implement in client exercise planning and education are addressed. Exercise prescription is discussed as part of the ongoing evaluation of client performance.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Create patient/client focused exercise programs, with modifications and progressive programming based on physiologic alterations; 2) Understand the effect of exercise on the physiological systems of the body and disease states; 3) Analyze exercise testing data from healthy individuals and individuals with physiological alterations; 4) Evaluate EKG responses to exercise; 5) Implement testing protocols and modifications for individuals with physiological alterations; 6) Understand acute responses and chronic adaptations to exercise and the impact on individuals with physiological adaptations

EXCM 375 Special Populations in Exercise Science (2 Credit Hours)
Pre-requisites: EXCM 201 and EXCM 364
This course provides practical information on exercise for persons with a wide range of health conditions, diseases and disabilities. Best-practice exercise prescription protocols for individuals across the life span will be addressed. An overview of unique physiology, effects of the condition on the exercise response, and effects of exercise training on the condition will be discussed. Recommendations for exercise testing and programming are presented for select populations.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Understand the relations between health conditions, disease, disability and physical activity; 2) Establish physical activity outcomes in individuals with health conditions, diseases or disabilities; 3) Modify existing physical activity prescriptions to match individual capabilities and needs; 4) Demonstrate an understanding of the risks and benefits associated with exercise participation: 5) Analyze the results of exercise tests and fitness evaluations in various populations; 6) Modify equipment arrangement and facility resources to accommodate use by individuals with special needs

EXCM 382 Clinical Research: Methods, Design and Ethics w/Lab (3 Credit Hours)
Pre-requisites: EXCM 201 and STAT 103
Study of current literature with implications for exercise and sport science specializations; use of library resources and retrieval systems; evaluation of professional competencies.

EXCM 385 Kinesiology and Sports Biomechanics w/Lab (4 Credit Hours)
Pre-requisites: PHYS 112 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
Analysis of human movement with emphasis on the biomechanics of exercise and sport movement patterns.

EXCM 387 Movement Anatomy in Exercise (3 Credit Hours)
Pre-requisites: EXCM 385
Concepts and principles from anatomy and biomechanics are integrated into the analysis of human movement. This course focuses on application of the principles of human movement for normal function and application to different levels of physical performance through case based applications and classroom activities. Content includes anatomical lever systems, moment arms, stability and laws of motion. Systematic analysis of human movement in clinical conditions, performance, and wellness settings will be reviewed. Development of individual plans to improve movement is woven throughout the course.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Explain the relationship between biomechanics, anatomy and human movement; 2) Understand upper and lower limb musculoskeletal anatomy, physiology, and function; 3) Apply functional anatomy in the analysis of normal physical performance; 4) Develop individualized plans to correct movement based on the assessment of the individual; 5) Evaluate movement techniques in various populations; 6) Evaluate client outcomes as a result of prescribed exercise modifications to improve movement patterns

EXCM 390 Psychology of Health and Exercise (3 Credit Hours)
Pre-requisites: EXCM 201 and PSYC 273
This course will present current research with focus on the leading theories and applications in health and exercise psychology. The implications and applications of research and practice for health behavior change by health and fitness professionals in diverse populations at the societal and individual levels will also be reviewed.

EXCM 395 Clinical Internship and Patient Management (6 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L), 4 of 8 upper division EXCM courses
Practical experience working with exercise physiologists, physical therapists, occupational therapists, rehabilitation therapists, and others, in cardiac care and orthopedic rehabilitation.
This course satisfies the Engaged Learning requirement.

EXCM 399 Special Topics in Physical Therapy (2 Credit Hours)
This course covers the general areas of physical therapy, as well as a relevant topic in physical therapy. This course will be offered as an elective and open to all students. Recommend evidence-based practices using cases studies (ie exercise prescription, patient education, society level affects).
Outcomes:
Examine various research and writing to gain understanding and knowledge in the areas of physical therapy; Evaluate scientific literature; Explore the impact a physical therapist has on their patient through movement improvement, pain management and prevention

EXCM 401 Applied Physiology of Exercise (4 Credit Hours)
This course focuses on biologic system responses at rest, during exercise, and as the result of training. Major emphasis is placed on bridging gaps between introductory concepts of exercise physiology and the contemporary research evidence that further advances the field of exercise science. The effect of environmental systems and factors on the regulatory response to exercise is addressed. The history and major milestones associated with the development of the science of exercise physiology are presented. Future developments in the field of exercise physiology, such as the role of genetics and genomics are integrated into the course. Laboratory and field experiences provide students with opportunities to apply theory to practice.
Outcomes:
1) Describe major milestones, influences, and future directions in the development of the science of exercise physiology; 2) Explain the importance of the physiological adaptations that occur as a result of properly designed training programs; 3) Analyze measures of the physiology of respiration, circulation, energy production, metabolism, and muscle function in rest and exercise states; 4) Interpret research findings focused on cardiovascular, respiratory, metabolic and neuromuscular physiology in exercise science; 5) Perform selected laboratory and field tests of physiological function and physical fitness; 6) Interpret results from laboratory and field tests of physiological function and physical performance; 7) Differentiate positive training changes and signs and symptoms of overtraining among healthy individuals throughout the life cycle

EXCM 424 Motor Learning and Performance (3 Credit Hours)
The course provides instruction in how humans control locomotion and how they learn/re-learn motor skills. Specifically, the course emphasizes the observable behavioral aspects of motor control/learning while detailing the neurophysiological and biomechanical processes that result in motor behaviors. Major course concepts include information processing and decision making; speed, accuracy, and coordination; and knowledge and skill acquisition and transfer.
Outcomes:
1) Understand theoretical approaches that drive motor control and motor learning research; 2) Analyze principles and processes underlying movement skilled performance; 3) Analyze the human motor system and how it supports the acquisition and retention of complex movement skills; 4) Adapt instruction situations to achieve maximum performance and retention of learned skills; 5) Relate information processing and decision-making models to performance and movement

EXCM 435 Health Promotion and Wellness Theories and Frameworks (3 Credit Hours)
This course emphasizes health promotion in diverse and changing cultures and societies. Determining and influencing factors of health are examined from a cultural competence perspective. Major health promotion, wellness, behavioral, and lifestyle theories that influence the professional practice of exercise science in community settings are integrated throughout the course. The role of the exercise scientist in health education for the prevention and treatment of health problems, health promotion, and enhancing quality of life is emphasized.
Outcomes:
1) Relate concepts of health, health promotion, and wellness that influence individual and group health and quality of life; 2) Assess the health education and health promotion needs of individuals and groups in diverse populations; 3) Design culturally congruent health education, wellness, and behavioral modification programs, focused on improved health and quality of life, in community-based settings; 4) Implement health education, wellness, health promotion, and behavioral modification programming for diverse populations; 5) Evaluate health education, wellness, health promotion and behavioral modification programming in a variety of settings, using an outcomes-oriented approach; 6) Identify cultural, social, economic, and political influences on decision making and action in health and wellness

EXCM 444 Strength Training and Conditioning (3 Credit Hours)
This course focuses on the analysis of theory in the improvement of athletic performance, with specific emphasis on assessment and implementation of resistance training programs. Foundational knowledge in human physiology and biomechanics is applied to principles of speed, agility, power, flexibility, and technique development specific to individuals¿ goals. Principles of anaerobic and aerobic metabolism in relation to strength training and conditioning are a major focus in the course. This course provides foundational preparation for students interested in taking the National Strength and Conditioning Association Certified Strength and Conditioning Specialist's exam.
Outcomes:
1) Analyze the relation between resistance training and human performance; 2) Incorporate appropriate exercises, such as resistance training, medicine ball, balance, plyometric, and linear and lateral movement exercises into exercise prescriptions; 3) Differentiate between general fitness prescriptions and specific training to enhance athletic performance; 4) Evaluate biomechanical aspects of efficiency and performance; 5) Apply performance enhancement training principles to individuals' specific needs and goals

EXCM 450 Nutrition, Health and Performance (3 Credit Hours)
This course focuses on advanced concepts of nutrition as these relate to health, exercise, fitness, and performance. The role of micronutrients and macronutrients in major dimension of health and fitness are addressed. Advanced concepts in nutrient selection, metabolism, and timing are integrated into plans for supporting and improving health and performance. Collaborative practice with dietetics professionals and the interprofessional team in optimizing health, fitness, and performance capacity is a major unifying concept of the course.
Outcomes:
1) Attribute major functions of macronutrients and micronutrients to health, exercise, fitness and performance; 2) Apply principles of evidence-based nutrition to the food habits and practices of diverse individuals and populations; 3) Analyze energy and nutrient intake based on level of training and type of sport and exercise; 4) Understand roles and domains of practice of collaborating professions in promoting health, fitness and performance; 5) Develop interprofessional competencies to collaborate with nutrition professionals in optimizing nutrition for health, fitness, and performance

EXCM 454 Applied Sports Science (3 Credit Hours)
This course focuses on the application of science in the study of elite athlete sports performance. Advanced aspects of physiological monitoring, along with other athlete assessment tools will be examined. Special emphasis will be placed on the evidence-based, practical application of these various techniques, enabling a holistic approach to improving athlete health and performance.
Outcomes:
Identify the relation between cumulative stress and human performance; Plan periodized practices of strength and conditioning, sport training, nutrition, and psychological preparation to optimize performance in individual and team sport

EXCM 458 Cardiac and Pulmonary Disease and Rehabilitation (3 Credit Hours)
This course focuses on two prevalent areas of public health concern for the exercise scientist: cardiac and pulmonary health and disease. Emphasis is placed on prevention, etiology, pathophysiology, and understanding the diagnosis and treatment of cardiac and pulmonary disease. The role of the clinical exercise scientist in preventive and rehabilitative exercise intervention and programming to promote cardiac and pulmonary health is emphasized. Key factors in the development, management, and evaluation of cardiopulmonary rehabilitation programs are integrated into the course.
Outcomes:
1) Understand anatomy and physiology associated with cardiopulmonary health and disease; 2) Relate pathophysiology changes in cardiac and pulmonary disease to exercise prescription; 3) Explain diagnostic tests and procedures used in exercise assessment and intervention in cardiac and pulmonary health and disease; 4) Understand essential elements and phases of cardiac and pulmonary rehabilitation; 5) Design preventive exercise prescriptions for cardiac and pulmonary health in individuals and groups; 6) Design rehabilitative exercise prescriptions for patients with cardiac and pulmonary health alterations

EXCM 468 Application of Advanced Clinical Exercise Testing & Prescription (4 Credit Hours)
This course emphasizes theory, techniques, and procedures of clinical exercise stress testing for diagnostic and functional assessment of individuals. Students will develop competencies in clinical testing skills ranging from electrocardiography to graded exercise and physical performance testing. Data from diagnostic testing and functional assessments will be integrated into individualized exercise prescriptions, based on risk assessment and stratification. Responses to emergency situations in the exercise environment are addressed.
Outcomes:
1) Understand the signs, symptoms and scope of cardiovascular conditions, respiratory conditions, and metabolic conditions, and the development of these pathologies; 2) Apply risk assessment and stratification models in the diagnostic and functional assessment of individuals; 3) Evaluate the indications and contraindications of subject selection for testing, considering safety precautions, indications for test termination, and emergency procedures for conducting a graded exercise stress test; 4) Interpret results of exercise stress tests; 5) Differentiate normal and abnormal electrocardiographic responses to exercise of varying duration and intensity; 6) Design appropriate exercise test mode and protocols in consideration of client characteristics; 7) Understand responses to various emergency situations that may occur in exercise settings

EXCM 475 Exercise Applications in Special Populations (3 Credit Hours)
This course focuses on the advanced knowledge and competencies needed to evaluate health behaviors and risk factors in special populations across the lifespan. The administration of fitness assessments and the design, implementation, and evaluation of exercise programs in special populations are addressed. Exercise is approached as a therapeutic and treatment modality for individuals and groups with a variety of anatomic, physiologic, cognitive and sensory alterations.
Outcomes:
1) Understand the advanced physiology of growth and development, aging, and the pathophysiology of health conditions, disease and disability in special populations; 2) Analyze the effects of exercise training and nutrition on the underlying etiology and pathophysiology of acute and chronic conditions; 3) Prescribe exercise activities to optimize health and performance in special populations; 4) Adapt exercise prescriptions based on the individualized needs of individuals with anatomic, physiologic, or sensory challenges; 5) Evaluate the effectiveness of adaptations to exercise prescriptions and programming in special populations

EXCM 478 EKG Interpretation (3 Credit Hours)
This course will help students master the practical competencies of electrocardiography (EKG), including performing a 12-lead EKG, ambulatory monitoring, and the concepts of monitoring and interpreting an EKG with and without exercise stress testing. Additionally, this course will present content related to the cardiac cycle, EKG abnormalities, ectopy, and dysrhythmias, and identifying ischemia. Students will perform hands-on 12-lead EKG analysis at rest and with exercise and the steps required for ambulatory monitor testing.

EXCM 480 Advanced Exercise Assessment and Programming (3 Credit Hours)
This course focuses on principles of periodization applied to a performance enhancement setting. Major dimensions of the course include cycles and periods, peaking for competition, and rest and recovery. Periodization models and theories are examined, with a special emphasis on contemporary research findings that are applied to enhance athletic training and physical performance. Assessment of training programs based on performance requirements are a major emphasis throughout the course.
Outcomes:
1) Apply periodization models in the optimization of athletic or physical training and performance; 2) Analyze the relationship between training volume and intensity over time; 3) Analyze principles of program design for performance enhancement; 4) Evaluate testing approaches to the assessment of strength and conditioning; 5) Generate exercise program modifications for individuals based on youth development, injuries, and inexperience; 6) Relate variables of overload, variation, and specificity to strength and conditioning training

EXCM 482 Research Methods and Evidence in Exercise Science (3 Credit Hours)
This course prepares the student to understand scholarly inquiry, evaluate research evidence, develop evidence-based practices/protocols, and generate knowledge for evidence-based practice in exercise and fitness. Methods of operationalizing scholarly inquiry include: understanding relations among theory, research, and practice; formulating research questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying research findings to exercise science practice. Social, cultural, political and ethical issues related to research are addressed, including special considerations of research conducted in exercise settings.
Outcomes:
1) Understand scholarly inquiry processes in relation to evidence-based practice and knowledge generation in the field of Exercise Science; 2) Formulate research questions that address clinical, educational, administrative, or policy issues for evidence-based practice in Exercise Science; 3) Understand the elements of various quantitative research designs; 4) Assess the adequacy of selected quantitative and qualitative designs in answering research questions in Exercise Science; 5) Evaluate extant evidence and theories relevant to knowledge gaps in the field of exercise science; 6) Analyze ethical issues and concerns in research related to Exercise Science

EXCM 485 Applied Biomechanics (4 Credit Hours)
This course will provide an analytical approach to the study of the human nervous system and human motion as applied to kinematic and kinetic analysis, study of anatomy, physiology, and mechanics.
Outcomes:
Students will use and apply laboratory measurement techniques commonly used in exercise science

EXCM 490 Special Topics in Exercise Science (1-3 Credit Hours)
Contemporary research, literature, projections and views as applied to fitness, nutrition, health, and well-being. Much of the learning that occurs in this course will be the result of group discussion. The topic areas covered will include fitness, nutrition, health, aging, obesity, and injuries. However, topics covered will largely be determined by student interests.
Pre-requisites: Restricted to Parkinson School of Health Sciences and Public Health students.
Outcomes:
1) Understand research findings and scholarly writings in a specific topical area of Exercise Science; 2) Evaluate scientific and theoretical literature in s specific topic area of Exercise Science; 3) Direct scholarly discussion in a topical area of exercise science, with a focus on the individual, family, and community

EXCM 495 Advanced Exercise Science Internship (4 Credit Hours)
This course is designed to provide 200 hours of practical experience working with diverse individuals and populations under the supervision and guidance of a preceptor. Settings may include those which provide cardiac and pulmonary care, physical rehabilitation or sports performance. Required seminars focus on program planning and evaluation, and human and fiscal resource management. 1 credit hour is 50 clock hours of internship.
Outcomes:
1) Apply specialized skills and knowledge acquired in exercise science core courses in a practicum setting; 2) Work collaboratively with the interprofessional team; 3) Participate in planning sessions, meetings, and other activities of the professional staff in the field setting; 4) Evaluate the effectiveness of the exercise science interventions on the individuals or populations served

EXCM 499 Independent Study (1-4 Credit Hours)
Pre-requisites: Restricted to Parkinson Exercise Science students
This is a directed study course in exercise science for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes, and timelines. Permission of the Program Director required.
Outcomes:
Students will be able to miiculate a general understanding of the selected topic

Exercise Physiology (EXEC)

Discover, search, courses (p. 2953)!

EXEC 101 Introduction to Exercise Physiology (4 Credit Hours)
Introduction to the major; also includes a lab component covering Emergency Procedures and Safety Skills, introduction to common safety principles, predisposing factors and common causes of accidents, injuries and illnesses.

Experiential Learning Course (EXPL)

Discover, search, courses (p. 2953)!

EXPL 290 Seminar in Community-Based Service and Leadership (3 Credit Hours)
This course is a seminar course focusing on community-based service and leadership through service-learning, in which students will work 40 hours over the semester at a non-profit organization.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain professional experience at an organization, while reflecting on their service experience in the context of asset-based community development, civic engagement, social justice, leadership in the community, and service for the common good

EXPL 291 Introduction to Research (3 Credit Hours)
This course is a seminar course focused on an introduction to research and community-based research. As an Engaged Learning course, students will work with a community partner on a community-based research project at a non-profit, community-based organization, approved by the Center for Engaged Learning, Teaching, and Scholarship (CELTS).
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will reflect on their research plan and community-based research experience in the context of research as service for the common good

EXPL 292 International Service Learning (3 Credit Hours)
Pre-requisites: Must have 30 credits completed (15 credits if a transfer student) and enroll through International Programs Office
This course is a seminar course focusing on community-based service in an international setting. The focus of the course will be on cultural and political practices from a community perspective through service-learning, in which students will work 50-75 hours over the academic period at international non-profit organizations.
Interdisciplinary Option: Global Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-UNIV292/INTS278
Outcomes:
Students will gain professional experience in an international setting, engaging in direct service with a different culture and community, while reflecting on their service experiences in the context of cultural and political community development, the impact of the current environment on specific populations, contemporary issues, social justice and poverty, and global citizenship

EXPL 390 Internship Seminar: Organizational Change and Community Leadership (3 Credit Hours)
This course is a seminar course focusing on organizational leadership and change through a 100 hour internship experience with a non-profit organization, government agency, or business organization, pre-approved by the Center for Experiential Learning.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Students will gain professional experience at an organization while reflecting on their work experience and applying theories of organizational leadership, civic engagement, community development, and leadership in the community

EXPL 391 Seminar in Undergraduate Research Methods (3 Credit Hours)
This seminar course offers undergraduate students the experiential opportunity to engage in research while building their foundation of research methods. Students may be part of the Loyola Undergraduate Research Opportunities Program (LUROP) through a funded fellowship, or students may be working independently with a faculty mentor (volunteering in a lab, working on a research team). All students must have a research project with a faculty mentor identified prior to enrolling in this course. As an experiential learning course, students will need to be engaging in research with a faculty mentor concurrently to taking this course. Students must work a minimum of 5 - 10 hours each week over the semester on their research projects (10 - 15 hours per week over the summer session). Students will reflect on research experience in the context of understanding research paradigms, application of research methodologies, understanding the implications of ethical research, and preparing to present research professionally. This course will provide students engaged in research with the opportunity to develop a formal written research paper and poster, as if the students are preparing to present their research in a professional setting, such as the LUROP Symposium.
This course satisfies the Engaged Learning requirement.

EXPL 393 Seminar in Integrative Leadership (3 Credit Hours)
This is a seminar course for students leaders in approved co-curricular programs (e.g., ABI leaders, student organization executive board, Loyola4Chicago leaders, etc.). Students in this course will complete at least 100 hours in a leadership experience in the context of integrative leadership theory culminating in a portfolio to demonstrate holistic leadership capacity.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Develop understanding of leadership theories, reflection on actions, and integrative leadership theories; 2) Enhance connection to the institution through leadership experience, and academic and professional learning and development; 3) Produce an integrative professional portfolio

Film (CEFI)

Discover, search, courses (p. 2953)!

CEFI 84 Documentary Film/Global Issues (0 Credit Hours)
Understanding current events and global issues as they are documented through film.

Finance (FINC)

Discover, search, courses (p. 2953)!

FINC 215 Personal Finance (3 Credit Hours)
Pre-requisites: None, does not count toward a concentration in finance
This is an applied course in planning, organizing, and managing an individual's personal finances.
Outcomes:
Students will demonstrate knowledge of financial planning, individual income tax, time value of money, liquidity management, consumer credit, insurance, employee benefits, and the basics of personal investing

FINC 301 Introductory Business Finance (3 Credit Hours)
Pre-requisites: Sophomore standing and C- or better in ISSCM 241 or ISSCM 241H or STAT 103; ECON 201 or ECON 201H; and ACCT 201 or ACCT 201H; ACCT 201 or 201H may also be taken as a co-requisite
The objective of this course is to provide students with a basic understanding of the general principles of business finance: capital investment, financing, capital structure, and related areas including the basics of valuation.
Course equivalencies: FINC332/FINC332H/CPST371
Outcomes:
Students will demonstrate basic knowledge of financial analysis, time value of money, financial decision making, the valuation of financial and physical assets, the risk-return tradeoff, capital budgeting, and dividend policy

FINC 334 Principles of Corporate Finance (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum of C- or better in ECON 201 or ECON 201H; ISSCM 241 or ISSCM 241H or STAT 103; ACCT 201 or ACCT 201H; and MATH 130 or MATH 131 or MATH 161; (ACCT 201 may taken as a co-requisite)
This course provides students with a foundational and integrated knowledge of corporate finance. Topics include discounted cash flows, firm valuation, capital budgeting, principals of the risk and return relationship, market efficiency, capital structure, and financing. Students will be asked to independently complete the Bloomberg Market Concepts (BMC) course.
Course equivalencies: FINC332/FINC 334/CPST271
Outcomes:
Students will demonstrate knowledge of valuation principles, raising funds for investment decisions, capital investment choices, risk and return relationship, capital markets and instruments, all in the context of real-world problems and situations

FINC 334H Principles of Corporate Finance- Honors (3 Credit Hours)
Pre-requisites: Open to students in the Quinlan Honors Program; Sophomore standing; C- or better in ECON 201 or ECON 201H; ISSCM 241 or ISSCM 241H or STAT 103; ACCT 201 or ACCT 201H; and MATH 130 or MATH 131 or MATH 161; (ACCT 201 may taken as a co-requisite)
This course provides students with a foundational and integrated knowledge of corporate finance. Topics include discounted cash flows, firm valuation, capital budgeting, principals of the risk and return relationship, market efficiency, capital structure, and financing. Students will be asked to independently complete the Bloomberg Market Concepts (BMC) course.
Course equivalencies: FINC332/FINC 334/CPST271
Outcomes:
Students will demonstrate knowledge of valuation principles, raising funds for investment decisions, capital investment choices, risk and return relationship, capital markets and instruments, all in the context of real-world problems and situations

FINC 335 Investments (3 Credit Hours)
Pre-requisites: Sophomore Standing and minimum grade of "C-" in FINC 334, FINC 334H or FINC 332, minimum grade of "C-" in MATH 130, MATH 131 or MATH 161
This course is an introductory course of capital market theory which includes the topics of risk and return analysis of stocks, bonds and cash equivalents; modern portfolio theory; bond pricing, the term structure of interest.
Outcomes:
Students will be able to demonstrate the analytical tools and finance theory necessary for making good investment decisions and for understanding the pricing of financial securities

FINC 336 Introduction to Derivatives (3 Credit Hours)
Pre-requisites: Junior standing, C- or better in FINC 335
This course offers a high level introduction to three categories of derivative markets: futures-forwards, swaps and options. Skills to be developed include analytical and decision-making, creative thinking and communication. Risk as both potential loss and opportunity for gain will be highlighted. Cases will be used.
Outcomes:
Exploring ethical and social dimensions of risk management and use and abuse of derivative securities

FINC 337 Banking, Money & Capital Markets (3 Credit Hours)
Pre-requisites: Junior Standing, Minimum grade of "C-" in: FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H
Introduction to financial markets and institutions and to the Federal Reserve and monetary policy.
Outcomes:
Students will be able to demonstrate an understanding of how financial markets and institutions work and are important to financial decision making, how interest rates and bond prices are determined and interrelated, why and how financial institutions are regulated by the government, and who the Federal Reserve is and how its actions affect the economy

FINC 338 Risk Management and Insurance (3 Credit Hours)
Pre-requisites: Junior Standing, Minimum grade of "C-" in FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H
Intro to risk identification, risk evaluation & risk treatment methods. Consideration is given to both business & personal risks, with an emphasis on insurance as a risk management tool.
Outcomes:
This course will prepare students with practical risk management and insurance principles/fundamentals, introduce risk management and insurance techniques and apply risk management analytical methods

FINC 342 Advanced Business Finance (3 Credit Hours)
Pre-requisites: Junior standing; Minimum grade of "C-" in FINC 335
This is an advanced course in corporate finance where students are given a thorough grounding in firm valuation and exposed to various financial decisions including raising capital, mergers and acquisitions, leveraged buyouts, spin-offs, and carve-outs, all in the context of their impact on firm value.
Outcomes:
Students will be able to demonstrate an understanding of firm valuation, as well as the impact of various corporate decisions on firm value

FINC 345 Portfolio Management (3 Credit Hours)
Pre-requisites: Junior standing; Minimum grade of "C-" in FINC 335
Topics include a critical appraisal of the efficient market hypothesis, asset allocation using the Markowitz mean-variance framework, fundamental and technical analysis, and mutual fund performance evaluation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will understand how stocks and other assets are selected; how economic and company information is monitored and used to adjust portfolio holdings; and how portfolios can be optimized to achieve targeted risk/return characteristics

FINC 346 Introduction to Options (3 Credit Hours)
Pre-requisites: Junior standing; Minimum grade of "C-" in FINC 335
This class offers a comprehensive introduction to options, including a detailed examination of option markets, option properties, trading strategies using options, binomial tree and Black-Scholes valuation models, and hedging strategies using options.
Outcomes:
Students will be able to demonstrate an understanding of option markets, option pricing models and how options can be used to hedge risks

FINC 347 Financial Institutions (3 Credit Hours)
Pre-requisites: Junior Standing, Minimum grade of "C-" in FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H
A study of the crucial role played by financial institutions. The course will be a blend of theory and analysis of the present institutional structure.
Outcomes:
Students will demonstrate an understanding of the following: the important role of financial intermediaries, interest rate risks, credit risks, market risk, and also risk management through capital adequacy and hedging risk with financial derivatives

FINC 349 Real Estate Finance & Investments (3 Credit Hours)
Pre-requisites: Junior standing, Minimum C- in FINC 334
Basic principles of real estate finance as well as practical applications. Learn topics, theories and current developments in real estate. Solve quantitative problems.
Outcomes:
General & working knowledge of real estate jargon and legal documents; Calculate mathematical solutions to problems in real estate; Understand time value of money related to real estate; Valuation of residential and commercial properties

FINC 355 International Finance Management (3 Credit Hours)
Pre-requisites: Junior Standing, Minimum grade of "C-" in FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H
This course examines the international dimensions of financial management. It introduces additional economic and financial opportunities/challenges faced by multinational corporations.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-FINC355/INTS369
Outcomes:
Students will be able to demonstrate understanding of foreign exchange markets, fundamental international parity relationships, reasons for international diversification, steps in foreign exchange risk management, and capital budgeting for multinational corporation

FINC 356 Advanced Topics in Investment Banking and Asset Management (3 Credit Hours)
Pre-requisites: B- or higher in FINC 335
This course examines selected topics in investment banking and asset management, including stock and bond offerings, private equity, buyouts, mergers and acquisitions. Students in the course research publicly traded companies, write equity research reports and pitch investment ideas; they also mentor junior analysts in the Rambler Investment Fund (RIF).
This course satisfies the Engaged Learning requirement.
Outcomes:
Conduct research; Write an equity investment report and pitch a trade idea; Value companies; Analyze investment banking transactions

FINC 357 Cases in Corporate Finance (3 Credit Hours)
Pre-requisites: Senior standing; Minimum grade of "C-" in FINC 335
This cases based course is designed to explore the practical application of the major corporate finance topics.
Outcomes:
Students will be able to understand how corporations use the conceptual aspects of corporate finance in real life settings; They will also learn to use the necessary tools in evaluating various corporate investment and financing decisions; They will apply these tools in solving the cases involving investment (such as building a new plant, or acquiring another firm) and financing (such as capital structure policy, and cost of capital) decisions

FINC 358 Financial Analytics (3 Credit Hours)
Pre-requisites: Junior Standing and minimum "C-" in FINC 335
This course focuses on how to use Python to build financial models. The course will examine financial securities, portfolio optimization, and valuation problems.
Outcomes:
Building financial models with Python; Translating raw data into meaningful variables for statistical analysis; Estimating statistical models to drive investment decisions; Valuation of securities; Portfolio optimization and implementing trading strategies

FINC 359 Introduction to Fintech (3 Credit Hours)
Pre-requisites: Junior Standing
Minimum grade of "C-" in FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H. The primary objective of this course is to equip students with economic insights to explore the current developments and future opportunities for disruptive technologies in the financial institutions and financial service sector. The course will take a financial economic and analytic perspective to augment financial talents and entrepreneurship with the necessary tools to understand the interaction of finance, technology, and regulations. It will cover detailed topics of decentralized finance (DeFi) infrastructure including blockchain technologies, cryptocurrencies, and non-fungible tokens (NFTs). Further, it will explore how the DeFi infrastructure together with artificial intelligence (AI) are reshaping the current ecosystem of payments, capital raising, credit and lending, investment, and risk management.
Outcomes:
Students will understand the key concepts of the disruptive technologies in Fintech: blockchain technology, Non-fungible tokens, and Defi infrastructure; Students will comprehend the impacts on financial services through application of disruptive technology; Students will develop the ability to outline the near and long-term possibilities for Decentralized Finance (Defi) and Fintech industry; Students will understand the pricing methodologies for crypto assets and investments; Students will understand the applications of Artificial Intelligence (AI) and Machine Learning in investment and risk management

