Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Freshman		
Fall		
ENGR 101	Introduction to Engineering Design [1]	4
MATH 161	Calculus I [2]	4
BIOL 101	General Biology I [2]	3
BIOL 111	General Biology I Lab [2]	1
PHYS 121	College Physics I with Calculus Lecture/ Discussion [2]	3
UNIV 101	First Year Seminar [3]	1
	Hours	**16**
Spring		
COMP 170	Introduction to Object-Oriented Programming [2]	3
MATH 162	Calculus II [2]	4
PHYS 122	College Physics II with Calculus Lecture/ Discussion [2]	3

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Engineering - ABET Student Outcomes

Student outcomes describe what students are expected to know and be able to do by the time of graduation. Our students will possess:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering and mathematics.
- An ability to apply engineering process to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Engineering with an Environmental Engineering Specialization (BS)

Environmental engineers identify, analyze and design solutions to environmental problems, which disproportionately impact historically disadvantaged communities. Addressing environmental issues, such as water, wastewater, air quality, and solids, requires taking into account the underlying impacts of climate change that threaten the global community. Our students learn environmental analysis and management for the water and wastewater treatment industries.

English

Explore the resources and career opportunities available through the English BA degree program! This four-year degree guides undergraduates towards developing new research and communication skills through reading, critiquing, and writing about literature and theory.

Mission and Goals

The Department of English at Loyola University Chicago seeks to promote the university's mission to encourage freedom of inquiry, the pursuit of truth and care for others through teaching, scholarship and service of the highest caliber.

In its teaching, the Department of English seeks to provide students with an education of the highest quality in the English language, in literature written in English and in critical and creative writing, judiciously combining breadth with depth, tradition with contemporaneity. It seeks to attract the best possible students from diverse geographical, professional, racial and ethnic backgrounds; it encourages minority and foreign applicants and those returning to school after an interruption of their academic lives. It encourages students throughout their programs so as to enable them to progress expeditiously to their degrees and to gain the maximum benefit from their experience.

Through the work of its faculty, the Department of English also strives to participate in and contribute to the wider community of scholarship, research and pedagogical theory and practice in the disciplines of literary and critical studies; in creative and critical writing; in comparative literature; in gender, ethnic and cultural studies; in teacher training; and in linguistics.

The Department of English also seeks to serve the larger university and greater Chicago community through public event programming, collaborative projects with secondary schools and other colleges and universities, and general assistance.

The Department of English operates four programs: the Writing Programs, Core Courses in English Language and Literature, the Undergraduate Major and Minor Programs, and the Graduate Programs. Specific goals for each of these programs follow. In order to achieve these goals at the highest levels of professional and intellectual accomplishment, the department seeks to recruit, support and retain the best faculty, and to foster academic freedom in teaching and research in ways that support the university's mission of producing knowledge in the service of humanity.

Writing Programs

- Develop in students' writing sound organization of thought, clarity in the structure of sentences and paragraphs, forceful, energetic prose and critical thinking; undergird the Writing Across the Curriculum Program in the undergraduate colleges; provide remedial instruction for those students who require it; and bring students with second language and dialect interference problems into the mainstream of standard written English
- Offer tutorial and collaborative aid at the LUC Writing Centers at Lake Shore and Water Tower Campuses to students from all colleges and levels of the university

Core Courses in English Language and Literature

- Introduce students to the study of literature by providing practice in careful, critical reading and developing in them a sense of the various contexts—biographical, social, political, etc.—that can enrich their understanding of a work
- Foster in students an appreciation and enjoyment of literature's aesthetic and intellectual elements
- Enhance students' perception of the richness and diversity of the social and ethical values in literature and our response to them, recognizing that literature is by its nature value-laden; that each author and reader brings to his or her work an ethical framework and vision of the human condition
- Enable students to transfer sensitivity to language and literary structure to their own writing, through a required writing component in each course
- Offer guidance and training in the writing of fiction, poetry and non-fictional prose

Undergraduate Programs

- English (BA) (p. 393)
- English (BA/BSED) (p. 394)
- English Honors (p. 396)
- English Minor (p. 396)
- English with a Creative Writing Concentration (BA) (p. 397)
- Shakespeare Studies Minor (p. 450)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

English (ENGL)

ENGL 100 Developmental Writing (3 Credit Hours)
English 100 is a basic writing course that provides instruction in fundamental composition skills to prepare the student for UCWR 110. The course emphasizes mastery of grammar, usage, and punctuation. Placement required.
Outcomes:
Students will develop skill in: writing with a clear audience and purpose in mind; developing a clearly stated thesis which acts as the governing idea of an essay; writing coherent paragraphs and well-organized longer essays using various invention strategies; using transitions to link ideas; exhibiting a working knowledge of basic grammar, usage, and punctuation conventions

ENGL 102 College Composition ESL 1 (3 Credit Hours)
English 102 is the first of a two-course sequence designed to improve the linguistic abilities of those for whom English is a second language. This course provides grammar and writing instruction for students who require more focused work in revising language usage and composing than English 103 can provide. Placement required.
Outcomes:
Students will develop skill in: writing essays that develop a clearly-stated governing idea and that provide relevant support for that idea; proceeding through all stages of the writing process: prewriting, drafting, and revising, with emphasis on improving language usage; editing their own compositions, and working with other students in peer-editing groups; consistently employing English-language grammar, usage, and punctuation

ENGL 103 College Composition ESL 2 (3 Credit Hours)
English 103 is the second of two courses intended to improve the linguistic abilities of those for whom English is a second language. English 103 stresses the acquisition of necessary language skills in the areas of grammar and usage, comprehension and critical reading, and writing at a level appropriate to university study in an English-speaking country. Placement required.
Outcomes:
Students develop skill in: writing with a clear audience and purpose in mind; developing a clearly stated thesis which acts as the governing idea of an essay; writing coherent paragraphs and well-organized longer essays using various invention strategies; using transitions to link ideas; exhibiting a working knowledge of grammar, usage, and punctuation

ENGL 210 Business Writing (3 Credit Hours)
English 210 provides training and practice in various forms of writing (such as memos, instructions, letters, resumes, proposals, and reports) relevant to students who are considering careers in business.
Outcomes:
Students will demonstrate familiarity with genres and styles of writing commonly used in business, with the stages of the writing process, and with individual and collaborative methods of composing

ENGL 211 Writing for Pre-Law Students (3 Credit Hours)
Pre-requisites: successful completion of UCWR 110
Studies in argument and exposition from a lawyer's perspective for students considering the study of law.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will gain an understanding of the principles involved in writing clear and effective prose for a variety of legal purposes, and be able to apply these principles to their own writing in the field

ENGL 212 Science Writing, Technical Communication, and Problem-Solving in Public (3 Credit Hours)
It doesn't matter how brilliant your work is if no one can understand it. Communication in technical and scientific fields involves presenting solutions to complex problems to a wide variety of audiences. Your research is important and this class is designed to help you better communicate your work and its significance. This course will introduce you to the principles and practices of technical writing, emphasizing clear, concise, and effective communication across contexts. This course focuses on training the skills you need to make your work legible beyond a narrow specialty area. You will learn how to write, design, revise, and analyze technical and scientific documents, including reports, proposals, research grants, instructional guides, and literature reviews. The term will conclude with a poster session, presentation, and research paper. Through hands-on assignments and team-based projects, you will develop the skills to communicate complex information clearly, tailor content to specific audiences, and collaborate effectively.
Outcomes:
Recognize characteristics and conventions of technical writing across fields; Research, analyze, and synthesize technical information; Present research findings and data across a variety of modalities; Develop proficiency in writing about technical topics for a variety of audiences; Design graphics to communicate technical, scientific, and statistical information; Deliver effective technical presentations; Develop an understanding of collaborative team dynamics, including conflict resolution; Write clear, concise, correct, and professional prose

ENGL 220 Theory and Practice of Tutoring Writing (3 Credit Hours)
This seminar explores Writing Center pedagogical theory and practice. It includes a community-based service-learning component that involves community-service, professional development, leadership development, civic engagement, and cross-curriculum collaboration on a daily basis to continually improve the quality of the writing tutoring services.
This course satisfies the Engaged Learning requirement.

ENGL 271 Exploring Poetry (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
The course will survey British and American poetry, especially from the Romantic movement on, especially of lyric kinds. Class discussion will generally focus on the form and sense of individual poems, and will in general be about poetic ways of meaning, and individual poets' understandings of what poetry is and what it is to do.
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ENGL 271/ACENG 271
Outcomes:
Students will be able to demonstrate an understanding of significant poems by selected British and American poets, demonstrate an understanding of basic critical terminology, and demonstrate an understanding of relevant critical perspectives on poetry

ENGL 272 Exploring Drama (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the understanding, appreciation, and criticism of drama; extensive readings and several critical analyses are required. Students will also be able to demonstrate understanding of how plays are constructed in different ways to serve different purposes.
Knowledge Area: Tier 2 Literary Knowledge
Outcomes:
Students will be able to demonstrate understanding of drama's ability to express the deepest and most complex feelings and concerns of human beings as individuals, as family members, and as members of society: the individual's place in the universe, in relation to others, and in relation to the socio-political system that he or she inhabits

ENGL 273 Exploring Fiction (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the understanding, appreciation, and criticism of prose fiction.
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ENGL 273/ACENG 273
Outcomes:
Students will be able to demonstrate understanding of fiction as a means of exploring human experience and understanding the creative process, and be able to use the technical vocabulary necessary for understanding fiction

ENGL 274 Exploring Shakespeare (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the works of Shakespeare as literature and as theatre, covering at least three of the four genres (comedy, history, tragedy, romance).
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ACENG 274 / ENGL 274
Outcomes:
Students will be able to demonstrate understanding of the theatrical and poetic works of Shakespeare, such elements of drama as plot, character, theme, imagery, and verse forms, as well as the personal, political and theatrical world in which Shakespeare lived and worked

ENGL 282 African-American Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the development of the African American literary tradition from the emergence of the slave narrative to the contemporary present.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: ENGL 282 / ACENG 282
Outcomes:
Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods

ENGL 282B African-American Literature 1700-1900 (3 Credit Hours)
This course focuses on the development of the African American literary tradition from the emergence of slave narrative to the contemporary present. This particular version of the course focuses on material within the time period 1700-1900.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Race and Ethnicity
Outcomes:
Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods

ENGL 282C African-American Literature since 1900 (3 Credit Hours)
This course focuses on the development of the African American literary tradition from the emergence of slave narrative to the contemporary present. This particular version of the course focuses on material since 1900.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods

ENGL 283 Women in Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the representation of women in literature, as discussed in a variety of literary works.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: ENGL283/WOST283/WSGS283
Outcomes:
Students will be able to demonstrate understanding of the representations of women in various periods of literary history and diverse cultural contexts

ENGL 284 Asian American Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the range of Asian American literature from its earliest works around the turn of the 20th century to its proliferation in contemporary literature.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Students will trace major developments in Asian American literature, recognize the diversity of Asian American identities and histories, and apply key concepts and historical contexts from Asian American culture

ENGL 287 Religion and Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the study of literature and religion as a contemporary field of inquiry. It aims to explain and illustrate the nature and theoretical strategies of a religious literary criticism, and to encourage an appreciation of this valuable and productive way of reading.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will be able to use the technical vocabulary necessary for discussing literary representations of religious and spiritual experience

ENGL 288 Nature in Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the relationship of human beings and the environment in which they function, as represented in a variety of literary works.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Course equivalencies: X-ENGL288/ESP 288/PAX 288
Outcomes:
students will be able to demonstrate understanding of the representations of ""nature"" in various periods of literary history and diverse cultural contexts

ENGL 290 Human Values in Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This variable topics course focuses on a perennial psychological or philosophical problem facing the individual as exemplified in literary works, e.g., the passage from innocence to experience, the problem of death, and the idea of liberty.
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ACENG 276 / ENGL 290
Outcomes:
Students will be able to demonstrate understanding of the ability of literature to express the deepest and most abiding concerns of human beings, and how literary works come to be

ENGL 292 South Asian Literature and Civilizations (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
An introduction to South Asian literatures and civilizations, from ancient to contemporary times, with attention to social institutions, religious practices, artistic achievements, literature, and modern challenges.
Interdisciplinary Option: Global Studies
Outcomes:
Students will gain an understanding of the cultures and civilizations of South Asia

ENGL 293 Advanced Writing (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent (grade of C- or higher)
This advanced writing course will focus on scholarly theories about the practice and process of writing. Course work will center on students' reconsiderations of their own writing processes in the context of scholarly composition theory.
Outcomes:
Students will develop and demonstrate theoretical knowledge of advanced strategies for producing academic writing

ENGL 294 Writing in/with New Media (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent, grade of C- or higher
This advanced writing course will consider how communication is mediated and remediated in the digital age, and draw connections between historical moments of print culture with that of contemporary technological advancement. Writing will engage emerging digital genres (websites, blogs, memes), digital storytelling, multimodal composition, and social media.
Outcomes:
Learn terms/theories/concepts of new media historically and in the present; identify interactions between new media, writing, and other disciplines; effectively move a piece of writing from concept to revision

ENGL 295 Writing Toward Social Justice: Eloquentia Perfecta (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent, grade of C- or better
Course will address problems of community concern through Jesuit rhetorical practice, with basis in thinking, acting and reflecting. Students will learn how to write and speak in a variety of outward-facing modalities. They will work in partnership with a local community organization, applying techniques and practices learned in the classroom. This course satisfies the Engaged Learning requirement.
Outcomes:
Reflection: personal concerns and values; Community organization collaboration: writing and presentation projects; Peer review and group writing; Proficiency in modalities: op-ed pieces, funding requests, promotional writing, multimodal presentations, grant writing

ENGL 296 Research Writing: Open Source Tools and Techniques (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent; COMP 141 or instructor permission
This course trains students in free, open-source, and text-based software to support clear, well-organized, accurate, and verifiable writing in academic contexts. The software tool-chain includes Zotero, LaTeX, Pandoc, and Git. Key writing skills are note-taking, information management, and revision.
Course equivalencies: X - COMP 250 / ENGL 296
Outcomes:
Students will acquire working knowledge of text-based and open-source software tools to support academic research and writing; Students will create researched arguments that are clear, well-organized, accurate and verifiable

ENGL 299 Topics in Advanced Writing (3 Credit Hours)
Pre-requisites: UCWR 110
This is a course in writing clear and effective prose in whatever form/genre is being studied; the subtitle will define the form/genre more precisely.
Outcomes:
Students will gain an understanding of the principles involved in writing clear and effective prose in whatever form/genre is under study, and be able to apply these principles to their own writing in this form/genre

ENGL 300 History of English Language (3 Credit Hours)
Study of the origin and development of English: its sounds, word-forms, and syntax.
Outcomes:
Students will demonstrate knowledge of the history of English and some understanding of linguistic theory

ENGL 303 Grammar: Principles & Pedagogy (3 Credit Hours)
A study of English grammar focusing on linguistic applications such as the teaching of Standard American English to native and non-native speakers, to speakers of Ebonics, and other classroom applications. Required for students planning to teach high school English, but open to others.
Outcomes:
Students will demonstrate understanding of grammar and sentence structure sufficient to teach them

ENGL 306 Studies in Women Writers (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry from any literary period.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 306A Studies in Women Writers Before 1700 (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry from before 1700.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 306B Studies in Women Writers 1700-1900 (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry within the period from 1700-1900.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 306C Studies in Women Writers Since 1900 (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry since 1900.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 307 Topics in Feminist and Gender Studies (3 Credit Hours)
This course is an intensive study of selected issues in women's studies or gender studies in relation to literature.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL307/WOST307/WSGS307

ENGL 311 U.S. Latino/a Literature (3 Credit Hours)
Pre-requisites: UCWR 110 plus one 200-level ENGL course
Students will study literature by U.S. Latino and Latina writers (esp. Mexican American, Puerto Rican, Dominican American, and Cuban American). Readings will highlight the variety of aesthetic styles and cultural points of view that characterize this rapidly growing field. Issues like language (bilingualism, translation, and code-switching), immigration, nationalism, transnationalism, and citizenship will be especially important.
Interdisciplinary Option: Latin American Studies
Outcomes:
Students will develop analytical tools, culturally-specific terms, and critical questions to help them to interpret and to write about Latino/a literature

ENGL 312 Studies in World Literature in English (3 Credit Hours)
Pre-requisites: UCWR 110 and a 200-level English course
This course adopts a transnational, trans-historical approach to Anglophone world literatures. Readings may include global, postcolonial, and/or diasporic literatures in English.
Interdisciplinary Option: Global Studies
Outcomes:
Students will develop analytical tools, culturally-specific terminology, and critical questions to enable them to interpret and formulate arguments about global English-language literatures

ENGL 312A Studies in World Literature in English Before 1700 (3 Credit Hours)
This course will introduce students to a range of critical and theoretical approaches to the study of world literatures in English. Authors studied may include leading theorists like Frantz Fanon, Edward Said, Gayatri Spivak, Homi Bhabha, Paul Gilroy, and Arjun Appadurai; and literary writers before 1700.
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about world literatures in English

ENGL 312B Studies in World Literature in English 1700-1900 (3 Credit Hours)
This course will introduce students to a range of critical and theoretical approaches to the study of world literatures in English. Authors studied may include leading theorists like Frantz Fanon, Edward Said, Gayatri Spivak, Homi Bhabha, Paul Gilroy, and Arjun Appadurai; and literary writers within the period of 1700-1900.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about world literatures in English

ENGL 312C Studies in World Literature in English Since 1900 (3 Credit Hours)
This course will introduce students to a range of critical and theoretical approaches to the study of world literatures in English. Authors studied may include leading theorists like Frantz Fanon, Edward Said, Gayatri Spivak, Homi Bhabha, Paul Gilroy, and Arjun Appadurai; and literary writers since 1900.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about world literatures in English

ENGL 313 Border Literatures (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The study of border literatures will vary, and may include Hispanic-American writers, the Caribbean poet, Derek Walcott, and other literatures that move between disparate locations (England, India, Africa, Burma, etc.).
Interdisciplinary Option: Global Studies, Race and Ethnicity
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 313A Border Literature Before 1700 (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The focus of the study of border literatures before 1700 will vary, and may include various writers in literatures that move between disparate locations (England, the Americas, India, Africa, Burma, etc.).
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 313B Border Literature 1700-1900 (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The study of border literatures from within this period will vary, and may include various writers in literature that move between disparate locations (England, the Americas, India, Africa, Burma, etc.).
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 313C Border Literature Since 1900 (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The focus of the study of border literatures from within this period will vary, and may include various writers in literatures that move between disparate locations (England, the Americas, India, Africa, Burma, etc.).
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 315 South Asian Literatures in English (3 Credit Hours)
This course focuses on the study of literature written in English from South Asia and the South Asian diaspora. Authors studied may include Narayan, Naipaul, Desai, Sidhwa, and Rushdie.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will be able to demonstrate understanding of the personal, cultural, and political experiences of South Asia's diverse populations as they are reflected in the literature of the modern and contemporary period

ENGL 315C South Asian Literature Since 1900 (3 Credit Hours)
This course focuses on the study of literature written in English from South Asia and the South Asian diaspora, focusing on the period since 1900. Authors studied may include Narayan, Naipaul, Desai, Sidwa, and Rushdie.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will be able to demonstrate understanding of the personal, cultural, and political experiences of South Asia's diverse populations as they are reflected in the literature of the modern and contemporary period

ENGL 316C Caribbean Literature in English Since 1900 (3 Credit Hours)
This course will introduce students to the study of literature written in English from the Caribbean in this period. Authors studied may include Lamming, Rhys, Walcott, Cliff, Lovelace, and Brathwaite.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Outcomes:
Students will be able to demonstrate understanding of the different genres of Caribbean literature, as well as the personal, political, and cultural contexts of the literature

ENGL 317 The Writing of Poetry (3 Credit Hours)
This course provides extensive practice in both the reading and the writing of poetry.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate understanding of the critical skills necessary for discussing, analyzing and formulating arguments about poetry, and will produce a portfolio of original poems

ENGL 318 The Writing of Fiction (3 Credit Hours)
This course will discuss the techniques of fiction writing and will offer guidance in writing some works of original short fiction.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate understanding of the critical skills necessary for discussing, analyzing and formulating arguments about fiction, and will produce original short stories

ENGL 318R The Writing of Fiction: Writing Rome (3 Credit Hours)
By exploring the city of Rome through reading, writing, and on-site classes, students will be provided with an interdisciplinary approach to the generation of written work. This course will discuss the techniques of fiction writing, drawing inspiration from the city of Rome as a backdrop. On-site classes will enrich the fiction writing process, while in-class workshops will offer guidance in writing works of short original fiction.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Italian Studies
Outcomes:
Students will be able to demonstrate understanding of the critical skills necessary for discussing, analyzing and formulating arguments about fiction, and will produce original works of fiction in the form of writing portfolio

ENGL 319 Writing Creative Nonfiction (3 Credit Hours)
A workshop in writing and critiquing original creative nonfiction in several representative sub-genres.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will learn to apply both traditional fictional techniques (eg, in-depth characterization, dramatic plot development, specific concrete detail) and more innovative ones (eg, shifting chronology, genre mixing, eccentric voices, multiple points-of-view) in their nonfiction writing

ENGL 320 English Literature: Medieval Period (3 Credit Hours)
This course provides a survey of Old and Middle English Literature, studied partly in translation and partly in the original.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-ENGL320/CATH321/MSTU308
Outcomes:
Students will receive training in the understanding, appreciation, and criticism of works of medieval culture

ENGL 321 Intro to Old English (3 Credit Hours)
This course introduces students to the fundamentals of the Old English language (c. 600-1150), surveying poetry and prose in the original.
Interdisciplinary Option: European Studies, Medieval Studies
Course equivalencies: X-ENGL321/MSTU312
Outcomes:
Students will be able to read Old English and to demonstrate a knowledge of literary works written in this language

ENGL 322 Chaucer (3 Credit Hours)
This course introduces students to the life and writings of Chaucer through the reading of a representative selection (but not necessarily all) of The Canterbury Tales and through considering a variety of critical perspectives on them.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-ENGL322/MSTU316
Outcomes:
Students will be able to demonstrate knowledge of Chaucer's poetry, the ability to read Middle English, and familiarity with some critical perspectives on Chaucer's works

ENGL 323 Studies in Medieval Literature (3 Credit Hours)
Intensive study of specific topics in the field of Medieval literature and culture.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-ENGL323/MSTU320
Outcomes:
Students will be able to demonstrate an understanding of significant works of the Medieval period, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 325 British Literature-The Renaissance (3 Credit Hours)
This course is a study of selected literature of the Tudor, Stuart, and Cromwellian periods, excluding Shakespeare, by authors such as Sidney, Spenser, Lanyer, Donne, Wroth, and Milton.
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students will become familiar with: the texts of significant authors of the period; how to read these texts in relation to the intellectual and social contexts in which they were produced; the literary genres, traditions, and conventions they employed and transformed

ENGL 326 Shakespeare: Selected Major Plays (3 Credit Hours)
This course is an advanced study of selected plays as theatre and as literature. Topics may include Shakespeare's life, sources, and influence; background of Early Modern literature and drama; Shakespeare's theatre; the tradition of Shakespeare criticism.
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students will be able to demonstrate understanding of, to analyze, and to defend interpretations of the plays of Shakespeare

ENGL 327 Studies in Shakespeare (3 Credit Hours)
Pre-requisites: ENGL 274 or 326
Intensive reading of selected Shakespeare plays.
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students will be able to demonstrate understanding of, to analyze, and to defend interpretations of a particular body of plays by Shakespeare, chosen by genre, theme, etc

ENGL 328 Studies in The Renaissance (3 Credit Hours)
The course will be a highly selective survey of late Renaissance literature, from John Donne and Ben Jonson to Andrew Marvell.
Interdisciplinary Option: Catholic Studies, European Studies, Shakespeare Studies
Outcomes:
Students will be able to: 1) demonstrate an understanding of significant works by selected Renaissance authors; 2) demonstrate an understanding of historical, political, social, and intellectual backgrounds as they provide a context for the poems; 3) demonstrate an understanding of relevant theoretical and critical perspectives

ENGL 329 Milton (3 Credit Hours)
This course will cover Milton's early poetry, one or two of his prose works, and his late, major poems: Paradise Lost, Paradise Regained, and Samson Agonistes.
Interdisciplinary Option: Catholic Studies, European Studies
Outcomes:
Students will be able to: 1) demonstrate an understanding of Milton's major works, and a knowledge of his career; 2) demonstrate an understanding of social, political, and cultural backgrounds as they provide a context for Milton's poems; 3) demonstrate an understanding of relevant theoretical and critical perspectives

ENGL 335 British Literature - The Romantic Period (3 Credit Hours)
This course focuses on the study of literature of the Romantic movement in its historical context; authors may include Blake, Wordsworth, Coleridge, Smith, Byron, P.B. Shelley, M.W. Shelley, Keats, Hemans, Hazlitt, and Austin.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of major works of the Romantic movement, and of its relationship to historical developments of the period

ENGL 338 Studies in The Romantic Movmnt (3 Credit Hours)
Students will engage in intensive consideration of selected Romantic period texts. The focus of the course will vary according to the instructor's choice of topic.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to discuss and analyze the texts studied in this course, and to articulate diverse positions on the issues related to the course's central topic

ENGL 340 British Literature - The Victorian Period (3 Credit Hours)
This course provides a survey of important works of prose, poetry, and fiction from the Victorian period (1832-1901). Authors may include Tennyson, the Brownings, Arnold, the Brontës, Hopkins, Hardy, Newman, Dickens, Thackeray, and George Eliot.
Interdisciplinary Option: European Studies
Outcomes:
Students will demonstrate their ability to analyze and interpret a variety of works studied in the course, and to articulate an awareness of the social, political, and historical contexts that inform an understanding of these works

ENGL 343 Studies in the Victorian Period (3 Credit Hours)
This course provides an opportunity for intensive consideration of selected Victorian texts that centers on a particular theme or genre or author. The course will vary each time it is taught.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of the subject of the course and an appreciation of that particular aspect of Victorian life, art, and thought

ENGL 344 Studies in Modernism (3 Credit Hours)
Pre-requisites: UCWR 110 and a 200-level English course
The course focuses on selected issues in current critical discussions of modernism. The issues may concern competing conceptions of modernism and individual writers associated with modernism.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to articulate diverse positions on the issues of the course

ENGL 345 British Literature Since 1900 (3 Credit Hours)
Pre-requisites: UCWR 110 and one 200-level English course
This course focuses on selected examples of British poetry, fiction, drama, film, and non-fiction written in the 20th century. The principle of selection may be cultural, theoretical, or formal.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of assigned texts and will be able to explain the relationship among assigned texts in relation to the themes of the course

ENGL 348 Studies in British Literature Since 1900 (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level English course
This course focuses intensively on selected twentieth century British texts in relation to social and literary issues of the period. The selection may focus on cultural, theoretical, or formal issues.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate detailed knowledge of particular texts and will be able to describe the relation of the assigned texts to a particular set of critical questions

ENGL 350 Studies in Postmodernism (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level English course
Postmodernism, as an aesthetic response to postmodernity, is an interdisciplinary concept, originating in architecture and encompassing literature, art in various media, digital media, and literary and cultural theory. Focusing primarily on Western literature and theory after WWII, this course investigates postmodernism as a literary period, an aesthetic style, an historical moment, and a cultural problematic.
Outcomes:
Students will learn how the term "postmodernism" functions as a literary period, an aesthetic style, an historical moment, a cultural problematic, as well as a theoretical imperative

ENGL 351 Contemporary Literature (3 Credit Hours)
Contemporary literature is most often defined as literature produced after WWII. This course explores the challenge of defining "contemporary" literature by reading a range of texts from the period in their aesthetic, social, historical, and cultural contexts.
Outcomes:
Students will learn critical and analytical tools for reading contemporary literature

ENGL 354 Contemporary Critical Theory (3 Credit Hours)
This course, which is required of all English majors, introduces students to critical terminology and to issues in contemporary criticism and theory. Readings may include critical works that have informed and established formalist, feminist, psychoanalytic, and Marxist approaches to literary analysis, as well as those associated with gender studies, cultural studies, postcolonialism, and deconstruction.
Outcomes:
Students will be able to demonstrate knowledge and understanding of significant texts and theories relating to issues in contemporary criticism

ENGL 355 Studies in Literary Criticism (3 Credit Hours)
Intensive study of specific topics in the field of literary criticism and theory.
Outcomes:
Students will be able to demonstrate an understanding of significant works in the designated field, and will be able to discuss relevant theoretical and critical perspectives

ENGL 357 Literature from a Writer's Perspective (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level English course
This course examines literature from various periods in poetry and/or prose for technical innovation and genre development, with particular emphasis on applications to the creative process.
Outcomes:
Students will gain a deeper understanding of the technical innovations and/or genre developments being studied, and will be able to apply these to their own creative works of fiction and/or poetry

ENGL 358 Cultural Theory (3 Credit Hours)
This course provides an introduction to the theory informing the field of Cultural Studies and to the history of theoretical writings about "culture."
Outcomes:
Students will be able to demonstrate knowledge and understanding of significant theoretical texts in the field of cultural studies

ENGL 359 High and Low Culture (3 Credit Hours)
Students will study the interactions between elite and popular culture, possibly focusing on a historical period or on a conceptual issue such as the framing of "canons." Students will review and assess the assumptions and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 359A High and Low Culture Before 1700 (3 Credit Hours)
Students will study the interaction between elite and popular culture, focusing on the material and issues relating to the period before 1700. Students will review and assess the assumption and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 359B High and Low Culture 1700-1900 (3 Credit Hours)
Students will study the interaction between elite and popular culture, focusing on the material and issues relating to the period from 1700-1900. Students will review and assess the assumption and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 359C High and Low Culture Since 1900 (3 Credit Hours)
Students will study the interaction between elite and popular culture, focusing on the material and issues relating to the period after 1900. Students will review and assess the assumption and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 361 Modernist Poetry (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course is a study of poetry written in response to the conditions of modernity from the late 19th century to the middle of the 20th. The course focuses on poetic style and technique as well as on historical and cultural contexts.
Outcomes:
Students will be able to demonstrate knowledge and understanding of significant texts, techniques, and concepts in modernist poetry, and to situate these in relation to important literary and historical contexts

ENGL 362 Studies in Poetry (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries.
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 362A Studies in Poetry Before 1700 (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on poetry written before 1700.
Course equivalencies: ENGL362/362A/362B/362C
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 362B Studies in Poetry 1700-1900 (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on poetry written between 1700 and 1900.
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 362C Studies in Poetry Since 1900 (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on poetry written since 1900.
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 363A Major Author, Before 1700 (3 Credit Hours)
Intensive study of the works and contexts of a major author, before 1700. Students will be able to demonstrate an understanding of the texts and contexts of a major author, before 1700.

ENGL 363B Major Author, 1700-1900 (3 Credit Hours)
Intensive study of the works and contexts of a major author, 1700-1900. Students will be able to demonstrate an understanding of the texts and contexts of a major author, before 1700.

ENGL 363C Major Author, After 1900 (3 Credit Hours)
Intensive study of the works and contexts of a major author, after 1900. Students will be able to demonstrate an understanding of the texts and contexts of a major author, after 1900.

