This gives students an opportunity to prepare and present a professional chemistry seminar for other professional chemists. The presenter is trained in organizing materials for the 500 Graduate Student Seminar (1)presentation and has the experience of conveying high level technical information to a friendly audience in preparation for subsequent professional presentations in the industrial, academic, and/or scientific meeting arena. The topics of the seminar should not be related to the student's research. The course should be taken at least once by all degree-seeking students.

CHEM 501 Directed Study (1-6 Credit Hours)
A special reading project is undertaken by qualified students and directed by a faculty member of the department with chairperson's approval.

CHEM 509 Doctoral Research (0-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 595 Thesis Supervision (1 Credit Hour)
The course is for master's degree candidates after completion of course requirements.

CHEM 600 Dissertation Supervision (1 Credit Hour)
The course is for Ph.D. degree candidates after completion of courses, cumulative examinations, and research tool requirements.

CHEM 605 Master's Study (1 Credit Hour)
This course is for MS students in the (up to two) intervening semesters between completing coursework/research credits and beginning their thesis supervision.

CHEM 610 Doctoral Study (1 Credit Hour)
This course is for PhD students in the intervening two semesters (pre-candidacy) between completing coursework/research credits and beginning their dissertation supervision.

Chemistry (MS)

The Graduate Chemistry program at Loyola University Chicago encompasses the traditional fields of specialization, including: *Analytical Chemistry, Biochemistry, Chemical Education, Inorganic Chemistry, Organic Chemistry and Physical Chemistry*

For students who enroll in our course-based Master of Science program, you will enjoy the small class sizes found in our upper level courses and access it provides to your instructors. Students with a strong interest in research can choose to obtain a thesis-based master's in a diverse range of subjects. Our MS students receive the academic rigor and laboratory instrumentation access associated with our PhD program in a flexible and condensed schedule expected of a master's program.

The Chemistry (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Biochemistry and Molecular Biology (MS) (p. 1352)
- Biology (MS) (p. 1147)

Doctoral

- Chemistry (PhD) (p. 1158)

Curriculum

The Master of Science in Chemistry requires 30-32 credit hours. Students may choose a course-based or thesis-based program, depending on their future goals.

Besides the traditional Master's program, the Chemistry (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Master of Science in Chemistry (Course-Based)

Required Coursework

Code	Title	Hours
CHEM 401	Chemistry Methodology and Communication	3
Select four from the following		*12*
CHEM 424	Molecular Characterization Part A	
CHEM 435	Special Topics in Physical Chemistry	
CHEM 445	Special Topics in Inorganic Chemistry	
CHEM 455	Special Topics in Analytical Chemistry	
CHEM 465	Special Topics in Biochemistry	
CHEM 480	Chemistry for Teachers I	
Chemistry Research (no more than 3cr hours)		
400 Level Chemistry Electives [1]		15
Total Hours		**30**

[1] Elective courses can be distributed or in a specialized area as determined by student. A list of all 400 level Chemistry courses can be found here (p. 1151).

Master of Science in Chemistry (Thesis-Based)

Required Coursework

Code	Title	Hours
CHEM 401	Chemistry Methodology and Communication	3
Select one of the following:		*3*
CHEM 424	Molecular Characterization Part A	
CHEM 435	Special Topics in Physical Chemistry	
CHEM 445	Special Topics in Inorganic Chemistry	
CHEM 455	Special Topics in Analytical Chemistry	
CHEM 465	Special Topics in Biochemistry

CHEM 595	Thesis Supervision	1
Total Hours		**32**

Thesis Requirement

In addition to coursework, students in Thesis-based MS in Chemistry will write and defend a research thesis. Once students have completed coursework and are solely working on the thesis they will be enrolled in the appropriate study or supervision course to maintain good standing in the university.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated

Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Trained in necessary lab protocol (notebooks, design of experiment, safety, etc.), effective communication of science, and job function (intellectual property, regulatory, ethics, etc.) necessary for careers with an advanced degree.
- Develop capabilities to solve fundamental problems on advanced topics in chemistry sub-disciplines relevant to their field of study.
- Demonstrate the ability to select and utilize appropriate methodologies and practices to solve chemical problems.

Chemistry (PhD)

Doctoral study in Chemistry at Loyola University Chicago is designed to develop within students the foundational skills for industrial work, academic research, and teaching careers in diverse learning communities. The department of chemistry offers opportunities for graduate study in sub-fields of chemistry such as Physical & Surface Chemistry, Medicinal Chemistry, Theoretical Chemistry, Biochemistry and Chemical Education.

Related Programs

Master's

- Biochemistry and Molecular Biology (MS) (p. 1352)
- Chemistry (MS) (p. 1153)

Curriculum

The PhD in Chemistry requires 62 credit hours earned through 6 (six) required courses and 42 credit hours of research in their sub-field, as well as an entrance examination, comprehensive examination, and dissertation. Students may choose a specialization in Analytical Chemistry, Biochemistry, Chemistry Education, Inorganic Chemistry, Organic Chemistry, or Physical Chemistry.

PhD Students will complete entrance exams, a comprehensive exam and then propose and defend research towards the dissertation.

Code	Title	Hours

[1] Must choose from one of the following: Archeometry and Adv Analytical Chemistry.

[2] For CHEM 465 choose from one of the following: Plant Biochemistry; The Chemistry of Enzymes; Biochem of Lipids; Adv Approaches in

Biochemistry; Adv Enzyme Kinetics and Mech; Molecular Immunology; Biochem of Renewable Energy; and Proteomics;

3 For CHEM 445 choose from one of the following: Molecular Characterization Part B; Medicinal Inorganic Chem; and Electron and X-Ray Methods.

4 For CHEM 425 choose from one of the following: Orgo Structure Determination; Strategy & Tactics or Org Chem; Func Dyes Biomed Imaging; Adv Orgo-Synthesis and Mech; Comp Organomet Chem; and Advanced Organic Synthesis;

5 For CHEM 435 choose from one of the following: Exp Tech of Surface Science; Survey of Modern Physical Chemistry; Surface Chem and Analysis; Thermodynam/ Protein Structures; and Computational Chemistry;

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Trained in necessary lab protocol (notebooks, design of experiment, safety, etc.), effective communication of science, and job function (intellectual property, regulatory, ethics, etc.) necessary for careers with an advanced degree.
- To be able to educate students interested in chemical sciences.
- Develop capabilities to solve fundamental problems on advanced topics in chemistry sub-disciplines relevant to their field of study.
- To be able to effectively design and carry out independent research leading to new knowledge or a practical, applicable result. This includes mastery of gathering, organizing, analyzing, and reporting data.

Child Development (PhD) with Erikson Institute

As of Fall 2024, this program is no longer accepting new students.

The PhD in Child Development is offered in partnership between the Erikson Institute and the Graduate School at Loyola University Chicago. Students examine how factors such as culture, social class, and social relationships influence human development from infancy through early and middle childhood. Among others, PhD graduates can consider careers in research, applied child development research, program design and evaluation, college teaching, program administration, and policy analysis.

Curriculum

The PhD in Child Development requires 44 credit hours of coursework, a qualifying paper, and a dissertation. Students enroll in courses both at Erikson Institute and at Loyola simultaneously.

Required Coursework

Code	Title	Hours
ERIK E421	Social and Emotional Development I	3
ERIK E426	Cognitive Development	3
ERIK E477	Seminar Children-At-Risk	3
ERIK E479	Teaching & Learning: Linking Theory & Research to Practice	3
ERIK E481	Seminar Social & Cultural Contexts	3
ERIK E482	Program Evaluation and Implementation Science	3
ERIK E489	Special Topics in Child Development	3
ERIK E486	Teaching Internship	3
ERIK E485	Research Internship	3
ERIK E497	Doctoral Study	1
ERIK E499	Dissertation Supervision	1
Select Two Graduate Electives from Loyola [1]		*6*
Select Three Graduate Methods or Statistics Courses at Loyola [2]		*9*
Total Hours		**44**

1 Loyola coursework is frequently taken in the School of Education or Psychology department. Students may speak with Graduate Program Director for assistance.

2 A list of approved methods and statistics courses will be made available by the Graduate Program Director.

Qualifying Paper

Upon completion of coursework, students will complete a qualifying paper to demonstrate readiness for candidacy.

Dissertation

Guided by a committee of faculty members, students will execute a substantial original piece of research to advance knowledge in the field of child development. After a public oral defense, the final dissertation will be deposited in a publicly available database per Graduate School policy.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the PhD in Child Development, students are expected to understand and apply the following in the areas of Theory, Context, Research Methods, and Intervention:

- (Theory) Basic tenets of influential child development theories and emerging theoretical and conceptual frameworks (e.g., behavioral genetics and developmental neuroscience)
- (Theory) Theoretical and conceptual frameworks utilized in empirical child development research
- (Theory) Processes and mechanisms that promote development and change
- (Theory) The use of scientific methods to inform and advance theory
- (Context) The transactional nature of development and how it interacts with all ecologies within which children are located (e.g., homes, schools, neighborhoods)
- (Context) Inequities in resources (historical and current) and structural oppressions and how these impact child development
- (Context) Strengths-based approaches to child development and the impacts that deficit lenses have
- (Research Methods) Quantitative and qualitative research methods and how each can be applied to relevant questions in child development
- (Research Methods) Univariate and multivariate data analytic techniques, including: correlation and regression (e.g., hierarchical multiple regression and logistic regression), factor analysis (e.g., exploratory, confirmatory) and ANOVA (e.g., repeated measures, MANOVA)
- (Research Methods) Up-to-date approaches for analyzing mediation, moderation and interdependence and for interpreting results of these analyses.
- (Research Methods) Specific analytic techniques for answering specific types of research questions and for drawing appropriate inferences from results.
- (Research Methods) Explain the strengths and limitations of measurement (e.g., reliability, validity) and designs (e.g., correlational, experimental, quasiexperimental; cross-sectional vs. longitudinal), quantitative and qualitative methods and analysis strategies to the study of child development
- (Intervention) The landscape of interventions for children and families (e.g., home visiting, early childhood education), and how such programs are developed and evaluated
- (Intervention) Research designs for assessing intervention effectiveness (e.g., appropriate application of quasi-experimental, experimental (RCT)
  and non-experimental research)
- (Intervention) Critical elements in intervention research and implementation science (including issues such as fidelity, attrition, dosage and local
  adaptations)
- (Intervention) Ethical and responsible conduct of intervention research (including attention to research with vulnerable populations)
- (Intervention) Empirical and theoretical foundations of interventions (either existing or newly designed), including hypothesized mechanisms of change, cultural appropriateness, and research for assessing effectiveness of a specific intervention

Classical Studies

The Post-Baccalaureate Certificate in Classical Studies offers students who have completed a Bachelor's degree the opportunity to achieve the fluency in reading ancient Greek and Latin required to pursue graduate study in Classics or related fields such as ancient history, archaeology, art history, philosophy, theology, or medieval studies. Coursework at the post-baccalaureate level also introduces some of the scholarship of Classical texts in which graduate study engages. Post-baccalaureate students become able to clarify their professional goals while they sharpen their technical skills and become better qualified to advance on the path they choose.

Linguistic preparation is a critical factor in students' success in the early years of their graduate programs. Committed and otherwise well-qualified students who have been able to begin serious language study only toward the end of their undergraduate careers face a competitive disadvantage. The Post-Baccalaureate Certificate is a credential with which to surmount it. No previous language experience is required, and students may choose from three tracks: Ancient Greek & Latin, Ancient Greek, or Latin.

Graduate Program

- Classical Studies Certificate (p. 1164)

Classical Civilization (CLST)

CLST 499 Directed Study (1-3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving the ancient Mediterranean world, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Greek (GREK)

GREK 412 Readings in Hellenistic Authors (3 Credit Hours)
This course centers on works in Greek of the Hellenistic period, particularly at the intellectual center of Alexandria.
Outcomes:
Students should demonstrate knowledge in detail about the authors, works, and literary enterprise pursued; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, and intellectual contexts and influences pertaining to them

GREK 415 The Greek Fathers (3 Credit Hours)
This course centers on the writings of the early church fathers such as Athanasius, Basil, and John Chrysostom, through which it looks to the historical background of Eastern patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the writings, their authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, cultural, theological, and intellectual contexts and influences pertaining to them

GREK 425 The Attic Orators (3 Credit Hours)
This course examines the works of Attic orators such as Antiphon, Lysias, and Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should demonstrate knowledge in detail of the genre, the authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, political, legal, and intellectual contexts and influences pertaining to them

GREK 431 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Herodotus, his project, and his milieu

GREK 435 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War by Thucydides, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Thucydides, his project, and his milieu

GREK 441 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 442 The Odyssey (3 Credit Hours)
This course centers on Homer's Odyssey, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 443 Pindar (3 Credit Hours)
This course centers on Pindar and on ancient Greek lyric poetry more generally, potentially including consideration of additional authors such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should demonstrate knowledge in detail about the authors, their works, and ancient lyric; They should engage critically with current scholarship relating to ancient lyric's historical, social, literary, and intellectual contexts

GREK 451 Greek Comedy (3 Credit Hours)
This course may focus on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E., or consider the development of New Comedy from Old in the more broadly cosmopolitan Hellenistic world.
Outcomes:
Students should demonstrate knowledge in detail about authors, plays, and the comedic forms; They should engage with current scholarship addressing Greek comedy's historical, social, and intellectual contexts and influences

GREK 453 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 454 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 455 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 462 Plato (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic and/or other philosophical dialogues.
Outcomes:
Students should demonstrate knowledge in detail about the author and his work; They should engage critically with current scholarship concerned with Platonic thought and the historical, social, and intellectual contexts and influences pertaining to it

GREK 473 New Testament Language (3 Credit Hours)
This course centers on study of the language and literary expression of selections from the New Testament.
Outcomes:
Students should demonstrate knowledge and understanding of the texts; They should engage critically with current scholarship exploring the linguistic, historical, social, literary, and intellectual contexts of the New Testament

GREK 488 Readings in Greek Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 489 Readings in Greek Lit II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving ancient Greek language or literature, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATIN (LATN)

LATN 415 The Latin Fathers (3 Credit Hours)
This course examines the writings of the early church fathers such as Ambrose, Jerome, and Augustine, looking through them to the historical and intellectual background of Western patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the texts, their authors, and their times; They should engage critically with current scholarship of the field

LATN 418 St Augustine (3 Credit Hours)
This course focuses on selected works of Augustine, set against the backdrop of Roman society and Mediterranean Christianity in the later Roman period.
Outcomes:
Students should demonstrate knowledge in detail about Augustine, his world, and his works; They should engage with current scholarship addressing Augustine's religious, intellectual, literary, social, and historical contexts and influences

LATN 431 Caesar (3 Credit Hours)
This course focuses on Julius Caesar's Commentaries on his Gallic War and the Civil War against Pompey the Great. It examines the texts within multiple frameworks in order to understand the political, military, intellectual, and historical contexts of Caesar's writing.
Outcomes:
Students should demonstrate detailed understanding of Caesar, his texts, and contexts; Additionally, students should engage critically with scholarship relating to Caesar and his place in the world

LATN 432 Livy (3 Credit Hours)
This course focuses on Livy's Ab Urbe Condita and the historical, intellectual, literary, and cultural contexts of this work. It considers Livy's place in Rome's historiographical tradition and the relationship of his work to the emerging imperial government.
Outcomes:
Students should demonstrate detailed understanding of Livy and his historical and cultural context; Additionally, students should engage critically with scholarship on Livy and his work

LATN 435 The Annals of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 436 The Histories of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 438 Suetonius (3 Credit Hours)
This course focuses on Suetonius's Lives and the historical, intellectual, literary, and cultural contexts of his writing. It examines the genre of biography in the ancient historiographical tradition and explores Suetonius's depiction of the Roman Emperors as both biographical and literary creations.
Outcomes:
Students should demonstrate detailed understanding of Suetonius and his historical and cultural context; They should engage critically with current scholarship on Suetonius, his project, and his milieu

LATN 441 The Aeneid of Virgil (3 Credit Hours)
This course centers on Vergil's Aeneid. It examines the poem's place in the tradition of Latin epic poetry with attention to Vergil's literary technique. It explores the poem's participation in and resistance to the Augustan imperial political program. It will touch on the enduring influence of the poem.
Outcomes:
Students should demonstrate detailed understanding of Vergil and the Aeneid; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 442 Earlier Works of Virgil (3 Credit Hours)
This course centers on Vergil's Eclogues and/or Georgics. It examines the genre(s) of bucolic and/or didactic poetry, focusing on Vergil's developing technique, especially his commitment to Alexandrian and Neoteric principles. It will explore how these poems respond to the uncertainty of the political moment and emergence of Imperial rule.
Outcomes:
Students should demonstrate detailed understanding of Vergil and his early poems; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 443 Catullus (3 Credit Hours)
This course centers on Catullus, the literary genres and traditions in which he worked, and the particular moment of late-Republican neoteric poetry. It considers Catullus' importance as an innovator in Latin poetry, his place in the social fabric of aristocratic Roman culture and how his poetry reflects that culture.
Outcomes:
Students should demonstrate detailed understanding of Catullus' works, literary technique, and world; They should engage critically with scholarship relating to Catullus' historical, social, literary, and intellectual contexts

LATN 444 Roman Elegy (3 Credit Hours)
This course focuses on Latin elegiac poetry through selections from Catullus, Tibullus, Propertius, and/or Ovid. The course explores elegy as a peculiarly Roman literary tradition linked closely to the Late Republic and Early Empire. It examines the recurrent themes and techniques of Latin Elegy.
Outcomes:
Students should demonstrate detailed understanding of Latin elegy; They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre

LATN 445 Ovid (3 Credit Hours)
This course centers on the poetry of Ovid, the genres in which he wrote, and the cultural, social, and historical contexts in which he worked. It explores Ovid's role as both a continuator and innovator within the Roman literary tradition and how his poetry responds to his socio-political moment.
Outcomes:
Students should demonstrate detailed understanding of Ovid and his work; They should engage critically with scholarship concerned with Ovid's social, cultural, and literary contexts and influences

LATN 446 The Odes of Horace (3 Credit Hours)
This course centers on the Odes of Horace, their relationship with traditions of lyric poetry and Roman Alexandrianism, and the cultural, social, and historical contexts to which Horace responded. The course examines Horace's poetic technique and his engagement with the emerging Augustan imperial regime.
Outcomes:
Students should demonstrate detailed understanding of Horace's Odes and their place in Roman poetry; They should engage critically with scholarship addressing Horace's work and various contexts

LATN 451 Roman Comedy (3 Credit Hours)
This course focuses on Roman comedy, including selected plays of Plautus and/or Terence. It examines the place of these works in the traditions of New Comedy more generally, exploring how they are produced in Latin as theater in the context of Roman Republican society.
Outcomes:
Students should demonstrate detailed understanding of the authors, the comedies, and their traditions; They should engage critically with scholarship addressing the plays multiple contexts and influences

LATN 455 Tragedies of Seneca (3 Credit Hours)
This course focuses on selected tragedies of Seneca. It examines these works in light of the traditions of ancient tragic drama and Latin literature more generally. It also explores the connection of these plays to Seneca's Stoic philosophy and the imperial regimes of Claudius and Nero.
Outcomes:
Students should demonstrate detailed understanding of Seneca's tragedies; They should engage critically with scholarship addressing Seneca's literary, philosophical, cultural, and historical contexts and influences

LATN 461 Lucretius (3 Credit Hours)
This course centers on the De Rerum Natura of Lucretius. It examines Lucretius' literary technique and his place in the Roman tradition of hexametric poetry. It also explores Lucretius as a major exponent of Epicurean philosophy and the scientific world view of that philosophical tradition.
Outcomes:
Students should demonstrate detailed understanding of Lucretius' work and its significance; They should engage critically with scholarship addressing Lucretius' literary, philosophical, cultural, and historical contexts and influences

LATN 462 Philosophy of Cicero (3 Credit Hours)
This course focuses on the philosophical works of Cicero and the Roman reception of Greek philosophical thought. It explores Cicero's role as a conduit into the Roman world for Greek ideas, including his contribution to the establishment of a philosophical vocabulary, and the enduring influence of his work.
Outcomes:
Students should demonstrate detailed understanding of individual works and Cicero's greater project; They should engage critically with scholarship addressing the various contexts and influences of Cicero's treatises

LATN 488 Readings in Latin Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 489 Readings in Latin Literature II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving Latin language or literature written in Latin, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATN 546 Seminar in Roman Satire (3 Credit Hours)
This course investigates Roman verse satire and its traditions through selections from Horace, Persius, and/or Juvenal, considered in their social, historical, and literary contexts. The Romans claimed satire as the one truly Roman genre: this course will explore the key themes and techniques animating the genre and its tradition. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.
Outcomes:
Students should demonstrate detailed understating about Roman Satire

Classical Studies Certificate

As of Fall 2026, this program is no longer accepting admits.

The Post-Baccalaureate Certificate in Classical Studies offers students who have completed a Bachelor's degree the opportunity to achieve the fluency in reading ancient Greek and Latin required to pursue graduate study in Classics or related fields such as ancient history, archaeology, art history, philosophy, theology, or medieval studies. Coursework at the post-baccalaureate level also introduces some of the scholarship of Classical texts in which graduate study engages. Post-baccalaureate students become able to clarify their professional goals while they sharpen their technical skills and become better qualified to advance on the path they choose.

Linguistic preparation is a critical factor in students' success in the early years of their graduate programs. Committed and otherwise well-qualified students who have been able to begin serious language study only toward the end of their undergraduate careers face a competitive disadvantage. The Post-Baccalaureate Certificate is a credential with which to surmount it.

Loyola's program is shaped in terms of competence attained, rather than a fixed period of study. Our program will meet you where you are in your own career of study, and work with you to bring your skills and knowledge up to the next stage.

Related Programs

Master's

- Digital Humanities (MA) (p. 1195)
- English (MA) (p. 1201)
- History (MA) (p. 1208)

Curriculum

The Post-Baccalaureate Classical Studies Certificate has three tracks: Greek and Latin, Greek, or Latin. Each option requires 6 courses (18 credit hours) to complete.

Greek and Latin Track

The certificate will be awarded to students who successfully complete two semesters totaling 18 "target" credit-hours at the 300-level in both Classical languages with a GPA of 3.0 in the program: "target" study in these two semesters should include at least 6 credit-hours in 300-level ancient Greek author-courses and at least 6 credit-hours in 300-level Latin author-courses. We recognize some students will have attained intermediate or advanced competence in both languages before their post-baccalaureate study and will need only two semesters of target-level work; some may have had the opportunity to become proficient in one Classical language but have weaker preparation in the other; and some may need to begin their study of both languages and will need additional coursework to complete the Certificate. Our program will meet you where you are in your own career of study, and work with you to bring your skills and knowledge up to the next stage.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Fluency in reading ancient Greek and/or Latin.
- Increased knowledge of the history of scholarship in ancient studies.
- Broader knowledge of the ancient Mediterranean world, gained through courses in art, archaeology, literature, and history.
- Sharpened technical skills (e.g., producing original and creative translations, reading scholarly articles, writing, presenting orally, preparing graduate school applications).
- Clarified goals for future professional work or higher education experiences.

Computer Science

Overview

The Computer Science Department offers PhD, Masters, and Graduate-level Certificate programs spanning their discipline to further their technical understanding.

Graduate Programs

- Computer Science (MS) (p. 1172)
- Computer Science (PhD) (p. 1175)
- Cybersecurity (MS) (p. 1176)
- Information Technology (MS) (p. 1179)
- Networking and Information Security Certificate (p. 1182)
- Software Engineering (MS) (p. 1182)

Computer Science (COMP)

COMP 400A Object-Oriented Programming (3 Credit Hours)
This programming intensive course with its weekly lab component provides an exploration in problem solving for graduate-level courses, using object-oriented programming in a language such as Java.
Outcomes:
To analyze and decompose problems, specify algorithms, and construct solutions by synthesizing classes, objects and other components of object

COMP 400B Data Structures I (3 Credit Hours)
Pre-requisites: COMP 400A
This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.
Outcomes:
Students describe linear data structures and analyze the performance of their operations

COMP 400C Data Structures II (3 Credit Hours)
Pre-requisites: COMP 400B and COMP 400D
This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 400D Computing Tools and Techniques (1 Credit Hour)
This course introduces students to the Unix shell environment and essential tools.
Outcomes:
Students who complete this course will develop fluency in the Unix (Linux) environment

COMP 400E Discrete Structures (3 Credit Hours)
This course provides the mathematical foundations for graduate-level study in computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Outcomes:
To analyze properties of functions, relations, graphs, trees, paths; evaluate Boolean Expressions; apply induction towards proving correctness of algorithm and classifying resource usage; synthesize finite-state machines and logic circuits

COMP 401 Computer Security (3 Credit Hours)
Pre-requisites: COMP 400A or instructor permission
This is a foundations course on computer security, covering a comprehensive range of concepts and technologies, including security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The final project requires a presentation and technical report where the students will show and describe what they accomplished.
Outcomes:
Students will find and exploit vulnerabilities in computer and network systems; articulate cryptography and security goals, and synthesize the knowledge of different tools and techniques by applying them to an intensive real-world project

COMP 403 Operations Management (3 Credit Hours)
Pre-requisites: COMP 400A
Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support.
Outcomes:
Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making

COMP 404 Organizational Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course focuses on the manager's role in leading Organization Development and Change to maximize organization and individual effectiveness with a focus on Information Technology. The class explores Organization Development and Change theory, change practices, and discusses considerations a manager will face as a change agent in today's computing ecosystem.
Outcomes:
To understand the dynamics of change in organizations; learn techniques and strategies in managing change; develop skills that will enable a change agent mentality within the context of IT leadership

COMP 405 Database Administration (3 Credit Hours)
Pre-requisites: COMP 400B
Knowledge of the configuration and management skills needed for successful administration of a database server. The database administrator manages hardware, backup, security, tables and indexes, performance monitoring, query performance and optimization, and transaction performance. This course takes a user through the stages of maximizing the performance of a database server.
Outcomes:
Students will learn how to manage database performance, including topics such as the query optimizer, SQL EXPLAIN, table statistics, concurrency and transaction isolation levels, and security

COMP 406 Data Mining (3 Credit Hours)
Pre-requisites: COMP 400B
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP/MATH 215), MATH 212, and MATH 264
An introduction to advanced numerical analysis. Introduction to error analysis, numerical solution of equations, interpolation and approximation, numerical differentiation and integration, matrices, and solution of systems of equations, numerical solution of ordinary and partial differential equations.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will have an understanding of advanced numerical analysis and its applications

COMP 410 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 271 and COMP 264
The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes.
Outcomes:
Students will learn important topics in advanced operating systems and be able to make presentations on the topics

COMP 412 Open Source Computing (3 Credit Hours)
Pre-requisites: COMP 400B
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Outcomes:
Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively

COMP 413 Intermediate Object-Oriented Development (3 Credit Hours)
Pre-requisites: COMP 400B
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Outcomes:
Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development

COMP 417 Social and Ethical Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 418 Combinatorial Mathematics (3 Credit Hours)
Pre-requisites: MATH 313 or COMP 163
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Course equivalencies: X-COMP418/MATH418
Outcomes:
Students will learn mathematical techniques in discrete mathematics and applied combinatorics

COMP 420 Software Systems Analysis (3 Credit Hours)
Pre-requisites: COMP 400B or instructor permission
This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design.
Outcomes:
Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation

COMP 421 Math Models & Simulation (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
This course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered.
Course equivalencies: X-COMP421/MATH421/STAT421
Outcomes:
Student will learn foundations of discrete event simulation

COMP 422 Software Development for Wireless and Mobile Devices (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcomes:
Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming

COMP 424 Client-Side Web Design (3 Credit Hours)
Pre-requisites: COMP 400B
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.
Outcomes:
Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems

COMP 425 Rapid Applications Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.
Outcomes:
Students will create database applications and web applications using server-side technologies

COMP 428 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or Permission
In this course, major types of error-correcting codes, encoding and decoding , and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes.
Course equivalencies: X-COMP428/MATH428
Outcomes:
Students will learn both the theory and application of error-correcting codes

COMP 429 Natural Language Processing (3 Credit Hours)
Pre-requisites: ((COMP 400B or COMP 271) and (MATH 131 OR equivalent) and (STAT 103 OR equivalent)) OR instructor permission
In this course, students examine in depth the problems, methods, and applications of NLP. Topics will include information retrieval, sentiment analysis, machine translation, document classification, and question answering. We will also cover the underlying theory from probability, statistics, and machine learning that are crucial for the field.
Outcomes:
Students will explain areas of NLP such as information retrieval, sentiment analysis, machine translation, document classification, question answering; Students will apply tools of NLP to a domain of their choice

COMP 431 Cryptography (3 Credit Hours)
Pre-requisites: COMP 271 and (Comp 163 or MATH 313 or MATH 201) or Permission
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP431/MATH431
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 433 Web Services Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP.
Outcomes:
Students will learn the standards and protocols for deploying web services

COMP 434 Enterprise Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors.
Outcomes:
Students will learn the architecture of EJB, entity and message and session beans

COMP 435 Formal Methods in Software Engineering (3 Credit Hours)
Pre-requisites: COMP 400C
As embedded and distributed systems are becoming ever more ubiquitous, we depend increasingly on the correctness and security of the software that controls such systems. This course studies the formal specification, verification, and synthesis of software.
Outcomes:
An understanding of the role of formal methods in the construction of software systems; proficiency in representative methods and tools, such as static analysis, model checking, and runtime verification

COMP 436 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 437 Intro Concurrent Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 439 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 400D or equivalent and (COMP 400C or equivalent or COMP 413)
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.
Outcomes:
Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems

COMP 440 Computer Forensics Investigations (3 Credit Hours)
Pre-requisites: COMP 401
This course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 441 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.
Outcomes:
Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces

COMP 442 Server-Side Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264 and COMP 413
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 443 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
Students should also have completed COMP 400D or equivalent. This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 445 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course considers the safety, security, reliability, and privacy concerns of the embedded devices and cloud-based resources of the Internet of things. The course discusses methods for addressing these concerns.
Outcomes:
Design/implement secure software for embedded systems and the IoT; Establish safety, security, reliability, privacy goals for IoT-based systems; Understand security and privacy concerns of embedded systems and the IoT

COMP 446 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.
Outcomes:
Students will learn how telephone and data networks work; They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system

COMP 447 Intrusion Detection and Computer Forensics (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.
Outcomes:
Students will learn to configure ID systems (eg, snort) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 448 Network Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.
Outcomes:
Students will gain an understanding of how to secure computers and network environments

COMP 449 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 450 Applied Cryptography (3 Credit Hours)
This course covers the applications of modern Cryptography, while addressing theoretical foundations as necessary. The course begins by introducing modern Cryptographic notions of security in the form of adversary experiments/challenges. Practical applications of Cryptography using OpenSSL are discussed throughout the course. More recent advances in Cryptography are also discussed.
Outcomes:
Reason about the security of a cryptographic system under various assumptions; Implement and analyze various cryptographic protocols; Gain familiarity with OpenSSL; Understand the implications of Post-Quantum Cryptography and potential future avenues of application

COMP 451 Enterprise Networking (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent, and COMP 443, and COMP 400D or equivalent
Management of complex, high-speed, heterogeneous computer networks. Device management using SNMP and related protocols. Configuration and use of Network Management Systems. Data-flow management using LARTC and similar tools.
Outcomes:
Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms

COMP 452 Introduction to Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities; Describe how vulnerabilities can be leveraged into an attack; Describe a vulnerability or attack at the machine-code level

COMP 453 Database Programming (3 Credit Hours)
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.
Outcomes:
Students will learn application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 458 Big Data Analytics (3 Credit Hours)
Pre-requisites: At least a C in the following courses (COMP 405 or COMP 453) AND (COMP 406 or COMP 479 or STAT 408 or equivalent)
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 460 Algorithms & Complexity (3 Credit Hours)
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.
Outcomes:
Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 462 Advanced Computer Architecture (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.
Outcomes:
Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems

COMP 464 High-Performance Computing (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcomes:
Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems

COMP 468 Database System Design (3 Credit Hours)
The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases.
Outcomes:
Students learn the theory and practice of advanced database design and implementation; They will also gain an understanding of using commercial database environments such as Oracle

COMP 469 Product Invention and 3D printing (3 Credit Hours)
This course explores how things are made, including: physical design vs design on non-physical things; rapid prototyping; 3D printing; 2D conceptualization and sketching; modeling.
Outcomes:
Student will be able to: Visualize ideas via sketching basic shapes; Create 3D models using 3D modeling software; Use a 3D Printer; Give constructive feedback in peer review sessions

COMP 470 Software Quality and Testing (3 Credit Hours)
In this programming intensive course, students will learn effective automation, testing, and use of software metrics through the practices of Test Driven Development and Continuous Deployment.
Outcomes:
Students will be able to perform rigorous testing techniques that contribute to operational reliability, and identify programming practices that both contribute to software maintainability and help to avoid errors

COMP 471 Theory of Programming Languages (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

COMP 472 Compiler Construction (3 Credit Hours)
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn the theory and practice of how to build a compiler

COMP 473 Advanced Object Oriented Programming (3 Credit Hours)
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 474 Software Engineering (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP476/MATH476
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 477 IT Project Management (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 479 Machine Learning (3 Credit Hours)
Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 480 Computer Graphics (3 Credit Hours)
This course introduces advanced topics in modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 483 Computational Biology (4 Credit Hours)
Pre-requisites: BIOL 488
This course presents an algorithmic focus to problems in computational Biology. As such it is built on earlier courses on algorithms and bioinformatics. Current algorithmic approaches, software tools, and scientific literature are discussed.
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 484 Artificial Intelligence (3 Credit Hours)
This course advanced artificial intelligence concepts including theory, search techniques and programming.
Outcomes:
Student will learn the theory of artificial intelligence, search techniques, and be able to build small applications based on it

COMP 486 Computational Neuroscience (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques.
Outcomes:
Students will be able to adeptly apply mathematical and computational frameworks in the various domains of neuroscience

COMP 487 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 479
Deep learning is part of a broader family of machine learning methods based on artificial neural networks. This course will include key concepts of neural network algorithms as well as their applications in computer vision and natural language processing.
Outcomes:
Students will analyze popular modern neural architectures such as convolutional and recurrent neural networks, design and evaluate their own neural networks, and apply neural network models to a practical task

COMP 488 Computer Science Topics (1-4 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 490 Independent Project (1-6 Credit Hours)
Pre-requisites: Approval of the Computer Science faculty member supervisor
An independent project in computer science or related disciplines, under the supervision of a member of the faculty.

COMP 499 Internship (1-6 Credit Hours)
An opportunity to obtain experience in software development, design, networks, or related activities in computer science in a professional setting. The student must obtain the approval of the Graduate Program Director and the student's work supervisor. A final report from the student and the supervisor are required.

COMP 501 Equitable and Inclusive Computer Science Pedagogy (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers the design of computer science courses through an equity and inclusion lens, and covers evidence-based best practices as applied to specific student concerns. Includes basics of teaching and learning theory and pedagogical techniques, and equity, diversity, and justice concerns.
Outcomes:
Ability to explain justice-centered CS education; understand pedagogical frameworks; understand assessment approaches; understand Active Learning and Peer Instruction

COMP 502 Structure of Research Management and Funding (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers grant-proposal development, University compliance regulations, and laboratory and research management.
Outcomes:
Ability to create successful grant proposals and to understand research management

COMP 503 Technology Entrepreneurship (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This course provides aspiring researchers with the skills to pursue new ventures and technology commercialization. Students learn how to transition an innovation from the lab to the marketplace.

COMP 590 PhD Independent Study (3 Credit Hours)
Independent study for PhD research, for students who have not yet completed the required credit hours.
Outcomes:
This will depend on the exact study or research project the student engages in, but generically the outcome is to gain expertise in a study topic or obtain research results

COMP 595 Thesis Supervision (1 Credit Hour)
Supervision for students working on a thesis while not for other classes. Restricted to students enrolled in the MS in Computer Science.

COMP 600 Dissertation Supervision (1 Credit Hour)
Dissertation work under the supervision of a faculty member.
Outcomes:
This course is an independent study course supervised by a research advisor, the purpose of the course is to enable PhD students to maintain full-time status while they prepare their dissertation proposal, and specific goals will vary for individual students, but in general, PhD students should be maturing as researchers

COMP 605 Master of Science Study (1 Credit Hour)
Course for continuing master's degree students engaged in study.

COMP 610 Doctoral Study (1 Credit Hour)
Dissertation preparation course, for when student has completed coursework but before student has defended their dissertation proposal. Can be taken only twice during a doctoral student's career at LUC.
Outcomes:
This course is an independent study course supervised by a research advisor; The purpose of the course is to enable PhD students to maintain full-time status while they complete their dissertation; Specific goals will vary for individual students, but in general, PhD students should be maturing as researchers and beginning to establish intellectual independence

Computer Science (MS)

The Master of Science in Computer Science provides a broad background in the practical and theoretical foundations of Computer Science appropriate for those interested in research or in advanced career opportunities.

The M.S. in Computer Science offers the following areas of specialization:

- No Concentration (Default)
- Artificial Intelligence
- Cybersecurity
- Computer Systems
- Thesis Track

The Computer Science (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Information Technology (MS) (p. 1179)
- Software Engineering (MS) (p. 1182)

Curriculum

The Master of Science in Computer Science requires a total of between 30 and 43 credit hours (typically 10-15 courses).

Foundation courses Comp 400A-E can be waived based on prior or current undergraduate or graduate coursework; these waivers will be determined by the Graduate Program Director. If one or more foundation courses are waived, the corresponding number of credit hours will be subtracted from the degree requirements. A student cannot both receive a credit-hours reduction for having a course waived and also receive credit for taking that course.

Besides the traditional Master's program, the Computer Science (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

To achieve depth and breadth, Computer Science students must complete the following:

Code	Title	Hours
Foundation Courses		
COMP 400A	Object-Oriented Programming [1]	3
COMP 400B	Data Structures I [1]	3
COMP 400C	Data Structures II [1]	3
COMP 400D	Computing Tools and Techniques [1]	1
COMP 400E	Discrete Structures [1]	3
Required Courses		
COMP 417	Social and Ethical Issues in Computing [2]	3
COMP 460	Algorithms & Complexity [2,5]	3
Track/Major Requirements		**12**
No Concentration (Default)		
Required Course		
COMP 413	Intermediate Object-Oriented Development	
Select three of the following:		
COMP 410	Operating Systems	
COMP 433	Web Services Programming	
COMP 436	Markup Languages	
COMP 439	Distributed Systems	
COMP 442	Server-Side Software Development	
COMP 443	Computer Networks	
COMP 453	Database Programming	
COMP 464	High-Performance Computing	
COMP 471	Theory of Programming Languages	
COMP 473	Advanced Object Oriented Programming	
COMP 474	Software Engineering	
Artificial Intelligence [3]		
Required Course		
COMP 479	Machine Learning	
Select one of the following:		
COMP 429	Natural Language Processing	
COMP 487	Deep Learning	
COMP 488	Computer Science Topics [4]	
Select two of the following:		
COMP 406	Data Mining	
COMP 429	Natural Language Processing	
COMP 458	Big Data Analytics	
COMP 487	Deep Learning	
COMP 488	Computer Science Topics	
Cybersecurity [5]		
Required Courses		
COMP 401	Computer Security	
COMP 447	Intrusion Detection and Computer Forensics	

COMP 448	Network Security	
COMP 452	Introduction to Computer Vulnerabilities	
Computer Systems [3]		
Required Course		
COMP 410	Operating Systems	
Select three of the following:		
COMP 405	Database Administration	
COMP 413	Intermediate Object-Oriented Development	
COMP 439	Distributed Systems	
COMP 443	Computer Networks	
COMP 451	Enterprise Networking	
COMP 462	Advanced Computer Architecture	
COMP 464	High-Performance Computing	
COMP 472	Compiler Construction	
General Elective Courses		12
Total Hours		**30-43**

1 May be waived based on prior or current undergraduate or graduate coursework; these waivers will be determined by the Graduate Program Director.

2 Either required course above can be substituted with another graduate course under the discretion of Graduate Program Director if students had their equivalent in their undergraduate program.

3 Students may petition the Graduate Program Director to substitute COMP 460 with a fifth course from this list.

4 COMP 488 counts as an AI restricted elective only if the GPD determines that the course in question is related to Machine Learning.

5 For the Cybersecurity concentration, Comp 460 is not a required course.

For students who have taken Computer Science coursework at Loyola: many 400-level courses in the department are cross-listed with 300-level analogues (e.g. COMP 443 Computer Networks and COMP 343 Computer Networks). Students who enter the MS program after taking a Loyola course in this category must choose to take 400-level courses that are not cross-listed with any 300-level courses taken earlier, unless granted specific permission by the Graduate Program Director.

If a student has had a foundation course waived, departmental assistance will usually be necessary to allow the student to register for any other course having that foundation course as a prerequisite.

General Electives

General electives can be any COMP 400 (p. 1165)-level class, except the foundation courses listed above. The elective course options are common for all programs, differing only in the total number of credits required. There are numerous options for independent study, including a programming project, research, or a service-oriented project. Students may take up to a maximum of 6 credit hours of COMP 490 Independent Project and/or COMP 499 Internship to fulfill electives.

Thesis Tracks

MS in Computer Science students may elect to craft a master's thesis. Course work is strongly recommended over the thesis option, especially for those not planning on a research-oriented career. Many students pursuing the thesis option would be considering a PhD program.

Students wishing to do a thesis should discuss this option as early as possible with the Graduate Program Director. These may involve research in purely theoretical computer science (for example, development or analysis of algorithms), the development of a software package, or instrumentation, measurement, and analysis of existing systems (for example, studying network performance). Because of this wide range, there is no one formal course in research methods. Courses in the electives list contain a significant component of area-specific integrated research methods material. Students interested in writing a thesis are strongly urged to seek advising as early as possible as to which electives will be the most appropriate for the student's proposed area of research.

1. Identify a faculty advisor and select a tentative topic or area of research. The existing program allows you to take up to 6.0 hours of COMP 490 Independent Project. You will typically begin your research program in such a course, though you may also identify an advisor and select a tentative topic as part of a conventional classroom.
2. Secure permission to pursue the thesis option from the Graduate Program Director. The Graduate Program Director, in consultation with you and your chosen advisor, recommends a thesis committee to the Graduate School. The committee will consist of at least three faculty members; normally the committee chair will be the advisor.
3. Once required courses are concluded and a thesis committee is approved, you maintain full-time status by enrolling in the one-credit-hour COMP 605 Master of Science Study or COMP 595 Thesis Supervision.
4. You will then prepare a formal research proposal, in consultation with your advisor. This proposal must be submitted to your committee for review. Any research involving human subjects will required IRB approval or exemption *before* the Graduate School approves your proposal. After this step you are now ready to "conduct research" for the project.
5. Upon completion of your thesis, you will be required to formally defend your research. Schedule this with your committee. Your thesis should be in nearly final form. Typically you should give the committee three weeks to read the final draft of the thesis before the defense date. Once approved by your committee, the GPD will submit the ballot for Graduate School approval and the student will submit their thesis for publication in the university eCommons.

Suggested Sequence of Courses

Traditional Master's Program

This sequence assumes starting in Fall and taking one Internship in the following Summer.

Course	Title	Hours
Year 1		
Fall		
COMP 400A	Object-Oriented Programming [1]	3
COMP 400B	Data Structures I [1]	3
COMP 400D	Computing Tools and Techniques [1]	1
COMP 413	Intermediate Object-Oriented Development	3
COMP 417	Social and Ethical Issues in Computing	3
Elective 1		3
	Hours	**9-16**
Spring		
COMP 400C	Data Structures II [1]	3
COMP 401	Computer Security [1]	3

COMP 460	Algorithms & Complexity	3
Restricted Elective 1		3
Restricted Elective 2		3
	Hours	**9-15**
Summer		
COMP 499	Internship	3
	Hours	**3**
Year 2		
Fall		
Restricted Elective 3		3
Elective 2		3
Elective 3		3
	Hours	**9**
	Total Hours	**30-43**

[1] May be waived based on prior or current undergraduate or graduate coursework; these waivers will be determined by the Graduate Program Director. If course is not waived, students should meet with Graduate Program Director to reallocate coursework load.

Accelerated Master's Pathway

Students can take up to 12 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Students may take any 400-level course that is cross-listed with a 300-level course, as a replacement for that 300-level course in the BS program. For example, students may take Comp 413 and thereby satisfy an bachelors requirement for COMP 313. If a student wants to take a 400-level course that is not cross-listed with a 300-level course, they should consult the Graduate Program Director for the corresponding undergraduate credit. For students whose undergrad major is outside of COMP, the 400-level courses will have to serve as undergraduate electives.

The COMP-MS program has a no-concentration option and also three concentrations, in AI, Cybersecurity and Computer Systems. Students interested in the no-concentration plan for the COMP-MS should take COMP 413 (or 313) as an undergraduate. Students interested in the AI concentration should take COMP 479 (or 379). Students interested in the Cybersecurity concentration should take COMP 401 (or 301). Students interested in the Computer Systems concentration should take COMP 410.

The below list of courses are for students without concentration. Students should consult with the Graduate Program Director if pursuing a concentration.

Course	Title	Hours
Senior		
Fall		
COMP 413	Intermediate Object-Oriented Development	3
COMP 417	Social and Ethical Issues in Computing	3
	Hours	**6**
Spring		
COMP 460	Algorithms & Complexity	3
Restricted Elective 1		3
	Hours	**6**
Master's		
Fall		
Elective 1		3
Elective 2		3
Restricted Elective 2		3
	Hours	**9**
Spring		
Elective 3		3
Restricted Elective 3		3
COMP 499	Internship	3
	Hours	**9**
	Total Hours	**30**

STEM Designation

With a national shortage of professionals trained in STEM-related fields, employers are actively pursuing STEM degree holders. Distinguish yourself in technology with a STEM-designated degree.

Loyola's master's degree programs in Computer Science have been granted a STEM designation from the U.S. Department of Homeland Security. The program achieved STEM designation because of its emphasis on teaching students how to solve computer science problems with a suite of quantitative and technological tools.

Under this STEM classification, international students can extend their training in the U.S. by working in their field of study. Students can qualify for a 24-month OPT (Optional Practical Training) Extension, bringing the total OPT time granted to 36 months.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students will gain a broad background in the practical and theoretical foundations of Computer Science.
- Students in a specific concentration will gain mastery in that area, which students who pursue the thesis option will gain deep expertise in their research area.

Computer Science (PhD)

The PhD in Computer Science is a new research-focused doctoral program with the objective to help students develop proficiency in conceptualizing and implementing computer models and tools that address societal needs. This proficiency will enable students to analyze and review critically the scientific work in their area of interest and in the broader field of computer science.

Related Programs

Master's

- Computer Science (MS) (p. 1172)

Curriculum

The PhD in Computer Science requires 60 credit hours of coursework and a dissertation.

Required Coursework

Code	Title	Hours
COMP 413	Intermediate Object-Oriented Development	3
COMP 417	Social and Ethical Issues in Computing	3
COMP 460	Algorithms & Complexity	3
Three COMP 400-Level Electives		*9*
Four Doctoral Qualifying Courses [1]		**12**
Theory		
COMP 409	Advanced Numerical Analysis	
COMP 431	Cryptography	
COMP 471	Theory of Programming Languages	
Systems		

COMP 410	Operating Systems	
COMP 439	Distributed Systems	
COMP 462	Advanced Computer Architecture	
COMP 464	High-Performance Computing	
Software

COMP 474	Software Engineering	
COMP 453	Database Programming	
Artificial Intelligence		
COMP 429	Natural Language Processing	
COMP 458	Big Data Analytics	
COMP 479	Machine Learning	
COMP 487	Deep Learning	
Required COMP 500-Level Courses		
COMP 501	Equitable and Inclusive Computer Science Pedagogy	3
COMP 502	Structure of Research Management and Funding	3
COMP 503	Technology Entrepreneurship	3
Dissertation Research		*21*
Total Hours		**60**

[1] To establish qualifications for research, students must take courses covering at least three of the four pillars of computer science (theory, systems, software, and artificial intelligence). A grade of A is required in three courses for successful qualification for doctoral candidacy.

Research and Dissertation

The doctoral program culminates in a dissertation that makes an original contribution to the discipline. Along the way, doctoral students are expected to write peer-reviewed conference and journal articles, engage in community outreach, develop their pedagogical skills, and pursue increasingly complex research projects. Students are also expected to open-source their research projects. The final dissertation must be deposited in a publicly accessible database in accordance with Graduate School policy.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the PhD in Computer Science, students will be able to demonstrate:

- Fundamental understanding of the principles, major research findings and current open problems in their area of emphasis
- Effective scientific communication skills
- Proficiency in critical thinking (including social impact)
- Appropriate use of the scientific method
- Technical writing proficiency
- Original scholarship and the ability to conduct independent research
- Understanding of equitable and inclusive computer science pedagogy
- Understanding of the grant proposal development process and various funding agencies

Cybersecurity (MS)

As cybersecurity becomes an increasingly valuable discipline to protect organizations' devices, networks, software, and data from cyber threats and attacks, the demand for skilled well-trained cybersecurity professionals will continue to grow. This program equips students with the skills and experience needed to begin or advance a successful career in cybersecurity. The Cybersecurity MS program offers a balance of technical and experiential learning through interdisciplinary coursework, innovative instruction, and opportunities to engage in research, competitions, and internships. Guided by Loyola's faculty, composed of active researchers and experienced practitioners, students develop advanced knowledge and earn first-hand experience in cybersecurity fundamentals, threat analysis, secure system design, incident detection and response, ethical hacking and penetration testing, artificial intelligence and machine learning, and more.

Courses may be taken in person or online. The program can be completed remotely, in-person, or hybrid.

The Cybersecurity (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Computer Science (MS) (p. 1172)
- Information Technology (MS) (p. 1179)

Curriculum

The Master of Science in Cybersecurity requires a total of between 30 and 37 credit hours (typically 10-13 courses).

Besides the traditional Master's program, the Cybersecurity (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Foundation courses COMP 400A (https://catalog.luc.edu/search/?P=COMP%20400A), COMP 400B (https://catalog.luc.edu/search/?P=COMP%20400B), and COMP 400D (https://catalog.luc.edu/search/?P=COMP%20400D) can be waived based on prior or current undergraduate or graduate coursework; these waivers will be determined by the Graduate Program Director. If one or more foundation courses are waived, the corresponding number of credit hours will be subtracted from the degree requirements. A student cannot both receive a credit-hours

reduction for having a course waived and also receive credit for taking that course.

Code	Title	Hours
Foundation Courses		
COMP 400A	Object-Oriented Programming [1]	3
COMP 400B	Data Structures I [1]	3
COMP 400D	Computing Tools and Techniques [1]	1
Required Courses		
COMP 401	Computer Security	3
COMP 417	Social and Ethical Issues in Computing	3
COMP 447	Intrusion Detection and Computer Forensics	3
COMP 448	Network Security	3
COMP 452	Introduction to Computer Vulnerabilities	3
Elective Courses		
Select five of the following courses: [2]		15
COMP 410	Operating Systems	
COMP 431	Cryptography	
COMP 440	Computer Forensics Investigations	
COMP 443	Computer Networks	
COMP 445	Internet of Things Device and Application Security	
COMP 449	Wireless Networking and Security	
COMP 451	Enterprise Networking	
COMP 471	Theory of Programming Languages	
COMP 479	Machine Learning	
COMP 487	Deep Learning	
COMP 488	Computer Science Topics [3]	
COMP 490	Independent Project [4]	
COMP 499	Internship [5]	
Total Hours		**30-37**

[1] May be waived based on prior or current undergraduate or graduate coursework; these waivers will be determined by the Graduate Program Director.

[2] Substitutions to the list of elective courses are allowed upon approval from the Graduate Program Director.

[3] The topic must be cybersecurity-related. Approval of GPD is required.

[4] This consists of participating in cybersecurity competitions and/or cybersecurity research.

[5] Up to 6 credit hours allowed.

For students who have taken Computer Science coursework at Loyola: many 400-level courses in the department are cross-listed with 300-level analogues (e.g. COMP 443 (https://catalog.luc.edu/search/?P=COMP%20443) Computer Networks and COMP 343 (https://catalog.luc.edu/search/?P=COMP%20343) Computer Networks). Students who enter the MS program after taking a Loyola course in this category must choose to take 400-level courses that are not cross-listed with any 300-level courses taken earlier, with approval from the Graduate Program Director.

Suggested Sequence of Courses

Traditional Master's Program

Course	Title	Hours
Year One		
Semester I

Total Hours	**30**

[1] COMP 440, COMP 443, COMP 448, COMP 449, or COMP 479 may be taken in lieu of these courses to complete the 12 shared credits. Other courses (e.g. COMP 488 on cybersecurity) can be allowed per GPD approval.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Security Fundamentals: Strong understanding of the fundamental principles and concepts of cybersecurity, including confidentiality, integrity, availability, authentication, and authorization.
- Threat Analysis: Ability to identify and assess security threats and vulnerabilities and develop strategies to mitigate cybersecurity attacks.
- Secure System Design: capacity to design and implement secure systems and networks, considering security at all stages of the development lifecycle.
- Incident Detection and Response: Skills to detect, respond to, and recover from cybersecurity incidents, including malware infections, data breaches, and denial-of-service attacks.
- Ethical Hacking and Penetration Testing: Competency in the areas of ethical hacking and penetration testing. This includes adherence to ethical principles and professional standards for cybersecurity, the ability to assess the security of systems and networks and recommend remediation strategies.

Information Technology (MS)

The Master of Science in Information Technology is designed for current and aspiring professionals in charge of developing, implementing, operating, and managing information systems in a variety of organizations.

Students in this program will gain a broad technical understanding of current and emerging technologies in the industry, familiarity with systems engineering concepts, and a solid foundation in net-centric computing. They will also have a firm grasp of current and future effects of the convergence of the telecommunications, media, and information technology sectors.

The Information Technology (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Courses may be taken in person or online.

Related Programs

Master's

- Computer Science (MS) (p. 1172)
- Software Engineering (MS) (p. 1182)

Curriculum

The Master of Science in Information Technology requires a total of between 30 and 36 credit hours (generally 10-12 courses).

Foundation courses COMP 400A and COMP 400B can be waived based on prior or current undergraduate or graduate coursework; these waivers will be determined by the Graduate Program Director. If one or more foundation courses are waived, the corresponding number of credit hours will be subtracted from the degree requirements. A student cannot both receive a credit-hours reduction for having a course waived and also receive credit for taking that course.

The M.S. in Information Systems offers the following tracks of specialization: Data Management; Technology Management; IT Security; or Enterprise Networking.

Besides the traditional Master's program, the Information Technology (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

To achieve depth and breadth, Information Technology students must be complete the following:

Code	Title	Hours
Foundation Courses		
COMP 400A	Object-Oriented Programming [1]	3
COMP 400B	Data Structures I [1]	3
Required		
COMP 417	Social and Ethical Issues in Computing [2]	3
Select Three Courses in a Track [3]		**9**
Data Management (DM) Track		
COMP 405	Database Administration	
COMP 406	Data Mining	
COMP 425	Rapid Applications Development	
COMP 453	Database Programming	
COMP 488	Computer Science Topics	
Technology Management (TM) Track		
COMP 403	Operations Management	
COMP 404	Organizational Development	
COMP 420	Software Systems Analysis	
COMP 477	IT Project Management	
IT Security (IS) Track		
COMP 401	Computer Security	
COMP 440	Computer Forensics Investigations	
COMP 447	Intrusion Detection and Computer Forensics	
COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 452	Introduction to Computer Vulnerabilities	
Enterprise Networking (EN) Track		
COMP 443	Computer Networks	
COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 451	Enterprise Networking	
Select six graduate level COMP Electives [4]		*18*
Total Hours		**30-36**

1. May be waived based on prior or current undergraduate or graduate coursework; these waivers will be determined by the Graduate Program Director.
2. This course can be substituted with another graduate course at the discretion of Graduate Program Director if students had the equivalent in their undergraduate program.
3. Courses can be substituted at the discretion of the Graduate Program Director. Substitutions will usually be limited to special-topics courses (COMP 488 Computer Science Topics) which have learning outcomes closely related to other courses in the track in question.
4. Electives can be any COMP 400 level class (p. 1165), except the foundation courses

(COMP 400A, COMP 400B, COMP 400C, COMP 400D, COMP 400E). Students may take up to a maximum of 6 credit hours of COMP 490 Independent Project and/or COMP 499 Internship. You can go here (p. 1165) for a list of COMP 400-level course descriptions.

For students who have taken Computer Science coursework at Loyola: many 400-level courses in the department are cross-listed with 300-level analogues (e.g. COMP 443 Computer Networks and COMP 343 Computer Networks). Students who enter the MS program after taking a Loyola course in this category must choose to take 400-level courses that are not cross-listed with any 300-level courses taken earlier, unless granted specific permission by the Graduate Program Director. Students may not use an introductory course to satisfy a foundation or elective requirement.

Suggested Sequence of Courses

Traditional Master's Program

This sequence supposes that the student starts in Fall and takes one Internship course over the following summer.

Course	Title	Hours
Year 1		
Fall		
COMP 400A	Object-Oriented Programming [1]	3
COMP 417	Social and Ethical Issues in Computing	3
Track Course 1		3
	Hours	**6-9**
Spring		
COMP 400B	Data Structures I [1]	3
Track Course 2		3
Elective 1		3
	Hours	**6-9**
Summer		
COMP 499	Internship [2]	3
	Hours	**3**
Year 2		
Fall		
Track Course 3		3
Elective 3		3
Elective 4		3
	Hours	**9**
Spring		
Elective 5		3
Elective 6		3
	Hours	**6**
	Total Hours	**30-36**

[1] May be waived based on prior or current undergraduate or graduate coursework; these waivers will be determined by the Graduate Program Director. If course is not waived, students should meet with Graduate Program Director to reallocate coursework load.

[2] COMP 499 Internship would count as one of the six (6) required elective courses.

Accelerated Master's Pathway

Students can take up to 12 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Students may take any 400-level course that is cross-listed with a 300-level course, as a replacement for that 300-level course in the BS program. For example, students may take COMP 453 and thereby satisfy a bachelors requirement for COMP 353. If a student wants to take a 400-level course that is not cross-listed with a 300-level course, they should consult the Graduate Program Director for the corresponding undergraduate credit. For students whose undergrad major is outside of COMP, the 400-level courses will have to serve as undergraduate electives.

The ITEC-MS program has four tracks, in Cybersecurity, Enterprise Networking, Data Management and Technology Management. Students should identify a track that interests them, and then take at least one graduate course as an undergraduate in that track, and preferably two, although the track can be changed later. For the Cybersecurity track, students should take COMP 401 (or 301). For the Enterprise Networking track, students should take COMP 443 (or 343). For the Data Management track, students should take one of COMP 405 or COMP 453 (or 305/353). For the Technology Management track, students should take at least one of COMP 403, COMP 404, COMP 420 or COMP 477, or the undergraduate equivalent.

Course	Title	Hours
Senior		
Fall		
COMP 417	Social and Ethical Issues in Computing	3
Track Course 1 [1]		3
	Hours	**6**
Spring		
Track Course 2 [1]		3
Track Course 3 [1]		3
	Hours	**6**
Master's		
Fall		
Elective 1		3
Elective 2		3
Elective 3		3
	Hours	**9**
Spring		
Elective 4		3
Elective 5		3
Elective 6		3
	Hours	**9**
	Total Hours	**30**

[1] Track courses can be swapped for electives in the senior year in consultation with the Graduate Program Director.

STEM Designation

With a national shortage of professionals trained in STEM-related fields, employers are actively pursuing STEM degree holders. Distinguish yourself in technology with a STEM-designated degree.

Loyola's master's degree programs in Computer Science have been granted a STEM designation from the U.S. Department of Homeland Security. The program achieved STEM designation because of its emphasis on teaching students how to solve computer science problems with a suite of quantitative and technological tools.

Under this STEM classification, international students can extend their training in the U.S. by working in their field of study. Students can qualify for a 24-month OPT (Optional Practical Training) Extension, bringing the total OPT time granted to 36 months.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students will gain familiarity with the broad outlines of computer technology, and will gain specialization in one of the track areas (Data Management, Technology Management, IT Security and Enterprise Networking).

Networking and Information Security Certificate

As of Fall 2026, this program is no longer accepting applicants.

This certificate program is focused on the increasingly important area of network security within the broader field of information technology. The coursework includes broader courses like Computer Networks and Network Security, plus more specialized courses on Intrusion Detection, Wireless Security, and Computer Forensics.

- Computer Science (MS) (p. 1172)

Curriculum

Code	Title	Hours
COMP 447	Intrusion Detection and Computer Forensics	3
Select Two Electives		*6*
COMP 443	Computer Networks	
COMP 448	Network Security	
COMP 449	Wireless Networking and Security	
COMP 488	Computer Science Topics	
Total Hours		**9**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Outcomes for all Certificate Programs:

- Students will have developed new technical skills in the area of their specializations.
- Students will have a better understanding of the domain contexts within which these skills can be applied.
- Students will have acquired a credential and additional knowledge allowing them to advance professionally.
- Students will be prepared to enter a graduate program in the Computer Science Department, with the transfer of certificate credits toward their master's degree.
- Students will be able to manage and address security concerns in networks, including wireless networks.
- Students will acquire the skills to monitor and secure computers and network environments.
- Students will have a fundamental understanding of computer forensics, and be able to design and implement a forensics examination.

Software Engineering (MS)

The Master of Science in Software Engineering caters to students interested in software engineering, software development, and other contemporary topics of long-term value to the industry. Most early careers in the industry are based on either software development or managerial aspects of software development. This degree places more weight on software development. For those seeking a greater focus on managerial aspects, we offer the M.S. in Information Technology (p. 1179).

The Software Engineering (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Computer Science (MS) (p. 1172)
- Information Technology (MS) (p. 1179)

Curriculum

The Master of Science in Software Engineering requires a total of between 30 and 40 credit hours (typically 10-14 courses).

Foundation courses Comp 400A-D can be waived based on prior or current undergraduate or graduate coursework; these waivers will be determined by the Graduate Program Director. If one or more foundation courses are waived, the corresponding number of credit hours will be subtracted from the degree requirements. A student cannot both receive a credit-hours reduction for having a course waived and also receive credit for taking that course.

Besides the traditional Master's program, the Software Engineering (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

To achieve depth and breadth, Software Engineering students must complete the following:

Code	Title	Hours
Foundation Courses		
COMP 400A	Object-Oriented Programming (Foundation Courses) [1]	3
COMP 400B	Data Structures I [1]	3
COMP 400C	Data Structures II [1]	3
COMP 400D	Computing Tools and Techniques [1]	1
Required Courses		
COMP 413	Intermediate Object-Oriented Development (Required Courses:)	3
COMP 417	Social and Ethical Issues in Computing	3
Restricted Electives		**9**
At least three courses, including at least one from Group 1		
Group 1		
COMP 424	Client-Side Web Design	
COMP 433	Web Services Programming	
COMP 434	Enterprise Software Development	
COMP 437	Intro Concurrent Programming	
COMP 439	Distributed Systems	
COMP 442	Server-Side Software Development	
COMP 460	Algorithms & Complexity	

COMP 471	Theory of Programming Languages	
COMP 473	Advanced Object Oriented Programming	
COMP 474	Software Engineering	
Group 2		
COMP 410	Operating Systems	
COMP 412	Open Source Computing	
COMP 420	Software Systems Analysis	
COMP 436	Markup Languages	
COMP 441	Human-Computer Interaction	
COMP 453	Database Programming	
COMP 464	High-Performance Computing	
General Elective Courses [2]		*15*
Total Hours		**30-40**

[1] May be waived based on prior or current undergraduate or graduate coursework; these waivers will be determined by the Graduate Program Director.

[2] Electives can be any COMP 400 level class (p. 1165), except the foundation courses (COMP 400A, COMP 400B, COMP 400C, COMP 400D). Students may take up to a maximum of 6 credit hours of COMP 490 Independent Project and/or COMP 499 Internship.

For students who have taken Computer Science coursework at Loyola: many 400-level courses in the department are cross-listed with 300-level analogues (e.g. COMP 443 Computer Networks and COMP 343 Computer Networks). Students who enter the MS program after taking a Loyola course in this category must choose to take 400-level courses that are not cross-listed with any 300-level courses taken earlier, unless granted specific permission by the Graduate Program Director.

If a student enters the program with an academic record of success in a a course similar to COMP 413 Intermediate Object-Oriented Development, or if the student can demonstrate programming experience with the concepts of COMP 413 Intermediate Object-Oriented Development, then the Graduate Program Director may substitute for the COMP 413 Intermediate Object-Oriented Development requirement a course in Group 1 or 2 that has COMP 413 Intermediate Object-Oriented Development as a prerequisite.

The department may substitute newly created permanent courses as members of either Group 1 or Group 2. Similarly, COMP 488 Computer Science Topics offerings may also be designated as members of either Group 1 or Group 2. Students are responsible for verifying any such substitutions in advance with their Graduate Program Director.

Suggested Sequence of Courses

Traditional Master's Program

Course	Title	Hours
Year 1		
Fall		
COMP 400A	Object-Oriented Programming [1]	3
COMP 400B	Data Structures I [1]	3
COMP 417	Social and Ethical Issues in Computing	3
Elective 1		3
	Hours	**6-12**
Spring		
COMP 400C	Data Structures II [1]	3
COMP 400D	Computing Tools and Techniques [1]	1
COMP 413	Intermediate Object-Oriented Development	3
Restricted Elective - Group 1		3
	Hours	**6-10**
Summer		
COMP 499	Internship [2]	3
	Hours	**3**
Year 2		
Fall		
Restricted Elective - Either Group		3
Elective 3		3
Elective 4		3
	Hours	**9**
Spring		
Restricted Elective - Either Group		3
Elective 5		3
	Hours	**6**
	Total Hours	**30-40**

[1] May be waived based on prior or current undergraduate or graduate coursework; these waivers will be determined by the Graduate Program Director. If course is not waived, students should meet with Graduate Program Director to reallocate coursework load.

[2] COMP 499 Internship would count toward one of (5) five general electives.

Accelerated Master's Pathway

Students can take up to 12 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Students may take any 400-level course that is cross-listed with a 300-level course, as a replacement for that 300-level course in the BS program. For example, students may take COMP 413 and thereby satisfy an bachelors requirement for COMP 313. If a student wants to take a 400-level course that is not cross-listed with a 300-level course, they should consult the Graduate Program Director for the corresponding undergraduate credit. For students whose undergrad major is outside of COMP, the 400-level courses will have to serve as undergraduate electives.

Students interested in the SWEN-MS degree should take COMP 413 (or 313) as an undergraduate, and at least one other course on the list of restricted electives for the SWEN-MS program.

The following four courses are a reasonable fit, but your circumstances may differ.

Course	Title	Hours
Senior		
Fall		
COMP 413	Intermediate Object-Oriented Development	3
COMP 417	Social and Ethical Issues in Computing	3
	Hours	**6**
Spring		
Restricted Elective - Group 1		3

Restricted Elective - Either Group		3
	Hours	**6**
Master's		
Fall		
Restricted Elective - Either Group		3
Elective 1		3
Elective 2		3
	Hours	**9**
Spring		
COMP 499	Internship [1]	3
Elective 4		3
Elective 5		3
	Hours	**9**
	Total Hours	**30**

[1] COMP 499 Internship would count toward one of (5) five general electives.

STEM Designation

With a national shortage of professionals trained in STEM-related fields, employers are actively pursuing STEM degree holders. Distinguish yourself in technology with a STEM-designated degree.

Loyola's master's degree programs in Computer Science have been granted a STEM designation from the U.S. Department of Homeland Security. The program achieved STEM designation because of its emphasis on teaching students how to solve computer science problems with a suite of quantitative and technological tools.

Under this STEM classification, international students can extend their training in the U.S. by working in their field of study. Students can qualify for a 24-month OPT (Optional Practical Training) Extension, bringing the total OPT time granted to 36 months.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given

explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students will gain familiarity with software development in a wide range of application contexts, using a range of programming languages and tools.

Criminal Justice and Criminology

The Department of Criminal Justice and Criminology offers a master's degree that prepares students to excel in today's evidence-based criminal justice system. A supportive environment accommodates the diversity of our students' lives with evening classes, option of part-time or full-time status, and flexible tailoring of electives. The Department is well-connected to local and federal agencies. Graduates have been placed in all areas of the criminal justice system including state and county agencies, and federal agencies such as the FBI, Secret Service, Federal Probation, Homeland Security, Federal Pretrial Services and DEA. Graduates also have been admitted into PhD programs or law schools.

Graduate Programs

- Criminal Justice and Criminology (MA) (p. 1187)

Criminal Justice & Criminology (CJC)

CJC 401 Politics and Policies in the Criminal Justice System (3 Credit Hours)
This course examines the interactional processes within and among the criminal justice system's components and their relationships to other public and private institutions. The role of politics in policy formulation, the policy making process, and the consequences of current policies on the operation of the criminal justice system are discussed.
Outcomes:
Students will understand the CJ policy-making process, including which factors facilitate/inhibit effective policy development and implementation, and how CJ research is used to formulate, implement, and evaluate CJ policies

CJC 402 Theories of Criminal Behavior (3 Credit Hours)
This is a comparative review of dominant contemporary theories and research on the causes of crime and delinquency. Competing theories on the causes of crime are analyzed, and their empirical support and implications for prevention programs and interventions are discussed.
Outcomes:
To analyze and discuss contemporary theories of criminal behavior

CJC 403 Research Methods and Program Evaluation (3 Credit Hours)
This course provides students with the substantive knowledge to be critical consumers of research studies and program evaluations. Students learn how to critique the internal, construct, and external validity of program evaluations and data collection efforts that seek to understand criminal behavior or the operation of the criminal justice system.
Outcomes:
To analyze and critique program evaluations and research designs

CJC 404 Applied Data Analysis and Interpretation (4 Credit Hours)
Students learn the skills and knowledge necessary to be critical consumers of statistical information often present in everyday criminal justice practice. Students learn which statistical tools are appropriate for specific measures and research questions, as well as how to generate and interpret statistical output using a statistical software package.
Outcomes:
Students will be able to select the correct statistical tools to use for conducting statistical analyses, use a statistical software package to analyze data, and interpret statistical output

CJC 408 Applied Research in Criminal Justice & Criminology (2 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404
In their final semester of the CJC graduate program, students complete a semester-long research project. This culminating experience is student-initiated and supervised by a member of the graduate faculty. This project encourages advanced students to approach the multifaceted problem of research as a set of interrelated issues ranging from tasks of concept formation and theory construction through research design and data collection to the assessment and analysis of the generated data.
Outcomes:
Students should be able to synthesize criminological theory, criminal justice policy, research methods, and data analysis into a final applied research project

CJC 410 Advanced Topics in Criminology (3 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on theories or contemporary issues concerning criminal and victim behavior. Examples of topics include: Drugs and Violence; Gender and Crime; Intimate Partner Violence; Sexual Violence; Human Trafficking; Environmental Crime; Victimology; International Criminology; Advanced Criminology; Race, Ethnicity, and Crime.
Outcomes:
Students will understand a contemporary issue in criminology with a special emphasis on research and theory developments

CJC 411 Advanced Topics in Policing (3 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of policing, including community- and problem-oriented policing, situational crime prevention, crime analysis, and Comp-Stat approaches to policing practice and management.
Outcomes:
Students will understand a contemporary issue in policing with a special emphasis on research and theory developments

CJC 412 Advanced Topics in Courts (3-6 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on contemporary issues in courts. Examples of topics include: International Criminal Law and Anti-Terrorism Enforcement, The American Jury; Death Penalty; International Criminal Law; Public Views of Justice; Media, Culture, and Criminal Law; Legal Rights of Children.
Outcomes:
Students will understand a contemporary issue in the court system with a special emphasis on research and theory developments

CJC 413 Advanced Topics in Corrections (3-6 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of corrections. Examples of graduate courses that will be offered as special topics courses under CJC 413 include: Principles of Punishment, Sentencing Policy, Restorative Justice, Risk Assessment, Re-Entry, What Works in Corrections, Mass Incarceration, and Juvenile Corrections.
Outcomes:
Students will understand a contemporary issue in corrections with a special emphasis on research and theory developments

CJC 414 General Special Topics (3 Credit Hours)
Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System.
Outcomes:
To analyze and discuss topics in criminal justice

CJC 415 Mental Illness and Crime (3 Credit Hours)
Pre-requisites: Graduate students only
This course explores the relationship of mental illness to crime and violence, the policies and programs concerning the treatment of individuals with mental illness in the criminal justice system, including the nature, prevalence and consequences of mental disorder among criminal offenders.
Outcomes:
Students will understand the history and development of research on mental illness and crime, assessments of risk for violence, as well as legal issues surrounding mentally disordered victims and offenders

CJC 416 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control.
Outcomes:
Students will understand how international legal and criminal justice systems interact to investigate, measure, and prosecute transnational crimes including trafficking, human rights violations, and war crimes

CJC 431 Criminal Victimization (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course critically explores the physical, emotional, and financial harm people suffer because of illegal criminal activities. The focus of the course is on the nature and extent of victimization, the estimation of risk, theories about the causes of victimization, and the consequences of victimization experiences. In addition, students will also study the emergence of special victims' groups, the implications of a victim-orientated perspective for the administration of justice, and system alternatives such as restitution and restorative justice.
Outcomes:
Articulate the history, nature, and magnitude of criminal victimization in the United States; Describe the theoretical underpinnings of victimization and current research on the risk and protective factors of criminal victimization; Differentiate the legal and social responses to criminal victimization; Describe the primary and secondary impact of criminal victimization on victims, their families, friends, and communities; Analyze data to examine trends and patterns of criminal victimization; Analyze data to examine the causes and correlates of criminal victimization; Identify which interventions and strategies offer the most promise for effective implementation and impact on preventing criminal victimization

CJC 432 Firearm Violence (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course will provide a comprehensive overview of the extent and nature of firearm violence, existing laws related to the acquisition, ownership and use of firearms, patterns and reasons for firearm ownership and acquisition, the various attempts to control access to firearms, and the effectiveness of such efforts. This course will explore both the criminal justice and public health perspectives and approaches to reducing firearm violence. Each discipline's framework, strategies, and challenges will be examined, with a focus on the opportunities and challenges of implementing interdisciplinary approaches in a "real world" setting. The class will emphasize the application of objective and rigorous scientific methods and research to understanding the extent and nature of firearm violence and evaluating interventions within the context of what is oftentimes a politically and emotionally charged debate.
Outcomes:
Articulate the extent and nature of firearm violence in the United States in a sophisticated way that illustrates an understanding of existing measures of firearm violence; Describe the strengths and limitations of existing data to measure the extent and nature of firearm violence, patterns and levels of firearm ownership, and firearm markets; Differentiate between the criminal justice and public health frameworks, and how each approaches firearm violence; Describe the importance and challenges of responding to complex issues like firearm violence from a multidisciplinary/intersectional/collaborative approach; Analyze data to examine trends and patterns of firearm violence; Analyze data to examine the correlates and causes of firearm violence; Describe evidence-based interventions and strategies to reduce firearm violence; Identify which interventions and strategies offer the most promise for effective implementation and impact on firearm violence

CJC 433 Wrongful Convictions and the Law (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
Wrongful convictions often include two types of errors, an innocent person is punished, and a guilty person escapes justice. In this class, we will explore how such errors occur by focusing on both investigation and adjudication practices. We will then apply what we have learned about criminal procedure to analyze individual wrongful conviction cases. This is an interactive course. Students will review case intake documents from a cooperating legal organization and help inform their case decisions. We will also work with the National Registry of Exonerations to draft case profiles for people who have already been exonerated. Ultimately, we will weigh the challenges of upholding defendants' rights without compromising public safety or producing additional errors.
Outcomes:
Evaluate criminal cases for potential errors, both episodic and systemic; Describe defendants' due process rights particularly under the 5th and 6th amendments and how these rights relate to criminal procedure in practice; Explain judicial opinions and their ability to remedy wrongful convictions; Identify the limitations of the appellate process and post-conviction review; Produce written content of publishable quality, with a special focus on accuracy and fact checking

CJC 499 Independent Study (1-6 Credit Hours)
Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic. Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

CJC 501 Thesis Research (2 Credit Hours)
Pre-requisites: Approval of Graduate Program Director and Grade of A- or better in CJC 403 and CJC 404
Supervision and guidance are given as students conduct their independent Masters' thesis research.
Outcomes:
Master's Thesis

CJC 502 Practicum in Criminal Justice (3-6 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404 Outcomes: Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency, and identify/describe the link between their field experience and prior courses through a research paper
This course enables the student to apply their knowledge (conceptual, theoretical, and methodological) in a practical agency setting.

CJC 595 Thesis Supervision (1 Credit Hour)
This is a non-credit course. Students who are working on approved master's thesis research and are not registered for any course are required to register for thesis supervision.

CJC 605 Master's Study (1 Credit Hour)
Pre-requisites: Completion of the graduate core courses; This course is a non-credit means of permitting students to be formally enrolled at Loyola while completing their culminating experience (i.e
, 408 project or thesis).

Criminal Justice and Criminology (MA)

The Master of Arts in Criminal Justice and Criminology provides students with a cutting-edge education that will prepare them to assume leadership roles in criminal justice and related agencies as well as to pursue more advanced educational opportunities.

The Criminal Justice and Criminology (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Cybersecurity (MS) (p. 1176)

Doctoral

- Social Work (PhD) (p. 1398)

Combined

- Political Science/Law (MA/JD) (p. 1888)

Curriculum

The Master of Arts in Criminology and Criminal Justice requires 30 credit hours of coursework, consisting of five required courses (including a culminating experience) and five elective courses. In order to demonstrate cumulative proficiency, students are required to pass either Applied Research in Criminal Justice & Criminology or complete a thesis as their culminating experience. By default, all students are placed in the non-thesis option unless they select and are approved for the thesis option.

Besides the traditional Master's program, the Criminal Justice and Criminology (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Coursework Requirements

Code	Title	Hours
Required Courses		
CJC 401	Politics and Policies in the Criminal Justice System	3
CJC 402	Theories of Criminal Behavior	3
CJC 403	Research Methods and Program Evaluation [1]	3
CJC 404	Applied Data Analysis and Interpretation [1]	4
Culminating Experience Course		
CJC 408	Applied Research in Criminal Justice & Criminology [1,3]	2
or CJC 501	Thesis Research	
Select Five Electives [2]		**15**
CJC 416	International Criminal Justice	
CJC 415	Mental Illness and Crime	
CJC 431	Criminal Victimization	
CJC 432	Firearm Violence	
CJC 433	Wrongful Convictions and the Law	
CJC 499	Independent Study	
CJC 502	Practicum in Criminal Justice	
Variable Topics Electives - Maximum of 3 in each area		
CJC 410	Advanced Topics in Criminology	
CJC 411	Advanced Topics in Policing	
CJC 412	Advanced Topics in Courts	

CJC 413	Advanced Topics in Corrections	
CJC 414	General Special Topics	
Total Hours		**30**

1 Student must earn a grade of **B** or better in order to graduate (a B- or below will not fulfill this requirement), and class must be repeated if grade below a B is earned.

2 Students are required to take at least **three** graduate-level electives in the Department of Criminal Justice & Criminology. In consultation with the Graduate Program Director, students may also select up to two graduate-level electives among those offered within the Department of Criminal Justice & Criminology as well as from other programs such as Social Work, Psychology, Women's Studies and Gender Studies, Public Policy, and Sociology. Students can take no more than one online graduate-level elective outside of the Department.

3 Students choosing the thesis track will complete a research thesis and take CJC 501 Thesis Research, while students who choose a non-thesis option will complete a major research paper and take CJC 408 Applied Research in Criminal Justice & Criminology.

Thesis Option

Students who have aspirations to pursue research in their career, or pursue a PhD, should consider the thesis track. Optimally, students should complete CJC 403 during the fall semester of their first year in the graduate program. In order to be approved for the thesis option, students must receive permission from the Department of CJC's Graduate Committee. The following requirements must be met:

- Completion of CJC 403 Research Methods and Program Evaluation with a grade of A- or better (no exceptions);
- Submission of a class paper to demonstrate writing skills that are acceptable to the Department of CJC's Graduate Committee; and,
- Submission of a thesis approval form that provides a brief description of the proposed research question, the proposed methodology, and a detailed timeline.

Once a student has selected the thesis option, they will sign a written agreement acknowledging that they cannot switch back to the non-thesis option if it becomes too difficult or takes longer than anticipated.

Students will work with their thesis chairperson to complete an acceptable draft of their thesis proposal. The thesis proposal draft will consist of a detailed literature review, research questions or hypotheses, research design, analysis plan, and a discussion of the strengths and limitations of the proposed research.

If data collection involves human participants, students must follow all of the requirements established by Loyola's Institutional Review Board (IRB) for the Protection of Human Subjects. Students cannot submit an IRB application until their thesis proposal is officially approved.

Once the formal thesis proposal has been approved, students will then work towards the completion of the research and composition of the thesis. Once final draft is reviewed and approved by entire committee, the student will make a formal presentation (defense) of the thesis and submit it to a publicly available database per Graduate School policies.

Suggested Sequence of Courses

Traditional Master's Program

Course	Title	Hours
Year 1		
Fall		
CJC 401	Politics and Policies in the Criminal Justice System	3
CJC 403	Research Methods and Program Evaluation	3
Elective 1		3
	Hours	**9**
Spring		
CJC 402	Theories of Criminal Behavior	3
CJC 404	Applied Data Analysis and Interpretation	4
Elective 2		3
	Hours	**10**
Year 2		
Fall		
Elective 3		3
Elective 4		3
Elective 5		3
	Hours	**9**
Spring		
Select one of the following:		2
CJC 408	Applied Research in Criminal Justice & Criminology	
CJC 501	Thesis Research	
	Hours	**2**
	Total Hours	**30**

Accelerated Master's Pathway

Students can take up to 13 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Course	Title	Hours
Senior		
Fall		
CJC 401	Politics and Policies in the Criminal Justice System [1]	3
CJC 403	Research Methods and Program Evaluation [1]	3
	Hours	**6**
Spring		
CJC 402	Theories of Criminal Behavior [1]	3
CJC 404	Applied Data Analysis and Interpretation [1]	4
	Hours	**7**
Master's		
Fall		
Elective 1		3
Elective 2		3
Elective 3		3
	Hours	**9**
Spring		
Elective 4		3

Elective 5		3
Select one of the following:		2
CJC 408	Applied Research in Criminal Justice & Criminology	
CJC 501	Thesis Research	
	Hours	**8**
	Total Hours	**30**

[1] Students can choose to take an Elective course in the senior year in lieu of this course. Students will need to take this required course when it is offered in the Master's year.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The CJC graduate curriculum incorporates six Student Learning Outcomes:

- Graduates will be able to analyze and explain the criminal justice policy-making process.
- Graduates will be able to critically analyze and apply historical and contemporary theories of delinquency and criminality to design, evaluate, and inform effective prevention programs and intervention strategies.
- Graduates will be able to critically evaluate research designs to assess the quality, rigor, and scholarly contributions of empirical studies in criminology and criminal justice.
- Graduates will be able to generate, analyze, and accurately interpret statistical output using appropriate statistical software to inform evidence-based decision-making in criminal justice contexts.
- Graduates will be able to systematically design and conduct research by integrating concept formation, theory construction, research design, data collection, and data analysis as interrelated components of the research process.

Data Science

Data Science

Over the last several decades there has been an explosion of data in nearly every field imaginable including business, marketing, sports, as well as scientific fields such as medicine, genetics, and neuroscience. As a result of this deluge of data, the demand for individuals with the skills to manage, analyze, and communicate results based on large amounts of data is as high as it has ever been.

Data science is a multi-disciplinary field combining techniques from mathematics, computer science, and statistics to organize, analyze, visualize, and extract useful information from data.

At the graduate level, students can pursue a Master's Degree (M.S.) in Data Science with an option between thesis track and non-thesis track. In addition, undergraduate students have the option to pursue a Bachelor's and Master's degree in five total years through the 4+1 program.

Further Information

If you have questions about the graduate programs in Data Science at Loyola University Chicago, please contact Dr. Yasin Silva, Graduate Program Director for Data Science, and Dr. Swarnali Banerjee, Director of the Data Science Program.

Graduate Programs

- Data Science (MS) (p. 1191)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

DATA SCIENCE GRADUATE HANDBOOK

Access the latest version of the Data Science Graduate Handbook (https://www.luc.edu/media/lucedu/cas-datascience/Data_Science_Graduate_Handbook.pdf). This document contains the academic policies for the Data Science MS and BS/MS programs, a description of the general duties of graduate assistants in these programs, and multiple resources available for data science students.

DSCI 401 Introduction to Data Science (4 Credit Hours)
Pre-requisites: Restricted to Graduate students
This course provides students with an introduction to data science using the R programming language covering such topics as data wrangling, data visualization, interacting with databases, principles of reproducible research, building simple statistical models/machine learning and data science ethics.
Outcomes:
Students will obtain an extensive background in the basic tools used in the field

DSCI 470 Data Science Consulting (2 Credit Hours)
Pre-requisites: STAT 408
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
Outcomes:
Students will apply methods learned in prior classes to address a real-world problem, gain oral and written presentation skills, and improve collaboration skills

DSCI 494 Data Science Research Design (2 Credit Hours)
Restricted to DSCI Graduate students. Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement research design practices in data science

DSCI 499 Data Science Research (1-8 Credit Hours)
Restricted to DSCI Graduate students. Students will conduct independent hypothesis-driven data science research under faculty guidance. Research efforts will include literature surveys, research design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for data science research

DSCI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: DSCI 499
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

Data Science (MS)

Students earning a MS in Data Science will gain a wide variety of skills needed to work with many different types of data, and to analyze, visualize, and extract useful information from data in a variety of ways. They will apply those skills in various contexts, especially during their capstone consulting class or thesis work. This 30-credit program has two tracks (thesis and non-thesis), can be completed full-time or part-time, and includes courses from Computer Science, Statistics, and Mathematics.

The Data Science (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Electives

The list of electives is divided into primary and secondary electives. Primary electives are recommended classes to all data science students. Secondary electives are courses that may be a good fit for students with a specific area of emphasis. Students need to coordinate with the Graduate Program Director if they plan to take a secondary elective.

Code	Title	Hours
Primary COMP electives		
COMP 406	Data Mining	3
COMP 429	Natural Language Processing	3
COMP 484	Artificial Intelligence	3
COMP 487	Deep Learning	3
COMP 488	Computer Science Topics (If the topic is relevant to data science. Example: Topics in Computer Vision)	1-4
Primary STAT electives		
STAT 411	Applied Survival Analysis	3
STAT 421	Math Modeling & Simulation	3
or COMP 421	Math Models & Simulation	
STAT 451	Applied Nonparametric Methods	3
STAT 444	Longitudinal Data Analysis and Mixed Modeling	3
STAT 488	Topics in Statistics (If the topic is relevant to data science. Examples: Multivariate Statistics, Bayesian Statistics)	1-3
Secondary COMP electives		
COMP 436	Markup Languages	3
COMP 441	Human-Computer Interaction	3
COMP 460	Algorithms & Complexity	3
COMP 405	Database Administration	3
COMP 412	Open Source Computing	3
COMP 413	Intermediate Object-Oriented Development	3
COMP 418	Combinatorial Mathematics	3
COMP 424	Client-Side Web Design	3
COMP 474	Software Engineering	3
COMP 422	Software Development for Wireless and Mobile Devices	3

COMP 417	Social and Ethical Issues in Computing	3
COMP 490	Independent Project	1-6
COMP 499	Internship	1-6
COMP 477	IT Project Management	3
Secondary STAT electives		
STAT 403	SAS Program & Applied Statistics	3
STAT 407	Statistical Design	3
STAT 404	Probability & Statistics I	3
STAT 405	Probability & Statistics II	3
STAT 498	Independent Study Statistics	1-6

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate

degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- The ability to manage large data sets in preparation for data science analysis.
- A working knowledge of statistical techniques and computer algorithms, and the ability to apply these methods to a wide array of real-world problems.
- The ability to perform a data science analysis from beginning to end while adhering to the principles of reproducible and ethical research.
- The ability to program in both the R and Python programming languages.
- Complete a project demonstrating competence in the field of data science. Non-thesis track: Students will be required to complete a real-world data science project prior to graduating from this program, either through our consulting course, an internship, an independent study, or other appropriate project. Thesis track: Students will be required to undertake a research project culminating in a thesis.

Digital Humanities

Digital Humanities offers an interdisciplinary Master of Arts program. Coursework is designed to provide technical skills to humanities students, as well as humanistic scholarly research methods to those with a technical or computer science background.

GRADUATE PROGRAMS

- Digital Humanities (MA) (p. 1195)

DIGH 400 Introduction to Digital Humanities Research (3 Credit Hours)
Enrollment in DIGH 400 is the prerequisite for DIGH 401, 402, 500, 595. An introduction to the digital humanities, work in a variety of humanities disciplines--literature, art, philosophy, theology, and history--that involves computer assistance in conducting or presenting research. This includes, for example, digitizing, markup, editing, publishing, archiving, analyzing, visualization, modeling, interpretive gaming, and instructional and interface design. This course will emphasize research questions and methods from a range of humanities disciplines--not computer technology per se but ways that computing can further humanities research agendas.
Outcomes:
Knowledge of how computing affects research in humanities, critical thinking about technology and humanities, awareness of broad social and ethical questions surrounding old and new, print and digital, media in contemporary culture

DIGH 401 Introduction to Computing (3 Credit Hours)
Pre-requisites: DIGH 400 co-enrollment
Primarily for DH students, the course combines historical study with a hands-on approach to computers their growing role in academic research, publishing, libraries, and the arts. Topics will include the structure of computers, the relation of hardware and software, text and image markup and publishing, database theory and design, modeling and visualization, text analytics, procedural logic, and the basic concepts of programming, artificial intelligence, and the social, ethical, and intellectual contexts for computing.
Outcomes:
Procedural literacy, historical knowledge of hardware and software platforms, ability to be a scholar-programmer or to collaborate fruitfully with scholar-programmers

DIGH 402 Digital Humanities Design (3 Credit Hours)
Introduces students to design and human computer interaction.
Outcomes:
Students gain practical experience with design, testing, and building ethical digital projects

DIGH 403 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: DIGH 400, DIGH 401, DIGH 402
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks

DIGH 405 Special Topics in Digital Humanities (3 Credit Hours)
Special topics in Digital Humanities or new approaches of current interest to the instructor.
Outcomes:
Dependent upon course topic; must be approved by GPD

DIGH 499 Independent Study in Digital Humanities (1-3 Credit Hours)
Students work under the direction of a faculty member on a particular area of interest within Digital Humanities.
Outcomes:
Students advances their research projects with direct and regular input from a faculty member

DIGH 500 Digital Humanities Practicum (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.
Outcomes:
A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

DIGH 501 Digital Humanities Project (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
In this capstone, students will apply skills they've learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.
Outcomes:
A working, practical final digital humanities project published online

DIGH 605 Master's Study (1 Credit Hour)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up any MA requirements, such as their field examinations and research project.
Outcomes:
Advancement to degree completion

Digital Humanities (MA)

As of Fall 2026, this program is no longer accepting applicants.

The Master of Arts in Digital Humanities program at Loyola University's Center for Textual Studies and Digital Humanities (CTSDH) combines theoretical and practical courses. Its aims are ultimately practical and professional, training new digital specialists for the growing knowledge and information economy and today's research in humanities disciplines.

Because the nature of much Digital Humanities work is constructive and project-based, students in the MA program will be given hands-on training in the workshop or seminar-based classes, such as training in text editing and markup, programming, interface design, project management, and digital archive construction. The MA program also explores theoretical, critical, social, and ethical contexts for thinking about Digital Humanities research and applications, including issues of data ethics, design justice, archive theories, public humanities, and digital preservation. The Master of Arts in Digital Humanities program was designed with partner departments including Computer Science, English, and History for students with interdisciplinary interests. We encourage students with interests at the intersection of culture and technology to consider this degree, which allows one to elect courses from the various partner departments.

The Digital Humanities (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Digital Media and Storytelling (MComm) (p. 1303)
- Public History (MA) (p. 1215)

Curriculum

The MA in Digital Humanities requires coursework totaling 30 credit hours and the completion of a capstone project. Students take six (6) core seminars in addition to a faculty-led practicum and two electives within the field of their choosing. In a student's final semesters they will work with faculty members to design and build their own digital research project.

Seminar topics range from an introduction to the methods and methodology of the field, to special topics in public history, design, research methods, textual criticism, human-computer interface, and web application development. Courses emphasize both discussion of the theories that shape and define the field of Digital Humanities as well as hands-on project building. Coursework is designed to provide technical skills to humanities students, as well as humanistic scholarly research methods to those with a technical or computer science background.

Besides the traditional Master's program, the Digital Humanities (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Foundational Curriculum		*18*
DIGH 400	Introduction to Digital Humanities Research [1]	
DIGH 402	Digital Humanities Design [1]	
DIGH 403	Introduction to Web Application Development	
COMP 400A	Object-Oriented Programming [1]	
COMP 417	Social and Ethical Issues in Computing [1]	
ENGL 413	Textual Criticism [1]	
Two 400-Level Electives Chosen with Advisor [2]		*6*
DIGH 500	Digital Humanities Practicum	3
DIGH 501	Digital Humanities Project	3
Total Hours		**30**

[1] This course may be used by students in the Accelerated Master's Pathway in their senior year.
[2] Electives can be any 400-level course but do check to see if there are course prerequisites. Suggested departments for elective course offerings include English, History, Communications, Environmental Sustainability, Women's and Gender Studies, and Theology. Students who have met necessary pre-requisites may be eligible to take other 400-level Computer Science classes, with approval from the Chair of Computer Science. Please confer with the Graduate Program Director for assistance.

Evaluation

Each student will produce a capstone project in one of their final courses (DIGH 501 Digital Humanities Project) under the direction of an advisor; the capstone will demonstrate knowledge and skills gained in coursework and will address one or more key problems in digital humanities research or applications.

Suggested Sequence of Courses

Traditional Master's Program

For full-time students; students taking the program part-time will work with the Graduate Program Director to plan their coursework.

Course	Title	Hours
Year 1		
Fall		
DIGH 400	Introduction to Digital Humanities Research	3
DIGH 401 / COMP 400A	Introduction to Computing	3
ENGL 413	Textual Criticism	3
	Hours	**9**
Spring		
DIGH 402	Digital Humanities Design	3
COMP 417	Social and Ethical Issues in Computing	3
Elective 1		3
	Hours	**9**
Year 2		
Fall		
DIGH 500	Digital Humanities Practicum	3
DIGH 403	Introduction to Web Application Development	3
	Hours	**6**
Spring		
DIGH 501	Digital Humanities Project	3
Elective 2		3
	Hours	**6**
	Total Hours	**30**

Accelerated Master's Pathway

Students can take up to 12 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Course	Title	Hours
Senior		
Fall		
DIGH 400	Introduction to Digital Humanities Research	3
DIGH 401 / COMP 400A	Introduction to Computing	3
	Hours	**6**
Spring		
DIGH 402	Digital Humanities Design	3
ENGL 413 or COMP 417	Textual Criticism [1] or Social and Ethical Issues in Computing	3
	Hours	**6**
Master's		
Fall		
DIGH 403	Introduction to Web Application Development	3
DIGH 500	Digital Humanities Practicum	3
COMP 417 or ENGL 413	Social and Ethical Issues in Computing [1] or Textual Criticism	3
	Hours	**9**
Spring		
DIGH 501	Digital Humanities Project	3
Elective		3
Elective		3
	Hours	**9**
	Total Hours	**30**

[1] Students can take a choice of either ENGL 413 or COMP 417 in the Senior year. Students must take the other course in their Master's year.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA in Digital Humanities, graduates will be able to:

- Demonstrate advanced knowledge of the interdisciplinary field of Digital Humanities.
- Utilize computers and computational tools for the exploration, analysis, and production of humanistic knowledge.
- Produce and develop a public-facing Digital Humanities research project.
- Shape and create ethical structures of knowledge and information systems through hands-on work in at least one area of Digital Humanities such as: digital mapping, textual analysis, digital archives, coding, design and UX/UI, and/or critical Digital Humanities.

English

Mission and Goals

The Department of English at Loyola University Chicago seeks to promote the university's mission to encourage freedom of inquiry, the pursuit of truth and care for others through teaching, scholarship and service of the highest caliber.

In its teaching, the Department of English seeks to provide students with an education of the highest quality in the English language, in literature written in English and in critical and creative writing, judiciously combining breadth with depth, tradition with contemporaneity. It seeks to attract the best possible students from diverse geographical, professional, racial and ethnic backgrounds; it encourages minority and foreign applicants and those returning to school after an interruption of their academic lives. It encourages students throughout their programs so as to enable them to progress expeditiously to their degrees and to gain the maximum benefit from their experience.

Through the work of its faculty, the Department of English also strives to participate in and contribute to the wider community of scholarship, research and pedagogical theory and practice in the disciplines of literary and critical studies; in creative and critical writing; in comparative literature; in gender, ethnic and cultural studies; in teacher training; and in linguistics.

The Department of English also seeks to serve the larger university and greater Chicago community through public event programming, collaborative projects with secondary schools and other colleges and universities, and general assistance.

Graduate Programs in English

The Department of English's interdisciplinary M.A. and Ph.D. programs each offer courses across three broad historical areas, with a special emphasis in textual studies. Our programs

- Maintain a curriculum and examination structure that facilitates the advanced study of literature in English in its cultural context, as experienced in any one of our three broad historical areas and textual studies: Medieval and Renaissance Literature, Nineteenth-Century Studies, Modern Literature and Culture, and Textual Studies and Digital Humanities
- Allow students to learn relevant literary and social history as well as acquire training in careful textual analysis
- Provide students with training in research and bibliographic methods, acquaint them with basic issues in the area of textual criticism,

develop their reading and analytical skills, and offer study in the history and theory of literary criticism
- Promote interest in and knowledge about the linguistic contexts in which literary works exist
- Strive by example, precept, and encouragement to enable students to improve their research writing skills, to apply these skills professionally outside the classroom and to become publishing scholars
- Prepare students to become effective teachers, equipping them to teach composition and literature courses at the college, university and advanced secondary-school level, and assisting them to develop their teaching potential through experience tutoring in the Writing Center, teaching composition and assisting in the teaching of literature courses in the department
- Support scholarly development of the faculty and students by promoting teaching and research assistantship programs that bring faculty and students together inside and outside the classroom to work on pedagogical and scholarly issues of mutual interest
- Strive to assist students in finding professional employment that makes effective use of the skills and knowledge acquired in their training, both inside and outside the academic community

Graduate Programs

- English (MA) (p. 1201)
- English (PhD) (p. 1203)

ENGLISH (ENGL)

ENGL 400 Intro to Graduate Study (3 Credit Hours)
The course serves as an introduction to the profession of literary studies for students new to the graduate programs in English. It offers a review of current critical theories and methodologies, research techniques, bibliographic methods, and issues in textual criticism.

ENGL 402 Teaching College Composition (3 Credit Hours)
The course deals with practical matters related to the teaching of college composition. It is organized around an examination of recent theories, methods, and materials used in the teaching of writing.

ENGL 403 Composition Theory (3 Credit Hours)
This course examines major and current advances in composition theory and reviews current scholarship in the teaching of writing, with some attention to the relationship between composition and literary theory.

ENGL 404 Pedagogy: Theory and Practice (3 Credit Hours)
Pre-requisites: ENGL 402
This course is designed to help students integrate theory and practice in teaching literature and cultural studies courses at the college level.
Outcomes:
Students will demonstrate an understanding of pedagogical theories by writing a teaching philosophy in which they explain and defend their theoretical approach; students will put their theory into practice by preparing a course proposal for a literature course, which includes a description and goals, syllabus and guidelines, classroom format, and assignments and evaluations procedures

ENGL 406 History of the English Language (3 Credit Hours)
The course is a study of the causes, mechanisms and consequences of language variation over time, with prominent examples taken from the history of English and its parent languages. All major areas of linguistic theory are considered: phonology, lexis, morphology, syntax, and semantics.
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 410 Contemporary Literary Criticism (3 Credit Hours)
This course presents studies in major contemporary theoretical and critical issues through a survey of major types of critical analysis, such as formalism, structuralism, semiotics, reader-response, deconstruction, psychoanalysis, and feminist criticism.

ENGL 412 History of the Book to 1800 (3 Credit Hours)
Pre-requisites: Graduate status
This course will examine the history of written and printed texts from their beginnings to 1800, including such topics as book production and distribution, early ideas about textual editing, literacy, copyright, and censorship.
Outcomes:
Students will be able to relate textual forms to cultural practices

ENGL 413 Textual Criticism (3 Credit Hours)
An introduction to major textual theories and their history. Topics may include such issues as analytic and descriptive bibliography, theories of copy-text, theoretical and practical issues in editing, and forms of textuality, including manuscript, print and digital.

ENGL 415 Media and Culture (3 Credit Hours)
This course examines the important and evolving roles that media plays in the construction, reformulation, and critique of contemporary culture. Topics will vary but may include digital textuality; visual culture studies; information technologies; postcoloniality and globalization; and web-based communities.

ENGL 419 Contemporary Issues in Literature and Culture (3 Credit Hours)
The course is an intensive study of a particular cultural issue in relation to literature.

ENGL 420 Topics in Critical Theory (3 Credit Hours)
Focused study of a particular problem or movement within critical theory–for example, globalization; the "new aesthetics"; high and low culture; psychoanalytic theory; whiteness studies.

ENGL 422 Postcolonial Theory (3 Credit Hours)
This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said, Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

ENGL 423 Marxist Literary Theory (3 Credit Hours)
Intensive study of selected writers and issues within the Marxist tradition of literary and cultural criticism.

ENGL 424 Cultural Studies (3 Credit Hours)
An examination of the theory and practice of cultural studies, with special attention to the role of literary and critical theory in its development.

ENGL 426 Feminist Theory and Criticism (3 Credit Hours)
An intensive study of recent feminist theory in a range of disciplines--including literature, philosophy, history, and law--and covering a variety of approaches, such as psychoanalysis, post-structuralism, post-colonialism, queer theory, and cultural studies.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 427 Dramatic Theory (3 Credit Hours)
This course presents selected theoretical approaches to drama from the Greeks to the present. Readings may include both theoretical works and plays. Topics may include genre, dramaturgies such as realism, epic theatre, and theatre of the absurd, reception, semiotics, feminist dramatic theory, and performance theory.

ENGL 428 Postmodernism (3 Credit Hours)
Pre-requisites: Graduate status
This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.
Outcomes:
Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams

ENGL 430 Topics in Literature Studies (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in literature.

ENGL 433 Seminar in Individual Authors (3 Credit Hours)
Intensive study of a single author. Includes a comprehensive reading of the author's major works, and a review of the critical reception.

ENGL 436 Women Writers in English (3 Credit Hours)
This course focuses on significant issues raised in and by women-authored works, including representations of gender roles and sexualities, and the cultural status and uses of women's literature. Authors from any period(s) in British, American and World literature may be included.

ENGL 437 Topics in Drama (3 Credit Hours)
This course may deal with topics that cut across historical and national boundaries, such as dramatic genres, women in drama, modern reappropriations of earlier drama; with more specialized topics such as performance or feminist dramatic theory; or with historical movements in drama.

ENGL 440 Topics in Medieval Literature (3 Credit Hours)
Studies in a range of Middle English writing serve as a focus for special topics, including mysticism and historical prose from the thirteenth to the fifteenth centuries.

ENGL 441 Old English Language & Literature (3 Credit Hours)
This course introduces Old English language and literature through readings in poetry and prose, with attention, as time allows, to major critical issues in texts of the period.

ENGL 443 Middle English Literature (3 Credit Hours)
This course may address texts that bridge the Old and Middle English periods or texts (excluding Chaucer) that date from the fourteenth-century, such as Langland, Malory, the Gawain-poet, Gower, and women writers.

ENGL 444 Medieval Drama (3 Credit Hours)
The course focuses on English drama from its beginnings to the early Renaissance, including liturgical drama, saints' plays, miracle plays, the cycles, and interludes.

ENGL 447 Chaucer (3 Credit Hours)
This course may focus on the Canterbury Tales or Troilus and Criseyde and the dream visions, and may include some of Chaucer's less frequently studied texts (e.g., his translation of the Consolation of Philosophy).

ENGL 450 Topics in Early Modern Literature & Culture (3 Credit Hours)
This course presents selected studies in poetry and prose of the English Renaissance.

ENGL 455 Shakespeare (3 Credit Hours)
The philosophical, esthetic, and historical problems of Shakespeare's plays are covered in this course, which also focuses on Shakespearean scholarship.

ENGL 456 Early Modern Drama (3 Credit Hours)
This course presents English drama of the period 1550 to 1642. Among the topics to be covered are the rise of the permanent theaters; Elizabethan and Jacobean contemporaries of Shakespeare; Caroline plays and masques. Historical background, theatrical developments, and critical approaches are also studied.

ENGL 457 Seventeenth-Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in seventeenth-century literature. Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 458 Milton (3 Credit Hours)
Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 460 Topics in Restoration & 18th Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in Restoration and eighteenth-century literature.

ENGL 470 Topics in Romanticism (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in Romantic literature.

ENGL 471 Poetry of Romantic Period (3 Credit Hours)
The poetry of major and minor Romantic figures is studied in this course, which includes a critical study of their esthetics, philosophical concepts, and critical standards.

ENGL 475 Topics in Victorian Literature (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme, or body of work in Victorian literature.

ENGL 476 Victorian Poetry (3 Credit Hours)
This course presents the historical, political, social, and intellectual influences on Victorian poetry and examines its artistic and formal innovations and achievements. The authors studied include: Tennyson, Browning, Arnold, Swinburne, and the Rossettis.

ENGL 477 Victorian Prose (3 Credit Hours)
The course examines the major critical and philosophical prose writers of the years 1837-1900: Macaulay, Carlyle, Arnold, Ruskin, Newman, and Pater. It also explores the intellectual, social, and political backgrounds of the period, and identifies Victorian prose styles.

ENGL 478 Victorian Novel (3 Credit Hours)
The course examines the major Victorian novelists: Dickens, Thackeray, the Brontes, Trollope, Eliot, Meredith, and Hardy; religious, social, scientific, historical, and philosophical influences on the novel are also explored.

ENGL 480 Topics in Modernism (3 Credit Hours)
Topics include modernism, the Symbolist movement, Edwardian Period, and other contextual issues that transcend genre boundaries and address larger concerns of social and intellectual history.

ENGL 481 Modern Poetry (3 Credit Hours)
The course examines tradition and experiment in modern poetry and includes English, Irish, and American poets.

ENGL 482 Modern Drama (3 Credit Hours)
This course presents selected studies in dramatists from Ibsen on, including British, American, Continental, and Irish dramatists.

ENGL 483 Modern Novel (3 Credit Hours)
The course concentrates on selected studies in Conrad, Galsworthy, Bennett, Wells, Joyce, Lawrence, Huxley, Woolf, Maugham, Forster and other novelists, but may include additional American, Irish, and Continental novelists.

ENGL 484 Literature and Culture of the Jazz Age (3 Credit Hours)
Taking an interdisciplinary approach to a crucial era, this course will consider such topics as the construction of race in literature and popular culture, the rise of the New Woman, the Harlem Renaissance, and the relationship of jazz to aesthetic modernism.

ENGL 485 Contemporary Literature (3 Credit Hours)
This course concentrates on literature and literary movements of the second half of the twentieth century. Possible topics include postcolonialism (Achebe, Jhabvala, Naipaul, Soyinka, Walcott), postmodernism (Acker, Calvino, Pynchon, Reed), and African-American writing (Baldwin, Morrison, Walker).
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in contemporary literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 487 Postcolonial Literature (3 Credit Hours)
This course examines the issues of modern-day colonization as depicted in selected fiction, drama, and poetry from Africa, South Asia, the West Indies, and Australia.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in postcolonial literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 488 20th Century Literature in English (3 Credit Hours)
Focusing on the relation between texts and their literary and cultural contexts, this course may include any twentieth-century text written in English and may address a particular theme, literary movement, period, nation, or historical event. We may also interrogate the foundation of such categories.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in 20th-century literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 489 Magic Realism (3 Credit Hours)
Fusing realistic and symbolic forms, "Magic Realism" raises boundary issues of many kinds, between history and myth, empirical and non-empirical experience, objective and subjective knowledge. This course examines magic realism from its modernist origins to contemporary postmodern and postcolonial fiction in many countries.

ENGL 490 Topics in American Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme, or body of work in American literature.

ENGL 491 Early American Literature (3 Credit Hours)
This course examines Hispanic, native American, Puritan, colonial, and early nationalist literature in the United States, and explores its American and European backgrounds.

ENGL 492 American Romanticism (3 Credit Hours)
The course includes selected studies in Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and others.

ENGL 493 American Realism (3 Credit Hours)
The course features selected studies in American realism, tracing its origins and development as a national literary movement, and reviewing its regional variations and sub-genres, with special attention to Twain, Howells, and James.

ENGL 494 American Literature Since 1914 (3 Credit Hours)
The course is composed of selected studies in representative American writers of poetry, fiction, drama, and prose in the twentieth century.

ENGL 495 Latino/a Literature (3 Credit Hours)
Pre-requisites: Graduate standing and consent of the GPD in English
Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a Literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 496 African American Literature (3 Credit Hours)
This course focuses on African-American literature over a range of periods and genres including 19th-century slave narratives (Douglass, Jacobs), the fiction and poetry of the Harlem Renaissance (Hurston, Hughes, McKay) and contemporary literature (Ellison, Shange, Morrison).

ENGL 500 Capstone Seminar (3 Credit Hours)
Pre-requisites: 18 credit hours in 400-level courses; GPA of 3 or above
This capstone seminar provides a sustained, semester-long experience of research and writing on a topic in literary studies. A statement of topic is due on the first day of class. Research and writing are supported by scaffolded assignments, peer community, and a syllabus of shared readings drawn from practical guidebooks and exemplars of literary criticism, theory, and scholarship. Students develop an original article-length research paper suitable for submission to a journal in the field of literary studies.
Outcomes:
Assess and intervene in existing scholarly discourses in the field, by developing an\\noriginal article-length research paper suitable for submission to a journal in the field of\\nliterary studies; Write effectively about texts in English, by supporting an interpretative argument with\ \nclose reading

ENGL 501 Directed Readings (3 Credit Hours)
An independent study course supervised by a faculty member with the approval of the program director. Readings are initiated by the student.

ENGL 502 Independent Study-Doctoral Qualification (3 Credit Hours)
The course is composed of special readings in the field of the student's specialization under the supervision of a faculty member with the approval of the chair. Normally the director will be the professor with whom the student plans to write the dissertation. The written outcome of the course will be a draft of a proposal for the dissertation. The course is graded on a credit/no-credit basis.

ENGL 540 Newberry Seminar (3 Credit Hours)
Special topics in literary study offered by the Newberry Library.

ENGL 595 Thesis Supervision (1 Credit Hour)
Directed studies for students working toward a master's thesis.

ENGL 600 Dissertation Supervision (1 Credit Hour)
Directed studies for students working toward a doctoral dissertation.

ENGL 605 Master's Study (1 Credit Hour)
Directed studies for students working toward a master's thesis.

ENGL 610 Doctoral Study (1 Credit Hour)
Directed studies for students working toward a doctoral dissertation.

English (MA)

The MA in English offers broad training in a variety of historical eras and cultural traditions, from the Medieval period to the contemporary moment. There are also opportunities for students interested in the digital humanities, critical theory, and writing pedagogy.

The English (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

- Philosophy (MA) (p. 1235)

Doctoral

- English (PhD) (p. 1203)

Curriculum

Program Requirements

The Master of Arts in English requires 30 semester hours of coursework. The program is designed so that a full-time student can complete these requirements in a year and a half of study.

Besides the traditional Master's program, the English (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Required Courses

Code	Title	Hours
ENGL 400	Intro to Graduate Study	3
Select Three (3) Courses in Literary Studies Courses (p. 1201)		9
At least one course must be in literature before 1800, and one in literature after 1800.		
Select One Course in Critical Theory		3
ENGL 406	History of the English Language	
ENGL 410	Contemporary Literary Criticism	
ENGL 419	Contemporary Issues in Literature and Culture	
ENGL 420	Topics in Critical Theory	
ENGL 422	Postcolonial Theory	
ENGL 423	Marxist Literary Theory	
ENGL 426	Feminist Theory and Criticism	
ENGL 427	Dramatic Theory	
Select One Course in Textual Studies or Digital Humanities		3
ENGL 412	History of the Book to 1800	
ENGL 413	Textual Criticism	
ENGL 415	Media and Culture	
Select Three 400-Level ENGL Elective Courses [1]		9
ENGL 500	Capstone Seminar	3
Total Hours		**30**

[1] Course descriptions for 400 level English courses can be found here (p. 1198). For students interested in taking an elective outside of the English Department, please contact the Graduate Program Director.

Literary Studies Courses

Code	Title	Hours
ENGL 428	Postmodernism	3
ENGL 430	Topics in Literature Studies	3

ENGL 491	Early American Literature	3
ENGL 492	American Romanticism	3
ENGL 493	American Realism	3
ENGL 494	American Literature Since 1914	3
ENGL 495	Latino/a Literature	3
ENGL 496	African American Literature	3

Part-time students must complete all requirements for the degree within four years.

If you are required to take certain undergraduate courses as a condition of admission, they have priority over all other program requirements. Undergraduate courses cannot be applied to the MA.

Suggested Sequence of Courses

Traditional Master's Program

Students are required to take ENGL 400 Intro to Graduate Study in their first semester. The MA is designed to be flexible, engaging students with literature from diverse historical, national, and global traditions, but with no set sequence of courses. Students choose courses after consulting with the Graduate Program Director for further guidance on how best to progress with their studies.

Accelerated Master's Pathway

Students can take up to 12 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Students admitted to the AMP are required to take ENGL 400 in their first semester. They may then take up to three (3) 400-Level English courses in the senior year. The remainder of credits will be taken in the Master's year. Students choose courses after consulting with the Graduate Program Director for further guidance on how best to progress with their studies.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA program students will be able to:

- Write effectively about a broad range of texts in English using effective compositional and rhetorical techniques.
- Assess and intervene in existing scholarly discourses in the field as a literary critic.
- Distinguish and interpret diverse experiences across various social formations (race, class, gender, sexuality, ability, etc.) as registered in literary works.
- Evaluate and apply the principles of a range of critical and textual theories, including those emerging from communities that have been historically underrepresented, in order to produce a sustained analysis of literary works.

English (PhD)

The PhD in English offers in-depth training in a variety of historical eras and cultural traditions, from the Medieval period to the contemporary moment. Students choose an area of specialization – Early Modern, Nineteenth-Century, or Modern – but also take courses in other areas. We offer many opportunities for students interested in getting involved in the digital humanities as well as other kinds of content, like archival studies, public humanities, and initiatives for exploring new futures in the humanities.

Related Programs

Master's

- Digital Humanities (MA) (p. 1195)
- English (MA) (p. 1201)

Curriculum

The PhD requires a total of 60 credit hours of coursework, a qualifying written and oral examination, and a dissertation. According to Graduate School regulations, work on the PhD must be completed eight years from the time you have begun coursework applicable to the degree; if you entered with an MA, you will have six years from the time of beginning course work for the PhD.

Required Coursework

Code	Title	Hours
Required Courses		**9**
ENGL 400	Intro to Graduate Study	
ENGL 402	Teaching College Composition	
ENGL 502	Independent Study-Doctoral Qualification	
Select two of the following: [1]		**6**
Textual Studies Courses		
ENGL 412	History of the Book to 1800	
ENGL 413	Textual Criticism	
ENGL 415	Media and Culture	
Critical Theory Courses (at least one)		
ENGL 410	Contemporary Literary Criticism	
ENGL 420	Topics in Critical Theory	
ENGL 422	Postcolonial Theory	
ENGL 423	Marxist Literary Theory	
ENGL 426	Feminist Theory and Criticism	
ENGL 427	Dramatic Theory	
Field-Specific Requirements		**24**
Students choose one of three specialized fields: Medieval and Renaissance Literature; Nineteenth-Century Studies; or Modern Literature and Culture. Students take six (6) courses in their chosen and 1 course each from the other two specializations, eight (8) courses total.		
Electives		
Seven (7) ENGL 400-Level or Higher Electives		21
Total Hours		**60**

[1] At least one course must be in critical theory. Students should confer with Graduate Program Director when selecting courses to ensure that they are the best fit for their course of study.

Field-Specific Requirements

Doctoral students in English who have completed the MA degree will enter one of the following three specialized fields and must meet the course requirements defined for that specialization. Students will be free to change their field at any time, provided that they are able to fulfill the course requirements for the new field. Students may choose to specialize in Medieval and Renaissance Literature, Nineteenth-Century Studies, or Modern Literature and Culture. Students will complete at least six (6) courses in their specialization, at least one (1) course in each of the other two specializations, and seven (7) 400-level elective courses of their choosing. ***Note that several of these requirements will be partly or wholly fulfilled by all students as a part of their MA study.***

If a student has been required to take certain undergraduate courses as a condition of admission, those courses have priority over all other program requirements. Undergraduate courses cannot be counted towards the PhD degree requirements.

Medieval and Renaissance Literature Courses

Code	Title	Hours
ENGL 440	Topics in Medieval Literature	3
ENGL 441	Old English Language & Literature	3
ENGL 443	Middle English Literature	3
ENGL 444	Medieval Drama	3
ENGL 447	Chaucer	3
ENGL 450	Topics in Early Modern Literature & Culture	3
ENGL 455	Shakespeare	3
ENGL 456	Early Modern Drama	3
ENGL 457	Seventeenth-Century Literature	3
ENGL 458	Milton	3

Nineteenth-Century Studies Courses

Code	Title	Hours
ENGL 460	Topics in Restoration & 18th Century Literature	3
ENGL 466		3
ENGL 470	Topics in Romanticism	3
ENGL 471	Poetry of Romantic Period	3
ENGL 475	Topics in Victorian Literature	3
ENGL 476	Victorian Poetry	3
ENGL 477	Victorian Prose	3
ENGL 478	Victorian Novel	3
ENGL 490	Topics in American Literature	3
ENGL 491	Early American Literature	3
ENGL 492	American Romanticism	3
ENGL 493	American Realism	3

Modern Literature and Culture Courses

Code	Title	Hours
ENGL 480	Topics in Modernism	3
ENGL 481	Modern Poetry	3
ENGL 482	Modern Drama	3
ENGL 483	Modern Novel	3
ENGL 484	Literature and Culture of the Jazz Age	3
ENGL 485	Contemporary Literature	3
ENGL 487	Postcolonial Literature	3
ENGL 488	20th Century Literature in English	3
ENGL 489	Magic Realism	3
ENGL 494	American Literature Since 1914	3
ENGL 495	Latino/a Literature	3
ENGL 496	African American Literature	3

Optional Specialization in Digital Humanities

Ph.D. students may obtain a specialization in Digital Humanities. To obtain this specialization students take one foundational course, followed by two electives. Note that COMP 400A or equivalent is a prerequisite for certain electives.

Code	Title	Hours
Required Foundational Course [1]		
Select one of the following:		3
COMP 400A	Object-Oriented Programming	
COMP 400D	Computing Tools and Techniques	
DIGH 400	Introduction to Digital Humanities Research	
DIGH 402	Digital Humanities Design	
Electives [2]		
Select two of the following:		6
COMP 400B	Data Structures I	
COMP 400C	Data Structures II	
COMP 401	Computer Security	
COMP 412	Open Source Computing	
COMP 417	Social and Ethical Issues in Computing	
COMP 436	Markup Languages	
COMP 441	Human-Computer Interaction	
COMP 477	IT Project Management	
COMP 502	Structure of Research Management and Funding	
COMP 503	Technology Entrepreneurship	
DIGH 401	Introduction to Computing	
DIGH 403	Introduction to Web Application Development	
DIGH 500	Digital Humanities Practicum	
ENGL 413	Textual Criticism	
ENGL 415	Media and Culture	
Total Hours		**9**

1. Students are allowed to take any course from this list as an elective if not being used to meet this requirement.
2. Other 400-level courses may count toward the specialization with approval of the Director of Graduate Programs.

Research Tool

Ph.D.-level research in literary studies presupposes skills (or 'research tools') not taught in ordinary graduate-level coursework in a Department of English. In view of the multilingual character of humanist study, scholars of literature must often read text in a language other than their principal one. For these reasons, as fulfillment of the discipline's research tool, Ph.D. students in the Department of English are required to demonstrate reading proficiency in a language other than English. This may be done by (a) passing a translation examination or (b) receiving a grade of B or higher in a graduate-level course in a language other than English. Exams and coursework at other institutions will usually be accepted, subject to review by the Director of Graduate Programs. Under special circumstances priority may be given to another research tool: for instance, a computer language, statistical analysis, or protocols for research with human subjects. Students are encouraged to discuss completion of this requirement with the Director of Graduate Programs soon after entering the program.

PhD Qualifying Examination

The PhD examination has a written component and an oral component. The written component consists of three three-hour essays. Each essay covers a field articulated by the student in consultation with their examining committee and the director of graduate programs. There are two basic kinds of field:

- An area of literary theory or research methods
- Literature of a historical period

The second type of field may be narrowed further, for instance to a particular genre, tradition, or region. Most students devise one field of the first type and two of the second. Other configurations are possible with approval of the graduate programs director.

Field descriptions and reading lists are worked out by the student in consultation with their examining committee and must be approved by examiners and by the graduate programs director. Field statements are due one month prior to the exam date.

The oral component is a two-hour oral examination, based on but not limited to the writing produced in the written component.

Candidacy and Defense

Students advance to doctoral candidacy when they have fulfilled all required courses and the research tool requirement, passed the Ph.D.

qualifying examination, established a dissertation committee, and produced an approved dissertation proposal.

Readers' copies of the completed dissertation are due to the dissertation committee one month prior to the final public presentation and defense.

Suggested Sequence of Courses

Students should consult the Graduate Program Director (GPD) to outline course selection and academic objectives. Students take ENGL 400 Intro to Graduate Study during their first Fall semester and ENGL 402 Teaching College Composition in their second Fall semester unless waived by the GPD for students entering with an M.A. With the guidance of the GPD, students will complete the remainder of their 400-level coursework in Critical Theory, Textual Studies, Field-Specific Requirements, and Electives based on offerings. ENGL 502 Independent Study-Doctoral Qualification should be taken at the end of the student's 400-level coursework, before starting ENGL 610 Doctoral Study and ENGL 600 Dissertation Supervision.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the PhD program students will be able to:

- Write effectively about a broad range of texts in English using effective compositional and rhetorical techniques.
- Assess and intervene in existing scholarly discourses in the field as a literary critic.
- Distinguish and interpret diverse experiences across various social formations (race, class, gender, sexuality, ability, etc.) as registered in literary works.
- Evaluate and apply the principles of a range of critical and textual theories, including those emerging from communities that have been historically underrepresented, in order to produce a sustained analysis of literary works.
- Define, distinguish, and evaluate three fields of study in literature as defined by historical period, genre, critical theory, and/or single author.
- Employ significant developments and emergent trends in pedagogical theories, methods, and materials to teach college-level composition and literature effectively.
- Use a variety of research methods (e.g., close reading, textual criticism, linguistic analysis, archival, biographical, etc.) and interpret the findings in order to produce a sustained analysis of one or more literary works.
- Defend scholarly interpretations and interventions at a professional level, leading to internal and external conference presentations, publication, fellowships, grants, and academic employment.

History

Graduate Study in History

The Department of History supports graduate study in Public History and US Social and Cultural History with a focus on the 19th and 20th centuries. Faculty strengths in this area include urban history, digital history, the built environment, labor, the history of sexuality, the history of women and gender, the history of political economy, and the history of popular culture and entertainment.

Led by a diverse and nationally-acclaimed faculty, our curriculum is designed to develop a deep understanding of the human past and to provide students with insight into the world in which they live through a perspective of time and change. Loyola History graduate students also have excellent opportunities for learning and exploration outside of the classroom.

Infused by our Jesuit mission, we support study that deepens our understanding of the human condition, reflects a shared commitment to a just and humane society, and puts knowledge to work in the world.

Graduate Programs

- History (MA) (p. 1208)
- History (PhD) (p. 1211)
- Public History (MA) (p. 1215)
- Public History Program with Dominican University (MA/MLIS) (p. 1216)

History (HIST)

HIST 400 Contemporary Approaches to History (3 Credit Hours)
The course focuses on twentieth-century historical writing, emphasizing changing interpretive paradigms and innovative methodologies, and will introduce students to the range of topics and influences that now shape the discipline.
Outcomes:
Students will demonstrate their ability to analyze historical interpretations, while honing their skills in writing and oral presentation

HIST 403 Professional Lives of Historians (3 Credit Hours)
This course explores pedagogical, professional, and ethical issues of importance to historians. We will examine the many identities of historians and the relationship between training in history and career pathways. Students will explore the history of the historical profession, approaches to teaching history, ethical issues in history as well as the diverse pathways available to those with training in history. Each student will complete a pedagogical activity, a career exploration report, and a professionalizing project. Required of all first year PhD students. Open to all other students as an elective.
Outcomes:
Recognize the application of historical training in many arenas; Understand the ethical challenges facing historians

HIST 410 Topics (3 Credit Hours)
Topics vary as this course allows for the offering of specialized topics designed to enhance the graduate curriculum. Students will be demonstrate knowledge of the key features of the topic, analyze and debate the various historical themes concerning it, and complete a historiographical or research paper related to the theme of the class.

HIST 441 Women's & Gender History: Europe (3 Credit Hours)
This course provides an introduction to the major themes and scholarship in women's and gender history. It examines a variety of debates about and methodological approaches to the historical construction of gender, ranging from histories of the body and sexuality to analyses of culture, politics, and the economy. It explores how gender identities were produced and contested at specific historical moments and in different locations.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST441/WOST441/WSGS441

HIST 442 Women's & Gender History: U.S.A. (3 Credit Hours)
The course explores the literature on women and gender in US history with attention to theoretical issues, a broad chronological scope, and cultural diversity. Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history while honing their skills in writing and oral presentation.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST442/WOST442/WSGS442
Outcomes:
Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history, while honing their skills in writing and oral presentation

HIST 450 Nineteenth Century America (3 Credit Hours)
This course focuses on major historiographical questions reflecting the diversity of inquiry in the field of nineteenth century U.S. history. Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century. Students learn to critique recent historical literature through discussion and reflective essays.
Outcomes:
Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century; Students learn to critique recent historical literature through discussion and reflective essays

HIST 459 Environmental History (3 Credit Hours)
Environmental history expands the customary framework of historical inquiry, incorporating such actors as animals, diseases, and climate alongside more familiar human institutions and creations. This course will expose students to the major concepts, tools, and sources in the field. It will equip students to describe major changes in approaches to environmental history. It will prepare students to write, teach, and develop research projects on environmental history.
Outcomes:
1) Exposure to the major concepts, tools, & sources in the field; 2) Ability to describe major changes in approaches to environmental history

HIST 460 Urban America (3 Credit Hours)
This course examines the evolution of the United States from a rural and small-town society to an urban and suburban nation. Cities, and especially Chicago, have long offered some of the best laboratories for the study of American history, social structure, economic development and cultural change. This colloquium will provide a historiographical introduction to the major questions and issues in the culture and social life of American cities.