FINC 365 Advanced International Financial Management (3 Credit Hours)
Pre-requisites: A minimum grade of "C-" in FINC 335 and FINC 355
This course covers advanced topics in international financial management. The course builds on materials discussed in International Financial Management (FINC 355). Specifically, this course exposes the students to: foreign exchange risk management, currency swaps, foreign exchange rate forecasting, efficiency of foreign exchange markets, international capital structure and cost of capital, global investment, multinational capital budgeting, multinational cash management, cross-border acquisitions, and international trade finance.
Outcomes:
Understand the global financial markets, perform multinational capital budgeting, and understand global portfolio management

FINC 395 Independent Study in Finance (1-3 Credit Hours)
Pre-requisites: Junior standing; instructor and dean permission required
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Finance not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in finance

FINC 396 Speaker Series: Risk Management and Insurance (0 Credit Hours)
Professional speaker series for all students majoring in Finance.
Outcomes:
Students will benefit from hearing professionals in the finance industry discuss current events, opportunities and challenges within the industry

FINC 399 Special Topics in Finance (1-3 Credit Hours)
Pre-requisites: Junior standing
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate an understanding of specialized topics not otherwise covered by department regular course offerings

FINC 450 Financial Management (3 Credit Hours)
Pre- or co-requisites: ACCT 400
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450B Finance for a Sustainable World (3 Credit Hours)
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450E Financial Management (3 Credit Hours)
Pre-requisites: Restricted to students in the Executive MBA Program
Studies the functions, tools, and policies of financial, investment, and portfolio management. Students analyze the structure of financial markets, valuation of stocks, and fixed income securities, risk and return relationships, and portfolio theory. Topics include investment and financial decision making under uncertainty.
Course equivalencies: FINC 450E/FINC 600E

FINC 451 Financial Markets & Institutions (3 Credit Hours)
Pre-requisites: FINC 450
Introduction to the financial system in the United States, including the fundamentals and role of money and capital markets, the institutions operating in these markets, the instruments traded, and the organization, functioning and operation of the Federal Reserve System.
Outcomes:
Students will be able to demonstrate an understanding of how financial markets and institutions work and are important to financial decision making, how interest rates and bond prices are determined and interrelated, why and how financial institutions are regulated by the government, and who the Federal Reserve is and how its actions affect the economy

FINC 452 Investment Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This course includes the topics of asset pricing models; risk and return analysis of stocks, bonds and cash equivalents; portfolio theory; bond pricing, the term structure of interest and immunization strategies in managing fixed income securities.
Outcomes:
Students will be able to demonstrate the analytical tools and finance theory necessary for making good investment decisions and for understanding the pricing of financial securities

FINC 453 Topics in Advanced Financial Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This is an advanced course in corporate finance where students are given a thorough grounding in firm valuation and exposed to various financial decisions including raising capital, mergers and acquisitions, leveraged buyouts, spin-offs, and carve-outs, all in the context of their impact on firm value.
Outcomes:
Students will be able to demonstrate an understanding of firm valuation, as well as the impact of various corporate decisions on firm value

FINC 455 International Financial Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This course examines the international dimensions of financial management. It introduces potential opportunities/challenges faced by multinational corporations as they expand their business overseas.
Outcomes:
Students will be able to demonstrate understanding of foreign exchange markets, fundamental international parity relationships, foreign exchange risk management strategies, and capital budgeting for multinational corporations

FINC 455E International Financial Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Examines foreign exchange rate exposure and hedging techniques to deal with exposure. Other topics include capital budgeting in an international framework and international financial markets.
Course equivalencies: FINC 455E/FINC 602E

FINC 456 Management of Financial Institutions (3 Credit Hours)
Pre-requisites: FINC 450
The course analyzes the importance played by financial institutions. This is a survey course that analyzes the present financial institutional structure with a special focus on managing risk.
Outcomes:
Students will demonstrate an understanding of the following topics: the role of financial intermediaries in managing interest rate, credit, market and international banking risks; Special attention will be given to procedures for measuring and managing these risks

FINC 459 Independent Study-Finance Management (3 Credit Hours)
Pre-requisites: FINC 450
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Finance not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in finance

FINC 470N Business Finance (3 Credit Hours)
Pre-requisites: FINC 450 or equivalent course
Exposure to international financial markets, international diversification, derivatives, risk management, asset valuation, multinational capital budgeting and more.
Outcomes:
Exposure to international diversification, derivatives, risk management, trading options, asset valuation and more

FINC 552 Emerging Markets (3 Credit Hours)
Pre-requisites: FINC 450 and ECON 420
An introduction to the contribution made by financial markets and institutions to economic growth and development in emerging market countries. Normally taught in Thailand, the course will provide a close look at a successful emerging market country.
Outcomes:
Students will demonstrate an understanding of the following topics: the contribution of financial institutions and markets to economic growth and development, the causes and effects of financial crises, the financial liberalization controversy, the impact of inflation, and the causes and effects of corruption; In addition, students will also demonstrate knowledge of Thailand's economic and financial systems

FINC 553 Applied Portfolio Management (3 Credit Hours)
Pre-requisites: FINC 452
This is a course in investment analysis and applied portfolio management. Topics will include investment policy and objectives, performance analysis and attribution, portfolio design, fixed income analysis and portfolio management, and equity analysis and portfolio management.
Outcomes:
At the conclusion of this course the student should be able to: 1) Create an investment policy statement; 2) Analyze and value fixed income securities; 3) Analyze and value equity securities; and 4) Develop and manage a portfolio of debt and equity securities

FINC 554 Fixed Income (3 Credit Hours)
Pre-requisites: FINC 450, or Quinlan Finance 450 Student Group Waiver; or B or better in FINC 335
This course provides an in-depth coverage of fixed income securities, and their markets. The course is an extension to other offerings in the finance program on futures, equities, and interest rate derivatives. The course is supplemented with hands-on applied sessions using Bloomberg, a leading global benchmark for data and analysis used by financial professionals worldwide.
Outcomes:
Identify the types, classifications, and characteristics of fixed income securities; Use Bloomberg and/or other resources to extract, interpret and aggregate key data; Analyze and price different types of fixed income securities

FINC 556 Investment Banking (3 Credit Hours)
Pre- or co-requisites: FINC 452; or prerequisite FINC 335 with minimum grade of " B"
This course provides a broad overview of the activities of investment banks, including venture capital fundraising, stock and bond underwriting, mergers and acquisitions, trading, asset securitization and money management.
Outcomes:
Students will understand how investment banks enhance capital markets by providing financing and investment services to companies, governments and individuals

FINC 599 Special Topics (3 Credit Hours)
Pre-requisites: FINC 450
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

FINC 602E International Financial Management (1.5 Credit Hours)
Examines foreign exchange rate exposure and hedging techniques to deal with exposure. Other topics include capital budgeting in an international framework and international financial markets.
Course equivalencies: FINC 455E/FINC 602E

FINC 620 Financial Mathematics and Modeling I (3 Credit Hours)
Pre-requisites: FINC 452 (co-requisite) and ISSCM 491 (pre-requisite); OR FINC 335 with a minimum grade of B (pre-requisite)
This course focuses on how to effectively use Python to build financial models. The course initially trains students to become sufficiently proficient to build financial models using Python, and then moves to its applications, such as translating raw data into meaningful indicators to help investment decisions. The course will examine financial securities, portfolio optimization, as well as valuation problems.

FINC 621 Financial Mathematics and Modeling II (3 Credit Hours)
Pre-requisites: FINC 620
Financial mathematics and modeling II is the second in a sequence of two courses. It is a combination of lecture and lab and will focus on the core mathematical, computational and practical modeling aspects encountered in modern financial applications. The programming languages of choice will be R and Excel/VBA. This course has a prerequisite of FINC 450, FINC 452, FINC 620, and ISOM 400. No prior R programming experience is required but familiarity with Excel/VBA is a pre-requisite.

FINC 622 Derivative Securities (3 Credit Hours)
Pre-requisites: FINC 450, or Quinlan Finance 450 Student Group Waiver
This course is a comprehensive introduction to the theory, use, and valuation of derivative securities, with particular emphasis on options and forward/futures contracts. A sound understanding of the intuition underlying option pricing is critical to a thorough understanding of modern finance and financial risk management. We may also look at other types of derivatives as well as some extensions of the most fundamental models.

FINC 624 Interest Rate Risk Management (3 Credit Hours)
Pre-requisites: FINC 622 or FINC 346 with minimum grade of "B"
Students are introduced to a plethora of financial derivatives, including both exchange-traded and OTC products, and then learn to use these products to hedge interest rate and other risks largely through the study of cases and detailed examples emphasizing the formation and use of synthetic positions.
Course equivalencies: X-ECON624/FINC624
Outcomes:
Students will be able to demonstrate an understanding of a wide variety of derivative products, as well as be able to use these products to manage interest rate and other risks

FINC 625 Applied Econometrics (3 Credit Hours)
Pre-requisites: ECON 420 and ISSCM 491
The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects.
Course equivalencies: X-ECON625/FINC625

FINC 626 Credit Risk Management and Structured Finance (3 Credit Hours)
Pre-requisites: FINC 622 or FINC 346 with minimum grade of "B"
We study credit risk and credit risk management. We examine a suite of financial securities which can be used to reduce (or magnify) credit risks, especially credit default swaps (CDS), asset-backed securities (ABS) and collateralized debt obligations (CDOs). We consider the role of these structured credit products in the global financial crisis.

FINC 628 Valuation (3 Credit Hours)
Pre-requisites: FINC 450 or Quinlan Finance 450 Student Group Waiver, or FINC 342 with the minimum grade of "B"; Restricted to Graduate School of Business or Undergraduate School of Business
This is an advanced course in valuation where students are given a thorough grounding in traditional valuation models (DCF and relative valuation) and also introduced to real option methods and ideas; a certain emphasis is placed on the valuation of start-ups and students are introduced to the venture capital markets.
Outcomes:
Students will be able to demonstrate an understanding of traditional valuation models as well as real options methods and ideas

FINC 630 Capstone Master of Science Finance (3 Credit Hours)
Pre-requisites: FINC 450 and any 3 additional 450 and above FINC courses
This course integrates theory, analytics, and modeling skills acquired in advanced finance courses. Subject matter will include topics and techniques in corporate finance, international financial management, risk management, and investments. It is intended for Master of Science in Finance (MSF) students and select MBAs concentrating in finance and who have satisfied the necessary prerequisites.
Outcomes:
Students will be able to perform a complicated valuation analysis of a public or private company; Students will understand different short and long-term financing techniques and their impact on a firm's cost of capital, capital structure, financial risk, credit, and business strategy; Students will be able to perform a complicated international capital budgeting analysis; Students will be able to evaluate public and private investments and assess their place in a portfolio

Fine Arts (FNAR)

Discover, search, courses (p. 2953)!

FNAR 110 Foundations of Visual Art (3 Credit Hours)
Explores some of the fundamental principles, concepts, and historical and contemporary contexts that constitute a contemporary art practice. Provides experience across a range of modes of art making while emphasizing the basic concepts that underlie visual expression. Studio activity is augmented with research, discussion, and critique.
Outcomes:
Explore and express visual concepts; Develop creative competencies; Utilize design elements to communicate themes and ideas; Expand cognitive capacities; Comprehend historical and contemporary approaches to visual art

FNAR 112 Two-Dimensional Design (3 Credit Hours)
An examination of the basic elements and organizational systems of visual expression through the application of design principles and theory.
Course equivalencies: FNAR112/ACFNA112
Outcomes:
Students will be able manipulate various forms of media to produce desired spatial effects, and understand how to control by- using such design methods as scale, perspective, and composition - the viewer's understanding of and reaction to visual information on a two-dimensional surface

FNAR 113 Drawing I (3 Credit Hours)
An introduction to the basic elements of drawing including: line, value, texture, volume, shape, proportion, perspective and visual composition. A variety of drawing materials will be explored with an emphasis on observation problems designed to build technical, perceptual, and personal expressive interpretation of form through the drawing idiom.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate an understanding of basic drawing principles and vocabulary, through practice and articulation of both formal and artistic ideas

FNAR 114 Painting I (3 Credit Hours)
An introduction to the basic elements of painting including: the application of drawing, design, and color principles. A variety of materials will be explored with an emphasis on oil painting. Observational problems will be introduced to build technical, perceptual, and personal expressive interpretation of form through the painting idiom.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate an understanding of basic painting principles and vocabulary, through practice and articulation of both formal and artistic ideas

FNAR 115 Foundations of Photography (3 Credit Hours)
This course introduces photography as a form of visual art. Students learn the technical concepts in order to develop their ability to express ideas through photography. The course also emphasizes strengthening visual literacy through lectures, discussions, and critiques. Requirements: A fully adjustable digital camera (DSLR) and an external hard drive are required.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: FNAR115/ICVM115/IFMS115
Outcomes:
Students will learn how to formulate and communicate ideas through photography; The course focuses on building the students' visual literacy and understanding of photography as a form of visual art

FNAR 116 Color Slide Photography (3 Credit Hours)
A non-darkroom, introductory course to the equipment, techniques and aesthetics of creative photography that emphasizes camera controls, principles of composition, concepts of color theory, the unique potential of the projected image, and personal expression. An adjustable 35mm camera is required.
Outcomes:
Students will be able to demonstrate an understanding and application of exposure, depth of field, rendering motion, full frame composition, sequential imagery, balance of film and light source, and the functions of color, all of which support the practice of creative photography

FNAR 118 Printmaking I (3 Credit Hours)
An exploration of the production of fine art multiples as they are created utilizing zinc and copper plates. Techniques of etching and engraving aquatint and color printing as well as innovative processes are taught.
Outcomes:
Students will demonstrate understanding of the techniques needed to produce images on metal plates and alternative surface; the intrinsic qualities particular to expression in print media, recognize fine prints, specific techniques, and archival quality in historical examples, use intaglio presses as a means of production and form evaluative judgments about printed imagery

FNAR 119 Watercolor Techniques (3 Credit Hours)
An introduction to the basic elements of watercolor painting including: the application of drawing, design, and color principles. A variety of techniques and materials will be explored including, watercolor paints and pencils, and brush and masking techniques. Observational problems will be introduced to build technical, perceptual, and personal expressive interpretation of form through the watercolor painting idiom.
Outcomes:
Students will be able to demonstrate an understanding of basic painting principles and vocabulary, through practice and articulation of both formal and artistic ideas

FNAR 120 Ceramics: Handbuilding (3 Credit Hours)
An exploration of various handbuilding techniques, surface design techniques, and firing ranges available to the contemporary ceramist. Students are encouraged to pursue individual expression in the context of a broad range of methods and creative concepts.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate the basics of successful construction and glaze techniques; demonstrate creative strategies and critical evaluation of the creative process; demonstrate an understanding of both historical and contemporary approaches to the medium and the role of the Ceramic artist in cultures past and present

FNAR 121 Ceramics: Wheelthrowing (3 Credit Hours)
An introduction to the potters' wheel. Students learn basic throwing skills, explore utilitarian design concepts, and learn to balance spontaneous and practiced approaches to process. Emphasis is on the successful integration of craft and personal expression.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: FNAR220/FNAR121
Outcomes:
Students will be able to demonstrate basic wheelthrowing and glaze techniques; demonstrate creative strategies and critical evaluation of the creative process; demonstrate an understanding of both historical and contemporary approaches to the medium and the role of the Ceramic artist in cultures past and present

FNAR 123 Metalwork and Jewelry I (3 Credit Hours)
The methods and processes of construction using nonferrous metals applied to problems in design and function. Projects are designed to familiarize the student with processes in metalwork and the proper use of hand tools.
Outcomes:
Students will demonstrate an understanding of the fundamental characteristics of metal; the ability to cut, shape and manipulate metals; to express visual ideas in low and high relief; and to form judgments about design on other than flat surfaces

FNAR 124 Sculpture Foundations (3 Credit Hours)
An introduction to three dimensional concepts and materials, and associated techniques, in the process of articulating a personal artistic statement. Students will be guided in the fabrication of various 3-D constructions employing a wide range of building materials such as plaster, wood, clay, foam board, paper, and metals.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to translate two-dimensional sketches and drawings into expressive three dimensional forms; demonstrate basic sculpting techniques and creative strategies; provide critical evaluation of the creative process; and produce objects that are viewable in the round, structurally stable with masses and appendages proportionate to one another

FNAR 126 Metal Sculpture and Welding (3 Credit Hours)
This course introduces students to the manipulation of iron, steel and steel alloys. Students learn how to choose gauges of steel, cut with oxy-acetylene torch and metal cutting wheels and blades and attach steel by traditional welding techniques.
Outcomes:
Students will be able to operate a torch safely; cut and weld cleanly, file grind and polish, forge, hammer and shape steel sheeting; demonstrate the ability to convert two-dimensional ideas into cogent three-dimensional forms; demonstrate understanding and control over hazardous technical processes and demonstrate understanding of the evaluative criteria of metal work

FNAR 129 Printmaking-Monotypes (3 Credit Hours)
An introduction into the various methods of producing one of a kind highly individual prints from a vast array of printing surfaces. A variety of materials will be explored through assignments which encourage an understanding of technique, perceptual thinking and expression of form.
Outcomes:
Students will be able to demonstrate a functional knowledge of a wide variety of printing media, be able to utilize the basic tools particular to each medium and produce a consistent series of formal images through recognition of their expressive properties

FNAR 132 Visual Communication I (3 Credit Hours)
This course initiates a professional sequence whereby the student receives an introduction to composition, typography, and historical and contemporary concepts in visual communication. It introduces students to page layout software (Adobe InDesign), its relationship to other software packages, and the technical aspects of digital typography.
Outcomes:
Students gain an understanding of fundamental principles of visual communication emphasizing typography, the development technical skills in materials and techniques, and the ability to express formal and creative ideas

FNAR 152 Drawing China (3 Credit Hours)
This is an introductory drawing course. There are no pre-requisites nor prior experience need to succeed in this course. Beijing is our laboratory and the topic of all class drawings.
Interdisciplinary Option: Asian Studies
Course equivalencies: FNAR152/ASIA152
Outcomes:
Students will be able to draw trees, buildings, automobiles, vegetables, human beings in real life situations and in perspective

FNAR 160 The Crafts of China (3 Credit Hours)
This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historical trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.
Interdisciplinary Option: Asian Studies
Course equivalencies: FNAR160/ASIA160
Outcomes:
Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China; Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture

FNAR 170 Three-Dimensional Design (3 Credit Hours)
An examination of the basic elements and organizational systems of spatial expression through the application of design principles and theory.
Course equivalencies: FNAR212/FNAR170
Outcomes:
Students will be able work with a variety of materials to produce three-dimensional objects in space, and understand how to control the viewer's reaction to those objects through the manipulation of solidity, transparency, movement and time

FNAR 190 Color Theory (3 Credit Hours)
An examination of the nature of subtractive and additive color in its physiological, psychological, aesthetic, cultural, and symbolic dimensions through the application of past and current theory. Emphasis is placed on color mixing, color relationships, and understanding color terminology. Students develop proficiency using color in their work as well as gaining a fundamental understanding of the basic visual, aesthetic, and theoretical considerations of color use in art & design.

FNAR 195 Topics in Fine Arts Pre-Collegiate (3 Credit Hours)
This course consists of special topics in specific Fine Arts areas, and is offered for the Pre-Collegiate student.
Outcomes:
While the specific area of study varies, the expectation is that the student will become familiar with the methods, materials and aesthetic properties of that artistic approach, as well as the technical means to control the expression

FNAR 199 Art and Visual Culture (3 Credit Hours)
An introduction to the principles of art and their application to broader visual culture, this course explores the complex nature of art through an examination of its visual elements, techniques, functions, critical methodologies, and related social issues. The course takes advantage of Chicago's artistic resources.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: FNAR199/ICVM199/IFMS199/ACFNA1
Outcomes:
Students will demonstrate knowledge of the elements of visual language; means of visual expression in diverse cultures and eras; media and techniques of art; artistic terminology; and critical approaches to the study of visual culture and related social issues; Students will acquire the skills to interpret art and visual culture in oral and written form

FNAR 200 Global Art History: Prehistoric to 600 CE (3 Credit Hours)
A comprehensive survey that introduces students to the art, architecture, and material practices of global cultures from pre-history to the 7th Century CE. This course will study the internal and cross-cultural relationships between various art forms and the social, geo-political, spiritual, economic, and political contexts in which selected artifacts and monuments were made.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: FNAR200/FNAR200R
Outcomes:
Students will acquire skills to critically analyze formal expressions, materials, functions, meanings, and makers of art and material culture in relation to the historical contexts of ancient global societies

FNAR 200R Art History: Pre-History to Renaissance in Rome (3 Credit Hours)
A general survey which explores the development of art in Western culture from pre-history through the sources of the Renaissance in the fourteenth century with a focus on Rome and Italy.
Course equivalencies: FNAR200/FNAR200R
Outcomes:
Students will be able to demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of art in relation to their cultural, social, and historical contexts

FNAR 201 Global Art History: 600-1800CE (3 Credit Hours)
A general survey which explores the development of global art from 540 through 1800.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: European Studies, Italian Studies
Course equivalencies: ACFNA 105 / FNAR 201
Outcomes:
Students will acquire skills to critically analyze formal expressions, materials, functions, meanings, and makers of art and material culture in relation to the historical contexts of early modern global societies

FNAR 202 Global Art History: Modern Art (3 Credit Hours)
A comprehensive survey of major artistic movements from a global perspective, engaging key concepts, issues, and modes of production in the modern world. It examines evolving ideas about the forms, content, techniques, and functions of art from the late 18th century to today considered within its socio-political and historical context.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: European Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Course equivalencies: FNAR202/ICVM202/IFMS202
Outcomes:
Students will demonstrate knowledge of the key ideas, formal expressions, themes, techniques, and functions of modern art in relation to social-historical contexts and modern culture from a global perspective

FNAR 203 Chicago: Face of a City (3 Credit Hours)
An examination of the history of the Chicago School of Architecture along with public sculpture and mural painting in Chicago, this course explores the changing trends of American public art, artists' response to a public audience, and issues of social responsibility. Participation in class field trips is required.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will be able to identify the major social concerns of the city as well as the means by which visual arts can be integrated into its daily life; They will be able to recognize the major artists and recent artistic developments in their urban context

FNAR 207 Women, Art, and Society (3 Credit Hours)
An examination of women artists in Western culture and the societies in which they worked from the medieval period to the present. Women's artistic production, the styles and subject matter they embraced, and their relation to artistic trends of their eras are explored within the context of social attitudes about gender.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-FNAR207/WOST207/WSGS207
Outcomes:
Students will be able to demonstrate knowledge of women's contribution to the visual arts, the factors that impacted their participation in the art world, the underlying ways that gender constructions impact society, and feminist theory and methodologies related to art

FNAR 213 Drawing II (3 Credit Hours)
Pre-requisites: FNAR 113
An intermediate level drawing course designed to extend the understanding of the visual elements of drawing introduced in FNAR 113. This course includes an emphasis on color, and an exploration of a broader range of drawing media. Observational and conceptual problems are introduced.
Outcomes:
Students will be able to demonstrate an understanding of more advanced drawing principles through expanded practice and articulation of both formal and artistic ideas

FNAR 214 Painting II (3 Credit Hours)
Pre-requisites: FNAR 114
An intermediate level painting course designed to extend the understanding of the application of drawing, design, and color principles introduced in FNAR 114. This course will explore both oil and acrylic painting and a variety of substrates. Emphasis on the human figure and individualized conceptual problems will be introduced to build technical, perceptual, and personal expressive interpretation of form through the painting idiom.
Outcomes:
Students will be able to demonstrate an understanding of more advanced painting principles through expanded practice and articulation of both formal and artistic ideas

FNAR 216 Lighting Techniques for Photography and Video Art (3 Credit Hours)
Pre-requisites: FNAR 115 or instructor permission
This course examines techniques with both available and artificial lights for works with photography and video. The students learn how the use and control of lighting are essential in working with lens-based media, whether it¿s on-location or in a studio environment. The concepts covered in the class will be used to produce photographic and video works.
Outcomes:
Students learn the equipment and techniques for effectively using available and artificial lights

FNAR 218 Printmaking II (3 Credit Hours)
Pre-requisites: FNAR 118
This course explores specialized work in intaglio, monotypes, and mixed media. Emphasis is placed on the development and perfecting of technique.
Outcomes:
Students demonstrate understanding of mixed-media printing; knowledge of a wide range of printmaking media; apply drawing concepts to the materials of printmaking; produce a consistent body of work in a complex medium; recognize historical prototypes and articulate the differences to others; and form judgments needed to adapt image making in a highly technical area of expression

FNAR 219 Photography: Digital Imaging (3 Credit Hours)
Pre-requisites: FNAR 115 - Foundations of Photography; A fully adjustable digital camera (DSLR) and an external hard drive are required
The course focuses on advanced editing techniques in Photoshop in regards to color correction, color management, image compositing, and image manipulation. Students will also learn the technical and aesthetic concepts that are crucial components of the digital workflow to further develop their visual languages as photographic artists.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR219/IFMS220
Outcomes:
Students learn more complex editing in Photoshop, how to operate a professional inkjet printer and the importance of paper selection; The course examines possibilities with digital technology

FNAR 221 Ceramic Science (3 Credit Hours)
An examination of practical and experimental approaches to applied chemistry as it relates to the ceramic arts. Students will learn the theory behind clay and glaze formulation, test a wide array of materials interactions; and learn practical skills in developing vitreous bodies, glass forming substances, and metallic oxide pigments.
Outcomes:
Students will be able to demonstrate knowledge of inorganic compounds and their useful combinations in formulating ceramic bodies, glazes, and pigments; demonstrate knowledge of the effects of firing temperature and atmosphere on ceramic formulations; demonstrate knowledge of safe lab practices in the ceramics studio

FNAR 222 Sculpture/Ceramics: Intermediate Ceramics (3 Credit Hours)
Pre-requisites: FNAR 124 and (FNAR 120 or FNAR 121); or instructor permission
This intermediate course expands the students' knowledge of materials, techniques, and concepts relative to the production of three-dimensional artwork. Students explore the dynamic interrelationship between art, craft, and design, with particular emphasis on the role and function of three-dimensional artworks historically and in contemporary practice. The conceptual possibilities for reproduction and multiplication in sculpture and ceramics is also highlighted. Visual and written research is a component of the course, as are personal reflection and group discussion. The course provides context for the key concepts explored.
Course equivalencies: FNAR320/FNAR222
Outcomes:
Students develop technical, aesthetic, and conceptual strategies in the creation of three-dimensional artwork, and increased awareness of cultural / historical perspectives of the medium

FNAR 223 Metalwork and Jewelry II (3 Credit Hours)
Pre-requisites: FNAR 123
Advanced work in metalwork and jewelry including problems in the techniques of lost wax casting and enameling
Outcomes:
Students will be able to demonstrate the ability to control materials with the addition of stones, found objects and other materials; design and cast works in the round; design a work and see it through from production to completion, and demonstrate knowledge of a wide range of metalwork techniques and their decorative and design potential

FNAR 232 Visual Communication II (3 Credit Hours)
Pre-requisites: FNAR 132 Visual Communication I
A continued study of the visual and conceptual principles introduced in FNAR 132 with an emphasis on advanced typographic principles and an introduction to the history of graphic design.
Outcomes:
Students gain knowledge of graphic design history and advance in their understanding of typography and imagery in the problem-solving processes in graphic design, including the further development of conceptual skills

FNAR 233 Digital Media Design (3 Credit Hours)
An exploration of image creation and design using Adobe Photoshop and Adobe Illustrator. This industry standard software is introduced as a vehicle for basic design concepts and as a tool for creative expression.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students gain an understanding of software skills and design basics; They develop the ability and techniques to manipulate software in the production of compositions effectively combining image and typography

FNAR 234 Digital Media: Vector (3 Credit Hours)
An exploration of vector illustration using Adobe Illustrator. This industry standard software is introduced as a vehicle for basic design concepts and as a tool for creative expression.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students gain an understanding of software skills and design basics; They develop the ability and techniques to manipulate software in the production of artistic compositions effectively combining image and typography

FNAR 235 Figure Studio (3 Credit Hours)
Pre-requisites: FNAR 113 or FNAR 114 or permission of the instructor
An advanced level studio course designed to introduce the human form with an emphasis on the application of drawing and wet media. Skeletal anatomy and concepts of visualization and proportion will be explored. Observational and conceptual problems will be introduced.. The course may be taken twice for credit.
Course equivalencies: X-FNAR235/THTR235
Outcomes:
Students will be able to demonstrate an understanding of the human form and anatomy through expanded practice and articulation of both formal and artistic ideas

FNAR 251 African-American Art (3 Credit Hours)
An introduction to the achievements of Americans of African descent beginning with African roots through the Harlem Renaissance to the contemporary work of such internationally recognized artists as Richard Hunt and Martin Puryear. Content may vary according to the particular focus of the instructor.
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-FNAR251/BWS 251
Outcomes:
Students will be able to demonstrate knowledge of the richness of African-American visual arts as they developed within and outside the purview of traditional art venues

FNAR 260 The Art of Bookbinding (3 Credit Hours)
An introduction to the basic methods of bookbinding exploring traditional and one-of-a-kind artists books. Sewn, glued and free form structures will form the basis for the study of image and text within the framework of a personal approach to alternative surfaces.
Outcomes:
Students will be able to construct and manipulate a wide variety of media using the grammar and language of the book form; Through selected projects students will utilize compositional elements and descriptive to communicate ideas and concepts in book form

FNAR 303 Visual Arts Pedagogy (3 Credit Hours)
This course explores the ideas of teaching and learning through the visual arts and arts integration as they pertain to teaching artists. Coursework includes lecture and discussion, readings, model teaching, and teaching artist visits. Students will learn art pedagogy, classroom management techniques, and to develop their ideas into a curricular format.
Outcomes:
Students will recognize perspectives and theories around learning through the visual arts, identify appropriate teaching content and techniques, and design appropriate visual arts lessons, aligning content and standards