ENGL 367 Modern Drama (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course is a study of dramatists and dramatic forms, techniques, and innovations from the late-nineteenth century to the present.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to recognize and define major modern dramaturgical techniques and to demonstrate understanding of, to analyze, and to defend interpretations of a variety of plays

ENGL 368 Studies in Drama (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 368A Studies in Drama Before 1700 (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on drama written before 1700.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 368B Studies in Drama 1700-1900 (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on drama written between 1700 and 1900.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 368C Studies in Drama Since 1900 (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on drama written since 1900.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 369A Women in Drama Before 1700 (3 Credit Hours)
This course focuses on women as playwrights, actors, directors, spectators, and subjects of drama before 1700.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will be able to demonstrate understanding of the ways in which women and issues important to women have been presented on the stage; they will be able to analyze and defend interpretations of a variety of plays

ENGL 369B Women in Drama 1700-1900 (3 Credit Hours)
This course focuses on women as playwrights, actors, directors, spectators, and subjects of drama between 1700 and 1900.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will be able to demonstrate understanding of the ways in which women and issues important to women have been presented on the stage; they will be able to analyze and defend interpretations of a variety of plays

ENGL 371 The Modern Novel (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course covers novels since the late 19th century and explores formal and cultural influences on the form.
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about the novel in the modern world

ENGL 372 Studies in Fiction (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 372A Studies in Fiction Before 1700 (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on fiction written before 1700.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 372B Studies in Fiction 1700-1900 (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on fiction written between 1700-1900.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 372C Studies in Fiction Since 1900 (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on fiction written since 1900.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 375 American Literature to 1865 (3 Credit Hours)
This course is a study of selected works of American Literature of this period against the background of historical events, political and social changes, moral and cultural traditions. Authors may include Bradford, Bradstreet, Franklin, Poe, Hawthorne, Melville, Emerson, and Thoreau.
Outcomes:
Students will be able to demonstrate understanding of the distinctive historical conditions that inform American literature of this period, and will be able to identify and discuss some of its ideological and generic characteristics

ENGL 376 American Literature 1865-1914 (3 Credit Hours)
This course is a study of the rise of American Literature of this period. Authors may include Whitman, Dickinson, Twain, James, and Dreiser.
Course equivalencies: ENGL 376 / ENGL 380
Outcomes:
Students will be able to demonstrate understanding of the distinctive historical conditions that inform American literature of this period, and will be able to identify and discuss some of its ideological and generic characteristics

ENGL 377 American Literature 1914-1945 (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course is a study of literature of early twentieth-century America. Authors may include Cather, Eliot, Frost, Hemingway, Fitzgerald, Faulkner, O'Neill, Miller and Williams.
Course equivalencies: ENGL 377 / ENGL 385
Outcomes:
Students will be able to demonstrate knowledge of the literature of this period in American history, and familiarity with critical perspectives on the works studied

ENGL 379 Studies in American Literature (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement, period, or theme.
Outcomes:
students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 379A Studies in American Literature Before 1700 (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement or theme before 1700.
Outcomes:
Students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 379B Studies in American Literature 1700-1900 (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement or theme in the period from 1700-1900.
Outcomes:
Students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 379C Studies in American Literature Since 1900 (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement or theme in the period since 1900.
Outcomes:
Students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 381 Comparative American Literature (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 381A Comparative Literature Before 1700 (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures, with a focus on the period before 1700.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 381B Comparative American Literature 1700 - 1900 (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures, with a focus on the period before 1700.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 381C Comparative American Literature Since 1900 (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures, with a focus on the period since 1900.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 382 Studies in American Culture (3 Credit Hours)
Intensive study of specific topics in the field of American culture.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 382A Studies in American Culture Before 1700 (3 Credit Hours)
Intensive study of specific topics in the field of American culture before 1700.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 382B Studies in American Culture 1700-1900 (3 Credit Hours)
Intensive study of specific topics in the field of American culture between 1700 and 1900.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 382C Studies in American Culture Since 1900 (3 Credit Hours)
Intensive study of specific topics in the field of American culture since 1900.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 383 Theology and Literature (1-3 Credit Hours)
Study of theological and religious symbols and themes in modern literature and/or in the arts.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-THEO383/ENGL383/CATH383
Outcomes:
The student who successfully completes this course will be able to demonstrate knowledge about religion and its intersections with selected contemporary ethical, social, political, economic, or cultural issues

ENGL 384 Studies in African American Literature (3 Credit Hours)
Intensive study of texts written by African American authors. The course varies in topic and may concentrate on a selection of works by a major African American writer or a particular African American literary movement, period, or theme.
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to demonstrate an understanding of African American literature and culture with specialized attention to a major or distinctive feature of the African American literary tradition

ENGL 384B Studies in African American Literature, 1700-1900 (3 Credit Hours)
Intensive study of texts written by African American authors. The course varies in topic and may concentrate on a selection of works by a major African American writer or a particular African American literary movement or theme, 1700-1900.
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to demonstrate an understanding of African American literature and culture with specialized attention to a major or distinctive feature of the African American literary tradition, 1700-1900

ENGL 384C Studies in African American Literature Since 1900 (3 Credit Hours)
Intensive study of texts written by African American authors. The course varies in topic and may concentrate on a selection of works by a major African American writer or a particular African American literary movement or theme since 1900.
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to demonstrate an understanding of African American literature and culture with specialized attention to a major or distinctive feature of the African American literary tradition since 1900

ENGL 390 Advanced Seminar (3 Credit Hours)
Pre-requisites: Junior standing
This course is required of all English majors. It offers an advanced, intensive study of a period, author, genre, theme or critical issue in a seminar setting. Topics are announced when the course is offered.
Outcomes:
Students will be able to recognize the ways that the subject matter of the seminar relates to the production, representation, and interpretation of artistic culture

ENGL 392 Advanced Creative Nonfiction Workshop (3 Credit Hours)
Pre-requisites: ENGL 319 Writing Creative Nonfiction
This is a workshop in writing creative nonfiction, furthering work done in ENGL 319, Writing Creative Nonfiction. Students will write in different genres (e.g., memoir, travel writing, speculative essay, nature writing, the spiritual essay), and will further their study in using both traditional and experimental literary techniques in nonfiction.
Outcomes:
Students will deepen their learning of traditional and innovative methods of writing creative nonfiction, applying them to their original creative nonfictions and discussing and critiquing them in fellow students' work

ENGL 393 Teaching English to Adults: Internship (1-3 Credit Hours)
Pre-requisites: Sophomore Standing or above
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program at Loyola University. Students examine literacy issues and write a research paper. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills

ENGL 394 Internship (3 Credit Hours)
Pre-requisites: Junior standing, six English courses
This course provides on-the-job experience for majors in adapting their writing and analytical skills to the needs of such fields as publishing, editing, and public relations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to analyze their experience in terms of the skills they brought to their jobs, what they learned about the fields they worked in, and what new skills they developed as a result of their experiences

ENGL 395 Honors Tutorial (3 Credit Hours)
Content will vary each time the course is offered, but in general will entail in-depth study of a literary genre or a major author or theme in literature.
Course equivalencies: ENGL 395H / ENGL 395
Outcomes:
Students will strengthen their capacity to analyze literature and to discuss it, both orally and in writing, and will be able to demonstrate understanding of the materials studied and of relevant theoretical and critical perspectives

ENGL 397 Advanced Writing Workshop: Poetry (3 Credit Hours)
Pre-requisites: ENGL 317
Students will read master poets as models and will write and revise poems of their own, which will be discussed by the class in a workshop format.
Outcomes:
Students will produce original poems, building upon skills honed in ENGL 317; They will also be able to demonstrate a deepening understanding of the critical skills necessary for analyzing and discussing original poetry, theirs and their fellow students'

ENGL 398 Advanced Writing Workshop: Fiction (3 Credit Hours)
Pre-requisites: ENGL 318
This course allows students to develop further their skills in writing and analyzing original fiction begun in ENGL 318, in a supportive workshop atmosphere.
Outcomes:
Students will produce original short stories, building upon skills honed in ENGL 318; They will also be able to demonstrate a deepening understanding of the critical skills necessary for analyzing and discussing original fiction, theirs and their fellow students'

ENGL 399 Special Studies in Literature (3 Credit Hours)
Subject matter of this course will be designated by a subscript whenever the course is offered. Usually taken as an independent study.
Outcomes:
Students will be able to demonstrate understanding of the topic of the course, and of the research and critical skills necessary to analyze and discuss it; Usually students will work independently and produce a research paper, under the direction of a faculty member

English (BA)

The undergraduate major program equips students with the skills and concepts that make the English major an asset in the modern world. In addition to literary analysis in both traditional and contemporary forms, the major helps students explore historical and cultural developments and invites them into the worlds of textual studies and digital humanities. All courses at all levels of the program encourage students to become clear and effective writers.

Related Programs

Major

- English with a Creative Writing Concentration (BA) (p. 397)

Minor

- English Minor (p. 396)
- Shakespeare Studies Minor (p. 450)

Curriculum

Twelve courses (36 hours), nine of which (27 hours) must be at the 300-level. Up to three elective courses (9 hours) may be drawn from UCLR-E 100 and advanced 200-level (ENGL 270 and above) courses. At least one course must be among those designated by the department as "multicultural." The Advanced Seminar (ENGL 390 Advanced Seminar) is considered the capstone of the major. These courses must also meet the following criteria:

Code	Title	Hours
Literary Theory		
ENGL 354	Contemporary Critical Theory	3
or ENGL 355	Studies in Literary Criticism	
Shakespeare		
Select one of the following: [1]		3
ENGL 326	Shakespeare: Selected Major Plays [2]	
ENGL 327	Studies in Shakespeare [2]	
Capstone: Advanced Seminar		
ENGL 390	Advanced Seminar [3]	3
English Literature Before 1900 (p. 393) (See List)		
Select at least one course prior to 1700 [4]		3
Select at least one course from 1700 to 1900		3
One additional course chosen from either of the previous categories		3
English Literature Since 1900 (p. 394) (See list)		**3**
Elective Courses		
Complete five ENGL elective courses		15
Total Hours		**36**

1. Note that ENGL 274 Exploring Shakespeare will **not** fulfill this requirement for English majors.
2. If both ENGL 326 Shakespeare: Selected Major Plays and ENGL 327 Studies in Shakespeare are taken, one may be used to satisfy the literature prior to 1700 requirement.
3. Open to students with junior or senior standing; students may take an additional ENGL 390 Advanced Seminar if they wish.
4. If a student takes both ENGL 326 Shakespeare: Selected Major Plays and ENGL 327 Studies in Shakespeare, one of these may be used to satisfy this requirement; the other will satisfy the Shakespeare requirement.

English Literature Before 1900

ENGL 382C	Studies in American Culture Since 1900	3
ENGL 384C	Studies in African American Literature Since 1900	3

Suggested Sequence of Courses

Students can begin the English (BA) degree at any point in their undergraduate studies, in consultation with their adviser. The major is designed to be flexible, engaging students with literature from diverse historical, national, and global traditions, but with no set sequence of courses. Students are encouraged, however, to take ENGL 354 (Contemporary Critical Theory) or ENGL 355 (Studies in Literary Criticism) early on, since these courses make them more conscious of what it means to read literature. Once students have declared the major, they are encouraged to contact their adviser in the English Department or the Department's Undergraduate Program Director for further guidance on how best to progress with their studies.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

English majors will:

- be able to perform close readings of literature and other kinds of texts, paying careful attention to textual detail.
- demonstrate an understanding of human diversity as it is represented in literature and other kinds of texts.
- be able to communicate their ideas clearly, in writing that employs appropriate word choice, diction, structure, and mechanics.
- be able to create focused and well-supported arguments and analyses.
- where applicable, demonstrate their understanding of literary and cultural theories by incorporating them into their work in precise and effective ways.
- where applicable, demonstrate their ability to employ in their own creative works their understanding of the conventions and techniques of particular literary genres.
- where applicable, demonstrate their knowledge of textual genres, histories, movements, traditions, and innovations.
- demonstrate an understanding of how texts reflect and affect societies and cultures.

English (BA/BSED)

The Department of English works closely with the School of Education (https://www.luc.edu/education/) to ensure that English majors who wish to teach high-school English are well prepared to do so and proceed smoothly towards both their degree in English and certification as teachers.

Regardless of the year in which they arrived at Loyola, students seeking certification must take all requirements for the Major. In addition, they must use three of their electives to take ENGL 303 Grammar: Principles & Pedagogy, ENGL 293 Advanced Writing, and ENGL 294 Writing in/with New Media

In addition to their English major, students interested in teaching high school English must apply to the School of Education BSED in Secondary Education (p. 919). Students are considered Dual-Degree Students and will earn both a BA and a BSED. Students planning to teach should

see Reid Leber in the School of Education their freshman year to ensure that they fulfill all of the requirements for the degree, major and Illinois licensure.

Dr. Elissa Weeks Stogner, Senior Lecturer in Writing and Core Literature, serves as liaison with the School of Education and oversees the advising of English-Secondary Education majors as they fulfill the requirements of both their major in English and their major in Secondary Education.

ENGL 384C	Studies in African American Literature Since 1900	3

Suggested Sequence of Courses

Unlike other students in the English Department, English/Secondary Education majors do not take courses in their last semester of their senior year, as they are student-teaching full time. All coursework should be finished prior to this semester. Students should plan on taking ENGL 293 Advanced Writing and ENGL 294 Writing in/with New Media during their first or second year. Students should take their critical theory course (either ENGL 354 Contemporary Critical Theory or ENGL 355 Studies in Literary Criticism) and their advanced seminar ENGL 390 Advanced Seminar during their third or fourth year. Students should work with their advisors, in the English Department as well as the School of Education, to devise a schedule that best suits their needs.

Transfer-Student Residency Requirement

At least 18 credit hours of ENGL courses must be completed at Loyola.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Learning Outcomes

English/Secondary Education majors will:

- be able to perform close readings of literature and other kinds of texts, paying careful attention to textual detail.
- demonstrate an understanding of human diversity as it is represented in literature and other kinds of texts.
- be able to communicate their ideas clearly, in writing that employs appropriate word choice, diction, structure, and mechanics.
- be able to create focused and well-supported arguments and analyses.
- where applicable, demonstrate their understanding of literary and cultural theories by incorporating them into their work in precise and effective ways.
- where applicable, demonstrate their ability to employ in their own creative works their understanding of the conventions and techniques of particular literary genres.
- where applicable, demonstrate their knowledge of textual genres, histories, movements, traditions, and innovations.
- demonstrate an understanding of how texts reflect and affect societies and cultures.
- have proficiency in all of these outcomes sufficient to teach English at the high school level.

English Honors

The English Honors Program

To graduate with honors in English, students in the English Honors Program must take three Advanced Seminars (ENGL 390 Advanced Seminar or ENGL 395 Honors Tutorial), all of which count towards the major either as electives or as courses satisfying historical period requirements. Students in the Creative Writing Concentration may substitute one Advanced Workshop (ENGL 392 Advanced Creative Nonfiction Workshop, ENGL 397 Advanced Writing Workshop: Poetry, or ENGL 398 Advanced Writing Workshop: Fiction) for ENGL 390 Advanced Seminar. In order to be admitted to the English Honors Program, a student should have completed at least two English courses beyond composition and must have an average of at least 3.4 in all English courses. The student must maintain this average throughout the program. In some cases, ENGL 399 Special Studies in Literature (Independent Study) can be substituted for one of the honors tutorials. Students interested in the English Honors Program should contact the director of undergraduate programs.

Sigma Tau Delta

Loyola sponsors a chapter of Sigma Tau Delta, the International English Honor Society. Sigma Tau Delta, a member of the Association of College Honor Societies, confers distinction for high achievement in the study of the English language and of literature in English, promotes interest in such study, and encourages creative and critical writing. Active members receive and have the opportunity to contribute to the society's award-winning literary publication, *The Rectangle*, and are eligible to compete for writing awards and scholarships. To be eligible for membership in Loyola's chapter, students must major or minor in English, have at least a B average in English, rank in the highest 35 percent of their class overall and have completed three semesters. New members are inducted in the spring. Interested students should contact the director of undergraduate programs.

English Minor

The English minor equips students with essential skills, concepts, and experiences for the modern world, in a compact and flexible format. In addition to literary analysis in both traditional and contemporary forms, the minor helps students explore historical and cultural developments, invites them into the worlds of textual studies and digital humanities, and creative writing in a diverse array of genres. All courses at all levels of the program encourage students to become clear and effective writers.

Related Programs

Major

- English (BA) (p. 393)

Combined

- English (BA/BSED) (p. 394)

Curriculum

The English minor consists of six courses (18 hours), four of which (12 hours) should be 300-level. Up to two courses may be drawn from UCLR 100-E and advanced 200-level (ENGL 270 and above) courses.

Code	Title	Hours

ENGL 270 or above		3
English 300-Level Course		3
English 300-Level Course		3
English 300-Level Course		3
English 300-Level Course		3
Total Hours		**18**

A list of undergraduate English courses can be found here (p. 382).

Suggested Sequence of Courses

The English minor is deliberately flexible. Though most (4) of the minor should be done at the 300 level, students are welcome to pursue their interests across our courses, including courses on literary study, advanced writing, and creative writing workshops. There is no required or suggested sequence of courses: students are encouraged to reach out to their advisor in the Department of English or the Director of Undergraduate Programs in English for advice in crafting a path through the minor that is rewarding for them.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

English minors will:

- be able to perform close readings of literature and other kinds of texts, paying careful attention to textual detail.
- demonstrate an understanding of human diversity as it is represented in literature and other kinds of texts.
- be able to communicate their ideas clearly, in writing that employs appropriate word choice, diction, structure, and mechanics.
- be able to create focused and well-supported arguments and analyses.
- where applicable, demonstrate their understanding of literary and cultural theories by incorporating them into their work in precise and effective ways.
- where applicable, demonstrate their ability to employ in their own creative works their understanding of the conventions and techniques of particular literary genres.
- where applicable, demonstrate their knowledge of textual genres, histories, movements, traditions, and innovations.
- demonstrate an understanding of how texts reflect and affect societies and cultures.

English with a Creative Writing Concentration (BA)

The Creative Writing Concentration is offered within the regular English major, and is intended for students interested in and committed both to their own creative work (fiction, poetry, and creative nonfiction) and to the study of literature from a writer's point of view.

Related Programs

Major

- English (BA) (p. 393)

Minor

- English Minor (p. 396)

Curriculum

Students can begin the English with a Creative Writing Concentration (BA) degree at any point in their undergraduate studies, in consultation with their adviser. The major is designed to be flexible, engaging students with a writing workshops in poetry, prose, and creative nonfiction, as well as courses on literature from diverse historical, national, and global traditions. There is no set sequence of courses, though students may wish to begin their introductory workshops (ENGL 317, ENGL 318, and ENGL 319) early on, in order to prepare them for their Advanced Workshops (ENGL 392, ENGL 397, and ENGL 398). Students may also wish to take ENGL 354 Contemporary Critical Theory or ENGL 355 Studies in Literary Criticism early on, since these courses make them more conscious of what it means to read literature. Once students have declared the major, they are encouraged to contact their adviser in the English Department or the Department's Undergraduate Program Director for further guidance on how best to progress with their studies.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

English Creative Writing Majors will:

- Demonstrate their understanding of literary and cultural theories by incorporating them into their work in precise and effective ways.
- Demonstrate their ability to employ in their own creative works their understanding of the conventions and techniques of particular literary genres.
- Demonstrate their ability to employ in their own creative works their knowledge of textual histories, movements, traditions, and innovations.
- Be able to perform close readings of literature and other kinds of texts, paying careful attention to textual detail.
- Demonstrate an understanding of human diversity as it is represented in literature and other kinds of texts.
- Be able to communicate their ideas clearly, in writing that employs appropriate word choice, diction, structure, and mechanics.

- Be able to create focused and well-supported arguments and analyses.
- Demonstrate an understanding of how texts reflect and affect societies and cultures.

European Studies Interdisciplinary Program

The College of Arts and Sciences' interdisciplinary European Studies Minor explores the history, politics, economics, and cultures of the peoples of Europe from ancient times to the present.

It is designed to appeal to students who are interested in gaining a deeper understanding of European nations, cultures, and people, who want to explore their own European heritage, or to complement their majors in areas such as Anthropology, Classics, Fine and Performing Arts, History, Global Studies, Modern Languages and Literatures, Philosophy, Political Science, Sociology, or Theology.

Undergraduate Programs

- European Studies Minor (p. 399)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

European Studies (EURO)

EURO 101 Introduction to European Studies (3 Credit Hours)
This course serves as an introduction to the interdisciplinary field of European studies. It provides an overview of the major disciplines represented in the program, introduces the main approaches covered in the program, and discusses some of the most important topics involving European states, regions, and the European Union. Restricted to European Studies minors.
Interdisciplinary Option: European Studies
Outcomes:
Students will gain a basic understanding of how different disciplines contribute to the study of Europe at the state, sub-state and supra-state levels

EURO 301 European Studies Capstone (3 Credit Hours)
This capstone class is intended to provide seniors a chance to reflect on what they have learned as European Studies minors by focusing on a particular theme. The class takes an interdisciplinary and cross-national approach. Students develop a major research project. Restricted to Juniors and Seniors minoring in European Studies.
Interdisciplinary Option: European Studies
Outcomes:
Through this course students will gain an understanding of the ways in which various fields and their approaches to European Studies can help answer specific important questions about the region

European Studies Minor

The College of Arts and Sciences' interdisciplinary European Studies Minor explores the history, politics, economics, and cultures of the peoples of Europe from ancient times to the present.

It is designed to appeal to students who are interested in gaining a deeper understanding of European nations, cultures, and people, who want to explore their own European heritage, or to complement their majors in areas such as Anthropology, Classics, Fine and Performing Arts, History, Global Studies, Modern Languages and Literatures, Philosophy, Political Science, Sociology, or Theology.

Our students will find the chance to mold their own minor liberating as there are only 2 required courses taken alongside 4 electives selected from over 150 course options across over 15 departments and programs. The program is highly flexible and can easily accommodate a semester or full year spent studying abroad.

Related Programs

Minor

- Asian Studies Minor (p. 267)
- Latin American and Latino Studies Minor (p. 504)

Curriculum

The European Studies minor requires students to complete six courses totaling at least 18 credit hours. Students must also complete at least the 104-level in a modern European Language. In terms of European languages, the Department of Modern Languages and Literatures at Loyola offers instruction in French, German, Italian, Polish, Russian, and Spanish. Students having learned a different European language may submit a Language Competency Exam at or above the 104-level. Alternatively, students may request approval from the Director of European Studies for certification of this requirement; this last option is primarily intended for bilingual, native speakers of a European language where sitting for an exam is not necessary.

Code	Title	Hours
Required Courses		
HIST 102	Culture, Power and Identity: Western Ideas & Institutions from 17th Century	3
PLSC 347	The European Union	3
Elective Courses (p.)		
Select four elective courses listed below.		12
Total Hours		**18**

Elective Courses

Students must take four electives from the courses listed below. This list is based on courses suggested by the respective department chairs in conjunction with the Euro Program Director. At least two of these electives need to be at the 300-level. To promote the interdisciplinary nature of the program, no more than two electives may be taken from any one department. In conjunction with the required courses listed above, this means that no more than three courses in total may be taken from any one department and applied to the European Studies minor. In accordance with the College's current double-dipping policy, "no fewer than 8 credit hours ... must be unique to" the minor. This effectively means that of the 6 courses taken in total for the minor, 3 must be uniquely and solely applied to the minor and cannot be double counted towards any other major or minor.

Learning Outcomes

Students completing a European Studies Minor will:

- Acquire a general awareness of the impact that Europe has had on global affairs and conversely, the effects of global forces on Europe.
- Possess general knowledge of the common cultural heritage found in Europe as well as the diversity of culture found within Europe.
- Understand the factors that have shaped Europe politically, socially, and economically throughout history.
- Acquire a basic understanding of present-day European institutions.
- Be prepared to complement their European studies at the Loyola campus with more in-depth "on the ground" study of a specific European country, to further their knowledge of that country's language, culture, history and to better understand the political, social and economic problems confronting it.

Fine and Performing Arts

The Department of Fine and Performing Arts (DFPA) is comprised of four distinct areas of study: Dance (http://luc.edu/dance/), Fine Arts (http://luc.edu/finearts/), Music (http://luc.edu/music/), and Theatre (http://luc.edu/theatre/). These areas are combined to promote dynamic artistic and academic opportunities for our students. Approximately 80 full and part time faculty members, actively involved in creative work, performance, and independent scholarship, teach and train over 400 student majors and minors in the department.

Students can choose a course of study from any of our 8 different majors or 11 different minors, or simply choose to explore a class in the art that interests them.

Our students are challenged to attentively experience and critically engage different aesthetic experiences, to develop and improve communication skills, and to relate the artistic experience to other fields. Our undergraduate programs prepare students for graduate work and employment in many dynamic cultural professions. The academic programs of the DFPA are complemented throughout the year by over 100 public presentations, performances, and exhibitions.

Our Mission

The Department of Fine and Performing Arts engages the transformative power of art to enrich the individual and connect communities. We provide students with theory and skill-based instruction within the context of a strong Jesuit liberal arts curriculum, and we engage audiences through extensive public programming in Dance, Fine Arts, Music, and Theatre. For more information, contact us at dfpa@luc.edu.

Undergraduate Programs

- Art History (BA) (p. 428)
- Art History Minor (p. 429)
- Dance (BA) (p. 431)
- Dance Minor (p. 432)
- Drawing, Painting and Printmaking Minor (p. 433)
- Music (BA) (p. 434)
- Music Minor (p. 436)
- Music with a Concentration in Jazz Studies (BA) (p. 437)
- Music with a Concentration in Liturgical Music (BA) (p. 439)
- Music with a Concentration in Vocal Performance (BA) (p. 440)
- Musical Theatre Minor (p. 442)
- Photography and Video Art (BA) (p. 445)
- Photography and Video Art Minor (p. 446)

- Sculpture and Ceramics (BA) (p. 447)
- Sculpture and Ceramics Minor (p. 449)
- Shakespeare Studies Minor (p. 450)
- Studio Arts (BA) (p. 451)
- Studio Art Minor (p. 452)
- Teaching Artist Minor (p. 453)
- Theatre (BA) (p. 454)
- Theatre Minor (p. 456)
- Visual Communication (BA) (p. 458)
- Visual Communication Minor (p. 459)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

ARTS (ARTS)

ARTS 200 Introduction to Teaching Artistry (3 Credit Hours)
Introduction to teaching artistry with an emphasis on art education, art integration, and community-based arts practices.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will identify and describe the practice of teaching artistry, reflect on a direct experience with an art organization, and create a lesson plan

ARTS 201 Grant Writing for the Arts (2 Credit Hours)
Introduction to grant writing for the arts. The course concludes with a completed grant proposal.
Outcomes:
Students will identify how to find grants that support the arts and engage in the process of applying for a grant or other arts funding

ARTS 397 Fieldwork in Arts Education (3 Credit Hours)
Credit given for arts education work outside the university undertaken under the guidance professional arts educators. Students keep an hour and activity log and write reflective evaluative papers. Permission of the Department of Fine and Performing Arts Specific outcomes and credit hours assigned to be determined by the student in consultation with the Teaching Artistry Faculty Coordinator and the project supervisor

DANCE (DANC)

DANC 111 Ballet I: Introduction to Ballet Theory and Technique (3 Credit Hours)
Ballet I is designed to introduce the concepts and vocabulary of ballet with a focus on developing student's body awareness and control. Students will learn about the art form of ballet in relationship to theatre, music and other forms of dance.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: THTR111/DANC111
Outcomes:
Students will improve their posture, flexibility and coordination; They will develop a reference for enjoying ballet performances and create a foundation for further dance training

DANC 121 Modern Dance I: Theories and Techniques (3 Credit Hours)
Modern Dance I is designed to increase student's body awareness, strength, flexibility and musicality. The course studies the technique and theory of Fall and Recovery developed by Doris Humphrey.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: THTR121/DANC121
Outcomes:
Students will develop a basic dance technique and be able to describe and demonstrate the differences between modern dance and ballet; They will understand the history of the development of modern dance as a uniquely American art form

DANC 131 Jazz Dance I: Theories and Techniques (3 Credit Hours)
Jazz I is designed to increase the student's body awareness, enjoyment of movement and appreciation of Jazz dance in theatrical productions. May be repeated once for credit.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: THTR131/DANC131
Outcomes:
Students will improve their strength, coordination, flexibility and correct posture; They will develop basic skills and vocabulary for performing Jazz movements and a framework to view dance in theatrical productions

DANC 212 Ballet Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Students should be familiar with the five feet and arm positions and be able to work in 5th position of the feet. Dancers should demonstrate correct alignment of the pelvis and spine in plie and releve and while working at the barre. Dancer must be able to execute correct articulation of the feet and leg in tendu. They should be familiar with basic petite allegro and action of the feet, hips and legs while jumping. This is a continuing ballet class designed to build on established vocabulary and movement fundamentals with emphasis on ballet as a theatrical art form.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR212/DANC212
Outcomes:
This class further develops strength, posture, flexibility and coordination; Progressions include more work en relev at the barre, development of leg extensions, single leg jumping and more complex movement combinations; Students will develop awareness of a dancer's role in a ballet production

DANC 213 Ballet III: Advanced Continuing Ballet (2 Credit Hours)
Pre-requisite skills: Student must demonstrate correct alignment and articulation at the barre and in the center when standing in first or fifth position. Student should have introductory proficiency in pirouettes en dehors and en dedans as well as petit allegro. This course serves students who have achieved proficiency in the basic elements of Continuing Ballet, but need to develop skills to meet the Intermediate level. Course focuses on reinforcing foundational technique in alignment and articulation and provides opportunities to develop strength, coordination and vocabulary required to advance to 311 Intermediate Ballet.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will increase their awareness of overall dance alignment and articulation; They will develop strength, coordination and vocabulary preparing them for Intermediate Ballet; Students will enhance their ability to travel across the floor as well as conduct pirouettes; Adagio work in the center and grand allegro is introduced

DANC 222 Modern Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Dancers should be able to maintain correct alignment of the legs, back and pelvis standing and shifting their weight. Must be familiar with 1st and 2nd position of the legs and demonstrate basic articulation of the legs in tendu and jumping. This course is designed to further increase student's body awareness, strength, flexibility and musicality. We will study the technique and theory of Fall and Recovery developed by Doris Humphrey as well as learn short excerpts of repertory to be analyzed. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR222/DANC222
Outcomes:
Students will further develop their modern dance technique and be able to execute more physically challenging falls and longer and more complex movement combinations

DANC 224 Majors Modern II (1 Credit Hour)
This course is designed for Dance majors to increase their body awareness, strength, flexibility and musicality through the study the technique and theory of Fall and Recovery developed by Doris Humphrey. Restricted to Dance Majors.
Outcomes:
Students will develop their modern dance technique including falls and longer and more complex movement combinations; They will further their understanding of spatial patterns and musicality

DANC 232 Jazz Dance II: Theories and Techniques (2 Credit Hours)
Prerequisite Skills: Dancers should demonstrate correct placement of the legs, back and pelvis standing and in plié. They should be able to demonstrate basic jazz turns, jazz runs and pas de bourée. Dancers need to use correct position and opposition of the arms in combinations. Jazz II is designed to further develop student's technical ability and awareness of Jazz dance in theatrical productions. Students will learn about professional Jazz dance in Chicago and improve their strength, coordination, flexibility and correct posture in increasingly complex combinations applying the vocabulary and principles of jazz dance. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR232/DANC232
Outcomes:
Students will improve their dance technique, performance skills and appreciation of Chicago's rich tradition of Jazz dance performance

DANC 240 Dance Practicum (1 Credit Hour)
Pre-requisites: THTR 253
Students apply stagecraft for dance in a variety of domains: costuming, lighting, electrics and sound. They will work as running crew for a mainstage dance production.
Outcomes:
Students will acquire a variety of skills necessary for producing dance; including collaboration and organization skills and will gain appreciation for the complexity dance production

DANC 250 Historical Contexts in Contemporary Dance Practice (3 Credit Hours)
Pre-requisites: Must be a Dance major or Dance minor
This course surveys historical flashpoints in the evolution of American contemporary dance. It provides a critical framework for interrogating cultural and sociopolitical influences on concert dance practice and performance. Students will analyze intersecting aesthetics originating from the French courts of Catherine de Medici and Louis XIV, the Atlantic slave trade and Asian theatrical dance forms such as kabuki and bharatanatyam in the development of ballet, modern, tap, jazz and musical theater dance.
Outcomes:
Students will be able to identify historical figures and events that have significantly influenced American theatrical dance; This course gives students the ability describe and interpret dance history by contextualizing sociopolitical and cultural influences on the evolution of dance aesthetics while applying critical race, queer and feminist theoretical frameworks to their understanding of contemporary dance in America

DANC 260 Topics in Dance (2 Credit Hours)
This course is a studio course that explores the theories and techniques of various dance forms. A specific dance genre will be selected each time the course is offered. The course may be repeated two times for credit.
Outcomes:
The student will gain a historical perspective on the dance form presented, as well as demonstrate specific skills required of the dance form

DANC 261 Topics in Applied Dance (1-2 Credit Hours)
This is an all-inclusive heading for courses rarely offered that serve under the Applied Technique designation for the Dance Minor.
Outcomes:
Each offering will provide discipline-specific vocabulary and applied skill acquisition