HIST 461 Twentieth Century America (3 Credit Hours)
Reading and discussion seminar. Students will read monographs and articles in 20th century U.S. history, including social, cultural, intellectual, and other approaches. The final assignment will be a long historiographic paper.

HIST 464 Transnational Urban History (3 Credit Hours)
This class exposes students to the history of cities across a broad spectrum of time and place. The level of analysis is both more global and more local than traditional narratives of the nation state. This course explores the recurring challenges and possibilities of urban life and urban governance across cultures and time. An emphasis on reading and writing will help students develop the skills of critical analysis. Restricted to Graduate Students.
Outcomes:
Appreciation for the recurring challenges and possibilities of urban life and urban governance across cultures and time; An emphasis on reading and writing will help students develop the skills of critical analysis

HIST 479 Public History Media (3 Credit Hours)
An introduction to the field of digital humanities and public media. Through a series of assignments and in-class labs centered around common Digital Humanities tools and platforms, the class will explore current and historical conversations in digital humanities and new media and address theoretical and practical problems involved in digital humanities-based methods and methodology. The final product of each assignment will be a collaborative digital public humanities project.
Outcomes:
Possess an introductory technical knowledge of digital tools or methods; Ability to apply technical knowledge about digital history tools to historical questions; Familiarity with managing and creating a team-based digital humanities project

HIST 480 Public History: Method & Theory (3 Credit Hours)
This course explores the field of public history with special emphasis on the theoretical and methodological challenges faced when preserving or presenting history outside of a formal classroom environment. Also under consideration will be the professional and ethical responsibilities of the historian both inside and outside of the university setting. Students will be able to understand the theoretical and methodological issues of importance to the field of public history, reflect upon ethical issues involved in the collection, curation, and presentation of history, and participate in applied projects drawing upon public history methodologies and presentation modes.

HIST 481 Management of Historic Resources (3 Credit Hours)
This class is an introduction to historic preservation. The class will review the way public historians work to protect the material culture of the built environment on a local, state, and national level. The class will consist of lectures on aspects of historic preservation, the discussion of weekly readings, and the execution of a preservation project. The project will be to prepare a National Register of Historic Places nomination on a single property or historic district.
Outcomes:
Understand the types of practice that characterizes the field of historic preservation; Understand current emerging issues in historic preservation from an ethical perspective; Experience carrying out the role of the public historian in historic preservation, ability to identify and explain the cultural value of what should be preserved

HIST 482 Archives and Record Management (3 Credit Hours)
This course introduces basic archival theory and methodology. Particular emphasis will be placed on ethics, best practices, and the relationship of archives to allied fields.
Outcomes:
Communicate what archives are and the basic tenants of the profession to a lay audience; Apply archival terminology and concepts to real world scenarios; Identify opportunities in the archival field that are appropriate for their career goals and level of experience; Apply the basics of collection care principles to any given collection at an institution; Understand the components of arrangement and description

HIST 483 Oral History: Method and Practice (3 Credit Hours)
This course will give students a basic understanding of oral history by asking several questions of the discipline, including: What exactly is oral history and what sets it apart from other historical research methodologies? What are the ethical issues involved in undertaking oral history? How does one conduct, record, and archive an interview? What steps are necessary in constructing an oral history project? What are the merits of the various products that can be derived from oral history in both texts and multimedia? In addition to reading oral historical texts and theory, students will conduct at least two interviews and participate in an ongoing oral history project. Students will learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition.
Outcomes:
Ability to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition

HIST 484 Material Culture (3 Credit Hours)
This class is restricted to Graduate students. This course is an introduction to approaches to the study of American material culture in its many forms, including decorative arts and mass-produced consumer objects; urban form, vernacular architecture, commemorative landscapes; the body and dress; foodways; and the material culture of childhood. The course will consider the ways scholars use material culture to "do" history, with an emphasis on artifacts as evidence.
Outcomes:
1) Students will understand the theory and practice of material culture study; 2) Students will gain experience in artifactural analysis; 3) Students will research and interpret material culture

HIST 487 Public History: Museums (3 Credit Hours)
This course introduces graduate students to issues involved in the management of history museums while considering many questions about the role and function of museums in American society. What does it mean to say that museums serve the public? How can museums become more diverse, equitable, accessible, and inclusive institutions? How do museums tell stories and who gets to decide what stories to tell? How and why do museums collect, care for, and display some objects and not others? Why do people visit museums, what do they experience there, and what do those visits mean to them? What does "success" look like and how does one measure it? What financial, administrative, and ethical issues do museums face? How can museums critically address today's complex political, cultural, and social realities?
Outcomes:
Possess introductory knowledge of the issues involved in the management and operation of history museums; Understand the historic and current role and function of museums in American society; Familiarity with various aspects of museum practice through hands-on activities and project-based coursework

HIST 496 Race, Violence & Memory (3 Credit Hours)
Pre-requisites: Graduate Student status
In the last generation, historians, literary scholars, and other humanists have intensified the study of historical memory and commemoration, even as public demonstrations, debates, and legislation over historical markers and monuments have proliferated. This course examines the ways that Americans have remembered, forgotten, and argued over violent episodes that have played important roles in their history. We will examine three aspects of historical memory: how individuals, institutions, and movements created and silenced historical memories; how these memories were embodied in the commemorative landscape; and how memories and public landscapes have changed over time.
Outcomes:
The course¿s primary goals are provide students with an understanding of these changing historical memories and the tools to incorporate them into the their future professional lives

HIST 498 Dissertation Research (3 Credit Hours)
Students register for this course once they begin work on their dissertation and have not yet completed the sixty hours required for the PhD degree. If necessary, this course can be taken up to three times.

HIST 499 Directed Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest. There is a form that must be completed and submitted prior to course registration. There are limits on how many of these can be taken over the course of a student's career: MA (2 times) and PhD (3 times).

HIST 510 Research Seminar - Special Topics (3 Credit Hours)
Research seminar using primary sources in cultural, social, technological, intellectual, and institutional history. Topics vary according to the interest of the instructor. Students will learn how to local and analyze archival material to develop an original article-length research paper. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 555 US Social & Intellectual History (3 Credit Hours)
Research seminar that focuses on different topics relating to the social and intellectual history of the United States. Students learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 558 Studies in American Cultural History (3 Credit Hours)
Research seminar focused on primary sources in American cultural history. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 561 Seminar-Gender & Women's History (3 Credit Hours)
This seminar focuses on the use of gender as a category of analysis in history and is particularly appropriate for those who have taken courses in Women's and Gender History or Women's Studies. Students will produce a research paper; they may choose any topic relevant to issues of gender or women for any time period or society, as long as adequate primary sources are available.

HIST 581 Practicum in Public History (3 Credit Hours)
Pre-requisites: HIST 480
Practicums provide students with specific exposure to an aspect of the practice of public history. Practicums are undertaken either under the direct supervision of Loyola faculty or the joint supervision of a Loyola faculty member and a cooperating off-campus supervisor.
Outcomes:
Strengthen skills used in the classroom, including teamwork and reflective practice in praxis situations; Gain experience in communication, collaboration, and intellectual self-confidence; Possess the opportunity to produce a public history work product; Broaden the public history toolkit

HIST 582 Public History Internship (1-3 Credit Hours)
The internship will provide an extended practical experience in the field of public history. Internships are tailored to fit the needs of the individual student and the needs of the off-campus agency involved. As part of their program, all public history students must undertake an internship either doing public history in the private sector or with a public agency. The internship is available during any semester and its timing is related to an individual student's progress in the program. This is a variable credit course. Students in the MA Public History program take a 1-hour internship (50 hours minimum). Students in the PhD program, the MA Program or the dual MAPH/MILS Program take a 3-hour internship (150 hours).
Outcomes:
Enhanced skills learned via program coursework, including teamwork and reflective practice, in praxis situations; Ability to synthesize out-of-classroom and in-classroom learning through practice; Ability to synthesize out-of-classroom learning through reflection; Possess the opportunity to produce a work product appropriate to their particular internship

HIST 584 U.S. Local History (3 Credit Hours)
Research Seminar that explores the nature and practice of local history and explores various methods and approaches central to local history research. This course will introduce students to the literature on local history, acquaint them with the methodology critical to local history research, and have them conduct original research on a local history topic.
Outcomes:
This course has three objectives: 1. to introduce students to the literature on local history; 2. to acquaint students with the methodology critical to local history research, 3. to conduct original research on a local history topic

HIST 585 Career Diversity Internship (3 Credit Hours)
An elective course that allows PhD and MA students explore a career pathway and have the opportunity to see how the skills gained in History can be applied to diverse career settings. Students will gain an exposure to a non-academic career, develop new skills, and gain experience is communication, collaboration, and intellectual self-confidence.
Outcomes:
Exposure to a non-academic career; development of new skills; gain experience in communication, collaboration, & intellectual self-confidence

HIST 598 Dissertation Proposal Seminar (3 Credit Hours)
Students work closely with an advisor to prepare their dissertation proposal.

HIST 599 Directed Primary Research (3 Credit Hours)
Students work under the direction of an advisor on a specific research project and produce a Master's Essay in lieu of the seminar requirement. There is a form that must be completed and submitted prior to course registration.

HIST 600 Dissertation Supervision (1 Credit Hour)
Students take this course once they complete all requirements for the PhD except the dissertation. The purpose of this course is to maintain active enrollment in the Graduate School during the fall and spring semesters. No credit hours are associated with this course and students receive a grade of CR.

HIST 605 Master's Study (1 Credit Hour)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

HIST 610 Doctoral Study (1 Credit Hour)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

History (MA)

The M.A. in History prepares students to become insightful and skilled research scholars, ready for PhD programs in History or a broad range of careers in cultural, academic, policy, or business settings.

The History (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Academic Areas of Focus

The History MA program focuses on 19th- and 20th-Century American History, with specific strengths in Social, Cultural, and Urban History. Faculty strengths in American history also include the built environment, labor, the history of sexuality, the history of women and gender, the history of political economy, and the history of popular culture and entertainment. Students in the MA program are required to select a major field in United States history. In addition, they will choose a minor field in Public, Medieval, Modern Europe or Gender and Women's history. Thematic minor fields (such as race and ethnicity or colonialism and empire) may be created with the approval of the Graduate Program Director. Students may also select a minor field from another discipline with the approval of the Graduate Program Director. Students wishing to pursue a minor field in public history must meet with the Public History Program Director and formally declare their intention to do so.

Curriculum

The Master of Arts program requires 30 credit hours, a comprehensive exam, and a research tool. This degree may be completed en route to the PhD with agreement of the Graduate Program Director.

Besides the traditional Master's program, the History (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours
Required Courses		
HIST 400	Contemporary Approaches to History	3
Three Major Field Courses		*9*
HIST 450	Nineteenth Century America	
HIST 461	Twentieth Century America	
One 400-level course [1]		
Two 500-level Research Seminars (one in major field) or one Research Seminar and HIST 599 Directed Research. One of the research seminars can be in the minor field.		*6*
History Minor Field (p. 1209) *Courses (3)*		*9*
All minor field courses are HIST 400-level courses.		
One HIST 400-Level Elective [1]		*3*
Total Hours		**30**

[1] All History 400-level courses can be found here (p. 1205).

Major and Minor Field

Students in the MA program have a major field in 19th and 20th Century United States History. They will choose a minor field in Public, Medieval, Modern Europe, or Gender and Women's History. The courses listed below are possible options as any actual minor field coursework will be developed with the Graduate Program Director. Thematic minor fields (such as race and ethnicity or colonialism and empire) may be created with the approval of the Graduate Program Director. Students may also select a minor field from another discipline with the approval of the Graduate Program Director. Students wishing to pursue a minor field in public history must meet with the Public History Program Director and formally declare their intention to use public history to do so.

Public History Minor Field Courses

Code	Title	Hours
HIST 479	Public History Media	3
HIST 480	Public History: Method & Theory	3
HIST 483	Oral History: Method and Practice	3

Medieval History Minor Field Courses

Code	Title	Hours

HIST 499	Directed Study	3
HIST 499	Directed Study	3

Modern Europe Minor Field Courses

Code	Title	Hours
HIST 441	Women's & Gender History: Europe	3
HIST 464	Transnational Urban History	3
HIST 499	Directed Study	3

Gender and Women's History Minor Field Courses

Code	Title	Hours
HIST 441	Women's & Gender History: Europe	3
HIST 442	Women's & Gender History: U.S.A.	3
WSGS 401	History of Feminist Thought	3

Research Tool

All master's level students must demonstrate competence in a research skill (oral history, public history media, or a reading knowledge of a foreign language, for example) appropriate to their major field. They are expected to master this skill before advancing beyond 18 credit hours. Coursework taken to master a language or for oral history and public history media if used for a research tool does not apply toward graduation.

Comprehensive Field Examinations

Toward the end of their graduate program, students must pass a take-home written examination in the major field. The student will produce two 10–15 page historiographical essays based on a reading list developed in conjunction with a two-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have one week to complete the exam, which will be evaluated by the student's examination committee. In addition, students satisfy the examination requirements in the minor field through earning nine credit hours with at least a B (3.0) average.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for the major. Students should consult the undergraduate program director for assistance with course selection.

Traditional Master's Program

Course	Title	Hours
Year 1		
Fall		
HIST 400	Contemporary Approaches to History	3
HIST 450	Nineteenth Century America	3
HIST 400-level course		3
	Hours	**9**

HIST 500-Level Elective		3
HIST 500-Level Elective		3
	Hours	**9**
	Total Hours	**30**

[1] Students can choose from the following History 400-Level courses: HIST 410 Topics, HIST 441 Women's & Gender History: Europe, HIST 442 Women's & Gender History: U.S.A., HIST 450 Nineteenth Century America, HIST 459 Environmental History, HIST 460 Urban America, HIST 461 Twentieth Century America, HIST 464 Transnational Urban History, HIST 484 Material Culture, or HIST 496 Race, Violence & Memory. Students should work with the Graduate Program Director when selecting electives.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review

the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Master of Arts in History, graduates will be able to:

- Apply the necessary skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity of context and biases of primary and secondary sources.
- Identify and criticize interpretive paradigms and methodologies relevant to historical scholarship and the historical profession.

History (PhD)

The Department of History supports graduate study in Public History and US Social and Cultural History with a focus on the 19th and 20th centuries. Faculty strengths in this area include urban history, digital history, the built environment, labor, the history of sexuality, the history of women and gender, the history of political economy, and the history of popular culture and entertainment. We offer a PhD in American History and a PhD in Public History/American HIstory. History doctoral students work closely with faculty in and out of the classroom as they train to become academic historians, public historians, teachers, archivists, museum professionals, and researchers as well as possess sufficient preparation to pursue other career pathways.

Related Programs

Master's

- Public History (MA) (p. 1215)

Combined

- Public History Program with Dominican University (MA/MLIS) (p. 1216)

Curriculum

PhD in History Course Requirements

The PhD Program is an in-person program that culminates in a Doctor of Philosophy (PhD) degree. There are two pathways for the PhD Program: PhD in American History and PhD in Public History/American History. Each requires 60 credit hours of coursework, demonstrated competency in two research tools, comprehensive examinations, and writing and defense of a dissertation.

All PhD students must successfully complete UNIV 370 (https://catalog.luc.edu/search/?P=UNIV%20370) Responsible Conduct in Research and Scholarship. It is strongly recommended that students complete this two-day training before beginning the second year of their program.

Students who enter the PhD in History after completion of a master's degree in history will have slightly adjusted coursework requirements.

PhD in History - American History Course Requirements

The PhD in 19th- and 20th-Century American History is an in-person program that culminates in the Doctor of Philosophy Degree. The PhD in History requires 60 credit hours of coursework, demonstrated competency in two research tools, comprehensive examinations in major and minor fields, and writing and defense of a dissertation. Students will select a major field in United States history and two minor fields in consultation with the Graduate Program Director.

Code	Title	Hours
HIST 400	Contemporary Approaches to History	3
HIST 403	Professional Lives of Historians	3
HIST 598	Dissertation Proposal Seminar	3
HIST 600	Dissertation Supervision	1
Six Major Field Courses		*18*
HIST 450	Nineteenth Century America	
HIST 461	Twentieth Century America	
Four (4) Additional HIST 400-Level Courses		
Two 500-level Research Seminars or one 500-level Reserach Seminar and HIST 599 Directed Research. One of the Research Seminars must be in the Major Field.		*6*
Three Courses in First (https://catalog.luc.edu/graduate-professional/graduate-school/arts-sciences/history/histminorfield/) [1]		*9*
Three Courses in Second (https://catalog.luc.edu/graduate-professional/graduate-school/arts-sciences/history/histminorfield/) [1]		*9*
Three Directed Studies or Electives		*9*
HIST 400-level course or HIST 499 Directed Study		
Total Hours		**61**

[1] In consultation with their advisor, students will select two minor fields. Each minor field consists of three courses. Students coming in with a M.A. will select one minor field in which they must complete at least three courses. This field must be distinct from the major field and from

fields taken at the Master's level. Students entering with a B.A. must complete **two** minor fields.

- Minor fields include areas of geographic or topical foci such as Gender and Women's History, Modern Europe, and Public History.
- Other thematic minor fields (such as race and ethnicity or colonialism and empire) may be created with the approval of the Graduate Program Director.
- Students may also select a minor field from another discipline with the approval of the Graduate Program Director.
- Students wishing to pursue a minor field in public history must meet with the Public History Program Director to formally declare public history as their minor field and indicate their plans for fulfilling the minor.

PhD in History - Public History/American History Course Requirements

The PhD in Public History/American History requires 60 credit hours of coursework, demonstrated competency in two research tools, comprehensive examinations in both Public History and American History major fields, a Public History Portfolio, and writing and defense of a dissertation. Public History/American History PhD students have two major fields in Public History and American History, thus they do not have any minor field requirements.

Building on Loyola's already strong Master's public history program, this 60-hour in-person degree program provides the opportunity for students to compete for positions calling for a doctorate, such as teaching public history at the university level, curating or administrating at governmental institutions such as the Smithsonian Institution or the National Park Service, or serving as a principal in a consulting firm. In essence, this program is similar to the standard American history PhD program but requires a double major in Public History and American History instead of a major field in American History and two minor fields. Students will leave Loyola with a firm grounding in American history as well as in the skills and theory of public history and its practice. Loyola is one of the few universities to offer a public history degree at the doctoral level and hopes to continue to attract strong non-traditional students already working in the public history profession as well as students interested in history at the doctoral level.

Code	Title	Hours
HIST 400	Contemporary Approaches to History (if equivalent not taken for Master's program)	3

All electives must be HIST 400-level courses.		
Total Hours		**61**

Minor Fields

Students in the PhD in American History will choose two minor fields in Public, Medieval, Modern Europe, or Gender and Women's History. The courses listed below are possible options as any actual minor field coursework will be developed with the Graduate Program Director. Thematic minor fields (such as race and ethnicity or colonialism and empire) may be created with the approval of the Graduate Program Director. Students may also select a minor field from another discipline with the approval of the Graduate Program Director. Students wishing to pursue a minor field in public history must meet with the Public History Program Director and formally declare their intention to use public history to do so.

Public History Minor Field Courses

HIST 442	Women's & Gender History: U.S.	3
WSGS 401	History of Feminist Thought	3

Research Tools

PhD in American History Research Tools

Students must demonstrate competency in two research tools. One tool must be within public history and may include HIST 483 Oral History: Method and Practice or HIST 479 Public History Media. When taken for the research tool requirement, HIST 483 and HIST 479 *cannot* be counted toward the minor field in Public History. In special circumstances, students may petition the Graduate Program Director to substitute

another research tool in place of the public history research tool requirement.

The second research tool requirement may be fulfilled in two ways: a) reading knowledge of a foreign language appropriate to the student's major field or b) mastery of a special skill required by the student's doctoral research. With the approval of the Graduate Program Director, students may demonstrate mastery in one of the following areas: digital humanities, statistics, computer science, GIS, and paleography. Courses taken in these subject areas at Loyola or another academic institution may be used to show mastery of a special skill but require prior approval by the Graduate Program Director.

PhD in Public History/American History Research Tools

Students must demonstrate competency in two research tools. When taken for the research tool requirement, HIST 483 *cannot* be counted toward the major field in Public History. The research tool requirement may also be fulfilled by: a) reading knowledge of a foreign language appropriate to the student's major field or b) mastery of a special skill required by the student's doctoral research. With the approval of the Graduate Program Director, students may demonstrate mastery in one of the following areas: digital humanities, statistics, computer science, GIS, and paleography. Courses taken in these subject areas at Loyola or another academic institution may be used to show mastery of a special skill but require prior approval by the Graduate Program Director.

Comprehensive Examinations

PhD in American History Examinations

Near the end of their graduate coursework, PhD students must pass a take-home written examination and a two-hour oral examination in their major field. For the written examination, the student will produce three 10–15 page historiographical essays based on a reading list developed in conjunction with a three-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have two weeks to complete the exam, which will be evaluated by the committee. The two-hour oral exam will occur within two weeks of completing the written exam.

For the major field examination in **US history**, students will have a field in two chronological areas:19th-Century and 20th-Century US History. They should also choose two thematic areas for the examination. Thematic areas include: Urban, Women/Gender, Sexuality, Indigenous America, Religion, African-Americans/Race, American West, Immigration/Ethnicity, Labor, Environmental, or Legal. Other thematic fields are possible with the approval of all committee members.

Students satisfy **the first** (of two) **minor field** requirements by the successful completion of three courses (nine credit hours) with at least a B (3.0) average.

The second minor field requirement is satisfied one of two ways:

- Passing a take-home written examination in which they will produce two 10–15 page historiographical essays based on a reading list developed in conjunction with a two-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have one week to complete the exam, which will be evaluated by the committee. Those who select a minor field outside of history must successfully pass a comprehensive examination in that discipline.
- The **Public History minor field** examination is a two-hour oral examination before a two-person faculty committee, one of whom must be the Public History Program Director. Students must schedule an exam date during the semester they are finishing their Public History field courses. The Public History Portfolio (see below) is submitted to the faculty committee a minimum of two days prior to the oral exam.
- Students entering the PhD Program with Advanced Standing take only one minor field exam.
- For the minor field examinations in areas **outside of US history** (such as medieval, modern Europe and other thematic fields with a Transnational Urban focus), students should work closely with their committee members to create reading lists with a broad chronological sweep and a set number of thematic areas.

PhD in Public History/American History Examinations and Portfolio

Near the end of their graduate coursework, PhD students in the Public History/American History Program must take two series of comprehensive exams, one for each major field.

For the **American History major field**, taken near the end of their graduate coursework, students complete a take-home written examination and a two-hour oral examination. For the written examination, the student will produce three 10–15 page historiographical essays based on a reading list developed in conjunction with a three-member committee of history faculty of their choosing. The committee should be established no later than the beginning of the semester in which the student intends to take the examination. Students will have two weeks to complete the exam, which will be evaluated by the committee. The two-hour oral exam will occur within two weeks of completing the written exam.

For the **American History major field**, students will have a field in each of two chronological areas: 19th-Century and 20th-Century US History. They should also choose two thematic areas for the examination. Thematic areas include Urban, Women and Gender, Sexuality, Indigenous America, Cultural, African Americans and Race, American West and Borderlands, Immigration and Ethnicity, Labor, Environmental, or Legal. Other thematic fields are possible with the approval of all committee members.

The **Public History major field** examination is a two-hour oral examination before a two-person faculty committee, one of whom must be the Public History Program Director. Students must schedule an exam date during the semester they are finishing their Public History field courses. The Public History Portfolio (see below) is submitted to the faculty committee a minimum of two days prior to oral exam.

PUBLIC HISTORY PORTFOLIO REQUIREMENT

The portfolio, which represents the capstone of the Public History major field, documents the achievements of PhD students and thereby identifies their strengths, weaknesses and abilities as public historians. Students begin compiling their portfolio during the first semester in the program. The final version will be submitted to the public history examination committee a minimum of two days prior to the oral exam.

Dissertation

Students will develop a dissertation field within their major field. For students in the Public History/American History program, their dissertation will be in their American history major field, although it can have a Public History focus. This field must be designated before students conclude their required coursework (typically not more than 18 credits beyond the MA, and at the end of the first year of the doctoral program). They will present a dissertation topic and proposal

to their major advisor for review and approval when they take HIST 598 Dissertation Proposal Seminar. Students formalize their proposed committee with approval from the Graduate Program Director and the Graduate School.

Following the successful completion of doctoral examinations and the portfolio requirement, students will make a public presentation of their dissertation proposal to a dissertation committee, which will include the dissertation director and at least two other faculty members acquainted with the research areas of the dissertation. In discussing the proposal, students and members of the committee should work out problems and address questions the committee members may have. Upon successfully completing the dissertation proposal review, students complete the Graduate School dissertation proposal process and submit their proposal, if applicable, to any relevant research compliance bodies (IRB) and to the Graduate School. Following its approval by the Graduate School and the successful completion of all other degree requirements, students are admitted to PhD candidacy.

Once students have advanced to candidacy, they will enroll in HIST 600 Dissertation Supervision each semester to maintain standing with the Graduate School while completing their research and writing the dissertation.

The PhD dissertation must be completed, approved by the designated committee members, and successfully defended orally at a public defense.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for the major. Students should consult the undergraduate program director for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the PhD in History, graduates will be able to:

- Apply the necessary skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity of context and biases of primary and secondary sources.
- Identify and criticize interpretive paradigms and methodologies relevant to historical scholarship and the historical profession.
- Apply the necessary skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity of context and biases of primary and secondary sources. [Public History/American History]
- Identify and criticize interpretive paradigms and methodologies relevant to historical scholarship and the historical profession. [Public History/American History]
- Demonstrate knowledge of the field of public history and its approach to understanding and presenting the past as well as illustrate facility with a variety of public history subfields. [Public History/American History]

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Public History (MA)

The Master of Arts in Public History program provides students both the theoretical and practical skill sets needed to perform public history work in a variety of vocations, whether as museum professionals, archivists, government contractors, community consultants, teachers both inside and outside the classroom, among others. Public historians are fundamental to shaping our understanding of the past—and our approach to the present.

Loyola University Chicago's distinguished MA in Public History prepares students to contribute to our shared knowledge of the history that informs our world today. Public history uses the past to serve a variety of contemporary needs. It entails the application of the skills and methods of history to the study, management, preservation, and interpretation of historical records and artifacts. A public historian is a professional who can put knowledge and skills to use in our society in such diverse activities as museum, historical society or archival work; neighborhood or community history projects; historic preservation and cultural resource management programs; and local, state, or federal research projects. Working with architects, librarians, business people, government policy analysts, exhibit designers or history enthusiasts, public historians contribute to our knowledge and understanding of the past.

The MA in Public History can be pursued full time or part time.

HIST 400-level course		
HIST 400-level course		
Total Hours		**31**

Comprehensive Field Examination

Toward the end of their graduate program, public history students must pass a two-hour oral examination in the field of public history before a two-person faculty committee, one of whom must be the Public History Program Director. The examination covers the field of public history and reflects the readings and assignments included in each of the public history courses as well as a review of the student's portfolio.

There is no examination in the minor field, but students must maintain at least a B average (3.0) in the three minor field courses.

Public History Portfolio

The portfolio, which represents the capstone of the program, documents the achievements of master's students and thereby identifies their strengths, weaknesses, and abilities as professional historians. Students begin compiling their portfolio during the first semester in the program. The portfolio will be evaluated by the two-person faculty examination committee. The portfolio will be submitted to the examination committee a minimum of two days prior to the oral exam.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
HIST 400	Contemporary Approaches to History	3
HIST 479	Public History Media	3
HIST 480	Public History: Method & Theory	3
	Hours	**9**
Spring		
Public History Elective Course		3
HIST 400-level course		3
HIST 400-level course		3
	Hours	**9**
Summer		
HIST 582	Public History Internship	1
	Hours	**1**
Year 2		
Fall

HIST 487	Public History: Museums	3
	Hours	**6**
	Total Hours	**31**

Comprehensive Field Examination

Toward the end of their graduate program, public history students must pass a two-hour oral examination in the field of public history before a two-person faculty committee, one of whom must be the Public History Program Director. The examination covers the field of public history and reflects the readings and assignments included in each of the public history courses as well as a review of the student's portfolio.

There is no examination in the minor field, but students must maintain at least a B average (3.0) in the three minor field courses.

Public History Portfolio

The portfolio, which represents the capstone of the program, documents the achievements of master's students and thereby identifies their strengths, weaknesses, and abilities as professional historians. Students begin compiling their portfolio during the first semester in the program. The portfolio will be evaluated by the two-person faculty examination committee. The portfolio will be submitted to the examination committee a minimum of two days prior to the oral exam.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA in Public History, graduates will be able to:

- Apply the necessary skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity of context and biases of primary and secondary sources.
- Demonstrate knowledge of the field of public history and its approach to understanding and presenting the past as well as illustrate facility with a variety of public history subfields.

Public History Program with Dominican University (MA/MLIS)

The Loyola Department of History and the Graduate School of Library and Information Science (GSLIS) of Dominican University (https://www.dom.edu/academics/majors-programs/mlis-and-ma-public-

history/) in River Forest, IL, cooperate to offer a joint program leading to two separate degrees: Master of Arts in Public History and Master of Library and Information Science (MLIS). The joint program allows students to complete work on the two degrees in a shorter time than if each degree were pursued separately.

Academic Areas of Focus

The joining of two applied degree programs, public history and library and information science, provides interested students with the opportunity to combine historical training with a more focused educational background in archives and library and information science. The Loyola University Chicago degree grounds graduates in the use of public history methods and theories and strengthens their ability to share historical interpretation with a broad range of public audiences.

Rrelated Programs

Master's

- History (MA) (p. 1208)
- Public History (MA) (p. 1215)

Doctoral

- History (PhD) (p. 1211)

Curriculum

The Master of Arts in Public History/Master of Library and Information Science with Dominican University requires 24 credit hours (including an internship) taken in Loyola University Chicago's history department, a public history portfolio, comprehensive examination, and 30 credit hours from the Graduate School of Library and Information Science at Dominican University. Information about the MLIS course requirements can be found on the Dominican University website.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA in Public History and MLIS in Library and Information Science at Dominican University, graduates will be able to:

- Apply the necessary skills to produce original scholarship on a chosen historical topic using primary sources while evaluating the validity of context and biases of primary and secondary sources.

- Demonstrate knowledge of the field of public history and its approach to understanding and presenting the past as well as illustrate facility with a variety of public history subfields.

Mathematics and Statistics

The Department of Mathematics and Statistics at Loyola University Chicago, in the College of Arts and Sciences, supports the Jesuit ideal of knowledge in the service of humanity. The department endeavors to advance knowledge in mathematics and statistics, engaged with Chicago, the nation and the world. To achieve this mission, the department participates in the discovery, development, demonstration and dissemination of professional knowledge and practice within a context of professional ethics and service to others.

Beyond honing students' analytical skills, the mathematics and statistics curricula also foster critical thinking and the ability to articulate it... skills that are in high demand in many diverse fields.

The Department of Mathematics and Statistics will work to ensure that we invest in each student's success, sense of belonging, and cultural competency. We will strive to engage, empower, inform, and hold our faculty and students accountable for fostering an environment where every person shares in the responsibility for advancing diversity and inclusive excellence. Likewise, the department decisions and policies will be crafted with these goals in mind. We commit to this mission recognizing a definition of diversity that includes, but is not limited to, race, ethnicity, color, religion, national or ethnic origin, sex, age, military/veteran status, disability, marital status, sexual orientation, gender identity and expression, socio-economic background, and residency.

Graduate Programs

- Applied Statistics (MS) (p. 1223)
- Mathematics (MS) (p. 1225)

Mathematics (MATH)

MATH 401 Introduction to Graduate Study in Mathematics (1 Credit Hour)
Pre-requisites: Graduate Student status
This is a professional development seminar for the beginning graduate student. Through short lectures, faculty panels, career panels, regular reading and writing assignments, and assorted workshops, it provides the student with the tools they need to succeed in the program, and beyond.
Outcomes:
Students will: gain practice reading, writing, listening to, and summarizing advanced mathematics; learn the pedagogical, ethical, and DEI matters associated with careers in the mathematical sciences; gain practice giving lectures, writing problem-sets, and grading mathematics; explore possible career trajectories

MATH 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

MATH 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

MATH 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

MATH 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: Some background in programing, linear algebra and differential equations
An introduction to numerical techniques for solving mathematical problems where exact solutions are impractical or computationally intensive. Topics include numerical errors, root finding, interpolation and approximation, methods for solving systems of linear equations, high order numerical differentiation and integration, eigenvalue problems, numerical solutions to ordinary and partial differential equations, and other selected topics.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will obtain an understanding of theoretical concepts and rigorous analytical skills for the use of numerical methods to analyze and solve complex mathematical and real-world problems

MATH 413 Algebra I (3 Credit Hours)
Pre-requisites: Graduate standing
This course covers basic algebraic structures, focused mainly on groups. Topics include normal subgroups, isomorphism theorems, and actions on sets. Additional topics chosen from the theory of groups or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about groups and their actions, preparing them for further advanced work in mathematics

MATH 414 Algebra II (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 413 or permission from the Graduate Program Director
This course covers basic algebraic structures, focused mainly on rings, fields and Galois theory. Additional topics chosen from the theory of rings fields or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about rings and fields, preparing them for further advanced work in mathematics

MATH 415 Topics in Linear Algebra (3 Credit Hours)
Pre-requisites: Graduate standing
An abstract approach to the study of finite- and infinite-dimensional vector spaces and their transformations. Selected topics may include similarity, duality, canonical forms, singular value decomposition, inner products, discrete Fourier transform, bilinear forms, Hermitian and unitary spaces.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about finite- and infinite-dimensional vector spaces and their transformations, preparing them for further advanced work in mathematics

MATH 416 Survey of Algebra (3 Credit Hours)
Pre-requisites: Graduate Student status
A survey course in three parts. I: the theorems of Burnside, Sylow, and Jordan-Holder, toward the classification of finite simple groups. II: (noncommutative) rings and modules over PIDs, including applications to classification problems. III: additional topic chosen by instructor, e.g., category theory, homological algebra, division rings, and representation theory.
Outcomes:
Students will demonstrate facility with standard proof techniques in abstract algebra, and the ability to work with algebraic structures (including actions, morphisms, and quotients; concretely and abstractly); Students will recognize the common theme of classification uniting the course topics

MATH 418 Combinatorial Mathematics (3 Credit Hours)
An introduction to the basic methods of counting and generation, including: induction, pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, and inclusion-exclusion principle. Topics drawn from partitions, graph theory, graph coloring, and combinatorial design, Polya's theory, Ramsey's theorem, and optimization problems.
Course equivalencies: X-COMP418/MATH418

MATH 420 Topics in Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 351 or permission of the instructor
This course will be a mathematical study of the concepts of truth and proof and how they relate to each other. The main topics to be covered are propositional logic, first order predicate logic, computability and undecidability results.
Outcomes:
Students will develop proof writing skills, expand mathematical literacy, understand the expressive power and limitations of propositional and predicate logics and learn the mathematical meaning of "truth" and "proof"

MATH 422 Advanced Topics in Number Theory (3 Credit Hours)
Pre-requisites: MATH 201 or the equivalent or permission of the instructor
Topics chosen from: Pythagorean triples, Fermat's Last Theorem, Pell's equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others.
Outcomes:
Understand the importance of historically significant concepts and problems in number theory; Understand the proofs of related theorems; Solve problems and prove theorems from topics covered in class

MATH 428 Algebraic Coding Theory (3 Credit Hours)
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, quadratic residue codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-COMP428/MATH428

MATH 431 Cryptography (3 Credit Hours)
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Additional topics may include more modern cryptosystems, such as those based on elliptic curve and lattices.
Course equivalencies: X-COMP431/MATH431

MATH 443 Intro to Algebraic Topology (3 Credit Hours)
In the study of topology, algebraic constructions (called "invariants") are used to help determine whether two differently presented topological spaces are indeed different. In this course, we introduce various topics related to this endeavor, including homotopy equivalence of topological spaces, group presentations, homomorphisms of spaces and of groups, covering spaces, the fundamental group, and homology theories. Time permitting, the cohomology ring of a space will also be introduced.

MATH 444 Topics in Geometry (1-3 Credit Hours)
An axiomatic approach to the study of geometry. While Euclidean geometry will be the main focus, elliptic and hyperbolic geometries will also be studied in detail. Additional non-Euclidean geometries (including projective, metric, and finite) and additional approaches (such as transformations and synthetic treatments) will also make an appearance.

MATH 445 Financial Math Derivatives (3 Credit Hours)
A first course in the mathematics of derivatives pricing. Topics include options markets, Black-Scholes pricing formulas, stochastic calculus, hedging schemes, binomial option pricing, exotic options, and more general derivatives.

MATH 451 Analysis I (3 Credit Hours)
Pre-requisites: Graduate Standing
A rigorous review of the topology of, and of the functions on, the real line and more general metric spaces. Topics include sequences, including sequences of functions, completeness, compactness, continuity, uniform continuity, and differentiation.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 452 Analysis II (3 Credit Hours)
Pre-requisites: MATH 451 or MATH 351 or permission from the Graduate Program Director
A continuation of MATH 451. A rigorous treatment of Riemann and elements of Lebesgue integration, series, including series of functions, and select topics in continuity and differentiation of multivariable functions, fixed point, implicit and inverse function theorems.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 453 Complex Analysis (3 Credit Hours)
Pre-requisites: MATH 351 or MATH 451 or permission from the Graduate Program Director
A rigorous introduction to the algebra and geometry of complex numbers, topology of the complex plane, and the theory of functions of a complex variable, including: analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, conformal mapping, analytic continuation, transfer theory, etc.
Outcomes:
Students will master the mathematical rigor behind undergraduate complex analysis, gain exposure to advanced topics in complex analysis, and obtain preparation for further graduate courses in analysis and its applications

MATH 454 Survey of Analysis (3 Credit Hours)
Pre-requisites: Graduate Student status
An introduction to advanced topics in analysis, including measure theory, functional analysis and partial differentials equations. Measurable sets; the Lebesgue integral in Rn; Lp and other function spaces; weak convergence; Lax-Milgram Theorem; and the calculus of variations. These topics are then applied to the study of linear PDEs. Students will be able to apply these concepts to study PDEs.
Outcomes:
Students will understand the central elements of Lebesgue integration (from measurable sets to the fundamental theorem of calculus for Lebesgue integrals) and of Lp spaces (including Minkowski and Hölder inequalities)

MATH 456 Mathematical Modeling (3 Credit Hours)
Pre-requisites: Graduate standing
This course will involve students using various areas of mathematics, such as vector calculus, linear algebra, and differential equations, to formulate and analyze mathematical models in, for example, mechanics, physics, biology, economics, etc.
Outcomes:
Students will gain experience using the tools from previous mathematics classes to formulate models of real world phenomena

MATH 458 Optimization (3 Credit Hours)
Pre-requisites: MATH 351 or permission from the Graduate Program Director
The course is a rigorous treatment of linear, nonlinear, and integer optimization, and may include optimization on graphs, stochastic optimization, etc. Modeling of real-life problems as optimization problems, mathematical analysis of resulting optimization problems, including proving existence of solutions, optimality conditions, convergence of algorithms, and computational approaches to solving the problems will be covered.
Course equivalencies: X-MATH458/STAT458/428
Outcomes:
Students will learn how to recognize optimization problems, model real-life challenges as optimization problems, solve the problems using computational methods, and perform rigorous mathematical analysis of the problems and prove convergence of the computational methods

MATH 460 Game Theory (3 Credit Hours)
Pre-requisites: Graduate standing
The theory and applications of noncooperative and cooperative games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.
Outcomes:
Students will obtain an understanding of the fundamentals of mathematical game theory, including the theoretical underpinnings of this theory, and will be able to apply this knowledge in a variety of settings

MATH 465 Introduction to Partial Differential Equations (3 Credit Hours)
This course is an introduction to the subject of partial differential equations. Focus will be on studying linear partial differential equations, such as the wave equation, that appear ubiquitously in nature. To solve these equations we will use techniques such as separation of variables and Fourier series. We will also discuss different boundary conditions, and their physical interpretation.

MATH 466 Dynamical Systems (3 Credit Hours)
Pre-requisites: Graduate standing
Modeling, rigorous analysis, and prediction of short-term and asymptotic behavior of dynamical systems is studied. Continuous-time and discrete-time dynamical systems are considered, and modeled by usually nonlinear differential and difference equations, respectively. Motivation comes from biological, chemical, mechanical, and engineering systems.
Outcomes:
Students will be able to model dynamical systems, perform rigorous mathematical analysis of them, and predict their behavior

MATH 475 Functional Analysis (3 Credit Hours)
Metric, normed, Banach, Hilbert, and sequence spaces. Linear operators and Fourier analysis. Hahn-Banach extension principle, Baire category, and uniform boundedness. Selected applications to economics, physics, engineering, and quantum theory.

MATH 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
No course description is available
Course equivalencies: X-COMP476/MATH476

MATH 486 General Topology (3 Credit Hours)
Pre-requisites: Graduate standing
This course builds on the basics of point-set topology and discusses topological spaces, continuity, connectedness and path-connectedness, compactness, product spaces, quotient spaces, metric spaces, countability and separation axioms. Further topics may include category theory and basic homotopy theory.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about general topological spaces, preparing them for further advanced work in mathematics

MATH 488 Special Topics in Mathematics (1-4 Credit Hours)
Selected topics in mathematics not covered in the department's regular course offerings. May be repeated for credit.

MATH 495 Graduate Practicum in Mathematics (2 Credit Hours)
Pre-requisites: MATH 401 and (MATH 414 or MATH 452 or MATH 416 or MATH 454); Graduate Student status
A project-based course. Under faculty consultation, students will design and independently carry out a research project devoted to the development, pedagogy, or application of mathematics. To earn credit for this course, the student will deliver both an oral presentation and technical paper at the level expected in the professional workplace.
Outcomes:
Students will have: analyzed professional literature from multiple sources, resulting in a motivating question for the project; gained practice communicating clearly, concisely, and in-step with discipline norms; and contributed to the learning, teaching, or application of mathematics through their findings

MATH 498 Independent Study (1-6 Credit Hours)
This is a directed study course undertaken by advanced students and supervised by a member of the graduate faculty.

MATH 595 Thesis Supervision (1-6 Credit Hours)
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.

MATH 605 Master's Study (1 Credit Hour)
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the final practicum.

Statistics (STAT)

STAT 401 Introduction to Applied Statistics Using R (1 Credit Hour)
Pre-requisites: Limited to Graduate Students Only
This course covers the basics of applied statistics including descriptive statistics and visualization (including graphing), univariate methods, inference, hypothesis testing and confidence intervals, two-sample and paired analyses, simple and multiple linear regression, ANOVA and logistic regression. The course introduces and uses the R freeware package.
Outcomes:
Upon completion of this course, it is expected that students will skillfully and accurately perform real-time data analysis using R and R/Studio

STAT 403 SAS Program & Applied Statistics (3 Credit Hours)
While simultaneously reviewing basic statistical methods (t tests, regression, ANOVA, interaction, etc.), this course introduces statistical modelling using the SAS program, involving the DATA step and various SAS procedures. Working on hands-on projects using real datasets, students present their final project results.

STAT 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

STAT 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

STAT 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov chains, classification of states, long-run behavior, birth and death processes, random walks, Poisson processes and their variations, and Brownian motion. In addition to applications, some theoretical derivations/proofs will also be emphasized.
Course equivalencies: X-MATH406/STAT406
Outcomes:
Students mastery of methods in stochastic processes and the ability to apply these in areas like biology, social science, sports, and finance

STAT 407 Statistical Design (3 Credit Hours)
This course provides students with a thorough introduction to statistical experimental design and to the statistical methods used to analyze the resulting data. The concepts of comparative experiments, ANOVA and mean separation procedures will be reviewed; blocking (complete and incomplete) will be discussed, as will be factorial designs, fractional factorial designs, and confounding. The course will focus on biometric applications such as clinical trials, HIV studies, and environmental and agricultural research, but industrial and other examples will occasionally be provided to show the breadth of application of experimental design ideas.

STAT 408 Applied Regression Analysis (3 Credit Hours)
This course provides students with a thorough introduction to applied regression methodology. The concept of simple linear regression will be reviewed and discussed using matrices, and multiple linear regression, transformations, diagnostics, polynomial regression, indicator variables, model building and multicolinearity will be discussed, as will be nonlinear and generalized linear regression. The course will focus on applications such as those from biometry and biostatistics (clinical trials, HIV studies, etc.), sports, engineering, agriculture and environmental science.

STAT 410 Categorical Data Analysis (3 Credit Hours)
This course provides an introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modeling techniques based on generalized linear models. Specialized methods for ordinal data, small samples, multi-category data, and matched pairs will also be discussed. The focus throughout this course will be on applications and real-life data sets.

STAT 411 Applied Survival Analysis (3 Credit Hours)
Modern statistical methods are covered to analyze data that is right, left and/or interval-censored. Nonparametric approaches such as the Kaplan-Meier estimation technique, log-rank test and proportional-hazards model are considered as are parametric methods such as those based on the Exponential and Weibull distribution. Accelerated failure time models and nonlinear models are also discussed.

STAT 421 Math Modeling & Simulation (3 Credit Hours)
This course uses SAS, R and high-level languages to perform statistical modelling by conducting statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or otherwise intractable.
Course equivalencies: X-COMP421/MATH421/STAT421

STAT 426 Advanced Statistical Inference (3 Credit Hours)
This course presents the role of likelihood methods in a whole range of statistical problems. The course reviews theoretical developments such as efficiency, completeness, and the Cramer-Rao lower bound, and shows how the likelihood approach is used to surpass these methods and to analyze regression problems, to deal with nuisance parameters by using marginal likelihood methods, and to deal with complex data structures such as censored and spatial data.

STAT 436 Topics in Biostatistics (3 Credit Hours)
This course covers experimental design (including interaction, analysis of covariance, and crossover designs) and the analysis of designed studies, simple and multiple linear regression, generalized linear and nonlinear regression, bioassay, relative potency and drug synergy, multivariate analysis (including MANOVA and multivariate regression), repeated measures (designs and analysis), and survival analysis (Cox proportional odds, log-rank tests, Kaplan-Meier estimation) of censored data. The emphasis of the course will be on applications instead of statistical theory, and students will be required to analyze real-life datasets using popular statistical packages.

STAT 437 Quantitative Bioinformatics (3 Credit Hours)
This course explores recently developed mathematical, probabilistic and statistical methods currently used in the fields of bioinformatics and DNA microarray and protein array data analysis. These include stochastic processes, (hidden and traditional) Markov chains, tree- and clustering techniques (including principal components analysis and biplots), discriminant analysis, experimental design strategies and ANOVA methods. Our focus in this course is on the application of these techniques and on meaningful interpretation of results.

STAT 438 Introduction to Predictive Analytics (3 Credit Hours)
Pre-requisites: Graduate students only
This course focuses on finding patterns, associations, and relationships in data. In examining real-world datasets, this course highlights, develops and applies methods in simple and multiple linear and logistic regression, classification and discriminant analysis, resampling methods, model selection, additive models and splines, tree-based methods, support vector machines, and unsupervised learning techniques such as clustering and PCA.
Outcomes:
Upon completion of this course, it is expected that students will master applied methods in predictive analytics (using R and/or Python) with applications to real data-sets

STAT 444 Longitudinal Data Analysis and Mixed Modeling (3 Credit Hours)
Pre-requisites: Graduate Students only
This course focuses on repeated measures, longitudinal, hierarchical and mixed modeling data analysis with an eye to applications, model identification, software implementation, and interpretation of computer results.
Outcomes:
Upon completion of this course, it is expected that students will master applied mixed-modelling methods (using R and/or SAS) with applications to real data-sets

STAT 451 Applied Nonparametric Methods (3 Credit Hours)
Pre-requisites: Graduate Students only
Many basic statistical techniques are based upon normal or binomial distributional assumptions which may not be appropriate in practice. This course introduces and illustrates rank-based methods, permutation tests, bootstrap methods, and curve smoothing useful to analyze data when normal and/or binomial assumptions are not valid.
Outcomes:
Upon completion of this course, it is expected that students will master applied nonparametric statistical methods (using R and/or SAS) with applications to real data-sets

STAT 460 Bayesian Statistical Methods (3 Credit Hours)
Pre-requisites: STAT 308 or STAT 408
A graduate-level treatment of Bayesian methods for data analysis focusing on the theoretical foundations and computational strategies for modern Bayesian inference. Topics include the formulation and analysis of single- and multi-parameter Bayesian models, hierarchical and multilevel structures, and Bayesian generalized linear models. The course will also consider advanced Markov Chain Monte Carlo computational techniques such as Gibbs sampling, Metropolis-Hastings algorithm, and Hamiltonian Monte Carlo. Emphasis is placed on both the mathematical underpinnings of Bayesian analysis and the implementation of complex models using contemporary software tools.
Outcomes:
By the end of the course, students will be able to: formulate and analyze complex Bayesian models; compare and select complex Bayesian models; critically interpret and communicate Bayesian analyses in research settings; extend basic Bayesian methods to advanced/nonstandard models

STAT 464 Multivariate Statistical Methods (3 Credit Hours)
Pre-requisites: STAT 308 or STAT 408
The course emphasizes both the theoretical foundations and applied aspects of multivariate analysis. Students will examine data exploration, inference, and model-based approaches, including principal components, factor and canonical correlation analysis, discriminant and cluster analysis, MANOVA, and modern dimensionality reduction techniques. The course will also introduce extensions of these methods and encourage critical evaluation of their assumptions and limitations. Statistical software, such as R, will be used for implementation and analysis.
Outcomes:
By the end of the course students will be able to: explain and analyze the theoretical framework underlying common multivariate methods; derive and interpret results from principal component and factor analyses; apply and critique modern dimensionality reduction and visualization techniques

STAT 465 Actuarial Theory I (0 Credit Hours)
This course provides an introduction to the models and methods used in actuarial mathematics and risk theory. Students are expected to gain a broad understanding of frequency and severity modelling, pricing, and accumulated risk. This course includes a blend of theory and applications.
Course equivalencies: X-MATH465/STAT465

STAT 466 Actuarial Theory II (0 Credit Hours)
With an introductory background in the field provided in STAT 465, this course thoroughly explores modelling and estimation techniques in actuarial mathematics and risk theory.
Course equivalencies: X-STAT466/MATH466

STAT 468 Risk Theory (0 Credit Hours)
With a focus on insurance, pensions and investments, this course provides an overview of the theory of risk, emphasizing the statistical challenges and assumptions inherent in models and methods.
Course equivalencies: X-STAT468/MATH468

STAT 488 Topics in Statistics (1-3 Credit Hours)
This topics course provides the means for new courses on current or 'hot' topics to be offered to students, with the topics being crafted to the given topic at hand. As such, the course may be taken repeatedly.

STAT 495 Statistical Consulting Capstone (2 Credit Hours)
Pre-requisites: Graduate Students only
Students enrolled in this course will be introduced to statistical consulting techniques useful for work with researchers and decision-makers in university, medical, financial and industrial settings; students will engage in actual hands-on statistical consulting with administrators, researchers, or students at one of Loyola's lakeside campuses or remotely.
Outcomes:
Upon completion of this course, it is expected that students will master the soft-skills of statistical consulting, communication, active listening, and real-time data analysis

STAT 498 Independent Study Statistics (1-6 Credit Hours)
Working with a statistics faculty member on a one-on-one or small group format, this course affords students the opportunity to thorough explore a statistical topic at greater depth. Generally, it involves a good deal of outside reading and/or programming, and weekly meetings with the professor.

Applied Statistics (MS)

Loyola's Master of Science in Applied Statistics emphasizes applied statistics and predictive modeling which gives students an advantage in evidence-based fields such as biomedical, environmental, marketing, educational, financial, and contract research (CRO) sectors. Our program can also be completed on a part-time basis and while working full-time.

The Applied Statistics (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Data Science (MS) (p. 1191)
- Mathematics (MS) (p. 1225)

Curriculum

The Master of Science in Applied Statistics requires 30 credit hours of coursework.

Besides the traditional Master's program, the Applied Statistics (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Required Courses

Code	Title	Hours
STAT 401	Introduction to Applied Statistics Using R	1
STAT 403	SAS Program & Applied Statistics	3
STAT 404	Probability & Statistics I	3
STAT 405	Probability & Statistics II	3
STAT 407	Statistical Design	3
STAT 408	Applied Regression Analysis	3
STAT 495	Statistical Consulting Capstone	2
Elective Courses		**12**
Select four from the following:		
STAT 406	Stochastic Processes	
STAT 410	Categorical Data Analysis	
STAT 411	Applied Survival Analysis	
STAT 421	Math Modeling & Simulation	
STAT 426	Advanced Statistical Inference	
STAT 436	Topics in Biostatistics	
STAT 438	Introduction to Predictive Analytics	
STAT 444	Longitudinal Data Analysis and Mixed Modeling	
STAT 451	Applied Nonparametric Methods	
STAT 460	Bayesian Statistical Methods	
STAT 464	Multivariate Statistical Methods	
STAT 488	Topics in Statistics	
STAT 498	Independent Study Statistics	
Total Hours		**30**

Specializations

Our flexible program allows students to focus on their interests by choosing a specialization. Possibilities include:

Specialization	Description
Biostatistics	The Biostatistics specialization covers non- and pre-clinical statistical methods, bioassay, statistical genetics, clinical trials, and bioinformatics.
Environmental Statistics	The Environmental Statistics specialization addresses Geographic Information Systems (GIS), spatial statistics, and environmetrics.
General Applied Statistics	The specialization in General Applied Statistics includes non-medical applications such as actuarial, commercial, data-mining, industrial, marketing, and national defense.
Predictive Analytics/ Modeling	The Predictive Modeling specialization focuses on big data analytics and modeling.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Traditional Master's Program

The below suggestion is for Fall full-time entrants. Adjustments are made for Summer or Spring entrants. Adjustments are also done on a case-

by-case basis for part-time students or if discussed with the Graduate Program Director.

Course	Title	Hours
Year 1		
Fall		
STAT 401	Introduction to Applied Statistics Using R	1
STAT 403	SAS Program & Applied Statistics	3
STAT 404	Probability & Statistics I	3
STAT 408	Applied Regression Analysis	3
	Hours	**10**
Spring		
STAT 405	Probability & Statistics II	3
Two 400-level STAT Electives		6
	Hours	**9**
Summer		
One 400-level STAT Elective [1]		3
	Hours	**3**
Year 2		
Fall		
STAT 407	Statistical Design	3
STAT 495	Statistical Consulting Capstone	2
One 400-level STAT Elective [1]		3
	Hours	**8**
	Total Hours	**30**

[1] If no elective is taken during the Summer term, it is expected that students will take two (2) 400-level STAT courses in Fall term Year 2.

Accelerated Master's Pathway

Students can take up to 13 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

With only very rare exception, AMP students should take the one-credit STAT 401 course in their undergraduate career as a double-count course. Additionally, the following list is suggested and specific courses should be worked out between the individual student at the Graduate Program Director. Essentially any additional (to the above one credit) 12 credits from 400-level STAT classes can be taken as double-count courses. Suggested courses include STAT 403, STAT 404, STAT 405, STAT 408, and any 400-level STAT electives. Most of these students should take STAT 408 as a double-count course.

Course	Title	Hours
Senior		
Fall		
STAT 401	Introduction to Applied Statistics Using R	1
STAT 403 or STAT 404	SAS Program & Applied Statistics or Probability & Statistics I	3
STAT 408	Applied Regression Analysis	3
	Hours	**7**
Spring		
STAT 400-Level Elective		3
STAT 400-Level Elective		3
	Hours	**6**
Master's		
Summer		
STAT 400-Level Elective [1]		3
	Hours	**3**
Fall		
STAT 404 or STAT 403	Probability & Statistics I [2] or SAS Program & Applied Statistics	3
STAT 407	Statistical Design	3
STAT 495	Statistical Consulting Capstone	2
	Hours	**8**
Spring		
STAT 405	Probability & Statistics II	3
STAT 400-Level Elective [1]		3
	Hours	**6**
	Total Hours	**30**

[1] If no elective is taken during the Summer term, it is expected that students will take additional elective in Master's year.

[2] Students will take whichever course not completed in Senior year.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both

advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of our MS program in Applied Statistics, students are expected to have:

- Mastered the art and science of choosing and/or developing the appropriate statistical model(s) for a given dataset-situation, and have mastered the skill of interpreting the chosen model.
- Received sufficient exposure to basic theorems and proofs used in introductory probability and statistical inference.
- Worked with data from application fields such as public/global health, medical, industrial and environmental research.
- Received training to ethically apply statistical training in the real world.
- Obtained hands-on experience and assimilated course material via our 2cr Statistical Consulting capstone/practicum class.
- Sufficiently mastered the course and practicum material to either obtain gainful employment in the field of attend a Ph.D. program

Mathematics (MS)

Loyola's Master of Science in Mathematics degree is a highly customizable program supporting students with a variety of career goals. Beyond delivering foundational knowledge in the discipline, its focus on critical-thinking, organizational, technological, and communication skills leaves students well-prepared for their next step.

The Mathematics (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

STEM Designation

The MS in Mathematics has been granted a STEM designation from the U.S. Department of Homeland Security. International students completing degrees with this designation can qualify for extended OPT (Optional Practical Training), bringing the total OPT time granted to 36 months.

Related Programs

Master's

- Applied Statistics (MS) (p. 1223)
- Data Science (MS) (p. 1191)

Curriculum

The Master of Science in Mathematics requires 27 credit hours of coursework, a one-credit professional development seminar during the first semester, and a two-credit practicum during the final semester, for a total of 30 credit hours.

Coursework includes required foundational courses in algebra, analysis, and statistics, as well as 18 credit hours of electives chosen from courses in Mathematics and cognate fields (such as Applied Statistics,

Data Science, and Computer Science). With their practicum, students design and independently execute a research project under faculty supervision.

Besides the traditional Master's program, the Mathematics (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours
Foundational Course Requirements		
MATH 416	Survey of Algebra	3
MATH 454	Survey of Analysis	3
MATH 404 / STAT 404	Probability & Statistics I [1]	3
or STAT 408	Applied Regression Analysis

Algebra or Analysis.		*3*
MATH 414	Algebra II	
MATH 415	Topics in Linear Algebra	
MATH 452	Analysis II	
MATH 453	Complex Analysis	
Cognate Fields. [1]		*3*
MATH 405 / STAT 405	Probability & Statistics II	
STAT 410	Categorical Data Analysis	
COMP 429	Natural Language Processing	
COMP 487	Deep Learning	
DSCI 401	Introduction to Data Science	
Or Another Course with Graduate Program Director Approval [2]		
Additional Requirements		
MATH 401	Introduction to Graduate Study in Mathematics	1
MATH 495	Graduate Practicum in Mathematics	2
Select four approved 400-level Electives in Mathematics or Statistics [3]		12
Total Hours		**30**

1. Students who select MATH 404/STAT 404 in Foundational Courses may opt to take STAT 408 as a Depth Course, and vice versa.
2. The depth requirement for Cognate Fields may be fulfilled by other courses, including courses from other departments, with approval of Graduate Program Director.
3. Approved elective courses should be selected with advice of Graduate Program Director to complement student's previous learning and support future plans.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Graduates of the Master of Science in Mathematics Program will:

- be able to construct mathematical proofs of basic theorems, and to write these proofs clearly using correct grammatical constructs and appropriate mathematical notation;

- have seen applications of mathematics to areas across mathematical disciplines and outside of mathematical disciplines;
- receive the training sufficient for acceptance into PhD programs or professional schools, or for hire in mathematics related industries;
- receive training on how to act responsibly and ethically within the discipline.

Modern Languages and Literature

As of Fall 2026, this program is no longer accepting applicants.

The Department of Modern Languages and Literatures offers a Master of Arts in Hispanic Studies. The department has full-time faculty with strong dedication to graduate teaching and a firm commitment to research. Study in the Department of Modern Languages and Literatures encourages close contact between faculty and students. In the tradition of the university at large, we value the individual.

We take pride in the diverse cultural, educational, intellectual and recreational opportunities available in the city of Chicago.

Graduate Programs

- Hispanic Studies (MA) (p. 1230)

Spanish (SPAN)

SPAN 402 Methods of Teaching Spanish (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. Students will explore theoretical, investigative, and practical issues of communicative language teaching that will help them develop communicative classroom environments that blend listening, speaking, reading, and writing.
The material in this course should encourage students to question assumptions and begin to formulate their own ideas about what goes on in their classrooms and in second language learning in general.

SPAN 403 Structure of Modern Spanish (3 Credit Hours)
An introduction to Spanish linguistics to provide a general understanding of phonology, morphology and syntax, as well as a history of Spanish grammar including variation and change.
Outcomes:
Students will understand the rules that govern sounds, word and sentence structure, and the dynamic interaction between Spanish and its neighboring languages

SPAN 405 Critical Methods (3 Credit Hours)
This course provides training in the application of contemporary critical methods with attention to the development of greater proficiency in literary analysis and written expression.
Outcomes:
Students will be able to discuss and write about knowledgeably works from the major literary genres: drama, prose fiction, essay, and poetry

SPAN 410 General Linguistics & Romance Languages (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in heritage language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. The material in this course should encourage students to question assumptions and begin to formalize their own ideas about what goes on in their classrooms and in heritage language learning in general.
Course equivalencies: X-SPAN410/CLST410/FREN410

SPAN 415 Medieval Spanish Literature (3 Credit Hours)
This course studies the development of Spanish medieval literature from the jarchas through the Celestina.
Outcomes:
Along with increasing their knowledge of Spanish history in the medieval period, students will be able to appreciate how the literature reflects the culture of the period

SPAN 416 Golden Age of Spanish Literature (3 Credit Hours)
This course is a graduate seminar whose primary focus is the literary production of the Spanish Golden Age, which dates from the second half of the sixteenth century to the end of the seventeenth. Students will analyze works of various genres - autobiography, prose, drama, poetry and the novel - by the most prominent authors of the time, including Teresa of Ávila, John of the Cross, Miguel de Cervantes, Baltasar Gracián, Francisco de Quevedo, Luis de Góngora, Félix Lope de Vega, Pedro Calderón de la Barca, Tirso de Molina and María de Zayas. We will give special attention to the historical, social and cultural context of early modern Spain, and students will gain exposure to the major critical trends and interpretation of Golden Age literature. The authors to be studied confront readers with the complex social fabric of pre-modern Spain and immerse us in the religious and economic realities of the Iberian Peninsula, the Mediterranean world and Europe. Our close reading of the texts will allow us to explore how early modern Spanish writers reflect the spiritual, intellectual and political currents of their time, especially as they shed light upon the network of institutions, practices, and beliefs that constituted Spanish culture.

SPAN 419 Romanticism in Spanish Literature (3 Credit Hours)
This course is a survey of Romanticism as a literary movement including its influence upon nineteenth-century culture.
Outcomes:
Students will be able to understand the philosophical, artistic, and esthetic tenents of Romanticism and their representation in a series of Hispanic texts from prose fiction to poetry and drama

SPAN 420 Realism & Naturalism (3 Credit Hours)
This course focuses on the various political, ideological, and intellectual trends that have shaped nineteenth-century Spanish literature and emphasizes the aesthetic and cultural influences that made the Spanish literary universe unique. It also takes up the question of the ways in which the literature of nineteenth-century Spain might be compared to that of Latin America and of the Western world generally. It will provide an overview of the key topics, writers, and literary genres of nineteenth-century Spanish literature, with particular emphasis on novels, poetry, folletines, short stories and, to a lesser extent, visual art. We will discuss the complexities of Spanish modernity using current theoretical perspectives in addition to various historical approaches, while emphasizing the way in which these texts offer multiple views of Spanish national identity and the construction of different models of the modern self.

SPAN 421 Theatre of Twentieth Century (3 Credit Hours)
The evolution of theatrical modes in 20th Century Spain. Authors: M. Mihura, Benavente, Valle Inclán, Arniches, García Lorca, Buero Vallejo, etc.
Outcomes:
Students will be able to explain how theater has dealt with contemporary experiences such as the Spanish Civil War, civil war, the polarization of society, group thinking, dictatorship, the inception of new mores and the inevitability of change

SPAN 426 Theater of The Golden Age (3 Credit Hours)
This course is a graduate seminar with a primary focus on theatrical works written in the Spanish Golden Age, which began in the mid-sixteenth century with the dramatist Lope de Rueda and ended in the late seventeenth century with the death of Calderón de la Barca. It combines the study of shorter works, entremeses, and full-length plays, or comedias, written by the most renowned playwrights of early modern Spain, including Cervantes, Lope de Vega and Tirso de Molina. Through the reading of these authors, students will explore the themes and social factors which shaped the plays of the Golden Age and will become familiar with the theatrical tradition that impacted Spanish society at all levels. Attention will also be given to the role of gender, religion, and socio-economic status in pre-modern Spanish society. We will use these texts in order to understand the historical context and the main currents of thought in early modern Spain.

SPAN 431 Poetry of The 20th Century (3 Credit Hours)
This course traces developments in Spanish poetry through a study of the works of selected poets, with special emphasis on the writers of the Generation of 1927.
Outcomes:
Students will understand the relationship between modernism and the avant garde, as well as the turn toward free verse and social poetry in the post-war period

SPAN 436 Poetry of The Golden Age (3 Credit Hours)
This course covers poetic theory and practice from Garcilaso to Góngora. It presents the classic modes as they were imitated and transformed to create a new poetic language.
Outcomes:
Students will be able to recognize the distinct styles and forms of Golden Age poetry

SPAN 437 Golden Age-Spanish Mysticism (3 Credit Hours)
This course is a survey of the most prominent authors of the Spanish Golden Age mystics - Ignatius of Loyola, Teresa of Avila, and John of the Cross, whose writings reflect the religious, spiritual, and intellectual currents of Counter-Reformation Spain. In the form of an independent study, students will examine the ascetical, mystical, and Illuminist trends of the sixteenth and seventeenth centuries, as well as the most important themes these writers developed in early modern Iberia: conversion and authority, vice and virtue, penance and pilgrimage, devotion and humor. These themes will be explored in the majors works (primary sources) of these authors, which will be complemented by secondary source readings and each student's independent research. The writers studied in this course and their texts will also be viewed in the context of the greater literary and artistic production of the Spanish Golden Age.

SPAN 441 Prose of The 20th Century (3 Credit Hours)
This course studies the development of Spanish prose from the Generation of 1898/ Modernism through Post-modernism, with emphasis on the novel, short story, and essay.
Outcomes:
Students will better appreciate and understand the complex literature of modern Spain

SPAN 446 Prose of The Golden Age (3 Credit Hours)
The course studies representative selections from the pastoral and the picaresque novel, the short novel, and didactic works of the period (Gracián and Quevedo).
Outcomes:
Students will understand how these authors expressed colliding sensibilities, and incorporated traditional themes-love, knowledge, deception, violence-through parody and satire

SPAN 447 Don Quijote (3 Credit Hours)
This course is a graduate seminar and its primary focus is the literary masterpiece of Miguel de Cervantes, El ingenioso hidalgo don Quijote de la Mancha (1605, 1615). Students will analyze the work that has come to be known as the first modern novel of Europe, and, through a close reading of the text, study the novel in relation to the literary traditions of the Renaissance: novella, the pastoral romance, the romance of chivalry, the humanist dialogue, the picaresque novel, including poetry and the comedia. We will give special attention to the historical, social and cultural context of Cervantes' world, and students will gain exposure to the major critical trends and interpretations surrounding his novel. Cervantes confronts readers with the complex social fabric of early modern Spain, and immerses us in the religious and economic realities of the Iberian Peninsula and the Mediterranean world. Our close reading of Don Quijote will explore its links to the network of institutions, practices, and beliefs that constituted early modern Spanish culture.

SPAN 470 Hispanic-American Poetry (3 Credit Hours)
The course traces the development of Latin American poetry in such representative poets as Rubén Darío, Gabriela Mistral, and Octavio Paz.
Outcomes:
Students will recognize the major themes and forms of Latin American poetry with a special emphasis on the 19th and 20th centuries

SPAN 480 Hispanic-American Novel (3 Credit Hours)
Pre-requisites: graduate standing
Analyzes salient themes and formal features of twentieth-century novel. Taught in Spanish. Prerequisite: graduate standing.
Outcomes:
Students will identify stylistic and thematic contours of the modern Latin American novel and draw connections between works of literature and the broader culture

SPAN 487 La Novela De La Revolucion Mexico (3 Credit Hours)
Pre-requisites: graduate standing
An analysis of representative works and themes of the Mexican Revolution, its mystique, critique, and legacy. Taught in Spanish.
Outcomes:
Students will comprehend main features of literature of the Revolution and draw relationships to contemporary Mexican cultural themes

SPAN 489 Cuento Hispano-Americano (3 Credit Hours)
The development of the Hispanic short story is studies in this course. Authors included are Quiroga, Cortázar, García Márquez, Castellanos, Valenzuela, and Ferré.
Outcomes:
Students will be able to contextualize the stories, analyze them both formally and thematically, and recognize the different types of short story written in Latin American: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 490 Hispanic Culture & Civilization (3 Credit Hours)
Pre-requisites: graduate standing
Interdisciplinary seminar brings to bear perspectives of literary intellectuals, anthropologists, sociologists, educators, and theologians on the topic. Visions of America. Taught in Spanish.
Outcomes:
Students will understand significance and many facets of theme of cultural identity in Latin America as expressed in various disciplines

SPAN 499 Graduate Internship (1-6 Credit Hours)
A course designed to provide students with the opportunity to make a connection between Hispanic Studies and its praxis in a professional work environment.

SPAN 500 Directed Readings (3 Credit Hours)
The course is composed of special readings undertaken only by highly qualified students and supervised by a member of the department.
Outcomes:
Students will be able to work individually on a research project of their own selection

SPAN 501 Thesis Research (3 Credit Hours)
Pre-requisites: Completion of initial thesis forms appearing on the GS website; permission of thesis director
Designed for graduate students who wish to write an M.A. thesis, and therefore conduct, and receive credit for, thesis-related research under the direction of the thesis director.
Outcomes:
To advance the student's knowledge in the area of focus; to enhance research skills and allow the student to develop bibliographies and a research paper

SPAN 595 Thesis Supervision (1 Credit Hour)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their MA thesis.

SPAN 599 Directed Primary Research (3 Credit Hours)
Pre-requisites: Students must have the permission of the Instructor of Record to enroll in this course
This course will culminate in the completion and presentation of a well-polished article-length paper in modern languages, literatures and linguistics to faculty members in the form of an oral defense. This course fulfills the Masters Essay.
Outcomes:
To refine and articulate a specific article-length research project in Hispanic Studies, and to research, write and defend this successfully completed project

SPAN 605 Master's Study (1 Credit Hour)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their Masters' essay.

Hispanic Studies (MA)

As of Fall 2026, this program is no longer accepting applicants.

Our Masters of Arts degree in Hispanic Studies allows students to begin their careers as Hispanists in many areas: teaching, translation and interpretation, diplomacy, foreign service, social work, journalism, editing, international business and more. This degree program allows students to explore their own academic interests, while at the same time providing them with a solid foundation in the literature and culture of the Hispanic world.

The Hispanic Studies (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- English (MA) (p. 1201)
- Global Strategic Communication (MS) (p. 1306)
- Language, Culture, and Curriculum (MEd) (p. 1695)

Curriculum

The Master of Arts in Hispanic Studies can be completed through a coursework or a master's paper or thesis option. The coursework option requires 30 credit hours of courses and a two-part comprehensive examination based on coursework and the Graduate Reading List. The second option similarly requires the completion of 30 credit hours of courses, as well as the composition of a master's essay (or research-length article), and oral defense. The third option again requires 30 credit hours of courses and completion of a master's thesis and oral defense. The essay and thesis option can only be taken with previous approval of the Graduate Program Director and the Graduate Committee.

Additionally, candidates for the MA degree fulfill the Research Tool Requirement of the Graduate School by showing competency in a language other than English or Spanish. This requirement can be fulfilled by taking a translation exam in the Graduate School, or by taking a language course at Loyola or elsewhere and earning a grade of B or higher.

Besides the traditional Master's program, the Hispanic Studies (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Required Coursework

Coursework for credit toward the MA in Hispanic Studies consists of graduate seminars in Spanish. With the permission of the Graduate Program Director, graduate students may take up to two graduate seminars in other academic departments of Loyola University, and up to two independent study courses.

Code	Title	Hours
Ten (10) SPAN Courses		**30**
All students take ten courses, including those taking exam or those completing the MA essay or the MA thesis		
Students choose from the following based on offerings available:		
SPAN 402	Methods of Teaching Spanish	
SPAN 403	Structure of Modern Spanish	
SPAN 405	Critical Methods	
SPAN 410	General Linguistics & Romance Languages	
SPAN 415	Medieval Spanish Literature	
SPAN 416	Golden Age of Spanish Literature	
SPAN 419	Romanticism in Spanish Literature	
SPAN 420	Realism & Naturalism	
SPAN 421	Theatre of Twentieth Century	
SPAN 426	Theater of The Golden Age	
SPAN 431	Poetry of The 20th Century	
SPAN 436	Poetry of The Golden Age	

SPAN 437	Golden Age-Spanish Mysticism	
SPAN 441	Prose of The 20th Century	
SPAN 446	Prose of The Golden Age	
SPAN 447	Don Quijote	
SPAN 470	Hispanic-American Poetry	
SPAN 480	Hispanic-American Novel	
SPAN 487	La Novela De La Revolucion Mexico	
SPAN 489	Cuento Hispano-Americano	
SPAN 490	Hispanic Culture & Civilization	
Total Hours		**30**

Independent Studies/Directed Readings

Occasionally the department of Modern Languages and Literatures offers independent studies at the graduate level SPAN 500 Directed Readings. When applicable, students may take up to one or two of these courses for credit towards the MA in Hispanic Studies. Normally, independent studies in other LUC departments or academic programs do not apply.

Internships

On occasion, the graduate program also offers academic credit towards the MA in Hispanic Studies in the form of an internship (SPAN 499 Graduate Internship). Please see the program director for more details.

Master's Paper or Thesis

Students who choose to write a master's paper or thesis are enrolled in SPAN 595 Thesis Supervision or SPAN 605 Master's Study to maintain standing in the Graduate School while conducting research and writing.

Suggested Sequence of Courses

Traditional Master's Program

In order to provide optimal flexibility in the Master's program, there is no required course sequence. However, students should meet with their Graduate Program Director to choose courses that highlight their research interests. Students who choose to write a Thesis or Master's Paper must take SPAN 595 Thesis Supervision and/or SPAN 605 Master's Study.

Accelerated Master's Pathway

Students can take up to 12 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs. Since there is no required course sequence to provide optimal flexibility, students should meet with their Graduate Program Director to choose courses that highlight their research interests. Students who choose to write a Thesis or Master's Paper must take SPAN 595 Thesis Supervision and/or SPAN 605 Master's Study.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review

process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, graduates will be able to:

- demonstrate familiarity with works of Latin American and Peninsular literature
- demonstrate familiarity with the general characteristics of several traditions and trends within the literary contexts of Latin America and Spain
- use the Spanish vocabulary necessary for discussing literature critically
- understand broad historical events, cultural currents, and current academic trends as they are represented in Latin American and Peninsular literature
- read, write, and speak Spanish fluently
- demonstrate the ability to do independent, scholarly research by integrating, comparing, and evaluating ideas and materials from various sources, both literary and critical
- develop and sustain a coherent argument in both oral and written Spanish
- know how to foster a collegial, collaborative learning environment that encourages self-expression
- comprehend the social and historical function and significance of literature, culture, and art in Spain and Latin America, and more broadly
- understand and incorporate the national standards for the teaching of foreign languages into the teaching of Spanish at various levels
- understand from a task-based perspective the theoretical and practical issues of communicative language teaching for all skill areas
- demonstrate competence in a language other than English or Spanish, for the purpose of research

Philosophy

Our graduate programs prepare students to be scholars and teachers who are grounded in the history of philosophy as well as contemporary philosophical methodologies. Our programs support specialization in a variety of contemporary fields, including those that expand the purview of philosophical inquiry beyond its traditional boundaries. Our department values philosophical pluralism, and our faculty represent diverse philosophical schools and perspectives, offering students a uniquely well-rounded education. We also take seriously the commitment of our Jesuit institution to social justice, providing opportunities to pursue philosophical inquiry that is socially engaged, interdisciplinary, and oriented toward the betterment of the world.

Graduate Programs

- Philosophy (MA) (p. 1235)
- Philosophy (PhD) (p. 1238)
- Social Philosophy (MA) (p. 1241)

Philosophy (PHIL)

PHIL 400 Philosophy Research Tools (3 Credit Hours)
This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Plato
Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)
Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)
Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)
Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)
Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)
Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)
Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 417 Classical German Philosophy (3 Credit Hours)
Pre-requisites: Graduate student status
Classical German Philosophy begins with Kant and his immediate predecessors, and extends to the early mid-19th century, including figures such as Herder, Fichte, Schelling, Goethe, Schiller , and Hegel, Feurebach, and Marc, among others. This course may include critiques of developments out of classical German philosophy. Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical Philosophy. Students will also become competent in engaging basic research in the philosophy of this era.
Outcomes:
Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical philosophy

PHIL 419 Aesthetics (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in aesthetics.
Outcomes:
Students will become conversant with the major projects and schools of thought in the field of aesthetics; Students will also gain knowledge of contemporary scholarship and develop basic research skills in this field

PHIL 420 Hegel (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)
Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)
Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)
Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)
Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)
Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Philosophy (3 Credit Hours)
Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)
Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)
Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)
Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)
Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)
Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)
Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 453 Philosophy of Technology (3 Credit Hours)
Pre-requisites: Restricted to Graduate Philosophy students, Other graduate students may enroll with Graduate Program Director permission
Introduces students to key issues, debates, and figures in the philosophy of technology, including both metaphysical and ethical issues related to computation, artificial intelligence, and human versus machine personhood.
Outcomes:
Interpret and compare the work of major figures in the philosophy of technology; Analyze and evaluate the ethical implications of technology on human persons and society; Analyze and evaluate theories of the ontology of technology; Produce original arguments based on the text, figures, and themes engaged in the course and apply these arguments to contemporary technological issues

PHIL 454 Philosophy of Religion (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)
Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)
Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)
Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)
Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)
Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)
Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)
Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)
Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 478 Research Methods in Social Justice (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course looks at several different methodological approaches to social justice issues: broad ethical frameworks; specific ethical issues, such as intent and volition; quantitative analysis; US law; and international law.
Outcomes:
Students are expected to know how to conduct literature reviews, how to use these approaches in analyzing social justice issues, and how to write up and present their research

PHIL 479 Issues in Applied Ethics (3 Credit Hours)
Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)
Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)
This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.
Outcomes:
Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)
Introduces students to philosophical issues concerning the social sciences.

PHIL 483 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 484 Philosophical Anthropology (3 Credit Hours)
Prepares students for advanced work about philosophical conceptions of human existence.
Interdisciplinary Option: Women & Gender Studies

PHIL 485 International Ethics (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 487 Moral and Legal Issues of Economic Sanctions (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course will provide an introduction to economic sanctions in the context of foreign relations and global governance. We will look closely at the issues of effectiveness and humanitarian impact. We will also look at legal issues, such as the problem of extraterritoriality.
Outcomes:
It is expected that students will have an overview of how sanctions interact with international law, institutions of global governance, and human rights law

PHIL 490 Current Philosophical Issues (3 Credit Hours)
Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (0-3 Credit Hours)
This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of social ethics. the student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)
This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (1 Credit Hour)
This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.
Outcomes:
The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (1 Credit Hour)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (1 Credit Hour)
This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (1 Credit Hour)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (1 Credit Hour)
This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Philosophy (MA)

The terminal MA in Philosophy at Loyola integrates a strong grounding in the history of philosophy with current debates in social and political philosophy, ethics, and contemporary philosophy. Our department is distinguished by its exceptional breadth in the history of philosophy with internationally recognized faculty working in ancient Greek and Chinese philosophy, Islamic philosophy, and medieval, modern and 19th and 20th century European philosophy. Students who complete the terminal MA can therefore expect to develop a strong foundation in the core areas of philosophy and the ability to pursue specialized research in a range of areas at the doctoral level. Loyola's terminal MA also lays an excellent intellectual foundation for those who intend to pursue graduate work outside of philosophy in such fields as history, theology, and English, as well as those interested in pursuing this degree for personal enrichment.

The Philosophy (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Program Highlights

- Writing workshops and vocational seminars to introduce students to coursework in graduate school
- Professional development and placement workshops that prepare students to present and publish their original research and apply for doctoral programs in philosophy and other fields as well as for professional careers in law, publishing, education, public policy and more
- Generalist training in the history of philosophy and an emphasis on philosophical pluralism that can prepare students for specialized research at the doctoral level

- Work with internationally recognized faculty in social and political philosophy, ethics, and bioethics
- Opportunity to attend seminars, conferences, and lectures in the Chicago-area

Doctoral

- Philosophy (PhD) (p. 1238)

Curriculum

The Master of Arts in Philosophy requires 30 credit hours of coursework and a MA examination. Entering MA students must have a Bachelor of Arts degree or its equivalent from an accredited institution. They should have a solid background in philosophy (ordinarily an undergraduate minor or its equivalent).

Besides the traditional Master's program, the Philosophy (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Specific courses may not be offered every semester and course offerings are subject to change.

Code	Title	Hours
Select one course in Ancient Philosophy:		*3*
PHIL 401	Plato	
PHIL 402	Aristotle	
PHIL 403	Ancient Philosophy	
Select one course in Medieval Philosophy:		*3*
PHIL 405	Augustine	
PHIL 406	Aquinas	
PHIL 407	Medieval Philosophy	
PHIL 408	Late Medieval Philosophy	
Select one course in Modern Philosophy:		*3*
PHIL 410	Descartes	
PHIL 411	Classical Rationalism	
PHIL 412	Classical Empiricism	
PHIL 415	Kant	
PHIL 416	17th-18th Century Philosophy	
Select one course in Continental Philosophy:		*3*
PHIL 422	Nietzsche	
PHIL 430	Husserl	
PHIL 432	Heidegger	
PHIL 433	Phenomenology/Existentialism	
PHIL 434	Hermeneutics & Critical Theory	
PHIL 436	Contemporary French Philosophy	
PHIL 437	Contemporary German Philosophy	
PHIL 438	Topics in Continental Philosophy	
Select one course in Analytic Philosophy:		*3*
PHIL 442	Anglo-American Philosophy	
PHIL 443	Anglo-American Epistemology	
PHIL 444	Studies in Logic	
PHIL 447	Issues in Cognitive Science	
Select five 400-level Electives		*15*
Total Hours		**30**

Note: Courses may fulfill different distribution requirements on an ad hoc basis, depending on course content. To confirm, please consult Graduate Program Director.

Other Philosophy graduate level courses may be used in the above requirements. Students should consult with the Graduate Program Director if a course of interest is not shown in the above curriculum grid. For a full list of Philosophy graduate level courses, click here (p. 1232).

Language Requirement

There is no language requirement or other research tool requirement for the M.A. degree in the Philosophy Department.

MA Examination

Toward the end of the course of studies, students pursuing the MA in Philosophy must pass an oral examination before a committee of at least three faculty members on a substantial research paper or thesis the student has written. The focus of the examination is on the argument and analysis of the paper, as well as on the background thought that the argument and analysis presuppose.

Suggested Sequence of Courses

Traditional Master's Program

Students in the terminal MA program may take any course from PHIL 400 to PHIL 490. However, students are advised to take courses in their first year that satisfy distribution requirements and/or introduce them to foundational texts, figures, and philosophical skill-sets. They will be encouraged to save elective courses for their second year when students typically take two courses per semester rather than three. Ideally, these electives will be related to their MA examination research. They will also focus in their second year on completing their MA examination, applying to PhD programs, and/or preparing for career paths outside of academic philosophy. A sample plan of study is included below:

Course	Title	Hours
Year 1		
Fall		
PHIL 401	Plato	3
PHIL 407	Medieval Philosophy	3
PHIL 478	Research Methods in Social Justice	3
	Hours	**9**
Spring		
PHIL 415	Kant	3
PHIL 433	Phenomenology/Existentialism	3
PHIL 441	Wittgenstein	3
	Hours	**9**
Year 2		
Fall		
PHIL 480	Social & Political Philosophy	3
PHIL 490	Current Philosophical Issues	3
	Hours	**6**
Spring		
PHIL 457	Aesthetics	3

PHIL 468	Topics in Ethics	3
	Hours	**6**
	Total Hours	**30**

Accelerated Master's Pathway

Students can take up to 12 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

All courses from PHIL 400 to PHIL 490 are appropriate to take during the student's undergraduate career. However, students will be advised to take courses during their senior year that satisfy distribution requirements for the MA and/or introduce students to foundational texts, ideas, or philosophical skill-sets: These courses include but are not limited to:

PHIL 401 Plato; PHIL 402 Aristotle; PHIL 403 Ancient Philosophy; PHIL 407 Medieval Philosophy; PHIL 415 Kant; PHIL 416 17th-18th Century Philosophy; PHIL 438 Topics in Continental Philosophy; PHIL 442 Anglo-American Philosophy; PHIL 450 Epistemology; PHIL 451 Metaphysics; PHIL 463 Virtue Ethics; PHIL 468 Topics in Ethics; PHIL 478 Research Methods in Social Justice; PHIL 480 Social & Political Philosophy; PHIL 483 Philosophical Questions in Human Rights; PHIL 490 Current Philosophical Issues

Below, please find a sample study plan for students in their senior year. Note that this plan will vary depending on the number of remaining required courses the student has for the major and the university curriculum.

Course	Title	Hours
Senior		
Fall		
PHIL 401	Plato	3
PHIL 478	Research Methods in Social Justice	3
	Hours	**6**
Spring		
PHIL 407	Medieval Philosophy	3
PHIL 480	Social & Political Philosophy	3
	Hours	**6**
Master's		
Fall		
PHIL 415	Kant	3
PHIL 433	Phenomenology/Existentialism	3
PHIL 441	Wittgenstein	3
	Hours	**9**
Spring		
PHIL 457	Aesthetics	3
PHIL 468	Topics in Ethics	3
PHIL 490	Current Philosophical Issues	3
	Hours	**9**
	Total Hours	**30**

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review

process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA in Philosophy, students will have:

- Acquired advanced disciplinary knowledge and be able to: (a) demonstrate broad knowledge of the history of philosophy; (b) engage critically with perennial and current debates in at least one branch of philosophy, such as ethics, social and political philosophy, or metaphysics; and (c) demonstrate focused expertise in a particular subfield of philosophy through sustained independent research.
- Mastered methodological and argumentative skills and be able to: (a) identify and analyze the hidden presuppositions of conceptual frameworks, social practices, or systems of belief; (b) construct and evaluate philosophical arguments in written and oral form; and (c) apply philosophical methods and insights across both analytic and continental traditions and to other areas of research or inquiry.
- Produced and disseminated original scholarship and be able to: (a) identify a significant philosophical question, situate it within the relevant scholarly literature, and construct an original argument in response; (b) compose a substantial research paper meeting graduate-level standards of philosophical writing; and (c) frame, defend, and respond to critical questioning of that research before a faculty committee in the MA examination.
- Demonstrated professional engagement and ethical commitment and be able to: (a) participate in the academic community through contribution to seminars, conferences, or workshops in philosophy; (b) articulate and apply Jesuit values—including commitments to truth, justice, and the common good—to philosophical questions; and (c) collaborate productively with peers and faculty in shared intellectual work.

Philosophy (PhD)

Loyola's PhD in Philosophy is a premiere program for graduate study in continental philosophy, social and political philosophy, and the history of philosophy. It is also renowned for its strengths in feminism, ethics and value theory, critical philosophy of race, and bioethics. Our department values philosophical pluralism and faculty are informed by a variety of traditions and methodologies, so students are exposed to a range of approaches, both analytic and continental, through their coursework. Loyola thus offers doctoral students a uniquely well-rounded education as well as a diversity of research paths that they can pursue.

Program Highlights

- **Outstanding Mentorship and Professional Development:** In addition to outstanding individual mentorship and advising, our faculty collaboratively designs and conducts programming to support student success. This includes a first year proseminar to prepare students for graduate coursework and professional development workshops throughout the year to prepare students to present and publish original research.
- **Developing Research Skills:** Doctoral students can take on research assistantships that cultivate relevant research and professional skills, for instance, by serving as editorial assistants for academic journals, directing our MAP chapter (https://www.luc.edu/philosophy/researchandinitiatives/minoritiesandphilosophychapter/), and engaging in faculty directed research. Doctoral students are also encouraged to participate in at least one of our research groups (https://www.luc.edu/philosophy/researchandinitiatives/researchgroups/) to expand their scholarly networks and present their research.
- **Teaching Excellence:** Loyola will prepare you to be an agile teacher who can design and deliver courses across the core areas of philosophy and adapt to the needs of students in an increasingly complex world. Our teaching assistantships prioritize pedagogical development, and we offer teacher training through pedagogy seminars and one-on-one mentorship as well as the opportunity to teach courses as instructors of record.
- **Academic Careers:** In addition to individual advising, Loyola's placement committee offers workshops and seminars to prepare doctoral students for success on the academic job market. This committee provides feedback on application materials, schedules mock-interviews, and coaches students through the process of campus visits and job offers. Our alumni enjoy great success in their chosen career paths, and many secure full-time positions at respected colleges and universities.
- **Career Diversity:** Loyola also recognizes the importance of supporting students interested in pursuing non-traditional career paths, offering internships and training in such fields as education administration, academic publishing, public policy, social work, and computer programing.

Curriculum

The PhD in Philosophy requires 49 hours of coursework, a foreign language requirement, qualifying examination, and dissertation. All requirements for the Master of Arts in Philosophy must be satisfied as the first stage of doctoral work. Entering PhD students must have a Bachelor of Arts degree or its equivalent from an accredited institution. They should have a solid background in philosophy, ordinarily an undergraduate major, including coursework in the history of ancient and early modern European philosophy as well as in metaphysics, epistemology, logic, ethics, and social-political philosophy.

Coursework Requirements

Specific courses may not be offered every semester and course offerings are subject to change.

Code	Title	Hours
Select one course in Ancient Philosophy:		*3*
PHIL 401	Plato

Total Hours		**49**

[1] This will be taken as a 0-credit Pedagogy Seminar.

Note: Courses may fulfill different distribution requirements on an ad hoc basis, depending on course content. To confirm, please consult Graduate Program Director.

Other Philosophy graduate level courses may be used in the above requirements. Students should consult with the Graduate Program Director if a course of interest is not shown in the above curriculum grid. For a full list of Philosophy graduate level courses, click here (p. 1232).

For further information, please refer to the Philosophy Graduate Student Handbook (https://www.luc.edu/media/lucedu/philosophy/pdfs/Grad%20Handbook%20January%202023.docx.pdf), or contact the Graduate Program Director.

Research Tool/Foreign Language Requirement

The "Research Tool" requirement ensures that doctoral students have the research skills necessary to become responsible professional researchers in their fields. In philosophy, doctoral students typically fulfill the Research Tool by demonstrating reading proficiency in at least one foreign language relevant to their primary area of research, typically German, French, ancient Greek, Latin, or classical Arabic. Depending on the student's research area, reading proficiency in two foreign languages may be required. Upon fulfilling this requirement, students should be able to read philosophical texts in their original language as well as untranslated historical and contemporary commentaries on these texts in order to conduct advanced research in philosophy.

In exceptional cases students may petition to fulfill the Research Tool requirement in a way other than knowledge of a foreign language, e.g., by research in a lab or clinical training, when it is appropriate to their primary areas of research.

For additional information about the Research Tool requirement, please refer to the Philosophy Graduate Student Handbook (https://www.luc.edu/media/lucedu/philosophy/pdfs/Grad%20Handbook%20January%202023.docx.pdf), or contact the Graduate Program Director.

PhD Qualifying Examination

PhD students will be required to complete a Foundational Paper and oral defense. This paper will test their knowledge in their general dissertation research area and should be completed during the Fall of Year 3. Upon completing and defending the Foundational Paper, students will take the Dissertation Proposal Seminar in Spring of their third year in preparation for their candidacy exam. The candidacy exam focuses on a dissertation

proposal and a draft of the first chapter or an extended review of the literature relevant to the dissertation. It also includes an oral defense designed to assess whether the proposal is well formed and a project which the student is prepared to carry out successfully. This examination may be taken after a student has completed all course distribution requirements and the first level of the language or other research tool requirement for the degree.

Dissertation and Oral Defense

The last stage of the PhD is the writing and defense of a dissertation. The dissertation is written under the direction of a member of the department's graduate faculty, and must be read and approved by at least two other readers who are ordinarily members of the department's graduate faculty. Formally, the dissertation begins with the submission of a "Thesis Outline." Upon approval of this outline the student is formally advanced to candidacy. The dissertation is completed with the passing of the public oral defense of the work and its acceptance by the Graduate School.

The MA Degree as Part of the PhD

The Master of Arts in Philosophy is ordinarily earned as the first part of a student's PhD work. Thirty hours of graduate coursework (10 courses) are required for students in the MA program. These courses must include five of the seven PhD distribution requirements, namely courses in contemporary Analytic Philosophy, Contemporary Continental Philosophy, Ancient Philosophy, Medieval Philosophy, and Modern Philosophy.

An MA Examination is required for students in the Accelerated Master's Pathway (AMP), MA in Social Philosophy, and MA in Philosophy programs. It is also required for students in the PhD program who have not completed an MA thesis prior to entering the PhD program at Loyola. There are three options for completing the MA Examination depending on the program of study: (1) Oral Defense of MA Thesis; (2) Oral Defense of MA Paper; and (3) Faculty Review of MA Portfolio comprised of Two Scholarly Research Papers (article-length).

Options 1 and 2 are designed for students in the AMP, MA in Social Philosophy, and MA in Philosophy. Option 3 is designed for students in the PhD program. While students may fulfill the MA examination in any one of these three ways, it is strongly recommended that students take the exam that has been designed for their program of study. Students will determine in consultation with their advisors which MA Examination option is best for them. Students should also consult the GPD if they wish to deviate from the recommended MA Examination option for their program.

Suggested Sequence of Courses

Students in the PhD program may take any course from PHIL 400 to PHIL 490. However, students are advised to take courses in their first year that satisfy distribution requirements and/or introduce them to foundational texts, figures, and philosophical skill-sets. They will be encouraged to save elective courses for their second and third year. Ideally, these electives will be related to the broad area of their dissertation research. Students will also take PHIL 505 Teaching Internship I for 0 credits before they begin teaching and PHIL 590 Dissertation Proposal Seminar for 0 credits before they defend their dissertation proposal. A sample plan of study is included below:

Course	Title	Hours
Year 1		
Fall		
PHIL 401	Plato	3
PHIL 478	Research Methods in Social Justice	3
PHIL 407	Medieval Philosophy	3
	Hours	**9**

PHIL 590	Dissertation Proposal Seminar	1
	Hours	**4**
	Total Hours	**49**

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the PhD in Philosophy, students will have:

- Acquired advanced knowledge and be able to: demonstrate knowledge of the history of philosophy; demonstrate knowledge of perennial and contemporary issues in philosophy; and demonstrate expertise in a particular area of philosophy.
- Engaged in discursive and critical thinking and be able to: identify hidden presuppositions of everyday beliefs; articulate and evaluate philosophical arguments; consider alternative kinds of philosophical argumentation; apply philosophical categories, methods, and insights to other areas of human interest, experience, or cognitive inquiry.
- Produced and disseminated scholarship and be able to: frame, research, complete and defend the PhD dissertation; and frame, complete and submit papers for scholarly conferences and publications.
- Developed effective teaching skills and be able to: effectively present material; create syllabi and craft a statement of teaching philosophy; run an effective philosophy course; satisfy University and Department expectations of core courses and instructors.
- Developed the skills to appreciate and participate in citizenship in the academic community, in the larger community, and the world and be able to: work for others for the sake of common purposes; foster Jesuit ideals, including truth and justice; enhance the pleasures of work in common.

Social Philosophy (MA)

The Master of Arts in Social Philosophy provides an education for students from various disciplines who want to explore social, political, legal, and ethical philosophy, especially as it applies to fields like law, public policy, criminal justice, gender equality, migration, environmental justice, bioethics, and AI policy. Students enrolled in this program will learn to analyze the human condition through complex social, political, economic, and cultural contexts that characterize the contemporary global landscape. This program emphasizes the integration of theoretical work in the classroom with work in the community. It also encourages interdisciplinary research and engagement with a variety of philosophical traditions and methodologies. Though students in this degree may wish to pursue a career in academic philosophy, it is designed to support students with a variety of professional goals.

The Social Philosophy (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Program Highlights

- Work with internationally recognized faculty in philosophy to evaluate social and ethical challenges shaping our world
- Design your degree by clustering courses in primary and secondary areas of focus that you choose
- Gain global perspectives on questions of ethics and social justice through the non-European Traditions requirement
- Integrate theoretical study with work in the world through a semester-long internship in PHIL 511: Social Ethics Practicum

Related Programs

Master's

- Philosophy (MA) (p. 1235)

Doctoral

- Philosophy (PhD) (p. 1238)

Curriculum

The MA in Social Philosophy requires 30 credit hours of coursework, an MA examination, and a semester-long internship through PHIL 511 Social Ethics Practicum. It is designed for students from various disciplines who want to explore social, political, legal, and ethical philosophy, especially as it applies to fields like law, public policy, criminal justice, gender equality, migration, environmental justice, bioethics, and AI policy. In addition to completing the required coursework, students work with faculty advisors to choose a primary and secondary area of focus aligned with their career goals. They uses these areas to select courses and choose an internship appropriate to these goals.

Entering MA in Social Philosophy students must have a Bachelor's degree or its equivalent from an accredited institution. Applicants will ideally have some coursework in philosophy or related fields from their previous institution, but a BA major or minor in philosophy is not required.

Besides the traditional Master's program, the Social Philosophy (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Please note that course offerings may vary by semester.

Code	Title	Hours
Non-European Traditions		**3**
Select one of the following:		
PHIL 407	Medieval Philosophy [1]	
PHIL 439	Chinese Philosophy	
PHIL 463	Virtue Ethics [1]	
PHIL 468	Topics in Ethics [1]	
PHIL 484	Philosophical Anthropology [1]	
PHIL 490	Current Philosophical Issues [1]	
Social and Political Philosophy/Ethics (p. 1242) [2]		**15**
PHIL 480	Social & Political Philosophy	
Select four additional courses		
Select three 400-level Electives [3, 4]		*9*
PHIL 511	Social Ethics Practicum	3
Total Hours		**30**

[1] In general, these courses meet the requirements, but sometimes a topic may not be suitable, in which case the Graduate Program Director will advise about a substitute.

[2] While it is not required, students are advised to choose a primary and secondary area of focus. Students will take three courses in the primary area and two courses from the secondary area. These areas include:

1. Social and Political Philosophy/Philosophy of Law
2. Critical Philosophy of Race/Feminism
3. Human Security

4. Climate Change and Environmental Justice
5. Bioethics
6. International Issues and Perspectives
7. Technology Ethics and Policy

[3] Students may also take PHIL 500, PHIL 501, PHIL 502, and PHIL 503
[4] Up to two electives may be taken in related courses offered by other graduate departments or schools within Loyola, subject to approval from the Graduate Program Director.

Students should consult with the Graduate Program Director if a course of interest is not shown in the curriculum grid. For a full list of Philosophy graduate level courses, click here (p. 1232).

Research Tool Requirement

There is no research tool/language requirement for this degree.

MA Examination

An MA Examination is required for students in the BA/MA, MA in Social Philosophy, and MA in Philosophy programs. It is also required for students in the PhD program who have not completed an MA thesis prior to entering the PhD program at Loyola. There are three options for completing the MA Examination depending on the program of study: (1) Oral Defense of MA Thesis; (2) Oral Defense of MA Paper; and (3) Faculty Review of MA Portfolio comprised of Two Scholarly Research Papers (article-length).

Options 1 and 2 are designed for students in the AMP and MA in Social Philosophy and the AMP and MA in Philosophy. Students work with a faculty advisor to determine which option is best depending on their career goals. Option 3 is designed for students in the PhD program. While students may fulfill the MA examination in any one of these three ways, it is strongly recommended that students take the exam that has been designed for their program of study. Students will determine in consultation with their advisors which MA Examination option is best for them. Students should also consult the GPD if they wish to deviate from the recommended MA Examination option for their program.

Suggested Sequence of Courses

Traditional Master's Program

Students in the MA in Social Philosophy may take any course from PHIL 400 to PHIL 490. However, students are advised to take courses in their first year that satisfy coursework requirements and/or introduce them to foundational philosophical skillsets. At the beginning of the first semester of Year 1, students work with a faculty advisor to choose a primary and secondary area of focus that aligns with their interests and career goals. Students will take three courses in the primary area of focus and two in the secondary area. They should complete no fewer than three of the five courses in the primary and/or secondary area of focus in Year 1. It is recommended that students complete PHIL 480 Social & Political Philosophy in Year 1. Students are also encouraged in Year 1 to take PHIL 478 Research Methods in Social Justice or a similar course that introduces students to foundational research and writing skills in social and political philosophy and satisfies an area requirement for the degree.

In Year 2, students complete any remaining coursework requirements and electives as well as PHIL 511 Social Ethics Practicum and the accompanying internship. Students will also complete the MA examination and work with their faculty advisor to prepare for their chosen career path.

A sample plan of study is included below:

Course	Title	Hours
Year 1		
Fall		
PHIL 480	Social & Political Philosophy [1]	3
Non-European Traditions Course		3
PHIL 400-Level Elective		3
	Hours	**9**
Spring		
Social and Political Philosophy/Ethics (p. 1242) [1]		3
Social and Political Philosophy/Ethics (p. 1242) [1]		3
Social and Political Philosophy/Ethics (p. 1242) [2]		3
	Hours	**9**
Year 2		
Fall		
PHIL 511	Social Ethics Practicum	3
Social and Political Philosophy/Ethics (p. 1242) [2]		3
	Hours	**6**
Spring		
PHIL 400-Level Elective [3]		3

PHIL 400-Level Elective [3]	3
Hours	**6**
Total Hours	**30**

[1] Primary area of focus.
[2] Secondary area of focus.
[3] May be taken outside of PHIL with GPD approval.

Accelerated Master's Pathway

Students can take up to 12 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

The following is a recommended plan of study for AMP students, but they are not required to take courses in this order. Students will work with a faculty advisor upon being admitted to the AMP to determine the best sequence of courses in their senior year based on the student's interests, the available course offerings, and the requirements of the degree.

Course	Title	Hours
Senior		
Fall		
PHIL 480	Social & Political Philosophy [1]	3
Social and Political Philosophy/Ethics (p. 1242) [1]		3
	Hours	**6**
Spring		
Social and Political Philosophy/Ethics (p. 1242) [1]		3
Non-European Traditions Course		3
	Hours	**6**
Master's		
Fall		
PHIL 400-Level Elective		3
PHIL 511	Social Ethics Practicum	3
Social and Political Philosophy/Ethics (p. 1242) [2]		3
	Hours	**9**
Spring		
Social and Political Philosophy/Ethics (p. 1242) [2]		3
PHIL 400-Level Elective [3]		3
PHIL 400-Level Elective [3]		3
	Hours	**9**
	Total Hours	**30**

[1] Primary area of focus.
[2] Secondary area of focus.
[3] May be taken outside of PHIL with GPD approval.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review

the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MA in Social Philosophy students will have:

- Acquired advanced knowledge in social, political, and ethical philosophy and be able to: (a) demonstrate knowledge of foundational and contemporary debates in social and political philosophy, ethics, and critical philosophy; (b) examine how European and non-European philosophical traditions have addressed questions of justice, rights, and social life; and (c) develop expertise at the intersection of a primary and secondary area of research focus.
- Mastered the critical and argumentative skills necessary to analyze and address concrete social and ethical challenges and be able to: (a) identify and analyze the philosophical presuppositions underlying social practices, legal frameworks, or policy debates; (b) construct, articulate, and evaluate philosophical arguments in written and oral form; and (c) apply philosophical methods and insights to concrete problems in their chosen area of professional or scholarly focus.
- Integrated theory and practice through applied philosophical work and be able to: (a) connect philosophical frameworks to real-world challenges in fields such as law, public policy, criminal justice, or environmental justice through the Social Ethics Practicum; (b) reflect critically on the ethical dimensions of professional practice in their internship setting; and (c) articulate the relevance of philosophical analysis to non-academic audiences and contexts.
- Produced and disseminated original scholarship and be able to: (a) identify a significant question in social or applied philosophy, situate it within the relevant scholarly literature, and construct an original argument in response; and (b) frame, complete, and defend an original research project through the MA examination
- Demonstrated professional engagement and ethical commitment and be able to: (a) participate in academic and professional communities through seminars, workshops, or public forums in philosophy or related fields; (b) articulate and apply Jesuit values—including commitments to truth, justice, and care for the common good—to social and ethical questions; and (c) collaborate productively with peers, faculty, and community partners in shared intellectual and practical work.

Political Science

The Department of Political Sciences offers students a personalized education within a distinctive graduate program. Graduate courses are taught by full time faculty and conducted in a seminar form, with specific attention to the individual interests of students. All graduate students receive extensive methodological training, a well-rounded exposure to political science- including courses in comparative politics and international relations- as well as courses in American politics and political theory.

Graduate Programs

- International Affairs (MA) (p. 1248)
- Political Science/Law (MA/JD) (p. 1888)
- Political Science (MA) (p. 1251)
- Political Science (PhD) (p. 1254)

Political Science (PLSC)

PLSC 400 Scope and Methods of Political Science (3 Credit Hours)
This is a broad course that lays out the main approaches to political science.

PLSC 401 Intro to Research Design & Method (3 Credit Hours)
This course is an introduction to principles of research design in political science. The main objective of this course is to familiarize students with the social scientific approach to studying politics.
Outcomes:
Students will learn how to ask empirical questions about the political world, how to develop theories and generate testable hypotheses, how to collect appropriate types of evidence, how to answer research questions scientifically using such evidence, and how to clearly convey their evidence and argument to others

PLSC 402 Seminar on Empirical Analysis (3 Credit Hours)
The course allows students to develop additional methods to empirical analysis.

PLSC 404 Selected Problems in American Politics (3 Credit Hours)
This course focuses on selected problems in the study of American politics and the American Political system.
Outcomes:
Gain an in-depth understanding of selected problems in American politics and the American Political system

PLSC 405 American Executive Branch (3 Credit Hours)
This course relies on historical and contemporary scholarly literature on the American presidency to analyze the development and scope of rhetorical and party leadership, legislative relations, the commander-in-chief and diplomatic roles as well as the growth of the institutionalized presidency.
Outcomes:
Students will master the key literature on the American presidency as well as conduct research on a particular aspect of the US presidency

PLSC 406 American Legislative Branch (3 Credit Hours)
This course focuses on the organization of and decision-making in the US legislative branch.
Outcomes:
Students will fully understand how the US Congress is structured and legislates, as well as its interactions with other US institutions and with American society

PLSC 407 Public Policy-Making & Implementation (3 Credit Hours)
This course examines the process and dynamics of US policy-making systems.
Outcomes:
Students will understand the development of the public sector agenda, the policy formation and legitimation processes, and the role of implementation functions, as these relate to substantive issues or policy arenas

PLSC 409 Organizational Theory (3 Credit Hours)
The course offers a broad approach to the various theoretical and practical approaches to the study of organizations.

PLSC 410 Urban Politics (3 Credit Hours)
This course addresses the major theories, studies and issues of urban politics.
Outcomes:
Students will understand "political machines", parties, interest groups, voting, protests, minority and ethnic groups, city councils, mayors, bureaucrats and community power structures

PLSC 411 American Political Parties/Electoral Process (3 Credit Hours)
This course analyzes the roles and functions of the party system and voting behavior in the United States.
Outcomes:
Students will understand the role of mass communication and issues in elections, the impact of party identification, and the impact of the electoral system on behavior of party and voter

PLSC 412 Constitutional Politics (3 Credit Hours)
This course examines constitutional policy-making in the United States.
Outcomes:
Students will understand the political role of the Supreme Court, judicial values in constitutional adjudication, and the impact of court decisions

PLSC 416 US Political Institutions (3 Credit Hours)
The course surveys academic literature on political institutions in the United States including the legislative, executive, and judicial branches of the federal government, state and local governments, parties, interest groups, media organizations, and civic organizations.
Outcomes:
Students will gain an in-depth understanding of a wide variety of political institutions and how they interact with one another

PLSC 417 The American Legal System (3 Credit Hours)
This course examines the structure, functions, interrelationships, dynamics, and decision-making processes of the US legal system.
Outcomes:
Students will understand the major components of the American legal system - legislatures, administrative agencies, and courts

PLSC 418 Political Psychology & Socialization (3 Credit Hours)
This course examines psychological, social and environmental influences on political attitudes and behavior.
Outcomes:
Students will understand the psychodynamics of political development and socialization as they interact with opinion formation and political participation

PLSC 419 Managing Urban Government (3 Credit Hours)
This course studies the politics of urban government management.
Outcomes:
Students will understand the environments in which the urban manager functions

PLSC 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

PLSC 421 Democratic Political Systems (3 Credit Hours)
This course examines selected democratic political systems.
Outcomes:
Students will understand how selected democratic systems operate, focusing on their similarities and differences

PLSC 422 Authoritarian Political Systems (3 Credit Hours)
This is a graduate-level seminar on authoritarian political systems. The course explores theoretical perspectives on authoritarianism, political institutions in non-democracies, and paths to democratization.
Outcomes:
Students will become familiar with concepts and theories of authoritarianism, gain knowledge about different types of authoritarian rule, and learn about how authoritarian governments work and perpetuate power

PLSC 423 Soviet & Post-Soviet Politics (3 Credit Hours)
This course analyzes the development of Soviet and post-Soviet politics since 1917.
Outcomes:
Students will understand the emergence and development of Soviet politics, as well as its decline in the mid-1980s

PLSC 424 Politics of Developing Areas (3 Credit Hours)
This course examines the politics of the "developing world."
Outcomes:
Students will understand the methods used to analyze politics in the developing and underdeveloped nation-states

PLSC 425 Sub-Saharan Africa (3 Credit Hours)
This course examines politics in Africa from the pre-colonial period to the present.
Outcomes:
Students will understand issues relating to decolonization, ethnicity, class, political economy, democratization, and regime transition in Sub-Saharan Africa

PLSC 426 Latin American Politics (3 Credit Hours)
This course examines important themes in the study of politics in Latin America.
Outcomes:
Students will understand the current scholarship and methodologies in the study of Latin American politics

PLSC 427 Politics of the Middle East (3 Credit Hours)
Enrollment Conditions: Permission of the instructor required. This course offers a historical and thematic approach to study the society and politics of the contemporary Middle East. Two central aims of the course are to cultivate critical perceptions regarding widespread images and descriptions of the region and to bolster students' historical, socioeconomic and political knowledge of the region.
Outcomes:
Students will master important political science literature on the Middle East and be well positioned to pursue original research

PLSC 428 Political Violence (3 Credit Hours)
This course offers a thematic approach to the study of political violence with a particular focus on armed conflicts involving non-state actors (i.e., civil wars). It addresses a wide variety of questions informed by the cutting-edge research in political science and other disciplines.
Outcomes:
Students will develop an understanding of the causes of different forms of violence in different parts of the world, motivations of people who participate in violence, and solutions to armed conflicts

PLSC 429 Comparative Politics Selected Problems (3 Credit Hours)
This course examines selected issues in comparative politics.
Outcomes:
Students will master the literature or conduct research in a particular area of comparative politics

PLSC 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

PLSC 431 Formulation US Foreign Policy (3 Credit Hours)
This course examines how US foreign policy is made.
Outcomes:
Students will understand the decision-making institutions and their interaction in the formulation and execution of political, military and economic foreign policy

PLSC 432 Comparative Foreign Policy Analysis (3 Credit Hours)
This course examines contemporary policy positions of major blocs of nations as well as specific nations.
Outcomes:
Students will understand how foreign policy is made in countries other than the United States, as well as the policy of blocs of nations

PLSC 433 International Organization (3 Credit Hours)
This course examines the development and role of international organizations.
Outcomes:
Students will understand the political and administrative principles and problems of various types of international organizations, including the United Nations, the World Trade Organization, the World Bank, the International Monetary Fund and other key global and regional organizations

PLSC 435 International Political Economics (3 Credit Hours)
This course examines global economic systems.
Outcomes:
Students will understand global political-economic relations in the post-WWII period, including international monetary relations, international trade, regional integration, direct investment, debt, and development assistance

PLSC 436 International Conflict (3 Credit Hours)
This course focuses on concepts and approaches related to the causes of war, conflict and peace in the international system.

PLSC 437 Selected Problems International Law (3 Credit Hours)
This course examines selected issues or problems in international law.
Outcomes:
Students will understand contemporary theories of international law and the relationships among the various traditional and contemporary areas of international law

PLSC 439 Selected Problems in International Politics (3 Credit Hours)
This course examines important themes and theories in international politics.
Outcomes:
Students will master a specific body of literature or conduct research in a particular area of international relations

PLSC 440 Ancient Political Thought (3 Credit Hours)
This course examines the major works of the most important theorists within the classical tradition.
Outcomes:
Students will master key writings of Thucydides, Plato, Aristotle, and other theorists

PLSC 442 Modern Political Thought (3 Credit Hours)
This course examines major modern political thinkers.
Outcomes:
Students will master key works of from the Italian Renaissance to the French Revolution

PLSC 444 Great Authors (3 Credit Hours)
This course focuses on the works of political theorists in the western tradition.
Outcomes:
Students will master key works of theorists in the western tradition

PLSC 446 Political Ethics (3 Credit Hours)
This course surveys classic debates on ethics - such as utilitarianism and deontological ethics - to provide students with analytical tools to answer the deceptively simple question "What is the right thing to do?" The course draws on classical readings of political philosophy, while seeking to make those abstract problems tangible by applying them to real world cases and examples.

PLSC 447 American Political Thought to Civil War (3 Credit Hours)
This course examines pre-Civil War US political thought.
Outcomes:
Students will master the works of key thinkers from the American founding to the Civil War

PLSC 449 19th Century Political Thought (3 Credit Hours)
This course examines key theorists in the nineteenth century.
Outcomes:
Student will master the works of key theorists beginning with the French Revolution and through the nineteenth century

PLSC 470 Fieldwork in Political Science-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

PLSC 476 Political Analysis II (3 Credit Hours)
This is an intermediate course in data analysis methods in political science.
Outcomes:
Students will master intermediate research and quantitative methods in political science

PLSC 499 Directed Readings (3-6 Credit Hours)
This course involves specialized study under the supervision of a faculty member.
Outcomes:
Students will master a particular segment of academic literature or conduct in-depth research on a specific topic

PLSC 502 Seminar in Political Behavior (3 Credit Hours)
This course examines selected topics in the development and shaping of political behavior.
Outcomes:
Students will master the political behavior literature and conduct research in specific areas of the discipline

PLSC 503 Seminar: Law & Political Behavior (3 Credit Hours)
This course analyzes selected topics concerning the relationship between legal processes, policies, and politics.
Outcomes:
Students will understand a particular topic in law and political behavior

PLSC 504 Seminar: American Public Policy (3 Credit Hours)
This seminar analyzes the American public policy.
Outcomes:
Students will understand the formation, implementation, and evaluation of public policies in the United States

PLSC 505 Seminar in Urban Problems (3 Credit Hours)
This course analyzes selected policies in urban and state politics.
Outcomes:
Students will understand the politics of specific urban and state policies

PLSC 506 Seminar State & Urban Policy Analysis (3 Credit Hours)
This course examines current perspectives and techniques in the analysis of state and urban policies.
Outcomes:
Students will understand contemporary policy analysis perspective and techniques as well as methods in policy analysis

PLSC 515 Seminar-Public Administration (3 Credit Hours)
This is an upper-level seminar on complex questions related to public administration.

PLSC 520 Seminar: Comparative Politics (3 Credit Hours)
This course examines an important, contemporary area of research in comparative politics.
Outcomes:
Students will master a specific body of literature and conduct research in a specific area in comparative politics

PLSC 521 Seminar Western European Politics (3 Credit Hours)
This course examines contemporary politics in Western European countries.
Outcomes:
Students will understand political and policy developments in Western Europe, as well as the structures of the European Union and the North Atlantic Treaty Organization

PLSC 531 Seminar: International Politics (3 Credit Hours)
This course examines various research topics in international politics.
Outcomes:
Students will master a particular body of work or conduct research in a specific area of international politics

PLSC 532 Soviet/Post-Soviet Foreign Policy (3 Credit Hours)
This course examines the foreign policies of the Soviet Union and the post-Soviet states.
Outcomes:
Students will understand the formulation and application Soviet and post-Soviet foreign policies

PLSC 533 U.S. National Security (3 Credit Hours)
This course examines the U.S. security establishment and the national security process.
Outcomes:
Students will understand how US security policy is made, including the defense budget, US force structure, intelligence, covert operations, and the role of Congress

PLSC 543 Liberalism (3 Credit Hours)
This course analyzes liberal political thought.
Outcomes:
Students will master key works and theorists focusing on equality, liberty, natural rights, utilitarianism, and idealistic bases of modern liberal society

PLSC 546 Political Philosophy Selected Problems (3 Credit Hours)
This course examines a selected theoretical issue in the history of political thought.
Outcomes:
Students will master the writings and theories in a particular theme of political theory

PLSC 595 Thesis Supervision (1 Credit Hour)
The is the first course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 596 Thesis Research (3 Credit Hours)
The is the second course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 597 Dissertation Research (3-6 Credit Hours)
The course is for students researching a thesis topic towards writing a dissertation prospectus.

PLSC 598 Teaching Internship (3 Credit Hours)
The course allows students to complete an internship focused on teaching.

PLSC 600 Dissertation Supervision (1 Credit Hour)
The course is for students researching a dissertation towards earning a PhD.

PLSC 605 Master's Study (1 Credit Hour)
The course is for students researching a thesis towards earning a Master's degree.

PLSC 610 Doctoral Study (1 Credit Hour)
The course is for students researching a dissertation towards earning a PhD.

International Affairs (MA)

The growing interconnectedness of the world's almost 200 countries, termed globalization, and the rising impact of foreign affairs on our daily lives increasingly require individuals with advanced knowledge of International Affairs. The Master of Arts in International Affairs allows students to explore global problems and interactions from an interdisciplinary perspective that makes use of eight Arts and Sciences academic departments and four additional colleges. Students will have the flexibility to tailor their program to fit their individual interests. Students can fulfill a capstone experience by participating in an internship, taking a study abroad class, writing a paper for publication, or writing a master's thesis.

The International Affairs (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Political Science (MA) (p. 1251)

Doctoral

- Political Science (PhD) (p. 1254)

Combined

- Political Science/Law (MA/JD) (p. 1888)

Curriculum

The Master of Arts in International Affairs requires 30 credits hours. Four required core classes, including a capstone experience, and an additional six elective classes, with no more than three offered by a single department in Arts & Sciences or another school at Loyola.

Besides the traditional Master's program, the International Affairs (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Required Courses

Code	Title	Hours
Foundational Courses		**9**
Foundational International Affairs Courses		
INTA 420 / PLSC 420	Comparative Political Systems	
INTA 430 / PLSC 430	Theories of International Politics	
INTA 475	Political Analysis I	
Elective Courses (max three classes per department or another School)		**18**
Criminal Justice and Criminology Department		
CJC 403	Research Methods and Program Evaluation	
CJC 404	Applied Data Analysis and Interpretation	
CJC 416	International Criminal Justice	
History Department		
HIST 441	Women's & Gender History: Europe	
HIST 459	Environmental History	
HIST 464	Transnational Urban History	
HIST 483	Oral History: Method and Practice	
Modern Languages and Literatures Department [1]		
SPAN 405	Critical Methods (pan-Hispanic world)	
SPAN 490	Hispanic Culture & Civilization (Latin American film, with a focus on human rights)	
Philosophy Department		
PHIL 400	Philosophy Research Tools	
PHIL 459	Philosophy of Law	
PHIL 463	Virtue Ethics (includes non-Western philosophy)	
PHIL 480	Social & Political Philosophy (focuses on global development on a regular basis)	
PHIL 490	Current Philosophical Issues (Critical Race Theory)	
Political Science Department		
PLSC 401	Intro to Research Design & Method	
PLSC 421	Democratic Political Systems	
PLSC 422	Authoritarian Political Systems	
PLSC 431	Formulation US Foreign Policy	
PLSC 432	Comparative Foreign Policy Analysis	
PLSC 433	International Organization	
PLSC 435	International Political Economics	
PLSC 436	International Conflict	
PLSC 476	Political Analysis II	
Psychology Department		
PSYC 460	Social Psychological Theory (Psychology Department)	
PSYC 461	Attitude and Attitude Change	
PSYC 474	Research in Group Dynamics	
PSYC 484	Prejudice and Intergroup Relations	
PSYC 486	Methods of Program Evaluation	
Sociology Department		
SOCL 410	Logic of Sociological Inquiry	
SOCL 412	Qualitative Methods in Social Research	
SOCL 414	Statistical Methods Analysis I	
SOCL 415	Statistical Methods of Analysis II	
SOCL 418	Demography	
SOCL 423	Social Movements	
SOCL 426	Sociology of Gender	
SOCL 441	Sociology of Religion	
SOCL 447	Sociology of Culture	
SOCL 461	Race & Ethnicity	
Theology Department		
THEO 459	Contemporary Theology	
THEO 460	Seminar in History of Theology	
THEO 464	Religion & Politics in Christian History	
THEO 470	Foundations Crititical Issues Theological Ethics	
THEO 480	Seminar in Christian Ethics	
School of Education (International Education)		
ELPS 405	Introduction to Educational Policy Analysis	
ELPS 448	International Higher Education	

ELPS 455	Comparative Education
School of Communication	
COMM 401	Foundations of Global Strategic Communication
COMM 402	Organizational Leadership and Change Management
COMM 422	Global and Multicultural Audiences and Stakeholders
School of Social Work	
SOWK 502	Power, Oppression, Privilege, and Social Justice
SOWK 730	Immigration Dynamics and U.S. Social Policy
SOWK 731	Social Work Practice with Refugees and Immigrants
SOWK 732	Migration, Social Justice, and Human Rights
SOWK 733	North American Migration Dynamics, Challenges & Opportunity
SOWK 754	Global Social Work: Reflective Practice for Justice and Peace
School of Law [2]	
LAW 176	International Trade Law
LAW 371	International Business Trans
LAW 372	International Law and Practice
LAW 388	Global Access to Medicine: A Patent Perspective
LAW 459	Intro to English Legal Profession
LAW 568	European Union Law
School of Law at John Felice Rome Center	
PLAW 101	Comparative and Ethical Lawyering for the Rule of Law
PLAW 102	History, Theory and Practice of Rule of Law for Development
PLAW 103	Theory and Practice of Assessments in Rule of Law Advising
PLAW 104	International Development Architecture
PLAW 105	Sustainable Development Through International Commerce and Investment
PLAW 106	Design of Rule of Law Programs and Proposal Preparation
PLAW 107	Rule of Law in Conflict Prevention and Peacebuilding
PLAW 108	Legal Systems and Methods
PLAW 250	Research and Writing on the Rule of Law
PLAW 907	Rule of Law Project Management, Monitoring & Evaluation
Parkinson School of Public Health	
MPBH 400	Determinants of Population Health
MPBH 414	Introduction to Global Health
MPBH 417	Global Maternal and Child Health
MPBH 422	Population Health Planning & Management
MPBH 424	Health Economics and Healthcare Financing
MPBH 432	Health Impact Assessment
Quinlan School of Business	
ECON 424	International Business Economics
ETHC 446	International Business Ethics
FINC 455	International Financial Management
HRER 422	Global Human Resource Management
HRER 502	Global Employment Relations
MARK 465	International Marketing
MARK 561	Comparative Consumer Behavior
SCMG 486	Global Logistics
Capstone	**3**
Select one of the following:	
INTA 470	Fieldwork in PLSC-Internship
PLSC 499	Directed Readings
PLSC 605	Master's Study
Total Hours	**30**

[1] Students interested in honing their foreign language skills will have the option of taking a 300 or 400-level language course (i.e., a course beyond 101, 102, 103, and 104), and having that course count as one of the six elective courses. Current language possibilities offered at Loyola at the 300 level include Chinese, French, German, Italian, and Spanish. Modern Languages and Literatures offers graduate-level courses in Spanish. The courses that follow are open only to interested students with advanced writing, speaking, and reading skills in Spanish.

[2] MA in International Affairs students must take variable credit Law courses for 3 credit hours. The course cannot be taken for less than 3 credit hours.

Note on Elective Courses

Students will take six elective courses, with no more than three offered by a single department in the College of Arts and Sciences or another School at Loyola. The core International Affairs courses in Political Science do not count toward this three-course total, and thus a student may take three Political Science courses in addition to the three core (required) courses. The participating programs that will contribute classes include eight departments in Arts & Sciences (History Department, Philosophy Department, Political Science Department, Psychology Department, Sociology Department, Theology Department, Criminal Justice & Criminology Department, and Modern Languages and Literatures Department) and four additional Schools (School of Communication, School of Education [International Education], School of Social Work, and School of Law). Please note that the courses listed might not be offered every year and new courses may be added to this list. Students should talk with the Graduate Program Director if they want to take a course that is not on the list of elective courses below for approval.

Suggested Sequence of Courses

Traditional Master's Program

In order to provide optimal flexibility in the Master's program, there is no required course sequence. However, it is suggested that students first take the required courses (PLSC 420, PLSC 430, and PLSC 475) as soon as they are offered before taking elective courses.

Accelerated Master's Pathway

Students can take up to 12 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Course	Title	Hours
Senior		
Fall		
INTA 430	Theories of International Politics	3

INTA 475	Political Analysis I	3
	Hours	**6**
Spring		
INTA 420	Comparative Political Systems	3
400-Level Elective Course		3
	Hours	**6**
Master's		
Additional 400-Level elective courses chosen in conjunction with the Graudate Program Director.		15
Capstone Course		3
	Hours	**18**
	Total Hours	**30**

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Students will graduate from MA International Affairs program having achieved the following learning outcomes:

- Critically analyze qualitative or quantitative research methods used in International Affairs research.
- Apply theories and concepts of comparative politics and international relations when interpreting past and present global issues.
- Demonstrate an ability to communicate effectively, both orally and in writing, about complex global issues.
- Develop research skills to collect, synthesize, and evaluate evidence from interdisciplinary sources to assess competing theories and explain global phenomena.

Political Science (MA)

The Master of Arts in Political Science provides students with a general, political science graduate education that trains students in methodological techniques and research design, and provides training in at least three fields of political science.