FNAR 304 Paris in the Nineteenth Century (3 Credit Hours)
An examination of Nineteenth Century art in Paris as shaped by contemporary changes in the physical, social and economic life of the city.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of nineteenth century art and artists in the context of the emergence of a modern, industrial urban complex

FNAR 305 American Art to 1945 (3 Credit Hours)
An examination of American painting, sculpture, and architecture from the colonial period to the period immediately following World War II. Emphasis is placed on the development of specifically American art forms as they evolved from their dependency upon European sources.
Outcomes:
Students will be able to recognize and demonstrate knowledge of major artists and artistic movements from the earliest days of the Republic when Europe served as a source of training and inspiration to the beginnings of modern times when global developments shifted the focus of artistic inspiration to New York

FNAR 306 Contemporary Art 1945-Present (3 Credit Hours)
An examination of recent developments in American and European art beginning with the physical shift of the center of artistic authority from Paris to New York during and immediately after World War II.
Outcomes:
Students will be able to recognize and demonstrate knowledge of major artists and artistic movements from the mid-twentieth century to the present day; They will also understand the major theoretical issues of the period

FNAR 311 Advanced Studio (3 Credit Hours)
Pre-requisites: FNAR 213 or FNAR 214 or equivalent
The most advanced level studio course in painting and drawing and is designed to aid the student in developing a body of creative work from conception to production to presentation. This course is conducted as an individual studio practicum between the instructor and student. The course may be taken twice for credit.
Outcomes:
Students will demonstrate a strong understanding of their own creative process through the development of a cohesive body of work

FNAR 312 Design III (3 Credit Hours)
Pre-requisites: FNAR 170
An application of two- and three-dimensional principles and methodologies to advanced studio projects in fine and applied areas.
Outcomes:
Students will be able to develop a series of multi-dimensional structures that utilize planar and spatial techniques to communicate a body of information and sensory experiences to others

FNAR 314 Painting III (3 Credit Hours)
Pre-requisites: FNAR 114 and 214
An advanced level painting course designed to extend the understanding of the application of drawing, design, and color principles introduced in FNAR 114 and expanded in FNAR 214. This course will explore a range of painting materials and substrates. Emphasis is placed on critique and the development of conceptual problems to build technical, perceptual, and personal expressive interpretation.
Outcomes:
Students will develop a body of work through expanded practice and articulation of both formal and artistic ideas

FNAR 315 Photography: Films and Cameras (3 Credit Hours)
Pre-requisites: FNAR 219 or instructor permission
This course will explore processes and materials related to film-based photography. The primary focus of this course will be shooting films with various types of film cameras. Students will also explore integrating a digital workflow to edit and print images captured on film.
Outcomes:
Students will learn how to use film cameras, scan film, and incorporate a digital workflow with the editing and printing of film to produce photographic projects

FNAR 318 Printmaking III (3 Credit Hours)
Pre-requisites: FNAR 218
A continued exploration of Printmaking I, II which enables the student to enhance technical and conceptual skills in printmaking mediums.
Outcomes:
Through selected projects students will demonstrate knowledge of contemporary trends in printmaking including new digital media and photomechanical processes; They will acquire analysis skills and functional critical knowledge of the grammar and language of prints

FNAR 320 Video Art (3 Credit Hours)
Pre-requisites: FNAR 216 or instructor permission
This is a course on Video Art and expanded lens-based media that introduces students to time-based art and the language and history of moving images. Students will explore the ways in which artists use video in their artworks and the techniques foundational to the craft of creating moving images.
Course equivalencies: FNAR320/FNAR222
Outcomes:
Students will learn technical skills, such as cinematography, video editing, and audio recording; Students will develop their literacy of video media by exploring artworks made by pioneering artists

FNAR 322 Sculpture & Ceramics: Advanced Studio (3 Credit Hours)
Pre-requisites: FNAR 222 or permission of instructor
An advanced studio course in which students focus on developing an independent, compelling three-dimensional fine arts practice through a more focused approach to the application and synthesis of knowledge and experiences in comparison to Intermediate Studio courses. Visual and written research and field trips are components of the course, as are personal reflection and group discussion. Technical experiments and key concepts are geared specifically to the students interests and artistic goals.
Course equivalencies: FNAR321/FNAR322
Outcomes:
Select and apply appropriate materials and methods to resolve complex visual and conceptual problems and meaningfully discuss key issues; Create a portfolio of work built on independent investigation

FNAR 332 Visual Communication III (3 Credit Hours)
Pre-requisites: FNAR 232 Visual Communication II
This course includes the continued study of contemporary graphic design practice and further work in design with emphasis on analytical and creative approaches to problem solving across many types of media. Students are exposed to current best practices for effective self-promotion.
Outcomes:
Students gain an understanding of how contemporary design is used to communicate; They begin to develop a sophisticated body of work, advancing in their ability to critically evaluate visual communication

FNAR 333 Explorations in Typography (3 Credit Hours)
Pre-requisites: FNAR 232
Students explore both practical and experimental solutions utilizing typography as a means of communication and language visualization; investigating multifaceted modes of expression with emphasis placed on the study and creation of meaning relative to audience, culture, and history.
Outcomes:
Students develop a heightened awareness of the nuanced role that typography plays as a delivery mechanism for narrative structures, information, language visualization, and alternate forms of expression

FNAR 334 Motion Design (3 Credit Hours)
An exploration of time-based motion graphics. Industry standard software is utilized as a vehicle for learning graphic animation concepts and as a tool for creative expression.
Outcomes:
Students gain an understanding of software skills and design basics; They develop the ability and techniques to manipulate software in the production of motion graphics effectively combining image and typography

FNAR 338 Medieval Art (3 Credit Hours)
An examination of the art and architecture of the Christian world from 250 to 1453 CE, including the Early Christian, Byzantine, Carolingian, Romanesque, and Gothic periods as well as the influence of Islamic culture.
Interdisciplinary Option: Catholic Studies, Medieval Studies
Course equivalencies: X-FNAR338/MSTU380/ROST338
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of medieval art and their relation to relevant cultural, social, and historical contexts; They will acquire the skills to critically analyze these relationships and to understand the scholarship and issues related to medieval studies

FNAR 341 Renaissance Art - Painting (3 Credit Hours)
An examination of pictorial arts of the Renaissance in Northern and Southern Europe within the context of the material culture and society of the fifteenth and sixteenth centuries. Content may vary according to the particular focus of the instructor.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-FNAR341/ROST341
Outcomes:
Students will demonstrate knowledge of techniques, formats, themes, forms, functions, and patronage of European painting and its relation to society and culture and will acquire the skills to critically analyze these relationships

FNAR 342 Art in Rome (3 Credit Hours)
A survey of Rome's artistic heritage, including architecture, mosaic, painting, and sculpture from antiquity to the present day studied within the context of Rome's changing roles in Western European history. Classes are taught on site.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR342/ROST342
Outcomes:
Students will demonstrate knowledge of Rome's cultural role in history and of its artistic traditions and how they relate to their historical context

FNAR 343 Baroque Art (3 Credit Hours)
An examination of art and architecture in Europe during the seventeenth and eighteenth centuries with special concentration on the preeminence of Rome. (Rome Center students are expected to visit and study certain works of art in their original location).
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR343/ROST343
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of seventeenth and eighteenth-century Western European art and their relation to relevant cultural, social and historical contexts; They acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Baroque studies

FNAR 344 Early Italian Renaissance Art (3 Credit Hours)
An examination of Italian art and architecture from the late thirteenth to the late fifteenth centuries with special emphasis on Florence, Siena, and centers in northern Italy such as Padua and Mantua. (Rome Center students visit and study certain works of art in their original location).
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR344/ROST344
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of early Italian Renaissance art and their relation to relevant cultural, social, and historical contexts; They acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Italian Renaissance art

FNAR 345 Italian High Renaissance and Mannerist Art (3 Credit Hours)
An examination of Italian painting, sculpture, and architecture from the late fifteenth through the sixteenth centuries, focusing on the art of Florence, Rome, and Venice and including consideration of such artists as Leonardo da Vinci, Michelangelo, Raphael, and Titian. (Rome Center students visit and study works of art in their original location).
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR345/ROST345
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of Italian High Renaissance and Mannerist art and their relation to relevant cultural, social, and historical contexts; Students acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Italian High Renaissance and Mannerist art

FNAR 349 Art and the Catholic Tradition (3 Credit Hours)
An examination of the integral role that the visual arts and architecture have played in the Catholic faith since its early centuries.
Interdisciplinary Option: Catholic Studies, European Studies
Outcomes:
Students will understand the role of Catholic art and architecture within its theological, social, and historical contexts through an examination of both visual and related textual sources

FNAR 351 Latin American Art I: Ancient to 19th Century (3 Credit Hours)
This course examines creative production in Latin America from its Ancient empires to colonization, and independence in the 19th century. Exploring archaic periods to imperial integration, we consider the legacy of indigenous artistic production and mestizaje in the visual culture in the region from the 16th through 19th century.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-ANTH344/FNAR351/INTS385/LASP
Outcomes:
Students will demonstrate the ability to distinguish sculptural, pictorial, and architectural styles of diverse cultures within the geographical and temporal boundaries defined, and historical processes that shaped its production

FNAR 352 Islam and Visual Culture (3 Credit Hours)
This course examines the visual forms of Islamic culture from the 7th century to the present. Students will be introduced to the major monuments, artistic techniques, and regional styles, investigating visual works within their historical context and in relation to intercultural engagement.
Interdisciplinary Option: Arabic Language and Culture, Global Studies, Islamic World Studies, Arabic Language and Culture, Global Studies, Islamic World Studies
Course equivalencies: X-FNAR352/LASP358
Outcomes:
Through study of major monuments, artistic techniques, regional style, and intercultural engagement, students will recognize Islam and visual culture as a global phenomenon entailing much more than religious artifacts

FNAR 353 Latin American Art II: Modern to Contemporary (3 Credit Hours)
This course provides an expanded understanding of modernity and its artistic partner, modernism, as well as the political, social and cultural landscapes that informed and formed the art and architecture of Latin America and its diasporic intersections, from the early twentieth century to the present day.
Course equivalencies: X-FNAR353/LASP359
Outcomes:
Students will demonstrate the ability to distinguish pictorial, sculptural, performative and architectural styles of diverse artists and identities associated with Latin America, and the historical processes that shaped its production

FNAR 355 Art of Africa (3 Credit Hours)
An examination of the traditional arts of West Africa and the Pacific and their role in the control and organization of tribal societies before the introduction of European influences.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Course equivalencies: ANTH345/BWS/INTS/FNAR355
Outcomes:
Students will demonstrate understanding of the unique role of the visual arts and music in the transmission of traditional mores; They will demonstrate understanding of the social and artistic distinctions found in a comparison of highly centralized societies with loosely defined tribal organization and how this is reflected in different cultural standards

FNAR 356 India, Women and Visual Culture (3 Credit Hours)
This course examines images of women and the work of women artists in India, engaging with broader topics in feminist and postcolonial theory, including indigenous responses to colonialism, contemporary critiques of the female form in Indian art, and the agency of women artists in the twentieth and twenty-first centuries.
Course equivalencies: X-FNAR356/ASIA356/INTS374
Outcomes:
Student will become familiar with the work of Indian women artists and how images of Indian women have been understood and interpreted throughout the 20th and 21st centuries

FNAR 357 South Asian Visual Culture (3 Credit Hours)
An examination of the cultural background and major art forms of South Asia from the Indus River Valley settlements to the Present. As well as sculpture, architecture and painting, popular visual art forms will be examined.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-FNAR357/ASIA357/INTS396
Outcomes:
Students will demonstrate knowledge of the religious, cultural and political forces shaping South Asian art; They will be able to distinguish the regional styles and identify the major monuments of South Asia; Students will understand the role of the visual arts in South Asian society

FNAR 358 Chinese Art and Culture (3 Credit Hours)
An examination of the cultural background and major visual art forms of China from prehistoric to early modern times.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-FNAR358/ASIA358/INTS321
Outcomes:
Students will demonstrate knowledge of the philosophical and religious sources of the major traditional art forms of China; They will recognize the degree to which Confucian morality controlled the social and intellectual principles by which society was governed and the arts evaluated until the advent of Communism

FNAR 359 Japanese Art and Culture (3 Credit Hours)
An examination of the cultural background and major art forms of Japan from earliest times until the twentieth century.
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: X-FNAR359/ASIA359/INTS329
Outcomes:
Students will demonstrate knowledge of the philosophical and religious sources of the major art forms of Japan; They will recognize the dual formative influences of indigenous traditions and those of foreign origin in what becomes a uniquely Japanese adaptation and resolution of ideas expressed effectively either verbally or visually

FNAR 360 Picturing Women in Renaissance and Baroque Art (3 Credit Hours)
An examination of issues related to women, art, and society in early modern Europe (15th-17th centuries) through a study of women as subject matter, viewers, producers, and patrons of art. A multi-disciplinary approach is employed to explore how gender as a social, political, and psychological category is reflected in and reinforced by visual culture.
Interdisciplinary Option: European Studies, Women & Gender Studies
Course equivalencies: X-FNAR360/WOST360/WSGS360
Outcomes:
Students will demonstrate knowledge of the ways gender is constructed in society, the origins and effects of gender attitudes, the interrelation between gender and visual culture, and the ways women have claimed agency; Students will critically analyze visual culture and gender attitudes and demonstrate knowledge of feminist theory and scholarly methods

FNAR 364 History of Graphic Design (3 Credit Hours)
A survey of the evolution of graphic communication from prehistory through postmodern design and the digital revolution.
Outcomes:
Students will demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of graphic communication in relation to its social-historical context

FNAR 365 History of Photography (3 Credit Hours)
A chronological and thematic survey of the history of photography, especially in Europe and America. Fine art and utilitarian applications of the medium are considered by examining photographers who represent the origin and development of major pictorial forms; the interaction between technology and imagery; and the relationships between photography and historical, social and cultural events.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR365/ICVM365/IFMS365
Outcomes:
Students will be able to demonstrate understanding of the most important pictorial forms, themes, practitioners, processes and context of photography as a fine and applied art from the beginning of the nineteenth century to the present

FNAR 367 History of Architecture (3 Credit Hours)
An examination of the history of the built environment from the earliest known forms to contemporary examples, in terms of architectural theory, structural realities and socio-cultural usages.
Outcomes:
Students will be able to demonstrate an understanding of the many ways architecture serves the human race, and be able to constructively analyze the specific functions buildings serve within their particular cultural temporal milieu

FNAR 367R Architecture in Rome (3 Credit Hours)
This course explores architectural drawing as a way to incorporate hands-on experience in students` study of architecture in Rome. Students will develop drawing skills by conceptualizing architectural ideas in relationship to Rome's buildings and sites.
Outcomes:
Upon successful completion of this course, students will be able to develop basic architectural drawing skills, to understand graphic standards and drawing conventions of the architectural design as well as to analyze and appreciate Rome's architectural buildings and spaces

FNAR 368 Fine Arts Internship (1-4 Credit Hours)
A comprehensive introduction to gallery and/or studio operations in the Fine Arts Division. Internships will provide opportunities in various aspects of administration, scholarship, teaching, and sustaining standards in studio and/or gallery performance. Gallery internships available at Loyola's Fine Arts Galleries. External internships upon approval. Teaching/studio assistantship based on class availability. Departmental consent required for enrollment.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop practical experience for the professional world and be able to demonstrate knowledge of gallery/museum administration, scholarship, exhibition production, and/or class preparation and teaching

FNAR 380 Internship I (1-4 Credit Hours)
Pre-requisites: FNAR 332 Visual Communication III; Fine Arts Majors only
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FNAR 381 Internship II (1-4 Credit Hours)
Pre-requisites: Permission of chairperson
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FNAR 382 Visual Communication IV (3 Credit Hours)
Pre-requisites: FNAR 332 Visual Communication III and Senior standing or instructor permission
This course perfects the practice and tools of visual communication through a series of advanced projects with the aim of creating a robust and well-balanced body of work.
Outcomes:
Students are prepared to use their skills in research, analysis, and the design processes that lead to creative conceptualization to create appropriate design decisions and refined design solutions

FNAR 383 Interactive Design (3 Credit Hours)
Pre-requisites: FNAR 233 Digital Media Design
This course introduces aspects of interaction and web design including theory, common best practices, usability, information architecture, graphic design in the interactive context, prototyping, and the technical parameters of an interactive environment. Industry standard software will be used. Strong emphasis will be placed on design principles, information hierarchy, and typography.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR383/ICVM383/IFMS383
Outcomes:
Experience in the research, planning, design, and prototyping of interactive communication

FNAR 388 Critical Approaches to Visual Art (3 Credit Hours)
Pre-requisites: FNAR 202: Modern Art, C- or higher
This course examines key theoretical issues in contemporary art. Students will apply these concepts to develop strategies for creative output. The course will feature readings, discussions, written assignments, and projects to explore interdisciplinary approaches that emphasize idea as the primary means of visual production.
Outcomes:
Gain an understanding of key theoretical concepts in contemporary art; Apply theoretical concepts for the production of artworks; Develop a contemporary art practice in preparation for FNAR 398 Capstone

FNAR 390 Art History: Methods and Research (3 Credit Hours)
Pre-requisites: Restricted to Art History Majors and Minors
An examination of theoretical, critical and methodological issues as related to Modern and Post-Modern art.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR390/IFMS390
Outcomes:
Students will learn to recognize and apply a range of appropriate theoretical approaches and scholarly methods

FNAR 391 Senior Thesis in Art History (3 Credit Hours)
Students develop an in-depth scholarly research paper while engaging new theoretical frames or topics to expand upon the writing and research of a paper of their choice from a previous art history class. In addition, they will share their research in a final, formal oral presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students produce a polished in-depth research paper; They demonstrate the ability to synthesize and apply ideas from scholarly sources; formulate, develop, and articulate in verbal and written form relevant issues

FNAR 392 Senior Thesis II: FNAR Art History Capstone (3 Credit Hours)
Pre-requisites: FNAR 391 or instructor permission; Art History majors only; Senior standing
The second half of the capstone experience for art history majors. In Senior Thesis II, students write an in-depth scholarly research paper.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students produce a polished in-depth research paper; They demonstrate the ability to synthesize and apply ideas from scholarly sources; formulate, develop, and defend a thesis; and critically analyze and articulate in verbal and written form the issues and ideas relevant to their topic

FNAR 393 Topics in Studio Art (3 Credit Hours)
Special topics in specific areas of study in studio art.
Outcomes:
Students will master topics in areas of studio art not offered elsewhere in the curriculum

FNAR 394 Topics in Art History (1-4 Credit Hours)
Special topics in specific areas of study in art history.
Outcomes:
Students will master topics in areas of art history not offered elsewhere in the curriculum

FNAR 398 Fine Arts Capstone (3 Credit Hours)
Pre-requisites: Completion of the most advanced course in the student's FNAR concentration
The course serves as the culmination of each student's experience as a Fine Art major. Students will demonstrate the ability to produce work that exemplified the application and synthesis of the knowledge gained from the courses and experiences.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate the ability to produce art work suitable for exhibit

FNAR 399 Independent Study (1-4 Credit Hours)
Pre-requisites: written permission of instructor and chairperson
Advanced student are afforded the opportunity to work on an in-depth project in the medium of his/her choice in a tutorial setting. The course is developed in consultation with a faculty advisor and is stated formally in a written contract. of definition, goals, procedures and outcomes.
Outcomes:
Students will be able to demonstrate the ability to produce a significant body of original artwork on a focused theme

Food and Nutrition (FONU)

Discover, search, courses (p. 2953)!

FONU 110 Culinary Explorations (3 Credit Hours)
Translate food and nutrition recommendations into delicious and realistic, food-based meals using basic culinary techniques. Examine the major food groups including both common and uncommon foods in each category. Explore ways to incorporate a variety of foods into meals considering budget, health, availability, personal values and preference.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) describe foods in major food category; 2) explain food based recommendations to promote nutritional adequacy and health; 3) demonstrate culinary competence by recipe preparation; 4) critique a unique recipe that they developed; 5) plan menus for a week that meet specified criteria

FONU 215 Fundamentals of Nutrition (3 Credit Hours)
For non-majors. Nutrients essential to a healthy diet, consideration of nutrition issues of public concern.

FONU 225 Food as Culture (3 Credit Hours)
Explore culture through foods and food ways across the globe.
This course examines food patterns of each continent using a multidimensional approach. Ethnic, geographical, religious, historical, geographical, and societal influences on food patterns of various regions and people will be presented through didactic and experiential activities. Information will be presented with the perspective of enhancing engagement and build positive relationships with future clients and communities served.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) identify common food sources of nutrients in the eating patterns of selected cultures; 2) describe foods, dishes and preparation methods common to selected nations and cultures; 3) explain traditional food use in selected cultures including infant feeding and illness; 4) compare and contrast typical American to specialized ethnic retail food markets; 5) discuss experiences with ethnic food

FONU 320 Nutrition Through the Life Cycle (3 Credit Hours)
Pre-requisites: FONU 215 Fundamentals of Nutrition
Learn about nutrient needs through the lifecycle from birth through aging to support optimal health and human potential. Key nutrition concepts to support normal growth and development, health maintenance, and disease prevention will be included. Nutrient needs will be translated to food-based solutions as an integral component of health habits. Community resources will be examined.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) describe the needs and roles of key nutrients at various stages of the life cycle; 2) translate nutrient needs into food-based solutions appropriate for life cycle stage; 3) explain common issues related to nutrition and food patterns specific to life cycle stage; 4) recommend community resources appropriate to life cycle stage

FONU 400 Role Development in Dietetic Practice (1 Credit Hour)
Pre-requisites: Admission to the dietetic internship
This course includes concepts and resources related to professional practice as a registered dietitian. Ethical issues, licensure, and scope of practice will be explored. Professional development will be discussed from entry-level to advanced practice. Fiscal aspects of professional practice, such as reimbursement and compensation, will also be considered.
Outcomes:
Students will define ethical issues, licensure requirements, increase professional development, and learn about fiscal aspects of the practice, such as reimbursement and compensation

FONU 410 Nutrition Focused Physical Assessment (2 Credit Hours)
This course focuses on physical and laboratory assessment skills necessary for the dietitian's practice, particularly in nutritional assessment and medical nutrition therapy. Emphasis is placed on skill development relevant to nutrition care of the individual, and/or for nutrition program delivery or evaluation. This course incorporates both classroom and lab activities. Master of Science in Dietetics major, or instructor permission
Outcomes:
Demonstrate competence in conducting a nutrition-focused physical assessment; Demonstrate skills for assessment and care of the patient receiving specialized nutrition support; Measure common physiologic parameters used in medical nutrition therapy

FONU 420 Transition to Supervised Practice in the Dietetic Internship (1 Credit Hour)
Pre-requisites: admission to LDI
This course begins skill development in preparation for the transition from the classroom environment to supervised practice in dietetics. Topics include ethical, legal, and safety issues for novice dietetic practice such as OSHA, HIPPA, IDPH, and standards of other regulatory agencies in health care. The nutrition care process including nutrition diagnostic language, planning and implementation of medical nutrition therapy (MNT) interventions are discussed. Basic familiarity and use of evidence-based practice protocols related to common conditions such as hypertension, diabetes, cardiovascular, renal, and/or gastrointestinal disorders, provision of specialized nutrition support and others. Medical terminology mastery is expected. Emphasis is placed on synthesis and application of undergraduate material, and effective clinical resource application.

FONU 422 Medical Nutrition Therapy Theory (3 Credit Hours)
Pre-requisites: FONU 420
This course includes the study of medical nutrition therapy (MNT) theory for dietetic practice including acute care, long term and outpatient environments. Complex medical conditions including trauma, burns, transplant, oncology, diabetes mellitus, sepsis, cardiovascular, gastrointestinal, neurological, and renal disorders. Alternate modalities of nutrition supported are included. The course includes theoretical foundations of patient care protocols, synthesis of research findings, and trends in health care related to practice protocols. This course should be taken in conjunction with FONU 423 for current Loyola dietetic interns.

FONU 423 Supervised Practice (SP) in Medical Nutrition Therapy (2 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course requires the student to complete 480 hours of dietetic SP in health care environments that provide acute care and renal replacement therapy. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 422. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 424 Public Health Nutrition and Research Theory for Dietetic Practice (3 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course includes the study of nutritional epidemiology, general principles of public health, major public health nutrition programs, research for beginning dietetic practitioners and professional development issues. Nutritional surveillance, program evaluation, and methods are discussed through lecture and review of professional literature.

FONU 425 Supervised Practice Public Hlth Nutrition, Rsrch, Prof Dvlpmnt & Marketing (2 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course includes 480 hours of dietetic SP in public health nutrition, research, marketing and an elective professional development area. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 424. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 426 Food Management Theory: Geriatric Nutrition (1 Credit Hour)
This course provides study of food management theory including food systems, operations, resource management (human, food, financial), quality improvement, safety and sanitation. Geriatric nutrition care and management theory is also revised from perspectives of medical care and facility management including regulatory agency standards.

FONU 427 Supervised Practice: Food Management, Geriatric Nutrition (1 Credit Hour)
This course requires the student to complete 240 hours of SP in food management and geriatric nutrition/long term care environments. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 426. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 499 Independent Study (1-4 Credit Hours)
Pre-requisites: Restricted to Parkinson Exercise Science students
This is a directed study course in exercise science for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines. Permission of the Program Director.
Outcomes:
Students will be able to miiculate a general understanding of the selected topic

FONU 501 Writing and Communications in Nutrition and Dietetics (3 Credit Hours)
This course focuses on scientific writing and communication skills essential to dietetic practice. Emphasis will be placed on clarify, consistency and translation of scientific evidence into effective messages for diverse populations. Standards for publication of practice and research based papers understanding and responding to peer review process will be discussed. Master of Science in Dietetics major, or instructor permission
Outcomes:
Create proposals, scientific reports and/or articles using writing skills of planning, drafting, revising and editing to incorporate appropriate evidence tailored to different audiences, publications and media formats

FONU 503 Dietetic Theories & Research Methods (3 Credit Hours)
This course analyzes theories of health and disease with implications for dietetic practice. Principles of research will be examined with a focus on methods to assess food, nutrients and related physical or biochemical parameters.

FONU 505 Trends in Dietetic Practice (2 Credit Hours)
Pre-requisites: admission to the MS in Dietetics, Dietetic Internship or FONU Program Director permission
This course includes emerging scientific research in the dietetics field as it relates to consumer food choices, evaluating the safety and health of the food supply, functional foods, vegetarian diets, food allergics and weight management. The course will focus on theoretical foundations, and synthesis of research trends into practice protocols. Mock counseling sessions will also occur utilizing up to date counseling methods including movational interviewing for behavior change.
Outcomes:
Student will demonstrate knowledge in emerging areas related to dietetic practice

FONU 507 Behavioral Change for Health Promotion (3 Credit Hours)
This course focuses on concepts and theories of health and behavior related to food, nutrition and other behaviors. Evidence to support select skills and techniques for health will be evaluated and applied. The impact of interventions will be analyzed to provide evidence-based frameworks for behavioral change in individuals and groups. Master of Science in Dietetics major, or instructor permission.
Outcomes:
Incorporate evidence-based behavioral change interventions into nutrition care plans; demonstrate skill in a behavioral change encounter in a simulation, analyze major approaches and influences of health promotion (eg policy, community engagement, advocacy and social marketing)

Forensic Science (FRSC)

Discover, search, courses (p. 2953)!