DANC 270 Dance Kinesiology (3 Credit Hours)
Pre-requisites: Must be an enrolled Dance Major or Dance Minor
The purpose of this class is to present dancers with basic knowledge of the anatomy, physiology, and biomechanics of human movement in dance and non-dance applications.
Outcomes:
Students participate in lecture, physical practice, group and individual projects to understand the mechanisms for dance movement and how movement patterns contribute to the presence or absence of dance injuries

DANC 275 Global Influences on Contemporary Dance Practice (2 Credit Hours)
Pre-requisites: Must be Dance Major or Dance Minor or have instructor approval
This seminar-styled course provides essential experience and knowledge through applied study of diverse lenses and movement styles contributing to contemporary dance practice.
Outcomes:
Identify, Demonstrate and Discuss non-western influences on contemporary dance choreography and practice

DANC 280 Dance & Disability: Interdisciplinary Theory & Applied Movement Practices (3 Credit Hours)
This course explores interdisciplinary theory and applied innovation at the intersection of movement, science, and community engagement.
Outcomes:
Students will demonstrate a working knowledge of best interdisciplinary practices in disability dance practices, and will develop strategies that address the physical, social, and cultural implications of physically integrated dance in multiple settings

DANC 312 Pointe I: Theory and Techniques (1 Credit Hour)
Co-requisites: DANC 213 or 341
This course is practice-oriented and builds on dancers' knowledge of ballet vocabulary, alignment, and strength. Pointework is geared towards the development of a higher level of articulation in classical footwork.
Outcomes:
The student will gain a deeper understanding of ballet technique en pointe, as well as demonstrate specific skills required of the dance form

DANC 314 Pointe II: Continuing Pointework (1 Credit Hour)
This is a studio class that explores ballet technique en pointe. This course is to be taken concurrently with DANC 213 Ballet III, DANC 341 Ballet IV, or DANC 343 Ballet V. This course explores continuing ballet technique en pointe. It requires students to apply and synthesize all aspects of pointework studies including technique, spatial awareness, dynamics and group forms by preparing and presenting a public performance. It must be taken concurrently with Ballet III, Ballet IV or Ballet V. May be taken 8 times for credit.
Outcomes:
Students gain a deeper understanding of pointe technique, as well as demonstrate specific advanced skills required of the dance form; Students apply and synthesize material in a public performance

DANC 323 Rehearsal and Performance (1 Credit Hour)
Pre-requisites: Permission of the department
Dancing, choreographing, or stage managing, in a campus production. Completion of a journal or paper is required. May be repeated up to 12 times.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique into production practice

DANC 324 Modern III: Theory and Techniques (1 Credit Hour)
This studio course develops core strength, coordination and musical, spatial and performance skills through the study the technique and theory developed by Martha Graham as well as contemporary dance practices.
Outcomes:
Dancers will improve coordination, phrasing, physical power, shift of weight, anatomical awareness, performance, projection, flexibility and placement

DANC 331 Jazz Dance III: Intermediate Jazz Dance Theories and Techniques (2 Credit Hours)
Pre-requisites: Permission of the Instructor
This course develops students' ability to execute Jazz dance technique at an intermediate level. Students improve their dance technique, dynamic, spatial and performance skills. Students apply and synthesize all aspects of jazz dance technique in public performance. This course may be taken six times for credit.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve core strength, coordination, flexibility and correct posture at the intermediate level, in increasingly complex combinations applying and synthesizing all concepts and technique in public performance

DANC 341 Ballet IV: Anatomical Foundations and Cultural Context (1 Credit Hour)
This applied studio technique course emphasizes contemporary scientific anatomical research and cultural context in the study of ballet. Course skills and concepts are applied and synthesized through presentation of a public performance.
Outcomes:
Students will improve strength, alignment, and ensemble skills, develop knowledge and apply anatomical principles, connect the study of ballet to cultural and artistic context

DANC 343 Ballet V: Advancing Ballet: Contemporary Methodologies in Applied Ballet (1 Credit Hour)
This applied studio technique course emphasizes contemporary best practices in the study of Ballet in performance and theory in order to advance artistic and technical proficiency. Course skills and concepts are applied and synthesized through presentation of a public performance.
Outcomes:
Students will improve strength, alignment, and ensemble skills, develop knowledge of universal dance principles and advance their proficiency in contemporary ballet practice; Course skills and concepts are applied and synthesized through presentation of a public performance

DANC 360 Dance Pedagogy (3 Credit Hours)
Pre-requisites: Dance major or dance minor
The study child development, sequential dance pedagogy, biomechanics, nutrition and classroom management techniques as it relates to the teaching of dance. Coursework includes lecture, readings, model teaching, and research. Students observe master teachers instructing children of all ages and create sequential lesson plans consisting of all elements of dance pedagogy.
Outcomes:
Students will demonstrate a working knowledge of child development in relationship to age-appropriate dance skills as well as behavioral expectations; They will develop strategies that address the sequences of skill acquisition as well as concrete strategies for classroom management

DANC 370 Dance Composition (3 Credit Hours)
Pre-requisites: Must be a Dance Major or Dance Minor to enroll; Placement in Level III or higher dance technique courses; Permission of the department required
This course takes students from an introduction to dance composition theory and techniques through the process of creating a group work for the stage. Course work includes lecture, discussion, selected readings, viewing of masterworks of dance composition, creation of several dance studies on various themes and culminates in the creation of a work for performance in the Student Choreographic Showcase.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through the development of short dance students learn the principles of dance composition and then apply them to their own creation performed for a public audience

DANC 380 Senior Showcase Capstone (1 Credit Hour)
Restricted to Senior Dance Majors. This course serves as the capstone of the Dance major and creates a platform for dancers to apply technical skills, theory and practice from many required courses for the Bachelor of Arts including DANC 341/DANC 343 Majors Ballet, DANC 321 Majors Modern, DANC 323 Rehearsal and Performance and DANC 370 Dance Composition.
Outcomes:
Dance majors will apply and synthesize all applied technique courses taken for their dance majors as well as integrate their knowledge of the choreographic and performance process

DANC 394 Internship in Dance (1-12 Credit Hours)
Dance students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a dance organization while reflecting on their work experience and applying theories and techniques acquired from their first dance courses

DANC 395 Independent Study (1-12 Credit Hours)
Pre-requisites: Written permission of chairperson
Independent study projects may be of various kinds and in any recognized area of the dance. Such projects should be done under the close supervision of a dance faculty member.
Outcomes:
To be determined by the student in consultation with the chairperson and dance faculty supervisor

DANC 397 Fieldwork in Chicago - Dance (1-12 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional dance organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Dance and the project supervisor

DANC 398 Research in Dance (1-12 Credit Hours)
Pre-requisites: DANC 323
Faculty serve as mentors for dance students pursuing research opportunities. Platforms cross various domains in cognitive, psychomotor, and artistic development. Students and faculty work together to generate qualitative and quantitative data documented in multiple modalities including: dancemaking, regression analyses, interviews, correlational and case studies. This course satisfies the Engaged Learning-Undergraduate Research requirement.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn discipline-specific language skills, research ethics and methodologies; Students will gain valuable skills disseminating research through performances, scholarly articles, conference presentations and research symposia

Fine Arts (FNAR)

FNAR 110 Foundations of Visual Art (3 Credit Hours)
Explores some of the fundamental principles, concepts, and historical and contemporary contexts that constitute a contemporary art practice. Provides experience across a range of modes of art making while emphasizing the basic concepts that underlie visual expression. Studio activity is augmented with research, discussion, and critique.
Outcomes:
Explore and express visual concepts; Develop creative competencies; Utilize design elements to communicate themes and ideas; Expand cognitive capacities; Comprehend historical and contemporary approaches to visual art

FNAR 112 Two-Dimensional Design (3 Credit Hours)
An examination of the basic elements and organizational systems of visual expression through the application of design principles and theory.
Course equivalencies: FNAR112/ACFNA112
Outcomes:
Students will be able manipulate various forms of media to produce desired spatial effects, and understand how to control by- using such design methods as scale, perspective, and composition - the viewer's understanding of and reaction to visual information on a two-dimensional surface

FNAR 113 Drawing I (3 Credit Hours)
An introduction to the basic elements of drawing including: line, value, texture, volume, shape, proportion, perspective and visual composition. A variety of drawing materials will be explored with an emphasis on observation problems designed to build technical, perceptual, and personal expressive interpretation of form through the drawing idiom.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate an understanding of basic drawing principles and vocabulary, through practice and articulation of both formal and artistic ideas

FNAR 114 Painting I (3 Credit Hours)
An introduction to the basic elements of painting including: the application of drawing, design, and color principles. A variety of materials will be explored with an emphasis on oil painting. Observational problems will be introduced to build technical, perceptual, and personal expressive interpretation of form through the painting idiom.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate an understanding of basic painting principles and vocabulary, through practice and articulation of both formal and artistic ideas

FNAR 115 Foundations of Photography (3 Credit Hours)
This course introduces photography as a form of visual art. Students learn the technical concepts in order to develop their ability to express ideas through photography. The course also emphasizes strengthening visual literacy through lectures, discussions, and critiques. Requirements: A fully adjustable digital camera (DSLR) and an external hard drive are required.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: FNAR115/ICVM115/IFMS115
Outcomes:
Students will learn how to formulate and communicate ideas through photography; The course focuses on building the students' visual literacy and understanding of photography as a form of visual art

FNAR 118 Printmaking I (3 Credit Hours)
An exploration of the production of fine art multiples as they are created utilizing zinc and copper plates. Techniques of etching and engraving aquatint and color printing as well as innovative processes are taught.
Outcomes:
Students will demonstrate understanding of the techniques needed to produce images on metal plates and alternative surface; the intrinsic qualities particular to expression in print media, recognize fine prints, specific techniques, and archival quality in historical examples, use intaglio presses as a means of production and form evaluative judgments about printed imagery

FNAR 120 Ceramics: Handbuilding (3 Credit Hours)
An exploration of various handbuilding techniques, surface design techniques, and firing ranges available to the contemporary ceramist. Students are encouraged to pursue individual expression in the context of a broad range of methods and creative concepts.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate the basics of successful construction and glaze techniques; demonstrate creative strategies and critical evaluation of the creative process; demonstrate an understanding of both historical and contemporary approaches to the medium and the role of the Ceramic artist in cultures past and present

FNAR 121 Ceramics: Wheelthrowing (3 Credit Hours)
An introduction to the potters' wheel. Students learn basic throwing skills, explore utilitarian design concepts, and learn to balance spontaneous and practiced approaches to process. Emphasis is on the successful integration of craft and personal expression.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: FNAR220/FNAR121
Outcomes:
Students will be able to demonstrate basic wheelthrowing and glaze techniques; demonstrate creative strategies and critical evaluation of the creative process; demonstrate an understanding of both historical and contemporary approaches to the medium and the role of the Ceramic artist in cultures past and present

FNAR 123 Metalwork and Jewelry I (3 Credit Hours)
The methods and processes of construction using nonferrous metals applied to problems in design and function. Projects are designed to familiarize the student with processes in metalwork and the proper use of hand tools.
Outcomes:
Students will demonstrate an understanding of the fundamental characteristics of metal; the ability to cut, shape and manipulate metals; to express visual ideas in low and high relief; and to form judgments about design on other than flat surfaces

FNAR 124 Sculpture Foundations (3 Credit Hours)
An introduction to three dimensional concepts and materials, and associated techniques, in the process of articulating a personal artistic statement. Students will be guided in the fabrication of various 3-D constructions employing a wide range of building materials such as plaster, wood, clay, foam board, paper, and metals.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to translate two-dimensional sketches and drawings into expressive three dimensional forms; demonstrate basic sculpting techniques and creative strategies; provide critical evaluation of the creative process; and produce objects that are viewable in the round, structurally stable with masses and appendages proportionate to one another

FNAR 132 Visual Communication I (3 Credit Hours)
This course initiates a professional sequence whereby the student receives an introduction to composition, typography, and historical and contemporary concepts in visual communication. It introduces students to page layout software (Adobe InDesign), its relationship to other software packages, and the technical aspects of digital typography.
Outcomes:
Students gain an understanding of fundamental principles of visual communication emphasizing typography, the development technical skills in materials and techniques, and the ability to express formal and creative ideas

FNAR 160 The Crafts of China (3 Credit Hours)
This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historical trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.
Interdisciplinary Option: Asian Studies
Course equivalencies: FNAR160/ASIA160
Outcomes:
Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China; Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture

FNAR 190 Color Theory (3 Credit Hours)
An examination of the nature of subtractive and additive color in its physiological, psychological, aesthetic, cultural, and symbolic dimensions through the application of past and current theory. Emphasis is placed on color mixing, color relationships, and understanding color terminology. Students develop proficiency using color in their work as well as gaining a fundamental understanding of the basic visual, aesthetic, and theoretical considerations of color use in art & design.

FNAR 195 Topics in Fine Arts Pre-Collegiate (3 Credit Hours)
This course consists of special topics in specific Fine Arts areas, and is offered for the Pre-Collegiate student.
Outcomes:
While the specific area of study varies, the expectation is that the student will become familiar with the methods, materials and aesthetic properties of that artistic approach, as well as the technical means to control the expression

FNAR 199 Art and Visual Culture (3 Credit Hours)
An introduction to the principles of art and their application to broader visual culture, this course explores the complex nature of art through an examination of its visual elements, techniques, functions, critical methodologies, and related social issues. The course takes advantage of Chicago's artistic resources.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X - ACFNA 100 / FNAR 199
Outcomes:
Students will demonstrate knowledge of the elements of visual language, means of visual expression in diverse cultures and eras, media and techniques of art, artistic terminology, and critical approaches to the study of visual culture and related social issues; Students will acquire the skills to interpret art and visual culture in oral and written form

FNAR 200 Global Art History: Prehistoric to 600 CE (3 Credit Hours)
A comprehensive survey that introduces students to the art, architecture, and material practices of global cultures from pre-history to the 7th Century CE. This course will study the internal and cross-cultural relationships between various art forms and the social, geo-political, spiritual, economic, and political contexts in which selected artifacts and monuments were made.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: FNAR200/FNAR200R
Outcomes:
Students will acquire skills to critically analyze formal expressions, materials, functions, meanings, and makers of art and material culture in relation to the historical contexts of ancient global societies

FNAR 200R Art History: Pre-History to Renaissance in Rome (3 Credit Hours)
A general survey which explores the development of art in Western culture from pre-history through the sources of the Renaissance in the fourteenth century with a focus on Rome and Italy.
Course equivalencies: FNAR200/FNAR200R
Outcomes:
Students will be able to demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of art in relation to their cultural, social, and historical contexts

FNAR 201 Global Art History: 600-1800CE (3 Credit Hours)
A general survey which explores the development of global art from 540 through 1800.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: European Studies, Italian Studies
Course equivalencies: ACFNA 105 / FNAR 201
Outcomes:
Students will acquire skills to critically analyze formal expressions, materials, functions, meanings, and makers of art and material culture in relation to the historical contexts of early modern global societies

FNAR 202 Global Art History: Modern Art (3 Credit Hours)
A comprehensive survey of major artistic movements from a global perspective, engaging key concepts, issues, and modes of production in the modern world. It examines evolving ideas about the forms, content, techniques, and functions of art from the late 18th century to today considered within its socio-political and historical context.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: European Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Course equivalencies: FNAR202/ICVM202/IFMS202
Outcomes:
Students will demonstrate knowledge of the key ideas, formal expressions, themes, techniques, and functions of modern art in relation to social-historical contexts and modern culture from a global perspective

FNAR 203 Chicago: Face of a City (3 Credit Hours)
An examination of the history of the Chicago School of Architecture along with public sculpture and mural painting in Chicago, this course explores the changing trends of American public art, artists' response to a public audience, and issues of social responsibility. Participation in class field trips is required.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will be able to identify the major social concerns of the city as well as the means by which visual arts can be integrated into its daily life; They will be able to recognize the major artists and recent artistic developments in their urban context

FNAR 207 Women, Art, and Society (3 Credit Hours)
An examination of women artists in Western culture and the societies in which they worked from the medieval period to the present. Women's artistic production, the styles and subject matter they embraced, and their relation to artistic trends of their eras are explored within the context of social attitudes about gender.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-FNAR207/WOST207/WSGS207
Outcomes:
Students will be able to demonstrate knowledge of women's contribution to the visual arts, the factors that impacted their participation in the art world, the underlying ways that gender constructions impact society, and feminist theory and methodologies related to art

FNAR 213 Drawing II (3 Credit Hours)
Pre-requisites: FNAR 113
An intermediate level drawing course designed to extend the understanding of the visual elements of drawing introduced in FNAR 113. This course includes an emphasis on color, and an exploration of a broader range of drawing media. Observational and conceptual problems are introduced.
Outcomes:
Students will be able to demonstrate an understanding of more advanced drawing principles through expanded practice and articulation of both formal and artistic ideas

FNAR 214 Painting II (3 Credit Hours)
Pre-requisites: FNAR 114
An intermediate level painting course designed to extend the understanding of the application of drawing, design, and color principles introduced in FNAR 114. This course will explore both oil and acrylic painting and a variety of substrates. Emphasis on individualized conceptual problems will be introduced to build technical, perceptual, and personal expressive interpretation of form through the painting idiom.
Outcomes:
Students will be able to demonstrate an understanding of more advanced painting principles through expanded practice and articulation of both formal and artistic ideas

FNAR 216 Lighting Techniques for Photography and Video Art (3 Credit Hours)
Pre-requisites: FNAR 115 or instructor permission
This course examines techniques with both available and artificial lights for works with photography and video. The students learn how the use and control of lighting are essential in working with lens-based media, whether it¿s on-location or in a studio environment. The concepts covered in the class will be used to produce photographic and video works.
Outcomes:
Students learn the equipment and techniques for effectively using available and artificial lights

FNAR 218 Printmaking II (3 Credit Hours)
Pre-requisites: FNAR 118
This course explores specialized work in intaglio, monotypes, and mixed media. Emphasis is placed on the development and perfecting of technique.
Outcomes:
Students demonstrate understanding of mixed-media printing; knowledge of a wide range of printmaking media; apply drawing concepts to the materials of printmaking; produce a consistent body of work in a complex medium; recognize historical prototypes and articulate the differences to others; and form judgments needed to adapt image making in a highly technical area of expression

FNAR 219 Photography: Digital Imaging (3 Credit Hours)
Pre-requisites: FNAR 115 - Foundations of Photography; A fully adjustable digital camera (DSLR) and an external hard drive are required
The course focuses on advanced editing techniques in Photoshop in regards to color correction, color management, image compositing, and image manipulation. Students will also learn the technical and aesthetic concepts that are crucial components of the digital workflow to further develop their visual languages as photographic artists.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR219/IFMS220
Outcomes:
Students learn more complex editing in Photoshop, how to operate a professional inkjet printer and the importance of paper selection; The course examines possibilities with digital technology

FNAR 222 Sculpture/Ceramics: Intermediate Studio (3 Credit Hours)
Pre-requisites: FNAR 124 and (FNAR 120 or FNAR 121); or instructor permission
This intermediate course expands the students' knowledge of materials, techniques, and concepts relative to the production of three-dimensional artwork. Students explore the dynamic interrelationship between art, craft, and design, with particular emphasis on the role and function of three-dimensional artworks historically and in contemporary practice. The conceptual possibilities for reproduction and multiplication in sculpture and ceramics is also highlighted. Visual and written research is a component of the course, as are personal reflection and group discussion. The course provides context for the key concepts explored.
Course equivalencies: FNAR320/FNAR222
Outcomes:
Students develop technical, aesthetic, and conceptual strategies in the creation of three-dimensional artwork, and increased awareness of cultural / historical perspectives of the medium

FNAR 232 Visual Communication II (3 Credit Hours)
Pre-requisites: FNAR 132 Visual Communication I
A continued study of the visual and conceptual principles introduced in FNAR 132 with an emphasis on advanced typographic principles and an introduction to the history of graphic design.
Outcomes:
Students gain knowledge of graphic design history and advance in their understanding of typography and imagery in the problem-solving processes in graphic design, including the further development of conceptual skills

FNAR 233 Digital Media Design (3 Credit Hours)
An exploration of image creation and design using Adobe Photoshop and Adobe Illustrator. This industry standard software is introduced as a vehicle for basic design concepts and as a tool for creative expression.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students gain an understanding of software skills and design basics; They develop the ability and techniques to manipulate software in the production of compositions effectively combining image and typography

FNAR 234 Digital Media: Vector (3 Credit Hours)
An exploration of vector illustration using Adobe Illustrator. This industry standard software is introduced as a vehicle for basic design concepts and as a tool for creative expression.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students gain an understanding of software skills and design basics; They develop the ability and techniques to manipulate software in the production of artistic compositions effectively combining image and typography

FNAR 251 African-American Art (3 Credit Hours)
An introduction to the achievements of Americans of African descent beginning with African roots through the Harlem Renaissance to the contemporary work of such internationally recognized artists as Richard Hunt and Martin Puryear. Content may vary according to the particular focus of the instructor.
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-FNAR251/BWS 251
Outcomes:
Students will be able to demonstrate knowledge of the richness of African-American visual arts as they developed within and outside the purview of traditional art venues

FNAR 260 The Art of Bookbinding (3 Credit Hours)
An introduction to the basic methods of bookbinding exploring traditional and one-of-a-kind artists books. Sewn, glued and free form structures will form the basis for the study of image and text within the framework of a personal approach to alternative surfaces.
Outcomes:
Students will be able to construct and manipulate a wide variety of media using the grammar and language of the book form; Through selected projects students will utilize compositional elements and descriptive to communicate ideas and concepts in book form

FNAR 303 Visual Arts Pedagogy (3 Credit Hours)
This course explores the ideas of teaching and learning through the visual arts and arts integration as they pertain to teaching artists. Coursework includes lecture and discussion, readings, model teaching, and teaching artist visits. Students will learn art pedagogy, classroom management techniques, and to develop their ideas into a curricular format.
Outcomes:
Students will recognize perspectives and theories around learning through the visual arts, identify appropriate teaching content and techniques, and design appropriate visual arts lessons, aligning content and standards

FNAR 304 Paris in the Nineteenth Century (3 Credit Hours)
An examination of Nineteenth Century art in Paris as shaped by contemporary changes in the physical, social and economic life of the city.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of nineteenth century art and artists in the context of the emergence of a modern, industrial urban complex

FNAR 305 American Art to 1945 (3 Credit Hours)
An examination of American painting, sculpture, and architecture from the colonial period to the period immediately following World War II. Emphasis is placed on the development of specifically American art forms as they evolved from their dependency upon European sources.
Outcomes:
Students will be able to recognize and demonstrate knowledge of major artists and artistic movements from the earliest days of the Republic when Europe served as a source of training and inspiration to the beginnings of modern times when global developments shifted the focus of artistic inspiration to New York

FNAR 306 Contemporary Art 1945-Present (3 Credit Hours)
An examination of recent developments in American and European art beginning with the physical shift of the center of artistic authority from Paris to New York during and immediately after World War II.
Outcomes:
Students will be able to recognize and demonstrate knowledge of major artists and artistic movements from the mid-twentieth century to the present day; They will also understand the major theoretical issues of the period

FNAR 311 Advanced Studio (3 Credit Hours)
Pre-requisites: FNAR 213 or FNAR 214 or equivalent
The most advanced level studio course in painting and drawing and is designed to aid the student in developing a body of creative work from conception to production to presentation. This course is conducted as an individual studio practicum between the instructor and student. The course may be taken twice for credit.
Outcomes:
Students will demonstrate a strong understanding of their own creative process through the development of a cohesive body of work

FNAR 314 Painting III (3 Credit Hours)
Pre-requisites: FNAR 114 and 214
An advanced level painting course designed to extend the understanding of the application of drawing, design, and color principles introduced in FNAR 114 and expanded in FNAR 214. This course will explore a range of painting materials and substrates. Emphasis is placed on critique and the development of conceptual problems to build technical, perceptual, and personal expressive interpretation.
Outcomes:
Students will develop a body of work through expanded practice and articulation of both formal and artistic ideas

FNAR 315 Photography: Films and Cameras (3 Credit Hours)
Pre-requisites: FNAR 219 or instructor permission
This course will explore processes and materials related to film-based photography. The primary focus of this course will be shooting films with various types of film cameras. Students will also explore integrating a digital workflow to edit and print images captured on film.
Outcomes:
Students will learn how to use film cameras, scan film, and incorporate a digital workflow with the editing and printing of film to produce photographic projects

FNAR 318 Printmaking III (3 Credit Hours)
Pre-requisites: FNAR 218
A continued exploration of Printmaking I, II which enables the student to enhance technical and conceptual skills in printmaking mediums.
Outcomes:
Through selected projects students will demonstrate knowledge of contemporary trends in printmaking including new digital media and photomechanical processes; They will acquire analysis skills and functional critical knowledge of the grammar and language of prints

FNAR 320 Video Art (3 Credit Hours)
Pre-requisites: FNAR 216 or instructor permission
This is a course on Video Art and expanded lens-based media that introduces students to time-based art and the language and history of moving images. Students will explore the ways in which artists use video in their artworks and the techniques foundational to the craft of creating moving images.
Outcomes:
Students will learn technical skills, such as cinematography, video editing, and audio recording; Students will develop their literacy of video media by exploring artworks made by pioneering artists

FNAR 322 Sculpture & Ceramics: Advanced Studio (3 Credit Hours)
Pre-requisites: FNAR 222 or permission of instructor
An advanced studio course in which students focus on developing an independent, compelling three-dimensional fine arts practice through a more focused approach to the application and synthesis of knowledge and experiences in comparison to Intermediate Studio courses. Visual and written research and field trips are components of the course, as are personal reflection and group discussion. Technical experiments and key concepts are geared specifically to the students interests and artistic goals.
Course equivalencies: FNAR321/FNAR322
Outcomes:
Select and apply appropriate materials and methods to resolve complex visual and conceptual problems and meaningfully discuss key issues; Create a portfolio of work built on independent investigation

FNAR 332 Visual Communication III (3 Credit Hours)
Pre-requisites: FNAR 232 Visual Communication II
This course includes the continued study of contemporary graphic design practice and further work in design with emphasis on analytical and creative approaches to problem solving across many types of media. Students are exposed to current best practices for effective self-promotion.
Outcomes:
Students gain an understanding of how contemporary design is used to communicate; They begin to develop a sophisticated body of work, advancing in their ability to critically evaluate visual communication

FNAR 333 Explorations in Typography (3 Credit Hours)
Pre-requisites: FNAR 232
Students explore both practical and experimental solutions utilizing typography as a means of communication and language visualization; investigating multifaceted modes of expression with emphasis placed on the study and creation of meaning relative to audience, culture, and history.
Outcomes:
Students develop a heightened awareness of the nuanced role that typography plays as a delivery mechanism for narrative structures, information, language visualization, and alternate forms of expression

FNAR 334 Motion Design (3 Credit Hours)
An exploration of time-based motion graphics. Industry standard software is utilized as a vehicle for learning graphic animation concepts and as a tool for creative expression.
Outcomes:
Students gain an understanding of software skills and design basics; They develop the ability and techniques to manipulate software in the production of motion graphics effectively combining image and typography

FNAR 338 Medieval Art (3 Credit Hours)
An examination of the art and architecture of the Christian world from 250 to 1453 CE, including the Early Christian, Byzantine, Carolingian, Romanesque, and Gothic periods as well as the influence of Islamic culture.
Interdisciplinary Option: Catholic Studies, Medieval Studies
Course equivalencies: X-FNAR338/MSTU380/ROST338
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of medieval art and their relation to relevant cultural, social, and historical contexts; They will acquire the skills to critically analyze these relationships and to understand the scholarship and issues related to medieval studies

FNAR 341 Renaissance Art - Painting (3 Credit Hours)
An examination of pictorial arts of the Renaissance in Northern and Southern Europe within the context of the material culture and society of the fifteenth and sixteenth centuries. Content may vary according to the particular focus of the instructor.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-FNAR341/ROST341
Outcomes:
Students will demonstrate knowledge of techniques, formats, themes, forms, functions, and patronage of European painting and its relation to society and culture and will acquire the skills to critically analyze these relationships

FNAR 342 Art in Rome (3 Credit Hours)
A survey of Rome's artistic heritage, including architecture, mosaic, painting, and sculpture from antiquity to the present day studied within the context of Rome's changing roles in Western European history. Classes are taught on site.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR342/ROST342
Outcomes:
Students will demonstrate knowledge of Rome's cultural role in history and of its artistic traditions and how they relate to their historical context

FNAR 343 Baroque Art (3 Credit Hours)
An examination of art and architecture in Europe during the seventeenth and eighteenth centuries with special concentration on the preeminence of Rome. (Rome Center students are expected to visit and study certain works of art in their original location).
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR343/ROST343
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of seventeenth and eighteenth-century Western European art and their relation to relevant cultural, social and historical contexts; They acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Baroque studies

FNAR 344 Early Italian Renaissance Art (3 Credit Hours)
An examination of Italian art and architecture from the late thirteenth to the late fifteenth centuries with special emphasis on Florence, Siena, and centers in northern Italy such as Padua and Mantua. (Rome Center students visit and study certain works of art in their original location).
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR344/ROST344
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of early Italian Renaissance art and their relation to relevant cultural, social, and historical contexts; They acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Italian Renaissance art

FNAR 345 Italian High Renaissance and Mannerist Art (3 Credit Hours)
An examination of Italian painting, sculpture, and architecture from the late fifteenth through the sixteenth centuries, focusing on the art of Florence, Rome, and Venice and including consideration of such artists as Leonardo da Vinci, Michelangelo, Raphael, and Titian. (Rome Center students visit and study works of art in their original location).
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR345/ROST345
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of Italian High Renaissance and Mannerist art and their relation to relevant cultural, social, and historical contexts; Students acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Italian High Renaissance and Mannerist art

FNAR 349 Art and the Catholic Tradition (3 Credit Hours)
An examination of the integral role that the visual arts and architecture have played in the Catholic faith since its early centuries.
Interdisciplinary Option: Catholic Studies, European Studies
Outcomes:
Students will understand the role of Catholic art and architecture within its theological, social, and historical contexts through an examination of both visual and related textual sources

FNAR 351 Latin American Art I: Ancient to 19th Century (3 Credit Hours)
This course examines creative production in Latin America from its Ancient empires to colonization, and independence in the 19th century. Exploring archaic periods to imperial integration, we consider the legacy of indigenous artistic production and mestizaje in the visual culture in the region from the 16th through 19th century.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-ANTH344/FNAR351/INTS385/LASP
Outcomes:
Students will demonstrate the ability to distinguish sculptural, pictorial, and architectural styles of diverse cultures within the geographical and temporal boundaries defined, and historical processes that shaped its production

FNAR 352 Islam and Visual Culture (3 Credit Hours)
This course examines the visual forms of Islamic culture from the 7th century to the present. Students will be introduced to the major monuments, artistic techniques, and regional styles, investigating visual works within their historical context and in relation to intercultural engagement.
Interdisciplinary Option: Arabic Language and Culture, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-FNAR352/IWS352
Outcomes:
Through study of major monuments, artistic techniques, regional style, and intercultural engagement, students will recognize Islam and visual culture as a global phenomenon entailing much more than religious artifacts

FNAR 353 Latin American Art II: Modern to Contemporary (3 Credit Hours)
This course provides an expanded understanding of modernity and its artistic partner, modernism, as well as the political, social and cultural landscapes that informed and formed the art and architecture of Latin America and its diasporic intersections, from the early twentieth century to the present day.
Interdisciplinary Option: Latin American Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate the ability to distinguish pictorial, sculptural, performative and architectural styles of diverse artists and identities associated with Latin America, and the historical processes that shaped its production

FNAR 355 Art of Africa (3 Credit Hours)
An examination of the traditional arts of West Africa and the Pacific and their role in the control and organization of tribal societies before the introduction of European influences.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Course equivalencies: ANTH345/BWS/INTS/FNAR355
Outcomes:
Students will demonstrate understanding of the unique role of the visual arts and music in the transmission of traditional mores; They will demonstrate understanding of the social and artistic distinctions found in a comparison of highly centralized societies with loosely defined tribal organization and how this is reflected in different cultural standards

FNAR 356 India, Women and Visual Culture (3 Credit Hours)
This course examines images of women and the work of women artists in India, engaging with broader topics in feminist and postcolonial theory, including indigenous responses to colonialism, contemporary critiques of the female form in Indian art, and the agency of women artists in the twentieth and twenty-first centuries.
Outcomes:
Student will become familiar with the work of Indian women artists and how images of Indian women have been understood and interpreted throughout the 20th and 21st centuries