The Political Science (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- International Affairs (MA) (p. 1248)

Doctoral

- Political Science (PhD) (p. 1254)

Combined

- Political Science/Law (MA/JD) (p. 1888)

Curriculum

The Master of Arts in Political Science requires 30 hours of coursework. Students are required to take 3 methods courses and a combination of courses in the sub-fields of American Politics, Comparative Politics, International Relations, and Political Theory. Students may complete an internship, write an MA thesis, or take comprehensive exams to fulfill their degree requirements.

Besides the traditional Master's program, the Political Science (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Course Requirements

Code	Title	Hours
Political Science Methods		
PLSC 401	Intro to Research Design & Method	3
PLSC 475	Political Analysis I	3
PLSC 476	Political Analysis II	3
Seven Electives from Two Subfields [1]		*21*
The sub-fields that may be chosen from are International Relations, Comparative Politics, American Politics, and Political Theory.		
International Relations Courses		
PLSC 430	Theories of International Politics	
PLSC 431	Formulation US Foreign Policy	
PLSC 432	Comparative Foreign Policy Analysis	
PLSC 433	International Organization	
PLSC 435	International Political Economics	
PLSC 436	International Conflict	
PLSC 437	Selected Problems International Law	
PLSC 439	Selected Problems in International Politics	
PLSC 531	Seminar: International Politics	
Comparative Politics Courses		
PLSC 420	Comparative Political Systems	
PLSC 421	Democratic Political Systems	
PLSC 422	Authoritarian Political Systems	
PLSC 423	Soviet & Post-Soviet Politics	
PLSC 424	Politics of Developing Areas	
PLSC 425	Sub-Saharan Africa	
PLSC 426	Latin American Politics	
PLSC 427	Politics of the Middle East	
PLSC 428	Political Violence	
PLSC 429	Comparative Politics Selected Problems	
PLSC 520	Seminar: Comparative Politics	
PLSC 521	Seminar Western European Politics	
PLSC 532	Soviet/Post-Soviet Foreign Policy	
American Politics Courses		
PLSC 404	Selected Problems in American Politics	
PLSC 405	American Executive Branch	
PLSC 406	American Legislative Branch	
PLSC 407	Public Policy-Making & Implementation	
PLSC 410	Urban Politics	
PLSC 411	American Political Parties/Electoral Process	
PLSC 412	Constitutional Politics	
PLSC 417	The American Legal System	
PLSC 418	Political Psychology & Socialization	
PLSC 419	Managing Urban Government	
Political Theory Courses		
PLSC 440	Ancient Political Thought	
PLSC 442	Modern Political Thought	
PLSC 444	Great Authors	
PLSC 446	Political Ethics	
PLSC 447	American Political Thought to Civil War	
PLSC 449	19th Century Political Thought	
PLSC 543	Liberalism	
PLSC 546	Political Philosophy Selected Problems	
Total Hours		**30**

[1] Seven elective courses should be chosen from at least two subfields: International Relations, Comparative Politics, American Politics, or Political Theory. With approval of the Graduate Program Director, up to six (6) hours may be at the graduate level in related disciplines.

Capstone Requirement: Thesis, Comprehensive Exams, or Internship

Thesis

Students may satisfy six hours (2 courses) by writing a thesis. Students who choose this option will take PLSC 596 Thesis Research for two semesters (a total of 6 credit hours, which count as electives) and take PLSC 595 Thesis Supervision until they are done with the thesis.

Code	Title	Hours
Take for two semesters (may satisfy 6 elective hours)		
PLSC 596	Thesis Research	
Take until done with thesis		
PLSC 595	Thesis Supervision	

Comprehensive Exam

MA students can choose to take a written comprehensive examination. The student will select five courses from the substantive courses they have taken on which they will be tested. Prior to taking the exam students must finish all incompletes. Students may be currently registered for courses necessary for the degree in the semester in which they take the exam. If the student has fulfilled all degree requirements except for the comprehensive exams, they should register for PLSC 605 Master's Study in the semesters leading up to and including the exam. Students taking comprehensive examinations at the master's degree level are expected to answer theoretical and substantive questions from a range of five courses they have taken in their coursework. Once a student knows that s/he will take the exam in a particular semester, we highly recommend that they discuss the exam with the faculty members with whom they have taken the five chosen courses. Comprehensive exams will take place during the second half of the fall and spring semesters. Students will answer three questions over a weekend, receiving the exam on a Friday at 5:00 PM and returning the completed examination the following Monday, at 9:00 AM. All three answers must be written during the specified weekend with no outside assistance. Students will write a maximum of 21, double-spaced pages (normal formatting: 1" margins, Times New Roman, 12 pitch font). Each answer should be approximately six or seven pages. Prior to taking comprehensive exams, students must submit to the Graduate Program Director a departmental "MA Requirements and Comprehensive Examination Form," that lists all of the courses the student has taken and identifies on which courses the student would like to be tested. At the beginning of each semester the Graduate Program Director will distribute this form to all students who will take the exam.

Doctoral students who have passed their PhD comprehensive exams and elect to leave the program with an MA before completing the PhD may use those exams to satisfy the MA capstone requirement. Departing doctoral students must have met all other MA program requirements to earn the MA.

Internship

PLSC 470 Fieldwork in Political Science-Internship offers academic credit toward your major or minor while interning and gaining professional experience at one of several organizations, either here in Chicago or elsewhere. The intent is for students to 1) apply their education to date in a professional setting, 2) gain valuable experience at the start of their professional careers, 3) to explore a particular area of professional interest before embarking on their careers, and 4) to potentially "get a foot in the door" within a particular field or employer with the hope of landing a permanent position upon graduation. While past interns have received job offers from organization where they have interned, there are no guarantees or promises of employment that accompany taking this course.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Traditional Master's Program

[1] Students choose from the following options: PLSC 404, PLSC 405, PLSC 406, PLSC 407, PLSC 410, PLSC 411, PLSC 412, PLSC 416, PLSC 417, PLSC 418, PLSC 419, PLSC 420, PLSC 421, PLSC 422, PLSC 423, PLSC 424, PLSC 425, PLSC 426, PLSC 427, PLSC 428, PLSC 429, PLSC 430, PLSC 431, PLSC 432, PLSC 433, PLSC 435, PLSC 436, PLSC 437, PLSC 439, PLSC 440, PLSC 442, PLSC 444, PLSC 446, PLSC 447, PLSC 449, PLSC 470, PLSC 506, PLSC 520, PLSC 521, PLSC 531, PLSC 532, PLSC 533, PLSC 543, or PLSC 546. Students should consult the Graduate Program Director for assistance in selecting an elective that conforms with their research interests.

[2] If pursuing thesis capstone option, student must substitute this elective for PLSC 596 Thesis Research.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the

Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Students will graduate from the MA in Political Science program having achieved the following learning outcomes:

- Apply theories and concepts of political science when interpreting past and present political issues.
- Evaluate empirical and normative claims about political phenomena by assessing theoretical coherence and empirical evidence.
- Implement quantitative research methods to answer political questions using statistical software to generate and interpret results
- Communicate about complex political issues clearly and effectively in written and oral formats.

We also encourage our MA students to take advantage of additional learning opportunities through numerous Political Science-sponsored programs:

1. Advanced methodological training
2. Advanced language training/proficiency in a language other than English
3. Advanced research skills
4. International, cross-cultural experience
5. Professional development and experience
6. Networking opportunities

Political Science (PhD)

The PhD program in political science is intended for students who wish to acquire careers in teaching and research or work in the government or the private sector. The focus includes the four fields of American Politics, Comparative Politics, International Relations, and Political Theory. Students will take most of their courses and specialize in two fields. One of the two fields will constitute the major field and the other the minor field.

Total Hours		**48**

[1] Students who do not enter Loyola with an MA may take the master's comprehensive exam after completing 10 courses (including PLSC 401 Intro to Research Design & Method, PLSC 475 Political Analysis I, and PLSC 476 Political Analysis II) and earn the MA en route to the PhD. Students must complete four semesters of residence, including at least two consecutive semesters at Loyola. At least one academic year (two consecutive semesters) must be spent as a full-time student.

Language Proficiency

Students may be required to develop language proficiency to conduct research for their doctoral dissertations. PhD students who need to take language courses that are necessary for dissertation research may be able to secure tuition support from The Graduate School with approval of the Graduate Program Director.

Comprehensive Exams

Candidates must pass three total comprehensive examinations (made up of both written and oral components), culminating in an oral examination where 4/5 faculty examiners must approve. All course requirements, including resolution of any outstanding Incomplete grades, must be fulfilled before students can take the written comprehensive examinations.

Dissertation

Candidates must complete and successfully defend both a dissertation proposal and the completed dissertation. Sometime in the third year of study, students are expected for form a dissertation committee, with the assistance of the Graduate Program Director.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

After coursework listed below is complete, students begin taking PLSC 610 Doctoral Study or PLSC 600 Dissertation Supervision until dissertation defense.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Students will graduate from the PhD in Political Science program having achieved the following learning outcomes:

- Create theoretically grounded interpretations of political phenomena.
- Evaluate competing empirical and normative explanations in political science scholarship by systematically assessing theoretical frameworks, research design, and evidentiary standards.
- Produce original contributions to political science knowledge using appropriate research methods.
- Communicate political science research effectively to specialist audiences through professional-quality writing and oral presentation.

Psychology

Consistent with Loyola University's mission as a Jesuit, Catholic institution, transformative graduate education in the Department of Psychology has two foci: **Healthy Development in Children, Youth, and Families**, and **Psychological Foundations of Social Justice**.

Within each, faculty and students pursue research and provide graduate training that draws upon clinical, developmental, and social psychology, and that has as its ultimate goal maximizing human potential and eliminating barriers to fully effective human functioning, development, and interaction.

- Students interested in focusing on **Psychological Foundations of Social Justice** and who aspire to a non-clinical academic or professional career, follow the Applied Social Psychology Program (p. 1259).
- Students interested in focusing on **Healthy Development in Children, Youth and Families**, and who aspire to a clinical academic or professional career, follow the Clinical Psychology PhD Program (p. 1264).
- Students interested in focusing on **Healthy Development in Children, Youth and Families**, and who aspire to a non-clinical academic or professional career, follow the Developmental Psychology Program (p. 1266).

Graduate Programs

- Applied Social Psychology (MA) (p. 1259)
- Applied Social Psychology (PhD) (p. 1262)
- Clinical Psychology (PhD) (p. 1264)
- Developmental Psychology (PhD) (p. 1266)

Psychology (PSYC)

PSYC 401 History & Systems of Psychology (3 Credit Hours)
History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.
Outcomes:
Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology; The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure

PSYC 412 Introduction to the Profession of Clinical Psychology (3 Credit Hours)
Required course for PhD program in Clinical Psychology-an introduction to our field. This course provides an introduction to the profession of Clinical Psychology by focusing on basic research and clinical skills necessary for a career as a clinical scientist and practitioner.
Outcomes:
Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences

PSYC 420 Research Methods in Psychology (3 Credit Hours)
An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.
Outcomes:
Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports

PSYC 432 Intellectual & Personality Assessment (3 Credit Hours)
This course covers the psychometric properties, administration procedures, and applications of the most common adult psychological measures. Students will gain an understanding of psychometric theory.
Outcomes:
Students will be able to administer and become familiar with how to interpret a WAIS-III, the MMPI-2, the Sentence Completion Test, and the TAT

PSYC 435 Seminar in Cognitive Neuroscience (3 Credit Hours)
The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

PSYC 436 Psychopharmacology (3 Credit Hours)
The types and mechanisms of medications used in the treatment of mental disorder are reviewed. Emphasis is given to behavioral effects and treatment effectiveness of drugs. Psychopharmacological research design and literature are reviewed.
Outcomes:
Students will learn basics of neurotransmission and be informed about medications including antidepressants, mood stabilizers, anti-psychotics, and substance abuse

PSYC 438 Principles of Psychological Assessment Child & Adult (3 Credit Hours)
This course is designed to expose students to a variety of assessment tools and tests available for children ranging from 1 month to 18 years of age.
Outcomes:
Students will develop competence in the administration and write-up of basic intelligence, achievement, and visual motor tests for children presenting with, for example, learning disabilities, mental retardation, social/communication disorders

PSYC 440 Theory & Research in Psychology of Language (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language.

PSYC 446 Psychopathology (3 Credit Hours)
This course reviews concepts, research, and theory (historical and current) in psychopathology and emphasizes diagnosis and etiology.
Outcomes:
Students will gain an appreciation for the major issues in the area of psychopathology, the ability to think clearly and scientifically about these issues, and an understanding of major mental disorders

PSYC 451 Psychopathology of Childhood & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on adjustment problems during childhood and adolescence using an ecological-developmental perspective.
Outcomes:
By gaining insight into the factors that enhance or interfere with positive developmental processes, students learn how to apply research and theory to improve the services they will offer to children and families in their professional careers

PSYC 452 Clinical Treatment of Children & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on empirically-supported interventions for children and families.
Outcomes:
Students learn how to select and evaluate needed prevention programs and interventions for children and families to achieve therapeutic goals

PSYC 455 Developmental Psychology (3 Credit Hours)
This course provides an overview of theory and research on developmental psychology.

PSYC 460 Social Psychological Theory (3 Credit Hours)
Survey of basic concepts, theories, and research in social psychology. Contents include foundations of social psychology; broad theoretical orientations (e.g., evolutionary, behavioral, cognitive, affective, individual, societal, cultural); specific theories at the intrapersonal, interpersonal, intra-group, and inter-group levels of analysis.
Outcomes:
Knowledge and skills in theory construction and criticism; understanding relation between theory and research methods; applying theories to social problems

PSYC 461 Attitude and Attitude Change (3 Credit Hours)
Survey of attitude formation and change literature. Topics include the nature and measurement of attitudes, explicit versus implicit attitudes, effects of attitudes on cognition and behavior.
Outcomes:
Knowledge and skills that enable the integration of multiple theories to conceptualize attitudinal phenomena, critical evaluation of research, written and oral expression about attitude topics, application of attitude theories to practical problems

PSYC 462 Cognitive Social Psychology (3 Credit Hours)
In depth examination of the human cognition within its social context; including topics such as impression formation, attribution, stereotyping, prejudice, social information processing, mental control, affect and social information processing, unconscious social cognition.
Outcomes:
An understanding of basic theoretical approaches and scientific methods of hypothesis testing within social cognition; Development of skills needed to perform research within social cognition

PSYC 464 Practicum in Psychotherapy I (3 Credit Hours)
This two semester practicum course provides applied experience conducting psychotherapy at Loyola University Chicago's Wellness Center.
Outcomes:
For client populations seeking psychotherapy, practicum students will be able to develop a treatment plan, articulate treatment goals, develop a working therapeutic alliance, and execute elementary psychotherapeutic techniques

PSYC 472 Organizational Psychology (3 Credit Hours)
Covers theory, research, and methods associated with behavior in organizational settings. Learning outcomes include knowledge of theory and methods of personnel selection, performance measurement and appraisal, knowledge and skills training; theory and research on leadership, motivation, group behavior, etc.

PSYC 473 Social Development (3 Credit Hours)
This course is designed to provide an advanced level introduction and discussion of critical issues essential to the study of social development. The contribution of multiple contexts (e.g., family, peers, culture) to social development is a major focus of this class.
Outcomes:
Students will become familiar with the several theoretical accounts as well as major empirical findings in the core areas of social development

PSYC 474 Research in Group Dynamics (3 Credit Hours)
Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research.

PSYC 475 Cognitive Development (3 Credit Hours)
This course is designed to provide an advanced level introduction to critical issues in the study of cognitive development from infancy through childhood.
Outcomes:
Students will be expected to draw connections between the major theoretical accounts of cognitive development and the empirical literature in core areas of children's cognition

PSYC 477 The Self and Self-Esteem (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the self and self-esteem. Course will focus on where self knowledge comes from and how it affects human behavior.
Outcomes:
Knowledge of psychological theory and research on the self and self-esteem

PSYC 479 Cognition and Emotion (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the role that emotion plays in cognitive activity and behavior. Course will focus on how emotion affects cognition and how different emotions have different effects.
Outcomes:
Knowledge of psychological theory and research on cognition and emotion

PSYC 482 Advanced Statistics (3 Credit Hours)
Covers analysis of factorial designs and other multifactor data sets.
Outcomes:
Learning outcomes include theory and assumptions underlying analysis of variance and multiple regression; ability to use SPSS to analyze data from factorial designs and other multifactor research endeavors

PSYC 484 Prejudice and Intergroup Relations (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on intergroup relations, stereotyping and prejudice. Course will focus on the perceptions, cognitions and behaviors toward members of our own group and members of outgroups.
Outcomes:
Knowledge of psychological theory and research on intergroup relations and prejudice

PSYC 485 Psychology and Law (3 Credit Hours)
Application of social psychological theory and research to criminal behavior and the criminal justice system. Specific topics include crime causation, mass media effects, jury selection, eyewitness accuracy, and crime prevention.
Outcomes:
An understanding of core theoretical and methodological approaches to criminal justice research, development of skills needed to perform psychologically oriented criminal justice research

PSYC 486 Methods of Program Evaluation (3 Credit Hours)
Overview of program evaluation methods, politics, ethics, and applications; including topics such as quasi-experimental design, statistical analysis issues, ethical guidelines, implementation strategies, and presentation styles.
Outcomes:
An understanding of the methods, strategies, ethical issues, and implementation obstacles of evaluation research; Development of skills needed to perform high quality evaluation research in a variety of applied settings

PSYC 489 Political Cognition (3 Credit Hours)
Examination of the cognitive determinants of political judgments and decision; including topics such as political information processing, voting preference, political stereotyping, racism, ideology and public opinion, and media effects.
Outcomes:
An understanding of core theoretical approaches within political psychology, scientific methods of hypothesis testing within political psychology, and the development of skills needed to perform research within political psychology

PSYC 491 Multivariate Analysis (3 Credit Hours)
An introduction to the theory and application of multivariate statistical techniques in psychology.
Outcomes:
Students will learn the conceptual underpinnings (including matrix algebra) and will also learn to conduct analyses for the following procedures: multiple and logistic regression, MANOVA, loglinear analysis, canonical correlation, factor analysis, and cluster analysis

PSYC 493 Structural Equation Modeling (3 Credit Hours)
An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.
Outcomes:
An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses

PSYC 509 Seminar on Teaching Psychology (0 Credit Hours)
This course provides an introduction to the psychology teaching and learning.

PSYC 510 Ethics & Professional Practice (3 Credit Hours)
The ethical standards and practice of psychologists, including basic principles of ethics, application of ethics to professional practice and to research, and professional problems and practices are reviewed.
Outcomes:
Students will learn to manage complex ethical problems encountered in psychological practice, research, and education

PSYC 513 Adolescence (3 Credit Hours)
This course offers an in-depth study of adolescence from a psychological as well as cultural and historical perspective, with a focus on biological, cognitive, psychological, and social changes.
Outcomes:
Students will learn important components of psychological health and maladaptation during the adolescent developmental period and how family, peer, and school contexts affect adolescent development

PSYC 514 Research in Development Psychology (3 Credit Hours)
The goal of this course is to survey important methods, issues, research designs, and other topics specific to research in developmental psychology and cultivate students¿ scientific skills like critical thought and evaluation of research.
Outcomes:
Students will be able to demonstrate understanding of developmental methodology, design, ethical concerns, and other issues relevant to developmental science

PSYC 515 Infancy (3 Credit Hours)
The goal of this course is to survey important topics in the field of infancy, the period of development from birth through approximately 3 years.
Outcomes:
Students will demonstrate understanding of infant developmental science in particular content areas and the processes underlying change

PSYC 518 Seminar Selected Topics-Clinical Psychology (3 Credit Hours)
This course provides an overview of selected topics in clinical psychology.

PSYC 525 Seminar in Social Psychology (3 Credit Hours)
This course provides an overview of theory and research on social psychology.

PSYC 535 Internship in Applied Social Psychology (1 Credit Hour)
Students complete an applied social psychology internship during this course.

PSYC 540 Psychology of Language Development (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language development.

PSYC 545 Select Topics in Developmental Psychology (3 Credit Hours)
This course provides an overview of selected topics in developmental psychology.

PSYC 548 Risk and Opportunity in Childhood and Adolescence (3 Credit Hours)
This course provides an overview of theory and research on risk an opportunity in childhood and adolescence.

PSYC 552 Neuropsychology (3 Credit Hours)
Neuropsychology involves the interdisciplinary study of the relations between human brain function and behavior.

PSYC 553 Neuropsychological Assessment (3 Credit Hours)
This course covers the major areas of neuropsychological assessment, including major assessment techniques, interviewing, report writing, and psychometric issues.
Outcomes:
Students will learn major issues and topic areas in neuropsychological assessment (eg, attention, language, memory, visual perception, motor functioning, executive functioning, and emotional functioning)

PSYC 555 Social Psychology Research and Professional Development (0 Credit Hours)
Pre-requisites: Graduate student standing in Social Psychology
Course will involve research presentations and other forms of professional development.
Outcomes:
Course will involve research presentations and other forms of professional development

PSYC 556 Developmental Psychology Research and Professional Development (0 Credit Hours)
Pre-requisites: Restricted to graduate students in Developmental Psychology
This course will involve research presentations and other forms of professional development.
Outcomes:
Students will gain the skills and knowledge necessary to present their research to colleagues; Students will possess greater readiness for their post-graduate career

PSYC 560 Human Diversity (3 Credit Hours)
This course provides a foundation in human diversity as it relates to the practice of clinical psychology. The course will examine theoretical perspectives and research findings related to human diversity. The goal of this course is to challenge students to think critically about the influence of human diversity on their psychological practice, research, and teaching.

PSYC 568 Evidence-Based Practice in Clinical Psychology (3 Credit Hours)
Pre-requisites: PSYC 412, or approval of instructor
This course provides a theoretical and skills-based overview of evidence-based practice (EBP) in clinical psychology, and surveys the theoretical and applied aspects of various evidence-based intervention approaches in psychology, including Motivational Interviewing (MI), Interpersonal Therapy (IPT), Cognitive Behavior Therapy (CBT), and Dialectical Behavior Therapy (DBT). Students will demonstrate an understanding of current theories and methods in evidence-based psychotherapy.

PSYC 595 Thesis Supervision (1-3 Credit Hours)
Pre-requisites: Enrollment is Restricted to Psychology graduate students
Students will make supervised progress towards completion of their theses.

PSYC 596 Internship in Clinical Psychology (1 Credit Hour)
Students complete a full time APA approved clinical internship during this course.

PSYC 597 Integrative Readings in Psychology (3 Credit Hours)
Students complete integrated readings under the supervision of a faculty member.

PSYC 598 Research (3-6 Credit Hours)
Students complete research under supervision of a faculty member.

PSYC 599 Directed Readings (3-6 Credit Hours)
Students complete directed readings under the supervision of a faculty member.

PSYC 600 Dissertation Supervision (1 Credit Hour)
Students complete dissertation research under the supervision of a faculty member.
Outcomes:
Students will make progress on their dissertation research

PSYC 605 Master's Study (1 Credit Hour)
Students complete master's thesis readings and research under the supervision of a faculty member.
Outcomes:
Students will make progress on their MA thesis proposal

PSYC 610 Doctoral Study (1 Credit Hour)
Students complete dissertation readings and research under the supervision of a faculty member.

Applied Social Psychology (MA)

The Master of Arts in Applied Social Psychology is a terminal degree program designed primarily to prepare people for careers as research specialist. Such individuals usually work under the direction of a PhD-level supervisor in government agencies, market research firms, research centers, personnel departments and so forth.

The Applied Social Psychology (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Doctoral

- Applied Social Psychology (PhD) (p. 1262)
- Clinical Psychology (PhD) (p. 1264)
- Developmental Psychology (PhD) (p. 1266)

Curriculum

The Master of Arts in Applied Social Psychology requires 30 credit hours of coursework and the completion of a master's thesis.

Besides the traditional Master's program, the Applied Social Psychology (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Required Coursework

Code	Title	Hours
Foundational Course Requirements		*12*
PSYC 420	Research Methods in Psychology [1]	

PSYC 460	Social Psychological Theory	
PSYC 482	Advanced Statistics	
PSYC 491	Multivariate Analysis [1]	
Advanced Methods [2]		*6*
PSYC 486	Methods of Program Evaluation (required)	
PSYC 493	Structural Equation Modeling	
Applied Topics (Pick One)		*3*
PSYC 472	Organizational Psychology	
PSYC 484	Prejudice and Intergroup Relations	
PSYC 485	Psychology and Law	
PSYC 489	Political Cognition	
Basic Social Psychology (Pick One)		*3*
PSYC 461	Attitude and Attitude Change	
PSYC 462	Cognitive Social Psychology	
PSYC 479	Cognition and Emotion	
PSYC 474	Research in Group Dynamics	
PSYC 477	The Self and Self-Esteem	
Two Graduate-Level PSYC Electives [3]		*6*
Total Hours		**30**

1. Course must be completed with a grade of "B" or better.
2. Advanced Methods courses can be any graduate level statistics or methods course. Please contact Graduate Program Director for assistance.
3. Graduate level (400+) Psychology courses can be found here (p. 1256).

Thesis

The master's thesis should reflect an applied problem or theoretical issue relevant to social psychology. In addition, the thesis should be empirical, i.e., involve the collection and analysis of data. The student must present the results of the study to the faculty and students of the Social Psychology Program as part of the Program colloquium series. All master's theses must be submitted for publication in accordance with Graduate School policy.

Students are encouraged to begin work on their Master's thesis early in their graduate careers. Optimally, data collection should begin in the fall semester of the student's second year, and the thesis should be completed by the beginning of the fall semester of his/her third year. This allows students to begin teaching for the department during their third year of graduate school.

Suggested Sequence of Courses

Traditional Master's Program

Course	Title	Hours
Year 1		
Fall		
PSYC 482	Advanced Statistics	3
PSYC 460 or PSYC 486	Social Psychological Theory [1] or Methods of Program Evaluation	3
Applied Topics or Basic Social Psychology Course [2]		3
	Hours	**9**
Spring		
PSYC 420	Research Methods in Psychology	3
PSYC 491	Multivariate Analysis	3
Applied Topics or Basic Social Psychology Course [2]		3
	Hours	**9**
Year 2		
Fall		
PSYC 486	Methods of Program Evaluation [3]	3
PSYC Graduate-Level Course [3]		3
	Hours	**6**
Spring		
Advanced Methods Course [3]		3
PSYC Graduate-Level Course [3]		3
	Hours	**6**
	Total Hours	**30**

1. Students should take **PSYC 460** or **PSYC 486** as offered in the Fall term. If PSYC 460 is taken in the first year, PSYC 486 is taken in the subsequent year. If PSYC 486 is taken in the first year, PSYC 460 is taken in the subsequent year.
2. Only one (1) Basic Social Psychology course and one (1) Applied Topics course are required for the degree.
3. Advanced Methods courses and PSYC Graduate-level courses can be taken at any time during the second year of coursework.

Accelerated Master's Pathway

Students can take up to 12 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Course	Title	Hours
Senior		
Fall		
PSYC 482	Advanced Statistics	3
PSYC 460 or PSYC 486	Social Psychological Theory [1] or Methods of Program Evaluation	3
	Hours	**6**
Spring		
PSYC 420	Research Methods in Psychology	3
PSYC 491	Multivariate Analysis	3
	Hours	**6**
Master's		
Fall		
PSYC 486	Methods of Program Evaluation [2]	3
Applied Topics Course		3
Basic Social Psychology Course		3
	Hours	**9**
Spring		
Advanced Methods Course [2]		3
PSYC Graduate-Level Course [2]		3
PSYC Graduate-Level Course [2]		3
	Hours	**9**
	Total Hours	**30**

1. Students should take **PSYC 460** or **PSYC 486** as offered in the Fall term. If PSYC 460 is taken in the first year, PSYC 486 is taken in the subsequent year. If PSYC 486 is taken in the first year, PSYC 460 is taken in the subsequent year.

[2] Advanced Methods courses and PSYC Graduate-level courses can be taken at any time during the second year of coursework.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Course	Title	Hours
Year 1		
Fall		
PSYC 482	Advanced Statistics	3
PSYC 460 or PSYC 486	Social Psychological Theory [1] or Methods of Program Evaluation	3
Applied Topics or Basic Social Psychology Course [2]		3
	Hours	**9**

Spring		
PSYC 420	Research Methods in Psychology	3
PSYC 491	Multivariate Analysis	3
Applied Topics or Basic Social Psychology Course [2]		3
	Hours	**9**
Year 2		
Fall		
PSYC 486	Methods of Program Evaluation [3]	3
PSYC Graduate-Level Course [3]		3
	Hours	**6**
Spring		
Advanced Methods Course [3]		3
PSYC Graduate-Level Course [3]		3
	Hours	**6**
	Total Hours	**30**

1 Students should take **PSYC 460** or **PSYC 486** as offered in the Fall term. If PSYC 460 is taken in the first year, PSYC 486 is taken in the subsequent year. If PSYC 486 is taken in the first year, PSYC 460 is taken in the subsequent year.

2 Only one (1) Basic Social Psychology course and one (1) Applied Topics course are required for the degree.

3 Advanced Methods courses and PSYC Graduate-level courses can be taken at any time during the second year of coursework.

Learning Outcomes

- Explain how classic and contemporary social psychological theory and research applies to human behavior in social settings
- Learn to conduct a literature review
- Evaluate the scientific rigor of research presented in social psychological journals and books
- Synthesize principles of basic and advanced research methods to produce independent, scholarly work
- Understand how to derive novel, previously untested hypotheses.
- Design and conduct basic and applied social psychology research
- Understand how to statistically analyze and interpret data collected in social psychology research
- Understand how to write up an academic research article
- Understand how to give a high quality professional presentation
- Apply ethical standards to evaluate psychological science and practice
- Apply knowledge of social psychology to scholarly and/or professional activities to promote positive social change
- Apply psychological content and skills to career goals
- Acquisition of research and publication skills that will allow students to pursue an applied job after completing the program

Applied Social Psychology (PhD)

Loyola University Chicago offers a Ph.D. Degree in Applied Social Psychology in the Psychology Department.

Related Programs

Master's

- Applied Social Psychology (MA) (p. 1259)

Doctoral

- Clinical Psychology (PhD) (p. 1264)
- Developmental Psychology (PhD) (p. 1266)

Curriculum

The PhD in Applied Social Psychology requires 60 credit hours of coursework, a master's thesis, internship in teaching or research, doctoral candidacy exam, and dissertation.

Coursework Requirements

PSYC 461	Attitude and Attitude Change	
PSYC 462	Cognitive Social Psychology	
PSYC 477	The Self and Self-Esteem	
PSYC 479	Cognition and Emotion	
PSYC 484	Prejudice and Intergroup Relations	
Eight Electives [3]		*24*
Total Hours		**60**

1 Courses in Psychology Core must be completed with a grade of B or better to be applied to degree.

2 Special topics in social psychology courses such as Psychology of Gender (PSYC 525a) and Community Psychology (PSYC 525b) may also fulfill this requirement

3 Electives may be selected from above courses, other graduate level Psychology courses, and graduate level coursework from other departments in the University (*e.g.,* Sociology, Counseling and Educational Psychology). Students should contact the Graduate Program Director for approval before registering.
Electives may also include independent, individualized readings (PSYC 599 Directed Readings) or research (PSYC 598 Research) courses with any willing faculty member.

Doctoral Candidacy Examination

The goal of the doctoral candidacy exam is to provide students with experience of applying and communicating basic and applied social psychological theory, methods and statistics through writing up their research findings in the form of a manuscript. This exam allows students to develop their expertise in applying a theoretical domain to an applied research question and using appropriate methodology and statistics to examine their research question. Writing a manuscript for publication is very different than writing a thesis or dissertation. Theses and dissertations are typically much longer in length than journals have the space to publish. Therefore, writing papers up for publication requires learning to write succinctly. Students are required to work with two members of the faculty – a first and second reader for their exam. There are two ways to demonstrate such expertise and options are discussed in the student handbook.

Internship

All PhD in Social Psychology students are required to complete an internship either as a researcher in an applied setting (for those students interested in applied setting employment), or as a teacher in an academic setting. The applied research internship requires approximately 500 hours of research experience; the teaching internship requires teaching two college-level psychology courses. Students can choose to split the internship - 1/2 applied research and 1/2 teaching by performing 250 hours of applied research and teaching one college-level courses. Internships are usually completed after receiving the MA degree and completing most required coursework - i.e., in the fourth or fifth year of a student's graduate career. However, students can also complete internship hours during the summer. All PhD students must make a presentation at SARS concerning their internships and what they learned while involved in order to complete the internship requirement.

Thesis and Dissertation

Students will complete a master's thesis and earn the MA in Social Psychology en route to the PhD. The master's thesis should reflect an applied problem or theoretical issue relevant to social psychology. In addition, the thesis should be empirical, i.e., involve the collection and analysis of data. The thesis will be published according to Graduate School policy.

The dissertation represents the culmination of one's graduate study. Writing a dissertation is an opportunity to draw upon all of one's knowledge and experience while making an original contribution to general knowledge and/or the solution to some social problem. After finishing the candidacy exam, students are well prepared for this task. Upon completion and successful oral defense of the dissertation, it will be deposited in a publicly accessible database in accordance with Graduate School policy.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
PSYC 482	Advanced Statistics	3

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

PhD Learning Outcomes

- Articulate and apply theoretical frameworks and methodological approaches from social psychology and related disciplines to address real-world problems in applied or academic settings.
- Demonstrate how to statistically analyze and interpret data collected in social psychology research
- Communicate social psychology theory, methods, and findings effectively to diverse audiences through written, visual or oral formats.
- Design, conduct, and interpret empirical research, including evaluations and interventions, as well as data collection and statistical analysis, to inform an understanding and develop solutions to social problems.

Clinical Psychology (PhD)

The Clinical Psychology PhD program at Loyola University Chicago adheres to the scientist-practitioner model of clinical training and is designed to develop skilled, creative professionals prepared to succeed in a variety of settings (e.g., clinical, research, academic). The program strives to provide a balance of training and experience in research, clinical work, and teaching. The mission of the program is to provide students with a strong foundation in general psychology along with training focused on the integration of research and practice of clinical psychology. Students are exposed to a range of clinical training and research, with an orientation toward social justice applications of both research and practice. Located in Chicago, Illinois, students have access to a variety of community-based research and clinical externship opportunities. Formal specialization is available in the area of clinical child psychology and/or neuropsychology.

APA Accredited

The clinical psychology program at Loyola University Chicago has been fully accredited by the American Psychological Association (https://www.apa.org/) since 1959.

Curriculum

The PhD in Clinical Psychology requires 73 credit hours of coursework, a comprehensive examination, supervised clinical and research experiences (including a yearlong APA-Accredited internship), and a dissertation. Students may select a sub-specialty in Child Clinical Psychology, or to elect to undertake a Neuropsychology module.

Total Hours		**73**

[1] Electives are selected by the student in consultation with their advisor and should provide the student with grater depth in their special interest area as well as a richer contextual framework for their clinical interests. Electives may be chosen from graduate level psychology courses or other graduate level courses in the university with approval.

APA Course Requirements

To acquire a broad background in primary content areas designated by APA ("discipline-specific knowledge"), clinical students are required

to complete courses the Biological, Cognitive, Affective, Social, and Developmental Aspects of Behavior, as well as Psychometrics and Advanced Integrative Knowledge in Scientific Psychology. In order to effectively plan coursework to meet all distribution requirements, students should consult their advisor and Graduate Program Director frequently.

The APA requires that students in all accredited clinical programs acquire basic knowledge in each of seven areas described as "broad theoretical and scientific foundations of the field of psychology." Note that the Department and APA requirements overlap in several respects. One class can simultaneously satisfy both Departmental and APA requirements.

Supervised Clinical Experience and Internship

Supervised clinical experience is an integral part of the overall program. All clinical students must complete a minimum of 800 hours of pre-internship, or practicum/externship training, experience. This begins during the second year when students complete a two-semester psychotherapy practicum based in the University's Wellness Center.

After the second year, students progress to advanced-level externship placements where they continue to receive supervised experience, generally with a wider range of assessment and intervention techniques and more diverse clinical populations. The Clinical Program maintains a close working relationship with many hospitals, medical centers, clinics, and mental health facilities in the Chicago metropolitan area.

Clinical Internship: The 12-month full-time internship is typically taken in the 6th year of study and may be completed at any APA-accredited site within the Chicago area or anywhere in the United States.

Comprehensive Examinations

In addition to the oral examinations associated with the master's thesis and doctoral dissertation, all clinical students are required to complete the Clinical Qualifying Examination. This exam is designed to provide a comprehensive assessment of professional and scientific competency in clinical psychology. Students typically take this exam after their third year of study. This exam covers three major areas: assessment, intervention, and psychopathology. An oral exam, the Clinical Competency Examination, is also required. In this exam, students are required to discuss clinical material related to a case that is given to the student by the examination committee. Students typically take this exam at the end of their fourth year of study.

Research, Thesis, and Dissertation

All clinical students are required to complete an empirical master's thesis and a doctoral dissertation. As such, students will complete a Master of Science in Clinical Psychology en route to the PhD. The program emphasizes research on clinical problems in applied clinical settings and strongly encourages such research. Because of the close working relationships between the clinical program at Loyola and Chicago-area mental health facilities, opportunities for clinical research are available at a variety of locations.

In addition to the required research and related courses, other elective opportunities exist for students to participate in research activity. Within the Department, faculty lead research teams that provide active forums for generating research ideas. Such research covers areas such as family and marital issues, depression, ethics, adolescence, psychotherapy research, exposure to violence, children's mental health services, and pediatric psychology. Finally, our faculty encourage students to present papers and posters at professional meetings and to publish their research.

The master's thesis and dissertation will be subject to oral defense and the final approved manuscript must be deposited in a publicly accessible database in accordance with Graduate School policy.

Child Clinical Sub-Specialty

The child sub-specialty allows students to develop special expertise in psychological approaches to understanding and treating children, adolescents, and families. Many of the clinical faculty teach courses and conduct research on issues related to children, adolescents, and families. In addition, clinical students and faculty interact closely with students and faculty of the developmental division through program meetings and research collaborations.

Students who enroll in this "track" complete the core courses required of all clinical students. In addition, they complete a series of advanced coursework in the child clinical sub-specialty and acquire clinical and research experience relevant to this sub-specialty as described below. It is important to note that all clinical students may take child clinical courses and acquire child related experiences. However, students can only report that they have been trained as child clinical psychologists if they complete the following requirements:

- In addition to the basic program course requirements, students in this track must take the following courses within their psychology core or electives: PSYC 473 Social Development, PSYC 475 Cognitive Development, PSYC 451 Psychopathology of Childhood &

Adolescents, PSYC 438 Principles of Psychological Assessment Child & Adult, PSYC 451 Psychopathology of Childhood & Adolescents.

- Students must complete a dissertation directly related to child, adolescent, or family issues. Also, at least one faculty member from the child track must serve on each student's Thesis and Dissertation Committees.
- Following the second year psychotherapy practicum, students must complete an advanced externship focusing primarily on work with children, adolescents, and/or families.
- Students are required to complete an internship where at least 33% of one's time is spent working with child, adolescent, or family clients

Neuropsychology Module

The neuropsychology module allows students to develop special expertise in clinical neuropsychological assessment. Students who wish to pursue completion of this "module" enroll in the core courses required of all clinical students. In addition, they complete advanced coursework in clinical neuropsychology and acquire clinical experience relevant to clinical neuropsychology as described below. It is important to note that all clinical students may take neuropsychology and acquire neuropsychology-related experiences. However, students can only report that they have focused their training in clinical neuropsychology if they complete the following requirements:

- In addition to the basic program course requirements, students in this track must take the following courses as part of their psychology core or electives: PSYC 552 Neuropsychology, PSYC 553 Neuropsychological Assessment, and PSYC 436 Psychopharmacology.
- Following the second year psychotherapy practicum, students must complete an advanced externship focusing primarily on clinical neuropsychological assessment of adults and/or children.
- Students are required to complete an internship where a significant portion of one's training is in the practice of clinical neuropsychology.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Knowledge of the substantive content in the field of clinical psychology
- Knowledge of theories and methodological approaches in psychology
- Design and implementation of psychological research
- Specialized knowledge of clinical assessment, treatment, and psychopathology, including integration of research and practice
- Effective communication of psychological information across contexts
- Knowledge of and adherence to the ethical standards of the profession
- Awareness and integration of intersectional dimensions of diversity and individual differences in the application of psychological principles and approaches

Developmental Psychology (PhD)

The Developmental Psychology Graduate Program aims to understand and support the healthy development of children, youth, and families. Our faculty specialize in the cognitive, cultural, social-emotional, linguistic, and neural factors that promote typical development and learning in infancy through adolescence. Through research training, coursework, and teaching, students gain the professional skills they need for non-clinical academic or professional careers.

Related Programs

Master's

- Applied Social Psychology (MA) (p. 1259)

Doctoral

- Applied Social Psychology (PhD) (p. 1262)
- Clinical Psychology (PhD) (p. 1264)

Curriculum

The PhD in Developmental Psychology requires 60 credit hours, a critical review paper, master's thesis, qualifying examination, and dissertation.

En route to earning the PhD in Developmental Psychology, students complete a master's degree (30 credit hours). An additional 30 credit hours are required beyond the master's degree for the doctoral degree.

Students may choose to complete an optional specialization in "Statistics and Research Methodology" by completing three statistics and/or research methods electives beyond those in the required coursework (i.e., PSYC 420, PSYC 482, and PSYC 491).

Coursework Requirements

Total Hours		**60**

1 All courses in the Psychology Foundational Courses must be completed with a grade of B or better to be applied to the degree.

2 Elective courses may be selected from the Developmental, Social or Clinical Topics courses listed above, or courses in the students' area of specialization, but each course can count only once toward meeting a requirement (i.e., no double dipping).

3 There is an optional specialization in Statistics and Research Methodology. Courses not listed here might also be acceptable to meet the specialization requirement. An updated list will be provided with the program handbook each year, reflecting a current list of courses. To count coursework beyond the list toward the specialization, the student must confer with the Graduate Program Director. All courses must be taken at the graduate level (400 or above).

Total Hours		**9**

Comprehensive Examination

The doctoral qualifying exam is taken after the student has completed at least two full years in the graduate program. The qualifying examination is a written exam, completed independently, and is the final step before the student begins dissertation research. At this stage, the student should have acquired considerable knowledge of the field of developmental psychology and of one or more specialty areas. Students will write a grant proposal related to their research area, based on guidelines from the faculty.

Thesis and Dissertation

The Master's thesis is an original research project, supervised by a Psychology Department faculty member, written up as a journal article and orally defended. Students who enter with advanced standing should check with the Graduate Program Director to determine if this requirement is met with previous master's degree.

The Dissertation is the product of a large-scale research endeavor undertaken with guidance and supervision of a faculty committee. A public oral defense of the dissertation is required, and after successful completion the final work will be deposited in a publicly available database in accordance with Graduate School policy.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Students who complete the PhD in Developmental Psychology will:

- Develop advanced knowledge of the cognitive, cultural, social-emotional, linguistic and neural factors that promote the learning and development of children and youth.
- Understand and conduct research using various data gathering methods, ethical conduct, and sophisticated statistical techniques.
- Conduct original research that contributes new knowledge and can ultimately support the healthy development of children, youth, and families.
- Learn about available research funding opportunities, and obtain experience with grant writing.
- Produce high quality oral and written presentations, including posters at conferences, and publications in peer-reviewed journals.

Sociology

The Department of Sociology at Loyola University Chicago advances the university's mission (https://www.luc.edu/mission/) of expanding knowledge in the service of humanity. We are committed to social justice, diversity, inclusion, scientific inquiry, and academic freedom. As scholars trained in diverse methodological approaches and practitioners of community-engaged scholarship, our work addresses public issues in Chicago as well as nationally, transnationally, and globally.

The Department of Sociology offers both an MA and a Ph.D. program. These programs provide students with a broad foundation in general sociology and extensive training in qualitative and quantitative research methodologies. The department offers electives and research opportunities in a variety of sub-areas, including:

- Urban, Environment, and Community
- Health and Medicine
- Politics, Power and Social Justice
- Global and Transnational
- Race, Ethnicity, Gender, and Sexuality
- Religion, Science, and Knowledge

Graduates of our master's program most often go on to careers in administration and research in business, education, health care and non-profit organizations. About a fifth of the master's students continue on to Ph.D. degrees at Loyola or other universities. About two-thirds of our Ph.D. graduates go on to teach in colleges or universities, while others work in research or administration in the public or private sector.

Graduate Program

- Sociology (MA) (p. 1272)
- Sociology (PhD) (p. 1276)

Sociology (SOCL)

SOCL 403 Sociological Perspectives I (3 Credit Hours)
Important theoretical and methodological concerns will be discussed with particular attention paid to how these concerns affect substantive areas in sociology.
Outcomes:
Students will gain familiarity with major themes that will shape their graduate education in sociology

SOCL 404 Sociological Perspectives II (3 Credit Hours)
Faculty will discuss their intellectual biographies and work that is of current interest to them.
Outcomes:
Students will gain familiarity with the range of substantive, theoretical and methodical concerns of the department's faculty

SOCL 405 History Sociological Thought (3 Credit Hours)
This course looks at the intellectual roots and expressions of the foundations of sociological theory in the 19th and early 20th century.
Outcomes:
Students will gain familiarity with the classical texts in sociological theory that established some of the basic perspectives, issues and debates that inform contemporary social theory and research

SOCL 406 Modern Sociological Theory (3 Credit Hours)
This course examines some of the dominant perspectives and trends of modern social theory.
Outcomes:
Students will develop familiarity with the primary sources that represent current trends in modern and postmodern theories

SOCL 410 Logic of Sociological Inquiry (3 Credit Hours)
This course explores the structures of sociological research, analyses, and explanations. Several major types of data collection will be examined and evaluated.
Outcomes:
Students will be able to formulate sociological problems, understand the relationship between problem formulation and data collection, measurement and analyses and develop the capacity to utilize different social scientific methods

SOCL 412 Qualitative Methods in Social Research (3 Credit Hours)
This course is an introduction to the major qualitative methods of social inquiry and the ethical issues raised by qualitative research.
Outcomes:
Students learn the skills of participant observation, interviewing, historical analysis, building theory from qualitative data, coding and content analysis

SOCL 413 Sociological Practicum (3 Credit Hours)
The class examines theoretical issues and past research relating to a particular social topic and then designs and completes a collective research project. Topics vary.
Outcomes:
Students gain facility with research design and group research practices

SOCL 414 Statistical Methods Analysis I (3 Credit Hours)
After a review of bivariate regression and cross-tabular analysis, the course provides an extended treatment of the general linear model. Topics include model construction, interpretation of results, partitioning of variance, tests of statistical significance and interactions.
Outcomes:
Students will be able to employ general linear models in original research and critically evaluate existing empirical research

SOCL 415 Statistical Methods of Analysis II (3 Credit Hours)
The course extends the applications of the general linear model to topics including path analysis, logistic regression, factor analysis and spatial and cluster analysis.
Outcomes:
Student will: understand the techniques with enough clarity to recognize when they are appropriate research tools; gain sufficient expertise to apply the techniques to moderately complex research problems; be able critically review the relevant literature

SOCL 418 Demography (3 Credit Hours)
This course examines the basic techniques used to assemble, analyze, and present demographic information. It also examines U.S. and world demographic trends and the causes and consequences of such demographic change.
Outcomes:
Students will gain an in-depth knowledge of demographic trends and an understanding of the sources, limitations, and advantages of various types of demographic data

SOCL 421 Theories Social Change (3 Credit Hours)
The course will critically appraise major theories of social change and examine different methodologies on both the macro- and micro-sociological levels.
Outcomes:
Students will gain a working knowledge of the major theoretical and methodological issues in the field

SOCL 423 Social Movements (3 Credit Hours)
This course will use case studies of contemporary social movements to examine collective efforts to promote social or cultural change. They will gain an understanding of the recursive relationship between empirical research and theory development.
Outcomes:
Students will be able to apply major theoretical perspectives on social movements to a variety of historical cases

SOCL 425 Inequality and Society (3 Credit Hours)
This is an empirical and theoretical inquiry into the causes, consequences, and dynamics of social inequality in modern societies.
Outcomes:
Student will be able to explain the distribution of economic, political, and social resources in society; the processes of class formation and the role of race and gender

SOCL 426 Sociology of Gender (3 Credit Hours)
This course surveys sociological and related scholarship on women and gender relations.
Outcomes:
Students will come to understand the social construction of gender and its centrality to studies of identity and sexuality, the division of labor, families and reproduction, violence, poverty, race, class and globalization

SOCL 427 Political Sociology (3 Credit Hours)
The course examines major theories of political action and change. Particular attention is paid to policy development.
Outcomes:
Students will develop an empirical and theoretical knowledge of the working of political systems and to be able to apply that knowledge to the development of social policy

SOCL 428 Poverty and Social Welfare (3 Credit Hours)
This course examines the development of poverty and social welfare efforts over time in the United States, with some comparisons to other industrial societies.
Outcomes:
Students will understand the character and consequences of poverty and social welfare policies in the United States, emphasizing current conditions and possibilities for the future

SOCL 431 Social Structure and Personality (3 Credit Hours)
This course examines the relationships between the individual and larger social structure and social trends.
Outcomes:
Students will gain familiarity with current research and theory concerning the relationship of self identity and personal narratives to socialization and structural factors, and the ways in which social class, work, race and nation construct age, gender and sub-cultural forms of subjectivity

SOCL 432 Socialization Thru Life Cycle (3 Credit Hours)
This course traces the nature of socialization and development of the individual through the life cycle.
Outcomes:
Students will become familiar with research and theory concerning the processes by which persons are socialized into sexual, racial, religious, occupational, marital, and parental social roles, identities and patterns of interactions at various stages of life

SOCL 435 Adult Development and Aging (3 Credit Hours)
The older adult population and adult development is examined from social and cultural perspectives.
Outcomes:
Studies will develop a knowledge of gerontological theories and research which pertain to the family, the community, political life, the economy, work and retirement, religious life, and other social institutions

SOCL 438 The Family (3 Credit Hours)
This course explores families, their changing internal structures, and their roles in contemporary societies.
Outcomes:
Students will develop an understanding of the household division of labor, mothering, the shifting character of marriage, the paid and unpaid work of care, dual career families, single parent households, racial/ethnic families, adoption, blended families, welfare policies, families in the class structure, and global issues

SOCL 439 Community Change (3 Credit Hours)
Contemporary communities are examined from a sociological perspective. Both geographic communities and communities of interest are studied.
Outcomes:
Students gain an understanding of how research can be used to facilitate social change in community settings; and an awareness of how community organizations, informal networks, and broader social forces shape the character and sustainability of particular communities

SOCL 440 Organizations & Organizational Change (3 Credit Hours)
This course examines the structures and processes that typify contemporary organizations, with particular attention to how organizations change.
Outcomes:
Students will be able to apply sociological methods to analyze organizations, and will develop an understanding of bureaucracy and alternative structures; the effect of organizational structure on administrators, workers, and clients; and how organizations are affected by their social environment

SOCL 441 Sociology of Religion (3 Credit Hours)
This course studies the relationship between religion and society, and explores central topics in the sociology of religion.
Outcomes:
Students will learn to define and explain religious organizations, beliefs, and practices as distinctly social phenomena, and understand how social processes both shape the form and content of religious life and in turn are shaped by them

SOCL 442 Religious Conflict & Change (3 Credit Hours)
This course will explore the complex reciprocal relationship between religion and historical processes of social change.
Outcomes:
Students will be able to analyze historical instances of religious conflict and change in the U.S. and other regions of the world; They will gain an understanding of how religion both affects and is affected by historical, political, and social change

SOCL 446 Knowledge, Power & Expertise (3 Credit Hours)
This course focuses on the relationship between knowledge, expertise and power in societies and how this relationship has consequences for the structure of knowledge and the organization of society.
Outcomes:
Students will be able to demonstrate a sociological understanding of the construction of knowledge and the organization of authority and expertise

SOCL 447 Sociology of Culture (3 Credit Hours)
This course will examine the relationship between social phenomena and cultural expressions, and the various ways sociologists have conceived of those relationships.
Outcomes:
Students will learn to apply sociological theories and methods to an analysis of cultural fields and understand the diversity of contemporary cultural objects and expressions, and how they are produced and used in social action

SOCL 448 Technology & Material Culture (3 Credit Hours)
This course will serve as an introduction to the sociology of things, most notably the sociology of technology, design and the built environment.
Outcomes:
Students will develop an understanding of both cultural, constructivist and political-economic approaches to the construction of technology and artifacts, and of a variety of theoretical approaches to the study of their impact and audience-response

SOCL 452 Complex Organizations (3 Credit Hours)
Formal organizations treated comparatively and systematically as major components of modern social organization are featured.
Outcomes:
Students will develop an understanding of leading theoretical traditions, historical and cross-national variation, organization-environment relations, and selected internal processes in the field of complex organizations

SOCL 453 Occupations and Professions (3 Credit Hours)
This course focuses on the structure of paid work in modern society, and its relationship to unpaid work and to self-employment. Special attention is given to the role of skills and knowledge in the structuring of work.
Outcomes:
Students will develop an understanding of how both macro and micro factors structure work; from capitalism, industrialism, gender, race and globalization to workplace interaction and culture

SOCL 461 Race & Ethnicity (3 Credit Hours)
This course explores the construction, meaning, uses and consequences of racial and ethnic identity in American society over time.
Outcomes:
Students will understand the role of migration and immigration on the construction of identity; analyze prejudice, discrimination, and inter-group conflict; and explore how social movements have and are changing these group relationships

SOCL 462 The Urban Metropolis (3 Credit Hours)
This course examines urbanization and its consequences through social theory and empirical studies emphasizing the modern European and American experience.
Outcomes:
Students will understand ecological and political economy perspectives on metropolitan development; changing regional patterns of population, housing, and employment; and urban governance, planning, and policies for the future

SOCL 463 Sociology & Natural Environment (3 Credit Hours)
This course examines the relationship between social life and the natural environment.
Outcomes:
Students will be able to demonstrate a sociological understanding of the relationship of humans to the natural environment and draw connections between basic ecological understandings of nature and the human impact on the natural world

SOCL 471 Sociology of Deviance & Control (3 Credit Hours)
This course is a socio-historical look at definitions of forms of deviant behavior and the identification of individuals as deviant.
Outcomes:
The student will learn how history and philosophy shape the definitions of deviant behavior and the methods used to control it; They will develop a sociological imagination to perceive the meaning of deviance beyond the superficialities of today's headlines

SOCL 473 Criminology (3 Credit Hours)
This course examines modern and traditional theories of criminology and their implications for social control, with emphasis on current work in criminology theory, social planning, and evaluation research.
Outcomes:
The student will acquire knowledge of the relationship between the various explanations of crime patterns and how these theories work to reduce or fail to reduce the level of criminal behavior

SOCL 481 Medical Sociology (3 Credit Hours)
This course will examine critical factors affecting mortality and morbidity; mental health; health services; community health; cross-cultural differences; aging and the strategy and conduct of socio-medical research.
Outcomes:
The student will be able to critically analyze the social components of illness and of health and to integrate theory and research in the study of health care institutions globally

SOCL 482 Education in Society (3 Credit Hours)
This course focuses on the social processes that affect both the means and ends of education. It has three units: Schools as Organizations; Inequality in Education; and Education and Cultural Reproduction. Open to all Graduate students.
Outcomes:
Improved understanding of the social processes and outcomes of education

SOCL 483 Teaching Sociology (3 Credit Hours)
Pre-requisites: Completion of at least one semester of graduate coursework
Students will learn to identify good teaching practices, to practice relevant skills, and to begin a lifelong process of professional development. They will develop materials for an undergraduate course.
Outcomes:
Students will create a portfolio of materials for an undergraduate course that reflect "best practices" in education

SOCL 490 Workshop: Applied Sociology (1 Credit Hour)
This focuses on special issues for methods used by applied sociologists, and topics vary from semester to semester. Most workshops involve presentations by faculty or applied sociologists from outside the university.
Outcomes:
Students will develop expertise in, for example: survey research, evaluation research, use of population data in policy making, focus groups, and developing community leadership

SOCL 491 Sociological Discourse (3 Credit Hours)
The course examines the nature of sociological argumentation in existing scholarly and popular literature and in the students' own writing.
Outcomes:
Students will be able to formulate and present sociological arguments in both oral and written forms, and to demonstrate their understanding of the relationship between problem formulation, data collection and measurement and analysis in their own and others' work

SOCL 494 Internship (3 Credit Hours)
Placements are typically in non-academic settings, e.g., government agencies, community organizations, businesses, or labor organizations. Students are expected to work a minimum of 100 hours and write an internship report.
Outcomes:
Students will develop skills in applying sociological methods and theoretical perspectives to the understanding and ameliorating of social issues in real world settings

SOCL 497 Independent Research (3 Credit Hours)
Students registered for independent study will meet as a workshop, under the guidance of a faculty member, at least three times per semester. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 498 Independent Research (1-3 Credit Hours)
Work on an individual research project under the supervision of a faculty member. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 499 Directed Study (3 Credit Hours)
Develop a reading list and paper under the supervision of a faculty member.

SOCL 500 Seminar-Applied Sociology & Social Policy (3 Credit Hours)
This course examines the use of sociology in determining and selecting alternative social policies.
Outcomes:
Students will develop knowledge about the roles that applied sociologists play in society; the relationship between sociologists and clients or organizations; the social research process and how it affects the research product; and ethical considerations of applied sociologists

SOCL 505 Controversery Current Social Thought (3 Credit Hours)
This is a seminar in which students and faculty will examine in detail particular controversies that are emerging in theoretical approaches to sociology. Topics will vary.
Outcomes:
Students will develop advanced skills in theoretical discourse

SOCL 510 Research Special Areas (3 Credit Hours)
Advanced methodology seminar in special topics.
Outcomes:
Students will develop advanced skills in the special area

SOCL 520 Topics in Contemporary Society (3 Credit Hours)
Various topics in the study of modern society
Outcomes:
Students will develop advanced skills in the particular area

SOCL 525 Seminar in Comparative Studies (3 Credit Hours)
The seminar will expose participants to comparative approaches in defining issues, topics or institutions, researched by comparative sociologists and cultural anthropologists. Specific topics for consideration will vary.
Outcomes:
Students will acquire knowledge of the utility of comparative approaches to cultural and social structures in developing greater definition and clarity, and a deeper understanding of a given topic

SOCL 540 Issues: Sociology of Religion (3 Credit Hours)
Focused study on a variable topic in the sociology of religion.

SOCL 560 Seminar-Issues in Communities & Urban Sociology (3 Credit Hours)
This course explores current issues in cities and in the sociological study of cities.
Outcomes:
Students will become familiar with current debates in urban sociology and apply sociological theories and analysis to contemporary issues in cities

SOCL 580 Seminar: Issues in Medical Sociology (3 Credit Hours)
This course explores a specialized topic in the sociology of health and medicine. Restricted to Graduate Students.
Outcomes:
Ability to analyze individual, social and institutional effects on health and medicine

SOCL 595 Thesis Supervision (1 Credit Hour)
Write a thesis under the supervision of a faculty member.

SOCL 600 Dissertation Supervision (1 Credit Hour)
Write a dissertation under the supervision of a faculty member.

SOCL 605 Master's Study (1 Credit Hour)
Develop a reading list and paper for an MA project under faculty supervision.

SOCL 610 Doctoral Study (1 Credit Hour)
This course can only be taken two times during a doctoral student's career.

Sociology (MA)

The Department of Sociology offers a comprehensive graduate program for a Master of Arts (MA) which provides a broad foundation in the discipline and enables students to explore a field relevant to their career interests. This program has two tracks: a general Master of Arts in Sociology track and a Public and Applied Sociology track. The general track prepares students for mid-level administration, research, and teaching positions, as well as for continuing into a Ph.D. The Public and Applied track prepares students to help shape and evaluate social policy and programs and includes a required internship. Both tracks train students in both qualitative and quantitative research methods and offer an elective in writing and presenting research.

The Sociology (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Major

- Social Philosophy (MA) (p. 1241)

Master's

- Criminal Justice and Criminology (MA) (p. 1187)

Doctoral

- Sociology (PhD) (p. 1276)

Curriculum

The Master of Arts in Sociology requires 30 credit hours and a master's thesis or portfolio. Students may choose between a general or applied sociology track.

Besides the traditional Master's program, the Sociology (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

General Sociology Requirements

The General MA Sociology track provides students with a broad foundation in sociological theory and methods, as well as a particular focus in a more specialized field of relevance to the student's career interests in academic, private sector work, government work, or public service. It is also the foundation for entrance into doctoral study in sociology and most other social science programs. This track requires ten courses plus the completion of a master's thesis. Completion of this degree normally takes up to two years as a full-time student.

SOCL 494	Internship
SOCL 497	Independent Research
SOCL 498	Independent Research
SOCL 499	Directed Study
Total Hours	**30**

Public and Applied Sociology Requirements

The Public and Applied Sociology track emphasizes the application of sociological knowledge and methods to the development and evaluation of policies and programs. It provides students with a broad foundation in sociological theory and methods, as well as a focus on a more specialized field of relevance to the student's career interests. This track requires ten courses, one of which is a credit-bearing internship in an organization outside of Loyola, as well as the completion of a research portfolio, consisting of one library-based paper and one empirical paper.

This degree can be particularly useful for students planning careers in corporations, hospitals, social service agencies, labor unions, community organizations, non-profit organizations, or government agencies. Completion of this degree normally requires one and a half years as a full-time student.

In addition to five electives within the Sociology Program, this track consists of five required courses:

Code	Title	Hours
Applied Sociology Required Courses		
SOCL 405	History Sociological Thought	3
SOCL 410	Logic of Sociological Inquiry	3
SOCL 412	Qualitative Methods in Social Research	3
SOCL 414	Statistical Methods Analysis I	3
SOCL 494	Internship	3
Choose Five Electives		**15**
SOCL 406	Modern Sociological Theory	
SOCL 415	Statistical Methods of Analysis II	
SOCL 418	Demography

SOCL 426	Sociology of Gender	
SOCL 427	Political Sociology	
SOCL 428	Poverty and Social Welfare	
SOCL 432	Socialization Thru Life Cycle	
SOCL 438	The Family	
SOCL 439	Community Change	
SOCL 440	Organizations & Organizational Change	
SOCL 441	Sociology of Religion	
SOCL 442	Religious Conflict & Change	
SOCL 446	Knowledge, Power & Expertise	
SOCL 447	Sociology of Culture	
SOCL 448	Technology & Material Culture	
SOCL 452	Complex Organizations	
SOCL 453	Occupations and Professions	
SOCL 461	Race & Ethnicity	
SOCL 462	The Urban Metropolis	
SOCL 463	Sociology & Natural Environment	
SOCL 471	Sociology of Deviance & Control	
SOCL 473	Criminology	
SOCL 481	Medical Sociology	
SOCL 490	Workshop: Applied Sociology	
SOCL 491	Sociological Discourse	
SOCL 497	Independent Research	
SOCL 498	Independent Research	
SOCL 499	Directed Study	
Total Hours		**30**

The internship is a unique opportunity for students to gain hands-on experience and to make professional contacts that will facilitate their careers. Interns have worked in a variety of organizations-the Illinois Criminal Justice Authority, American Medical Association, Better Government Association, and the Midwest Women's Center-as well as for several metropolitan newspapers, fair housing commissions, city government departments, and major corporations.

Suggested Sequence of Courses

Traditional Master's Program

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their Graduate Program Director for assistance with course selection.

General Sociology Track

[1] Chosen in consultation with the Graduate Program Director.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

There are two possible tracks when obtaining your M.A.: the General M.A. or the Public & Applied M.A. in Sociology.

The General MA Sociology track provides students with a broad foundation in sociological theory and methods, as well as a particular focus in a more specialized field of relevance to the student's career interests in academic, private sector work, government work, or public service. It is also the foundation for entrance into doctoral study in sociology and most other social science programs. This track requires ten courses plus the completion of a master's thesis. Completion of this degree normally takes up to two years as a full-time student. This degree prepares students for positions as research staff in government, non-profit, and for-profit sectors.

The Public and Applied Sociology track emphasizes the application of sociological knowledge and methods to the development and evaluation of policies and programs. It provides students with a broad foundation in sociological theory and methods, as well as a focus on a more specialized field of relevance to the student's career interests. This track requires ten courses, one of which is a credit-bearing internship in an organization outside of Loyola, as well as the completion of a research portfolio, consisting of one library-based paper and one empirical paper.

This degree can be particularly useful for students planning careers in corporations, hospitals, social service agencies, labor unions, community organizations, non-profit organizations, or government agencies. Completion of this degree normally requires one and a half years as a full-time student. This degree prepares students for positions as program directors or staff in government, non-profit, and for-profit sectors.

Students will learn to:

- Identify the broad theoretical orientations of the discipline. [General Track]
- Frame sociological research questions. [General Track]
- Synthesize social scientific literature. [General Track]
- Select appropriate data sources. [General Track]
- Collect and present data in accordance with ethical and professional standards. [General Track]
- Use one or more data collection methods to carry out a research project, such as interviews, participant observation, surveys, or archival evidence. [General Track]
- Analyze quantitative or qualitative data. [General Track]
- Write a sociological research report. [General Track]
- Apply sociological knowledge to governmental, non-profit, or for-profit organizational activities. [Applied Track]
- Contribute to the work of a governmental, non-profit, or for-profit organization through an internship. [Applied Track]
- Frame a research question relevant to an organization. [Applied Track]
- Select appropriate data sources. [Applied Track]
- Collect and present data in accordance with ethical and professional standards. [Applied Track]
- Use one or more data collection methods, such as interviews, participant observation, or surveys. [Applied Track]
- Analyze quantitative or qualitative data. [Applied Track]
- Write a sociologically-informed report that is relevant to an organization. [Applied Track]

Sociology (PhD)

The PhD program in Sociology is designed to produce independent scholars able to conduct research, teach or serve in a variety of settings. We offer comprehensive training in the knowledge and skills which constitute professional competence in the field. The curriculum is designed to equip students with a broad foundation in general sociology and in more specialized knowledge related to students' career interests in teaching, research, governmental work, or public service.

PhD students work closely with faculty as they advance in the program. The program has particular strengths in the following sub-fields of sociology:

- Urban, Environment, and Community
- Health and Medicine
- Politics, Power and Social Justice
- Global and Transnational Sociology
- Race, Ethnicity, Gender, and Sexuality
- Religion, Science, and Knowledge

Related Programs

Major

- Social Philosophy (MA) (p. 1241)

Master's

- Political Science (MA) (p. 1251)
- Sociology (MA) (p. 1272)

Curriculum

The PhD in Sociology requires 61 credit hours, comprehensive examinations, and a dissertation. Students who enter the program with a master's degree in Sociology are required to complete 30 credit hours of coursework at Loyola. The student's thesis or research paper may also be certified at this time as meeting the department's master's thesis requirement for the PhD.

Course Requirements

After the initial integrative coursework in preparation for the qualifying exams and the doctoral review, students move on more advanced coursework. This involves specialized courses, individual study, and seminars in areas relevant for the student's scholarly and professional development. These courses include classes on college-level teaching and writing for publication. Students who successfully complete the course on college-level teaching and have a master's degree are eligible to teach at the university.

[1] In planning the more specialized phase of their graduate program, doctoral students are encouraged to take full advantage of the resources of the university and, where pertinent, to take courses in other graduate departments.

Comprehensive Examinations

Written examinations in two related special fields are normally taken after coursework is completed. Students must choose two Special Fields, or sub-fields in sociology, in which they wish to be examined. We strongly suggest that these exams be completed in the third year or the beginning of the fourth year. You may not take an exam if you have any Incompletes, or if you are on Academic Probation. The Department offers exams in several different subfields. Please consult with the Graduate Program Director or see the Graduate Student Handbook for specific details. Students may petition to take one of the two exams in another area (but not more than one) upon consultation with the Graduate Program Director. Such exceptions are not regularly granted. The only fields that will be considered are those established as sections within the American Sociological Association: http://www.asanet.org/asa-communities/asa-sections/current-sections.

The goals of the Special Field exams are to demonstrate:

- sophisticated knowledge of the development and current theoretical and empirical debates in a sub-field
- knowledge of important empirical patterns relevant to a sub-field
- the capacity for analytic writing, including the ability to marshal evidence to make claims, the capacity to make logic comparisons, and the capacity to identify gaps and issues in fields.
- the capacity to write in a clear, organized academic style, with few grammatical and spelling errors

The exam is a five-day, take-home exam, in which students answer 3 to 4 questions chosen by the committee. The questions are typically handed out on a Monday morning and completed by the end of the day on a Friday (or a similar time period). Students, who for medical, family, or work reasons, are unable to take the five-day exam, may petition the GPD to use a different exam form: a 30-40 page review that demonstrates your knowledge of the key developments and current debates in the field, key empirical patterns relevant to your field, and methodological techniques and tools commonly used in the sub-field. Students may want to model their papers on articles in The Annual Review of Sociology and similar periodicals. Again, this option is reserved for students who have extenuating circumstances that strongly limit their ability to take the 5-day exam. The Director will provide more guidance on expectations. Under no circumstances may students answer specific questions set by the Director and Reader: the student must produce a review essay.

Dissertation

Once both comprehensive exams are passed, the next step is to prepare the **dissertation proposal**. The proposal is an important document for the candidate, for the faculty committee, and for the department. The acceptance of the dissertation proposal indicates that your committee is confident that the proposed research is highly likely to contribute original results that are important to other sociologists, under the limited time frame of graduate school. The Sociology Department requires that all dissertation proposals be defended in front of the Dissertation Committee. At Loyola, these hearings are "open," which means that members of the university, as well as family and friends, may attend the defense. The purpose of the proposal hearing is primarily to judge whether the proposal is sound enough for the research to go forward; secondarily, it is to provide constructive feedback. For more on the dissertation proposal and defense, please see the graduate student handbook.

The **dissertation** is the culmination of your doctoral program career. It will be the most sustained piece of research and writing you will have done to this point in your career, and it will serve as the basis of publications as an Assistant Professor if you are planning an academic career. A well-planned dissertation is one of the keys to success; time management is another. The Department requires a public defense of all doctoral dissertations. When your committee agrees that the dissertation is ready for defense, you will need to follow the formal procedures laid down by the Graduate School for final defense and deposition. For more information on the dissertation and dissertation defense, please see the graduate student handbook.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

This degree prepares students for research and teaching positions in the academic, government, non-profit, and for-profit sectors.

- Demonstrate knowledge of the broad theoretical orientations of the discipline. [Research learning outcome]
- Demonstrate knowledge of two empirical sub-fields in the discipline. [Research learning outcome]
- Frame sociological research questions both theoretically and empirically. [Research learning outcome]

- Select appropriate data sources. [Research learning outcome]
- Analyze and present data in accordance with ethical and professional standards. [Research learning outcome]
- Use one or more data collection methods to carry out a major research project: interviews, participant observation, surveys, or archival evidence. [Research learning outcome]
- Analyze quantitative or qualitative data with respect to sociological claims or theories. [Research learning outcome]
- Write for publication. [Research learning outcome]
- Present findings orally for lay or professional audiences. [Research learning outcome]
- Assist an instructor of record with grading, tutoring, and class presentations. [Teaching learning outcome]
- Teach as an undergraduate instructor of record, by developing the capacity to: design a syllabus; create and carry out assignments, assessments, and lectures; integrate Ignatian pedagogical techniques, including curia personalis; and reflective learning. [Teaching learning outcome]

Theology

Loyola University Chicago is home to a number of leading scholars in Christian Ethics, Systematic Theology, and New Testament/Early Christianity. Our graduate programs are designed to equip students with the resources necessary for contributing to theology as a discipline that is at once academically rigorous and creative.

Graduate Programs

- Theology (MA) (p. 1281)
- Theology (PhD) (p. 1284)

Theology (THEO)

THEO 401 Tutorial in Biblical Studies (3 Credit Hours)
A reading course with variable content and readings in the area of biblical studies.

THEO 403 Topics in Rabbinic & Medieval Literature (3 Credit Hours)
Topics in post-biblical Jewish literature and thought, covering texts from approximately 200 to 1600.

THEO 404 History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution, in the context of the ancient Near East.
Course equivalencies: IPS 440/THEO 404
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 405 Formation of The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament, in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition.
Course equivalencies: IPS441/THEO 405
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 406 Basic Hebrew Grammar (3 Credit Hours)
Study of the fundamental elements of classical Hebrew.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 407 Hebrew Exegesis (3 Credit Hours)
Introduction to the fundamentals of classical Hebrew, including the Hebrew alphabet, basic syntax, and the basic grammatical forms of the language, designed to advance reading knowledge of the Old Testament.

THEO 418 Theological Prophets-Ancient Israel (3 Credit Hours)
This course examines the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by contemporary sociological and anthropological perspectives. Standard historical-critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 420 Seminar (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 421 Directed Reading in Bible Studies (1-3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 422 Directed Reading in Bible Studies (3 Credit Hours)
Independent research in topics in bible studies according to program developed jointly by the student & faculty director.

THEO 424 The Synoptic Gospels (3 Credit Hours)
Study of the diversity of early Christianity as represented in the Synoptic Gospels, particularly the commonalities and contrasts in the worldviews operative in Mark, Luke, and Matthew.
Course equivalencies: IPS 445/THEO 424

THEO 425 Luke-Acts & New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view.
Course equivalencies: IPS 446/THEO 425
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 427 St Paul's Contribution to Christianity (3 Credit Hours)
Examination of Paul's thought through exacting analysis of Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity.
Course equivalencies: IPS 448/THEO 427
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 429 Person of Jesus in New Testament (3 Credit Hours)
In this course, attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities.
Course equivalencies: IPS 449/THEO 429
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 436 Christology (3 Credit Hours)
This course will study the speculations and formulations concerning the person of Christ and the redemptive incarnation from the early fathers and councils up to and including modern times.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 437 Mystery of God in Christian Theology (3 Credit Hours)
The Christian church has insisted, from the beginning, that Jesus Christ is decisive in humanity's access to, and understanding of, God. This realization was expressed in the doctrine of the Trinity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 440 Seminar in Systematic Theology (1-12 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 441 Directed Reading in Systematic Theology (3 Credit Hours)
Independent research in topics in systematic theology according to program developed jointly by the student & faculty director.

THEO 447 Philosophical Theology (3 Credit Hours)
A study of the ways in which philosophical assumptions, systems, and methodologies shape theological reflection.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 449 Phenomenology of Religion (3 Credit Hours)
This course will examine religion from a phenomenological point of view, allowing the methods and texts of phenomenology to shape our understanding of religious phenomena, such as revelation, givenness, metaphysics, incarnation, etc.. Topics may also include investigations of the borders between phenomenology and theology.

THEO 459 Contemporary Theology (1-12 Credit Hours)
Advanced study of readings and themes in contemporary theology, in conversation with a variety of disciplines.

THEO 460 Seminar in History of Theology (1-12 Credit Hours)
A consideration of the organizing models characteristic of theology in particular periods. The seminar is organized around a specific doctrinal theme determined, in part, by the specialized interests of the students.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 461 Directed Readings in History of Theology (3 Credit Hours)
Independent research in topics in history of theology according to program developed jointly by the student and faculty director.

THEO 464 Religion & Politics in Christian History (3 Credit Hours)
Exploration of the intersections of religious and political thought in Christian history from the 19th century to today.

THEO 470 Foundations Crititical Issues Theological Ethics (1-12 Credit Hours)
Devoted to a critical analysis of theological ethics firmly rooted in the historical method, studying the various methodologies, critical issues and the personalities.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 475 Natural Law & Theological Ethics (3 Credit Hours)
Some of the many theological interpretations of natural law developed in Western Christian thought will be examined. The issue of a specific Christian ethic vis-à-vis a universal humanistic ethic will be investigated.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 477 Feminist Issues in Theology and Ethics (3 Credit Hours)
Designed around current issues in feminist theology and ethics. Issues include the role of the Bible in feminist theology, hermeneutics, theological education, church and sacraments, as well as normative theory, sexuality and reproduction, and ecology.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-THEO477/WOST468/WSGS468
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 478 Issues in Medical Ethics (3 Credit Hours)
The course will deal with the problems of abortion, genetic engineering, technological reproduction, sterilization of the handicapped, prolonging life, etc.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 480 Seminar in Christian Ethics (1-12 Credit Hours)
In-depth study of select topics in contemporary Christian ethics. Topics vary from faith and morality, religion and politics, church-state relations, and work to ecology, sexuality, and eschatology.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 481 Directed Readings Christian Ethics (3 Credit Hours)
Independent research in topics in Christian ethics according to program developed jointly by the student and faculty director.

THEO 500 Theological Pedagogy I (0 Credit Hours)
Theological Pedagogy is designed for graduate students interested in teaching theology courses at LUC. The hope is to help future instructors succeed in the classroom with a thoughtful reflection on course learning goals and then constructing a syllabus that reflects those individual goals - all while discussing and keeping in focus the "special" nature of theology and religious studies.
Outcomes:
Students will reflect on course learning goals for their own future courses; Students will produce a syllabus for their own future courses

THEO 502 Theological Pedagogy II (0 Credit Hours)
Theological Pedagogy is designed for graduate students to take simultaneously with their first semester as an instructor of record for a core Theology course. Among other goals, students are encouraged to develop a greater sense of one's own personal identity in the classroom through the crafting of a Teaching Philosophy, foster a community of support and critical reflection with other first-time instructors, and participate in the culminating Symposium on the Teaching of Theology and Religious Studies.
Outcomes:
Students will craft a Teaching Philosophy that reflects on their personal identity in the classroom; Students will reflect on their teaching in the classroom through presenting in a Symposium on the Teaching of Theology and Religious Studies

THEO 515 Gospels in Early Christianity (3 Credit Hours)
This course will focus on the study of one or the other of the four gospels.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 517 Early Christian Letters (1-12 Credit Hours)
This course studies letters from Christian leaders of the first two centuries A.D. in their original Greek language.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 519 Latr Nt-Subapost Writ (3 Credit Hours)
This course studies New Testament and non-canonical Christian writings in their original Greek language from the late first and early second century A.D.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 523 Cultural-Religious Environment Early Christianity (3 Credit Hours)
This course examines specific aspects of the cultural and religious environment of the Mediterranean world between 200 B.C. and A.D. 300 relevant to early Christianity. Outcomes A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 527 Various Community Early Christianity (3 Credit Hours)
The course will examine the identity, cohesion, and institutions of various communal groups in early Christianity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 530 Seminar - Variable Titles (1-12 Credit Hours)
Extensive and in-depth study of selected topic.

THEO 536 Christian Doctrine-Catholic Theology (3 Credit Hours)
This course will examine the dialectical relationships between Christian doctrine and theological learning.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 560 Contemporary Authors (1-12 Credit Hours)
This course will examine the methods, concerns, major issues, achievements, and lasting influence of twentieth century writers whose work has significantly shaped theology today.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 570 Fundamental Issues in Christian Ethics (1-12 Credit Hours)
Fundamental issues raised in defining Christian ethics, delineating its sources and methods, developing normative theories, and analyzing processes of moral decision-making.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 573 Roman Catholic Ethics (3 Credit Hours)
This course will concentrate on one or more classic topics in Roman Catholic ethics.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 575 Religious Ethics and Social Theory (3 Credit Hours)
This course investigates what religious ethics gains from and contributes to basic concerns.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 580 Christian Social Ethics (3 Credit Hours)
The course will examine the sources, transformation, problematics, and potential directions in developing the middle principles which articulate the interaction of theological ethics and social questions.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 585 Issues Applied Theology Ethics (3 Credit Hours)
An examination in depth one or more areas which have traditionally engaged religious ethicists.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 590 Directed Readings and Research (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 592 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 593 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 600 Dissertation Supervision (1 Credit Hour)
Students who have filed the dissertation paperwork and are currently writing, should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 605 Master's Study (1 Credit Hour)
Students who have completed their Master's level course work and are preparing for the comprehensive exams should enroll in this course, unless they plan to take the exam while taking courses. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 610 Doctoral Study (1 Credit Hour)
Students who have completed their doctoral level course work and are studying for the written and oral comprehensive exams should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

Theology (MA)

The MA degree program is appropriate for students seeking either a terminal degree or a degree that will prepare them to pursue a doctoral degree. Applicants can be admitted to the program on a part-time basis. Many courses are conveniently scheduled during late afternoon or evening hours.

The Theology (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Public History (MA) (p. 1215)
- Sociology (MA) (p. 1272)

Doctoral

- Theology (PhD) (p. 1284)

Curriculum

The Master of Arts in Theology requires 30–36 credit hours of coursework and a comprehensive examination. Students may choose to concentrate in one of the following areas: Theological Studies, Biblical Languages and Literature, Biblical Studies, or Christian Ethics. An Education minor option is also offered. Note: the MA in Biblical Languages and Literature requires an additional 6 credit hours due to intensive language requirements.

Besides the traditional Master's program, the Theology (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours
MA Requirements [1]		**30-36**
Students may choose one of the following concentration areas. (p. 1282) Courses in the concentrations are chosen from theology course areas with the option for directed readings and independent study for particular areas of study.		
Theological Studies		
Two (2) courses in Biblical Studies Area (p. 1282)		
Two (2) courses in Systematic or Historical Theology Area (p. 1282)		
Two (2) courses in Christian Ethics Area (p. 1282)		
Four Gradute-level electives		
Biblical Languages and Literature		
Four courses in Major Biblical Language (Hebrew or Greek)		
Two courses in Minor Biblical Language (Hebrew or Greek)		
Two courses in Old Testament		
Two courses in New Testament		
One (1) course in Systematic or Historical Theology Area (p. 1282)		
One (1) course in Christian Ethics Area (p. 1282)		
Biblical Studies		
Five (5) courses in Biblical Studies Area (p. 1282)		
One (1) course in Systematic or Historical Theology Area (p. 1282)		
One (1) course in Christian Ethics Area (p. 1282)		
Three Graduate Electives		
Christian Ethics		
Five (5) courses in Christian Ethics Area (p. 1282)		
Two (2) courses in Systematic or Historical Theology Area (p. 1282)		
Two (2) courses in Biblical Studies Area (p. 1282)		
Graduate Elective		
Bioethics & Health Care Policy		
BEHL 401	Clinical Topics in Bioethics	
Two (2) courses in Christian Ethics Area (p. 1282)		
Two (2) courses in Biblical Studies Area (p. 1282)		
Two (2) courses in Systematic or Historical Theology Area (p. 1282)		
Three courses in Bioethics [2]		
Total Hours		**30-36**

[1] The Theology (MA) with a concentration in Biblical Languages and Literature requires 36 credit hours total due to 6 credit hours in intensive language requirements. All other Theology (MA) programs require 30 credit hours.
[2] One course in Bioethics may be taken at the Neiswanger Institute.

Education Minor Option

Students seeking an MA in any of our four concentrations can pursue a minor in Education. This option is excellent preparation for those who plan to teach theology at the high school level, where candidates with a combination of academic theological training and teacher training are in high demand.

Code	Title	Hours
CIEP 414	Instructional Methods-Diverse Population	3
CIEP 423	Advanced Literacy Instruction in the Content Area	3
CIEP 425	Theory and Practice in Assessment	3
CIEP 458		3

For those students who choose this option, the Theology Department will recognize two of these four required School of Education courses as fulfilling two electives in the MA program. The other two School of

Education courses are in addition to the usual MA course requirements. Students frequently take these additional two courses during the summer

Concentration Descriptions

The Master of Arts in Theology requires 30–36 credit hours of coursework and a comprehensive examination. The following descriptions are provided to aid in choosing a concentration area:

- **Theological Studies**: emphasizes exposure to the full range of theological investigation.
- **Biblical Languages and Literature**: provides students with the initial language and biblical study necessary to apply to doctoral programs in Biblical Studies. Half of the coursework is in biblical Greek and Hebrew. Note: requires an additional 6 credit hours due to intensive language requirements.
- **Biblical Studies**: directed towards students with a particular interest in Biblical Studies, but does not incorporate the language study necessary for doctoral work in Biblical Studies.
- **Christian Ethics**: focuses on coursework in Christian Ethics with similarities to the concentration in Theological Studies for a comprehensive overall coursework.
- **Bioethics & Health Care Policy**: offered jointly with the Neiswanger Institute for Bioethics and Healthcare Leadership. This concentration is appropriate for students interested in pursuing a social ethical understanding of bioethics. Courses in this concentration address the history of bioethics including the issues of racism and eugenics; methods and approaches in medical ethics and bioethics (ethnography, narrative bioethics, feminist bioethics); and topics in bioethics such as reproductive medicine and reproductive justice, genetics, disability ethics, spiritual care ethics, end of life, and healthcare justice.

Biblical Studies Area

Code	Title	Hours

THEO 585	Issues Applied Theology Ethics	3

Suggested Sequence of Courses

Traditional Master's Program

In order to provide optimal flexibility in the Master's program, there is no required course sequence. However, it is suggested that students first take one 400-level course in the Biblical Studies Area, one in the Systematic and Historical Theology Area, and one in the Christian Ethics Area, and then proceed to 400-level elective courses. Students should consult with the Graduate Program Director on selection of courses.

Accelerated Master's Pathway

Students can take up to 15 credit hours in the Senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs. While there is no required course sequence to provide optimal flexibility, it is suggested that students first take one 400-level course in the Biblical Studies Area, one in the Systematic and Historical Theology Area, and one in the Christian Ethics Area, and then proceed to 400-level elective courses. Students should consult with the Graduate Program Director on selection of courses.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the

Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By the end of the M.A., students will have met the following objectives:

- Comprehension and Analysis of Scriptural, Ethical, Theological, and Religious Sources: Students will be able to analyze and interpret key scriptural, theological, ethical, and/or religious sources at an advanced level.
- Development of Research Methodologies: Students will be able to apply advanced research methodologies to formulate original arguments and contributions to their field(s).
- Creation and Communication of Scholarly Work: Students will be able to generate and effectively communicate original scholarly research, demonstrating proficiency in both written and oral forms, thereby contributing to academic discourse within their respective fields.
- Analysis of Contemporary Issues: Students will be able to analyze contemporary social, cultural, and philosophical issues using their discipline-specific knowledge of theology, ethics and/or biblical studies.
- Development of Effective Pedagogical Skills: Students will be able to plan and implement Ignatian-informed, effective pedagogical practices.

Assessment

1. All M.A. Students are required to take rigorous courses, giving students a solid foundation in theological traditions and disciplines. At the end of the program, each student takes a comprehensive written exam. The questions in these exams are tailored to the students' course record and interest.
2. M.A. students can participate in many of the pedagogical opportunities that we offer as a department, e.g., course design, assessment tools, etc., which are especially pertinent to the M.A. THEO/EDU MINOR students.
3. The M.A. program regularly enrolls Jesuit scholastics in a wide range of our courses as they pursue the M.A. in Social Philosophy from the Philosophy Department. Their presence enriches our classes and our diversity of students enriches the scholastics' educational breadth of experience. Occasionally, Theology faculty direct or advise their M.A. theses.
4. Our M.A. students are exposed to the many programs across the university that support the Jesuit mission, to which our department's faculty contribute. In particular, the *Healing Earth Project*, an online tool to teach environmental science in secondary schools, integrated with ethics and spirituality, allows M.A. students who will teach in high schools to excel in this area.

Theology (PhD)

The study of religion has been called a "field-encompassing field" (Clifford Geertz) in that the understanding of religion involves many disciplines. The PhD in Theology at Loyola emphasizes interdisciplinary engagement, drawing on historical, linguistic, philosophical, sociological, and literary methods, in addition to the core materials and texts of the fields of Systematic Theology, Christian Ethics, or Biblical Studies. Loyola University's doctoral program in theology is designed for those who envision a career primarily in teaching and scholarly research at an advanced level. We offer two specializations.

In our Integrative Studies in Ethics and Theology (ISET) specialization, students give particular attention to the ways in which theology (historical and systematic) and Christian ethics intersect with and influence one another in particular thinkers and with respect to concrete theological and ethical questions.

The New Testament and Early Christianity specialization concentrates on the New Testament and closely related texts in their historical, cultural, and religious context. The interpretation of texts involves the use of a variety of methods, both literary and historical. While studying the New Testament in its multifaceted reality, students explore the fascinating history and culture of contemporary Jewish and Greco-Roman worlds, the richness of the Jewish Scriptures, and the challenging diversity of Second Temple Judaism.

Related Programs

Master's

- Digital Humanities (MA) (p. 1195)
- Sociology (MA) (p. 1272)
- Theology (MA) (p. 1281)

Curriculum

The PhD in Theology can be pursued in one of two areas of study: Integrative Studies in Ethics and Theology or New Testament and Early Christianity.

Integrative Studies in Ethics and Theology Requirements

The PhD in Theology with a concentration in Integrative Studies in Ethics and Theology requires 30 credit hours of coursework, two research tools (typically two modern languages), a comprehensive examination, and dissertation. Students must complete a master's degree (30 credit hours) before entering the PhD program; the courses listed below are required for the PhD.

The program in Integrative Studies in Ethics and Theology (ISET) represents an effort to rethink the riches of the Christian theological tradition to meet the intellectual, societal, and ethical challenges that confront humanity in the 21st century. In their studies and research, students give particular attention to the ways in which Christian theology and ethics interrelate and mutually inform one another.

ISET-ETHICS Required Courses

Code	Title	Hours
ISET Seminar [1]		*6*
Five Courses in Christian Ethics		*15*
THEO 470	Foundations Crititical Issues Theological Ethics	
THEO 475	Natural Law & Theological Ethics	
THEO 477	Feminist Issues in Theology and Ethics	
THEO 478	Issues in Medical Ethics	
THEO 480	Seminar in Christian Ethics	
THEO 481	Directed Readings Christian Ethics	
THEO 570	Fundamental Issues in Christian Ethics	
THEO 573	Roman Catholic Ethics	
THEO 575	Religious Ethics and Social Theory	
THEO 580	Christian Social Ethics	
THEO 585	Issues Applied Theology Ethics	
THEO 592	Directed Readings	
One Course in Historical or Systematic Theology		*3*
THEO 436	Christology	
THEO 437	Mystery of God in Christian Theology	
THEO 440	Seminar in Systematic Theology	
THEO 441	Directed Reading in Systematic Theology	
THEO 447	Philosophical Theology	
THEO 449	Phenomenology of Religion	
THEO 459	Contemporary Theology	
THEO 460	Seminar in History of Theology	
THEO 461	Directed Readings in History of Theology	
THEO 464	Religion & Politics in Christian History	
THEO 530	Seminar - Variable Titles	
THEO 536	Christian Doctrine-Catholic Theology

Total Hours		**30**

[1] The ISET seminar is taken during the Spring semester of the first two years of PhD coursework. Please consult with the GPD regarding the courses which will fulfill the ISET requirement.

Language Requirements

Students who want to pursue the specialization in Integrative Studies in Ethics and Theology must be able to demonstrate a reading knowledge of French, German, or Spanish before matriculation into the doctoral program. They must demonstrate a reading competency in one of the other two modern languages (or, in the case of Theology, a language pertinent to the intended dissertation topic) before the beginning of their third year of doctoral study.

New Testament and Early Christianity Requirements

The New Testament and Early Christianity specialization concentrates on the New Testament and closely related texts in their historical, cultural, and religious context. The interpretation of texts involves the use of a variety of methods, both literary and historical. While studying the New Testament in its multifaceted reality, students explore the fascinating history and culture of contemporary Jewish and Greco-Roman worlds, the richness of the Jewish Scriptures, and the challenging diversity of Second Temple Judaism.

The PhD in Theology with a concentration in New Testament and Early Christianity requires 36 credit hours of coursework, demonstrated competency in four languages (Greek, Hebrew or Latin, and two modern languages), a comprehensive examination, and dissertation. Students must complete a master's degree (30 credit hours) before entering the PhD program; the courses listed below are required for the PhD.

Required Courses

THEO 585	Issues Applied Theology Ethics	
THEO 592	Directed Readings	
Select Five Electives [1]		*15*
Total Hours		**36**

[1] Two (2) of the five (5) electives may be used for language remediation if needed.

Language Requirements

Students who want to pursue the specialization in New Testament and Early Christianity must be able to demonstrate a reading knowledge of Greek and either French, German, or Spanish before matriculation into the doctoral program. They must demonstrate a reading competency in Hebrew or Latin and one additional language before the beginning of their third year of doctoral study. German must be one of the modern languages. Modern languages courses taken to fulfill this requirement do not count towards the degree.

Comprehensive Exams

All PhD students complete comprehensive doctoral exams.

The doctoral exam for Integrative Studies in Ethics and Theology takes place over three days. The first two days of comprehensive exams cover the student's area of focus, either Ethics or Theology, but the third day is integrative. Each student chooses one of two options: to compare two figures in depth - one working primarily in Christian ethics and one working primarily in Theology or Bible; or to focus around a particular theme and propose authors working on this theme to read and prepare

The New Testament and Early Christianity written exams take place over three days. Day one consists of translation, textual criticism, and exegesis of a Greek text from the NT or other early Christian literature. Day two consists of questions related to a large cross section of reading outside the New Testament from 200 BCE to 200 CE. Day three consists of material chosen by the student as their "minor area" and is usually preparation for the student's dissertation research. These three days of writing are followed by an oral defense, usually during the week following the written exams.

Dissertation

Students will develop a dissertation field within their specialization. Following the successful completion of doctoral examinations and the portfolio requirement, students will make a presentation of their dissertation proposal to a dissertation committee, which will include the dissertation director and at least two other faculty members acquainted with the research areas of the dissertation.

Following approval of the dissertation proposal and the successful completion of all other degree requirements, students are admitted to PhD candidacy. Once students have advanced to candidacy, they will enroll in THEO 600 Dissertation Supervision each semester to maintain standing with the Graduate School while completing their research and writing the dissertation.

The PhD dissertation must be completed, approved by the designated committee members, and successfully defended orally at a public defense.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Doctoral Program, Objectives, Criteria, and Assessment

The objectives for the doctoral program, and the criteria by which we propose to assess them, include the following:

- Train students to develop sophisticated knowledge of theological traditions and disciplines.
- Train students to produce high-quality, original research.
- Mentor students to develop pedagogical excellence.
- Prepare students for positions in academic, ministry, non-profit, and other venues.
- Forward the Jesuit mission and identity of Loyola University Chicago.

OBJECTIVE 1: Train students to develop sophisticated knowledge of theological traditions and disciplines.

CRITERIa:

1. Excellence in coursework
2. Successful passage of comprehensive exams
3. Successful defense of dissertation

ASSESSMENT:

1. The Department has a standard process of oversight through the GPD, the advisors and exam committees.
2. Comprehensive exams, written and oral, based on the rubrics found in the Appendices, must be passed by all doctoral students (see Appendix 17: Theology Department Comprehensive Exam Rubric for Ph.D. in ISET and Appendix 18: Theology Department Comprehensive Exam Rubric for Ph.D. in NT/EC).
3. In the research and writing phase of the dissertation assessment takes place under the close and formalized supervision of the director and readers.

OBJECTIVE 2: Train students to produce high-quality, original research.

CRITERIA:

1. Doctoral curriculum
2. Mentoring of students' scholarly research
3. Scope and methods of research and dissertations
4. Publication record

ASSESSMENT:

1. Taught and mentored by internationally and nationally recognized faculty, doctoral students begin training in research during the coursework portion of their program. They receive guidance in researching and writing scholarly papers, and they are offered numerous extracurricular lectures, colloquia, advanced seminars, individualized reading and research opportunities, etc. Doctoral students on assistantships serve as research assistants to the members of the graduate faculty.
2. Under supervision and mentoring of faculty, doctoral students develop their own research, often emerging from their coursework, which they present at national and international conferences.
3. The department's students engage in wide-ranging topics of theology and ethics, history, and biblical studies. The Loyola Theology Department distinguishes itself from peer institutions by its commitment to interdisciplinary methods, integrating biblical, theological and ethical reflection with literary theory, social and political theory, or medical sciences, among others. The interdisciplinary, interreligious, intercultural, and international focus is reflected in the Loyola students' interests.
4. Many of our students have a strong record of publishing peer-reviewed articles, and/or chapters in edited books, even before graduation. Some students have served as co-editors of books with faculty members. A significant number of dissertations produced by our graduates are later published as monographs; since 2011, at least 27 of our PhD graduates have had their dissertations published; the rate has increased significantly over the previous ten years. Several students have been awarded external prizes and internal and external fellowships, including a Fulbright. (See Appendix 19: Information on Recent Graduates of the Loyola University Chicago Department of Theology Doctoral Program.)

OBJECTIVE 3: Mentor students to develop pedagogical excellence.

CRITERIA:

1. Pedagogical training and experience
2. Teaching excellence

ASSESSMENT:

1. Pedagogical training is integrated into the doctoral course of study. All doctoral students participate in two theological pedagogy courses. Most of our doctoral students serve as teaching assistants for at least two semesters, offering support to full-time faculty members teaching core, in offering lectures, running discussion sessions, and in grading. Most after completion of doctoral exams teach one or more sections of courses offered to our undergraduates. All doctoral students on assistantship take the Teaching Effectiveness Seminar through the Graduate School during the year in which they begin teaching as a teacher of record, and all those who are serving as a teacher of record for the first time are assigned a full-time faculty member as a teaching mentor, to help guide syllabus and curriculum preparation (see Appendix 20: Theology and Religious Studies Pedagogy).
2. Teaching excellence is promoted and assessed via departmental practices: all teachers of record are evaluated by their students, and their faculty mentors perform classroom visits and provide evaluations.

OBJECTIVE 4: Prepare students for positions in academic, ministry, non-profit, and other venues

CRITERIA:

1. Strength of mentoring relationships between faculty and students
2. Strength of professional development programs for students
3. Reasonable time to completion of doctoral degree
4. Placement record of graduates in various career paths

ASSESSMENT:

1. Through intense and strong mentorship, the high ratio of graduate faculty to students, and three endowed chairs whose teaching obligations are dedicated primarily to the doctoral program, students gain sophisticated mastery of theology, ethics, and / or New Testament & Early Christianity studies; and they are prepared to become experts in their field of specialization. The quality of mentoring is assessed through written reports by students and faculty and through regular section meetings.
2. The main professional development occurs across the entire range of coursework, exam preparation and dissertation research and writing. In addition, we offer workshops on publishing and on presenting papers at conferences and we strongly support our students' membership in national and international academic societies (AAR, CBA, CSBR, CTA, CTSA, SBL, SCE, SE etc.).
3. The Department of Theology has significantly reduced its average time to degree completion in the years 2013-2017, compared to the previous five-year period (2008-2012). However, in previous years the department admitted not only students with full fellowships, but also unfunded and part-time students. Some of these took much longer to complete their degree. (See Appendix 19: Information on Recent Graduates of the Loyola University Chicago Department of Theology Doctoral Program.)

4. In a changing job market, the doctoral program recognizes our graduates need to be prepared for academic careers while enabling them to pursue alternatives to a tenure-track position in a university. Therefore, careers such as non-profit management, publishing, academic administration, or leadership positions in healthcare, and ministry are receiving more attention than in the past. (See Appendix 21: Department of Theology Placement Statistics, Ph.D. Program, 2013 – 2018.)

OBJECTIVE 5: Forward the Jesuit mission and identity of Loyola University Chicago

CRITERIA:

1. Contribution of doctoral programs
2. Contribution of department's widespread support of Jesuit identity and mission

ASSESSMENT:

1. The Jesuit Order is committed to a broad range of values: social justice, solidarity, and ecological sustainability. Doctoral level courses stress these commitments, and the department encourages and engages students in multiple services that resonate with the Jesuit mission, both on and off campus. Some of our graduates have gone on to teach in Jesuit universities and colleges, and at least two currently serve as chairs of AJCU departments of theology. In the last few years a number have taken teaching positions at Jesuit high schools.
2. Our department's faculty contribute to numerous programs across the university that support the Jesuit mission, such as the Peace Program, Environmental Studies, Human Rights of Children, and Bioethics. Our faculty are responsible for the core teaching of Catholic theology as well as religious studies. The engagement with diverse cultures, Christian confessions, and religions of the world has long been a hallmark of the Jesuit mission. Our doctoral students share this vision and are trained in translating it into their research and teaching.

Women's Studies and Gender Studies

The Graduate Programs in Women's Studies and Gender Studies draw from a variety of departments and programs on campus to analyze how knowledge is shaped by power (especially around the intersecting axes of gender, sexuality, and race) and to create new pathways for promoting social justice.

The WSGS community at Loyola is broadly interdisciplinary; culturally and intellectually diverse; tight-knit and supportive; politically and socially engaged; and committed to open-ended critique, inquiry, and invention. It is also an intimate community where students build strong bonds with each other and with their faculty.

Graduate Programs

- Women's Studies and Gender Studies (MA) (p. 1289)
- Women's Studies and Gender Studies (MA)/Social Work (MSW) (p. 1907)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

WSGS 401 History of Feminist Thought (3 Credit Hours)
This course surveys the historical development of feminist thought from Mary Wollstonecraft to second wave feminism and beyond and analyzes the impact of feminism on the general culture.
Course equivalencies: WOST401/WSGS401

WSGS 402 Foundations of Women's Studies (3 Credit Hours)
This course investigates how gender has become a critical category in education and knowledge and traces the institutional and intellectual development of women's and gender studies as a field, focusing on the evolution of WGS in the academy (here and in other countries) and on the changes in concepts of knowledge, in methodologies, and in pedagogy that women's studies scholarship has produced in various fields.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST402/WSGS402

WSGS 450 Global Feminisms (3 Credit Hours)
This course is a course that explores feminism and the study of gender in a global dimension. Chosen texts privilege the study of women, gender, and sexuality from an international perspective. The course highlights the intimate relationship between the study of feminism, (post/de)colonialism, and racism.
Course equivalencies: WOST450/WSGS450

WSGS 455 Feminist Pedagogy (3 Credit Hours)
Pre-requisites: Graduate Status
This course will focus on distinctly feminist ways of learning and teaching. As with feminist theory and research methods, feminist pedagogy has been understood to include characteristics like self-reflexivity, de-centered authority, standpoint epistemologies, examinations of power dynamics, and attention to embodied ways of learning and knowing.
Outcomes:
Understand the foundational principles of feminist pedagogy and related approaches to teaching; Develop skills to analyze and produce sound teaching practices within a feminist intersectional framework

WSGS 460 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: Graduate Status
We will explore how crossing borders, identity politics, gender, and sexuality intersect to produce a conversation on contemporary global immigration issues. Focus is on movement from three geographic locations from/to the Global South and North: Latin America to the US and Europe; Africa to Europe; Europe to Latin America and back.

WSGS 470 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: Graduate Status
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Course equivalencies: WOST370/WSGS370/WGSG470
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 475 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: Graduate Status
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 480 Queer Theory (3 Credit Hours)
Pre-requisites: Graduate status
This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications. Outcome: Students will acquire and utilize theoretical concepts in queer studies, develop cultural competency in queer studies and present information about the field orally and in writing.
Interdisciplinary Option: Women & Gender Studies

WSGS 497 Topics in Women's Studies and Gender Studies (3 Credit Hours)
This topics course may originate in Women's Studies and Gender Studies or as a cross-listed course and deals with women's and gender topics including identity, sexuality, diversity, relationships of power in national, transnational and international contexts. The ethical and social justice implications of topics include feminist perspectives.
Course equivalencies: WOST497/WSGS497
Outcomes:
Students understand feminist perspectives on gender in literature; Students connect theory and practice in writing, performance, action or in combined formats

WSGS 498 Practicum (1-3 Credit Hours)
WSGS Practicum gives students the option of doing an internship, teaching assistantship, or research assistantship under the supervision of a faculty member. This practicum counts as an elective credit towards the student's MA degree.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST498/WSGS498
Outcomes:
Develop intersectional research and critical thinking skills in academic/socio-cultural contexts while being fully engaged in Practicum; Enhance written and verbal communication through creative use of Feminist pedagogy and methodology to enhance classroom education and public/academic presentations

WSGS 499 Independent Study (1-3 Credit Hours)
An independent study provides students with the opportunity to work closely and one-on-one with a faculty member. The student can choose her/their/his topic or creative project. The independent study should be comparable to a graduate-level course.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST499/WSGS499

WSGS 500 Thesis Research (3 Credit Hours)
A Thesis Research course allows graduate students to fine tune their research skills, academic writing, and independent thought while they are preparing their thesis proposal and/or writing their thesis.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST500/WSGS500

WSGS 595 Thesis Supervision (1 Credit Hour)
The focus of a Thesis Supervision is to help students better strategize, structure, and organize themselves as they write their thesis. Students will also be advised about how to prepare for a successful oral defense.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST595/WSGS595

WSGS 599 Capstone Presentation (0 Credit Hours)
Pre-requisites: Successful completion of 12 hours in the MA program in WSGS
WSGS 599 is the culmination of the Master's program in Women's Studies and Gender Studies. Requirements include a 10 page synthesis paper or detailed outline, annotated bibliography, and public presentation at our biannual capstone ceremony.
Outcomes:
Synthesis of the students' graduate coursework; performance of the diversity of outcomes in WSGS; celebration of students' achievements; networking

WSGS 605 Master's Study (1 Credit Hour)
Continuing work on completion of the Master's Degree in Women's Studies and Gender Studies.
Interdisciplinary Option: Women & Gender Studies

Women's Studies and Gender Studies (MA)

The Graduate Programs in Women's Studies and Gender Studies draw from a variety of departments and programs on campus to analyze how knowledge is shaped by power (especially around the intersecting axes of gender, sexuality, and race) and to create new pathways for promoting social justice.

The WSGS community at Loyola is broadly interdisciplinary; culturally and intellectually diverse; tight-knit and supportive; politically and socially engaged; and committed to open-ended critique, inquiry, and invention.

The Women's Studies and Gender Studies (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Combined

- Women's Studies and Gender Studies (MA)/Social Work (MSW) (p. 1907)

Curriculum

The Master of Arts in Women's Studies and Gender Studies requires 30 credit hours of courses plus a capstone presentation (WSGS 599).

Besides the traditional Master's program, the Women's Studies and Gender Studies (MA) is also offered as an Accelerated Master's Pathway

where exceptional undergraduate students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours
Required Courses		
WSGS 401	History of Feminist Thought (Offered every fall)	3
WSGS 402	Foundations of Women's Studies (Offered every spring)	3
One Global Feminisms course [1]		**3**
WSGS 450	Global Feminisms	
One Practicum or Thesis [2]		**3**
WSGS 498	Practicum	
WSGS 500	Thesis Research	
Select six elective courses [3]		**18**
WSGS 460	Migration, Identity, Sexuality	
WSGS 455	Feminist Pedagogy	
WSGS 470	Sexual Assault Advocacy	
WSGS 475	Masculinity Studies: Equity, Race, Transformation	
WSGS 480	Queer Theory	
WSGS 497	Topics in Women's Studies and Gender Studies	
WSGS 499	Independent Study	
WSGS 595	Thesis Supervision	
Total Hours		**30**

1. The third core requirement is a course that explores feminism/gender in a global dimension; a number of different courses can satisfy this requirement.
2. The practicum consists of either an internship with a Chicago non-governmental organization or a TAship.
3. Some graduate level electives are offered through other departments, including English, History, Philosophy, Sociology, Political Science, Theology, Communications, Law, and Social Work. Students must select three electives to apply to a track of study (detailed below).

Tracks of Study

Students must choose one of the following concentration tracks for at least three of their electives. Dual-degree students will not be required to choose a concentration beyond their dual degree, but they may organize their electives around a concentration if they choose.

- Global and Transnational
- Gender and Violence
- Bodies and Sexualities
- Religion and Ethics
- Expressive Arts and Visual Cultures
- Self-designed concentration (must be approved by the Graduate Program Director based on a written statement explaining the merits of the proposed course of study)

Suggested Sequence of Course

Traditional Master's Program

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their Graduate Program Director for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
WSGS 401	History of Feminist Thought	3
WSGS 450	Global Feminisms	3
Elective		3
	Hours	**9**
Spring		
WSGS 402	Foundations of Women's Studies	3
Elective		3
Elective		3
	Hours	**9**

	Hours	**9**
	Total Hours	**30**

[1] This course was chosen for the purposes of creating a sequence of courses. Students are able to choose from WSGS 450 or one of the following electives: WSGS 455, WSGS 460, WSGS 475, WSGS 480, or WSGS 497.

[2] An elective was chosen for the purposes of creating a sequence of courses. Students are able to choose from WSGS 450 (if not taken in Fall) or one of the following electives: WSGS 455, WSGS 460, WSGS 475, WSGS 480, or WSGS 497.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon graduating, Graduate Women's Studies and Gender Studies students will be able to:

- Analyze major influences within key historic feminist/gender studies movements in a global landscape.
- Explain how women's studies and gender studies are distinct and fundamental fields of study intimately connected to each other and other interdisciplinary academic disciplines across the university.
- Examine the intersections of identities (e.g., gender, race, ethnicity, class, sexuality, nationality, etc.) and the ways in which they contribute to instances of privilege and power dynamics across global cultures, space, and time.
- Understand their own relationship within their communities and that actions (or inactions) and cultural competencies are integral to addressing inequalities.
- Conduct research by privileging Feminist, Queer, and/or other Gender Studies theories and methodologies through both an intersectional and social justice lens.

Communication

Located in one of the world's top communication centers, Loyola University Chicago provides an ideal setting for integrating study with practical application in the expanding fields of advertising, advocacy, digital media, film, multimedia journalism, public relations, and other areas of communication.

Students benefit from a distinguished scholarly faculty of experienced communication professionals in journalism, media studies, documentary film production, cultural communication and public advocacy.

Loyola's School of Communication offers state-of-the-art on-site production facilities, labs, and equipment, as well as proximity to Chicago's vast production community. Loyola is home to WLUW, a 24-hour FM radio station, *The Phoenix*, an award-winning student newspaper, and an extensive internship program.

The study of communication is one of the primary means for promoting the traditional goals of liberal education: understanding political rhetoric and social justice, participating in media advocacy and developing an ethical sensitivity so necessary in our time. Students at Loyola's School of Communication learn not just how to get a message out, but how to think critically and communicate ethically.

Graduate Programs

- Advertising and Emerging Media (MS) (p. 1301)
- Digital Media and Storytelling (MComm) (p. 1303)
- Global Strategic Communication (MS) (p. 1306)

Communications (COMM)

COMM 400 Emerging Creative Technologies (3 Credit Hours)
Emerging Creative Technologies explores the dynamic intersection of user experience, multimedia storytelling, visual communication, and emerging creative technologies. Students will gain foundational knowledge in UX/UI design while developing hands-on skills across digital content formats, including video, visual design, generative AI, and portfolio creation. The course blends academic study with real-world creative application. Students will analyze contemporary media platforms, examine how digital environments influence audience behavior, and produce original creative work that reflects strategic thinking and professional identity. By the end of the session, students will build a polished portfolio showcasing their capabilities as digital creators, communicators, and storytellers.
Outcomes:
Apply UX and UI principles to digital storytelling, multimedia design, and content strategy; Create original digital content across multiple formats, including image, video, and written assets; Responsibly incorporate generative AI as part of creative ideation and production workflows; Evaluate the cultural, ethical, and strategic implications of content creation within digital environments; Build and refine a professional digital portfolio suitable for graduate-level and industry use; Develop a reflective understanding of creative identity and long-term professional goals

COMM 401 Foundations of Global Strategic Communication (3 Credit Hours)
This course delves into two areas impacting communicators' success in the global arena: new media and culture. Through a blend of class discussions, interactive activities and guest speakers, students will study frameworks for strategic communication in a global environment and then apply these lessons in group and individual projects. Enrollment limited to students in GSCM-MS Program. Students are expected to understand fundamental concepts in strategic communication, be able to identify and explain the role of strategic communication in the global business context, understand the importance of dialogue and engagement, and have the ability to construct effective messages.

COMM 402 Organizational Leadership and Change Management (3 Credit Hours)
Students will examine best practices in organizational leadership and change management. Students will also be introduced to major economic, financial and business principles and the terms, concepts and values that guide organizations. Finally, will gain insights that will enable them to work more effectively as communicators and organizational leaders. Enrollment limited to students in GSCM-MS Program. Students are expected to gain knowledge and leadership skills needed to help organizations chart a successful course through change. They are also expected to understand the major drivers of organizational change; the role leadership plays in anticipating, planning and navigating organizational change.

COMM 403 Strategic Communication Research Methods (3 Credit Hours)
This course is designed to provide students with a critical framework for evaluating communication research and first-hand experience in the research process. Specifically, we will examine how research questions, originating from client-specific interests, are translated into a research project. Enrollment limited to students in the GSCM-MS Program. Students are expected to know how to read and evaluate a research study, select appropriate research questions, develop measurements, draw a sample, collect and analyze data and interpret the results.

COMM 405 Story Development and Production (3 Credit Hours)
This course will give students a basic understanding of narrative theory and its evolution. It will also emphasize the idea that telling a good story begins with having something to say and a purpose for telling it to someone. Students must be enrolled in SOC Professional Degree Program MC in Digital Storytelling.
Outcomes:
Students will read, write and practice narrative techniques on electronic modes of communication while learning about narrative structure, content and form of delivery

COMM 406 Environmental Advocacy (3 Credit Hours)
Pre-requisites: COMM 100 and Sophomore standing; Prerequisites are waived for undergraduate and graduate students in the School of Environmental sustainability and for students in the Digital Media and Storytelling program
This course explores the rhetorical means by which citizens influence the policies and practices affecting our natural and human environments. The focus is on current controversies.
Course equivalencies: X - COMM 306 / COMM 406
Outcomes:
The course seeks to provide an understanding of the history and range of communication styles in the US environmental movement and to help students develop practical skills relevant to entering into environmental debates

COMM 409 Video Production Lab (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This six-week graduate course is designed as an entry-level introduction to the foundational concepts and techniques in video, audio, and editing production. This class prepares students with little to no prior experience in video and audio production to readily participate in the Digital Media and Storytelling (DMST) master's program. Students with some or greater knowledge in this field will also have the opportunity to expand their prior knowledge as the course focuses on developing practical skills to effectively capture and edit video and audio elements to create compelling visual narratives. Students will be provided access to industry- standard tools while learning how to shape stories using best practices in media production. Throughout the course, students will explore the fundamentals of video production, including camera operation, sound recording, and editing software using Adobe software. Emphasis will be placed on hands-on experience, with each student producing and editing short video projects that integrate both visual and audio storytelling techniques.
Outcomes:
Demonstrate proficiency in operating digital video cameras and audio recording equipment to capture high-quality footage and sound for storytelling purposes; Apply fundamental techniques of video composition, including framing, lighting, and shot sequencing, to create visually compelling narratives; Utilize industry-standard editing software, such as Adobe Premiere Pro, to edit and assemble video and audio elements into coherent short-form productions; Implement basic audio post-production techniques, including dialog editing, sound effects creation, and mixing, to enhance the overall quality of video projects; Develop and execute a complete video production workflow, from pre-production planning to final delivery, demonstrating an understanding of storytelling principles and best practices in digital media production

COMM 410 Media Law for Inclusive Digital Storytelling (3 Credit Hours)
This course addresses how courts and lawmakers have addressed legal issues presented by digital media. Students must be enrolled in Professional Degree Program MC in Digital Storytelling.
Outcomes:
Students will learn some of the ways that blogger's rights, intellectual property, libel, privacy and threats pose challenges to internet legal regulations and social ethics

COMM 411 Strategic Communication Ethics and Law (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and Digital Advertising MS programs
This course examines diverse methods for identifying legal and ethical issues that arise from organizational communication practices within strategic communication contexts. Students will develop the ability to recognize a broad spectrum of concerns and apply systematic analytical approaches to clearly resolve business-related challenges.
Outcomes:
Recognize the tensions inherent in serving as an advocate for an organization while also having duties to the public; Be able to recognize and critically assess ethical strategic communication issues; Apply classical ethical theories using ethical decision-making processes to evaluate potential courses of action in response to contemporary strategic communication ethics case studies; Be able to develop a workshop to introduce an ethical decision-making process that you recommend for adoption in an organization or profession; Demonstrate a broad understanding of the history and scope of the First Amendment as well as a thorough knowledge of the laws and regulations that uniquely affect media industries and media professionals; Identify legal problems in real and hypothetical situations and resolve those problems by applying legal principles; Reflect on the meaning of freedom of speech in society and the rights and duties of media professionals

COMM 412 Communication Content Mining and Analytics (3 Credit Hours)
This course is for students interested in learning practical data analysis/data mining techniques in strategic communication. A useful takeaway from the course will be the ability to perform powerful data analysis using popular statistic packages (e.g., R, SPSS, Excel) and web analytics (e.g., Google Analytics). Enrollment limited to students in the GSCM-MS Program. Students are expected to increase their critical thinking ability to assess the quality of consumer information and the limitations of online data. They will become familiar with frequently used data analysis tools.

COMM 413 Writing for Strategic Communication (3 Credit Hours)
This advanced writing intensive course engages students in the strategic process of professional-level writing by focusing on communication objectives, cultural differences among audiences, techniques, style and mechanics. Students will learn the importance of planning, research, pre-writing, editing and rewriting in the writing process. Restricted to Global Strategic Communication Students
Outcomes:
The course also provides practical, real world writing experience in diverse formats for a wide range of audiences, including memos, proposals, creative briefs, executive speeches, op-eds, fact sheets, news releases, blogs and other social media

COMM 414 Advertising Campaigns (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
In this Advertising Campaigns class, students will explore the profound impact of rapidly evolving technologies on modern advertising practices. The course examines how changing media consumption behaviors have transformed consumer journeys from linear patterns to complex, interconnected experiences driven by micro-moments and personal intents. Students will critically analyze traditional advertising agency models, identifying why many long-standing practices are becoming obsolete in today's digital landscape. The class will challenge participants to rethink creative processes and develop innovative approaches that align with current market demands and communication goals. Through collaborative projects and discussions, students will work to bridge the gap between conventional advertising wisdom and the realities of the digital age. The course emphasizes the need for original thinking and adaptability in crafting effective campaigns that resonate across various touchpoints in consumers' lives.
Outcomes:
Analyze the impact of changing technologies on consumer behavior and media consumption patterns; Evaluate traditional advertising models and identify areas for innovation in the digital age; Develop strategies to engage consumers across multiple touchpoints throughout their non-linear consumer journey; Create data-driven, intent-based advertising campaigns that resonate with target audiences in their micro-moments; Design integrated campaigns that seamlessly blend traditional and digital advertising approaches; Apply critical thinking skills to assess and adapt campaign strategies in response to rapidly changing market conditions

COMM 415 Career and Portfolio Development (3 Credit Hours)
This course prepares students for professional life after graduation by focusing on how to build and present themselves as media professionals. Students will clarify their strengths, shape a distinctive professional identity, and learn how to showcase creative work in ways that connect to specific roles and career goals. Topics include portfolio development, personal branding, professional pitching, client communication, platform etiquette, freelancing, and media entrepreneurship. Through hands-on projects, students leave the course with a set of practical, finished materials ready to use as they begin applying for jobs, seeking freelance clients, or pursuing entrepreneurial opportunities in the media industry.
Outcomes:
Articulate a clear professional identity and value proposition tailored to media industries\\n; Develop a portfolio strategy aligned with specific career goals, target audiences, and industries; Create and deliver professional pitches and application materials for employers, collaborators, and clients; Evaluate freelance, entrepreneurial, and creator-based business models for sustainable career development; Apply client communication and personal branding strategies to support long-term professional growth

COMM 417 Media Planning (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and the Dual Degree-Advertising & Public Relations BA programs
This course examines the advertising and marketing processes required to research, develop, and implement an effective media plan for budgeting appropriate advertising time and space.
Course equivalencies: COMM 317/COMM 417
Outcomes:
Student teams will develop competencies in decision-making processes and tools, including research methods, objectives, strategies, and tactics, to construct an advertising media plan

COMM 420 Digital Production: Storytelling with Impact (3 Credit Hours)
This lab-based course will introduce students to production techniques for digital storytelling. Students will acquire knowledge of videography, sound recording, video and audio editing, web design and interactivity.
Outcomes:
Students will find compelling stories, set scenes and use narrative techniques to craft influential stories designed for professional purposes in advertising, journalism or documentary production

COMM 421 Global Strategic Communication Boot Camp Chicago (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS program
COMM 421 is a week-long immersion experience designed to provide students with direct engagement with leaders in public relations, advertising, digital marketing, and AI-driven communication. The course incorporates structured workshops, real-world simulation activities, and visits to professional organizations. Through these engaged learning experiences, students strengthen their understanding of strategic communication principles and develop competencies required for leadership roles in the global communication industry.
Outcomes:
Apply strategic communication frameworks in global and multicultural contexts; Analyze the role of AI and emerging technologies in PR and advertising; Engage with industry professionals to understand current trends and challenges; Reflect critically on the ethical and cultural dimensions of global communication practices

COMM 422 Global and Multicultural Audiences and Stakeholders (3 Credit Hours)
In this course students will investigate various audiences in today's global marketplace that organizations need to consider to remain relevant. The course will explore the concept of globalization and how, as a dynamic and uneven process, it requires practitioners to understand global and local audiences and those influenced by multiple cultures. Restricted to ADPR-BASD, GSCM-MS, and DMST-MC students.
Outcomes:
The goals of the course are to learn to be sensitive to a variety of cultures; recognize particular values, needs, and behaviors; and craft messages that connect and engage

COMM 425 AI-Powered Marketing and Analytics (3 Credit Hours)
This course will explore online audience behavior and measurement. Students will use analytics to understand user activities and to drive improvements in distribution performance. In the course of their development, students will come to understand intellectual property protection, self-publication, bandwidth issues, usability, file formats, social sharing, security, syndication, and mobile delivery.
Outcomes:
Analyze digital audience behavior using analytics tools to inform marketing strategies and content distribution decisions; Evaluate the legal, marketing, and economic factors affecting digital content distribution and audience targeting; Implement data-driven strategies to improve digital content performance and audience engagement across various platforms; Design digital marketing materials that comply with intellectual property laws and address security and usability concerns; Optimize digital content for multi-platform delivery, with a focus on mobile and social media channels, considering bandwidth and file format implications

COMM 426 Strategic Business Communication for Social Impact (3 Credit Hours)
The strategic simulation class setting will engage the students in the imaginary leadership role to exercise how to make an ethical decision on the issues and challenges. This incorporates a mix of lectures, case discussions, role-playing, and group projects in real-world applications.
Outcomes:
Apply fundamental principles of communication in different organizational contexts\\n; Demonstrate ability to write and present effectively, considering audience and purpose; Understand and address critical challenges during crises; Identify communication solutions to foster a positive team culture through employee communication; Leverage ethical communication in decision-making and problem-solving; Navigate cross-cultural and global communication issues and differences

COMM 429 Advertising and Public Relations Design (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and the Dual Degree-Advertising & Public Relations BA programs
This course is for students who want to understand the creative and design discipline of the fields. Students will learn the fundamentals of print-based messages used in advertising and public relations. Students will employ various design programs applied in today's industry to develop visual communications projects, which will culminate in a final portfolio.
Course equivalencies: COMM 329/COMM 429
Outcomes:
Students will learn and become competent in the following: Current design programs, including InDesign and Photoshop; Basic design principles, such as color, space, and typography; Common formats for designing integrated marketing communication print materials

COMM 430 Multiplatform Visual Design (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This course will focus on digital design with emphasis on creation, refinement, and publishing of content in multiple formats. Through the lens of visual storytelling, we will explore photography and photo-editing, typography and graphic design, and animation and motion graphics using a combination of research, discussion, and hands-on workshops. We will also discuss methods of print and web design in a practical context, both as artistic expression and commercial production.
Outcomes:
Develop an understanding of visual design principles; Gain experience using the Adobe Creative Suite (Photoshop, AfterEffects, Illustrator, InDesign); Learn basic technical skills for digital photographic equipment; Explore the theoretical and practical place of digital and print visual design

COMM 431 Campaign for Social Impact (3 Credit Hours)
This course empowers students to design, implement, and evaluate digital campaigns using Integrative Marketing Communication (IMC) principles with a strong emphasis on community service and engaged learning. Students will work on hands-on projects that address real-world community needs, applying research, planning, implementation, and evaluation strategies. Through case studies, client campaigns, and community-based initiatives, students will build a portfolio of projects that not only enhance their professional skills but also contribute positively to the community and society.
Outcomes:
Develop and manage online content promotion and branded digital campaigns to promote community-based initiatives and social causes; Apply critical thinking and research skills to craft clear messages and digital materials for social good; Execute social media engagement and user-oriented content strategies; Evaluate campaign success by setting the key performance indicators (KPIs) to assess the effectiveness of campaigns and their impact on community improvement; Engage in a cycle of practice, feedback, and refinement to develop transferable skills while making meaningful contributions to community projects

COMM 432 Public Interest Communication (3 Credit Hours)
This course explores the principles and best practices of strategic communication aimed at achieving lasting, positive social change in various areas, including climate change, racial justice, healthcare access, and housing policy. This interdisciplinary program draws from practice and scholarship in public relations, journalism, advertising, psychology, sociology, political science, anthropology, and neuroscience. This course is custom-tailored for current and future communications directors at a nonprofit organization or a media relations officer at a foundation being an account executive at a strategic communications firm.
Outcomes:
Identify and target issues that can be addressed with public interest communications; Conduct research to underpin strategic communications aimed at driving social change; Use systems thinking to identify a specific approach to driving change; Develop strategic communication initiatives that can drive positive social change; Advocate and advise in the use of visual collateral that can best reach the target community

COMM 433 Corporate Communication (3 Credit Hours)
Pre-requisites: For GSCM-MS students, COMM 401; DMST-MC students may also enroll without pre-requisite
This course develops a multiple stakeholder approach to managing the communication function in corporations. Management topics include developing a communication plan, budgeting, creating a communications calendar, working with agencies and other external resources, project management and evaluation.
Outcomes:
At the end of the course, students are expected to understand how the communication function is organized in corporations and non-governmental organizations (NGOs)

COMM 434 Business-to-Business Communication (3 Credit Hours)
The robust business-to-business (B2B) sector provides enormous opportunity in the global marketplace. This course will explore B2B's unique set of challenges that strategic communicators need to consider in developing and delivering effective messages. Restricted to Global Strategic Communication Students.
Outcomes:
Students are expected to gain a working knowledge of the theories, concepts, and issues of in B2B communication

COMM 435 Public Affairs and Issues Management (3 Credit Hours)
The course explores how to predict and identify emerging issues, which can proliferate rapidly through digital and social media; accurately assess the potential threat posed by issues; and plan and implement effective response to prevent issues from growing into crises. Restricted to Global Strategic Communication Students.
Outcomes:
At the end of the course, students will understand the role of the public affairs function in organizations, know how to monitor for and identify emerging issues and to build a firewall to make organizations less vulnerable to attack

COMM 436 Social Media Crisis Communication (3 Credit Hours)
This course focuses on realistic social media issues and crisis cases and students' practices on how to respond to fast-paced information on multiple social media channels and to create effective responses. This course is custom-tailored for current and future PR managers, digital specialists, community managers, and others who need to have a high degree of public visibility and responsibility.
Outcomes:
Master crisis communication theories; Identify different types of crises; Successfully manage social media during a crisis; Develop key messages and identify and implement the preemptive and responsive strategies; Train yourself as a spokesperson

COMM 437 Advertising and Public Relations Multimedia Commercial Production (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC, the Global Strategic Communication MS, and the Dual Degree-Advertising & Public Relations BA programs
This is an advanced video and advertising course designed to give students an introduction to various types of multimedia commercials as well as practical considerations of producing branded content and television spots, including for real clients.
Course equivalencies: COMM 337/COMM 437
Outcomes:
Build experience in effective multi-tasking and teamwork; gain skills with technology and strategy, creative, and application process of broadcast production; and practice engaging with the community in media development efforts

COMM 438 Search & Display Advertising (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This course covers the enduring foundation of digital advertising --- Search Advertising and Display Advertising, which is a part of the bigger scope called programmatic advertising. Students will be exposed to 1) fundamental concepts in search and display advertising, 2) hands-on practices on creating both search and display advertising campaign, and 3) evaluation skills in optimizing search & display advertising campaigns. This course is mostly built upon Google's advertising products. However, the fundamental logics, once acquired, can be applied to all forms of paid ads in digital space.
Outcomes:
Knowledge of the key terms and development process of search & display advertising; Knowledge of the various factors that could influence the success of search & display campaigns; Ability to develop and implement search & display advertising campaigns; Ability to evaluate and optimize for search & display advertising campaigns; Analyze and interpret complex campaign data using industry-standard analytics tools to drive performance improvements; Integrate search and display advertising strategies with broader digital marketing efforts for cohesive brand messaging and improved customer journey mapping

COMM 439 Video Documentary (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods.
Course equivalencies: X - COMM 339 / COMM 439
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 441 Global Strategic Communication Capstone (3 Credit Hours)
Students will synthesize & apply knowledge and skills from previous courses to demonstrate competence in a specialized area of strategic communication of greatest interest to them. Students will submit a comprehensive work, research project, media artifact, business plan, or any other comparable work approved by the instructor. In addition, students will develop fully annotated & professional quality final presentation. Enrollment is restricted to students in the GSCM-MS Program. Students are expected to become more knowledgeable in an area of specialization by exploring a specific type of strategic communication, engaging in research, building relationships with professionals and developing creative applications to demonstrate professional-level knowledge, understanding of practices, skills & competencies.