FRSC 340 Introduction to Forensic Science (3 Credit Hours)
Pre-requisites: CJC 101; Forensic Science Majors Only
This course provides an overview of the basic principles and uses of forensic science within the field of criminal justice. The course is designed for forensic science majors emphasizing the scientific aspects in the forensic sciences.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will be able to identify the uses and limitations of the existing forensic science techniques used within the field of criminal justice

FRSC 341 Forensic Ethics and Professional Practice (3 Credit Hours)
Pre-requisites: FRSC 340; Forensic Science Majors only
This course develops a basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought and application of ethics to the field and professional practice of forensic science.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will demonstrate an understanding and application of ethics in the forensic sciences; Students will be able to articulate the role and challenges of ethical issues facing forensic science today, the applicability of ethics in the profession and their individual careers

FRSC 342 Expert Witness Testimony and Court Room Demeanor (3 Credit Hours)
Pre-requisites: FRSC 341; Forensic Science Majors Only
The goal for this course is to give you the information necessary to be an effective and ethical witness. This should help throughout your career and help make testimony not so much something to be feared as something which represents the culmination of your work in a case.
Interdisciplinary Option: Forensic Science
Outcomes:
Students should develop courtroom and expert witness testimony literacy, understanding of the dynamics during court and appreciate the impact to the judicial system

FRSC 343 Physical Organic Chemistry for Forensic Science (3 Credit Hours)
Pre-requisites: PHYS 112; MATH 132; CHEM 222 or (CHEM 224 and CHEM 226) or (CHEM 240, CHEM 241, CHEM 260, and CHEM 272); and Forensic Science majors
An introduction to the foundational principles of physical and physical organic chemistry. The course focuses on the application of these principles to solving problems in forensic science. The numerous aspects of forensic science require a working knowledge of physical chemistry, the foundational principles, and the interrelation of cause and effect.
Outcomes:
Understand the basic concepts of physical and physical organic chemistry; Acquire and interpret data and form conclusions; and Use critical thinking skills in problem solving

FRSC 350 Pattern Evidence I (3 Credit Hours)
Pre-requisites: FRSC 341; Forensic Science Majors only
This course introduces the basic principles and methods of forensic pattern evidence: latent fingerprints, firearms and tool marks, and question documents.
Interdisciplinary Option: Forensic Science
Course equivalencies: X-CRMJ382/FRSC382
Outcomes:
Students will demonstrate an understanding of the three (3) forensic pattern evidence areas; Students will develop techniques, work on non-probative cases, and written formal reports of findings

FRSC 350L Pattern Evidence Lab I (1 Credit Hour)
Co-requisites: FRSC 350; Forensic Science Majors only
This course introduces the basic laboratory methods of forensic pattern evidence: latent prints, firearms and toolmarks, and questioned documents. Prerequisite or
Interdisciplinary Option: Forensic Science
Outcomes:
Students will demonstrate a basic competency through development of various techniques; Students will work non-probative cases, along with written formal reports of their findings

FRSC 360 Forensic Drug Chemistry I (3 Credit Hours)
Pre-requisites: (CHEM 212, CHEM 214, CHEM 224, and CHEM 226) or (CHEM 241, CHEM 272, and CHEM 280); FRSC 342; and Forensic Science majors
This course provides an introduction to the basic principles of forensic drug analysis. The use of microscopic, chemical, and chromatographic techniques to gather data, interpret results and form conclusions are developed. Recognizing the strengths and weaknesses in the techniques used and the correct interpretation of results is stressed.
Interdisciplinary Option: Forensic Science
Course equivalencies: CHEM 316/FRSC 360
Outcomes:
The techniques, skills, advances and limitations of the modern forensic laboratory discussed; The students will be able to summarize basic concepts of forensic drug analysis, testing, and formal reporting

FRSC 360L Forensic Drug Chemistry Laboratory I (2 Credit Hours)
Pre-requisites: (CHEM 212, CHEM 214, CHEM 224, and CHEM 226) or (CHEM 241, CHEM 272, and CHEM 280); FRSC 342 and Forensic Science majors
Co-requisites: FRSC 360
This course provides both basic and advanced foundations to the principles of forensic drug analysis. The use of basic and advanced analytical techniques to gather data, interpret results and form conclusions are developed. Additionally, national forensic laboratory operational standards and requirements are incorporated.
Interdisciplinary Option: Forensic Science
Course equivalencies: CHEM 316L/FRSC 360L
Outcomes:
The techniques, skills, advances and limitations of the modern forensic laboratory will be discussed; The students will be able to demonstrate basic/advanced concepts of forensic drug analysis, testing, and formal reporting

FRSC 361 Forensic Toxicology I (3 Credit Hours)
Pre-requisites: FRSC 360/360L; Co-requisite FRSC 361L; Forensic Science Majors Only
This course stresses the practical and theoretical aspects to forensic toxicology, the study of drugs and their implications in a forensic setting when toxicity sets in. The analysis and description of drugs are introduced. Case studies are reviewed where drug use may become a forensic matter.
Interdisciplinary Option: Forensic Science
Course equivalencies: CHEM 315/FRSC 361
Outcomes:
Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought and application of ethics to the field of forensic toxicology

FRSC 361L Forensic Toxicology Laboratory I (1 Credit Hour)
Pre-requisites: FRSC 360/360L; Corequisite: FRSC 361; Forensic Science Majors Only
This course stresses the practical and theoretical aspects to forensic toxicology, the study of drugs and their implications in a forensic setting when toxicity sets in. The analysis and description of drugs are introduced. Case studies are reviewed where drug use may become a forensic matter.
Interdisciplinary Option: Forensic Science
Outcomes:
The techniques, skills, advances and limitations of the modern forensic laboratory discussed; The students will be able to summarize basic concepts of forensic drug analysis, testing, and formal reporting

FRSC 370 Forensic Biology (3 Credit Hours)
Pre-requisites: FRSC 341, BIOL 102 and 112; Corequisite: FRSC 370L; Forensic Science Majors Only
This course stresses the practical and theoretical aspects to forensic biology. Forensic biology includes the examination, identification, and characterization of biological materials found on various types of evidence.
Interdisciplinary Option: Forensic Science
Outcomes:
Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought and application of ethics to the field of forensic biology

FRSC 370L Forensic Biology Laboratory (1 Credit Hour)
Pre-requisites: FRSC 341, BIOL 102 and 112; Corequisite: FRSC 370; Forensic Science Majors Only
This course stresses the practical and theoretical aspects to forensic biology. Forensic biology includes the examination, identification, and characterization of biological materials found on various types of evidence.
Interdisciplinary Option: Forensic Science
Outcomes:
Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought and application of ethics to the field of forensic biology

FRSC 371 Forensic Molecular Biology Lecture and Laboratory (5 Credit Hours)
Pre-requisites: BIOL 282, BIOL 283, FRSC 342, FRSC 370, FRSC 370L; Forensic Science Majors only - Biology/DNA Option
This course prepares students to work in forensic DNA analysis. The lectures cover the basic aspects of DNA structure and function while the laboratory gives students experience with the techniques and instruments used in forensic DNA analysis.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will have a strong theoretical understanding of STR marker origin, population biology, and legal uses, and will be able to isolate and process DNA for STR scoring

FRSC 390 Forensic Science Internship (3-4 Credit Hours)
Pre-requisites: FRSC 342; Forensic Science Majors Only
The purpose of this course is to enhance the student's development and learning through observational and participatory experience in forensic focused criminal justice agencies.
Interdisciplinary Option: Forensic Science
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-FRSC 390/ANTH 396A
Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific forensic focused criminal justice agency and be able to identify and describe the link between their field experience and prior courses

FRSC 392 Forensic Science Seminar (1 Credit Hour)
A weekly seminar course with presentations, generally given by outside speakers, covering topics in chemistry usually not encountered in the classroom. Forensic Science Majors Only.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will demonstrate their understanding by writing a one page summary of each presentation

FRSC 394 Forensic Science Research (1-4 Credit Hours)
Pre-requisites: Prior consultation with the instructor and a completed agreement form; Agreement forms for this directed study course are obtained from the program office, and the completed form (signed by the student, instructor, and program director) must be deposited in the program office before enrollment
This course gives undergraduate students an opportunity to participate in research in a selected area. Forensic Science Majors Only.
Interdisciplinary Option: Forensic Science
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will accomplish the research task defined in the contractual arrangement between the student and the instructor

FRSC 395 Special Topics in the Forensic Science (3 Credit Hours)
Pre-requisites: FRSC 341; Forensic Science Majors Only
Special topics courses provide students with an opportunity to examine various forensic science topics not normally offered as part of the Program's regular curriculum.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will be able to gain an understanding of new issues confronting the forensic sciences, or an advanced understanding of traditional subjects covered in basic courses

French (FREN)

Discover, search, courses (p. 2953)!

FREN 101 Elementary French I (3 Credit Hours)
Pre-requisites: No previous knowledge of French is expected; Please go to http://www.luc.edu/modernlang/exam.shtml for placement test instructions, especially if you took any French courses in high school or college
Taught in French. Instructs basic communicative French, the people and cultures where it is spoken, using formal and informal registers, and speaking in present and future time. Students will listen and respond, read and write, ask and answer simple questions in basic functional French. Content: personal topics, everyday living.
Outcomes:
Student will successfully interpret and express needs pertaining to home, work, college, leisure, and dining; Achievement level desired: Novice Low, American Council on the Teaching of Foreign Languages (ACTFL*) standards

FREN 102 Elementary French II (3 Credit Hours)
Pre-requisites: FREN 101 or one semester college French with C- or better, or placement test score; Please go to Modern Languages home page for placement test instructions; You must take the placement test if you took any French courses in high school
Taught in French. Continuation of basic French inter-communication skills both producing French (speaking and writing), and interpreting French (listening and reading.) The aim is to comprehend and contribute to discussions about families, housing, sports, travel, and traditions in French.
Outcomes:
Students will comprehend and speak in present, future, and past narrative; get and give simple direction; share personal information; Achievement level desired: ACTFL* Novice Low to Mid

FREN 103 Intermediate French I (3 Credit Hours)
Pre-requisites: FREN 102, or equivalent French at another college, with C- or better, or placement test score; Exam required for placement on the basis of high-school work: please go to Modern Languages home page for placement test instructions
Taught in French. Course continues to work on focus on pronunciation, grammar. and developing conversational and writing fluency. Students will read excerpts of French and francophone media or literature. Topics include the environment and the many francophone cultures and tasks include narrating in more complex past, future and hypothetical contexts.
Outcomes:
Students become more fluent and precise in expressing opinions, asking and answering more probing and data-driven questions, on topic; Achievement level desired ACTFL* Novice Mid to High

FREN 104 Intermediate French II (3 Credit Hours)
Pre-requisites: FREN 103, or equivalent French at another college, with C- or better, or placement test score; Placement test on the basis of high-school work required: please go to Modern languages home page for placement test instructions
Taught in French. Students will comprehend and produce French in more complex contexts (literary and cultural) while reviewing intermediate grammar structures to improve fluency and accuracy. Students present and debate cultural, historical or current events topics; practice expressing emotion, opinion, judgment, necessity, hypotheticals, and regret.
Outcomes:
Students will skillfully interpret and write about literature excerpts or French and francophone media; They will summarize, narrate, and offer opinions; Achievement level desired ACTFL* Novice High to Intermediate Low

FREN 250 French Composition and Conversation I (3 Credit Hours)
Pre-requisites: FREN 104, or college transfer equivalent, with C- or better, or placement test score; Placement test based on high-school work is required: please go to Modern Languages home page for placement test instructions
Taught entirely in French. Students develop advanced interpretive and presentation skills, detecting sequencing, time frames and chronology in texts, whether heard or viewed. Format is discussion, presentation, role plays, several compositions written in a process.
Outcomes:
Students will share points of view verbally and in writing on contemporary topics discovered in current media of French and francophone cultures; Achieved level desired ACTFL* Intermediate Low to Mid

FREN 251 French Composition and Conversation II (3 Credit Hours)
Pre-requisites: FREN 104, or college transfer equivalent, with C- or better or placement test score; Placement test based on high-school work is required: please go to Modern Languages home page for placement test instructions
Taught entirely in French. Via classic, French New Wave, francophone to contemporary French-speaking film students discover and compare cultural differences, discuss global or local concerns, spanning the disciplines. Writing in a process leads to more sophisticated writing skills.
Outcomes:
Students become ever-precise and effective in communicating facts, opinions, and concerns about French-speaking communities in relationship to their own; Achieved level desired ACTFL* Intermediate Low to Mid

FREN 270 Main Currents of French Literature & Culture I (3 Credit Hours)
Pre-requisites: Pass FREN 250 and/or FREN 251 with C- or better or AP credit for both 250 and 251, or with instructor's consent
Survey of representative works of French literature from the Middle Ages, the Renaissance, and the 17th and 18th centuries, examining the formation of French cultural identity up through the Enlightenment and the French Revolution.
Interdisciplinary Option: European Studies
Outcomes:
Students will identify literary and cultural trends and ruptures across these centuries, and explain them in some detail; Achievement level desired: ACTFL* Intermediate Mid to High

FREN 271 Main Currents of French Literature & Culture II (3 Credit Hours)
Pre-requisites: Pass FREN 250 and/or FREN 251 with C or better, acquire AP credit, or instructor's consent
Survey of representative works of French literature in all genres, from Romanticism through narrative realism and the modernist innovations of Surrealism and existentialism in the 20th century.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will learn to identify these literary and cultural movements, and explain in some detail their importance regarding French cultural identity; Achievement level desired: ACTFL* Intermediate Mid to High

FREN 300 Tutorial for Credit (1-6 Credit Hours)
Pre-requisites: FREN 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
Eligible students majoring in French may elect tutorial for credit; topic chosen in consultation with faculty member.
Outcomes:
Student may choose their own topic to explore

FREN 301 Stylistics (3 Credit Hours)
Pre-requisites: FREN 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
This is advanced work in writing expository prose is based on intensive study of advanced grammar and syntax with attention to peculiar features of the French idiom. Students examine phonology and phonetics with attention to French speech patterns and rhythms whilst enhancing vocabulary development through the varieties of lexical references and other dictionaries.
Outcomes:
Students will be able to demonstrate a sophisticated, comprehensive command of the complexities of written and spoken French; Achievement level desired: ACTFL* Advanced Low

FREN 302 French for Professions (3 Credit Hours)
Pre-requisites: FREN 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
Surviving in global careers--commerce, law, diplomacy, communications, health--requires knowledge of business terminology and organism structures. Students study current events, and present on francophone companies, institutions, and NGO's. Résumés are perfected in French, interview questions are drilled. The French government DAF (Diplôme du français des affaires) exam is optional.
Outcomes:
Students will be able to navigate confidently in French business and diplomatic sectors; They will be prepared to interview in French; ACTFL* achievement level desired: Intermediate High to Advanced Low

FREN 308 Literary Criticism and Theory (3 Credit Hours)
Pre-requisites: Completion of French major course requirements and instructor's consent
Capstone for all French Majors, taken with other Modern Languages & Literatures language majors. Students will study major schools and themes in literary theory, both historical and contemporary. Rhetorical, philosophical, historical, and cultural approaches to literature will be studied in intimate conjunction with specific literary texts drawn from several linguistic and cultural traditions.
Course equivalencies: X-FREN/GERM/ITAL/SPAN308
Outcomes:
Students will be able to demonstrate critical knowledge and understanding of major theoretical issues in the study of literature; ACTFL* achievement level desired: Advanced Low to Mid

FREN 309 Francophone Literature (3 Credit Hours)
Pre-requisites: FREN 271 with C or better, and instructor's consent
Students explore salient characteristics and themes of literature of various genres written in French from Northern and Sub-Saharan Africa, the Caribbean, and Québec. Topics include «la négritude», other reactions to colonialism, `borrowed language', ideas and realities of liberation, post-colonialism, the francophone woman, literature as political agent, and satire.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Course equivalencies: X-FREN309/BWS 309/INTS309
Outcomes:
Students will be able to demonstrate critical knowledge of historical and political implications of these movements in contemporary global society; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 311 French Modernity (3 Credit Hours)
Pre-requisites: FREN 271 with C or better, and instructor's consent
Students study major French authors of the twentieth and twenty-first centuries (Proust, Malraux, Sartre, Camus, and others), with attention to the historical context of their works against the background of two world wars and world-wide revolutionary movements, along with their interaction with other artistic media.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to demonstrate critical knowledge of major literary works studied, and appreciate the major issues and their cultural significance; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 314 Survey of Medieval Literature (3 Credit Hours)
Pre-requisites: FREN 270 with a grade of C or better and permission of the instructor
This course will explore the literature and culture of the French Middle Ages. Students will develop familiarity with literary genres and themes including the chansons de geste, romances, and fabliaux, courtly love, the international character of medieval French literature, voices and representation of women, and the role of the Church.
Interdisciplinary Option: Medieval Studies
Course equivalencies: X-FREN314/MSTU372
Outcomes:
Students will be able to demonstrate critical knowledge of major literary works studied, and appreciate the major issues and their cultural significance; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 316 Renaissance France (3 Credit Hours)
Pre-requisites: FREN 270 with C or better, and instructor's consent
Students study major authors of the French Renaissance in their historical and cultural contexts. Authors to be read will include Marot, Labé, Scève, Rabelais, Du Bellay, Ronsard, and Montaigne, in conjunction with study of Renaissance culture, the Reformation, the Wars of Religion, and the other arts.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate critical knowledge of major literary works studied, and appreciate the major issues and their cultural significance; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 317 Le Grand Siècle (3 Credit Hours)
Pre-requisites: FREN 270 with C or better, and instructor's consent
Students study major authors of the "long" 17th century in historical and cultural contexts: Corneille, Cyrano, Descartes, Pascal, Mme de Lafayette, Molière, Racine, Mme de Sévigné, the moralistes, among others. Focus is on complex historical contexts of the period: baby kings, the Fronde, religious conflict, the court and wars of Louis XIV.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate critical knowledge of major literary works studied, and appreciate the major issues and their cultural significance; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 318 Enlightenment France (3 Credit Hours)
Pre-requisites: FREN 270 with C or better, and instructor's consent
Students study major French authors of the European Enlightenment. Authors to be read will include Montesquieu, Voltaire, Rousseau, and Diderot, among others, in the context of the development of (and resistance to) the Enlightenment and the French Revolution.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate critical knowledge of major literary works studied, and appreciate the major issues and their cultural significance; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 319 Romantic Century (3 Credit Hours)
Pre-requisites: FREN 271 with C or better, and instructor's consent
Students study the emergence of French Romanticism in the wake of Revolutionary tumult (Lamartine, Vigny, and Hugo), and of the deeper and darker reaction to bourgeois culture (Baudelaire, Flaubert, Rimbaud, and others), marking relations with painting, sculpture, and music.
Interdisciplinary Option: European Studies
Outcomes:
Appreciation of works from modern sensibilities are formulated, plus an understanding of major issues and questions in these works and their culture; ACTFL* achievement level desired: Intermediate Mid-Advanced Low

FREN 320 Survey of Literature of the Theatre (3 Credit Hours)
Pre-requisites: French 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
Students study theater in French from its medieval beginnings to the present. Authors/works to be read may include medieval farce, Turnèbe, Corneille, Molière, Racine, Diderot, Hugo, Rostand, Ionesco, Girardoux, Beckett, and Césaire. Works will be studied in historical, cultural, critical, and performing contexts.
Outcomes:
Students will demonstrate critical knowledge of major works of French theater, and appreciate the major issues involved and their cultural significance; ACTFL* achievement level: Intermediate Mid to Advanced Low

FREN 330 Survey-Poetry Thry & Practice (3 Credit Hours)
Pre-requisites: FREN 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
Theory and Practice. Study of French narrative, dramatic, and lyric poetry, with emphasis on the lyric.
Outcomes:
Students will be able to demonstrate detailed critical knowledge and comprehension of major literary works of the genre under study, as well as a sophisticated critical appreciation of the major issues and questions in these works and their culture

FREN 340 Survey of Prose: Fictional & Non-Fictional (3 Credit Hours)
Pre-requisites: FREN 270 and/or FREN 271 with C or better, and instructor's consent
Students conduct detailed analysis of the outstanding stylistic features of France's great prose writers from the XVIth century to the present day. Works may include writings by Rabelais, Montaigne, Pascal, Voltaire, Flaubert, Balzac, Michelet, Proust, Camus, Malraux and Lévi-Strauss, among others.
Interdisciplinary Option: European Studies
Outcomes:
Appreciation of the rich variety of expressive skills and moral penetration among France's great prose writers; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 369 Introduction to French for Reading Knowledge (3 Credit Hours)
This course will prepare students for reading and conducting research in French. Fundamentals of grammar, syntax, and vocabulary essential to reading competence will be covered, using materials drawn from a wide range of fields. Completion of this course with a passing grade fulfills the Graduate School language competency requirement. This course is restricted to graduate students.
Course equivalencies: FREN369 / FREN109

FREN 390 French & Francophone Cultures & Civilizations (3 Credit Hours)
Pre-requisites: FREN 271 with C or better, and instructor's consent
This multidisciplinary study of French and Francophone cultures as they have developed over the centuries will focus on the historical, institutional, religious, and artistic manifestations that have contributed to the formation of these identities. Special attention will be given to their revolutionary role in politics, painting, intellectual life, and cinema.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Course equivalencies: X-FREN390/INTS390
Outcomes:
Students will be able to identify and discuss the revolutionary roles these cultures have had in politics, painting, intellectual life, and cinema; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 395 Internship (3 Credit Hours)
Pre-requisites: Completion of at least one 300-level French course and instructor's consent
Eligible students who have secured an internship related to the field of study may complete an internship for credit, with the approval of a faculty member. Students complete reflective assignments and a final project in French, in consultation with the faculty member.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience while working with the French language and Francophone cultures and applying skills they have learned in the classroom

FREN 399 French Honors Tutorial (3 Credit Hours)
Eligible students majoring in French and with departmental honors may elect tutorial for credit; topic chosen in consultation with faculty member. Instructor's consent, restricted to students in French BA.
Course equivalencies: FREN399H / FREN399
Outcomes:
Students will explore a topic of their choice guided by a faculty member, and will conduct a research project that will result in a final paper

General Nursing (GNUR)

Discover, search, courses (p. 2953)!

GNUR XXX Comprehensive Exam Semester 1 (0 Credit Hours)
Course designation for program planning master's students into the comprehensive examination requirement; First semester of the process.

GNUR YYY Comprehensive Exam Semester 2 (0 Credit Hours)
Course designation for program planning master's students into the comprehensive examination requirement; Second semester of the process.

GNUR 102 Introduction to Professional Nursing Practice (1 Credit Hour)
This course introduces the mission of the MNSON and the foundations of nursing practice. Nursing is presented as a scientific profession with a heritage of strong values-based leadership based on critical thinking and evidence based practice.
Outcomes:
Describe the mission of the MNSON and discuss the ANA Scope of Standards of Nursing Practice

GNUR 155 Human Anatomy (3 Credit Hours)
This course is designed to give students a basic understanding of the structure of the major organs and systems of the human body from the cellular to the system level. Must also enroll in GNUR 155L.

GNUR 155L Human Anatomy Lab (1 Credit Hour)
Companion laboratory course for GNUR 155, Human Anatomy Must also enroll in GNUR 155.

GNUR 156 Human Physiology (3 Credit Hours)
This course is designed to give students a basic understanding of the function of the major organs and systems of the human body from the cellular to the system level. Must have taken and passed GNUR 155, GNUR 160 with a C- or better. Must also enroll in GNUR 156L.

GNUR 156L Human Physiology Lab (1 Credit Hour)
Companion laboratory course for GNUR 156, Human Physiology Must enroll in GNUR 156.

GNUR 157 Human Anatomy and Physiology I Theory (3 Credit Hours)
Co-requisites: GNUR 157L The first in a two-part sequence, this course is designed to give students a detailed understanding of the structure of the major organs and systems of the human body from the cellular to the system level
It includes the integumentary system, the skeletal system, the skeletal muscles, the nervous system, and the special senses (sight, hearing, smell, taste). By the end of the course, students will be able to demonstrate understanding of the workings of the above systems from an anatomical and physiological viewpoint.
Outcomes:
Use appropriate terminology to discuss anatomy and physiology; Identify anatomical structures and describe the complex interrelationships between structure and function; Explain how body systems work together to maintain homeostasis; Describe the general structure and function of the integumentary system, the skeletal system, the skeletal muscles, the nervous system, and the special senses and their interactions with each other; Recognize and apply patterns that unify, organize, and simplify the abundant detail of anatomy and physiology

GNUR 157L Human Anatomy and Physiology I Lab (1 Credit Hour)
Co-requisites: GNUR 157 This course is the companion laboratory course for GNUR 157, Anatomy and Physiology I
This course is designed to give students a basic understanding of the structure and function of the major organs and systems of the human body from the cellular to the system level of the integumentary, skeletal, muscle and nervous systems. By the end of the course, students will be able to demonstrate understanding of the workings of the systems from an anatomical and physiological viewpoint.
Outcomes:
Identify anatomical structures using appropriate terminology and describe the complex interrelationships between structure and function of the system level of the integumentary, skeletal, muscle and nervous systems; Use appropriate laboratory tools and techniques to examine anatomical structures and physiological functions; Work collaboratively with peers during lab and communicate results of lab work effectively

GNUR 158 Human Anatomy and Physiology II Theory (3 Credit Hours)
Co-requisites: GNUR 158L The second in a two-part sequence, this course is designed to give students a detailed understanding of the structure of the major organs and systems of the human body from the cellular to the system level
It includes the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems, as well as the concepts of development, metabolism, fluid and electrolyte balance, and acid-base balance. By the end of the course, students will be able to demonstrate understanding of the workings of the above systems from an anatomical and physiological viewpoint.
Outcomes:
Use appropriate terminology to discuss anatomy and physiology; Identify anatomical structures and describe the complex interrelationships between structure and function; Explain how body systems work together to maintain homeostasis; Describe the general structure and function of endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems, as well as the concepts of development, metabolism, fluid and electrolyte balance, and acid-base balance and their interactions with each other; Recognize and apply patterns that unify, organize, and simplify the abundant detail of anatomy and physiology

GNUR 158L Human Anatomy and Physiology II Lab (1 Credit Hour)
Co-requisites: GNUR 158 This course is the companion laboratory course for GNUR 158, Anatomy and Physiology II
This course is designed to give students a basic understanding of the structure and function of the major organs and systems of the human body from the cellular to the system level of the endocrine, cardiovascular, respiratory, digestive, urinary, and reproductive systems. By the end of the course, students will be able to demonstrate understanding of the workings of the systems from an anatomical and physiological viewpoint.
Outcomes:
Identify anatomical structures using appropriate terminology and describe the complex interrelationships between structure and function of the system level of the endocrine, cardiovascular, respiratory, digestive, urinary, and reproductive systems; Use appropriate laboratory tools and techniques to examine anatomical structures or physiological functions; Work collaboratively with peers during lab and communicate results of lab work effectively

GNUR 160 Chemistry for Health Professions (3 Credit Hours)
Introduction to general chemistry and elements of organic chemistry and biochemistry include the review of families of simple organic molecules and simple sugars, the role of enzymes in biochemical reactions, and the metabolism of carbohydrates, proteins, and lipids. Must also enroll in GNUR 160L.
Course equivalencies: GNUR160/CHEM151

GNUR 160L Chemistry for Health Professions Lab (1 Credit Hour)
Companion laboratory course for GNUR 160, Chemistry for Health Professions Must also enroll in GNUR 160.

GNUR 203 Microbiology for Health Professions with Lab (3 Credit Hours)
This course examines basic concepts of microbial metabolism, genetics, and classification in order to understand their effects on human health. Clinically relevant microbial diseases will be explored, with a focus on microbe-human interactions, epidemiology, and methods to control microbes. The course includes a laboratory component designed to complement lecture topics.
Outcomes:
Identify the association between the major groups of microorganisms, the portals of entry and exit of microorganisms that cause disease, and disease processes; Describe the components and functions of the human immune system, the role it plays in protecting the host, and methods that microorganisms use to evade or defeat the immune system; Apply microbial control principles to aseptic technique, antimicrobial treatments, drug resistance, and antibiotic stewardship; Explain the magnitude of the global impact of microbes on human illness, and the factors that hamper effective global public health efforts; Implement microbiological techniques such as isolation of organisms, counting microbial populations, staining, ELISA, and metabolic identification of organisms

GNUR 204 Bridge Course and Nursing Concepts (3 Credit Hours)
This course provides conceptual linkage between student's previous nursing education and clinical experiences to professional nursing. The student's background in liberal arts, science and nursing is used as the basis for exploration of theories that guide contemporary nursing practice and leadership. Historical, cultural and political factors that have shaped contemporary nursing and the U.S. health care system are explored. Emphasis is placed on developing an understanding of scientific problem-solving, by accessing and evaluating data from a variety of sources. Critical thinking skills and the ability to evaluate evidence for practice are stressed.

GNUR 207 Concepts of Professional Nursing Practice (2 Credit Hours)
This course explores nursing concepts for professional nursing practice in the care of individuals, families, communities, and populations, along the health-illness continuum. Content includes client and family- centered care, client teaching, levels of prevention, the determinants of health and illness, and the principles of population- focused and culturally sensitive care. Students are introduced to the historical and political influences of the current US health care delivery system with an emphasis on the issues of health care access, health care disparities, social determinants of health, biases in the healthcare setting, and health literacy among culturally diverse and vulnerable populations.
Outcomes:
1) Describe the role of the professional nurse in health promotion and risk reduction for individuals, families, communities, and populations, with an emphasis on the impact of values, lifestyle, and cultural influences; 2) Understand the cultural basis for health beliefs and practices for individuals, families, communities, and populations; 3) Understand the epidemiological model for diseases, including the levels of prevention and population-based approaches; 4) Explain the structure and function of the US health care delivery system and the impact of these factors on access, quality, and cost of health care; 5) Understand the health goals for the nation identified by Healthy People initiative

GNUR 207A Concepts of Professional Nursing Practice (3 Credit Hours)
This course explores nursing concepts for professional nursing practice in the care of individuals, families, communities, and populations, along the health-illness continuum. Content includes client and family- centered care, client teaching, levels of prevention, the determinants of health and illness, and the principles of population- focused and culturally sensitive care. Students are introduced to the historical and political influences of the current US health care delivery system with an emphasis on the issues of health care access, health care disparities, social determinants of health, biases in the healthcare setting, and health literacy among culturally diverse and vulnerable populations. Restricted to RN-BSN Students Only.
Outcomes:
1) Describe the role of the professional nurse in health promotion and risk reduction for individuals, families, communities, and populations, with an emphasis on the impact of values, lifestyle, and cultural influences; 2) Understand the cultural basis for health beliefs and practices for individuals, families, communities, and populations; 3) Understand the epidemiological model for diseases, including the levels of prevention and population-based approaches; 4) Explain the structure and function of the US health care delivery system and the impact of these factors on access, quality, and cost of health care; 5) Understand the health goals for the nation identified by Healthy People initiative

GNUR 230 Success in Nursing I (1 Credit Hour)
This course is designed to help students to understand and develop the vocabulary and critical thinking skills necessary to increase their success in nursing courses, the nursing program, and the university.
Outcomes:
The student will be able to increase their mathematical, verbal, critical thinking, and study skills; The student will learn to use the nursing process as a problem solving method

GNUR 238 The Foundations of Clinical Practice in Nursing (3 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 155, GNUR 156, and GNUR 160 with a C- or better; Must also enroll in GNUR 238L
This course introduces basic nursing concepts such as critical thinking, the nursing process, physiologic and safety needs of the client, health assessment, and fundamental nursing skills, including safe medication administration. The course prepares students for the role of the professional nurse in the clinical setting.

GNUR 238L Foundations of Clinical Practice in Nursing Lab (1 Credit Hour)
The students will utilize critical thinking skills and the nursing process to apply basic nursing concepts in the performance of health assessment and fundamental nursing skills. The course prepares students for the role of the professional nurse in the clinical setting. Must enroll in GNUR 238.

GNUR 290 Concepts in Older Adult Health (2 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 238, GNUR 293 and GNUR 297 with a C- or better, OR be enrolled in GNUR 238, GNUR 293 and GNUR 297
This course introduces students to the care of older adults. It is designed to explore current concepts and practices pertaining to aging. This course provides an overview of the normal physical, psychological, and social-cultural aspects of the aging process. It addresses health and health alterations of aging and exploration of attitudes toward care of the older adult. Enrollment is restricted to students admitted to the BSN program.

GNUR 293 Pathophysiology (4 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 155, GNUR 156 and GNUR 160 with a C - or better
This course provides the student with knowledge of the basic mechanisms involved in pathophysiological processes.
Outcomes:
The student will be able to use critical thinking skills in the application of pathophysiological processes to clinical practice

GNUR 294 Foundations of Pharmacology (3 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 293, GNUR 203, GNUR 238, GNUR 297 with a C- or better; Must have taken and passed GNUR 238L with a P
This course introduces nursing students to pharmacology and provides them with the foundation needed to administer medications.