FNAR 357 South Asian Visual Culture (3 Credit Hours)
An examination of the cultural background and major art forms of South Asia from the Indus River Valley settlements to the Present. As well as sculpture, architecture and painting, popular visual art forms will be examined.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-FNAR357/ASIA357/INTS396
Outcomes:
Students will demonstrate knowledge of the religious, cultural and political forces shaping South Asian art; They will be able to distinguish the regional styles and identify the major monuments of South Asia; Students will understand the role of the visual arts in South Asian society

FNAR 358 Chinese Art and Culture (3 Credit Hours)
An examination of the cultural background and major visual art forms of China from prehistoric to early modern times.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-FNAR358/ASIA358/INTS321
Outcomes:
Students will demonstrate knowledge of the philosophical and religious sources of the major traditional art forms of China; They will recognize the degree to which Confucian morality controlled the social and intellectual principles by which society was governed and the arts evaluated until the advent of Communism

FNAR 359 Japanese Art and Culture (3 Credit Hours)
An examination of the cultural background and major art forms of Japan from earliest times until the twentieth century.
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: X-FNAR359/ASIA359/INTS329
Outcomes:
Students will demonstrate knowledge of the philosophical and religious sources of the major art forms of Japan; They will recognize the dual formative influences of indigenous traditions and those of foreign origin in what becomes a uniquely Japanese adaptation and resolution of ideas expressed effectively either verbally or visually

FNAR 360 Picturing Women in Renaissance and Baroque Art (3 Credit Hours)
An examination of issues related to women, art, and society in early modern Europe (15th-17th centuries) through a study of women as subject matter, viewers, producers, and patrons of art. A multi-disciplinary approach is employed to explore how gender as a social, political, and psychological category is reflected in and reinforced by visual culture.
Interdisciplinary Option: European Studies, Women & Gender Studies
Course equivalencies: X-FNAR360/WOST360/WSGS360
Outcomes:
Students will demonstrate knowledge of the ways gender is constructed in society, the origins and effects of gender attitudes, the interrelation between gender and visual culture, and the ways women have claimed agency; Students will critically analyze visual culture and gender attitudes and demonstrate knowledge of feminist theory and scholarly methods

FNAR 364 History of Graphic Design (3 Credit Hours)
A survey of the evolution of graphic communication from prehistory through postmodern design and the digital revolution.
Outcomes:
Students will demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of graphic communication in relation to its social-historical context

FNAR 365 History of Photography (3 Credit Hours)
A chronological and thematic survey of the history of photography, especially in Europe and America. Fine art and utilitarian applications of the medium are considered by examining photographers who represent the origin and development of major pictorial forms; the interaction between technology and imagery; and the relationships between photography and historical, social and cultural events.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR365/ICVM365/IFMS365
Outcomes:
Students will be able to demonstrate understanding of the most important pictorial forms, themes, practitioners, processes and context of photography as a fine and applied art from the beginning of the nineteenth century to the present

FNAR 367 History of Architecture (3 Credit Hours)
An examination of the history of the built environment from the earliest known forms to contemporary examples, in terms of architectural theory, structural realities and socio-cultural usages.
Outcomes:
Students will be able to demonstrate an understanding of the many ways architecture serves the human race, and be able to constructively analyze the specific functions buildings serve within their particular cultural temporal milieu

FNAR 367R Architecture in Rome (3 Credit Hours)
This course explores architectural drawing as a way to incorporate hands-on experience in students` study of architecture in Rome. Students will develop drawing skills by conceptualizing architectural ideas in relationship to Rome's buildings and sites.
Outcomes:
Upon successful completion of this course, students will be able to develop basic architectural drawing skills, to understand graphic standards and drawing conventions of the architectural design as well as to analyze and appreciate Rome's architectural buildings and spaces

FNAR 368 Fine Arts Internship (1-4 Credit Hours)
A comprehensive introduction to gallery and/or studio operations in the Fine Arts Division. Internships will provide opportunities in various aspects of administration, scholarship, teaching, and sustaining standards in studio and/or gallery performance. Gallery internships available at the Ralph Arnold Gallery. External internships upon approval. Teaching/studio assistantship based on class availability. Departmental consent required for enrollment.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop practical experience for the professional world and be able to demonstrate knowledge of gallery/museum administration, scholarship, exhibition production, and/or class preparation and teaching

FNAR 380 Internship I (1-4 Credit Hours)
Pre-requisites: FNAR 332 Visual Communication III; Fine Arts Majors only
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FNAR 381 Internship II (1-4 Credit Hours)
Pre-requisites: Permission of chairperson
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FNAR 382 Visual Communication IV (3 Credit Hours)
Pre-requisites: FNAR 332 Visual Communication III and Senior standing or instructor permission
This course perfects the practice and tools of visual communication through a series of advanced projects with the aim of creating a robust and well-balanced body of work.
Outcomes:
Students are prepared to use their skills in research, analysis, and the design processes that lead to creative conceptualization to create appropriate design decisions and refined design solutions

FNAR 383 Interactive Design (3 Credit Hours)
Pre-requisites: FNAR 233 Digital Media Design
This course introduces aspects of interaction and web design including theory, common best practices, usability, information architecture, graphic design in the interactive context, prototyping, and the technical parameters of an interactive environment. Industry standard software will be used. Strong emphasis will be placed on design principles, information hierarchy, and typography.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR383/ICVM383/IFMS383
Outcomes:
Experience in the research, planning, design, and prototyping of interactive communication

FNAR 388 Critical Approaches to Visual Art (3 Credit Hours)
Pre-requisites: FNAR 202: Modern Art, C- or higher
This course examines key theoretical issues in contemporary art. Students will apply these concepts to develop strategies for creative output. The course will feature readings, discussions, written assignments, and projects to explore interdisciplinary approaches that emphasize idea as the primary means of visual production.
Outcomes:
Gain an understanding of key theoretical concepts in contemporary art; Apply theoretical concepts for the production of artworks; Develop a contemporary art practice in preparation for FNAR 398 Capstone

FNAR 390 Art History: Methods and Research (3 Credit Hours)
Pre-requisites: Restricted to Art History Majors and Minors
An examination of theoretical, critical and methodological issues as related to Modern and Post-Modern art.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR390/IFMS390
Outcomes:
Students will learn to recognize and apply a range of appropriate theoretical approaches and scholarly methods

FNAR 391 Senior Thesis in Art History (3 Credit Hours)
Students develop an in-depth scholarly research paper while engaging new theoretical frames or topics to expand upon the writing and research of a paper of their choice from a previous art history class. In addition, they will share their research in a final, formal oral presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students produce a polished in-depth research paper; They demonstrate the ability to synthesize and apply ideas from scholarly sources; formulate, develop, and articulate in verbal and written form relevant issues

FNAR 392 Senior Thesis II: FNAR Art History Capstone (3 Credit Hours)
Pre-requisites: FNAR 391 or instructor permission; Art History majors only; Senior standing
The second half of the capstone experience for art history majors. In Senior Thesis II, students write an in-depth scholarly research paper.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students produce a polished in-depth research paper; They demonstrate the ability to synthesize and apply ideas from scholarly sources; formulate, develop, and defend a thesis; and critically analyze and articulate in verbal and written form the issues and ideas relevant to their topic

FNAR 393 Topics in Studio Art (3 Credit Hours)
Special topics in specific areas of study in studio art.
Outcomes:
Students will master topics in areas of studio art not offered elsewhere in the curriculum

FNAR 394 Topics in Art History (1-4 Credit Hours)
Special topics in specific areas of study in art history.
Outcomes:
Students will master topics in areas of art history not offered elsewhere in the curriculum

FNAR 398 Fine Arts Capstone (3 Credit Hours)
Pre-requisites: Completion of the most advanced course in the student's FNAR concentration
The course serves as the culmination of each student's experience as a Fine Art major. Students will demonstrate the ability to produce work that exemplified the application and synthesis of the knowledge gained from the courses and experiences.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate the ability to produce art work suitable for exhibit

FNAR 399 Independent Study (1-4 Credit Hours)
Pre-requisites: written permission of instructor and chairperson
Advanced student are afforded the opportunity to work on an in-depth project in the medium of his/her choice in a tutorial setting. The course is developed in consultation with a faculty advisor and is stated formally in a written contract. of definition, goals, procedures and outcomes.
Outcomes:
Students will be able to demonstrate the ability to produce a significant body of original artwork on a focused theme

Music (MUSC)

MUSC 101 Music: Art of Listening (3 Credit Hours)
Focus is on the acquisition and enhancement of listening skills through direct experience of musical works along with an examination of cross-cultural similarities and differences among musical styles. Concert attendance is required.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
A cultivation of musical perception through a process of repeated and guided listening; strengthening of listening skills while developing and expanding styles perspectives

MUSC 102 Class Piano for Beginners (3 Credit Hours)
For the student who has never had keyboard instruction and is interested in learning the art of performance on the piano. Fundamentals of music theory, note reading and personal enjoyment are emphasized. Strongly recommended for those preparing to teach music in elementary school.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
A basic keyboard ability with an emphasis on reading music symbols accurately while also enjoying the making and doing of music

MUSC 103 Class Guitar for Beginners (3 Credit Hours)
For the student who has never had guitar instruction and is interested in learning the art of performance on the guitar. Fundamentals of music theory, note reading and personal enjoyment are emphasized. Strongly recommended for those preparing to teach music in elementary school.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
A basic guitar ability with an emphasis on reading music symbols accurately while also enjoying the making and doing of music

MUSC 104 Gospel Choir (1 Credit Hour)
Admission through audition. A mixed ensemble of singers performing primarily Gospel music (Spirituals, Blues, etc). Admission through audition. The choir participates in at least one public performance each semester. May be repeated to a limit of eight hours.
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-MUSC104/BWS 104
Outcomes:
Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance; They reflect on their personal and collective artistic growth through the process

MUSC 105 Symphony Orchestra (1 Credit Hour)
Admission through audition. The study and performance of standard orchestral literature. Students must provide their own instruments and should have previous ensemble experience. The ensemble gives at least two concerts each semester.
Knowledge Area: Artistic Knowledge and Experience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper instrumental technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the process

MUSC 106 Guitar Ensemble (1 Credit Hour)
Admission through audition. For advanced guitarists. The study, rehearsal and performance of transcriptions and original works for guitar ensemble. Repertoire from the Renaissance through the present will be performed. Students must provide their own instruments. Gives at least one concert each semester.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper guitar technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the process

MUSC 107 Chorus (1 Credit Hour)
University Chorus is a topics course in ensemble singing devoted to the study, rehearsal and performance of standard choral literature of all periods. Admission through audition. Gives at least two performances each semester. Some sections require audition for admission.
Knowledge Area: Artistic Knowledge and Experience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve their vocal/choral technique and knowledge of the musical literature through rehearsal and performance; They reflect on their personal and collective artistic growth throughout the performance process

MUSC 108 Liturgical Choir: Cantorum (1 Credit Hour)
Admission through audition. An SATB ensemble providing music for the Sunday liturgies in Madonna della Strada Chapel and other university liturgical and choral functions and concerts. Repertoire includes both traditional and contemporary sacred music. Admission through audition.
Knowledge Area: Artistic Knowledge and Experience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic throughout the performance process

MUSC 109 Jazz Ensemble (1 Credit Hour)
Admission through audition. Rehearsal and performance of standard Jazz and Big Band music. Members must have previous Jazz Band experience. Performs publicly at least twice each semester of the academic year.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-MUSC109/BWS 109
Outcomes:
Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 110 Wind Ensemble (1 Credit Hour)
Admission through audition. The study and performance of standard wind ensemble literature. Students must provide their own instruments and should have previous ensemble experience. The ensemble gives at least two concerts each semester.
Knowledge Area: Artistic Knowledge and Experience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 111 Percussion Ensemble (1 Credit Hour)
Enrollment Requirements: Audition and permission of the instructor. The study and performance of standard percussion ensemble literature. The ensemble gives at least two concerts each semester.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 112 Loyola University Technology Ensemble (1 Credit Hour)
Loyola University Technology Ensemble (LUTE) is a performing ensemble with a composition & engineering component. Its primary instrumentation is electronic or electroacoustic, encompassing digital and analogue electronic instruments, live coding, circuit bending, and repurposing of devices or objects, etc. LUTE will appear in public at least once during each semester.
Course equivalencies: X-COMP 112/MUSC 112
Outcomes:
Collaborate to compose, engineer, and perform unique technology-driven musical experiences; design interface modules for electroacoustic performance; encode musical ideas in software or digital musical instruments; perform publicly

MUSC 122 Introduction to Digital Music (3 Credit Hours)
Computers and digital tools have been seeping into the world of music, and this course aims to explore this newly formed territory. This course is intended for students who wish to learn more about electronic music, signal processing, and algorithmic music composition. Understanding of the physics of musical sound and digital audio, facility with hands-on applications of algorithmic music composition and musicology, and ability to design and render digital instruments.
Knowledge Area: Quantitative Knowledge
Course equivalencies: X-COMP 122/MUSC 122

MUSC 142 Class Voice for Beginners (3 Credit Hours)
For the student who has never had voice instruction and is interested in learning the art of vocal performance. Fundamentals of music theory, note reading and personal enjoyment are emphasized. Strongly recommended for those preparing to teach in elementary school.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: THTR242/THTR142/MUSC142
Outcomes:
A basic vocal ability with an emphasis on reading music symbols accurately while also enjoying the making and doing of music

MUSC 144 Music Theory I (3 Credit Hours)
Co-requisites: MUSC 145
An introduction to the fundamentals of melodic construction in all the diatonic modes (major/minor and modal) and culminates in control of two-part counterpoint. Melodies will be examined and broken down into their essential components. The class strengthens the basic musicianship skills of the student through performance of the students' written compositions illustrating the class concepts. Must be taken concurrently with MUSC 145.
Outcomes:
Through the study of melody students will develop an understanding of musical notation, the organization and color of all diatonic scales (major/minor and modal), interaction between intervals, transposition and its implications, rhythmic and beat structure, and begin developing critical analysis skills

MUSC 145 Musicianship Lab I (1 Credit Hour)
Co-requisites: MUSC 144
This course reinforces concepts presented in Music Theory I and introduces students to the basic concepts of sight singing, ear training and dictation. The voice is the class's primary focus. This course must be taken concurrently with MUSC 144.
Outcomes:
Recognize Music Theory I concepts by ear, dictate accurately those concepts, and recreate them on the voice and piano; Apply these concepts to student's primary instrument

MUSC 153 The Music of China (3 Credit Hours)
This course surveys the broad range of Chinese musical traditions as well as the practice of fieldwork, music theory and methodological issues encountered in Chinese music studies.
Outcomes:
Students will identify Chinese musical traditions throughout history and their connections to the Chinese language, history, cultural and religious studies and politics

MUSC 154 Intro to Opera (3 Credit Hours)
Survey of opera from 1600 to the present and consideration of opera as an art form which combines music and drama. Analysis of libretto structure and study of the variety of operatic styles are included.
Course equivalencies: X-MUSC154/THTR154
Outcomes:
Fundamental acquaintance with a wide selection of operatic literature and the principle eras of the European and American traditions

MUSC 154R Introduction to Opera in Rome (3 Credit Hours)
This course offers the student an overview of the development of opera in Europe with a particular emphasis on some of the most representative Italian operas and authors from the 17th to the 20th century. As the course considers opera as a cultural phenomenon, the historical, intellectual, political, social, religious and economic conditions that influenced the development of this art will be also examined.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Italian Studies
Course equivalencies: X-MUSC154/THTR154
Outcomes:
Students will acquire the basic understanding the cultural phenomenon of opera and the style differences of different historical periods, as well as musical terms

MUSC 155 Intro to Symphonic Music (3 Credit Hours)
Survey of the principal forms of orchestral music from the Baroque to the present. Course will include: the symphony, concerto suite, overture, and symphonic poems. (Also offered at Rome Center.)
Outcomes:
Functional knowledge of the language and grammar of music through selected analysis and experience of specific symphonic literature

MUSC 156 Intro to Jazz (3 Credit Hours)
Survey of the development of jazz emphasizing the major trends and artists of this unique American style. Listening skills will be developed.
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-MUSC156/BWS 156
Outcomes:
Functional knowledge of the language and grammar of this uniquely American music through selected analysis and experience of specific jazz literature

MUSC 157 America Popular Song (3 Credit Hours)
Survey of American popular song from the early 19th century minstrel shows to the present. The evolution of this music and its relationship to society will be studied. Listening skills will be developed.
Outcomes:
Functional knowledge of the language and grammar of popular music through selected analysis and experience of specific repertoire

MUSC 161 Music in United States (3 Credit Hours)
An historical survey and guided listening experience of the evolution of music in the United States from the earliest inhabitants and settlers to the dawn of the 21st century. Special emphasis will be given to a selected era and/or music type.
Outcomes:
An understanding of the societal influences on the music of the United States and an appreciation of its music repertoire

MUSC 185 Jazz Improvisation (3 Credit Hours)
Previous basic understanding of theory and analysis is essential. Fundamentals will be expanded and enhanced through writing, listening and performing. An emphasis will be placed on learning the jazz language by ear. Students will also learn to read lead sheets and chord symbols, developing the ability to apply the jazz language to the repertoire.
Outcomes:
Appreciation for and ability to create and perform jazz improvisation

MUSC 186 Jazz Arranging (3 Credit Hours)
Fundamentals of composition and arranging will be expanded and enhanced through writing and listening. Students will learn information about the instrumentation of the big band, instrument ranges, and how to use software to make arrangements. Previous basic understanding of theory and analysis is essential.

MUSC 201 Music Technology I (3 Credit Hours)
This introductory course in Music Technology is designed to introduce students to MIDI orchestration, sequencing and digital audio editing. The course is designed to present software and hardware as tools for the creation of sound design as musical composition.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Demonstrate proficiency in using software as a musical instrument to orchestrate, perform and record

MUSC 202 Class Piano II (3 Credit Hours)
Pre-requisites: MUSC 102 or permission of the instructor
This applied group class is designed for students who have successfully completed MUSC 102, or have previously attained a similar level of proficiency. Emphasis is on a variety of styles and levels of keyboard repertoire to promote a balance of new information with musical material that reinforce concepts.
Outcomes:
Students will demonstrate basic keyboard skills, piano repertoire and musical styles, to express themselves musically at the piano

MUSC 203 Class Guitar II (3 Credit Hours)
Pre-requisites: MUSC 103 or permission of the department
This course is a continuation of (MUSC 103) or a previously attained equivalent level of study and musical skill development. Throughout the course students refine technical skills and music theory as applied to the guitar. Students perform in both solo and ensemble settings.
Outcomes:
Students will demonstrate an ongoing development of coordination skills, fingerboard knowledge, sight-reading skills, performance practices and intermediate repertoire knowledge

MUSC 207 Chamber Choir (1 Credit Hour)
Audition Required. An ensemble of advanced singers performing works written especially for the smaller choir. Performance of music from all historical periods suitable for this type of choir. The choir participates in at least two public performances each semester. Admission through audition. May be repeated for up to eight credit hours.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain knowledge of the musical literature offered through rehearsal and performance, while integrating proper vocal/choral technique; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 244 Music Theory II (3 Credit Hours)
Pre-requisites: MUSC 144; Corequisite: MUSC 245
An introduction to the fundamentals of harmonic progressions controlled through either expansion of a tonic-dominant phrase structure, elaborations of two-part counterpoint structures, or control of the three basic root motion models. Music will be analyzed using chord matrixes and reductions into two-part frameworks. The class strengthens the basic musicianship skills through performance students' compositions illustrating the class concepts. Must be taken concurrently with MUSC 245.
Outcomes:
Through the study of harmony students will develop an understanding of all chord types, root motion, cadence types, how tonal music expands upon the basic tonic-dominant phrase, voice leading techniques, and begins exploring the techniques of chromaticism and modulation; The class will also further develop the student's critical analysis skills

MUSC 245 Musicianship Lab II (1 Credit Hour)
Co-requisites: MUSC 244
Students build on basic voice and board skills acquired in Musicianship Lab I and reinforce concepts introduced in Music Theory II by recreating the concepts on the keyboard and voice. This course must be taken concurrently with MUSC 244.
Outcomes:
Recognize Music Theory II concepts by ear, dictate accurately those concepts, and recreate them on the voice and piano; Apply these concepts to student's primary instrument

MUSC 246 Composition I (3 Credit Hours)
Course deals with the study of music theory and simple and binary forms. In addition to that, students compose an original piece of music for two instruments that receives public performance.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through the study of relevant music scores, students learn the principles of composition and instrumentation to then apply them to their own compositions

MUSC 247 Composition II (3 Credit Hours)
Pre-requisites: MUSC 246
This course deals with the study of melody, counterpoint, harmony, and shorter forms. In addition to the study of theory and form, students compose an original piece of music for two instruments that is presented professionally at a public performance.
Outcomes:
Through the study of related scores and with the supervision of instructor, students compose an original work for violin and piano or violoncello and piano

MUSC 248 Jazz Composition and Arranging (3 Credit Hours)
Pre-requisites: MUSC 144
A study of the harmonic, melodic, and rhythmic theories that lead to the ability to compose and arrange in the jazz idiom. Emphasis will be placed on common harmonic progressions, scale / chord relationships, melody, song forms, and extended harmony and reharmonization. Students will also learn the basic principles of arranging and music notation, culminating in a final composition and arranging project for jazz quintet.
Outcomes:
The ability to compose and arrange music for small jazz combos of up to two horns plus rhythm section

MUSC 252 Music History I (3 Credit Hours)
Pre-requisites: MUSC 144 and MUSC 145 or taken concurrently
European music from the Medieval to the early Baroque where vocal music dominated, and the study of counterpoint led to the birth of harmony.
Interdisciplinary Option: Catholic Studies, European Studies
Outcomes:
Through listening, performance and study students demonstrate an understanding of how melodic composition gave rise to harmony and formed the foundation of Western music

MUSC 255 Music in Catholic Worship (3 Credit Hours)
Pre-requisites: MUSC 252
This course will trace the development of music in liturgy from Gregorian chant through Vatican II and to the present, examining repertoire and forms, musical and theological trends, and how music has been employed in the expression of the living prayer of the Roman Catholic Church through the centuries.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-MUSC255/CATH255
Outcomes:
Students can identify the major shifts and movements of music in the Catholic Church from the Middle Ages to the present, including the shifts represented by the Second Vatican Council

MUSC 256 Jazz Music History (3 Credit Hours)
This course is a historical and listening survey exploring the development of jazz music from its origins at the turn of the 20th century to the music of the present era. Many styles of jazz and a multitude of important musicians will be discussed, as well as important cultural and sociological aspects of the art form.
Interdisciplinary Option: Italian American Studies
Outcomes:
Through listening, lecture, required reading, and concert attendance, the student will gain an understanding of the basic musical elements of jazz, it's musical and sociological contexts, and how these elements have developed and changed over the music's varied history

MUSC 260 Conducting (3 Credit Hours)
The student will acquire a personal conducting style through study and practical application and will develop the basic skills that make one an effective, well-rounded conductor.
Outcomes:
Students will demonstrate rudimentary skills of conducting: including conducting patterns, cues, score reading and analysis

MUSC 261 Lyric Diction I: Italian and German (1 Credit Hour)
This course will acquaint students with the rules of diction in the two major languages of classical singing, German and Italian. Students will gain both a theoretical understanding of the rules of diction and the practical ability to make the relevant sounds and sing in these languages. Concurrent enrollment in 280K Applied Music: Voice is required.
Outcomes:
To successfully transcribe Italian and German into IPA; To learn and produce all of the relevant sounds of German and Italian; To sing in German and Italian with accurate diction

MUSC 262 Lyric Diction II: French and Other Languages (1 Credit Hour)
This course will acquaint the student with the rules of French, English and Latin. Students will gain both a theoretical understanding of the rules of diction and the practical ability to make relevant sounds and sing in these languages. Concurrent enrollment in 280K Applied Music: Voice is required.
Outcomes:
To successfully transcribe French, English and Latin texts into IPA; To learn to produce all of the relevant sounds of French; To sing in French, English and Latin with accurate diction

MUSC 280A Applied Music: Clarinet (1 Credit Hour)
Twelve 30-minute individual lessons in clarinet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280AA Applied Music: Conducting (1 Credit Hour)
Pre-requisites: MUSC 144, MUSC 145, MUSC 244, MUSC 245, MUSC 260
Twelve 30-minute individual lessons in conducting. Topics include: baton techniques, gestural mechanics, ear training, score study, transpositions, orchestrational basics, phrasing, and chord recognition. Choral, orchestral, or wind band considerations will be explored in greater detail, according to the background of the student.
Outcomes:
Advanced skills in conducting both small and large ensembles, score study, rehearsal, and concert programming

MUSC 280B Applied Music: Percussion (1 Credit Hour)
Twelve 30-minute individual lessons in percussion. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280BB Applied Music: Improvisation (1 Credit Hour)
Pre-requisites: MUSC 144, 145, 244, 245, 185, 385
Twelve 30-minute individual lessons in improvisation. Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction on the harmonic, melodic, and rhythmic theories that lead to the ability to improvise. Students may study with any of the jazz faculty regardless of their primary instrument.
Outcomes:
Students will learn to improvise over intermediate to advanced tunes in the jazz repertoire

MUSC 280C Applied Music: Oboe (1 Credit Hour)
Twelve 30-minute individual lessons in oboe. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280E Applied Music: Trumpet (1 Credit Hour)
Twelve 30-minute individual lessons in trumpet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280F Applied Music: Saxophone (1 Credit Hour)
Twelve 30-minute individual lessons in saxophone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280G Applied Music: Guitar (1 Credit Hour)
Twelve 30-minute individual lessons in classical or electric guitar. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280I Applied Music: Organ (1 Credit Hour)
Twelve 30-minute individual lessons in organ. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280J Applied Music: Piano (1 Credit Hour)
Twelve 30-minute individual lessons in piano. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280K Applied Music: Voice (1 Credit Hour)
Twelve 30-minute individual lessons in voice. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280L Applied Music: Violin (1 Credit Hour)
Twelve 30-minute individual lessons in violin. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280M Applied Music: Flute (1 Credit Hour)
Twelve 30-minute individual lessons in flute. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280N Applied Music: Cello (1 Credit Hour)
Twelve 30-minute individual lessons in cello. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280O Applied Music: Double Bass (1 Credit Hour)
Twelve 30-minute individual lessons in double bass. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280P Applied Music: Viola (1 Credit Hour)
Twelve 30-minute individual lessons in viola. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280Q Applied Music: Horn (1 Credit Hour)
Twelve 30-minute individual lessons in horn. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280R Applied Music: Trombone (1 Credit Hour)
Twelve 30-minute individual lessons in trombone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280S Applied Music: Harp (1 Credit Hour)
Twelve 30-minute individual lessons in harp. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280U Applied Music: Drum Set (1 Credit Hour)
Twelve 30-minute individual lessons in drum set. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280V Applied Music: Low Brass (1 Credit Hour)
Twelve 30-minute individual lessons in low brass, including euphonium and/or tuba. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280Y Applied Music: Bassoon (1 Credit Hour)
Twelve 30-minute individual lessons in bassoon. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280Z Applied Music: Composition (1 Credit Hour)
Pre-requisites: MUSC 144, 244,145, 245; 246 or 248
Twelve 30-minute individual lessons. Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction to develop original compositions from concept to completion. Idioms, genres, forms, instrumentation, and other considerations will vary from student to student. May be repeated for up to 8 credit hours.
Outcomes:
The ability to more fully develop original musical ideas into completed, and professionally notated, compositions

MUSC 289 Chamber Music (1 Credit Hour)
Small ensemble (2-10 member) applied music study through non-jazz instrumental ensembles. Open to strings, woodwinds, brass, keyboard instruments. One or more public performance is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain knowledge of the musical literature offered and improve their ensemble playing skills through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 290 Jazz Combo (1 Credit Hour)
Small group applied jazz music study through ensemble playing. One or more public performance is required. Enrollment Conditions: Audition and permission of the instructor
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain knowledge of the musical literature and improve their ensemble playing skills through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 320 Rehearsal and Performance (1 Credit Hour)
This course allows students to receive credit for performing in an on-campus production during the semester. Completion and submission of a journal or paper is required. Permission of department is required.
This course satisfies the Engaged Learning requirement.