COMM 444 Social Media Campaigns (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and the Dual Degree-Advertising & Public Relations BA programs
This interactive, hands-on, strategy-meets-execution course that is designed to help you think like a social media campaign planner and campaign creator, capable of building insight-driven strategies, selecting platforms, developing creative ideas and understanding paid/owned/earned dynamics. The goal is that at the end of the semester, you have mastered the fundamentals of consumer behavior on social platforms, strategic campaign development, creative ideation, media planning, and performance management that spans across advertising, public relations and communication practices.
Course equivalencies: COMM 331/COMM 444
Outcomes:
Master the development of comprehensive social media strategies based on consumer insights: Students will learn to identify target audiences, uncover behavioral and cultural insights, and translate these findings into high-impact social media campaign strategies; Assess specific platform nuances and audience expectations: No single platform is the same and serves different objectives for brand development and students will examine how different social media platforms operate - including their engagement patterns and algorithmic structures that shape content and communication strategies; Create professional-level customer journey maps and identify high-impact touchpoints: Students will gain experience in mapping consumer paths across platforms and identify moments of opportunity for engagement, influence, and/or conversion within multi-platform journeys; Generate upper-level creative content strategies tailored to platform-specific audiences: Students will gain experience in creating platform-specific campaigns that are targeted to specific audiences, delivering on the client's brief expectations; Present professional-level social media campaign recommendations to clients: Students will get firsthand experience in presenting an industry-standard integrated social media campaign program

COMM 445 Creating ADPR Content with AI (3 Credit Hours)
Pre-requisites: COMM 211 or enrollment in the Global Strategic Communication (MS) program
This course explores the current practices, opportunities, challenges, and ethics of strategic integration of Artificial Intelligence (AI) and Generative AI (GAI) into advertising, public relations, and communication workflows. Students learn various AI platforms and how to use AI for audience research, content creation, and campaign optimization while navigating the ethical and legal implications of automated communication.
Course equivalencies: COMM 335 / COMM 445
Outcomes:
Have comprehensive knowledge of the AI platforms and tools used for creating effective strategic communication content; Master how to integrate AI to reduce creative production time; Understand at a professional level the ethical implementations for AI use including navigating transparency, data privacy, and other issues; Master the skills of working effectively in teams to prepare marketing communication programs

COMM 448 Short-Form Series Production (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This course prepares students to design, produce, and evaluate professional-quality short-form digital media through the creation of original, serialized video projects. Students will develop skills in visual storytelling, pacing, audience engagement, and multiplatform production while applying industry-standard workflows for planning, shooting, editing, and post-production. By the end of the course, students will be able to produce cohesive digital series content, make informed creative and technical decisions, and critically reflect on their work in ways that support both portfolio development and professional practice in contemporary media industries.
Outcomes:
Develop a multi-part story series with a clear theme connecting all episodes; Execute all stages from pre-production planning through final delivery, demonstrating competency in shooting, editing, sound design, and post-production; Apply critical feedback by engaging in constructive peer critique; Articulate the creative process behind their original content, including the challenges faced and solutions implemented during project development; Manage production timelines by working efficiently under deadline pressure, problem-solving independently, and delivering completed work on schedule

COMM 449 Capstone Seminar (3 Credit Hours)
Pre-requisites: COMM 400
Capstone Seminar is designed to equip students with the necessary skills, knowledge, and strategies to successfully complete their culminating capstone project. This course focuses on project planning, development and execution. Students will develop a clear project proposal, enhance their research and critical thinking skills. Through workshops, peer feedback, and faculty guidance, students will develop their capstone project idea and establish timelines. By the end of this course, students will have a solid foundation to confidently begin their capstone project.
Outcomes:
Students will develop skills in project planning and time management, including setting timelines, defining objectives, and coordinating resources for their capstone project; Students will analyze and critique various forms of digital media, understanding their impact on audiences and the techniques used to create them; Students will conduct research relevant to their capstone project, utilizing academic and industry sources to inform their work; Students will understand and apply ethical principles in digital media production, including copyright, privacy, and representation; Students will complete a proposal or preliminary work that prepares them for successful execution of their capstone project; Students will engage in self-assessment and reflection on their learning experiences, identifying strengths and areas for improvement as they prepare for their capstone

COMM 450 Capstone II (3 Credit Hours)
Pre-requisites: COMM 400, 405, 410, 415, 420, 425, and 430
This course involves integration of new media tools and storytelling, culminating in a professional project that is conveyed to public audiences and widely distributed.

COMM 455 Animation (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This course will focus on animation with specific emphasis on the creation, refinement, and publishing of a visual story. Students will learn 2D and 3D techniques, cameras, CGI and other software and equipment to create animated works.
Course equivalencies: COMM 305/COMM 455
Outcomes:
Theories of visual and image-based storytelling; script writing; character development; storyboarding; creating visual stories from images; animation enhancement/manipulation; graphic design; and contemporary animation design options for visual storytelling/promotion

COMM 458 Newscasting and Producing (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This is designed as a capstone course for the broadcast journalism emphasis. It covers all aspects of TV (or web) newscasts, including producing, anchoring, reporting, photography, and editing, as well as studio production. The class produces and delivers newscasts designed to prepare students for work in the TV news industry.
Course equivalencies: COMM 358/COMM 458

COMM 459 Advanced Post Production (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This course combines advanced editing theory and practice, aimed at providing students with the skills required for editing motion pictures of all genres and for all platforms.
Course equivalencies: X - COMM 359 / COMM 459
Outcomes:
Students will learn how to edit for motion pictures of all forms

COMM 460 AI and Media Experience Design (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Advertising MS program
This advanced, practice-oriented course examines how artificial intelligence is reshaping the end-to-end advertising value chain--from insight generation and creative development to personalization, media optimization, and customer experience design. Building on foundational AI-in-advertising concepts, students will develop the skills to design AI-enabled creative systems, prototype AI-driven experiences (including conversational and agentic interfaces), and evaluate the ethical, legal, and strategic tradeoffs of deploying AI in Business-to-Consumer (B2C) contexts. The course emphasizes hands-on experimentation with current AI tools, frameworks for trustworthy deployment, and professional communication of AI strategy to stakeholders.
Outcomes:
Explain core AI capabilities and limitations in advertising contexts; Design generative AI workflows for creative production; Translate business problems into AI-assisted insight and measurement plans; Prototype conversational/agentic customer experiences; Evaluate ethical, legal, and governance implications of AI deployment; Present AI strategy and implementation recommendations professionally

COMM 461 Health Communication (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and the Dual Degree-Advertising & Public Relations BA programs
This course focuses on the growing field of health communication. Building on students' knowledge of public relations, advertising, communication, and marketing, this class aims to help students develop an area of specialization that offers career opportunities in many settings. Through guest speakers and field trips, the class is designed to provide an overview of what health communicators do and where they work.
Course equivalencies: COMM 311/COMM 461
Outcomes:
Provide a foundation of knowledge about the US healthcare system and acquaint students with how communications can play a vital role in accomplishing public health objectives

COMM 462 Health Literacy & Digital Technology (3 Credit Hours)
This course explores a deeper understanding of the potential of digital communication tools to improve health literacy and contribute to better health outcomes across the full spectrum of healthcare. This course prepares these students to enter a local health department, community organization, or government agency, and global health communication PR consultancy, which contributes to health communication research, patient counseling, materials design, and program management.
Outcomes:
Be skilled in analyzing, interpreting, and communicating complex health concepts across a wide range of media platforms, equipping them to effectively manage health communication in a digital landscape; Describe and assess the ecological factors that affect health literacy; Assess the potential for digital technologies to either bridge or deepen health inequities based on factors such as age, education, socio-economic status, and geographic location; Evaluate the role of digital health interventions in addressing health system deficiencies, particularly in underserved or remote areas, and understand the challenges related to infrastructure and accessibility; Monitor and evaluate the utilization and impact of digital health technologies across different social groups to ensure that the benefits of digital health are equitably distributed; Develop communication interventions that leverage digital technologies to improve health equity, ensuring that these innovations do not reinforce existing social and health inequities

COMM 463 Intermediate Advertising Design (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC, the Global Strategic Communication MS, and the Dual Degree-Advertising & Public Relations BA programs
Builds on the creative skills and understanding acquired in the introductory advertising creative courses to enhance students' conceptual abilities. Utilizing Adobe InDesign and Photoshop, students learn to design for various advertising formats including digital, print, and for client presentations.
Course equivalencies: COMM 330/COMM 463
Outcomes:
The best work is finished on computers and reviewed by advertising professionals at the end of the semester

COMM 464 Mobile Advertising (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC, the Global Strategic Communication MS, and the Dual Degree-Advertising & Public Relations BA programs
Mobile is one of the most valued investments for advertisers. This course covers the latest practices and trends of mobile advertising which includes 1) branded mobile application design and development; 2) advanced mobile experiences with AR/VR experiments; and 3) various practices, tactics, and ethical concerns for native mobile advertising experiences.
Course equivalencies: COMM 334/COMM 464
Outcomes:
Knowledge of relevant human-computer interaction theories and branded mobile design/development; Ability to use digital tools to create mobile advertising campaigns; Understanding of importance and implications of ethics in mobile advertising

COMM 466 Advanced Quantitative Research Methods (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This course is students to get familiar with sophisticated statistical techniques and data analysis procedures in conducting academic research in the field of advertising. The course will cover topics such as experimental design, survey design, regression analysis, moderation analysis, mediation analysis, structural equation modeling, and longitudinal data analysis. Hands-on sessions using statistical software (e.g., SPSS) will be integral, allowing students to gain practical experience with real datasets. The course will culminate in a final project where students will apply learned methods to a research question of their choice, fostering skills in research design, data analysis, and scholarly communication.
Outcomes:
Understand and apply advanced statistical methods in research; Proficiently use statistical software for data analysis; Design and execute quantitative research studies; Interpret and critically evaluate quantitative research findings; Communicate research findings effectively through written and oral presentations; Develop a research project proposal using advanced quantitative methods

COMM 467 Advanced Digital Analytics (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This is an intense course designed for students who have a foundational understanding of digital data analysis and are looking to deepen their expertise. This course will explore the advanced techniques and tools used in the analysis of digital data, with a strong emphasis on SQL and its applications in digital analytics. The course integrates theoretical knowledge with practical skills, offering hands-on sessions where students will work with real data sets. Students will learn to extract, transform, and analyze data from various digital sources to make informed business decisions. The course culminates in a capstone project where students apply their skills to solve a real-world digital analytics problem.
Outcomes:
Demonstrate advanced understanding of digital data sources and structures; Proficiently use SQL for complex data queries and analysis; Apply statistical methods to analyze and interpret digital data; Integrate data from multiple sources for comprehensive analytics; Develop and execute a digital analytics project from conception to completion; Effectively communicate analytical findings to both technical and non-technical audiences

COMM 468 Consumer Psychology (3 Credit Hours)
This is a course designed for students who wants to explore the psychological principles and theories underlying consumer behavior, offering insights into how consumers think, feel, and make decisions. In a format of seminar discussion, students will be exposed to a blend of theoretical exploration and practical applications. They will also examine various aspects of consumer psychology to analyze real-world examples, and concludes with a project where students apply their understanding to a consumer behavior problem or opportunity.
Outcomes:
Understand key psychological theories relevant to consumer behavior; Analyze how consumer perception, motivation, and decision-making processes influence buying behavior; Apply consumer psychology principles to marketing and business strategies; Evaluate the impact of social and cultural factors on consumer behavior; Conduct research and analyze data to inform consumer psychology insights; Develop and present a comprehensive project that applies consumer psychology concepts to a real-world problem

COMM 469 Digital User Experience Strategy (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and Digital Advertising MS programs
This course is redesigned to cover emerging topics in persuasive technology design on different types of interfaces and settings. The course will cover the foundations of persuasive UX/UI design, specifically in the context of strategic communication. Students will learn the core user experience (UX) design principles, including usability heuristics, information architecture, and behavioral economics applied in digital advertising and marketing, such as urgency and scarcity tactics, social proof implementation, and neuromarketing principles. Students will learn the psychological triggers that drive purchase decisions and consumer engagement and satisfaction based on solid scientific evidence.
Outcomes:
Understand the principles of user experience and their application in persuasion; Apply design thinking to create innovative solutions; Design effective UI and UX systems for digital communication campaigns; Implement human-centered design approaches in digital strategies; Recognize and address ethical considerations in user experience for diverse audiences; Develop skills in virtual agent design for persuasion purpose; Create and evaluate a comprehensive project that integrates UI/UX and ethical considerations

COMM 470 Special Topics in Advertising and Public Relations (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and the Dual Degree-Advertising & Public Relations BA programs
These are advanced courses in specialized AD/PR areas. Titles and content vary, and prerequisites are established according to course content. May be repeated with different topics for a total of 9 credit hours, but only 6 credit hours may count toward the major.
Course equivalencies: COMM 370/COMM 470

COMM 471 Media Commerce and Platform Ecosystems (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Advertising MS program
This interactive, hands-on, strategy-meets-execution course is designed to prepare you to plan and operate advertising and content programs inside commerce and platform ecosystems, where media exposure and point of sale are increasingly inseparable. Students will learn a strategic overview of retail media networks, social commerce, and live commerce and practice the operational skills needed to drive measurable outcomes, including product visibility, add-to-cart, conversion, and revenue. The course moves beyond traditional ad metrics (clicks and impressions) to focus on commerce-ready creative, product data and merchandising fundamentals, shopper journey design, and performance measurement within online retail and social environments.
Outcomes:
Explain how commerce and platform ecosystems work; Plan commerce-first strategies based on shopper insights; Develop commerce-ready creative and content systems; Operate shopping and retail media campaigns; Measure performance using commerce metrics; Present professional commerce recommendations

COMM 473 Digital Storytelling Abroad (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography, and editing skills within another country and cultural context.
Course equivalencies: COMM 373/COMM 473

COMM 479 Digital Sustainability (3 Credit Hours)
Pre-requisites: DMST and SES grad students can enroll
Digital Sustainability explores the environmental impact of digital media. Mining precious metals to manufacture devices, burning fossil fuels to run data centers, global black market trading of e-waste are points where the digital world meets the physical world. Students will explore digital sustainability problems, and work toward creative solutions.
Course equivalencies: COMM 379 / COMM 479
Outcomes:
Learn about environmental issues stemming from digital media infrastructure; Critically evaluate different disciplinary perspectives to gain a broader understanding; Develop ethical reasoning regarding environmental impact resulting from digital media ecology

COMM 480 Advertising and Emerging Media Capstone (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Advertising MS program
The MS Advertising and Emerging Media capstone project focuses on idea generation, research, and strategic planning. Students will choose between a data-driven research project or a production-focused advertising project, working closely with a supervisor to develop a comprehensive project proposal. For research-oriented projects, students will conduct a thorough literature review, identify research gaps, and formulate hypotheses or research questions. Those pursuing production projects will analyze market trends, extract consumer insights, and create a detailed creative brief for a real-world client. Both tracks emphasize critical thinking, strategic planning, and the development of a solid foundation for project execution. Through weekly meetings with supervisors and structured modules, students will refine their project concepts, ensuring they are well-prepared for the execution phase.
Outcomes:
Conduct comprehensive background research on a selected real-world client, understand the market challenge, and build a situational analysis; Formulate clear research questions, hypotheses, or creative briefs that guide the project's development; Develop a thorough project proposal, including objectives, methodologies, and expected outcomes; Demonstrate critical thinking in identifying research gaps or market opportunities; Apply ethical considerations in research design or advertising strategy development; Articulate complex ideas clearly in both written proposals and oral presentations

COMM 481 Project II (3 Credit Hours)
Building on the foundation laid in Phase 1, this course guides students through the execution, analysis, and presentation of their capstone projects. Students pursuing data-driven research will collect and analyze data, interpret findings, and prepare a comprehensive research paper. Those engaged in production projects will create tangible advertising materials based on their creative briefs, such as integrated campaigns, digital content, or other innovative advertising solutions. Both tracks emphasize practical application of skills, problem-solving, and the ability to adapt to challenges that arise during project execution. The course maintains a focus on weekly supervision meetings and structured modules to support students through data analysis or creative production, culminating in a final presentation of their completed projects. This phase prepares students to deliver high-quality, professional-grade work that demonstrates their readiness for advanced roles in the advertising industry or further academic pursuit.
Outcomes:
Execute the designed research methodology or creative strategy effectively; Analyze and interpret data or consumer insights to drive decision-making in research findings or creative execution; Create professional-quality deliverables, such as research papers or advertising materials, that meet industry or academic standards; Utilize technical skills relevant to their chosen project type, such as statistical analysis software or creative design tools; Manage a long-term project effectively, adhering to timelines and adapting to challenges as they arise; Demonstrate problem-solving skills in addressing unexpected challenges during project execution

COMM 491 Advertising/Public Relations Internship (3 Credit Hours)
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Restricted to students in the ADPR-BASD and GSCM-MS programs. Students must attend an internship orientation and submit application packet to instructor. If approved, student is enrolled in course.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 492 Multimedia Journalism Internship (3 Credit Hours)
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Restricted to students in the DMST-MC program.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 494 Film & Digital Media Internship (3 Credit Hours)
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting. Restricted to students in the DMST-MC program.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

COMM 498 Directed Study for Graduate Students (1-3 Credit Hours)
Students may sign up for a one to three credit hour course to work independently in the student's area of interest with a supervising faculty member whose expertise is in that area. Projects may include, but are not limited to: a reading course, where the student contracts to read and create an annotated bibliography of research materials, a writing course, where a student has developed a strong paper for a course and wants to refine it for possible conference presentation and/or publication. Restricted to students in the DMST-MC, ADPR-BASD, and GSCM-MS programs.

COMM 700 Certificate: Digital Media Ethics (0 Credit Hours)
Loyola's Center for Digital Ethics and Policy certificate course explores codes of ethics and ethical decision making, legal limits of online speech, strategies to spot and deal with fake content, intellectual property and user generated content, understanding privacy concerns, ethical issues with big data, the ethics of deception online, among other topics.
Outcomes:
Participants will be able to understand ethical issues that are most likely to come up in their particular professional contexts and be able to take this knowledge back to their organization to help guide policy and procedure

COMM 701 Organizational Leadership and Change Management (0 Credit Hours)
Loyola's School of Communication offers a new certificate course custom-tailored for managers who want to accelerate the pace of successful change in their organizations. This course combines online learning with a focused 3-day program at Loyola, plus personalized coaching afterward. Participants will be able to shape their learning around their organization's needs.
Outcomes:
This course will help managers who want to accelerate the pace of successful change in their organizations, leading change on the front lines and managers whose supervisors have identified them as emerging leaders

Advertising and Emerging Media (MS)

Advertising graduate students in the MS in Advertising and Emerging Media are required to study the history, design, distribution, ethical standards and research methods for communicating commercial messages to diverse, international audiences within a digital context. With a broad variety of elective choices, students are introduced to advertising theories and creative concepts through copywriting, design and directing for online, interactive and moving image commercial media work, and to courses with more in-depth work on the psychology of audiences, mobile advertising, social media distribution and digital analytics strategies.

The Advertising and Emerging Media (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Prior to Fall 2026, this program was named Digital Advertising (MS). Students completing those requirements should refer to our Archive Catalogs (p. 2662).

	Total Hours	**30**

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission

requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Demonstrate communication skills in advertising, such as strategic acumen, knowledge of research methods, creative insights, content design and creation that will include written and visual communication, and may include film and interactive digital production, including gaming.
- Develop integrated advertising campaigns that apply cutting-edge research methods and are informed by consumer behavior, data analytics, ethical considerations and the trending practices of AI.
- Collaborate and work as part of a diverse team skillfully managing conflicts and expressing viewpoints to help create and implement cohesive advertising campaigns.
- Think critically to evaluate data, assess strategies, and execute creative directions.
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community.
- Present a project of relevant work that demonstrates an impressive knowledge of the advertising business.
- Possess the competencies to work as a professional in an advertising role.

Digital Media and Storytelling (MComm)

Create a Personal and Rewarding Experience.

Loyola University's Master of Digital Media and Storytelling program is for makers. Makers of all forms of digital content who desire the tools to turn their ideas into compelling, marketable stories they can share with the world. The two-year program prepares professionals for a career in digital

media by teaching them the most important skills hiring managers need: How to write, shoot and edit powerful digital content.

One of the greatest strengths of our program is that students can shape their own experience. Prospective candidates should demonstrate an interest in digital media and/or storytelling in relation to:

- Journalism
- Advertising
- Public relations
- Documentary filmmaking

Digital Media and Storytelling Program Highlights

- Real-world curriculum equips students from diverse backgrounds with a broader, more in-depth skill set so that they can become productive members of communications teams in a variety of organizations.
- Create a digital portfolio in the heart of Chicago—Courses take place at Loyola's Water Tower Campus in Chicago, a world-class city that is recognized as a leading communications and business district.
- A capstone course that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public.
- Students can work with faculty to help determine the right career for them or how to become more marketable in their current area of employment.

The Digital Media and Storytelling (MComm) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Students who complete the graduate program in Digital Media and Storytelling will:

- Gain proficiency in using industry-standard cameras and sound equipment, including smartphone technology in video storytelling.
- Develop the ability to craft engaging and well-structured non-fiction narratives across multiple digital platforms.
- Analyze digital audience behavior and the legal, marketing and economic environment for finding ideal audiences and distributing digital content.
- Gain proficiency using the Adobe Creative Suite (Photoshop, AfterEffects, Illustrator, InDesign, etc.) and achieve proficiency in digital and print visual design.
- Create industry-standard content that integrates learning from all coursework and culminates into a capstone project suitable for a professional portfolio.
- Develop a mindful approach to ethical storytelling and the representation of diverse voices and perspectives. By understanding the impact of media, students create projects that reflect inclusivity and social responsibility.

Global Strategic Communication (MS)

Whether you're a recent graduate looking to jumpstart your communication career, a communicator who wants to build or advance their career on the global stage or a mid-career professional seeking expanded skills and digital fluency to move into communication management, the M.S. in Global Strategic Communication may be the perfect graduate program for you.

It's a professionally-focused, interdisciplinary, non-thesis program designed to prepare graduates for successful careers in public relations, advertising, digital and social media, corporate communication, content marketing and related fields. It accommodates busy working professionals with evening courses, online electives and full- and part-time options.

The Global Strategic Communication (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Digital Media and Storytelling (MComm) (p. 1303)

Curriculum

Degree Requirements

The program requires satisfactory completion of 30 credit hours (10 courses): eight required courses, including a capstone experience (24 credit hours); and two electives (6 credit hours). No thesis is required.

Besides the traditional Master's program, the Global Strategic Communication (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

All required courses during the fall and spring semesters are taught once a week from 7-9:30 p.m. at Loyola's Water Tower campus. In addition, one elective is offered online each summer.

A minimum cumulative GPA of 3.0 is required to remain in good standing in the program and to be eligible for graduation.

Code	Title	Hours
COMM 401	Foundations of Global Strategic Communication	3
COMM 403	Strategic Communication Research Methods	3

[2] Only after all Digital Media and Storytelling students have enrolled.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Traditional Master's Program

Course	Title	Hours
First Year		
Fall		
COMM 401	Foundations of Global Strategic Communication	3
COMM 403	Strategic Communication Research Methods	3
COMM 413	Writing for Strategic Communication	3
	Hours	**9**
Spring		
COMM 411	Strategic Communication Ethics and Law	3
COMM 421 or COMM 470	Global Strategic Communication Boot Camp Chicago or Special Topics in Advertising and Public Relations	3
COMM 431	Campaign for Social Impact	3
One course from List of Electives for GSC		3
	Hours	**12**
Second Year		
Fall		
COMM 426	Strategic Business Communication for Social Impact	3
COMM 441	Global Strategic Communication Capstone	3
One course from List of Electives for GSC		3
	Hours	**9**
	Total Hours	**30**

Accelerated Master's Pathway

Students can take up to 12 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Course	Title	Hours
Senior		
Fall		
COMM 401	Foundations of Global Strategic Communication	3
COMM 403	Strategic Communication Research Methods	3

Spring		
COMM 441	Global Strategic Communication Capstone	3
One course from List of Electives for GSC		3
	Hours	**6**
	Total Hours	**30**

Length of Program

Full- and part-time options are available. Full-time students take three courses in the fall and four in the spring with summer options, allowing them to complete the program one and a half years. Part-time students have up to three years to complete the program. The program is flexible – it's possible to switch between full- and part-time study.

Curriculum

The curriculum is designed to help recent graduates successfully launch careers in communication and to enable professional communicators to take their careers to the next level. Courses emphasize acquiring expert knowledge and up#to-date digital and analytical tools, developing a global perspective and honing skills – such as critical thinking, creativity, problem solving, writing, business literacy, leadership and entrepreneurship – needed for a competitive edge.

The program's touchstones include an emphasis on strategic planning, consideration of multiple stakeholders, cultural relevance and sensitivity, social justice, effective use of digital channels and ethical decision making. Courses teach a combination of practical skills and "big-picture" knowledge intended to help students develop into skilled strategists, capable organizational leaders and ethical communicators.

In addition, multicultural and multinational examples, cases and perspectives are integrated throughout the curriculum to help students build or enhance a global perspective. The program also offers opportunities for study and immersion in China and London.

These are some of the topics examined in the program:

- As our economy further globalizes, how do we understand new stakeholders and create culturally sensitive and relevant messages and campaigns to engage them?
- Many corporations are embracing "profit with purpose" and building alliances with nonprofits, as well as optimizing their operations for their communities, employees and suppliers. Strategic communication campaigns tell these compelling stories.
- The Internet knows no boundaries: YouTube has become the globe's jukebox, and people around the world participate in revolutions via SMS text and Twitter. The Internet has created a new category of earned media – one that presents new opportunities but must be negotiated carefully because everyone is potentially an influencer.
- Digital messages can be measured with unparalleled precision. We can now use big data and other unobtrusive tools to find insights, and

use web and social analytics to precisely measure the success of our communication programs.

Courses are taught by seasoned teachers and communication professionals who are digitally fluent and savvy in both media and business. Classes are small, personal and hands-on, include the Convergence Studio, state-of-the-art computer labs and exceptional infrastructure for learning and demonstrating digital communication skills.

Classes frequently partner with local nonprofits as pro bono clients, and students will have ample opportunities to do meaningful real-world projects. Whether it's developing a social media strategy or crafting an entire communication campaign, this work enriches student portfolios and enables students to shape and effectively express their personal brand.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Students who complete the graduate program in Global Strategic Communication will:

- Create and implement strategic communication campaigns that combine advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts.
- Develop strategic messages to engage with diverse stakeholders through multiple channels, including both traditional and digital media.
- Understand the digital marketing and analytic strategies and tactics for marketing, advertising and public relations practices.
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities.
- Practice ethical communication to create a social impact that both benefits the organization and the society
- Demonstrate the competencies to work as a professional in strategic communication management for social impact

Counseling Psychology (CPSY)

CPSY 420 Counseling Skills (3 Credit Hours)
This course provides an introduction to counseling skills as they apply to the helping professions.
Outcomes:
Students will be able to demonstrate clinical attending, observing, and responding behaviors in one-to-one counseling interviews

CPSY 421 Professional Issues Counseling (3 Credit Hours)
The course will provide students with an overview of the current ethical, legal, and professional issues in the practice of counseling. The course will use American Counseling Association's Codes of Ethics and Standards of Practice as a foundation for examining ethical decision making.
Outcomes:
Students will demonstrate knowledge about the ethical standards of the counseling profession and will develop the ability to apply the knowledge base of their discipline in an ethical and reflective manner

CPSY 423 Theory Counseling and Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Course equivalencies: X - CPSY 323 / 423
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 424 Career Development and Counseling (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Course equivalencies: X - CPSY 324 / 424
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed; major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 425 Assessment in Counseling (3 Credit Hours)
This course provides an introduction to the basic principles involved in using tests, inventories, observational procedures, and other forms of assessment in counseling.
Outcomes:
Students will be able to demonstrate an understanding of the conceptual underpinnings of reliability, validity, and the use of norms and score transformations and how these apply to the professional and ethical use of assessment information in counseling

CPSY 426 Group Counseling: Theory and Practice (3 Credit Hours)
Pre-requisites: CPSY 423
This course provides an overview of prevailing group counseling models and theories and their application to conducting group counseling in various settings.
Outcomes:
Students will be able to understand and integrate various properties of groups into a meaningful theoretical framework, and develop and demonstrate an understanding of group process through participation in a group experience

CPSY 427 Clinical Mental Health Counseling (3 Credit Hours)
The first purpose is to conduct an in-depth examination of Community Counseling as a helping profession. Specifically, we will examine (a) historical, philosophical, and social/political influences on contemporary community counseling practices, (b) professional organizations to which community counselors belong, the settings in which they practice, and the roles of community counselors in those settings, (c) credentialing and licensing for community counseling practice, and (d) knowledge bases critical to community counseling. The second purpose is to provide students with an opportunity to develop their skills at presenting to professional audiences. Thus, students will have an opportunity to develop in-depth knowledge on a substantive topic relevant to the work of community counselors and present their findings to the class.
Outcomes:
Students will know the history of the counseling profession and current issues involved in the professional practice of counseling

CPSY 428 Foundations of Professional School Counseling (3 Credit Hours)
This course is designed to introduce students to the philosophy of a comprehensive, developmental K-12 school-counseling program and to the national standards for school counseling. The emphasis will be on school counselors' roles and functions as defined by the American School Counselor Association.
Outcomes:
Participants in this course will be able to develop and implement a school counseling program according to the American School Counselors Association's National Standards and the Illinois Developmental Counseling Model

CPSY 431 Advanced School Counseling & Consultation (3 Credit Hours)
Pre-requisites: CPSY 428 Intro to School Counseling
This course introduces the attitudes, concepts, and skills of indirect service delivery through consultation. This course is designed to produce consultation and organizational development skills that will facilitate effective professional school counseling practice. Reflection on the practice of consultation is also developed, as well as competencies for practice within a multiculturally diverse society.
Outcomes:
Students will understanding of the school culture and organizational and contextual factors to the consultation/intervention process and understand the consultative process

CPSY 433 Multicultural Counseling (3 Credit Hours)
The course provides an overview of the experiences of various cultural groups with the United States, concerning issues of oppression, identity development, and acculturation, for instance. The course aims to develop multicultural competence by increasing students' awareness, knowledge, and skill base.
Course equivalencies: X - CPSY 332 / 433
Outcomes:
Students will increase their awareness of their own cultural background, biases, and world view; Students will increase their knowledge of the world view of culturally diverse clients; Students will begin to develop appropriate interventions strategies to work effectively with diverse populations

CPSY 435 Selected Topics in Counseling (3 Credit Hours)
This is an advanced seminar on selected topics in counseling. Topics vary, but typically have included the following: school counseling, community counseling, psychology of oppression, prevention and outreach, and supervision.
Outcomes:
Outcomes vary with topic

CPSY 437 Addiction Counseling (3 Credit Hours)
This course is designed to provide an introduction to the fundamentals of addiction counseling. This course will supply students with the requisite knowledge relevant in this area.
Outcomes:
Students will demonstrate knowledge of the etiology and diagnosis of substance abuse problems and their treatment from major theoretical perspectives

CPSY 440 Practicum (3 Credit Hours)
Pre-requisites: Consent of Instructor
This course is a supervised experience in counseling taken for two semesters by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the ACA ethical standards of conduct, and participate in other professional roles required in their field placement

CPSY 441 Internship (3 Credit Hours)
This course is a supervised experience in counseling taken in a two semester sequence with CPSY 440 by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, and understand the APA code of ethics

CPSY 442 Doctoral Practicum (3 Credit Hours)
Pre-requisites: CPSY 441 and consent of instructor
This is an advanced doctoral-level supervised experience for counseling psychology students and is a continuation of CPSY 441.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the APA code of ethics, and participate in other professional roles related to the doctoral-level practice of counseling psychology

CPSY 443 Clerkship (1 Credit Hour)
Pre-requisites: CPSY 441 and 442
This is an elective supervised clinical experience in assessment or psychotherapy for doctoral students in counseling psychology. A field placement is required and all supervision is provided on site by a qualified supervisor employed by the agency in which the field work is taking place.
Outcomes:
Varies with goals of student and agreement with field site

CPSY 444 Family Therapy I (3 Credit Hours)
This course is designed to introduce students to foundational approaches and theories of family therapy.
Outcomes:
Students will be able to apply foundational theories and their corresponding interventions to clinical problems in a family context

CPSY 445 Family Therapy II (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 446 Marital/Couples Therapy (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 450 Research Methods in Counseling Psychology (3 Credit Hours)
The course is structured so that major quantitative research methods can be grasped by the student so that they can critically read and evaluate the professional literature and design their own study. The primary goal is for students to understand the fundamental ideas (i.e., big pictures of research methods) involved in each analytic tool and to be able to choose appropriate analyses for their research question. Added training/exercises might be needed for students to be able to apply analytic tools in a technically appropriate manner (i.e., technical procedures of research methods) but the focus of this course is to help students develop a strategic sense of research methods, based on which students can absorb detailed tactical procedures of research methods later.

CPSY 454 Human Development: Cognitive, Aff & Phys Bases (3 Credit Hours)
Restricted to Graduate Students. This course is a graduate-level survey of human development across the lifespan.
Course equivalencies: CPSY 454/454
Outcomes:
To build the students' foundational knowledge of lifespan developmental theories and research and to critically examine the extent to which cultural variation is included and/or excluded from developmental theories

CPSY 458 Adolescent Development and Counseling (3 Credit Hours)
Pre-requisites: CPSY 454
This course provides in-depth study of psychological theories and research relevant to adolescent development.
Outcomes:
Students will be able to apply relevant theories to promote well-being and academic success in adolescents and prevent psychological and academic problems

CPSY 461 Neuropsychology (3 Credit Hours)
This course is a survey of neuroanatomy and brain-behavior relationships.
Outcomes:
Students will be able to demonstrate knowledge of neuroanatomy and brain-behavior relationships

CPSY 482 Personality and Intellectual Assessment (3 Credit Hours)
This is a course in which students acquire basic proficiency in the administration and interpretation of objective and projective personality tests.
Course equivalencies: X-CIEP482/CPSY482
Outcomes:
Students will demonstrate skills with the administration, interpretation, and presentation of personality assessment results

CPSY 498 Independent Study (1-3 Credit Hours)
Topics chosen for individual study. Must be approved by an instructor and department chairperson.

CPSY 499 Independent Research (1-3 Credit Hours)
Research projects selected by the individual student, with the approval of the research supervisor and the department chairperson.
Outcomes:
Outcomes are chosen between the instructor and the student during the semester the student takes the course

CPSY 527 Prevention, Advocacy, and Outreach: Community-Based (3 Credit Hours)
This course will introduce students to the fundamentals of prevention, advocacy, and outreach work, components of a community counseling model. The course will integrate theory, practice, and evaluation research in its methods and will involve designing and implementing an actual community-based intervention program. A critical component of this course will be learning about the nuances of developing relationships with community systems.
Outcomes:
Students will be able to think critically about the conceptual and theoretical philosophies that underlie prevention practice and will be able to develop preventative interventions for use in school and community contexts

CPSY 528 Clinical Appraisal and Treatment Planning (3 Credit Hours)
This course focuses on developing intake interviewing skills, writing intake reports, conducting diagnoses, and developing treatment plans. Interviewing styles including social history interviews, mental status examinations, and behavioral interviews are explored.
Outcomes:
Students will be able to demonstrate the ability to collect useful information from clients through diagnostic interviews and mental status examinations, assign diagnoses, write treatment plans, and formulate treatment recommendations

CPSY 529 Psychology of Immigration (3 Credit Hours)
This course will cover such topics as the current status of U.S. immigrants, major theories and literature on immigration and acculturation, ethnic identity, social relationship issues, language issues, immigrant family issues, migratory loss, general and special topics for Latino/a immigrants, general and special topics for Asian immigrants, and special populations.
Outcomes:
1) develop skills, competencies, and points of view; 2) learn to analyze and critically evaluate ideas, arguments, and points of view; 3) acquire an interest in learning more by seeking answers

CPSY 530 Research Seminar in Counseling Psychology (3 Credit Hours)
Pre-requisites: consent of instructor
This doctoral seminar provides in depth coverage of important methodological issues involved in conducting research in counseling psychology and provides the student to develop a research proposal.
Outcomes:
Students will be able to demonstrate knowledge of methodological issues involved in conducting research in counseling psychology, including understanding and controlling threats to validity, understanding the limits of null hypothesis significance testing and the importance of effect size estimates to the interpretation of the results of individual experiments and to the accumulation of evidence across experiments; Students will also demonstrate the ability to translate a research interest into a researchable question and design a study to address the question

CPSY 531 Ethical and Legal Issues in Counseling Psychology (3 Credit Hours)
The course uses the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct as a framework, to examine representative ethical, professional and legal issues commonly encountered in the exercise of our professional responsibilities as clinicians, teachers, supervisors, and researchers.
Outcomes:
Students will be able to demonstrate knowledge about the contemporary ethical, professional and legal issues relevant to the practice of professional psychology and will be able think critically about ethical dilemmas to make ethical decisions,

CPSY 532 Advanced Theories in Psychotherapy (3 Credit Hours)
This is an advanced course in reading, understanding, and applying theories of counseling and psychotherapy. It was designed to stimulate multiple aspects of learning experiences: introduction to contemporary theories, review of empirical evidence, session role-play, and development of theoretical orientation. Through the course, students are expected to synthesize theoretical, empirical, practical, and personal information about change to further formulate their theoretical orientation. Therefore, this course has two learning goals, including: (1) gaining knowledge of counseling theories, and (2) learning to apply knowledge and experiences to formulate personal theoretical orientation.

CPSY 533 Proseminar (0 Credit Hours)
CIEP 533 is a seminar class intended to provide supervision to first year School Psychology students enrolled in CIEP 477 for the Fall term. CIEP 533 focuses on the completion of a long-term academic case study and intervention within a 5-step problem solving framework. The case study requires candidates, working in teams, to complete all steps of a problem-solving process: Problem Identification; Problem Analysis; Plan Development; Plan Implementation and Monitoring; and Plan Evaluation. Candidates will collect individual student academic data, determine the nature and magnitude of a student's academic difficulty using appropriate comparison standards, develop an intervention plan, implement the plan, collect progress-monitoring and implementation fidelity data, evaluate the outcome of the intervention, and share the outcomes in written and oral formats.

CPSY 535 Seminar in Supervision & Consultation (3 Credit Hours)
Pre-requisites: permission of instructor
This seminar exposes students to theory and research on clinical supervision relevant to training mental health professionals.
Outcomes:
Students will be able to apply theoretical and research knowledge to conceptualize the development of clinicians-in-training and generate interventions to promote their growth

CPSY 536 Supervision Practicum (3 Credit Hours)
This course is an advanced graduate-level course in supervision practicum. You will be asked to apply your knowledge of supervision process, theory, and counselor development to your supervision of entry-level counseling professionals in a practicum setting.
Outcomes:
Students will demonstrate clinical supervisory skills based on appropriate theory and the ability to conceptualize counselor trainee development

CPSY 595 Thesis Supervision (1 Credit Hour)
To be registered for while working on an approved thesis project.

CPSY 600 Dissertation Supervision (1 Credit Hour)
To be registered for while working on an approved dissertation project.

CPSY 605 Master's Study (1 Credit Hour)
To be registered for while preparing a thesis proposal.

CPSY 610 Doctoral Study (1 Credit Hour)
This course can only be taken two times during a doctoral student's career while preparing a dissertation proposal. Restrict enrollment to CPSY PhD students and allow students to complete twice in a career.

CPSY 615 Internship: Counseling Psychology (1 Credit Hour)
Please consult the Counseling Psychology Graduate Program Handbook for the complete description of the internship.

CPSY 620 Dissertation Research (3 Credit Hours)
The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation or capstone research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421) or RMTD 406, CIEP 448, and RMTD 400 and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods. Students are well positioned to complete culminating project for doctoral candidacy upon completion of this course.

Education Leadership and Policy Studies (ELPS)

ELPS 400 Inquiry Into Educational Policy (3 Credit Hours)
No course description is available

ELPS 403 Qualitative Research Methods in Education (3 Credit Hours)
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Course equivalencies: RMTD405 / ELPS403
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

ELPS 404 Entrepreneurial Approaches to Catholic Education (3 Credit Hours)
Mark Casson in his book The Entrepreneurs: An Economic Theory, says that the theory of entrepreneurship rests upon the following definition: "An entrepreneur is someone who specializes in making judgmental decision about the coordination of scarce resources." This could also be the definition of a Catholic school leader! Catholic education is the largest non-public education system in America. But it is also half the size it was in 1960. To stay relevant and thriving, Catholic education must become more innovative and entrepreneurial. We will investigate the process by which innovations are designed and will critically assess the efficacy of a wide range of innovations. What leads to innovation and how is it scaled effectively? We will read and talk to educators, entrepreneurs, and policy makers about design innovations, and will critically assess the efficacy and scalability of a wide range of innovations targeting students, teachers, and schools.

ELPS 405 Introduction to Educational Policy Analysis (3 Credit Hours)
This course is an introduction to educational policy analysis that allow students to critically access the underlying assumptions and politics that guide particular policy choices and evaluate their design, implementation, and impacts.
Outcomes:
Students will demonstrate the ability to critically examine and conceptualize policies, design alternatives and argue persuasively for these alternatives while gaining fluency in the current policy debates

ELPS 406 Foundations Using Data for Continuous Improvement (3 Credit Hours)
This is the foundation course for data-based decision making within the principal preparation series. This graduate course provides skill sets to help future school leaders and administrators to access, interpret, and encourage the use of data to improve student educational outcomes. Restricted to graduate students in the School of Education. Students will learn how to organize, analyze, and synthesize data in order to interpret student and teacher assessment results.

ELPS 407 Leading for Data-based Decision Making (3 Credit Hours)
The primary purpose of this course is to provide candidates with the knowledge, skills, and dispositions necessary to assist school-aged students to accomplish educational outcomes. Restricted to graduate students in the School of Education.
Outcomes:
Candidates will examine data and the use of data in making decisions on several different levels

ELPS 408 Leading for Diversity (3 Credit Hours)
This course focuses on meeting the needs of children from diverse linguistic, cultural, and racial backgrounds within the context of a society faced with issues of poverty, discrimination, racism, and sexism. This course explores issues of second language and second culture acquisition and consider the relationship between identity construction and school success.

ELPS 409 Fundamentals of Instructional Coaching (3 Credit Hours)
The instructional coach provides instructional leadership by supporting evidence-based instructional practices with classroom teachers. This course focuses on developing the elements of instructional coaching: assessment for learning, delivery of effective curriculum, enhancing classroom instruction, and effective classroom management. In developing the role of the instructional coach, candidates will develop skill in building trusting relationships, facilitating support from administrators, and providing confidential, non-evaluative job-embedded professional development for faculty. Models of coaching will be explored as well as a focus on conferencing and facilitation skills.

ELPS 410 Sociology of Education (3 Credit Hours)
This course introduces students to the field of the sociology of education. It examines the societal role of education and the enactment of education using macro-historical, meso-institutional and micro-interactional perspectives, and exposes students to major theoretical traditions in the discipline.
Outcomes:
Knowledge of theories and empirical research that can guide critical evaluation of 1) conditions and problems in K-12 schools 2) ideas, arguments, and points of view regarding K-12 schools

ELPS 413 Critical Social Theories (3 Credit Hours)
This survey course examines the foundations, applications, and practice of critical social theories in U.S. education. Through rigorous texts, engaged discussion, and reflective assignments, this course aims to address the following central questions: What is theory and who gets to define that?; What is social theory?; What is critical about critical social theories?; How is theory pertinent to practical, everyday educational practices?; How can and does education contribute to either reinforcing or challenging relations of power and domination in the modern era?; and What is your relationship to critical social theory?
Outcomes:
This course has been designed to meet the following objectives: Students will: 1) Use prior knowledge to make real-word connections to critical social theories; 2) Understand and apply critical social theories to their personal and professional contexts; 3) Increase their reflexivity with regards to critical social issues; 4) Engage in aesthetic educational practices; 5) Embrace conflict as a necessary part of the learning process; 6) Examine the hidden curriculum of higher education through the application of critical social theories; 7) Explore with "play" as a necessary aspect of authentic learning; 8) Experience multimodal approaches to engaging the course content

ELPS 418 Writing Workshop in Rome, Italy (1 Credit Hour)
Immersed in the city of Rome for 14 days, students will use historical and cultural site visits to inspire their daily research and writing sessions. Students will engage in the exploration of our rich Jesuit tradition by studying a brief history of St. Ignatius and the city of Rome and by examining basic Jesuit ideals and principles while using their reflections to support their daily writing sessions. This course is a graduate level course for graduate thesis, comprehensive exams, capstones, and dissertation writers. Academic projects may be completed during this course. This course is a one-credit hour self-guided writing course. This course is open to LUC graduate students and visiting students, Alumni, and faculty who are currently engaged in professional and academic writing and research.
Outcomes:
Students will demonstrate sustained writing productivity by producing measurable progress on a substantive writing project through disciplined daily writing, rigorous critical reflection, ethical research practice, and iterative faculty-guided feedback within an immersive international learning environment; Writers will have completed at least 50 hours of dedicated writing during this workshop - dissertation, defense presentation, academic project, or work project

ELPS 419 Leadership in Higher Education (3 Credit Hours)
This course is designed to provide foundational grounding in leadership theory and research. Specific attention is paid to the evolution of leadership theory, interdisciplinary conceptualizations, administrative applications, pedagogy for teaching and learning, and the leadership development process of college students.
Outcomes:
Students will be able to describe various historical and contemporary perspectives on administrative leadership and their application in higher education, including the influence of gender and culture on leadership development

ELPS 420 Philosophy of Education (3 Credit Hours)
This course examines the philosophical questions embedded in teaching, learning, and schooling.
Outcomes:
Students acquire familiarity with the history of philosophic thinking about education and develop an ability to formulate valid arguments about the fundamental issues in teaching, learning, and schooling

ELPS 421 Theories of Knowledge and Education (3 Credit Hours)
This course examines theories of knowledge and their implications for educational practice from a philosophic.
Outcomes:
Students understand different philosophic explanations of learning and knowledge and acquire the ability to interpret educational practices according to these explanations

ELPS 422 Modern Theories of Education (3 Credit Hours)
An examination of modern theories of education from a series of philosophical perspectives.
Outcomes:
Students develop a critical understanding of modern theories of education

ELPS 423 Value Theory and Education (3 Credit Hours)
Using various value theories, the course examines the practices of teaching, learning, and schooling.
Outcomes:
The student acquires familiarity with theories of value and is able to use them in critically examining the practices of teaching, learning, and schooling

ELPS 424 Jesus the Teacher: A Theology of Education (3 Credit Hours)
The course develops a theology of education based on the account of Jesus provided in the New Testament.
Outcomes:
The student is able to interpret the task of education in light of the life of Jesus

ELPS 425 Foundations in Student Affairs (3 Credit Hours)
This course provides an introduction to the college student affairs profession. Special attention is focused on historical and philosophical foundations, organizational structures, professional roles, functions, and services, and challenges, opportunities, and issues faced by professional staff.
Outcomes:
Students will be able to describe factors contributing to America's diverse system of higher education and its impact on the design and delivery of student affairs programs and services

ELPS 426 Student Affairs Administration Higher Education (3 Credit Hours)
No course description is available

ELPS 427 Foundations in Higher Education (3 Credit Hours)
The purpose of this new course is to provide a comprehensive examination of the foundations of higher education in the United States.
Outcomes:
This course is designed to help students critically engage with central features of higher education institutions, policies, and constituents; Of special interest is the evolution of policies, ideologies and practices that have a direct impact on social justice concerns

ELPS 428 The Junior and Community College (3 Credit Hours)
This course introduces the two-year college and its role in American higher education, including a focus on historical origins, characteristics of students and faculty, curriculum development, governance and collective bargaining, and contemporary issues.
Outcomes:
Students will be able to describe factors influencing the development of the two-year college within the broader system of higher education in the United States, and understand the special role that the two-year institution serves in American society

ELPS 429 Selected Topics in Higher Education (3 Credit Hours)
This course will discuss special topics in higher education policy and practice.
Outcomes:
Students will be able to identify, review and critically analyze significant higher education policy and practice issues

ELPS 430 Curriculum and Pedagogy in Higher Education (3 Credit Hours)
This course examines the notion of curriculum. This course will allow you to consider the following central questions: What are curriculum and pedagogy?; What has curriculum and pedagogy looked like in your schooling experiences?; What roles do curriculum and pedagogy play in the context of higher education & student affairs?; What are the explicit and implicit curricula of higher education & student affairs?; How is higher education & student affairs curriculum created, by whom, and for what purpose?; What is your own understanding and experiences with curriculum and pedagogy in your own life?
Outcomes:
This course aims to model effective curricular design course activities, assignments, readings, and relationships; While the explicit nature of such items is critical, the implicit framings of this course should prove even more impactful

ELPS 431 Evaluation in Higher Education (3 Credit Hours)
This course examines evaluation and assessment philosophy, approaches, models, and practice in higher education with focus on institutional accountability and assurance of quality programs.
Outcomes:
Students will gain an appreciation for the importance of evaluation and assessment of educational programs in higher education and understand strategies employed by institutions to achieve their goals and objectives; Students will also gain an understanding of the range of quantitative and qualitative tools available to measure student learning and developmental outcomes

ELPS 432 Multiculturalism for Social Justice in Higher Education (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course provides an introduction to theory and research related to multiculturalism and social justice. Learning is targeted at increasing students' multicultural awareness, knowledge, and skills in the context of higher education practice.
Outcomes:
Understand social justice conceptual foundations and the various ways in which oppression influences individuals, institutions, and the broader society

ELPS 433 Student Development in Higher Education (3 Credit Hours)
This course introduces cognitive and psychosocial research and theory focused on the maturation and development of traditional aged college students, particularly in the domains of identity, cognition, and moral reasoning.
Outcomes:
Students will demonstrate an understanding of key theories of college student development and their application in improving plans and policies implemented in the context of administration and/or teaching

ELPS 434 American College Student (3 Credit Hours)
This course explores who goes to college, and the affects of cultural background and campus environments on college student experiences.
Outcomes:
Students will be able to explain how campus environments influence student learning and identity including analyzing the experiences of different students and student groups using anthropological and sociological constructs

ELPS 435 Enrollment Management in Higher Education (3 Credit Hours)
This course examines research and theory focusing on student demand for higher education, college choice, recruitment and marketing, public aid policy, retention and student success, and best practices related to enrollment management.
Outcomes:
Students will demonstrate factors influencing both demand for higher education and student choice of institutions, with focus on the role of public financial aid policy in access and choice

ELPS 436 Women in Higher Education (3 Credit Hours)
This course explores issues unique to women as academic leaders and administrators in higher education. It examines the history and challenges that women have faced as students in higher education institutions, exploring the factors that have affected their participation, matriculation, and completion of programs, over time and today. Last, this course will explore gender and expanding issues around identification and sexual orientation, as related to institutional inclusiveness and student supportive services.

ELPS 437 Today's Community College Students (1 Credit Hour)
No course description is available

ELPS 438 Designing Effective Community College Courses (1 Credit Hour)
No course description is available

ELPS 439 Assessing Student Learning in Community Colleges (1 Credit Hour)
No course description is available

ELPS 440 Community College Students as Learners (1 Credit Hour)
No course description is available

ELPS 441 Community College Teaching (3 Credit Hours)
This course examines the curriculum and programs offered within community colleges and the instructional philosophies and strategies used to encourage student success. It will examine the heterogenous population of students who attend these institutions and their learning needs and preferences. The course will also require students to understand the curricular issues faced in today's colleges including elimination of developmental education, use of early college courses, articulation agreements and expanding offerings to include topics germane to diverse students.

ELPS 442 Humanistic Foundations of Education (3 Credit Hours)
No course description is available

ELPS 443 Educational Classics (3 Credit Hours)
Analysis of selected works of major importance in the development of educational theory.
Outcomes:
Student acquires an advanced understanding of the thinking of some persons who have made a major contribution to educational theory

ELPS 444 American Schooling and Social Policy: A Historical Perspective (3 Credit Hours)
A historical analysis of the economic, political, cultural, and social factors that helped to shape educational policy and schooling in the United States.
Outcomes:
Students will be able to demonstrate a historical understanding of the development of educational policy and schooling institutions and demonstrate a knowledge of the historiographic approaches and debates in the history of education

ELPS 448 International Higher Education (3 Credit Hours)
This course introduces students to the higher education systems of countries around the world, placing a particular emphasis on how each system is confronting the challenges of globalization.
Outcomes:
Students will understand how IHE's respond to challenges of internationalization, massification, scholar & student exchange, access challenges, accountability demands, was well as international trade agreements on the exchange of educational goods & services

ELPS 450 Finding Jesuit Jesus:Preparing Prof Life-Live Sprtual Exercise St. Ignatius (3 Credit Hours)
An adapted version of the Spiritual Exercises of St. Ignatius of Loyola, founder of the Jesuits, this 14-day course in Rome, Italy @JFRC provides students the structured time and study to reflect more deeply on faith, the power of God's love and relationships with others as they frame their professional life design. Time for personal prayer, reflection, liturgies, thematic walks and talks are embedded in this course and all of which will help assist students in their faith journey and as they discern, plan and prepare for a professional life. The course intends to advance opportunity for student exploration and understanding of Jesuit history, values and principles - what does it mean to walk, live, discern and work, as people of Ignatius regardless of faith origin. This course is an invitation to imagine and to plan to live a life of service regardless of profession or career choice.
Course equivalencies: ELPS 350/ELPS 450
Outcomes:
To further student understanding of diversity of ideas and beliefs in the world; To enhance student knowledge of concepts and designs of social justice while exploring the ancient history of Rome; To better understand Ignatian spirituality and faith in action in our global and diverse world; To engage in service learning to better understand the plight of refugees around the world and expand student knowledge in the service of humanity through learning, discerning and faith; To advance opportunity for student discernment and understanding of personal and professional vocation; what does it mean to walk, and work as people of and with Ignatius - regardless of faith origin

ELPS 453 Legal Aspects of American Higher Education (3 Credit Hours)
This course examines complex sources of law that impact higher education with a special focus on the student-institution and faculty-institution legal relationship.
Outcomes:
Students will demonstrate a heightened awareness of the key role that the law serves in its relationship with higher education administration and policy; Students will critically evaluate and implement preventative legal strategies on the campus and understand the ethical and social justice implications of such work

ELPS 454 Budgeting and Finance in Higher Education (3 Credit Hours)
This course examines finance-related issues and trends in higher education and reviews budgeting techniques used by colleges and universities.
Outcomes:
Students will demonstrate skills in analyzing higher education financial statements and other fiscal documents, and understand current patterns of higher education finance and their strengths and limitations

ELPS 455 Comparative Education (3 Credit Hours)
The application of historiographic and social scientific theories and methods to understanding international issues of education.
Outcomes:
Students will demonstrate a sound grasp of the field's major issues and perspectives, the nature of comparativist research, and the work of major figures

ELPS 456 Education & Democratization (3 Credit Hours)
This course will explore some of the conceptual underpinnings of democracy as they relate to contemporary education policy. Texts read include books by Richard Rorty, John Dewey, Cornell West Claudia Rankine and other contemporary writers who work on democracy and education. Themes to be addressed include citizenship education, identity politics, hyper-partisanship, and new nationalisms.

ELPS 457 Comparative Theory (3 Credit Hours)
Pre-requisites: ELPS 455 or consent of instructor
A course in the philosophy and sociology of comparative education knowledge.
Outcomes:
Students will demonstrate a sound grasp of the field's major epistemological issues and a sense of how their own work and that of others fit into the theoretical landscape of comparative education

ELPS 458 International Education (3 Credit Hours)
This Advanced Seminar, which is both theoretical and applied, introduces students to issues and institutions involved in international educational development. This course will provide students with a deep understanding of the changing role of educational development projects in light of the post-2015 development agenda, post-financial crisis and global recession, post-Ebola epidemic, and post-Arabic Spring periods. Students will spend time exploring and understanding how these many `post-contexts and settings¿ are changing the nature of development and the educational responses that are now coordinated across different scales and spaces (national, regional, and global levels). With the aid of class readings and paying particular attention to endogenous and exogenous challenges that Africa and the Middle East confront, discussions will be framed through a comparative and international educational perspective that exposes students to how different theories of education and development influence policy, priorities, and programs of international, national, and local institutions in these regions.

ELPS 459 Organization & Governance in Higher Education (3 Credit Hours)
This course examines the organizational and governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 460 School Administration (3 Credit Hours)
This course serves as an introduction to the administration and governance of American public schools. The course provides an overview of educational administration and the systemic forces that impact upon its functioning.
Outcomes:
Students will be able to apply a systems model approach to school leadership; Students will be able to articulate how to transform school inputs into successful school outputs that build positive will and capacity in order to accomplish the school's vision and mission

ELPS 461 Issues in School Law (3 Credit Hours)
An in-depth examination of current legal issues and their educational implications for district leaders. Emphasis is given to legal issues in personnel practices and district-wide compliance with state and federal laws and regulations. State standards affecting school administration are also examined.
Outcomes:
Students will become familiar with and be able to address school law decisions within the context of school leadership; Students will be able to lead district-wide compliance with state and federal laws and regulations

ELPS 462 The Principalship (3 Credit Hours)
Study of the leadership and administrative responsibilities of elementary and secondary school principals. Topics include: creating a learning community, team-building, school improvement planning, budgeting, staffing, scheduling, and ethical and operational issues in decision-making.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to the ethical and operational issues in decision-making inherent in the leadership role of the school principal as they pertain to various leadership tasks

ELPS 463 School Leadership and the Law (3 Credit Hours)
Provides prospective administrators with an overview of the legal system as it impacts school operations. Intended as a first course in school law, topics include: constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations, and implications for administrative practice.
Outcomes:
Students will be able to demonstrate understanding of an overview of the legal system as it impacts school operations including constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations from the lens of the educational leader

ELPS 464 Workshop: Superintendency (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences in District Leadership offices. This course provides students with the opportunity to develop skills, understandings, and dispositions required of a superintendent - collaborating with boards of education, citizens of the community, and other relevant stakeholders. Restricted to LUC Graduate students.
Outcomes:
Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate and engage in activities that utilize data gathering techniques and analysis to inform programmatic decisions; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs; Understand and can monitor and evaluate district management and operational systems

ELPS 465 Workshop (Variable Topics) (3 Credit Hours)
These workshops focus on specific areas of educational leadership, such as: Instructional Leadership, Equity and Justice, Collective Bargaining, Research in Educational Leadership, Cultural Context for Informed Decision Making, and The Superintendency.
Course equivalencies: X- CIEP 473/ ELPS 465
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the relevant workshop area

ELPS 466 School Finance and Budgeting (3 Credit Hours)
Study of the processes by which financial decisions are made by local school districts, with special emphasis on the roles of building and district administrators in the budgeting process. Included are the techniques of constructing and managing the budget, while addressing issues of need and equity in the school community. Also covered are the sources of school revenues and an introduction to the process and principles of facility planning. This course is intended as a first course in school finance.
Outcomes:
Students will be able to demonstrate understanding of and competencies pertinent to the school leader's role in building, maintaining, and managing the school budget while addressing issues of need and equity

ELPS 467 School Law & Government (3 Credit Hours)
The legal basis of public education in the United States, with special reference to Illinois major court decisions and statutes are reviewed through the lens of the district-wide leader. Due process, special education, multi-cultural differences, school board relations and other related legal matters will be examined through the role of the superintendent. This course is intended as a second course for a law minor.
Outcomes:
Students will be able to demonstrate an understanding of due process, special education, multi-cultural differences, school board relations and other related school legal matters through the lens of the superintendent

ELPS 468 Problems in Finance and Business Management (3 Credit Hours)
Examination of the social justice issues inherent in developing and evaluating state and local school finance policy, including equity, adequacy, the social and ethical issues associated with allocating resources and relating school costs to achievement. Selected problems of school district financial management are studied, including central office organization, financial management and control, securing and accounting for grant funds, debt financing, insurance and support services management. This course covers topics especially pertinent to district administrators and superintendents.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to district level leadership in financial management, control, and allocation through the lens of social justice issues

ELPS 469 Human Resources in Educational Organizations (3 Credit Hours)
This course explores various facets of human resource administration in educational organizations. Topics covered include organizational equity in strategic planning and compensation, employment justice in recruitment, selection, staff development, performance appraisal, discipline, and an introduction to unionism.
Outcomes:
Students will be able to create a strategic plan from recruitment through continual employment for both certified and classified personnel that supports the school's mission and promotes educational excellence for all

ELPS 470 School Supervision (3 Credit Hours)
This course is designed to examine school formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Students will be able to demonstrate understanding of the nature of teaching and learning, develop the skills for conducting the pre-conference, classroom observation, and post-conference of the clinical supervision model, and develop the capacity to facilitate action research, study teams and cooperative supervision

ELPS 471 MTSS for Instructional Leaders (3 Credit Hours)
The purpose of this course is to provide candidates with the skills to (a) identify and assess the universal level of academic and behavior programming (b) create and sustain secondary and tertiary systems of support (targeted group or individual interventions) (c) develop continuous improvement plans to support the development of the necessary MTSS systems, practices, and processes.

ELPS 472 Administration of Special Education and Pupil Services (3 Credit Hours)
An exploration of legal provisions governing the most current legal issues related to special education and No Child Left Behind, including state rules, regulations and case law. Also examined are the practical issues, such as administering fiscally and ethically responsible service delivery models at the local level. Leadership dimensions necessary to enhance the learning process in an inclusive setting are a special concern.
Outcomes:
Students will be able to demonstrate an understanding of legal provisions of special education and No Child Left Behind, as well as the practical issues, such as administering fiscally and ethically responsible inclusive service delivery models at the local school building level

ELPS 473 Problems in School Supervision (3 Credit Hours)
This course focuses on the critical skills of leading supervision for school leaders within districts and schools. Upon completion of this course, candidates will practice supervision and evaluative skills related to the delivery of curriculum and student outcomes.

ELPS 474 Curriculum Development for Instructional Leaders (3 Credit Hours)
This course focuses on the critical skills of leading curriculum development within schools. Upon completion of this course, candidates will practice leadership skills related to the delivery of curriculum.

ELPS 475 Human Resource Administration for the School District Leader (3 Credit Hours)
Within this course, students explore various facets of human resource administration in educational organizations at the district/macro level. Human resource leadership, as it specifically relates to promoting district vision and mission, will be researched and simulated to develop preferred professional practice that promotes integrity and social justice for the entire educational community.
Outcomes:
Students will demonstrate an understanding of: strategic planning, human resources' system auditing, supervision and evaluation of educational administrators, unions, and collective bargaining

ELPS 476 Technology in School Administration (3 Credit Hours)
A laboratory-based course on the issues and uses of technology and the related skills of applying technology to problem solving in school administration. This includes design of information systems, networks and data bases, software selection and use, instruction, student testing and program evaluation, scheduling, communications and managing school support services. This course includes examining issues with an emphasis on data based decision-making.
Outcomes:
Students will be able to examine school leadership issues through the use of technology in order to make data-driven decisions

ELPS 480 Residency Seminar for MEd Administration & Supervision (0-3 Credit Hours)
This course is part of a sequence of courses for students in the Master's Principal Preparation Program. Restricted to students in M.Ed. Administration and Supervision. Students will meet with their assigned university coach to make progress in completing the electronic onboarding plan.

ELPS 481 Mission Driven Leadership for Principals (3 Credit Hours)
This course will provide the basis for making sound theoretical, ethical, and practical administrative decisions with particular attention given to data-driven decision making to improve student outcomes.
Outcomes:
Candidates will gain an understanding of various leadership theories, adult learning theory and professional practice, and applying leadership theory to improve student outcomes

ELPS 482 School Supervision for Principals (3 Credit Hours)
This course is designed to examine the broad concept of supervision as well as formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions for supervision of teaching that supports the ongoing growth and professional learning of teachers, leading to improved student outcomes for every student

ELPS 483 Human and Fiscal Resource for Principals (3 Credit Hours)
This course explores various facet of human and fiscal resource management in educational organizations through theory and practical application.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to take a strategic approach to resource management in educational organizations

ELPS 484 School Law, Policy Formation, and Community Involvement (3 Credit Hours)
This course covers school law and policy formation designed for candidates seeking to become building leaders in schools.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to understand school law and ethical decision making with particular attention given to building safety, current legal "hot topics," understanding the governance of the local school board and working with the various communities associated with a school

ELPS 485 Instructional Leadership: Equity and Justice (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences. Students study community engagement, board relations development, cultural and community context through the lens of district instructional leadership. Scope: Access, equity and ethical leadership. Restricted to LUC Graduate students.
Outcomes:
Develop appropriate procedures and relationships for working with local governing boards; Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs

ELPS 490 Introduction to Educational Policy Studies (3 Credit Hours)
This policy analysis course examines the general conceptual, ethical, and empirical issues related to educational policy-making at both the macro (national, regional, and state) and micro (local and institutional) levels.
Outcomes:
Students will be able to demonstrate a knowledge of educational policy analysis strategies

ELPS 491 Issues in Educational Policy (3 Credit Hours)
Analysis of selected case studies of important policy issues from various levels of education.
Outcomes:
Students will be able to identify, review, and critically analyze significant educational policy issues

ELPS 498 Independent Study (1-3 Credit Hours)
Pre-requisites: consent of instructor
No course description is available

ELPS 499 Directed Research (1-3 Credit Hours)
Pre-requisites: Consent of instructor
In-depth independent research developed jointly by the student and a faculty director. The topic should be one with which the student has some familiarity so that the research can be an examination of it in-depth.
Outcomes:
Learning outcomes are created individually for each Independent Study

ELPS 500 Seminar in Current Educational Literature (3 Credit Hours)
Overview of methods and techniques of bibliographic research related to students' research material.

ELPS 501 Leadership / Capacity Building Organizations (3 Credit Hours)
M.Ed. IEPE Cohort: Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy. Emphasis will be placed on organizational cultures and organizational learning. Restricted to IEPE Cohort.
Outcomes:
Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy; Emphasis will be placed on organizational cultures and organizational learning

ELPS 503 Critical Perspectives on the Internationalization of Higher Ed (3 Credit Hours)
In this course, students will examine the following question, "What does meaningful, socially responsible internationalization look like?" The course will expose students to a diversity of approaches to internationalization and to prepare them to make informed decisions about internationalization strategies that are 1) congruent with their institutions' mission, constituencies, resources, and values; 2) informed by best practices and empirical research; and 3) rooted in principles of equity and inclusiveness.
Outcomes:
Upon completion of this course, students will be able to articulate the different modalities of internationalization and the main geopolitical, societal, and economic forces shaping the internationalization of higher education worldwide; reflect on how these forces translate into concrete strategies, expectations, and challenges surrounding internationalization at the institutional level; critically analyze the impact that internationalization can have on students, faculty, and other institutional actors, especially in terms of perpetuating inequitable, discriminatory, and exclusionary societal structures; and integrate this knowledge into empirically-supported recommendations for internationalization strategic planning in real-world settings

ELPS 504 Advanced Financial Strategies in Higher Education (3 Credit Hours)
The purpose of this course is to build on a basic understanding of program budgeting to examine institutional financial strategies; state, and federal institutional funding; and public and financial aid polices that effect who has access to higher education. Apply higher education budget fundamentals to gain insight on institutional financial challenges. 2. Identify and assess the impact of the macro-dimensions of finance and how they inform campus level dynamics (e.g., budgeting, planning, equity) that complicate institutional financial decision-making
Outcomes:
Students should be able to demonstrate observable growth in their ability to: 1

ELPS 505 Seminar in Leadership Theory (3 Credit Hours)
This course is designed to provide grounding in leadership theory and research. Critical perspectives will be used to examine the evolution of leadership theory, interdisciplinary conceptualizations of the topic, administrative applications of theory, and pedagogy for teaching and learning about leadership.
Outcomes:
Students will be able apply critical perspectives to the deconstruction and reconstruction of leadership in professional practice

ELPS 506 Strategic Executive Leadership in Higher Education (3 Credit Hours)
This course examines strategic executive leadership in higher education and in particular leader role performance in complex organizational structures. This exploration is grounded in the rich, interdisciplinary body of knowledge on leadership theory and complemented by the infusion of critical perspectives.
Outcomes:
Students will be able apply and engage in executive leadership from a perspective grounded in social justice

ELPS 507 Advanced Governance in Higher Education (3 Credit Hours)
This course examines the governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 508 Equity and Justice in Higher Education (3 Credit Hours)
his workshop/course focuses on diversity, equity, inclusion, and justice in higher education, providing a learning environment for advanced discussions, as well as opportunities for EdD doctoral students to apply learning to practice.
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the area of diversity, equity, inclusion and justice in higher education

ELPS 509 Introduction to Analytics in Higher Education (3 Credit Hours)
This course is designed to help students leverage data sets and systems in applied ways to improve their leadership. The course will cover key education data portals (e.g., IPEDS, Census data, proprietary systems) as well as introduce students to different data visualization techniques (e.g., geospatial mapping, infographics, etc.). Students will produce reports or grant proposals relevant to their career trajectory as a key deliverable.
Outcomes:
After taking a class on data analytics, students should have acquired a range of technical and nontechnical skills, as it relates to higher education as well as gained an understanding of the key concepts and methods used in data analytics

ELPS 512 Sociology of Teaching (3 Credit Hours)
This course investigates the practice and profession of teaching of teaching from a sociological perspective. Empirical data and social theory will guide students' learning about the practice and profession of teaching and how different demographic, professional, organizational, and political factors shape them. Students will expand their factual knowledge about the historical and contemporary topics related to the sociology of teaching, and will develop their ability to investigate, analyze and communicate effectively about topics related to the practice and profession of teaching.

ELPS 514 The School as Organization (3 Credit Hours)
This course will expose students to organization theory and its application to understanding the operation, performance, and effectiveness of educational organizations.
Outcomes:
Students will become familiar with foundational literature in organization theory and organizational behavior, and will develop their ability to apply concepts from organization theory and organizational behavior to their analysis to educational organizations

ELPS 515 Seminar in Education Policy (3 Credit Hours)
This course is an advanced seminar that will focus on a specific education policy topic. Students will read in-depth on the course topic (reading both theoretical literature and case material) and will develop their understanding of texts and the topic through intensive seminar discussion. Student develops an advanced understanding of the seminar topic and knowledge of the research literature related to it.

ELPS 520 Seminar in the Philosophy of Education (3 Credit Hours)
An in-depth examination of a topic in educational theory.
Outcomes:
Student develops an advanced understanding of the ways in which an educational issue can be analyzed

ELPS 525 Practicum Higher Education I (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 526 Practicum Higher Education II (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 527 Higher Education Capstone (3 Credit Hours)
ELPS 527 will be offered in both Fall and Spring semesters for all Higher Ed students. This course is a culminating seminar course that facilitates broad conversations, audits and guidance about values discernment, job search process, critical considerations for job fit and placement -successful transition to Higher Ed job market and Higher Ed work communities.

ELPS 528 Internship Higher Education II (1-3 Credit Hours)
Required Internship Experience for graduate Higher Education programs.

ELPS 529 Seminar in Higher Education (3 Credit Hours)
Pre-requisites: consent of instructor
This course is a topical seminar, typically for doctoral students, addressing one or more historical and/or contemporary topics or issues within higher education.
Outcomes:
Students will demonstrate a deepened understanding of one or more topics or issues and the ability to critically analyze these topics/issues using research and theory

ELPS 530 Proseminar: Higher Education (3 Credit Hours)
This course is restricted to Higher Education Doctoral Students

ELPS 550 Seminar on Globalization and Education (3 Credit Hours)
This advanced comparative education seminar examines globalization (economic, social and cultural) both as something that has a profound impact on schooling and as something that education produces. The course will focus on how globalization can be productively theorized and studied by social scientists.
Outcomes:
Students in the course will understand and be able to critically evaluate the diverse range of approaches used by comparative and international education scholars to study education and globalization

ELPS 560 Seminar in School Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course provides specific practical recommendations for those leaders who seek to transform their schools into professional learning communities. Students will analyze their current organizational culture and core beliefs through the reframing process.
Outcomes:
Using Wiggins and McTighe (2005 backwards-design model, students will create a needs assessment to gather data on one of their current organization's core beliefs; From this data, students will create a school improvement plan for the change process to close the gaps between the current and desired reality of their organization

ELPS 561 Seminar in Current Issues in Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is intended to provide future and practicing administrators with a mindful framework for raising the questions to realize the moral/ethical dimensions that are currently at stake in our educational institutions with an emphasis on ethical dilemmas involving human resource administration.
Outcomes:
Using professional obligations as a framework for dialogue, students will examine the philosophies of utilitarianism, deontology and ethic of care as they pertain to human resource management in schools; Based on these three ethical lenses, students will create their own professional code of conduct and apply it to resolve multiple ethical dilemmas surrounding human resource management and leadership in schools

ELPS 562 Practicum School Administration (3 Credit Hours)
Pre-requisites: consent of program director and must be either the last course or next to last course of a student's program
Required of all students seeking administrative certification, i.e. Illinois Type 75 Principal or Superintendent. This course involves students in leadership activities to be carried out at a work site under the supervision of the university instructor and a cooperating administrator at the work site. Students must complete a minimum of 100 hours of approved leadership activities. Students are required to attend an orientation session during the semester prior to the semester in which they enroll in the practicum. Practicum is offered only in the fall and spring semesters.
Outcomes:
Students will be able to demonstrate competencies in a myriad of leadership and administrative areas relevant to the leadership role appropriate to the certification sought, the school principal or the school superintendent

ELPS 563 Administrative Internship (3-6 Credit Hours)
This course is designed as a supervised internship to provide aspiring teacher leader an on-the-job leadership experience in an elementary, middle, or secondary school. The on-site administrative mentor will have appropriate credentials and experiences for the level and department in which the internship is scheduled and experienced. The internship provides the opportunity for teacher leader candidates to relate knowledge and skills acquired through formal course work, readings, research, and simulations to actual teacher leadership experiences. The internship is both an active and a reflective experience designed to encourage the intern to examine the potential role of teacher leaders and functions of schooling and education in light of changing demographics, current local and national trends, and global issues.

ELPS 564 Education Policy Internship (3 Credit Hours)
Pre-requisites: ELPS 405 & ELPS 410
This course provides Cultural & Educational Policy Studies graduate students with an engaged learning opportunity that integrates coursework with professional practice in the context of education policy information, analysis, implementation and/or evaluation and research. Students develop and refine professional skills as well as identify and reinforce connections between graduate coursework and professional experiences.

ELPS 565 International Education Internship (3 Credit Hours)
Supervised experience with an international governmental or non-governmental agency approved by the Director or Associate Director of the Center for Comparative Education.
Outcomes:
Students will demonstrate working knowledge of an internationally oriented organization whose activities are related to their area of scholarship

ELPS 566 Principal Internship One (3 Credit Hours)
This is the first of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 567 Principal Internship Two (3 Credit Hours)
This is the second of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.

ELPS 568 Principal Internship Three (3 Credit Hours)
This is the third of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 569 Principal Internship Four (3 Credit Hours)
This is the fourth of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 570 Supervision Seminar (3 Credit Hours)
Provides students with an in-depth examination into a special topic. Topics vary by section. Course may be repeated.

ELPS 571 Seminar in Current Issues in School Supervision (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is designed to examine current issues in supervision and their impact on providing instructional leadership directed toward school improvement and reform.
Outcomes:
Students will be able to demonstrate a critical examination of issues in the differentiated model of supervision, develop the skills for developing collaboratively a learning organization that frames, analyzes, and resolves problems in instructional improvement, and develop the capacity to work with faculty and other stakeholders to identify needs for professional development, to organize, facilitate, and evaluate professional development, and to ensure that professional development activities focus on improving student outcomes

ELPS 580 Residency Seminar for Students in Educational Leadership (0-4 Credit Hours)
A seminar taken to address the interests and needs of students during Ed Leadership studies. The topics include preparation for the comprehensive examination, Writing Workshop, Internship planning and on-boarding, planning and writing the capstone or dissertation and other topics planned by the EDLD faculty.
Outcomes:
EDLD Students will be able to demonstrate understanding of the various seminar topics presented - internships, dissertation, comprehensive exams

ELPS 595 Thesis Supervision (1 Credit Hour)
This course is a Thesis Research and Writing course. Student is engaged in thesis writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and thesis student. Culminating project is Thesis and thesis defense. Completion of all forms required for thesis completion are the responsibility of SOE graduate student.

ELPS 600 Dissertation Supervision (1 Credit Hour)
This course is a Dissertation Research and Writing course. Student is engaged in dissertation writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and dissertation student. Culminating project is Dissertation and Dissertation defense. Completion of all forms required for Dissertation completion are the responsibility of SOE graduate student.

ELPS 601 Capstone Supervision (1 Credit Hour)
This course is to develop a Capstone project. Students are engaged in planning and writing of the capstone project; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and capstone student. Culminating project is the Capstone Project and Capstone defense. Completion of all forms required for Capstone completion are the responsibility of SOE graduate student.
Outcomes:
School of Education students will complete and defend their required capstone project for an EdD degree; Students will research, write and defend their capstone project under the supervision of a Capstone Chair and Capstone committee

ELPS 605 Master's Study (1 Credit Hour)
This is Master's study course designed for in-depth study, writing and research.

ELPS 610 Doctoral Study (1 Credit Hour)
Restricted to School of Education Doctoral students (PhD & EdD). This course can only be taken two times during a doctoral student's career.

ELPS 620 Dissertation Research (3 Credit Hours)
Conducting research is a complex, demanding, and time-consuming task. The instructor suggests that while one can be familiar with different paradigms of inquiry, one may not necessarily know how to actually undertake the task of planning and effectively proposing an investigation (Locke, et al, 1987). Others assert that what is important and might be challenging is to frame a valid problem and a specific purpose, in addition to ask the right questions which will give direction to relevant research activities (McEwan & McEwan, 2003). Given the challenge and complexity of designing proposals and conducting research activities, it is anticipated that doctoral students may benefit from additional learning experiences that may lead to the successful completion of their research projects (Ovando, 2010) including a support team to facilitate the task of planning a dissertation proposal. As others note, "Having access to a group of peers who are also engaged in the doctoral studies journey provides an excellent source of moral support. In addition, cohort members provide empathetic listening, share resources and offer honest and constructive feedback" (Ovando, Ramirez & Shefelbine, 2008, p. 45). In the spirit of the writing workshop (Calkins, 1986) and the professional learning community (Kanold, 2010), it is expected that all students will engage in literature searches, scholarly writing, and collaborative inquiry in a respectful and productive way in order to enhance their research capacity (conceptual, technical and interactive skills), attitudes and dispositions. Such engagement will lead to the development of a sound dissertation proposal, CITI research approval as a researcher, and to the preparation for the rigor of conducting investigations The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421), and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods.

ELPS 621 EdD Capstone Research (3 Credit Hours)
This course focuses on the application of research understandings, knowledge, concepts and terminology so this is an opportunity for students to incorporate research information, foundational knowledge and conceptual understanding of research methods. While the nature of the capstone project is more personal, this scholarly work is a culmination of student learning. 2) Learn, design, and write the initial chapters of their capstone project. 3) Provide meaningful feedback to their peers regarding specific areas of their capstone project development and writing. 4) Understand the importance of the capstone committee chairperson and other members of the committee.
Outcomes:
1) Enhance their research inquiry capacity and ability to critically analyze research proposals, research reports and reviews of literature

ELPS 661 Internship in School Business Management I (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional capacities related to ethical school business management. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

ELPS 662 Internship in School Business Management II (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional related to ethical school business management. This course completes the state's required two semesters of CSBO Internship. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

Research Methods (RMTD)

RMTD 400 Introduction to Research Methodology (3 Credit Hours)
This course provides an introduction to research methods used in education and the social sciences including qualitative and quantitative research designs.
Course equivalencies: RMTD400 / CIEP495
Outcomes:
Students will be able to critique the argument and methods used in a primary research study, to integrate in a written literature review the results of studies in order to present an argument, and to understand the ethical issues involved in research with human subjects

RMTD 403 Survey Research (3 Credit Hours)
This course provides an introduction to the design and analysis of survey research, and the psychological foundations of questionnaire design.
Course equivalencies: RMTD403 / CIEP494
Outcomes:
Students will be able to develop a survey or questionnaire, design a study using a survey or questionnaire, gather and record data from a survey or questionnaire, analyze the resulting data from a survey or questionnaire, and present and interpret the results in oral and written form

RMTD 404 Introduction to Educational Statistics (3 Credit Hours)
This graduate course provides an introduction to descriptive and inferential statistical methods used in education, psychology and the health professions.
Outcomes:
Students will be able to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to understand the assumptions and limitations of using statistical methods for analysis

RMTD 406 Educational Evaluation (3 Credit Hours)
The course will focus on the theories, models, strategies and practices that are germane to educational evaluation, including the history of evaluation studies in the social sciences, the various roles of the evaluator in the development and assessment of programs, evaluation theory and social policy.
Course equivalencies: RMTD406 / CIEP496
Outcomes:
Students will be able to state the purposes, benefits and importance of evaluation research, describe the history and culture associated with evaluation in the US, to read and critique a range of evaluation proposals and reports, to compare and contrast different approaches to evaluation, to develop a proposal for a program evaluation including writing measurable program objectives, planning data collection methods and presenting results to consumers

RMTD 407 Introduction to Evaluation Theory (3 Credit Hours)
This course introduces students to program evaluation theory in the social sciences, including various conceptualizations of evaluation, historical development of the field, purposes of evaluation, and social and political contexts of evaluation practice.
Outcomes:
Students will engage major theoretical concepts of the field - methods, use, values, and practice - from the perspectives of various evaluation theorists; Throughout course readings, discussion and assignments, students will have the opportunity to critically reflect on understandings of social justice, implicitly and explicitly, evident in the evaluation theories

RMTD 408 Evaluation and Evidence in Cross Cultural Contexts (3 Credit Hours)
M.Ed. IEPE Cohort: Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders. Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence. Enrollment Restrictions: M. ED. Online Cohort IEPE.
Outcomes:
This course focuses on the writing, presentation and publication dimensions of evaluative work; Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders; Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence

RMTD 410 Communicating Research Findings (3 Credit Hours)
This course will expose students to strategies for developing clear arguments in engaging, relevant, content-rich papers and presentations. This course will familiarize students with conventions of written research that improve acceptance and publication rates. It will also explore alternative forms of representing research findings.
Outcomes:
Students will have enhanced skills in communicating research findings to diverse audiences, both verbally and in writing

RMTD 411 Introduction to Human Performance Technology (3 Credit Hours)
This course introduces students to the models, practices and competencies associated with field of Human performance improvement.
Outcomes:
Students will be able to apply the practices associated with the roles of an HPT professional; Students will conduct an analysis of an organizational problem and plan an appropriate intervention and change management strategy

RMTD 412 Needs Assessment (3 Credit Hours)
In this course, students will learn the principles of needs assessment to improve programs and organizations. Needs assessments are a systematic set of procedures to identify within an organization a set of priorities to improve programs and/or organizations.
Outcomes:
Students will plan a needs assessment, develop data collection tools and conduct a practice assessment

RMTD 415 Practicum in Organizational Evaluation (3 Credit Hours)
This practicum course is intended to help candidates integrate theoretical and research coursework with the practice of organizational evaluation and to reflect on their own development as professionals in the service of social justice. The practicum project involves the planning, conducting and reporting results of an evaluation, human performance improvement, or needs assessment project.
Outcomes:
During the course of the practicum candidates are expected to complete a practicum project

RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Method (3 Credit Hours)
Pre-requisites: RMTD 400 or equivalent
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

RMTD 421 Educational Research II: Building a Body of Evidence Quantitative Method (3 Credit Hours)
This course introduces students to the theories, traditions and components of quantitative research in the social sciences, integrating basic design principles of quantitative research with commonly used statistical methods for analyzing data from these designs.
Outcomes:
Students will be able to recognize and discuss various epistemologies, designs, theories and ethical issues in quantitative research, to critique quantitative studies in terms of design, methodology, validity, statistical analysis, results, ethics and conclusions in oral and written critiques, to apply statistical methods to quantitative data using a statistical analysis computer program, to understand and discuss the theoretical basis and underlying assumptions of various statistical methods in the context of common quantitative study designs, and to analyze, interpret and present the findings of a data analysis

RMTD 422 Single Subject Design (3 Credit Hours)
Pre-requisites: RMTD 400
This course will introduce students to single-case experimental designs as they apply to research and practice in special education and other educational settings. Methods for single-case experiments are applicable to monitoring response to intervention as well as research on low-incidence conditions. Students will learn to critique single-subject experimental research studies and to design studies to monitor treatment interventions in educational settings.

RMTD 430 Psychological Measurement (3 Credit Hours)
This course introduces the assumptions underlying measurement in psychology and education including types of measurements, test development, and theoretical, quantitative and practical issues of reliability, validity and scoring.
Course equivalencies: RMTD430 / CPSY430
Outcomes:
Students will be able to critique studies of the development, reliability and validity of measurement instruments, and to design and plan a study of the reliability and validity of a measurement instrument

RMTD 432 Item Response Theory (3 Credit Hours)
No course description is available
Course equivalencies: RMTD432 / CPSY488

RMTD 440 Mixed Methods Research (3 Credit Hours)
Pre-requisites: RMTD 420 and RMTD 421; Enrollment is restricted to Graduate Education Students
The course addresses the theory and practice of mixing inquiry methodologies in educational and social inquiry. The course covers selected roots of the contemporary interest in mixing methods, various conceptualizations of mixed methods design and analysis, and challenges of mixed methods practice. Students will develop a historical understanding of mixed methods and various frameworks for mixed methods, as well as basic competencies in mixed methods practice.

RMTD 470 Case Study Research (3 Credit Hours)
Pre-requisites: RMTD 420
This course in an in-depth study of a qualitative research methodology: case study. This course allows students to carry out a case study, as well as engage issues common across qualitative research methodologies, such as the flexibility in research design, the ethical dimensions of qualitative research, and qualitative data analysis. Course content is applicable to research and evaluation contexts in education as well as other social and human service practices.

RMTD 481 Advanced Educational Statistics (3 Credit Hours)
This course covers statistical inference, hypothesis testing, estimation of power, factorial analysis of variance, multiple regression and selected non-parametric statistical techniques.
Course equivalencies: RMTD481 / CPSY490
Outcomes:
Students will be able to identify and justify the use of particular statistical techniques for a given research question, to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to critique the assumptions and limitations of statistical techniques in a given analysis

RMTD 482 Introduction to Linear Models (3 Credit Hours)
This course covers simple/multiple regression, one- and two- way analysis of variance (ANOVA) followed by multiple comparisons, and analysis of covariance (ANCOVA). Knowledge of basic algebra is required; knowledge of calculus is not required.
Course equivalencies: RMTD482 / CPSY493
Outcomes:
Students will be able to identify and justify the use of particular univariate statistical techniques for a given research question, to analyze quantitative data using SPSS, and to interpret the results of a statistical analysis in written and oral presentations

RMTD 483 Multivariate Statistics (3 Credit Hours)
Pre-requisites: RMTD 421 (B or Better)
This course covers multiple regression, multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), repeated MANOVA, discriminant analysis, canonical correlation and possibly principal components/factors analysis. Knowledge of basic algebra and univariate inferential statistical techniques is required; knowledge of calculus is not required.
Course equivalencies: RMTD483 / CPSY492
Outcomes:
This course equips students with knowledge and hands-on experience for conducting valid quantitative research focusing on multivariate statistics; Students will be able to identify and justify the use of particular multivariate statistical techniques for a given research question, to analyze multivariate data using SPSS, and to interpret and communicate the results of a statistical analysis in written and oral presentations

RMTD 484 Hierarchical Linear Models (3 Credit Hours)
This course examines the conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities) using methods for hierarchical linear models.
Course equivalencies: RMTD484 / CPSY491
Outcomes:
Students will be able to identify and justify the use of hierarchical linear models for a given research question, to analyze multilevel data using a statistical computing package, to interpret and communicate the results of a hierarchical linear model in written and oral presentations, and to critique the assumptions and limitations of the use of hierarchical linear models in a given analysis

RMTD 487 Factor Analysis (3 Credit Hours)
No course description is available

RMTD 488 Meta-Analysis (3 Credit Hours)
This course introduces statistical methods in the design and analysis of quantitative research syntheses.
Outcomes:
Students will be able to design and plan a small-scale research review, to locate and evaluate the studies for a review, to code and organize the studies for a review, to analyze the effect sizes from a review, and to produce a comprehensive written synthesis of the study results

RMTD 520 Research Seminar I (3 Credit Hours)
This course will provide doctoral students with an intro to their PhD/EdD program as well as an intro to the dissertation process. The course will focus on methods and processes involved in developing a prospectus and review of literature for a dissertation.
Outcomes:
Students will develop a plan of study for their degree as well as prospectus for their dissertation

RMTD 530 Seminar in Tests & Measurements (3 Credit Hours)
Educational and psychological tests are commonly used to measure latent traits (e.g., knowledge, aptitude, achievement, attitude, and personality), often with the goal of making inferences on individuals or groups of individuals. Item response theory (IRT) measurement models are useful tools in examining the quality of the data that arises from the administration of such tests, which in turn allows us to make judgements about the validity of the test scores (or latent trait estimates) and the quality of the tests (are the items confusing and/or are they biased). This course will introduce students to commonly used IRT models for analyzing dichotomous (e.g., 0=incorrect and 1=correct) and polytomous (0=never, 1=sometimes, 2=always) test data. While much of the course will be application oriented, some technical details that facilitate the understanding of the IRT and highlight the advantages of it over classical test theory (CTT) will be provided. Knowledge of basic algebra, linear modeling, and CTT is required.
Course equivalencies: RMTD530 / CPSY590

RMTD 580 Selected Topics (3 Credit Hours)
What is the role of qualitative critical research when the need for social justice has never been greater? (p. 1) ask Denzin and Lincoln (2017). In this course, we will begin by reviewing systems of inquiry within research in general explore as a basis for our deep dive into the importance of qualitative critical inquiry. We will focus on the meaning and discourses around critical qualitative research by exploring four methodologies: counter-storytelling, PhotoVoice, Youth Participatory Action Research, and Portraiture. Guest scholars who specialize in such methods will describe their purpose and process with qualitative critical research. Students will reflect on readings, write an article critique, and collaboratively present on a methodology and conceptual framework. Students will leave this course able to speak the language of qualitative research in new, robust, and meaningful ways coupled with a better understanding of who they are as researchers and the possibilities of social transformation through qualitative design.

RMTD 590 Seminar:Advanced Mixed Methods (3 Credit Hours)
Pre-requisites: RMTD 420, 421
This course explores the theory and practice of mixed methods research in program evaluation and applied social science research.
Course equivalencies: RMTD590 / CPSY580
Outcomes:
Students will become familiar with selected roots of the contemporary interest in mixed methods research and evaluation, as well as various approaches to mixing research paradigms, purposes, designs, analyses, methods, and so on; Students will develop knowledge for identifying and critiquing mixed method research; They will also be able to develop a mixed methods study

Community Counseling (MA)

As of Fall 2026, this program is no longer accepting applicants.

The MA in Counseling Psychology prepares students to help communities living with disparities in health and well-being, especially the under-served. Loyola's program is the place for you to commit to shifting this inequitable landscape.

Related Programs

Master's

- Community Counseling (MEd) (p. 1657)

Doctoral

- Counseling Psychology (PhD) (p. 1327)
- School Psychology (PhD) (p. 1334)

Curriculum

The Master of Arts in Counseling Psychology requires 48 semester hours of graduate study focused in two major areas: counseling core and a specialty area. The program includes 450 clock hours of practicum/internship experience for six semester hours of course credit. Students must also take and pass a comprehensive examination during their final semester of study.

Total Hours		**48**

Please note that PC and LCPC eligibility in Illinois requires CPSY 437 Addiction Counseling, CPSY 444 Family Therapy I, CPSY 528 Clinical Appraisal and Treatment Planning, and 700 hours of practicum/internship training.

1. Students are required to participate on a faculty member's research team for one semester. CPSY 499 Independent Research should be taken at that time and the student should register for his or her faculty mentor's section of CPSY 499 Independent Research. Voluntary (i.e., not for course credit) participation in research for more than one semester is recommended.
2. Practicum/Internship requires 450 hours of supervised experience in a setting relevant to community counseling practice.
3. General Elective can be another course selected from Research Elective list, or 3 semester hours from this list.

Comprehensive Assessment

A comprehensive proctored examination is required. Please see the School of Education Academic Calendar for comprehensive exam dates.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- By program completion, candidates will articulate and apply principles of social justice to critically reflect upon their own identities and emerging counseling practices as demonstrated by course-based assessments and observations of practice.
- By program completion, candidates will demonstrate counseling theory and counseling skills that enable them to appropriately serve diverse clients and diverse clinical concerns as demonstrated by course-based assessments and observations of practice.
- By program completion, candidates will learn to consume and develop culturally responsive research concepts and begin to articulate their own emerging research program as demonstrated by course-based assessments, and participation in faculty research programs.

Counseling Psychology (PhD)

Loyola's PhD in counseling psychology has been accredited by the American Psychologist Association (APA) since 1984. The mission of the PhD program in counseling psychology at Loyola University Chicago is to graduate scientist-practitioner-oriented health service psychologists who identify with the field of counseling psychology and who are committed to promoting social justice in all their professional activities.

- Community Counseling (MA) (p. 1325)

Doctoral

- School Psychology (PhD) (p. 1334)

Combined

- School Psychology (MEd/EdS) (p. 1896)

Curriculum

The PhD in Counseling Psychology requires 69 credit hours of coursework beyond a master's degree, written and oral comprehensive examinations, a culminating portfolio and a dissertation with oral defense. Students develop an area of research expertise by engaging in research with faculty throughout their doctoral study. A 2,000 hour pre-doctoral internship is also required.

For more information about the following items, please refer to the Counseling Student Handbook 2024 (https://catalog.luc.edu/graduate-professional/graduate-school/education/counseling-psychology-phd/2023CPSYDOCTORALHANDBOOK.pdf)-2025 (https://acrobat.adobe.com/link/review/?uri=urn:aaid:scds:US:ce7389bd-a3b7-3a9f-8cd3-f07993bc594d).

[1] Repeatable

Practicum

The Chicagoland area provides a wealth of clinical training opportunities for doctoral students in counseling psychology. Approximately half of our students seek training in university counseling centers in the city and suburbs, while the other half receives their clinical and diagnostic training in hospitals and community mental health centers. Students receive a generalist training, but through site selection can begin to acquire population-specific competencies in working with children, adolescents, families, veterans, gay/lesbian/bisexual clients, and other groups of individuals. Many of the practicum sites also contain APA-approved internship programs where trainees are provided with rigorous supervision and on-site seminars.

Comprehensive Examination

The comprehensive examination is an oral exam that provides students an opportunity to integrate all course work, individual reading, research, and applied training. The comprehensive examination committee will be composed of the student's advisor (who will chair the exam) and two counseling psychology faculty members. Comprehensive examination performance will be evaluated by the committee using a rubric published in the Student Handbook and will evaluate student's understanding of profession wide competencies and program competencies.

Culminating Portfolio

The culminating portfolio represents the final pre-internship opportunity for students to demonstrate their integrative knowledge of health service and counseling psychology. The portfolio must be completed and submitted electronically by January 31 of the year the student applies for internship. Successful completion of this portfolio is required before leaving for internship. The following documents are required:

- Approved Dissertation Proposal
- Approved Clinical Case Study
- Approved Assessment Report
- Integrative Paper
- Social Justice Intervention Paper

Dissertation

Students will define an area of research interest and propose a research program leading to a written dissertation. Oral defense of the dissertation required.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. [1] Students may also choose to take a Psychology Core or Research Elective in this term.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- You will engage in independent scholarship on questions important to counseling psychology, and develop and evaluate interventions to promote positive human development.
- You'll be equipped to practice as a health service psychologist with competencies in research, ethical and legal standards, individual and cultural diversity, professional values and attitudes, communication and interpersonal skills, assessment, intervention, supervision, consultation and inter-professional/interdisciplinary knowledge and skills.

Cultural and Educational Policy Studies (MA)

This program is no longer accepting applicants.

Curriculum

The Master of Arts in Cultural and Educational Policy Studies requires 30 credit hours of coursework and a thesis. Students select a specialization in Comparative and International Education, History of Education, Sociology of Education, or Philosophy of Education.

Required Coursework

Code	Title	Hours
Select Three Courses in Major Area [1]		*9*
Select Two from Outside the Major Area		*6*
ELPS 410	Sociology of Education	
ELPS 420	Philosophy of Education	
ELPS 444	American Schooling and Social Policy: A Historical Perspective	
ELPS 455	Comparative Education	
RMTD 400	Introduction to Research Methodology	3
Select Four Electives		*12*
ELPS 595	Thesis Supervision	1
Total Hours		**31**

[1] At least one course in Major Area must be at introductory level (ELPS 410 Sociology of Education, ELPS 420 Philosophy of Education, ELPS 444 American Schooling and Social Policy: A Historical Perspective, or ELPS 455 Comparative Education).

[2] Two courses are selected in consultation with the advisor in order to customize the course of study to the student's particular interests and needs. Commonly, students take additional research methods courses (*eg* RMTD 404 Introduction to Educational Statistics or RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Method. However, electives may also be taken in other areas of the

School of Education and, if appropriate, in other areas of the university as well.

Thesis

The MA thesis is the final requirement for the degree and will make a noteworthy, original contribution to current research knowledge and understanding of an educational issue or question that falls within the social foundations of education. A typical CEPS MA thesis is in the realm of 30-50 double-spaced pages (excluding references) and may eventually be revised and reworked to be submitted for publication as a book chapter or journal article.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Cultural and Educational Policy Studies (PhD)

This program is no longer accepting applicants.

Curriculum

The PhD in Cultural and Educational Policy requires 62 credit hours of coursework, qualifying examination, and dissertation.

To fulfill the Cultural Foundations and Policy core, students will choose one course from each of the following areas: Comparative and International Education, History of Education, Philosophy of Education, and Sociology of Education. Students will then choose a Depth Area from those above and take five (5) courses within it.

Required Coursework

Code	Title	Hours
Cultural and Policy Foundations		**12**
ELPS 410	Sociology of Education	
ELPS 420	Philosophy of Education	
ELPS 444	American Schooling and Social Policy: A Historical Perspective	
ELPS 455	Comparative Education	
Coursework in Depth Area		**15**
Research Methods		**6**
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Method [1]	
RMTD 421	Educational Research II: Building a Body of Evidence Quantitative Method	
Select Nine Graduate Level Electives [2]		**27**
ELPS 600	Dissertation Supervision	1
ELPS 610	Doctoral Study	1
Total Hours		**62**

1. RMTD 420 and RMTD 421 combined will fulfill the responsible conduct of research and scholarship training required by the Graduate School for all students completing a thesis or dissertation.
2. Students will select electives in consultation with their advisor to customize the course of study in the student's area of interest and research. Students are encouraged to complete coursework that contributes to a minor area of study within the four CEPS areas.

Comprehensive Exam

After PhD in Cultural and Educational Policy Studies students complete core courses in the discipline and required research courses, they are eligible to complete their comprehensive examinations. The comprehensive examination is intended to establish that doctoral students have sufficient
comprehensive knowledge and academic writing skills to succeed in their areas of study. The examination consists of three different sections: one pertaining to the student's area of concentration; one related to a minor area of study in one of the four CEPS core areas; and one on a topic connected to the student's prospective dissertation. Over a one-week period, the student writes an essay in response to a question on each of these sections, so that all three sections are covered over three weeks. Each essay should be approximately 10-12 double-spaced pages in length (2500-3000 words excluding bibliography) but no more than 15 pages (3750 words excluding bibliography) overall. The essays should include complete citations and bibliography in APA or Chicago Manual of Style format.

Dissertation

Students will define an area of research interest and propose a research program leading to a written dissertation. Oral defense of the dissertation required. The final dissertation will be deposited in a publicly accessible database in accordance with Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Higher Education (PhD)

As of Fall 2026, this program is no longer accepting students.

Loyola's PhD in Higher Education is an interdisciplinary program that encourages students to connect theory to practice while supporting scholarship on equity and social justice in various post-secondary contexts.

Comprehensive Exam

After PhD in Higher Education students complete core courses in the discipline and required research courses, they are eligible to complete their comprehensive examinations and should speak with their academic advisors. Advisors assist students to develop research questions and the literature that should be reviewed to complete the exam. The

comprehensive examination is offered during the fall, spring and summer semesters.

Dissertation

Students will define an area of research interest and propose a research program leading to a written dissertation. Oral defense of the dissertation required. The final dissertation will be deposited in a publicly accessible database in accordance with Graduate School policy.

Suggested Sequence of Courses

After coursework listed below is complete, students begin taking ELPS 610 Doctoral Study or ELPS 600 Dissertation Supervision until dissertation defense.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- You will gain scholarly frames for understanding various higher education contexts, critically evaluate research (i.e., designs, data analysis, and data interpretation) and apply critical inquiry and research skills to successfully complete your dissertation research.

Research Methodology (MA)

We believe that data tells the story of the human experience. In Loyola's Research Methodology Program, we look at numbers in context. Unlike in math or statistics, where a number is the final answer, we know that numbers tell a story. We challenge our students to use data to highlight the systematic and personal characteristics that contribute to social inequities and leverage the findings to devise ways to offset those inequities.

- Research Methodology (PhD) (p. 1333)

Combined

- School Psychology (MEd/EdS) (p. 1896)

Curriculum

The Master of Arts in Research Methodology requires 30 credit hours. Students may also choose to write a master's thesis.

Required Courses

Code	Title	Hours
Required Courses		
RMTD 400	Introduction to Research Methodology	3
RMTD 404	Introduction to Educational Statistics	3
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Method [1]	3

RMTD 421	Educational Research II: Building a Body of Evidence Quantitative Method	3
Select Six Electives [2]		*18*
Total Hours		**30**

1. RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Method and RMTD 421 Educational Research II: Building a Body of Evidence Quantitative Method will fulfill the responsible conduct of research and scholarship requirement for students who compose a thesis.
2. At least one elective (3 credit hours) must be taken in a substantive area of the social sciences with approval from the student's advisor. This course is usually in the area that the student would like to apply research methods (*e.g.* Higher Education, Social Work, or Curriculum and Instruction).

Thesis Option

Students can choose to complete a thesis as part of their electives. Students completing a thesis can focus on the application of methods to a substantive area (higher education, social work, curriculum and instruction, etc.) or an investigation of methods.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- You will be able to critically evaluate bodies of knowledge from a variety of methodological traditions, use a variety of software programs to implement analyses, and assist with all stages of a research study in applied settings.

Research Methodology (PhD)

As of Fall 2026, this program is no longer accepting applicants.

The Research Methodology program offers a comprehensive curriculum designed to equip students with the knowledge and skills to conduct rigorous and effective research across various disciplines. Through a combination of theoretical foundations, practical applications, and hands-on experience, students gain proficiency in quantitative, qualitative, and program evaluation methodologies.

Related Programs

Master's

- Research Methodology (MA) (p. 1332)

Doctoral

- Counseling Psychology (PhD) (p. 1327)
- School Psychology (PhD) (p. 1334)

Curriculum

The PhD in Research Methodology requires 60 credit hours, the completion of a research portfolio, and a dissertation. Students also participate in a consulting experience, where they participate in research or provide consulting assistance to researchers or organizations.

Required Courses

Code	Title	Hours
RMTD 403	Survey Research	3
RMTD 406	Educational Evaluation	3
RMTD 420	Educational Research I: Building a Body of Evidence With Qualitative Method *	3
RMTD 421	Educational Research II: Building a Body of Evidence Quantitative Method	3
One advanced quantitative course		3
RMTD 483	Multivariate Statistics	
RMTD 484	Hierarchical Linear Models	
RMTD 488	Meta-Analysis	
One advanced qualitative course		3
RMTD 422	Single Subject Design	
RMTD 432	Item Response Theory	
RMTD 440	Mixed Methods Research	
RMTD 470	Case Study Research	
Three courses in Minor Research Area		9
Eleven Electives		33
Total Hours		**60**

Comprehensive Assessment

A Comprehensive Research Portfolio is required. The portfolio contains three items: a) a report on a research consulting experience, b) a research paper demonstrating the candidate's understanding of all phases in the research process and the ability to analyze and interpret data from a research study, and c) a literature review of an issue in the candidate's area of concentration.

Dissertation

A dissertation, as well as an oral defense of the dissertation, is required. Once completed, the final dissertation must be submitted to a publicly accessible database according to Graduate School policy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students will demonstrate the ability to design and implement rigorous research and/or evaluation, including both qualitative and quantitative methodologies, to address complex questions through a social justice lens.
- Students will proficiently apply advanced statistical and qualitative analysis techniques using diverse software to analyze and interpret data, ensuring accurate and meaningful findings.
- Students will develop expertise in evaluating and implementing measurement tools and frameworks, ensuring the validity, reliability, and ethical use of instruments in research and evaluation contexts.

- Students will critically assess research literature and methodologies, identifying potential biases, misrepresented findings, or data misuse in existing studies and publications.
- Students will effectively communicate complex research findings to both academic and non-academic audiences, ensuring clarity, accuracy, and the appropriate interpretation of results.

School Psychology (PhD)

Work directly with students, while also publishing change-making research that will help disrupt inequities in our education system with a PhD in School Psychology.

Accreditation

Loyola's PhD in School Psychology has been accredited by the American Psychologist Association (APA) and approved by the National Association of School Psychologists (NASP).

Related Programs

Master's

- Community Counseling (MA) (p. 1325)

Doctoral

- Counseling Psychology (PhD) (p. 1327)
- Research Methodology (PhD) (p. 1333)

Curriculum

The PhD in School Psychology requires 99 credit hours, 600 hours of school-based practicum, a minimum 900 hours of advanced practicum, a Doctoral Culminating Portfolio (which serves as the major comprehensive exam), a dissertation, and completion of a full-time yearlong APA-accredited internship. The PhD in School Psychology is organized to facilitate and maximize academic, research, and clinical experiences.

Required Coursework

Code	Title	Hours
Psychological Foundations		**21**
CIEP 413	Psychopathology & School Mental Health	
CIEP 466	School Psychology Special Topics	
CIEP 484	Biological Foundation: Behavior in Schools	
CPSY 435	Selected Topics in Counseling	
or PSYC 401	History & Systems of Psychology	
CPSY 454	Human Development: Cognitive, Aff & Phys Bases

RMTD 590	Seminar:Advanced Mixed Methods	
Advanced Practicum		**21**
CIEP 461	Practicum in School Psychology I	
CIEP 463	Practicum Schl Psychology II	
CIEP 533	Proseminar: Educational Psychology/School Psychology	
CIEP 546	School Psychology Advanced Practicum	
CIEP 586	Doctoral Internship: School Psychology	
One Graduate Level Elective		**3**
Total Hours		**99**

[1] Students must have previously completed an undergraduate or graduate level course in statistics with a grade of B or better, or take such a course before entering the program or in Fall of the first semester.

Students must also participate in a faculty research team during years one through four.

Practicum and Internship

In the second year of the program, students complete two semesters of a structured school-based practicum, in which they spend two days a week in a school setting and complete structured activities under the supervision of a credentialed school psychologist. In the third and fourth years of the program, students complete two advanced practica in a school or clinical setting while working on the dissertation proposal. In the fourth year of the program, students apply for a calendar-year-long

doctoral APA-accredited internship in health service psychology through the Association of Psychology Postdoctoral and Internship Centers (APPIC) matching system. The internship must be under the direction of a licensed psychologist and certified school psychologist. The Director of Clinical Training approves internship applications submitted by doctoral students

Candidates in all programs leading to Illinois certification are required to pass an Illinois State Criminal Background Check.

Comprehensive Assessment

Doctoral students complete their major comprehensive examination (Doctoral Culminating Portfolio) prior to accepting an internship and typically during the fourth year of study.

Dissertation

A dissertation and oral defense is required. Upon completion, the dissertation is submitted for publication in a publicly accessible database per Graduate School policy.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The School Psychology PhD program has three aims:

- To develop scientist-practitioners who have a professional identify as socially just school psychologists who are guided by the ethical and legal principles of the profession;
- To develop scientist-practitioners who understand and can implement evidence-based, assessment, intervention, and consultation practice from a social justice perspective; and
- To develop scientist-practitioners who can evaluate, produce, and disseminate research

To achieve these aims, the program is scoped and sequenced to build students' knowledge, attitudes, and skills such that they can enter the profession with the foundational and functional competencies needed to effectively provide services.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Biochemistry & Molecular Biology (BMB)

BMB 400 Special Topics: Molecular Biology (1-3 Credit Hours)
Courses of half a semester to a semester on different topics of molecular biology, treated in depth with readings of the current literature.
Outcomes:
To learn about diverse areas of Molecular Biology which are not treated in regular courses

BMB 417 Molecular Biology (3 Credit Hours)
The Biochemistry and Molecular Biology course will cover diverse subjects of importance to modern cell an organismal biology from a molecular biology perspective.

BMB 471 Comp Molecular Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

BMB 490 Special Topics in Molecular Biology (1-3 Credit Hours)
This course covers a specific topic in molecular biology. The topics can vary among different special topics courses.

BMB 499 Research in Molecular Biology (1-9 Credit Hours)
The students do mentored work in a laboratory on a research project. Their performance is evaluated by their mentor at the end of the year, and is given a pass/not pass grade.
Outcomes:
To develop the ability to organize a research project proposing hypotheses and testing them in the laboratory and against the current literature

BMB 501 Molecular Biology Journal Club (0-1 Credit Hours)
This is a weekly course where students take turns to present a scientific paper. Following the presentation there is a discussion by students and faculty. Students prepare the presentation under the supervision of a faculty mentor.
Outcomes:
To develop the ability to read and analyze a scientific paper and to develop oral presentation skills and appropriate visual aids

BMB 502 Seminar in Molecular Biology (0 Credit Hours)
Biweekly seminars where invited speakers from outside the institution present their work. The presentation is followed by a discussion by students and faculty.
Outcomes:
To become familiar with current research in different molecular biology areas by listening to the actual scientist developing the work

BMB 524 Molecular Biology & Genetics of Development (2 Credit Hours)
This is a weekly course on Molecular aspects of Developmental Biology, with a mixture of lectures, discussions of original papers and presentations by external speakers.
Course equivalencies: X-BICH524/MBIO524
Outcomes:
An understanding of the principles of developmental biology with emphasis in the molecular genetics of development

BMB 526 DNA Repair & Recombination (2 Credit Hours)
This is a weekly course on mechanisms of mutagenesis, genetic repair and recombination. The course uses a mixture of lectures and discussions of original scientific papers.
Course equivalencies: X-MBIO526/BICH526
Outcomes:
An understanding of the basic mechanisms of mutagenesis, genetic repair, homologous recombination, and non-homologous end joining

BMB 590 Molecular Biology of Oncogenesis (3 Credit Hours)
The course will cover different subjects in cancer molecular biology with a combination of lectures and discussions of original scientific papers.
Outcomes:
A basic knowledge about mechanisms of oncogenesis and the biology of cancer, and an ability to search and understand the classic as well as modern literature on the subject

BMB 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

BMB 600 Dissertation Supervision (1 Credit Hour)
The students work on their dissertation under the supervision of their mentor and of their dissertation committee. Their progress is evaluated by their mentor and is given credit or no credit.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Bioethics & Healthcare Leadership (BEHL)

BEHL 401 Clinical Topics in Bioethics (3 Credit Hours)
This course will provide an overview of the major areas of clinical biomedical ethics. Issues will be examined and analyzed including problem-solving, theory and practice, end-of-life decision making, etc. Extensive use of case discussion and analysis will help to develop participants' ethical problem-solving skills.
Course equivalencies: IPS 651/BEHP 401/BEHL 401
Outcomes:
Participants will gain familiarity with terminology, resources, and major frameworks of ethical analysis in biomedical ethics

BEHL 402 Justice & Health Care (3 Credit Hours)
This course provides an overview of justice and health care with a special emphasis upon the developing world by examining prevailing theoretical frameworks and how justice is played out in various health care systems.
Outcomes:
Participants will gain a better understanding of what justice means with regard to health care

BEHL 403 Ethics Care Continuum (3 Credit Hours)
This course prepares students to identify biomedical ethical issues in settings such as long-term care, rehabilitation care, mental health, and hospice, and to develop moral frameworks for addressing these issues.
Outcomes:
Participants will be able to analyze cases and issues regarding health-care delivery and adapt principle frameworks of biomedical ethics to these settings

BEHL 404 Biomedical Ethics and Law (3 Credit Hours)
This course serves as an introduction to biomedical ethics and the law and will introduce the history of bioethics and the US legal system by surveying a number of seminal legal cases.
Outcomes:
Participants will have a better understanding of how bioethics has been shaping legal decisions and legislation throughout history

BEHL 405 Research Ethics (3 Credit Hours)
This interactive seminar will explore the responsible conduct of science with a focus on ethical issues in clinical research involving human participants. We will review federal research policies related to investigator responsibilities and institutional review board (IRB) function.
Outcomes:
Students will become familiar with the history, terminology, and resources of research ethics as well as key debates that have occurred/are occurring in the research ethics literature

BEHL 406 Principles of Health Care Ethics (3 Credit Hours)
This course provides an overview of important ethical theories in bioethics. We will mainly examine major works in the field by leading bioethics scholars to become better familiar with different approaches in the field.
Outcomes:
Students should be able to identify and analyze ethical theories and become familiar with various ethical approaches

BEHL 407 Social Determinants of Health and Bioethics (3 Credit Hours)
This course will review the theoretical work on social science (anthropology, sociology) and moral reasoning as it pertains to the discipline of bioethics, its philosophical roots, and the body of social science works in bioethics.
Outcomes:
Students will learn how to use the technique of self-reflexivity to understand cultural values

BEHL 408 Ethics, Genetics and Health Policy (3 Credit Hours)
This course will provide an introduction to genetic ethics and a survey of topics that constitute the professional and popular literature in the field. Topics to be considered include, but are not limited to, gene patenting, human cloning, and race and genetics.
Outcomes:
Students will have an understanding of ethical questions that genetic technological advances pose to our understanding of human identity and social justice

BEHL 409 Religion and Bioethics (3 Credit Hours)
This course is a thematic exploration of religion and bioethics with a specific concentration on its implications at the end of life.
Outcomes:
Students will better understanding of suffering and death, and meaning that underlie these issues in bioethics, and the practice of healthcare at the end of life

BEHL 410 Ethics Consultation Simulation Seminar (1-3 Credit Hours)
This is a two-month course of online learning (June-July) including a 3-day on-campus intensive experience for students including didactic sessions and ethics consultation skills development.
Outcomes:
Students will improve communication and interaction skills while doing ethics consultation

BEHL 411 Systems Ethics Frameworks (3 Credit Hours)
The course introduces current ethical issues in public health research, practice, and policy. Public health frameworks and approaches will be used to explore prevention, social justice, and health equity.
Outcomes:
Participants will be familiar with key readings, ethical frameworks, and practical tools for assessing public health challenges

BEHL 412 Organizational Ethics I: Business, Professionalism, and Justice (3 Credit Hours)
This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians within a group practice, administrators within a health system, or advocates within a community.
Course equivalencies: IPS 652/BEHP 412/BEHL 412
Outcomes:
Participants will understand responsibilities social justice entails to self, one's profession, various institutions which a healthcare profession is a member, one's patients, and the underserved

BEHL 413 History of Medicine and Bioethics (3 Credit Hours)
This course seeks to situate and examine the emergence and development of the field of bioethics within the history of medicine and the ethical concerns embodied in medicine¿s practice.
Outcomes:
Participants will have an understanding of how bioethics emerged within the broader history of medicine and and continues today as a distinct discipline

BEHL 414 Moral Theology for Bioethics (3 Credit Hours)
This course provides an introduction to Catholic moral theology through a historical review of its development and a consideration of key documents, events, arguments and concepts beginning with the scriptural witness of Christ and concluding with the moral teaching of John Paul II as it bears upon contemporary Catholic moral theology.
Outcomes:
Its goal is to assist in establishing an historical and theoretical foundation for those who are interested in bioethics as it is considered and practiced in the Catholic tradition

BEHL 415 Ethical & Religious Directives for Catholic Healthcare Leadership (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics

BEHL 416 Catholic Bioethics and Social Justice (3 Credit Hours)
This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context

BEHL 417 Narrative Ethics (3 Credit Hours)
This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.
Outcomes:
This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics

BEHL 418 Advancing Health Equity Practice (3 Credit Hours)
This course introduces the frameworks and practice of health equity as it pertains to the field of bioethics. The tools and materials help students more effectively incorporate health equity into all aspects of their work. Topics include: community health, multi-sector community engagement, and innovative approaches to clinical and community work to improve populations health.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Effectively incorporate health equity into all aspects of bioethics practice

BEHL 419 Organizational Ethics II: Ethical Leadership Changing Healthcare Envrnmnt (3 Credit Hours)
This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined. Questions of leadership style and theories of what constitutes effective leadership are considered.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Key focus on communication strategies and methods of organizational change

BEHL 420 Advanced Topics in Bioethics and Law (3 Credit Hours)
This class will explore the historical relationship between law and bioethics and examine how law and bioethics come together or may be at odds. Recognize/discuss changing nature of physician-patient relationship, continuing evolution of informed consent, intersection of commerce and science, changing definition of death, growing complexity of reproduction.
Outcomes:
Resolve dilemmas raised by changing biotechnology

BEHL 421 Practicum in Clinical Ethics (3 Credit Hours)
Pre-requisites: Department Consent Required
The goal of the clinical ethics practicum is to provide doctoral students on the clinical ethics track the opportunity to use knowledge and skills acquired in the academic program in a clinical setting (e.g. community hospital or academic medical center), under the direction of a preceptor at that setting.
Outcomes:
This practicum will expose students to the practical applications of clinical ethics

BEHL 422 Practicum in Organizational/Public Health Ethics (3 Credit Hours)
Pre-requisites: BEHL 419
The practicum will enable the student to work on a project which translates both general and discipline-specific information into organizational ethics or public health practice. Students must demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding these topics, and exhibit leadership, creativity, and the ability to work well with others.
Outcomes:
Goal of the practicum is to provide students the opportunity to use knowledge and skills acquired in the academic program in a professional setting under the direction of a preceptor

BEHL 423 Doctoral Capstone I (3 Credit Hours)
Pre-requisites: Oral and Written Qualifying Exams
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Publishable peer-reviewed paper

BEHL 424 Doctoral Capstone II (3 Credit Hours)
Pre-requisites: BEHL 423
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Students will be required to appear on campus for a capstone presentation with faculty

BEHL 425 Empirical Bioethics (3 Credit Hours)
Provides an overview of empirical research in the increasingly interdisciplinary field of bioethics. Will examine the relationship between empirical data and normative claims and potential pitfalls that may arise when using information about what (is) to determine what (ought) to be done.
Outcomes:
Students will gain familiarity with the range of quantitative and qualitative research methods used in bioethics as well as academic disciplines, understanding of empirical studies on ethical problems in medicine, public health policy, and clinical research; Discussions will be relevant to a range of professional settings

BEHL 426 Ignatian Spirituality and Medicine (3 Credit Hours)
This course in will explore the roots of Ignatian Spirituality as presented in the Spiritual Exercise and other writings of Ignatius Loyola and the early Jesuits. From this historical starting point, the course will shift to explore key themes that have emerged from this spiritual tradition as it relates to medicine, paying special attention to the Spiritual Exercises.
Outcomes:
This course aims to assist students in establishing a substantive understanding of Ignatian spirituality and the tradition of Jesuit education in which they participate as a means for leading faithful, joyful, and hopeful lives as physicians

BEHL 427 Professionalism and Professional Ethics (3 Credit Hours)
This course will review and critically examine the professional codes of ethics of a variety of health-related professions: medicine, nursing, dentistry, social work, chaplaincy, risk management, and allied health. We will examine the growth of professionalism as a movement and answer questions related to this topic.
Outcomes:
Understand what is a profession, what are professional ethics; Difference between common morality and professional ethics, and difference between applied ethics and professional ethics; We will also discuss whether a pan-professional ethics code is needed for the health care professions

BEHL 428 Writing and Scholarship Skills (3 Credit Hours)
Writing skills are an essential form of communication not only between the instructor and students but also among and between the students themselves. Topics covered: Academic Integrity; Grammar; Resource Development/Citation; Clarity/Formality; Development of a Thesis and Writing of a Thesis Statement; Organization and Outlining; Critical Thinking/ Analysis/Reasoning; and Development of a Conclusion.
Outcomes:
This course will provide a review of basic writing skills as well help students develop analytical and communication skills that are critical to scholarly writing in the multidisciplinary field of bioethics

BEHL 429 Pediatric Ethics (3 Credit Hours)
This course will introduce ethical topics in the areas of pediatric medicine and research. Topics to be addressed may include decision making, neonatal issues, teens and decisional authority, research with minors.
Outcomes:
Discover aspects of the pediatric population that raise unique concerns, create novel moral environments, and thus require nuanced and sensitive attention to and tools of ethical inquiry

BEHL 430 Advanced Clinical Ethics Skills (3 Credit Hours)
Pre-requisites: BEHL 410 Ethics Consult Simulation Seminar
Two-month blended course of online learning and two-day intensive experience on Health Sciences Campus in Maywood. Course provides an opportunity for advanced graduate students to improve and refine clinical ethics skills. Participants will practice consultation skills, evaluate performance of others, and receive feedback from faculty reviewers.
Outcomes:
Students will develop their own portfolio for quality attestation

BEHL 431 Current Debates in Research Ethics (3 Credit Hours)
Pre-requisites: BEHL 405 or permission from instructor
This course will focus on unique ethical issues that arise in research with special populations. Included but not limited to children; women, fetuses, and embryos; prisoners; indigenous and racial/ethnic minority communities; healthy volunteers. Research in emergency and international settings as well as research at the end-of-life will be discussed.
Outcomes:
Material covered in this course will be relevant for ethicists, IRB members, and clinical investigators

BEHL 432 Global Bioethics (3 Credit Hours)
This course will survey major topics in global bioethics. Students will be introduced to global bioethics frameworks, practices, and governance bodies in order to place bioethical problems in a global context. Attention will be given to how the global realities of health disparities and neoliberal economic policies impact bioethical questions. Guest lecturers will share experiences working in clinical ethics, public health, social justice, health care policy, and research across the globe.
Outcomes:
Students will gain knowledge regarding clinical ethics, public health, social justice, health care policy, and research across the globe

BEHL 433 Mastering Clinical Ethics Consultation (3 Credit Hours)
Pre-requisites: BEHL 410 and BEHL 430
This 2 week on-campus course provides an opportunity for advanced bioethics doctoral students in the clinical ethics concentration to refine their clinical ethics skills to a mastery level. Students will participate in simulated ethics consultations, practice communication and interpersonal skills and receive feedback on their performance. With access to LUHS, students will participate in clinical rounds, case discussions, and active ethics consultations and debriefing sessions. This course will require students to reach a predefined mastery level of skill in simulated ethics case consultations using the Assessing Clinical Ethics Skills (ACES) evaluation tool. They will also be required to write chart notes for ethics consultations.
Outcomes:
Students will achieve mastery of clinical ethics consultation skills, written chart notes, and improve communication and interpersonal skills

BEHL 434 Oral Health Ethics (3 Credit Hours)
According to the CDC, "Oral health affects our ability to speak, smile, eat, and show emotions. It also affects self-esteem, school performance, and attendance at work and school. Oral diseases - which range from cavities to gum disease to oral cancer - cause pain and disability for millions of Americans." As with other areas of healthcare, ethical issues arise in oral health. Issues to be addressed in this course will include access to care, confidentiality, professional obligations of dentists, informed consent, treatment planning, and the importance of oral health to overall health and well-being.
Outcomes:
Participants will have a better understanding of ethical issues that arise within oral health care

BEHL 435 Disability Ethics (3 Credit Hours)
One in four individuals is considered disabled. What that means, however, differs from person to person, culture to culture, and environment to environment. Disability can be inborn or acquired, short-term or chronic, intellectual or not, etc. The term is broad in scope and is not subject to precise definition. Disability raises many bioethical issues across the lifespan. This course will examine definitions of disability as well as make distinctions between disability, disorder, disease, disfunction and identity. We will consider disability from the bio-medical model, psycho-social model, public health model and neurodiversity model. The lens through which we will explore disability is that of social justice. Readings, viewings and lectures will present a range of perspectives including historical framing, narrative of the lived experience, legal documents, theoretical and philosophical underpinnings and clinical discourse.
Outcomes:
Understand the complexities and variations in defining disability; Analyze disability through multiple models and frameworks; Explore the ethical implications of disability across different contexts; Engage critically with lived experiences and theoretical perspectives on disability; Develop a social justice-oriented approach to disability ethics

BEHL 436 Adolescent Health Ethics (3 Credit Hours)
This course will provide an overview of ethical issues in adolescent health and a survey of some topics that are unique to the field. This will build on concepts addressed in Pediatric Ethics and discuss how ethical decisions may change as children develop physically and psychologically. Classes will be topic driven and will draw upon a variety of sources including recent articles on a range of topics within the field, videos and cases. The ethical questions that are unique to adolescents will serve as the organizing themes of the course.
Outcomes:
Identify the unique ethical issues raised by adolescent patients; Understand how developing autonomy may impact healthcare decisions for adolescents distinct from children and adults; Consider the range of stakeholders involved in adolescent health care

BEHL 491 Special Topics (1-3 Credit Hours)
Provides an opportunity to introduce new courses.