GNUR 297 Clinical Nutrition for Nursing Practice (2 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 155, GNUR 156, and GNUR 160 with a C- or better
This course introduces foundations of nutrition for nursing practice. Evidence-based nutrition is applied across the life-span and health continuum. Nutritional assessment, cultural practices and health policies are explored.

GNUR 307 Concepts of Professional Nursing Practice (3 Credit Hours)
This course explores concepts for professional nursing practice. Major course concepts include the social contract with nursing and society, health promotion and risk reduction, social and cultural factors influencing health beliefs and practices, and the relations between theory, research, evidence and practice. Interprofessional competencies within the structure and function of the healthcare system are addressed. This course is for RN-BSN students.
Outcomes:
Upon successful completion of this course, the student is able to: 1) Explain historical, contemporary, cultural, and policy trends that have shaped nursing practice and roles; 2) Relate the mission and values of the Marcella Niehoff School of Nursing to the social contract for professional nursing; 3) Understand the social and cultural basis for health beliefs and practices in individuals, families, communities, and populations; 4) Understand the role of the professional nurse in health promotion and risk reduction; 5) Explain the integration of theory and research into professional nursing practice; 6) Analyze the impact of interprofessional competencies, collaboration skills, and advocacy skills on patient and family centered care; and 7) Analyze the structure and function of the US healthcare system in access, quality, and cost dimensions

GNUR 325 Selected Topics (1-3 Credit Hours)
This course will provide the student with content knowledge specific to particular areas of nursing. Topics may include peer teaching, critical care, emergency, high-risk childbearing families, community health, oncologic, rehabilitation, gerontologic nursing, or comparative health systems including international study.

GNUR 327 Introduction to Spiritual Care (3 Credit Hours)
Spiritual Care is essential to providing quality nursing care. This course is focused on the nurse as integral to the care of the whole person. Historical, theoretical and practical perspectives of providing spiritual care are discussed as well as the nursing process, cultural considerations, therapeutic use of self, and most frequently used nursing interventions related to spiritual care.
Knowledge Area: Tier 2 Theological Knowledge
Outcomes:
Discuss professional mandates for spiritual care; Explain importance of fostering personal spiritual self awareness in caring for spirit of the patient, family and community; Integrate elements of spiritual assessment into overall assessment of a patient; Use prayer to comfort patients; Define suffering and relationship to spiritual care

GNUR 338A Physical Assessment for R.N.s (3 Credit Hours)
Restricted to Graduate Nursing students. This course prepares students to conduct comprehensive health assessments. Students are provided experiential learning opportunities to demonstrate competency in health assessment. Emphasis is placed on the physical, psychological, social, cultural, spiritual, and economic dimensions of health and wellness, and the identification of real and potential patient health and wellness problems.

GNUR 344 Quality and Safety (3 Credit Hours)
This course focuses on quality and safety in healthcare. Historical and contemporary trends in quality and safety are addressed and major initiatives for quality and safety in healthcare are examined. The course is structured around the knowledge, skills, and attitudes of the Quality and Safety Education for Nurses initiative. This course is for RN-BSN students.
Outcomes:
1) Understand historical forces and events shaping quality and safety initiatives in health care; 2) Differentiate between quality and safety in healthcare and professional nursing practice; 3) Relate key knowledge, skills, and attitudes of patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics to the contemporary health care system and professional nursing practice; 4) Understand the dimensions of patient-centered care and the factors influencing those dimensions; 5) Analyze the effectiveness of interprofessional teams; 6) Relate informatics and evidence-based practice to quality and safety for individuals, groups, communities, and populations; 7) Apply tools and processes in quality and safety initiatives

GNUR 356 Nursing Informatics (3 Credit Hours)
This course provides an introduction to nursing informatics, involving the integration of nursing, health, computer, and information science, in the support of professional nursing practice. The effective use of technology in aspects of health care deliver are explored. Information retrieval, management, and evaluation strategies are emphasized. Legal and ethical principles and standards are applied to the use of information and technology in professional nursing practice. This course is for RN-BSN students.
Outcomes:
Upon the successful completion of this course, the student is able to: 1) Analyze web-based health content resources; 2) Describe the clinician role in the design, selection, implementation, and evaluation of healthcare applications and systems; 3) Apply selection, retrieval, and evaluation strategies in the use of data relevant for patient care; 4) Relate nursing and healthcare informatics competencies to effective nursing practice; 5) Explain the data-driven healthcare culture; 6) Apply ethical and legal principles in the use of information and technologies for professional nursing practice

GNUR 360 Nursing Research: For Evidence-Based Practice (3 Credit Hours)
Pre-requisites: Must have taken and passed PSYC 304 or STAT 103 with a C- or better
This course provides basic knowledge regarding the research process and the importance of evidence-based nursing practices. Students learn to analyze how evidence is generated to make clinical judgments that inform practice in a variety of settings.
Course equivalencies: GNUR350/GNUR3660

GNUR 361 Nursing Ethics (3 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 360, MSN 277, MSN 277L, GNUR 294, GNUR 290 with a C- or better
This course offers students, as future health care professionals and as health care recipients, opportunities to think philosophically, demonstrate ethical awareness, do ethical reflection, and apply ethical principles in decision-making.
Outcomes:
The student will be able to recognize and respond to ethical challenges inherent in the delivery of health care to individuals with differing philosophical views and diverse backgrounds providing reasoned arguments for views held/positions taken

GNUR 363 Healthcare Transitions (3 Credit Hours)
Patients pass between health care settings, levels of care, health care providers, and their homes and the communities where they live. These transitions require high degrees of care coordination and management to ensure continuity across settings, providers, and levels. This course examines coordination of care and management of transitions across settings, providers, and levels. Models and frameworks of transition and care coordination will be examined, along with the contemporary research in care coordination and transition management. The professional nurse's role in care coordination and transition management in health will be a focus of the course. This course is for RN-BSN students.
Outcomes:
Upon successful completion of the course, the student has the ability to: 1) Understand models and frameworks association with health care transitions and care coordination; 2) Analyze research findings related to care coordination and transition management in health care; 3) Understand facilitators and barriers for effective care coordination and transition management; 4) Describe the role of information, informatics, and technology for enhancing care coordination and transition management; 5) Understand patient, clinician, caregiver, and institutional outcomes associated with successful care coordination and transition management

GNUR 383 Leadership for Professional Nursing Practice (3 Credit Hours)
Pre-requisites: Must have taken and passed MCN 273, MCN 374, CMAN 272, CMAN 380, GNUR 360 with a C- or better , OR MCN 273L, MCN374L, CMAN 272L, CMAN 380L with a P
This course prepares the student to provide leadership in the practice setting and profession. Personal identity and role as nurse leader is addressed from unit-based to organizational and policy environments. Principles of leadership are developed and applied in clinical settings. Legal, regulatory and professional standards related to nursing practice are presented.

GNUR 384 Clinical Role Transition (3 Credit Hours)
Pre-requisites: Must have taken and passed MCN 273, MCN 374, CMAN 272, CMAN 380, GNUR 360,with a C- or better; Must have taken and passed MCN 273L, MCN 374L, CMAN 272L, and CMAN 380L with a P; Must also enroll in GNUR 383
Through preceptor-based learning and seminars, this experience focuses on assimilating the role behaviors of a professional nurse as a provider, designer, manager, and coordinator of care in health care systems, and a member of a profession. Clinical reasoning, critical thinking, prioritization, and the integration of knowledge are emphasized in this experience, focusing on the provision of patient-centered, evidence-based care as a member of an interprofessional health care team.
This course satisfies the Engaged Learning requirement.
Outcomes:
Upon successful completion of this course, the student is able to: 1) Incorporate standards of practice into the development, implementation, and evaluation of evidence-based, patient-centered care; 2) Apply principles of quality and safety in patient care settings; 3) Apply knowledge of prioritization and delegation in the management of care; 4) Collaborate with patients, families, and members of the interprofessional health care team in the design, delivery, and evaluation of evidence-based, patient-centered care; 5) Exemplify role behaviors consistent with a member of a profession; 6) Incorporate ethical, legal, regulatory, financial, and economic considerations into the design, delivery, management, and evaluation of care

GNUR 390 Integrative Clinical Practicum (0 Credit Hours)
This clinical practicum experience provides opportunities for the student to integrate theoretical knowledge into the role behaviors of the professional nurse as a designer, provider, manager, and coordinator of care in health care systems and the community. This course is for RN-BSN students.
Outcomes:
1) Incorporate standards of practice and professional performance into the design, implementation, and evaluation of evidence-based care strategies; 2) Apply principles of quality and safety in enacting the role of the professional nurse; 3) Collaborate with recipients of care, the interprofessional team, and community resources in the design, delivery, and evaluation of evidence-based, client centered, care strategies; 4) Exemplify the role behaviors consistent with membership in the profession of nursing; 5) Incorporate ethical, legal, regulatory, financial, and economic considerations into the design, implementation, management, and evaluation of evidence-based care initiatives

GNUR 399 Independent Study (1-5 Credit Hours)
Requires approval of Associate Dean Academic Programs in Nursing.

GNUR 402 Ethics for Health Professionals (2 Credit Hours)
In their various roles and practice settings, health care professionals participate in the unfolding stories of patients/clients and their families. They encounter ethical questions, concerns, problems and dilemmas in the course of their professional lives. These challenges affect health care professionals as independent and collaborative decision makers as well as members of the health care team who may be called upon to implement the decisions of others. This course provides students with opportunities to explore the impact of ethical issues on their personal and professional lives. Individual, family, institutional and societal issues are discussed. Students are guided in the application of frameworks that aid in resolving ethical dilemmas in professional practice. Emphasis is placed on developing skills in reflective moral thinking.

GNUR 404 Theories & Concepts for Advanced Clinical Practice (3 Credit Hours)
This course focuses on the development and use of disciplinary knowledge as a foundation for advanced nursing practice. Basic philosophical assumptions and the history of knowledge development in nursing are presented. The relation between concepts, theory, research, and practice are emphasized, with a focus on concepts and middle-range theories that are applied in advanced nursing practice.
Outcomes:
Upon successful completion of the course the student will be able to: 1) Understand the history and driving forces for knowledge development in nursing; 2) Describe the philosophical foundations of nursing and advanced nursing practice; 3) Understand the levels of theory development in nursing; 4) Explain the use of selected concepts and middle-range theories to guide advanced nursing practice; 5) Analyze concepts and theories for use in nursing practice; 6) Analyze the relation between theory, research, and nursing practice

GNUR 405 Introductory Statistics for Healthcare Professionals (3 Credit Hours)
Pre-requisites: Restricted to MSN, DNP, and PhD Nursing students
This course is focused on facilitating student acquisition of the knowledge and skills that will enable them to manage basic statistical issues that confront practitioners and researchers in health professions. Course topics and experiences will prepare students to interpret findings from published research and quality improvement reports and to conduct basic data analysis in future projects.
Outcomes:
1) Define basic statistical concepts; 2) Differentiate descriptive and inferential statistical tests; 3) Describe the purpose and appropriate application of statistical techniques; 4) Interpret the meaning of statistical tests; 5) Manage and analyze data using statistical software

GNUR 407 Social Justice and Ethics in Health Care (3 Credit Hours)
This course examines social justice, ethics, and nursing advocacy in healthcare at global, national, and local levels for the doctorally prepared nurse. Social justice and ethical issues in healthcare are analyzed using established theories and frameworks. Recommendations for resolution of social justice and ethical issues will be addressed.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Understand the historical, cultural, economic, and political theories and perspectives of social justice and ethics; 2) Analyze social justice and ethical issues at local, national, and global levels; 3) Apply professional codes to individual and interwoven issues of social justice, ethics and leadership; 4) Develop a plan to address population health inequities, based on evidence, codes and principles

GNUR 408 Research for Advanced Clinical Practice (3 Credit Hours)
Pre-requisites: Admission to a Master of Science in Dietetics or Master of Science in Nursing program
This course prepares students to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices and protocols form the foundation health care practice. The importance of translation of scientific evidence to improve practice is emphasized.
Outcomes:
Conceptualize an evidence-based protocol or pilot research study that corresponds to a clinical, educational administrative or policy issue or problem

GNUR 409 Advanced Health Assessment Lecture and Lab (3 Credit Hours)
This course prepares graduate nursing students to obtain a complete and accurate health database, including history, physical examination, and laboratory components, as a foundation for advanced nursing practice. Building upon previously acquired assessment skills, the focus is on the critical skills of obtaining a meaningful history and integrating it with physical findings to begin to develop a problem list.

GNUR 413 Advanced Pharmacology (3 Credit Hours)
This course will be the foundation for the advanced practice nurse to make appropriate decisions regarding the pharmacological management of patients in clinical practice. Pharmacological principles, including pharmacokinetics, pharmacodynamics, mechanisms of adverse drug reactions, and contraindications will be discussed. Legal requirements for writing prescriptions and the format for prescriptions as well as common sources of medication errors and methods to prevent them will be described. Developmental considerations, socioeconomic status, and complementary therapies will be addressed throughout the course. Pharmacotherapy of selected common disorders will be addressed. Students will synthesize and integrate diverse viewpoints, principles, and selected research findings related to the complex needs of patients via case study analyses. This course, along with clinical courses, will prepare the advanced practice nurse for prescriptive authority.

GNUR 420 Leadership and Roles in Advanced Nursing Practice (3 Credit Hours)
This course focuses on leadership concepts and theories with emphasis on application for transformation in healthcare. This course is designed to assist the student to enter into leadership and advanced nursing practice roles. Special emphasis is placed on the student's personal and professional development as a leader with a clear, individual vision for impacting the health of specific populations.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Synthesize knowledge of the concept of role and its components as they relate to advanced nursing practice; 2) Understand role expectations of advanced nursing practice and its major components: advanced practitioner (NP, CNS, CNM, CRNA), consultant, change agent, case manager, educator, researcher and leader and how they are integrated into health systems; 3) Articulate the role of the graduate prepared nurse as a clinical nurse expert, leader and innovator in healthcare; 4) Analyze knowledge of leadership theories for use as a foundation for role enactment as a leader in healthcare; 5) Understand principles of systems theory and their application to the clinical environment; 6) Compare models for change and sustainability consistent with current healthcare system dynamics; 7) Identify actionable leadership opportunities to improve nursing practice and patient outcomes; 8) Understand the potential for information systems to support decision making and innovation in practice and care delivery systems

GNUR 425 Advanced Health Assessment Across the LifeSpan (4 Credit Hours)
This course will prepare the graduate-level nursing student to generate a patient health database, including history and physical examination to inform clinical decision making and health promotion, across the lifespan. The course includes lecture and laboratory components.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Obtain comprehensive and problem-focused health histories including nutritional, cultural, social, functional, and developmental components; 2) Document comprehensive and problem focused health histories; 3) Perform comprehensive and problem-focused physical .examinations; 4) Differentiate normal and abnormal physical, behavioral, and developmental findings; 5) Develop a client problem list based on that patient's health history, and physical examination; 6) Plan anticipatory guidance and health promotion based on age, developmental level and cultural background

GNUR 432 Philosophy of Science (3 Credit Hours)
This course addresses the history and philosophy of science and the influence on nursing knowledge and the rapidly evolving nature of nursing science. This course includes the exploration of a diverse range of historical and contemporary influences of epistemological perspectives of the nature of knowledge and patterns and/or processes of knowing. An evolutionary lens is used to examine the history, philosophical foundations, and associated purpose, and methods of science as a foundation for nursing science.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Describe philosophies of science within historical contexts; 2) Discuss how the nature of knowledge relates to philosophy of science; 3) Analyze how different philosophies of science provide a foundation for nursing knowledge development and discovery; 4) Analyze the association between epistemological and philosophy of science foundations that guide scientific methods

GNUR 436 Psychiatric Mental Health Assessment Across the Lifespan (2 Credit Hours)
Pre-requisites: GNUR 425 Advanced Health Assessment Across the Lifespan
This course focuses on the major principles and skills to conduct a psychiatric mental health assessment across the lifespan. Clinical interviewing skills, eliciting important information, and developing a therapeutic rapport with patients and families are foundational knowledge and skills. Students will learn components of the psychiatric evaluation, including psychiatric review of symptoms and mental status examination, and the development of differential diagnoses and diagnostic formulation. Integrating laboratory findings and medical history into the psychiatric evaluation and utilizing evidence-based clinical practice guidelines will be emphasized. This course will also incorporate theories and practice of diversity and inclusion as it relates to the biopsychosocial and cultural understanding of mental illness.
Outcomes:
At the successful completion of the course, students will be able to: 1) Elicit a comprehensive psychiatric health history and mental health assessment; 2) Distinguish assessment features, interviewing techniques, and legal/ethical aspects for children, adolescents, older or cognitively-impaired adults, and other special populations; 3) Integrate medical history and laboratory findings into differential diagnoses and diagnostic formulation; 4) Apply critical thinking skills and diagnostic reasoning with the use of evidence-based clinical practice guidelines across the lifespan; 5) Identify risk and protective factors, vulnerability, and areas of mental health resilience for patients, families, and communities

GNUR 440 Systematic Inquiry I: Scholarly Writing (2 Credit Hours)
This course focuses on types and styles of academic and scholarly writing. Students learn and apply elements of a rhetorical situation in the production of written work. Style and formatting considerations of scholarly writing are integrated into the drafting and revision of various forms of written work. Experiences with editing, peer-evaluation, and self-evaluation are integrated into the course, along with responding to substantive feedback in the revision of written work. Upon successful completion of this course, the student will be able to:
Outcomes:
1) Compare different genres of academic and scholarly writing styles and products; 2) Apply elements of style and grammar to scholarly writing; 3) Integrate components of a rhetorical situation into logical, focused, and coherent written works; 4) Engage in self and peer critique of written work; 5) Respond to substantive critiques of written work

GNUR 442 Advanced Physiology/Pathophysiology (3 Credit Hours)
This course presents contemporary principles of physiology that underlie the normal function of the human body and serve as a basis for clinical practice in a variety of settings. The content is taught within the context of key molecular processes, cellular and organ system function, and interactions among organ systems. Select clinical cases and exemplars are used to illustrate physiologic concepts and to facilitate the application of physiologic principles to understand the body's homeostatic processes in health and disease. Emphasis is on normal physiology but approaches are used to bridge physiological science with clinical application to common clinical disorders. The educational experience consists of three hours of classroom or on-line instruction per week, independent readings, case analyses, web-based applications, and classroom and/or course platform-supported discussion.

GNUR 451 Psychopharmacology Across the Lifespan (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course focuses on the development of psychopharmacologic knowledge, critical thinking, and clinical judgment in the application of psychotropic medications to treat and manage psychiatric mental health conditions across the lifespan. Emphasis is on the neurobiological underpinning of psychopathology, pharmacodynamics, and pharmacokinetics of psychotropic medications. Students will learn the general principles of psychopharmacologic treatment, major psychotropic drug classes, and the ethical, legal, and professional guidelines for prescribing as an advanced practice nurse.
Outcomes:
At the successful completion of the course, students will be able to: 1) Understand the neurobiological processes related to the psychopharmacological treatment of psychiatric mental health disorders across the lifespan; 2) Differentiate between the major classes of psychopharmacologic medications in terms of pharmacokinetics, pharmacogenomics, pharmacotherapeutic value, and pharmacodynamics; 3) Apply critical thinking and clinical judgment when selecting appropriate psychotropic medications for patients, including: indication for use, diagnostic reasoning, medication and family history, dosing regimens, side effects, drug interactions, contraindications, and therapeutic drug monitoring; 4) Distinguish the management of psychotropic medications across the developmental lifespan, including children, adolescents, adults and older adults, and for patients with psychiatric comorbidities, substance use disorders, and other acute or chronic medical illnesses; 5) Evaluate therapeutic outcomes of psychopharmacological intervention using evidence-based prescribing guidelines, standard monitoring methodologies, psychological tools sensitive to medication changes, and other recommended laboratory testing; 6) Understand the legal, ethical, socio-cultural, and economic considerations when prescribing psychotropic medications across the lifespan

GNUR 455 Scholarly Writing (1 Credit Hour)
This course provides the opportunity for graduate students to further develop their scholarly writing skills. Research tools, publication ethics, literature reviews, academic writing, scientific research reports, submission strategies and etiquette, and alternative disciplinary genres will be explored.
Outcomes:
Develop individual strategies for reading, generating, revising, editing, and proofreading scholarly writing; Recognize, discuss, and demonstrate dynamics of effective literature reviews, scientific research reports and proposals

GNUR 456 Psychotherapeutics Individuals Groups Families (3 Credit Hours)

Pre-requisites: Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I

This course focuses on the theoretical underpinnings and professional practice of integrating and evaluating psychotherapeutic modalities into advanced practice psychiatric nursing care with individuals, groups, and families. Using the principles of psychotherapy, students will learn the skills to develop strong therapeutic relationships to enhance mental health treatment, strengthen mental health resilience, and improve psychiatric outcomes. Emphasis will be on patient and family-centered care, which integrates socio-cultural perspectives of mental health and illness, treatment preferences, ethics and values, and legal or economic considerations.

Outcomes:

At the successful completion of the course, students will be able to: 1) Synthesize theories, ideological approaches, and methods for psychotherapeutic intervention as a basis for individual, family, and group therapy; 2) Understand how psychotherapeutic modalities, such as cognitive-behavioral, humanistic, and integrative-holistic therapies, are recommended based on age and developmental level, psychiatric condition, evidence-based practice, and patient-family preferences; 3) Apply clinical judgment, critical thinking, and decision making when integrating principles and techniques of psychotherapy into care; 4) Assess socio-cultural and spiritual perspectives of individuals, groups, and families and incorporate values into care; 5) Evaluate psychotherapeutic approach based on patient or family response, research and practice evidence, and changes in health policy; 6) Integrate legal, ethical, economic, and professional standards to the practice of psychotherapy

GNUR 461 Health Policy Issues (1 Credit Hour)

This course will introduce graduate nursing students to general health policy with a clinical approach. The focus of study in this course is to look at health policy as well as individual patients and caregivers and how they interact with each other and with the overall health systems. Health policy affects the patients we see on a daily basis, and the finances of health in the United States influences the care that is offered depending upon public or private health care funding. This course content will help bridge the gap separating the micro-world of individual patient and the macro universe of health policy.

GNUR 462 Health Care Financing (1 Credit Hour)

This course introduces concepts of economics and financial management for health care professionals. Course content includes principles of economics, fundamentals of managed care, and health reform, budgets and budget preparation, financial analysis, preparation of business plans, and health program grant proposals, and issues relevant to international settings and future trends.

GNUR 463 Cancer Genomics (3 Credit Hours)

This course uses a case-based learning process to examine the genetic basis for cancer disease, common cancer genetic syndromes, relative risk assessments, screening and surveillance guidelines, and the educational and management needs of clients and their families related to genetic predisposition to cancer. The emphasis is on the role of the advanced practice nurse.

Outcomes:

Upon completion of this course the student will be able to: 1) Describe the structure of DNA and differentiate among the various forms of genetic inheritance; 2) Describe the cancer burden in United States and how the science of genetics will assist with cancer control; 3) Explain oncogenesis, and function of oncogenes and tumor suppressor genes; 4) Obtain a genetics family history, and make a preliminary assessment of risk for genetic predisposition for cancer and the need for referral for further a genetic work-up; 5) Develop a basic level of skill in communicating information regarding cancer predisposition with sensitivity to the culture and the educational level of the clients and their families; 6) Analyze the cancer risk associated with common genetic cancer syndromes, the criteria for genetic screening and surveillance, and the genetic therapies available to date; 7) Analyze and apply current and future applications of genomics to cancer care

GNUR 471 Palliative Care (2 Credit Hours)

This course is designed to provide the student with an overview of the philosophy and principles of palliative care; the course emphasizes the unique knowledge that describes, explains, and guides the provision of hospice and palliative care. Students consider a holistic approach to care, including state-of-the-art nursing interventions that provide effective pain and symptom management and promote psychosocial and spiritual well-being. Students are prepared to serve diverse client populations whose diseases are life-threatening, and to perform effectively as members of an interdisciplinary team providing palliative care.

GNUR 472 Psychiatric Mental Health Advanced Practice Across Lifespan I (3 Credit Hours)
Pre-requisites: GNUR 436 Psychiatric Mental Health Assessment Across the Lifespan
This course focuses on the neuroscientific understanding of psychiatric mental health disorders, which includes current evidence in genetics, biochemistry, neuropsychiatry, and behavioral neurology. Students will learn the DSM-5 classification for mental disorders, including etiology, development and course, risk and prognostic factors, diagnostic criteria, differential diagnoses, and cultural considerations. Major categories of mental disorders examined in this course are: psychosis and schizophrenia, depression and other mood disorders, anxiety disorders, trauma and stressor-related disorders, attention-deficit hyperactivity disorder, and substance use disorders. Evidence-based treatment recommendations for psychiatric disorders will be addressed across the developmental lifespan and expanded within psychopharmacology and psychotherapeutic modalities courses. Socio-cultural and ethical implications of the psychiatric mental health diagnosis also will be discussed.
Outcomes:
At the successful completion of the course, students will be able to: Synthesize neuroscientific evidence for the assessment, diagnosis and treatment of children, adolescents, adults, and older adults with psychiatric mental health disorders; Explain psychiatric mental health diagnoses with an understanding of current brain and behavioral research which emphasizes neurotransmitters, neural circuitry and brain regions, psychiatric symptomology, human behavior, and neuroplasticity; Apply critical thinking, diagnostic reasoning, and clinical judgment to the assessment, diagnosis, treatment, and evaluation of psychiatric mental health disorders across the lifespan; Implement the use of psychological tools and rating scales to strengthen diagnostic certainty, collect subjective and objective data, measure progress, and evaluate treatment outcomes; Examine the socio-cultural and ethical implications associated with the psychiatric mental health diagnosis

GNUR 474 Psychiatric Mental Health Advanced Practice Across Lifespan II (3 Credit Hours)
Pre-requisites: GNUR 472 Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course builds on the knowledge base, diagnostic reasoning, and critical thinking competencies developed in Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I. This course continues the neuroscientific understanding of psychiatric mental health disorders and DSM-5 classification - for additional categories of illness, including autism and other neurodevelopmental disorders, eating disorders, dementia and delirium, sleep disorders, suicidality, and personality disorders. Evidence-based treatment recommendations for psychiatric disorders will be addressed across the lifespan and expanded within psychopharmacology and psychotherapeutic modalities courses. In addition, emphasis on the bio-social-cultural understanding of mental health and illness will continue to be explored with special consideration to vulnerable groups.
Outcomes:
At the successful completion of the course, students will be able to: 1) Synthesize neuroscientific evidence on the assessment, diagnosis and treatment of children, adolescents, adults, and older adults with psychiatric mental health disorders; 2) Explain psychiatric mental health diagnoses with an understanding of current brain and behavioral research which emphasizes neurotransmitters, neural circuitry and brain regions, psychiatric symptomology, human behavior, and neuroplasticity; 3) Apply critical thinking, diagnostic reasoning, and clinical judgment into the assessment, diagnosis, treatment, and evaluation of psychiatric mental health disorders across the lifespan; 4) Develop treatment recommendations and care plans that incorporate the perspectives, cultures, and values of patients and families with consideration to safety, environmental context, and professional ethics; 5) Explain the complex socio-cultural, ethical, political, and economic context for psychiatric diagnosis, mental health care, and mental health policy within the US; 6) Examine the impact of policy changes and advocacy efforts for special or vulnerable populations within psychiatric mental health care and treatment

GNUR 476 Basic Diagnostics for Advanced Practice (2 Credit Hours)
Pre-requisites: Advanced Health Assessment, Advanced Pathophysiology, Advanced Pharmacology
The focus of this course is on clinical decision making for selecting and interpreting diagnostic tests. Students will use evidence to appropriately gather, interpret, and manage objective diagnostic clinical data to manage various health problems across the lifespan.
Outcomes:
1) Select appropriate diagnostic tests for conditions commonly seen by advanced practice nurses; 2) Evaluate diagnostic tests selection, based on health assessment data, clinical signs and symptoms, cost, risk/benefit analysis; 3) Interpret diagnostic test results for clinical decision making

GNUR 482 Psychiatric Mental Health Advanced Practice Nursing Practicum (2-3 Credit Hours)
Pre-requisites: GNUR 472 Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
The practicum course guides the development and transition of students to the advanced practice psychiatric nurse practitioner role. Synthesizing knowledge and experience gained from previous courses, the practicum helps students advance their proficiency and skills in caring for patients with acute, chronic, and complex psychiatric mental health problems. With understanding of various psychiatric mental health settings and levels of care, students in the practicum experience will apply their knowledge and synthesis of content with patients, families, and communities across the lifespan. Emphasis will be on the assessment, diagnosis, treatment, and care coordination of psychiatric mental health disorders. Students are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent within their population and specialty practice.
Outcomes:
At the successful completion of the course, students will be able to: 1) Elicit and document a comprehensive psychiatric history and mental health assessment with consideration for level of care and treatment setting; 2) Generate differential diagnoses, problem list, and diagnostic formulation after synthesizing and evaluating objective and subjective data from patients, families, and other informants; 3) Develop an evidence-based treatment plan based on psychiatric diagnosis and presentation, knowledge of psychopharmacology and psychotherapeutic approaches, respect for persons, and consideration to special or vulnerable groups; 4) Apply critical thinking, clinical judgment, and decision making when implementing treatment recommendations and evaluating strategies within mental health care plans; 5) Understand the importance of coordinated care for children, adolescents, adults, and older adults with consideration to legal, ethical, and social aspects to care; 6) Implement preventive psychiatric mental health care for populations across the lifespan, which includes health and wellness programs, mental health screening, psychoeducation, counseling and therapeutic services, and integrative and holistic approaches

GNUR 498 Independent Study (1-6 Credit Hours)
Directed study in a specific topic area under the supervision of a faculty member.