MUSC 326 Digital Music Programming (3 Credit Hours)
Pre-requisites: COMP/MUSC 122, MUSC 201, COMP 125, COMP 150, COMP 170, or permission of instructor
This course is an exploration of coding for music applications. Topics include digital audio and synthesis theory and basic, musical data structures, and principles of computer music composition and interactivity. Students will design synthesis and sampling instruments, algorithmic music generators, signal processors, and interactive control systems using one or more music programming languages.
Course equivalencies: X-COMP 326/MUSC 326
Outcomes:
Create software modules for processing digital audio, MIDI, and generative music; develop interactive interfaces; export applications or modules; produce a portfolio of creative projects in areas of real-time audio/MIDI processing

MUSC 333 Music and Ritual in Catholic Liturgical Life (3 Credit Hours)
Drawing both from liturgical documents and the ritual texts themselves, this course explores how the theology and spirituality of our Catholic tradition are expressed in the music, liturgies, and rituals of the Roman Catholic Church.
Outcomes:
Students are conversant with the components, structure, and musical elements of the Catholic liturgy and how the Mass interacts with the spiritual and cultural lives of the faithful

MUSC 344 Music Theory III (3 Credit Hours)
Pre-requisites: MUSC 244 or permission of chair
Study of large compositional forms and the extended harmonic vocabulary of music of the 19th century. Continued development of aural, keyboard, sight-singing, compositional and analytical skills in class, computer lab and small group sessions.
Outcomes:
Expansion and deepening of knowledge of the language and grammar of music and their interaction; Ability to use this understanding in both written and aural analysis and to form and defend evaluative judgments about music

MUSC 345 Music Theory IV (3 Credit Hours)
Pre-requisites: MUSC 344 or permission of chair
Continued examination of the structural aspects of music with a focus on contrapuntal forms. Study of the compositional vocabularies of 20th century music. Continued development of aural, keyboard, sightsinging, compositional and analytical skills in class, computer lab and weekly skills sessions.
Outcomes:
Expansion and deepening of knowledge of the language and grammar of music and their interaction; Ability to use this understanding in both written and aural analysis and to form and defend evaluative judgments about music

MUSC 347 Composition III (3 Credit Hours)
Pre-requisites: MUSC 247
Course provides students with the ability to compose an original work for string quartet and examines larger forms, chromatic harmony, extended tonality, and modern techniques.
Outcomes:
Through the writing of original music and the study of related scores students demonstrate an understanding of musical forms and techniques and the ability to compose music for string quartet

MUSC 353 Music History II (3 Credit Hours)
Pre-requisites: MUSC 244 and MUSC 245
A new shared musical language spreads through Europe during the Baroque through Romantic period giving rise to the best known composers of Western music.
Interdisciplinary Option: European Studies
Course equivalencies: MUSC353 / MUSC253
Outcomes:
Students demonstrate an understanding of how composers developed music during this common practice period to create some of the most well known works of the Western cannon

MUSC 354 Music History III (3 Credit Hours)
Pre-requisites: MUSC 244 and MUSC 245
Composers in the modern era turn to innovative and foreign influences as technological developments allow the Western musical tradition to spread throughout the world.
Course equivalencies: MUSC354 / MUSC254
Outcomes:
Students are able to identify and articulate the many musical innovations and movements that helped turn Western music into a global force of expression

MUSC 363 Foundations of Vocal Technique and Pedagogy (3 Credit Hours)
This course will acquaint students with the basics of anatomy and physiology associated with singing technique, including the anatomy of the larynx, the structure of posture and breathing, and the physics of resonance. Additional topics will include vocal registers, healthy use of voice, and the basics of vocal instruction. Recognize healthy modes of phonation across musical styles. Learn to structure a voice lesson.
Outcomes:
Identify the major anatomical structures used in singing and their function

MUSC 364 Vocal Repertoire (3 Credit Hours)
This course covers a broad spectrum of vocal repertoire from 1600 to the present. Emphasis will be given to the application of stylistic conventions and the development of effective performance skills, culminating in public performance.
Outcomes:
To gain knowledge of important vocal repertoire and history; To develop the creative capacity to perform vocal music of different styles and eras

MUSC 365 Vocal Performance Workshop (3 Credit Hours)
The class aims to develop students' ability to deliver compelling performances on the musical stage. The first portion of the semester is focused on gaining and applying theoretical knowledge of acting for the singer. The second portion of the class focuses on preparing and performing opera/musical scenes.
Outcomes:
Acquire foundational skills in acting for singers / Learn basics of stagecraft for musical production / Perform operatic and/or musical theatre scenes

MUSC 370 The Business of Music (3 Credit Hours)
The Business of Music will offer a broad overview as to how the music industry works and provide insight into various career options. The course will include weekly discussions on current events in the music industry as they occur and feature a host of guest speakers. Students will also learn about the recording industry, music publishing, and the digital music world.
Outcomes:
An understanding of careers in the areas of performance, composition, production, management, education, and radio

MUSC 374 Musical Theatre Repertoire (4 Credit Hours)
This capstone repertoire course synthesizes musical theatre history, theory and performance. It is designed to develop students' ability to perform vocally, dramatically and physically within the canon of musical theatre repertoire. It culminates in a musical theatre showcase which features student performance of the repertoire learned in class.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of the history of musical theatre performance by comparing the work of significant composers, directors and choreographers and demonstrate understanding of the intrinsic requirements for effective synthesis of vocal, dramatic and dance performance

MUSC 380A Applied Music Advanced: Clarinet (1 Credit Hour)
Twelve 60-minute individual lessons in clarinet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380AA Applied Music Advanced: Conducting (1 Credit Hour)
Pre-requisites: MUSC 144, MUSC 145, MUSC 244, MUSC 245, MUSC 260
Twelve 60-minute individual lessons in conducting. Topics include: baton techniques, gestural mechanics, ear training, score study, transpositions, orchestrational basics, phrasing, and chord recognition. Choral, orchestral, or wind band considerations will be explored in greater detail, according to the background of the student.
Outcomes:
Advanced skills in conducting both small and large ensembles, score study, rehearsal, and concert programming

MUSC 380B Applied Music Advanced: Percussion (1 Credit Hour)
Twelve 60-minute individual lessons in percussion. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380BB Applied Music Advanced: Improvisation (1 Credit Hour)
Pre-requisites: MUSC 144, 145, 244, 245, 185, 385
Twelve 60-minute individual lessons in improvisation. Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction on the harmonic, melodic, and rhythmic theories that lead to the ability to improvise. Students may study with any of the jazz faculty regardless of their primary instrument.
Outcomes:
Students will learn to improvise over intermediate to advanced tunes in the jazz repertoire

MUSC 380C Applied Music Advanced: Oboe (1 Credit Hour)
Twelve 60-minute individual lessons in oboe. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380E Applied Music Advanced: Trumpet (1 Credit Hour)
Twelve 60-minute individual lessons in trumpet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380F Applied Music Advanced: Saxophone (1 Credit Hour)
Twelve 60-minute individual lessons in saxophone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380G Applied Music Advanced: Guitar (1 Credit Hour)
Twelve 60-minute individual lessons in classical or electric guitar. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380I Applied Music Advanced: Organ (1 Credit Hour)
Twelve 60-minute individual lessons in organ. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380J Applied Music Advanced: Piano (1 Credit Hour)
Twelve 60-minute individual lessons in piano. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380K Applied Music Advanced: Voice (1 Credit Hour)
Twelve 60-minute individual lessons in voice. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380L Applied Music Advanced: Violin (1 Credit Hour)
Twelve 60-minute individual lessons in violin. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380M Applied Music Advanced: Flute (1 Credit Hour)
Twelve 60-minute individual lessons in flute. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380N Applied Music Advanced: Cello (1 Credit Hour)
Twelve 60-minute individual lessons in cello. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380O Applied Music Advanced: Double Bass (1 Credit Hour)
Twelve 60-minute individual lessons in double bass. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380P Applied Music Advanced: Viola (1 Credit Hour)
Twelve 60-minute individual lessons in viola. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380Q Applied Music Advanced: Horn (1 Credit Hour)
Twelve 60-minute individual lessons in horn. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380R Applied Music: Advanced Trombone (1 Credit Hour)
Twelve 60-minute individual lessons in trombone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380S Applied Music Advanced: Harp (1 Credit Hour)
Twelve 60-minute individual lessons in harp. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380U Applied Music Advanced: Drum Set (1 Credit Hour)
Twelve 60-minute individual lessons in drum set. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380V Applied Music Advanced: Low Brass (1 Credit Hour)
Twelve 60-minute individual lessons in low brass, including euphonium and/or tuba. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380Y Applied Music Advanced: Bassoon (1 Credit Hour)
Twelve 60-minute individual lessons in bassoon. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380Z Applied Music Advanced: Composition (1 Credit Hour)
Pre-requisites: MUSC 144, 244,145, 245; 246 or 248
Twelve 60-minute individual lessons. Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction to develop original compositions from concept to completion. Idioms, genres, forms, instrumentation, and other considerations will vary from student to student. May be repeated for up to 8 credit hours.
Outcomes:
The ability to more fully develop original musical ideas into completed, and professionally notated, compositions

MUSC 385 Jazz Improvisation II (3 Credit Hours)
Pre-requisites: MUSC 185 Jazz Improvisation
A continued study of the harmonic, melodic, and rhythmic theories that lead to the ability to improvise in the jazz genre. Emphasis is on ear training, listening, extended harmony, motivic development, rhythm, and scale /chord relationships.
Outcomes:
Students will be able to construct bass lines, build four-part chordal accompaniment at the piano, and improvise melodies and improvise over intermediate to advanced tunes in the jazz

MUSC 386 Orchestration (3 Credit Hours)
Pre-requisites: MUSIC 144 or permission of chair
Immersion in the art of writing for the instruments of the orchestra in order to understand and write /arrange music for the indigenous capability of each instrument while achieving desired sound effects.
Outcomes:
Ability to score effectively for every instrumental family and also to write/arrange music for any instrumental ensemble

MUSC 387 Solo Recital: MUSC Capstone (1-4 Credit Hours)
Pre-requisites: Department's permission and audition
Preparation and presentation of a full-length, balanced program by memory in one's major area of performance. This may be taken twice for credit.
Outcomes:
For the performance-oriented student, the capstone of 4 years of applied study as well as fulfillment of an experience required by graduate schools for performance majors

MUSC 388 Lecture/Recital: MUSC Capstone (3 Credit Hours)
Pre-requisites: Music Major only
A directed studies capstone experience course. Project proposal must be approved by the course advisor by the end of the first week of the semester. A Public presentation of the project is required. Examples of appropriate capstone projects include, a performance of a composition, paper presentation, digital music design for a commercial product, conduct a chamber ensemble or the creation of a music installation. This course satisfies the Engaged Learning requirement.
Outcomes:
Synthesize previous course work into a public presentation in the students' area of interest

MUSC 389 Topics in Music (1-9 Credit Hours)
Specific course titles and content will vary. May be taken as directed study under the supervision of a designated faculty member for independent or small group research in special areas of interest. Because of variations described, students may repeat the course for a total of six hours.
Outcomes:
Opportunity to experience a music elective which is not ordinarily in the music offerings and thus enables individual enhancement of unique interests

MUSC 394 Internship in Music (1-6 Credit Hours)
Music students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission required. No more than 6 credit hours of Internship or Fieldwork can be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a music organization while reflecting on their work experience and applying theories and techniques acquired from their music courses

MUSC 397 Fieldwork in Chicago - Music (1-6 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional music organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours can be applied towards the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours to be assigned to be determined by the student in consultation with the Director of Music and the project supervisor

MUSC 399 Independent Study (1-6 Credit Hours)
Pre-requisites: written permission of chairperson
Independent study projects may be of various kinds and in any recognized area of the theatre arts. Such projects should be done under the close supervision of a music faculty member.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the chairperson and theatre faculty supervisor

Theater (THTR)

THTR 100 Intro to Theatre Experience (3 Credit Hours)
This course is an introductory study of the theatrical art form and its contemporary production practice. Students engage in a series of workshops and participatory creative projects.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will demonstrate the ability to identify the variety of collaborating arts and artists that combine to create of a work of theatre; to analyze a play script for live performance; to evaluate theatrical production; and to creatively apply knowledge of theatrical process through expressive and creative endeavors

THTR 142 Class Voice for Beginners (3 Credit Hours)
This class is for the student who has never had voice instruction and is interested in learning the art of performance in voice. Strongly recommended for those interested in the music major, theater or public speaking/performance
Course equivalencies: THTR242/THTR142/MUSC142
Outcomes:
Students will demonstrate understanding and application of the fundamentals of music theory, diction, and tone

THTR 154 Introduction to Opera (3 Credit Hours)
Survey of opera from 1600 to the present and consideration of opera as an art form which combines music and drama. Analysis of libretto structure and study of the variety of operatic styles are included.
Course equivalencies: X-MUSC154/THTR154
Outcomes:
Fundamental acquaintance with a wide selection of operatic literature and the principle eras of the European and American traditions

THTR 203 Dramatic & Theatrical Process (3 Credit Hours)
This course is an introduction to the basic methods of analyzing and interpreting plays representative of the modern stage (from Ibsen to the present). It explores how text analysis is, for all theatre artists, a critical first step in transferring the printed play text to the stage.
Outcomes:
Students will acquire the ability to analyze a play's structure and ideational content, its characters, and the potential challenges each play presents to theatre artists seeking to produce the play on the stage for a modern audience

THTR 204 Playwriting (3 Credit Hours)
This course is and introduction to the theories and techniques of playwriting with particular emphasis on the analysis of dramatic structure.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of the theories and techniques of playwriting and dramatic structure through application of these skills in several playwriting exercises and the development of a one act play

THTR 205 Theatre in Chicago (3 Credit Hours)
This course is an introduction to live theatre in the rich Chicago theatre scene. Students will develop an appreciation and enjoyment of drama through attendance at live theatre performance and sharpen critical thinking skills through written critiques and discussion of those productions.
Outcomes:
Students will demonstrate knowledge of and appreciation for the range of theatrical experiences, traditions and expressions available in the City of Chicago

THTR 227 Stage Management (3 Credit Hours)
This course explores the role of the stage manager in theatrical production from pre-production through closing documentation.
Outcomes:
Students will demonstrate understanding of the responsibilities and duties of a Stage Manager to a production; develop the necessary communication and organizational skills to fulfill these responsibilities in a production experience; and be exposed to various techniques and tools used in professional stage management

THTR 241 Voice & Diction for Stage I (3 Credit Hours)
This course focuses on the techniques of effective voice and speech production.
Course equivalencies: THTR 241 / THTR 241E
Outcomes:
Through class exercises and presentations, students will demonstrate greater knowledge and control over their breath support, tonal placement, vocal resonance, projection, clarity of articulation, Standard American vowel and consonant formation, language orchestration and coloration

THTR 252 Theatrical Design I (3 Credit Hours)
This course introduces the theatre student to the fundamentals of design especially as they relate to the theatrical design of sets, lights, and costumes.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will demonstrate understanding of the tools a set, costume, and lighting designer use to express their ideas; improve their abilities to communicate their creative ideas; appreciate how design affects an overall theatrical experience; and be prepared to engage in practical design experience in our theatre

THTR 261 Beginning Acting (3 Credit Hours)
Beginning Acting is an introduction designed to provide a foundation in the critical understanding and practical application of contemporary acting theories and techniques. Content will focus on stimulating full utilization of the actor's instrument (mind, body, voice, imagination, and emotion) and using exercises and improvisations to provide a practical approach to standard acting challenges.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will develop skills in observation, concentration and imagination, as well as critical skills in script analysis

THTR 267 Acting Theories and Techniques II (3 Credit Hours)
Pre-requisites: THTR 261
This course builds on the skills introduced in THTR 261 and development of physical and vocal skills towards performance of character from classical texts.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students will develop skills to research historical information for application in performance of characters and improve use of the body and voice to communicate character

THTR 300 Design Technology: Special Effects, Sound Engineer (3 Credit Hours)
Special Effects, Sound Engineering, Moving Light Programing, Projections, Computer Aided Drafting and Automation Design
Outcomes:
To provide a broad overview of current state of the art stage design technologies through lectures, demonstrations, and hands-on work

THTR 305 Theatre Workshop: Special Topics (3 Credit Hours)
This course introduces the student to a style, genre or method theatre making through active application in exercises, demonstrations, games and workshops.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop skills in applying performance theory to practice; develop performance skills in a particular style or genre; expand a repertoire of rehearsal techniques; and develop skills to create original theatre pieces

THTR 321 Practicum: Costumes (2 Credit Hours)
This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience scenic or costume construction.
Course equivalencies: THTR321/THTR 321E/THTR321C
Outcomes:
Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321C Practicum: Costumes (2 Credit Hours)
This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience scenic or costume construction.
Course equivalencies: THTR321/THTR 321E/THTR321C
Outcomes:
Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321E Practicum: Electrics (2 Credit Hours)
This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience with electrics.
Outcomes:
Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321P Theatre Practicum: Production Staff (1 Credit Hour)
Pre-requisites: Permission of the Department
This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience as production staff.
Outcomes:
Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321R Theatre Practicum: Running Crew (1 Credit Hour)
This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience with a running crew.
Outcomes:
Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321S Practicum: Scenic (2 Credit Hours)
Theatre Practicum (Scenery) is one of four experiential learning courses that will provide the student with an opportunity for practical application of varied techniques and theories in planning and construction of theatrical scenery and properties. The specific topics and skills the course will focus on vary from semester to semester as per the demands of each design.

THTR 321T Theatre Practicum: Scene Painting (1 Credit Hour)
Theatre Practicum: Scene Painting is a hands-on learning course that will provide the student with an opportunity for practical application of varied scenic painting techniques as applied to Loyola Theatre productions. The course is introductory and assumes no prior skills. A student with a background in painting in other mediums will be able to gain theatre specific, and more advanced, skills in this course.
Outcomes:
Students will acquire a variety of skills necessary for producing theatre, including collaboration and organization skills, and will gain appreciation for the complexity of play production

THTR 323 Rehearsal & Performance (1-12 Credit Hours)
Pre-requisites: permission of the instructor
This course allows students to receive credit for stage managing, acting in or directing a campus production during the semester. Completion and submission of a journal or paper is required. Course may be repeated up to 12 times for a total of no more than 12 credit hours.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique covered in coursework to production practice

THTR 324 Applied Design and Management (1-3 Credit Hours)
This independent study course supports student scene, costume, lighting, make-up, sound or property designers and stage managers selected by the faculty to design or manage for university productions. Department Permission Required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will deepen their understanding of a design process via first hand experience in our theatre

THTR 324D Applied Design (1-3 Credit Hours)
This class will teach Stage Design techniques in practice in production through mentorship. Students will design productions or assist faculty designers.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will accomplish goals in Communication, Collaboration and Conception; Design, Application and Reflection

THTR 324M Applied Management (1-3 Credit Hours)
This class will teach Stage Management techniques in practice in production through mentorship. Students will Stage Manage or Assistant Stage Manage productions.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will accomplish goals in Communication, Collaboration and Conception; Application; Reflection

THTR 327 Theatre Management and Arts Leadership (3 Credit Hours)
Pre-requisites: THTR 100 or THTR 203
This course is an introduction to the economic, managerial and administrative aspects of American Theatre and performing arts in general, with an emphasis on the non-for profit Chicago and Regional Theatre Industry and practical and contemporary aspects of the field. Any student looking to work in performing arts leadership or administration or start their own company will find this course valuable.
Outcomes:
Students demonstrate knowledge of the evolution of arts organizations and theatrical management; practical management tools; the economic challenges of producing theatre; production trends in the industry; the theories and processes behind planning and decision making; and students will gain appreciation for the importance of management in theatrical productions and organizations

THTR 329 Make-up and Mask Design (3 Credit Hours)
This course involves a hands-on study of make-up techniques especially as they relate to basic theatrical needs, character make-up, and special effects make-up.
Outcomes:
Students will be prepared to use make-up effectively in the theatre either as performers or beginning make-up designers, and to understand the variety of techniques and tools a make-up designer has available

THTR 331 Movement: Theories & Technique I (3 Credit Hours)
This course examines the relationship between the kinetic and kinesthetic experiences and personality development.
Course equivalencies: THTR 331 / THTR 331E
Outcomes:
Through a series of exercises, students will demonstrate an awareness of one's physical mannerisms, increased confidence in one's physical presence on stage and demonstrate physical transformation into character

THTR 335 London Theatre Experience (3 Credit Hours)
This course is a month long study abroad experience which allows the student to intensively study British theatre through excursions within London, special guest lecturers, walking tours, workshops, gallery and museum visits, and attendance of at least eight plays.
Outcomes:
Students will gain an understanding of the importance of London theatre and its influence on the rest of the world's theatre

THTR 336 Stage Combat for Actors (3 Credit Hours)
This class will teach Stage Combat techniques that will allow actors to perform fights effectively and safely. Students will work towards a final performance involving all students in a story told through violence.
Outcomes:
Be able to perform a choreographed stage combat sequence effectively and safely at full speed and before a live audience

THTR 341 Studies in Dramatic Form (3 Credit Hours)
This course studies the various structural forms drama has taken from the Greeks to the present. In particular it looks at tragedy, comedy, and melodrama and seeks to find their roots in the cultures which nurtured them.
Outcomes:
the student will be able to distinguish various dramatic forms as well as their roots in their cultures, and will have a vocabulary with which to discuss and evaluate them

THTR 344 Dialects for the Stage (3 Credit Hours)
This course provide instruction in the dialects most frequently used by the American actor and to explore a systematic approach to dialect acquisition which will serve the student in further independent dialect study.
Outcomes:
Students will acquire a working knowledge of the International Phonetic Alphabet, an understanding of the historical and cultural background of each dialect, skills in applying dialects to dramatic texts, and an introduction to the work of the dialect coach in the theatre

THTR 346 Scenic Art: Color Elevation to Scene Painting (3 Credit Hours)
This course is introduces the student to basic scene painting techniques for the theatre.
Outcomes:
Students will demonstrate understanding of the role of the scenic artist in relationship to the scenic designer, develop basic level skills required to execute the designer's intention or vision and execute a paint elevation

THTR 348 Theatre Pedagogy (3 Credit Hours)
This course explores the process of engaging children with teaching artistry techniques such as theatre acting games, design, and technical theatre as a means towards self-expression, personal development and content learning. This course will utilize planning tools and teach facilitation techniques that can be utilized across artistic practices. Laboratory experiences working with children are provided.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR348/CIEPM95
Outcomes:
Students will articulate the differences and similarities between theatre for children and creative dramatics disciplines, develop age appropriate materials and exercises, identify appropriate facilitating methods and techniques and apply these techniques in a laboratory setting

THTR 352 Theatrical Design II (3 Credit Hours)
Pre-requisites: THTR 252
An Intermediate course of study to explore the process of Theatre Design (Scenic, Costumes, and Lighting). Collaboration and storytelling through visual means is the key to understanding text-based theatre. Each individual will have the opportunity to express ideas in class discussions, written critical analysis, and execution of design while enhancing the process of design.
Outcomes:
The purpose of this course is to develop intermediate design skills building upon those learned THTR 252 and preparing students for assistant level production design experiences; Students will learn to merge and implement visual ideas to communicate with directors, fellow designers, actors, and technicians; Students will develop a critical eye in a group setting and have the ability to appraise the process in an open forum of discussion and reflection; Students will demonstrate evidence of research and written analysis through technical skills, preliminary sketching, and drawing techniques; Students will develop a better understanding of how to read scripts and how to describe and discuss the material in a cohesive manner in a group, and discover new and innovative ways of translating the text into thoughtful and inspiring designs

THTR 353 Theatrical Design III (3 Credit Hours)
Pre-requisites: THTR 252 and THTR 352
This team taught course will alternate between full group discussions on topics valuable to all disciplines and small group instruction on specific techniques within sub-disciplines. Students will declare a discipline at the beginning of the course. Students can repeat the course to pursue a second discipline. Students will be placed in teams of complimentary disciplines.
Outcomes:
Students will gain advanced level theories, practices, and techniques in one of the following theatrical design disciplines: scenery, costumes, lighting, or sound; Students will further deepen collaboration, communication, and presentation skills; Students will develop individual artistic voice as expressed through theatrical design

THTR 354 Storytelling Design: Puppetry, Properties and Toy (3 Credit Hours)
Pre-requisites: THTR 252, and either THTR 261 or 266
Puppetry is one of the oldest forms of storytelling. This course is intended to allow the student to several explore different forms of storytelling through the use of puppets and puppetry. The course will explore shadow puppetry, toy theatre and hand & rod puppetry. Each student will develop, as a member of a series of "production teams", a brief performance piece base.
Outcomes:
Students will gain skill in design through the storytelling techniques of puppetry and toy theatre

THTR 364 Theatre History and Literature I (3 Credit Hours)
Pre-requisites: THTR 203 or THTR 100
Theatre History and Literature is a part of a four-course sequence that examines works of dramatic literature in their historical context. Theatre History and Literature I focuses on the development of theatre from Greek through Jacobean and Caroline periods.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students will identify and describe events, practitioners, practices, theatre architecture, and significant plays within their historical context; Students will apply research to creative practice

THTR 365 Theatre History and Literature II (3 Credit Hours)
Pre-requisites: THTR 203 or THTR 100
Theatre History and Literature is a four course sequence that examines works of dramatic literature in their historical context. Theatre History and Literature II focuses on the development of theatre from the 16th through 19th centuries.
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students will identify and describe events, practitioners, practices, theatre architecture and significant plays within their historical context, They will also apply research to creative practice

THTR 366 Theatre History and Literature III (3 Credit Hours)
Pre-requisites: THTR 203 or THTR 100
Theatre History and Literature is a part of a four-course sequence that examines works of dramatic literature in their historical context. Theatre History and Literature III focuses on the development of theatre from the 19th through mid-20th centuries.
Interdisciplinary Option: European Studies
Outcomes:
Students will identify and describe events, practitioners, practices, theatre architecture and significant plays within their historical context; Students will apply research to creative practice

THTR 367 Theatre History and Literature IV (3 Credit Hours)
Pre-requisites: THTR 203 or THTR 100
Theatre History and Literature is a four-course sequence that examines works of dramatic literature in their historical context. Theatre History and Literature IV focuses on contemporary and post-modern theatre.
Outcomes:
Students will identify and describe events, practitioners, practices, theatre architecture and significant plays within their historical context; Students will apply research to creative practice

THTR 368 Acting Theories and Techniques III (3 Credit Hours)
This course continues the work of THTR 261, based on the needs of the students, using plays by modern and contemporary playwrights as the primary material.
Outcomes:
Students will be able to demonstrate an understanding of how to interpret and effectively perform plays written since the early 19th century up to present day

THTR 369 Acting Theories and Techniques IV (3 Credit Hours)
Pre-requisites: THTR 267
This course continues the work of THTR 368 based on the needs of the students. Performance material is at discretion of the instructor.
Outcomes:
Students will further develop performance skills and workshop areas of weakness based on individual needs and interests

THTR 375 Play Direction: Theater Capstone (3 Credit Hours)
Pre-requisites: THTR 203, 252, 266, 267, 364, 365, 366 and 367, or 375 may be taken concurrently with THTR 367
This course explores the fundamental principles of play direction. Students are required to direct a monologue, select a play script for production, develop a production concept, stage a fifteen-minute scene, and develop a detailed Director's Notebook.
Outcomes:
Students acquire the skills to identify the basic elements of stage direction; analyze a play script from the point of view of the director; articulate and defend a production concept; develop actor-coaching skills; and identify elements of direction that communicate story, theme, and concept

THTR 377 Audition Seminar (3 Credit Hours)
Pre-requisites: THTR 368
This course focuses on preparing to audition for professional theatre, commercial and film with particular emphasis on audition for Chicago Theatre.
Outcomes:
Students will demonstrate the ability to engage an auditor through an audition, demonstrate the ability to score and read copy truthfully, develop a head shot and resume and develop a personal repertoire of suitable audition pieces

THTR 393 Shakespeare Seminar (3 Credit Hours)
Pre-requisites: ENGL 326, THTR 365, and 9 credit hours for electives in the minor
This course provides a capstone seminar experience for students, focusing on how Shakespeare has been interpreted on the page and the stage. It will culminate with a thesis project, either scholarly or creative, that will serve as the capstone for the Shakespeare Studies Minor.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students will engage in advanced scholarly work in Shakespearean Studies towards development of a scholarly thesis or significant project

THTR 394 Internship in Theatre (1-6 Credit Hours)
Theatre students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department Permission Required. No more than 6 credit hours of Internship of Fieldwork may be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a theatrical organization while reflecting on their work experience and applying theories and techniques acquired from their theatre courses

THTR 395 Seminar in Theatre (3 Credit Hours)
Subject and requirements of this course will be determined by needs and interests of the students.
Outcomes:
To be determined by the instructor in consultation with the chairperson

THTR 396 Seminar in Theatre II (3 Credit Hours)
Subject and requirements to be determined by needs and interests of the students.
Outcomes:
To be determined by the instructor in consultation with the chairperson

THTR 397 Fieldwork in Chicago - Theatre (1-6 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional theatre organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied towards the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Theatre and the project supervisor

THTR 399 Independent Study (3 Credit Hours)
Pre-requisites: written permission of chairperson
Independent study projects may be of various kinds and in any recognized area of the theatre arts. Such projects should be done under the close supervision of a theatre faculty member.
Outcomes:
To be determined by the student in consultation with the chairperson and theatre faculty supervisor

Art History (BA)

The art history major is designed to ensure that students are well versed in both the historical and critical facets of the field through a sequence of courses (p. 429) that explores art objects from a variety of cultures across time. Courses emphasize visual, verbal, writing, and critical thinking skills, giving students the tools to form persuasive arguments based on evidence found in tangible objects, original documents, and scholarly literature.

The skills developed in the art history program prepare students for graduate programs and for a broad variety of careers.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Upon completion of this program, students will be able to:

- Demonstrate an understanding of human creativity and the role of the visual arts as a mode of visual communication in a global context
- Employ the elements of visual language and artistic terminology to critically analyze and interpret objects of art, architecture, and visual culture
- Demonstrate general knowledge and understanding of Western and non-Western art traditions across historical periods in terms of major monuments, artists, ideas, formal expression, themes, techniques, iconography, and functions of art in relation to their cultural, social, religious, and historical contexts
- Demonstrate depth of knowledge and understanding of specific historical periods or civilizations in the history of art
- Demonstrate an understanding of visual culture as it relates to issues of gender, class, race, religion
- Demonstrate knowledge of and an ability to apply art historical methodologies, criticism, and theory in art history research
- Demonstrate skills in critical thinking, conceptualization of self-developed projects, scholarly research techniques, and written and oral communication
- Demonstrate an understanding of the interdisciplinary nature of art history

Art History Minor

The Art History minor is often added as a secondary focus of study in order to complement or enhance a student's major or chosen career path. Students may also choose to add the minor in order to pursue an area of interest without the responsibility of a major.

While the major (p. 428) is a comprehensive course of study, the minor in Art History is intended to provide a breadth of knowledge. Art history minors develop a base-level understanding of the field, from the arts of the ancient world to contemporary art.

Dance (BA)

The Bachelor of Arts in Dance offers diverse rigorous dance training within the context of Loyola's Ignatian liberal arts curriculum in the service of social justice. The dance curriculum (p. 431) features classical, contemporary and global forms which contextualize and enrich current and emerging approaches to dance creation, dance research and performance.

[1] Course can be taken in any semester that it appears in depending on student's preference and course schedule.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Demonstrate an understanding of choreographic processes, aesthetic properties of style, and the ways these shape and are shaped by artistic and cultural ideas and contexts
- Apply and synthesize performance experience with a wide selection of dance repertory, the principal eras, genres, and cultural sources.
- Employ fundamental knowledge of the body/embodiment and of kinesiology as applicable to work in dance. Critically evaluate classroom technique, injury prevention, wellness, and personal development.
- Apply the ability to think, speak, and write clearly and effectively, and to communicate with precision, cogency, and rhetorical effectiveness, with the understanding that sharing our work in multiple contexts allows us to engage with the world on topics of academic and social relevance.
- Demonstrate the ability to develop and defend critical evaluations through creative inquiry and to respect, understand, and evaluate work in a variety of disciplines and scholarly, artistic, and pedagogical endeavors.
- Convey general knowledge of business and professional practices as they relate to the field of dance, recognizing that collaboration and interconnection are central to the growth and strengthening of our field.
- Demonstrate an understanding of, and experience in thinking about, moral and ethical problems. Cultivate empathy within roles as scholars and artists.

Dance Minor

For students looking to deepen their knowledge and experience in Dance while studying at Loyola University Chicago, the Dance minor offers a flexible framework for students to pursue excellence artistically and academically.

[1] Indicates that a student must be a declared DANC major or minor to enroll

Students interested in receiving a dance minor should make an appointment with Dance Minor Advisor Mari Jo Barker (mirbe@luc.edu).

Transfer-Student Residency Requirement

At least 9 credit hours of the dance minor must be completed at Loyola.

Learning Outcomes

- Increase psychomotor, cognitive and affective skills through the practice of dance
- Demonstrate foundational knowledge of dance theory and performance
- Employ fundamental knowledge of the body/embodiment and of kinesiology as applicable to work in dance. Critically evaluate classroom technique, injury prevention, wellness, and personal development
- Synthesize and apply coursework by preparing for and presenting public performance
- Engage with peers in co-curricular Dance minor piece for Dance Informance and in extra-curricular student dance organizations

Drawing, Painting and Printmaking Minor

As of Fall 2026, this minor is no longer accepting students. Please refer to the majors and minors listed below under "Related Programs," which will continue to be offered at the university.

The minor in Drawing, Painting & Printmaking is often added as a secondary focus of study in order to complement or enhance a student's major or chosen career path. Students may also choose to add the minor in order to pursue an area of interest without the responsibility of a major (p. 451).

The minor embodies many of the key historical, critical, theoretical, methodological and contextual elements embedded within the more comprehensive framework of the major.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Upon completion of this program, students will be able to:

- Apply a range of materials, processes and techniques within their chosen concentration as a primary form of artistic expression
- Analyze interpret and comprehend the elements that constitute a work of art (visual, functional, psychological, and social)
- Engage in self-directed problem solving analysis and critical thinking, and take creative and intellectual risks in the production of original artwork
- Employ scholarly and visual research in developing concepts, principles, and theories that underlie their artistic intentions, and effectively communicate them orally and in written form

Music (BA)

The Loyola University music program invites students of all backgrounds to engage in a vast array of performance and coursework opportunities. Located in one of the world's most vibrant musical centers, and featuring a highly dedicated and award-winning faculty, Music at Loyola provides the rigorous training necessary for those intent on pursuing a career in music, while offering a welcoming environment for non-majors seeking to enhance their collegiate experience.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Upon completion of this program, students will demonstrate:

- a thorough understanding of the basic elements related to music theory: rhythm, melody, and harmony.
- an understanding of musical forms, processes, and structures; and the ability to employ this understanding in written and verbal analyses.
- proficiency in the basic areas of musicianship: keyboard, aural skills, and sight-singing.
- a basic knowledge of music history resulting, in part, from score analysis, dedicated listening, and concert attendance.
- the ability to apply critical thinking towards music and its contextualization.
- the technical skills requisite for artistic self-expression.
- the knowledge and skills necessary to work collaboratively as part of a musical ensemble.
- the development of metacognitive skills.
- a working knowledge of the artistic considerations necessary to produce and perform a solo recital (capstone project)

Music Minor

The Music Minor cultivates foundational knowledge in music theory, history, and literature, while affording students the opportunity to work with a world-class faculty in an array of applied and performance classes.

While many students pursue the Music Minor simply to continue a lifelong passion, others find it to be a great complement to their major course of study, especially when their desired career path intersects with music, or the arts in general (e.g. Music Business, Arts Administration, Music Therapy, or Digital Music).

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Upon completion of this program, students will demonstrate:

- a thorough understanding of the basic elements related to music theory: rhythm, melody, and harmony.
- an understanding of musical forms, processes, and structures; and the ability to employ this understanding in written and verbal analyses.
- proficiency in the basic areas of musicianship: keyboard, aural skills, and sight-singing.
- a basic knowledge of music history resulting, in part, from score analysis, dedicated listening, and concert attendance.
- the ability to apply critical thinking towards music and its contextualization.
- the technical skills requisite for artistic self-expression.
- the knowledge and skills necessary to work collaboratively as part of a musical ensemble.
- the development of metacognitive skills.
- a working knowledge of the artistic considerations necessary to produce and perform a solo recital (capstone project)

Music with a Concentration in Liturgical Music (BA)

As of Fall 2026, this program is no longer accepting applicants.