BEHL 492 Master's Research - Capstone (3 Credit Hours)
The capstone course is the final course which provides an opportunity for the student to develop a paper of publishable quality.

BEHL 493 Independent Study (1-3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 500 Introduction to Healthcare Mission Leadership (3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 501 Church and Mission (3 Credit Hours)
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II and contemporary times

BEHL 502 Christian Doctrine (3 Credit Hours)
This course surveys the historical evolution of Christian doctrine and its theological interpretations from the early church through the 21st century. It assists students in understanding how theological doctrines apply to contemporary ministry contexts, particularly the work of Catholic health care. The course explores the early Christological controversies, the Trinity, Grace, liberationist theologies, and the role of dialogue as a fundamental feature of the development of doctrine.
Outcomes:
Students will understand theological doctrine and apply to contemporary ministry contexts in Catholic health care

BEHL 503 Foundations of Christian Spirituality (3 Credit Hours)
Christian spirituality (the 'lived experience of Christian faith') is a separate but partnered academic field with theology today. Key issues are: defining 'spirituality', methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

BEHL 504 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

BEHL 505 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

BEHL 506 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

BEHL 510 Integrated Doctoral Seminar in Ethics, Theology, and Healthcare (3 Credit Hours)
The Integrated Seminars in Ethics, Theology and Healthcare (ISETH) are the core of the Doctorate in Healthcare Mission Leadership (D.HMCL) degree program. Students in the DHCML program are required to complete three of these seminars, which will be offered every Fall and Spring term with variable topics, as part of their degree program. These courses will be primarily theoretical and methodological in focus, rather than practical.
Outcomes:
This course is designed to build on and integrate students' prior graduate coursework in theology and bioethics with their ongoing work in Catholic healthcare

BEHL 511 Mission, Leadership, and Spiritual Formation Seminar (3 Credit Hours)
This course explores the theology, traditions, and current practices foundational for understanding and achieving formation as an essential offering of Catholic health care ministries. By examining a Face to Face Online Hybrid (greater than 75% online) Blended (30%-70% online) variety of methods and models of formation programs of Catholic healthcare in the United States, students will cultivate personal practices that enhance their ability to design and operationalize experiences for persons in various roles within the ministries they serve - from new associate orientation to senior leadership.
Outcomes:
Gain an understanding and practical ability to ensure the programs, resources, and encounters they design and facilitate are grounded in tradition of Catholic ministry, inviting to diverse participant populations, and support the achievement of specified outcomes; In so doing, understand and develop skills necessary to implement integrative, professional, and valued programs of formation

BEHL 512 Canon Law, Sponsorship, and Church Relations (3 Credit Hours)
This two-month course explores the theology, traditions, and practical applications of canon law in the context of Catholic health care. The course will provide an overview of canon law, the emerging theology of sponsorship and ministerial juridic persons, and review a variety of models of church relations current in contemporary Catholic health care.
Outcomes:
Students will gain fluency in canon law, gain knowledge of the particular canons in Catholic health care, and develop a deeper understanding of sponsorship in order to understand the specific sponsorship model applicable to their own healthcare context

Biomedical Sciences (BMSC)

BMSC 402 Statistical Methods for Biomedical Science (2-3 Credit Hours)
This course covers a broad array of statistical methods for the biological and medical sciences. Topics include descriptive statistics, non-parametric methods, categorical data analysis, and regression methods for normal, non-normal, and repeated measures data. The course focuses on the analysis of real datasets using RStudio, although no previous programming experience is assumed.
Course equivalencies: CRME420/BMSC402/MPBH404

BMSC 405 Ethics in Biomedical Sciences (1 Credit Hour)
This is an interactive seminar course where students discuss and debate ethics in biomedical sciences to foster integrity, professional character, and ethical problem solving skills.

BMSC 406 Special Topics (1-3 Credit Hours)
This course covers a specific topic in biomedical sciences. The topics can vary among different special topics courses.

BMSC 410 Biochemistry and Molecular Biology (4 Credit Hours)
This course will give students a broad understanding of the synthesis and functions of the major macromolecules that comprise a cell, and the biochemical mechanisms by which these molecules interact to contribute to cellular function.

BMSC 412 Cell Biology (4 Credit Hours)
This course will provide students with knowledge of the structure and function of cells, including the experimental foundations of cell and molecular biology.

BMSC 414 Systems Biology (3 Credit Hours)
This course will provide first year graduate students with an introduction to human physiology. Emphasis is placed on the major organ systems including the nervous, cardiovascular, pulmonary, renal, gastrointestinal and endocrine systems. Basic physiology of blood, skin and bone, as well as introductory concepts in immunology and pharmacology are also covered.

BMSC 416 Methods Biomedical Science (1 Credit Hour)
This course will familiarize first year graduate students with various methods that are used in contemporary biomedical research. It will introduce methods relevant to molecular biology, tissue culture, transgenic model systems, imaging, biochemistry, bioinformatics, electrophysiology, and immunology.

BMSC 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

BMSC 499 Research (0-2 Credit Hours)
Pre-requisites: First year PhD students will register for one research rotation in the Fall semester (2 credit hours), and two research rotations in the Spring semester (3 credit hours)
Research rotation course for first year students in the Integrated Program in Biomedical Sciences.
Outcomes:
Research course will provide laboratory experience during the first year of study, expected to culminate in the selection of a dissertation research laboratory and mentor at the end of the first year

BMSC 600 Dissertation Supervision (1 Credit Hour)
Following completion of the required 48 credit hours in the first 2 years, IPBS PhD students maintain registration via BMSC 600.
Outcomes:
IPBS PhD students will work on their dissertation while registered for BMSC 600

Cellular & Molecular Oncology (CMO)

CMO 499 Research (1-9 Credit Hours)
Pre-requisites: Restricted to students enrolled in CMO MS program
CMO 499 is designed to give credit for laboratory research efforts that will result in a M.S. thesis. Students will learn theoretical and laboratory technical tools to investigate and test a hypothesis. Students will search the literature for background, rationale, and protocols for their research project. Students will communicate results and knowledge through written and oral communications.
Outcomes:
1) Clearly communicate, describe, and implement techniques used for a research problem; 2) Describe results-obtained; 3) Draw conclusions based on data-obtained; 4) List future directions; and 5) Understand the significance of the work

CMO 502 Seminar (0 Credit Hours)
A seminar will be held on a rotating basis once per week. CMO M.S. students will be required to attend seminars as part of the CMO 502 course. This course is designed to help students stay abreast of current topics in oncology. Students will attend weekly seminars, and are encouraged to interact with both invited and current faculty speakers by asking questions and contributing to group discussions. Upon completion of this course CMO 502, students will have gained a better understanding of current oncology research. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar, 3) Question new data or their interpretation

CMO 503 Special Topics in Oncology (0-1 Credit Hours)
CMO 503 will be a new journal club course-discussing and analyzing papers from presenters in CMO 502 Seminar Series one week in advance of their seminar. CMO 503 and CMO 502 will be aligned to expose students to oncology-focused scientists presenting a seminar the following week. Students will read an article by the seminar speaker, participate in discussion sessions, and ask questions during the seminars. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe cutting edge research in the particular area of investigation covered by the course; 2) Discuss limitations to experimental approaches; 3) Discuss real-world application of the research topic being studied; and 4) Critically read scientific literature on cancer biology

CMO 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: Completion of required coursework
Thesis supervision course for CMO MS students who have completed the required credit hours. Allows completion of thesis research and defense, required for degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Healthcare Professions Education (HPE)

HPE 400 Research Methods in Health Professions Education (4 Credit Hours)
Introduction for Health Professions Education (HPE) students to the fundamentals of research design for education and scholarship in teaching and learning. This course offers a deep dive into educational research, covering problem identification, literature review, research question formulation, and the critical evaluation and synthesis of existing studies. It provides a solid foundation in quantitative research (including reliability, validity, survey construction, and validation), qualitative research (focusing on interviews and focus groups), and mixed methods research. The course emphasizes ethical principles in research and teaches effective data interpretation and presentation. Additionally, students will be introduced to grant development and introduced to their capstone project which is a research proposal. This course will equip students with the skills needed to excel in educational research., reliability, validity, survey construction, and survey validation), qualitative research (as it relates to interviews and focus groups) and mixed methods research (how to manage and use more than one method of data collection); Analyze data and ethical research practices that guide educational research; Illustrate grant development with an introduction of the capstone project research proposal.
Outcomes:
Identify a research problem and method of literature review; Formulate research questions and hypothesis; Distinguish between quantitative, qualitative, and mixed methods research; Describe fundamentals of quantitative research (e.g

HPE 401 Fundamentals of Learning and Teaching Modalities in Health Professions (3 Credit Hours)
Introduction to a range of teaching modalities, including large group lectures, small group teaching, case-based, problem-based, and team-based learning, flipped classrooms, standardized patients, simulation, e-learning, procedural, chalk talks, and clinical and bedside teaching. Ignatian Pedagogy will be threaded throughout the course. Rooted in adult learning theories and human cognition, students will review these fundamental concepts and seamlessly apply them throughout the course. There is a strong focus on practical application, enabling participants to create innovative and engaging learner-centered experiences, establish supportive learning environments, and adeptly integrate feedback. As a culmination of their learning, students will craft a final project, utilizing one of these teaching modalities to instruct peers on a relevant topic, applying the skills in a real-world educational context., large group lecture, small group teaching, cased-based, problem based and team-based learning, flipped classroom, standardized patients, simulation, e-learning and clinical and bedside teaching); Define the concepts of adult learning theories (e.g., learning theory, human cognition); Apply knowledge and understanding of androgyny to class work during this course; Demonstrate course skills, including the creation of innovative and engaging learner-centered experiences which will be showcased in the teaching portfolio project; Appraise experience with teaching modalities in education through reflective writing.
Outcomes:
Categorize different teaching modalities (e.g

HPE 402 Technology in Education and Effective Lecture Skills (4 Credit Hours)
In this engaging course, through a series of hands-on activities, participants will design and produce an electronic lecture that skillfully incorporates critical components of effective instruction. Students will not only create an educational presentation, but also assess its effectiveness through peer review, showcasing their critical evaluation skills and the ability to use feedback for continuous improvement. By the course's conclusion, participants implement peer-reviewed feedback and integrate best practices to refine their lecture into a polished, pedagogically effective resource.
Outcomes:
Produce an engaging and impactful electronic lecture that incorporates critical components of effective instruction; Demonstrate critical evaluation skills through peer review of educational content; Use peer feedback to revise and enhance their lecture; Appraise use of technology in education with discussion posts

HPE 403 Principles of Curriculum Design (4 Credit Hours)
The course will focus on the formal process of curriculum development. Much of the course will cover the standard medical education curriculum development process developed by Kern and Thomas (Thomas PA, Kern DE et al. Curriculum Development for Medical Education: A Six-Step Approach. 3rd ed. The Johns Hopkins University Press). Throughout this course, students will delve into essential theoretical literature specific to healthcare education, equipping participants with a solid foundation. They will learn to pinpoint educational challenges through needs assessment and distinguish between learning goals and objectives. Furthermore, students will master the art of crafting effective learning objectives using Bloom's Taxonomy and selecting fitting evaluation designs. Participants will learn educational strategies that will allow them to achieve their curriculum objectives. Finally, students will gain practical strategies for collecting and leveraging educational data to continuously enhance pedagogy, ensuring their healthcare education practices are informed, effective, and patient centered.
Outcomes:
Develop familiarity with essential theoretical literature of Kern's Six-Step Approach to Medical Education curriculum development; Identify curricular problems; Formulate a needs assessment; Recall the fundamental differences between learning goals and objectives; Illustrate how to create learning objectives for courses and educational sessions utilizing Bloom's Taxonomy; Select an appropriate evaluation design based on the identified objectives; Evaluate the effectiveness and impact of various educational technologies on learning outcomes and instructional design; Develop strategies to gather, review, and utilize educational data to improve pedagogy

HPE 404 Statistical Methods for Educational Research (4 Credit Hours)
This course offers a foundational understanding of statistical analysis within the context of research in clinical and health professions education. Through a blend of theoretical knowledge and hands-on practice, students will become proficient in defining core statistical concepts, applying statistical methods to diverse data types, and recognizing statistical analysis as a versatile toolkit for uncovering insights in data. Additionally, they will explore how statistical thinking enhances problem-solving skills in health professions education research and gain an understanding of the purpose and proper application of statistical techniques. Practical skills include conducting statistical tests, interpreting their outcomes, and translating results into meaningful conclusions. By the course's conclusion, students will be well-prepared to engage in evidence-based research, make informed decisions, and contribute to advancements in both clinical practice and medical education.
Outcomes:
Define basic statistical concepts; Analyze statistics from clinical and educational data; Classify statistical analysis as a collection of techniques that are intended to uncover information in data; Discuss how statistical methodology is used to aid thinking in health professions education research; Describe proper use of the statistical techniques that are presented in this course; Compute statistical tests of research hypotheses using methods presented in this course; Interpret the meaning of tests of hypotheses and other statistical computations

HPE 405 Strategies in Assessment, Implementation, and Evaluation in HPE (4 Credit Hours)
This course is designed to equip students with the advanced skills and knowledge required to navigate the evolving landscape of healthcare education. This program offers a dynamic blend of theory and practice. Dive deep into the art and science of designing effective assessment strategies, implementing innovative educational techniques, and rigorously evaluating the outcomes in health professions education. Through critical analysis and synthesis, students will gain the skills to create holistic, evidence-based educational approaches.
Outcomes:
Apply advanced theoretical knowledge to real-world scenarios within the evolving landscape of healthcare education; Employ a blend of theory and practice to effectively address complex challenges and opportunities; Analyze the art and science of effective assessment strategies, innovative educational techniques, outcomes evaluations in health professions education; Demonstrate an understanding of various assessment and testing methods; Appraise educational practices, leveraging advanced skills and knowledge to lead positive change and innovation in healthcare education

HPE 406 Leadership in Health Professions Education (3 Credit Hours)
This course is designed to provide students with an understanding of the various theories that underpin leadership education and practice within the context of health professions education. As an active participant in this class, students will explore the presented leadership theories to shape their approach as an educator but also examine how these theories inform their interactions and engagement with the world within and beyond the healthcare and education domains. Participants will gain insights into how leadership principles can be applied to address the unique challenges and opportunities faced by health professions educators, helping them become a more effective leader and educator in the healthcare field, ultimately contributing to the advancement of healthcare education and practice.
Outcomes:
Review the fundamental concepts of leadership and the theories in the context of health professions education; Analyze ideas, arguments, and viewpoints related to leadership theories within healthcare and educational settings; Assess the effectiveness of different leadership styles, change agent qualities, and approaches in various organizational contexts, especially in the context of driving change; Articulate how one's personal developmental perspective influences both philosophical beliefs and practical applications in healthcare leadership and education

HPE 407 Administrative Skills and Organizational Change (3 Credit Hours)
This course has a clear focus on two main aspects: understanding how organizations undergo transformations and equipping individuals to drive change within an organization. It covers several key areas, including the driving forces behind change, the process of implementing change, the qualities, and skills necessary for effective change agents, and the behavioral theory explaining how both individuals and organizations evolve. A comprehensive grasp of the various theoretical frameworks shaping the organization and structure of higher education is integral to achieving proficiency in these areas. The goal of this course is to provide students with valuable insights into the major functions and structures within higher education. In essence, it's not focused on teaching administrative or faculty tasks but rather on helping participants understand the context within which they operate within higher education. This course introduces students to important concepts, theories, and fiscal practices in higher education. Moreover, it offers opportunities for students to analyze, test, and receive feedback on their financial decision making and its impact on critical higher education issues.
Outcomes:
Explain the significance of theoretical frameworks in shaping the structure of higher education and organizational dynamics; Apply knowledge of organizational change forces; Analyze real-world scenarios of organizational transformation; Examine the various factors contributing to the success or failure of change initiatives within organizations; Demonstrate competence in financial decision-making processes by making informed decisions that address critical higher education issues; Develop innovative approaches for implementing change within an organization

HPE 408 Health Professions Education Capstone Project (3 Credit Hours)
In this course students craft a research proposal primed for submission to the Institutional Review Board (IRB). Guided by seasoned educators and researchers, participants skillfully construct essential components of a robust research proposal that fills a current gap in the literature. Proposals will include an introduction, background, significance, thorough literature review, research methods, budget, and thoughtful implications and conclusions. By course end, students will not only have a well prepared research proposal but also the knowledge and confidence to undertake impactful research in the dynamic landscape of health professions education.
Outcomes:
Demonstrate a grasp of health professions education research principles; Construct an effectively structured research proposal that includes a well-defined introduction, background/significance, and literature review; Develop the research methods, implications, and conclusion sections of a health professions educational research proposal; Generate a coherent, complete, well-structured, and insightful proposal ready for IRB submission

Infectious Disease & Immunology (IDIM)

IDIM 400 Infections and Immunology (3 Credit Hours)
IDIM 400 integrates basic knowledge of infectious microorganisms with an understanding of innate and adaptive immune systems that react against them. Following a review of infections caused by specific infectious organisms, IDIM 400 will focus on specific aspects of immune systems and how they interact to remove these infectious microorganisms.
Outcomes:
1) Explain the cellular basis of immune development; 2) Differentiate between the mechanisms of activation of immune systems; 3) Analyze the mechanisms involved in combating bacterial and viral infections

IDIM 401 Conceptual Bases of Infectious Diseases (2 Credit Hours)
IDIM 401 integrates a basic science understanding of microorganisms with an understanding of their role in human health. Following a review of bacterial physiology and gene expression, the focus will be on bacterial disease, including basic strategies used to cause disease and details of pathogenesis by medically important bacterial pathogens.
Outcomes:
1) Describe differences between bacteria and eukaryotes; 2) Understand mechanisms by which bacteria cause disease; 3) Understand limitations of current antimicrobial therapies; 4) Differentiate between similar diseases with different causes

IDIM 403 Parasitology and Virology (2 Credit Hours)
Pre-requisites: IDIM 400
The Parasitology and Virology course IDIM 403 is designed to describe infections caused by microorganisms and animal diseases transmissible to man, with a primary focus on parasites and viruses. We will emphasize the pathophysiology of these diseases in humans of various ages. This course will promote an understanding of how the properties of certain infectious agents can in some cases avoid an adequate immune response.
Outcomes:
1) Explain the mechanisms of pathogenicity of various infectious agents; 2) Analyze the mechanisms by which emerging viruses arise; 3) Apply knowledge to viral vaccine development

IDIM 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

IDIM 492 Research (1-8 Credit Hours)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. IDIM 492 is designed to give credit for the research efforts that will result in the Master's thesis.

IDIM 501 Seminar (1 Credit Hour)
IDIM 501 is designed to help students stay abreast of current topics in infectious disease and immunology. Students will attend weekly seminars and are encouraged to interact with invited seminar speakers by asking questions and contributing to group discussions. Upon completion students will have enhanced their understanding of current research.
Outcomes:
1) Describe the results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar; 3) Question new data or their interpretation

IDIM 502 Special Topics in Infectious Disease and Immunology (0-5 Credit Hours)
IDIM is designed to immerse students in current literature, with new topics chosen each year. Students will read the primary literature and participate in discussion sessions. The course will enhance the ability of the student to critically read and interpret scientific literature in infectious disease and immunology.
Outcomes:
1) Critically read and discuss scientific literature in the area covered by the course; 2) Discuss experimental approaches, their limitations, and the conclusions that can be drawn from observed results

IDIM 595 Thesis Supervision (1 Credit Hour)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. This course is similar to IDIM 492, except that students are expected to perform at an advanced level in all aspects.
Outcomes:
Understand the significance and clearly communicate the research problem; Describe the approaches used and results obtained; Draw conclusions and identify future directions

Integrative Cell Biology (ICB)

ICB 401 Gross Anatomy (6 Credit Hours)
The student develops a knowledge and understanding of the basic concepts and facts of human gross anatomy as it relates to function and clinical problems. Lectures, clinical case-based and problem-based learning, computer-aided instructional materials, and cadaver dissection serve as guides to laboratory study.

ICB 403 Graduate Histology (3 Credit Hours)
The course is designed to provide the student with a basic knowledge and understanding of the structure and function of the human body at the light and electron microscopic level. The interdependence between structure and function in the different tissues and organs of the body is emphasized. Clinical and research application of the course material are also stressed.

ICB 411 Advanced Gross Anatomy (2 Credit Hours)
The study of the gross structure of the human body at an advanced level presented at conference sessions. Registrants for this course may include graduate students, advanced medical students, as well as those who hold the M.D. degree and are concurrently registered for advanced work in one of the clinical departments.

ICB 445 Scientific Literature: Review & Critique (0-1 Credit Hours)
Students are taught critical evaluation of scientific literature, hypothesis testing, and presentations. This course involves attendance at scientific presentations by students and outside speakers and a journal club component. Both staff and students participate and the class is only offered during the fall semester. This course alternates with ICB 446 - Review and Seminar.
Outcomes:
Be competent with public speaking and broaden scientific knowledge; Learn to understand and evaluate the scientific contribution of the paper

ICB 446 Review Seminar (0-1 Credit Hours)
The student participates in a series of seminars and journal clubs that provide a forum for intensive review of scientific topics. Research progress reports of the students is incorporated into this course as a part of the scientific presentation. This course alternates with ICB 445 - Scientific Literature: Review & Critique and is only offered during the spring semester.
Outcomes:
Gained exposure to research scientists from outside Loyola University Chicago; Obtained opportunities to network with established scientists

ICB 459 Research (1-8 Credit Hours)
Independent research for thesis or dissertation under the supervision of an appointed faculty adviser. Credit various upon assigned effort and time spent in the laboratory. Requires a written report.

ICB 462 Teaching of Anatomy I (0-2 Credit Hours)
A practical experience in the teaching of Gross Anatomy to graduate and medical students. Students assist in the planning, preparation, and teaching of laboratory sessions. The course allows students to place the experience of teaching gross anatomy on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 463 Teaching Anatomy II (0-2 Credit Hours)
A practical experience in the teaching of histology to graduate and medical students. Students assist in the planning, preparation and teaching of laboratory sessions. The course allows students to place the experience of teaching histology on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 501 Special Topics in Anatomy (1-2 Credit Hours)
Occasionally specific faculty members may offer a specialized seminar course. The purpose of such courses is to further graduate student's knowledge in a specialized current scientific research area. The graduate students explore in detail one or more areas of special interest through seminars, conferences, library and laboratory work.

ICB 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

ICB 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Microbiology and Immunology (MIIM)

MIIM 411 Basic Molecular Microbiology (2-3 Credit Hours)
This course is an introduction to fundamental concepts in microbiology
Outcomes:
Students will be able to demonstrate an understanding of the morphology, growth, division, development, molecular biology, genetics and physiology of microorganisms

MIIM 413 Basic Concepts of Immunology (3 Credit Hours)
This course is an introduction to the concepts of host immunity and defense.
Outcomes:
Students will be able to understand the fundamental principles of immunobiology, immunochemistry and immunogenetics, host immunity and defense, and the basic concepts of normal host defense versus the untoward responses (hypersensitivity) and their consequences

MIIM 414 Virology (3 Credit Hours)
This is a survey course that examines animal viruses and their interactions with host cells.
Course equivalencies: X-MBIO414/MIIM414
Outcomes:
Students will be able to demonstrate an understanding of viral structure and multiplication, and molecular interactions of important animal viruses with their host cells

MIIM 415 Medical Immunology (2 Credit Hours)
Pre-requisites: General Biology and/or Cell Biology Course is open to all Integrated Program in Biomedical Sciences PhD and MS students, graduate Nursing students, medical students, and advanced undergraduate students
The medical immunology course provides an in depth description of the components of the innate and adaptive immune system and how they interact to protect humans against infectious microorganisms. The course will have two 3 hour sessions per week for 8 weeks as well as 2 written exams.
Outcomes:
Be able to describe the development and mechanism(s) of activation of the innate and adaptive immune systems, their regulation and outcomes of their inability to do so

MIIM 420 Methods & Techniques in Microbiology Research (1 Credit Hour)
This course is an introduction to the theory of techniques used for research in microbiology and immunology.
Outcomes:
Students will be able to demonstrate competency with various research techniques including spectrophotometry, centrifugation, chromatography, photography, as well as other methods necessary for the study of microbiology, immunology or virology

MIIM 431 The Molecular Biology of Viruses (3 Credit Hours)
Pre-requisites: Include undergraduate or graduate-level courses in cell biology and biochemistry, graduate course 402 Microbes and Hosts, and / or prior approval from the course director(s)
The course will cover molecular biology and biochemistry of virus infections. Current understanding of virus-cell entry, replication, and assembly will be prominent themes. Course will include lectures on viral evolution, ecology, pathogenesis and viral immunology. The interactive course will include lectures, review of current virology literature, and student-led presentations.
Course equivalencies: MBIO431/MIIM431
Outcomes:
Detailed understanding of virology; be able to integrate concepts in this field with chemistry and health science; comprehend and appreciate current literature; be prepared for lab studies

MIIM 441 Immunology-Immunochemistry (3 Credit Hours)
This is an advanced immunology course that emphasizes structural concepts in immunology. Review and discussion of current literature exemplifies concepts presented in lecture.
Outcomes:
Students will demonstrate an understanding of the chemical definition of antigens, immunogens, structural concepts in immunology, immunoglobulin structure, structure of antigens and their interactions, and recognition of antigen by T-cells and B-cells

MIIM 442 Cell & Molecular Immunology (3 Credit Hours)
This is an advanced immunology course that examines the cellular and molecular basis of the immune response.
Outcomes:
Students will be able to demonstrate an understanding of the cellular and molecular basis of the immune response, as well as the cellular cooperation essential to the nature of immunology

MIIM 443 Molecular B-Cell Immunology (4 Credit Hours)
This is an advanced molecular immunology course with emphasis on proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system. Course includes critical evaluation of recent literature.
Outcomes:
Students will demonstrate an understanding of proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system

MIIM 461 Microbiological Cytology & Ultrastructure (3 Credit Hours)
This is an advanced course that presents the principles and application of light and electron microscopes for the study of cell structure and function.
Outcomes:
Students will demonstrate an understanding of the principles of light and electron microscopes and their use as tools in cellular and molecular biology

MIIM 471 Molecular Microbial Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

MIIM 490 Molecular Biology of Oncogenesis (2 Credit Hours)
This course is an advanced course that provides a detailed analysis of molecular events that result in the tumorigenic transformation of eukaryotic cells.
Outcomes:
Students will demonstrate an understanding of oncogenesis by DNA and RNA tumor viruses, the role of oncogenesis and their relationship to normal genes, hormonal effects, and chromosomal abnormalities

MIIM 492 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.
Outcomes:
Students will learn how to perform laboratory work, including how to appropriately control their experiments, how to interpret results, and what conclusions they may draw

MIIM 501 Seminar (0 Credit Hours)
This course provides opportunities for students to hear about cutting-edge research being conducted nationally and internationally.
Outcomes:
Students will be able to demonstrate a general awareness of current research in the area of microbiology, immunology and virology

MIIM 502 Special Topics (1-4 Credit Hours)
This course is covers a specific topic in microbiology, immunology or virology.
Outcomes:
Students will be able to able to articulate a general understanding of the selected topic

MIIM 503 Current Literature (0-1 Credit Hours)
This course is a paper-driven course in which papers of current interest are read and discussed.
Outcomes:
Students will demonstrate an ability to identify, critically analyze and articulate key concepts of scientific papers

MIIM 595 Thesis Supervision (1 Credit Hour)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor.
Outcomes:
Students will contribute to the existing body of scientific knowledge and/or methodology in their thesis area; They will defend their results to their committee members

MIIM 600 Dissertation Supervision (1 Credit Hour)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor.
Outcomes:
Students will add new knowledge to the existing body of scientific knowledge in their dissertation area; They will defend their results in a public forum

Neuroscience (NRSC)

NRSC 410 Cellular & Molecular Neurobiology (3 Credit Hours)
This course will review current knowledge of the morphological, biophysical and biochemical properties of neurons. Fundamental neuronal network processes such as stimulus transduction, neuronal plasticity, information processing, and learning and memory will be reviewed.
Outcomes:
An advanced knowledge of the biophysical and biochemical properties of nerve cells and fundamental aspects of more global central nervous system function

NRSC 415 Neurochemistry (3 Credit Hours)
This course is a team-taught neurochemistry course that integrates basic biochemical mechanisms of neurotransmitter synthesis, storage, reuptake, and inactivation with applied correlates to central and peripheral nervous system neurodegenerative disorders. Organic chemistry and neurobiology/neurophysiology are required prerequisite courses. Emphasis is placed on student participation including a student-held lecture series covering a contemporary neurochemical topic of their choosing.
Interdisciplinary Option: Neuroscience

NRSC 421 Neuroscience Teaching (1 Credit Hour)
This course consists in serving as a Teaching Assistant in the medical Neuroscience course labs and proctoring the medical neuroscience course exams. It also includes a weekly pre-lab meeting in which the material for that week's lab is discussed.
Outcomes:
Experience in teaching neuroanatomy for Neuroscience Graduate Program students

NRSC 422 Behavioral Neuroscience (2 Credit Hours)
This course discusses the brain's role in sensory perception, higher perceptual functions, attention, learning and memory, executive function, and emotion. It consists of weekly lectures given by the professor or by one or two students.
Outcomes:
An understanding of higher brain function and experience giving presentations

NRSC 423 Special Topics in Neuroscience (3 Credit Hours)
Restricted to Graduate level students. This course explores a wide spectrum of neuroscience-related topics, and the subject matter will vary with each offering.
Outcomes:
Measures include exam performance, in-class participation, and student presentation

NRSC 499 Research (1-9 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

NRSC 502 Neuroscience Journal Club (0-1 Credit Hours)
Pre-requisites: Must be member of the Neuroscience Graduate Program
One hour weekly course during which all students in the Neuroscience Graduate Program meet to discuss and critically evaluate recent, high impact journal articles covering varied neuroscience topics under the direction of two faculty mentors with neuroscience expertise.
Outcomes:
Students will advance their knowledge of new neuroscience concepts and methods; Students will gain experience in presenting in front of a group; Students will gain confidence in their abilities to critically evaluate experimental design and statistical methods

NRSC 503 Neuroscience Seminar (0-1 Credit Hours)
In both the fall and spring this course includes monthly Neuroscience seminar presentations by internal and external speakers. In the fall, the course also includes weekly journal club presentations by the graduate students: in the spring the course also includes weekly research progress reports by the graduate students.
Outcomes:
A broad overview of current topics in the field and experience giving research presentations

NRSC 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

NRSC 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Pharmacology (PHAR)

PHAR 405 Pharmacology Journal Club (0-1 Credit Hours)
This course involves students in reading and presenting the scientific literature in journal club format with the goals of learning to, i) evaluate the pharmacological literature and voice a critique in a constructive manner, ii) present such literature in a peer-context, and iii) assimilate information presented by other speakers and formulate, ask, and discuss around relevant appropriate questions.

PHAR 406 Special Problems in Pharmacology (1-4 Credit Hours)
This course covers a specific topic in pharmacological or biomedical sciences. The topics can vary among different special topics courses.

PHAR 407 Fundamentals of Drug Discovery and Development (3 Credit Hours)
This course introduces the process of drug discovery, and students will explore the theoretical and practical aspects of the entire process from concept to clinical trials. Topics include selection, design and use of disease models, current methods and strategies of drug target identification, lead molecule identification, the clinical trial process and pre- and post-market safety.
Outcomes:
Upon completion of this course, the students will have sufficient understanding of the drug discovery process to: 1) Discuss the methods and strategies used to identify potential drug targets; 2) Describe approaches used to screen for lead molecules; 3) Articulate the general FDA regulatory requirements encountered in bringing a new drug to market; 4) Identify requirements for pre-clinical assessment of potential compounds; 5) Define and describe the steps of the clinical trials process; and 6) Articulate and discuss ethical aspects in drug development, including, but not limited to, animal use, clinical trials, intellectual property and research design and integrity

PHAR 408 Molecular Basis of Disease and Therapeutics (3 Credit Hours)
The course focus is on understanding contemporary research in the pathophysiology of major human diseases and in the development of respective therapeutic treatment strategies. Emphasis will be on cutting edge studies in molecular medicine, including topics in cardiology, endocrinology, oncology, inflammatory diseases and in the neurosciences. There are no prerequisites, but students should have a solid understanding of cell and molecular biology, biochemistry and systems physiology.
Outcomes:
Understand contemporary research strategies applicable to investigating the molecular basis of disease and therapeutics and develop critical thinking and writing skills in hypothesis testing, experimental design and data analyses

PHAR 409 Principles of Pharmacology (3 Credit Hours)
This course introduces students to the fundamental principles of pharmacology and the clinical use of the major classes of drugs currently used with a focus upon fundamental concepts. Topics include drugs and their receptors, molecular aspects of drug targets and drug action, pharmacodynamics and the quantitative aspects of drug-receptor interactions, pharmacokinetic properties of drugs influencing drug distribution and drug dosing, drug metabolism and the effects of genetics on drug action, mechanisms of drug toxicity, and scientific approaches to the discovery of new drugs. Finally, the pharmacology and clinical uses of the major classes of drugs, including drugs used to treat diseases of various systems including cardiovascular, central nervous system, endocrine/reproductive systems, and cancer are covered.

PHAR 410 Signal Transduction (3 Credit Hours)
This course is open to all Ph.D., M.D./Ph.D., and M.S. students. Students will gain a theoretical and practical understanding of how extracellular signals are transduced through receptors into metabolic events. It is designed for second year PhD students who have completed the Biomedical Sciences core curriculum. The format is one lecture followed by one research paper discussion for each topic. Students will also gain in-depth knowledge of the signal transduction topics covered in the course.
Outcomes:
Students will be able to interpret data and design experiments examining signal transduction pathways

PHAR 415 Current Topics in Pharmacology and Epidemiology of Disease (2 Credit Hours)
This advanced graduate level course will cover an up-to-date overview of topics directly relevant to pharmacovigilance, pharmacoepidemiology, and the factors that play a role in success or failure of approved therapeutic agents.
Outcomes:
Students who complete this course will gain knowledge of major epidemiology concepts and statistical principles used in epidemiology and pharmacovigilance

PHAR 420 Pharmacovigilance: A Practical Approach (4 Credit Hours)
This advanced graduate level course will provide an up-to-date and in-depth understanding of pharmacovigilance in the context of modern pharmaceutical drug development and pharmacology. Pharmacovigilance is the pharmacological science relating to the detection, collection, assessment, monitoring, and prevention of adverse effects associated with pharmaceutical products. Enrollment Condition: Drug Discovery (PHAR 407), recommended but not required Students will be able to identify and describe the regulatory environment and product safety as it pertains to the collection, assessment, reporting and analysis of adverse events.
Outcomes:
Upon completion of this course, students will demonstrate an understanding of pharmacovigilance and patient safety

PHAR 453 The Teaching of Pharmacology (0-1 Credit Hours)
This course teaches the practice and pedagogy of graduate level teaching. Students work under supervision to prepare and present a didactic lecture which is reviewed by faculty and students.

PHAR 499 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.
Outcomes:
Generate, analyze, and interpret original research data using appropriate analytical and statistical approaches; Apply appropriate experimental methodologies to investigate the hypotheses in your proposal, including, if appropriate, therapeutic discovery/development, molecular mechanisms of disease and drug action, toxicology, and drug safety/pharmacovigilance; Integrate findings from experimental studies with current scientific literature to advance understanding of pharmacological mechanisms; Demonstrate independence, professionalism, and ethical conduct in the planning, execution, and reporting of your research

PHAR 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Develop and write a research thesis proposal addressing a significant question in molecular pharmacology; Generate, analyze, and interpret original research data using appropriate analytical and statistical approaches; Integrate findings from experimental studies with current scientific literature to advance understanding of pharmacological mechanisms; Demonstrate independence, professionalism, and ethical conduct in the planning, execution, and reporting of your research

PHAR 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Develop and write a research dissertation proposal addressing a significant question in molecular pharmacology; Apply appropriate experimental methodologies to investigate the hypotheses in your proposal, including, if appropriate, therapeutic discovery/development, molecular mechanisms of disease and drug action, toxicology, and drug safety/pharmacovigilance; Generate, analyze, and interpret original research data using appropriate analytical and statistical approaches; Integrate findings from experimental studies with current scientific literature to advance understanding of pharmacological mechanisms; Demonstrate independence, professionalism, and ethical conduct in the planning, execution, and reporting of your research

Physiology (PIOL)

PIOL 401 Physiology (4 Credit Hours)
This course integrates the contents of two sections of the medical school (M1) course Function of the Human Body course (PIO L301); with additional meetings to present discuss papers at graduate level (2 paper presentations per graduate student). In the Fall semester, students will review cell physiology and autonomic neuroscience, and will learn cardiovascular and renal physiology in depth. The course topics will include introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations, and renal physiology. In the Spring semester, students will learn pulmonary, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. Instructor Consent Required.
Outcomes:
Students familiar with introductory physiology are expected to learn and understand cardiovascular, reproductive and endocrine systems in an integrative fashion in this course; Emphasis will be placed on understanding key concepts of normal physiological and biochemical systems in healthy humans; Selected aspects of pathophysiological processes will be discussed to illustrate how an understanding of normal function can be applied to clinical medicine

PIOL 410 Intro to Research (1-3 Credit Hours)
This course provides an introduction to a wide variety of commonly used techniques in cell and molecular physiology research, with concomitant laboratory rotations to learn those techniques.

PIOL 412 Research (1-6 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PIOL 414 Graduate Colloquy (1-8 Credit Hours)
Special advanced topics course with variable credit. Paper discussion and instructor-led presentations.

PIOL 416 Research Seminar (1 Credit Hour)
Seminar presentation on PhD candidate's dissertation topics advance.

PIOL 417 Cellular Physiology (3 Credit Hours)
Pre-requisites: Restricted to Master of Physiology Program students
The major goal of the Cellular Physiology course is to define the molecular and cellular basis of systems Physiology and Pathophysiology. The course consists in distinct sessions of teaching, problem solving, and reviews.
Outcomes:
- Understand the relationships among molecular, cellular and systems physiology; - Understand membrane structure and function; - Understand distinct metabolic and signaling pathways

PIOL 418 Teaching of Physiology (0 Credit Hours)
Teaching training and practice opportunities for upper level PhD candidates.

PIOL 420 Methods/Technical in Physiological Research (2 Credit Hours)
This course is intended for students seeking advanced knowledge of cutting-edge experimental approaches currently used in cardiovascular, metabolic, and neuroscience research. These topics will be discussed in both a technical/methodological sense, and in the context of the current scientific literature.

PIOL 421 Function of the Human Body I (4 Credit Hours)
This course will present the basic concepts and principles of human physiology. The course topics will include: introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations and pulmonary physiology. The format will be lectures, simulations, small group problem sessions and scheduled reviews. Small group problem sessions will be held after each subject area and will focus on clinical application and integration of conceptual information presented in lectures. Small group sessions and reviews also will provide the student with the opportunity to obtain clarification from instructors of any outstanding questions and are designed to encourage active learning, as well as develop critical thinking and problem solving skills. Students will be evaluated by multiple choice and essay exams given after each of the 5 major topic areas. Course material will be geared toward non-thesis Masters students. Given that physiology is the basis of medicine, this course will prepare students with the basic science knowledge to successfully continue their professional development in future biomedical programs.
Outcomes:
Students will be able to describe the cellular mechanisms responsible for cardiac, skeletal and smooth muscle contraction and the factors that regulate their activity

PIOL 422 Function of the Human Body II (4 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course presents the basic concepts and principles of human physiology. The course will be presented over one semester and the topics include: renal, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. The format will be lectures, small group problem sessions and scheduled reviews.
Outcomes:
Students will be able to explain the cellular mechanisms responsible for normal renal, acid-base, endocrine, gastrointestinal and reproductive physiology

PIOL 423 Biochemical Physiology (3 Credit Hours)
Biochemical Physiology will give students knowledge of foundational processes that dictate cellular physiologic processes. Topics include the structure and properties of nucleic acids, amino acids, protein structure and folding, enzyme kinetics, metabolic pathways and intracellular signal transduction. The course will present the biochemical physiology.
Outcomes:
Student completing this course should: - Understand the biochemical mechanisms which underlie physiological processes; - Understand protein structure dynamics and how these structures are dictated by second

PIOL 425 Physiology of Aging (3 Credit Hours)
Pre-requisites: BMSC 410, BMSC 412, BMSC 416
The focus of this special topics course is on the unique physiological changes that occur with aging. Didactic instruction will be supplemented with readings from current primary literature in the field. Students will be responsible for reading and presenting articles for group discussion.
Outcomes:
1) Acquire advanced knowledge of aging processes; 2) Identify key gaps in knowledge in the aging field; 3) Engage in transformational/critical discussion of seminal papers in the aging field

PIOL 426 Biophysical Research Methods (3 Credit Hours)
Pre-requisites: IPBS Core curriculum The focus of this special topics course is to introduce students to the field of biophysics, with special focus on practical applications of biophysical methods in research Didactic instruction will be supplemented with readings from current primary literature in the field. Students will be responsible for reading and presenting articles for group discussion.
Outcomes:
Demonstrate a general understanding of the field of biophysics; Demonstrate deep knowledge and understanding of fundamental aspects cell mechanics, muscle mechanics, and integrated biomechanics; Demonstrate knowledge of current biophysical methods used in research; Demonstrate knowledge of fluorescence spectroscopy; Demonstrate knowledge of microscopy; Demonstrate understanding of computational biology approaches; Critically evaluate biophysical data from the literature; Interpret biophysical data for a general audience and effectively communicate biophysical information in both oral and written forms; Incorporate high standards of ethics into data interpretation and presentation

PIOL 430 Basic Human Anatomy (2 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course will provide students with the basic concepts and facts of human gross anatomy as they related to physiology and function. Specific sections include the musculo-skeletal components of the extremities, trunk and head, the peripheral nervous system to include both the somatic and autonomic systems, the cardiovascular system, respiratory system, digestive system, urinary system and reproductive system. Each system will integrate embryology, radiology and basic clinical applications.
Outcomes:
Students will be able to describe and integrate basic human anatomy of the major organ systems to physiology and clinical medicine

PIOL 446 Cardiovascular Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on cardiovascular physiology topics.

PIOL 450 Fundamentals Of Neurophysiology (4 Credit Hours)
This course imparts the basic concepts and fundamentals of Neurophysiology, with emphasis on concepts relevant to human neuroscience. Students will learn Neurophysiology fundamentals at the cellular, structural and physiological levels of various complex systems in the brain, with specific discussion of clinical correlates of Pathophysiological conditions.
Outcomes:
Students successfully completing this course will be able to understand and explain neurophysiological mechanisms relevant to normal and abnormal conditions

PIOL 461 Introduction to Human Pathophysiology (5 Credit Hours)
Restricted to students in the Masters of Science in Physiology program. This course presents the basic concepts and principles of human pathophysiology. The course will be presented over one semester and the topics include: clinical evaluation of cardiac structure and function followed by a review of the major disorders of cardiovascular function.
Outcomes:
Students will be able to critically evaluate basic pathophysiological mechanisms underlying the most common forms of adult human cardiovascular disease

PIOL 468 Neurophysiology Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on neurophysiology topics.

PIOL 470 Excitability & Ion Transport (1-4 Credit Hours)
The course focuses on basic concepts of the physical movement of ions during activation of voltage- and ligand- gated ion channels.

PIOL 472 Structure/Function Membrane Proteins (3 Credit Hours)
The course explores basic and advanced concepts of membrane proteins structure, cell biology and function.

PIOL 500 Professional Development I (3 Credit Hours)
Must be enrolled in the MSP program. Professional Development will meet once/month throughout the one-year MSP program. Students will receive information about the options available for a career in the health sciences and will enhance their professional portfolio by participating in a variety of workshops designed to better equip them for a health science career.
Outcomes:
Students will be able to understand the curriculum and admission requirements of the various professional health programs and gain an understanding of the interview process

PIOL 501 Professional Development II (1 Credit Hour)
Pre-requisites: PIOL 500
Professional Development will meet and have self-directed study time throughout the spring semester of the MSMP program. Students will receive bi-weekly, specific individualized one-on-one mentoring from their academic advisors and also meet with the course director for specific lectures on their AMCAS and AACOMAS applications for medical and DO schools. Students will continue to enhance their knowledge of the admissions process by having general lectures and individual sessions discussing their motivation, enhancing their self-awareness, writing their personal statements, their selection of appropriate medical schools, selection of activities (community and medical volunteering, health care exposure (shadowing, scribing, etc.), research for their application, overall discussions on writing their secondary statements, choice of letters of recommendation, etc. MSMP students only.
Outcomes:
Following successful completion of this course, the MSMP student will: 1) Demonstrate enhanced ability for self-awareness and analysis regarding their medical school application; 2) Demonstrate self-reflection in the selection of target medical schools, discussing their fit in terms of each medical school's mission statement; 3) Continue working with their academic advisor to prepare a well-written personal statement appropriately tailored to the professional program of choice; 4) Demonstrate understating of the application process and preparation of application forms

PIOL 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

PIOL 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

PIOL 605 Physiology Study (0 Credit Hours)
Must be enrolled during fall semester of MS program in Physiology. Holding course to keep the student active in the program while completing MS degree requirements.

Biomedical Sciences

The Graduate School at the Health Sciences Campus offers advanced degree programs in a range of disciplines in the biomedical sciences.

A PhD degree in biomedical sciences is offered through our Integrated Program in Biomedical Sciences (IPBS). The IPBS is an umbrella admission program that allows students to select one of six different tracks for specialization (Biochemistry, Molecular, and Cancer Biology, Cell and Molecular Physiology, Integrative Cell Biology, Microbiology and Immunology, Molecular Pharmacology and Therapeutics, and Neuroscience) . Students admitted to the Stritch School of Medicine MD/PhD enroll in the IPBS during the PhD-phase of their training and join one of the six IPBS tracks.

Master of Science degrees in the biomedical sciences are offered by each of our six IPBS tracks, plus programs in Infectious Disease and Immunology, Cellular and Molecular Oncology, Clinical and Applied Proteomics, Mass Spectrometry and Medical Physiology.

A Pharmacovigilance Certificate program is also offered, in addition to a MS in Pharmacology/MBA dual degree offered in conjunction with the Quinlan School of Business.

Graduate Programs

- Biochemistry and Molecular Biology (MS) (p. 1352)
- Biochemistry, Molecular and Cancer Biology (PhD) (p. 1353)
- Biochemistry and Molecular Biology (MD/PhD) (p. 1860)
- Cell and Molecular Physiology (MS) (p. 1356)
- Cell and Molecular Physiology (PhD) (p. 1356)
- Cell and Molecular Physiology (MD/PhD) (p. 1864)
- Cellular and Molecular Oncology (MS) (p. 1358)
- Health Professions Education (MHPE) (p. 1360)
- Health Professions Leadership and Education Certificate (p. 1361)
- Infectious Disease and Immunology (MS) (p. 1361)
- Integrative Cell Biology (MS) (p. 1362)
- Integrative Cell Biology (PhD) (p. 1364)
- Integrative Cell Biology (MD/PhD) (p. 1872)
- Medical Physiology (MS) (p. 1365)
- Microbiology and Immunology (MS) (p. 1366)
- Microbiology and Immunology (PhD) (p. 1367)
- Microbiology and Immunology (MD/PhD) (p. 1881)
- Molecular Pharmacology and Therapeutics (MS) (p. 1369)
- Molecular Pharmacology and Therapeutics (PhD) (p. 1372)
- Molecular Pharmacology and Therapeutics (MD/PhD) (p. 1883)
- Neuroscience (MS) (p. 1374)
- Neuroscience (PhD) (p. 1375)
- Neuroscience (MD/PhD) (p. 1885)
- Pharmacology/Business (MS/MBA) (p. 1887)
- Pharmacovigilance Certificate (p. 1377)

Biochemistry and Molecular Biology (MS)

The goal of the Master of Science in Biochemistry and Molecular Biology is to train students in the basic science and methodology of Biochemistry and Molecular Biology, to allow them to apply this knowledge in jobs as research assistants in academy or the biotechnology industry, or as teachers in primary or secondary education. Students graduating with an MS degree often obtain additional education in PhD and MD programs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Understand concepts in biochemistry and molecular biology.
- Develop and test research-based hypotheses.
- Implement research projects in an academic setting.
- Write scientific abstracts and manuscripts on their own projects.

Biochemistry, Molecular and Cancer Biology (PhD)

The PhD program in Biochemistry, Molecular, & Cancer Biology is part of the Integrated Program in Biomedical Sciences at Loyola

University's Health Sciences campus. The goal of this program to train students as independent investigators who will go on to post-doctoral fellowships following the completion of the degree, and eventually become independent academic researchers and teachers.

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:

- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology
- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 18 credits hours of Research. Students who take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the Comprehensive Exam.

BMB 501	Molecular Biology Journal Club	1
BMB 502	Seminar in Molecular Biology	0
BMB 600	Dissertation Supervision	1
Total Hours		**49**

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the spring/summer of the second year. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students

who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo three laboratory rotations beginning in the first semester to identify a research advisor. Students select laboratories for each rotation from a list of available advisors and in consultation with the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a public seminar, approved by the Dissertation Committee and deposited in a public database.

	Hours	**4**
	Total Hours	**49**

1. Research credits are variable (1-9 credit hours) and fewer can be taken to accommodate additional elective courses.
2. Elective Courses (12 credits hours) may be taken in anytime in the first three years of the program, depending on their offering.
3. Students enroll in BMB 501 Molecular Biology Journal Club, BMB 502 Seminar in Molecular Biology, and BMB 600 Dissertation Supervision each semester for the remainder of time in the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in biochemistry, molecular biology, and cancer biology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.

- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Cell and Molecular Physiology (MS)

The Master of Science in Cell and Molecular Physiology (MS CaMP) is a research-intensive program that provides a broad, foundational knowledge of cellular, molecular, and systems-level physiology as well as the opportunity to pursue research with faculty mentors. The MS CaMP program fosters a stimulating and exciting research environment.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

MS CaMP students will be able to demonstrate ability in:

- Gaining a general knowledge base in the biomedical sciences
- Acquisition of deeper knowledge of past and current scientific literature in a more specific field within physiology (i.e., in the chosen track of study)
- Ability to form hypotheses and to design and perform appropriate experiments to test these hypothesis
- Acquisition of oral and written communication skills for scientific peers and general audiences

Cell and Molecular Physiology (PhD)

Physiology is the study of the function of living organisms. The PhD in Cellular and Molecular Physiology trains students to acquire, analyze and integrate data obtained from their basic research into a physiological context to understand the molecular basis of cell function and dysfunction within the organism. With cardiovascular research and neurosciences & metabolism as main research topics, students receive a solid integrated training in basic medical sciences including biochemistry, biophysics, cell biology, molecular biology, physiology and pathophysiology.

- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Cellular and Molecular Oncology (MS)

The Cellular and Molecular Oncology Master of Science (CMO MS) program will prepare master's level scientists to meet the changing landscape of cancer research. Our CMO MS graduate program focuses on training and providing both the academic and laboratory research tools to best prepare graduate students to meet the challenges within the field of oncology early in their careers.

Students will be trained for future careers in the pharmaceutical, biotech, or biomedical industry. Top researchers within Loyola's Department of Cancer Biology will mentor CMO MS students toward the successful completion of their thesis research, directly involving students in the lab from day one. The profile of CMO MS students will be as diverse as the subject matter that they seek to study, many may seek to prepare themselves for an industry-related career, others will become top

candidates for PhD programs, and some will be competitive candidates for healthcare professional schools.

A commonality linking Loyola's CMO MS graduate students lies in their fundamental passion for effecting change in cancer-research.

Research and Thesis

Hands-on laboratory research will begin in the first semester of study. Students will complete two lab rotations to help them identify their research advisor and lab. Upon completion of the first semester, a student's research advisor will be assigned and subsequent lab time will be spent designing, conducting, and analyzing independent research projects under the supervision of the student's advisor. Upon completion of the CMO MS program, graduates can expect they will be highly knowledgeable in the methodology and skill necessary for success in future research endeavors.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Deploy a number of concepts, techniques and resources, within the specific topic of their thesis project, to carry out a largely independent research project in experimental oncology.

- Analyze, interpret and comprehend experimental data in a critical fashion.
- Engage in self-directed problem solving. Employ critical thinking and evaluate risks in original scientific projects.
- Use problem-solving experiences to diagnose and troubleshoot new failures to fix experimental faults in a rapid and consistent fashion.
- Being familiar with scholarly publications and the major open questions within an area of investigation.
- Present, verbally and in written form, their scientific results, relating the results to the existing body of knowledge.

Health Professions Education (MHPE)

Teaching, leading, and learning in health professions education has evolved to necessitate an understanding of pedagogy, assessment, feedback, leadership and scholarship in order to create curricula, lead programs, and properly execute academic research. Our MHPE program targets individuals who seek a more granular development of these skills to advance their effectiveness as health professions educators and their careers. Our focus will be on healthcare professionals who are serving or desiring to assume roles in educational leadership, healthcare organizations, or professional societies.

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Demonstrate newly gained expertise in health professions pedagogy by receiving a passing score on a final project utilizing an evidence-based teaching approach.
- Cultivate an inclusive and culturally competent learning environment, thereby, allowing all to live out LUC's commitment to social justice, as evidenced by receiving a passing score on discussion posts and replies within each course.
- Apply leadership skills obtained through specialized coursework, particularly skills to help form and educate other healthcare professionals, as evidenced by receiving a passing score on the leadership philosophy paper.
- Design an impactful and purpose-driven curricula related to a relevant health professions topic, as evidenced by receiving a passing score on a final curriculum design project.
- Develop expertise in educational synthesis and scholarship, as evidenced by designing a capstone research project that earns a passing score.

Total Hours		**30**

Students will participate in the Department of Medicine's Clinical Grand Rounds that are held once a week. Students are expected to attend at least five Grand Rounds seminars, generally in their second year. This requirement allows Master's students to interact with physicians, residents, and medical students.

Research

Students will select a laboratory for research following one to three 6-week rotations during the first semester. Students will select laboratories for each rotation in consultation with faculty mentors and the program's graduate program director. MS candidates are expected to undertake an independent, original experimental study resulting in a new and significant contribution to knowledge. The research will culminate in the preparation of a thesis and a final oral examination conducted by the student's MS Thesis Committee.

Thesis

By the beginning of the second year (August), in consultation with her/his mentors, students will select a committee (the two mentors plus two other faculty) and submit a written proposal for the master's thesis work. Following approval of the proposal, students continue to carry out the appropriate experiments and develop the written thesis. Students will defend their thesis in a public, oral defense and to their committee by the end of the second year (by the end of July). Students are expected to actively engage in research for the duration of the program, including during semester breaks.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Master's students will graduate with the ability to:

- Discuss, develop, conduct and/or supervise research projects that call for broad training in the biomedical sciences and focused training in Infectious Disease and Immunology.
- Provide technical expertise in molecular biology and cellular biology and a variety of other areas, such as biochemistry, immunological techniques, enzyme assays, and cell culture.
- Act as liaison between researchers and clinical faculty and in situations that require familiarity with clinical presentations within the areas of infectious disease and immunology, as well as treatment of infectious disease.
- Incorporate high standards of ethics into research design and execution and data interpretation.
- Demonstrate strong oral presentation skills in the course of dialogues with colleagues, clients, physicians, and research scientists.
- Have thorough knowledge, within the fields of infectious diseases and immunology, of the biomedical research process including project planning, experimental design, and research protocol development. This knowledge will be beneficial to those pursuing careers in health sciences, government or commercial environments.

Integrative Cell Biology (MS)

Knowledge in the Biomedical Sciences has been growing exponentially over the last decade. As we learn more about cells at the molecular level, we also discover the need to understand their interactions and functions integratively, emulating life in an in vitro setting. The Master of Science in Integrative Cell Biology at Loyola University Chicago is training the next generation of biomedical researchers. Through the program, students acquire a solid foundation and understanding of cell function at molecular, multicellular tissue, and organ structure levels.

	Total Hours	**30**

[1] Students enroll in ICB 445 Scientific Literature: Review & Critique, ICB 446 Review Seminar, and ICB 459 Research every semester.

[2] ICB 459 Research credit hours are variable, but student must take a total of 8 credit hours over the course of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular, and cellular processes and current biomedical research methods.
- Propose original biomedical research questions and design experiments to interrogate these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Clearly and effectively communicate scientific information in both oral and written forms
- Critically evaluate the results to arrive at a conclusive interpretation of the novel findings.
- Search and critically evaluate the scientific literature and data in the context of the novel findings.

Integrative Cell Biology (PhD)

The PhD in Integrative Cell Biology offers students a flexible curriculum focused on learning cell biology in a comprehensive scope, ranging from the molecular biology of cells and cell structures to cellular functions in various biological contexts, like cancer, inflammation, and immunology.

Related Programs

Doctoral

- Biochemistry, Molecular and Cancer Biology (PhD) (p. 1353)
- Cell and Molecular Physiology (PhD) (p. 1356)

Combined

- Integrative Cell Biology (MD/PhD) (p. 1872)

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:

- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology
- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

Code	Title	Hours

Total Hours		**48**

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the second year. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo three laboratory rotations beginning in the first semester to identify a research advisor. Students select

laboratories for each rotation from a list of available advisors and in consultation with the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in cellular biology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Medical Physiology (MS)

The Master of Science in Physiology (MSMP) program at Loyola University Chicago Health Sciences Campus is designed for college graduates who are interested in strengthening their understanding

of medical physiology with the intent of enhancing their academic credentials to succeed in their medical school applications and the medical school academic years. The MSMP program is a non-thesis, full-time, nine month special master's program running from early September to late May. Our courses are designed specifically for MSMP students and are classroom-taught by medical school faculty professors who have extensive medical education and admissions experience at Loyola University Chicago Stritch School of Medicine.

MSMP students will pursue intensive studies in M1-level graduate cell physiology, physiological biochemistry, organ system medical physiology, neurophysiology, basic human anatomy, introduction to pathophysiology and clinical bioethics. Our Professional Development course helps each student with all aspects of their applications to medical school. Each student in the MSMP program is assigned a faculty advisor to guide them throughout the program, as well as with their medical school applications. We also provide assistance for students interested in local medical and community volunteer programs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program graduates will be able to demonstrate ability in:

- Acquiring advanced knowledge and engaging in transformational and critical thinking.
- Producing and disseminating scholarship.
- Demonstrating ethical thinking and responsible conduct.
- Applying principles of social justice to the larger community.

Microbiology and Immunology (MS)

The Microbiology and Immunology MS program offers a two-year, research-intensive program that leads to a Master's degree in Microbiology and Immunology. Students will be trained in the rigor of the scientific method by proposing and completing a research project under the direction of a selected faculty mentor.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- apply their broad training in the biomedical sciences and specialized training in Microbiology and Immunology. This wide knowledge base will provide versatility in applying for subsequent positions in research or teaching.
- demonstrate expertise in molecular biology and a variety of other areas, such as biochemistry, immunological techniques, enzyme assays, and cell culturing.
- communicate your scientific expertise in oral presentations.
- Our graduates are equipped to succeed in more advanced research, teaching or administrative positions and will serve as leaders in their chosen professions. They are also prepared for additional educational objectives such as obtaining an advanced degree in such areas as law, medicine or research.

Microbiology and Immunology (PhD)

The PhD in Microbiology and Immunology trains students for a career in research and teaching in microbiology, virology, immunology or molecular biology. The Department of Microbiology and Immunology creates and environment through courses, laboratory work, and other activities to allow students to acquire the tools necessary to work independently and to think critically. The department instills a sense of thoroughness, accuracy, and knowledge of common research tools that is indispensable. Students will able to independently analyze and evaluate scientific problems and be responsible for their research by the end of their program.

	Hours	**0**
	Total Hours	**48**

[1] Elective courses may be taken anytime in the first three years of the program, depending on when they are offered.

[2] MIIM 502 Special Topics must be taken 3 times, but can be taken any semester during the first 3 years.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in microbiology and immunology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Molecular Pharmacology and Therapeutics (MS)

The Master of Science in Molecular Pharmacology and Therapeutics is a research intensive program designed to graduate students with a broad base of knowledge in the biomedical sciences and a more focused understanding of pharmacology. The goal of our graduate program is to prepare students for advanced training in the biomedical sciences, academia, the pharmaceutical industry, or consulting.

The Molecular Pharmacology and Therapeutics (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Doctoral

- Molecular Pharmacology and Therapeutics (PhD) (p. 1372)

Combined

- Molecular Pharmacology and Therapeutics (MD/PhD) (p. 1883)

Curriculum

Besides the traditional Master's program, the Molecular Pharmacology and Therapeutics (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Required Coursework

Thesis Track

The Master of Science in Molecular Pharmacology and Therapeutics requires 30 credit hours of coursework and a master's thesis.

Code	Title	Hours
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
PHAR 405	Pharmacology Journal Club ((taken 3 times))	3

PHAR 409	Principles of Pharmacology	3
Select 2 Electives		*6*
PHAR 407	Fundamentals of Drug Discovery and Development	
PHAR 408	Molecular Basis of Disease and Therapeutics	
PHAR 410	Signal Transduction	
PHAR 415	Current Topics in Pharmacology and Epidemiology of Disease	
PHAR 420	Pharmacovigilance: A Practical Approach	
PHAR 499	Research	1-6
GSSM S65	Master's Study-Summer	1
PHAR 595	Thesis Supervision	1
Total Hours		**30**

Non-Thesis Track

This track is for students who have need for a less in depth research-intensive experience. Applicants must have a strong rationale for this to be accepted into this track. Students who are interested in research careers should opt for the thesis track.

Code	Title	Hours
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 412	Cell Biology	4
BMSC 416	Methods Biomedical Science	1
PHAR 405	Pharmacology Journal Club	0
PHAR 406	Special Problems in Pharmacology	1
PHAR 407	Fundamentals of Drug Discovery and Development	3
PHAR 409	Principles of Pharmacology	3
PHAR 415	Current Topics in Pharmacology and Epidemiology of Disease	2
PHAR 420	Pharmacovigilance: A Practical Approach	4
PHAR 499	Research	1
Elective Course [1]		3
Total Hours		**30**

[1] Elective course chosen in conjunction with the Graduate Program Director.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their Graduate Program Director for assistance with course selection.

Traditional Master's Program

Thesis Track

Course	Title	Hours
Year 1		
Fall		
BMSC 410	Biochemistry and Molecular Biology	4
BMSC 416	Methods Biomedical Science	1
BMSC 412	Cell Biology	4
PHAR 405	Pharmacology Journal Club	1

	Total Hours	**30**

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review

process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular, and cellular processes and common biomedical research methods.
- Demonstrate an understanding of the molecular, cellular, and physiological mechanisms underlying the pathophysiological changes that occur in disease etiology and describe how targeting these mechanisms with drug(s) can act to effectively treat the disease.
- Understand, assess, and draw conclusions from published research.
- Describe various approaches by which new drugs are discovered and developed and the process by which drugs are approved for clinical use.
- Propose original biomedical research by forming an hypotheses, designing experiments, critically evaluating experimental results, interpreting data, and drawing appropriate conclusions.
- Design and effectively present scientific presentations, write scientific papers and grants.
- Articulate and discuss ethical aspects in drug development and pharmacovigilance, including, but not limited to, animal use, clinical trials, intellectual property, benefit-risk analysis, and research design and integrity.

Molecular Pharmacology and Therapeutics (PhD)

The PhD in Molecular Pharmacology & Therapeutics is dedicated to training outstanding scientists in the pharmacological sciences. After successful completion of formal course work students will have acquired in-depth knowledge of pharmacology and basic knowledge of molecular and cellular biology, biochemistry, and physiology. Our training provides a solid foundation for successful scientific careers in a wide range of areas, including academia, government, and the pharmaceutical industry.

Curriculum

The Graduate School at the Health Sciences Campus offers a PhD degree program in the biomedical sciences through the Integrated Program in Biomedical Sciences (IPBS). IPBS is an umbrella admission program in which students are admitted and undergo laboratory rotations before choosing an advisor and specialization track.

The following six tracks are offered in the IPBS:

- Biochemistry, Molecular & Cancer Biology
- Cell & Molecular Physiology
- Integrative Cell Biology
- Microbiology & Immunology
- Molecular Pharmacology & Therapeutics
- Neuroscience

Students receive rigorous training in the fundamentals of the scientific method, oral and written scientific communication, data analysis and presentation, critical analysis of scientific literature, and practical laboratory skills through a combination of coursework and dissertation research. Dissertation research is conducted under the direction of an advisor and Dissertation Committee.

IPBS Course Requirements

The PhD program consists of 48 credit hours of course work in the first two to three years plus research culminating in a dissertation. The course work consists of a Core Curriculum of 14 credit hours, at least 15 credit hours of electives and up to 19 credits hours of Research. Students whom take more than 15 credits of electives can reduce the number of Research credits accordingly. The electives include track-specific courses plus specialized courses offered by any track. Details about the electives required for each track can be found in the individual IPBS PhD track catalog pages. IPBS students also enroll in a Seminar and Journal Club course every semester. Students enroll in Dissertation Supervision after they have completed the required 48 credit hours.

Code	Title	Hours
Foundational Curriculum

Research [1]		19
Seminar		
Journal Club		
Dissertation Supervision		1
Total Hours		**49**

[1] Students can choose to take more than 15 credits of electives and reduce research credits accordingly.

Molecular Pharmacology and Therapeutics Track Specific Course Requirements

The PhD in Biochemistry, Molecular Pharmacology and Therapeutics requires 48 credit hours and consists of the IPBS Core Curriculum plus a Molecular Biology and Therapeutics Required course and Electives, Research, Journal Club, Seminar, a comprehensive examination, and completion of a dissertation.

Code	Title	Hours
IPBS Core Curriculum (see above)		**14**
Molecular Pharmacology and Therapeutics Requirements		
Molecular Pharmacology and Therapeutics Electives		*15-16*
BMSC 414	Systems Biology	
PHAR 407	Fundamentals of Drug Discovery and Development	
PHAR 408	Molecular Basis of Disease and Therapeutics	
PHAR 409	Principles of Pharmacology	
PHAR 410	Signal Transduction	
PHAR 415	Current Topics in Pharmacology and Epidemiology of Disease	
PHAR 420	Pharmacovigilance: A Practical Approach	
PHAR 406	Special Problems in Pharmacology	
PHAR 499	Research (hours vary) [1]	1-12
PHAR 405	Pharmacology Journal Club	0
PHAR 600	Dissertation Supervision	1
Total Hours		**49**

[1] Students are expected to complete 18-19 credit hours of PHAR 499 Research.

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the second year. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo three laboratory rotations beginning in the first semester to identify a research advisor. Students select laboratories for each rotation from a list of available advisors and in consultation with the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in molecular pharmacology and therapeutics.
- Articulate the approaches by which drugs are discovered and developed, from molecular mechanisms through clinical trials, drug safety and pharmacovigilance, including ethics and research integrity.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Neuroscience (MS)

The Master of Science in Neuroscience is a two-year, research-intensive program designed to provide students with a foundational understanding of neuroscience and an appreciation for emerging concepts and related methodologies. At Loyola University Chicago, we take an intra-departmental and interdisciplinary approach to learning, giving students a broad choice of mentors and neuroscience-related research projects to help advance your career. Students will acquire the knowledge and confidence to develop novel neuroscience questions, address them with rational and reproducible experimental design, and succeed in challenging academic and industry environments.

Total Hours	**48**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- A thorough conceptual understanding of structure and function of the nervous system as well as the biology and function of cells of the nervous system.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Pharmacovigilance Certificate

Pharmacovigilance is the science of collecting, detecting, assessing, and monitoring data of drugs in order to minimize or prevent adverse effects. Pharmacovigilance, modernization and evolution of safety pharmacology, employs sophisticated state of the art approaches in the collection and analyses of data for therapeutics under development and for post-marketing surveillance of pharmaceutical products. Pharmacovigilance offers the promise of significant beneficial improvements in human health by providing safer, more effective and individually tailored therapeutics.

Loyola's Department of Molecular Pharmacology & Neuroscience offers a 12-credit certificate program in Pharmacovigilance which can be completed in 1-year (full-time) or 2-years (part-time). This program is especially well suited for individuals who are planning careers in the pharmaceutical industry, public health sciences, or biomedical research. The certificate program is also suited for physicians, nurses, and scientists in epidemiology or therapeutic-related fields. The program covers all aspects of Pharmacovigilance, related drug development and regulatory topics, and the ethics associate with these endeavors. Courses involve executives and expert scientists from the pharmaceutical industry who are world leaders in these areas.

All courses consist of Asynchronous lectures and synchronous course meetings (early evening) and are flexible to allow students to take the courses from home and around daytime obligations.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of this program, students will be able to:

- Identify and evaluate Drug Development pathways including pre-clinical and clinical trials and the ethical, scientific, and regulatory issues around them.
- Identify and evaluate signal identification, assessment, management, and causality assessment.
- Evaluate benefit-risk, risk minimization, product safety monitoring, and vaccine safety monitoring.
- Evaluate and assess real world data/evidence.
- Interpret evidence obtained in Pharmacovigilance, including behavioral science, patient perspectives, and risk communication.
- Identify and explain the ways in which Pharmacovigilance can produce evidence and evaluations of data, and how these can be used to benefit human health.

Neiswanger Institute of Bioethics and Healthcare Leadership

The Neiswanger Institute for Bioethics and Healthcare Leadership is a pluralistic program that draws upon the commitment to social justice of the Jesuit and Roman Catholic heritage of the Stritch School of Medicine in its teaching, research, and service. The Institute promotes the ideals

of Jesuit education in seeking to form “men and women for others” and to make our classrooms a “home for all faiths.” Thus, while giving special regard to Catholic healthcare ethics in teaching and research, the Institute also fosters respectful dialogue among all traditions represented in our student body and patient population.

Two things distinguish the Neiswanger Institute for Bioethics:

- A commitment to educating healthcare professionals to be effective leaders for social justice in medicine and society, and;
- A commitment to understanding and respecting the role of religious and spiritual traditions, especially that of the school’s Roman Catholic heritage, in healthcare decision making.

The primary values of the Institute, a regard for social justice and a commitment to understanding the roles of religion and spirituality in medicine, give rise to a research and teaching focus for institute faculty that includes addressing racial and ethnic disparities in healthcare, fostering cultural humility and competence, contributing to global health, promoting public health, and advocating a renewal of medical professionalism that evidences a concern for the common good.

As part of our mission, the Institute offers online master's degree programs and a hybrid doctoral degree in bioethics and healthcare mission leadership, as well as online certificate programs for healthcare professionals. Our innovative online environment supports practical education and provides valuable engagement and networking among peers and experts in the field of bioethics and health policy.

Graduate Programs

- Bioethics and Health Policy (DBe) (p. 1378)
- Bioethics and Health Policy (MA) (p. 1379)
- Bioethics and Health Policy Certificate (p. 1380)
- Healthcare Mission Leadership (DHCML) (p. 1380)
- Healthcare Mission Leadership (MA) (p. 1381)

Bioethics and Health Policy (DBe)

Our professional Doctorate in Bioethics (DBe) is a first of its kind and meets the growing need for advanced training in bioethics for those professionals that have increased responsibilities related to bioethics and health policy at their institution. Such individuals may serve as chair of a hospital’s ethics committee, perform clinical ethics consultations, have administrative oriented ethics work or are a steward for issues central to your institution’s mission and values. This degree offers healthcare professionals an opportunity to obtain a high quality doctorate through a hybrid delivery system (asynchronous online courses combined with blended courses that require 2-3 days of on-campus activity).

Related Programs

Master's

- Bioethics and Health Policy (MA) (p. 1379)

Certificate

- Bioethics and Health Policy Certificate (p. 1380)

Curriculum

The Doctorate in Bioethics (DBe) is a professional doctoral degree and requires 57 credit hours of coursework, written and oral qualifying examinations, two capstone courses, and one capstone presentation (virtual or in-person). Matriculants in the doctoral program are required to maintain a 3.5 cumulative GPA.

Students who enter with a previously earned master's degree in bioethics may transfer up to 27 credit hours (pending approval from program director), and are required to complete a minimum of three (3) required courses, five (5) elective courses, and the two (2) capstones at Loyola.

Total Hours		**57**

[1] Indicates hybrid course offered asynchronously online with two to three days of on-campus activity.

Qualifying Examination

The qualifying examination students in the Bioethics Doctoral Program (DBe) should be completed after other coursework but *prior to* the Doctoral Capstone courses. This is an open book essay exam that should be an opportunity for the doctoral student to showcase their knowledge from the coursework they’ve already taken. After written responses are submitted, an oral exam is conducted online with the student and two

faculty reviewers. This is an opportunity for the student to clarify and expand upon their written answers. The student will receive a letter from the graduate program director indicating successful completion of the written and oral exams.

Capstones

DBe students will take two doctoral capstone courses (BEHL 423 Doctoral Capstone I and BEHL 424 Doctoral Capstone II), each of which should result in peer-reviewed articles. Afterwards students will make a virtual or in-person presentation of their capstone work.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Participants who complete the program will be able to:

- Analyze common ethical challenges arising in clinical cases.
- Apply fundamental ethical principles and legal frameworks to clinical cases.
- Develop a credible argument regarding a current bioethical controversy.
- Demonstrate the knowledge and skills necessary to advise healthcare professionals in a specialized area of bioethics such as clinical case consultation, research ethics, public health ethics, Catholic bioethics.
- Produce a manuscript for submission to a peer reviewed publication.

Bioethics and Health Policy (MA)

The key ingredients to a successful experience in an online educational program are the quality of the students and the dedication of the faculty. Our students typically have advanced or professional degrees in a variety of disciplines and they hail from all over the country (and even a few from outside the US). Our program attracts physicians, nurses, social workers, chaplains, health care administrators, lawyers, researchers, and even a few of our own medical students.

Our faculty members (https://hsd.luc.edu/bioethics/aboutus/facultydirectory/) are trained in a variety of disciplines: law, medical humanities, philosophy, psychology, public health, theology, and health care ethics (https://hsd.luc.edu/bioethics/aboutus/whatisbioethics/). Because of the commitment of our faculty to online education, we can boast a low attrition rate, and students typically complete the master's program within 2 to 3 years.

- Apply fundamental ethical principles and legal frameworks to clinical cases.

Healthcare Mission Leadership (DHCML)

As the position of mission leadership has evolved over the past three decades, leaders working in Catholic healthcare cite an increasing need for well-prepared executives with deep understanding of Catholic

theology, bioethics, practical business acumen, and organizational leadership who can function in an executive capacity to guide increasingly complex organizations.

Our interdisciplinary online Doctorate in Healthcare Mission Leadership builds on the MA in Healthcare Mission Leadership and provides a professional, doctoral-level preparation for individuals who hold or will hold positions of senior leadership within Catholic healthcare organizations.

Related Programs

Master's

- Bioethics and Health Policy (MA) (p. 1379)

Curriculum

The Doctorate in Healthcare Mission Leadership (DHCML) is a professional doctoral degree and requires 66 credit hours of coursework. Matriculants in the doctoral program are required to maintain a 3.5 GPA.

Students may transfer up to 33 credit hours of coursework from an external MA degree toward the DHCML based on curricular requirements. Prior graduate coursework will be evaluated on an individual basis. Each student's course of study will be tailored to build on and complement their previous coursework. DHCML students may also select additional electives in healthcare leadership and management from the Quinlan School of Business or in theology and spirituality from the Department of Theology. These electives will be selected in conversation with the student's academic advisor.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Participants who complete the program will be able to:

- Analyze common challenges to maintaining fidelity to the mission of Catholic healthcare institutions.
- Apply fundamental ethical principles and theological frameworks to clinical and organizational questions.
- Develop a credible argument regarding a current mission-related challenges.
- Develop strategies to foster fidelity to mission utilizing management, formational, theological, and ethical knowledge and skills.

Healthcare Mission Leadership (MA)

As of Fall 2026, this program is no longer accepting applicants.

The Master of Arts in Healthcare Mission Leadership offers professional preparation for those in senior leadership positions in a healthcare environment who are charged with developing, enhancing, cultivating, and protecting the identity and mission of their organizations. This interdisciplinary program is offered collaboratively by Loyola's Neiswanger Institute for Bioethics and Healthcare Leadership at the Stritch School of Medicine, the Marcella Niehoff School of Nursing, and the Institute of Pastoral Studies. It integrates courses from theology, spirituality, bioethics, organizational development, and leadership to offer a well-rounded degree pertinent to the work being done in Catholic hospitals and health systems throughout the world.

Related Programs

Doctoral

- Healthcare Mission Leadership (DHCML) (p. 1380)

Curriculum

The Master of Arts in Healthcare Mission Leadership is designed to meet the Competencies for Mission Leaders outlined by the Catholic Health Association. The program 36 credit hours of foundational coursework in three competency domains: Theology and Spirituality, Ethics, and Organizational Management and Leadership. Since participants in this program will come with a wide range of past education and experience, this curriculum can be tailored to each applicant's background. Candidates demonstrating graduate-level training in a competency represented by a particular foundational course may substitute other courses in that or another competency domain.

Nursing (PhD)

Preparing nurse scholars to improve health through research, education, and leadership. The PhD in Nursing prepares graduates to advance the scientific foundation of nursing practice and health care delivery. Under the guidance of our faculty, students are prepared to launch a program of research addressing the social, cultural, political and ethical issues related to an area of nursing scholarship.

Related Programs

Doctoral

- Family Nurse Practitioner (DNP) (p. 1500)

Curriculum

The PhD in Nursing requires a minimum of 48 credit hours for students entering with a master's degree.[1] Students entering with a BSN complete an additional 24 credit hours of graduate level nursing courses.

PhD courses meet online two late afternoon-evenings per week in the fall and spring semesters. Two additional days of intensive in person training sessions per semester (Spring and Fall) are required. In person intensives meet on a rotating basis between the Lake Shore and Health Sciences campuses.

Required Courses

Code	Title	Hours
GNUR 432	Philosophy of Science	3
GNUR 440	Systematic Inquiry I: Scholarly Writing	2
GNUR 500	Phenomena and Theories for Nursing Science I	2
GNUR 501	Phenomena and Theories for Nursing Science II	2
GNUR 508	The Nurse Scientist Role	2
GNUR 509	Teaching Methods	3
GNUR 512	Quantitative Methods & Design for Nursing Research	3

GNUR 610	Doctoral Study	1
GNUR 600	Dissertation Supervision	1
Two (2) Courses in Cognate Area		6
Total Hours		**48**

[1] GNUR 510 Teaching Practicum is required for students who receive funding through the Nurse Faculty Loan Program. Students in that program will complete 49 credit hours of coursework.

[2] Students who have not taken a graduate level statistics course prior to entering the PhD program may be required to take an additional three credit hour graduate statistics course before enrolling in GNUR 546 Advanced Statistics I or GNUR 547 Advanced Statistics II. The pre-requisite will not replace one of the above required courses and students will graduate with 49 credit hours.

Qualifying Examination

At the completion of coursework, students are required to successfully complete a qualifying examination consisting of both written and oral components. The examinations are designed to assess the depth, breadth, comprehension, integration, and synthesis of knowledge that forms the foundation for conducting dissertation research.

Dissertation

A directed dissertation is required to complete a PhD in Nursing. All students in the Graduate School who write a dissertation must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship. It is recommended that this course be taken prior to beginning research.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Program Goal

The goal of the PhD in Nursing program is to prepare scholars who improve human health through the development and expansion of knowledge.

Learning Outcomes

At the completion of the program the graduate has the knowledge and skills to:

- Initiate a beginning program of research that expands nursing and healthcare knowledge.
- Incorporate social, cultural, political, economic, and ethical considerations into nursing scholarship and practice.
- Participate in the international community of scholars to further the Jesuit mission of generation and dissemination of knowledge in the service of humanity.
- Assume leadership roles in nursing research, education, practice, policy development, and/or administration in order to improve the health of society.
- Differentiate between managing a career as a nurse scientist and stewarding the nursing discipline.

Social Work (SOWK)

SOWK 500 Life Span Development, Human Behavior, Trauma, & Theory (3 Credit Hours)
This course will consider bio-psycho-social-spiritual theories across the life-course, with a focus on trauma and resilience and an understanding of the role of neuroscience in development.
Course equivalencies: SOWK 305/SOWK 500
Outcomes:
1) Analyze how racism, oppression, cultural context, and structural inequities influence human development and adaptation across the life span using biopsychosocial spiritual and life course perspectives; 2) Apply theories of human development, trauma, resilience, and neuroscience to explain engagement with individuals and families within their social and environmental contexts; 3) Assess developmental strengths, stressors, risk and protective factors, and environmental influences affecting individuals and families at different life stages using relevant social work theories and empirical literature

SOWK 501 Assessment of Client Concerns in Context (3 Credit Hours)
Course will teach students to conduct a strengths-based and contextual assessment of client concerns. Students will learn to conduct a culturally informed bio-psycho-social-spiritual assessment in which they gather information about presenting concerns from the perspective of clients and collateral sources.
Course equivalencies: SOWK 380/SOWK 501
Outcomes:
1) Demonstrate and apply knowledge and skills for conducting a biopsychosocial-spiritual assessment; 2) Conceptualize culturally-informed diagnostic assessment; 3) Develop and apply DSM-5-TR diagnostic assessment to a simulated patient, producing a culturally-informed DSM-5-TR diagnosis

SOWK 502 Power, Oppression, Privilege, and Social Justice (3 Credit Hours)
This course is designed to assist social work students with understanding the concepts of power, privilege, oppression, and social justice in their work with historically marginalized and oppressed populations.
Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50
Outcomes:
Analyze how personal identities, values, and biases influence professional behavior, and apply ethical principles and cultural humility to evaluate practice within diverse and oppressive systems; Evaluate how systems of power, privilege, and oppression shape human rights and opportunities, and create strategies to advance social, economic, and environmental justice through advocacy and allyship at the micro, mezzo, and macro levels; Synthesize theoretical frameworks (critical race theory, intersectionality, anti-oppressive and strengths-based practice) to design and apply culturally responsive, collaborative interventions that promote empowerment and systemic change

SOWK 503 Practice Skills with Individuals and Families (3 Credit Hours)
Pre-requisites: Corequisite is SOWK 501; Restricted to Graduate Social Work students
This introductory micro practice course begins by focusing on the development of core skills for social workers in their encounters with individuals and families.
Course equivalencies: SOWK 301/SOWK 503
Outcomes:
1) Analyze biopsychosocial-spiritual development across the life span by examining how trauma, resilience, culture, and social environments influence individuals and families at different developmental stages; 2) Apply human development and social work theories to real-life contexts in order to interpret individual and family experiences across the life course, with attention to diversity, oppression, and resilience; 3) Evaluate how social work knowledge of life span development informs ethical, culturally responsive practice and contributes to effective engagement, assessment, and intervention across systems

SOWK 504 Integrated Micro/Mezzo/Macro Theory and Practice (3 Credit Hours)
This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community engaged practices. While integrating theories of sociology, political science, anthropology, public health, and urban studies, as well as practice knowledge, the class examines relationships between social, economic, political, and cultural structures, collective action, and individual attitudes and behaviors.
Outcomes:
1) Understand integrated practice models that apply across micro, mezzo, and macro domains, 2) appraise the quality and utility of empirical research related to the key theories, topics, and problems examined

SOWK 505 Group Work Practice in Social Work: Micro/Mezzo/Macro (3 Credit Hours)
This course presents theoretical and practical approaches to social work with groups, with a focus on group development, dynamics, and processes.
Course equivalencies: SOWK 303/SOWK 505
Outcomes:
1) Demonstrate and apply ethical and professional behavior by integrating social work values, self-awareness, and group facilitation skills that promote inclusivity, collaboration, and mutual support among diverse group members; 2) Analyze and synthesize group dynamics, theories, and evidence-based practices to assess group needs, develop goals, and implement interventions that foster empowerment and social justice; 3) Engage and collaborate with individuals and groups to plan, lead, and evaluate group processes that enhance collective well-being, inclusion, and effective problem-solving across diverse settings

SOWK 506 Research and Evaluation in Social Work Practice (3 Credit Hours)
This course introduces the methods of social work research, including problem formulation, research ethics, research designs, measurement, data collection, sampling, and data analysis through a social justice/anti-racist/global perspective.
Course equivalencies: SOWK 390/SOWK 506
Outcomes:
1) Critically analyze social work research studies for ethical rigor, cultural responsiveness, anti-racist practice, and methodological quality using established research standards; 2) Apply practice-informed research principles to formulate research questions, select appropriate qualitative, quantitative, or mixed-methods designs, and justify methodological choices relevant to social work practice; 3) Design and evaluate a research or program evaluation proposal that includes ethical considerations, sampling strategies, data collection plans, and analysis approaches to assess practice and program effectiveness

SOWK 508 Integrated Micro, Mezzo, and Macro Practice (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work Students
This course focuses on integrated practice approaches that span three frameworks, including micro (e.g. individuals, families, and groups), mezzo (e.g. communities), and macro (e.g. systems, society) levels. It will examine various theories and models, the quality and utility of empirical research, as well as the impact of interprofessional and interdisciplinary collaboration efforts.
Outcomes:
1) Apply ethical, professional, and anti-oppressive social work values to engage individuals, families, groups, organizations, and communities using integrated micro, mezzo, and macro practice frameworks that advance human rights and social justice; 2) Assess social problems, client systems, and policy contexts using person-in-environment, systems, and policy-aware frameworks to identify strengths, risks, and structural influences across micro, mezzo, and macro levels of practice; 3) Design and implement integrated intervention strategies that address social problems through coordinated micro, mezzo, and macro actions to promote equitable, sustainable change

SOWK 509 Social Work Policy and Community Intervention (3 Credit Hours)
Drawing from social work theory, research, and practice, Social Work Policy and Community Interventions examines the roles of social workers in policy practice as well as change agents within community and organizational contexts.
Outcomes:
1) Analyze how social, racial, economic, and environmental injustices are embedded in existing policies and evaluate their impacts on individuals, families, and communities; 2) Design and advocate for equitable, evidence-informed policies that promote social change and address systemic inequities at local, national, and global levels; 3) Apply policy analysis frameworks and research evidence to assess the effectiveness of policy interventions and design strategies for implementation that improve service delivery and community well-being

SOWK 600 Dissertation Supervision (1 Credit Hour)
Students register for this course once they have finished their core curriculum, passed their comps, and have an approved dissertation proposal.\\n
Outcomes:
Design and defend a dissertation proposal and prepare and submit an application for Institutional Review Board (IRB) approval; Implement original research by executing the approved study and defending the final dissertation according to program standards

SOWK 602 Health and Behavioral Health Policy and Systems (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides students with frameworks for understanding the interrelationship between developments in health and behavioral health policy, delivery systems, and social work practice on micro, mezzo, and macro levels. Practice issues associated with organizational structure, patient-centered care, team and interdisciplinary relations, as well as collaboration and conflict, are considered.
Outcomes:
Analyze and evaluate the structure and financing of US health and behavioral health systems to identify disparities and propose strategies that promote equitable access to care; Critically assess and apply theories and models of health policy to develop evidence-informed recommendations that address systemic inequities in health and behavioral health service delivery; Design and advocate for policy and organizational changes that advance social, racial, and economic justice within health and behavioral health systems through interdisciplinary collaboration and stakeholder engagement

SOWK 603 Seminar in Brief Treatment (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This seminar builds on the student's knowledge of short-term treatment, expanding this knowledge and skill toward understanding, and the practice of brief treatment as a modality of social work intervention. It examines the essential components of brief treatment (task-centered, crisis intervention, brief psychotherapy) with individual clients.
Outcomes:
Demonstrate ethical and culturally responsive professional behavior by applying social work values, self-reflection, and critical thinking to diverse brief treatment settings and client populations; Integrate and apply evidence-informed theories and research to assess client needs and formulate treatment goals within brief therapeutic frameworks such as psychodynamic, cognitive-behavioral, and solution-focused models; Design, implement, and evaluate time-limited interventions that promote client empowerment, well-being, and measurable progress within ethical and evidence-based social work practice

SOWK 604 Advanced Clinical Social Work Practice with Groups (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The course focuses on multiple theoretical approaches in group work practice with diverse and at-risk populations with an emphasis on social and economic justice
Although the focus is on treatment groups, content will include the structure, function and techniques of intervention with all types of groups, emphasizing the conscious use of self. The method of instruction is interactive, collaborative, and experientially based.
Outcomes:
Demonstrate and apply ethical, reflective, and culturally responsive professional behavior by integrating social work values, group work standards, and anti-oppressive frameworks in diverse group settings; Analyze and synthesize theories, research, and policies that inform group work practice, and design interventions that promote human rights, social, racial, economic, and environmental justice within therapeutic and community groups; Engage, assess, intervene, and evaluate group processes by applying evidence-informed models, facilitating collaboration, and evaluating outcomes to strengthen group cohesion and empower members

SOWK 605 Human Sexuality and Sexual Dysfunction (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, SOWK 506, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides basic knowledge about the physiology and psychology of human sexuality as well as consideration of some areas of sexual dysfunction. Attention is also focused on cultural, societal, and personal attitudes which may affect the student's response to this area of practice.
Outcomes:
Analyze how their own identities, values, and biases influence perceptions of human sexuality and evaluate how ethical principles and cultural humility can be applied to promote sex-positive, inclusive, and affirming practice across client systems; Evaluate how intersecting systems of power, privilege, and oppression shape sexual health outcomes and create strategies to advance human rights and sexual justice through advocacy, policy development, and macro-level interventions; Synthesize research, theory, and clinical frameworks to design and implement evidence-informed interventions that address sexuality-related issues across the lifespan and promote empowerment, advocacy, and systemic change

SOWK 606 Practicum in Research & Evaluation (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 506, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is designed to introduce MSW students to a range of philosophies, methods, and techniques that are useful for evaluating human service programs and practice interventions. The course is intended to help you become more aware of the range of evaluation activities conducted in health care and human service agencies and to prepare you to conduct your own small and mid-range evaluations of programs and practice.

SOWK 609A School Social Work Policy and Practice I (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course is the first of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education.
Outcomes:
Demonstrate and apply ethical, anti-racist, and equity-informed professional behavior by analyzing the roles and responsibilities of school social workers within P-12 systems and adhering to NASW standards and school-based policies; Critically analyze and synthesize school and education policies to evaluate their impact on student well-being, access, and equity, and propose strategies that promote human rights and social, racial, and economic justice; Design and evaluate evidence-informed, systemic interventions that address barriers to learning and promote inclusive, trauma-informed, and data-driven practices in school settings

SOWK 609B School Social Work Policy and Practice II (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course is the second of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education.
Outcomes:
Demonstrate and apply ethical, reflective, and culturally responsive professional behavior in school settings by integrating anti-racist, anti-oppressive, and evidence-informed principles in their assessment and intervention practices; Analyze and synthesize data from multiple sources to assess student strengths and needs, design functional behavioral analyses, and develop evidence-informed intervention plans that promote equity and positive student outcomes; Evaluate and advocate for policies and crisis intervention strategies that advance human rights, social and racial justice, and systemic well-being within educational environments

SOWK 611 Social Work Practice with Couples (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course explores clinical models and techniques for the treatment of couples with relationship problems
Primary attention is given to the integration of systemic and analytical theories. Specific strategies and techniques are presented and demonstrated. Attention is given to the range of symptomatology and challenges including sexual dysfunction.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and equity-based perspectives in analyzing relational dynamics, power imbalances, and cultural influences in couple therapy; Integrate and synthesize evidence-informed theories, research findings, and systemic frameworks to assess couple functioning and develop treatment plans responsive to diverse relational contexts; Design, implement, and evaluate therapeutic interventions using multiple couple therapy models to promote emotional connection, relational resilience, and positive outcomes for diverse and non-traditional couples

SOWK 612 Family Assessment and Intervention (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The course examines different theoretical approaches to assessment and intervention with families
The focus will be on interpersonal interaction patterns and on systems rather than on individual feelings and behaviors, although those aspects of working with family members are not excluded. Different models of family therapy will be described, applied to case problems, compared with other models and/or theories, and evaluated for their effectiveness.
Outcomes:
Demonstrate and apply ethical and culturally responsive professional behavior by integrating anti-racist, anti-oppressive, and equity-based principles into family assessment and intervention practices; Analyze and evaluate family dynamics, structures, and systems through evidence-informed frameworks to develop assessment plans and advocate for policies that promote human rights, justice, and equitable access to family support resources; Design, implement, and evaluate family-centered interventions that promote communication, resilience, and systemic change within diverse, nontraditional, and intergenerational family systems

SOWK 613 Advanced Family Treatment (3 Credit Hours)
This course deepens students clinical practice competence in family therapy. Through discussion and experiential exercises, use of case vignettes and films, it will refine understanding of the therapeutic process and the development of treatment skills. Students will advance their understanding of the relationship between treatment goals and treatment techniques.

SOWK 614 Clinical Social Work Practice in Health Care (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will view the practice of social work in health care as the integration of physical and mental health. We will explore in depth the biopsychosocial concomitants of physical and mental disorders. The integration of both health and mental health has implications for assessment and intervention and relies upon a person-centered/relation-centered framework.
Outcomes:
Demonstrate and apply ethical, professional, and collaborative behavior by integrating social work values, standards, and interprofessional communication skills in healthcare settings to support holistic client care; Analyze and evaluate health disparities and systemic inequities by applying evidence-informed research and policy frameworks that advance human rights, social, racial, and economic justice in healthcare practice; Design, implement, and assess biopsychosocial-spiritual interventions that address the complex needs of individuals and families across diverse healthcare contexts through culturally responsive and client-centered practice

SOWK 615 Social Work Practice with Adolescents (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Social workers encounter adolescents in a variety of settings, including schools, mental health, child welfare, medical, juvenile justice, and substance abuse treatment. This course seeks to prepare students for direct intervention with adolescents and their families in these settings and within young people's own social contexts.
Outcomes:
Integrate and apply research-informed theories and evidence-based frameworks to understand adolescent developmental processes (neurobiological, cognitive, emotional, and social) in order to differentiate normative behavior from indicators of psychological distress or maladjustment; Evaluate how environmental, cultural, and systemic factors influence adolescent identity formation, risk-taking, and resilience within diverse social contexts; Design and implement developmentally appropriate, strengths-based intervention strategies to support adolescents and their families across multiple practice settings, including schools, mental health, and other child-serving systems

SOWK 616 Psychotherapy with Adults (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This practice course focuses on the content and processes of psychotherapy and the strategic use of therapeutic communications with adults. The focus will include psychotherapy informed by psychodynamic and developmental frameworks.
Outcomes:
Demonstrate and apply ethical, reflective, and culturally responsive professional behavior by integrating social work values and anti-oppressive principles into psychotherapy with diverse adult populations; Analyze and evaluate the impact of systemic inequities, intersectionality, and human rights concerns on adult mental health to develop psychotherapeutic approaches that promote social, racial, and economic justice; Design, implement, and assess evidence-informed psychotherapeutic interventions that enhance client well-being and strengthen therapeutic relationships through engagement, assessment, intervention, and evaluation processes

SOWK 618 The Role of Religion and Spirituality in Psychotherapy (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course examines the predominant practice theories regarding religion and spirituality for the "person-in-the-situation". Included in the course material are relevant neurological, psychological, philosophical, theological, and sociocultural understandings of the interface between social work practice and religion and spirituality.
Outcomes:
Demonstrate and apply ethical and professional behavior by integrating social work values, critical self-reflection, and cultural humility in the assessment and understanding of how clients' religious practices and spiritual beliefs interface with mental health disorders; Analyze and evaluate the impact of systemic oppression, social inequities, and human rights issues on mental health to develop culturally responsive and justice-oriented approaches to clinical practice and psychopathology; Apply and integrate evidence-informed theories and diagnostic frameworks to assess, formulate, and intervene effectively with individuals and families experiencing mental health challenges within diverse social, religious, and spiritual contexts

SOWK 619 Issues in Treatment of Women (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The focus of the course is the identification and application of clinical social work assessment and intervention relevant to practice with women. The circumstances of women are directly relevant to the studies of children and families, as well as health and mental health since they generally are the primary caregivers for others in our society.
Outcomes:
Analyze and apply feminist, intersectional, and research-informed frameworks to evaluate gendered experiences and inform evidence-based clinical and advocacy practices with cisgender women; Demonstrate and integrate engagement strategies that build collaborative, culturally responsive, and trauma-informed relationships with women and their families in diverse practice settings; Design, implement, and evaluate feminist-informed interventions that promote empowerment, resilience, and systemic change to improve well-being and advance social justice for women

SOWK 620 Clinical Social Work Practice with Children (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course focuses on learning about clinical social work with children through helping students deeply understand a clinical relationship that children find meaningful in advancing their self-determination. In keeping with the present and future of clinical social work, this course includes a multicultural and global focus.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and equity-centered perspectives to analyze how cultural, developmental, and systemic factors influence social work practice with children and their families; Integrate and implement evidence-informed theories, developmental frameworks, and assessment tools to engage, assess, and intervene effectively with children and their families across diverse contexts; Evaluate and reflect on practice outcomes by measuring intervention effectiveness and adapting strategies to enhance trauma-informed, ethical, and strengths-based practice with children and families

SOWK 621 Clinical Practice in Addiction (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This advanced-level course is associated with counseling clients affected by Substance Use Disorders (SUD). The core Functions and skills examined include: screening, intake, orientation, assessment, treatment planning, counseling (individual, family and group), case management, crisis intervention, client education, referral, reports and recordkeeping, consultation with other professionals and intervention.
Outcomes:
Demonstrate and apply ethical decision-making frameworks and professional standards to analyze complex situations involving clients with substance use disorders, ensuring integrity and accountability in practice; Integrate and evaluate research-informed theories, diagnostic criteria, and assessment tools to develop individualized, evidence-based treatment plans that promote client recovery and resilience; Design, implement, and assess intervention strategies that enhance client engagement, family support, and community collaboration to promote sustainable recovery and systemic change

SOWK 622 Substance Abuse Treatment in Groups (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will focus on the many applications of group work to serve substance use disorder (SUD) affected clients. Through a combination of assigned readings, attendance at group meetings, and hands-on participation in small groups within the class, students will gain a working knowledge of how groups function to assist those recovering from SUDs.
Outcomes:
Demonstrate and apply ethical, culturally responsive, and evidence-informed professional behavior by integrating social work values and anti-oppressive principles into group treatment with individuals experiencing substance use disorders; Analyze and synthesize theoretical models and research evidence to design and facilitate effective, trauma-informed, and strengths-based group interventions that promote recovery and resilience among diverse populations; Implement and evaluate group-based interventions by applying motivational interviewing, mutual aid, and empowerment-focused strategies to enhance client engagement, well-being, and sustained behavioral change

SOWK 626 Social Work with Severely Mentally Ill (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course offers students the chance to learn about leading-edge social work approaches providing humane care for severely mentally ill clients, especially those clients with concomitant substance abuse, developmental disabilities, and severe socioeconomic disadvantage. Working with the client's environment, collaboration with other systems, advocacy and program development are considered.
Outcomes:
Demonstrate ethical, culturally responsive, and anti-oppressive social work practice with individuals, families, groups, organizations, and communities affected by severe mental illness and upholding human rights, equity, and social justice; Analyze and integrate research-informed and practice-informed evidence to assess, intervene, and evaluate services for individuals and families experiencing severe mental illness, applying critical thinking and reflective judgment to improve outcomes; Design advocacy strategies, policy initiatives, and community-based interventions that address systemic barriers and promote inclusion, empowerment, and recovery among people with severe mental illness

SOWK 631 Clinical Social Work Practice with Family Violence (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will focus primarily on interpersonal and family violence between partners and the impact of violence on the family. It will examine the various epistemological conceptualizations of violence, and the treatment of violence as it is experienced by and from various family members within an ecological framework with consideration of micro, mezzo, and macro areas of practice.
Outcomes:
Analyze family violence using ethical reasoning and an intersectional, justice-oriented lens to demonstrate professional behavior, uphold human rights, and integrate anti-racism, diversity, equity, and inclusion in clinical decision-making; Apply research-informed theories, policies, and evidence-based frameworks to engage, assess, and intervene with individuals, families, groups, organizations, and communities affected by violence across the lifespan; Evaluate clinical, policy, and programmatic responses to family violence and construct informed recommendations while maintaining reflective awareness of professional values, biases, and well-being, Aligned with: Competencies 1-8 (integrated and holistic alignment)

SOWK 632 Clinical Social Work with Older Adults (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course includes a review of the basic concepts of gerontology/ geriatric practice, mental health issues, and interventions. The content of the course is intended to challenge students to move beyond basic levels of knowledge. It is intended to help students adapt social work theory (person-in-environment), practice principles, standards, and values to practice with older adults.
Outcomes:
Demonstrate knowledge of theories and practice concepts regarding the unique and diverse needs and capacities of older adults and their families, including mental health, substance abuse, and neurological challenges; Identify diversity, social justice, and human rights challenges for older adults with attention to the unique challenges of aging for groups that have been marginalized and discriminated against during their lifetimes; Utilize the elements of a biopsychosocial assessment and apply relevant laws, policies, and knowledge of resources to social work practice with older adults

SOWK 634 Special Topics (1-3 Credit Hours)
Topics for these courses are diverse. The purpose of having these courses is to expand the curriculum content and expose students to new and innovative subject matter. The topic of the course will be included in the class notes.

SOWK 637 Neurodevelopment and Trauma (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is an advanced concentration year practice elective focused on assessing the neurodevelopmental impact of trauma and selecting interventions consistent with this assessment. Students will learn to identify major regions of the brain, appreciate the sequential nature of brain development, and determine which areas of the brain have likely been affected by developmental trauma. Consistent with a neurosequential understanding of development, students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma. This assessment and intervention process occurs within the frameworks of systems and attachment theories, which recognize that the relational environments and communities in which clients live must be adequately safe and supportive for any intervention to be effective. This course is a hybrid course, incorporating recorded material supplied by The Child Trauma Academy. By the end of the course, students will have completed the majority of the requirements for Phase I Certification in the Neurosequential Model of Therapeutics. Because of this, the reading and out-of-class workload for this course is heavier than usual.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and equity-centered perspectives to analyze how social, cultural, and systemic factors influence neurodevelopmental and trauma-related outcomes across the lifespan; Integrate and synthesize neuroscience-informed theories and trauma assessment tools to assess the developmental, relational, and environmental impacts of trauma on individuals and families; Design and evaluate evidence-informed, brain-based, and relationally focused interventions that promote resilience, recovery, and healing for individuals and communities affected by trauma

SOWK 645 Crisis Intervention (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course provides students with the theoretical bases and practical skills for working with clients in crisis. This course focuses on general crisis theories, assessment models, and treatment/ intervention strategies. Students will concentrate on the application of these theories, models, and strategies in various practice settings.
Outcomes:
Demonstrate and apply ethical and professional behavior by integrating the NASW Code of Ethics, professional values, and self-reflective practice when assessing individual crises through an intersectional, culturally responsive, and anti-oppressive lens; Analyze and evaluate how political, systemic, and cultural factors contribute to crises in order to inform holistic, equitable, and evidence-informed crisis interventions with individuals, groups, families, and communities; Identify and implement evidence-based, trauma-informed crisis interventions that promote stabilization and enhance the well-being of individuals, groups, families, and communities

SOWK 650 Leadership & Supervision in Service Organizations (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Course content focuses on providing knowledge, values, ethics, and skills in guiding the work of others within social service organizations. Content areas include but are not limited to staff management, administrative supervision principles, models and styles, staff development, clinical supervision, teamwork, staff selection, legal and ethical issues, evaluation and termination, mediation, and conflict resolution.
Outcomes:
Demonstrate and apply ethical, inclusive, and socially just leadership behaviors by integrating professional values, anti-oppressive principles, and human rights frameworks into supervision and organizational practice; Analyze and synthesize research-informed theories and models of leadership, supervision, and organizational behavior to assess group and organizational dynamics and develop effective strategies for staff engagement, communication, and change management; Design, implement, and evaluate leadership and supervision practices that enhance team effectiveness, promote equity and professional growth, and improve outcomes across organizational systems

SOWK 652 Organizations, Program Development, and Evaluation (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course builds knowledge and skills in the areas of program development, sustainability, and evaluation. Program development is presented using an approach that also highlights the role of power, values, needs, and resources in decision-making processes. Grant-writing skills are developed alongside a critical analysis of social entrepreneurship and longstanding models of philanthropy. Knowledge and application of technology-based strategies to monitoring, evaluation and program improvement through data collection, data analysis, and data presentation are covered as well.
Outcomes:
Demonstrate and apply ethical and culturally responsive professional behavior by integrating anti-racist, inclusive, and justice-oriented principles into the design, implementation, and evaluation of social service programs; Analyze and synthesize research-informed theories, organizational models, and policy frameworks to develop logic models, evaluation plans, and funding strategies that strengthen organizational effectiveness and sustainability; Design, implement, and evaluate evidence-informed programs and fiscal strategies that enhance community impact, promote equity, and improve outcomes through ethical decision-making and continuous program improvement

SOWK 653 Community Organizing and Policy Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course focuses on the practice of community and political organizing designed to bring about social, economic, and racial justice. It explores interdisciplinary theories relating to processes of social change, representation, and power.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and justice-oriented approaches to analyze systemic inequities and advocate for policies and practices that promote human rights and social, racial, economic, and environmental justice; Integrate and synthesize community organizing, policy practice, and participatory frameworks to assess power structures, identify community needs and assets, and develop strategies for collective social action; Design, implement, and evaluate community-based and policy-driven interventions that empower marginalized groups, mobilize resources, and advance structural change through collaborative organizing and advocacy

SOWK 656 Social Work Practice with LGBTQ Populations (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is designed to provide students with an in-depth and critical understanding of social work practice issues related to individuals who are lesbian, gay, bisexual, transgender, and queer (+) (LGBTQ+), which includes intersex, two-spirit, demisexual, asexual, pansexual, omnisexual, their families, and the communities in which they live.
Outcomes:
Analyze how personal values, biases, and social identities influence professional relationships with LGBTQ+ clients and apply ethical decision-making frameworks to evaluate culturally responsive and affirming interventions across micro, mezzo, and macro levels of practice; Evaluate how intersecting systems of power, oppression, and privilege shape the lived experiences of LGBTQ+ individuals and create strategies that advance human rights, social, economic, and environmental justice through policy practice, advocacy, and coalition-building; Synthesize theories, research, and clinical frameworks (eg, minority stress theory, intersectionality, and trauma-informed care) to design and implement affirming, evidence-informed interventions that promote resilience, empowerment, and systemic change in LGBTQ+ communities

SOWK 662 Professional Development (3 Credit Hours)
This course focuses on the student's development as a social work professional and as a potential leader within the field, and the opportunities and strategies for personal professional impact. It is designed for the student who wants to develop a vision for advancing within the profession.

SOWK 670 Bridging Psychodynamic Theory and Cognitive Behavioral Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Psychodynamic theory and cognitive-behavioral theory are each associated with methods of intervention that have consistently been found to have therapeutic value for clients with a variety of psychosocial problems.
Outcomes:
Demonstrate and apply ethical, professional, and culturally responsive practice by integrating psychodynamic and cognitive-behavioral theories into clinical assessment and intervention with diverse client populations; Analyze and synthesize psychodynamic and cognitive-behavioral theoretical frameworks to assess client needs, formulate treatment goals, and select evidence-informed strategies that promote growth and resilience; Design, implement, and evaluate integrated treatment plans that enhance client well-being and advance effective therapeutic outcomes through the combined use of psychodynamic and cognitive-behavioral approaches

SOWK 680 Advanced Micro-Level Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
Micro Practice extends foundation knowledge of generalist practice and requires critical understanding of diverse theories and their related evidence-informed practice models. Critical analysis examines these models from an anti-racist and strengths perspective in order to intervene effectively using a variety of systems perspectives in situations of increased complexity.
Outcomes:
Demonstrate ethical, professional, and culturally responsive behavior by integrating anti-oppressive frameworks, critical self-reflection, and respect for diversity to advance human rights and equitable clinical social work practice with individuals, families, and groups; Assess clinical cases using clinical theories and policy-aware frameworks, develop treatment plans grounded in research-informed practice, and effectively engage with individuals, families, and groups in clinical settings; Implement evidence-based clinical interventions that improve client functioning and evaluate intervention outcomes across diverse individuals and families

SOWK 681 Advanced Mezzo & Macro Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course will focus on integrated practice approaches that span the micro (e.g., individuals/families/groups), mezzo (e.g., communities), and macro (e.g., systems, societal) frameworks. Numerous theories and models will be examined throughout the semester. The course also explores the role of the social work profession in creating social and organizational change, as well as interprofessional and interdisciplinary efforts.
Outcomes:
Demonstrate self-awareness and professional behavior in engaging with individuals, teams, community groups and organizations; Understand and demonstrate effective group and team facilitation and mediation process skills that facilitate engagement and collaboration

SOWK 682 Advanced Mezzo and Macro Practice (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work students, Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community-engaged practices and considers the community as a place of practice and source of social change and discusses the role. Emphasis is given to philanthropy and its critiques, as well as grant-writing. In addition, the course will provide(s) practical experience such as creating work team contracts, articulating the elements of a typical grant proposal, and reviewing grant proposals.
Outcomes:
Demonstrate and apply ethical, professional, and justice-oriented practice by integrating diverse theoretical frameworks and engaging in advocacy to promote equity and inclusion across systems of care; Analyze and synthesize policy, research, and practice perspectives to assess problems across micro, mezzo, and macro contexts and develop interventions that address the complex needs of individuals, families, and communities; Design, implement, and evaluate integrated practice interventions that promote collaboration, empowerment, and sustainable change within and across systems

SOWK 689 Arts-Based and Experiential Approaches to Social Work (3 Credit Hours)
Pre-requisites: SOWK 501 and SOWK 503 (Grade of C or better), or Advanced Standing or 5-Year SOWK Students
Students learn about arts-based and experiential approaches in social work practice, the theories that drive and support their use, and the evidence that supports their use throughout all levels of social work practice, including the micro, mezzo, and macro levels.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and inclusive practice by integrating arts-based and experiential approaches to promote social justice, equity, and empowerment among diverse client populations; Engage and collaborate with individuals, families, groups, organizations, and communities to incorporate creative, somatic, and expressive interventions that enhance engagement, communication, and healing across social work contexts; Design, implement, and evaluate arts-based and experiential treatment plans that promote resilience, growth, and transformation through innovative and culturally responsive interventions

SOWK 690 Independent Study (1-3 Credit Hours)
Independent studies generally consist of research, activities, and papers. Dependent on a student's needs, the course can be either 1, 2 or 3 credit hours and the requirements are adjusted accordingly. Students need to find a full-time faculty member willing to teach this course, obtain approval from the faculty member, as well as the Program Director to register for this course.

SOWK 714 Philanthropy, Public Policy, and Community Change (3 Credit Hours)
Pre-requisites: Graduate Social Work; Or Advanced Standing Students or 5-Year Social Work Students
This course examines the roles that philanthropy and foundations play in advancing, influencing, and preventing social and community change. It explores relationships between public policy and philanthropic giving. Patterns of giving, policy intervention strategies, structural issues, and programmatic opportunities and constraints will be illuminated.
Course equivalencies: PHPY402/SOWK714
Outcomes:
Engage with individuals, groups, organizations, and communities to critically examine philanthropy, public policy, and social change and reflect on their own positionality within systems of power and funding; Assess the roles, impacts, and accountability of philanthropic foundations and public policies by applying research, theory, and critical analysis to social welfare systems and community change efforts; Intervene and evaluate strategies for philanthropy-driven and policy-informed social change by analyzing evidence, engaging community perspectives, and assessing outcomes of alternative funding and advocacy approaches

SOWK 722 Introduction to Alcohol and Other Drug Disorders (3 Credit Hours)
This course will inform students about the prevalence of substance use disorders. These disorders are a part of the broad spectrum of social work practice. An assumption of the course is that SUD manifests in a variety of social work practice settings, therefore all social workers must have basic skills to identify, intervene with and refer to SUD-involved clients.
Outcomes:
Apply ethical, professional, and anti-oppressive social work principles to substance use practice by examining social justice, diversity, and human rights issues affecting individuals, families, and communities impacted by substance use disorders; Analyze substance use patterns, cultural contexts, and policy influences to assess the impact of alcohol and other drugs on individuals, families, and communities across micro, mezzo, and macro levels of practice; Evaluate substance use interventions, prevention strategies, and recovery-oriented approaches by integrating research-informed knowledge, experiential learning, and reflective practice to inform social work responses to substance use disorders

SOWK 730 Immigration Dynamics and U.S. Social Policy (3 Credit Hours)
This course also offers an exploration into some of the social policy and social welfare concerns associated with contemporary migration. This examination considers the social, political, environmental, and economic causes and consequences of migration; public policy regarding migration and the rights of immigrants; and the roles of governmental and nongovernmental local, national, and international organizations. Social justice themes related to migration are also explored.
Outcomes:
Analyze how US migration laws, policies, and historical practices produce and reproduce social, racial, economic, and environmental injustices, and apply that analysis to explain implications for immigrant well-being and service access; Apply anti-racist, diversity, equity, and inclusion principles to critically evaluate immigration-related programs, case materials, and classroom discussions, and to design culturally responsive teaching cases or interventions; Evaluate policy options and synthesize research, primary sources, and community perspectives to propose evidence-informed policy or practice recommendations and to assess their likely effects on individuals, families, and communities

SOWK 731 Social Work Practice with Refugees and Immigrants (3 Credit Hours)
This course focuses on identification and application of clinical social work assessment and intervention with major migrant groups. It considers immigrant and refugee individuals and families currently living in the U.S., helping students build a knowledge base for effective work, especially with those experiencing violence and trauma.
Outcomes:
Analyze and apply anti-racist, culturally responsive, and trauma-informed frameworks to advance human rights and social, racial, economic, and environmental justice in clinical practice with immigrants and refugees; Integrate research evidence, theoretical perspectives, and client narratives to develop and evaluate practice-informed interventions that promote resilience and empowerment among immigrant and refugee individuals, families, and communities; Design and implement collaborative, multi-level intervention strategies that strengthen engagement, assessment, and advocacy with immigrant and refugee populations while fostering sustainable change in organizational and community contexts

SOWK 732 Migration, Social Justice, and Human Rights (3 Credit Hours)
This course offers an exploration into some of the human rights and social justice concerns associated with global migration. It addresses distinct perspectives and practices of justice as they relate to concrete ethical and justice dilemmas posed by contemporary migration, immigration policies, and the social, political, and environmental factors that contribute to voluntary and forced migration.
Outcomes:
Evaluate and apply social work ethical principles and professional standards to complex human rights and migration scenarios, demonstrating integrity, critical reflection, and ethical decision-making in practice; Analyze and advocate for equitable social policies and practices that promote human rights, anti-racism, and social justice for migrants and refugees across micro, mezzo, and macro levels of practice; Design and propose policy-informed interventions that address human insecurities and systemic inequities affecting immigrant and refugee communities, integrating diverse social justice frameworks and evidence-informed approaches

SOWK 733 North American Migration Dynamics, Challenges & Opportunity (1-3 Credit Hours)
This course is offered in Mexico in collaboration with IberoAmericana an opportunity for Loyola students to come together with Mexican students to study migration related issues affecting our respective countries and shared continent. Specifically, the course will focus on central themes concerning the opportunities as well as challenges to fundamental social institutions and migration dynamics of policies for North America.

SOWK 734 Social Policy and Older Adults (3 Credit Hours)
This course will focus on services issues related to geriatric case management, home care and the continuum of community based services as well as the relationship between informal and formal support. In addition to exploring direct services and programs for older adults, there will be consideration of the needs and services for family caregivers.
Outcomes:
Students in this class will demonstrate the capacity to engage in critical thinking, apply knowledge of human behavior and the social environment, engage in policy practice to advance social and economic well-being and to deliver effective social work services; and respond to contexts that shape practice

SOWK 735 Loss, Grief, and Dying (3 Credit Hours)
Losses, followed by grief reactions are present in nearly every clinical situation that Social Workers encounter. This course will help students acquire skills in helping clients (and themselves) transition through grief in response to non-death and death experiences. The course builds on knowledge of direct practice, human behavior theory, life span development, and cultural diversity.
Outcomes:
Evaluate ethical and professional responsibilities in social work practice with loss, grief, and bereavement across diverse cultural and social contexts; Assess individual, family, and community responses to loss and grief using culturally responsive and theoretically informed social work frameworks; Apply and evaluate intervention strategies that support healing, meaning-making, and resilience in individuals and communities experiencing loss and bereavement

SOWK 754 Global Social Work: Reflective Practice for Justice and Peace (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work students
This course provides an introduction to social work practice in an international context. The emphasis is on understanding cross-cultural peace-building practices using clinical skills and community action activities that build civil society structures and promote peaceful resolution of socially traumatized experiences. This course includes video conferencing.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and human rights-based frameworks to analyze global issues of oppression, inequality, and justice across diverse cultural contexts; Integrate and synthesize policy, advocacy, and global practice models to develop strategies that influence international social welfare systems and promote equitable and sustainable community development; Design and evaluate culturally responsive and collaborative interventions that strengthen cross-national partnerships and promote social change, peace-building, and community resilience

SOWK 763 Women in a Global Context (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work students
This course covers understanding women in a global context, social development institutions, and women's representation within them and in related media and social media. It builds the knowledge of relevance to students of social work, women's studies, international studies, migration, and communication.
Outcomes:
By the end of this course, students will be able to: 1) Critically analyze global social policies through a feminist lens to evaluate their impact on women's rights and social, racial, economic, and environmental justice (Aligned with Competency 2 - Advance Human Rights and Social, Racial, Economic, and Environmental Justice); 2) Assess and interpret diverse cultural, social, and political perspectives influencing women's lived experiences globally to enhance cross-cultural understanding and advocacy in social work practice (Aligned with Competency 5 - Engage Diversity and Difference in Practice)\\n; 3) Create evidence-informed media or policy advocacy products that promote equitable representation and justice for women in global and local contexts (Aligned with Competency 2 - Advance Human Rights and Social, Racial, Economic, and Environmental Justice and Competency 5 - Engage Diversity and Difference in Practice)

SOWK 780 Integrative Seminar I Advanced School Mental Health Program (1 Credit Hour)
Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. This is the first semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar.

SOWK 781 Integrative Seminar II Advanced School Mental Health Program (2 Credit Hours)
Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 780 prior to taking this course. This is the second semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program.
Outcomes:
Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 782 Integrative Seminar III Advanced School Mental Health Program (1 Credit Hour)
This is the first semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students must be enrolled in the Advanced School Mental Health Certificate program.
Outcomes:
Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 783 Integrative Seminar IV Advanced School Mental Health Program (2 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 782. This is the second semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program.
Outcomes:
Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 784 Evidence Based Practice in Schools (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of evidence based practice techniques in the school setting.
Outcomes:
Students will have an increased ability to apply EBP interventions in educational settings

SOWK 785 Solution-Focused Brief Therapy Techniques (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of solution-focused brief therapy techniques in school settings.
Outcomes:
Students will have an increased ability to apply solution-focused brief therapy techniques in educational settings

SOWK 786 Special Topics in School Social Work (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course will focus on different critical issues related to social work interventions in school settings.
Outcomes:
Students will gain expertise in various interventions of importance to effective social work in school settings

SOWK 787 Special Topics in School Social Work - Immersion Weekend (1 Credit Hour)
This is a one credit course that compliments SOWK 786 and provides an immersion experience related to the special topic course for that year. Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed or be concurrently enrolled in SOWK 786.
Outcomes:
Students will gain additional expertise in various interventions of importance to effective social work in school settings

SOWK 788 SMHAPP Independent Study (2 Credit Hours)
Independent study for students admitted into the SMHAPP certificate program. Restricted to SMHAPP certificate program.

SOWK 800 Statistics (3 Credit Hours)
Pre-requisites: Restricted to Social Work PhD students; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course is the first in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers basic statistical concepts of probability, sampling distributions, confidence intervals, and statistical inference. The focus for the course is the applied use of statistical methods for the analysis of social science data using SPSS and manual calculations. In addition to covering applied statistical concepts and their application to data, the course will also critically examine the question of causality.
Outcomes:
Understand basic statistical concepts of probability, sampling distributions, confidence intervals, and statistical inference, including z-tests, t-tests, ANOVA, and Chi-square; Examine critically the question of causality; Demonstrate critical thinking around how statistics and quantitative analysis can be used to both marginalize and empower racial, ethnic, and other identity and/or geographic community groups

SOWK 801 Historical & Contemporary Issues in Social Work Practice (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
The course will provide a critical review and analysis of the historical development of social work practice and identify and explore contemporary issues that impact the current delivery of social work practice services. Students will read from the professional literature ranging from the early 1900s to the present; critically evaluate the development of social work practice theory, knowledge, and skills as the profession sought to define what constitutes social work practice; examine the broader social, cultural, political, economic, and other contextual forces that shaped (and were shaped by) the development of social work practice and the provision of services to individuals, families, groups, and communities.
Outcomes:
Evaluate the general historical development of social work practice in the 19th, 20th, and 21st centuries, and its impact upon the empowerment and oppression of historically marginalized communities; Evaluate how historically marginalized communities created systems of mutual aid to support each other outside of the profession of social work; Identify the domains of social work practice knowledge and the intellectual currents which have influenced its ongoing development

SOWK 802 Grand Theories & Perspectives in Social Work Knowledge (3 Credit Hours)
Pre-requisites: Restricted to Social Work PhD students; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course focuses on grand theories and perspectives which guide social work practice, research, and policy. Students in this course will critically examine the grand theories and perspectives which have influenced social work in the past, currently influence social work, and will likely shape the profession of social work in the future. Through examining and critiquing the grand theories and perspectives, students will be challenged to think about how these theories do and do not address social and economic justice while also acquiring more knowledge regarding how these theories and perspectives help students better understand their substantive areas.
Outcomes:
Examine various theoretical models and perspectives of practice in social work; Explore the advantages and limitations of social work paradigms; Understand the utility and difficulties associated with a multi-theoretical approach to social work practice and research

SOWK 803 Advanced Statistics (3 Credit Hours)
Pre-requisites: Restricted to students in the Social Work PhD program; Completion of SOWK 800 with a grade of B- or higher; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director; Completion of a course comparable to SOWK 800 with a grade of B- or higher is required; Interested non-social work PhD students are to submit the comparable course syllabus to the social work Doctoral Program Director for review and approval
This is the second in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers various multivariate statistical analysis techniques to test hypotheses that are most relevant to issues of social, economic, racial, and environmental justice.
Outcomes:
Understand correlation, two-way ANOVA, linear, multiple, and logistic regression; Apply these techniques, test assumptions, and interpret results using statistical software; Promote critical thinking around how statistics can be used to both marginalize and empower racial, ethnic, and other identity and/or geographic community groups, and around ethics in quantitative analysis

SOWK 804 Qualitative Research (3 Credit Hours)
Pre-requisites: Restricted to students in the Social Work PhD program with completion of SOWK 818 with a grade of B- or higher; For non-social work PhD students, completion of a course comparable to SOWK 818 with a grade of B- or higher and approval from the School of Social Work Doctoral Program Director; Interested non-social work PhD students are to submit the comparable course syllabus to the social work Doctoral Program Director for review and approval
This course provides an overview of the fundamentals of qualitative research. It provides a detailed consideration of knowledge and skills in qualitative inquiry. The science and paradigms for qualitative inquiry in social work are examined as well as principles for qualitative inquiry design including data collection, analysis, and writing.
Outcomes:
Articulate the connections between paradigm, research question, qualitative method, and methods for data analysis; Design and implement a qualitative research project that appropriately matches research questions; Describe the development and usefulness of different qualitative research methods, including ethnography and ethnomethodology, grounded theory, phenomenological approaches, historical research, and constructivist inquiry

SOWK 805 Research Practicum I (3 Credit Hours)
Pre-requisites: Doctoral student standing in the School of Social Work at Loyola University Chicago; Completion of SOWK 800, SOWK 803, SOWK 804, SOWK 818 with a grade of B- or higher
This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals.
Outcomes:
Critique research articles or their designs that demonstrate various methodologies and identify their strengths and weaknesses, as well as their contributions to social work practice; Identify a research problem and select an appropriate design and analysis plan; Create at least 2 manuscripts for publication or other similar documents reporting on the findings of their project

SOWK 806 Research Practicum II (3 Credit Hours)
Pre-requisites: Doctoral student standing in the School of Social Work at Loyola University Chicago; Completion of SOWK 805 with a grade of B- or higher
This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals.
Outcomes:
Critique research articles or their designs that demonstrate various methodologies; Identify strengths, weaknesses, and contributions of research articles to social work; Complete a research project that identifies a research problem and select an appropriate design and analysis plan

SOWK 808 Integration of Research, Practice, & Theory in Social Work Scholarship (3 Credit Hours)
Pre-requisites: Completion of SOWK 800, SOWK 803, SOWK 804, SOWK 818 with a grade of B- or higher and Social Work PhD Student; For non-social work PhD students, completion of comparable courses with a grade of B- or higher; Interested non-social work PhD students are to submit the comparable course syllabi to the social work Doctoral Program Director for review and approval
This course focuses on the examination of research, practice, and theory as well as the integration of these focal areas in doctoral students' substantive areas. Students will examine the research, theories, and practices that have been used in their substantive areas to gain further knowledge of the current state of their substantive areas and address key research questions.
Outcomes:
Examine research, theories, and practices in student's own substantive areas; Identify gaps in knowledge in student's own substantive areas of research; Explore ideas for future research and scholarship; Critically evaluate existing evidence in student's own areas of research

SOWK 817 The Nature of Social Work Knowledge (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course aims to help students understand the variety of contemporary understandings of science in the social and behavioral sciences and foundational aspects of designing research to develop conceptual frameworks for social work practice. Emphasis will be on science as a problem-solving process, with scientific knowledge development being a major link for the social worker between the roles of practitioner and researcher.
Outcomes:
Evaluate key aspects in philosophy of research for the social and behavioral sciences; Evaluate and analyze the major paradigms of knowledge generation in social work; Formulate an approach to scientific knowledge, with a focus on emancipation, anti-oppression as values key to the mission of social work, considering how approaches to science support or undermine those goals

SOWK 818 Social Work Research Methodology: Overview of the Fundamentals (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course presents an overview and critical analysis of the research methods commonly used in social work and other related disciplines. The course will involve reading about these research methods, critically analyzing a variety of research reports, and applying research methods to an area relevant to the advancement of knowledge about social work selected by each student.
Outcomes:
Understand the epistemological bases of various approaches to research on the research process and knowledge development in the social sciences; Understand the variety of traditions of research in and relevant to the social work profession, with an emphasis on research about practice, to identify and analyze the research and evaluation designs or strategies of inquiry; Understand problem formulation process, including engaging in the process of identifying and refining the description of a study issue, the statement of a research question, and the connection of it to a strategy of inquiry

SOWK 820 Social Theory & Social Change (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course will explore the evolution and development of macro practice in the United States with a focus on theory and methods that undergird community practice and policy practice. Course content will include a conceptual history of macro practice within social work, including the unique role of macro practice methods in carrying out the mission of the social work profession. The role of different forms of power, at the institutional and social level, as well as values and ethical dilemmas associated with macro practice and their relation to social work, will also inform the course.
Outcomes:
Evaluate the use of macro practice, including community practice (ie, development, planning, organization) and policy practice in the United States; Critically analyze how macro practice evolved within the social work profession, including the degree to which macro practice methods and models have advanced social work's historic mission and values; Identify how macro practice methods are used to address forms of social, political, and economic inequality, promote social justice, and secure human rights

SOWK 822 Organizational Analysis (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course explores the ways in which an organizational lens can be usefully applied in the context of social welfare-related research. The course will provide an overview of the ways in which scholars have approached the study of organizations and highlight theoretical traditions useful for understanding the work of human service organizations.
Outcomes:
Apply an organizational lens to analyze the roles and functions of human service organizations-such as social service agencies, schools, and advocacy organizations-in addressing social problems; Critically evaluate major theoretical traditions in organizational studies and assess their relevance to contemporary social welfare research contexts; Integrate organizational theory into original research designs, selecting appropriate theoretical frameworks and methodological approaches to explore questions related to social welfare and human service delivery

SOWK 827 Doctoral Study (1 Credit Hour)
Students register for this course during the semester they are taking their comprehensive exams and any semesters they do not yet have an approved proposal.
Outcomes:
Evaluate and demonstrate mastery of core disciplinary knowledge by successfully completing the comprehensive examination according to program criteria; Design a dissertation proposal plan and select a dissertation chair/adviser in collaboration with the doctoral program director

SOWK 828 Teaching Seminar and Practicum I (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course is designed to provide doctoral students with a thorough overview of teaching within a university setting from social justice and anti-racist perspective and the practical experience of preparing and teaching a course. This course focuses on theories of learning, the application of these theories to the teaching process, and the teaching process itself. SOWK 829 is a continuation of this content.
Outcomes:
Identify, discuss and analyze various teaching activities in relation to theories of learning and antiracist pedagogy; Identify and know how to develop a course in an area of specific academic interest and professional expertise; Develop a personal pedagogical style and accompanying statement, supplemented by additional relevant technological expertise which will support a sense of competence in your own ability to teach

SOWK 829 Teaching Seminar & Practicum II (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago and completion of SOWK 828 with a grade of B- or higher; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course is designed to provide doctoral students with a thorough overview of teaching within a university setting from a social justice and anti-racist perspective with the practical experience of preparing and teaching course content. SOWK 829 also continues focus on integrating material from SOWK 828 and creating and managing an inclusive environment via a variety of learning platforms with diverse students.
Outcomes:
Identify one's own biases and triggers to include and conduct class discussions on issues of social justice and diversity as it relates to the various topics in all social work courses; Develop ability to manage conflict around issues of diversity, whether it be political, theoretical, or personal issues raised in class discussion; Assess and critique their own and their colleagues' teaching style, instructional methods, and general strengths and weaknesses as a social work instructor

Social Work (PhD)

The PhD in Social Work, established in 1986, extends the tradition of educating students in research, scholarship, and teaching with the Jesuit ideals of service to others and commitment to social justice as its foundation. The doctoral program prepares students for leadership roles in diverse practice and academic arenas.