GNUR 499 Interprofessional Team Practicum (1-7 Credit Hours)
Consent of discipline Program Director in collaboration with course faculty is required for registration. This course provides opportunities to students with backgrounds in a variety of clinical disciplines to engage in interprofessional team projects in healthcare settings and health and human service organizations, and to develop interprofessional competencies and project management skills.
Outcomes:
Apply knowledge of selected concepts, models, and theories from the clinical and management sciences to the management of high performing teams; apply evidence based/research findings for a selected problem/project; and examine the leader role within an interprofessional team environment

GNUR 500 Phenomena and Theories for Nursing Science I (2 Credit Hours)
This course emphasizes methods to analyze and develop knowledge of a phenomenon that is relevant to nursing science. Traditional and advanced methods of concept analysis and development are explored and critiqued for the advancement of nursing knowledge and nursing science. Fieldwork experiences for developing and refining a phenomenon of interest are included in the course.
Outcomes:
Upon successful completion of the course, the student is able to: 1) Evaluate existing and emerging concept development and analysis methods in developing substantive knowledge of a phenomenon; 2) Differentiate between disciplinary and professional knowledge of a phenomenon of interest; 3) Analyze the theoretical-conceptual-empirical structure of a phenomenon; 4) Compare extant and sensitizing conceptualizations of phenomenon

GNUR 501 Phenomena and Theories for Nursing Science II (2 Credit Hours)
This course is focused on the role of theory in the development of nursing knowledge. Emphasis is placed on strategies for theory development and evaluation in the generation and advancement of nursing science. Levels of theory on a continuum spanning grand theory to middle range theory are examined for utility in nursing science. The relation between theory and the substantive structure of nursing is examined.
Outcomes:
Upon successful completion to this course, the student is able to: 1) Relate the domain and perspective of the substantive structure of nursing to nursing theory and nursing science; 2) Analyze levels of theory, nursing theory, and theory development; 3) Apply theory analysis, theory synthesis, and theory derivation strategies; 4) Evaluate the logical and conceptual structure of theory and nursing theory

GNUR 504 Emergency and Acute Care Procedures for the NP (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to provide the nurse practitioner student with the knowledge and skills necessary to affect patient care outcomes in emergency settings. This course will incorporate procedural skills necessary to meet clinical competencies of the emergency nurse practitioner. Diagnostic and therapeutic procedures used in the evaluation and management of patients with emergent conditions will be incorporated.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Recognize the importance of patient education and informed consent prior to performing procedures; 2) Synthesize knowledge of anatomy, pathophysiology and procedural methods for select interventions; 3) Incorporate understanding of indications, contraindications, and anticipated outcomes in clinical decision-making related to select procedures; 4) Demonstrate beginning skills in the execution of select diagnostic and therapeutic procedures in a procedural lab

GNUR 508 The Nurse Scientist Role (2 Credit Hours)
This course addresses the responsibilities and activities of a nurse scientist including the responsible conduct of research and ethical practice; scientific freedom and social responsibility; collaboration and negotiation; and the peer review process. The development of a program of research and research career trajectory including research funding and dissemination of research are examined. Students will identify traditional and emerging settings for the nurse scientist. The course explores knowledge and skills required to successfully work in teams within the local and global scientific community. The role expectation of the nurse scientist related to intra-professional and interprofessional research and mentorship are examined.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Analyze the qualifications, attributes, professional values, and ethics of a nurse scientist; 2) Identify career trajectory options of a nurse scientist; 3) Analyze stewardship of the nursing discipline within intra- and interprofessional teams

GNUR 509 Teaching Methods (3 Credit Hours)
This course focuses on teaching and learning theories, principles, and practices in nursing education. Major topic areas include philosophies and theories of teaching and learning, teaching and learning processes and resources, curricular and program designs and frameworks, competency development and assessment, evaluation and measurements strategies, the faculty role, and regulatory issues.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain philosophies, theories and principles of teaching and learning; 2) Evaluate curricular design and implementation; 3) Analyze evaluation and measurement strategies in nursing education; 4) Discuss expectations of the faculty role; 5) Articulate the relationship among educational setting, teaching methods, and learner outcomes; 6) Evaluate education and nursing education research literature for implementation in practice

GNUR 510 Teaching Practicum (3 Credit Hours)
This practicum course provides students with a context for applying the concepts of teaching and learning in nursing education. Students will experience various dimensions of the teaching role and design, deliver and evaluate teaching/learning strategies. The practicum consists of supervised experiences with assigned faculty mentor(s) in varied teaching/learning environments.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Assess the learning needs and learning styles of learners; 2) Apply effective teaching in a selected area of nursing; 3) Apply principles of evaluation in formative and summative evaluations of the learners

GNUR 512 Quantitative Methods & Design for Nursing Research (3 Credit Hours)
This course focuses on quantitative research methods and designs for nursing research. The linkages between theory, concepts, research design, instrumentation, sampling, data collection and analysis, and reporting are emphasized. Ethical concerns related to the research process are discussed and analyzed. Students will gain practical experiences in quantitative research methods.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Evaluate and synthesize quantitative research studies and identify gaps for future quantitative research; 2) Identify theoretical or conceptual frameworks that guide research; 3) Develop research aims to address gaps in knowledge; 4) Understand conceptual-operational linkages in quantitative nursing research; 5) Assess the adequacy of quantitative designs in answering research questions; 6) Identify ethical concerns of quantitative research and the protection of human subjects; 7) Apply knowledge and skills related to conducting a quantitative research study

GNUR 513 Qualitative Methods in Nursing Research (3 Credit Hours)
This course focuses on exploration of qualitative research approaches including grounded theory, ethnography, phenomenology, narrative, case study, and pragmatic approaches such as qualitative description. Discussion will include a focus on epistemology, ontology, methods, strategies, data collection, analysis, and dissemination of results. Ethical and special concerns of qualitative research are emphasized.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain the significance of qualitative research methods for the development of nursing and interdisciplinary science; 2) Explain the relationship between theoretical and philosophical foundations and assumptions of qualitative research methods; 3) Compare qualitative research designs including background, purpose, research; 4) Develop basic skills in qualitative data collection and analysis; 5) Analyze ethical issues related to qualitative research and the protection of human subjects

GNUR 514 Common Health Problems of Adults/Older Adults (3 Credit Hours)
One course of a three-course sequence, GNUR 514 is designed to prepare the Nurse Practitioner to assume responsibility for coordination and management of adult/older adult health care. A major focus of the course is to prepare the student to assess and manage selected common health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the management of care of adults experiencing common health problems.

GNUR 517 APN Practicum: Primary Health Care (1-6 Credit Hours)
Pre-requisites: Minimum grade of B- in GNUR 413, GNUR 425, & GNUR 442
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of Nurse Practitioner in primary care. During each practicum, the student will care for patients progressing in complexity from health promotion and disease prevention to assessment and management of the most common acute, chronic, and complex health problems. The student's level of performance is expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent. Clinical seminars will include discussion of concepts introduced in previous courses with application to clinical practice. Seminars will include student and faculty-led discussions, case reviews, and guest speakers.

GNUR 518L First Semester Student Standardized Patient Lab (0 Credit Hours)
This one-day seminar focuses on helping the primary care nurse practitioner student prepare for the first clinical practicum. The seminar includes a standardized patient experience.

GNUR 519 Measurement for Nursing Research (3 Credit Hours)
This course focuses on principles and concepts of measurement in nursing research. Psychometric theory, measurement frameworks and instrument development, critique, and testing are addressed. Methods for generating and evaluating reliability and validity evidence are emphasized and operationalized. Ethical concerns related to the development and use of measuring instruments are examined.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Understand key principles and concepts of psychometric theory and measurement frameworks; 2) Differentiate between reliability and validity as evidence to support the use of a measure; 3) Apply statistical techniques in the generation of reliability and validity evidence; 4) Evaluate the suitability of measuring instruments for use in nursing research; 5) Understand principles and approaches to instrument development and testing; 6) Understand ethical issues related to instrument development, testing, and usage

GNUR 520 Systematic Inq II: Reviewing & Synthesizing Lit (2 Credit Hours)
This course focuses on learning and applying the process of systematic inquiry as a method to identify the state of science of a substantive area, gaps in the literature, and implications for nursing. Students learn how to search, organize and analyze the literature, synthesize and report the findings.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Define systematic inquiry and its relationship to research; 2) Distinguish among different types of literature syntheses; 3) Apply the process of systematic inquiry to a select topic; 4) Apply tools, methods and techniques for organizing literature; 5) Utilize appropriate standardized guidelines when reporting a literature review

GNUR 521 Population-Focused Health (3 Credit Hours)
This course is designed to assist students with identifying, analyzing, and evaluating health issues confronting the doctorally prepared nurse in the provision of population-focused health care. Epidemiologic concepts and databases will be covered in the context of population needs assessments. Evidence-based interventions that address health disparities will be examined.
Outcomes:
1) Analyze the role of federal, state, and local governments in population health; 2) Assess population specific health needs using Healthy People and the determinants of health as frameworks; 3) Examine the role of the World Health Organization and non-governmental organizations in population health; 4) Analyze health disparities and needs of priority populations using databases; 5) Apply epidemiologic concepts when completing a population needs assessment; 6) Examine evidence-based interventions for population specific health issues

GNUR 522 Emergency Health Care of Adults (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to provide the nurse practitioner student with the knowledge and skills necessary to affect patient care outcomes in emergency settings. This course will incorporate procedural skills necessary to meet clinical competencies of the emergency nurse practitioner. Diagnostic and therapeutic procedures used in the evaluation and management of patients with emergent conditions will be incorporated.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Recognize the importance of patient education and informed consent prior to performing procedures; 2) Synthesize knowledge of anatomy, pathophysiology and procedural methods for select interventions; 3) Incorporate understanding of indications, contraindications, and anticipated outcomes in clinical decision-making related to select procedures; 4) Demonstrate beginning skills in the execution of select diagnostic and therapeutic procedures in a procedural lab

GNUR 523 Health Care Policy and Economics (3 Credit Hours)
Course content provides the student with advanced policy, economic and financial knowledge, frameworks and skills required to assume a leadership role in healthcare. An emphasis is placed on using evidence to develop an understanding of key relationships between political, economic and financial dimensions in healthcare and how these relationships affect a selected population of interest.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Evaluate the influences of policy on health care delivery at institutional, local, state, national or global levels; 2) Analyze the effects of health policy; 3) Analyze the effects of economic factors on health care decision making; 4) Apply strategies for assessing costs, maximizing productivity, and achieving quality outcomes in evidence-based practice and/or research; 5) Design practice improvement recommendations that account for policy, economic and financial variables affecting selected populations

GNUR 524 Advanced Reproductive and Sexual Health (3 Credit Hours)
Pre-requisites: GNUR 442 Advanced Physiology; GNUR 413: Advanced Pharmacology; and GNUR 425 Advanced Health Assessment
This course will prepare the advanced practice nurse to manage the reproductive and sexual health care needs of all individuals throughout the lifespan. Theories and knowledge from biological, behavioral, social and nursing sciences will be applied in the provision of care for reproductive and sexual health. Emphasis is on the principles of reproductive anatomy and physiology including puberty, genetics, pregnancy, embryonic/fetal development, parturition, puerperium, lactation, and menopause in relationship to advanced practice nursing care.
Outcomes:
By the end of this course, advanced practice nursing students will: 1) Synthesize principles of neuroendocrine and physiological regulation of female and male reproductive function and the normal parameters of puberty, menarche, fertility, and menopause; 2) Analyze the impact of non-gynecologic primary health conditions on reproductive and sexual health; 3) Incorporate established evidence based sexual and reproductive health clinical practice guidelines; 4) Identify strategies to provide high quality, person-affirming, and culturally inclusive healthcare for self-identified gender and sexual minority persons and non-conforming individuals; 5) Develop genomics and genetic risk factor assessment in relation to reproductive and sexual health care, including basic principles of genetic testing, counseling, and referrals; 6) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes

GNUR 525 Special Populations and Topics in Emergency Health Care (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to prepare the emergency nurse practitioner student to assume responsibility for stabilization and treatment of special populations that present to the emergency department. Evidence-based practice is discussed as it relates to the evaluation and treatment of emergent conditions in obstetrics and gynecology, pediatrics, mental health disorders, victims of abuse, and patients receiving palliative and hospice care. Special topics of disaster management, the approach to acute resuscitation, analgesia and procedural sedation, toxicology, environmental emergencies and legal topics in emergency health care will be covered.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Synthesize evidence-based theories and practices into assessment, diagnosis and treatment of patients in special populations that present to the emergency department for care; 2) Analyze subjective/objective information to emulate differential diagnoses of emergent conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Develop treatment plans that incorporate inter-professional and socio-cultural sensitive treatment options; 5) Recognize legal issues that are unique to the delivery of care in the emergency setting; 6) Apply principles of disaster management to the care of individuals and communities affected by disasters

GNUR 526 Management of Common Adult Health Problems (4 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of common primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected common health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for Health Promotion and Disease Prevention, evaluation, and treatment of dermatologic, mental health, HEENT, gastrointestinal, and genitourinary problems.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Assess presenting common health problems in adults/older adults with specified conditions; 2) Analyze subjective/objective information to formulate differential diagnoses of common conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Establish a patient-centered treatment plan that is cost effective, consistent with best evidence, age appropriate, and culturally sensitive; 5) Modify the treatment plan based on outcomes; 6) Recognize problems that require consultation or referral to other members of the multidisciplinary health care team

GNUR 528 Management of Complex Adult Health Problems (4 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of complex primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected complex health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for evaluation and treatment of cardiovascular, peripheral vascular, respiratory, palliative care, neurological, musculoskeletal, hematologic, endocrine, infectious disease, and renal disease problems.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Assess presenting complex health problems in adults/older adults with specified conditions; 2) Analyze subjective/objective information to formulate differential diagnoses of complex conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Establish a patient-centered treatment plan that is cost effective, consistent with best evidence, age appropriate, and culturally sensitive; 5) Modify the treatment plan based on outcomes; 6) Recognize problems that require consultation or referral to other members of the multidisciplinary health care team

GNUR 529 Family-Focused Health Promotion and Disease Prevention (3 Credit Hours)
Pre-requisites: GNUR 442 Advanced Physiology; GNUR 413: Advanced Pharmacology; and GNUR 425 Advanced Health Assessment
This course emphasizes a family-focused approach to health promotion, disease prevention, and risk reduction from birth to end of life. Common issues impacting individual, family, population, community, and global health are explored. Strategies for health promotion and disease prevention are addressed with consideration for culture, social determinants of health, and social justice.
Outcomes:
By the end of this course, advanced practice nursing students will: 1) Analyze data sources that identify and predict health risks of the individual, family, and community to facilitate development of clinical intervention strategies; 2) Integrate family systems theory and research on health promotion and disease prevention into strategies to manage health-related problems affecting family and community; 3) Synthesize broad ecological, global and social determinants of health to design evidence-based, culturally relevant clinical interventions and strategies; 4) Apply evidence-based guidelines to the identification and prevention of significant healthcare problems affecting populations at risk; 5) Distinguish cultural, spiritual, ethnic, gender, sexual orientation, economic, environmental, and age cohort differences in the risk, presentation, progression, and treatment of health problems

GNUR 530 Topical Seminar for Nursing (1-5 Credit Hours)
These are seminars in specialty areas of nursing theory (e.g., Parse theory), methods (e.g., historical research, grounded methods), as well as concepts (e.g., spirituality, decision-making, bereavement). Students are encouraged to take those seminars to prepare them for their dissertation.
Outcomes:
Students are expected to use the specialty information to further enhance their understanding of their research phenomenon

GNUR 532 Research Internship (2-3 Credit Hours)
This course provides an opportunity for the student to undergo a mentored experience in scientific inquiry. With the Course Director, students will identify a faculty mentor who has an active program of research and can provide an environment for a mentored experience in scientific investigation. The student and faculty mentor will mutually develop achievable objectives with measureable outcomes. This experience can encompass a broad range of research activities that span the scope of scientific investigation. Successful completion of the internship will provide the student with an experiential base of research, which will enhance their knowledge and skills in the conduct of research and facilitate their socialization into the multifaceted role of an investigator.

GNUR 534 Advanced Practice Nursing Care of Older Adults (2 Credit Hours)
Pre-requisites: GNUR 528 Management of Complex Adult Health Problems for NP students OR MSN 447 for CNS students
This course explores current issues in aging and the care of older adults. A major focus of the course is preparing the advanced practice nurse to manage the healthcare of older adults with multiple medical and psychosocial needs in increasingly complex care systems. Topics include health promotion, disease prevention, and social determinants of health for older adults across the spectrum of health and illness, best practices in the management of geriatric syndromes, and special considerations in the assessment of older adults with functional and cognitive limitations.
Outcomes:
1) Apply current issues in aging, including aging theory, social determinants of health, caregiving, and legal-ethical considerations in the care of older adults; 2) Investigate the variety of care systems and settings where older adults receive care, including transitions of care; 3) Generate comprehensive health maintenance plans for healthy older adults and older adults with multiple comorbidities, incorporating evidence-based screening and prevention principles; 4) Discuss special considerations in the assessment of older adults with functional and cognitive limitations; 5) Apply best practices in assessment and management of geriatric syndromes; 6) Evaluate the importance of interprofessional teamwork in the care of older adults with multiple comorbidities

GNUR 535 Substance Use Disorders Addiction Lifespan I (3 Credit Hours)
Pre-requisites: Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I and II
This course is an introduction to critical thinking, diagnostic reasoning and clinical judgment to assess, diagnose and treat clients with substance use and addictive disorders. Neurobiological, behavioral, and socioecological perspectives will be used to understand the etiology, course and development, differential diagnoses and management of substance use and addiction. Students will learn pharmacological and non-pharmacological interventions to treat and manage substance use and addictive disorders across the lifespan.
Outcomes:
At the successful completion of the course, students will be able to: 1) Synthesize evidence-based scientific theories of substance use and addictive disorders; 2) Understand the neurobiological, behavioral, and socioecological aspects of substance use and addiction; 3) Assess and diagnose substance use and addictive disorders for clients with developmental considerations across the lifespan; 4) Apply pharmacologic, non-pharmacologic, and behavioral interventions in the management of clients with substance use and addictive disorders; 5) Evaluate management strategies in the treatment of substance use and addictive disorders

GNUR 536 Management of Adults with Acute/Critical Conditions I (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is one of two acute care management courses for students in the Adult-Gerontology Acute Care NP and CNS tracks. Students will integrate pathophysiology in the assessment, diagnoses, collaborative and holistic management of adults and older adults with traumatic, pulmonary and cardiothoracic disorders in acute/critical care. Students will analyze, integrate, and synthesize pathophysiological concepts and current research findings for collaborative management of the acute care adult/older adult.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply knowledge from health, psychological, physiological, and social sciences in the advanced nursing management of adults with trauma and cardiothoracic disorders within an acute care setting; 2) Develop differential diagnoses based on a holistic health assessment including medical and social history, presenting symptoms, physical findings, and diagnostic information; 3) Implement appropriate diagnostic and therapeutic interventions for adults with emphasis on safety, cost, efficacy, and patient's immediate condition and needs; 4) Identify the need for consultation and inter-professional collaboration with and referral to appropriate healthcare providers; 5) Evaluate the effectiveness of treatment plans based on patient's outcomes

GNUR 537 Substance Use Disorders Addiction Lifespan II (2 Credit Hours)
Pre-requisites: Substance Use Disorders and Addiction Across the Lifespan I
This course focuses on the complex management of treating substance use and addictive disorders across the lifespan. Evidence-based strategies for caring for clients with co-occurring substance use and psychiatric disorders are presented. Students will learn innovative and novel approaches within research and practice to treat substance use and addiction. The socio-cultural, ethical, and legal challenges surrounding addiction and substance use disorders also will be explored.
Outcomes:
At the successful completion of the course, students will be able to: 1) Understand different philosophical approaches to manage addiction and substance use, including abstinence and harm reduction models; 2) Implement and evaluate evidence-based strategies to care for clients with complex co-occurring psychiatric and substance use disorders with an emphasis on recovery; 3) Describe how to include family and community members into the management of substance use disorders and address stigma associated with addiction and substance use; 4) Analyze the current research and practice focused on innovative and novel approaches and examine socio-cultural, ethical, and policy implications; 5) Explain the legal, ethical, and economic factors associated with substance use and addiction practice

GNUR 538 Management of Adults with Acute/Critical Conditions II (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is one of two acute care management courses for students in the Adult-Gerontology Acute Care NP and CNS tracks. Students will integrate pathophysiology in assessment, diagnoses, collaborative and holistic management of adults and older adults with systemic disorders that include episodic and chronic health problems in acute/critical care. Students will analyze, integrate, and synthesize pathophysiological concepts and current research findings for collaborative management of the acute care adult/older adult.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply knowledge from health, psychological, physiological, and social sciences in the advanced nursing management of adults with systemic disorders that include acute and critical episodes of health problems in acute care settings; 2) Develop differential diagnoses based on a holistic health assessment including medical and social history, presenting symptoms, physical findings, and diagnostic information; 3) Implement appropriate diagnostic and therapeutic interventions for adults with emphasis on safety, cost, efficacy, and patient's immediate condition and needs; 4) Identify the need for consultation and inter-professional collaboration with and referral to appropriate healthcare providers; 5) Evaluate the effectiveness of treatment plans based on patient's outcomes

GNUR 539 Innovative Science, Theory and Methods (3 Credit Hours)
This course will introduce doctoral students to evolving areas of science and technology relevant to nurse scientists that require collaborative approaches and interdisciplinary team science. Content will focus on informatics and data science, genomics, implementation science, team science, and the value of health care.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Identify core concepts in informatics/data science, genomics, and implementation science; 2) Describe implementation science methods and determine appropriate models for health-related interventions; 3) Analyze the main ethical issues surrounding the use of big data (of all types); 4) Determine the value of innovative science methods to the health care system; 5) Analyze current and future applications of omics for precision health

GNUR 540 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Outcomes:
1) Analyze the multi-faceted ethical problems in healthcare, nursing practice, education, research, administration and policy; 2) Articulate one's own approach to moral reasoning when responding to bioethical issues in nursing; 3) Identify presuppositions/assumptions underlying one's positions and the bases for accepting those presuppositions/assumptions; 4) Examine fundamental critical questions in ethics and nursing; 5) Explore selected social justice bioethical issues

GNUR 542 Grant and Proposal Writing (3 Credit Hours)
This course provides the foundation for grant development and submission. Content includes identifying sources and types of funding from governmental agencies, private foundations, and professional societies. Fundamental skills and strategies needed to prepare a competitive research grant proposal are addressed. Emphasis is placed on the strategies in revising an application, and the peer review process. Students will gain experience in writing sections of a competitive grant proposal, critiquing proposals and participating in a mock review.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Identify major sources and mechanisms of public and private funding for health-related research; 2) Describe key components of a research grant proposal; 3) Evaluate the strengths and weaknesses of research proposals; 4) Develop skills in preparing a competitive grant application; 5) Critique research grant proposals using peer review process

GNUR 543 Adult Primary Care NP Practicum (1-4 Credit Hours)
Pre-requisites: GNUR 526: Management of Common Adult Health Problems or GNUR 528: Management of Complex Adult Health Problems; WHNP Students also need MCN 414: Childbearing/ Family Course
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in primary care. During each practicum, the student will care for adult patients. This care includes health promotion, disease prevention, as well as assessment and management of the most common acute, chronic, and complex health problems.
Outcomes:
At the successful completion of this practicum, students will be able to: 1) Perform complete physical, psychological and social health assessments, incorporating principles of health promotion, health maintenance, and chronic disease management; 2) Provide teaching, counseling, and anticipatory guidance in accordance with the patient and family's readiness stage; 3) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens; 4) Integrate knowledge of pathophysiologic and psychosocial changes associated with common acute, chronic and complex health problems into clinical decision-making; 5) Implement evidence-based, developmentally supportive plans of care for adolescents, adults, and older adults; 6) Modify management plan according to clinical response and changes in condition; 7) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 8) Demonstrate effective communication, collaboration and relationship building with patients, families, and interprofessional team members; 9) Analyze quality issues in the clinical setting, prioritizing patient safety and cost effectiveness

GNUR 544 Nursing and Health Policy (3 Credit Hours)
This course provides a framework for understanding health care delivery systems and the ability to analyze health policy using selected theoretical models. Students will apply theoretical models to evaluate existing and proposed health policies from the perspective of relevant stakeholders. Students will identify the political, economic, legal, social and ethical forces which impact the health policy-making process at the organization, local, state and national level, The changing role and responsibilities of the government, private sector, health professionals, and consumers will be examined in terms of access to care, health care financing, regulations, safety, quality and efficiency. Specific methods and strategies to influence health policy will be explored.
Course equivalencies: X-DNP 503/GNUR 544
Outcomes:
1) Analyze health care delivery systems and specific health policies using selected theoretical models; 2) Describe forces that shape health care policy development and implementation in the United States; 3) Relate the philosophy and ethical basis of Jesuit education to the values and preferences which shape health policy in a pluralistic society; 4) Outline the process of policy development and implementation within the content of multiple forces (government, the private sector, health professionals and consumers) that shape health care policy in the United States; 5) Discuss current health and nursing policy issues in the US and globally with emphasis on the political, social, economic, and cultural factors which influence health disparities and access to care; 6) Analyze a health policy within the student's own area of practice and interest in terms of the social, economic, legal political, and ethical forces that effect current and latent health outcomes; 7) Explain specific methods and strategies hat health care providers can use to advocate for and influence health policy at the organization, local, state, national and/or international level

GNUR 545 Evidence Translation for Advanced Clinical Practice (3 Credit Hours)
This course builds on the student's understanding of using research and scholarly inquiry to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on developing leadership competencies in the areas of translational research, evidence-based practice and interprofessional teamwork. Key competencies are developed in the critical evaluation and synthesis of extant research, development of evidence-based protocols and evaluation of outcomes.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Evaluate theory, concepts and methods to guide translation of evidence; 2) Formulate questions about population-based practice problems, issues and areas for improvement in context; 3) Synthesize the state of evidence with regard to a specific practice problem; 4) Develop an evidence-based protocol to address the practice problem, issue and/or area for improvement in context; 5) Understand the use of metrics in the identification, monitoring and evaluation of practice outcomes; 6) Analyze social, cultural, political and ethical issues related to implementation of practice and process improvements

GNUR 546 Advanced Statistics I (3 Credit Hours)
This course provides graduate students with a foundation in applied regression analysis techniques used in health, social, and behavioral sciences. The major topics covered in this course are univariate/multivariate linear regression, advanced data screening, model building, variable selection, regression diagnostics, univariate/factorial analysis of variance, and repeated measures design analysis of variance. Conceptual understanding and critical evaluation of statistical models is emphasized. Students will gain practical experience in using statistical software packages for the analysis of data.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply general linear modeling techniques in answering research questions; 2) Analyze bivariate and multivariate associations; 3) Interpret results of statistical testing using general linear modeling techniques; 4) Understand the process of model building and variable selection; 5) Evaluate assumptions of general linear models; 6) Apply regression diagnostic techniques

GNUR 547 Advanced Statistics II (3 Credit Hours)
This course will introduce advanced data analysis techniques common in clinical, behavioral and health outcomes research. Students will learn how to conduct and interpret mediational effects and path analysis, multivariate statistical models, repeated measures analysis, nonparametric analysis, and logistic regression models. Although the mathematical basis of the techniques will be considered, the course emphasizes the appropriate use and interpretation of these techniques.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Select appropriate analytic techniques based on the research questions; 2) Understand the computational basis for statistical techniques covered in this course; 3) Evaluate assumptions associated with each statistical technique; 4) Employ statistical software to conduct the appropriate analysis; 5) Interpret the results and make statistical inference

GNUR 550 Substance Use Management Practicum (3 Credit Hours)
Pre-requisites: Psychiatric Mental Health Advanced Practice Practicum
This specialty practicum course has a focus on the diagnostic reasoning and clinical judgment required to assess, diagnose and treat substance use and addictive disorders. Students will integrate knowledge from their coursework and psychiatric mental health population clinical to diagnose and manage clients with substance use and addictive disorders across the lifespan. The student's level of performance is expected to progress throughout the clinical practicum.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply evidence-based practice strategies to assess and diagnose children, adolescents, adults and older adult clients with substance use and addictive disorders; 2) Implement management strategies in the treatment of substance use and addictive · disorders; 3) Analyze the ethical, legal, and policy issues impacting advanced practice nursing care of clients with substance use and addictive disorders; 4) Coordinate care across transitions for clients diagnosed with substance use and addictive disorders

GNUR 551 Cancer Care: Cancer Biology and Epidemiology (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to present an in-depth understanding of the current knowledge and research in cancer biology and pathogenesis. Genetic, molecular and cellular mechanisms of cancer pathogenesis are covered in depth. Cancer epidemiology, concepts of primary risk reduction, as well as cancer screening are presented. Susceptibility for hereditary cancers due to germline mutations is included in the context of primary and secondary prevention. Current and future applications of genomics to cancer care are presented and discussed.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Analyze theories and research findings relative to the current understanding of the biology of cancer; 2) Describe national and global trends in cancer incidence and mortality; 3) Discuss evidence supporting cancer prevention; 4) Analyze cancer risk associated with common hereditary cancer syndromes; 5) Understand general principles of cancer screening; 6) Analyze current and future applications of genomics to cancer care

GNUR 553 Cancer Care: Diagnostic and Therapeutic Approaches (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course will focus on the diagnostic and management dimensions of select cancers including hereditary cancer syndromes. Specialized content will focus on the therapeutic modalities utilized during the acute care phase of the cancer continuum across multiple care settings. Pharmacology of cancer therapies will be explored.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Differentiate among specific cancer types in terms of: epidemiology, etiology, prevention, screening, detection, classification, and treatment; 2) Apply diagnostic approaches and methods to cancer management; 3) Explain concepts and principles of cancer staging for various cancer types; 4) Apply general principles of treatment planning in cancer management; 5) Compare major treatment modalities; 6) Evaluate evidence-based therapeutic and pharmacologic treatment strategies for patients across the cancer care continuum; 7) Articulate the role of the advanced practice nurse in the interprofessional management of patients