A Major in Music with a concentration in Liturgical Music prepares students to work as church music directors. This concentration provides students the experience of working with pastors, choirs and congregations, building their skills and talents as future musicians and directors.

Conducting a choir or a congregation requires verbal and non-verbal communication skills, musical and liturgical knowledge, and a generosity of spirit—things that aid in leading and engaging others in worship. This major, while concentrating in the Roman Catholic tradition, will also prepare students for work in other Christian denominations, mainline Protestant and Orthodox, as they will study these different liturgical traditions, as well as their works of sacred music.

Building upon the solid curricular foundation already established in the Music program, this new major combines the study of sacred text and song, imagery, melody and rhythm. It is inherently a portrayal of interdisciplinary drawing from both the disciplines of theology and music.

Music with a Concentration in Vocal Performance (BA)

As of Fall 2026, this program is no longer accepting applicants.

Loyola's Vocal Performance Concentration offers a program that emphasizes rigorous, conservatory-level study in a liberal arts setting. The curriculum is designed to support the artistry, citizenship, and intellect of the singer, as well as pedagogy, performance, and collaborative ensemble singing. Extraordinary singing is nurtured at every stage, as well as care of the whole person within the liberal arts environment.

In addition to the core music major requirements, students study diction, vocal repertoire, vocal pedagogy, vocal coaching, and ensemble singing. Students may also participate as soloists in oratorios, musicals, and opera scenes, as well as other performance opportunities. All Vocal Performance students are also required to give a full recital their senior year.

Recent performances include Mozart's Requiem, Orff's Carmina Burana, Faure's Requiem, Schubert's Mass in G, Robert Ray's Gospel Mass, Opera Scenes, and James Whitbourn's Annelies, which was performed with the Grammy-nominated Lincoln Trio. Additionally, the choirs participate in the annual holiday Lessons and Carols and JOYOLA, which collectively draw over 1200 people each year.

With a firm dedication to supporting social justice issues through the arts, Loyola's vocal students often engage in programming that highlights issues of our time. The choirs are frequent collaborators with the Institute of Environmental Sustainability, having performed regularly at the Climate Change Conference. Other projects have included a Black History Month program, Holocaust remembrance programming, outreach to the homeless, frequent collaborations with Misericordia, and the annual Women's Collegiate Choral Festival, celebrating women in the field of choral music.

In addition to supporting an outstanding faculty, Loyola also welcomes frequent guest artists. Recent guests have included Craig Terry (Lyric Opera), Richard Boldrey (Northwestern University), Rebecca Schorsch (Roosevelt University), Anne Harley (Scripps College), Shannon McGinnis (Collaborative Arts Institute), as well as area professional ensembles such as Bella Voce and William Ferris Chorale.

The Vocal Performance Concentration allows for the flexibility needed for students to pursue their love of singing, while simultaneously receiving a solid liberal arts education. Loyola music majors have gone on to become skilled educators, performers, arts administrators, music therapists, scholars, and most importantly, well-rounded young professionals.

For more information about the Vocal Performance Concentration please contact Kirsten Hedegaard at khedegaard@luc.edu.

Transfer-Student Residency Requirement

At least 11 hours of MTHE-MINR must be completed at Loyola.

Double-Dipping Policy

This department observes the CAS Double-Dipping Policy regarding unique credits received for each declared major/minor. Additional information about the policy may be found here (https://www.luc.edu/cas/double-dippingpolicy/).

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Students completing the Minor in Musical Theatre will:

- Create convincing characters and perform clear, active objectives
- Expand repertoire by performing pieces from a wide range of genres and eras
- Acquire proper dance technique with opportunities to train in ballet, modern, and jazz
- Demonstrate proper vocal technique and a deep understanding of musicality, rhythm, and written music

Photography and Video Art (BA)

As of Fall 2026, this program is no longer accepting applicants. Please refer to the majors listed below under "Related Programs," which will continue to be offered at the university.

Photography has played a major role in the production of images in visual culture since its invention in the first half of the 19th century. The program at Loyola University is focused on photography as an artistic discipline that has developed a rich history over the last century and a half, and which continues to evolve with recent innovations in technology. The curriculum guides students in learning the technical foundations, aesthetic strategies and conceptual approaches, and the cultural/historical perspectives of the medium. Through the program, students build their ability to pursue photography as a means of creative exploration and intellectual investigation.

The curriculum builds a foundation that enables students to pursue a broad range of career paths. It provides an experience that prepares students to apply to graduate programs and pursue a career in contemporary art as an artist or a curator. It develops techniques for students who are interested the commercial applications of the medium (editorial fashion/architecture/product photography). Finally, as a program that emphasizes the ability to create and analyze images, the curriculum offers skills that are relevant to numerous fields beyond photography that rely on conceptual thinking and communication through visual means (architecture, design, advertising, illustration, photo journalism, media studies, and visual anthropology).

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Employ visual and scholarly research in developing concepts that underlie artistic projects
- Effectively communicate artistic intent through visual, written, and oral forms
- Develop cohesive bodies of work for public presentations and build portfolios to pursue professional opportunities
- Understand the role of artmaking in human creativity within a global historical context
- Differentiate between artistic styles and the multiplicity of populations and communities from which works have been made (and are made)
- Engage in critical discussion with a depth of analysis and appreciation for aesthetic and conceptual diversity

Photography and Video Art Minor

As of Fall 2026, this minor is no longer accepting students. Please refer to the majors and minors listed below under "Related Programs," which will continue to be offered at the university.

The Photography and Video Art minor is often added as a secondary focus of study in order to complement or enhance a student's major or chosen career path. Students may also choose to add the minor in order to pursue an area of interest without the responsibility of a major.

The minor embodies many of the key historical, critical, theoretical, methodological and contextual elements embedded within the more comprehensive framework of the major (p. 445).

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Upon completion of this program, students will be able to:

- Apply a range of materials, processes and techniques within their chosen concentration as a primary form of artistic expression
- Analyze interpret and comprehend the elements that constitute a work of art (visual, functional, psychological, and social)
- Engage in self-directed problem solving analysis and critical thinking, and take creative and intellectual risks in the production of original artwork
- Employ scholarly and visual research in developing concepts, principles, and theories that underlie their artistic intentions, and effectively communicate them orally and in written form.

Sculpture and Ceramics (BA)

As of Fall 2026, this program is no longer accepting applicants. Please refer to the majors listed below under "Related Programs," which will continue to be offered at the university.

The Sculpture & Ceramics Major at Loyola University Chicago explores the interplay between Art, Craft & Design, and reflects on the vital contribution that three dimensional art forms make to material culture. Enhanced by a long history and a diversity of contemporary practice, the curriculum offers courses in 3D Design, Ceramics, Sculpture and Jewelry which investigate a variety of perspectives and approaches (conceptual, theoretical and empirical). The program is housed in the Ralph Arnold Fine Arts Annex at the Lakeshore Campus which feature studio spaces for 3D Design, Sculpture, Ceramics, & Jewelry.

The major provides opportunity to develop unique capabilities which can be applied to a broad range of career paths. Students gain entry to higher education, or they can focus strategically on building a distinctive life in the visual arts though specialized production, promotion and collaboration. Many skills are transferrable for students interested in a career in the applied arts (interior architecture/product design/ advertising & PR/theater & film/museums & galleries - exhibition design and production, props, sets, special effects etc.).

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Upon completion of this program, students will be able to:

- Apply a range of materials, processes and techniques within their chosen concentration as a primary form of artistic expression
- Analyze interpret and comprehend the elements that constitute a work of art (visual, functional, psychological, and social)
- Engage in self-directed problem solving analysis and critical thinking, and take creative and intellectual risks in the production of original artwork
- Employ scholarly and visual research in developing concepts, principles, and theories that underlie their artistic intentions, and effectively communicate them orally and in written form

Shakespeare Studies Minor

As of Fall 2026, this minor is no longer accepting students.

The works of William Shakespeare are foundational for two disciplines that Loyola offers as majors, English and Theatre, and central to the liberal arts tradition that is at the core of the College of Arts and Sciences undergraduate experience.

The Shakespeare Studies Minor will provide Loyola undergraduates with the opportunity to pursue advanced study in an interdisciplinary (http://www.luc.edu/shakespeare/participatingdepartmentsandfaculty/) fashion. Drawing from six academic departments, Shakespeare is one of the primary filters through which we experience the classical and medieval worlds. He provides a crucible in which one can study Renaissance history, philosophy, arts and literature. His work has had had a profound impact on the Western intellectual tradition, wrestled with by figures as wide-ranging as Coleridge, Goethe, Nietzsche, Dickens, Melville, and Freud; and his plays have inspired innumerable appropriations and adaptations, in every conceivable form, from painting to opera, dance, film, and beyond. To encounter Shakespeare is to encounter as far as it possible through a single figure, the breadth and scope of history, art, culture, and philosophy, making his work an ideal focal point for interdisciplinary spirit.

Students who wish to minor in Shakespeare Studies should contact Lee Keenan (https://www.luc.edu/dfpa/facultyandstaffdirectory/leekeenanmfa.shtml/), the Director of Theatre.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Students completing the Shakespeare Studies Minor will:

- Engage in the practices of interdisciplinary study.
- Acquire substantial knowledge of the works of William Shakespeare and his contemporaries and the culture in which they lived.
- Master skills of research used to produce significant works of scholarship, preparing those who plan on pursuing academic graduate work for further study.
- Acquire skills and knowledge that will provide a foundation for those seeking to pursue a professional career in theatre.

Studio Arts (BA)

The Studio Arts major at Loyola University Chicago is focused on the subject as an artistic discipline with a rich global history, encompassing many diverse perspectives and approaches, which explores the relationship of traditional practices to recent advances in technology. The curriculum guides students in learning the technical foundations, aesthetic strategies and conceptual approaches, and the cultural / historical perspectives of the medium. Through the program, students build their ability to pursue Studio Arts as a means of creative exploration and intellectual investigation.

For students admitted before Fall 2026, this program was previously called Drawing, Painting, and Printmaking (BA). More information can be found here (p. 2662).

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Understand the place of artmaking in human creativity within a global historical context
- Differentiate between artistic styles, and the multiplicity of populations and communities from which works of have been made (and are made)
- Engage in critical discussion with a depth of analysis and appreciation for aesthetic and conceptual diversity

Studio Art Minor

The Studio Art minor is often added as a secondary focus of study in order to compliment or enhance a student's major or chosen career path. Students may also choose to add the minor in order to pursue an area of interest without the responsibility of a major.

Teaching Artist Minor

As of Fall 2026, this program is no longer accepting students.

The Teaching Artist Minor at Loyola University Chicago prepares artists to work as teaching artists in conjunction with certified public school teachers, arts organizations, and out-of-school programs. The minor is not a credentialing program. This minor focuses on experiential learning in local schools and arts organizations, preparing Loyola undergraduates to teach basic artistic skills to students from ages 7 to 70.

Learning Outcomes

Students completing the Teaching Artist Minor will:

- Employ fundamental knowledge of arts education, arts integration, and community-based arts to develop a course of study appropriate to specific institutions
- Apply pedagogy strategies that are developmentally appropriate
- Hold high expectations and build on the assets of diverse populations
- Utilize assessment strategies to measure learning effectiveness that are non-discriminatory
- Demonstrate effective classroom management

Theatre (BA)

Loyola University Chicago's Bachelor of Arts in Theatre strives to make the most out of a liberal arts education. By fostering work in performance, directing, design, technology, management, dramaturgy, and literature,

the theatre major prepares students to enter any aspect of the theatre industry.

Our approach to theatre is based in the Liberal Arts; by offering a BA rather than a BFA, we emphasize the importance of interdisciplinary study in the formation of adaptable, well rounded theatre artists. By nurturing and educating actors, directors, administrators, playwrights, designers, and technicians, we prepare theatre artists to enter any aspect of the industry.

Production of plays is integral to all of our academic work, and we offer many opportunities (https://www.luc.edu/theatre/opportunities/) for students to participate in our active production program as actors, directors, designers, dramaturges, and playwrights. We produce a season of faculty-directed (https://www.luc.edu/theatre/aboutus/facultyandproductionstaff/) plays and musicals, which often reflects the curricular and educational goals and mission of the department. The season is complimented by a diverse collection of student-generated work, ranging from funded research to experimental and staged readings.

We also take full advantage of our location right in the heart of Chicago's thriving theatre community. Our full time faculty of eight is comprised of professional actors, directors, dramaturges, and designers. Students are afforded chances to dabble in the professional world prior to graduation with the guidance and mentorship of their professors, as well as the multitude of internship and apprenticeship opportunities available at professional theatres around the city.

Loyola University Chicago is one of eight NAST-accredited (https://nast.arts-accredit.org/) institutions in Illinois (and the only one in the Chicago metropolitan area), as well as a member of the League of Chicago Theatres (https://chicagoplays.com/) and the Theatre Communications Group (https://circle.tcg.org/home/?ssopc=1).

Residency Requirement

Transfer students majoring in theatre are required to complete a minimum of 24 credit hours of theatre major requirements at Loyola.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Upon completion of the Theatre Major students will be able to demonstrate the variety of skills necessary for producing theatre; including collaboration, communication and hands-on skills through the completion of practicum courses.
- Upon completion of the Theatre Major students can construct and communicate nuanced, well-chosen, evidenced arguments in one or more ways as evidenced in a thesis-based essay, program note, dramaturgical research, artistic and/or creative reflections.
- Upon completion of the Theatre Major students can articulate connections between history/theory and theatrical practice as evidenced in a thesis-based essay or capstone Directing case book.
- Upon completion of the Theatre Major students can demonstrate ethical reasoning about theatre's impact on global communities through creation of works, analysis of works or acknowledgement of works.
- Upon completion of the Theatre Major students will be able to translate research and script analysis into a role via in-class scene work and/or production performance.
- Upon completion of the Theatre Major students will be able to contribute to a collaborative, creative ensemble via consistent participation and effective incorporation of feedback through in-class work and/or production.
- Upon completion of the Theatre Major students will be able to present creative and analytical ideas orally and visually while balancing self-expression and collaborative team dynamics.

Theatre Minor

The Minor in Theatre cultivates foundational knowledge in theatrical literature, performance, design, and technology, with room for at least three elective courses for advanced exploration or specific topics.

	Total Hours	**18**

Residency Requirement

Transfer students minoring in theatre are required to complete a minimum of 11 credit hours of theatre minor requirements at Loyola.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Students completing the Minor in Theatre will:

- Develop an understanding of dramatic and structural composition
- Demonstrate how set, costumes, and lighting are used as tools for expression

- Analyze a play with character in mind, develop relationships with fellow actors on stage, and play clear and effective character objectives
- Gain hands-on production experience

Visual Communication (BA)

The visual communication program in the Fine Arts Division at Loyola University Chicago prepares students to enter the workforce as design professionals, with graduates employed in graphic design studios, internal design teams, branding firms, cultural institutions, and other creative agencies. Students learn graphic design history, theory, and practice, in a rigorous program that covers the essentials needed by professionals. Graduates of the program have career opportunities in branding and corporate identity, advertising, web design, motion graphics, interface design, package design, mobile interactive design, digital product design, exhibit design, print and publication design, and more.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as

complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Upon completion of this program, students will be able to demonstrate:

- An understanding of the role of visual communication in the culture at large
- An understanding of and experience in the variety of forms of visual communication from print to digital media, mastering the basics of visual form, color, typography, photography, layout, and interactive media
- Technical skills used to produce visual communication digitally and by hand
- Knowledge of key historical periods in the history of graphic design
- Skills in critical thinking, written and oral communication, visual literacy, and the conceptualization of self-developed projects
- Readiness for a career through a capstone project, an internship experience, and the preparation of a portfolio and related professional documents

Visual Communication Minor

The Visual Communication minor is often added as a secondary focus of study in order to complement or enhance a student's major or chosen career path. Students may also choose to add the minor in order to pursue an area of interest without the responsibility of a major.

While the major (p. 458) is a comprehensive course of study, the minor in Visual Communication is intended to provide a breadth of knowledge. Visual Communication minors develop a base-level understanding of the field, including how to organize complex information in order to persuade, to entertain, and to educate a diverse audience.

Forensic Science

About Us

Forensic scientists analyze and evaluate evidence in criminal investigations. This evidence may include DNA from bodily fluids or other cells, drugs in different forms or in bodily fluids, firearms/weapons, and a variety of other types of evidence. A strong background in natural sciences, especially biology, chemistry or anthropology, allows the scientist to apply their knowledge to these analyses. The Forensic Science Program at Loyola University Chicago emphasizes natural science coursework and builds other necessary skills including critical thinking, ethics, strong analytical abilities, and written and oral communication.

Students pursuing the BS in Forensic Science (p. 462) at Loyola University Chicago benefit from expert faculty and state-of-the-art facilities, preparing them for careers in a variety of occupational settings. Apply today!

Program Mission Statement

Provide Loyola University Chicago students with a solid foundation in the natural sciences, educate students in a broad range of forensic analytical techniques from a generalist perspective, educate students in the various aspects of forensic science professional practice, emphasize the importance of critical thinking skills in approaching forensic science problems, and prepare students for entry level positions in forensic science laboratories and graduate or professional schools in the forensic sciences.

Advisory Board

In keeping with our mission, the Forensic Science Program has an advisory board made up of administrators from forensic laboratories. The relationships with these laboratories allows the Forensic Science Program to provide our graduates with the most relevant education, skills, and abilities to gain employment. Advisory Board members are regional and national leaders, active within their respective disciplines. Members are from the Illinois State Police Forensic Science Center at Chicago, Northeastern Illinois Regional Crime Laboratory, DuPage County Crime Laboratory, Idaho State Police, US Drug Enforcement Administration-North Central Regional Laboratory, US Internal Revenue Service-National Laboratory, US Food and Drug Administration-Forensic Chemistry Center, and United States Drug Testing Laboratories, Inc.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Forensic Science (FRSC)

FRSC 340 Introduction to Forensic Science (3 Credit Hours)
Pre-requisites: CJC 101; Restricted to Forensic Science majors
This course provides an overview of the basic principles and uses of forensic science within the field of criminal justice. The course is designed for forensic science majors emphasizing the scientific aspects in the forensic sciences.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will be able to identify the uses and limitations of the existing forensic science techniques used within the field of criminal justice

FRSC 341 Forensic Ethics and Professional Practice (3 Credit Hours)
Pre-requisites: FRSC 340; Restricted to Forensic Science majors
This course develops a basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought, and application of ethics to the field and professional practice of forensic science.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will demonstrate an understanding and application of ethics in the forensic sciences; Students will be able to articulate the role and challenges of ethical issues facing forensic science today and the applicability of ethics in the profession and their individual careers

FRSC 342 Expert Witness Testimony and Court Room Demeanor (3 Credit Hours)
Pre-requisites: FRSC 341; Restricted to Forensic Science majors
The goal for this course is to give you the information necessary to be an effective and ethical witness. This should help throughout your career and help make testimony not so much something to be feared as something which represents the culmination of your work in a case.
Interdisciplinary Option: Forensic Science
Outcomes:
Students should develop courtroom and expert witness testimony literacy, understanding of the dynamics during court, and appreciation of the impact to the judicial system

FRSC 343 Physical Organic Chemistry for Forensic Science (3 Credit Hours)
Pre-requisites: PHYS 112; MATH 132; CHEM 222 or (CHEM 224 and CHEM 226) or (CHEM 240, CHEM 241, CHEM 260, and CHEM 272); Restricted to Forensic Science majors
An introduction to the foundational principles of physical and physical organic chemistry. The course focuses on the application of these principles to solving problems in forensic science. The numerous aspects of forensic science require a working knowledge of physical chemistry, the foundational principles, and the interrelation of cause and effect.
Outcomes:
Understand the basic concepts of physical and physical organic chemistry; Acquire and interpret data and form conclusions; Use critical thinking skills in problem solving

FRSC 350 Pattern Evidence I (3 Credit Hours)
Pre-requisites: FRSC 341; Restricted to Forensic Science majors
This course introduces the basic principles and methods of forensic pattern evidence: latent fingerprints, firearms and tool marks, and question documents.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will demonstrate an understanding of the three (3) forensic pattern evidence areas; Students will develop techniques, work on non-probative cases, and write formal reports of findings

FRSC 350L Pattern Evidence Lab I (1 Credit Hour)
Pre-requisites: FRSC 350 (may also be taken as a Corequisite); Restricted to Forensic Science majors
This course introduces the basic laboratory methods of forensic pattern evidence: latent prints, firearms and tool marks, and questioned documents.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will demonstrate a basic competency through development of various techniques; Students will work non-probative cases, along with written formal reports of their findings

FRSC 360 Forensic Drug Chemistry I (3 Credit Hours)
Pre-requisites: (CHEM 212, CHEM 214, CHEM 224, and CHEM 226) or (CHEM 241, CHEM 272, and CHEM 280); Restricted to Forensic Science majors
Co-requisites: FRSC 360L
This course provides an introduction to the basic principles of forensic drug analysis. The use of microscopic, chemical, and chromatographic techniques to gather data, interpret results, and form conclusions are developed. Recognizing the strengths and weaknesses in the techniques used and the correct interpretation of results is stressed.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will be able to discuss techniques, skills, advances, and limitations of the modern forensic laboratory; Students will be able to summarize basic concepts of forensic drug analysis, testing, and formal reporting

FRSC 360L Forensic Drug Chemistry Laboratory I (2 Credit Hours)
Pre-requisites: (CHEM 212, CHEM 214, CHEM 224, and CHEM 226) or (CHEM 241, CHEM 272, and CHEM 280); Restricted to Forensic Science majors
Co-requisites: FRSC 360
This course provides both basic and advanced foundations to the principles of forensic drug analysis. The use of basic and advanced analytical techniques to gather data, interpret results, and form conclusions are developed. Additionally, national forensic laboratory operational standards and requirements are incorporated.
Interdisciplinary Option: Forensic Science
Outcomes:
The techniques, skills, advances, and limitations of the modern forensic laboratory will be discussed; The students will be able to demonstrate basic/advanced concepts of forensic drug analysis, testing, and formal reporting

FRSC 361 Forensic Toxicology I (3 Credit Hours)
Pre-requisites: FRSC 360 and FRSC 360L; Restricted to Forensic Science majors
Co-requisites: FRSC 361L
This course stresses the practical and theoretical aspects to forensic toxicology and the study of drugs and their implications in a forensic setting when toxicity sets in. The analysis and description of drugs are introduced. Case studies are reviewed where drug use may become a forensic matter.
Interdisciplinary Option: Forensic Science
Outcomes:
Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought, and application of ethics to the field of forensic toxicology

FRSC 361L Forensic Toxicology Laboratory I (1 Credit Hour)
Pre-requisites: FRSC 360 and FRSC 360L; Restricted to Forensic Science majors
Co-requisites: FRSC 361
This course stresses the practical and theoretical aspects to forensic toxicology and the study of drugs and their implications in a forensic setting when toxicity sets in. The analysis and description of drugs are introduced. Case studies are reviewed where drug use may become a forensic matter.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will be able to discuss techniques, skills, advances, and limitations of the modern forensic laboratory; Students will be able to summarize basic concepts of forensic drug analysis, testing, and formal reporting

FRSC 370 Forensic Biology (3 Credit Hours)
Pre-requisites: FRSC 341, BIOL 102, BIOL 112; Restricted to Forensic Science majors
Co-requisites: FRSC 370L
This course stresses the practical and theoretical aspects to forensic biology. Forensic biology includes the examination, identification, and characterization of biological materials found on various types of evidence.
Interdisciplinary Option: Forensic Science
Outcomes:
Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought, and application of ethics to the field of forensic biology

FRSC 370L Forensic Biology Laboratory (1 Credit Hour)
Pre-requisites: FRSC 341, BIOL 102, and BIOL 112; Restricted to Forensic Science majors
Co-requisites: FRSC 370
This course stresses the practical and theoretical aspects to forensic biology. Forensic biology includes the examination, identification, and characterization of biological materials found on various types of evidence.
Interdisciplinary Option: Forensic Science
Outcomes:
Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought, and application of ethics to the field of forensic biology

FRSC 371 Forensic Molecular Biology Lecture and Laboratory (5 Credit Hours)
Pre-requisites: BIOL 282, BIOL 283, FRSC 342, FRSC 370, and FRSC 370L; Restricted to Forensic Science majors
This course prepares students to work in forensic DNA analysis. The lectures cover the basic aspects of DNA structure and function while the laboratory gives students experience with the techniques and instruments used in forensic DNA analysis.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will have a strong theoretical understanding of STR marker origin, population biology, and legal uses and will be able to isolate and process DNA for STR scoring

FRSC 390 Forensic Science Internship (1-4 Credit Hours)
Pre-requisites: FRSC 342; Restricted to Forensic Science majors
The purpose of this course is to enhance the student's development and learning through observational and participatory experience in forensic focused criminal justice agencies.
Interdisciplinary Option: Forensic Science
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-FRSC 390/ANTH 396A
Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific forensic focused criminal justice agency and be able to identify and describe the link between their field experience and prior courses

FRSC 392 Forensic Science Seminar (1 Credit Hour)
A weekly seminar course with presentations - generally given by outside speakers - covering topics in chemistry usually not encountered in the classroom.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will demonstrate their understanding by writing a one page summary of each presentation

FRSC 394 Forensic Science Research (1-4 Credit Hours)
Pre-requisites: Restricted to Forensic Science majors; Prior consultation with the instructor and a completed agreement form; Agreement forms for this directed study course are obtained from the program office, and the completed form (signed by the student, instructor, and program director) must be deposited in the program office before enrollment
This course gives undergraduate students an opportunity to participate in research in a selected area.
Interdisciplinary Option: Forensic Science
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will accomplish the research task defined in the contractual arrangement between the student and the instructor

FRSC 395 Special Topics in the Forensic Science (3 Credit Hours)
Pre-requisites: FRSC 341; Restricted to Forensic Science majors
Special topics courses provide students with an opportunity to examine various forensic science topics not normally offered as part of the Program's regular curriculum.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will be able to gain an understanding of new issues confronting the forensic sciences or an advanced understanding of traditional subjects covered in basic courses

Forensic Science (BS)

Loyola's strong reputation in the sciences, along with its successful track record in preparing students for the health professions, enables forensic science graduates to begin highly successful careers in this dynamic field.

The Program is fully accredited by The Forensic Education Programs Accreditation Commission (FEPAC). Learn more about FEPAC on their website. (https://www.fepac-edu.org/)

This major combines coursework from biology, chemistry, criminal justice, mathematics, physics, in addition to forensic science courses.

Program Content and Sensitive Topics

The Forensic Science Program curriculum, by its very nature, includes sensitive topics such as drug overdose, drug-facilitated sexual assault, sexual violence, domestic violence, postmortem forensic toxicology, homicides, and other violent crime. Our faculty endeavor to handle these topics with the appropriate respect, professionalism, gravity, and discretion. However, students should be aware that these and other topics involving criminal behavior are covered in numerous courses throughout the curriculum. Some courses also include in-depth discussion and case studies.

Related Programs

Major

- Biochemistry (BS) (p. 313)
- Criminal Justice and Criminology (BS) (p. 363)

Minor

- Criminal Justice and Criminology Minor (p. 365)

Curriculum

The forensic science major requires 84-88 credit hours of coursework. The curriculum delivers a broad knowledge base and covers the three major areas in forensic science laboratories: pattern, biology-DNA, and chemistry. Students in this program are required to include the following classes in their curriculum:

Code	Title	Hours
Laboratory Science Courses		
BIOL 101	General Biology I	3
BIOL 111	General Biology I Lab	1
BIOL 102	General Biology II	3
BIOL 112	General Biology II Lab	1
BIOL 282	Genetics	3
BIOL 283	Genetics Laboratory	1
BIOL 366L	Cell Physiology and Biochemistry Lab	3
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
CHEM 180	Chemical Reactivity I	3
CHEM 181	Chemical Reactivity I Lab	1
CHEM 240	Chemical Reactivity II	3
CHEM 241	Chemical Reactivity II Laboratory	1
CHEM 260	Quantitative Methods in Chemistry	3
CHEM 272	Analytical Chemistry Laboratory	2

CHEM 280	Environmental & Chemical Analysis	3

FRSC 360 & 360L	Forensic Drug Chemistry I and Forensic Drug Chemistry Laboratory I	5
FRSC 370 & 370L	Forensic Biology and Forensic Biology Laboratory	4
Forensic Capstone		
Select one of the following:		1-5
FRSC 361 & 361L	Forensic Toxicology I and Forensic Toxicology Laboratory I	
FRSC 371	Forensic Molecular Biology Lecture and Laboratory	
ANTH 396A	Internship: Bioarchaeology & Forensic Anthropology [1]	
Ancillary Courses		
MATH 131	Applied Calculus I	3
MATH 132	Applied Calculus II	3
STAT 335	Introduction to Biostatistics	3
Total Hours		**84-88**

[1] Requires ANTH 326 Human Osteology Lecture/Laboratory as a prerequisite

In addition to fulfilling major requirements to earn an undergraduate degree, students are required to complete Loyola's Core Curriculum (p. 989), which teaches them important skills and values. Students also develop their own interests by taking general electives.

Electives

Code	Title	Hours
Students in this program are encouraged, but not required, to select elective courses from the following list:		
ANTH 324	Human Evolution	3
ANTH 326	Human Osteology Lecture/Laboratory	4
ANTH 359	Paleopathology	3
BIOL 242	Anatomy and Physiology I	4
BIOL 243	Anatomy and Physiology II	4
BIOL 251	Cell Biology	3
BIOL 341	Histology Lecture/Laboratory	4
FRSC 390	Forensic Science Internship	3-4
FRSC 392	Forensic Science Seminar	1
FRSC 394	Forensic Science Research	1-4
FRSC 395	Special Topics in the Forensic Science	3
CJC 201	Theories of Criminal Behavior	3
CJC 202	Criminal Courts	3
CJC 203	Policing	3
CJC 322	Criminal Law	3
CJC 323	Criminal Procedure	3
CJC 371	Victimology	3

Suggested Sequence of Courses

Students **not** placing in MATH 118 Precalculus II or higher cannot start the Chemistry sequence until MATH 117 Precalculus I is completed with a grade of C- or better. Such students are advised to enroll in first-year Chemistry courses in the summer sessions (after meeting the math requirement) in order to complete the major in four years.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

[1] Scheduling of this course is flexible

[2] BIOL 366L, FRSC 390, and FRSC 394 satisfy the Engaged Learning requirements.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

The Forensic Science Program is dedicated to:

- Upon completion of the FRSC-BS degree, students will:
- 1. recognize and use foundational scientific principles in biology, chemistry, biochemistry, physics, and math
- 2. identify and explain foundational principles that guide the professional practice of forensic scientists in areas such as courtroom demeanor, ethics, evidence handling, and crime science investigations
- 3. Interpret, evaluate and solve problems related to pattern evidence, drug chemistry, and forensic biology using foundational scientific principles
- 4. develop laboratory skills and perform experiments as applied to independent forensic science projects in research and operational laboratories
- 5. analyze and design solutions to problems presented in a capstone experience in either forensic molecular biology (DNA), forensic toxicology, or anthropology
- 6. communicate technical and scientific topics to a variety of audiences in oral and written formats

Global Studies

About Us

The Global Studies Program serves students who wish to achieve a deeper understanding of other nations, cultures, and peoples in the modern world. Students majoring or minoring in Global Studies will explore general aspects of the international system from the perspectives of the academic departments represented in the program. Students will also examine the histories, cultures, and political systems of various regions of the world. To facilitate these studies, global studies majors and minors will develop a level of proficiency in a modern language beyond the general requirement of the College of Arts and Sciences.

The Global Studies Program prepares students for careers in an increasingly interdependent global environment. Professions that draw especially heavily on a background in global studies include those in business, communication, public service, education, journalism, law and social work. Completing a global studies major or minor also helps prepare students for graduate studies in global/international affairs.