Our mission is to educate and train doctoral students to be independent scholars who conduct rigorous social work research and deliver effective teaching strategies to future social workers. The PhD Program at Loyola University Chicago School of Social Work builds on its clinical reputation by preparing doctoral students to create and evaluate practice-informed, client-centered interventions and policies that impact practice at the micro, mezzo, and macro levels. Doctoral students are trained in these practice-informed approaches to understand and respond to the complex social, racial, and economic justice issues that impact the most marginalized and oppressed in our society. The doctoral program reflects the social justice mission of our university by training doctoral students to engage in reflective and intentional study to become scholars who transform themselves, their community, the profession, and their world.

Program Goals

The specific goals of the PhD Program at the School of Social Work at Loyola University Chicago are consistent with national goals as outlined in the Group for Advancement of Doctoral Education (https://www.gadesocialwork.org/) and prepare professionals for:

- Scholarship and research in areas that include but are not limited to theory building, the effectiveness of practice interventions, and program evaluation.
- Academic teaching in the content areas of theory, practice, research, and policy.
- The advancement of the social work profession in a context that is global, and multi-cultural, requiring and addressing global-based human rights violations and inequalities.
- Leadership in the profession's commitment to remedying the growing and profound inequality with a commitment to policies, practices, and research that remedy those inequalities and their immediate negative effects on vulnerable populations.
- Inter-disciplinary scholarly work through course electives taken outside the SSW (School of Social Work) to enhance student's learning toward the completion of their dissertation.

Curriculum

The PhD in Social work requires 50 credit hours of coursework, a comprehensive examination, and a dissertation.

Coursework Requirements

The PhD in Social Work courses expand on student's understanding of social work research methodology and teaching.

Code	Title	Hours
SOWK 800	Statistics	3
SOWK 801	Historical & Contemporary Issues in Social Work Practice	3
SOWK 802	Grand Theories & Perspectives in Social Work Knowledge	3
SOWK 803	Advanced Statistics	3
SOWK 804	Qualitative Research	3
SOWK 805	Research Practicum I	3
SOWK 806	Research Practicum II	3
SOWK 808	Integration of Research, Practice, & Theory in Social Work Scholarship	3
SOWK 817	The Nature of Social Work Knowledge	3
SOWK 818	Social Work Research Methodology: Overview of the Fundamentals	3
SOWK 820	Social Theory & Social Change	3
SOWK 822	Organizational Analysis	3
SOWK 828	Teaching Seminar and Practicum I	3
SOWK 829	Teaching Seminar & Practicum II	3
Graduate Level Elective Courses [1]		6
SOWK 827	Doctoral Study	1
SOWK 600	Dissertation Supervision	1
Total Hours		**50**

[1] The goal of elective courses is to enhance the quality and scholarship of the dissertation. The Director of the Doctoral Program should be consulted to provide advising about potential elective courses.

Once a student has completed coursework, they are registered for SOWK 827 Doctoral Study or SOWK 600 Dissertation Supervision to maintain standing in the Graduate School. It is not necessary for students to register for either of these courses during the summer term, but it is imperative that they register for either of these two courses every fall and spring term until graduation.

Comprehensive Examinations

Once students have completed the core curriculum (the second year of course work) they prepare for the Comprehensive Exam which is

taken during the fall semester of their third year and prior to developing a dissertation proposal. The written and oral exam test knowledge and critical thinking in research and micro/mezzo/macro theories and practices in the context of social justice applications.

Dissertation

Students are encouraged to begin thinking about specific areas for scholarly inquiry early in their course of study and to discuss these interests with full-time faculty members who have similar interest and expertise. The educational experiences are planned to facilitate the development of skills of intensive investigation and the application of research techniques to clinical phenomenon, process and/or services. A dissertation proposal Chairperson may be selected as early as the second semester of study. The selection of the Chairperson is normally a matter of mutual agreement between the student and the faculty member involved. The development of the dissertation proposal is a continuous process of focus, modification, and refinement until the proposal is developed to the satisfaction of the student and the dissertation Chairperson.

The following criteria will be applied by members of the Dissertation Proposal Committee in determining acceptability of the document and in granting final approval:

1. Proposals must have as their ultimate objective a contribution to the knowledge of the practice of social work. This objective may be in the advancement of relevant theory, the improvement of practice, the process outcomes, or synthesis of existing knowledge.
2. The formulated research question must be based on informed and extensive knowledge of theory and prior empirical study in the specific area of pursuit.
3. Clear concepts and well articulated research questions must be formulated.
4. Client systems, other social systems, and social service delivery systems are acceptable foci for subject matter within the context of practice related problems, situations, interactions, processes, and outcomes.
5. Replication of other studies is acceptable provided theory is advanced by way of its application to practice. This implies thinking though of alternative explanations of prior findings, the formulation of questions and hypotheses which reflect this thinking and the development of designs which take into account the gaps and/or limitations of prior work.
6. Proposals must include an acceptable plan and methodology of inquiry. No single research methodology is favored or prohibited. The proposed study may be exploratory, experimental, or historic in nature. Appropriate guidelines for the collection of data and data analysis must be stated.
7. Sample size must be appropriate to the nature of the study, the questions asked and methods to be used. Intensive case study (individual, group or family) and single subject approached may be acceptable. However, replication over series of cases may improve the potential for committee approval as a dissertation topic and would provide opportunity for comparative analysis.
8. When agency accessibility and cooperation is essential to the study, a plan based on preliminary negotiations when attention to feasibility must be presented.
9. Proposals must accord with the policies and procedures of all relevant review boards for the Protection of Human Subjects.

When the Chairperson is satisfied that a report is reaching a stage at which approval from the Committee is likely, the Chairperson will request the Director of the Doctoral Program to schedule a Dissertation Hearing which will be open to the public and advertised to the students and faculty and the School of Social Work.

After the Dissertation Committee has given final approval to the Dissertation, the student must bring the manuscript form into conformance with official specifications and to submit all appropriate abstracts and forms. Students should be aware that they will not be allowed to graduate unless the Graduate School is satisfied that they have met all the requirements related to the submissions of the final document.

Suggested Sequence of Courses

After coursework listed below is complete, students begin taking SOWK 827 Doctoral Study or SOWK 600 Dissertation Supervision until dissertation defense.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

At the completion of the program, doctoral students in the PhD program should be able to demonstrate the following competencies as a practice-informed researcher in the field of social work.

- Apply a commitment to social justice, equity, and inclusion of all people, in all course assignments, comprehensive exams and dissertation work, with particular attention to the needs and empowerment of people who are vulnerable, oppressed, and living in poverty guided by the National Association of Social Work Code of Ethics
- Critically analyze and evaluate social work theories, practices, policies, and research and contribute to, extend, and create knowledge in your area of specialization
- Differentiate, appraise, and develop the capabilities as an independent research scholar, the necessary interpersonal skills for team-based research and scholarship, and the ability to contribute to the knowledge base in one’s area of interest through independent and collaborative scholarship.
- Examine one's positionality in research and teaching and develop a commitment to anti-racist and anti-oppressive practices in social work research, practice, and education as demonstrated by completion of yearlong research and teaching practicums.
- Compare, contrast, and critique existing social work pedagogies, and construct an emerging pedagogical style with teaching strategies for online and in person classrooms, which support establishing an inclusive classroom tailored to the learning styles of diverse students and their intersectional identities.

Institute of Pastoral Studies

Mission & Vision

The Institute of Pastoral Studies at Loyola University Chicago, a Catholic and Jesuit institution, facilitates the integrated ministerial development of diverse and dynamic leaders for creative, compassionate, and courageous service to church and society.

The Institute of Pastoral Studies aims to be a renowned global hub for educating and forming leaders in ministry who can adapt to the rapidly changing religious and social landscapes of the 21st century.

Degree Programs

IPS has six graduate degree programs and six degree concentration options that engage students at the nexus of theory and practice. Each program is built on foundational knowledge, enhanced by professional skills, and requires contextual education (https://www.luc.edu/ips/resources/contextualeducation/). No degree program at IPS is complete without an integration project (https://www.luc.edu/ips/resources/procedures/#den124710), ensuring that the academic knowledge, skills, and context come together so that our degree students graduate as true "Masters" in their chosen field of study. Our placement rates for graduates are strong, as each student has access to Loyola's career center as well as one of the largest, global network of ministerial alumni from a Catholic institution.

IPS degree programs are offered in Chicago, online, and in Rome, Italy. In addition to the assistance that may be provided by the University's Financial Aid office, IPS manages grants and scholarships available exclusively to its students seeking a graduate certificate or degree. As we live in an increasingly diverse and global world, IPS supports international education for its students through a special fund established for that purpose.

Being at a world-class institution in a world-class city means that IPS attracts a world-class faculty. Students study with highly-qualified professors, many of whom also bring ministerial experience to the program. Whether our students seek a program that leads to a career in ministry, service in the Church, counseling, spirituality, or social entrepreneurship, IPS has a degree or certificate to meet their needs.

To learn more about the Institute of Pastoral Studies, please complete the request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session (https://www.luc.edu/ips/admission/visit/), "All About IPS."

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.*

*Loyola University Chicago’s Institute for Pastoral Studies is accredited by the Association of Theological Schools (ATS) and is currently under a Warning pertaining to ATS Standards 2.6-7 on Educational Evaluation.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), Master of Arts in Pastoral Studies (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Graduate Certificates

The Institute of Pastoral Studies (IPS) offers eight graduate certificate programs. All certificate programs are accessible online. Some of these programs provide practical skills and can be obtained without an advanced degree, while others require an advanced degree to support the additional scholarly study. Please see the individual descriptions for prerequisite requirements.

The certificate programs provide participants with the opportunity to pursue a concentrated series of courses in Pastoral Counseling, Spiritual Direction, Christian Spirituality, Social Justice, Social Enterprise, Pastoral Leadership, Church Management, and Religious Education. In each of the advanced graduate certificate programs, students may substitute some courses for others, with the approval of the program director, in order to avoid redundancy or in order to create specialized professional focus.

Topics will vary.

Institute of Pastoral Studies (IPS)

IPS 400 Introduction to Graduate and Professional Writing (0 Credit Hours)
Writing skills are essential for success in graduate study and work in a variety of professional and ministerial settings. This course covers the following topics: academic integrity, grammar, research skills, citation, writing organization, thesis construction and critical thinking. Restricted to Institute of Pastoral Studies students
Outcomes:
Students will enhance their writing skills and develop analytical and communication skills that are critical to academic and professional writing

IPS 402 Church and Mission (3 Credit Hours)
Pre-requisites: IPS 570
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II to contemporary times

IPS 403 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

IPS 404 Theologies of Suffering (3 Credit Hours)
This course focuses on theologies of suffering with written interaction and assignments, personal reflection on the theologies of suffering and substantive feedback. The readings include 1) Scriptural treatment of suffering (Psalms, Job, Lamentations); 2) Theologians on suffering (Moltmann, Schillebeeckx, Gutierrez, Hall); 3) From various perspectives (womanist, liberation theologians, pastoral care).
Outcomes:
Integrate unit reading and resources with contemporary experience, highlighting the key concepts and points made by the authors

IPS 416 Introduction to New Testament (3 Credit Hours)
This course serves as an introduction to and overview of the New Testament. Students explore the world of Jesus and his interpreters from both a historical and a biblical perspective and learn about the religious and cultural world of Palestinian Judaism during the Roman occupation.
Outcomes:
Gain insight into the socio-economic-political context, discover and utilize the tools of historical studies and textual criticism and to translate New Testament faith into their own contexts

IPS 417 Introduction to the Old Testament (3 Credit Hours)
This course is an introduction to the Old Testament, the sacred literature of Christians and Jews. We will examine texts from the Pentateuch, historical, prophetic, and wisdom books. In order to reconstruct the meaning of texts for their original audiences, we will employ methods of modern critical biblical scholarship.
Outcomes:
Understand key theological points, recognize historical realities that gave rise to texts, recognize the theological, sociological, historical critiques expressed by texts, and demonstrate awareness of modern approaches to understanding texts

IPS 420 Ignatian Spiritual Direction Practicum I (3 Credit Hours)
Pre-requisites: Restricted to IPS Spiritual Direction Students
The Ignatian Spiritual Direction Practicum is for those who have experienced the transformative effects of the spirituality of St. Ignatius of Loyola in the Spiritual Exercises and feel called to help others experience this quiet, abiding presence in their lives. Interns develop and deepen their capacity to listen contemplatively to the movements of God in the life and prayer of directees. This includes helping directees discern those movements, make large and small decisions in the light of those movements, and foster an intimacy with God.
Outcomes:
Upon completion of this course, students will be able to: Define and demonstrate spiritual direction in the Ignatian tradition; differentiating between direction, therapy, and pastoral counseling; Recognize key moments in directees, including touchstone moments, images of God and self, key facts of one¿s spiritual journey, and how discernment is operative; Understand and experience the importance of supervision for on-going formation of all spiritual directors; and Identify and implement healthy and appropriate boundaries in a direction relationship

IPS 421 Ignatian Spiritual Direction Practicum II (2 Credit Hours)
Pre-requisites: Restricted to Approved Ignatian Practicum Students
The Ignatian Spiritual Direction Practicum is for those who have experienced the transformative effects of the spirituality of St. Ignatius of Loyola in the Spiritual Exercises and feel called to help others experience this quiet, abiding presence in their lives. Interns develop and deepen their capacity to listen contemplatively to the movements of God in the life and prayer of directees. This includes helping directees discern those movements, make large and small decisions in the light of those movements, and foster an intimacy with God. - Attend to and integrate one¿s personal grief as a way of increasing capacity to direct those who are grieving. - Understand and be aware of resistance in directees and how to respond.
Outcomes:
- Define and demonstrate spiritual direction in the Ignatian tradition
- Integrate learning into directing those with marginalized identities, including people of color, women, members of the LGBTQ+ community, and the aging

IPS 424 Catholic Social Ethics & Migration (3 Credit Hours)
Pre-requisites: Restricted to Institute of Pastoral Studies students
Our pastoral work with migrants requires a theology and an ethic of solidarity that gives greater meaning to the Gospel and to the ecclesial experience through a culture of encounter. In this course, students will receive the opportunity to: (1) Discern the "signs of the times" by listening and putting words to the sufferings, realities and hopes of migrants; (2) Receive the tools for personal and community reflection on the phenomenon of migration and illuminate this reality through from an ethic of solidarity which can be expressed through acts of both charity (welcoming the stranger) and social justice (creating systemic change); (3) To become aware of the psychological, spiritual and social condition that makes the migrant an extremely vulnerable person and realize that our salvation depends on the treatment we give our neighbors (Mt 25:40); (4) To become aware of our status as social beings and the universal call to love through "The Theology of the Good Samaritan" as one of the key teachings of Pope Francis' new encyclical, Fratelli Tutti, which implies working towards creating change in structures to make resettlement easier legally and institutionally; (5) Reflect on the importance and centrality of accompaniment as Jesus' own style and the essential characteristic of his various aspects and challenges included in the pastoral act of accompanying migrants. Note: The course will incorporate a popular religiosity style as well as the personal experiences of students to embrace key topics that are at the very center of our Catholic Social Teaching.
Outcomes:
Explain the key principles of social ethics in the Catholic tradition, particularly as outlined in modern 20th and 21st-century Church documents; Develop a pastoral plan that integrates practical, methodological, and pastoral tools to systematically address the spiritual and social needs of migrants; Critically assess the social structures that hinder the development of migrants and propose ways to accompany and support their holistic growth through ministry

IPS 428 Introduction to Spirituality Praxis (3 Credit Hours)
Investigation of the ministry of spiritual direction/accompaniment in a Christian context. Understanding spiritual direction/accompaniment as a particular form of mentoring and teaching, the course helps students to become critically aware of and explicitly articulate their working spiritual theology.
Outcomes:
Understand the nature of the ministry of spiritual direction; Interpret primary sources on the theme of spiritual formation; Analyze their working spiritual theology and their potential to become spiritual directors

IPS 429 Essentials of Spiritual Direction (3 Credit Hours)
Pre-requisites: IPS 428
This course invites students to consider the practical conditions, requirements and main challenges of the ministry of spiritual direction/ accompaniment so as to further their discernment process and prepare them for the Contextual Education component of their program of study, where they will begin to serve as spiritual directors/companions.
Outcomes:
Identify relational dynamics operative in spiritual direction; Measure the significance of developmental, relational and social-cultural factors for spiritual direction; Employ open listening, questioning and verbatim accounts

IPS 430 Spiritual Direction Development and Practice (3 Credit Hours)
Pre-requisites: Restricted to IPS Spiritual Direction Students
This course is designed for those called to the ministry of spiritual direction in the Christian tradition. It is structured to enable students to clarify their own frames of reference, develop interpersonal skills specific to spiritual direction, and experientially and academically consider the purposes and nuances of spiritual direction. In-class lecture, discussion, and practice of spiritual direction will be incorporated into synchronous sessions.
Outcomes:
More deeply understand and articulate one¿s own spirituality and its influence in one¿s practice of spiritual direction; Identify and explain key components and considerations for the practice of spiritual direction; Engage in meaningful ways with doing spiritual direction with individuals from different identities, communities, and ideologies and how this impacts the practice of spiritual direction; and Demonstrate interpersonal maturity and active listening skills in the context of spiritual direction

IPS 433 Dorothy Day and Thomas Merton (3 Credit Hours)
Dorothy Day, Catholic Worker co-founder, and Thomas Merton, Trappist monk, were outstanding American Catholics. Their lives and teaching raise important questions concerning vocation and religious commitment, war and peace, contemplation and simplicity in modern life, Christian activism, racial justice, capitalism, women, laity, and, with Merton, Christianity's relationship to world religions.
Outcomes:
A critical appropriation of activist-and-contemplative Christian/Catholic Christian spirituality and theology as understood and practiced in the lives of two outstanding American Catholic Christians

IPS 434 Art and Spirit: The Sacred and the Secular (3 Credit Hours)
An introduction to the visual arts exploring various approaches to understanding art, art history, terminology, techniques, media, and motivating factors for creating art from secular and sacred perspectives. A secular art appreciation textbook will be used in conjunction with Sacred Art Learning Units including lectures, readings, museum visits, and discussions on art from the Catholic tradition and other perspectives.
Outcomes:
Students will gain an understanding of liturgical art and environment ministry; enriched sense of religious identity; understanding of basic components of secular and sacred visual art, art history, contemporary art, and the value of art

IPS 435 Spirituality and Same-Sex Orientation (3 Credit Hours)
Spirituality is the lived experience of faith. What is the lived experience of Christian faith of gay and lesbian persons? What are the classical and contemporary resources biblical, theological, scientific, psychological, spiritual and experiential by which gay Christians affirm a spiritual core from which they live their lives and faith?
Outcomes:
Demonstrated understanding of key elements by which gays and lesbians shape lives that are simultaneously faithful to the gospel of Christ, their religious tradition, and the truth of their sexuality

IPS 436 Prayer: Ongoing Path of Conversion (3 Credit Hours)
The course combines theory and practice. It presents prayer as an intimate means of ongoing conversion in the Christian life. Content includes the biblical, historical, and theological foundations of prayer, psychological factors, and the actual practice of various Christian meditative and contemplative practices (lectio divina, meditation, Ignatian contemplation, centering prayer).
Outcomes:
A demonstrated understanding of: the history of Christian prayer; growth and development models in prayer; biblical and theological foundations; the experience of 4 Christian and 1 non-Christian prayer form

IPS 440 The History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution in the context of the ancient Near East. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 440/THEO 404

IPS 441 The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament , in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS441/THEO 405

IPS 442 Prophetic Literature (3 Credit Hours)
This course examined the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by the contemporary sociological and anthropological perspectives. Standard historical critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of this course

IPS 443 Wisdom Literature and Psalms (3 Credit Hours)
This course will study the Wisdom tradition and the Psalms of Israel. Formal critical analysis and history of tradition studies will be emphasized. The rich diversity of these parts of scripture will be a prime focus.
Course equivalencies: IPS 443/THEO419
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 445 The Synoptic Gospels (3 Credit Hours)
Even though the course focuses on Matthew, there will be a continual comparison with the other two Synoptics and occasionally with John. By exegesis of the Gospel of Matthew and the study of its specificity among the gospels, it is hoped students will be able to connect their contemporary experience of Christian diversity to the experiences of the earliest followers of Jesus. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 445/THEO 424

IPS 446 Luke-Acts and the New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view. Emphasis will be placed on the theological perspective of the writer of Luke-Acts and on the relationship of that perspective to other early Christian writers (Mark, Matthew, and Paul).
Course equivalencies: IPS 446/THEO 425
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 447 The Johannine Literature (3 Credit Hours)
The gospel of John has arguably exerted more influence on later Christian theology than any other gospel. Its unique Christology, possible anti-Judaism, the history of the Johannine community as reflected in the gospel, and the relation of the gospel to the Johannine epistles will be explored. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 447/THEO426

IPS 448 St. Paul's Contribution to Christianity (3 Credit Hours)
This course looks to three goals: a careful understanding of Paul's thought, to be discovered through exacting analysis of often difficult Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity in its facets of spirituality, Christology, redemption, ecclesiology, worship, sacraments, sin, etc.
Course equivalencies: IPS 448/THEO 427
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 449 The Person of Jesus in the New Testament (3 Credit Hours)
In this course attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities. Emphasis will be placed on both the variety and the development of early Christian attempts to understand the meaning of Jesus. In addition this variety and development will be placed in the context of early Judaism and Graeco-Roman religions.
Course equivalencies: IPS 449/THEO 429
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 454 Ministry with Young People & Spirituality Today (3 Credit Hours)
Pre-requisites: Restricted to Institute of Pastoral Studies students
Students will explore the foundations for ministry with young people, including the essential components to accompany youth and young adults in developing their identity as missionary disciples. The class will explore Ignatian spirituality as a tool to answer the recurring questions and challenges that shape young people's search for meaning and purpose in life.
Outcomes:
Articulate the differences between Youth Ministry, Young Adult Ministry, and Pastoral Juvenil in relation to the cultural and societal shifts affecting young people today, including secularization and disaffiliation; Apply Ignatian spirituality as a tool for discernment and accompaniment in ministry, supporting young people on their spiritual journeys toward developing their identity as missionary disciples; Evaluate current ministry approaches and propose new strategies for engaging youth, young adults, and jóvenes in a multicultural, secularizing world

IPS 456 Administration and Entrepreneurship in a Pastoral Context (3 Credit Hours)
This course equips students with essential management and leadership skills tailored for pastoral and nonprofit settings. Topics include project financing, budgeting, fundraising, grant writing, safeguarding policies, team building, volunteer management, and meeting coordination. Emphasizing an entrepreneurial approach, students will explore innovative strategies for developing, executing, and sustaining pastoral projects and initiatives that meet community needs. The course fosters a balance between practical skills and visionary leadership, preparing students to manage resources effectively while fostering a mission-driven, entrepreneurial spirit within faith-based and nonprofit settings.
Outcomes:
Critically evaluate management and leadership approaches for pastoral and nonprofit initiatives using case-based analysis that accounts for financial, operational/logistical, safeguarding, and human-resource realities; Produce a strategic plan for a pastoral initiative that includes (a) a project scope and goals, (b) a budget, (c) a financing/fundraising or grant strategy, (d) a staffing/volunteer plan, and (e) an implementation timeline with basic success indicators; Facilitate effective team and volunteer coordination for a pastoral project by applying structured communication and conflict-management practices that support accountability, collaboration, and mission-aligned innovation

IPS 465 Psychology and Spirituality of Life Transitions (3 Credit Hours)
Course examines the dynamics of change, attachment, and loss, suffering and grief and the transition process of endings, empty spaces and new beginnings. Conscious and intentional living is recognized as the most precious gift to give to oneself, loved ones, and the world.
Outcomes:
Students will learn how to face and incorporate change with increased faith and hope; more fully understand the psychological and spiritual impact of change; recognize value and meaning in events of daily life

IPS 467 Introduction to Canon Law (3 Credit Hours)
This course introduces students to Canon Law, also known as church law, which is grounded in the theology and ecclesiology of the Catholic Church.
Outcomes:
General overview of canon law as needed for lay ecclesial ministry; basic understanding of canon law as a discipline; knowledge of canons as related to sacrament of marriage and sacraments of initiation

IPS 472 Pastoral Counseling in an Intercultural Context (3 Credit Hours)
This course invites students into a reflective, interactive, experiential process of exploring the place of culture, values, beliefs, and biases in the counseling context. Students examine their own cultural experiences, with special attention to power dynamics, even as they study the complex dynamics of other cultures.
Outcomes:
Deepen awareness of one's own cultural dynamics; develop an increased understanding of other cultures; consider strategies and interventions for sensitively meeting the needs of those encountered in pastoral counseling

IPS 473 Family Therapy and Personal Transformation (3 Credit Hours)
Family therapy is a unique way of working with individuals, couples and families. This course will examine the foundations of, and theory and practice of family therapy as expressed in five major schools. We will integrate psychological and theological dimensions throughout. The course will balance didactic input and experiential exercises.
Outcomes:
Demonstrated knowledge of application ability of family system theory, family therapy, and understanding of culture and other effects on family systems

IPS 474 Addictions & Modes of Therapy (3 Credit Hours)
Addictions are among the most pervasive and potentially destructive entrapments of the human condition. Their presence in manifold forms, underscores the importance of understanding the roots and sources of its patterns, in order to ultimately shape treatment and therapeutic strategies from a holistic and integrative point of view.
Outcomes:
Gain understanding of general addictive patterns/processes as they are discernible across addictions; Grapple with the roots, causes, and extent of addictions, from various viewpoints; Understand various treatment approaches

IPS 478 Couples Counseling (3 Credit Hours)
This course prepares clinicians to understand and work with couples in crisis by examining five therapy approaches. Marital development, premarital counseling, healthy marital functioning, sexuality, spirituality, physiology, enrichment and working with affairs will be addressed. Class built upon lecture, case study, video presentation, role play, small and large group processing.
Outcomes:
Working knowledge of marital health, conflict and role of affect; ability to assess family dynamics and prepare treatment plan; comfort level with couples

IPS 480 Mindfulness and Pastoral Ministry (3 Credit Hours)
Participants will examine: a) historical overview of mindfulness in Christian and certain Eastern religious traditions; b) integration of mindfulness in pastoral ministry; c) emerging neuroscience regarding mindfulness; and, d) clinical research on the effectiveness of mindfulness in promoting positive mental health.
Outcomes:
Participants will gain the ability to describe the benefits of mindfulness and how mindfulness can be integrated into personal life and utilized in professional and/or ministerial roles; be personally knowledgeable about the experience of developing mindful awareness

IPS 483 The Pastoral Care & Counseling of Men (3 Credit Hours)
This course explains what it means to be male and masculine in this time and culture. Psychological development, influence of culture, power, the Male Code, intimacy, emotions, sexuality, spirituality, and inner life will all be explored. Individual and group, clinical and educational approaches will be discussed.
Outcomes:
Appropriated gender-based approach to working with men; and acquired inquisitiveness to men's issues and upbringing

IPS 485 Religious Education, Evangelization & Cultures (3 Credit Hours)
Religious education, including catechesis, evangelization, religious instruction, and faith formation, occurs within cultural settings (e.g., urban/suburban/rural; secular/religious; settled/immigrant; ethnically diverse/uniform; Millennial/GenX/Boomer/Greatest generation). This course provides the tools to analyze a cultural context, identify barriers to ongoing conversion, and teach effectively for religious and spiritual growth. Understand the educational significance of cultural context; Develop ethnographic and contextual analytical skills; Analyze and evaluate themselves, curricula and others for cultural appropriateness; Create culturally sensitive learning events.
Outcomes:
Know basic catechesis

IPS 486 Principles of Religious Education (3 Credit Hours)
Religious education, including catechesis, evangelization, religious instruction, and faith formation, occurs in many contexts often targeted for a particular age or cultural group. This basic course in religious education reveals the theological and educational roots and introduces the basic elements and processes including assessment, backward design, curriculum and learning. Analyze learning contexts; Apply theories to real life contexts; Evaluate oneself, curricula, and others with standards; Create a lesson addressing a real-life teaching challenge.
Outcomes:
Know and understand basic catechesis

IPS 493 Health Care Integration Project Portfolio (0 Credit Hours)
Pre-requisites: This course must be taken in the last year of study after fulfilling the other requirements for the concentration including: 3 designated health care courses, 2 workshops, basic CPE and CPE residency; Focused on the Certification process, an Integration Project portfolio is required for completion of the Health Care Chaplaincy Concentration in the MA Pastoral Studies program; This 0 credit course seeks to assist in the process by providing supervision for the student Focused on the process for Board Certification. Health Care Integration Project portfolio is required for completion of the Health Care Chaplaincy Concentration in the MA Pastoral Studies program. This 0 credit course seeks to assist in the process by providing supervision for the student.
Outcomes:
Completed portfolio for Board Certification with the National Association of Catholic Chaplains or Association of Professional Chaplains

IPS 499 Guided Study (1-6 Credit Hours)
Topics will vary.

IPS 501 Advanced Human Relation Skills (3 Credit Hours)
Provides the skills needed for the interpersonal involvement essential in any helping relationship. Participants learn and practice the skills of communicating empathy and challenge to others as well as exploring and disclosing oneself. Learning consists of applying theory to the experience of relationships in small groups.
Outcomes:
Students will effectively use ten essential skills to communicate and connect in relationships; Students will practice these skills with one another to understand the effect of these skills on the receiver

IPS 502 Theology of the Developing Person (3 Credit Hours)
This course seeks to help the students think theologically about human personhood. It offers students a theological anthropology presented with developmental considerations in mind. It offers a theological dialogue partner for psychological perspectives on development.
Outcomes:
Students will form a more abiding and working connection between theology and human experience; Students will understand how pastoral and therapeutic practice is strengthened by theological awareness and supports therapeutic and caregiving relationships

IPS 503 Fundamentals of Pastoral Counseling (3 Credit Hours)
Pre-requisites: IPS 501 (minimum grade of C+)
This course focuses on the process and skills of pastoral counseling. Emphasis is on training in basic listening and influencing skills. Students practice selected strategies drawn from various approaches to counseling.
Outcomes:
At the conclusion of this course, students will be expected to demonstrate mastery of two classes of core counseling skills (listening and influencing), which they will practice in small peer groups under the supervision of the instructors

IPS 505 Group Counseling Approaches (3 Credit Hours)
This course introduces students to the theory and practice of group approaches to counseling and preventative, psychoeducation work. Group dynamics and leadership issues are explored. Students will design and lead a group of their choosing.
Outcomes:
From various approaches to structured and unstructured groups, students develop a design for a specific group in which they are interested and which they plan to use in their subsequent career

IPS 507 Pastoral, Psychodynamic Assessment and Intervention (3 Credit Hours)
This course offers students the opportunity to integrate theoretical insights with the practical issues of assessment, diagnosis and response strategies for individuals and families. Psychodynamic and theological models are used in this effort, as is a strong commitment to naming the pastoral dimensions of assessment and response.
Outcomes:
Gain awareness of how healing and renewal is strengthened therapeutically; Examine how prevailing cultural attitudes contribute to human distress and / or renewal

IPS 509 Psychopathology (3 Credit Hours)
Pre-requisites: IPS 517
Students will learn how to use the Diagnostic and Statistical Manual of Mental Disorders 5th Edition (DSM-5) for diagnosing various psychopathological disorders.
Outcomes:
Familiarity with the DSM-5; DSM-IV TR multi-axial system; examine the etiology, treatment, and prognosis of selected mental disorders; develop interviewing skills to identify psychopathology; integrate a pastoral dimension of dealing with persons suffering from psychopathology

IPS 511 Internship Supervision I (3 Credit Hours)
Internship Supervision/Practicum I intend to facilitate entrance into the clinical internship site. Students will obtain further development of theory and skills of pastoral counseling. The course will facilitate the integration of theory and praxis, psychological and theological, and the personal and professional dimensions of one's identity as a pastoral counselor.
Outcomes:
Demonstrate growing integration of pastoral counseling skills and psychological theory into practice; Develop knowledge and understanding of competencies and diverse perspectives needed by spiritually integrated and clinically informed pastoral counselors

IPS 512 Ethics, Pastoral Counseling, and Spirituality (3 Credit Hours)
This course introduces students to the richness and diversity of the Christian moral tradition, giving particular attention to the deep interconnections between spirituality and ethics. It also introduces students to the codes, procedures and theoretical underpinnings of professional ethics, essential for those pursuing vocations as pastoral counselors and spiritual directors.
Outcomes:
Articulate ethical methodologies, relationship between spirituality and ethics, knowledge of several professional codes, skills of assisting clients, awareness of personal ethical stances and their integration in counseling and spiritual direction

IPS 513 Internship Supervision II (3 Credit Hours)
Pre-requisites: IPS 511
Supervision II/Practicum intends to facilitate ongoing development of theory and skills of pastoral counseling. Students will facilitate the integration of theory and practice, psychological and theological, personal and professional dimensions of one's identity as a pastoral counselor. The course includes the completion of the clinical integration project.
Outcomes:
Demonstrate integration of pastoral counseling skills and psychological theory into practice; Consolidate knowledge and understanding of competencies and diverse perspectives needed for spiritually integrated counseling by pastoral counselors

IPS 515 Research Methods (3 Credit Hours)
This course familiarizes students with research methods quantitative and qualitative approaches, experimental research design, interview and survey methods, descriptive and analytical statistics and evaluative research.
Outcomes:
Increased knowledge of research methods and statistics; critically evaluate research literature; become familiar with current research in counseling and pastoral counseling; identify research topics of personal and professional interest

IPS 517 Models of Pastoral Counseling (3 Credit Hours)
Models act like paradigms that inform therapists about what is important to focus on in their clients and what is healing, restorative, and growth-inducing in therapy. Each says something about what normal and abnormal functioning looks like and how therapy helps a person move from unhealthy to healthy functioning.
Outcomes:
Become familiar with basic counseling theories; articulate key concepts, assumptions about human nature, therapist, client relationship, process and goals, techniques, as well as strengths and limitations of each approach

IPS 518 Career Counseling for the Pastoral Counselor (3 Credit Hours)
This course will shed light on the value of the career counseling process by integrating career counseling theory, career inventories case studies, experiential learning and class discussion.
Outcomes:
General understanding of major career development theories and their relevance to the counseling process; Utilize multiple career development exercises and job search strategies, including resume-writing and interviewing techniques

IPS 520 Testing, Measurement & Assessment (3 Credit Hours)
Pre-requisites: Completion of a minimum of 24 credit hours, including Models of Pastoral Counseling (517), Psychopathology (509), and Human Development (555)
The course is required for licensure but is not a prerequisite for other courses. This course will provide an understanding of the role of individual and group approaches to assessment and evaluation and its role in diagnosis, clinical intervention, and treatment planning. It will cover assessment of the various attributes of a person though standardized tests, and also include an overview of statistical procedures relevant to test standardization and interpretation. Students will gain first-hand exposure to specific tests and learn to read and evaluate such instruments.
Outcomes:
This course is being added to the MA PC curriculum in response to a new requirement in state licensure for master level counselors

IPS 530 Clinical Pastoral Care Registration (1 Credit Hour)
Pre-requisites: Must be in MDiv or MAPS program to register for this course; CPE site must be approved prior to engagement; Clinical Pastoral Care registration for MDiv and MAPS students provides confirmation of CPE requirement for degree
This course serves as continuous enrollment and fulltime status verification for IPS students for whom CPE is a program requirement.
Outcomes:
Fulfills CPE or Contextual Ed requirement for MDiv and MAPS students

IPS 531 Christian Doctrine (3 Credit Hours)
The course is divided into two sections: (1) the historical evolution of Christian doctrine and its theological interpretations through Vatican II; (2) the development of doctrine in the post-Vatican II era, including an in-depth study of Karl Rahner's fundamental theology and contemporary theological issues with applications to present-day pastoral ministry.
Course equivalencies: X - IPS 531 / BEHL 502
Outcomes:
Students will discover the tools of historical theology and correlation; revising theological understanding in changed historical-cultural contexts; and the hermeneutical task of translating their meaning into present contexts

IPS 532 Social Context of Ministry (3 Credit Hours)
Christian life and ministry are socially located; they take place in specific social, cultural, political and economic contexts. We cannot minister effectively if we do not have a better understanding of the context in which we are called to serve. These contexts are the environment within which persons minister.
Outcomes:
Gain skills of critical social analysis and theological assessment for strategies of social change to facilitate ministry in a given context

IPS 541 Liturgy and Christian Sacraments (3 Credit Hours)
The Sacraments express our faith bringing us into an encounter with God's grace, forming us into the image of Christ. This course explores the theological, religious, and cultural origins of the liturgy and the sacraments as they have developed in response to the needs of the Church communities throughout time.
Outcomes:
Students will develop the ability to articulate a sacramental theology and understanding of the sacraments that enables them to address the meaning of the sacraments in connection to contemporary culture

IPS 545 The Foundations of Christian Spirituality (3 Credit Hours)
Enrollment Conditions: This course is required of all students in the MASp: Contemporary Spirituality Concentration and/or the Spiritual Direction Concentration; Is also required of all MDiv students. Christian spirituality (the "lived experience of Christian faith") is a separate but partnered academic field with theology today. Key issues are: defining "spirituality", methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

IPS 551 Social Ethics in the Catholic Tradition (3 Credit Hours)
Students should ideally complete IPS 416, 417, and 531 prior to taking this course. This course focuses on the tradition and practice of Catholic social thought. Students will become familiar with the documentary tradition of Catholic social teaching, as well as the ways that Catholic social thought has been embodied and advanced through the lives of Catholic activists and liberation theology. Particular attention will be given to history, texts, methodology, and significant figures in the tradition.
Outcomes:
Upon completion of this course, students will have a thorough knowledge of the tradition of Catholic social thought, will be able to analyze contemporary issues through the lens of this tradition, and will be able to enact this tradition in their ministerial contexts

IPS 553 Moral Theology and Christian Ethics (3 Credit Hours)
This course focuses primarily on methods in ethics. Students will become familiar with the tradition of Catholic moral theology as well as different contemporary methodologies in ethics. Particular attention will be given to the history of the discipline, the role of scripture in moral reasoning, and Catholic social teaching. To articulate the history and central categories in Catholic moral theology; to analyze a variety of contemporary methodologies in theological ethics.

IPS 555 Human Person and Psychological Development (3 Credit Hours)
Human beings are created to grow and mature into their full humanity. Every phase of life carries particular psychological and spiritual agendas. While each person is unique, our developmental story from birth to death is also our universal human story with particular variations, sharpened around gender and cultural differences.
Outcomes:
Exploration of developmental differences; Discovery of reliable markers for ministry to persons throughout the life cycle

IPS 560 Liturgical Leadership (3 Credit Hours)
This practicum develops skills in preparation for preaching and presiding at liturgical celebrations. The student will become familiar with different preaching styles, as well as theories of preaching and presiding. The focus includes public communication and preaching skills, as well as supervising and training volunteer liturgical ministers. Knowledge of preaching and presiding styles and theory.
Outcomes:
Ability to preside at liturgical celebrations; Development of preaching and public speaking skills; Familiarity with liturgical rites

IPS 564 Foundations of Pastoral Care (3 Credit Hours)
Pastoral Care is the ministry of accompanying people in the difficult times of their lives. Students explore the history, theology and purpose of pastoral care, including their own personal loss experiences. Students will be able to assess who they are as minister and what they bring into the pastoral care environment. Students will demonstrate the ability to implement pastoral care skills.

IPS 565 Pastoral Leadership (3 Credit Hours)
Examines recent and contemporary leadership theories, principles and practices, and assists students' applications as pastoral leaders in their own religious traditions and institutions. Offers a wide array of readings from the organizational and corporate literature, church documents, and pastoral literature from Roman Catholic, hierarchical church, and congregational church perspectives.
Outcomes:
Apply leadership literature from organizational, corporate, and pastoral perspectives, growing personal capacity for integrating pastoral management and leadership performances appropriate to their religious traditions, governance structures, and communities

IPS 570 Introduction to Theology and Ministry (3 Credit Hours)
IPS 570: Introduction to Theology and Ministry is recommended as the first course in the program. This course explores the interplay among traditions of theology and ministry, the history of ministry and the challenge of relating foundational traditions to the present array of ministries. The course allows you to become more certain and deliberate about the skills that constitute ministerial practice and ministerial theology.
Outcomes:
Students clarify and articulate a theory of ministry and method of ministry from which to operate; The heart of the course is development of self-confidence ministerial capacities as a professional

IPS 572 Ignatian Spirituality (3 Credit Hours)
This course invites students to consider core elements and principles of Ignatian spirituality, through the study of Ignatius of Loyola's major works and relevant Ignatian literature. Particular attention will be given to the Spiritual Exercises and their use for spiritual direction and formation, discernment and prayer.
Outcomes:
Identify the distinctive characteristics of Ignatian spirituality; Acquire practical knowledge of Ignatian imaginative prayer and discernment of spirits; Learn to adapt and direct Ignatius' Spiritual Exercises for spiritual direction

IPS 573 Spiritual Exercises of St Ignatius (3 Credit Hours)
This course provides an introduction and overview to Ignatian spirituality and the Spiritual Exercises of St. Ignatius of Loyola, equipping students to provide spiritual direction to individuals making the Exercises. Throughout the course we will address and discuss Ignatian topics, such as the movements of the Spiritual Exercises, the importance of discernment as a spiritual director, and one's own personal experience with the Exercises.
Outcomes:
Recognize the Ignatian Rules for Discernment within the context of directing an individual making the Spiritual Exercises; Identify and witness the key movements and meditations of the Spiritual Exercises; Recognize key elements of Ignatian spirituality and how they fit in the Spiritual Exercises; Articulate one's own personal experience and transformation due to Ignatian Spirituality and the Spiritual Exercises; Engage with current and prudent practices and be aware of opportunities for continuing education as spiritual directors

IPS 578 Contextual Education Preparation (1 Credit Hour)
Restricted to Institute of Pastoral Studies students. Prepares students to engage in the practice of contextual education by orienting students to the contextual education framework, focusing on their own vocational identity, and reflecting on how students view the work of ministry. It also covers the logistics of procuring a site and conducting theological action research.
Outcomes:
Facilitate site selection and completion of site agreement; introduce the practice of Theological Action Research; be orientated to contextual education

IPS 579 Contextual Education Introduction (1.5 Credit Hours)
Restricted to Institute of Pastoral Studies students. Facilitates the student's initial foray into work at their contextual education site, through regular coaching for reflection and guidance as well as workshops on useful skills for ministry. Students gain 100 hours of hands on experience at their site of ministry and begin to develop a community-based theological action research project.
Outcomes:
To gain basic familiarity with the contextual education site and to build relationships within the community, and gain basic experience in the work of ministry pertaining to the site

IPS 580 Contextual Education I (1.5 Credit Hours)
Pre-requisites: Completion of at least 18 credit hours, attendance at prep session, approval of site and supervisor by CCE, completed required documentation
Students apply for placement with an approved site at which they will exercise & develop professional/ministerial skills. Students engage in a minimum of 200 hours of leadership praxis. Students receive practically oriented instruction, participate in practice-based workshops & reflect on their leadership experience with their peers & an experienced coach.
Course equivalencies: IPS 580/IPS 640
Outcomes:
Gain tangible skills for leadership in ministry; Test vocational commitments and refine vocational identity; Develop capacity for theological reflection especially toward the integration of discipleship, leadership and mission

IPS 581 Contextual Education II (3 Credit Hours)
Pre-requisites: IPS 580
Students continue in their field placement exercising professional/ministerial leadership and further developing their self-identified professional/ministerial skills. While continuing to engage these contexts, students meet in class to further reflect on their leadership in ministry, discerning emerging strengths and areas of needed growth.
Course equivalencies: IPS 641/IPS 581
Outcomes:
Gain further proficiency in skills for leadership in ministry; Deepen & refine vocational identity in relation to present & future work; Further develop capacities of theological reflection on their work of ministry

IPS 585 Intro to Spiritual Direction Certificate Praxis for Contextual Ed (1.5 Credit Hours)
Designed particularly for Spiritual Direction Certificate students, IPS 585 launches a year-long praxis sequence focused on building competency and experience in the practice of offering spiritual direction. Through an eight-week, 1.5-credit online seminar, students establish a learning plan, form supervision agreements, and begin recruiting, screening, and meeting with directees in a manner consistent with professional and ethical standards. Students engage in guided practice, peer learning, and structured reflection (including verbatim work) while developing an initial plan for a silent or spiritual direction retreat that will be implemented during the fall-spring course sequence.
Outcomes:
Design a personalized praxis plan (learning plan) that identifies formation goals, supervision arrangements, and benchmarks for progress across the year-long sequence; Demonstrate foundational spiritual direction session practices (eg, attentive listening, discernment-oriented questioning, and session structure) in initial directee encounters; Apply ethical and professional standards for spiritual direction practice, including confidentiality, boundaries, documentation, and appropriate referral; Analyze sessions using verbatim reporting and reflective writing to evaluate personal strengths, growth edges, and next steps for competency development; Develop a feasible retreat concept note and preliminary retreat plan (purpose, structure, logistics, and evaluation approach) aligned with program expectations

IPS 586 Spiritual Direction Certificate Praxis I for Contextual Ed (0 Credit Hours)
IPS 586 is the first semester of a two-term, supervised practicum for Spiritual Direction Certificate students. Building on the foundational preparation of IPS 585, students engage in sustained spiritual direction practice with directees and in structured supervision designed to deepen competence, confidence, and ethical integrity. Students work toward the benchmark of completing substantial directee contact hours during the academic year (approximately 50 hours across IPS 586 and IPS 587), with ongoing reflection through verbatim work and self-assessment. During IPS 586, students also refine their retreat plan and complete the preparations necessary to host a silent or spiritual direction retreat during the practicum sequence.
Outcomes:
Sustain regular spiritual direction practice with directees and document progress toward program benchmarks using accurate hour logs and supervision verification; Integrate supervisory feedback to refine spiritual direction skills (eg, presence, listening, discernment, and ethical practice) and demonstrate growth over time; Analyze spiritual direction sessions through recurring verbatim reporting and reflective writing to strengthen critical reflection and self-assessment; Develop and finalize an implementable retreat plan (purpose, schedule, logistics, hospitality, and evaluation) appropriate to the student's context and scope; Evaluate vocational fit and formation needs in light of practicum experiences and articulate concrete next steps for continued growth

IPS 587 Spiritual Direction Certificate Praxis II for Contextual Ed (0 Credit Hours)
IPS 587 is the second semester of the Spiritual Direction Certificate supervised practicum sequence. Students continue providing spiritual direction with directees, deepen their competence through structured supervision, and complete remaining benchmarks for the certificate practicum (approximately 50 total directee contact hours across IPS 586 and IPS 587). The course culminates in the student's leadership of a silent or spiritual direction retreat and in a final integrative self-assessment of readiness for ongoing practice. Students submit a concise praxis portfolio that documents learning, supervision engagement, ethical practice, and next steps for continued formation.
Outcomes:
Demonstrate sustained, ethically grounded spiritual direction practice and complete required directee contact hours with accurate documentation and supervisor verification; Synthesize supervisory feedback across the year to articulate an emerging personal approach to spiritual direction and areas for continued development; Evaluate spiritual direction practice using advanced verbatim reflection that integrates theological/spiritual insight, self-awareness, and practical skill refinement; Plan and lead at least one silent or spiritual direction retreat and assess its effectiveness using participant feedback and self-evaluation; Create a final praxis portfolio that evidences competence, vocational commitment, and a realistic plan for continued supervision and professional/ministerial growth

IPS 593 Integration Project (0 Credit Hours)
The Integration Project (typically a written paper) involves the personal integration and application of one's course of studies at IPS into one's vocational/ministerial identity. 593 is required for MDIV, MASJ, MASp, MAHCML and MAPS students (though MAPS-Health Care Chaplaincy concentration students take 493 instead). Enrollment Conditions: Students should register in their final semester of coursework, or when they are within 9 credits of completing the degree. Registration requires a signed copy of the Integration Project Proposal.
Outcomes:
Successful integration and assessment of students' studies and vocational development

IPS 596 Special Topics in Health Care Ethics (1-3 Credit Hours)
This course is restricted to IPS graduate students.

IPS 599 Special Topics (1-6 Credit Hours)
Topics will vary.
Outcomes:
Outcomes will vary

IPS 605 Master's Study (1 Credit Hour)
IPS students who have not completed their degree are required to be continuously enrolled in a course until their degree is completed. This zero credit hour course fulfills that requirement for those who are finished with their coursework but not their final projects. Maintaining enrollment for those who are finished with their coursework but not their final projects.

IPS 610 Foundations of Social Justice (3 Credit Hours)
This course explores the philosophical, ethical and theological foundations for social justice with a particular emphasis on Catholic Social Teaching and Catholic social ethics, addressing the practice of justice with attention to concrete dilemmas which confront Christians in their efforts to do justice.
Outcomes:
To develop an in-depth understanding of social justice in the Catholic social teaching tradition, and in the Jewish and Christian scriptures; to articulate and support a working definition of social justice informed by the course

IPS 615 Liberation Theology (3 Credit Hours)
Liberation Theology refers to several related theologies that emerged in Latin America. Many more have been developed but all share the same basic methodology, focus their efforts on issues of social justice, and proceed with a prophetic voice. The course introduces the method of liberation theology and surveys a selection of primary texts from a variety of social contexts.
Outcomes:
Students will critically and constructively assess the contributions of Liberation Theology in the broader theological conversation; develop the skills necessary to assess and respond theologically to their own social contexts

IPS 620 Diversity and Equity (3 Credit Hours)
This course explores diversity in a global environment characterized by color, ethnicity, culture, national origin, class, gender, age, religion, physical or mental ability, gender identity and sexuality. Students will effectively analyze and assess the cultural and institutional context of social justice issues. IPS 620 is cross-listed with SOWK 502: Oppression,Privilege,Diversity.
Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50

IPS 625 Social Ethics: Politics and Global Economics (3 Credit Hours)
Economic institutions and issues of global justice are considered in the writings of philosophers, economists and socio-political theorists. Students effectively analyze institutional contexts of social justice issues and understand foundational local, national, and international justice issues linked to the political, economic, and social arenas. Analyze & evaluate current trends in international relations policy, economic markets & environmental impact from social justice perspective. Develop tactics for engaging in the work of social change within emerging global context.

IPS 627 Social Entrepreneurship (3 Credit Hours)
Intensive consideration of different examples of social entrepreneurship, including at least one utilizing Catholic Social Teaching; and more general observations of other models of social engagement and challenging unmet needs.
Outcomes:
Creation of an initial business sketch for a viable social entrepreneurship project to address a specific need

IPS 635 Community Organizing and Community Development (3 Credit Hours)
This course combines experiential learning with theories of community organization and development, exploring methods, strategies and key ideas of broad-based community organizing. Students will learn and practice the tools needed to organize as well as exhibit initial (foundational) competencies in social advocacy, community organizing and social change. IPS 635 is cross listed with SOWK 509: Community Intervention.
Course equivalencies: X- SOWK 509/IPS 635
Outcomes:
Increase understanding of approaches and methods of community organizing and community development; Become competent in evaluating resources available for the work of community organizing and development

IPS 651 Clinical Bioethics (3 Credit Hours)
This course will provide an overview of the major areas of clinical biomedical ethics. Issues that will be examined and analyzed include problem-solving methods, the theory and practice of informed consent, end-of-life decision making, physician-assisted suicide, pediatric ethical dilemmas, spirituality in clinical encounters, the injustice of health care disparities, and the role of ethics committees.
Course equivalencies: IPS 651/BEHP 401/BEHL 401
Outcomes:
Participants will gain familiarity with the terminology, resources, and major frameworks of ethical analysis in biomedical ethics

IPS 652 Organizational Ethics I (3 Credit Hours)
This is a two-month long blended course of online learning and a two-day intensive experience on the HSD campus. This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians within a group practice, administrators within a health system, or advocates within a community.
Course equivalencies: IPS 652/BEHP 412/BEHL 412
Outcomes:
Social and economic context of health care in the United States will be overviewed as the background for considering the responsibilities social justice entails to self, one's profession, one's patients, and the underserved

IPS 653 Organizational Ethics II (3 Credit Hours)
This is a two-month long blended course of online learning and a two-day intensive experience on the HSD campus. This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Questions of leadership style and theories of what constitutes effective leadership are considered; Communication strategies and methods of organizational change key focuses

IPS 654 Catholic Bioethics and Clinical Practice (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
Assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics

IPS 655 Catholic Bioethics and Social Justice (3 Credit Hours)
Course involves an historical study of the development of the body of official Catholic Social Teaching specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Develop the participants understanding of the principles of Catholic Social Teaching and their application to the healthcare context

IPS 656 Advancing Health Equity Practice (3 Credit Hours)
A two-month long blended course of online learning and a two-day intensive experience on the HSD campus. Topics cover the role of racial and economic health disparities in the process of care and health outcomes, Cultural and Linguistic Appropriate Standards (CLAS) in health care, self-assessment and evaluation of institutional needs.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Knowledge and skills gained in this course can be used to develop an advocacy role for evaluating and promoting cultural competency within a health care system

IPS 657 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

IPS 658 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

IPS 659 Management of Professionals in Healthcare Organizations (3 Credit Hours)
This course offers students the opportunity to analyze, expand, and synthesize their understanding of technical, human relations and conceptual skills essential to functioning within the role of manager/administrator in health care settings.
Course equivalencies: X-IPS 659/CMAN568
Outcomes:
Analyze and synthesize knowledge of the concepts of professional role and organizational dynamics for use as a foundation for the role of manager/administrator in health care settings

IPS 660 Leadership in Social Justice Organizations (3 Credit Hours)
This course explores different approaches to leadership on behalf of social justice with a strong focus on developing a personal leadership style and practices to deepen students' sense of vocation. Develops a number of practical leadership skills connected to discernment, leading through adaptive challenges, team development and bridge building, management, and visioning.
Outcomes:
To understand leadership models and techniques for social justice organizations; To integrate spiritual practices and disciplines into leadership and management; To develop skills managing and interfacing with faith-based and non-profit

IPS 672 Media for Ministry and Mission (3 Credit Hours)
For more than a hundred years, film, radio, and television have had a profound effect on the practice on ministry and pastoral care. Now in the 21st century, the explosion of new types of interactive and social media have revolutionized our interactions, our economy, and our world. Churches and social justice organizations, however, have often been slow to adopt or even explore these new technologies.
Outcomes:
Participants will leave this course with an understanding of how to navigate the changing media landscape, think theologically about digital communications, and put media tools to work for ministry and mission; You will learn to plan strategic campaigns, create content, and measure results; Coursework will include engagement with various platforms, as well as an introduction to key concepts from media history and theory

Counseling

- Counseling for Ministry (MA) (p. 1412)
- Pastoral Counseling (MA) (p. 1415)
- Pastoral Counseling Certificate (p. 1418)

Counseling for Ministry (MA)

As of Fall 2026, the degree described on this page is no longer accepting applicants.

We encourage those interested in Counseling ministries (but not licensure as a professional counselor) to apply to the Pastoral Studies (MA) (p. 1437) degree, into which foundational counseling courses can be directly integrated.

The 36 credit hour Master Of Arts degree in Counseling For Ministry is designed to prepare students to become competent and effective pastoral caregivers in their present and future ministries.

Our contemporary social and cultural contexts reveal strong needs for ministry-based caregiving with competency from within religious traditions and their communities. The long and rich history of counseling within ministry gives witness to that commitment called "ministry of care", or in Jesuit terms, *cura personalis*.

The Master's in Counseling for Ministry degree program is suited to international students and others who do not require the 60 credit hour MA in Pastoral Counseling that is designed to meet the requirements for Illinois licensure as a clinical counselor.

The MA in Counseling for Ministry mirrors the competency requirements of the Pastoral Counseling program but without the additional licensure requirements, allowing students to serve the therapeutic needs of faith communities in the USA and around the world.

The Counseling for Ministry (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

To learn more about the master's degree in counseling for ministry and studying in the USA, please visit our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Curriculum

The Master of Arts in Counseling for Ministry allows international students and those interested in Pastoral Counseling to receive a degree in counseling without the 60 credit hour licensure requirements. This 38 credit hour program continues to build student's understanding of religious culture, values and beliefs in a reflective and articulate form while equipping students to serve the therapeutic needs of their communities in a meaningful way.

The Counseling for Ministry (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Accelerated Master's Pathway

Students can take up to 18 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

These are the appropriate classes for students in their first year of graduate study for the MA in Counseling for Ministry (MACM) at the Institute of Pastoral Studies (IPS). With the approval of their IPS academic advisor and undergraduate degree advisor, a student may select alternative classes from the MACM curriculum or other graduate-level classes that count as electives toward the MACM.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional

Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the Master of Arts in Counseling for Ministry, students will be able to demonstrate:

- The ability of pastoral caregivers to engage their social and cultural contextual environments in order to expand their pastoral competencies. (Cultural Context)
- The ability to interpret and assess pastoral caregiving in relation to the historical and contemporary pastoral commitments of faith communities. (Theology/Spirituality/Religious Heritage)
- The ability to offer competent and meaningful pastorally supportive services within largely faith-based contexts, based on personal, interpersonal, and spiritual maturity. (Maturity/Personal Formation)
- The ability to appropriately assess personal and relational life conditions that contribute to human distress and break down, with the skills needed to discern and effectively pastoral engage the identified dilemmas within the range of their defined competencies. (Skills/Ministerial Leadership)

Pastoral Counseling (MA)

Pastoral counseling at IPS is understood as professional therapeutic ministry. This ministry is pursued with a vision of the human person that includes insights from the human sciences as well as religious and spiritual dimensions of life. Often, but not always, pastoral counseling takes place in a setting that reflects a spiritually-oriented environment. The purpose of the M.A. in Pastoral Counseling is to prepare caregivers and counselors for this work.

This degree program prepares pastoral clinicians to provide therapeutic services in faith-based and other contexts. A multidisciplinary curriculum and peer learning groups are among the distinguishing characteristics of this degree.

The Pastoral Counseling (MA) also offers an Accelerated Master's Pathway for Undergraduate students to start their Graduate studies in their senior year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Students in this program will find an understanding of pastoral counseling incorporating both the best of psychological theory and the riches of contemporary theology. They will find educational and spiritual approaches that combine both theory and practice. They will discover a vision of the counselor that reflects both individual and relational work, supportive and intensive therapies, psychological competence and theological congruence. And they will find a methodology that is consistently committed to the achievement of personal and professional integration.

In order to meet the current licensure requirements of the state of Illinois (LPC as a base for moving toward LCPC), and to respond to developing nationwide trends toward interstate licensure portability, while continuing to provide the integrative pastoral focus of Loyola's MA Pastoral Counseling degree, the degree has moved to a three year, 60-hour design.

- LPC = Licensed Professional Counselor
- LCPC = Licensed Clinical Professional Counselor

The Master's in Pastoral Counseling program can also be completed half time over four or five years. The half time student's curriculum is determined with their advisor.

The Master's in Pastoral Counseling can be completed entirely online. Students seeking to complete the degree fully online and in three years (as a full-time student) must enroll and begin in a Fall semester.

A diverse number of internship sites are available from non-profits, governmental organizations, schools, counseling, mental health and faith-based sites. Students apply for these internships and are selected by the sites. Students may submit a site of their own choosing, but it must be approved by IPS.

International Students

International students who will study in person in Chicago must enroll and begin the curriculum in a Fall semester.

Additional Information

To learn more about state and international authorization of programs, please refer to our State and International Authorization page (https://www.luc.edu/ool/services/stateandinternationalauthorization/). To learn more about the accreditation of Loyola University Chicago and its schools, as well as information about professional licensure, visit our Accreditation page (https://www.luc.edu/accreditation/index.shtml/).

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Curriculum

Master of Arts in Pastoral Counseling

In order to meet the current licensure requirements of the state of Illinois (LPC as a base for moving toward LCPC), and to respond to developing nationwide trends toward interstate licensure portability, while continuing to provide the integrative pastoral focus of Loyola's MA Pastoral Counseling degree, the curriculum is built around a three year, 60 credit hour design.

Part-time students will tailor their course selection with their advisor. International students with a student visa and studying in person must begin the degree in a Fall semester.

- LPC = Licensed Professional Counselor
- LCPC = Licensed Clinical Professional Counselor

Besides the traditional Master's program, the Public Service Leadership (MA) is also offered as an Accelerated Master's Pathway where exceptional students can begin their first year of Graduate studies in their senior year. A suggested sequence for the AMP can be found below.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Master of Arts in Pastoral Counseling

By completing the Master of Arts in Pastoral Counseling, students will be able to demonstrate:

- The ability to pastorally and clinically engage human psychological, relational, and contextual distress in therapeutic ways. (Cultural Context)
- The ability to interpret, engage, and expand psycho-spiritual meaning making in relation to the pastoral legacy of faith communities. (Theology /Spirituality/Religious Heritage)
- The ability to offer competent therapeutic services in secular and/or faith-based contexts based on personal, interpersonal, and spiritual maturity. (Maturity/Personal Formation)
- The ability to appropriately assess and diagnose personal and relational life conditions that contribute to human distress and break down, with the skills needed to discern and effectively pastoral engage the identified dilemmas. (Skills/Ministerial Leadership)

Pastoral Counseling Certificate

As of Fall 2026, this program is no longer accepting applicants.

Available On-Site and Online. This advanced graduate certificate program prepares counselors to practice counseling in secular and/or faith-based settings through gaining additional skills in psychospiritual therapeutic accompaniment. A Masters degree in counseling or Ministry/Divinity/Theology is a prerequisite for this certificate. Five courses comprise the certificate with one of these courses to include a one semester practicum and/or internship supervision experience.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- The Certificate in Pastoral Counseling prepares counselors of various theoretical orientations to practice spiritually integrated counseling within faith-based and/or secular settings.

Divinity

- Divinity (MDiv) (p. 1419)
- Divinity with a Concentration in Chaplaincy (MDiv) (p. 1423)
- Divinity with a Concentration in Spiritual Direction (MDiv) (p. 1427)
- Divinity and Pastoral Counseling (MDiv/MA) (p. 1866)
- Divinity and Social Justice (MDiv/MA) (p. 1867)

Divinity (MDiv)

Available Online. The Master of Divinity (MDiv) is a comprehensive degree designed to meet the educational needs of persons called to professional ministerial leadership. Students complete the core curriculum and may choose to take elective courses specific to such ministries as chaplaincy, religious education, social justice, digital communications, and church management, among others. This degree satisfies the educational requirements for Board Certification by both the National Association of Catholic Chaplains and the Association of Professional Chaplains.

These ministers extend the religious tradition in spiritual leadership in a variety of contexts (parishes and churches, healthcare institutions, faith-based non-profit organizations, retreat centers, educational institutions, etc.) by preaching and teaching, by counseling, consoling, and offering pastoral care, by serving and challenging, by leading prayer and praying, by empowering and equipping, by prophetically pointing to injustice and by faithfully organizing for needed change. Born of the present needs for church ministers and decision-makers, this degree qualifies students for the new genre of pastoral leadership. The MDiv cultivates a ministerial way of being through academic and formational requirements, which parallel the Church's traditional seminary setting. Loyola's Jesuit and university context provides the breadth and depth that tomorrow's Church requires.

The religious leaders who emerge from this MDiv program are called upon to resource (both to mediate and to augment) the Christian Tradition. Thus, they require education and formation not only for the way things are, but also for the way things are going to be. They need to be generalists grounded in the faith tradition, but also specialists possessing the interpersonal and spiritual skills to empower others in particular settings. These persons will be leaders who can articulate in religious language their own profound experience, discern the presence of the divine in others' experience, and convoke and nurture community, accompanying others on the journey through life.

While focused primarily to prepare non-ordained people for ministerial leadership, the Loyola MDiv program also welcomes members of religious communities, clergy, and participants from other communions committed to an academic and formational experience attuned to the diversity, mutuality, and collaboration that will characterize tomorrow's Church.

Students can pursue the degree on campus or as a distance program via online education. For the distance program all courses are available entirely online. Students can take courses on either a full or part-time basis. Full-time students take three-four years to complete the program; part-time students typically complete their degree within five-six years. The typical course load is three or four courses per semester for full-time students, with additional classes taken over two summers. The MDiv degree cannot be completed on a summers-only basis.

The Divinity (MDiv) also offers an Accelerated Master's Pathway for Undergraduate students to start their Graduate studies in their senior year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

The MDiv of the Institute of Pastoral Studies at Loyola University Chicago truly assists persons in achieving a degree of difference for tomorrow's Church as it prepares people to lead extraordinary lives.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Curriculum

The MDiv curriculum recognizes that professional ministerial leadership emerges from faith-filled ministerial practice and seeks reflective critical understanding to prepare graduates to know, serve and love practically.

This gives rise to three aspects of the MDiv program: faith formation, reflective critical understanding and ministerial practice.

These areas of the curriculum prepare students for work in various areas:

- The church's institutional placements, which include parish leadership, diocesan administration, hospital chaplaincy and campus

ministry, and parallel religious organizations, which include ministry options in organizations dealing with religious communications.
- Peace and justice advocacy, parochial school administration, as well as spirituality centers.
- Public-service positions such as legal advocacy, industrial chaplaincy, business ethics, social work, nursing and counseling that invite a pastoral or spiritual perspective, along with standard knowledge of the field.

The MDiv degree is a 72-credit-hour (24-course) degree program, composed of three interconnected components: academic coursework, pastoral formation and ministerial skills. The IPS MDiv curriculum recognizes ministerial leadership as emerging from faith-filled ministerial practice, seeking reflective critical understanding, so as to serve, know, and love practically. These three movements are reflected in each aspect of the MDiv Program: Faith Formation, Reflective Critical Understanding and Ministerial Practice.

Besides the traditional Master's program, the Divinity (MDiv) is also offered as an Accelerated Master's Pathway where exceptional students can begin their first year of Graduate studies in their senior year. A suggested sequence for the AMP can be found below.

The MDiv curriculum builds on top of the Master of Arts in Pastoral Studies (MAPS) degree program.

Code	Title	Hours

Ministry Focus		

Ministry Focus names the process by which the MDiv student reviews the work of the first half of his/her curriculum, declares an intended focus or particular character, and projects the remainder of this curriculum for assessment, feedback, and approval by the IPS faculty. While these two tasks are distinct they intertwine in many ways and are enacted in one procedure.

Three (3) Courses in Ministry Focus		9
Contextual Education		
IPS 579	Contextual Education Introduction	1.5
IPS 580	Contextual Education I	1.5
IPS 581	Contextual Education II	3
Total Hours		**72**

Contextual Education

As a "pastoral" institute, IPS operates from a "praxis paradigm*" in relation to theological and ministerial education. This means that in Contextual Education students acquire knowledge for the sake of religious transformation as they experience God's action in persons' lives and link this action with tradition. Thus, images of Contextual Education limited to giving students work experience. while they are studying, or that understand Field Education to be the context in which to "learn skills," are marginal to and outmoded for the praxis paradigm for pastoral studies. On the contrary, Contextual Education is an essential locus for exercising and gaining the knowledge essential for pastoral studies. It is a theological exercise, including four movements:

- Describing the community's practice
- Analyzing this practice historically
- Systematically relating life themes in the practice to the religious traditions
- Establishing the norms and strategies of ministerial response to the practice

Contextual Education plays a major role in the very orchestration of theological education, an activity through which students generate data for theological construction and reconstruction. It also provides a setting for the student to exercise ministerial skills of caring for creation (cosmic, social, personal, and individual welfare), proclaiming the faith, and enacting the community.

Contextual Education then stands at the portal between the community and the university. In one direction the Contextual Education students join the community engaging the religious experiences of life. In the other, at the Institute, they join teachers and colleagues reflecting on the community's practice in light of the religious traditions. During this exchange MDiv Students learn to generatively practice reflection and reflectively practice. They learn to become "ministers," ambassadors to the community.

MDiv students normally engage in Contextual Education during the second year of the program (or after 8–12 courses have been completed). This allows students to do one year of classroom work and to prepare to engage a Contextual Education placement. It provides another year of classroom endeavor after the experience to concentrate on one's ministry objectives, refined in Contextual Education.

Clinical Pastoral Education

Clinical Pastoral Education (CPE) is a an interfaith method of theological education through which a student learns pastoral skills within a context of ministerial relationships to people and under the direct supervision of a certified pastoral supervisor. It provides a learning situation for

a ministerial student in which they may develop awareness of the theological and psycho-social concerns of persons in crisis.

The CPE component is typically completed before application to candidacy to address one key candidacy concern, namely, personal growth matters of self awareness and self reflection. The student uses material from the CPE report to support his or her candidacy.

Candidacy is the process by which the IPS faculty exercises its responsibility to the church and other concerned publics by determining that the student has both the potential to satisfactorily complete this degree and a readiness to begin ministry.

MDiv Midpoint Review

When students reach the half-way point in their coursework, they being preparing for contextual education. As part of this preparation process, students will also do a Midpoint Review. The student will write a brief statement (3-4 pages) on his or her "Vocational Identity, Vision, and Practice." This statement will first be approved by the Faculty Coordinator for Contextual Education. It will be submitted to the student's advisor, and the student and advisor will meet to discuss the statement, as well as the student's progress toward the completion of the M.Div. program. The advisor will note the successful completion of the Midpoint Review in the student's eportfolio on TaskStream. Alternatively, if the advisor has concerns about the student's progress, further work may be requested to successfully complete this review (e.g., further units of CPE, spiritual direction or pastoral counseling, re-taking courses in which one did not receive a passing grade, etc.). Failure to successfully complete this review and/or any additional steps requested in this process may be grounds for dismissal from the program.

In addition, the statement will serve as a draft for this same section of the student's final integration project, and the comparison of the two drafts will ideally demonstrate the progress and growth the student has achieved through completing the final half of the MDiv program. For guidelines on drafting this statement, see the relevant section of the M.Div. Integration Project Guidelines Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710).

Faith Formation

Spiritual Direction

Spiritual direction is the process of deepening one's relationship with God through a reflection and discernment process shared with a mentor trained to facilitate listening and responding to God's continuing revelation in the whole of one's life. It is recognized that many MDiv students have a spiritual director and the availability of this service is not intended to replace that long-standing relationship. However IPS does provide the opportunity of experienced spiritual directors for all IPS students. Individual sessions will be held for one hour every other week. A registration form available on the IPS website must be filled out and returned to the IPS Office 2 weeks prior to the beginning of each semester, and registration must be made through LOCUS. This is a 0 credit hour course.

Pastoral Counseling

Pastoral counseling is a process of developing a deeper understanding of self and self-in-relationship to others, to society and to the environment. Particular attention is given to theological and psychological dimensions of personal growth and integration. Individual sessions will be one hour each week. A registration form available on the IPS website must be filled out and returned to the IPS Office 2 weeks prior to the beginning of each semester, and registration must be made through LOCUS. This is a 0 credit hour course.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

MDiv (Master of Divinity)

By completing the Master of Divinity, students will be able to demonstrate:

- The ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences; (Theology/Religious Heritage).
- The ability to engage, transform, and/or critique social, economic, political, and ecclesial realities of our day in order to address the changing landscape of ministry. (Cultural Context)
- The ability to engage the relevant dimensions of Christian faith, discipleship and ministry with interpersonal, spiritual, and ecclesial maturity. (Maturity/Personal Formation)
- The ability to be present to the person and community's condition and environments by developing skills to discern and describe the ministry required; (Skills/Ministerial Leadership)
- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation.

Divinity with a Concentration in Chaplaincy (MDiv)

As of Fall 2026, the subprogram described on this page is no longer accepting applicants.

Those interested in Chaplaincy ministries should apply directly to the Master of Divinity (MDiv) (p. 1419) program, into which chaplaincy courses can be integrated. The MDiv degree satisfies the educational requirements for Board Certification by the National Association of Catholic Chaplains and the Association of Professional Chaplains.

The M.Div. with the Chaplaincy concentration prepares students for the process to be certified as a Board Certified Chaplain (BCC via BCCI (https://bcci.professionalchaplains.org/content.asp?pl=25&contentid=25)) with the Association of Professional Chaplains (APC) (https://www.professionalchaplains.org/) or The National Association of Catholic Chaplains (NACC) (https://www.nacc.org/). On the IPS website, you can learn more about Chaplaincy (https://www.luc.edu/ips/resources/chaplaincy/).

The Divinity with a Concentration in Chaplaincy (MDiv) also offers an Accelerated Master's Pathway for Undergraduate students to start their Graduate studies in their senior year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Certificate

- Spiritual Direction Certificate (p. 1457)

Curriculum

The Master of Divinity, M.Div. (p. 1419) degree is a 74-credit-hour (24-course) degree program that includes and builds on the requirements for the Master of Arts in Pastoral Studies (MAPS). All components of the M.Div. Chaplaincy concentration, except for Clinical Pastoral Education (CPE) (https://www.luc.edu/ips/resources/cpe/), can be completed online or on-campus. Some courses are also available in the summer, including through the IPS Rome program. Students can complete the CPE requirement at any location accredited by the Association of Clinical Pastoral Education (ACPE), College of Pastoral Supervision and Psychotherapy (CPSP), or Clinical Pastoral Education International (CPEI).

Besides the traditional Master's program, the Divinity with a Concentration in Chaplaincy (MDiv) is also offered as an Accelerated Master's Pathway where exceptional students can begin their first year of Graduate studies in their senior year. A suggested sequence for the AMP can be found below.

Final Integration Project		
IPS 493	Health Care Integration Project Portfolio	0
Total Hours		**74**

1. For example, "Justice in Scripture," "Wisdom Literature," "Paul and His Letters," and others.
2. A variety of bioethics courses are offered through Loyola's Neiswanger Institute for Bioethics (https://hsd.luc.edu/bioethics/content/coursedescriptions/). If student is going into chaplaincy in a different area, e.g., prison chaplaincy, a different ethics elective may be substituted here with the approval of your academic advisor.
3. Students will select a Spirituality Elective in conversation with their faculty advisor, typically from the curriculum of our spirituality programs; for example, "Ignatian Spirituality."
4. Students will select ministerial electives in conversation with their faculty advisor. Most select classes included in the curricula of other IPS degrees (such as Pastoral Counseling and Social Justice). Among the options are "Ignatian Spirituality," "Social Ethics in the Catholic Tradition," and "Leadership in Social Justice Organizations."
5. Additional 3 credit hours, if necessary (see the "Contextual Education" section below and note the APC Board Certification Requirements)

Contextual Education

Based on the requirements for Board Certification as a chaplain, the M.Div.—Chaplaincy concentration requires students to complete four units of Clinical Pastoral Education (CPE). Three of these units must be submitted for Advanced Standing (https://www.luc.edu/media/lucedu/ips/pdfs/Advanced_Standing-1.pdf) credits for two Contextual Education courses (6 credit hours): IPS 580 Contextual Education I and IPS 581 Contextual Education II.[1] More information on CPE can be found here (https://www.luc.edu/ips/resources/cpe/). During the fourth and final unit of CPE, students must concurrently register for IPS 530 Clinical Pastoral Care Registration, a zero credit registration course.

1. Certification through APC only allows 1 unit of CPE to count for 3 credits towards the 72 credits of graduate work required. Students who plan to seek their board certification may need to take an additional 3 credit elective.

M.Div. Midpoint Review

When students reach the half-way point in their coursework, they begin preparing for contextual education. As part of this preparation process,

students will also do a Midpoint Review. The student will write a brief statement (3-4 pages) on his or her "Vocational Identity, Vision, and Practice." This statement will first be approved by the Faculty Coordinator for Contextual Education. It will be submitted to the student's advisor, and the student and advisor will meet to discuss the statement and the student's progress toward the completion of the M.Div. program. Alternatively, if the advisor has concerns about the student's progress, further work may be requested to successfully complete this review (e.g., further units of CPE, spiritual direction, or pastoral counseling, re-taking courses in which one did not receive a grade of C or higher, etc.). Failure to successfully complete this review and/or any additional steps requested in this process may be grounds for dismissal from the program.

Final Integration Project

The final program requirement is IPS 493 Health Care Integration Project Portfolio. In IPS 493 Health Care Integration Project Portfolio, students are mentored in the process of preparing the materials required to sit for board certification.

More information about the vocation of chaplaincy can be found here (https://www.luc.edu/ips/resources/chaplaincy/).

To learn more about the Spiritual Direction concentration, please fill out our request for information form (https://www.luc.edu/ips/rfi/) or attend an information session (https://www.luc.edu/ips/admission/visit/).

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review

the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

MDiv (Master of Divinity)

By completing the Master of Divinity, students will be able to demonstrate:

- The ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences; (Theology/Religious Heritage).
- The ability to engage, transform, and/or critique social, economic, political, and ecclesial realities of our day in order to address the changing landscape of ministry. (Cultural Context)
- The ability to engage the relevant dimensions of Christian faith, discipleship and ministry with interpersonal, spiritual, and ecclesial maturity. (Maturity/Personal Formation)
- The ability to be present to the person and community's condition and environments by developing skills to discern and describe the ministry required; (Skills/Ministerial Leadership)
- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation.
- By completing the Concentration in Chaplaincy, students will be able to demonstrate an understanding and personal integration of methods of pastoral care appropriate to the healthcare setting, supported by a conceptual foundation of theology and ethics.
- By completing the Concentration in Chaplaincy, students will be able to demonstrate a competency to obtain certification as a Board Certified Chaplain (BCC) with The National Association of Catholic Chaplains (NACC), The Association of Professional Chaplains (APC), or other recognized national certifying association.

Divinity with a Concentration in Spiritual Direction (MDiv)

As of Fall 2026, the subprogram described on this page is no longer accepting applicants.

Those interested in the MDiv and Spiritual Direction ministries should apply to both the Master of Divinity (MDiv) (p. 1419) program and to the Spiritual Direction Certificate (p. 1457), which can be integrated into a single comprehensive curriculum without increasing the number of required credit hours.

The IPS Master of Divinity (M.Div.) offers a unique Spiritual Direction concentration to provide students the opportunity to focus their formation on acquiring the theoretical and practical skills they need to provide spiritual direction, where they will accompany others with their spiritual development and relationship with God. Spiritual directors walk alongside each person on his or her spiritual journey, accompanying individuals as they become more fully realized spiritual beings. Students also have the unique opportunity to learn to direct and use the Spiritual Exercises of Ignatius of Loyola in and for spiritual direction, offering spiritual accompaniment framed by and infused with the Jesuit perspective and values.

The Divinity with a Concentration in Spiritual Direction (MDiv) also offers an Accelerated Master's Pathway for Undergraduate students to start their Graduate studies in their senior year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Certificate

- Spiritual Direction Certificate (p. 1457)

Curriculum

The M.Div. degree is a 74-credit-hour (24-course) degree program that builds on the curriculum of the Master of Arts in Pastoral Studies (MAPS) degree. All components of the M.Div. Spiritual Direction concentration, except for CPE, can be completed online or on-campus. Students can complete the CPE requirement at any ACPE accredited location (across the USA). Some courses are also available in the summer through the IPS Rome program.

Besides the traditional Master's program, the Divinity with a Concentration in Spiritual Direction (MDiv) is also offered as an Accelerated Master's Pathway where exceptional students can begin their first year of Graduate studies in their senior year. A suggested sequence for the AMP can be found below.

Integration Project		
IPS 593	Integration Project	0
Total Hours		**74**

Contextual Education

The Contextual Education requirement is adapted to enable students of the M.Div. Concentration in Spiritual Direction to acquire the practical skills for and experience of spiritual direction in learning interaction with their peers and under the supervision of an experienced spiritual director. Students have the unique opportunity to learn to direct and use the Spiritual Exercises of Ignatius of Loyola in and for spiritual direction. They also have the possibility of learning to practice spiritual direction in a spiritual tradition other than Ignatian (e.g., Carmelite, Benedictine, Franciscan, etc.) under the guidance of a trained coach/mentor. Suitable field learning settings may be found in the Chicago area, elsewhere in the United States or in other countries, upon approval by Dr. Dan Rhodes, Faculty Coordinator of Contextual Education.

Clinical Pastoral Education

Clinical Pastoral Education (CPE) (https://www.luc.edu/ips/resources/cpe/) is an interfaith method of theological education through which a student learns pastoral skills within a context of ministerial relationships to people and under the direct supervision of a certified pastoral supervisor. It provides a learning situation for a ministerial student in which they may develop awareness of the theological and psycho-social concerns of persons in crisis.

The CPE component is typically completed before the application to candidacy to address one key candidacy concern, namely, personal growth matters of self-awareness and self-reflection. The student uses material from the CPE report to support his or her candidacy. Students complete CPE units at any ACPE Accredited Center (https://acpe.edu/education/cpe-students/) and must concurrently register for IPS 530 Clinical Pastoral Care Registration, a zero credit registration course.

Candidacy is the process by which the IPS faculty exercises its responsibility to the church and other concerned publics by determining that the student has both the potential to satisfactorily complete this degree and a readiness to begin ministry.

Spiritual Direction

Students must complete 4 semesters of spiritual direction. The 30-day or 30-week version of the *Spiritual Exercises of Ignatius of Loyola* will count for 2 semesters of personal spiritual direction.

M.Div. Midpoint Review

When students reach the half-way point in their coursework, they begin preparing for contextual education. As part of this preparation process, students will also do a Midpoint Review. The student will write a brief statement (3-4 pages) on his or her "Vocational Identity, Vision, and Practice." This statement will first be approved by the Faculty Coordinator for Contextual Education. It will be submitted to the student's advisor, and the student and advisor will meet to discuss the statement and the student's progress toward the completion of the M.Div. program. Alternatively, if the advisor has concerns about the student's progress, further work may be requested to successfully complete this review (e.g., further units of CPE, spiritual direction, or pastoral counseling, re-taking courses in which one did not receive a grade of C or higher, etc.). Failure to successfully complete this review and/or any additional steps requested in this process may be grounds for dismissal from the program.

In addition, the statement will serve as a draft for this same section of the student's final integration project, and the comparison of the two drafts will ideally demonstrate the progress and growth the student has achieved through completing the final half of the M.Div. program. For guidelines on drafting this statement, see the relevant section of the M.Div. Integration Project Guidelines Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710).

Final Integration Project

Students complete the program with IPS 593 Integration Project, the zero-credit course that facilitates the completion of the Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710), in their final year.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences (Theology/Religious Heritage)
- Ability to engage, transform, and/or critique social, economic, political, and ecclesial realities (Cultural Context)
- Ability to engage Christian faith, discipleship, and ministry with interpersonal, spiritual, and ecclesial maturity (Maturity/Personal Formation)
- Ability to discern and describe ministry required by being present to the person and community's condition (Skills/Ministerial Leadership)
- Ability to construct ministerial vision and formulate strategies for personal and community transformation
- An understanding of key components and considerations for the practice of spiritual direction
- Self-awareness of one's own spirituality as it relates to the ministry and practice of spiritual direction
- Demonstrate professional skills in and for spiritual direction

Pastoral Studies

- Church Management Certificate (p. 1431)
- Maestria de Artes en Estudios Pastorales Bilingue (Espanol)/MA Pastoral Studies, Online Bilingual (Spanish) (p. 1432)
- Pastoral Leadership Certificate (p. 1436)
- Pastoral Studies (MA) (p. 1437)
- Pastoral Studies with a Concentration in Church Management (MA) (p. 1440)
- Pastoral Studies with a Concentration in Digital Communication (MA) (p. 1441)
- Pastoral Studies with a Concentration in Healthcare Chaplaincy (MA) (p. 1442)
- Pastoral Studies with a Concentration in Religious Education (MA) (p. 1445)
- Religious Education Certificate (p. 1446)

Church Management Certificate

As of Fall 2026, this program is no longer accepting applicants.

This Certificate emerges from reflection on the gap in skill sets among the leaders of many churches today, Catholic and Protestant. Members of church staff, comprised increasingly of laypersons with degrees in pastoral ministry, education, counseling, and theology, find themselves engaging in activities related to budgeting, project management, human resources, organizational development and change, and more. There is a need for parish leaders and pastoral ministers to have the education, training, and skills associated with these areas.

The MBA curriculum at the Quinlan School of Business includes a set of core and non-core courses. The core graduate courses at Quinlan are designed for those with no business experience. Students who already have a business degree, however, or who have taken business courses in the past (within the last 5-10 years) and possess significant business experience should be advised to skip the core courses and go directly to more specific and specialized courses in consultation with their academic advisor at IPS and the Associate Dean for Programs at the QSB.

IPS offers an education in Church Management through a concentration within the MA in Pastoral Studies and through a Graduate Certificate. Click here for information on the MA Degree and Concentration option: Pastoral Studies with a Concentration in Church Management (MA) (p. 1440).

This Certificate can be applied toward to the requirements of an MA degree at IPS, in whole or in part depending on the requirements of the MA in question.

- Pastoral Studies (MA) (p. 1437)

Certificate

- Spiritual Direction Certificate (p. 1457)

Curriculum

The Graduate Certificate in Church Management requires two courses (6 credit hours) at the Institute of Pastoral Studies and three courses (9 credit hours) at the Quinlan School of Business (QSB), for a total of 15 hours. The two IPS courses will be chosen in consultation with the academic advisor. The decision concerning which courses to take at QSB will be determined according to each student's experience in consultation with their academic advisor and the Assoc. Dean for Programs at QSB. There are, however, guidelines that will ensure that each student is well formed in the areas of accounting and management. The Graduate Certificate in Church Management can be completed online, though there are more course options at QSB for students who take in-person courses.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Church Management

- The ability to engage in general business operations related to budgeting, project management, human resources, marketing, and organizational development and change in non-profit or faith-based settings.

Maestria de Artes en Estudios Pastorales Bilingue (Espanol)/MA Pastoral Studies, Online Bilingual (Spanish)

DISPONIBLE EXCLUSIVAMENTE EN LÍNEA

El programa Virtual (Online) Bilingüe (Español) Maestría de Artes en Estudios Pastorales (MAPS) (https://www.luc.edu/media/lucedu/gpem/pdfs/programsheetscurrent/IPS-MAPSSpanish.pdf) prepara estudiantes para el servicio ministerial en comunidades biculturales y bilingües (diócesis, parroquias, escuelas, hospitales, y otras organizaciones comunitarias), tanto a nivel local como internacional. Este es un programa que integra la formación teológica y pastoral en cuatro áreas fundamentales:

1. Humana
2. Espiritual
3. Intelectual
4. Ministerial

Por medio del estudio e investigación y de la integración de un proyecto teológico-pastoral en el contexto de sus experiencias, los estudiantes desarrollan sus cualidades y habilidades personales para su ministerio, arraigados en la fe y en la comunión eclesial y Trinitaria. El Programa Virtual Bilingüe MAPS en el Instituto de Estudios Pastorales ofrece a los estudiantes una amplia fundación sistemática para una variedad de ministerios y herramientas necesarias para comprometerse crítica y constructivamente con los retos y oportunidades de nuestro tiempo.

Esta Maestría de Artes en Estudios Pastorales (MAPS) *Bilingüe* en *Español* es completamente virtual, con sesiones sincrónicas y asincrónicas. En las sesiones sincrónicas estudiantes y profesores desde distintas partes del mundo se reúnen simultáneamente en un salón virtual por medio de plataformas (Sakai) y herramientas electrónicas ofrecidas por la Universidad de Loyola Chicago. En las sesiones asincrónicas los estudiantes consultan los recursos y materiales de clase y envían sus ensayos, tareas y preguntas en Sakai de acuerdo a sus propios horarios.

De esta manera los estudiantes no necesitarían trasladarse a Chicago para sus cursos, pero si pudieran asistir, con gusto les daremos la bienvenida a Chicago para la ceremonia de graduación.

Este programa es dialéctico y contextual, en el que interactúan las visiones, ideas, y las *praxes* de teólogos y agentes de pastoral que trabajan en comunidades bilingües y multiculturales en los Estados Unidos de Norteamérica y alrededor del mundo, unidos por el amor al evangelio de Jesucristo y comprometidos con los valores del Reino de Dios.

Al terminar su Maestría de Artes en Estudios Pastorales (MAPS) los estudiantes estarán preparados para responder al los desafíos pastorales contemporáneos e integrarse en diversos ministerios en comunidades, instituciones, y organizaciones bilingües y multiculturales.

Visión General

El programa virtual (en línea) bilingüe (español) de maestría en artes en estudios pastorales (MAPS) contiene 12 clases, una experiencia formativa práctica llamada Educación Contextual y un documento de integración acumulativo escrito en el semestre final.

- Las clases estan ofrecidas en español e inglés
- Se puede terminar en 2 años consecutivos
- El programa empieza en el verano (mayo) de cada año
- Todos los cursos se ofrecen en línea, con formatos tanto sincronizados (conferencias de video) como no sincronizados (foros de discusión) que te proveen la oportunidad de ser flexible y balancear el trabajo y vida personal.
- Requisitos de horas de práctica supervisada (Contextual Education) pueden realizarse en tu propia comunidad local.

Importante: Los solicitantes deben tener fluidez en español e inglés para completar con éxito el programa. El MAPS bilingüe en línea es un modelo de cohorte que solo comienza en verano. Las solicitudes deben presentarse antes del 1 de abril de cada año calendario. Se requiere inscripción continua; los cursos se ofrecerán en el semestre de otoño (16 semanas), semestre de primavera (16 semanas) y sesiones de verano (6-8 semanas).

English Text

Available Exclusively Online

The Virtual (Online) Bilingual (Spanish) Master of Arts in Pastoral Studies (MAPS) (https://www.luc.edu/media/lucedu/gpem/pdfs/programsheetscurrent/IPS-MAPSBiligual.pdf) program prepares students for ministerial service in bicultural and bilingual communities (dioceses, parishes, schools, hospitals, and other community organizations), both locally and globally. This is a program that integrates theological and pastoral formation in four fundamental areas:

1. Human
2. Spiritual
3. Intellectual
4. Ministerial

Through study and research and the integration of a theological-pastoral project in the context of their experiences, students develop their personal qualities and abilities for their ministry, rooted in faith and in ecclesial and Trinitarian communion. The MAPS Online Bilingual Program at the Institute for Pastoral Studies offers students a broad systematic foundation for a variety of ministries and tools necessary to critically and constructively engage with the challenges and opportunities of our time.

This Bilingual Master of Arts in Pastoral Studies (MAPS) in Spanish is completely virtual, with synchronous and asynchronous sessions. In synchronous sessions, students and teachers from different parts of the world meet simultaneously in a virtual room through platforms (Sakai) and use electronic tools offered by the University of Loyola Chicago. In asynchronous sessions, students consult class resources and materials and submit their essays, assignments and questions in Sakai according to their own schedules. In this way, students would not need to travel to Chicago for their courses, but if they could attend, we will gladly welcome them to Chicago for the graduation ceremony.

This program is dialectical and contextual, in which the visions, ideas, and praxes of theologians and pastoral agents working in bilingual and multicultural communities in the United States of America and around the world, united for the love of the gospel of God, interact. Jesus Christ and committed to the values of the Kingdom of God. Upon completion of their Master of Arts in Pastoral Studies (MAPS) students will be prepared to respond to contemporary pastoral challenges and integrate into diverse ministries in bilingual and multicultural communities, institutions, and organizations.

Overview

The Virtual (Online) Bilingual (Spanish) Master of Arts in Pastoral Studies (MAPS) program contains 12 classes, a practical formative experience called Contextual Education, and a cumulative Integration Paper written in the final semester.

- Classes are offered in Spanish and English
- Program can be completed in 2 consecutive years
- The program begins in the summer (May) of each year
- All courses are offered online, with both synchronized (video conferencing) and non-synchronized (discussion forums) formats that provide you with the opportunity to be flexible and balance work and personal life.
- Supervised practice hour requirements (Contextual Education) can be completed in your own local community.

Important: Applicants must be fluent in both Spanish and English in order to successfully complete the program. The MAPS Online Bilingual degree is a cohort model with a summer start only. Applications must be submitted by April 1 of each calendar year. Continuous enrollment is required; courses will be offered in the fall semester (16 weeks), spring semester (16 weeks), and summer sessions (6-8 weeks).

- **12 cursos; 36 horas crédito | 75% de los cursos comunes y especializadas se impartirán en español, y 25% en inglés.**
  - 8 cursos comunes
  - 3 cursos de especialidad (incluida la Administración y Gestión para el Ministerio en Comunidades Interculturales, la Praxis Espiritual Cristiana en el Ministerio Juvenil y la Ética Social Católica y la Migración)
  - 1 curso de Contextual Education (inglés)
  - Proyecto Integración (español o inglés)

Descripciónes de los 8 Cursos Comunes (3 Créditos cada Clase)

IPS 570 Introducción a la Teología y Ministerio

Descripción: Este curso, recomendado al comienzo de este programa, explora la interacción entre las tradiciones de teología y ministerio, la historia del ministerio y los retos que presentan al relacionar las tradiciones fundacionales y la diversidad contemporánea de ministerios. Este curso capacita a los estudiantes a ser más asertivos y reflexivos acerca de las habilidades que constituyen la teología y la praxis en el ministerio pastoral.

Resultados: Los estudiantes clarificarán y articularán la teoría y método del ministerio desde los cuales va a realizar su acción pastoral. El corazón de este curso es el desarrollo de autoconfianza de sus habilidades pastorales como un profesional.

IPS 417 Literatura del Israel Antiguo

Descripción: En esto curso analizaremos la estructura y mensaje de los libros del Antiguo Testamento: el Pentateuco, los Libros Históricos, los Profetas y la Literatura Sapiencial en su contexto literario, histórico, social y religioso por medio de los métodos de análisis histórico crítico y literario.

Resultados: Por medio de los métodos de análisis crítico y literario, los estudiantes comprenderán los contextos históricos y literarios de los libros del Antiguo Testamento, y articularán sus temas centrales y su mensaje teológico.

IPS 416 Introducción al Nuevo Testamento

Descripción: En esto curso analizaremos la estructura y mensaje de los libros del Nuevo Testamento en su contexto literario, histórico, social y religioso del mundo Palestino y Greco Romano.

Resultados: Por medio de los métodos de análisis crítico y literario, los estudiantes comprenderán los contextos históricos y literarios de los libros del Nuevo Testamento, y articularán sus temas centrales y su mensaje teológico.

IPS 531 Doctrina Cristiana

Descripción: En este curso estudiaremos el desarrollo de la doctrina cristiana desde los Padres de la Iglesia, los primeros Concilios Ecuménicos hasta el Concilio Vaticano II. En este curso analizaremos particularmente el pensamiento de Karl Rahner, Gustavo Gutierrez y Jon Sobrino, así como los documentos latinoamericanos postconciliares y sus repercusiones en la praxis pastoral.

Resultados: Los estudiantes demostrarán y articularán un conocimiento orgánico, sistemático e integral del desarrollo de la Doctrina Cristiana y su aplicación en el contexto histórico y social de su ministerio pastoral.

IPS 402 La Iglesia y su Misión

Descripción: En este curso estudiaremos diversos modelos y tradiciones de la Iglesia y su misión en el mundo, desde el Nuevo Testamento hasta el Concilio Vaticano II, así como las reflexiones y praxes pastorales postconciliares, particularmente en Las Américas.

Resultados: Los estudiantes articularán una visión integral, orgánica y crítica de los distintos modelos de Iglesia y su misión a lo largo de la historia, a fin de identificar los retos y oportunidades de sus propias comunidades eclesiales y su acción pastoral en el contexto socio-económico y cultural del mundo contemporáneo.

IPS 541 Liturgia y Sacramentos

Descripción: En este curso estudiaremos los orígenes bíblicos, teológicos, religiosos y culturales de la liturgia de los sacramentos en las comunidades eclesiales a lo largo de la historia.

Resultados: Los estudiantes desarrollarán la habilidad de articular la teología sacramental y litúrgica de los sacramentos, y así capacitarlos para que respondan al significado y celebración de los sacramentos en su contexto histórico y cultural contemporáneo.

IPS 553 Teología Moral y Ética Cristiana

Descripción: Los estudiantes se familiarizarán con la tradición de la moral católica, así como también con diferentes metodologías contemporáneas sobre ética. Daremos particular atención a la historia de la ética, sus métodos, la función de la Escritura en el razonamiento moral, y en las enseñanzas de la Doctrina Social de la Iglesia.

Resultados: Los estudiantes serán capaces de articular la historia y las categorías centrales en la teología moral Católica para analizar diversas metodologías contemporáneas en teología ética.

IPS 555 La Persona Humana y el Desarrollo Psicológico

Descripción: Los seres humanos son creados para crecer y madurar plenamente. Cada fase de la vida conlleva agendas psicológicas y espirituales particulares. Si bien cada persona es única, la historia de nuestro desarrollo desde el nacimiento hasta la muerte es también nuestra historia humana universal con variaciones particulares, definidas y moldeadas por el género y las diferencias culturales.

Resultados: Los estudiantes explorarán las diferencias del desarrollo humano, así como las características y cualidades confiables para el ministerio de las personas a lo largo de los ciclos de la vida.

Descripciónes de los 3 Cursos Especializadas (3 Créditos cada Clase)

Administración y emprendimiento en contexto pastoral

Descripción: En este curso se hará un repaso general sobre las habilidades fundamentales de administración en el contexto pastoral: financiación y manejo de proyectos, recaudación de fondos, elaboración de presupuestos, políticas de salvaguardia, formación de equipos, manejo de voluntarios, y coordinación de reuniones. Todo desde una perspectiva de emprendimiento que aborde las necesidades de proyectos e iniciativas pastorales.

Resultados: El estudiante demostrará la capacidad de planificar, evaluar, estructurar, coordinar y ejecutar proyectos o iniciativas pastorales con habilidades de planificación estratégica y análisis efectivo en la toma de decisiones.

El ministerio con jóvenes y espiritualidad hoy

Descripción: Los estudiantes explorarán las bases para el ministerio con los jóvenes, incluyendo los componentes esenciales para acompañar a los jóvenes y adultos jóvenes en el desarrollo de su identidad como discípulos misioneros. Exploraremos la espiritualidad ignaciana como una herramienta para responder a las preguntas y desafíos recurrentes que dan forma a la búsqueda de los jóvenes de sentido y propósito en la vida.

Resultados: Los estudiantes podrán articular y evaluar las diferencias entre Youth Ministry, Young Adult Ministry y Pastoral Juvenil Hispana en un panorama actual de multiculturalismo, creciente secularización y desafiliación entre jóvenes, jóvenes adultos, y jóvenes hispanos/latinos hoy, así como encontrar nuevas formas de ayudar a los jóvenes que están en una jornada espiritual a través del discernimiento y el acompañamiento.

Ética Social Católica & Migración

Descripción: Nuestro trabajo pastoral con los y las migrantes requiere de una teología y ética de la solidaridad que dote de mayor sentido al Evangelio y a la experiencia eclesial a través de una cultura del encuentro. En este curso, los y las estudiantes recibirán la oportunidad de:

1. Discernir los “signos de los tiempos” escuchando y poniendo palabras a los sufrimientos, realidades y esperanzas del Pueblo Migrante;
2. Recibir las herramientas para la reflexión personal y comunitaria sobre el fenómeno de la migración e iluminar esta realidad desde una ética de solidaridad expresada en actos de caridad (acogiendo al extranjero) y la justicia social (creando cambios sistemáticos);
3. Tomar conciencia de la condición psicológica, espiritual y social que hace del sujeto migrante una persona extremadamente vulnerable y darse cuenta de que nuestra salvación depende del trato que le hayamos dado (Mt 25,40);
4. Tomar conciencia de nuestra condición de seres sociales y del llamado universal al amor a través de “*La Teología del Buen Samaritano*” como una de las enseñanzas claves de la nueva encíclica del Papa Francisco, *Fratelli Tutti*, la cual implica crear cambios sistemáticos en las estructuras para facilitar el restablecimiento legal e institucional de los migrantes;
5. Reflexionar sobre la importancia y centralidad del acompañamiento como el estilo propio de Jesús y la característica esencial de sus distintos aspectos y retos incluidos en el acto pastoral de acompañar a personas migrantes.

Nota: El curso incorporará una religiosidad popular al igual que las experiencias personales de los y las estudiantes con el fin de acompañar los temas claves que se encuentran en el centro mismo de nuestra Enseñanza Social Católica.

Resultados: Los estudiantes se familiarizarán con la ética social en la Tradición Católica, incluyendo los principios claves establecidos en documentos modernos de los siglos XX y XXI. Los y las estudiantes

serán capaces de profundizar en su llamado bautismal de salir al encuentro de los y las migrantes, acompañarles y cuestionar las estructuras que les impiden su desarrollo espiritual y social desde un plan pastoral que incorpore herramientas metodológicas, prácticas y pastorales con las cuales puedan organizar su ministerio de una manera sistemática y efectiva.

Descripción de "Contextual Education" (Una Secuencia de 3 Clases)

El desarrollo contextual es donde el ministerio del estudiante integra los cuatro aspectos del programa MAPS. Es el lugar para integrar el aprendizaje teológico, ministerial, personal y espiritual en el contexto de su ministerio pastoral cotidiano. En este contexto el estudiante desarrolla su capacitación como agente de pastoral en el lugar donde ejerce su ministerio por medio de la supervisión y la educación semanal facilitadas por profesores y compañeros.

Este desarrollo contextual puede estar directamente relacionado con el trabajo que el estudiante está realizando o puede ser seleccionado de entre lugares que el Instituto de Estudios de Pastoral ha cultivado en los Estado Unidos de Norteamérica, Latinoamérica, España, u otros lugares del mundo.

1. IPS 578 Preparación de Educación Contextual (*0 créditos, precio del curso $125.00*)
2. IPS 579 Introducción a la Educación Contextual (1.5 *créditos, precio del curso $250.00*)
3. IPS 580 Educación Contextual (1.5 *horas crédito*)

La Educación Contextual es la experiencia pastoral del estudiante durante su educación que está directamente relacionada con sus estudios pastorales. Al mismo tiempo, el estudiante perfecciona sus aptitudes y teología pastoral, y su identidad vocacional. La Educación Contextual consiste de 10-15 horas a la semanas de ministerio pastoral, reflexión semanal con un supervisor y con compañeros en el lugar donde trabajan. Cada semana los estudiantes revisan los objetivos de aprendizaje, preparan y reflexionan sobre los eventos pastorales, y evalúan su aprendizaje y *praxis* con sus compañeros.

Projecto de Integración

(*cero horas crédito, precio del curso $500*)
En el último año, los estudiantes completan este programa con el Proyecto de Integración IPS 593.

Este es un ensayo de 35-50 páginas en el que los estudiantes demuestran la integración de los cursos con algún asunto relevante en su contexto de trabajo pastoral. Además, en este proyecto el estudiante demuestra su capacidad de investigación en cuestiones de fe y vida, y su habilidad para integrar cuestiones contemporáneas con la tradición de la Iglesia.

English Text

Curriculum Guide (https://www.luc.edu/media/lucedu/ips/pdfs/Bilingual%20MAPS.pdf)

- 12 courses; 36 credit hours | 75% of core and specialty classes will be delivered in Spanish, 25% in English
  - 8 core courses
  - 3 specialty courses (including Administration and Management for Ministry in Intercultural Communities, Christian Spiritual Praxis in Youth Ministry, and Catholic Social Ethics and Migration)
  - Contextual Education course (English)
  - Integration Project (English or Spanish)

Description of the 3 Specialty Courses (3 Credit Hours per Class)

Administration and Entrepreneurship in a Pastoral Context

Description: This course will provide an overview of fundamental management skills in the pastoral context: project financing and management, fundraising, budgeting, safeguard policies, team building, volunteer management, and coordination of meetings. All from an entrepreneurial perspective that addresses the need for projects and pastoral initiatives.

Outcomes: The student will demonstrate the ability to plan, assess, structure, coordinate and execute pastoral projects or initiatives with strategic planning skills, and effective analysis in decision making.

Ministry with Young People and Spirituality Today

Description: Students will explore the foundations for ministry with young people, including the essential components to accompany youth and young adults in developing their identity as missionary disciples. We will explore Ignatian spirituality as a tool to answer the recurring questions and challenges that shape young people's search for meaning and purpose in life.

Outcomes: Students will be able to articulate and assess the differences between Youth Ministry, Young Adult Ministry and Pastoral Juvenil in a current landscape of multiculturalism, increasing secularization, and disaffiliation among youth, young adults, and jóvenes today as well as to find new ways to help young people who are on a spiritual journey through discernment and accompaniment.

Catholic Social Ethics & Migration

Description: Our pastoral work with migrants requires a theology and an ethic of solidarity that gives greater meaning to the Gospel and to the ecclesial experience through a culture of encounter. In this course, students will receive the opportunity to:

1. Discern the "signs of the times" by listening and putting words to the sufferings, realities and hopes of migrants;
2. Receive the tools for personal and community reflection on the phenomenon of migration and illuminate this reality through from an ethic of solidarity which can be expressed through acts of both charity (welcoming the stranger) and social justice (creating systemic change);
3. To become aware of the psychological, spiritual and social condition that makes the migrant an extremely vulnerable person and realize that our salvation depends on the treatment we give our neighbors (Mt 25:40);
4. To become aware of our status as social beings and the universal call to love through "*The Theology of the Good Samaritan*" as one of the key teachings of Pope Francis' new encyclical, *Fratelli Tutti*, which implies working towards creating change in structures to make resettlement easier legally and institutionally;
5. Reflect on the importance and centrality of accompaniment as Jesus' own style and the essential characteristic of his various aspects and challenges included in the pastoral act of accompanying migrants.

Note: The course will incorporate a popular religiosity style as well as the personal experiences of students to embrace key topics that are at the very center of our Catholic Social Teaching.

Outcomes: Students will become familiar with social ethics in the Catholic tradition, including the key principles set out in modern documents of the 20th and 21st centuries. Students will be able to deepen their baptismal call to encounter migrants, accompany them and question the structures that prevent them of their spiritual and social development through a pastoral plan that incorporates methodological, practical and pastoral tools with which they can organize their ministry in a systematic and effective way.

Description of "Contextual Education"

(*A 3-course sequence*)
Contextual Education is where the student's ministry integrates the four aspects of the MAPS program. It is the place to combine theological, ministerial, personal and spiritual learning in the context of your daily pastoral ministry. In this context, the student develops training as a pastoral agent in the place where they exercise ministry through supervision and weekly education provided by teachers and colleagues.

This contextual development can be directly related to the work that the student is doing or can be selected from places that the Institute for Pastoral Studies has cultivated in the United States of America, Latin America, Spain, or other places in the world.

1. IPS 578 Contextual Education Preparation (0 credits, course fee of $125.00)
2. IPS 579 Contextual Education Introduction (1.5 credits, course fee of $250.00)
3. IPS 580 Contextual Education I (1.5 credit hours, standard tuition rate)

Contextual Education is the student's pastoral experience during their education that is directly related to pastoral studies. At the same time, the student perfects aptitudes and pastoral theology, as well as vocational identity. Contextual Education consists of 10-15 hours a week of pastoral ministry, weekly reflection with a supervisor and with colleagues in the place where they work. Each week students review learning objectives, prepare and reflect on pastoral events, and evaluate their learning and praxis with their peers.

Integration Project

(*0 credit hours, $500.00 course fee*)
In the final year, students complete their program with the IPS 593 Integration Project.

This is a 35-50 page essay in which students demonstrate the integration of courses with some relevant issue in their pastoral work context. In addition, in this project the student demonstrate the ability to investigate matters of faith and life, and capacity to integrate contemporary issues with the tradition of the Church.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Resultados/Learning Outcomes

Al completar su Maestría de Artes en Estudios Pastorales (MAPS) los estudiantes serán capaces de demostrar:/Upon completing their Master of Arts in Pastoral Studies (MAPS) students will be able to demonstrate:

- Un conocimiento profundo de las fuentes y recursos teológicos, ministeriales, e interpersonales para el servicio efectivo en y para la iglesia y el mundo en posiciones de formación, investigación, o liderazgo eclesial./A deep understanding of theological, ministerial, and interpersonal sources and resources for effective service in and for the church and the world in positions of formation, research, or ecclesial leadership.
- Capacidad para entender y analizar los contextos sociales y culturales en los que el graduado estará llamado a servir, siempre con una mirada y compromiso con los marginados, excluidos, y para luchar para erradicar las estructuras y sistemas de opresión./ Ability to understand and analyze the social and cultural contexts in which the graduate will be called to serve, always with a view and commitment to the marginalized, excluded, and to fight to eradicate the structures and systems of oppression.
- Habilidad para articular retóricamente y por escrito temas teológicos y pastorales concretos de relevancia para audiencias y comunidades cultural y teológicamente diversas./Ability to articulate rhetorically and in writing concrete theological and pastoral issues of relevance to culturally and theologically diverse audiences and communities.
- Su compromiso y habilidad personal para nutrirse de los adelantos académicos sobre espiritualidad, teología pastoral y psicología para optimizar sus contribuciones pastorales y académicas en sus contextos particulares./Commitment and personal ability to nurture academic advances in spirituality, pastoral theology, and psychology to optimize his pastoral and academic contributions in his particular contexts.

Pastoral Leadership Certificate

As of Fall 2026, this program is no longer accepting admits.

The Graduate Certificate in Pastoral Leadership provides students with a foundational and broad understanding of pastoral care, Christian theology, and scripture. The curriculum is flexible to accommodate each student's experience and vocational goals. It includes a wide range of elective course options trading on the expertise of IPS faculty and existing course offerings, allows students to discern in community and with intention their vocational goals, and provides a graduate-level credential that can be rolled directly into a master's degree program for those who decide to continue their education and formation for ministry.

This Certificate can be applied toward to the requirements of an MA degree at IPS, in whole or in part depending on the requirements of the MA in question.

Master's

- Divinity (MDiv) (p. 1419)
- Maestria de Artes en Estudios Pastorales Bilingue (Espanol)/MA Pastoral Studies, Online Bilingual (Spanish) (p. 1432)
- Pastoral Counseling (MA) (p. 1415)
- Pastoral Studies (MA) (p. 1437)

Certificate

- Spiritual Direction Certificate (p. 1457)

Curriculum

The Graduate Certificate in Pastoral Leadership requires completion of five courses (15 credit hours). For elective courses, students will work with their academic advisor to choose those that best suit their background, experience, interests, and goals. The Institute of Pastoral Studies offers a large number courses online every year, including the required course for this certificate. It is possible, therefore, to complete this certificate entirely online depending on which elective courses a student chooses within the options that satisfy the curricular requirements.

Total Hours		**15**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students gain a foundational and broad base of knowledge and skills necessary for pastoral ministry, defined as a ministry of care through accompaniment and support focused on the emotional, spiritual, and social well-being of the person.

Pastoral Studies (MA)

Available Online. The Master of Arts in Pastoral Studies (MAPS) degree program prepares students for ministerial service in a variety of contexts. Embracing four areas of development—human, spiritual, intellectual, and ministerial—the program guides students in the development of their own pastoral identity through an integrated exploration of theology and pastoral practice. Students complete the core curriculum and may choose to take elective courses appropriate to such ministry areas as chaplaincy, religious education, social justice, digital communications, and church management, among others. This degree satisfies the educational requirements for Board Certification by the National Association of Catholic Chaplains. Those seeking eventual Chaplaincy Board Certification through the Association of Professional Chaplains should instead apply to the Master of Divinity (MDiv) (p. 1419) program, which meets that organization's specific educational requirements.

Through graduate coursework, focused contextual experiences, and an integration project, students explore and work to develop those personal qualities necessary for faithful service, spiritual practices grounded in God's Trinitarian life, theological knowledge and intellectual skills, and the pastoral abilities appropriate to their gifts and ministerial context. The MAPS degree at the Institute of Pastoral Studies offers students a systematic and broad foundation for a variety of ministries and the tools necessary to engage critically and constructively the challenges and opportunities of our contemporary context.

Courses are available online, in person at Loyola's downtown Chicago campus, or in Rome, Italy. Students who enroll in the master's degree can study under the general MAPS program or focus their studies in one of four areas of concentration: church management, digital communication, health care chaplaincy, and religious education.

The Pastoral Studies (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

To learn more about state and international authorization of programs, please refer to our State and International Authorization page (https://www.luc.edu/ool/services/stateandinternationalauthorization/). To learn more about the accreditation of Loyola University Chicago and its schools, as well as information about professional licensure, visit our Accreditation page (https://www.luc.edu/accreditation/index.shtml/).

Curriculum

Master of Arts in Pastoral Studies

This traditional curriculum, designed to provide a solid first-degree experience in education for ministry includes courses in scripture, pastoral theology, and ministerial skills, as well as numerous concentrations, including one in Healthcare Ministries. This MA in Pastoral Studies forms the basis for the MDiv degree. Students have the option at any point during their degree program or upon completion of their degree program to apply for the MDiv degree, and all of these courses will count toward their MDiv degree.

Besides the traditional Master's program, the Pastoral Studies (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

IPS 593	Integration Project	0
Total Hours		**37**

Intellectual Development

Intellectual development seeks to expand the pastoral minister's understanding and appreciation of faith. It consists in theological studies, and draws also upon a wide range of other disciplines: philosophy, the arts, psychology, sociology, culture, and language studies.

Ministerial Development

Ministerial development cultivates the knowledge, attitudes and skills that directly pertain to effective functioning in the ministry setting, or to the pastoral administration that supports direct ministry and draws also upon a wide range of other disciplines: counseling, medical ethics, business administration, leadership, organizational development, and law.

Chosen from course offerings to address elements in pastoral ministry competencies in areas such as:

- Promoting or organizing action on behalf of justice
- Youth ministry
- Pastoral presence and care for the sick and the dying
- Parish ministry
- Health ministries

Contextual Development

The contextual development is where the ministry student brings together all four developmental aspects of the degree program. It is the place to integrate the theological, ministerial, personal and spiritual learnings of this degree in the context of the lived everyday ministry setting. Here, in a structured program that combines on-site mentoring and supervision located in actual ministry practice with peer and faculty weekly reflection sessions, the student achieves and realizes that sense of professional and personal competency as minister.

These field learning settings can be directly related to the student's present work situation or can be selected from placements IPS has cultivated. Because of the ability to operate in a blended and on-line teaching manner, these placements can be located in the resource rich area of Chicago or other settings around the nation or the world.

Code	Title	Hours
IPS 578	Contextual Education Preparation	1
IPS 579	Contextual Education Introduction	1.5
IPS 580	Contextual Education I	1.5

Contextual Education is the experience during the student's ministerial education that directly engages pastoral practice in the context of ministerial studies. Simultaneously, the student refines pastoral skills, ministerial theology and vocational identity. Contextual Education consists of 10-15 hours per week of ministry at a site, reflection with a site supervisor and as well as a weekly peer reflection seminar on campus. In the weekly seminar students review learning contracts, prepare and reflect on pastoral events, and exercise peer evaluations.

Human Development

Human development seeks to enhance the pastoral minister's human qualities and character, fostering a healthy and well-balanced personality, for the sake of both human growth and ministerial service.

Spiritual Development

Spiritual development aims to arouse and animate true hunger for holiness, desire for union with God through Christ in the Spirit, daily growing love of God and neighbor in life and ministry, and the practices of prayer and spirituality that foster these attitudes and dispositions.

Integration Project

Students complete the program with IPS 593 Integration Project, the zero-credit Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710), in their final year.

Suggested Sequence of Courses

Traditional Master's Program

Course	Title	Hours
Year 1		
Fall		
IPS 570	Introduction to Theology and Ministry	3
IPS 402	Church and Mission	3
IPS 417	Introduction to the Old Testament	3
	Hours	**9**
Spring		
IPS 416	Introduction to New Testament	3
IPS 531	Christian Doctrine	3
IPS 555	Human Person and Psychological Development	3
IPS 578	Contextual Education Preparation	1
	Hours	**10**

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while

in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.

Pastoral Studies with a Concentration in Church Management (MA)

As of Fall 2026, the subprogram described on this page is no longer accepting applicants.

Those interested in Church Management ministries should apply to the Pastoral Studies (MA) (p. 1437) degree, into which management courses can be integrated.

Available Online. The MA in Pastoral Studies (MAPS) with a concentration in Church Management is a 36 hour degree that includes eight core courses, three electives (offered by the Quinlan School of Business), a three credit hour Contextual Education course, and a Final Integration Project. The Church Management concentration can be completed online.

This concentration emerges from reflection on the gap in skill sets among the leaders of many churches today, Catholic and Protestant. Members of church staff, comprised increasingly of laypersons with degrees in pastoral ministry, education, counseling, and theology, find themselves engaging in activities related to budgeting, project management, human resources, organizational development and change, and more. There is a need for parish leaders and pastoral ministers to have the education, training, and skills associated with these areas.

The MBA curriculum at the Quinlan School of Business includes a set of core and non-core courses. The core graduate courses at Quinlan are designed for those with no business experience. Students who already have a business degree, however, or who have taken business courses in the past (within the last 5-10 years) and possess significant business experience should be advised to skip the core courses and go directly to more specific and specialized courses in consultation with their academic advisor and the Associate Dean for Programs at the QSB.

In addition, for the MAPS concentration in Church Management:

- The ability to engage in general business operations related to budgeting, project management, human resources, marketing, and organizational development and change.

The background and initial plan of each student should be summarized and sent to Quinlan's associate dean for graduate programs for discussion and approval prior to registering for classes.

- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.
- With the Concentration in Church Management, students also will demonstrate the ability to engage in general business operations related to budgeting, project management, human resources, marketing, and organizational development and change in non-profit or faith-based settings.

Pastoral Studies with a Concentration in Digital Communication (MA)

As of Fall 2026, the subprogram described on this page is no longer accepting applicants.

Those interested in Digital Communications ministries should apply to the Pastoral Studies (MA) (p. 1437) degree, into which digital communications courses can be integrated.

The Master of Arts in Pastoral Studies (MAPS) degree program prepares students for ministerial service in a variety of contexts. Embracing four areas of development—human, spiritual, intellectual, and ministerial—the program guides students in the development of their own pastoral identity through an integrated exploration of theology and pastoral practice.

Through graduate coursework, focused contextual experiences, and an integration project, students explore and work to develop those personal qualities necessary for faithful service, spiritual practices grounded in God's Trinitarian life, theological knowledge and intellectual skills, and the pastoral abilities appropriate to their gifts and ministerial context. The MAPS degree at the Institute of Pastoral Studies offers students a systematic and broad foundation for a variety of ministries and the tools necessary to engage critically and constructively the challenges and opportunities of our contemporary context.

The MAPS degree concentration in Digital Communications allows students to hone their communication skills and learn best practices for using digital media in the dissemination of parish/congregation/diocese news, events, and the message of the Gospel in order to reach a wider audience through social media, webpages, video, and more.

In addition, for the MAPS concentration in Digital Communications:

- An understanding and integration of best practices in communications using digital media into their ministerial context and work.

Pastoral Studies with a Concentration in Healthcare Chaplaincy (MA)

As of Fall 2026, the subprogram described on this page is no longer accepting applicants.

Those interested in Catholic Chaplaincy ministries should apply to the Pastoral Studies (MA) (p. 1437) degree, into which chaplaincy courses can be integrated. The Pastoral Studies (MA) satisfies the education requirements for Board Certification by the National Association of Catholic Chaplains.

The Master of Arts in Pastoral Studies (MAPS) degree program prepares students for ministerial service in a variety of contexts. Embracing four areas of development—human, spiritual, intellectual, and ministerial—the program guides students in the development of their own pastoral identity through an integrated exploration of theology and pastoral practice.

Through graduate coursework, focused contextual experiences, and an integration project, students explore and work to develop those personal qualities necessary for faithful service, spiritual practices grounded in God's Trinitarian life, theological knowledge and intellectual skills, and the pastoral abilities appropriate to their gifts and ministerial context. The MAPS degree at the Institute of Pastoral Studies offers students a systematic and broad foundation for a variety of ministries and the tools necessary to engage critically and constructively the challenges and opportunities of our contemporary context.

The MAPS Concentration in Health Care Chaplaincy prepares students for the certification process with the National Association of Catholic Chaplains (NACC) and other certifying bodies that require a 36 credit hour graduate degree.

The Pastoral Studies with a Concentration in Healthcare Chaplaincy (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

All components of the MAPS—Health Care Chaplaincy concentration, except for Clinical Pastoral Education (CPE) (https://www.luc.edu/ips/resources/cpe/), can be completed online or on-campus. Some courses are also available in the summer through the IPS Rome program.

In addition, for the MAPS concentration in Healthcare Chaplaincy:

- An understanding and personal integration of methods of pastoral care appropriate to the healthcare setting, supported by a conceptual foundation of theology and ethics.
- A readiness to complete successfully the process for certification as a Board Certified Chaplain (BCC) with The National Association of Catholic Chaplains (NACC).

[1] A variety of health care ethics courses are offered through Loyola's Neiswanger Institute for Bioethics (http://hsd.luc.edu/bioethics/). A list of these courses can be found in the Graduate School catalog, under the heading, "Bioethics and Health Care Leadership (https://catalog.luc.edu/graduate-professional/graduate-school/#coursestext)."

[2] In IPS 493, students are mentored in the process of preparing the materials required to sit for board certification.

On the Institute of Pastoral Studies webpage, you can find more information about the vocation of chaplaincy (https://www.luc.edu/ips/resources/chaplaincy/).

Students interested in becoming Board Certified Chaplains with the Association of Professional Chaplains (APC) can do so by pursuing the Master of Divinity (MDiv) (p. 1419) degree and choosing electives aimed at meeting APC competencies. The APC requires a 72 credit hours degree (the MDiv) and certifies Protestant chaplains as well as chaplains in an array of religious traditions.

Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

MA in Pastoral Studies

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.
- By completing the Concentration in Chaplaincy, students will be able to demonstrate an understanding and personal integration of methods of pastoral care appropriate to the healthcare setting, supported by a conceptual foundation of theology and ethics.
- By completing the Concentration in Chaplaincy, students will be able to demonstrate a competency to obtain certification as a Board Certified Chaplain (BCC) with The National Association of Catholic Chaplains (NACC) or other recognized national certifying association that requires a 36-credit hour graduate degree.

Pastoral Studies with a Concentration in Religious Education (MA)

As of Fall 2026, the subprogram described on this page is no longer accepting applicants.

Those interested in Religious Education ministries should apply to the Pastoral Studies (MA) (p. 1437) degree, into which religious education courses can be integrated.

Available Online. The Master of Arts in Pastoral Studies (MAPS) degree program prepares students for ministerial service in a variety of contexts. Embracing four areas of development—human, spiritual, intellectual, and ministerial—the program guides students in the development of their own pastoral identity through an integrated exploration of theology and pastoral practice.

Through graduate coursework, focused contextual experiences, and an integration project, students explore and work to develop those personal qualities necessary for faithful service, spiritual practices grounded in God's Trinitarian life, theological knowledge and intellectual skills, and the pastoral abilities appropriate to their gifts and ministerial context. The MAPS degree at the Institute of Pastoral Studies offers students a systematic and broad foundation for a variety of ministries and the tools necessary to engage critically and constructively the challenges and opportunities of our contemporary context.

The MAPS concentration in Religious Education enables students to develop the practices of thinking, acting, and teaching necessary for service in today's culturally, generationally, and theologically diverse church. Students in this concentration cultivate the practice of considering every problem and situation through theological lenses, so that the outcome or solution is infused with the principles of faith. These habits prepare students of the Religious Education concentration to engage, catechize, and educate all age groups in a variety of contexts.