GNUR 555 Cancer Care: Palliative/Supportive Management (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to present an in-depth understanding of the current knowledge and research in psychological and supportive care for patients and families living with cancer. Information relevant to the following domains will be explored: symptom management; psychological, spiritual and culturally-appropriate care; communication; survivorship; and hospice and palliative care.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Analyze theories and research findings relative to the current understanding of cancer and treatment-related symptoms across the cancer care continuum; 2) Identify evidence-based advanced nursing practice for symptom management and psychological care of patients with cancer, across the cancer care continuum, including at the end of life; 3) Identify strategies for effective communication with patients, families, and interprofessional team members; 4) Describe psychosocial, spiritual, and culturally appropriate components of care with patients and families coping with cancer; 5) Explain unique issues of the cancer survivor; 6) Integrate principles of palliative care across the cancer care continuum; 7) Articulate the role of the advanced practice nurse in the interprofessional management of patients

GNUR 560 Cancer Care Advanced Practice Practicum (2-3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
The practicum course guides the student in a synthesis of content from nursing and related sciences and allows for the application of this knowledge to the role of the advanced practice nurse providing advanced nursing care to patients and families across the cancer care continuum. Students will gain experience in a variety of settings that will advance their proficiency in caring for patients and families with cancer.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply evidence in the assessment and management of patients across the cancer care continuum; 2) Collaborate with health professionals to plan and implement best practices in cancer care; 3) Evaluate the treatment plan for value and quality and modify as needed; 4) Analyze the ethical, legal, cost, and policy issues affecting advanced practice nursing of patients and families across the cancer care continuum; 5) Discuss the value of multidisciplinary cancer care teams to provide the most appropriate care for this complex and vulnerable population; 6) Demonstrate and document personal and professional growth in the role of the advanced practice nurse

GNUR 562 Emergency Health Care Advanced Practice Practicum (1-6 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
The practicum course guides the student in a synthesis of content from nursing and related sciences and allows for the application of this knowledge to the role of the nurse practitioner in the emergency setting. Students will advance their proficiency in caring for patients that present across the lifespan and across acuity levels.
Outcomes:
1) Apply evidence-based practice strategies to assess and diagnose patients across the lifespan and across acuity levels that present with emergency/urgent conditions; 2) Implement management strategies in the treatment of patients in the emergency department setting; 3) Analyze the ethical, legal, and policy issues impacting advanced practice nursing care of patients that present in an emergency/urgent care setting; 4) Implement proficiency in procedural skills relevant to the evaluation, stabilization, resuscitation, and treatment of the patient in the emergency setting; 5) Integrate the appropriate use of consultation, collaboration, and referral to appropriate health care providers into management of patients in an emergency/urgent care setting

GNUR 570 DNP Scholarly Project: Planning (1 Credit Hour)
Pre- or co-requisites: GNUR 545
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 1 SH course focuses on skills necessary for planning a successful DNP scholarly project. Project identification within the student's area of advanced expertise, organizational needs assessment, and outlining the project are emphasized. Skills necessary for the implementation of a successful DNP scholarly project, including collaborative inter-professional team participation and leadership, communication, and methods for project management, are emphasized.
Outcomes:
Upon successful completion of this course, DNP students will apply project management principles in the identification of a feasible DNP Scholarly Project that reflects the student's practice expertise, is evidence-based and grounded in theory

GNUR 571 DNP Scholarly Project: Proposal and Pre-Implementation (2 Credit Hours)
Pre-requisites: DNP Scholarly Project: Planning
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 2 SH course entails 1 SH of on-line seminar and 1 SH (75 clock hours) of practicum experience. The seminar focuses on full development and writing of a succinct proposal which describes planning, implementing, evaluating, and disseminating a scholarly project. The project is designed to improve patient, practice, or organizational outcomes based on an organizational needs assessment that demonstrates feasibility and organization's readiness for student's proposed project. Development of relationships at the project site, and exploration/initiation of preliminary project steps are emphasized during the practicum hours.
Outcomes:
Upon successful completion of this course, DNP students will: 1) Incorporate findings from an organizational needs assessment into the development of a feasible scholarly project; 2) Defend a written project proposal which links scholarly experiences, use of evidence to improve either practice or patient outcomes or both

GNUR 572 DNP Scholarly Project: Project Implementation (2 Credit Hours)
Pre-requisites: GNUR 571 DNP Scholarly Project: Proposal and Pre-Implementation
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This course combines 1 SH of didactic and scheduled on-line seminars throughout the semester with 1 SH (75 clock hours) of practicum experience. Project implementation is the focus of the practicum experience. Project management guidance is provided through on-line seminar sessions, in concert with Faculty Directors, and through communication with the student and external mentor. Students are expected to have a DNP Scholarly Project faculty director, an external member and an approved and willing project site in place prior to course entry.
Outcomes:
Upon successful completion of this course, DNP students will: 1) Implement DNP Scholarly Project using project management skills and competencies; 2) Demonstrate leadership skills in project implementation and management; 3) Apply problem-solving methods and change concepts during project management

GNUR 573 DNP Scholarly Project: Analysis and Dissemination (1 Credit Hour)
Pre-requisites: GNUR 572 DNP Scholarly Project: Implementation
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 1 SH seminar course guides DNP students through the completion of the DNP Scholarly Project, evaluation of project outcomes through analysis of process and outcome indicators, and dissemination. Methods for dissemination include sharing of project outcomes with project site stakeholders, completion of a manuscript, and exploration of a publication site.
Outcomes:
Upon successful completion of this course, DNP student will integrate project elements and data, demonstrating the use of evidence to improve patient or system outcomes

GNUR 598 Directed Study (1-6 Credit Hours)
Directed Study is a focused, defined, and substantive reading or research experience supervised by a faculty member. Directed study involves a close collaboration between the student, supervising faculty, and the academic advisor/chair in the design, scope, and expected student learning outcomes from the experience. Directed study may not be used as a substitute for an existing course or a cancelled course. Directed study credits may range from 1 to 3 semester hours. A course topic of Directed Readings or Directed Research may be requested to be entered on the transcript.

GNUR 600 Dissertation Supervision (0 Credit Hours)
This course focuses on continuing formation as a scholar through the development of the dissertation proposal. Using the student's dissertation plans as a reference point, the course will target strategies and competencies in generating and critically evaluating new knowledge, understanding the legacies of past and current work in the discipline and topic area, the transformational nature of knowledge, and the transformative work of communicating knowledge to others. Students are expected to maintain close and frequent contact with their dissertation chairperson/ committee members during their enrollment in the course. Two semesters in seminar format and thereafter the student works with the Dissertation Chair and committee in completing the dissertation

GNUR 605 Master's Study (0 Credit Hours)
Course designation for students who have completed their coursework and are completing the master's comprehensive examination. Enrollment in GNUR 605 is considered full-time study. Graded as credit (pass) or no credit (fail). This course can be taken twice.

GNUR 610 Doctoral Study (0 Credit Hours)
This course can only be taken two times during a doctoral student's career.

German (GERM)

Discover, search, courses (p. 2953)!

GERM 101 Elementary German I (3 Credit Hours)
This course is an introduction to German, designed for students with no previous experience. Students develop communicative language skills and acquire a fundamental knowledge of German-speaking cultures.
Outcomes:
Students will be able to understand simple sentences and short narratives, respond to basic inquiries about themselves and others, formulate basic questions, comprehend basic written texts, and write simple German sentences

GERM 102 Elementary German II (3 Credit Hours)
Pre-requisites: GERM 101
Students will further develop communicative language skills and knowledge of German-speaking cultures, and will finish learning all the basic grammatical structures of the language.
Outcomes:
Students will have learned to express themselves through a wider range of vocabulary and grammatical structures; They will be able to express appropriate reactions to ordinary situations, read more complex texts, and write sentences in short but cohesive paragraphs

GERM 103 Intermediate German I (3 Credit Hours)
Pre-requisites: GERM 102 Students will review and develop their understanding of German grammar and vocabulary
Students will read and discuss a variety of short readings, including short stories and poetry.
Outcomes:
Students will have gained a wider range of oral expression, both lexical and grammatical; They will be able to express more complex reactions, read more complex narrative and literary texts, and write sentences in longer paragraphs

GERM 104 Intermediate German II (3 Credit Hours)
Pre-requisites: GERM 103 This course focuses on review and practice of more complex grammatical elements
Students will read texts of greater length and complexity, expand their vocabulary, and increase their ability to communicate, both orally and in writing.
Outcomes:
Students will have gained a wider range of oral expression, both lexical and grammatical; They will be able to express more complex reactions, read more complex narrative and literary texts, and write sentences in cohesive paragraphs and short essays

GERM 250 Composition & Conversation I (3 Credit Hours)
Pre-requisites: GERM 104
This is a briskly paced class in which students engage in learning to express themselves effectively, both orally and in writing, in German. All work is carried out in German.
Interdisciplinary Option: German Studies
Outcomes:
Students gain confidence in their ability to speak, read and write modern German, and will gain a wider range of oral expression, both lexical and grammatical

GERM 251 Composition & Conversation II (3 Credit Hours)
Pre-requisites: GERM 250
Students will learn to express themselves with increasing sophistication in both oral and written German. Course materials are challenging and may include a full length literary text.
Interdisciplinary Option: German Studies
Outcomes:
Students will gain further confidence in their ability to speak, read and write modern German, and will have gain a wider range of oral expression, both lexical and grammatical

GERM 270 Modern German Literature and Culture I (3 Credit Hours)
Pre-requisites: GERM 103 or equivalent
Representative works in literature, philosophy, and fine arts, with sociopolitical backgrounds, 1830-1900.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to understand revolutionary post-romanticism, realism, and naturalism in German literature and culture

GERM 271 Modern German Literature and Culture II (3 Credit Hours)
Pre-requisites: GERM 271
Representative works in literature, philosophy, and fine arts, with sociological backgrounds, 1900-present.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to understand neoromanticism, expressionism, literature and fascism, socialist realism, and postwar culture in West and East Germany

GERM 300 Tutorial for Credit (1-6 Credit Hours)
Pre-requisites: Permission of chairperson
Eligible students minoring in German may elect tutorial for credit.
Outcomes:
Students will be able to focus on a specific aspect of German literature or culture

GERM 320 German-American History: Focus on Chicago (3 Credit Hours)
This engaged-learning course traces the history of German-speaking immigrants in the United States from its very beginnings in 1608, through the 19th century heyday of German immigration, and to the present day. Chicago will function as a case study. Students will interact with the DANK Haus and the German community in Chicago.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn about the historical chronology of German-speaking immigration to the United States, assimilation, and German-American cultural contributions to the US, with a focus on Chicago; Students will interact with the DANK Haus and the German community in Chicago

GERM 369 German Reading Knowledge (3 Credit Hours)
This course provides graduate students in the humanities, arts and social sciences with the fundamentals of German grammar for the purposes of reading and translating academic German. Students will work through German grammar explanations, vocabulary, strategies for negotiating meaning, and translation exercises.
Course equivalencies: GERM369 / GERM109

GERM 370 German Cinema (3 Credit Hours)
The course provides an overview of German film from its beginnings until the present time. Movies will be screened and discussed chronologically from the various eras of German film: Silent Movies, Weimar Sound Movies, Film in the Third Reich, Post-War Films, New German Cinema and Movies of Unified Germany. Taught in English.
Interdisciplinary Option: European Studies, Film & Digital Media Studies, German Studies, Global Studies, International Film & Media Studies
Course equivalencies: X-GERM370/ICVM370/IFMS370

German Studies (GRMS)

Discover, search, courses (p. 2953)!

GRMS 300 German Studies Minor Capstone (1 Credit Hour)
In an independent study format, students write a 10-15 page paper that synthesizes the knowledge gained in their coursework into an interdisciplinary project, combining that knowledge with the student's other academic interests. Alternatively, students may secure a supervised internship at a German-related institution or organization that also lines up with their interests Students must be near completion of most requirements for German Studies Minor in order to be eligible for enrollment.
Interdisciplinary Option: German Studies
Outcomes:
Interdisciplinary synthesis of coursework into a paper, or outcomes based on a specific internship, including a reflection component

Global Studies (GLST)

Discover, search, courses (p. 2953)!

GLST 101 Introduction to Global Studies (3 Credit Hours)
This course serves as an introduction to the interdisciplinary field of global studies. It provides an overview of the major disciplines represented in the program, introduces the main regions covered in the program, and discusses important global issues.
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, European Studies, Global Studies, Islamic World Studies, Latin American Studies
Outcomes:
By analyzing various topics in global studies, students will gain an understanding of the different regions of the world and the ways that different disciplines contribute to this interdisciplinary field

GLST 301 Capstone in Global Studies: Directed Readings (3 Credit Hours)
Pre-requisites: Course requires permission of instructor; GLST will enroll approved students directly (no self-enrollment or non-GLST advisors); Course is open only to junior and senior majors and minors
This course number may be used only exceptionally for a course of study that a student contracts with a faculty mentor of their choosing and that is not offered otherwise at Loyola. The contracted course must function as a way for students to draw together their undergraduate studies in a "capstone" fashion and in a way that is relevant to the concerns of the Global Studies Program. Students must arrange this course of study with their chosen faculty mentor. The faculty mentor should send the syllabus to the director of global studies at least one month before the start of the term in which the student plans to undertake their course of study. Students will complete a very substantial research project or paper of approximately 20,000 to 25,000 words (about 40-50 double-spaced pages) that they work on over the course of the entire semester with their faculty mentor.
Interdisciplinary Option: Global Studies
Outcomes:
Students will improve their research and writing skills and will acquire an in-depth knowledge of an issue critical to a comprehensive understanding of the interdisciplinary field of global studies

GLST 302 States and Firms (3 Credit Hours)
This course focuses on the relationship between multinational corporations and the state. It explores the origin of firms, as well as issues such as corruption, tax policy, bailouts, and economic development. It also examines the development of private military contractors and their relationship to state security.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate understanding of the various relations between multinational corporations and states as well as private military contractors and states

GLST 303 Technological Change and Society (3 Credit Hours)
This course explores how changes in technology affect society in four broad areas: its impact on how we communicate, on the workplace, on regulatory issues surrounding technology firms, and on humanity itself.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate an understanding of the various relations between technology and society

GLST 304 Global Civil Society and Social Movements (3 Credit Hours)
This course focuses on global civil society groups (both advocacy groups or apolitical) and on social movements that seek to fight injustices. We discuss a variety of examples of civil society projects ranging from monitoring government corruption and promoting micro-credit to organizing transnational protest campaigns.
Interdisciplinary Option: Global Studies
Course equivalencies: X-GLST 304/SOCL 304
Outcomes:
Students will demonstrate a comprehension of the dynamics of global civil society and social movements, both for cases discussed in class and to material from outside class

GLST 305 Globalization and Environmental Sustainability (3 Credit Hours)
This course introduces students to social, political and economic factors that have contributed to globalization, development and their impact on the environment. It provides students with the background and conceptual tools to understand global environmental challenges and questions.
Interdisciplinary Option: Global Studies
Outcomes:
Students will develop a fundamental knowledge of the study of global development and environmental challenges and develop analytical skills to assess the tradeoffs involved in economic development and environmental sustainability

GLST 306 International Development (3 Credit Hours)
This course provides an interdisciplinary overview of the international development system and issues related to development in those countries variously referred to as third world, developing, underdeveloped, or peripheral countries.
Interdisciplinary Option: Global Studies
Course equivalencies: X-GLST 306/SOCL 306
Outcomes:
Students will be able to demonstrate a fundamental knowledge of the various factors that are considered to help or hinder development

GLST 370 Internship in Global Studies (3-6 Credit Hours)
Pre-requisites: Open to all GLST major and minors but requires instructor permission to enroll
Students enrolled in this course must secure an internship relevant to the field of global studies. Students not only engage in regular workplace activities but also attend class meetings, complete writing assignments reflecting on their internship placements, write a final paper, and submit a final evaluation from their workplace supervisor.
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, European Studies, Global Studies, Islamic World Studies, Latin American Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate awareness of at least one important global concern or issue as addressed in the internship

GLST 398 Topics in Global Studies (3 Credit Hours)
This is a variable topics course. Specific topics vary from semester to semester.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate knowledge of a unique topic in the interdisciplinary field of Global Studies

Graduate Neuroscience (NRSC)

Discover, search, courses (p. 2953)!

NRSC 410 Cellular & Molecular Neurobiology (3 Credit Hours)
This course will review current knowledge of the morphological, biophysical and biochemical properties of neurons. Fundamental neuronal network processes such as stimulus transduction, neuronal plasticity, information processing, and learning and memory will be reviewed.
Outcomes:
An advanced knowledge of the biophysical and biochemical properties of nerve cells and fundamental aspects of more global central nervous system function

NRSC 415 Neurochemistry (3 Credit Hours)
This course is a team-taught neurochemistry course that integrates basic biochemical mechanisms of neurotransmitter synthesis, storage, reuptake, and inactivation with applied correlates to central and peripheral nervous system neurodegenerative disorders. Organic chemistry and neurobiology/neurophysiology are required prerequisite courses. Emphasis is placed on student participation including a student-held lecture series covering a contemporary neurochemical topic of their choosing.
Interdisciplinary Option: Neuroscience

NRSC 421 Neuroscience Teaching (1 Credit Hour)
This course consists in serving as a Teaching Assistant in the medical Neuroscience course labs and proctoring the medical neuroscience course exams. It also includes a weekly pre-lab meeting in which the material for that week's lab is discussed.
Outcomes:
Experience in teaching neuroanatomy for Neuroscience Graduate Program students

NRSC 422 Behavioral Neuroscience (2 Credit Hours)
This course discusses the brain's role in sensory perception, higher perceptual functions, attention, learning and memory, executive function, and emotion. It consists of weekly lectures given by the professor or by one or two students.
Outcomes:
An understanding of higher brain function and experience giving presentations

NRSC 423 Special Topics in Neuroscience (3 Credit Hours)
Restricted to Graduate level students. This course explores a wide spectrum of neuroscience-related topics, and the subject matter will vary with each offering.
Outcomes:
Measures include exam performance, in-class participation, and student presentation

NRSC 499 Research (1-9 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

NRSC 502 Neuroscience Journal Club (0-1 Credit Hours)
Pre-requisites: Must be member of the Neuroscience Graduate Program
One hour weekly course during which all students in the Neuroscience Graduate Program meet to discuss and critically evaluate recent, high impact journal articles covering varied neuroscience topics under the direction of two faculty mentors with neuroscience expertise.
Outcomes:
Students advance their knowledge of new neuroscience concepts and methods, gain experience in presenting in front of a group, and gain confidence in their abilities to critically evaluate experimental design and statistical methods

NRSC 503 Neuroscience Seminar (0-1 Credit Hours)
In both the fall and spring this course includes monthly Neuroscience seminar presentations by internal and external speakers. In the fall, the course also includes weekly journal club presentations by the graduate students: in the spring the course also includes weekly research progress reports by the graduate students.
Outcomes:
A broad overview of current topics in the field and experience giving research presentations

NRSC 595 Thesis Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the masters of science thesis and degree.

NRSC 600 Dissertation Supervision (0 Credit Hours)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.

Graduate School Seminar (GSSM)

Discover, search, courses (p. 2953)!

GSSM S59 Thesis Supervision-Summer (0 Credit Hours)
Course for continuing students engaged in thesis research and writing under advisor's supervision during summer.

GSSM S60 Dissertation Supervision-Summer (0 Credit Hours)
Course for continuing students engaged in dissertation research under advisor's supervision during summer.

GSSM S61 Doctoral Study-Summer (0 Credit Hours)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations in summer.

GSSM S65 Master's Study-Summer (0 Credit Hours)
Course for continuing master's degree students engaged in study for comprehensive or qualifying examinations during summer.

GSSM 501 Teaching Effectiveness Seminar (0 Credit Hours)
Pre-requisites: Approval of the Graduate School
This seminar provides pedagogical support to funded graduate students serving as teachers of record.
Outcomes:
To enhance students' abilities to teach undergraduate courses and deepen their pedagogical toolkit

Greek (GREK)

Discover, search, courses (p. 2953)!

GREK 101 Ancient Greek I (3 Credit Hours)
This course introduces students to elementary grammatical forms, basic syntax, and vocabulary of ancient Greek, and simple readings in the language.
Course equivalencies: GREK131/GREK101
Outcomes:
students should be able to demonstrate basic knowledge of ancient Greek vocabulary, syntax and grammar and deploy it to be able to translate accurately simple Greek sentences and passages into English

GREK 102 Ancient Greek II (3 Credit Hours)
Pre-requisites: GREK 101
This course continues the study of the fundamentals of the ancient Greek language, including more vocabulary, grammar, syntax and more advanced readings. (Ancient Greek I or its equivalent is a prerequisite for this course.)
Course equivalencies: GREK132/GREK102
Outcomes:
Students should be able to demonstrate more advanced knowledge of ancient Greek vocabulary, syntax and grammar, and deploy it to be able to translate accurately more advanced Greek sentences and passages into English

GREK 236 Xenophon (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of representative selections from the prose works of Xenophon, with special emphasis on review of ancient Greek grammar as it is encountered in the selected texts.
Outcomes:
Students should be able to translate the selected prose passages in ancient Greek with accuracy, as well as demonstrate understanding of the content of the passages

GREK 262 Introduction to Plato (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of representative selections from works of the philosopher Plato, with special emphasis on review of ancient Greek grammar as it is encountered in the selected texts.
Outcomes:
Students should be able to translate accurately the selected passages from Plato, as well as demonstrate knowledge and understanding of the content of the passages

GREK 267 Intro to New Testament Greek (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of selections from the New Testament, with special emphasis on review of ancient Greek grammar as it is encountered in the selected texts.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-GREK267/THEO307
Outcomes:
Students should be able to translate accurately the selected passages, as well as demonstrate knowledge and understanding of the content

GREK 271 Intermediate Greek (3 Credit Hours)
Pre-requisites: GREK 101; GREK 102 or equivalent This intermediate-level course centers on translation of prose and poetry of Greek authors, with special emphasis on review of Greek grammar as it is encountered in the selected texts
No course description is available
Outcomes:
To review and master basic Greek grammar, vocabulary, and syntax; To read and understand selections of Greek prose and poetry in the original language; To prepare for further study in ancient Greek literature (in the original), history, and culture

GREK 275 Introduction to Greek Oratory (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of selections from Attic and other ancient Greek orators, with special emphasis on review of ancient Greek grammar as it is encountered in the selected texts.
Outcomes:
Students should be able to translate accurately the selected passages, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings, as well as rhetorical figure and constructs in them

GREK 281 Intro to Greek Historiography (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of representative selections from the historical works of ancient Greek authors, with special emphasis on review of ancient Greek grammar as it is encountered in the selected texts.
Outcomes:
Students should be able to translate accurately ancient Greek historical prose passages, analyze and appreciate their style and contents, and demonstrate knowledge and understanding of their various contexts and meanings

GREK 285 Introduction to Greek Poetry (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of representative selections from the poetic works of ancient Greek authors, with special emphases on review of Greek grammar as it is encountered in the selected texts and the basic style and structure of Greek poetry.
Outcomes:
Students should be able to translate accurately the selected passages in Greek poetry, comprehend, analyze and appreciate various poetic genres, as well as demonstrate knowledge and understanding of the content and artistry of the selected poetry

GREK 286 Introduction to Greek Drama (3 Credit Hours)
Pre-requisites: GREK 101 and 102 or their equivalents
This course centers on translation of representative selections from the dramatic works of ancient Greek authors, with special emphases on review of Greek grammar as it is encountered in the selected texts and the basic style and structure of Greek drama.
Outcomes:
Students should be able to translate accurately the selected passages in Greek drama, comprehend, analyze and appreciate the genre, as well as demonstrate knowledge and understanding of the content and artistry of the selected texts

GREK 287 Introduction to Christian Greek (3 Credit Hours)
Pre-requisites: GREK 102
This course focuses on the translation of selected passages from Christian Greek writers, such as Origen, Basil, and Gregory, with special emphasis on review of grammar as it is encountered in the selected texts.
Outcomes:
Students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings

GREK 289 Readings in Ancient Greek Literature (3 Credit Hours)
Pre-requisites: GREK 101 and 102 or their equivalents
Students study a selected range of texts in ancient Greek literature. (This is a special topics course in ancient Greek.)
Outcomes:
Students should be able to demonstrate deeper knowledge and understanding of ancient Greek literature, its style, and its possible interpretations

GREK 303 Greek Composition (3 Credit Hours)
Pre-requisites: Two other GREK author courses
This course involves practical exercises to develop correct and fluent expression in written ancient Greek prose.
Outcomes:
students should be able to write ancient Greek in various styles, demonstrating facility in deploying fluent knowledge of vocabulary, syntax and grammar in the writing of ancient Greek prose

GREK 315 The Greek Fathers (3 Credit Hours)
This course examines the writings of the early church fathers, including such as Athanasius, Basil and John (Chrysostom); it also comprises an introduction to the historical background of Eastern patristic thought.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students should be able to translate these works with proficiency, demonstrate knowledge in detail of the writings, their authors and their times, and appreciate more deeply the issues and concerns located in these writings

GREK 325 Demosthenes (3 Credit Hours)
This course examines the works of the Attic orator Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should be able to translate these works with proficiency, demonstrate knowledge in detail of the genre, the author and his times, and understand and appreciate the ideas, issues and concerns expressed in the orations

GREK 331 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the various contexts in which his work was produced.
Outcomes:
Students should be able to translate the Histories with proficiency, as well as demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances

GREK 335 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War of Thucydides, the events about which he writes, and the various contexts in which his work was produced.
Outcomes:
Students should be able to translate the History with proficiency, as well as demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances

GREK 341 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad and the genre of ancient Greek epic poetry, in particular, on the characters of the heroes and their place within the context of Greek society and thought.
Outcomes:
Students should be able to translate the Iliad with proficiency, and demonstrate detailed knowledge of the author, the poem, its contents and meanings, as well as deeper understanding and appreciation of various contexts of the poem, its transmission, and the accomplishment of its composition

GREK 342 The Odyssey (3 Credit Hours)
This course focuses on Homer's Odyssey and the genre of ancient Greek epic poetry, in particular, on the character of Odysseus and his place within the context of Greek society and thought.
Outcomes:
Students should be able to translate the Odyssey with proficiency, and demonstrate detailed knowledge of the author, the poem, and its contents and meanings, as well as deeper understanding and appreciation of various contexts of the poem, its transmission, and the accomplishment of its composition

GREK 343 Greek Lyric Poetry (3 Credit Hours)
The subject of this course is ancient Greek lyric poetry involving selections from such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should be able to translate the selected works with proficiency, demonstrate knowledge in detail about the authors, their poetry, and the various poetic styles they employed, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 351 Aristophanes (3 Credit Hours)
This course focuses on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to translate the selections of Aristophanes with proficiency, and demonstrate knowledge in detail about the author and his comedies, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 353 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of Athens in the earlier fifth century B.C.E.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to translate the selections from Aeschylus with proficiency, and demonstrate knowledge in detail about the author and his tragedies, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 354 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of Athens in the fifth century B.C.E.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to translate the selections from Sophocles with proficiency, and demonstrate knowledge in detail about the author and his tragedies, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 355 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of Athens in the later fifth century B.C.E.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to translate the selections from Euripides with proficiency, and demonstrate knowledge in detail about the author and his tragedies, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 360 Theocritus (3 Credit Hours)
This courses centers on the poetry of Theocritus of Syracuse, set against the background of Hellenistic Alexandria.
Outcomes:
Students should be able to translate the selections from Theocritus with proficiency, and demonstrate knowledge in detail about the author, his poetry, and the styles he employed, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 362 Plato Republic (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic.
Outcomes:
Students should be able to translate the selections with proficiency, and demonstrate knowledge in detail about the author and his work, as well as deeper understanding and appreciation of the work's meaning and the historical, social and intellectual contexts and influences pertaining to it

GREK 388 Readings in Greek Literature I (3 Credit Hours)
Students study a selected range of masterworks in Greek literature. (This is a special topics course in ancient Greek.)
Outcomes:
Students should be able to translate the selected works with proficiency and demonstrate deeper knowledge and understanding of them, their styles and possible interpretations

GREK 389 Readings in Greek Literature II (3 Credit Hours)
Students study a selected range of masterworks in Greek literature. (This is a special topics course in ancient Greek.)
Outcomes:
Students should be able to translate the selected works with proficiency and demonstrate deeper knowledge and understanding of them, their styles and possible interpretations

GREK 412 Readings in Hellenistic Authors (3 Credit Hours)
This course centers on works in Greek of the Hellenistic period, particularly at the intellectual center of Alexandria.
Outcomes:
Students should demonstrate knowledge in detail about the authors, works, and literary enterprise pursued; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, and intellectual contexts and influences pertaining to them

GREK 415 The Greek Fathers (3 Credit Hours)
This course centers on the writings of the early church fathers such as Athanasius, Basil, and John Chrysostom, through which it looks to the historical background of Eastern patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the writings, their authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, cultural, theological, and intellectual contexts and influences pertaining to them

GREK 425 The Attic Orators (3 Credit Hours)
This course examines the works of Attic orators such as Antiphon, Lysias, and Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should demonstrate knowledge in detail of the genre, the authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, political, legal, and intellectual contexts and influences pertaining to them

GREK 431 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Herodotus, his project, and his milieu

GREK 435 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War by Thucydides, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Thucydides, his project, and his milieu

GREK 441 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 442 The Odyssey (3 Credit Hours)
This course centers on Homer's Odyssey, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 443 Pindar (3 Credit Hours)
This course centers on Pindar and on ancient Greek lyric poetry more generally, potentially including consideration of additional authors such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should demonstrate knowledge in detail about the authors, their works, and ancient lyric; They should engage critically with current scholarship relating to ancient lyric's historical, social, literary, and intellectual contexts

GREK 451 Greek Comedy (3 Credit Hours)
This course may focus on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E., or consider the development of New Comedy from Old in the more broadly cosmopolitan Hellenistic world.
Outcomes:
Students should demonstrate knowledge in detail about authors, plays, and the comedic forms; They should engage with current scholarship addressing Greek comedy's historical, social, and intellectual contexts and influences

GREK 453 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 454 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 455 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 462 Plato (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic and/or other philosophical dialogues.
Outcomes:
Students should demonstrate knowledge in detail about the author and his work; They should engage critically with current scholarship concerned with Platonic thought and the historical, social, and intellectual contexts and influences pertaining to it

GREK 473 New Testament Language (3 Credit Hours)
This course centers on study of the language and literary expression of selections from the New Testament.
Outcomes:
Students should demonstrate knowledge and understanding of the texts; They should engage critically with current scholarship exploring the linguistic, historical, social, literary, and intellectual contexts of the New Testament

GREK 488 Readings in Greek Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 489 Readings in Greek Lit II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving ancient Greek language or literature, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Health Informatics and Data Science (HIDS)

Discover, search, courses (p. 2953)!