Undergraduate Programs

- Global Studies (BA) (p. 466)
- Global Studies Minor (p. 472)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Global Studies (GLST)

GLST 101 Introduction to Global Studies (3 Credit Hours)
This course serves as an introduction to the interdisciplinary field of global studies. It provides an overview of the major disciplines represented in the program, introduces the main regions covered in the program, and discusses important global issues.
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, European Studies, Global Studies, Latin American Studies, Middle East and Islamic World Studies
Outcomes:
By analyzing various topics in global studies, students will gain an understanding of the different regions of the world and the ways that different disciplines contribute to this interdisciplinary field

GLST 301 Directed Readings in Global Studies (3 Credit Hours)
Pre-requisites: Course requires permission of instructor; GLST will enroll approved students directly (no self-enrollment or non-GLST advisors); Course is open only to junior and senior majors and minors
This directed readings course may be taken with permission of the director of the Global Studies Program for a course of study not otherwise offered at Loyola that is relevant to the Global Studies Program and addresses at least one of the program's learning outcomes. Students must arrange this course of study with a faculty mentor of their choosing and in conversation with the GLST director. The faculty mentor, who can come from any department or school at Loyola University Chicago, should send the syllabus to the director of the Global Studies Program for approval at least one month before the start of the term in which the student plans to undertake their course of study. Normally, students should complete a substantial research project or a paper of approximately 20,000 words (about forty double-spaced pages) that they work on over the course of the entire semester with their faculty mentor.
Interdisciplinary Option: Global Studies
Outcomes:
Students will 1) demonstrate progress in their research and writing skills; and 2) demonstrate advanced undergraduate knowledge of the issue or issues covered in the directed study course

GLST 302 States and Firms (3 Credit Hours)
This course focuses on the relationship between multinational corporations and the state. It explores the origin of firms, as well as issues such as corruption, tax policy, bailouts, and economic development. It also examines the development of private military contractors and their relationship to state security.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate understanding of the various relations between multinational corporations and states as well as private military contractors and states

GLST 303 Technological Change and Society (3 Credit Hours)
This course explores how changes in technology affect society in four broad areas: its impact on how we communicate, on the workplace, on regulatory issues surrounding technology firms, and on humanity itself.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate an understanding of the various relations between technology and society

GLST 304 Global Civil Society and Social Movements (3 Credit Hours)
This course focuses on global civil society groups (both advocacy groups or apolitical) and on social movements that seek to fight injustices. We discuss a variety of examples of civil society projects ranging from monitoring government corruption and promoting micro-credit to organizing transnational protest campaigns.
Interdisciplinary Option: Global Studies
Course equivalencies: X-GLST 304/SOCL 304
Outcomes:
Students will demonstrate a comprehension of the dynamics of global civil society and social movements, both for cases discussed in class and to material from outside class

GLST 305 Globalization and Environmental Sustainability (3 Credit Hours)
This course introduces students to social, political and economic factors that have contributed to globalization, development and their impact on the environment. It provides students with the background and conceptual tools to understand global environmental challenges and questions.
Interdisciplinary Option: Global Studies
Outcomes:
Students will develop a fundamental knowledge of the study of global development and environmental challenges and develop analytical skills to assess the tradeoffs involved in economic development and environmental sustainability

GLST 306 International Development (3 Credit Hours)
This course provides an interdisciplinary overview of the international development system and issues related to development in those countries variously referred to as third world, developing, underdeveloped, or peripheral countries.
Interdisciplinary Option: Global Studies
Course equivalencies: X-GLST 306/SOCL 306
Outcomes:
Students will be able to demonstrate a fundamental knowledge of the various factors that are considered to help or hinder development

GLST 309 The Global Economy (3 Credit Hours)
This course examines global economic relations with a focus on the movement of three items across borders: the movement of goods (trade), the movement of money (finance), and the movement of people (migration). The course aims not only to help students become more informed consumers of the news and events of the day, but also to enable them to critically evaluate and understand these events in their own terms.
Interdisciplinary Option: Global Studies
Course equivalencies: GLST 309 / PLSC 350
Outcomes:
Demonstrate an understanding of global trade, cross-border financial flows, and immigration as well as the political systems that help shape these transactions in at least two countries; Demonstrate an awareness of historical patterns concerning trade, global finance, and immigration and be able to apply knowledge of these historical patterns to current events and debates; Demonstrate the research skills necessary to gather, evaluate, and synthesize information from multiple sources to support an argument about an issue related to global trade, finance, or immigration

GLST 370 Internship in Global Studies (3-6 Credit Hours)
Pre-requisites: Open to all GLST major and minors but requires instructor permission to enroll
Students enrolled in this course must secure an internship relevant to the field of global studies. Students not only engage in regular workplace activities but also attend class meetings, complete writing assignments reflecting on their internship placements, write a final paper, and submit a final evaluation from their workplace supervisor.
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, European Studies, Global Studies, Latin American Studies, Middle East and Islamic World Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate awareness of at least one important global concern or issue as addressed in the internship

GLST 398 Topics in Global Studies (3 Credit Hours)
This is a variable topics course. Specific topics vary from semester to semester.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate knowledge of a unique topic in the interdisciplinary field of Global Studies

Global Studies (BA)

The BA in Global Studies (GLST) gives students the opportunity to examine global issues from the perspective of several academic disciplines in the humanities and social sciences. While developing an individual program, a global studies student may choose from a very wide range of courses drawn from units across the university.

Related Programs

Major

- Political Science (BA) (p. 619)

Master's

- Global Strategic Communication (MS) (p. 1306)
- Language, Culture, and Curriculum (MEd) (p. 1695)

Minor

- Global Studies Minor (p. 472)

Curriculum

The curriculum leading to a BA in Global Studies consists of thirty-three semester hours of coursework (eleven courses) and the fulfillment of an intermediate-level foreign language proficiency requirement. Courses completed to satisfy the language requirement do not count toward the thirty-three semester hours of coursework.

The College of Arts and Sciences requires that a minimum of twenty-one credit hours (seven courses) of any major, including the Global Studies Major, be unique to that major and hence may not count toward any other major or minor. The Global Studies Program allows up to nine credit hours (three courses) to fulfill the requirements of the Global Studies Major and any other individual major or minor. Therefore, students may count up to four classes total toward the BA in Global Studies and all other declared majors/minors.

The Global Studies Major requires students to complete the following core courses in addition to their Global Studies elective courses.

Code	Title	Hours
GLST 101	Introduction to Global Studies	3
ANTH 100	Globalization and Local Cultures	3
PLSC 102	International Relations in an Age of Globalization	3
Select at least two of the below 300-level courses. You may take up to four additional GLST 300-level courses as electives. Hence, up to six courses total from the below list can count for the Global Studies Major.		6
GLST 301	Directed Readings in Global Studies	
GLST 302	States and Firms	
GLST 303	Technological Change and Society	
GLST 304	Global Civil Society and Social Movements	
GLST 305	Globalization and Environmental Sustainability	
GLST 306	International Development	
GLST 309	The Global Economy	
GLST 370	Internship in Global Studies	
GLST 398	Topics in Global Studies	
GLST Elective Courses (p. 466)		18
Total Hours		**33**

Elective Courses

Majors have five required courses (ANTH 100, GLST 101, PLSC 102, and two 300-level GLST courses) and six electives of their choosing. In addition to the 300-level GLST courses listed above, numerous courses based in departments and schools across the university are tagged with the Global Studies Program and may count as electives in the Global Studies Major. Please consult LOCUS using the interdisciplinary search option in the “Undergraduate CORE/Interdisciplinary” drop-down menu or the semester-specific listing on the Global Studies website to see which electives are being offered in a given semester.

Global Studies majors must take elective courses in the major from at least two units (school, department, or program). Courses taken abroad may be substituted for LUC Global Studies courses only if they are pre-approved as GLST major electives by the director of Global Studies.

Many departmentally-based courses tagged with the Global Studies Program are not offered very often. If you want to know when a particular tagged course is going to be offered next, please check with the course's home department. The Global Studies Program does not control the scheduling of tagged elective courses.

Global Studies focuses on the world outside of the United States since around 1850 CE. Some LUC courses relevant to the geographic and thematic areas of focus named below may not appear on our lists, especially if they are "topics" courses. Please check with the director of the Global Studies Program if you have any questions about a course not listed below that you would like to count toward your Global Studies major.

Geographic and Thematic Areas of Concentration in the Global Studies Major

Students majoring in Global Studies are not required to choose an area of concentration but are encouraged to do so. Students may, for example, focus four or more of their major elective courses on one world area, preferably in alignment with their modern foreign language studies:

Africa, Asia, Europe, Latin America, or the Middle East. Alternatively, students may choose to complete a cluster of four or more courses from the thematic areas listed below or create their own thematic area in consultation with the program director. Relevant courses taken abroad may also count toward a given thematic area.

Africa

Code	Title	Hours
AFR 201	African Studies and the African Diaspora	3
ANTH 213	Culture in Africa	3

Portfolio Requirement

All graduating global studies majors must submit during their final semester a portfolio. These portfolios are not graded at the level of the individual student but are used instead as part of an annual assessment of the program. Graduating students will receive an email about two months prior to graduation requesting the portfolio and detailing what students should include in it. Students are required to submit the following:

1. a personal statement (300-500 words) describing the most important knowledge and skills gained as a global studies major as well as the courses and experiences you have found most helpful;
2. the inclusion of a statement (300-500 words) on the strengths and weaknesses of the Global Studies Program itself as you see it as well as any recommendations you would like to see made to the program; and
3. depending on the year, we might request copies of essays completed for a Global Studies course, a short response to an essay prompt, or a similar kind of product. The details of what is needed will be communicated in the email sent prior to graduation.

December graduates must submit their portfolios by December 10th of their final semester; May graduates must submit their portfolios by April 30th of their final semester. Please note that portfolio submission prior to graduation is a requirement that is separate from all other Global Studies Major requirements.

Language Requirement

The language requirement for the major in global studies may be satisfied in any of the following ways:

- Successful completion with a grade of "C" or better of a 104-level or higher course in one of the accepted modern, foreign languages offered by the Department of Modern Languages and Literatures.
- Completion of a language proficiency examination or the equivalent, administered by the Department of Modern Languages and Literatures, demonstrating proficiency at the 104 level or higher of a modern, foreign language. Please email CASLanguageTesting@luc.edu for information about language proficiency testing.
- Determination by the director of the Global Studies Program, in consultation with appropriate specialists, that a student has at least a 104-level reading and writing proficiency in a language that is not taught or tested at Loyola.

Please note that English, American Sign Language, computer languages, and other US-based languages do not satisfy this requirement.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Upon completion of the program, global studies majors will be able to do the following:

- Describe causes of or potential solutions to different contemporary global problems
- Synthesize geographical, cultural, or historical information from one or more world regions to support evidence-based arguments in global studies
- Analyze different modern political systems outside of North America
- Assess the significance and effectiveness of different international/global organizations

Global Studies Minor

The minor in Global Studies benefits students who want to engage in a focused program of coursework in the study of Global Studies, but are unable to complete the Global Studies major.

Related Programs

Major

- Global Studies (BA) (p. 466)
- Political Science (BA) (p. 619)

Master's

- Language, Culture, and Curriculum (MEd) (p. 1695)

Curriculum

The curriculum leading to a minor in Global Studies consists of eighteen semester hours of coursework (six courses) and the fulfillment of a language proficiency requirement. Courses completed to satisfy the language requirement do not count toward the eighteen semester hours of coursework.

Of the eighteen hours of coursework leading to a minor in Global Studies, students must successfully complete the following:

Code	Title	Hours
Minor Requirements		
GLST 101		3
Select at least two of the below courses. Students may take up to two additional courses from the below list as program electives (so, up to a total of four GLST 300-level courses).		6
GLST 301	Directed Readings in Global Studies	
GLST 302	States and Firms	
GLST 303	Technological Change and Society	
GLST 304	Global Civil Society and Social Movements	
GLST 305	Globalization and Environmental Sustainability	
GLST 306	International Development	
GLST 309	The Global Economy	
GLST 370	Internship in Global Studies	
GLST 398	Topics in Global Studies	
Three total electives, including at least one general (not area specific) courses focusing on various aspects of global studies. Electives must be taken from at least two units in total (that is, two departments or program).		9
Total Hours		**18**

A maximum of three courses may count toward the Global Studies Minor and another major or minor. No more than four courses total may count for the Global Studies Minor and all other declared majors/minors.

Numerous courses based in departments and schools across the university are tagged with the Global Studies Program and may count as electives in the Global Studies Minor. These are listed below. However, many of these courses are not offered very often. If you want to know when a particular tagged course is going to be offered next, you must check with the course's home department. The Global Studies Program does not control the scheduling of tagged elective courses.

Global Studies focuses on the world outside of the United States since around 1850 CE. Some LUC courses relevant to the geographic and thematic areas of focus named below may not appear on our lists, especially if they are "topics" courses. Please check with the director of the Global Studies Program if you have any questions about a course

not listed below that you would like to count toward your Global Studies major.

Language Requirement

The language requirement for the minor in global studies may be satisfied in any of the following ways:

- Successful completion with a grade of "C" or better of three or more years of high school instruction in the same modern foreign language.
- Successful completion with a grade of "C" or better of a 103-level or higher course in one of the accepted languages offered by the Department of Modern Languages and Literatures.
- Completion of a language proficiency examination or the equivalent, administered by the Department of Modern Languages and Literatures, demonstrating proficiency at the 103 level or higher. Please email CASLanguageTesting@luc.edu for information about language proficiency exams.
- Determination by the director of the Global Studies Program, in consultation with appropriate specialists, that a student has at least a 103-level reading and writing proficiency in a language that is not taught or tested at Loyola.

Please note that English, American Sign Language, computer languages, and other US-based languages do not satisfy this requirement.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Fulfillment of the required language proficiency is not included below as those courses do not count toward the credit hours of the minor. Courses must be taken or waived by placement examination before completion of the minor.

Declaring a Minor in Global Studies

Please use LOCUS to declare a minor. We encourage you to also meet with the global studies director to discuss program requirements, career goals, and internship options.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Upon completion of the program, global studies minors will be able to do the following:

- Demonstrate an ability to describe and analyze some important contemporary global concerns (e.g., the environment, violence, human trafficking, poverty, child labor)
- Demonstrate geographical and historical knowledge of different world regions (Asia, Africa, South America, Europe, and the Middle East)
- Demonstrate an ability to describe and analyze important elements of some non-US cultures
- Demonstrate an ability to describe and analyze the modern political system of at least one country outside of North America

History

Overview

History Department faculty are engaged with wide-ranging fields of history across the globe, wrestling with the human past in all its complexity and contingency. Our curriculum is designed to develop a deep understanding of that past and to provide students with insight into the world in which they live through a perspective of change over time. History courses include a consideration of ideas and value systems in the past, enhancing students' understanding of both their own and other cultures in the present. At the same time, our curriculum teaches historical writing, analysis, and research as vital skills, and it fosters an appreciation of historical prose as a distinctive form of literature.

A History major prepares students to be critical thinkers ready for a wide range of careers and graduate programs. History majors thrive in careers in law, education, business, government, academia, and other fields that value the ability to ask broad questions, research specific answers, and craft compelling narratives.

Undergraduate Programs

- History (BA) (p. 492)
- History Minor (p. 496)
- Honors in History (p. 497)

History Department Policies

Double Dipping Policy

The History Department's policy on 'double dipping', or having courses count toward more than one major or minor, is below; it is consistent with the general policy of the College of Arts and Sciences.

1. Students may not major and minor in the same discipline.
2. Majors: Not less than 21 credit hours in the individual student's transcript must be unique to each major; that is, the courses in question are considered as actually fulfilling requirements of one major, not of more than one major.
3. Minors and interdisciplinary minors: not less than 8 credit hours in the individual student's transcript must be unique to each minor; that is, the courses in question are considered as actually fulfilling requirements of one minor, not of more than one minor or major.
4. General exceptions to Rules 2 and 3 will be made if approved by the chairs/directors of the department(s)/program(s) housing each affected major and minor. A list of standing general exceptions will be maintained by the Dean's office.
5. Individual student exceptions may be made in appropriate cases by department chairs and program directors.
6. Departments and Programs may enforce stricter double-dipping policies than those stated above, which also should be provided to the Dean's Office.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

History (HIST)

HIST 101 Culture, Power and Identity: Western Ideas & Institutions to 17th Century (3 Credit Hours)
This course traces the early development of Western ideas and institutions from the ancient Near East; Greece and Rome; the medieval civilization(s); to the European Renaissance and Reformation.
Knowledge Area: Foundational Historical Knowledge
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-HIST101/CATH101/ACHIS101
Outcomes:
Students will gain an understanding of history as a discipline; be able to place Judaism, Christianity, and Islam in historical context; explain the expansion of the West; and develop their critical thinking and communications skills

HIST 102 Culture, Power and Identity: Western Ideas & Institutions from 17th Century (3 Credit Hours)
This course traces the development of Western ideas and institutions and their global impact from the seventeenth century to the present.
Knowledge Area: Foundational Historical Knowledge
Interdisciplinary Option: European Studies
Course equivalencies: ACHIS 102 / HIST 102
Outcomes:
Students will gain an understanding of history as a discipline, develop critical thinking skills based on historical knowledge about the key people, places, and events that shaped the modern world, and hone their communication skills

HIST 103 American Pluralism (3 Credit Hours)
This course is an introduction to the origins, development and structure of the United States as a pluralistic and multiracial society from 1609 to the present.
Knowledge Area: Foundational Historical Knowledge
Outcomes:
Students will gain an understanding of history as a discipline, demonstrate historical knowledge, draw links between the American experience and national identities, and develop critical thinking and communication skills

HIST 104 Global History Since 1500 (3 Credit Hours)
This course deals with the emergence of the modern world, including such topics as the expansion and intensification of cross-cultural interaction; imperialism, colonialism, and nationalism; the spread of information; capitalism, industrialism, and popular sovereignty; race and ethnicity, gender, and socio-economic status.
Knowledge Area: Foundational Historical Knowledge
Interdisciplinary Option: Global Studies
Course equivalencies: HIST / ACHIS 104
Outcomes:
Students will gain an understanding of history as a discipline; Evaluate and explain the forces of historical continuity and change; Demonstrate how the encounters/changes between and among societies produced the world we have today; Analyze and discuss the significance of primary and secondary sources and how they relate to the history under discussion

HIST 205 Modern Western Civilization: Social Sciences in Context (3 Credit Hours)
An introduction to history as a discipline and an analysis of the history of Western civilization since the 17th century that emphasizes the contexts from which emerged the concepts of the social sciences and their related value systems.

HIST 208 East Asian History: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the roles and contributions of China, Japan, and Korea from the sixteenth century to the present tracing such themes as nationalism, capitalism, socialism, imperialism, war, peace, race, and gender struggles.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: X-HIST108/ASIA108/INTS108
Outcomes:
Students will demonstrate an ability to evaluate and explain the forces of historical continuity and change; understand the relationships among historical events, cultures and social forces; analyze and discuss the significance of primary and secondary sources

HIST 208X Pre-Modern Chinese History (3 Credit Hours)
This course starts with the formative periods of Chinese civilization from the Neolithic era and ends with the Opium War and the collapse of the Manchu Qing Empire in 1911. This course will provide students with an understanding of modern-day China by looking at China's dynamic and multilayered past.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-HIST342A/ASIA342A
Outcomes:
Students will learn to: situate major historical events in China's early history in their proper geographical, chronological, and thematic context; and use primary and secondary sources to construct interpretations of historical problems and events

HIST 208Z Modern Chinese History (3 Credit Hours)
The course is specifically designed for foreign students studying in Beijing with the objective of enabling them to understand the ongoing social, economic and political trends which have roots in the past. The time period studied will span from the end of the 19th century through the 20th century.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-HIST346A/ASIA346A/INTS346A
Outcomes:
students will learn to situate major historical events such as the May Fourth Movement in their proper geographical, chronological, and thematic context; and recognize the extent to which history is at the core of current Chinese leaders' speeches, policy making, and rule making

HIST 209 Islamic History: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
The course will introduce the historical development of Islamic civilization and the formation of Muslim social and political institutions from the 7th century to the present.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Arabic Language and Culture, Asian Studies, Global Studies, Islamic World Studies
Course equivalencies: HIST/ASIA/IWS/INTS109/AFR111
Outcomes:
Students will be able to demonstrate knowledge of the historical development and diversity of Islamic beliefs, practices, and institutions in varied regional contexts and historical periods

HIST 210 Latin American History: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the formation of modern Latin America by examining the region as a global nexus where ideologies, cultures, peoples, and political entities have conjoined and clashed from the fifteenth century to the present. Demonstrate and understanding of the relationships among historical events, culture and social forces. Differentiate between students' values and ways of understanding the world & those of other cultures.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Latin American Studies
Outcomes:
Demonstrate and ability to evaluate and explain forces of historical continuity and change; Demonstrate and understanding of the relationships among historical events, culture and social forces; Differentiate between students' values and ways of understanding the world & those of other cultures

HIST 211 US History to 1865: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to the history of the United States from the colonial era through the Civil War.
Knowledge Area: Tier 2 Historical Knowledge
Course equivalencies: HIST201/HIST111/ACHIS201
Outcomes:
Students will demonstrate an understanding of Native American societies, the impact of European colonization, the creation and evolution of democratic institutions in a multicultural society, the geographic expansion of the United States, and the impact of slavery

HIST 212 US History since 1865: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to the history of the United States from the Civil War to the present.
Knowledge Area: Tier 2 Historical Knowledge
Course equivalencies: HIST202/HIST112/ACHIS202
Outcomes:
Students will demonstrate an understanding of how the United States became a modern industrial society, the emergence and evolution of the modern welfare state, the rise of the United States as a global power, and the impact of controversies over civil rights and liberties on American society

HIST 213 African History: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course surveys the history of Africa from dynastic Egypt to post-colonialism. The primary focus of this class is to examine the interactions African peoples had with non-Africans from the 15th century to the present. Engage communication skills and sensitivities. Possess a heightened understanding of diversity in the world.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Middle East and Islamic World Studies
Outcomes:
Engage in critical thinking skills and disposition; Engage communication skills and sensitivities; Possess a heightened understanding of diversity in the world

HIST 253A Barbarians and the Fall of the Roman Empire (3 Credit Hours)
This course examines the interaction between Romans and the so-called 'barbarians' such as the Goths, Huns, Slavs, and Arabs from the 2nd to the 7th centuries, with a focus on how new archaeological and skeletal data is changing our understanding of the barbarians.
Interdisciplinary Option: European Studies, Italian Studies, Medieval Studies
Outcomes:
Students will study the role of neighboring peoples in the collapse of the Roman Empire; interpret archaeological data; compare receptions of immigrants and refugees in the ancient and modern world

HIST 254A The Vikings (3 Credit Hours)
The Vikings are popularly thought of as invaders, marauders, destroyers of civilized peace. However, recent research has focused on their society, culture, accomplishments and contributions in a much more positive sense.
Interdisciplinary Option: European Studies, Medieval Studies
Course equivalencies: X-HIST334/MSTU326
Outcomes:
Students will gain an understanding of the impact of the Vikings on European development; a knowledge of historiographical issues concerning the Vikings; and awareness of various types of primary sources

HIST 257A Witchcraft and Science in Pre-Modern Europe (3 Credit Hours)
This course will trace the history of medieval and early modern ideas about nature, magic, demonology, and witchcraft, exploring the history of reason and rationality, elite and popular culture, persecution and society, and the intersections between Magic, Science, and Witchcraft.
Interdisciplinary Option: European Studies, Medieval Studies
Outcomes:
Students will understand connections between witchcraft and popular religions; the gendering of witches; the political and economic aspects of witch trials; and modern portrayals of witches in popular media

HIST 258A Blood, Heresy, and Treason: The Tudors and Stuarts (3 Credit Hours)
This course covers the most crucial period in the history of England, encompassing the Reformation, The Tudors, the Civil War, the Glorious Revolution, and the rise of Britain as a great power. Major figures featured include Richard III, Henry VIII, Thomas More, Elizabeth I, Shakespeare, Oliver Cromwell, and Charles II. Students will confront developments significant not just for the British Isles, but across the globe for centuries. Students will hone their critical thinking skills through the analysis of historical evidence.
Interdisciplinary Option: European Studies

HIST 265A The First World War (3 Credit Hours)
World War I is arguably the greatest watershed separating us from our pre-modern past. This course proposes to explore the causes, campaigns consequences, and cultural legacies of the war. Students will be required to read eyewitness accounts and memoirs, and view films that assess the war's impact on world civilization. Students will learn about the First World War by engaging with primary accounts by combatants and non-combatants. Students will hone their critical thinking skills through the analysis of historical evidence.
Interdisciplinary Option: European Studies

HIST 267A Modern German Culture and Ideas I (3 Credit Hours)
This course will investigate intellectual and cultural responses to major events of nineteenth-century German history, including the Napoleonic Wars, the Restoration, the Revolution of 1848, the unification of Germany, the German Empire under Bismarck and Wilhelm II, and events leading to the First World War.
Interdisciplinary Option: European Studies, German Studies
Course equivalencies: X-HIST321A/INTS321A
Outcomes:
The student will be able to connect German cultural life to political and social developments, and be able to identify intellectual currents such as Romantic Germany, Idealist Germany, and Dionysian Germany

HIST 267B Modern German Culture and Ideas II (3 Credit Hours)
This course will cover the major phases of modern German history: Wilhelmine Germany, Volkish Germany, Germany in the First World War, Weimar Germany, National Socialist Germany, Germany in the Second World War, Post-War West Germany, East Germany, and Reunification. While setting forth the background of political and social developments, we will carefully consider responses to these issues by leaders in German intellectual and cultural life.
Interdisciplinary Option: European Studies, Global Studies, German Studies
Course equivalencies: X-HIST336/INTS336
Outcomes:
Students will apprehend the role of Germany in World War I; the turn to the Weimar Republic; the Rise and Fall of National Socialism; the emergence of two Germanies as a consequence of defeat in World War II; reunification in 1989; and cultural responses to these developments

HIST 275A The Silk Roads: Global Trade, Culture, & Politics (3 Credit Hours)
The course will cover: exchanges between nomad and sedentary populations in East Asia and the flourishing of information routes to modern day Mongolia, Afghanistan, India, Greece and Rome; interactions with European powers, concepts of colonialism, imperialism, and the emergence of 20th century world wars; contemporary geo-political challenges in the region.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Understand diversity in the World from a historical, political, and economic point of view; familiarize oneself with the relations between Asia and the West; highlight differences, similarities and reciprocal influences

HIST 279C History of Computing (3 Credit Hours)
This course will teach students about the history of computing from the development of number systems and arithmetic, through calculating and computing machines, to advanced communication technology via the Internet. The History of Computing will foster historical awareness about the ongoing relationships between social organization, intellectual climate, and technological innovation. Students will attain computer science literacy while studying core historical concepts. They will learn the background of the computing discipline, which plays a significant role in modern human experience.
Course equivalencies: X - COMP 111 / HIST 279C

HIST 279E Climate and History (3 Credit Hours)
Explores the role of climate in history, from the emergence of homo sapiens to recent anthropogenic climate change. Major topics include the social impact of climate variability, sources of resilience, origins of scientific knowledge, and the use of historical knowledge in the present.
Course equivalencies: X-HIST279E/ ENVS279
Outcomes:
Students will analyze examples of climate shaping history, learn different ways that scholars have treated this relationship, and reflect on how this knowledge might be useful today

HIST 280A Pirates and Sailors in the Revolutionary Atlantic (3 Credit Hours)
Moving beyond seafaring lore and legend, this course places the history of pirates and sailors in the context of "Atlantic history." Students will explore how organized conquests and trading ventures led to the formation of the first British empire and the expansion of commercial networks around the Atlantic and beyond.
Outcomes:
Course prepares students to confront the way political and economic power is exercised, justified, questioned, and resisted during periods of rapid, global capitalist expansion

HIST 290A History of Sexuality in the United States (3 Credit Hours)
This course provides a historical introduction to sexual behaviors and attitudes in the United States from the early American period to the present. The primary emphasis concerns the impact of social and political change on sexual norms and behavior.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST392/WOST/WSGS320
Outcomes:
The course enables students to comprehend the evolving boundaries of sexual behavior and the historical transformations of the family, sexuality, gender, and personal identity in the United States

HIST 291A American Icons: Heroes, Images, Ideas (3 Credit Hours)
We explore US history through Iconic photographs, movies, artworks and essays. For example, the film "To Kill a Mockingbird," allows us to delineate the image of race, class and family in the South during the Great Depression, even as the film opens up Hollywood's role in shaping popular ideologies. Learn about 20th-century US history, including the Great Depression, Civil Rights Movement, and Cold War; develop writing and discussion skills; learn about the relationship between history and memory.

HIST 297E North American Environmental History (3 Credit Hours)
This course surveys the environment and environmentalism in United States history, from the transformation of New England into a farm ecology, the expansion of the cotton South, the settlement of the West, to the rise of industrial cities, suburban sprawl, and the globalization of the economy.
Course equivalencies: X-ENVS297/HIST297E
Outcomes:
Students will be able to demonstrate historical knowledge of environmental thought and ecological science, to draw links between environmental concerns and public policies, and to develop critical thinking and communication skills

HIST 298A History and the Public: Intro to Public History (3 Credit Hours)
History and the Public explores the field of public history with special emphasis on the theory, methods, practice, ethics, and controversies faced when preserving or presenting history outside of a formal classroom environment.
Outcomes:
Appreciate how public historians shape public perceptions of the past and how public perceptions of the past shape public history; appreciate the diverse areas of historical practice; enhance teamwork skills

HIST 299 Historical Methods (3 Credit Hours)
Pre-requisites: 12 hours in HIST
This course studies the ways historians arrive at their interpretation of events. This is accomplished through a history of historical writing or through a special selected topic that illustrates the use of different methods by past and present historians. Students are expected to take this course after completing their four introductory courses for the major.
Outcomes:
students will understand that history is not a set of facts but a discipline that depends on competing paradigms and the ongoing interpretation of primary sources

HIST 300 Topics in History (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. They may be used, like all other 300-level courses, to fulfill the history major distribution requirements. The title of each Topics course, specifying date and/or area, will indicate which distribution requirement it fulfills within the history major. Students can take HIST 300 multiple times.