In addition, for the MAPS concentration in Religious Education:

- The ability to administer religious education programs in a variety of contexts and engage, catechize, and educate groups of all types.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

MA in Pastoral Studies

By completing the Master of Arts in Pastoral Studies, students will be able to demonstrate:

- A fluency with the theological, ministerial, and interpersonal resources that make successful service to the church and world feasible in positions of formation, scholarship, or ecclesial leadership.
- The capacity to understand and critique the social and cultural contexts in which the graduate will be called to serve, always with an eye toward the marginalized, excluded, and systems of oppression.
- The ability to articulate with rhetorical skill and persuasion convincing command of relevant theological and ministerial themes and applications to various potential audiences, both orally and in writing.
- Personal engagement with, and an ability to draw upon, spiritual and psychological insights and scholarship that will nourish them as they make successful ministerial or academic contributions to their particular settings and contexts.
- With the Concentration in Religious Education, students will also demonstrate the ability to administer religious education programs in

a variety of contexts and engage, catechize, and educate groups of all types.

Religious Education Certificate

As of Fall 2026, this program is no longer accepting applicants.

Available Online. The Graduate Certificate in Religious Education develops the practices of thinking, acting, and teaching necessary for service in today's culturally, generationally, and theologically diverse church. Students cultivate the practice of considering every problem and situation through theological lenses, so that the outcome or solution is infused with the principles of faith. These habits prepare students of the Religious Education Certificate to engage, catechize, and educate all age groups in a variety of contexts.

This Certificate can be applied toward to the requirements of an MA degree at IPS, in whole or in part depending on the requirements of the MA in question.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- The ability to administer religious education programs in a variety of contexts and engage, catechize, and educate groups of all types.

Social Justice

- Social Justice (MA) (p. 1446)
- Social Justice Certificate (p. 1449)

Social Justice (MA)

As of Fall 2026, the degree described on this page is no longer accepting applicants.

We encourage those interested in Social Justice ministries to apply to the Pastoral Studies (MA) (p. 1437) degree, into which social justice ministry courses can be directly integrated.

As disparities along ethic/racial, economic, gender and religious lines gain prominence in the national conversation, there is a growing need for trained "change agents" to carry out the work of community development, social justice and human rights advocacy.

Faith-based community service programs, service immersion trips, and social justice projects attract high-minded "change agents" of great generosity and courage who want to serve economically disadvantaged communities, underserved and underrepresented populations, and people whose human dignity is under assault by social arrangements and structures. The post-Vatican II emphasis on a Church that sees working for justice as constitutive of the Christian life and that proposes an "option for the poor" as a pastoral standard, has spawned a growing number of talented and educated young adults who want to integrate service, social justice, and advocacy into their life patterns and career choices. With Pope Francis, the social justice movement is gaining even more momentum.

This degree program is designed to serve these change agents, offering a solid grounding in spiritual and theological foundations for this work, information about the key social justice issues today, the skills and told of assessment and analysis in addressing these issues, best-practice strategies for effective work in advocacy and community development, contextual education at sites where social justice work is exemplary, and the practical tools of successful leadership in addressing social justice issues.

The Social Justice (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of

Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Electives

Electives (9 credit hours) are chosen in consultation with the academic advisor. Electives may be taken in IPS or in many of the other schools, colleges, academic centers and institutes at Loyola University Chicago. See your academic advisor for more details.

The following represents a list of courses across the university that would be appropriate for students in the MA in Social Justice. It is meant to be suggestive rather than exhaustive. This list is to make students aware of "sub-disciplines" within social justice as a way of exploring different career options. This list also emphasizes the interdisciplinary nature of the degree and the career field. In this way, students might take multiple electives within a given field.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the

Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the Master of Arts in Social Justice, students will be able to demonstrate:

- Examine philosophical and theological approaches to justice with a special focus on the Catholic social tradition as these approaches address global, post-modern contexts.
- Describe a greater awareness and understanding of competing forces at the heart of conflicts over justice in various contexts and one's own location in relation to them. (poverty, culture, race, ethnicity, gender, sexual orientation, power, inequality, religion)
- Demonstrate a spiritual maturity that drives one to fully and productively engage in diverse contexts experiencing oppression, marginalization, deprivation and conflict.
- Develop the primary skills of deep listening, dialogue, adaptive leadership, conflict transformation, relationship building, and have basic facility in the secondary skills of community organizing and development, advocacy for policy change, and practical knowledge for organizational management and social entrepreneurship.

Social Justice Certificate

As of Fall 2026, this program is no longer accepting applicants.

Available Online.[1] The Graduate Certificate in Social Justice is intentionally designed in direct consultation with the "best practices" of community-based organizations. It prepares people for faith-based leadership in social advocacy, community and labor organizing, and systemic social change. The program combines theoretical and practical learning in social justice and activism.

The certificate program is specifically designed for:

1. students who have completed an undergraduate degree and wish to deepen their understanding of social justice;
2. students in graduate programs who wish to add an advanced certificate in social justice;
3. professionals whose work in the field would be enhanced by a graduate-level credential.

This Certificate can be applied toward to the requirements of an MA degree at IPS, in whole or in part depending on the requirements of the MA in question.

To learn more about the Graduate Certificate in Social Justice, please fill out our request for information form (https://www.luc.edu/ips/rfi/) or attend an information session (https://www.luc.edu/ips/admission/visit/).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The Certificate in Social Justice is comprised entirely of elective courses, all chosen from within the curriculum of the MA in Social Justice. The learning outcomes of the Certificate, therefore, are determined by the collection of courses chosen by the student.

At a general level, students will be able to demonstrate:

- An understanding of theories and perspectives on social justice, with special attention to Biblical traditions of justice and modern Catholic social teaching;
- An understanding of the histories, movements, theories, and practices studied in chosen elective courses.

Spirituality

- Christian Spirituality (MA) (p. 1450)
- Christian Spirituality - Spiritual Direction Concentration (MA) (p. 1453)
- Christian Spirituality Certificate (p. 1456)
- Spiritual Direction Certificate (p. 1457)

Christian Spirituality (MA)

As of Fall 2026, the degree described on this page is no longer accepting applicants.

We encourage those interested in Christian Spirituality to apply to the Pastoral Studies (MA) (p. 1437) degree, into which Christian spirituality courses can be directly integrated.

Drawing on the wisdom of the Ignatian tradition, the Master of Arts in Christian Spirituality equips students for meaningful and holistic living and ministry to meet the personal and social challenges of our time by deepening their knowledge of God and self. Joining contemplation to action, the Ignatian approach to spirituality and spiritual formation is grounded in a personal relationship with God/Christ, lived in the world and addresses the needs and issues of our time, ecumenical in its appeal to all Christians, and adapted to each person's uniqueness.

The Master of Arts in Christian Spirituality is a 36-hour degree program which can be completed entirely online or by taking a combination of online and in-person courses. Students also have the opportunity to take IPS summer courses that include a 10-day experience in Rome, many of which fulfill requirements for the MA in Christian Spirituality. Full-time students can complete the MA degree in two years.

The Christian Spirituality (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Students completing the MA in Christian Spirituality may choose to pursue a concentration in *Spiritual Direction*. The Spiritual Direction

concentration is designed to prepare spiritual directors to facilitate the regular, on-going practice of accompanying people as they attempt to deepen their relationship with the divine. Unique to the Institute of Pastoral Studies, students have the opportunity to receive training on how to direct and make use of the *Spiritual Exercises of Ignatius of Loyola* (30-day or 30-week format) in spiritual direction.

To learn more about the Master of Arts in Christian Spirituality, please complete our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session (https://www.luc.edu/ips/admission/visit/).

The U.S. Department of Education requires any institution offering distance education/online programs to students outside of its home state to acquire authorization from the states in which students reside. Regulations vary from state to state. While Loyola University Chicago is authorized, exempt or pursuing authorization in most states, some restrictions apply. Please see our State Authorization (https://www.luc.edu/online/aboutloyolaonline/state-authorization/) page for the most up-to-date information.

Loyola University Chicago is registered as a private institution with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

The Institute of Pastoral Studies, Loyola University Chicago (IPS), is accredited by the Commission on Accrediting of the Association of Theological Schools. The Board of Commissioners of the Association of Theological Schools (ATS) granted full accreditation to IPS on June 10, 2019.

The Association of Theological Schools
10 Summit Park Drive
Pittsburgh PA 15275-1110
Telephone: 412-788-6505

The following IPS degree programs are approved by the Commission on Accrediting: Master of Divinity, Master of Arts in Christian Spirituality (Professional MA), Master of Arts in Counseling for Ministry (Professional MA), Master of Arts in Pastoral Counseling (Professional MA), and the Master of Arts in Social Justice (Professional MA) were also approved, as were our comprehensive online (distance education) programs.

Contextual Education

MA in Christian Spirituality students acquire and enhance their spiritual leadership and skills in a structured contextual education program that combines onsite mentoring and supervision, skill-based workshops, as well as peer and faculty weekly reflection sessions. Students typically minister 8-10 hours per week for a period of 20-22 weeks, for a total of at least 200 hours of onsite experience and formation. The field learning settings can be directly related to the student's present work situation or can be selected from placements IPS has cultivated in the resource rich area of Chicago or other settings around the nation or the world.

Students fulfill the Contextual Education requirement of the MA in Christian Spirituality by successfully completing the following 3 courses:

Code	Title	Hours
IPS 578	Contextual Education Preparation	1
IPS 579	Contextual Education Introduction	1.5
IPS 580	Contextual Education I	1.5

Integration Project

MA in Christian Spirituality students complete the program with IPS 593 Integration Project, the zero-credit Integration Project (https://www.luc.edu/ips/resources/procedures/#den124710), in their final year.

Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted

to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the Master of Arts in Christian Spirituality, students will be able to demonstrate:

- Spiritual perspective formed in self-awareness and engagement with modern culture and the classic and contemporary resources of the Christian tradition;
- Spirituality literacy grounded in biblical, theological and psychological competencies;
- Spirituality praxis through personal engagement with the spiritual dimension of Christian faith, discipleship and ministry;
- Professional skills in and for spiritual accompaniment.

Christian Spirituality - Spiritual Direction Concentration (MA)

As of Fall 2026, the subprogram described on this page is no longer accepting applicants.

Those interested in Spiritual Direction ministries but with no prior theology or ministry studies should apply to both the Pastoral Studies (MA) (p. 1437) degree and the Spiritual Direction Certificate (p. 1457), which can be combined into a single curriculum and completed in two years by full-time students (a part-time option is available). Those with prior theological and ministerial formation should apply directly and only to the Spiritual Direction Certificate (p. 1457).

The Spiritual Direction Concentration provides MA in Christian Spirituality students the opportunity to focus their formation on acquiring the theoretical and practical skills they need to provide spiritual direction, where they will accompany others with their spiritual development and relationship with God. Spiritual directors walk alongside each person on his or her spiritual journey, accompanying individuals as they become more fully realized spiritual beings. Students also have the unique opportunity to learn to direct and use the *Spiritual Exercises of Ignatius of Loyola* in and for spiritual direction, offering spiritual accompaniment framed by and infused with the Jesuit perspective and values.

This degree is suited to those holding a bachelor's degree in any field and who are interested in forming themselves for the vocation of spiritual director, including the integration of spiritual direction into existing careers and current contexts, including retreat centers, community programs, church and parish offices, and more.

Those already holding a graduate degree in theology, ministry, or related fields may qualify to pursue formation as a spiritual director through the Spiritual Direction Certificate (p. 1457).

The Christian Spirituality - Spiritual Direction Concentration (MA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Available Online.

Curriculum

MA in Christian Spirituality students opting for the Spiritual Direction concentration (MACS-SD) must complete the 33 credit hour core course of the MACS plus two additional specialized spiritual direction courses. Students must also complete the Contextual Education (https://www.luc.edu/ips/resources/contextualeducation/) requirement (4 credit hours) and the Integration Paper (https://www.luc.edu/ips/resources/procedures/) (a capstone writing project).

Besides the traditional Master's program, the Christian Spirituality - Spiritual Direction Concentration (MA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours
IPS 403	Spiritual Paths in World Religions	3

IPS 580	Contextual Education I	1.5
IPS 593	Integration Project	0
One IPS Elective Course		3
Total Hours		**37**

Students must also complete 4 semesters of spiritual direction. The 30-day or 30-week version of the *Spiritual Exercises of Ignatius of Loyola* (optional) will count for 2 semesters of personal spiritual direction.

Students in the MACS-Spiritual Direction concentration with the goal of learning how to direct the Spiritual Exercises of St. Ignatius must have completed the 30-day or the 30-week (19th Annotation) format of the Exercises prior to beginning the Contextual Education component of their program (before your final year begins). This requirement will be waived for those who have completed the Spiritual Exercises within 5 years of commencing their studies at IPS.

The Contextual Education requirement is adapted to enable MA in Christian Spirituality: Spiritual Direction Concentration students to acquire the practical skills for and experience of spiritual direction in learning interaction with their peers and under the supervision of an experienced spiritual director. Students have the unique opportunity to learn to direct and use the *Spiritual Exercises of Ignatius of Loyola* in and for spiritual direction. Suitable field learning settings may be found in the Chicago area, elsewhere in the United States or in other countries, upon approval by the Faculty Coordinator of Contextual Education.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Spiritual perspective formed in self-awareness and engagement with modern culture and the classic and contemporary resources of the Christian tradition;
- Spirituality literacy grounded in biblical, theological and psychological competencies;
- Spirituality praxis through personal engagement with the spiritual dimension of Christian faith, discipleship and ministry;
- An understanding of key components and considerations for the practice of spiritual direction;
- Self-awareness of one's own spirituality as it relates to the ministry and practice of spiritual direction;
- Demonstrate professional skills in and for spiritual direction.

Christian Spirituality Certificate

As of Fall 2026, this program is no longer accepting admits.

The Graduate Certificate in Christian Spirituality provides students with a foundational and broad understanding of Christian spiritual theologies, traditions, and practices. Students develop an integrated spiritual perspective through self-reflection and engagement with modern culture and the classic and contemporary resources of the Christian tradition. They advance in their spiritual maturity and with a perspective grounded in key biblical, theological, and psychological competencies. The curriculum is flexible to accommodate each student's experience and vocational goals. It includes a wide range of elective course options trading on the expertise of IPS faculty and existing course offerings, allows students to discern in community and with intention their vocational goals, and provides a graduate-level credential that can be rolled directly into a master's degree program for those who decide to continue their education and formation for ministry.

The Graduate Certificate in Christian Spirituality provides a flexible course of study for

- Persons seeking to deepen their understanding and practice of Christian spirituality
- Those exploring a new career path in ministries that involve spiritual accompaniment
- Ministers who want to expand their vocational horizon, expanding their knowledge and skill base to include Christian spiritual theologies, traditions, and practices
- Volunteers or part-time professionals who seek to advance in their ministry

This Certificate can be applied toward to the requirements of an MA degree at IPS, in whole or in part depending on the requirements of the MA in question.

- Spiritual Direction Certificate (p. 1457)

Curriculum

The Graduate Certificate in Christian Spirituality requires completion of five courses (15 credit hours). Three courses are required and two courses are electives. Students will work with their academic advisor to choose elective courses that best suit their background, experience, interests, and goals.

Code	Title	Hours
IPS 545	The Foundations of Christian Spirituality	3
IPS 572	Ignatian Spirituality	3
IPS 428	Introduction to Spirituality Praxis	3
Electives		6
Total Hours		**15**

The Institute of Pastoral Studies offers a large number of courses online every year, including the three required courses for this certificate. It is possible, therefore, to complete the Graduate Certificate in Christian Spirituality entirely online depending on which courses a student chooses within the elective options that satisfy the curricular requirements.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
IPS 428	Introduction to Spirituality Praxis	3
IPS 545	The Foundations of Christian Spirituality	3
	Hours	**6**
Spring		
IPS 572	Ignatian Spirituality	3

	Hours	**6**
Summer		
Elective #2		3
	Hours	**3**
	Total Hours	**15**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students gain a foundational and broad base of knowledge and skills related to Christian spirituality. Students advance their personal spiritual perspective through self-reflection and engagement with modern culture and the classic and contemporary resources of the Christian tradition. Graduates integrate and embody key biblical, theological, and psychological competencies resulting from personal engagement with the spiritual dimensions of faith, discipleship, and ministry.

Spiritual Direction Certificate

Available Online. The Graduate Certificate in Spiritual Direction is suited to applicants holding a Master's degree or above in theological or ministerial studies, psychology or counseling, psychiatric social work, or health care and who seek to develop and integrate spiritual direction skills and practices into their work.

For those who have discerned a call to work in specifically Jesuit contexts or in ways that integrate Ignatian Spirituality into their practice, IPS offers a track that trains students to be a director in the Spiritual Exercises of St Ignatius. This option requires that a student have completed the Spiritual Exercises within five years of commencing the Certificate or can commit to doing so during their first year (before entering the contextual education requirement of the Certificate).

- Pastoral Counseling (MA) (p. 1415)
- Pastoral Studies (MA) (p. 1437)

Curriculum

The certificate comprises the following courses:

Code	Title	Hours
IPS 545	The Foundations of Christian Spirituality	3
IPS 501	Advanced Human Relation Skills	3
IPS 430	Spiritual Direction Development and Practice	3
IPS 572 or IPS 573	Ignatian Spirituality Spiritual Exercises of St Ignatius	3
IPS 585	Intro to Spiritual Direction Certificate Praxis for Contextual Ed	1.5
IPS 586	Spiritual Direction Certificate Praxis I for Contextual Ed	0
IPS 587	Spiritual Direction Certificate Praxis II for Contextual Ed	0
Total Hours		**13.5**

Students must also complete 4 semesters of spiritual direction. The 30-day or 30-week version of the *Spiritual Exercises of Ignatius of Loyola* will count for 2 semesters of personal spiritual direction.

Students in the Certificate in Spiritual Direction seeking to learn how to direct the Spiritual Exercises of St. Ignatius must have completed the 30-day or the 30-week 19th Annotation format of the Exercises prior to beginning the Contextual Education component of their program. This requirement will be waived for those who have taken the complete Spiritual Exercises within 5 years of commencing their studies at IPS.

The Contextual Education requirement is adapted to enable students of the Certificate in Spiritual Direction to acquire the practical skills for and experience of spiritual direction in learning interaction with their peers and under the supervision of an experienced spiritual director. Students have the unique opportunity to learn to direct and use the Spiritual Exercises of Ignatius of Loyola in and for spiritual direction. Suitable field learning settings may be found in the Chicago area, elsewhere in the United States or in other countries, upon approval by Prof. Dan Rhodes, Faculty Coordinator of Contextual Education.

Applicants holding a Master's degree in psychology, counseling, or psychiatric social work must provide evidence of having completed prerequisite graduate level courses in biblical and foundational theology, typically a 3-credit hour course in Hebrew Scriptures (Old Testament) or New Testament, and a 3-credit hour course in systematic theology. Applicants from the psychology or counseling fields who have not completed courses in biblical and theological foundations can do so at the IPS by taking courses such as:

Code	Title	Hours

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the Spiritual Direction Certificates, students will be able to demonstrate:

- Analyze spiritual direction cases and apply theological, ethical, and pastoral frameworks to determine appropriate aims, boundaries, and responses, including attention to the directee's context and needs.
- Critically reflect on and integrate their personal spirituality, theological understanding, and developing ministerial identity in a coherent approach to the practice of spiritual direction.
- Conduct spiritual direction sessions demonstrating core competencies (e.g., attentive listening, discernment, facilitating prayer) and evaluate their practice using evidence from supervision/observation and structured self-assessment.

Marcella Niehoff School of Nursing

Mission, Vision & Core Values

Our Jesuit values guide us to shape the future of health and health care

Our mission at the Marcella Niehoff School of Nursing is to advance the science of nursing and provide a transformative education in the Jesuit Catholic tradition that prepares compassionate, innovative, diverse nurse leaders who provide care for the whole person and partner locally and globally to promote social justice and health for all.

Our vision at the Marcella Niehoff School of Nursing is to be a preeminent leader in transforming the health of persons, families, communities and populations, while promoting social justice, health equity and quality care for all.

In keeping with the University's Ignatian heritage, the School of Nursing is committed to the five hallmark characteristics of a Jesuit education. These characteristics provide the foundation for our core values, helping guide and motivate our administrators, faculty, students, and graduates to think differently about their approach to health care.

Core Values

Commitment to Excellence

Apply well-learned lessons and skills to achieve new ideas, better solutions, and vital answers.

- Promote dialogue, critical thinking, and the discernment of meaning in the process of enhancing health of persons and communities, both locally and globally.
- Foster an academic environment that supports and guides students in their transformation toward becoming health care leaders.

Faith in God and the Religious Tradition

Promote well-formed and strongly held beliefs in one's faith tradition to deepen others' relationship with God.

- Acknowledge that humans are physical, psychosocial, and spiritual beings
- Recognize that spirituality affects health.
- Respect that spirituality is lived out differently through diverse faiths, beliefs, and religious traditions.
- Create a safe place to search for meaning in the process of discovery and transformation, as well as social change.
- Respect our potential for achievement while accepting our human limitations in the pursuit of good.

Service that Promotes Justice

Use learning and leadership in openhanded and generous ways to ensure freedom of inquiry, the pursuit of truth, and care for others.

- Commit to social justice by engaging individuals, families, and communities, both locally and globally, to improve and promote health.
- Recognize that health disparities exist; those with the greatest need and with the least access hold a higher priority for action.
- Engage in research and application of evidence-based practice or best practices that limit health disparities.

Values-Based Leadership

Ensure a consistent focus on personal integrity, ethical behavior in business and in all professions, and the appropriate balance between justice and fairness.

- Foster synergistic collaborations within and between professions, disciplines, programs, and partners.
- Respect the dignity and fundamental rights of all.
- Embrace the tension that exists between competing priorities (e.g., mission-driven, financially-driven, Ethical & Religious Directives for Catholic Health Care Services) when making choices.
- Accept responsibility to make choices and act through discernment, being wise stewards of resources.
- Actively seek diversity in people, programs, professions, and practice to strengthen the communities of which we are a part.
- Promote a culture of purposeful transparency.

Global Awareness

Demonstrate an understanding that the world's people and societies are interrelated and interdependent.

- Understand that individuals are intimately connected to, live within, and operate within community.
- Recognize that communities have cultural capital with unique strengths.
- Foster relationships and engaging in partnerships in order to promote health.
- Embrace culture as a means to serve and to lead change toward better health.
- Apply the lessons we learn locally to global milieus and applying lessons learned globally to local initiatives.

Accreditation

The master's degree program in nursing and the Doctor of Nursing Practice program and the post-graduate APRN certificate program at Loyola University Chicago is accredited by the

Commission on Collegiate Nursing Education
655 K Street, NW
Suite 750
Washington, DC 20001
202-887-6791.

CM/MH/AD Nursing (CMAN)

CMAN 403 Health Care Delivery and Organization (3 Credit Hours)
This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the healthcare system is structured, how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on quality, patient safety and information technology as center pieces of the modern health care environment.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Distinguish the roles, functions and responsibilities of healthcare system components (ie, delivery, financing and regulation); 2) Analyze the interaction of social; political and economic forces shaping healthcare delivery and their impact on cost, quality and access; 3) Compare the organization of multiple healthcare delivery structures to the effectiveness of meeting population health needs; 4) Analyze factors influencing trends in healthcare quality and patient safety

CMAN 407 Population Health Informatics (3 Credit Hours)
This course focuses on informatics in health care, with an emphasis on information systems and the use of information technology (IT) applications to support population health. Basic epidemiologic concepts of health are addressed. The key concepts of feasibility, usability and adaptability are addressed. This course includes evaluation of IT applications for healthcare administration, clinical practice, research, and education.
Outcomes:
1) Apply principles of health care informatics for population health; 2) Apply basic concepts of epidemiology for population health; 3) Analyze the role of population health informatics in understanding data, information, & knowledge; 4) Apply population health informatics in surveillance, interoperability and big data contexts; 5) Evaluate quality in electronic health records, mobile applications, and personal health records; 6) Identify the economic value and potential for sustainability in population health technologies

CMAN 417 Nursing and Health Care Administration Practicum (1-6 Credit Hours)
The practicum course guides the student in a synthesis of content from nursing and related sciences and the application of this knowledge to the role of the nurse in leadership and management experiences. Emphasis will be placed on the student's clinical engagement in management initiatives requiring critical assessment, planning, intervention, and evaluation activities using theoretical models and management tools. Students in the practicum experience are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent.
Outcomes:
1) Apply knowledge of selected concepts, models, and theories from nursing and management sciences to achieve high quality nursing care and effective healthcare team coordination in a variety of settings; 2) Apply knowledge of healthcare policy, finance and regulatory environments to identify clinical questions, implement safety initiatives, and monitor patient outcomes; 3) Incorporate effective communication techniques to deliver evidence-based, patient-centered care; 4) Analyze and evaluate healthcare organization structure, mission, and philosophy as they relate to the standards of care, staffing and performance, development and marketing of programs and projects; 5) Evaluate the use of information technology to improve patient care outcomes and create a safe care environment; 6) Apply legal, ethical principles to the nursing role of leadership and management

CMAN 425 Advanced Quality and Safety in Health Care (3 Credit Hours)
This course focuses on managing the continuum between safety and quality and the strategic importance of these concepts to healthcare organizations and clients. Trends in patient safety and healthcare quality, practices in different healthcare environments, and practices related to improving safety and quality will be examined. The course is designed to provide students with knowledge and skills in systems thinking and in preventing, learning from and resolving error and addressing adverse events. Interprofessional teamwork, the use of information technology and data are emphasized in promoting safer healthcare and improved outcomes.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain the forces driving the focus on safety and quality in health care; 2) Evaluate strategies for improving safety and quality in health care; 3) Explain the influence of systems (environmental, organizational, provider, technological and task) on healthcare outcomes; 4) Analyze the role of various systems and factors in creating safe environments of care; 5) Explain the impact of just culture thinking on safety and quality improvement in health care; 6) Develop a plan for improvement of a safety and/or quality issue

CMAN 428 Psychiatric Mental Health and Illness Across the Lifespan (3 Credit Hours)
This course focuses on knowledge and competencies to deliver holistic, evidence-based mental health care across diverse populations and clinical settings. Students will examine the biological, psychological, social, and spiritual dimensions of mental illness and psychiatric disorders throughout the lifespan. Emphasis is placed on therapeutic communication, psychopharmacology, trauma-informed care, crisis intervention, and collaborative treatment planning within interprofessional teams. Students will develop assessment skills, clinical reasoning, and self-reflexive competencies essential for providing person-centered psychiatric care that respects human dignity across the mental health-illness continuum.
Outcomes:
Apply knowledge of neurobiology, psychopathology, and developmental theories to conduct comprehensive psychiatric assessments and formulate evidence-based person-centered treatment plans; Analyze therapeutic communication techniques, trauma-informed care, and evidence-based psychotherapeutic interventions to develop therapeutic relationships and support care and recovery across the lifespan; Apply pharmacological principles and psychopharmacology evidence to evaluate medication management strategies, monitor treatment responses, and educate patients about psychotropic medications and side effects; Understand risk factors for self-harm, suicide, violence, and psychiatric emergencies to implement evidence-based crisis intervention strategies and maintain safe therapeutic environments; Recognize interprofessional mental health teams, community resources, and support systems to develop comprehensive, recovery-oriented treatment plans that address the holistic needs of individuals with mental illness and address stigma related to mental illness; Understand ethical principles, legal standards, and mental health policy to navigate complex mental health dilemmas including confidentiality, informed consent, involuntary treatment, equitable care, and capacity determination while respecting patient autonomy and rights

CMAN 428L Psychiatric Mental Health and Illness Across the Lifespan Clinical (2 Credit Hours)
This clinical course focuses on preparing students to care for persons experiencing mental illness. Using a biopsychosocial model, students will engage in direct patient care across the mental health-illness continuum, working with individuals, families, and groups experiencing acute and chronic psychiatric conditions. Clinical experiences include community mental health centers, inpatient hospitals, integrated behavioral health settings, and outpatient psychiatric services. Emphasis is placed on therapeutic communication, interdisciplinary collaboration, trauma-informed care, and addressing social determinants of mental health within community contexts. Students work to cultivate clinical judgment, cultural humility, and advocacy skills essential for person-centered mental health care.
Outcomes:
Perform comprehensive biopsychosocial-spiritual psychiatric assessments using standardized screening tools and diagnostic criteria to formulate clinical impressions and develop person-centered treatment plans; Integrate therapeutic communication with individuals experiencing mental illness using communication techniques, empathy, and presence to promote care; Implement evidence-based psychotherapeutic interventions, including cognitive-behavioral techniques, motivational interviewing, and psychoeducation, in inpatient and community settings; Apply crisis intervention competencies by conducting suicide and violence risk assessments, reviewing de-escalation strategies, and appropriate emergency responses that ensure patient and community safety; Collaborate with interprofessional team members, community organizations, and social service agencies to coordinate comprehensive mental illness services that address housing, employment, substance use, and other social risks, and apply clinical reasoning and pharmacological knowledge to provide patient education and person-centered care; Apply trauma-informed care principles and cultural humility into clinical practice and reflect on personal values, biases, and emotional responses in mental health clinical encounters to promote professional growth, maintain therapeutic boundaries, and practice self-care strategies that prevent burnout and compassion fatigue

CMAN 430 Leadership and Administration in Health Care (3 Credit Hours)
This course focuses on the integration of core knowledge in leadership, administration, human resources and communication in health care organizations. Special emphasis is placed on leadership styles, the roles of the leader, human resources management and communication. The course is designed to provide the student with knowledge to practice the leadership skills necessary to positively impact healthcare systems. Selected Topics May Include: Leadership theory and style and professional practice a) leader competencies b) Influencing behaviors c) Relationship management d) Culture e) Nimble flexibility f) Professional accountability g) Motivation for high performance h) Strategic leadership and tactical leadership (Administration vs management) Human resource management a) Communication b) Difficult conversations c) Conflict resolution d) Coaching e) Performance evaluation f) Onboarding Power politics a) Development and management of partnerships/relationships/networks b) Strategic negotiation c) Power.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Relate essential nurse leadership competencies for effective management in healthcare organizations; 2) Evaluate the impact of leadership styles on organizational culture and effectiveness; 3) Generate strategies to optimize human resource performance in healthcare settings; 4) Identify strategies to address interpersonal and intraorganizational conflict

CMAN 438 Population Based Public and Community Health (3 Credit Hours)
This course examines population health across local, national, and global contexts, emphasizing the social, environmental, political, and economic factors that influence health outcomes. Students explore public health systems, epidemiology, policy, technology, and community health settings to understand health disparities and promote health equity. Using evidence-based frameworks, students apply population health concepts through community assessment, health education planning, and role exploration to support health promotion, disease prevention, and emergency preparedness across diverse populations.
Outcomes:
Apply the nursing process in the care of individuals, families, communities, and systems; Analyze population health trends using epidemiological data, surveillance systems, and public health indicators to identify priority health issues; Evaluate the role of social determinants of health, policy, politics, technology, social media, and health communication strategies on health outcomes across diverse populations and settings; Evaluate the roles of community health nurses across varied practice settings and populations, integrating principles of cultural humility, health literacy, and public health preparedness; Conduct a comprehensive community assessment to identify strengths, risks, and health needs of a defined population or aggregate; Design an evidence-based community health education intervention that promotes health, prevents disease, and addresses identified population needs

CMAN 445 Health Care Outcomes (3 Credit Hours)
This course focuses on the theory and methods to measure and evaluate healthcare outcomes. Concepts of population health will guide the comparison and analysis of health outcomes and measures. Current political, legal, regulatory, and ethical issues will be explored as these relate to health outcomes. Interprofessional teamwork, the use of information technology and data are emphasized in promoting safer healthcare and improved outcomes.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Analyze the political, legal, regulatory, and ethical influences in the development and current status of outcomes management; 2) Apply methods and processes for improving outcomes; 3) Utilize data-driven decision making for health outcomes; 4) Develop leadership and interprofessional competence in analyzing healthcare outcomes; 5) Generate data-driven change strategies to improve health outcomes

CMAN 448 Program Planning and Marketing in Health Care (3 Credit Hours)
This course presents an integrated approach to strategic planning, program planning, and marketing in nursing and health care organizations. Key models, elements and processes associated with strategic planning are presented with an emphasis on the leadership role in leveraging information, environmental scanning, and competitive analysis. Theories, models, tools, and processes for program planning, implementation, and evaluation and the marketing of nursing and healthcare services are addressed. The integration of strategic planning, program planning, and marketing with the mission, goals, and objectives of organizations and services is emphasized. 6. Relate the strategic planning, program planning, and marketing processes to nursing leadership competencies.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Analyze models and theories of strategic planning, program planning, and marketing; 2) Explain the relation between organization mission, goals, and objectives and the strategic planning, program planning, and marketing processes; 3) Apply tools of strategic planning to an organization; 4) Create a comprehensive plan focused on the needs, design, implementation and evaluation of a program that derives from an organizational strategic plan; 5) Evaluate marketing strategies

CMAN 460 Health Care Policy (3 Credit Hours)
This course is designed to introduce key policy issues and processes in public policy development. The impact of health care policy on management and health system improvement is discussed. The student is provided with advanced policy knowledge, frameworks, and skills required to assume a leadership role in health care. Emphasis is placed on using evidence to develop an understanding of the effect of health care policy on practice.
Outcomes:
1) Identify key policy issues in contemporary health systems; 2) Analyze the effect of health policy on practice; 3) Analyze strategies for health system improvement through public policy; 4) Advocate for policy adoption to a health care decision maker; 5) Identify the effects of government regulation on education and practice

CMAN 533 Fiscal Management in Health Care Organizations (3 Credit Hours)
This course prepares the graduate student to develop a framework for understanding key issues in financial management in health care from two perspectives. First, the course explores the relationship between the national economic environment and the financial context for current models of health care delivery. Second the course introduces a variety of fiscal concepts and techniques as applied to nursing and healthcare administration. Emphasis is placed on the way cost data influences operational decision making in healthcare administrative practice.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Upon successful completion of the course, the student will: 1) Analyze the impact of political, social and economic factors on the cost of patient care delivery; 2) Examine cost behavior concepts as they relate to nursing and other health care models in healthcare organizations; 3) Apply cost accounting techniques in health care; 4) Analyze ethical and legal issues surrounding fiscal management

CMAN 569 Comparative Effective Research in Healthcare (3 Credit Hours)
Pre-requisites: GNUR 450 or equivalent required; CMAN 439 and 440 recommended
Comparative effective research (CER) is a central tenet of health care reform. This course offers an overview of policy implications and rationale for CER and explores different approaches of developing, analyzing and communicating CER. Research comparing the clinical and economic merits of different treatments, devices and procedures will be explored.
Outcomes:
Apply political, social and ethical perspectives to uses of CER, Demonstrate effective retrieval of CER reviews from public sources, Demonstrate knowledge of major CER methods and tools, Evaluate quality of evidence from CER reports, Assess treatment options in defined patient population

Doctor of Nursing Practice (DNP)

DNP 510 Capstone Seminar (1-3 Credit Hours)
The DNP scholarly project demonstrates an in-depth knowledge of each student's area of specialization in nursing practice. This project relates to advanced practice in the nursing specialty and benefits a group, population, or community rather than an individual patient. The DNP Scholarly project is a synthesis of the student's work and lays the groundwork for future scholarship with the goal of a tangible and deliverable academic product derived from the practice courses and immersion experience. The DNP scholarly project, unlike that of PhD level research, may take a number of forms such as: practice change initiative; pilot study; program evaluation; quality improvement project; evaluation of a new practice model; or a consulting project. This course addresses the unique needs and challenges second year DNP students face while completing their projects. Seminar content focuses on skills necessary for successful clinical project completion through: presentations, selected readings and online forums. The seminar operates at the group level and is designed to work in concert with and support individual students' DNP Faculty Director and external mentor (often the student's preceptor at the project site). Course content parallels the three overall stages of a DNP Scholarly Project: the design, proposal submission and proposal approval (First semester); project implementation (second semester); and, final presentation and dissemination (third semester). Students are expected to have a Faculty Director for their project and a tentative external mentor in place prior to course entry. This seminar is completed sequentially over a minimum of three semesters. Students are expected to be enrolled in this course each semester that they are working on the DNP Scholarly Project.

DNP 511 Practicum (1-6 Credit Hours)
Theory, evidence, and the systematic translation of research into practice serve as the foci for DNP practicum experiences across the program of study. Students investigate clinical problems and refine their clinical translational capabilities within the context of the broader health care system. Clinical learning is directed toward systematic application of knowledge and scientific discovery in resolving new or persistent problems affecting the safety and quality of patient care. Mentored clinical application of evidence-based knowledge and skills, as well as independent investigation and evaluation of outcomes, supports integration of the DNP role into the complex circumstances of contemporary nursing practice. Leadership, consultation, advocacy, fiscal accountability and interdisciplinary collaboration serve as core competencies to effect organizational change.

General Nursing (GNUR)

GNUR 402 Ethics for Health Professionals (2 Credit Hours)
In their various roles and practice settings, health care professionals participate in the unfolding stories of patients/clients and their families. They encounter ethical questions, concerns, problems and dilemmas in the course of their professional lives. These challenges affect health care professionals as independent and collaborative decision makers as well as members of the health care team who may be called upon to implement the decisions of others. This course provides students with opportunities to explore the impact of ethical issues on their personal and professional lives. Individual, family, institutional and societal issues are discussed. Students are guided in the application of frameworks that aid in resolving ethical dilemmas in professional practice. Emphasis is placed on developing skills in reflective moral thinking.

GNUR 403 Theories and Concepts for Professional Nursing Practice (3 Credit Hours)
This course is focused on theories and concepts that inform professional nursing practice across settings and spheres of care. The relations between concepts, theories, nursing knowledge, and nursing practice are emphasized. The evolution of knowledge for nursing practice, in nursing practice, and of nursing practice are emphasized in the course.
Outcomes:
Understand influential forces in the development of knowledge for professional nursing practice; Analyze the relation between theory, research and scholarship, and practice; Differentiate knowledge for nursing practice, knowledge in nursing practice, and knowledge of nursing practice; Relate patterns of knowing to professional nursing practice; Explain the use of selected concepts and theories as guides to nursing practice

GNUR 404 Theories & Concepts for Advanced Clinical Practice (3 Credit Hours)
This course focuses on the development and use of disciplinary knowledge as a foundation for advanced nursing practice. Basic philosophical assumptions and the history of knowledge development in nursing are presented. The relation between concepts, theory, research, and practice are emphasized, with a focus on concepts and middle-range theories that are applied in advanced nursing practice.
Outcomes:
Understand the history and driving forces for knowledge development in nursing; Describe the philosophical foundations of nursing and advanced nursing practice; Understand the levels of theory development in nursing; Explain the use of selected concepts and middle-range theories to guide advanced nursing practice; Analyze concepts and theories for use in nursing practice; Analyze the relation between theory, research, and nursing practice

GNUR 405 Introductory Statistics for Healthcare Professionals (3 Credit Hours)
Pre-requisites: Restricted to MSN, DNP, and PhD Nursing students
This course is focused on facilitating student acquisition of the knowledge and skills that will enable them to manage basic statistical issues that confront practitioners and researchers in health professions. Course topics and experiences will prepare students to interpret findings from published research and quality improvement reports and to conduct basic data analysis in future projects.
Outcomes:
1) Define basic statistical concepts; 2) Differentiate descriptive and inferential statistical tests; 3) Describe the purpose and appropriate application of statistical techniques; 4) Interpret the meaning of statistical tests; 5) Manage and analyze data using statistical software

GNUR 407 Social Justice and Ethics in Health Care (3 Credit Hours)
This course examines social justice, ethics, and nursing advocacy in healthcare at global, national, and local levels for the doctorally prepared nurse. Social justice and ethical issues in healthcare are analyzed using established theories and frameworks. Recommendations for resolution of social justice and ethical issues will be addressed.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Understand the historical, cultural, economic, and political theories and perspectives of social justice and ethics; 2) Analyze social justice and ethical issues at local, national, and global levels; 3) Apply professional codes to individual and interwoven issues of social justice, ethics and leadership; 4) Develop a plan to address population health inequities, based on evidence, codes and principles

GNUR 408 Research for Advanced Clinical Practice (3 Credit Hours)
Pre-requisites: Admission to a Master of Science in Dietetics or Master of Science in Nursing program
This course prepares students to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices and protocols form the foundation health care practice. The importance of translation of scientific evidence to improve practice is emphasized.
Outcomes:
Conceptualize an evidence-based protocol or pilot research study that corresponds to a clinical, educational administrative or policy issue or problem

GNUR 410 Information Technology in Healthcare (3 Credit Hours)
This course prepares graduate-entry nursing students to apply health information technology, informatics, and data analytics to enhance the quality, safety, and equity of patient care. Through case-based learning, hands-on exploration of electronic health records and clinical decision support systems, analysis of real and simulated data, and structured discussion of emerging technologies - such as artificial intelligence and telehealth - students examine how digital tools influence clinical workflows, decision-making, and patient outcomes. Emphasis is placed on ethical and evidence-informed technology use, including privacy and cybersecurity, interoperability, mitigation of algorithmic bias, and equitable access to digital health resources. By the end of the course, learners will be able to critically evaluate and ethically apply health technologies to support data-driven clinical decisions, optimize care processes, collaborate across disciplines, and contribute to technology-enabled quality improvement initiatives in diverse healthcare settings.
Outcomes:
Evaluate electronic health record systems, clinical decision support tools, and health information technologies to optimize nursing workflows, enhance interprofessional communication, and improve patient safety outcomes; Analyze clinical and population health data using informatics principles to identify patterns, interpret trends, and support evidence-based practice and quality improvement initiatives; Assess emerging healthcare technologies and their implementation in clinical practice, including impact on care delivery, patient outcomes, and implications for health equity; Evaluate informatics policies, privacy and security standards, and interoperability frameworks to ensure ethical technology use, protect patient data, and promote equitable access to health information

GNUR 412 Scholarly Inquiry for Evidence-Based Nursing Practice (3 Credit Hours)
This course provides graduate nursing students with the knowledge and skills necessary to engage in scholarly inquiry within advanced nursing roles. Emphasis is placed on understanding and applying research, evidence-based practice, and quality improvement (QI) frameworks to improve health outcomes and healthcare systems. The interrelationships among nursing theory, research, and clinical practice are explored. Through critical appraisal of diverse research methodologies, learners identify practice gaps, evaluate evidence, and design evidence-based projects. Principles of ethical scholarship, cultural humility, and protection of vulnerable populations are emphasized. Students create an individualized plan to advance their role as scholarly nurses who contribute to nursing knowledge and healthcare quality.
Outcomes:
Examine appropriate applications of quality improvement, research, and evidence-based practice in improving patient outcomes; Compare and contrast research methodologies and the appropriate application of each; Analyze the interrelationships among theory, research, and nursing practice to guide advanced clinical decision-making; Design an evidence-based practice project that demonstrates appropriate application of research to practice; Create a plan to advance one's scholarship and professional development as a scholarly nurse; Apply ethical and cultural principles in research, quality improvement, and evidence-based practice

GNUR 413 Advanced Pharmacology (3 Credit Hours)
This course will be the foundation for the advanced practice nurse to make appropriate decisions regarding the pharmacological management of patients in clinical practice. Pharmacological principles, including pharmacokinetics, pharmacodynamics, mechanisms of adverse drug reactions, and contraindications will be discussed. Legal requirements for writing prescriptions and the format for prescriptions as well as common sources of medication errors and methods to prevent them will be described. Developmental considerations, socioeconomic status, and complementary therapies will be addressed throughout the course. Pharmacotherapy of selected common disorders will be addressed. Students will synthesize and integrate diverse viewpoints, principles, and selected research findings related to the complex needs of patients via case study analyses. This course, along with clinical courses, will prepare the advanced practice nurse for prescriptive authority.
Outcomes:
Apply the principles of pharmacokinetics and pharmacodynamics to pharmacological interventions used in selected acute and chronic illnesses; Describe the potential iatrogenic effects of pharmacological therapy; Identify drugs of choice for selected health problems considering the patient's age, socioeconomic status, cultural background, concurrent illnesses, pregnancy, lactation, and potential drug-drug, drug-food, and drug-herbal medicinal interactions; Discuss factors that affect compliance with prescribed and OTC medication regimens and their implication for drug selection and patient education; Comply with TJC National Patient Safety Goals related to prescription writing; Critique research on drug therapy pertinent to one's own practice; Discuss ethical, legal, and economic issues associated with pharmacological interventions

GNUR 414 Health Assessment (2 Credit Hours)
This course prepares students to conduct comprehensive health assessments. Students will develop clinical reasoning skills, physical and psychosocial assessment techniques, and critical thinking skills to inform clinical decision-making. Students will synthesize knowledge gained from this course and required science courses to perform and understand holistic assessments with diverse populations in a variety of healthcare settings.
Outcomes:
Apply clinical reasoning and judgment to conduct comprehensive health assessments across diverse populations; Synthesize and translate assessment data using systematic processes to identify health problems and develop comprehensive, person-centered nursing plans that address actual and potential health needs; Demonstrate assessment knowledge by performing comprehensive health histories and applying clinically relevant physical, psychosocial, and functional assessment findings that distinguish normal from abnormal findings, identify health disparities, and inform nursing practice across the adult lifespan and four spheres of care; Describe system-level quality and safety practices that utilize evidence-based assessment protocols and policies that improve patient outcomes across healthcare settings

GNUR 414L Health Assessment Laboratory and Clinical (1 Credit Hour)
This laboratory course provides students with structured, hands-on practice experiences to develop, refine, and demonstrate competence of comprehensive health assessments. Students apply theoretical knowledge and evidence-based assessment techniques through progressive skill development in laboratory, simulation, and clinical practice settings. Students will integrate clinical reasoning skills and professional communication while performing assessments of the individual and family in various healthcare settings, across diverse populations.
Outcomes:
Conduct comprehensive and focused health history interviews that incorporate developmental, cultural, and contextual factors to guide clinical decision making; Perform systematic, comprehensive physical assessments across all body systems, utilizing clinical reasoning to identify normal and abnormal findings; Analyze and synthesize comprehensive assessment data using clinical reasoning to identify patient-centered nursing problems and establish priorities for evidence-based nursing interventions; Communicate comprehensive assessment findings verbally and through written documentation that reflects professional nursing standards, informs interprofessional collaboration, and meets legal/ethical principles

GNUR 416 Nursing Fundamentals (1 Credit Hour)
This course prepares students to demonstrate mastery of fundamental nursing skills that serve as the foundation for safe, effective, evidence-based, and person-centered nursing practice. The course integrates knowledge from nursing science and pathophysiology to develop clinical judgment, technical proficiency, and professional accountability. Students synthesize theoretical knowledge with hands-on skill development to perform fundamental nursing interventions with precision, safety, and cultural responsiveness across diverse populations and healthcare settings.
Outcomes:
Apply theoretical frameworks and evidence-based knowledge to guide clinical reasoning and patient-centered nursing practice across diverse populations and healthcare settings; Analyze the legal, ethical, and regulatory standards that guide professional nursing practice, documentation requirements, interprofessional collaboration, and quality and safety frameworks; Synthesize principles of mathematics and physiological concepts for safe medication management and identify risks in medication administration across the lifespan

GNUR 416L Nursing Fundamentals Lab and Clinical (1 Credit Hour)
This laboratory course provides hands-on practice in lab, simulation, and clinical environments to develop mastery of fundamental nursing skills. Students apply theoretical knowledge from the concurrent theory course to perform essential nursing interventions with technical proficiency, clinical judgment, and professional accountability. Through skills practice, simulation, and competency-based assessments, students synthesize knowledge with psychomotor skill development, emphasizing precision, safety, and cultural responsiveness across diverse populations and healthcare settings.
Outcomes:
Demonstrate competence in performing fundamental nursing skills with safety, clinical judgment, and person-centered care principles; Accurately document procedures and nursing interventions, ensure interprofessional care coordination, and maintain compliance with legal, regulatory, and ethical standards for professional nursing practice; Integrate nursing knowledge and mathematical competencies to ensure safe medication management

GNUR 418 Advanced Pharmacology and Therapeutics (3 Credit Hours)
This course provides the knowledge and skills to pharmacologically manage patients; health conditions in a safe, high-quality, and cost-effective manner. Emphasis is on the development of therapeutic decision-making for evidence-based and efficacious drug selection based on health problems, individual factors influencing drug response, such as genetics, age, body weight, and lifestyle, and economic considerations. The course focuses on safe prescriptive practice, patient education, and monitoring of therapeutic response, or pharmacovigilance, in diverse populations across the lifespan.
Outcomes:
Apply evidence from nursing and related sciences to guide safe, effective, and cost-conscious pharmacologic decision-making; Develop pharmacological treatment plans based on the integration of physiology, pathophysiology, pharmacodynamics, and pharmacokinetics; Manage pharmacologic therapies safely and accurately, incorporating pharmacokinetics, pharmacodynamics, pharmacogenomics, developmental, and patient-specific considerations; Evaluate nonpharmacological and adjunctive interventions that complement pharmacologic care and align with patient-centered goals; Mitigate risks associated with pharmacologic and nonpharmacologic therapies, including adverse events, drug interactions, and social determinants of health; Engage in interprofessional collaborative practice within professional scope and regulatory boundaries

GNUR 419 Pathophysiology for Nursing Practice (3 Credit Hours)
This course builds upon knowledge of anatomy, physiology, and the biological sciences to examine pathophysiologic mechanisms underlying human disease. Students integrate cellular, molecular, and systems-level processes to understand physiological dysfunction, adaptive and maladaptive responses, and disease progression. Students analyze how genomic, environmental, and social determinants influence health outcomes and apply this understanding to support clinical reasoning, evidence-based practice, and professional nursing judgment across diverse populations.
Outcomes:
Evaluate the adaptive and maladaptive responses of body systems to internal and external stressors using systems thinking; Analyze alterations in normal physiological processes to explain the mechanisms underlying disease states; Integrate cellular, molecular, and systems-level concepts to interpret how alterations in structure and function contribute to disease development and clinical manifestations; Examine the influence of genomic, environmental, and social determinants of health on the development and progression of disease; Synthesize pathophysiologic knowledge as a foundation for advanced clinical reasoning, judgment, and professional nursing practice

GNUR 420 Leadership and Roles in Advanced Nursing Practice (3 Credit Hours)
This course focuses on leadership concepts and theories with emphasis on application for transformation in healthcare. This course is designed to assist the student to enter into leadership and advanced nursing practice roles. Special emphasis is placed on the student's personal and professional development as a leader with a clear, individual vision for impacting the health of specific populations.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Synthesize knowledge of the concept of role and its components as they relate to advanced nursing practice; 2) Understand role expectations of advanced nursing practice and its major components: advanced practitioner (NP, CNS, CNM, CRNA), consultant, change agent, case manager, educator, researcher and leader and how they are integrated into health systems; 3) Articulate the role of the graduate prepared nurse as a clinical nurse expert, leader and innovator in healthcare; 4) Analyze knowledge of leadership theories for use as a foundation for role enactment as a leader in healthcare; 5) Understand principles of systems theory and their application to the clinical environment; 6) Compare models for change and sustainability consistent with current healthcare system dynamics; 7) Identify actionable leadership opportunities to improve nursing practice and patient outcomes; 8) Understand the potential for information systems to support decision making and innovation in practice and care delivery systems

GNUR 421 Pharmacology for Nursing Practice (3 Credit Hours)
This course examines the principles of pharmacology essential for safe, evidence-based nursing practice across the lifespan. Students explore pharmacokinetics, pharmacodynamics, pharmacogenomics, and mechanisms of action of major drug classes used in acute, chronic, and population-based care settings. Emphasis is placed on clinical decision-making, medication safety, patient education, health equity, and interprofessional collaboration. Learners apply pharmacologic knowledge to assess therapeutic effectiveness, anticipate adverse effects, prevent medication errors, and support person-centered care for diverse populations.
Outcomes:
Explain core pharmacologic principles, including pharmacokinetics, pharmacodynamics, and pharmacogenomics; Analyze major drug classes in relation to mechanisms of action, therapeutic effects, adverse effects, and contraindications; Examine the impact of patient-specific factors on medication selection and therapeutic response; Evaluate medication safety principles, including causes of medication errors and adverse drug events; Assess ethical, legal, and regulatory considerations related to medication use in nursing practice; Apply pharmacologic knowledge to clinical scenarios to support clinical reasoning and evidence-informed decisions

GNUR 424 Health Promotion Across the Lifespan (3 Credit Hours)
This course provides students with the skills to promote healthy lifestyles across the lifespan to improve the health of individuals and families. Theoretical models are examined to understand health-promotion decision making. Guided by these theories, students design evidence-based health teaching plans and health maintenance schedules across the lifespan. Using a patient-centered approach, structural, cultural, and social determinants of health are explored, with an emphasis on cultural humility, social justice, and patient safety standards and goals.
Outcomes:
Analyze individual and family health behaviors across the lifespan using established health behavior theories; Assess individual and family health risks using screening guidelines, risk assessment tools, and social, structural, and cultural determinants of health; Apply principles of motivational interviewing and therapeutic communication to support health behavior change in individuals and families; Design evidence-based health teaching plans for individuals or families that incorporate cultural humility, patient-centered care, and patient safety standards; Develop age-appropriate health maintenance schedules for individuals or families based on risk assessment findings and evidence-based screening and prevention guidelines; Demonstrate ethical and professional use of technology, social media, and social marketing strategies to promote health across the lifespan

GNUR 425 Advanced Health Assessment Across the LifeSpan (4 Credit Hours)
This course will prepare the graduate-level nursing student to generate a patient health database, including history and physical examination to inform clinical decision making and health promotion, across the lifespan. The course includes lecture and laboratory components.
Outcomes:
Obtain comprehensive and problem-focused health histories including nutritional, cultural, social, functional, and developmental components; Document comprehensive and problem focused health histories; Perform comprehensive and problem-focused physical examinations; Differentiate normal and abnormal physical, behavioral, and developmental findings; Develop a client problem list based on that patient's health history, and physical examination; Plan anticipatory guidance and health promotion based on age, developmental level and cultural background

GNUR 432 Philosophy of Science (3 Credit Hours)
This course addresses the history and philosophy of science and the influence on nursing knowledge and the rapidly evolving nature of nursing science. This course includes the exploration of a diverse range of historical and contemporary influences of epistemological perspectives of the nature of knowledge and patterns and/or processes of knowing. An evolutionary lens is used to examine the history, philosophical foundations, and associated purpose, and methods of science as a foundation for nursing science.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Describe philosophies of science within historical contexts; 2) Discuss how the nature of knowledge relates to philosophy of science; 3) Analyze how different philosophies of science provide a foundation for nursing knowledge development and discovery; 4) Analyze the association between epistemological and philosophy of science foundations that guide scientific methods

GNUR 436 Psychiatric Mental Health Assessment Across the Lifespan (2 Credit Hours)
Pre-requisites: GNUR 425 Advanced Health Assessment Across the Lifespan
This course focuses on the major principles and skills to conduct a psychiatric mental health assessment across the lifespan. Clinical interviewing skills, eliciting important information, and developing a therapeutic rapport with patients and families are foundational knowledge and skills. Students will learn components of the psychiatric evaluation, including psychiatric review of symptoms and mental status examination, and the development of differential diagnoses and diagnostic formulation. Integrating laboratory findings and medical history into the psychiatric evaluation and utilizing evidence-based clinical practice guidelines will be emphasized. This course will also incorporate theories and practice of diversity and inclusion as it relates to the biopsychosocial and cultural understanding of mental illness.
Outcomes:
At the successful completion of the course, students will be able to: 1) Elicit a comprehensive psychiatric health history and mental health assessment; 2) Distinguish assessment features, interviewing techniques, and legal/ethical aspects for children, adolescents, older or cognitively-impaired adults, and other special populations; 3) Integrate medical history and laboratory findings into differential diagnoses and diagnostic formulation; 4) Apply critical thinking skills and diagnostic reasoning with the use of evidence-based clinical practice guidelines across the lifespan; 5) Identify risk and protective factors, vulnerability, and areas of mental health resilience for patients, families, and communities

GNUR 440 Systematic Inquiry I: Scholarly Writing (2 Credit Hours)
This course focuses on types and styles of academic and scholarly writing. Students learn and apply elements of a rhetorical situation in the production of written work. Style and formatting considerations of scholarly writing are integrated into the drafting and revision of various forms of written work. Experiences with editing, peer-evaluation, and self-evaluation are integrated into the course, along with responding to substantive feedback in the revision of written work. Upon successful completion of this course, the student will be able to:
Outcomes:
1) Compare different genres of academic and scholarly writing styles and products; 2) Apply elements of style and grammar to scholarly writing; 3) Integrate components of a rhetorical situation into logical, focused, and coherent written works; 4) Engage in self and peer critique of written work; 5) Respond to substantive critiques of written work

GNUR 442 Advanced Physiology/Pathophysiology (3 Credit Hours)
This course presents contemporary principles of physiology that underlie the normal function of the human body and serve as a basis for clinical practice in a variety of settings. The content is taught within the context of key molecular processes, cellular and organ system function, and interactions among organ systems. Select clinical cases and exemplars are used to illustrate physiologic concepts and to facilitate the application of physiologic principles to understand the body's homeostatic processes in health and disease. Emphasis is on normal physiology but approaches are used to bridge physiological science with clinical application to common clinical disorders. The educational experience consists of three hours of classroom or on-line instruction per week, independent readings, case analyses, web-based applications, and classroom and/or course platform-supported discussion.
Outcomes:
Explain the physiologic processes that underlie the normal function of the human body; Achieve an understanding of the dynamic interactions of organs and organ systems that promote homeostasis; Interpret and analyze physiologic data within the context of select clinical disorders; Apply the principles of physiology to the understanding of the body's response to threats to homeostasis; Appreciate physiological research aimed at health promotion and the prevention and management of disease

GNUR 443 Psychiatric Mental Health NP Practicum I: Foundational Skills (3 Credit Hours)
This practicum introduces students to foundational skills in psychiatric mental health advanced practice nursing, emphasizing patient-centered care. Students apply basic diagnostic reasoning, screening, interviewing techniques, and management strategies for common behavioral health conditions.
Outcomes:
Demonstrate professionalism in interactions with patients/families and the healthcare team, reflecting ethical standards and respect for patient autonomy; Perform a basic psychiatric mental health history and assessment; Formulate differential diagnoses and basic management plans for common psychiatric mental health problems based on patient data and evidence-based guidelines; Demonstrate therapeutic communication skills in interactions with patients from diverse backgrounds; Collaborate with patients, faculty, preceptors, and other healthcare providers to initiate basic diagnostic and therapeutic interventions; Assess the impact of acute and chronic medical problems on psychiatric assessment, diagnosis, and treatment

GNUR 444 Psychiatric Mental Health NP Practicum II: Expanding Clinical Reasoning (3 Credit Hours)
Building upon foundational skills and competencies, this practicum focuses on advancing clinical reasoning and expanding diagnostic and management capabilities of psychiatric mental health patients across the lifespan. Students will refine their management skills and begin caring for patients with increasingly complex psychiatric mental healthcare needs. Students will continue incorporating health promotion strategies while integrating evidence-based practice.
Outcomes:
Conduct and document an advanced psychiatric history and mental health assessment with consideration for level of care and treatment setting; Justify clinical decision-making in the formulation of differential diagnoses; Implement evidence-based therapeutic plans for common and complex psychiatric mental health conditions, considering patient preferences, socio-economic, and cultural contexts; Engage in shared decision-making with patients and caregivers to promote health, self-care management, and health literacy; Coordinate psychiatric mental health care for children, adolescents, adults, and older adults with consideration to legal, ethical, and social aspects to care

GNUR 445 PMHNP Practicum III: Advanced Clinical Management and Leadership (3 Credit Hours)
This practicum emphasizes the advanced management of common and complex psychiatric mental health patients across the lifespan. Students refine their clinical judgment while developing leadership skills in interprofessional collaboration and psychiatric mental health patient care coordination across the lifespan.
Outcomes:
Manage increasingly complex patient care through comprehensive assessment and evidence-based interventions; Optimize patient care as part of an interprofessional team, demonstrating leadership and accountability in psychiatric mental health care settings; Address healthcare disparities to promote equitable outcomes; Manage challenging patient interactions and ethical dilemmas; Incorporate health and psychosocial risk factors into patient treatment plans; Apply principles of self-empowerment and efficacy for behavior change; Prescribe appropriate psychopharmacologic medications

GNUR 446 PMHNP Practicum IV: Transition to Practice (3 Credit Hours)
This practicum prepares students for independent psychiatric mental health advanced practice nursing. The course emphasis is on full integration of clinical skills, decision-making, and professional roles to prepare competent, independent practitioners who are practice ready.
Outcomes:
Provide independent, comprehensive care that integrates diagnostic reasoning, evidence-based practice, and clinical judgment in managing patients with complex psychiatric mental health diagnoses; Lead interprofessional teams to enhance patient safety, quality, and care outcomes; Utilize health information technologies to improve patient care and outcomes; Reflect on practice experiences to identify areas for continued professional development and lifelong learning as a nurse practitioner; Uphold ethical principles in psychiatric mental health practice, including patient autonomy, confidentiality, collaboration, and informed consent; Facilitate shared decision-making opportunities appropriate to the individual and family members' culture, resources, and health literacy; Integrate mental health promotion and relapse prevention for patients and families; Lead individual and group therapy

GNUR 447 AG Acute Care Nurse Practitioner Practicum I: Foundational Skills (3 Credit Hours)
This practicum introduces students to foundational skills in adult gerontology acute care advanced practice nursing. Students develop competency in patient assessment and are introduced to basic diagnostic reasoning and management strategies for episodic, critical, and complex illness and injury, as well as chronic disease exacerbations from middle adolescence through the adult lifespan.
Outcomes:
Demonstrate professionalism in interactions with patients and the healthcare team; Perform and document clinically relevant focused or comprehensive patient history and physical assessment, including health promotion and disease and injury prevention; Formulate differential diagnoses and basic management plans for episodic, critical, and complex illness and injury as well as chronic disease exacerbations based on patient data and evidence-based guidelines; Communicate effectively to build trust and rapport with patients from diverse backgrounds; Collaborate with patients, faculty, preceptors, and other healthcare providers to initiate basic diagnostic and therapeutic interventions

GNUR 448 AG Acute Care NP Practicum II: Expanding Clinical Reasoning (3 Credit Hours)
Building upon foundational skills and competencies, this practicum focuses on advancing clinical reasoning and expanding diagnostic and management capabilities for middle adolescent, adult, and older adult acute care patients. Students will advance clinical reasoning and expand diagnostic and management skills for patients with increasingly complex episodic, critical, and complex illness and injury, as well as chronic disease exacerbations.
Outcomes:
Justify clinical decision-making in the formulation of differential diagnoses for patients with episodic, critical, and complex illness and injury, as well as chronic disease exacerbations; Implement evidence-based therapeutic plans considering patient preferences, socio-economic, and cultural contexts; Order diagnostic tests aligned with patient presentations; Engage in shared decision-making with patients and caregivers to address risk behavior and promote self-care management, and health literacy; Apply principles of patient care coordination and transitions of care; Manage patients requiring emergent care, consultation, or referral

GNUR 449 AG Acute Care NP Practicum III: Advanced Clinical Management and Leadership (3 Credit Hours)
This practicum emphasizes the advanced management of episodic, critical, and complex illness, injuries, and chronic disease exacerbations from middle adolescence through the adult lifespan. Students refine clinical judgment with emphasis on advancing leadership abilities in interprofessional collaboration and coordinating patient-centered care in high-acuity settings.
Outcomes:
Demonstrate advancing independence in the management of complex patient care; Effectively participate in interprofessional healthcare teams to coordinate and optimize patient care, demonstrating leadership and accountability in acute care settings; Advance integration of the social determinants of health into management plans to address healthcare disparities and promote equitable outcomes middle adolescents through the adult lifespan; Manage difficult patient interactions and ethical dilemmas; Manage patient transitions between care settings, ensuring continuity, and minimizing risks during transfers; Integrate ethical principles into care, including end-of-life decision-making and palliative care

GNUR 451 Psychopharmacology Across the Lifespan (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course focuses on the development of psychopharmacologic knowledge, critical thinking, and clinical judgment in the application of psychotropic medications to treat and manage psychiatric mental health conditions across the lifespan. Emphasis is on the neurobiological underpinning of psychopathology, pharmacodynamics, and pharmacokinetics of psychotropic medications. Students will learn the general principles of psychopharmacologic treatment, major psychotropic drug classes, and the ethical, legal, and professional guidelines for prescribing as an advanced practice nurse.
Outcomes:
At the successful completion of the course, students will be able to: 1) Understand the neurobiological processes related to the psychopharmacological treatment of psychiatric mental health disorders across the lifespan; 2) Differentiate between the major classes of psychopharmacologic medications in terms of pharmacokinetics, pharmacogenomics, pharmacotherapeutic value, and pharmacodynamics; 3) Apply critical thinking and clinical judgment when selecting appropriate psychotropic medications for patients, including: indication for use, diagnostic reasoning, medication and family history, dosing regimens, side effects, drug interactions, contraindications, and therapeutic drug monitoring; 4) Distinguish the management of psychotropic medications across the developmental lifespan, including children, adolescents, adults and older adults, and for patients with psychiatric comorbidities, substance use disorders, and other acute or chronic medical illnesses; 5) Evaluate therapeutic outcomes of psychopharmacological intervention using evidence-based prescribing guidelines, standard monitoring methodologies, psychological tools sensitive to medication changes, and other recommended laboratory testing; 6) Understand the legal, ethical, socio-cultural, and economic considerations when prescribing psychotropic medications across the lifespan

GNUR 452 AG Acute Care NP Practicum IV: Transition to Practice (3 Credit Hours)
This practicum prepares students for independent acute care practice for adolescents, adults, and older adults. The emphasis is on full integration of clinical skills, decision-making, and professional roles to prepare competent, independent practitioners who are practice ready.
Outcomes:
Provide independent, comprehensive care for complex acute, critical, and chronically ill adult and older adult patients to manage physiologic instability and risk for potential life-threatening conditions; Demonstrate full integration of diagnostic reasoning, evidence-based practice, and clinical judgment in managing complex patient care; Lead interprofessional teams to enhance patient safety, quality, and care outcomes in acute care settings; Utilize health information technologies to improve patient care and outcomes; Reflect on practice experiences to identify areas for continued professional development and lifelong learning as a nurse practitioner

GNUR 453 Social Justice and Ethics in Professional Nursing Practice (2 Credit Hours)
This course focuses on ethics, social justice, and advocacy in the professional nursing role. Frameworks and approaches to ethics, social justice, and advocacy are presented through the perspective of professional nursing practice, professional nursing identity, and responsible citizenship in promoting health and health equity. Strategies to promote self-advocacy skills in individuals and groups are integrated into the course.
Outcomes:
Compare advocacy strategies in advancing social justice, inclusivity, and health equity; Compare ethical frameworks for decision making in professional nursing practice; Understand health-related social justice and health-related ethical issues at the local, regional, national, and global levels; Integrate ethical standards and professional values and guidelines into mission-centered professional nursing practice

GNUR 454 Policy, Advocacy, and Care Coordination (2 Credit Hours)
This course prepares master's entry nursing students to lead and advocate for equitable, coordinated, and patient-centered care within complex healthcare systems. Students explore the nurse's role in care transitions, interprofessional collaboration, and systems-based practice. Emphasis is placed on health policy, population health, and strategies for influencing change through advocacy, leadership, and ethical decision-making to improve health outcomes at the individual, community, and systems levels.
Outcomes:
Apply knowledge of systems and policies to design coordinated care plans that promote safe and equitable outcomes; Integrate principles of team science and leadership to improve care coordination and transitions; Analyze the impact of health policy and financing on care delivery, access, and health equity; Advocate for individuals, families, and populations to influence policy and promote social justice in healthcare; Examine leadership behaviors to advance policy development, ethical practice, and accountability in complex health systems

GNUR 455 Scholarly Writing (1 Credit Hour)
This course provides the opportunity for graduate students to further develop their scholarly writing skills. Research tools, publication ethics, literature reviews, academic writing, scientific research reports, submission strategies and etiquette, and alternative disciplinary genres will be explored.
Outcomes:
Develop individual strategies for reading, generating, revising, editing, and proofreading scholarly writing; Recognize, discuss, and demonstrate dynamics of effective literature reviews, scientific research reports and proposals

GNUR 456 Psychotherapeutics Individuals Groups Families (3 Credit Hours)
Pre-requisites: Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course focuses on the theoretical underpinnings and professional practice of integrating and evaluating psychotherapeutic modalities into advanced practice psychiatric nursing care with individuals, groups, and families. Using the principles of psychotherapy, students will learn the skills to develop strong therapeutic relationships to enhance mental health treatment, strengthen mental health resilience, and improve psychiatric outcomes. Emphasis will be on patient and family-centered care, which integrates socio-cultural perspectives of mental health and illness, treatment preferences, ethics and values, and legal or economic considerations.
Outcomes:
At the successful completion of the course, students will be able to: 1) Synthesize theories, ideological approaches, and methods for psychotherapeutic intervention as a basis for individual, family, and group therapy; 2) Understand how psychotherapeutic modalities, such as cognitive-behavioral, humanistic, and integrative-holistic therapies, are recommended based on age and developmental level, psychiatric condition, evidence-based practice, and patient-family preferences; 3) Apply clinical judgment, critical thinking, and decision making when integrating principles and techniques of psychotherapy into care; 4) Assess socio-cultural and spiritual perspectives of individuals, groups, and families and incorporate values into care; 5) Evaluate psychotherapeutic approach based on patient or family response, research and practice evidence, and changes in health policy; 6) Integrate legal, ethical, economic, and professional standards to the practice of psychotherapy

GNUR 471 Palliative Care (2 Credit Hours)
This course is designed to provide the student with an overview of the philosophy and principles of palliative care; the course emphasizes the unique knowledge that describes, explains, and guides the provision of hospice and palliative care. Students consider a holistic approach to care, including state-of-the-art nursing interventions that provide effective pain and symptom management and promote psychosocial and spiritual well-being. Students are prepared to serve diverse client populations whose diseases are life-threatening, and to perform effectively as members of an interdisciplinary team providing palliative care.

GNUR 472 Psychiatric Mental Health Advanced Practice Across Lifespan I (3 Credit Hours)

Pre-requisites: GNUR 436 Psychiatric Mental Health Assessment Across the Lifespan

This course focuses on the neuroscientific understanding of psychiatric mental health disorders, which includes current evidence in genetics, biochemistry, neuropsychiatry, and behavioral neurology. Students will learn the DSM-5 classification for mental disorders, including etiology, development and course, risk and prognostic factors, diagnostic criteria, differential diagnoses, and cultural considerations. Major categories of mental disorders examined in this course are: psychosis and schizophrenia, depression and other mood disorders, anxiety disorders, trauma and stressor-related disorders, attention-deficit hyperactivity disorder, and substance use disorders. Evidence-based treatment recommendations for psychiatric disorders will be addressed across the developmental lifespan and expanded within psychopharmacology and psychotherapeutic modalities courses. Socio-cultural and ethical implications of the psychiatric mental health diagnosis also will be discussed.

Outcomes:

At the successful completion of the course, students will be able to: Synthesize neuroscientific evidence for the assessment, diagnosis and treatment of children, adolescents, adults, and older adults with psychiatric mental health disorders; Explain psychiatric mental health diagnoses with an understanding of current brain and behavioral research which emphasizes neurotransmitters, neural circuitry and brain regions, psychiatric symptomology, human behavior, and neuroplasticity; Apply critical thinking, diagnostic reasoning, and clinical judgment to the assessment, diagnosis, treatment, and evaluation of psychiatric mental health disorders across the lifespan; Implement the use of psychological tools and rating scales to strengthen diagnostic certainty, collect subjective and objective data, measure progress, and evaluate treatment outcomes; Examine the socio-cultural and ethical implications associated with the psychiatric mental health diagnosis

GNUR 473 Leadership in Nursing Practice (3 Credit Hours)

This course focuses on leadership concepts and theories, with an emphasis on application for transformation in healthcare. Students will explore contemporary and historical leadership theories, organizational dynamics, change management strategies, and quality improvement methodologies essential for effective nursing leadership. This course prepares nurses to navigate regulatory, financial, legal, ethical, and technological influences that influence healthcare and policies. This prepares nurses to lead interprofessional teams, influence health policy, and drive innovations that promote health equity and social justice.

Outcomes:

Utilize principles of leadership and management concepts and theories to analyze organizational structures, cultures, and processes that impact healthcare delivery and patient outcomes; Apply leadership concepts and strategies to develop personal leadership style that promotes safety, fosters interprofessional teamwork, and promotes solutions to the challenges in healthcare environments; Apply evidence-based change management theories to lead organizational change that improves care quality and patient safety; Analyze health and regulatory policy at organizational, local, state, and national levels to advocate for policy changes that address challenges in the healthcare system; Evaluate quality improvement initiatives that support evidence-based practice and drive measurable improvements in healthcare outcomes; Apply communication strategies to lead interprofessional teams, facilitate collaboration, and promote high-quality, person-centered care across healthcare settings

GNUR 474 Psychiatric Mental Health Advanced Practice Across Lifespan II (3 Credit Hours)

Pre-requisites: GNUR 472 Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I

This course builds on the knowledge base, diagnostic reasoning, and critical thinking competencies developed in Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I. This course continues the neuroscientific understanding of psychiatric mental health disorders and DSM-5 classification - for additional categories of illness, including autism and other neurodevelopmental disorders, eating disorders, dementia and delirium, sleep disorders, suicidality, and personality disorders. Evidence-based treatment recommendations for psychiatric disorders will be addressed across the lifespan and expanded within psychopharmacology and psychotherapeutic modalities courses. In addition, emphasis on the bio-social-cultural understanding of mental health and illness will continue to be explored with special consideration to vulnerable groups.

Outcomes:

At the successful completion of the course, students will be able to: 1) Synthesize neuroscientific evidence on the assessment, diagnosis and treatment of children, adolescents, adults, and older adults with psychiatric mental health disorders; 2) Explain psychiatric mental health diagnoses with an understanding of current brain and behavioral research which emphasizes neurotransmitters, neural circuitry and brain regions, psychiatric symptomology, human behavior, and neuroplasticity; 3) Apply critical thinking, diagnostic reasoning, and clinical judgment into the assessment, diagnosis, treatment, and evaluation of psychiatric mental health disorders across the lifespan; 4) Develop treatment recommendations and care plans that incorporate the perspectives, cultures, and values of patients and families with consideration to safety, environmental context, and professional ethics; 5) Explain the complex socio-cultural, ethical, political, and economic context for psychiatric diagnosis, mental health care, and mental health policy within the US; 6) Examine the impact of policy changes and advocacy efforts for special or vulnerable populations within psychiatric mental health care and treatment

GNUR 475 Quality and Safety in Professional Nursing Practice (3 Credit Hours)

This course focuses on quality and safety as interdependent concepts. Quality and safety from the provider and recipient of care perspectives are emphasized, along with organizational and societal factors that contribute to a culture of safety and quality. The professional nurse role in improving quality and safety individually, and within the intraprofessional and interprofessional care teams is a focus of this course.

Outcomes:

Analyze common and distinct attributes and indicators of quality, safety, and cultures of quality and safety; Compare provider, organizational, and societal factors that influence quality and safety; Implement strategies to improve patient care outcomes at the individual, group, and community levels; Compare models and processes of quality, safety, quality improvement, and process improvement; Analyze the nursing role in improving healthcare quality and safety through individual, intraprofessional, and interprofessional actions

GNUR 476 Basic Diagnostics for Advanced Practice (2 Credit Hours)
Pre-requisites: Advanced Health Assessment, Advanced Pathophysiology, Advanced Pharmacology
The focus of this course is on clinical decision making for selecting and interpreting diagnostic tests. Students will use evidence to appropriately gather, interpret, and manage objective diagnostic clinical data to manage various health problems across the lifespan.
Outcomes:
1) Select appropriate diagnostic tests for conditions commonly seen by advanced practice nurses; 2) Evaluate diagnostic tests selection, based on health assessment data, clinical signs and symptoms, cost, risk/benefit analysis; 3) Interpret diagnostic test results for clinical decision making

GNUR 477 Professional Nursing: Identity, Values, and Practice (2 Credit Hours)
This course introduces nursing students to professional identity formation and the foundational competencies needed for safe, ethical, and high-quality nursing practice. Students examine legal, regulatory, and professional standards while developing skills in communication, ethical decision-making, teamwork, accountability, scope of practice, and self-care. Grounded in Jesuit values of cura personalis, magis, reflection, and intentionality, learning activities include case-based analysis, guided reflection, and discussion of real-world professional scenarios. By the end of the course, students will be able to analyze professional nursing standards, integrate Jesuit values into practice, and apply effective communication, decision-making, and self-care strategies to navigate complex professional situations and sustain professional integrity and well-being.
Outcomes:
Evaluate professional nursing standards, ethical codes, and legal and regulatory frameworks to support evidence-based decision-making, accountability, and advocacy for equitable care; Integrate Jesuit values and professional nursing standards to support therapeutic communication, cultural humility, effective teamwork, and professional identity development; Create evidence-based strategies for professional resilience, self-care, and lifelong learning that prevent burnout and support ongoing professional engagement and advocacy; Synthesize values, ethics, knowledge, and professional comportment to develop a professional nursing identity that guides decision-making, relationships, and advocacy across care settings

GNUR 480 Professional Role Development for Nursing (3 Credit Hours)
This clinical immersion experience facilitates the integration of nursing knowledge, clinical reasoning, leadership, and professional role behaviors as students transition into the role of the professional registered nurse. Working in partnership with a preceptor and under faculty supervision, students synthesize concepts from biological, behavioral, and clinical sciences to design, deliver, and evaluate evidence-based, equitable, and person-centered care. Students engage in interprofessional practice, emphasizing clinical judgment, quality improvement, and leadership for health equity. Reflection is used to advance professional identity, ethical comportment, and accountability for outcomes across levels of care.
Outcomes:
Integrate professional standards, evidence, and ethical principles to design, deliver, and evaluate person-centered, equitable, and safe nursing care; Integrate safety culture, quality improvement, and evidence-based principles to evaluate and enhance clinical decision-making, care delivery, and system processes that promote safe, effective, and equitable patient outcomes; Apply leadership and management principles to coordinate, prioritize, and delegate nursing care that ensures safe, effective, and person-centered outcomes; Collaborate with patients, families, and interprofessional teams using effective communication, shared decision-making, and technology to improve quality, safety, and equity in care outcomes; Exemplify accountability, professionalism, and reflective practice consistent with the values and responsibilities of the registered nurse role; Analyze the impact of social, structural, and environmental determinants of health on patient and population outcomes to promote health equity and justice

GNUR 482 Psychiatric Mental Health Advanced Practice Nursing Practicum (3 Credit Hours)
Pre-requisites: GNUR 472
The practicum course guides the development and transition of students to the advanced practice psychiatric nurse practitioner role. Synthesizing knowledge and experience gained from previous courses, the practicum helps students advance their proficiency and skills in caring for patients with acute, chronic, and complex psychiatric mental health problems. With understanding of various psychiatric mental health settings and levels of care, students in the practicum experience will apply their knowledge and synthesis of content with patients, families, and communities across the lifespan. Emphasis will be on the assessment, diagnosis, treatment, and care coordination of psychiatric mental health disorders. Students are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent within their population and specialty practice.
Outcomes:
At the successful completion of the course, students will be able to: 1) Elicit and document a comprehensive psychiatric history and mental health assessment with consideration for level of care and treatment setting; 2) Generate differential diagnoses, problem list, and diagnostic formulation after synthesizing and evaluating objective and subjective data from patients, families, and other informants; 3) Develop an evidence-based treatment plan based on psychiatric diagnosis and presentation, knowledge of psychopharmacology and psychotherapeutic approaches, respect for persons, and consideration to special or vulnerable groups; 4) Apply critical thinking, clinical judgment, and decision making when implementing treatment recommendations and evaluating strategies within mental health care plans; 5) Understand the importance of coordinated care for children, adolescents, adults, and older adults with consideration to legal, ethical, and social aspects to care; 6) Implement preventive psychiatric mental health care for populations across the lifespan, which includes health and wellness programs, mental health screening, psychoeducation, counseling and therapeutic services, and integrative and holistic approaches

GNUR 487 Primary Care Nurse Practitioner Practicum I: Foundational Skills (3 Credit Hours)
Co-requisites: GNUR 526 or GNUR 528
This practicum introduces students to foundational skills and competencies in advanced practice nursing in primary care, emphasizing patient-centered care and health promotion. Students apply basic diagnostic reasoning and management strategies for common primary care conditions.
Outcomes:
Demonstrate professionalism in interactions with patients and the healthcare team; Perform clinically relevant focused or comprehensive patient history and physical assessment; Formulate differential diagnoses and basic management plans for common health problems based on patient data and evidence-based guidelines; Communicate effectively to build trust and rapport with patients from diverse backgrounds; Collaborate with patients, faculty, preceptors, and other healthcare providers to initiate basic diagnostic and therapeutic interventions; Screen for health risks and health promotion/disease prevention needs, based on age and risk factors

GNUR 488 Family Nurse Practitioner Practicum II: Expanding Clinical Reasoning (3 Credit Hours)
Co-requisites: MCN 401 and MCN 414
Building upon foundational skills and competencies, this practicum focuses on advancing clinical reasoning and expanding diagnostic and management capabilities of primary care patients across the lifespan. Students will refine management of common health conditions and collaborate to begin caring for patients with increasingly complex healthcare needs. Students will continue incorporating health promotion and disease prevention strategies while integrating evidence-based practice.
Outcomes:
Justify clinical decision-making in the formulation of differential diagnoses; Implement evidence-based therapeutic plans for primary care conditions, considering patient preferences, socio-economic, and cultural contexts; Order diagnostic tests aligned with patient presentations; Engage in shared decision-making with patients and families to promote health, self-care management, and health literacy; Apply principles of patient care coordination and referral for continuity of care across the healthcare continuum; Implement interventions to promote health with at-risk families

GNUR 489 FNP Practicum III: Advanced Clinical Management and Leadership (3 Credit Hours)
This practicum emphasizes the advanced management of common and complex primary care patients across the lifespan. Students refine clinical judgment in managing chronic illnesses, multiple comorbidities, and preventative care while developing leadership skills in interprofessional collaboration and patient care coordination.
Outcomes:
Manage increasingly complex patient care, through comprehensive assessment and evidence-based interventions; Optimize patient care as part of an interprofessional team, demonstrating leadership and accountability in primary care settings; Address healthcare disparities to promote equitable outcomes; Apply current evidence-based guidelines to clinical cases; Manage difficult patient interactions and ethical dilemmas; Prescribe medications for special populations (infants, children, pregnant/lactating women, older adults)

GNUR 490 FNP Practicum IV: Transition to Practice (3 Credit Hours)
This practicum prepares students for independent primary care practice across the lifespan. The course emphasis is on full integration of clinical skills, decision-making, and professional roles in order to prepare competent, independent practitioners who are practice-ready.
Outcomes:
Provide independent, comprehensive care for diverse populations across the lifespan, managing acute, chronic, and preventative care needs; Integrate diagnostic reasoning, evidence-based practice, and clinical judgment in managing complex patient care; Lead interprofessional teams to enhance patient safety, quality, and care outcomes in primary care settings; Utilize health information technologies to improve patient care and outcomes; Reflect on practice experiences to identify areas for continued professional development and lifelong learning as a nurse practitioner; Facilitate family decision-making

GNUR 491 AGPC-NP Practicum II: Expanding Clinical Reasoning (3 Credit Hours)
Building upon foundational skills and competencies, this practicum focuses on advancing clinical reasoning and expanding diagnostic and management capabilities of adolescent, adult, and older adult primary care patients. Students will refine management of common health conditions and begin caring for patients with increasingly complex healthcare needs. Students will continue incorporating health promotion and disease prevention strategies while integrating evidence-based practice.
Outcomes:
Justify clinical decision-making in the formulation of differential diagnoses; Implement evidence-based therapeutic plans for primary care conditions, considering patient preferences, socio-economic, and cultural contexts; Order diagnostic tests aligned with patient presentations; Engage in shared decision-making with patients and caregivers to promote health, self-care management, and health literacy; Apply principles of patient care coordination and referral for continuity of care across the healthcare continuum; Implement interventions to reduce risk factors for diverse and vulnerable populations from middle adolescents to frail older adults

GNUR 492 AGPC-NP Practicum III Advanced Clinical Management and Leadership (3 Credit Hours)
This practicum emphasizes the advanced management of common and complex adolescent, adult, and older adult primary care patients. Students refine clinical judgment in managing chronic illnesses, multiple comorbidities, and preventative care while developing leadership skills in interprofessional collaboration and patient care coordination.
Outcomes:
Manage complex patient care, through comprehensive assessment and evidence-based interventions; Optimize patient care as part of an interprofessional team, demonstrating leadership and accountability in primary care settings; Address healthcare disparities to promote equitable outcomes; Apply current evidence-based guidelines to common and complex clinical cases; Manage difficult patient interactions and ethical dilemmas; Manage medications for the older adult population, incorporating polypharmacy and deprescribing principles

GNUR 493 AGPC-NP Practicum IV: Transition to Practice (3 Credit Hours)
This practicum prepares students for independent primary care practice for adolescents, adults, and older adults. The emphasis is on full integration of clinical skills, decision-making, and professional roles in order to prepare competent, independent practitioners who are practice-ready.
Outcomes:
Provide independent, comprehensive care for diverse populations, managing acute, chronic, and preventative care needs; Integrate diagnostic reasoning, evidence-based practice, and clinical judgment in managing complex patient care; Lead interprofessional teams to enhance patient safety, quality, and care outcomes in primary care settings; Utilize health information technologies to improve patient care and outcomes; Reflect on practice experiences to identify areas for continued professional development and lifelong learning as a nurse practitioner; Manage geriatric syndromes

GNUR 494 WHNP Practicum II: Expanding Clinical Reasoning (3 Credit Hours)
Building upon foundational skills and competencies, this practicum focuses on advancing clinical reasoning and expanding diagnostic and management capabilities of Women's Health primary care and gender related care for patients from puberty across the adult lifespan. Students will refine management of common health conditions and collaborate to begin caring for patients with increasingly complex healthcare needs. Students will continue incorporating health promotion and disease prevention strategies while integrating evidence-based practice.
Outcomes:
Justify clinical decision-making in the formulation of differential diagnoses; Implement evidence-based therapeutic plans for primary care conditions, considering patient preferences, socio-economic, and cultural contexts; Order diagnostic tests aligned with patient presentations; Engage in shared decision-making with patients and families to promote health, self-care management, and health literacy; Apply principles of patient care coordination and referral for continuity of care across the healthcare continuum; Screen for risk factors that may affect reproductive, pregnancy, and/or sexual health status and outcomes; Perform an age appropriate, comprehensive gynecologic, sexual, reproductive, and menopausal health history and physical examination

GNUR 495 WHNP Clinical Practicum III: Advanced Clinical Management and Leadership (3 Credit Hours)
This practicum emphasizes the advanced management of common and complex Women's Health primary care patients inclusive of all gender identities, including transgender and non-binary individuals. Students refine clinical judgment in managing chronic illnesses, multiple comorbidities, and preventative care while developing leadership skills in interprofessional collaboration and patient care coordination for puberty through the adult lifespan.
Outcomes:
Manage increasingly complex patient care through comprehensive assessment and evidence-based interventions; Optimize patient care as part of an interprofessional team, demonstrating leadership and accountability in primary care settings; Address healthcare disparities to promote equitable outcomes; Apply current evidence-based guidelines to clinical cases; Manage difficult patient interactions and ethical dilemmas; Participate in care collaboration for people with complex reproductive and sexual healthcare needs

GNUR 496 WHNP Practicum IV: Transition to Practice (3 Credit Hours)
This practicum prepares students for independent Women's Health/ Gender Related primary care practice from puberty across the adult lifespan. The emphasis is on full integration of clinical skills, decision-making, and professional roles.
Outcomes:
Demonstrate professionalism in interactions with patients and the healthcare team; Perform and document clinically relevant focused or comprehensive patient history and physical assessment, including health promotion and disease and injury prevention; Formulate differential diagnoses and basic management plans for episodic, critical, and complex illness and injury as well as chronic disease exacerbations based on patient data and evidence-based guidelines; Communicate effectively to build trust and rapport with patients from diverse backgrounds; Collaborate with patients, faculty, preceptors, and other healthcare providers to initiate basic diagnostic and therapeutic interventions

GNUR 498 Independent Study (1-6 Credit Hours)
Directed study in a specific topic area under the supervision of a faculty member.

GNUR 499 Interprofessional Team Practicum (1-7 Credit Hours)
Consent of discipline Program Director in collaboration with course faculty is required for registration. This course provides opportunities to students with backgrounds in a variety of clinical disciplines to engage in interprofessional team projects in healthcare settings and health and human service organizations, and to develop interprofessional competencies and project management skills.
Outcomes:
Apply knowledge of selected concepts, models, and theories from the clinical and management sciences to the management of high performing teams; apply evidence based/research findings for a selected problem/project; and examine the leader role within an interprofessional team environment

GNUR 500 Phenomena and Theories for Nursing Science I (2 Credit Hours)
This course emphasizes methods to analyze and develop knowledge of a phenomenon that is relevant to nursing science. Traditional and advanced methods of concept analysis and development are explored and critiqued for the advancement of nursing knowledge and nursing science. Fieldwork experiences for developing and refining a phenomenon of interest are included in the course.
Outcomes:
Upon successful completion of the course, the student is able to: 1) Evaluate existing and emerging concept development and analysis methods in developing substantive knowledge of a phenomenon; 2) Differentiate between disciplinary and professional knowledge of a phenomenon of interest; 3) Analyze the theoretical-conceptual-empirical structure of a phenomenon; 4) Compare extant and sensitizing conceptualizations of phenomenon

GNUR 501 Phenomena and Theories for Nursing Science II (2 Credit Hours)
This course is focused on the role of theory in the development of nursing knowledge. Emphasis is placed on strategies for theory development and evaluation in the generation and advancement of nursing science. Levels of theory on a continuum spanning grand theory to middle range theory are examined for utility in nursing science. The relation between theory and the substantive structure of nursing is examined.
Outcomes:
Upon successful completion to this course, the student is able to: 1) Relate the domain and perspective of the substantive structure of nursing to nursing theory and nursing science; 2) Analyze levels of theory, nursing theory, and theory development; 3) Apply theory analysis, theory synthesis, and theory derivation strategies; 4) Evaluate the logical and conceptual structure of theory and nursing theory

GNUR 504 Emergency and Acute Care Procedures for the NP (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to provide the nurse practitioner student with the knowledge and skills necessary to affect patient care outcomes in emergency settings. This course will incorporate procedural skills necessary to meet clinical competencies of the emergency nurse practitioner. Diagnostic and therapeutic procedures used in the evaluation and management of patients with emergent conditions will be incorporated.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Recognize the importance of patient education and informed consent prior to performing procedures; 2) Synthesize knowledge of anatomy, pathophysiology and procedural methods for select interventions; 3) Incorporate understanding of indications, contraindications, and anticipated outcomes in clinical decision-making related to select procedures; 4) Demonstrate beginning skills in the execution of select diagnostic and therapeutic procedures in a procedural lab

GNUR 508 The Nurse Scientist Role (2 Credit Hours)
This course addresses the responsibilities and activities of a nurse scientist including the responsible conduct of research and ethical practice; scientific freedom and social responsibility; collaboration and negotiation; and the peer review process. The development of a program of research and research career trajectory including research funding and dissemination of research are examined. Students will identify traditional and emerging settings for the nurse scientist. The course explores knowledge and skills required to successfully work in teams within the local and global scientific community. The role expectation of the nurse scientist related to intra-professional and interprofessional research and mentorship are examined.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Analyze the qualifications, attributes, professional values, and ethics of a nurse scientist; 2) Identify career trajectory options of a nurse scientist; 3) Analyze stewardship of the nursing discipline within intra- and interprofessional teams

GNUR 509 Teaching Methods (3 Credit Hours)
This course focuses on teaching and learning theories, principles, and practices in nursing education. Major topic areas include philosophies and theories of teaching and learning, teaching and learning processes and resources, curricular and program designs and frameworks, competency development and assessment, evaluation and measurements strategies, the faculty role, and regulatory issues.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain philosophies, theories and principles of teaching and learning; 2) Evaluate curricular design and implementation; 3) Analyze evaluation and measurement strategies in nursing education; 4) Discuss expectations of the faculty role; 5) Articulate the relationship among educational setting, teaching methods, and learner outcomes; 6) Evaluate education and nursing education research literature for implementation in practice

GNUR 510 Teaching Practicum (3 Credit Hours)
This practicum course provides students with a context for applying the concepts of teaching and learning in nursing education. Students will experience various dimensions of the teaching role and design, deliver and evaluate teaching/learning strategies. The practicum consists of supervised experiences with assigned faculty mentor(s) in varied teaching/learning environments.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Assess the learning needs and learning styles of learners; 2) Apply effective teaching in a selected area of nursing; 3) Apply principles of evaluation in formative and summative evaluations of the learners

GNUR 512 Quantitative Methods & Design for Nursing Research (3 Credit Hours)
This course focuses on quantitative research methods and designs for nursing research. The linkages between theory, concepts, research design, instrumentation, sampling, data collection and analysis, and reporting are emphasized. Ethical concerns related to the research process are discussed and analyzed. Students will gain practical experiences in quantitative research methods.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Evaluate and synthesize quantitative research studies and identify gaps for future quantitative research; 2) Identify theoretical or conceptual frameworks that guide research; 3) Develop research aims to address gaps in knowledge; 4) Understand conceptual-operational linkages in quantitative nursing research; 5) Assess the adequacy of quantitative designs in answering research questions; 6) Identify ethical concerns of quantitative research and the protection of human subjects; 7) Apply knowledge and skills related to conducting a quantitative research study

GNUR 513 Qualitative Methods in Nursing Research (3 Credit Hours)
This course focuses on exploration of qualitative research approaches including grounded theory, ethnography, phenomenology, narrative, case study, and pragmatic approaches such as qualitative description. Discussion will include a focus on epistemology, ontology, methods, strategies, data collection, analysis, and dissemination of results. Ethical and special concerns of qualitative research are emphasized.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain the significance of qualitative research methods for the development of nursing and interdisciplinary science; 2) Explain the relationship between theoretical and philosophical foundations and assumptions of qualitative research methods; 3) Compare the major qualitative research designs in terms of background, purpose, research questions, data gathering techniques, analytical methods and report of results; 4) Develop basic skills in qualitative data collection and analysis; 5) Analyze ethical issues related to qualitative research and the protection of human subjects

GNUR 519 Measurement for Nursing Research (3 Credit Hours)
This course focuses on principles and concepts of measurement in nursing research. Psychometric theory, measurement frameworks and instrument development, critique, and testing are addressed. Methods for generating and evaluating reliability and validity evidence are emphasized and operationalized. Ethical concerns related to the development and use of measuring instruments are examined.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Understand key principles and concepts of psychometric theory and measurement frameworks; 2) Differentiate between reliability and validity as evidence to support the use of a measure; 3) Apply statistical techniques in the generation of reliability and validity evidence; 4) Evaluate the suitability of measuring instruments for use in nursing research; 5) Understand principles and approaches to instrument development and testing; 6) Understand ethical issues related to instrument development, testing, and usage

GNUR 520 Systematic Inq II: Reviewing & Synthesizing Lit (2 Credit Hours)
This course focuses on learning and applying the process of systematic inquiry as a method to identify the state of science of a substantive area, gaps in the literature, and implications for nursing. Students learn how to search, organize and analyze the literature, synthesize and report the findings.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Define systematic inquiry and its relationship to research; 2) Distinguish among different types of literature syntheses; 3) Apply the process of systematic inquiry to a select topic; 4) Apply tools, methods and techniques for organizing literature; 5) Utilize appropriate standardized guidelines when reporting a literature review

GNUR 521 Population-Focused Health (3 Credit Hours)
This course is designed to assist students with identifying, analyzing, and evaluating health issues confronting the doctorally prepared nurse in the provision of population-focused health care. Epidemiologic concepts and databases will be covered in the context of population needs assessments. Evidence-based interventions that address health disparities will be examined.
Outcomes:
1) Analyze the role of federal, state, and local governments in population health; 2) Assess population specific health needs using Healthy People and the determinants of health as frameworks; 3) Examine the role of the World Health Organization and non-governmental organizations in population health; 4) Analyze health disparities and needs of priority populations using databases; 5) Apply epidemiologic concepts when completing a population needs assessment; 6) Examine evidence-based interventions for population specific health issues

GNUR 522 Emergency Health Care of Adults (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to provide the nurse practitioner student with the knowledge and skills necessary to affect patient care outcomes in emergency settings. This course will incorporate procedural skills necessary to meet clinical competencies of the emergency nurse practitioner. Diagnostic and therapeutic procedures used in the evaluation and management of patients with emergent conditions will be incorporated.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Recognize the importance of patient education and informed consent prior to performing procedures; 2) Synthesize knowledge of anatomy, pathophysiology and procedural methods for select interventions; 3) Incorporate understanding of indications, contraindications, and anticipated outcomes in clinical decision-making related to select procedures; 4) Demonstrate beginning skills in the execution of select diagnostic and therapeutic procedures in a procedural lab

GNUR 523 Health Care Policy and Economics (3 Credit Hours)
Course content provides the student with advanced policy, economic and financial knowledge, frameworks and skills required to assume a leadership role in healthcare. An emphasis is placed on using evidence to develop an understanding of key relationships between political, economic and financial dimensions in healthcare and how these relationships affect a selected population of interest.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Evaluate the influences of policy on health care delivery at institutional, local, state, national or global levels; 2) Analyze the effects of health policy; 3) Analyze the effects of economic factors on health care decision making; 4) Apply strategies for assessing costs, maximizing productivity, and achieving quality outcomes in evidence-based practice and/or research; 5) Design practice improvement recommendations that account for policy, economic and financial variables affecting selected populations

GNUR 524 Advanced Reproductive and Sexual Health (3 Credit Hours)
Pre-requisites: GNUR 442 Advanced Physiology; GNUR 413: Advanced Pharmacology; and GNUR 425 Advanced Health Assessment
This course will prepare the advanced practice nurse to manage the reproductive and sexual health care needs of all individuals throughout the lifespan. Theories and knowledge from biological, behavioral, social and nursing sciences will be applied in the provision of care for reproductive and sexual health. Emphasis is on the principles of reproductive anatomy and physiology including puberty, genetics, pregnancy, embryonic/fetal development, parturition, puerperium, lactation, and menopause in relationship to advanced practice nursing care.
Outcomes:
By the end of this course, advanced practice nursing students will: 1) Synthesize principles of neuroendocrine and physiological regulation of female and male reproductive function and the normal parameters of puberty, menarche, fertility, and menopause; 2) Analyze the impact of non-gynecologic primary health conditions on reproductive and sexual health; 3) Incorporate established evidence based sexual and reproductive health clinical practice guidelines; 4) Identify strategies to provide high quality, person-affirming, and culturally inclusive healthcare for self-identified gender and sexual minority persons and non-conforming individuals; 5) Develop genomics and genetic risk factor assessment in relation to reproductive and sexual health care, including basic principles of genetic testing, counseling, and referrals; 6) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes

GNUR 525 Special Populations and Topics in Emergency Health Care (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to prepare the emergency nurse practitioner student to assume responsibility for stabilization and treatment of special populations that present to the emergency department. Evidence-based practice is discussed as it relates to the evaluation and treatment of emergent conditions in obstetrics and gynecology, pediatrics, mental health disorders, victims of abuse, and patients receiving palliative and hospice care. Special topics of disaster management, the approach to acute resuscitation, analgesia and procedural sedation, toxicology, environmental emergencies and legal topics in emergency health care will be covered.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Synthesize evidence-based theories and practices into assessment, diagnosis and treatment of patients in special populations that present to the emergency department for care; 2) Analyze subjective/objective information to emulate differential diagnoses of emergent conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Develop treatment plans that incorporate inter-professional and socio-cultural sensitive treatment options; 5) Recognize legal issues that are unique to the delivery of care in the emergency setting; 6) Apply principles of disaster management to the care of individuals and communities affected by disasters

GNUR 526 Management of Common Adult Health Problems (4 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of common primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected common health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for Health Promotion and Disease Prevention, evaluation, and treatment of dermatologic, mental health, HEENT, gastrointestinal, and genitourinary problems.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Assess presenting common health problems in adults/older adults with specified conditions; 2) Analyze subjective/objective information to formulate differential diagnoses of common conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Establish a patient-centered treatment plan that is cost effective, consistent with best evidence, age appropriate, and culturally sensitive; 5) Modify the treatment plan based on outcomes; 6) Recognize problems that require consultation or referral to other members of the multidisciplinary health care team

GNUR 528 Management of Complex Adult Health Problems (4 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of complex primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected complex health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for evaluation and treatment of cardiovascular, peripheral vascular, respiratory, palliative care, neurological, musculoskeletal, hematologic, endocrine, infectious disease, and renal disease problems.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Assess presenting complex health problems in adults/older adults with specified conditions; 2) Analyze subjective/objective information to formulate differential diagnoses of complex conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Establish a patient-centered treatment plan that is cost effective, consistent with best evidence, age appropriate, and culturally sensitive; 5) Modify the treatment plan based on outcomes; 6) Recognize problems that require consultation or referral to other members of the multidisciplinary health care team

GNUR 529 Family-Focused Health Promotion and Disease Prevention (3 Credit Hours)

Pre-requisites: GNUR 442 Advanced Physiology; GNUR 413: Advanced Pharmacology; and GNUR 425 Advanced Health Assessment

This course emphasizes a family-focused approach to health promotion, disease prevention, and risk reduction from birth to end of life. Common issues impacting individual, family, population, community, and global health are explored. Strategies for health promotion and disease prevention are addressed with consideration for culture, social determinants of health, and social justice.

Outcomes:

By the end of this course, advanced practice nursing students will: 1) Analyze data sources that identify and predict health risks of the individual, family, and community to facilitate development of clinical intervention strategies; 2) Integrate family systems theory and research on health promotion and disease prevention into strategies to manage health-related problems affecting family and community; 3) Synthesize broad ecological, global and social determinants of health to design evidence-based, culturally relevant clinical interventions and strategies; 4) Apply evidence-based guidelines to the identification and prevention of significant healthcare problems affecting populations at risk; 5) Distinguish cultural, spiritual, ethnic, gender, sexual orientation, economic, environmental, and age cohort differences in the risk, presentation, progression, and treatment of health problems

GNUR 530 Topical Seminar for Nursing (1-5 Credit Hours)

These are seminars in specialty areas of nursing theory (e.g., Parse theory), methods (e.g., historical research, grounded methods), as well as concepts (e.g., spirituality, decision-making, bereavement). Students are encouraged to take those seminars to prepare them for their dissertation.

Outcomes:

Students are expected to use the specialty information to further enhance their understanding of their research phenomenon

GNUR 532 Research Internship (2-3 Credit Hours)

This course provides an opportunity for the student to undergo a mentored experience in scientific inquiry. With the Course Director, students will identify a faculty mentor who has an active program of research and can provide an environment for a mentored experience in scientific investigation. The student and faculty mentor will mutually develop achievable objectives with measureable outcomes. This experience can encompass a broad range of research activities that span the scope of scientific investigation. Successful completion of the internship will provide the student with an experiential base of research, which will enhance their knowledge and skills in the conduct of research and facilitate their socialization into the multifaceted role of an investigator.

GNUR 534 Advanced Practice Nursing Care of Older Adults (2 Credit Hours)

Pre-requisites: GNUR 528 Management of Complex Adult Health Problems for NP students OR MSN 447 for CNS students

This course explores current issues in aging and the care of older adults. A major focus of the course is preparing the advanced practice nurse to manage the healthcare of older adults with multiple medical and psychosocial needs in increasingly complex care systems. Topics include health promotion, disease prevention, and social determinants of health for older adults across the spectrum of health and illness, best practices in the management of geriatric syndromes, and special considerations in the assessment of older adults with functional and cognitive limitations.

Outcomes:

1) Apply current issues in aging, including aging theory, social determinants of health, caregiving, and legal-ethical considerations in the care of older adults; 2) Investigate the variety of care systems and settings where older adults receive care, including transitions of care; 3) Generate comprehensive health maintenance plans for healthy older adults and older adults with multiple comorbidities, incorporating evidence-based screening and prevention principles; 4) Discuss special considerations in the assessment of older adults with functional and cognitive limitations; 5) Apply best practices in assessment and management of geriatric syndromes; 6) Evaluate the importance of interprofessional teamwork in the care of older adults with multiple comorbidities

GNUR 535 Substance Use Disorders Addiction Lifespan I (3 Credit Hours)

Pre-requisites: Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I and II

This course is an introduction to critical thinking, diagnostic reasoning and clinical judgment to assess, diagnose and treat clients with substance use and addictive disorders. Neurobiological, behavioral, and socioecological perspectives will be used to understand the etiology, course and development, differential diagnoses and management of substance use and addiction. Students will learn pharmacological and non-pharmacological interventions to treat and manage substance use and addictive disorders across the lifespan.

Outcomes:

At the successful completion of the course, students will be able to: 1) Synthesize evidence-based scientific theories of substance use and addictive disorders; 2) Understand the neurobiological, behavioral, and socioecological aspects of substance use and addiction; 3) Assess and diagnose substance use and addictive disorders for clients with developmental considerations across the lifespan; 4) Apply pharmacologic, non-pharmacologic, and behavioral interventions in the management of clients with substance use and addictive disorders; 5) Evaluate management strategies in the treatment of substance use and addictive disorders

GNUR 536 Management of Adults with Acute/Critical Conditions I (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is one of two acute care management courses for students in the Adult-Gerontology Acute Care NP and CNS tracks. Students will integrate pathophysiology in the assessment, diagnoses, collaborative and holistic management of adults and older adults with traumatic, pulmonary and cardiothoracic disorders in acute/critical care. Students will analyze, integrate, and synthesize pathophysiological concepts and current research findings for collaborative management of the acute care adult/older adult.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Apply knowledge from health, psychological, physiological, and social sciences in the advanced nursing management of adults with trauma and cardiothoracic disorders within an acute care setting; 2) Develop differential diagnoses based on a holistic health assessment including medical and social history, presenting symptoms, physical findings, and diagnostic information; 3) Implement appropriate diagnostic and therapeutic interventions for adults with emphasis on safety, cost, efficacy, and patient's immediate condition and needs; 4) Identify the need for consultation and inter-professional collaboration with and referral to appropriate healthcare providers; 5) Evaluate the effectiveness of treatment plans based on patient's outcomes

GNUR 537 Substance Use Disorders Addiction Lifespan II (2 Credit Hours)

Pre-requisites: Substance Use Disorders and Addiction Across the Lifespan I

This course focuses on the complex management of treating substance use and addictive disorders across the lifespan. Evidence-based strategies for caring for clients with co-occurring substance use and psychiatric disorders are presented. Students will learn innovative and novel approaches within research and practice to treat substance use and addiction. The socio-cultural, ethical, and legal challenges surrounding addiction and substance use disorders also will be explored.

Outcomes:

At the successful completion of the course, students will be able to: 1) Understand different philosophical approaches to manage addiction and substance use, including abstinence and harm reduction models; 2) Implement and evaluate evidence-based strategies to care for clients with complex co-occurring psychiatric and substance use disorders with an emphasis on recovery; 3) Describe how to include family and community members into the management of substance use disorders and address stigma associated with addiction and substance use; 4) Analyze the current research and practice focused on innovative and novel approaches and examine socio-cultural, ethical, and policy implications; 5) Explain the legal, ethical, and economic factors associated with substance use and addiction practice

GNUR 538 Management of Adults with Acute/Critical Conditions II (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is one of two acute care management courses for students in the Adult-Gerontology Acute Care NP and CNS tracks. Students will integrate pathophysiology in assessment, diagnoses, collaborative and holistic management of adults and older adults with systemic disorders that include episodic and chronic health problems in acute/critical care. Students will analyze, integrate, and synthesize pathophysiological concepts and current research findings for collaborative management of the acute care adult/older adult.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply knowledge from health, psychological, physiological, and social sciences in the advanced nursing management of adults with systemic disorders that include acute and critical episodes of health problems in acute care settings; 2) Develop differential diagnoses based on a holistic health assessment including medical and social history, presenting symptoms, physical findings, and diagnostic information; 3) Implement appropriate diagnostic and therapeutic interventions for adults with emphasis on safety, cost, efficacy, and patient's immediate condition and needs; 4) Identify the need for consultation and inter-professional collaboration with and referral to appropriate healthcare providers; 5) Evaluate the effectiveness of treatment plans based on patient's outcomes

GNUR 539 Innovative Science, Theory and Methods (3 Credit Hours)
This course will introduce doctoral students to evolving areas of science and technology relevant to nurse scientists that require collaborative approaches and interdisciplinary team science. Content will focus on informatics and data science, genomics, implementation science, team science, and the value of health care.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Identify core concepts in informatics/data science, genomics, and implementation science; 2) Describe implementation science methods and determine appropriate models for health-related interventions; 3) Analyze the main ethical issues surrounding the use of big data (of all types); 4) Determine the value of innovative science methods to the health care system; 5) Analyze current and future applications of omics for precision health

GNUR 540 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Outcomes:
1) Analyze the multi-faceted ethical problems in healthcare, nursing practice, education, research, administration and policy; 2) Articulate one's own approach to moral reasoning when responding to bioethical issues in nursing; 3) Identify presuppositions/assumptions underlying one's positions and the bases for accepting those presuppositions/assumptions; 4) Examine fundamental critical questions in ethics and nursing; 5) Explore selected social justice bioethical issues

GNUR 542 Grant and Proposal Writing (3 Credit Hours)
This course provides the foundation for grant development and submission. Content includes identifying sources and types of funding from governmental agencies, private foundations, and professional societies. Fundamental skills and strategies needed to prepare a competitive research grant proposal are addressed. Emphasis is placed on the strategies in revising an application, and the peer review process. Students will gain experience in writing sections of a competitive grant proposal, critiquing proposals and participating in a mock review.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Identify major sources and mechanisms of public and private funding for health-related research; 2) Describe key components of a research grant proposal; 3) Evaluate the strengths and weaknesses of research proposals; 4) Develop skills in preparing a competitive grant application; 5) Critique research grant proposals using peer review process

GNUR 543 Adult Primary Care NP Practicum (1-4 Credit Hours)
Pre-requisites: GNUR 526: Management of Common Adult Health Problems or GNUR 528: Management of Complex Adult Health Problems; WHNP Students also need MCN 414: Childbearing/ Family Course
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in primary care. During each practicum, the student will care for adult patients. This care includes health promotion, disease prevention, as well as assessment and management of the most common acute, chronic, and complex health problems.
Outcomes:
At the successful completion of this practicum, students will be able to: 1) Perform complete physical, psychological and social health assessments, incorporating principles of health promotion, health maintenance, and chronic disease management; 2) Provide teaching, counseling, and anticipatory guidance in accordance with the patient and family's readiness stage; 3) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens; 4) Integrate knowledge of pathophysiologic and psychosocial changes associated with common acute, chronic and complex health problems into clinical decision-making; 5) Implement evidence-based, developmentally supportive plans of care for adolescents, adults, and older adults; 6) Modify management plan according to clinical response and changes in condition; 7) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 8) Demonstrate effective communication, collaboration and relationship building with patients, families, and interprofessional team members; 9) Analyze quality issues in the clinical setting, prioritizing patient safety and cost effectiveness

GNUR 544 Nursing and Health Policy (3 Credit Hours)
This course provides a framework for understanding health care delivery systems and the ability to analyze health policy using selected theoretical models. Students will apply theoretical models to evaluate existing and proposed health policies from the perspective of relevant stakeholders. Students will identify the political, economic, legal, social and ethical forces which impact the health policy-making process at the organization, local, state and national level, The changing role and responsibilities of the government, private sector, health professionals, and consumers will be examined in terms of access to care, health care financing, regulations, safety, quality and efficiency. Specific methods and strategies to influence health policy will be explored.
Course equivalencies: X-DNP 503/GNUR 544
Outcomes:
1) Analyze health care delivery systems and specific health policies using selected theoretical models; 2) Describe forces that shape health care policy development and implementation in the United States; 3) Relate the philosophy and ethical basis of Jesuit education to the values and preferences which shape health policy in a pluralistic society; 4) Outline the process of policy development and implementation within the content of multiple forces (government, the private sector, health professionals and consumers) that shape health care policy in the United States; 5) Discuss current health and nursing policy issues in the US and globally with emphasis on the political, social, economic, and cultural factors which influence health disparities and access to care; 6) Analyze a health policy within the student's own area of practice and interest in terms of the social, economic, legal political, and ethical forces that effect current and latent health outcomes; 7) Explain specific methods and strategies hat health care providers can use to advocate for and influence health policy at the organization, local, state, national and/or international level

GNUR 545 Evidence Translation for Advanced Clinical Practice (3 Credit Hours)
This course builds on the student's understanding of using research and scholarly inquiry to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on developing leadership competencies in the areas of translational research, evidence-based practice and interprofessional teamwork. Key competencies are developed in the critical evaluation and synthesis of extant research, development of evidence-based protocols and evaluation of outcomes.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Evaluate theory, concepts and methods to guide translation of evidence; 2) Formulate questions about population-based practice problems, issues and areas for improvement in context; 3) Synthesize the state of evidence with regard to a specific practice problem; 4) Develop an evidence-based protocol to address the practice problem, issue and/or area for improvement in context; 5) Understand the use of metrics in the identification, monitoring and evaluation of practice outcomes; 6) Analyze social, cultural, political and ethical issues related to implementation of practice and process improvements

GNUR 546 Advanced Statistics I (3 Credit Hours)
This course provides graduate students with a foundation in applied regression analysis techniques used in health, social, and behavioral sciences. The major topics covered in this course are univariate/multivariate linear regression, advanced data screening, model building, variable selection, regression diagnostics, univariate/factorial analysis of variance, and repeated measures design analysis of variance. Conceptual understanding and critical evaluation of statistical models is emphasized. Students will gain practical experience in using statistical software packages for the analysis of data.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply general linear modeling techniques in answering research questions; 2) Analyze bivariate and multivariate associations; 3) Interpret results of statistical testing using general linear modeling techniques; 4) Understand the process of model building and variable selection; 5) Evaluate assumptions of general linear models; 6) Apply regression diagnostic techniques

GNUR 547 Advanced Statistics II (3 Credit Hours)
This course will introduce advanced data analysis techniques common in clinical, behavioral and health outcomes research. Students will learn how to conduct and interpret mediational effects and path analysis, multivariate statistical models, repeated measures analysis, nonparametric analysis, and logistic regression models. Although the mathematical basis of the techniques will be considered, the course emphasizes the appropriate use and interpretation of these techniques.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Select appropriate analytic techniques based on the research questions; 2) Understand the computational basis for statistical techniques covered in this course; 3) Evaluate assumptions associated with each statistical technique; 4) Employ statistical software to conduct the appropriate analysis; 5) Interpret the results and make statistical inference

GNUR 550 Substance Use Management Practicum (3 Credit Hours)
Pre-requisites: Psychiatric Mental Health Advanced Practice Practicum
This specialty practicum course has a focus on the diagnostic reasoning and clinical judgment required to assess, diagnose and treat substance use and addictive disorders. Students will integrate knowledge from their coursework and psychiatric mental health population clinical to diagnose and manage clients with substance use and addictive disorders across the lifespan. The student's level of performance is expected to progress throughout the clinical practicum.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply evidence-based practice strategies to assess and diagnose children, adolescents, adults and older adult clients with substance use and addictive disorders; 2) Implement management strategies in the treatment of substance use and addictive · disorders; 3) Analyze the ethical, legal, and policy issues impacting advanced practice nursing care of clients with substance use and addictive disorders; 4) Coordinate care across transitions for clients diagnosed with substance use and addictive disorders

GNUR 551 Cancer Care: Cancer Biology and Epidemiology (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is designed to present an in-depth understanding of the current knowledge and research in cancer biology and pathogenesis. Genetic, molecular and cellular mechanisms of cancer pathogenesis are covered in depth. Cancer epidemiology, concepts of primary risk reduction, as well as cancer screening are presented. Susceptibility for hereditary cancers due to germline mutations is included in the context of primary and secondary prevention. Current and future applications of genomics to cancer care are presented and discussed.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Analyze theories and research findings relative to the current understanding of the biology of cancer; 2) Describe national and global trends in cancer incidence and mortality; 3) Discuss evidence supporting cancer prevention; 4) Analyze cancer risk associated with common hereditary cancer syndromes; 5) Understand general principles of cancer screening; 6) Analyze current and future applications of genomics to cancer care

GNUR 553 Cancer Care: Diagnostic and Therapeutic Approaches (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course will focus on the diagnostic and management dimensions of select cancers including hereditary cancer syndromes. Specialized content will focus on the therapeutic modalities utilized during the acute care phase of the cancer continuum across multiple care settings. Pharmacology of cancer therapies will be explored.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Differentiate among specific cancer types in terms of: epidemiology, etiology, prevention, screening, detection, classification, and treatment; 2) Apply diagnostic approaches and methods to cancer management; 3) Explain concepts and principles of cancer staging for various cancer types; 4) Apply general principles of treatment planning in cancer management; 5) Compare major treatment modalities; 6) Evaluate evidence-based therapeutic and pharmacologic treatment strategies for patients across the cancer care continuum; 7) Articulate the role of the advanced practice nurse in the interprofessional management of patients

GNUR 555 Cancer Care: Palliative/Supportive Management (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is designed to present an in-depth understanding of the current knowledge and research in psychological and supportive care for patients and families living with cancer. Information relevant to the following domains will be explored: symptom management; psychological, spiritual and culturally-appropriate care; communication; survivorship; and hospice and palliative care.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Analyze theories and research findings relative to the current understanding of cancer and treatment-related symptoms across the cancer care continuum; 2) Identify evidence-based advanced nursing practice for symptom management and psychological care of patients with cancer, across the cancer care continuum, including at the end of life; 3) Identify strategies for effective communication with patients, families, and interprofessional team members; 4) Describe psychosocial, spiritual, and culturally appropriate components of care with patients and families coping with cancer; 5) Explain unique issues of the cancer survivor; 6) Integrate principles of palliative care across the cancer care continuum; 7) Articulate the role of the advanced practice nurse in the interprofessional management of patients

GNUR 560 Cancer Care Advanced Practice Practicum (2-3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

The practicum course guides the student in a synthesis of content from nursing and related sciences and allows for the application of this knowledge to the role of the advanced practice nurse providing advanced nursing care to patients and families across the cancer care continuum. Students will gain experience in a variety of settings that will advance their proficiency in caring for patients and families with cancer.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Apply evidence in the assessment and management of patients across the cancer care continuum; 2) Collaborate with health professionals to plan and implement best practices in cancer care; 3) Evaluate the treatment plan for value and quality and modify as needed; 4) Analyze the ethical, legal, cost, and policy issues affecting advanced practice nursing of patients and families across the cancer care continuum; 5) Discuss the value of multidisciplinary cancer care teams to provide the most appropriate care for this complex and vulnerable population; 6) Demonstrate and document personal and professional growth in the role of the advanced practice nurse

GNUR 562 Emergency Health Care Advanced Practice Practicum (1-6 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
The practicum course guides the student in a synthesis of content from nursing and related sciences and allows for the application of this knowledge to the role of the nurse practitioner in the emergency setting. Students will advance their proficiency in caring for patients that present across the lifespan and across acuity levels.
Outcomes:
1) Apply evidence-based practice strategies to assess and diagnose patients across the lifespan and across acuity levels that present with emergency/urgent conditions; 2) Implement management strategies in the treatment of patients in the emergency department setting; 3) Analyze the ethical, legal, and policy issues impacting advanced practice nursing care of patients that present in an emergency/urgent care setting; 4) Implement proficiency in procedural skills relevant to the evaluation, stabilization, resuscitation, and treatment of the patient in the emergency setting; 5) Integrate the appropriate use of consultation, collaboration, and referral to appropriate health care providers into management of patients in an emergency/urgent care setting

GNUR 570 DNP Scholarly Project: Planning (1 Credit Hour)
Pre- or co-requisites: GNUR 545
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 1 SH course focuses on skills necessary for planning a successful DNP scholarly project. Project identification within the student's area of advanced expertise, organizational needs assessment, and outlining the project are emphasized. Skills necessary for the implementation of a successful DNP scholarly project, including collaborative inter-professional team participation and leadership, communication, and methods for project management, are emphasized.
Outcomes:
Upon successful completion of this course, DNP students will apply project management principles in the identification of a feasible DNP Scholarly Project that reflects the student's practice expertise, is evidence-based and grounded in theory

GNUR 571 DNP Scholarly Project: Proposal and Pre-Implementation (2 Credit Hours)
Pre-requisites: DNP Scholarly Project: Planning
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 2 SH course entails 1 SH of on-line seminar and 1 SH (75 clock hours) of practicum experience. The seminar focuses on full development and writing of a succinct proposal which describes planning, implementing, evaluating, and disseminating a scholarly project. The project is designed to improve patient, practice, or organizational outcomes based on an organizational needs assessment that demonstrates feasibility and organization's readiness for student's proposed project. Development of relationships at the project site, and exploration/initiation of preliminary project steps are emphasized during the practicum hours.
Outcomes:
Upon successful completion of this course, DNP students will: 1) Incorporate findings from an organizational needs assessment into the development of a feasible scholarly project; 2) Defend a written project proposal which links scholarly experiences, use of evidence to improve either practice or patient outcomes or both

GNUR 572 DNP Scholarly Project: Project Implementation (2 Credit Hours)
Pre-requisites: GNUR 571 DNP Scholarly Project: Proposal and Pre-Implementation
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This course combines 1 SH of didactic and scheduled on-line seminars throughout the semester with 1 SH (75 clock hours) of practicum experience. Project implementation is the focus of the practicum experience. Project management guidance is provided through on-line seminar sessions, in concert with Faculty Directors, and through communication with the student and external mentor. Students are expected to have a DNP Scholarly Project faculty director, an external member and an approved and willing project site in place prior to course entry.
Outcomes:
Upon successful completion of this course, DNP students will: 1) Implement DNP Scholarly Project using project management skills and competencies; 2) Demonstrate leadership skills in project implementation and management; 3) Apply problem-solving methods and change concepts during project management

GNUR 573 DNP Scholarly Project: Analysis and Dissemination (1 Credit Hour)
Pre-requisites: GNUR 572 DNP Scholarly Project: Implementation
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 1 SH seminar course guides DNP students through the completion of the DNP Scholarly Project, evaluation of project outcomes through analysis of process and outcome indicators, and dissemination. Methods for dissemination include sharing of project outcomes with project site stakeholders, completion of a manuscript, and exploration of a publication site.
Outcomes:
Upon successful completion of this course, DNP student will integrate project elements and data, demonstrating the use of evidence to improve patient or system outcomes

GNUR 574 DNP Project Course I: Foundations of Systems-based Practice (2 Credit Hours)
Pre-requisites: GNUR 404, GNUR 408, and GNUR 521
Co-requisites: GNUR 574L
This course builds on the student's understanding of scholarly inquiry, population health, and leadership roles to address complex practice problems and improve practice outcomes. Students will focus on developing knowledge and skills in problem recognition, needs assessment, development of an evidence-based practice question, and interprofessional teamwork. Key competencies are developed in identification of population-focused priorities, systems-based practice, scholarly inquiry, quality improvement principles, and ethical conduct of scholarship.
Outcomes:
Evaluate theory, concepts, and methods to guide translation of evidence; Formulate questions about population-based practice problems, issues and areas for improvement in context; Discuss the use of metrics in the identification, monitoring, and evaluation of practice outcomes; Analyze social, cultural, political and ethical issues related to planning of practice and process improvements; Analyze practice at micro and macro system levels

GNUR 574L DNP Project Practicum I: Planning (1 Credit Hour)
Pre-requisites: GNUR 404, GNUR 408, and GNUR 521
Co-requisites: GNUR 574
This practicum provides students with an opportunity to work collaboratively with a site mentor (preceptor) and interprofessional stakeholders and build a team for evidence-based practice and quality improvement projects. Students develop competencies in collaboration, systems-based practice, and leadership.
Outcomes:
Engage system stakeholders to complete an organizational needs assessment of local capacity to address population health opportunities; Collaborate with project site mentor and system stakeholders to develop a practice question and outcomes of importance to the organization

GNUR 575 Evidence Translation for Systems-Based Practice (3 Credit Hours)
Pre-requisites: GNUR 404, GNUR 408, GNUR 521, GNUR 574, and GNUR 574L
This course builds on the student's understanding of using evidence and scholarly inquiry to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on developing knowledge and skills in the areas of evidence-based practice, quality improvement, and interprofessional teamwork. Key competencies are developed in the critical appraisal and synthesis of evidence, development of evidence-based protocols, and evaluation of outcomes.
Outcomes:
Apply guiding theories and/or frameworks from nursing and other disciplines to practice and process improvements; Synthesize the state of evidence regarding practice problems, identifying gaps and barriers in translation of evidence to practice; Engage stakeholders to develop evidence-based protocols and action plans to address a practice issue in context; Identify metrics to monitor and evaluate practice outcomes; Address social, cultural, political and ethical issues related to implementation of practice and process improvements

GNUR 576 DNP Project Course 3: DNP Project Practicum II (1 Credit Hour)
Pre-requisites: GNUR 404, GNUR 408, GNUR 521, GNUR 574, GNUR 574L, and GNUR 575
This practicum provides students with an opportunity to work collaboratively with interprofessional stakeholders to implement and monitor the DNP project. Students develop competencies in quality and safety, collaboration, knowledge of systems, and leadership.
Outcomes:
Apply project management skills and problem-solving methods to the implementation of a DNP project; Demonstrate team leadership skills including cognitive flexibility and professional communication in the implementation of intentional systems change; Monitor project processes and intervention fidelity, especially with regard to social, cultural, and ethical considerations

GNUR 577 DNP Project Course 4: DNP Project Evaluation and Dissemination (2 Credit Hours)
Pre-requisites: GNUR 404, GNUR 408, GNUR 521, GNUR 574, GNUR574L, GNUR 575, and GNUR 576
This course builds on the student's understanding of scholarship and quality and safety to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on advancing scholarship and presenting outcomes of systems-based practice change. Key competencies are developed in dissemination of outcomes and considerations of cost-effectiveness in care.
Outcomes:
Integrate project elements and data analysis, demonstrating use of evidence to improve patient or system outcomes; Analyze project results in the context of lessons learned, as well as implications for project site sustainability and advanced practice nursing; Conduct a cost-benefit analysis for a systems change, incorporating this into recommendations for future action; Disseminate project findings to university, project site, and professional community

GNUR 598 Directed Study (1-6 Credit Hours)
Directed Study is a focused, defined, and substantive reading or research experience supervised by a faculty member. Directed study involves a close collaboration between the student, supervising faculty, and the academic advisor/chair in the design, scope, and expected student learning outcomes from the experience. Directed study may not be used as a substitute for an existing course or a cancelled course. Directed study credits may range from 1 to 3 semester hours. A course topic of Directed Readings or Directed Research may be requested to be entered on the transcript.