HIDS 401 Foundations of Health Informatics (3 Credit Hours)
This course offers students a broad overview of health informatics as a foundation for further study of the topic. Designed as a survey of informatics domains as well as primer of informatics methods, this course serves as an introduction for anyone interested to ask good informatics questions, employ informatics tools, or design informatics systems across a broad range of biomedical applications.
Outcomes:
Understand the differences between data, information, and knowledge, and analyze the processes to transform data into actionable knowledge in the context of health and biomedical domains; Understand the particular nature of data, information, and knowledge in health, analyze the importance and limitations of coding standards; Analyze and evaluate the role of health informatics and its societal impact; Analyze the current trends and current issues in health informatics

HIDS 411 Clinical Data Science (3 Credit Hours)
Clinical Data Science provides students with an introduction to a broad range of concepts and methods in data science, as they pertain to biomedical research. The focus of the class is on introducing key methods ranging from data collection and storage, to probabilistic methods, etc.
Outcomes:
Understand and describe the steps in the life cycle in biomedical and clinical research; Understand the key principles of data management; Apply, analyze, and evaluate data structures, standards, and quality of data in large biomedical databases and clinical research; Analyze and evaluate key data analytics concepts as they apply to biomedical research; Analyze ethical and legal issues when dealing with biomedical and clinical data

HIDS 412 Translational Bioinformatics (3 Credit Hours)
Pre-requisites: HIDS 411 Clinical Data Science
This course covers the fundamentals of bioinformatics and how they apply to translational and clinical problems. The purpose of this course is to give students a broad overview of the field of bioinformatics, and the tools commonly used, as well as the applications to practical biomedical issues, diseases, population health, drug discovery, etc. The students will also be exposed to a variety of open-source software for sequence alignment, SNPs discovery, and on how to access and analyze data from large biological databases, for translational and clinical research.
Outcomes:
Understand and apply a range of bioinformatics algorithms, and their computational efficiency; Apply and analyze informatics techniques to retrieve, store, and analyze 'omics' data; Apply and analyze open-source tools and open access databases to find and analyze data of translational and clinical importance; Analyze the current trends and problems in bioinformatics and how they relate to clinical issues, population and public health

HIDS 421 Security and Privacy in Healthcare (3 Credit Hours)
This course provides students with a broad exposure to concepts, policies, and methodologies in security and privacy, as they pertain to healthcare research and practice. Information security and data privacy are essential components of biomedical and clinical research, and therefore, it is critical for students to understand security guidelines.
Outcomes:
Understand the role of information security and data privacy in healthcare; Apply basic principles of computer security, such as confidentiality, integrity, and availability; Apply and analyze security principles in research data management; Analyze and evaluate the ethical and legal considerations associated with biomedical and clinical data; Understand and analyze the importance and role of the Institutional Review Board and its function with respect to protecting human subjects

HIDS 422 Ontologies in Healthcare (3 Credit Hours)
This course provides students with essential concepts of ontologies, building ontologies, and knowledge representation as they pertain to health care, and biomedical research. With the ubiquitous nature of computer systems, and information-based systems in health care (and everywhere!) there is a critical need to be able to represent information.
Outcomes:
Understand the role of ontologies in knowledge representation; Understand the differences between realist and anti-realist ontologies; Understand and describe the importance of propositional and predicate logic in knowledge representation and discovery; Understand basic principles of developing ontologies in health care; Build ontologies using computer ontology-building tools; Understand and describe how ontologies affect biomedical informatics systems and how we discovery new knowledge

HIDS 431 Introduction to Natural Language Processing in Health (3 Credit Hours)
Pre-requisites: HIDS 401 Foundations of Health Informatics and HIDS 411 Clinical Data Science
The objective of this course is to present a broad overview of methodologies to analyze and mine biomedical text automatically. Students will be exposed to some of the common and state-of-the-art software, algorithms and techniques to extract content and knowledge from biomedical texts. A particular emphasis will be placed on how these methodologies are used in the context of health care, clinical records and narratives, and how extracted information can be used to improve care.
Outcomes:
Understand and apply artificial intelligence methodologies and software to automatically extract information from unstructured text; Assess and evaluate advantages and disadvantages of such methodologies; Understand and analyze how machine learning tools are used in a clinical context; Analyze how NLP techniques enrich structured data, improve accuracy of diagnosis, and their role in learning health systems

HIDS 441 Human Centered AI for Healthcare (3 Credit Hours)
This is a survey course of AI user-facing systems for healthcare, that demonstrates the practical use of seminal algorithms in machine learning and AI, as well as principles of interaction design and user center design. In addition, the course focuses on how these design principles and algorithms can be blended to generate impactful systems that help bridge health disparities.
Outcomes:
Analyze the factors that influence a successful human interaction with computer systems for healthcare; Compare and contrast the opportunities and limitations of AI infused technologies for healthcare applications; Develop evaluation and testing plans for eHealth applications/devices that use AI; Design applications/devices that satisfy a healthcare need using principles of AI and human factors

HIDS 495 Independent Study (1-4 Credit Hours)
This is a directed study course in health informatics for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

HIDS 499 Health Informatics Capstone (1-3 Credit Hours)
Pre-requisites: Students in the HIDS program must have completed 2 semesters of course work
Development of an informatics project, including research question, literature review, and assessment.
Outcomes:
Development of a scholarly paper and presentation

Health Systems Management (HSM)

Discover, search, courses (p. 2953)!

HSM 110 Healthcare in America (3 Credit Hours)
This course introduces the U.S. healthcare system and compares it to systems in other developed nations. Emphasis is given to the government's dominant role in health care delivery, payment and regulation, as well as the differences between public health and health care systems. The social justice implications of cost, quality and access are highlighted.
Interdisciplinary Option: Bioethics
This course satisfies the Engaged Learning requirement.
Outcomes:
Describe the evolution of health care in America and the influence of history on the current health care system; Demonstrate knowledge of the structure and functions of the US health care system; Identify at an introductory level the political, economic and social factors that shape the US health care system; Describe the inter-relationships among healthcare stakeholders including providers, suppliers, payers' workforce, and consumers; Recognize the issues of health care disparities, access to care and social justice present in the current US health care system; Identify criteria for evaluating the evolving and changing US health care system; Compare the US health care system to those of other developed nations

HSM 120 Essentials of Medical Terminology for Health Professionals (1 Credit Hour)
This course introduces students to the language of the health professions. Word structure, prefixes and suffixes, and rules of building and analyzing medical words are introduced. Students explore terms relating to anatomy, pathology, diagnostic and clinical procedures, and select medical specialties. Emphasis is given to defining, interpreting and pronouncing medical terminology.
Outcomes:
Identify structure of medical vocabulary including prefixes, suffixes and root words; Apply the rules of building medical terms; Recognize and define medical terms relating to anatomical structure and function, pathology, diagnostic and clinical procedures, and medical specialties; Use medical terminology accurately in context

HSM 200 Careers in Healthcare Administration (2 Credit Hours)
This course provides an introduction to healthcare administration careers. Students explore the various sectors and supporting industries making up the larger healthcare enterprise. Administrative career options and industry growth patterns are presented. Students are introduced to working professionals and professional organizations representing various sectors of the healthcare industry. Class discussions integrate healthcare industry vocabulary and jargon.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Distinguish healthcare sectors and supporting industries; 2) Describe a variety of roles and functions within healthcare administration; 3) Identify various entry points into a healthcare administration career; and 4) Explore areas of interest for career consideration

HSM 210 Introduction to Global Healthcare Delivery (3 Credit Hours)
Social determinants of health, comparative health systems, global health initiatives and their effects on health outcomes are addressed. Students examine current issues impacting global population health and improvements in care locally and worldwide. Roles of governmental, institutional and corporate organizations in financing, governing and delivering worldwide healthcare are studied.
Interdisciplinary Option: Bioethics, Global Studies, Bioethics, Global Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-HSM210/PUBH314/ENVS385
Outcomes:
At the successful completion of the course, the student will be able to: 1) Identify major global health care strengths and challenges; 2) Develop a broad worldview of communities and countries with different lifestyles, economics, and geopolitical systems and how these differences impact health care; 3) Explain the characteristics and roles of governments, non-governmental organizations (NGO's) and public/private partnerships as relates to health and health care around the world; 4) Analyze the impact of globalization on health and healthcare systems; 5) Assess the ethical and social justice issues associated with health inequities around the world; 6) Address a global health care issue, analyze the issue using relevant theoretical concepts and recommend a course of action

HSM 220 Post-Acute & Long-Term Care Management (3 Credit Hours)
This course examines healthcare delivery models designed to meet the needs of older adults and those with disabilities and chronic health conditions. It explores the experience of the patients and caregivers receiving these services as well as the professional workforce who provides them. It also examines the methodologies used to make decisions that impact internal and external customers.
Interdisciplinary Option: Bioethics
This course satisfies the Engaged Learning requirement.
Outcomes:
Analyze the challenges and opportunities faced by the US healthcare system related to changing demographics; Apply theories of aging and disability to the management of post-acute and long-term care services; Compare healthcare delivery models used in post-acute and long-term care services; Articulate the roles, responsibilities, and challenges faced by post-acute and long-term care professionals; Articulate the social justice and ethical issues associated with aging and disability in the context \\nof post-acute and long-term care environments

HSM 230 Fundamentals of Health Equity (3 Credit Hours)
Pre-requisites: HSM 110 (Can also be taken as a corequisite)
This course introduces the concept of health equity and provides an overview of health disparities in the U.S. Students examine the root causes of and explore populations most affected by health inequities. The course explores system approaches and strategies aimed at improving health equity.
Interdisciplinary Option: Bioethics
Outcomes:
Analyze pathways of causality leading to health inequities; Differentiate between disease causation and disparity causation; Compare and contrast strategies to improve health equity in the US; Identify roles and responsibilities of healthcare professionals as agents of change; Explain the relationship between community, social justice and health status; Describe philosophical principles that underlie social justice priorities; Generate ideas for programs and policies that promote health equity

HSM 240 Healthcare Workforce Management and Professionalism (3 Credit Hours)
Co-requisites: HSM 110
This course offers a comprehensive examination of human resources management (HRM) in healthcare, emphasizing its strategic application. It addresses the technical and legal facets of HRM while also fostering the development of professionalism and equipping students to thrive in the ever-evolving healthcare environment.
Outcomes:
Examine the impact of human resources management (HRM) and organizational development principles on healthcare administration practices; Describe how internal and external environments impact the healthcare workforce environment; Identify the key elements of professionalism in healthcare administration, including ethical standards, communication, and teamwork; Analyze scenarios to assess the impact of HRM decisions on healthcare organizations, including their financial and operational outcomes; Evaluate the impact of professionalism on healthcare administration practices; Demonstrate engagement in HRM activities, including negotiation and communication

HSM 280 Healthcare Ethics in Practice (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent
This course provides an in-depth exploration of ethical leadership within healthcare management. Students will examine historical and contemporary ethical issues that impact the management of healthcare organizations, gaining a comprehensive understanding of the challenges and responsibilities faced by healthcare leaders. The course emphasizes the importance of personal moral perspectives, encouraging students to compare their views with those of their peers and the dominant positions of the day to foster a nuanced appreciation of diverse ethical opinions.
Outcomes:
Describe historical and contemporary ethical issues affecting management of healthcare organizations; Analyze key characteristics of healthcare administrators that contribute to ethical and effective leadership; Apply critical thinking to decision-making models when managing differing opinions and justifying ethical decisions; Reflect on personal values to gain insight into one's vocation and career path in the health sciences, integrating self-awareness with future professional responsibilities

HSM 310 Healthcare Project Management (3 Credit Hours)
Pre-requisites: HSM 110; Course is restricted to Healthcare Administration and Public Health majors
This course introduces the fundamental principles of project management in healthcare organizations, emphasizing the processes, tools, and methodologies necessary for successful project execution. Students will learn how to initiate, plan, execute, monitor, and close projects in healthcare settings, with a focus on strategic alignment, risk management, and stakeholder communication. The course also emphasizes the development of teamwork, leadership, and managerial skills required to effectively manage diverse teams and navigate challenges in dynamic healthcare environments. Through practical applications, students will gain hands-on experience in creating project plans, managing resources, and ensuring successful project outcomes.
Outcomes:
Explain key project management principles, tools, methodologies, and frameworks, with a focus on healthcare projects; Distinguish between the roles and responsibilities of functional managers and project managers; Develop comprehensive healthcare project plans that address scope, goals, timelines, budgets, and stakeholder communication; Identify potential risks for healthcare projects and risk mitigation strategies; Apply leadership and collaboration skills to lead teams and achieve project goals and objectives

HSM 315 Healthcare Quality & Performance Improvement (3 Credit Hours)
Pre-requisites: HSM 240 and HSM 368
This course examines the role of management in measuring performance and achieving quality in healthcare organizations. Emphasis is on the historical evolution, current concepts and future trends associated with measuring and evaluating health care quality. Students explore fundamental concepts of quality improvement design, planning, and methodology.
Outcomes:
1) Articulate the historical evolution and current forces driving changes in healthcare quality; 2) Describe major quality improvement models that provide a framework for change; 3) Differentiate the use of structural, process and outcome indicators for measuring quality; 4) Apply quantitative and qualitative performance measurement approaches to healthcare processes; 5) Apply quality improvement tools and techniques to healthcare processes; 6) Explain operational and clinical quality improvement data; and 7) Apply a systematic quality improvement approach to healthcare processes

HSM 320 Healthcare Program Planning and Evaluation (3 Credit Hours)
Pre-requisites: (ISSCM 241 or PSYC 304) and HSM 358
This course introduces students to the process of health program planning, including development of program objectives, methods, needs assessment, budget, timelines, contracting and marketing. Health program evaluation will emphasize design of a program evaluation including measurement and analysis of program outcomes, costs, and impact on community health concerns. Psychometric, economic, political and ethical issues related to health program planning and evaluation are explored.
Outcomes:
1) Understand concepts and principles of program planning and evaluation in healthcare; 2) Identify models for the planning and evaluation of health programs; 3) Understand ethical, political, economic and psychometric issues related to health program planning and evaluation; 4) Identify data sources for planning and evaluation of health programs; 5) Develop a plan for evaluation of a local healthcare program; 6) Recognize the importance of needs assessment to program planning; 7) Describe selected methods for evaluating need, process, impact (outcome), and efficiency; 8) Identify the components of an evaluation report; 9) Evaluate a local community's healthcare program; and 10) Explain the role and responsibilities of the healthcare manager in healthcare program planning and evaluation

HSM 325 Healthcare Fiscal Management (3 Credit Hours)
Pre-requisites: HSM 110 and FINC 301
This course introduces fundamental concepts related to financial management of healthcare organizations. Students explore financial-decision tools and the role of financial decision-making in managing delivery of care. How the U.S. health system impacts an organization's financial health and management is considered. Major concepts include cost-accounting, budgeting, cost/benefit analysis, and reimbursement mechanisms.
Outcomes:
At the successful completion of the course, students will be able to: 1) Describe the impact of political, social, and economic factors on the cost of patient care delivery; 2) Analyze the impact of US healthcare payment system on the organization and delivery of healthcare; 3) Evaluate financial health of a healthcare organization; 4) Apply principles of accounting to organizational decision-making; 5) Explain revenue cycle and budgeting in a healthcare organization; 6) Explain the legal, ethical, and social justice issues surrounding fiscal management in the health care setting; 7) Describe non-profit's role in providing uncompensated care and impact on financial decision-making

HSM 330 Healthcare Legal & Regulatory Environment (3 Credit Hours)
Pre-requisites: HSM 240 and either HSM 280 or PHIL 284
This course explores the foundations of healthcare law. Key topics include informed consent, joint ventures, medical staff issues, credentialing, liability, and bioethical concerns such as end-of-life decision-making. Additionally, the course explores risk management strategies, fraud and abuse regulations, and other critical healthcare laws. Students will gain insight into the law-making process, the role of regulatory bodies, and their impact on healthcare operations. Emphasis is placed on understanding and applying these concepts to case studies and real-world healthcare management scenarios.
Outcomes:
Examine the structure of the US legal system and its application to healthcare regulations and judicial processes; Describe the principles of liability as they pertain to healthcare organizations, medical staff, and joint ventures; Identify key government regulations impacting healthcare services, professionals, and organizational compliance; Analyze bioethical issues in healthcare regulations, including end-of-life decision-making, negligence, malpractice, informed consent, and the use of human research subjects and their connection to healthcare regulation; Discuss risk management practices and strategies to prevent healthcare fraud, abuse, and regulatory violations

HSM 338 Healthcare Strategy and Marketing (3 Credit Hours)
Pre-requisites: HSM 110, HSM 230, and HSM 310
This course offers an overview of healthcare strategy and marketing, focused on strategic management and marketing fundamentals and tools. Students work individually and in groups to apply strategies specific to healthcare consumers, markets, products and services; developing and presenting the marketing component of a healthcare business plan at the end of the semester.
Outcomes:
Apply principles of strategic management in the context of a healthcare organization; Utilize basis healthcare market research approaches, techniques and tools; Identify ethical and legal issues related to strategy and marketing in healthcare organizations; Develop a strategic marketing campaign for a healthcare product, program or service; Demonstrate effective teamwork skills in producing and presenting multimedia-based strategy and marketing materials and plans

HSM 340 Health Care Policy (3 Credit Hours)
Pre-requisites: HSM 110 and HSM 230; HSM 230 may also be taken as a corequisite
This course explores government's role in organizing, financing and delivering healthcare. With an emphasis on policy formation, advocacy and change, students apply policy analysis tools to contemporary public health and healthcare problems. Using examples such as Medicare, Medicaid or mental health policy, the course highlights the role of leadership as a key component of successful policymaking.
Outcomes:
Explain how federal, state, and local health policy is formulated and implemented; Assess the balance between public good and individual rights in the policy process; Analyze the impact of specific healthcare policy on health outcomes and the delivery of healthcare; Identify future health policy directions that would improve the health status of Americans; Describe the role of individual and organizational leadership in influencing and improving policy outcomes

HSM 345 Healthcare Data Analytics (3 Credit Hours)
Pre-requisites: ACCT 201 and ISSCM 241/PSYC 304 This course explores the use of clinical and operational data to improve outcomes and achieve greater efficiencies in healthcare systems
The role of data analytics in supporting informed decision-making is emphasized. Topics include data manipulation, analysis, and visualization. Practical business intelligence tools, such as Microsoft Excel® or Tableau®, are used.
Outcomes:
Discuss the role of data analytics in clinical and operational improvement efforts; Apply analytic techniques to health and healthcare data using business intelligence tools or applications; Identify meaningful patterns and trends in data sets to inform business decisions; Understand and interpret business needs and extract appropriate data necessary to solve problems; Propose solutions to complex business problems that are supported by data analysis & visualizations

HSM 350 Healthcare Administration Capstone (3 Credit Hours)
Pre-requisites: HSM 200, 310, 315, 330, 338, 345, 358, 368, 386 and FINC 301
The capstone course is designed to demonstrate accumulated knowledge in healthcare administration. Skills and theories gained throughout the curriculum are integrated into an original team project. Students apply central concepts such as operations, strategy, quality, finance and project management to a specialized area of healthcare in a manner congruent with the Jesuit value of social justice.
Outcomes:
1) Apply healthcare administration knowledge, concepts and skills to an identified healthcare delivery project; 2) Synthesize relevant knowledge from pertinent data sources to meet complex project goals; 3) Synthesize mentor feedback into a reorganized project plan; 4) Demonstrate problem-solving skills in the context of a healthcare delivery project; 5) Manage a large-scale project; and 6) Demonstrate effective teamwork in working toward a common project goal

HSM 355 Special Topics (1-3 Credit Hours)
Pre-requisites: Variable, used as needed,
Variable hours and topics.

HSM 358 Research Literacy for Health Decision-Makers (3 Credit Hours)
Pre-requisites: ISSCM 241 or STAT 103
This course explores the research process and the regulatory requirements in health sciences research. It provides a foundation for application of evidence-based practices in healthcare services. The fundamentals of research design, methodology, interpretation, and critical appraisal are introduced. The course requires critical thinking to determine the relevance of novel research. Emphasis is given to practical applications to decision-making in healthcare administration. Students will present a critical analysis of multiple types of research studies.
Outcomes:
Outline research processes; Discuss the strengths and weaknesses of specific levels of evidence; Describe ethical doctrine and regulations impacting human participant protection; Assess study design, measures, and data collection techniques; Critically evaluate health-related research, including analysis and conclusions; Evaluate the relevance of novel research

HSM 360 Healthcare Administration Field Internship (6 Credit Hours)
Pre-requisites: HSM 200, 310, 315, 330, 338, 345, 358, 368, 386 and FINC 301
This professional experience provides exposure to and experience in the healthcare environment. Under the supervision of a field preceptor and faculty advisor, students work with a healthcare organization integrating content gained through prior HCA coursework. Students develop and refine skills and practical knowledge by conducting a goal-based project(s) of value to the internship site. Project objectives are developed in concert between student, faculty, and preceptor. The experience involves three on-campus seminars, preparation of seminar deliverables plus a minimum of 196 on-site hours fulfilled on a weekly basis as mutually agreed between student and preceptor. The field experience as facilitated by Loyola University Chicago and the HCA Program concludes at the close of the semester and may or may not be compensated.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Apply healthcare administration theoretical knowledge, concepts, and skills to the practice setting; 2) Solve project challenges through the use of analytical and reflective tools; 3) Function as a collaborative team member; 4) Demonstrate critical thinking and refine communication skills; 5) Apply strategies of ethical reasoning to arrive at principled decisions in the Jesuit tradition; 6) Integrate supervisory, and faculty feedback to improve personal skills, knowledge, and effectiveness; and 7) Demonstrate the ability to work independently, thoughtfully, and resourcefully

HSM 365 Health Innovation and Entrepreneurship (3 Credit Hours)
This course introduces basic concepts and methods of design thinking and entrepreneurial training through lecture, discussion and experiential activities. Students will form collaborative teams to develop innovative healthcare products, processes or services especially relevant to promoting health equity and reducing health disparities - by practicing customer discovery, problem identification, ideation, prototyping, testing and pitching. Course is open to Juniors and Seniors at the Parkinson School as well as students in the LUC Interdisciplinary Honors Program.
Outcomes:
Students will be able to define basic principles of design thinking and entrepreneurial business model generation, and explain how they can be applied in a variety of healthcare settings as tools for innovation especially related to promoting health equity and reducing health disparities

HSM 368 Management of Healthcare Organizations (3 Credit Hours)
Pre-requisites: HSM 110
This course familiarizes students with the profession of healthcare administration by providing an overview to leadership, management, organizational development and change. Reflecting the uniqueness of the healthcare sector, students are introduced to key principles, practices and theories that support the socially just and ethical management of healthcare organizations.
Outcomes:
1) Differentiate between the roles of healthcare manager and healthcare leader; 2) Describe how management principles are applied in healthcare organizations; 3) Articulate organizational development challenges faced by healthcare entities; 4) Formulate strategies to manage a change intervention; and 5) Explain ethical and social justice responsibilities in healthcare management

HSM 386 Health Information Systems Management (3 Credit Hours)
Pre-requisites: HSM 110 (Can also be taken as a corequisite)
This course explores the management and leadership of health information systems in the healthcare industry. Students will examine the types, purposes, and attributes of clinical and administrative systems used in healthcare organizations. Topics include the value of health information systems in enhancing organizational performance, the systems development lifecycle, and the role of management and leadership in system implementation. Additional focus is placed on addressing privacy, security, and ethical challenges, as well as evaluating the impact of emerging trends on healthcare delivery.
Outcomes:
Describe the major types, purposes, and attributes of clinical and administrative information systems used in health care organizations; Explain the value of health information systems, including their role in supporting organizational performance, strategy, and effective management; Evaluate risks related to privacy, security, and ethical considerations in the use and management of health information systems; Explain how the systems development lifecycle supports the effective management of health information systems; Evaluate the potential impact of emerging trends in health information systems

HSM 399 Independent Study in Healthcare Administration (1-4 Credit Hours)
Pre-requisites: Permission of the Program Director
This is a directed study course in public health for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines. Must be enrolled in the undergraduate Healthcare Administration program.
Outcomes:
Upon successful completion of this course, the student will be able to articulate a general understanding of the selected topic

Healthcare Administration (MHA)

Discover, search, courses (p. 2953)!

MHA 405 U.S. Health Systems Management (3 Credit Hours)
This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the structure of healthcare in the US healthcare impacts operational management of provider systems focus on how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on management of quality, patient safety and information technology as centerpieces of the modern health care environment.
Outcomes:
Distinguish roles, functions and responsibilities of healthcare system components; Analyze the interaction of social, political and economic forces shaping healthcare delivery and impact on cost, quality and access

MHA 415 Culture of Quality & Safety in Health Care (3 Credit Hours)
Developing, managing healthcare safety and quality programs by demonstrating strategic importance of concepts inside healthcare organizations and clients. Discussion of safety science, high reliability organizations, trends in patient safety, healthcare quality, practices in different healthcare environments, development of organizational cultures, safety & quality, tools for monitoring performance improvement will be examined.
Outcomes:
Students will explain forces driving safety and quality in healthcare, evaluate strategies for improving safety/quality in healthcare, describe influence of systems on outcomes; Analyze role of various systems, factors in creating safe environments of care; Explain "just culture" thinking on safety, quality improvement; Develop plan for improvement of safety/quality

MHA 430 Managerial Epidemiology (3 Credit Hours)
Introduces epidemiological principles, tools pertinent to population health management, delivery of healthcare services, fundamentals of epidemiologic inquiry, population health, community health needs assessment introduced. Methods to effective planning, monitoring, and evaluation of healthcare services. Emphasis given to practical applications, decision-making in healthcare administration, planning, management, financing, outcome evaluation, within healthcare organizations.
Outcomes:
Students will distill the central role of population health management in healthcare administration, epidemiology in evidence-based management, basic principles/methods of descriptive epidemiology to healthcare, administration functions

MHA 440 Healthcare Management and Ethics (3 Credit Hours)
This course deepens insights into profession of healthcare administration, presents key principles, practices of management within healthcare organizations. Emphasis given to knowledge, skills necessary to effectively manage healthcare organizations. The interplay between management and the larger environment of internal/external stakeholders explored, ethical issues common to healthcare management examined. Provides foundation for developing effective management.
Outcomes:
Students will differentiate key principles of management, articulate the governance and management structure of healthcare organizations, synthesize core functions of healthcare manager; Identify/frame/evaluate healthcare management challenges, define strategies for addressing challenges

MHA 450 Research Literacy for Health Decision Makers (3 Credit Hours)
This course explores the research process and the regulatory requirements in health sciences research. The fundamentals of research design, methodology, interpretation, and critical appraisal are introduced. The course requires critical thinking and analysis to determine the relevance of novel research. Emphasis is given to practical applications to decision-making in healthcare administration including planning, management, assessment, and outcome evaluation, within healthcare organizations. Students will present a critical analysis of multiple types of research studies. 2) Describe research governance, ethical doctrine and regulations impacting human participant protection. 3) Assess study design and describe appropriate measures and data collection techniques. 4) Discuss regulatory and policy factors that impact health-related research. 5) Critically evaluate health-related research, including analysis and conclusions. 6) Evaluate the relevance and implementation challenges of novel research. 7) Determine how ethical healthcare leaders impact innovation and research.
Outcomes:
1) Explain the scientific method as it relates to research

MHA 451 Healthcare Finance I (3 Credit Hours)
This course provides a basic understanding of financial management principles with emphasis on the not-for-profit entity. Foundational accounting concepts are explored with a focus on risk, financial statements, capital investments, debt and equity financing.
Outcomes:
Students will be able to recognize the three main corporate financial statements and explain in lay terms the information contained therein

MHA 452 Healthcare Finance II (3 Credit Hours)
Pre-requisites: MHA 451
Building on the foundational learning from Healthcare Finance I, this course focuses on for-profit entities within the health care sector and reimbursement methods. Financial concepts, discounted cash flow analysis, risk, financial performance evaluation, capital investments, capital budgeting, debt, equity financing will be explored. Description, assessments of reimbursement methodologies, strategies will be explored.
Outcomes:
Engage in long-term financial forecasting and planning; Differentiate various reimbursement strategies/ methodologies; Complete comprehensive financial forecast for a healthcare organization

MHA 460 Strategy & Leadership in Healthcare Organizations (3 Credit Hours)
This course examines competitive strategy, leadership in current healthcare environment. Content emphasizes formulation, execution & management, critical evaluation of organizational strategy. Key challenges faced by U.S. healthcare organizations and strategic responses are introduced. The relationship between strategic outcomes and leadership is explored emphasizing values-based leadership and individual qualities that define effective leaders. 2) Evaluate strategic options for a healthcare organization. 3) Formulate a strategy for a healthcare organization. 4) Manage the execution of a defined strategy. 5) Evaluate the performance of a strategic plan. 6) Compare theoretical concepts of leadership.
Outcomes:
1) Analyze the internal and external environment to which a strategy must respond

MHA 468 Healthcare Data Analytics & Business Intelligence (3 Credit Hours)
This course explores the use of data analytics, mining, visualization, tools to support data-driven decisions in healthcare organizations. Students develop a comprehensive view of data, use data to drive outcomes and efficiencies in healthcare. Commonly used methods/challenges in data analytics discussed. Multiple sources are explored including patient-generated data, electronic health records, administrative databases.
Outcomes:
Students will discuss the role of data analytics in health care organizations, demonstrate conceptual and practical knowledge, share structuring of health and healthcare data, retrieve data, perform descriptive analyses on healthcare datasets

MHA 480 Topics in Post-Acute Care (3 Credit Hours)
Pre-requisites: MHA 405, MHA 415, MHA 430, MHA 451, MHA 452, MHA 491, and MHA 492