GNUR 600 Dissertation Supervision (1 Credit Hour)
This course focuses on continuing formation as a scholar through the development of the dissertation proposal. Using the student's dissertation plans as a reference point, the course will target strategies and competencies in generating and critically evaluating new knowledge, understanding the legacies of past and current work in the discipline and topic area, the transformational nature of knowledge, and the transformative work of communicating knowledge to others. Students are expected to maintain close and frequent contact with their dissertation chairperson/ committee members during their enrollment in the course. Two semesters in seminar format and thereafter the student works with the Dissertation Chair and committee in completing the dissertation.
Outcomes:
Generate specific aims for a research project; Design a research study to answer specific research questions; Execute data collection according to a research plan; Analyze and interpret research study results; Present findings from a research study; Defend research findings in a public forum; Ensure protection of human subjects in the ethical and responsible conduct of research

GNUR 605 Master's Study (1 Credit Hour)
Course designation for students who have completed their coursework and are completing the master's comprehensive examination. Enrollment in GNUR 605 is considered full-time study. Graded as credit (pass) or no credit (fail). This course can be taken twice.
Outcomes:
Integrate comprehensive knowledge from conceptual and theoretical bases of science and nursing science

GNUR 610 Doctoral Study (1 Credit Hour)
Course designation for students who have completed their coursework and are taking the qualifying examinations. The purpose of the qualifying examination is to assess the depth, breadth, comprehension, integration, and synthesis of knowledge that forms the foundation for conducting the dissertation research.
Outcomes:
Integrate comprehensive knowledge from the philosophical, conceptual and theoretical bases of science and nursing science, and research methods into a developing program of research

Maternal/Child Nursing (MCN)

MCN 401 Child/Family Health (3 Credit Hours)
Pre-requisites: B- or higher in GNUR 413, GNUR 425, and GNUR 442
MCN 401 is designed to prepare the Nurse Practitioner to assume responsibility for the coordination and management of health care for children, birth through adolescence. A developmental perspective is used to address the primary health care needs of the childrearing family with an emphasis on meeting the psychosocial and developmental needs of children and families. A major focus of the course is to prepare the student to assess, diagnose and manage selected common health problems of the pediatric population in primary care settings. Indications for collaboration, consultation, and/or referral to other members of the health care team are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical clinical judgment and implement theoretical knowledge in the management of the pediatric population, both in health and when experiencing common health problems.

MCN 414 Childbearing/Family (3 Credit Hours)
Pre-requisites: GNUR 413, GNUR 425 & GNUR 442 (minimum grade of B-)
This course will prepare the advanced practice nurse to manage the health care of essentially normal childbearing women during the prenatal and postpartum periods. Theories and knowledge from biological, behavioral, social and nursing sciences will be applied in the provision of care for childbearing women and families. Emphasis is on the concept of wellness during pregnancy, recognition of high-risk conditions requiring referral or collaborative practice, and the importance of support from family and community networks.

MCN 420 APN Practicum: Child/Family Health (1-3 Credit Hours)
Pre-requisites: GNUR 413, GNUR 425, and GNUR 442 (minimum grade of B-)
Co-requisites: MCN 401 (as prerequisite, minimum grade of B-)
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of Nurse Practitioner in primary care. During each practicum, the student will care for patients progressing in complexity from health promotion and disease prevention to assessment and management of the most common acute, chronic, and complex health problems. The student's level of performance is expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent. Pre or
Course equivalencies: MCN 420 / MCN 406

MCN 430 Reproductive Health and Nursing Care of the Childbearing Family (3 Credit Hours)
This course examines the reproductive health and nursing care of people with gender-related needs across the lifespan, including perinatal families from preconception through the postpartum period, including care of the newborn. Emphasis is on the concept of wellness during the preconception, pregnancy, and postpartum periods with recognition of high-risk conditions, and the importance of support from family and community networks. The course is designed to foster an understanding of reproductive justice and the impact of social determinants on family health. Upon completing the course, learners will be able to provide evidence-based, and equitable care for birthing individuals and their families.
Outcomes:
Synthesize physiologic, developmental, and psychosocial knowledge to analyze the adaptations of the perinatal person; Evaluate how social, structural, environmental, and policy determinants of health influence reproductive and family outcomes; Appraise and apply evidence-based interventions to promote wellness, prevent complications, and manage high-risk reproductive and perinatal conditions; Integrate leadership and communication competencies to coordinate interprofessional, person-centered, and family-inclusive reproductive care across the lifespan; Integrate principles of reproductive justice and ethics to advocate for equitable care and informed decision-making for all birthing individuals; Analyze neonatal growth, adaptation, and developmental trajectories across varying levels of risk to inform evidence-informed nursing management

MCN 430L Reproductive Health and Nursing Care of the Childbearing Family Clinical (2 Credit Hours)
This clinical course provides students with opportunities to apply theoretical knowledge and evidence-based practice to promote wellness, prevent complications, and manage high-risk reproductive and perinatal conditions across the lifespan. Students will engage in the care of individuals with gender-related reproductive health needs, from menarche through menopause, with an emphasis on the care of childbearing families throughout pregnancy, birth, and the postpartum period. Priority is placed on clinical reasoning, interprofessional collaboration, reproductive justice, and culturally responsive, person-centered care.
Outcomes:
Evaluate physiological, psychosocial, and pathophysiological adaptations of the childbearing person and fetus/neonate to conduct comprehensive assessments of the perinatal family; Provide safe, equitable, and therapeutic nursing care to individuals and the perinatal family across varying levels of risk and complexity, integrating cultural, social, and environmental contexts to inform clinical reasoning; Collaborate effectively with individuals, families, and interprofessional teams to optimize reproductive health outcomes through communication, advocacy, and shared decision-making; Integrate advanced pharmacologic principles and current evidence to ensure safe medication management during the perinatal period; Integrate ethical reasoning, professional accountability, and reflective practice to guide nursing actions in perinatal scenarios; Exemplify professional behaviors through leadership, accountability, and role modeling in professional conduct, including reliability, appearance, communication, and decision-making

MCN 431 Pediatric Nursing (3 Credit Hours)
This course prepares students to provide comprehensive, evidence-based, person-centered care to pediatric patients and families from infancy through adolescence and across the healthcare continuum. The course integrates the four spheres of care (health promotion and disease prevention, chronic disease management, regenerative/restorative care, and hospice/palliative/supportive care), the levels of prevention model, and the Healthy People initiative to address complex health needs and promote health equity for diverse pediatric populations. Major pediatric topics are covered, with an emphasis on family-centered care, pediatric assessment, developmental assessment, interprofessional communication, and care coordination.
Outcomes:
Synthesize nursing and interdisciplinary knowledge to analyze normal and altered physical and psychosocial growth and development patterns from infancy through adolescence, including application of theoretical frameworks to inform clinical reasoning and judgment; Implement and evaluate evidence-based preventive interventions and population-focused risk reduction strategies for pediatric populations and families, incorporating principles of health equity, social determinants of health, and cultural responsiveness; Develop and evaluate evidence-based care for pediatric patients and families experiencing health alterations, integrating person-centered care principles and systems-based practice approaches; Critically evaluate and advocate for policy changes and system-level interventions that address current trends, structural barriers, and health disparities affecting pediatric populations, demonstrating leadership in advancing health equity and transforming healthcare delivery systems

MCN 431L Pediatric Nursing Clinical (2 Credit Hours)
This clinical course provides students with structured, faculty-supervised practice experiences to synthesize and apply theoretical concepts, evidence-based knowledge, and clinical competencies to provide comprehensive, developmentally supportive, person-centered nursing care to pediatric patients and families. Students will incorporate concepts of family-centered care, teamwork, and patient safety into the care provided. Students practice across the four spheres of care (health promotion and disease prevention, chronic disease management, regenerative/restorative care, and hospice/palliative/supportive care), the levels of prevention model, and diverse healthcare settings to promote health equity and optimal outcomes for diverse pediatric populations.
Outcomes:
Synthesize developmental theories of Piaget and Erickson to conduct developmental assessments from infancy through adolescence, identify developmental variations and risk factors, and translate findings into developmentally supportive interventions to promote optimal growth and well-being; Demonstrate competence in conducting comprehensive and focused physical assessments on pediatric patients from infancy through adolescence, integrating developmental considerations, family-centered approaches, and culturally responsive techniques and distinguishing between normal and abnormal findings; Synthesize pediatric assessments to formulate evidence-based nursing concept maps to guide care that addresses complex health needs across multiple settings (acute hospital, primary care, outpatient, and community); Demonstrate effective communication strategies across interprofessional teams, patients, families, and communities; Demonstrate exemplary professional behaviors including integrity, appropriate professional presence, ethical conduct, confidentiality, and advocacy

MCN 516 Pediatric Primary Care NP Practicum (3 Credit Hours)
Pre-requisites: MCN 401 Child/Family Health
This course guides the student toward a synthesis of content from nursing and related sciences, applying this knowledge to the role of the nurse practitioner in the primary care of pediatric patients. During this practicum experience, the student will care for children from birth through adolescence across a continuum from health promotion to the management of common health problems.
Outcomes:
At the successful completion of this practicum, students will be able to: 1) Perform a complete physical, psychological and social health assessment incorporating principles of child development, health promotion and health maintenance; 2) Provide developmentally appropriate teaching, counseling, and anticipatory guidance; 3) Apply preventive interventions and risk reduction strategies for infants through adolescents, and their families; 4) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens; 5) Implement evidence-based, developmentally supportive plans of care for pediatric patients and their families; 6) Modify management plans according to clinical responses and changes in condition; 7) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 8) Demonstrate effective communication, collaboration and relationship building with patients, families, and interprofessional team members; 9) Analyze quality issues in the clinical setting, prioritizing patient safety and cost effectiveness

MCN 530 Topical Seminar for Nursing (1-5 Credit Hours)
These are seminars in specialty areas of nursing theory (e.g., Parse theory), methods (e.g., historical research, grounded methods), as well as concepts (e.g., spirituality, decision-making, bereavement). Students are encouraged to take those seminars to prepare them for their dissertation. Restricted to Graduate Nursing students.
Outcomes:
Students are expected to use the specialty information to further enhance their understanding of their research phenomenon

Medical/Surgical Nursing (MSN)

MSN 408 APN Practicum (1-9 Credit Hours)
Pre-requisites: GNUR 413, GNUR 425 & GNUR 442 (minimum grade of B-)
This course prepares the student to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices/protocols form the foundation for evidence-based practice. Methods of operationalizing scholarly inquiry include understanding relationships among nursing theory, research, principles of epidemiology and practice; formulating research questions and evidence-based practice questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying inquiry to practice. The importance of the translation of scientific evidence to improve practice is emphasized. Social, cultural, political and ethical issues related to research are addressed, consistent with the Jesuit values surrounding social justice.

MSN 422 Adult Health Nursing I: Foundations of Medical-Surgical Care (3 Credit Hours)
This didactic course prepares nursing students to deliver evidence-based, person-centered care to adults with common acute and chronic conditions affecting multiple body systems. Through interactive lectures, case-based analysis, clinical reasoning activities, and integration of informatics and quality-improvement concepts, students apply the nursing process while synthesizing pathophysiological and pharmacological knowledge to promote safe, effective, and equitable care across diverse healthcare settings. Grounded in Jesuit values of cura personalis and social justice, learning experiences emphasize the influence of health systems, social determinants of health, and emerging technologies, including artificial intelligence, while highlighting the ethical responsibilities and essential role of human judgment in clinical decision-making. By the end of the course, learners will be able to analyze complex adult health conditions, prioritize and coordinate nursing care using evidence and clinical judgment, collaborate effectively within interprofessional teams, and apply systems-based and informatics-informed strategies to optimize adult health outcomes.
Outcomes:
Analyze assessment data using pathophysiology, pharmacology, and clinical decision tools to prioritize nursing care for adults with acute and chronic conditions; Design evidence-based, person-centered nursing care plans that integrate clinical reasoning and prioritize patient safety to achieve effective outcomes for adults with acute and chronic conditions; Evaluate interprofessional collaboration frameworks and therapeutic communication strategies to support culturally responsive, team-based care for adults and their families; Analyze healthcare delivery systems, care coordination processes, and health information technologies to determine their influence on health equity, access, and quality of care for adult populations; Develop patient- and family-centered education strategies that promote health literacy, self-management, and shared decision-making for adults with acute and chronic condition

MSN 422L Adult Health Nursing I: Foundations of Medical-Surgical Care Clinical (2 Credit Hours)
This clinical course provides pre-licensure nursing students with supervised experiential learning opportunities to apply evidence-based, person-centered nursing care for adults with common acute and chronic conditions across healthcare settings. Building on concurrent didactic content, students actively integrate pathophysiologic and pharmacologic knowledge, clinical judgment, and the nursing process to assess, plan, implement, and evaluate care for adults with complex health needs. Through direct patient care, interprofessional collaboration, and reflective practice, students examine how health systems, social determinants of health, and emerging technologies influence care delivery and outcomes. Grounded in Jesuit values of cura personalis and social justice, the clinical experience emphasizes ethical practice, patient safety, health equity, and accountability within scope of practice. By the end of the course, students will demonstrate the ability to deliver safe, compassionate, and coordinated nursing care, communicate effectively within interprofessional teams, and reflect on their development as professional nurses in adult healthcare environments.
Outcomes:
Apply comprehensive assessment skills and clinical judgment to deliver safe, evidence-based nursing care for adults with common acute and chronic conditions under faculty or preceptor supervision; Implement evidence-based, person-centered nursing care plans that reflect clinical priorities, patient goals, and quality and safety principles in diverse adult health care settings; Demonstrate effective interprofessional communication and teamwork, including timely documentation and SBAR handoffs, to support coordinated, culturally responsive care for adults and families; Integrate health systems knowledge, care coordination processes, and health information technologies to support continuity of care, patient safety, and equitable access to services; Educate patients and families using health-literacy-responsive strategies that promote self-management, shared decision-making, and safe transitions of care

MSN 433 Suturing and Acute Wound Management (1 Credit Hour)
This course is designed to enable the APRN student to obtain the theoretical knowledge and practical skills necessary to assess and manage acute wounds. This didactic/lab course discusses principles of wound care and teaches students techniques of wound closure including pain control, basic suturing and advanced skin closures; management of infections and injuries to the skin, hands and feet; and simple incision and drainage of abscesses. The student will be able to practice advanced skills that essential in the clinical management of the patient with acute wounds.

MSN 447 CNS Practice Across the Adult Age Spectrum (3 Credit Hours)
This course promotes in-depth exploration of significant clinical problems occurring in adult health patients from the vantage point of the advanced practice nurse prepared as a clinical nurse specialist (CNS). This course will prepare the CNS student for expert clinical practice and the competencies to translate clinical expertise into quality, cost-effective outcomes for adult patients. A major focus of the course is to prepare CNS students to assume responsibility for coordination, management and assurance of safety and quality of care of adult patients across the three spheres of influence: patient/client, nurses and nursing practice, organization/system of adult health patients. Attention will be directed to identifying and analyzing selected problems, designing effective advanced nursing interventions and evaluating health care outcomes related to adult health patients. Special consideration with be given to the top Medicare diagnoses, National Patient Safety Goals, CMS core performance measures, and new models for healthcare delivery. Indications for leadership, collaboration and consultation with other health care professionals are emphasized to insure optimal clinical management and achievement of evidence-based outcomes for the hospitalized adult patient. Strategies for improving the quality of health care through patient safety interventions and strategies are incorporated into patient care protocols at the individual, group and system level. The subsequent APN practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the coordinating and managing the care of adults experiencing acute and chronic health problems.

MSN 465 Adult Health Nursing II: Complex and High Acuity Care (3 Credit Hours)
This concept-based course prepares nursing students to plan care for adults with complex, acute, and life-threatening conditions through advanced clinical reasoning across interacting physiological, professional, and psychosocial concepts. Using case-based learning, concept mapping, and unfolding high-acuity scenarios, students examine how multisystem interactions drive patient deterioration, how professional practice addresses systems-level challenges, and how ethical, cultural, and end-of-life considerations shape crisis care. Grounded in Jesuit values of cura personalis and social justice, learners evaluate quality and safety initiatives, healthcare systems, and emerging technologies, including artificial intelligence, with emphasis on equity, advocacy, and the nurse's role in improving outcomes. By course completion, students will recognize and respond to complex patient deterioration, coordinate care in high-acuity environments, and apply systems-based, ethical, person-centered decision-making to support safe, equitable care for critically ill adults and those facing end-of-life transitions.
Outcomes:
Synthesize advanced pathophysiologic and pharmacologic concepts to plan evidence-based nursing care for adults with complex, multisystem, and life-threatening conditions; Analyze clinical data and patterns of deterioration, and safety risks to guide nursing responses for adults with complex health needs; Design interprofessional collaboration and care coordination strategies that support effective teamwork and safe transitions of care in high-acuity and complex clinical environments; Appraise health policies, informatics applications, and organizational structures to propose system-level improvements that enhance equity, efficiency, and patient safety; Integrate ethical principles, psychosocial considerations, and evidence-based palliative approaches to plan compassionate, person-centered care for adults experiencing serious illness and end-of-life transitions

MSN 465L Adult Health Nursing II: Complex and High Acuity Care Clinical (2 Credit Hours)
This clinical course provides nursing students with supervised experiential learning focused on the care of adults with complex, multisystem, and life-threatening conditions in high-acuity healthcare settings. Building on concurrent Adult Health II didactic content, students apply advanced clinical judgment, prioritize care for deteriorating patients, and integrate pathophysiologic, pharmacologic, psychosocial, and ethical considerations into nursing practice. Through direct patient care, interprofessional collaboration, documentation, and reflective practice, students examine how health systems, technology, policy, and equity influence outcomes for critically ill and dying patients. Grounded in Jesuit values of cura personalis and social justice, the clinical experience emphasizes compassionate, ethical, and accountable nursing care across acute, transitional, and community-linked settings. By the end of the course, students will demonstrate readiness to safely manage complex patient assignments, communicate effectively within interprofessional teams, and provide person-centered care in high-acuity and end-of-life contexts.
Outcomes:
Apply advanced assessment skills and clinical judgment to deliver safe, evidence-based nursing care for adults with complex, multisystem, and high-acuity health conditions; Prioritize and manage care for deteriorating patients by integrating physiologic data, medication effects, and safety indicators within scope of practice; Demonstrate effective interprofessional communication, including SBAR handoffs and professional documentation, to support coordinated care across high-acuity settings and transitions; Integrate systems awareness, informatics tools, and safety principles to support quality care, risk mitigation, and equitable outcomes for complex adult patients; Provide compassionate, person-centered nursing care that incorporates ethical principles, psychosocial support, and palliative approaches for adults experiencing serious illness and end-of-life transitions

MSN 485 APN Practicum: Adult/Older Adult Acute Care NP (1-12 Credit Hours)
Pre-requisites: GNUR 413, GNUR 425 & GNUR 442 (minimum grade of B-)
This clinical practicum is designed to guide the student toward the development of scientific knowledge and advanced practice skills in the area of acute care nursing. The attainment of this advanced practice mastery involves the synthesis of concepts, knowledge and skills gained in the previous courses applied to the care of the acutely ill adult patient. Course content focuses primarily on the advanced practice of acute care nursing and guides the student toward an actualization of the role of the acute care practitioner. The student will care for the acute care patient from admission to the tertiary care center through discharge/rehabilitation when possible. Through the use of nursing frameworks, nursing diagnosis, the nursing process, application of advanced knowledge, and advanced practice skills, the student will develop strategies for the nursing management of the critically ill patient. Professional, legal, cultural and ethical implications are presented. The practicum offers the student opportunities to work with the interdisciplinary team and to develop skills necessary for advanced practice nursing, advanced management, and exploration of research in the area of acute care nursing. Clinical seminars will include discussion of concepts that have been introduced in previous courses and will be built upon with added depth. A grand rounds/case study approach will be utilized with cases cared for by students in the clinical arena. Other possible topics include: implementation of the advanced practice nursing role, social support, patient advocacy, vulnerable populations, cultural diversity, contracting, credentialing, privileging, etc. Seminars will also include identification of ethical issues in the students' practice, application of research findings, applying a Jesuit philosophy in the care of the acutely ill individual or family, and individual development of a philosophy of advanced practice nursing. Seminars will include student and faculty-led discussions.

MSN 510 Clinical Practicum for Advanced Practice in the CNS role (2-4 Credit Hours)
Pre-requisites: MSN 447 CNS Practice Across the Adult Age Spectrum
This practicum course guides the student toward a synthesis of concepts and content from nursing and related sciences, and toward the application of this knowledge to the advanced practice nursing of patients across the adult age spectrum. Clinical Nurse Specialist (CNS) students are prepared to impact three spheres: client, nurse/ nursing practice and the healthcare system. This course prepares students to make important contributions to health care including: disseminating new knowledge; designing and evaluating innovative strategies to improve quality of care and safety in all settings; improving systems of care; providing leadership that promotes interprofessional collaboration; and influencing and shaping health policy. Clinical experiences are provided in clinical areas related to the student's population as well as area of specialization in order to demonstrate achievement of quality, cost-effective, patient focused outcomes across all three spheres of impact.
Outcomes:
At the end of the course the student will be able to: 1) Apply nursing health related models in the clinical practice setting; 2) Collaborate with the interprofessional team to support and improve patient outcomes; 3) Demonstrate the role of the CNS across the three spheres of impact: client, nurse/ nursing practice, and the healthcare system; 4) Design, deliver and evaluate evidence-based solutions to health-care problems that represent translation of best evidence into practice; 5) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 6) Incorporate teaching-learning principles in meeting the educational needs of patients, their families, professional nursing staff, and the community at large; and 7) Analyze psychosocial, legal, ethical, political, and spiritual factors relevant to advanced nursing practice across the three spheres of impact

MSN 516 Adult Gerontology Acute Care NP Practicum (2-5 Credit Hours)
Pre-requisites: GNUR 536 Mgmt of Adults with Acute/Critical Conditions I and 538 Mgmt of Adults with Acute/Critical Conditions II
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in acute care. The practicum offers the student opportunities to work with the interprofessional team and to develop skills necessary for advanced practice nursing, including advanced management and exploration of evidence in the area of acute care nursing.
Outcomes:
1) Assess acutely ill adults applying nursing, behavioral and natural sciences concepts; 2) Collaborate with an interprofessional team in providing care to acutely ill patients in primary, secondary and tertiary health care settings; 3) Apply evidence-based strategies to the management of acutely ill adults; 4) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 5) Incorporate teaching-learning principles in meeting the educational needs of patients, families, and the community at large; 6) Examine quality improvement issues in the clinical setting, prioritizing patient safety and cost effectiveness; 7) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens

MSN 520 Clinical Nurse Specialist Practicum I (3 Credit Hours)
This practicum introduces students to the role and functions of the clinical nurse specialist (CNS) in the systematic delivery of advanced practice nursing within organizations. Students will demonstrate initial role development as a CNS in the care of patients across the adult age spectrum. Competencies and components of the role of CNS are explored in the three spheres of impact (Patient Care, Nurses and Nursing, Organization and Systems).
Outcomes:
Apply current evidence to guide CNS practice; Generate clinical decisions based on integrated pathophysiological, pharmacological, and psychosocial knowledge; Collaborate with the interprofessional team to support and improve patient outcomes; Identify the role of the CNS across the three spheres of impact: client, nurse/ nursing practice, and the healthcare system; Operationalize the CNS role in direct patient care and consultation

MSN 522 Clinical Nurse Specialist Practicum II (3 Credit Hours)
In this practicum the CNS student will continue to develop CNS role competencies. Students will employ data-driven decision-making to enhance clinical and organizational outcomes. Students will demonstrate leadership in care delivery, safety, and quality improvement at the system level.
Outcomes:
Assess the practice environment and processes for improvement opportunities; Participate in systematic quality improvement and safety initiatives; Mentor nurses and nursing staff in using evidence-based practice principles; Participate in the process of selecting, integrating, managing, and evaluating technology and products to promote safety, quality, efficiency; Incorporate teaching-learning principles in meeting the educational needs of patients, their families, professional nursing staff, and the community at large; Facilitate interprofessional collaboration to address practice gaps

MSN 523 Clinical Nurse Specialist Practicum III (3 Credit Hours)
This practicum continues student growth in CNS role development actualizing functions and competencies of the clinical nurse specialist (CNS) in the systematic delivery of advanced practice nursing within complex organizations. Competencies and components of the role of the CNS are explored in the care of patients across the adult age spectrum to demonstrate assessment and intervention strategies, including pharmacologic and nonpharmacologic interventions, to address acute and chronic health conditions and human responses to illness. Students are expected to exhibit professional accountability and role identity as CNS.
Outcomes:
Design evidence-based interventions, including advanced nursing therapies, to meet the needs of complex patients; Incorporate determinants of health and health equity assessments and perspectives into practice; Prescribe medications, therapeutics, diagnostic studies, equipment, and procedures to manage the health issues of patients; Lead quality improvement and safety initiatives; Apply clinical practice guidelines and evidence to inform CNS-led interventions

MSN 524 Clinical Nurse Specialist Practicum IV (3 Credit Hours)
This final CNS practicum offers CNS students the opportunity to fully enact CNS role competencies in all spheres of impact (patient, nurse, system). Students will achieve competency in designing and evaluating innovative strategies to improve quality of care and safety in all settings; improving systems of care; providing leadership that promotes interprofessional collaboration; and influencing and shaping health policy. This course provides the student an opportunity to demonstrate a synthesis of previous coursework and clinical practicum in preparation for independent advanced practice as a clinical and professional leader. Students are expected to exhibit professional accountability and role identity as CNS.
Outcomes:
Implement advanced CNS role competencies across the client, nurse/nursing practice, and healthcare system spheres of impact; Demonstrate CNS practice and fiscal outcomes to internal stakeholders; Design, deliver, and evaluate evidence-based solutions to health-care problems that represent translation of best evidence into practice; Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; Apply ethical decision-making frameworks to advocate for patients/families, nurses, other healthcare providers, populations, and the community; Demonstrate leadership in interprofessional collaboration for evidence-based care; Integrate scholarship, leadership, and clinical expertise to improve health outcomes

Master of Nursing (MN)

The Master of Nursing (MN) program is a transformative, graduate-level pathway for individuals with baccalaureate or higher degrees who want to transition to a career as a registered professional nurse. The program builds on prior academic achievement, professional experience, and pre-requisite coursework.

The 16-month, full-time, four-semester program is offered at the Health Sciences Campus in Maywood, Illinois. Coursework, laboratory, and simulation learning experiences are completed in person at that campus. Clinical learning experiences are completed at health care partner sites throughout the Chicagoland area. Clinical learning is integrated across all semesters of the program and includes acute care and community based experiences.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Integrate advanced knowledge from nursing, liberal arts, and sciences to provide evidence-based practice that demonstrates clinical judgment, honors the whole person—body, mind, and spirit—and advances the nursing discipline through scholarship
- Provide person-centered, compassionate care informed by cura personalis and social justice that upholds human dignity, addresses health disparities, and utilizes therapeutic communication across the lifespan and care continuum
- Apply population health principles and interprofessional partnerships to collaborate with diverse stakeholders, address social determinants of health, and advance health equity through evidence-based interventions and advocacy
- Implement comprehensive, collaborative plans of care that integrate quality and safety principles, clinical judgment, and ethics to achieve expected outcomes and minimize risk of harm
- Evaluate healthcare outcomes using scholarly inquiry and evidence-based practice to continuously improve nursing care, translate research into practice, and promote health equity
- Demonstrate systems-based practice and leadership by analyzing and influencing complex healthcare systems, utilizing informatics and healthcare technologies to enhance clinical judgment, and serving as conscientious stewards of resources
- Analyze health policy and advocate at organizational, systems, and governmental levels to influence policies that address social determinants of health and promote equitable access to care for all populations
- Synthesize nursing values, ethics, and social justice frameworks to demonstrate professionalism while maintaining accountability to patients, the profession, and society
- Design personal, professional, and leadership development through self-reflection, lifelong learning, advocacy for environmental health, and cultivation of resilience and well-being that supports excellence in advanced nursing practice with global awareness

Nursing and Healthcare Administration (MSN)

As of Fall 2026, this program is no longer accepting applicants.

The MSN track in Nursing and Healthcare Administration is designed to prepare the next generation of nursing executives with the clinical and administrative skills to shape nursing and health care teams and improve the overall delivery of patient care.

Clinical Requirements

All our practicums are designed by faculty members, who will help you secure your clinical site placements. Practicum experiences for the

Nursing & Health Care Administration program can be completed in the student's geographical area.

The Nursing & Health Care Administration Practicum is six semester hours (each semester hour equals 56 clock hours).

Exam Requirements

All MSN students are required to complete a comprehensive exam to complete their degree.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

This is a sample program plan based on a Fall semester start. All students will work with their program director to create their program plan prior to starting the program.

[1] Nursing and Healthcare Administration MSN is an online program that will include immersion weekends. There will be one weekend in the Fall semester and one weekend in the Spring semester for the first two years of the student's program. Immersion weekends will begin on Saturday morning and conclude Sunday afternoon.

Immersion Sessions

Loyola's Nursing Health Care Administration MSN program is offered in a hybrid learning format that combines distance education with on-campus immersion sessions annually incorporating course work, seminars, and presentations.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Master of Science in Nursing (MSN) program is to prepare nurses at the master's level who use advanced knowledge and skills to assume a leadership role in interprofessional healthcare delivery to improve health outcomes at the system, population, or individual patient levels.

Program Outcomes

At the completion of the MSN program, the graduate has the knowledge and skills to:

- Integrate scientific findings from nursing, healthcare, and biopsychosocial fields; public health sciences; and the Jesuit Catholic tradition for the continual improvement of nursing and healthcare across diverse settings.
- Function as a leader emphasizing ethical and critical decision-making, effective working relationships, and application of organizational sciences in a systems perspective, to promote safe and high quality patient-centered care.
- Use translational science to integrate evidence into practice.
- Critically appraise healthcare technologies and information systems and incorporate data to promote optimal communication and healthcare delivery at the system and patient-care levels.
- Understand and appreciate the importance of health policies on health status and employ advocacy strategies to positively influence health care at the population level.

- As a leader or member of an interprofessional team, effectively communicate, collaborate, and consult with other health professionals to improve patient and population health outcomes.
- Working collaboratively with patients, families, and communities, utilize culturally sensitive evidence-based strategies for health promotion and disease prevention locally, nationally, and globally.
- Use expanded knowledge and change-agent skills for professional growth and the provision of indirect and direct care that enhances outcomes for individuals, populations, and systems.

Adult-Gerontology Acute Care Clinical Nurse Specialist (DNP)

As of Fall 2026, this program is no longer accepting applicants.

Graduates of the Adult-Gerontology Acute Care Clinical Nurse Specialist track use advanced skills to care for adults in increasingly complex acute and critical care settings. The curriculum focuses on three spheres of impact: patient care, nursing personnel, and the health care system. Graduates of the track possess the core competencies to practice as a CNS for acute and critically ill adult patients in a variety of inpatients settings, including direct care, consultation, systems leadership, collaboration, research, ethical decision-making, and advocacy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Adult-Gerontology Acute Care Nurse Practitioner (DNP)

Learn to care for adults with complex and critical conditions.

The Adult Gerontology Acute Care Nurse Practitioner track is designed to develop the advanced skills and knowledge to handle complex and critical patient situations, involving adults and older adults.

- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Adult Gerontology Clinical Nurse Specialist with Oncology Specialty (DNP)

As of Fall 2026, this program is no longer accepting applicants.

The Clinical Nurse Specialist (CNS) role provides leadership for best practice initiatives and cost- effective quality improvement.

Clinical Nurse Specialists possess the advanced knowledge and skills to coordinate quality care practices across three spheres of impact: patient care, nursing personnel, and the health care system. The role may include direct patient care, as well as consultation, systems leadership, research, ethical decision-making, and advocacy.

The oncology specialty preparation in the Adult Gerontology Clinical Nurse Specialist track provides the graduate with advanced oncology knowledge and skills to care for patients and their families across the cancer care continuum.

Clinical Experience

DNP students are required to complete practicums that focus on acquiring the advanced skills and knowledge to meet the competencies to practice as an Adult-Gerontology Primary Care NP. Faculty design clinical rotations and place students with preceptors. Loyola maintains academic-practice partnerships throughout the Chicago metropolitan area with a focus on working in underserved communities.

A minimum of 2,000 hours of clinical practice experience is required before entering the first APRN clinical rotation. Clinical placements for students in these programs are in the Chicago area, and students must have an Illinois RN license before they begin their clinical experience/rotation.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Adult-Gerontology Primary Care Nurse Practitioner with Oncology Specialty (DNP)

As of Fall 2026, this program is no longer accepting applicants.

The Adult-Gerontology Primary Care Nurse Practitioner Program is designed to prepare graduates to conduct advanced health assessments and histories, develop treatment plans for acute illness and chronic disease management, manage overall adult and gerontologic patient care, including issues related to aging and development, and leadership in interprofessional advanced nursing practice.

The oncology specialty preparation in the Adult Gerontology Primary Care Nurse Practitioner track provides the graduate with advanced oncology knowledge and skills to care for patients and their families across the cancer care continuum.

Psychiatric Mental Health Nurse Practitioner (DNP)

The Psychiatric-Mental Health Nurse Practitioner track of the DNP program is designed to prepare graduates to conduct psychiatric mental health evaluations and advanced health assessment and histories, develop therapeutic rapport with clients and families, promote mental health, develop and implement mental health treatment plans included medication management and counseling and provide leadership in interprofessional team management of clients with psychiatric and mental health conditions.

Related Programs

Doctoral

- Psychiatric Mental Health Nurse Practitioner with Substance Use and Addictions Specialty (DNP) (p. 1502)
- Systems Leadership (DNP) (p. 1504)

Curriculum

The Psychiatric Mental Health NP program is a blended format with both online and in-person instruction, including Immersion weekends at Loyola's Health Sciences Campus. Many students are working professionals with families, so we offer both part-time and full-time options to fit your schedule.

With our rigorous curriculum and significant number of credit and clinical hours, we seek to prepare you to successfully take the American Nurses Credentialing Center (ANCC) certification board in Psychiatric Mental Health Nurse Practitioner (Across the Lifespan).

The DNP can be completed in 74 credit hours or about four to five years.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Systems Leadership (DNP)

As of Fall 2026, this program is no longer accepting applicants.

The Systems Leadership track of the Doctor of Nursing Practice program integrates advanced nursing practice competencies in a post- master's curriculum that includes leadership, systems thinking, quality and safety, health policy, and health care economics and finance.

This program is available to students entering with a completed MSN degree.

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Women's Health/Gender Related Nurse Practitioner (DNP)

The Women's Health/Gender Related track of the Doctor of Nursing Practice program prepares graduates to conduct advanced health assessments and health histories, develop treatment plans for acute illness and chronic disease management, manage health across the lifespan, including pregnancy and menopause, manage sensitive topics in women's and gender related health, and provide leadership in interprofessional, team-based evidence-based health care.

Practicum		**12**
GNUR 543	Adult Primary Care NP Practicum	
Total Hours		**71**

Clinical Experiences

A minimum of 2,000 hours of recent clinical practice experience is required before entering the first APRN clinical rotation. Clinical placements for students in these programs are in the Chicago area, and students must have a RN license in the state of Illinois before they begin the clinical portion of the program.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Program Goal

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

Program Outcomes

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Post-Graduate Advanced Practice Registered Nurse (APRN) Certificate

The Post-Graduate APRN Certificate program is designed for graduate prepared registered nurses who wish to obtain preparation in an additional advanced practice nursing role and/or population, and eligibility for completing the certification examination in that role and/or population. A gap analysis that considers prior graduate level coursework and the recency of that coursework serves as the foundation for an individualized program of study leading to the certificate.

Program Goal

The goal of the post-graduate Advanced Practice Registered Nurse (APRN) certificate programs is to prepare APRNs in a selected role and population, with the option of a specialty focus, by building on previous graduate level nursing education.

Related Programs

Master's

- Nursing and Healthcare Administration (MSN) (p. 1491)

Doctoral

- Nursing (PhD) (p. 1382)

Certificate

- Oncology Nursing Certificate (p. 1507)

The coursework in the Post-Graduate APRN Certificate Program is individualized, based on prior graduate level coursework in nursing, and the recency of that coursework. At a minimum, students in the Post-Graduate APRN Certificate Program will complete patient care management coursework and clinical practicum experiences relevant to the role and population focus being pursued through the program.

Learning Outcomes

Upon the successful completion of the Post-Graduate Certificate Program, the graduate will be able to:

- Integrate scientific findings from nursing, healthcare, biopsychosocial fields and public health into values-based advanced practice nursing care.

- Function as a clinical leader, emphasizing ethical and critical decision-making and effective working relationships in the delivery of safe, high quality, patient-centered care.
- Use translational science to integrate evidence into practice.
- Employ advocacy strategies in advanced nursing practice.
- Collaborate with patients, families, and communities, utilizing culturally sensitive, evidence-based strategies for health promotion and disease prevention.
- Communicate, collaborate, and consult with members of the interprofessional team in the improvement of patient and population health outcomes.

Oncology Nursing Certificate

As of Fall 2026, this program is no longer accepting applicants.

The Oncology Certificate program is designed for baccalaureate or graduate prepared nurses who desire to advance their skills and knowledge in the care of patients with cancer.

Students may also complete Oncology Specialization as part of their program of study in the Adult-Gerontology Clinical Nurse Specialist or Adult-Gerontology Primary Care Nurse Practitioner tracks of the DNP program.

Loyola Nursing's Online Oncology Certificate program is designed for advanced practice nurses and BSN-prepared nurses who want to advance their oncology knowledge and skills. Experience in an oncology nursing practice area is required.

Related Programs

Doctoral

- Adult-Gerontology Primary Care Nurse Practitioner with Oncology Specialty (DNP) (p. 1498)
- Psychiatric Mental Health Nurse Practitioner (DNP) (p. 1501)

Certificate

- Post-Graduate Advanced Practice Registered Nurse (APRN) Certificate (p. 1506)

Curriculum

Loyola's Oncology Certificate program focuses on the continuum of cancer care—from prevention, risk identification, acute care, and end of life. The online certificate can be completed in nine semester hours.

Students pursuing an Oncology Certificate, will take the following courses:

Code	Title	Hours
GNUR 551	Cancer Care: Cancer Biology and Epidemiology	3
GNUR 555	Cancer Care: Palliative/Supportive Management	3
GNUR 553	Cancer Care: Diagnostic and Therapeutic Approaches	3
Total Hours		**9**

Students pursuing Oncology Specialty preparation as part of the DNP program complete the following courses and the oncology specialty practicum:

Code	Title	Hours
GNUR 551	Cancer Care: Cancer Biology and Epidemiology	3
GNUR 555	Cancer Care: Palliative/Supportive Management	3
GNUR 553	Cancer Care: Diagnostic and Therapeutic Approaches	3
Oncology Specialty Practicum		6
Total Hours		**15**

Suggested Sequence of Courses

Course	Title	Hours
Year 1		
Fall		
GNUR 551	Cancer Care: Cancer Biology and Epidemiology	3
	Hours	**3**
Spring		
GNUR 555	Cancer Care: Palliative/Supportive Management	3

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The Oncology Nursing Certificate program is focused on:

- Collaboration with health professionals to plan and implement best practices in cancer care
- Providing advanced nursing care to patients and families across the cancer care continuum

Parkinson School of Health Sciences and Public Health

Loyola University Chicago's Parkinson School of Health Sciences and Public Health brings together our call as a Jesuit institution to go to the frontiers of education, research, and practice, and help people who live at the margins.

An established leader in health care education with the Stritch School of Medicine and the Marcella Niehoff School of Nursing, the Parkinson School of Health Sciences and Public Health draws on those strengths to address today's public health challenges and train the next generation of experts in public health, health systems and informatics, dietetics, exercise science, and medical laboratory science.

Flexible degree programs and certificates are available as listed below that meet student, community, and industry needs. The Parkinson School includes programs for undergraduate and graduate students, as well as career professionals who seek additional skills or a career change. Innovative and accessible program formats for adult learners along with traditional undergraduates include online instruction and hybrid learning programs on Loyola's Health Sciences Campus and Lakeshore campuses.

Graduate Programs

- Clinical Certificate in Blood Banking (p. 1524)
- Clinical Certificate in Hematology (p. 1525)
- Clinical Certificate in Microbiology (p. 1525)
- Dietetic Internship Certificate (p. 1526)
- Dietetics (MS) (p. 1530)
- Exercise Science (MS) (p. 1531)
- Health Informatics (MS) (p. 1533)
- Health Informatics Certificate (p. 1536)
- Healthcare Administration (MHA) (p. 1536)
- Medical Laboratory Science (MS) (p. 1539)
- Medicine/Public Health (MD/MPH) (p. 1879)
- Public Health (MPH) (p. 1540)
- Public Health Certificate (p. 1544)
- Social Work/Public Health (MSW/MPH) (p. 1904)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Exercise Physiology (EXCM)

EXCM 401 Applied Physiology of Exercise (4 Credit Hours)
This course focuses on biologic system responses at rest, during exercise, and as the result of training. Major emphasis is placed on bridging gaps between introductory concepts of exercise physiology and the contemporary research evidence that further advances the field of exercise science. The effect of environmental systems and factors on the regulatory response to exercise is addressed. The history and major milestones associated with the development of the science of exercise physiology are presented. Future developments in the field of exercise physiology, such as the role of genetics and genomics are integrated into the course. Laboratory and field experiences provide students with opportunities to apply theory to practice.
Outcomes:
1) Describe major milestones, influences, and future directions in the development of the science of exercise physiology; 2) Explain the importance of the physiological adaptations that occur as a result of properly designed training programs; 3) Analyze measures of the physiology of respiration, circulation, energy production, metabolism, and muscle function in rest and exercise states; 4) Interpret research findings focused on cardiovascular, respiratory, metabolic and neuromuscular physiology in exercise science; 5) Perform selected laboratory and field tests of physiological function and physical fitness; 6) Interpret results from laboratory and field tests of physiological function and physical performance; 7) Differentiate positive training changes and signs and symptoms of overtraining among healthy individuals throughout the life cycle

EXCM 424 Motor Learning and Performance (3 Credit Hours)
The course provides instruction in how humans control locomotion and how they learn/re-learn motor skills. Specifically, the course emphasizes the observable behavioral aspects of motor control/learning while detailing the neurophysiological and biomechanical processes that result in motor behaviors. Major course concepts include information processing and decision making; speed, accuracy, and coordination; and knowledge and skill acquisition and transfer.
Outcomes:
1) Understand theoretical approaches that drive motor control and motor learning research; 2) Analyze principles and processes underlying movement skilled performance; 3) Analyze the human motor system and how it supports the acquisition and retention of complex movement skills; 4) Adapt instruction situations to achieve maximum performance and retention of learned skills; 5) Relate information processing and decision-making models to performance and movement

EXCM 435 Health Promotion and Wellness Theories and Frameworks (3 Credit Hours)
This course emphasizes health promotion in diverse and changing cultures and societies. Determining and influencing factors of health are examined from a cultural competence perspective. Major health promotion, wellness, behavioral, and lifestyle theories that influence the professional practice of exercise science in community settings are integrated throughout the course. The role of the exercise scientist in health education for the prevention and treatment of health problems, health promotion, and enhancing quality of life is emphasized.
Outcomes:
1) Relate concepts of health, health promotion, and wellness that influence individual and group health and quality of life; 2) Assess the health education and health promotion needs of individuals and groups in diverse populations; 3) Design culturally congruent health education, wellness, and behavioral modification programs, focused on improved health and quality of life, in community-based settings; 4) Implement health education, wellness, health promotion, and behavioral modification programming for diverse populations; 5) Evaluate health education, wellness, health promotion and behavioral modification programming in a variety of settings, using an outcomes-oriented approach; 6) Identify cultural, social, economic, and political influences on decision making and action in health and wellness

EXCM 444 Strength Training and Conditioning (3 Credit Hours)
This course focuses on the analysis of theory in the improvement of athletic performance, with specific emphasis on assessment and implementation of resistance training programs. Foundational knowledge in human physiology and biomechanics is applied to principles of speed, agility, power, flexibility, and technique development specific to individuals¿ goals. Principles of anaerobic and aerobic metabolism in relation to strength training and conditioning are a major focus in the course. This course provides foundational preparation for students interested in taking the National Strength and Conditioning Association Certified Strength and Conditioning Specialist's exam.
Outcomes:
1) Analyze the relation between resistance training and human performance; 2) Incorporate appropriate exercises, such as resistance training, medicine ball, balance, plyometric, and linear and lateral movement exercises into exercise prescriptions; 3) Differentiate between general fitness prescriptions and specific training to enhance athletic performance; 4) Evaluate biomechanical aspects of efficiency and performance; 5) Apply performance enhancement training principles to individuals' specific needs and goals

EXCM 450 Nutrition, Health and Performance (3 Credit Hours)
This course focuses on advanced concepts of nutrition as these relate to health, exercise, fitness, and performance. The role of micronutrients and macronutrients in major dimension of health and fitness are addressed. Advanced concepts in nutrient selection, metabolism, and timing are integrated into plans for supporting and improving health and performance. Collaborative practice with dietetics professionals and the interprofessional team in optimizing health, fitness, and performance capacity is a major unifying concept of the course.
Outcomes:
1) Attribute major functions of macronutrients and micronutrients to health, exercise, fitness and performance; 2) Apply principles of evidence-based nutrition to the food habits and practices of diverse individuals and populations; 3) Analyze energy and nutrient intake based on level of training and type of sport and exercise; 4) Understand roles and domains of practice of collaborating professions in promoting health, fitness and performance; 5) Develop interprofessional competencies to collaborate with nutrition professionals in optimizing nutrition for health, fitness, and performance

EXCM 454 Applied Sports Science (3 Credit Hours)
This course focuses on the application of science in the study of elite athlete sports performance. Advanced aspects of physiological monitoring, along with other athlete assessment tools will be examined. Special emphasis will be placed on the evidence-based, practical application of these various techniques, enabling a holistic approach to improving athlete health and performance.
Outcomes:
Identify the relation between cumulative stress and human performance; Plan periodized practices of strength and conditioning, sport training, nutrition, and psychological preparation to optimize performance in individual and team sport

EXCM 458 Cardiac and Pulmonary Disease and Rehabilitation (3 Credit Hours)
This course focuses on two prevalent areas of public health concern for the exercise scientist: cardiac and pulmonary health and disease. Emphasis is placed on prevention, etiology, pathophysiology, and understanding the diagnosis and treatment of cardiac and pulmonary disease. The role of the clinical exercise scientist in preventive and rehabilitative exercise intervention and programming to promote cardiac and pulmonary health is emphasized. Key factors in the development, management, and evaluation of cardiopulmonary rehabilitation programs are integrated into the course.
Outcomes:
1) Understand anatomy and physiology associated with cardiopulmonary health and disease; 2) Relate pathophysiology changes in cardiac and pulmonary disease to exercise prescription; 3) Explain diagnostic tests and procedures used in exercise assessment and intervention in cardiac and pulmonary health and disease; 4) Understand essential elements and phases of cardiac and pulmonary rehabilitation; 5) Design preventive exercise prescriptions for cardiac and pulmonary health in individuals and groups; 6) Design rehabilitative exercise prescriptions for patients with cardiac and pulmonary health alterations

EXCM 468 Application of Advanced Clinical Exercise Testing & Prescription (3 Credit Hours)
This course emphasizes theory, techniques, and procedures of clinical exercise stress testing for diagnostic and functional assessment of individuals. Students will develop competencies in clinical testing skills ranging from electrocardiography to graded exercise and physical performance testing. Data from diagnostic testing and functional assessments will be integrated into individualized exercise prescriptions, based on risk assessment and stratification. Responses to emergency situations in the exercise environment are addressed.
Outcomes:
Compare the signs, symptoms and scope of cardiovascular conditions, respiratory conditions, and metabolic conditions, and the development of these pathologies; Apply risk assessment and stratification models in the diagnostic and functional assessment of individuals; Evaluate the indications and contraindications of subject selection for testing, considering safety precautions, indications for test termination, and emergency procedures for conducting a graded exercise stress test; Differentiate normal and abnormal electrocardiographic responses to exercise of varying duration and intensity; Design appropriate exercise test mode and protocols in consideration of client characteristics

EXCM 475 Exercise Applications in Special Populations (3 Credit Hours)
This course focuses on the advanced knowledge and competencies needed to evaluate health behaviors and risk factors in special populations across the lifespan. The administration of fitness assessments and the design, implementation, and evaluation of exercise programs in special populations are addressed. Exercise is approached as a therapeutic and treatment modality for individuals and groups with a variety of anatomic, physiologic, cognitive and sensory alterations.
Outcomes:
1) Understand the advanced physiology of growth and development, aging, and the pathophysiology of health conditions, disease and disability in special populations; 2) Analyze the effects of exercise training and nutrition on the underlying etiology and pathophysiology of acute and chronic conditions; 3) Prescribe exercise activities to optimize health and performance in special populations; 4) Adapt exercise prescriptions based on the individualized needs of individuals with anatomic, physiologic, or sensory challenges; 5) Evaluate the effectiveness of adaptations to exercise prescriptions and programming in special populations

EXCM 478 EKG Interpretation (3 Credit Hours)
This course will help students master the practical competencies of electrocardiography (EKG), including performing a 12-lead EKG, ambulatory monitoring, and the concepts of monitoring and interpreting an EKG with and without exercise stress testing. Additionally, this course will present content related to the cardiac cycle, EKG abnormalities, ectopy, and dysrhythmias, and identifying ischemia. Students will perform hands-on 12-lead EKG analysis at rest and with exercise and the steps required for ambulatory monitor testing.

EXCM 480 Advanced Exercise Assessment and Programming (3 Credit Hours)
This course focuses on principles of periodization applied to a performance enhancement setting. Major dimensions of the course include cycles and periods, peaking for competition, and rest and recovery. Periodization models and theories are examined, with a special emphasis on contemporary research findings that are applied to enhance athletic training and physical performance. Assessment of training programs based on performance requirements are a major emphasis throughout the course.
Outcomes:
1) Apply periodization models in the optimization of athletic or physical training and performance; 2) Analyze the relationship between training volume and intensity over time; 3) Analyze principles of program design for performance enhancement; 4) Evaluate testing approaches to the assessment of strength and conditioning; 5) Generate exercise program modifications for individuals based on youth development, injuries, and inexperience; 6) Relate variables of overload, variation, and specificity to strength and conditioning training

EXCM 482 Research Methods and Evidence in Exercise Science (3 Credit Hours)
This course prepares the student to understand scholarly inquiry, evaluate research evidence, develop evidence-based practices/protocols, and generate knowledge for evidence-based practice in exercise and fitness. Methods of operationalizing scholarly inquiry include: understanding relations among theory, research, and practice; formulating research questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying research findings to exercise science practice. Social, cultural, political and ethical issues related to research are addressed, including special considerations of research conducted in exercise settings.
Outcomes:
1) Understand scholarly inquiry processes in relation to evidence-based practice and knowledge generation in the field of Exercise Science; 2) Formulate research questions that address clinical, educational, administrative, or policy issues for evidence-based practice in Exercise Science; 3) Understand the elements of various quantitative research designs; 4) Assess the adequacy of selected quantitative and qualitative designs in answering research questions in Exercise Science; 5) Evaluate extant evidence and theories relevant to knowledge gaps in the field of exercise science; 6) Analyze ethical issues and concerns in research related to Exercise Science

EXCM 485 Applied Biomechanics (4 Credit Hours)
This course will provide an analytical approach to the study of the human nervous system and human motion as applied to kinematic and kinetic analysis, study of anatomy, physiology, and mechanics.
Outcomes:
Students will use and apply laboratory measurement techniques commonly used in exercise science

EXCM 487 Movement Anatomy in Exercise (3 Credit Hours)
Concepts and principles from anatomy and biomechanics are integrated into the analysis of human movement. This course focuses on application of the principles of human movement for normal function and application to different levels of physical performance through case-based applications and classroom activities. Content includes anatomical lever systems, moment arms, stability and laws of motion. Systematic analysis of human movement in clinical conditions, performance, and wellness settings will be reviewed. Development of individual plans to improve movement is woven throughout the course.
Outcomes:
Analyze the relationship between biomechanics, anatomy, and human movement across a range of physical tasks; Integrate advanced understanding of upper and lower limb musculoskeletal anatomy, physiology, and function to explain movement efficiency and constraint; Apply functional anatomy and biomechanical principles to evaluate and justify movement strategies in normal physical performance; Evaluate movement techniques across populations, considering anatomical variation, mechanical tradeoffs, and contextual demands; Evaluate movement outcomes resulting from prescribed exercise or movement modifications, using anatomical and biomechanical rationale to support conclusions

EXCM 490 Special Topics in Exercise Science (1-3 Credit Hours)
Contemporary research, literature, projections and views as applied to fitness, nutrition, health, and well-being. Much of the learning that occurs in this course will be the result of group discussion. The topic areas covered will include fitness, nutrition, health, aging, obesity, and injuries. However, topics covered will largely be determined by student interests. Pre-requisites: Restricted to Parkinson School of Health Sciences and Public Health students.
Outcomes:
1) Understand research findings and scholarly writings in a specific topical area of Exercise Science; 2) Evaluate scientific and theoretical literature in s specific topic area of Exercise Science; 3) Direct scholarly discussion in a topical area of exercise science, with a focus on the individual, family, and community

EXCM 495 Field Experience I (3 Credit Hours)
This course is designed to provide 200 hours of practical experience working with diverse individuals and populations under the supervision and guidance of a preceptor. Settings may include those which provide cardiac and pulmonary care, physical rehabilitation or sports performance. Required seminars focus on program planning and evaluation, and human and fiscal resource management.
Outcomes:
Apply specialized exercise science knowledge and skills by implementing evidence-based interventions within authentic practicum settings; Collaborate effectively within interprofessional teams by integrating diverse professional perspectives to optimize patient/client outcomes; Demonstrate professional engagement through active involvement in planning sessions and team meetings; Evaluate the effectiveness of the exercise science interventions on the individuals or populations served

EXCM 496 Field Experience II (3 Credit Hours)
This course is designed to provide 200 hours of practical experience working with diverse individuals and populations under the supervision and guidance of a preceptor. Settings may include those which provide cardiac and pulmonary care, physical rehabilitation, or sports performance. Required seminars focus on program planning and evaluation, and human and fiscal resource management. This is the second of two required field experiences.
Outcomes:
Apply specialized exercise science knowledge and skills by implementing evidence-based interventions within authentic practicum settings; Collaborate effectively within interprofessional teams by integrating diverse professional perspectives to optimize patient/client outcomes; Demonstrate engagement through active involvement in planning sessions and team meetings; Evaluate the effectiveness of the exercise science interventions on the individuals or populations served

EXCM 499 Independent Study (1-4 Credit Hours)
Pre-requisites: Restricted to Parkinson Exercise Science students
This is a directed study course in exercise science for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes, and timelines. Permission of the Program Director required.
Outcomes:
Students will be able to miiculate a general understanding of the selected topic

Food and Nutrition (FONU)

FONU 400 Role Development in Dietetic Practice (1 Credit Hour)
Pre-requisites: Admission to the dietetic internship
This course includes concepts and resources related to professional practice as a registered dietitian. Ethical issues, licensure, and scope of practice will be explored. Professional development will be discussed from entry-level to advanced practice. Fiscal aspects of professional practice, such as reimbursement and compensation, will also be considered.
Outcomes:
Students will define ethical issues, licensure requirements, increase professional development, and learn about fiscal aspects of the practice, such as reimbursement and compensation

FONU 410 Nutrition Focused Physical Assessment (2 Credit Hours)
This course focuses on physical and laboratory assessment skills necessary for the dietitian's practice, particularly in nutritional assessment and medical nutrition therapy. Emphasis is placed on skill development relevant to nutrition care of the individual, and/or for nutrition program delivery or evaluation. This course incorporates both classroom and lab activities. Master of Science in Dietetics major, or instructor permission
Outcomes:
Demonstrate competence in conducting a nutrition-focused physical assessment; Demonstrate skills for assessment and care of the patient receiving specialized nutrition support; Measure common physiologic parameters used in medical nutrition therapy

FONU 420 Transition to Supervised Practice in the Dietetic Internship (1 Credit Hour)
Pre-requisites: admission to LDI
This course begins skill development in preparation for the transition from the classroom environment to supervised practice in dietetics. Topics include ethical, legal, and safety issues for novice dietetic practice such as OSHA, HIPPA, IDPH, and standards of other regulatory agencies in health care. The nutrition care process including nutrition diagnostic language, planning and implementation of medical nutrition therapy (MNT) interventions are discussed. Basic familiarity and use of evidence-based practice protocols related to common conditions such as hypertension, diabetes, cardiovascular, renal, and/or gastrointestinal disorders, provision of specialized nutrition support and others. Medical terminology mastery is expected. Emphasis is placed on synthesis and application of undergraduate material, and effective clinical resource application.

FONU 422 Medical Nutrition Therapy Theory (3 Credit Hours)
Pre-requisites: FONU 420
This course includes the study of medical nutrition therapy (MNT) theory for dietetic practice including acute care, long term and outpatient environments. Complex medical conditions including trauma, burns, transplant, oncology, diabetes mellitus, sepsis, cardiovascular, gastrointestinal, neurological, and renal disorders. Alternate modalities of nutrition supported are included. The course includes theoretical foundations of patient care protocols, synthesis of research findings, and trends in health care related to practice protocols. This course should be taken in conjunction with FONU 423 for current Loyola dietetic interns.

FONU 423 Supervised Practice (SP) in Medical Nutrition Therapy (2 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course requires the student to complete 480 hours of dietetic SP in health care environments that provide acute care and renal replacement therapy. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 422. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 424 Public Health Nutrition and Research Theory for Dietetic Practice (3 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course includes the study of nutritional epidemiology, general principles of public health, major public health nutrition programs, research for beginning dietetic practitioners and professional development issues. Nutritional surveillance, program evaluation, and methods are discussed through lecture and review of professional literature.

FONU 425 Supervised Practice Public Hlth Nutrition, Rsrch, Prof Dvlpmnt & Marketing (2 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course includes 480 hours of dietetic SP in public health nutrition, research, marketing and an elective professional development area. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 424. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 426 Food Management Theory: Geriatric Nutrition (1 Credit Hour)
This course provides study of food management theory including food systems, operations, resource management (human, food, financial), quality improvement, safety and sanitation. Geriatric nutrition care and management theory is also revised from perspectives of medical care and facility management including regulatory agency standards.

FONU 427 Supervised Practice: Food Management, Geriatric Nutrition (1 Credit Hour)
This course requires the student to complete 240 hours of SP in food management and geriatric nutrition/long term care environments. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 426. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 499 Independent Study (1-4 Credit Hours)
Pre-requisites: Restricted to Parkinson Exercise Science students
This is a directed study course in exercise science for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines. Permission of the Program Director.
Outcomes:
Students will be able to miiculate a general understanding of the selected topic

FONU 501 Writing and Communications in Nutrition and Dietetics (3 Credit Hours)
This course focuses on scientific writing and communication skills essential to dietetic practice. Emphasis will be placed on clarify, consistency and translation of scientific evidence into effective messages for diverse populations. Standards for publication of practice and research based papers understanding and responding to peer review process will be discussed. Master of Science in Dietetics major, or instructor permission
Outcomes:
Create proposals, scientific reports and/or articles using writing skills of planning, drafting, revising and editing to incorporate appropriate evidence tailored to different audiences, publications and media formats

FONU 503 Dietetic Theories & Research Methods (3 Credit Hours)
This course analyzes theories of health and disease with implications for dietetic practice. Principles of research will be examined with a focus on methods to assess food, nutrients and related physical or biochemical parameters.

FONU 505 Trends in Dietetic Practice (2 Credit Hours)
Pre-requisites: admission to the MS in Dietetics, Dietetic Internship or FONU Program Director permission
This course includes emerging scientific research in the dietetics field as it relates to consumer food choices, evaluating the safety and health of the food supply, functional foods, vegetarian diets, food allergics and weight management. The course will focus on theoretical foundations, and synthesis of research trends into practice protocols. Mock counseling sessions will also occur utilizing up to date counseling methods including movational interviewing for behavior change.
Outcomes:
Student will demonstrate knowledge in emerging areas related to dietetic practice

FONU 507 Behavioral Change for Health Promotion (3 Credit Hours)
This course focuses on concepts and theories of health and behavior related to food, nutrition and other behaviors. Evidence to support select skills and techniques for health will be evaluated and applied. The impact of interventions will be analyzed to provide evidence-based frameworks for behavioral change in individuals and groups. Master of Science in Dietetics major, or instructor permission.
Outcomes:
Incorporate evidence-based behavioral change interventions into nutrition care plans; demonstrate skill in a behavioral change encounter in a simulation, analyze major approaches and influences of health promotion (eg policy, community engagement, advocacy and social marketing)

Health Informatics & Data Science (HIDS)

HIDS 401 Foundations of Health Informatics (3 Credit Hours)
This course offers students a broad overview of health informatics as a foundation for further study of the topic. Designed as a survey of informatics domains as well as primer of informatics methods, this course serves as an introduction for anyone interested to ask good informatics questions, employ informatics tools, or design informatics systems across a broad range of biomedical applications.
Outcomes:
Understand the differences between data, information, and knowledge, and analyze the processes to transform data into actionable knowledge in the context of health and biomedical domains; Understand the particular nature of data, information, and knowledge in health, analyze the importance and limitations of coding standards; Analyze and evaluate the role of health informatics and its societal impact; Analyze the current trends and current issues in health informatics

HIDS 405 Data Wrangling for Analytics (3 Credit Hours)
Data are messy, come from different sources, and are seldom complete. This course provides an in-depth study of how to prepare data coming from various sources, in different formats, with noisy information, in order to perform meaningful and sound analyses. Contents include grouping data, visualizing data, and aggregating data from the web and other sources.
Outcomes:
1) Program basic data integration and cleaning routines; 2) Evaluate the access and organization of various sources of information; 3) Assess the quality of data for a particular use case; 4) Apply techniques that group, transform and aggregate data

HIDS 408 Building Trust in Scientific Health Communication (3 Credit Hours)
This course familiarizes students with the concepts of misinformation, disinformation, and communicating for impact. Content covered includes how to fact check and how to combat misinformation and disinformation in practice.
Outcomes:
Compare misinformation and disinformation from different perspectives; Identify the predominate narratives in the health misinformation environment; Distinguish between high- and low-level interventions to counteract misinformation

HIDS 411 Clinical Data Science (3 Credit Hours)
Clinical Data Science provides students with an introduction to a broad range of concepts and methods in data science, as they pertain to biomedical research. The focus of the class is on introducing key methods ranging from data collection and storage, to probabilistic methods, etc.
Outcomes:
Understand and describe the steps in the life cycle in biomedical and clinical research; Understand the key principles of data management; Apply, analyze, and evaluate data structures, standards, and quality of data in large biomedical databases and clinical research; Analyze and evaluate key data analytics concepts as they apply to biomedical research; Analyze ethical and legal issues when dealing with biomedical and clinical data

HIDS 412 Translational Bioinformatics (3 Credit Hours)
Pre-requisites: HIDS 411 Clinical Data Science
This course covers the fundamentals of bioinformatics and how they apply to translational and clinical problems. The purpose of this course is to give students a broad overview of the field of bioinformatics, and the tools commonly used, as well as the applications to practical biomedical issues, diseases, population health, drug discovery, etc. The students will also be exposed to a variety of open-source software for sequence alignment, SNPs discovery, and on how to access and analyze data from large biological databases, for translational and clinical research.
Outcomes:
Understand and apply a range of bioinformatics algorithms, and their computational efficiency; Apply and analyze informatics techniques to retrieve, store, and analyze 'omics' data; Apply and analyze open-source tools and open access databases to find and analyze data of translational and clinical importance; Analyze the current trends and problems in bioinformatics and how they relate to clinical issues, population and public health

HIDS 421 Security and Privacy in Healthcare (3 Credit Hours)
This course provides students with a broad exposure to concepts, policies, and methodologies in security and privacy, as they pertain to healthcare research and practice. Information security and data privacy are essential components of biomedical and clinical research, and therefore, it is critical for students to understand security guidelines.
Outcomes:
Understand the role of information security and data privacy in healthcare; Apply basic principles of computer security, such as confidentiality, integrity, and availability; Apply and analyze security principles in research data management; Analyze and evaluate the ethical and legal considerations associated with biomedical and clinical data; Understand and analyze the importance and role of the Institutional Review Board and its function with respect to protecting human subjects

HIDS 422 Ontologies in Healthcare (3 Credit Hours)
This course provides students with essential concepts of ontologies, building ontologies, and knowledge representation as they pertain to health care, and biomedical research. With the ubiquitous nature of computer systems, and information-based systems in health care (and everywhere!) there is a critical need to be able to represent information.
Outcomes:
Understand the role of ontologies in knowledge representation; Understand the differences between realist and anti-realist ontologies; Understand and describe the importance of propositional and predicate logic in knowledge representation and discovery; Understand basic principles of developing ontologies in health care; Build ontologies using computer ontology-building tools; Understand and describe how ontologies affect biomedical informatics systems and how we discovery new knowledge

HIDS 424 Spatial Data Science in Healthcare (3 Credit Hours)
This course is a comprehensive introduction to spatial data analysis and visualization using programming languages (R or Python). Modules will cover core concepts and practical applications of spatial data handling within these tools. The content is structured to progressively build knowledge, starting from basic principles and advancing to more complex analytical techniques.
Outcomes:
1) Differentiate various spatial data formats and structures, including vector and raster data; 2) Demonstrate proficiency in importing, processing, and managing spatial datasets using programming languages, ensuring data integrity and analytical readiness; 3) Produce informative, aesthetically compelling visualizations of spatial data to effectively communicate spatial insights; 4) Interpret spatial patterns, relationships, and trends using statistical methods to derive meaningful conclusions

HIDS 441 Human Centered AI for Healthcare (3 Credit Hours)
This is a survey course of AI user-facing systems for healthcare, that demonstrates the practical use of seminal algorithms in machine learning and AI, as well as principles of interaction design and user center design. In addition, the course focuses on how these design principles and algorithms can be blended to generate impactful systems that help bridge health disparities.
Outcomes:
Assess a healthcare situation that can be improved with interactive technology; Apply interaction design principles to mock up a system that utilizes AI in the context of healthcare; Evaluate interactive systems based on design principles for ehealth/applications that use AI; Compare the opportunities and limitations of seminal AI technologies; Design realistic technological solutions for healthcare problems with the technology available; Communicate the design and evaluation of AI imbued technology for healthcare

HIDS 495 Independent Study (1-4 Credit Hours)
This is a directed study course in health informatics for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

HIDS 496 Special Topics in Health Informatics (1-3 Credit Hours)
This course covers a specific topic in health informatics.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

HIDS 499 Health Informatics Capstone (1-3 Credit Hours)
Pre-requisites: Students in the HIDS program must have completed 2 semesters of course work
Development of an informatics project, including research question, literature review, and assessment.
Outcomes:
Development of a scholarly paper and presentation

Healthcare Administration (MHA)

MHA 405 U.S. Health Systems Management (3 Credit Hours)
This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the structure of healthcare in the US healthcare impacts operational management of provider systems focus on how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on management of quality, patient safety and information technology as centerpieces of the modern health care environment.
Outcomes:
Distinguish roles, functions and responsibilities of healthcare system components; Analyze the interaction of social, political and economic forces shaping healthcare delivery and impact on cost, quality and access

MHA 415 Culture of Quality & Safety in Health Care (3 Credit Hours)
Developing, managing healthcare safety and quality programs by demonstrating strategic importance of concepts inside healthcare organizations and clients. Discussion of safety science, high reliability organizations, trends in patient safety, healthcare quality, practices in different healthcare environments, development of organizational cultures, safety & quality, tools for monitoring performance improvement will be examined.
Outcomes:
Students will explain forces driving safety and quality in healthcare, evaluate strategies for improving safety/quality in healthcare, describe influence of systems on outcomes; Analyze role of various systems, factors in creating safe environments of care; Explain "just culture" thinking on safety, quality improvement; Develop plan for improvement of safety/quality

MHA 430 Managerial Epidemiology (3 Credit Hours)
Introduces epidemiological principles, tools pertinent to population health management, delivery of healthcare services, fundamentals of epidemiologic inquiry, population health, community health needs assessment introduced. Methods to effective planning, monitoring, and evaluation of healthcare services. Emphasis given to practical applications, decision-making in healthcare administration, planning, management, financing, outcome evaluation, within healthcare organizations.
Outcomes:
Students will distill the central role of population health management in healthcare administration, epidemiology in evidence-based management, basic principles/methods of descriptive epidemiology to healthcare, administration functions

MHA 440 Healthcare Management and Ethics (3 Credit Hours)
This course deepens insights into profession of healthcare administration, presents key principles, practices of management within healthcare organizations. Emphasis given to knowledge, skills necessary to effectively manage healthcare organizations. The interplay between management and the larger environment of internal/external stakeholders explored, ethical issues common to healthcare management examined. Provides foundation for developing effective management.
Outcomes:
Students will differentiate key principles of management, articulate the governance and management structure of healthcare organizations, synthesize core functions of healthcare manager; Identify/frame/evaluate healthcare management challenges, define strategies for addressing challenges

MHA 450 Research Literacy for Health Decision Makers (3 Credit Hours)
This course explores the research process and the regulatory requirements in health sciences research. The fundamentals of research design, methodology, interpretation, and critical appraisal are introduced. The course requires critical thinking and analysis to determine the relevance of novel research. Emphasis is given to practical applications to decision-making in healthcare administration including planning, management, assessment, and outcome evaluation, within healthcare organizations. Students will present a critical analysis of multiple types of research studies.
Course equivalencies: X - HSM 358 / MHA 450
Outcomes:
Explain the scientific method as it relates to research; Describe research governance, ethical doctrine and regulations impacting human participant protection; Assess study design and describe appropriate measures and data collection techniques; Discuss regulatory and policy factors that impact health-related research; Critically evaluate health-related research, including analysis and conclusions; Evaluate the relevance and implementation challenges of novel research; Determine how ethical healthcare leaders impact innovation and research

MHA 451 Healthcare Finance I (3 Credit Hours)
This course provides a basic understanding of financial management principles with emphasis on the not-for-profit entity. Foundational accounting concepts are explored with a focus on risk, financial statements, capital investments, debt and equity financing.
Outcomes:
Students will be able to recognize the three main corporate financial statements and explain in lay terms the information contained therein

MHA 452 Healthcare Finance II (3 Credit Hours)
Pre-requisites: MHA 451
Building on the foundational learning from Healthcare Finance I, this course focuses on for-profit entities within the health care sector and reimbursement methods. Financial concepts, discounted cash flow analysis, risk, financial performance evaluation, capital investments, capital budgeting, debt, equity financing will be explored. Description, assessments of reimbursement methodologies, strategies will be explored.
Outcomes:
Engage in long-term financial forecasting and planning; Differentiate various reimbursement strategies/ methodologies; Complete comprehensive financial forecast for a healthcare organization

MHA 460 Strategy & Leadership in Healthcare Organizations (3 Credit Hours)
This course examines competitive strategy, leadership in current healthcare environment. Content emphasizes formulation, execution & management, critical evaluation of organizational strategy. Key challenges faced by U.S. healthcare organizations and strategic responses are introduced. The relationship between strategic outcomes and leadership is explored emphasizing values-based leadership and individual qualities that define effective leaders. 2) Evaluate strategic options for a healthcare organization. 3) Formulate a strategy for a healthcare organization. 4) Manage the execution of a defined strategy. 5) Evaluate the performance of a strategic plan. 6) Compare theoretical concepts of leadership.
Outcomes:
1) Analyze the internal and external environment to which a strategy must respond

MHA 468 Healthcare Data Analytics & Business Intelligence (3 Credit Hours)
This course explores the use of data analytics, mining, visualization, tools to support data-driven decisions in healthcare organizations. Students develop a comprehensive view of data, use data to drive outcomes and efficiencies in healthcare. Commonly used methods/challenges in data analytics discussed. Multiple sources are explored including patient-generated data, electronic health records, administrative databases.
Outcomes:
Students will discuss the role of data analytics in health care organizations, demonstrate conceptual and practical knowledge, share structuring of health and healthcare data, retrieve data, perform descriptive analyses on healthcare datasets

MHA 472 Population Health Analytics and Emerging Technology for Healthcare Adminstn (3 Credit Hours)
This course integrates population health, healthcare analytics, business intelligence, and emerging technologies to support data-driven decision-making and organizational change in healthcare settings. Students examine the use of vital statistics, core health indicators, and population-level data to analyze health trends, assess performance, and inform organizational and policy decisions. Emphasis is placed on communicating analytic findings to decision-makers and applying analytic insights, including those supported by artificial intelligence, to lead continuous improvement and change initiatives within healthcare organizations.
Outcomes:
Explain the role of data analytics, population health, and epidemiology in healthcare administration; Analyze healthcare and population health data using appropriate analytic and business intelligence tools; Apply analytics to assess performance, monitor trends, and support quality, safety, and population health improvement; Design data-informed strategies to support evidence-based decision-making and organizational change

MHA 480 Topics in Post-Acute Care (3 Credit Hours)
Pre-requisites: MHA 405, MHA 415, MHA 430, MHA 451, MHA 452, MHA 491, and MHA 492
This course acquaints students with services delivered following traditional acute-care episodes or stays, providing comprehensive overview of programs, policies, services specific to post-acute care providers, facilities. The operating environment is examined with emphasis on regulations, reimbursement, care delivery, alternative delivery systems. Timely issues, challenges, dilemmas confronting long term care management explored.
Outcomes:
Demonstrate understanding of the basic operations of the continuum of post-acute care services, including delivery systems, consumers, providers, competitors; Discuss legal, regulatory environment surrounding post-acute care; Delineate role of financing/reimbursement

MHA 484 Capstone I-Healthcare Decision Support (3 Credit Hours)
Pre-requisites: Instructor Permission required
The course focuses on understanding decision support systems and how they are used to inform leadership decision-making across healthcare organizations. 2) Evaluate strategic options for a healthcare organization. 3) Formulate a strategy for a healthcare organization. 4) Manage the execution of a defined strategy. 5) Evaluate the performance of a strategic plan. 6) Compare theoretical concepts of leadership.
Outcomes:
1) Analyze the internal and external environment to which a strategy must respond

MHA 489 Human Resources and Professionalism (3 Credit Hours)
Human Resources and Professionalism is designed to equip students with the knowledge and skills to effectively manage human resources in the dynamic healthcare industry. Students will explore the role of human resources in healthcare, understanding the success of any healthcare organization is heavily dependent on workforce planning, recruitment, selection and retention. This course introduces the technical and legal aspects of human resources management (HRM) from a strategic business perspective and examines how HRM best practices can be applied to health services organizations (HSO s). The course examines how to manage human resources effectively in the dynamic legal, social, and economic environment currently constraining health care organizations. 2) Develop talent management processes including; recruitment plans, selection, engagement, and retention, and performance appraisal of employees. 3) Identify laws and policies affecting and protecting healthcare workers. 4) Determine effective strategies for conflict identification and management. 5) Discuss ethical leadership, codes of conduct and professional responsibilities. 6) Develop a plan for continued professional development, network expansion, and service to the profession.
Outcomes:
1) Evaluate HR management practices

MHA 490 Research and Innovation in Healthcare Administration (3 Credit Hours)
This course explores the research process and the regulatory requirements in drug, device, and biological product development. The fundamentals of research design, methodology, interpretation, and critical appraisal are introduced. The course requires critical thinking and analysis to determine the relevance of novel research. Emphasis is given to practical applications to decision-making in healthcare administration including planning, management, assessment, and outcome evaluation, within healthcare organizations.
Outcomes:
1) Outline the research and drug, device, and biologic development processes; 2) Discuss regulatory and policy factors that impact health-related research; 3) Critically evaluate health-related research; 4) Evaluate academic and industry contributions to innovation; 5) Evaluate the relevance and implementation challenges of novel research; 6) Determine how ethical healthcare leaders impact innovation and research

MHA 491 Systems Thinking for Healthcare Leaders (1 Credit Hour)
This two-day immersion will serve as an introductory course for the MHA program. Students will explore the concepts of systems thinking and develop practical skills for its application in healthcare settings. Students will be provided with supplemental reading materials and participate in simulations and exercises to hone their skills in this critical leadership competency.
Outcomes:
Students will define systems thinking as a leadership model and Apply relevant components of systems thinking in real-world healthcare setting

MHA 492 Policy in Health Systems (1 Credit Hour)
This Immersion provides students with policy, economic, and governance framework for understanding healthcare delivery systems. Selected theoretical models will be used to analyze existing and proposed health policies from the perspective of relevant stakeholders. Critical appraisal of selected national and global programs including their underlying values, socio-political, and economic issues, is a focus. This critical appraisal,based on the political, economic, legal, social, and ethical forces which impact the health policy-making process will be examined against the backdrop of US healthcare delivery systems. Implications for research and practice aimed at improving health outcomes of a student's target population will be a focus of this course. 2) Define various governance models and their relationships to governing regulatory bodies. 3) Use selected theoretical models to critically analyze health policies and related .issues from multiple stakeholder perspectives, including underrepresented populations.
Outcomes:
1) Describe the policy development and implementation processes in the United States

MHA 493 Healthcare Performance Management (1 Credit Hour)
This two-day immersion helps students build practical skills for ongoing performance management and monitoring of strategically aligned key performance indicators. Students will explore use of scorecards, dashboards as tool for ongoing outcomes monitoring, management within health systems. Students will be provided with supplemental reading, guest lecturers, participate in simulations, exercises.
Outcomes:
Students will build outcome monitoring scorecards and dashboards, effectively communicate outcomes and performance metrics

MHA 494 Multi-disciplinary Teams in Healthcare (1 Credit Hour)
Two-day immersion provides students with practical lessons, recognizing and optimizing the multi-disciplinary nature of healthcare workforces. Focus on building cross-functional teams, recognizing potential strengths/weaknesses of team members from different educational/ practice backgrounds. Team building exercises, small group theories will be incorporated to demonstrate practical value of multi-disciplinary teams. Course includes supplemental reading materials, guest lecturers, simulations, exercises to hone skills in critical leadership competency.
Outcomes:
Students will identify opportunities, challenges facing healthcare workforce; will effectively build multi-disciplinary teams of health care workers from a variety of specialties and fields

MHA 495 Capstone II (3-6 Credit Hours)
Pre-requisites: MHA 484 *Students without work experience or looking to gain more confidence and skill may take a 2nd capstone course, either concurrently or after the first capstone
This course provides students with the direction and support to complete an independent capstone project relative to an area of professional interest. Students develop a 1) workable problem statement; 2) a precise and targeted literature review on the topic of interest; and 3) propose an interventional capstone project to address the identified need/ problem using the principles of Six Sigma DMAIC (Define, Measure, Analyze, Implement, and Control). Students identify a community-based partner organization and secure commitment from the organization and individual preceptor willing to facilitate the project. A written plan of execution is submitted in the form of the Capstone Project Plan. Upon faculty approval, students may begin the implementation of the project. The second capstone provides more experiential learning opportunities and allow for greater interaction with the partner organization and problem-solving methodology. 2) Demonstrate analytic, critical thinking, and problem-solving capabilities by proposing an administrative solution to a healthcare problem.
Outcomes:
1) Examine a relevant healthcare problem or knowledge gap by executing and synthesizing a professional research and literature review

MHA 499 Independent Study in Healthcare Administration (1-3 Credit Hours)
Pre-requisites: Course open to MHA students; Permission of the Program Director
This is a directed study course in healthcare administration for approved students, supervised by a member of the MHA faculty. Students must have assigned professor, written objectives, planned outcomes and timelines.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

Master of Public Health (MPBH)

MPBH 400 Determinants of Population Health (3 Credit Hours)
This course will introduce students to the public health perspective population perspective. A major focus of the course is understanding the fundamentals of health disparities and how they are produced and reproduced, and how simple solutions to our most pressing public health problems are unlikely to succeed. Graduate standing in the MPH or Public Health Certificate Program, or permission of instructor.

MPBH 401 Environmental Health (3 Credit Hours)
This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.
Course equivalencies: X-ENVS301/PUBH301/MBPH401

MPBH 402 Public Health Practice and Management (3 Credit Hours)
This course will provide an introduction to public health practices and cover management basics as applied to the public health field. The topics covered in the course will be examined through the lenses of prevention, social justice and the role of governmental public health. In Part I of the course, we will study basic public health concepts, core public health functions and practices, public health infrastructure at the local, state and federal levels, and the major areas of public health services and interventions. In Part II, we will cover management principles and functions such as planning, organizing, controlling and leading. We will apply these concepts to the administration of public health organizations.
Outcomes:
Assess population needs, assets and capacities that affect communities' health; Apply awareness of cultural values and practices to the design or implementation of public health policies or programs; Design a population-based policy, program, project or intervention; Explain basic principles and tools of budget and resource management; Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making

MPBH 403 Introduction to Epidemiology (3 Credit Hours)
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.
Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403

MPBH 404 Biostatistics for Health and Biological Science (3 Credit Hours)
Introductory course allows students to utilize SAS software to perform analytical methods including Graphical and Numerical Descriptive Statistics, Probability calculations and distributions with emphasis on the binomial(discrete) and normal (continuous) distributions, Inferential Statistics: Point Estimation, Interval Estimation and Hypothesis Testing, Nonparametric statistical methods and Sample Size Calculation.
Course equivalencies: CRME420/BMSC402/MPBH404

MPBH 407 Public Health Policy: Concepts and Practice (3 Credit Hours)
Pre-requisites: Open for registration for MPH students; All other students require department approval
No course description is available
Course equivalencies: PUBH 307/MPBH 407

MPBH 409 Biostatistics I (3 Credit Hours)
Pre-requisites: Introductory course
Introductory biostatistics course which allows students to utilize STATA software and perform/ operate analytic methods. Course provides outline of tests of statistical significance and probability theory. Students will conduct statistical hypothesis testing using methods presented in class.

MPBH 410 MPH Practicum (1-3 Credit Hours)
All MPH students are required to complete at least 1 credit of a practicum (internship) to gain a better understanding of a public health practice, directly utilize their own MPH training, and network with public health professionals in the field. Students need to provide a signed agreement and must be in the process of completing 21 credit hours, including at least four core courses.

MPBH 411 MPH Capstone (1-3 Credit Hours)
The goal of the Capstone project is to provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework and through practicum experience. The objective is to enable the student to work on a project which translates both general and discipline specific information into public health practice. Students should complete the core, program specific courses. We recommend to split credits over last two semesters and register 1 credit each semester.
Outcomes:
The Capstone will provide the students an opportunity to exhibit their proficiency in public health skills through a written report and oral presentation

MPBH 412 Intro to Statistical Computing for Public Health (1-3 Credit Hours)
Pre-requisites: This course is designed for students who have taken or are taking Introduction to Epidemiology (MPBH 403) and Biostatistics I (MPBH 404 or 409)
This course introduces students to statistical computing. The emphasis is on manipulating data sets and basic statistical procedures such as t-tests, chi-square tests, and correlations. The course currently focuses on the use of SAS and STATA software packages., data importation from various sources, cleaning, validation, subsetting, merging, and transforming datasets); Construct clear and concise documentation of newly created datasets; Use SAS data-step programming, macros, and built-in procedures for statistical analysis and visualization (i.e., PROC MEANS, FREQ, SGPLOT, and UNIVARIATE); Demonstrate the ability to use descriptive techniques to summarize public health data (i.e., t-tests, chi-square tests, and basic regression models); Describe the results of basic statistical analyses.
Outcomes:
Execute data management techniques to create public health analytical datasets (i.e

MPBH 414 Introduction to Global Health (3 Credit Hours)
This course is is an introduction to global health at the graduate level to provide the student with an understanding of health surveillance systems, and determinants, consequences and trends of disease in low- and middle-income countries, with some reference to high-income countries and regions. Both infectious and non-communicable diseases will be addressed, as will reproductive and women's health, nutrition, immigration health and environmental health. The format of the course will be both didactic, with some asynchronous lectures online, and student-led discussion and teamwork in the classroom.
Outcomes:
Synthesize the most commonly used global health metrics, intervention frameworks, and monitoring and evaluation strategies in the creation of a global health program plan; Summarize reasons for health inequities and disparities which exist in low- and middle-income countries, as well as higher-income countries; Examine specific risk factors for poor outcomes in common global health issues; Illustrate the concept of global health security and its impact on disease outbreaks; Evaluate case studies of existing global health interventions and policies; Compare and contrast existing global health funding and implementation systems, such as bilateral aid, multilateral agencies, and public/private partnerships, including ethical concerns

MPBH 415 Non-Communicable Disease Epidemiology (3 Credit Hours)
Pre-requisites: MPBH 403 or consent of instructor
This course covers public health topics related to non-communicable diseases (NCDs). The course explores topics such as: burden of NCDs in populations; the conceptual frameworks for studying chronic disease causation and control; the epidemiology of cardiometabolic diseases as well as the epidemiologic transition in relation to risk factors for the major chronic diseases (e.g. nutrition, obesity, physical exercise, alcohol and tobacco use) as well as upstream factors impacting on diseases such as food policy and the built environment; integrated healthcare services and public health interventions; and, the study designs used to assess associations between exposures and NCDs.
Outcomes:
Apply frameworks to understand social and ecological determinants of non-communicable diseases, as well as the biological and behavioral risk factors across the life-course; Articulate the methodological issues in the study of non-communicable diseases including tools for surveillance, the limits of observational evidence, life-course epidemiology and genetic associations, assessment of risk and risk scores, burden of disease estimates; Explain the drivers of non-communicable disease epidemiology; Discuss interventions to prevent and control non-communicable diseases low-middle income countries

MPBH 416 Health Services Research Methods (3 Credit Hours)
This course introduces students to the scope of health services research by addressing issues central to understanding and applying modern research to public health and health policy. Formulate questions and develop studies using primary data collection approach that are timely and relevant to contemporary organization, financing, and delivery of U.S. public health.
Outcomes:
Determine health services research's scope

MPBH 417 Global Maternal and Child Health (3 Credit Hours)
Pre-requisites: MPBH 414 and MPBH 403
This course prepares the student to gain substantive knowledge of the key issues in global maternal and child health. With a focus on low-and-middle income countries (LMICs), the course will provide the student an opportunity to delve into critical issues faced by women and children, assess health disparities, and examine social justice issues in LMICs. In addition, the student will be expected to think critically about existing programs, research, and policy involving maternal and child health.
Outcomes:
Identify specific risk factors for poor outcomes in reproductive health; Discuss contemporary issues surrounding maternal and child health; Apply methods of program evaluation to health programming for women and children in an international setting; Analyze major causes and trends of morbidity and mortality among women and children in LMICs; Explain the social, political and economic determinants of maternal and child health and how they contribute to population health and health inequities; Explain how globalization affects global burdens of disease among women and children

MPBH 418 Global Health Experience Seminar (0 Credit Hours)
This 0-credit seminar course prepares students selected for the summer global health internship to engage ethically, professionally, and effectively in international public health settings. Through interactive sessions, students will explore foundational global health concepts, complete ethics and safety training, analyze key public health indicators for their assigned site, and reflect on the role of culture in shaping health beliefs and health systems. Emphasis will be placed on responsible global engagement, cultural humility, and comparative analysis of health systems. Successful completion of this course is required for participation in the summer field internship abroad.
Outcomes:
Analyze the health status of populations using available data for your assigned local sit; Describe how cultural context influences perceptions of health and disease in your local implementation context; Compare and contrast the local national model or health system for provision of healthcare to the US system, including their respective effects on health and healthcare expenditure; Define local, national, and international codes of ethics and how they are relevant to one's working environment

MPBH 420 Public Health Law: Theories and Cases (3 Credit Hours)
This course explores how the law can be utilized to promote, or impede, proposed public health interventions at the local, state, federal level. Students review key theories of public health law that examine the role of the legislature, executive agencies, and the courts in crafting, executing, reviewing public health policy. This course is geared towards MPH students in Public Health Policy and Management track, and no prior training in law or legal analysis is assumed.
Outcomes:
Describe the inter-dependence of law and public health; Identify areas of law applicable to promoting public health; Articulate the legal, ethical and practical conflicts that arise in approaching public health through law

MPBH 421 Biostatistics II (3 Credit Hours)
Pre-requisites: MPBH 409 Biostatistics I Students will utilize text on Biostatistics for Public Health
Course will cover linear and logistic regression and ANOVA. Students will utilize STATA software for hypothesis testing.
Outcomes:
Students will conduct statistical hypothesis testing using methods presented in class

MPBH 422 Population Health Planning & Management (3 Credit Hours)
This course prepares students to confront--thoughtfully and systematically-resource allocation decisions by developing the knowledge, tools, and skills needed to plan, implement, and evaluate programs, interventions, and services that address public health problems, improve population health, and reduce inequities.

MPBH 423 Intermediate Epidemiology (3 Credit Hours)
Pre-requisites: MPBH 403 Introduction to Epidemiology and MPBH 412 Introduction to Statistical Computing for Public Health Research
Intermediate Epidemiology focuses on analysis of observational data. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 424 Health Economics and Healthcare Financing (3 Credit Hours)
This course will examine selected topics in health economics with major implications for healthcare delivery, healthcare financing and clinical and public health research. Essential economic theories and methods for exploring each topic will be discussed along a review of existing empirical research.
Outcomes:
Describe the US health delivery and financing system; Apply essential economic theories/methods to study consumer behavior and healthcare demand, healthcare market and supply of services, and medical cost-effectiveness analysis

MPBH 425 Policy Analysis (3 Credit Hours)
This course will provide an introduction to the issues and methods of health policy analysis. Health policy analysis requires several distinct sets of skills: technical understanding of analytical tools, understanding the policy and managerial context within and outside of your organization, and the ability to produce and communicate practical advice. This is a track-specific requirement for MPH Graduates in the Health Policy track.
Outcomes:
Students will develop a good working understanding of the methods specific to these issues examined through this course and will also learn how to apply these to specific problems

MPBH 426 Infectious Disease Epidemiology (3 Credit Hours)
Pre-requisites: Introduction to Epidemiology (MPBH 403)
This course will introduce the basic methods for infectious disease epidemiology and review case studies of important disease syndromes and entities. Important terminology and definitions for infectious disease epidemiology will be reviewed, including nomenclature related to outbreak investigations, disease surveillance, laboratory diagnosis, molecular epidemiology, disease transmission and susceptibility.

MPBH 427 Advanced Statistical Methods (1-3 Credit Hours)
Co-requisites: MPBH 421 (or prior completion of a two-semester course sequence in Biostatistics) and one course in statistical computing such as MPBH 412
This course covers a broad overview of statistical models and estimation methods for outcome variables (normal and non-normal) that are clustered or measured repeatedly in time or space. The focus is on applications and computer software methods for correlated regression models, including ANOVA based methods, hierarchical linear models, etc.
Outcomes:
Apply generalized linear models to regress a set of explanatory variables against non-normally distributed outcomes, including binary outcomes (logistic regression), multinomial outcomes (ordinal and multinomial logistic regression), and count outcomes (Poisson and negative-binomial regression); Identify and employ appropriate methods for the analysis of repeated measures, including the use of generalized estimating equations (GEE models) and/or mixed-effects models for nested and hierarchical data; Analyze data using Parametric methods for time-to-event data; Conduct Bayesian estimation for unknown parameters; Employ multivariate methods to solve real-world problems and dimensionality reduction; Use statistical programming to apply learned statistical models and estimation methods; Explain the results of statistical analyses

MPBH 430 Environmental Health Policy (3 Credit Hours)
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing. This course is offered both online and in-person.
Outcomes:
1) Outline fundamental public health concerns that have been associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

MPBH 431 Grant Writing (3 Credit Hours)
This course will provide an overview of the NIH extramural funding process, with additional information on funding opportunities outside NIH. Students will learn the key components of successful grants and factors that may lead to grants not being reviewed favorably. The focus will be on grant writing skills.
Outcomes:
Students will be required to write a 10-12 page R01-style grant proposal (application), as described in the NIH guidelines

MPBH 432 Health Impact Assessment (3 Credit Hours)
This course is an introduction to health impact assessment which is a decision-support tool that uses a combination of procedures, methods, and approaches to determine how a policy, project/program may affect the health of a community, and the distribution of those effects within the population of the community.

MPBH 433 Clinical Trials (3 Credit Hours)
Clinical Trials course is designed for students interested in the design, implementation and management of clinical trials and their ethical and clinical implications. Topics include trial design, randomization, recruitment and sample size, monitoring and analysis. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 434 Systematic Review and Meta-Analysis (3 Credit Hours)
Meta analysis course provides instruction on methods for synthesizing clinical research information and how to assess the strength of the evidence for policy development and clinic contexts. The course is designed to highlight rigorous systematic review methods while students complete a systematic review on a topic of their choice. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 449 Biostatistics for Public Health Interventions (3 Credit Hours)
This course targets the application of sophisticated statistical methodologies to enhance the efficacy and precision of public health interventions. At the heart of this course is a rigorous examination of strategies for reducing bias in observational studies through advanced techniques such as imputation for missing data and propensity scores. The curriculum is expanded to include psychometric analysis, providing essential tools for the evaluation of measurement instruments, and ecological analysis, which aids in the interpretation of population-level health outcomes. A significant addition to this course is the analysis of screening and diagnostic tests, focusing on studying measures of accuracy and agreement critical for evaluating the performance of these tests in public health. The course also explores the complexities of survey design, offering insights into managing and analyzing data from multifaceted study designs to ensure the reliability and validity of intervention assessments.
Outcomes:
Apply advanced statistical techniques including imputation for missing data, and propensity score analysis to reduce bias in observational studies; Evaluate the design of public health research studies and interventions for methodological soundness; Apply psychometric principles to evaluate the reliability and validity of measurement instruments used in public health research; Use ecological analysis to interpret population-level health outcomes, understanding the impact of environmental and social factors on public health

MPBH 450 Biostatistics for Electronic Health Record (EHR) Data (3 Credit Hours)
Pre-requisites: Students must have completed MPBH 449
This course delves into the analysis and interpretation of data from Electronic Health Records (EHRs), a cornerstone of clinical, epidemiologic, and translational research. Emphasizing a hands-on approach, it covers EHR system fundamentals, data extraction and cleaning, privacy standards, case identification, study design, and advanced statistical analysis. Students will learn to navigate EHR data structures, medical vocabularies, and relational databases, applying these skills to design research studies and create patient cohorts. The goal is to equip students with the ability to harness EHR data for innovative healthcare solutions., ICD, CPT, NDC, SNOMED, and LOINC codes) for accurate case identification; Develop skills in constructing patient cohorts and extracting relevant data; Identify controls and apply propensity score matching in observational research; Design robust matched case-control and retrospective cohort studies using EHR data; Recognize privacy and security standards, including HIPAA regulations; Apply advanced statistical methods to analyze EHR data and assess research findings critically.
Outcomes:
Explain relational database and data warehouse models pertinent to EHR data; Use medical vocabularies and ontologies (i.e

MPBH 460 Public Health Data Visualization and Reporting (3 Credit Hours)
Pre-requisites: Students must have completed MPBH 421 (Biostatistics II) or equivalent experience in biostatistical methods and public health principles
This course is designed to navigate the intersection of public health data, visual communication, and ethical representation, focusing on creating impactful visuals that cater to diverse audiences including patients, healthcare providers, policymakers, and the broader community. It emphasizes the ethical considerations in data visualization, tackling potential biases, and ensuring visuals are both informative and accessible. Through practical applications, students will learn to craft infographics, community health maps, dashboards, and effective manuscript tables, all while understanding the unique needs of different user groups. The course will explore advanced visualization techniques like heatmaps, interaction visuals, and temporal data displays, equipping students with the skills to present complex health data.
Outcomes:
Develop the ability to create impactful and ethically responsible visual representations of public health data tailored to diverse audiences, including patients, healthcare providers, policymakers, and the general public; Explore advanced data visualization techniques, including heatmaps, interactive visuals, and temporal data displays, to effectively present complex health information; Apply ethical considerations in data visualization, addressing potential biases and ensuring that visuals are accurate, accessible, and inclusive; Design visual communication strategies into public health research and reporting to enhance the impact and understanding of data-driven insights

MPBH 495 Special Topics (1-3 Credit Hours)
This course covers a specific topic in public health. Restricted to students in the Master of Public Health (MPH) program, or with permission of the instructor. Outcome: students will be able to articulate a general understanding of the selected topic.

MPBH 499 Public Health in Action (3 Credit Hours)
Public Health in Action prepares MPH students for the real world through practical hands-on learning that addresses the cross-disciplinary competencies in advocacy, leadership, budgeting, planning and implementing programs with limited resources, building a shared vision and mission, setting priorities and goals, contributing on inter-professional teams, advancing cultural diversity and inclusiveness in community health efforts, building partnerships, leading community initiatives, and communicating to media. It is intended students will take this course at the end of the MPH program. Enrollment Conditions: Graduate standing in the MPH Program and graduating in the current or following semester, or permission of instructor. Students should have completed at least 18 credit hours of coursework, including all other core courses. MD/MPH students may take this course in the spring of their first year in the program.

Medical Laboratory Science (MLS)

MLS 401 Laboratory Fundamentals (2 Credit Hours)
Introduction to life in the clinical laboratory. Safety practices, laboratory mathematics, statistical analysis, and fundamental laboratory training in phlebotomy, pipetting, microscopy and calibrations.
Outcomes:
Demonstrate and identify safe and professional knowledge consistent with the field of Medical Laboratory Science, including use of universal precautions and ability to decipher Safety Data Sheets; Accurately perform skills needed in medical laboratory science including phlebotomy, processing of specimens, pipetting, microscopy, and calibrations\\n; Demonstrate competency in use of laboratory calculations\\n; Understand the history and role Medical Laboratory Scientists play in health care

MLS 410 Clinical Immunology (2 Credit Hours)
This course focuses on principles and procedures of immunology and serology. Emphasis will be on the role of the immune system in health and disease and developing an understanding of the role of both humoral and cellular immunity. Admission to M.S. in Medical Laboratory Science program. Upon completion, students will demonstrate understanding of the discipline of immunology and apply theoretical concepts to differentiate patient health and disease states.

MLS 415 Urinalysis and Body Fluids (2 Credit Hours)
Theoretical and applied concepts related to the formation, collection, processing, and evaluation of urine and body fluids. Study of urine and body fluids including chemical, physical, and microscopic properties. This course also encompasses the evaluation of normal fluid characteristics, and those that reflect abnormality or disease. Restricted to students in the M.S. in Medical Laboratory Science program. Upon completion, students will be able to explain the formation of fluids in the human body and correlate normal and pathological states associated with chemical, physical and microscopic findings.

MLS 420 Molecular Diagnostics (2 Credit Hours)
This course is will provide students with an understanding of the processes which have been collectively referred to as molecular biology as they relate to laboratory medicine. Instruction emphasizes molecular methodologies and current applications of molecular diagnostics utilized in the clinical laboratory. Upon completion of this course students will gain a background in molecular biology which will promote critical thinking and problem solving as it relates to clinical molecular diagnostics.

MLS 430 Clinical Chemistry I (3 Credit Hours)
Pre-requisites: Admission to M.S. in Medical Laboratory Science program
This course is designed for medical laboratory science students to gain an understanding of the analytical principles and components of instrumentation utilized in clinical chemistry laboratories.
Outcomes:
Upon completion of this course, students will describe chemical constituents of bodily fluids, their regulation and laboratory methods of analysis for compounds including electrolytes, carbohydrates, lipids and proteins

MLS 440 Clinical Chemistry II (2 Credit Hours)
Advanced course in clinical chemistry/biochemistry which continues study of measurement and interpretation of chemical constituents in human blood and body fluids. Topics include endocrinology, organ systems, therapeutic drug monitoring, toxicology, tumor markers and nutritional chemistry. This course will prepare students for their clinical practicum in Clinical Chemistry. Enrollment Condition: Admission to the M.S. in Medical Laboratory Science program
Outcomes:
Upon completion, students will be able to identify interrelated human metabolic functions in normal and disease states, analyze laboratory data, interpret results, and utilize information to determine a diagnosis

MLS 450 Hematology (2 Credit Hours)
Co-requisites: MLS 450L
This course focuses on the study of formed elements of blood including production and maturation. Normal cell morphology and abnormal morphologic changes due to disease states are studied. Recognition and correlation of pathological changes in morphology, cytochemistry and distribution of cells in peripheral blood and bone marrow are discussed. This course will prepare students for their clinical practicum in Hematology.
Outcomes:
Describe the physiology, development of cells, and process of hematopoiesis; Discuss the function of normal cellular elements of blood and associate abnormal elements to disease states; Identify the morphological characteristics of both normal and abnormal cellular elements of blood; Describe anemias, determine appropriate testing for disorder, and classify based on morphology and underlying cause; Differentiate myeloproliferative, myelodysplastic, and lymphoproliferative disorders by connecting laboratory findings with diagnosis

MLS 450L Hematology Laboratory (2 Credit Hours)
Co-requisites: MLS 450
This course emphasizes the integration of hematologic theory and applied laboratory practice to prepare students for clinical testing environments. Students perform manual and automated hematologic procedures while applying conceptual knowledge to interpret laboratory results. Professional conduct and laboratory safety are emphasized throughout the course. This course will prepare students for their clinical practicum in Hematology.
Outcomes:
Demonstrate competency in routine and specialized hematology procedures, including identification and troubleshooting of common sources of laboratory error to ensure accurate patient results; Analyze and evaluate laboratory findings with hematologic disease states, including anemias, leukocyte disorders, and platelet abnormalities, using provided cases and unknown specimen analysis; Apply laboratory safety guidelines, including standard precautions and PPE use, to promote personal and laboratory safety

MLS 455 Hemostasis (2 Credit Hours)
This course will cover the mechanisms by which blood coagulates. Topics explored include the pathophysiology of hemostatic disorders and the antithrombotic therapies utilized to manage them. Focus on examination of the coagulation system and correlations of laboratory results to clinical findings in the classification of disorders. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course students will apply knowledge of the process of coagulation to interpret laboratory results as they relate to hemostatic dysfunctions and treatment of clinical disease.

MLS 460 Immunohematology (3 Credit Hours)
Co-requisites: MLS 460L
This course focuses on principles of antigen/antibody reactions and their relevance to Immunohematology. The ABO and Rh systems, major blood group systems, regulation, common procedures, adverse reactions, and donation of blood components are all studied as integral parts to the practice of transfusion medicine. This course will prepare students for a clinical practicum in Immunohematology.
Outcomes:
Apply theoretical Immunohematology concepts in the technical evaluation of the antigen and antibody characteristics of blood group systems; Evaluate ABO/Rh blood groups and resolve discrepancies utilizing forward and reverse blood typing of test samples; Solve simple and complex antibody identifications, including identification of multiple antibodies; Analyze the roles and responsibilities of the transfusion service within the healthcare system, including donor screening, blood component selection, transfusion support, and specialized testing for maternal, neonatal, and other special patient populations

MLS 460L Immunohematology Laboratory (2 Credit Hours)
Co-requisites: MLS 460
This course focuses on applying immunohematology theory through hands-on laboratory testing and clinical problem solving. Students perform routine and specialized immunohematology testing, interpret serologic findings, and resolve discrepancies using case-based and unknown specimens to support transfusion decision-making. This course will prepare students for a clinical practicum in Immunohematology.
Outcomes:
Perform routine and specialized immunohematology testing, including ABO/Rh typing, antibody screening and identification, and compatibility testing, following established laboratory procedures; Interpret serologic reactions and laboratory data to identify clinically significant antibodies and discrepancies; Use laboratory findings from given cases and unknown specimens to resolve immunohematologic problems and support appropriate transfusion decisions; Apply laboratory safety guidelines, including standard precautions and PPE use, to promote personal and laboratory safety

MLS 465 Laboratory Leadership I (1 Credit Hour)
Pre-requisites: Admission to the M.S. in Medical Laboratory Science program
This first of three courses in the leadership series, prepares the student for an entry-level laboratory position by developing skills in basic laboratory management practices including principles of leadership, functions of a manager, and personnel management.
Outcomes:
Upon completion of this course students will be able to utilize leadership theories to evaluate and demonstrate effective management through evaluation of common clinical laboratory issues

MLS 466 Laboratory Leadership II (1 Credit Hour)
The second installment in the three course Leadership series prepares the student for a laboratory position by developing skills in basic laboratory management practices including financial considerations, laboratory regulations, and laboratory operations. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course students will exhibit knowledge of the financial requirements needed for effective laboratory management and the role of laboratorians in regulation and accreditation of laboratories.

MLS 467 Laboratory Leadership III (1 Credit Hour)
The final installment in the Leadership series of courses prepares the student for a laboratory position by developing skills in career planning, introduction to professional development, grant writing, and process improvement planning. Completion of MLS 466 Laboratory Leadership II and good academic standing as defined by the M.S. in Medical Laboratory Science handbook. Upon completion of this course students will exhibit skills needed for effective laboratory management including departmental improvement planning, professional development and performance feedback.

MLS 470 Bacteriology and Virology (3 Credit Hours)
Co-requisites: MLS 470L
Introduction to bacteria and viruses, with a focus on organisms that are medically relevant to humans. Specimen collection, processing, identification techniques, and recognition of key diagnostic features will be emphasized. Students will correlate clinical features to laboratory findings. This course will prepare students for their clinical practicum in Microbiology.
Outcomes:
Differentiate pathogens from commensal bacteria for specific sites of the human body; Evaluate appropriate methods for collection and processing of clinical specimens, transport devices, and diagnostic laboratory methods for recovery and identification of bacteria and viruses; Accurately identify bacteria and viruses through key features including specimen type, diagnostic testing, treatment, and other clinical information

MLS 470L Bacteriology Laboratory (2 Credit Hours)
Co-requisites: MLS 470
This course focuses on applying bacteriology concepts through hands-on laboratory work in a student microbiology laboratory. Students connect theoretical knowledge to practice by cultivating organisms, interpreting laboratory results, and evaluating organism significance within diagnostic workflows. Emphasis is placed on linking laboratory findings to clinical context, troubleshooting results, and supporting clinical decision-making. This course prepares students for a clinical practicum in Microbiology.
Outcomes:
Apply bacteriology concepts through hands-on laboratory practice to evaluate clinically relevant microorganisms from human specimens; Differentiate pathogens from normal or commensal flora by interpreting laboratory findings; Analyze and troubleshoot microbiology testing outcomes through evaluation of laboratory data, organism characteristics, diagnostic methods, workflow, and potential sources of error; Integrate laboratory findings with clinical features to support diagnostic reasoning while adhering to laboratory safety guidelines, including standard precautions and appropriate PPE use

MLS 475 Clinical Parasitology and Mycology (2 Credit Hours)
Study of parasites and fungi that are medically relevant to humans. This course introduces students to the taxonomy and identification of morphologic and microscopic characteristics of parasites and fungi. Diagnosis of disease states based upon laboratory findings will be emphasized. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course, students will be able to identify the pathogenesis, symptomatology, laboratory diagnosis, and treatment for the parasites and fungi included in the course.

MLS 481 Clinical Practice in Hematology (3 Credit Hours)
Pre-requisites: Completion of MLS 410, MLS 415, MLS 450, MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Hematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Hematology testing in a medical laboratory

MLS 482 Clinical Practice in Chemistry (3 Credit Hours)
Pre-requisites: Completion of MLS 440, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Chemistry under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Chemistry testing in a medical laboratory

MLS 483 Clinical Practice in Immunohematology (3 Credit Hours)
Clinical experience in Immunohematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control. Completion of MLS 455, MLS 460, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook. Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Immunohematology testing in a medical laboratory.

MLS 484 Clinical Practice in Hemostasis and Body Fluids (1-2 Credit Hours)
Pre-requisites: MLS 415, MLS 455, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Hemostasis, Urinalysis, and other Body Fluid analyses under the guidance of qualified medical laboratory professionals. Application of knowledge and clinical skills gained from first year courses. Focus on acquisition of manual and automated laboratory skills, laboratory safety, principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will demonstrate evidence of possessing the knowledge and skills necessary to perform Hemostasis, Urinalysis, and Body Fluid analyses testing in a medical laboratory

MLS 485 Clinical Practice in Microbiology (3 Credit Hours)
Pre-requisites: Completion of MLS 470, MLS 475, and good academic standing as defined in the M.S. in Medical Laboratory handbook
Clinical experience in Microbiology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first-year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Microbiologic testing in a medical laboratory

MLS 486 Clinical Practice - MLS Special Topics (1-2 Credit Hours)
Clinical experience in specialty areas of laboratory medicine under the guidance of qualified medical laboratory professionals. Students will actively engage in applying the medical knowledge and clinical skills gained in the didactic and student training laboratory courses in Molecular Diagnostics, Flow Cytometry, HLA testing, and laboratory administration. Completion of MLS 420, MLS 466, and good academic standing as defined in the M.S. in Medical Laboratory Science handbook. Upon completion of this course students will provide evidence of possessing the knowledge and skills needed to enter into specialty areas of a medical laboratory.

MLS 490 MLS Educational Practice and Review (2 Credit Hours)
Pre-requisites: Completion of MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science handbook
This course will prepare students for taking a Medical Laboratory Science certification exam. Students will gain basic educational and pedagogical approaches needed to train others in the field of Medical Laboratory Science. Application of theories demonstrated through presentation of review lectures and assisting in kinesthetic instruction for laboratory sessions.
Outcomes:
Upon completion of this course students will be able to utilize effective teaching strategies to plan and present a lecture unit, including writing objectives and assessment strategies

MLS 495 Medical Laboratory Science Capstone (1-2 Credit Hours)
Pre-requisites: Completion of MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science handbook
The MLS Capstone exposes students to leadership and ancillary niche aspects beyond those of a standard Medical Laboratory Science curriculum. Students will create a Capstone project to reflect on their unique experience in the field and demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding laboratory medicine.
Outcomes:
This course will provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework, professional practice, and their Capstone Experience

Clinical Certificate in Blood Banking

Laboratory Medicine is essential to the practice of healthcare and competent laboratorians are critical to the prevention, diagnosis, treatment, and monitoring of health and disease.

Blood Banking Scientists perform specialized and routine testing to determine patient blood types, identify blood antibodies, and provide blood products compatible for transfusion to patients. Students who complete the Clinical Certificate in Blood Banking will immediately be eligible to sit for the American Society of Clinical Pathology (ASCP) Board of Certification (BOC) Blood Banking exam through Route 3 eligibility after the conclusion of the program.

The Clinical Certificate in Blood Banking is offered under the umbrella of the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) accredited M.S. in Medical Laboratory Science (MLS) program (https://www.luc.edu/parkinson/mls/msinmedicallaboratoryscience/), meeting rigorous standards for quality, education, and innovation. *NAACLS can be contacted at: National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720 Rosemont, IL 60018; Ph: 773-714-8880; Fax: 773-714-8886; Email:* **info@NAACLS.org**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon successful completion of a clinical Certificate program, students will:

- Apply critical thinking skills to evaluate and interpret clinical data.
- Exhibit oral and written communication skills sufficient to serve the needs of patients and the health care team.
- Demonstrate competency needed to work as a medical scientist in their specific concentration by performing basic and diagnostic laboratory analysis in accordance with established laboratory procedures.

Clinical Certificate in Hematology

Laboratory Medicine is essential to the practice of healthcare and competent laboratorians are critical to the prevention, diagnosis, treatment, and monitoring of health and disease.

Hematology Scientists perform manual and automated analyses of blood cells to determine hematologic and coagulation disorders. Students who complete the Clinical Certificate in Hematology will immediately be eligible to sit for the American Society of Clinical Pathology (ASCP) Board of Certification (BOC) Hematology exam through Route 3 eligibility after the conclusion of the program.

Dietetic Internship Certificate

Translate science into solutions for health.

Loyola University Chicago offers two tracks of an accredited Dietetic Internship (DI) to prepare students to become professional registered dietitian nutritionists. Students benefit from the constructive and supportive environment of Loyola University Chicago. With Jesuit values as a foundation, students learn leadership, communication, and management skills which are applied to dietetic practice in health care and other settings. This prepares our students to enter dietetic practice as competent, highly qualified professionals after passing the registration exam for dietitians. Graduates of Loyola's Dietetic Internship program is highly sought for positions in health care and nutrition programs. Students enter a wide range of dietetic careers, including:

- Clinical dietitians with health care organizations including hospitals, medical centers, dialysis centers, skilled nursing, and rehabilitation facilities
- Community nutritionists with public health departments, federally qualified health centers, community clinics, and federal nutrition programs such as the Women, Infant, and Children's program
- Director or manager of food service operations
- Private practice or consulting

To Become a Registered Dietitian Nutritionist

To become a registered Dietitian Nutritionist (RDN) The following criteria must be completed:

1. Completion of a bachelor's degree at a US regionally accredited university or college and course work accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND®) of the Academy of Nutrition and Dietetics,
2. Completion of an ACEND®-accredited supervised practice program, such as the Loyola Dietetic Internship,
3. Pass the Registration Examination for Dietitians, national examination administered by the Commission on Dietetic Registration (CDR).
4. More information regarding the examination can be found online through CDR (https://www.cdrnet.org/).
5. Licensure is required to practice as a Registered Dietitian Nutritionist in the State of Illinois (https://www.idfpr.com/profs/dietNutrition.asp)

To maintain the RDN credential, one must complete continuing professional education requirements.

Effective January 1, 2024, the Commission on Dietetic Registration (CDR) will require the minimum of a master's degree to be eligible for the credentialing examination for registered dietitian nutritionist (RDN). For more information about this requirement, please refer to the CDR website (https://www.cdrnet.org/).

Professional Dietetic Practice

Upon successful completion of all LDI program requirements (supervised practice, didactic, seminars, and others based on track), students receive a verification statement of completion of the ACEND - accredited dietetic internship and are eligible to take the *Registration Examination for Dietitians* by the Commission on Dietetic Registration. In the State of Illinois, one must be licensed by the Department of Professional and Financial Regulation to practice dietetics. Information about licensure for dietitians in Illinois can be obtained at: http://www.idfpr.com/Renewals/apply/Forms/diet-ex.pdf.

Additional information about licensure for dietetic practice in other states can be found online (https://www.cdrnet.org/).

Accreditation

The Loyola University Chicago Dietetic Internship (LDI) is accredited by the Council on Accreditation for Education in Nutrition and Dietetics (ACEND) an agency of the Academy of Nutrition and Dietetics (AND). Upon successful completion of all LDI program requirements (supervised practice, didactic, seminars and others based on program track), students receive an ACEND verification statement and are eligible to take the Registration Examination for Dietitians by the Commission on Dietetic Registration. Information about accreditation status can be obtained from:

Accreditation for Education in Nutrition and Dietetics
Academy of Nutrition and Dietetics

- Healthcare Administration (MHA) (p. 1536)

Curriculum

The Loyola Dietetic Internship offers two options or tracks to completion: Dietetic Internship Certificate track (DI/C) or a combined Master of Science in Dietetics/Dietetic Internship (MS/DI).

Dietetic Internship Certificate track (DI/C)

This is 8 courses, 14 credits and includes 1100 hours of supervised practice as part of FONU 423, FONU 425, and FONU 427.

Upon completion of the DI/C requirements, the student receives the ACEND Verification Statement of Completion of a Dietetic Internship and is eligible to take the *Registration Examination for Dietitians*.

Code	Title	Hours
Didactic Courses		
FONU 400	Role Development in Dietetic Practice	1
FONU 420	Transition to Supervised Practice in the Dietetic Internship	1
FONU 422	Medical Nutrition Therapy Theory	3
FONU 424	Public Health Nutrition and Research Theory for Dietetic Practice	3
FONU 426	Food Management Theory: Geriatric Nutrition	1
Supervised Practice Courses		
FONU 423	Supervised Practice (SP) in Medical Nutrition Therapy	2
FONU 425	Supervised Practice Public Hlth Nutrition, Rsrch, Prof Dvlpmnt & Marketing	2
FONU 427	Supervised Practice: Food Management, Geriatric Nutrition	1
Total Hours		**14**

Combined Master of Science in Dietetics/Dietetic Internship (MS/DI)

This is 20 courses, 46 credits and includes 1100 hours of supervised practice as part of FONU 423, FONU 425, and FONU 427, and the comprehensive exam.

Upon completion of the MS/DI requirements, the student receives the ACEND Verification Statement of Completion of a Dietetic Internship and is eligible to take the *Registration Examination for Dietitians*, and a Master of Science in Dietetics degree from the Loyola University Chicago Graduate School.

MPBH 417	Global Maternal and Child Health	
MPBH 431	Grant Writing	
MPBH 495	Special Topics	

EXCM 450	Nutrition, Health and Performance	
Total Hours		**46**

Once a week, students are required to participate in class at the Loyola University Health Sciences Division (HSD) campus in Maywood, IL. Class time is not calculated in the supervised-practice hours and typically are scheduled from 6 p.m. - 9 p.m. Classes include lecture, discussion, group problem-solving, critical-thinking activities, exams, and additional assignments. In addition to the courses below, dietetic interns are required to attend seminars, both internal and external to the University, that enhance knowledge and skill development.

Please note that completion of the MS in Dietetics (p. 1530) degree also requires successful comprehensive exam completion according to policies of the Parkinson School of Health Sciences and Public Health.

Internship

Two Options For Completing the Loyola Dietetic Internship

Each track meets ACEND standards for dietetic internships. Ten students are admitted annually to each track of the LDI as coordinated by nationwide, computerized matching by D&D Digital (https://www.dnddigital.com/).

ANTICIPATION TIME FOR COMPLETION

- DI/C: 13 months
- MS/DI: 22 months

CREDITS

- DI/C: 14
- MS/DI: 46

D&D DIGITAL MATCHING NUMBER

- DI/C: 494
- MS/DI: 156

Both tracks are eligible to take the registration examination for dietitians.

HOURS OF SUPERVISED PRACTICE

- DI only: 1100
- MS/DI: 1100

SUPERVISED PRACTICE STARTS

- DI/C: The first semester after admission
- MS/DI: After completing majority of graduate work

UPON COMPLETION STUDENT RECEIVES

- DI/C: ACEND verification state of DI completion
- MS/DI: ACEND verification statement of DI completion and Loyola Master of Science (MS) in Dietetics degree

Supervised Practice Experiences Summary

Interns complete eight rotations during the course of the program, which are nested within FONU 423, FONU 425, and FONU 427. Interns are typically scheduled to complete supervised practice eight hours per day, typically Monday through Friday. Interns should expect to be in supervised practice two-three weekend days per semester. Time for travel is not part of supervised practice.

FONU 423 Supervised Practice (SP) in Medical Nutrition Therapy

Medical Nutrition Therapy (55 days): Interns develop skills to meet the responsibilities of a clinical dietitian and follow the host facility's standards of care and practice guidelines. Interns are initially assigned a low number of assessment, screening, educational, and follow-up activities per week on less-complex patients. As the weeks proceed, interns are assigned more complex cases and the volume of patients increases. In addition, interns participate in the quality management program for clinical nutrition care, in-service presentations, patient care conferences, and departmental meetings.

Dialysis Medical Therapy (5 days): Interns develop medical nutrition therapy skills with a focus on renal patients.

FONU 425 Supervised Practice Public Hlth Nutrition, Rsrch, Prof Dvlpmnt & Marketing

Public Health Nutrition (35 days): This experience allows interns to work with diverse age groups, as well as socioeconomic and cultural backgrounds. Interns are involved in planning and delivering nutrition programs including those provided by the Women, Infant, Children (WIC) special supplemental nutrition program, schools and school-based health clinics, Catholic Charities, and outpatient departments.

Professional Development (10 days): Students identify an area of professional dietetic practice that they would like to explore with additional experiences. The DI Director and student collaborate to develop this individualized experience using available resources.

Research (10 days): Students develop and engage in scholarly inquiry under the direction of faculty and preceptors, including perspectives of ethical considerations, research methods, statistical analysis, and dissemination of findings. Projects may be individual, group, and/or at other supervised practice sites.

Marketing Rotation (5 days): Interns have the opportunity to work on marketing a food product or nutrition service, employing market strategies, evaluating consumer needs and trends, testing products, and interacting with the media. Possible sites include food and pharmaceutical companies, public relations firms, and wellness programs.

FONU 427 Supervised Practice: Food Management, Geriatric Nutrition

Management Rotation (25 days): Interns actively participate in all aspects of food-service management, including production, purchasing, service, inventory systems, human resources, safety, and sanitation. Through this experience, interns gain experience in problem solving, quality management, and fiscal management.

Long-Term Care Rotation (5 days): Interns work collaboratively with preceptors to provide nutrition care to the elderly, developmentally disabled, psychiatric, and rehabilitation residents in long-term care facilities. This rotation includes experiences in both clinical nutrition care of residents and management of food-service operations within long-term care facilities.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Dietetic Internship Certificate track (DI/C)

Course	Title	Hours

	Hours	**6**
	Total Hours	**46**

Monthly Seminars and Activities

Interns broaden their perspective on various areas of dietetics through seminars, group tours, and other activities. Participation in all seminars and related activities is mandatory for all interns. Examples include: participation in the Distinguished Speaker Seminar Series and the Palmer Research Symposium sponsored by the Marcella Niehoff School of Nursing; Illinois Dietetic Association (IDA) Annual Assembly; IDA Lobby Day in Springfield, IL; seminars on sports nutrition, reimbursement and ethical issues in dietetic practice; media training; and an ethnic food tour. Participation in these activities is required. This time is not calculated as part of supervised-practice or didactic hours. An additional fee is added to tuition to cover the costs of seminar participation.

Other Details

Details about the Loyola academic calendar, including the start dates of each semester, can be found online (https://www.luc.edu/academics/schedules/index.shtml/).

Download the Loyola Dietetic Internship (LDI) program plan (https://www.luc.edu/media/lucedu/schoolhealthsciencespublichealth/documents/LDIProgramPlan.pdf). For additional questions, please contact: Joanne Kouba, (jkouba@luc.edu) PhD, RD, LDN, Director, Dietetics Education Programs. Also see the Dietetics Handbook Aug 2023 (https://www.luc.edu/media/lucedu/parkinson/pdfs/LDI.Handbook.revised.2023.08.28.Final.pdf).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Evaluate research to apply evidence-based guidelines, systematic reviews, and scientific literature in nutrition and dietetics practice. (CRDN 1.2)

Practice in compliance with current federal regulations and state statutes and rules, as applicable, and in accordance with accreditation standards and the Scope of Practice for the Registered Dietitian Nutritionist, Standards of Practice, Standards of Professional Performance, and Code of Ethics for the Profession of Nutrition and Dietetics. (CRDN 2.1)

Perform Medical Nutrition Therapy by utilizing the Nutrition Care Process, including the use of standardized nutrition terminology as a part of the clinical workflow elements for individuals, groups, and populations of differing ages and health status, in a variety of settings. (CRDN 3.1)

Develop recipes, formulas, and menus that are both acceptable and affordable, accommodating the cultural diversity and health needs of various populations, groups, and individuals. (CRDN 3.14)

Analyze risk in nutrition and dietetics practice (such as risks to achieving set goals and objectives, risk management plan, or risk due to clinical liability or foodborne illness). (CRDN 4.10)

Dietetics (MS)

For registered dietitians who want to be leaders in health care administration.

Loyola University Chicago offers a unique opportunity to complete a Master of Science degree in Dietetics. The program offers a healthcare administration focus, preparing professional, registered dietitians to design and implement systems that lead to desired health outcomes. This program can also be completed while simultaneously completing the Dietetic Internship.

Related Programs

Master's

- Exercise Science (MS) (p. 1531)
- Healthcare Administration (MHA) (p. 1536)

Certificate

- Dietetic Internship Certificate (p. 1526)

Curriculum

Successful completion of a comprehensive exam is a program requirement for degree conferral. The Master of Science in Dietetics (without the dietetic internship) does not require supervised practice or practicum hours in a health care agency. FONU 410 Nutrition Focused Physical Assessment requires experiential learning in a clinical skills or simulation lab on campus.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Evaluate research and apply evidence-based guidelines, systematic reviews, and scientific literature in nutrition and dietetics practice.
- Design, implement, and evaluate presentations to a target audience.
- Articulate one's skills, strengths, knowledge, and experiences relevant to career goals.
- Develop a plan to provide or develop a product, program, or service that includes a budget, staffing needs, equipment, and supplies.
- Demonstrate professional writing skills in preparing professional communications.

Exercise Science (MS)

Take the next step towards a career in rehabilitation, sports medicine, strength and conditioning, or clinical exercise physiology.

While a bachelor's degree in exercise science is sufficient to get an entry-level position, continuing education in exercise science is a must to advance in the field. At Loyola, you can earn a master's degree in exercise science and graduate better prepared to start your career in rehabilitation, sports medicine, strength and conditioning, or clinical exercise physiology.

Picture yourself helping people make positive lifestyle choices for their health, whether it's serving injured athletes, those living with primary disabilities, or the general public. A Masters Degree in Exercise Science affords you access to professionally accredited certifications, jobs with top-level employers, and a career that sets you above the rest if continuing to a terminal degree (e.g. Doctor of Physical Therapy, Ph.D., Physicians Assistant, etc.).

The Exercise Science (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Dietetics (MS) (p. 1530)
- Health Informatics (MS) (p. 1533)

Certificate

- Health Informatics Certificate (p. 1536)

Curriculum

During your first year in this two-year program, you will build a foundation in exercise science-related fields through classroom instruction and lab-based activities. In your second year, you will complete advanced specialty coursework as well as two 200-hour field experiences and a comprehensive final examination.

Besides the traditional Master's program, the Exercise Science (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

MSES Curriculum (35 credits)

Pre-Requisites: Anatomy with Lab (4 credits); Physiology with Lab (4 credits)

Code	Title	Hours
Foundational Coursework		
EXCM 401	Applied Physiology of Exercise	4
EXCM 450	Nutrition, Health and Performance	3
EXCM 475	Exercise Applications in Special Populations	3
EXCM 482	Research Methods and Evidence in Exercise Science	3
EXCM 485	Applied Biomechanics	4
EXCM 487	Movement Anatomy in Exercise	3
Tracks (p. 1531)		**9**
General track must complete a minimum of 9 credit hours from courses listed below.		
Concentrations in Strength and Conditioning and Human Performance or Clinical Exercise Science must complete 9 credit hours of track-specific curricula from the courses listed below.		
Internship Course		
EXCM 495	Field Experience I	3
EXCM 496	Field Experience II	3
Total Hours		**35**

Tracks

General track must complete 9 credit hours from the courses listed below. Tracks in Strength and Conditioning and Human Performance or Clinical Exercise Science must complete 9 credit hours of track-specific curricula from the courses listed below.

General Track

Code	Title	Hours
MS EXCM General Track-Specific Curricula		**9**
Must complete a minimum of 9 credit hours from below:		
EXCM 444	Strength Training and Conditioning	
EXCM 454	Applied Sports Science	
EXCM 458	Cardiac and Pulmonary Disease and Rehabilitation	
EXCM 468	Application of Advanced Clinical Exercise Testing & Prescription	
EXCM 478	EKG Interpretation	

EXCM 480	Advanced Exercise Assessment and Programming

EXCM 496	Field Experience II	3
Track Course		3
Track Course		3
	Hours	**13**
	Total Hours	**35**

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.