HIST 300A Topics (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course counts as a 300-level history elective. Students may repeat the course for credit when the topic changes.
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

HIST 300B Topics in Premodern History (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course may be used to fulfill the history major distribution requirement in 300-Level Pre-1700 European History or may count as a 300-Level history elective. Students may repeat the course for credit when the topic changes.
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

HIST 300C Topics in European History (Post-1700) (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course may be used to fulfill the history major distribution requirement in 300-Level Post-1700 European History or may count as a 300-Level history elective. Students may repeat the course for credit when the topic changes.
Interdisciplinary Option: European Studies
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

HIST 300D Topics in U.S. History (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course may be used to fulfill the history major distribution requirement in 300-level U.S. history or may count as a 300-level history elective. Students may repeat the course for credit when the topic changes.
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

HIST 300E Topics in World History (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course may be used to fulfill the history major distribution requirement for a 300-level course in the history of Africa, Asia, Latin America, or the Middle East or may count as a 300-level history elective. Students may repeat the course for credit when the topic changes.
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

HIST 301 Plagues: The Black Death and Other Pandemics (3 Credit Hours)
This course examines some of the worst pandemics ever to strike humanity, starting with the outbreaks of smallpox and bubonic in the final centuries of the Roman Empire, the devastating Black Death of the 14th century, and the diseases that destroyed the native Americans in the wake of Columbus's voyages.
Interdisciplinary Option: Bioethics
Course equivalencies: X-HIST301/ESP 304
Outcomes:
Students will gain an understanding of: the role of poverty, nutrition, and population in epidemics; state, church, or community responses to epidemics; how science has changed the history of disease

HIST 302 History of Western Education (3 Credit Hours)
History of Western Education. (ELPS 310)
Course equivalencies: X-ELPS301/HIST302

HIST 303 Pre-Industrial City in Europe (3 Credit Hours)
This course traces urban development from late antiquity to the early modern period.
Interdisciplinary Option: European Studies, Medieval Studies
Course equivalencies: X-HIST303/MSTU324
Outcomes:
Students will demonstrate an understanding of the origins and chronology of European town planning and development; and make comparisons with Islamic and Asian cities

HIST 307 Greece to Alexander the Great (3 Credit Hours)
This course explores ancient Greek history, society and culture, from the Bronze Age through the period of Classical Greece ending with Alexander and his empire.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST309/HIST307
Outcomes:
Students will be able to evaluate and interpret different types of sources critically and explain how these affect our understanding of the ancient Greeks

HIST 308A History of Rome to Constantine (3 Credit Hours)
This course surveys ancient Roman history, with a focus on Rome's conquest of the Mediterranean, the civil wars that ended the Roman Republic, the good and bad emperors of the Principate, and the conversion of Constantine to Christianity.
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: X-CLST308/HIST308/ROST308
Outcomes:
Students will understand the interrelationship among political, social, economic, and cultural developments and develop their research and writing skills

HIST 308B Pompeii and Herculaneum (3 Credit Hours)
The two best known Roman towns - Pompeii and Herculaneum - whose remains were preserved by the eruption of Mt. Vesuvius in 79 CE - will serve as a microcosm for understanding Roman society.
Interdisciplinary Option: European Studies, Italian Studies
Course equivalencies: HIST328/CLST328/ANTH328
Outcomes:
Students will gain an understanding of how recent archaeological discoveries have changed our view of Pompeii and Herculaneum and learn to "read" such things as dining and bathing rituals, gladiator games, and public and private architecture to gain insight into the structures of Roman social and cultural life

HIST 308C History of Early Christianity (3 Credit Hours)
This course examines the history of Christian communities and beliefs from their emergence in Jewish Palestine to the legalization of that religion in the Late Antique period. Students will gain familiarity with the diversity of early Christian belief, the interaction with the Roman imperial government, the evangelization and spread of Christianity both within the Roman Empire and outside it, the impact of Christianity on Roman social and family life, and the birth of monasticism.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-HIST309/CATH309
Outcomes:
Students will be able to evaluate the impact of discoveries such as the Dead Sea Scrolls and the Nag Hammadi library on the history of early Christianity; appreciate the extraordinary diversity of early Christianity; understand why Christianity was seen as a threat to Roman family life; improve their research, writing, and oral presentation skills; improve their critical reading skills of both secondary and primary sources

HIST 308D Transformations of Rome in Late Antiquity (3 Credit Hours)
This course focuses on the City of Rome itself from the third century up to the reign of Charlemagne. It demonstrates that this period was a time of gradual transformation and continuity. Both literary sources and the archaeology and epigraphy of the City shall be combined to show that barbarian invasions did not destroy the walls of Rome, and that the arrival of Christianity did not cause the fall of classical culture.
Interdisciplinary Option: European Studies, German Studies
Course equivalencies: HIST 339/CLST 318
Outcomes:
Students will be able to demonstrate an understanding of the working of historical mechanisms, evaluate and critically analyze this historical period

HIST 309 Shipwreck Archaeology (3 Credit Hours)
Students study how the technology of scuba diving combined with scientific archaeology has created a new discipline of shipwreck archaeology since the 1960s. They follow the history of the discipline and explore shipwrecks from Bronze Age Greece to nineteenth-century Chicago. They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum.
Interdisciplinary Option: Medieval Studies
Course equivalencies: XHIST324MSTU330ANTH347CLST324
Outcomes:
Students understand the importance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant

HIST 310 The Middle Ages (3 Credit Hours)
This course examines European, Islamic and Byzantine society and culture in the Middle Ages.
Interdisciplinary Option: Catholic Studies, German Studies, Medieval Studies
Course equivalencies: X-HIST310/MSTU328/CATH310
Outcomes:
Students will learn of the Middle Ages, including relations between religious and political institutions; cultural developments; the rise of towns; reactions to the Black Death and the Hundred Years War

HIST 310A Medieval World 1100-1500 (3 Credit Hours)
This course examines European society and culture in the later Middle Ages.
Interdisciplinary Option: Catholic Studies, German Studies, Medieval Studies
Course equivalencies: HIST311/MSTU332/CATH311
Outcomes:
Students will demonstrate understanding of new forms of schools and learning; the origins of national monarchies; the crusades; chivalry; courtly love and the role of women; the rise of towns; church and state relations; the Black Death and the Hundred Years War

HIST 310B Medieval Culture (3 Credit Hours)
This course explores the three cultures of the Middle Ages - Islam, Byzantium, and Europe, with particular emphasis on art, music, and literature.
Interdisciplinary Option: Catholic Studies, German Studies
Outcomes:
students will understand how these cultures developed through shared roots, mutual influence, interaction and reaction; be able to interpret artistic expression and material culture in historical context; and gain skill in the analysis of primary sources

HIST 310C Medieval Women (3 Credit Hours)
This course explores the lives of medieval women from 500-1500 CE. While paying close attention to medieval ideas about gender and sexuality, students will examine experiences of medieval women from a range of backgrounds and social statuses as well as male and female roles in family life, religion, and politics.
Interdisciplinary Option: Medieval Studies, Women & Gender Studies
Outcomes:
Students will understand resources concerning medieval women while gaining appreciation for the need to challenge historical "master narratives" that frequently ignore or minimize the experiences and roles of women

HIST 310D Medieval Popular Religion (3 Credit Hours)
This course will explore the "lived" religious experience of medieval people through their actions, behaviors and artifacts. "Folk" (or pagan) survivals, pilgrimage, music and arts, devotion to saints, magical beliefs and practices, and attitudes to the natural/supernatural world[s] may be covered, depending on subtitle.
Interdisciplinary Option: Catholic Studies, Medieval Studies
Outcomes:
Students will appreciate the complex world view and agency of regular medieval people; they will acquire research skills and be able to critically assess primary and secondary source materials

HIST 310F Medieval Inquisitions and Heresy (3 Credit Hours)
This course examines the intriguing range of religious beliefs and practices in medieval Europe. Over the course of the semester, students will explore the criteria and processes by which local communities and translocal authorities defined heresy as well as the political interests and cultural assumptions that shaped labels and definitions.
Interdisciplinary Option: Medieval Studies
Outcomes:
Students will understand beliefs that shaped medieval religiosity, gain appreciation for roles played by heretics and inquisitions in premodern Europe, and look for similar phenomena in the modern world

HIST 310G Supernatural in the Middle Ages (3 Credit Hours)
Understanding the medieval supernatural leads to an appreciation of the richness of medieval society and intellectual culture. How were "natural" and "supernatural" defined across time and space, popular and elite cultures? How were ideas about the "supernatural" shaped by daily life, theology?
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Outcomes:
Think historically about social and intellectual approaches to the supernatural; Assess arguments; interpret and contextualize primary sources; Develop research skills and ability to formulate questions

HIST 310L Love and Violence in Medieval Culture and Society (3 Credit Hours)
We will investigate the extent to which chivalric ideas controlled or encouraged aristocratic violence; the relationship between violence and courtliness; the extent to which chivalry threatened or strengthened royal government; and the influence of courtly love on gender.
Interdisciplinary Option: Medieval Studies, Women & Gender Studies
Outcomes:
Familiarity with medieval ideas about acceptable forms of violence; understand long-term influence of medieval ideas about love, sexuality, and violence; how to read and interpret medieval literary and social texts

HIST 311B The Crusades: Christianity and Islam (3 Credit Hours)
This course examines the origins and development of the Crusades and the Crusader States in the Islamic East. It will explore crusade ideology, political and military histories of crusades, compare Christian, Jewish, and Muslim perceptions of the crusading movement, and consider invocations of Jihad and Crusade into the modern era.
Interdisciplinary Option: Catholic Studies, European Studies, Middle East and Islamic World Studies, Medieval Studies
Outcomes:
Students will learn about the histories of the Crusades, the communities impacted by them, and historiographical debates on the topic; They will write papers using primary and secondary sources

HIST 312 England to 1485 (3 Credit Hours)
This course examines the history of medieval England, with an emphasis on its cultural history as manifested through written documents, material remains, art and music.
Interdisciplinary Option: Medieval Studies, Shakespeare Studies
Course equivalencies: X-HIST329/MSTU340
Outcomes:
Students will understand that English culture is an amalgamation of Anglo-Saxon and Norman-French culture, with influences from the Celtic and the Latin culture of Roman Catholicism; and will gain skill in the analysis of primary sources

HIST 314 Renaissance (3 Credit Hours)
This course examines the political and cultural life of Italy's five principal city-states (Rome, Florence, Venice, Milan and Naples) from the era of St. Francis and Dante until the sack of Rome in 1527.
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies, Medieval Studies, Shakespeare Studies
Course equivalencies: HIST314/MSTU336
Outcomes:
Students gain appreciation for the debate about a rebirth of ancient culture in the city-states of Italy; They acquire special cognizance of humanism as a historical phenomenon and the influence of humanism on education, politics, the visual arts and religion

HIST 314A The Jesuits: Life and History (3 Credit Hours)
This course examines the history of the Society of Jesus from its founding by Ignatius Loyola in the 16th century to its activities in the contemporary world.
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: X-HIST297/CATH297
Outcomes:
Students will gain a sense of the characteristics of Jesuit spirituality and the contribution of Jesuits to various fields of human endeavor such as evangelization, education, politics, literature, and the visual arts

HIST 315 The Reformation (3 Credit Hours)
This course examines the birth and progress of the Reformation in Europe from Luther's protest in 1517 to the conclusion of the Thirty Years War in 1648.
Interdisciplinary Option: Catholic Studies, European Studies, German Studies, Shakespeare Studies
Course equivalencies: X-HIST315/CATH316
Outcomes:
Students gain familiarity with the social, religious, intellectual, and political background of the Reformation; Luther's personal religious experience and his theological convictions; the Swiss Reformation of Zwingli and Calvin; the nature and spread of Calvinism; the elements of the Radical Reformation; and the efforts for Catholic Reform culminating at the Council of Trent

HIST 316 History of Poland (3 Credit Hours)
This course examines political, socioeconomic, and cultural developments in Poland since the first Polish state. Its major themes include: the consolidation of the Polish state; economic and political problems in the 17th Century; revolution and independence; World War II; Communist rule in Poland; and Solidarity.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Outcomes:
Students will improve their analytical, quantitative synthetic, and critical cognitive skills; develop written and oral communications skills; and gain historical knowledge

HIST 317 Age of Absolutism & the Enlightenment (3 Credit Hours)
The course explores the period that leads directly into the French Revolution.
Interdisciplinary Option: European Studies
Outcomes:
Students gain an appreciation of the social and economic role of Western Europe in the world of the 17th and 18th centuries; the nature of classic absolutism as illustrated by the reign of Louis XIV of France; and the origin and evolution of Prussia and Austria as examples of enlightened absolutism

HIST 318A Early Modern England 1485-1760 (3 Credit Hours)
This course surveys the major political, social, economic, religious, and cultural developments in England under the Tudors, Stuarts and early Hanoverians (1485-1760).
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students examine the complexities of the aftermath of the Wars of the Roses; the English Reformation; Elizabethan and Jacobean culture and society; the English Civil War and Glorious Revolution of 1688; the wars against Louis XIV; and the rise of England as a great power

HIST 318B English Social History 1450-1750 (3 Credit Hours)
This is a course in the social and cultural history of early-modern England. It focuses, in particular, upon the tension between how early modern English men and women saw their world (ordered, hierarchical, stable, divinely sanctioned) and what their world was actually like (disordered, socially mobile, unstable, secular).
Interdisciplinary Option: European Studies
Outcomes:
Students will gain an understanding of the best and most recent work in demography, iconography, family history, women's history, and the histories of material culture, popular culture, religion, education and crime, and be exposed both to a wide variety of historical methodologies as well as related fields such as anthropology and art history

HIST 318C London 1550 - 1715 (3 Credit Hours)
This interdisciplinary introduction to the history of London will assess the economic, political, social, and cultural reasons for the city's importance in British and world history.
Interdisciplinary Option: European Studies, Shakespeare Studies, Urban Studies
Outcomes:
Students will gain an understanding of how a variety of source materials can be are used to develop an urban history of Great Britain's capital and apply this knowledge to enhance their own communication and critical thinking skills

HIST 320 Era French Revolution & Napoleon (3 Credit Hours)
This course analyzes the causes, meanings, and consequences of the French Revolution of 1789 by examining French society and culture from the age of absolutism to the end of Napoleon Bonaparte's empire.
Interdisciplinary Option: European Studies
Outcomes:
Students will gain an understanding of both the Revolution itself and its effects on the course of world history and become familiar with variety of analytic styles, such as narrative, political, economic, social, Marxist, and revisionist approaches to the history of the period

HIST 321 19th Century European Culture and Ideas (3 Credit Hours)
This course investigates the main currents of European thought and culture from the Romantic era to the fin de siècle. Using literary texts and music, as well as visual arts, we will study the major intellectual trends of the nineteenth century and attempt to determine their influence on European society.
Interdisciplinary Option: European Studies, German Studies
Outcomes:
By using their historical knowledge of nineteenth century Europe as a guide, students will develop critical thinking and communications skills about the art, music, and literature of the era

HIST 322 Modern France: From Empire to Postcolonial Nation (3 Credit Hours)
This course explores the cultural and political development of modern France as a nation and imperial power. It examines the formation of national identities; the discourse and practice of French nationalism and republicanism; and the forms of resistance and collaboration that shaped relations between citizens, state, colonized peoples, and empire.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: X-HIST338/INTS338
Outcomes:
Students will understand how the development of French republicanism and Enlightenment thinking shaped nation and empire building in the 19th century but also influenced colonial resistance in the 20th century

HIST 324 Italy 19th & 20th Centuries (3 Credit Hours)
This course studies the major currents in Italy from the defeat of Napoleon to the present.
Interdisciplinary Option: European Studies, Global Studies, Italian American Studies, Italian Studies
Course equivalencies: HIST335/INTS335/ROST335
Outcomes:
Students explore the political, social, religious, economic and intellectual currents against the background of Italy's unification as a nation-state

HIST 325 Modern Britain: Empire, Industry, Democracy (3 Credit Hours)
This course examines political changes in Britain, economic and social causes and consequences of industrialization, and the changing position of Great Britain in Europe and the world.
Interdisciplinary Option: European Studies
Outcomes:
Students will demonstrate an understanding of the political process of democratization and the global affect of economic change on Britain as evidenced in the extension of voting rights, the growth of Empire, the creation of the Commonwealth and participation in the European Union

HIST 325A The British Empire: From Barbados to Brexit (3 Credit Hours)
This course examines the rise and decline of Britain's empire.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: X-HIST332/INTS332
Outcomes:
Students will understand the different factors responsible for its growth; relationship of empire and British economic and political change; place of empire in the Victorian ethos; different imperial governing arrangements; growth of nationalism and movements for independence within the empire and commonwealth

HIST 326 Ireland: Colony to Nation State (3 Credit Hours)
This course traces the transformation of Britain's oldest colony into an independent nation between the seventeenth and twentieth centuries.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: HIST333/INTS333
Outcomes:
Students will develop an understanding of how Irish nationalism shaped British and Irish history and use Ireland as a template to develop critical thinking and communications skills about the transformation of colonies into independent states

HIST 327A The Balkans: History, Fiction, Film (3 Credit Hours)
Covering southeast European areas once ruled by the Habsburg, Venetian, and Ottoman Empires, the course explores the following issues: the rise and fall of empires; nationalism and nation-formation; Communism and post-socialist transformations; popular culture and politics; and experiences of war, organized violence, and international intervention.
Interdisciplinary Option: European Studies, Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will gain fain factual knowledge (terminology, trends, basic structures) of Balkan societies and develop advanced skills in speaking and writing about history

HIST 328 Russia Pre-1917: Empire Building (3 Credit Hours)
This course examines how, by the middle of the 19th century, Russia emerged as the largest empire in the world.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to explain how Russia survived the ravages of the Mongols under Chingis Khan, the reign of terror under Ivan the Terrible, westernization under Peter the Great; opened itself to new ideas under Catherine the Great, while it continued to preserve an oppressive institution of serfdom and remained a deeply divided society ready to explode in 1917

HIST 328A Russian Empire and Literature (3 Credit Hours)
This course examines a history of the Russian empire through the works of Russian literature. What Russian writers from Pushkin to Tolstoy can tell us about Russia and how a history of the Russian empire is crystallized in the works of fiction are among the issues addressed in this course. Course introduces students to the history of the Russian empire and classics of Russian literature. A historical and literary context will help students understand the predicament of contemporary Russia.
Interdisciplinary Option: European Studies

HIST 329 Women's Sphere in Past Society (3 Credit Hours)
This course examines comparative perspectives on feminism, sexuality, and women in the family and in public life in Europe 1700-present.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST293/WOST256/WSGS256
Outcomes:
Students will demonstrate understanding of women's contributions to history, historian's perspectives on women in history, and the gendered definition of public and private spheres

HIST 329C Empire, Sex, Violence: European Colonial History (3 Credit Hours)
This course examines European colonialism in Africa and Asia. Topics include theories of imperial expansion; the rise of "scientific" racism; the role of class and gender in colonial ideologies; the relationship between ideas of "civilization" and colonial violence; the forces behind decolonization; and globalization in the post-colonial world. Students will know the political and socio-economic factors that shaped European imperialism in the nineteenth and twentieth centuries and understand the consequences of colonialism and decolonization on the world today.
Interdisciplinary Option: European Studies, Global Studies, Women & Gender Studies

HIST 329N Modern European Nationalism: Myth and Reality (3 Credit Hours)
The course will begin by tracing the origins and various forms of European nationalism, continue with the establishment of nation-states in Western and Eastern Europe, and end with a discussion of various national and ethnic issues that dominate European political and ideological discourse today.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Outcomes:
Students will explore ways in which nationalism has affected relations between individuals, communities, and states in Europe; Students will assess nationalism's adaptability to diverse social, political, and cultural environments

HIST 330 Europe in the Age of Catastrophe, 1900-1945 (3 Credit Hours)
This course traces the origins of the two world wars in the first half of the twentieth century and assesses the cultural and political movements that transformed Europe and the west in those years.
Interdisciplinary Option: European Studies, Global Studies, German Studies
Course equivalencies: X-HIST325/INTS376
Outcomes:
Students will develop critical thinking and communications skills about how the contemporary world was shaped by the political, military, cultural, and social transformations in the first half of the twentieth century

HIST 330F Fascinating Fascism: 1919 to the Present (3 Credit Hours)
The recent emergence of populist nationalism in the western world has sparked a renewed interest in the political phenomenon of Fascism. This course explores the rise and evolution of Fascist movements and regimes from early twentieth century to the present. Students will learn about the characteristics of Fascist movements, the circumstances that brought some of them to power, and the factors that shaped the behavior of Fascist Regimes.
Interdisciplinary Option: European Studies, Global Studies

HIST 331A Food, Hunger, and Power in the Modern World (3 Credit Hours)
This course explores how conflicts over food shaped the modern world. We compare shifting interpretations of famine (in Ireland, India, and Ethiopia), and explore how food became a "weapon of war" during the World Wars. Finally, the course analyzes how race, gender, and class shaped American food and welfare policies.); Students will develop skills in analytically interpreting both primary and secondary sources; Students will have engaged in independent research with both primary and secondary sources to complete a historical research project; Students will understand how race and gender have shaped and been shaped by the modern food system.
Interdisciplinary Option: Bioethics, European Studies, Global Studies, Women & Gender Studies
Outcomes:
Students will have developed an awareness of the biological, political, social, cultural, and economic meanings of food in modern societies; Students will have gained exposure to different methodological approaches to studying food and hunger (anthropology, economics, sociology, psychology, gender studies etc

HIST 334A The Nazi Revolution (3 Credit Hours)
The course will deal with the causes, main features and consequences of the Nazi movement in Germany and Europe from 1919 to 1945.
Interdisciplinary Option: European Studies, German Studies
Outcomes:
The students explore the origins of Nazism and the reasons for Hitler's success; Students appreciate the elements of "Nazi culture," the nature of Nazi rule in the 1930s, Nazi foreign policy and aggression in the 1930s, and World War II; They acquire a sense of the Nazi movement as a phenomenon growing out of unique German circumstances as well as one reflecting the larger context of modern western history

HIST 334B The Holocaust: History and Memory (3 Credit Hours)
This course explores a defining event of modernity, the genocide of Europe's Jews, by exploring Nazi actions, victims' varied experiences, and international reactions. We will also tackle questions like: Was the Holocaust unique? What does it mean to be a "bystander"? What are the politics of memory and commemoration?
Interdisciplinary Option: European Studies, Global Studies, Peace, Justice, and Conflict Studies, Polish Studies
Course equivalencies: X-HIST304/PAX 304
Outcomes:
Students acquire a sense of the causes, processes and implications of recent genocide; They are challenged to develop the outlines of a theory for predicting when genocide is likely to occur and to provide a clear definition of the term; Most importantly, they articulate from the historical data ways to prevent genocide

HIST 335 The Second World War (3 Credit Hours)
The course examines the history of the war from its origins to the destruction of the Axis powers and the onset of the Cold War.
Interdisciplinary Option: European Studies, Global Studies, German Studies, Polish Studies
Course equivalencies: X-HIST326/INTS328/PAX 326
Outcomes:
Students will understand the interrelationship among political, social, economic, military, and diplomatic developments as demonstrated in the events of the Holocaust, the spread of nationalism, and the origins of the Cold War

HIST 336 Contemporary Europe 1945 to Present (3 Credit Hours)
This course examines the postwar world, the movement toward European integration; the tensions between East and West; problems and proposed solutions in contemporary Europe, as well as responses to these issues made by intellectual and cultural leaders of the modern age.
Interdisciplinary Option: European Studies, Global Studies, German Studies, Polish Studies
Course equivalencies: X-HIST327/INTS327
Outcomes:
Students will understand the process of European integration, including the effects of the Cold War on Europe, the challenges of the re-unification of Germany, the integration of ten Central European nations into the European Union, and cultural reactions to these developments

HIST 337 Rise & Fall of Soviet Union (3 Credit Hours)
This course will cover such issues as the Revolution and Civil War, Stalin's repression, victories in World War II, the years of stagnation, Soviet society, its institutions and culture.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Course equivalencies: X-HIST341/INTS392
Outcomes:
Students will be able to explain how the Russian Socialist revolution came into being, what kind of society it sought to create, and how this new society, the Soviet Union, developed and finally dissolved in 1991

HIST 337A Women in Russia and Eurasia, 1860-Present (3 Credit Hours)
This course surveys the experiences of women in the late Russian empire, the Soviet Union, and the states that now comprise the region. In particular, we will examine the ways in which writers, filmmakers, and activists of the 19th, 20th, and 21st centuries have addressed the 'woman question.'
Interdisciplinary Option: European Studies, Global Studies, Women & Gender Studies
Outcomes:
Students will gain understanding of key concepts related to women's history in Russia; they will produce written and oral commentaries on the texts and issues studied in class

HIST 338A History of European Communism (3 Credit Hours)
In this course students will study the history of European Communism from its inception. The success that this ideology enjoyed among European societies makes it necessary to study this phenomenon in detail. The course will begin by tracing the origins of Communism and end with a discussion of its downfall.
Interdisciplinary Option: European Studies, Global Studies, German Studies
Outcomes:
Improved cognitive skills and communications skills; Enhanced historical knowledge

HIST 338B Eastern Europe in the 20th Century (3 Credit Hours)
This course offers a historical survey and analysis of the processes of political, social, cultural, and economic change that affected Eastern Europe in the twentieth century. The course will begin with the break-up of multi-national empires in Eastern Europe and end with the collapse of communism.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Improved cognitive skills and communications skills; Enhanced historical knowledge

HIST 339C Modern Europe and the Arts (3 Credit Hours)
This course takes advantage of Chicago's access to one of the most important collections of modern European art in the world. The Art Institute of Chicago offers masterpieces representing every major aesthetic movement in Western history. Full appreciation of these treasures involves recognizing the historical circumstances that surrounded their creation and considering the ideas their creators intended to communicate.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: X-HIST305/INTS305A
Outcomes:
Students will better appreciate the great works themselves and learn from them about major developments in modern European social, political, and cultural history

HIST 339F History of Feminist Thought and Social Action (3 Credit Hours)
This course focuses on the history and development of feminist thought and activism since the late eighteenth century. Attention goes beyond just U.S. and European feminist history, exploring Indigenous, Black, and postcolonial feminism to investigate their unique feminist ideas and the challenges they pose to "traditional" feminist thought and action.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X - WSGS 330 / HIST 339F
Outcomes:
Students will learn to identify key concepts, thinkers, activists; analyze and critique some of the major works; and develop an integrated understanding of the history of feminist thought, broadly conceived

HIST 340B Introduction to Islamic History (3 Credit Hours)
This course focuses on the early and medieval history of the states, societies, and cultures of the Middle East from the prophetic mission until the fall of the 'Abbasid empire in 1258.
Interdisciplinary Option: Middle East and Islamic World Studies, Medieval Studies
Course equivalencies: X-HIST312/IWS312
Outcomes:
Students will demonstrate an understanding of the impact of Islam as a religious and cultural phenomenon and be able to analyze historically the Quran as well as primary sources from jurisprudence, philosophy, ethics, and historiography

HIST 341 Modern Middle East (3 Credit Hours)
This course surveys the modern Middle East, with a focus on the Arab world.
Interdisciplinary Option: Arabic Language and Culture, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-HIST313/INTS313/IWS313
Outcomes:
Students will demonstrate an understanding of the Ottoman background; the age of imperialism; and the 20th century, and be able to approach the period from an anthropological as well as historical perspective

HIST 341B Arab-Israeli Conflict (3 Credit Hours)
This course explores the history of the Arab-Israeli conflict since the beginnings of the immigration of the East Europeans and Russian Jews to Ottoman Palestine in the late 19th century.
Interdisciplinary Option: Global Studies, Middle East and Islamic World Studies, Peace, Justice, and Conflict Studies
Course equivalencies: HIST322/INTS322/PAX 322/IWS322
Outcomes:
Students will gain understanding of national Zionism in Europe; Ottoman and British Palestine; the declaration of the state of Israel; the Palestinian refugee problem; the Arab-Israeli wars; the Camp David agreement and recent peace talks and their aftermath

HIST 341C Tunisia On-Site: Arab Spring, Democratic Change, Islam (3 Credit Hours)
A combination of site visits, lectures, and group discussions throughout Tunisia provides a unique experiential understanding of the relationship between the Arab spring, democratic change, Islam, gender relations, and U.S. foreign policy amidst the historical inheritances of the Carthaginian, Roman, Islamic, and French empires in North Africa.
Interdisciplinary Option: African Studies and the African Diaspora, Arabic Language and Culture, Global Studies, Middle East and Islamic World Studies, Women & Gender Studies
Course equivalencies: X-PLSC 399/HIST 313T
Outcomes:
Experientially based knowledge of the politics, society, culture, history, and international relations of a country (Tunisia) in a region (North Africa) at the intersection of Africa and the Middle East

HIST 342A African History to 1600 (3 Credit Hours)
This course traces the history of the African continent to 1600.
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-HIST350/BWS 386/INTS378
Outcomes:
students will demonstrate understanding of the development and diversity of political, economic, ecological, cultural and religious forces in Africa, as well as the relationship between Africa and other world areas

HIST 342B African History Post-1600 (3 Credit Hours)
This course traces the history of the African continent from 1600 to the present, i.e., from the tumult of the slave trade through Africa's resistance to European imperialism and colonialism, and its eventual emergence as an independent continent.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-HIST351/BWS 387/INTS351
Outcomes:
Students will appreciate the legacies of colonialism and place the contemporary problems of independence in historical perspective

HIST 342C The History of Islam in Africa (3 Credit Hours)
This course examines the development of Islam in Africa, including issues such as Islamic mysticism, eschatology, and state formation.
Interdisciplinary Option: African Studies and the African Diaspora, Middle East and Islamic World Studies
Course equivalencies: X-HIST349/BWS300/IWS349
Outcomes:
Students will gain an understanding of how and when Islam entered Africa and how the religion shaped African societies prior to the colonial period

HIST 342D African Diaspora in the Middle East and South Asia (3 Credit Hours)
The purpose of this course is to explore the African Diaspora as it pertains to the Middle East and South Asia. Issues such as the concept of slavery in Islam, and identity preservation will be treated throughout the course of the semester. Emphasis will be placed on the role Black Africans such as Antara ibn Shadad, Malik Kafur, and Malik Ambar, just to name a few, played in the formation and crystallization of Middle Eastern and South Asian states, kingdoms and empires.
Interdisciplinary Option: African Studies and the African Diaspora

HIST 342M African Music's Influence on American Music (3 Credit Hours)
This historically-based exploration will analyze the role that African music from the continent played in shaping and forming such American musical forms as the Blues, Jazz, Rock and Roll, Soul Music, and Hip-Hop. The course begins in 15th century West Africa, and ends in the late 20th century American milieu.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Outcomes:
Students will demonstrate understanding of the development and diversity of African, as well as the influence of African music on American culture

HIST 343 Modern South Asia (3 Credit Hours)
This course will examine the modern history of South Asia. It will explore the history of South Asia with a thematic and chronological approach. Important subjects to be examined include: early modern state formation, colonial forms of knowledge, religious identity, gender and class relations, and the political economy in the early modern and colonial state.
Interdisciplinary Option: Asian Studies, Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will enhance their written and oral communication skills; improve their critical thinking skills and improve their ability to engage in historical analysis

HIST 345A Traditional China from Antiquity to 1550 (3 Credit Hours)
This course will trace Chinese history from the origins of classical Chinese civilization in the Shang and Zhou periods to the evolution of an agrarian society under the imperial state.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-HIST342/ASIA341
Outcomes:
Students will gain an understanding of how domination by aristocratic lineage gave way to the Confucian state and society based on peasant farming; and how a bureaucratic and autocratic polity existed in symbiosis with a socioeconomic elite that maintained itself through the dominance of the agrarian economy as well as through increasing access to the sources of commerce and trade

HIST 346A Early Modern China: 1550-1800 (3 Credit Hours)
This course studies early modern Chinese society, economy, and the state from ca. 1550 to 1800, a period which marked the culmination of the development of the centralized, bureaucratic, imperial state and exhibited significant innovations in economic structure and activity. Students will be able to describe the pressure of unprecedented demographic growth, and explain how the society began to experience many of the problems that continue. They will be able analyze China's failure to build on its earlier economic and technological successes by exploring intellectual life and its relation to scientific and technological innovation.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-HIST344/ASIA344/INTS371

HIST 346B Reform & Revolution in China, 1800-1949 (3 Credit Hours)
This course explores China's attempt to adjust to the complex transformations in its economy, society, politics and intellectual life initiated during the early modern period and transfigured into crisis proportions by unchecked demographic growth. These challenges were heightened and made more acute by the often hostile encounter with first the West and then Japan through the end of World War II.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Global Studies
Course equivalencies: X-HIST345/ASIA345/INTS372
Outcomes:
Students will be able to describe and assess the numerous evolutionary and revolutionary strategies for change during the period in China under discussion

HIST 346C History of Christianity in China (3 Credit Hours)
The course will cover the encounter between China and Christianity, from 7th century Nestorian monks, 12th century Franciscan Missions, 16th century Jesuit missionaries, Christianity in the period of Western imperialism, the expulsion of Western missionaries after the 1949 Communist revolution, and the formation of underground churches. Develop critical, writing, and research skills. Deepen understanding of Christianity as a world religion, the history of China, Christianity in China, and historical ties between China and The West.
Interdisciplinary Option: Asian Studies, Catholic Studies, Chinese Language & Culture, Global Studies

HIST 347A China Since 1949: The People's Republic (3 Credit Hours)
This course examines the attempt to create and foster the growth of a socialist state and society in China under the Chinese Communist Party, with attention to the steady transformation of society, the economy, and political life since 1949.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Global Studies
Course equivalencies: X-HIST346/ASIA346/INTS373
Outcomes:
Students will be able to assess the major convulsive episodes such as land reform, the Great Leap Forward, the Great Proletarian Cultural Revolution, the Four Modernizations, and the impact and legacy of Mao Zedong

HIST 347C Cultural Revolution-China (3 Credit Hours)
The Great Proletarian Cultural Revolution (1966-1976) was a watershed in China's modern history. Over the course of a decade, Mao summoned the populace to battle "bourgeoisie" of the state by attacking various parts of the social, cultural and political structure.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Global Studies
Course equivalencies: X-HIST346B/ASIA346B/INTS346B
Outcomes:
Students will examine the Cultural Revolution from the perspectives of political, social, and cultural history, utilizing memoirs, oral histories, documentary and dramatized films, primary documents written by China's party leaders, and scholarly writings; come to understand these events not solely from the hindsight of post-reform China, but from the perspective of the times during which these events unfolded; and develop their own understandings of what these years meant for the shaping of modern China's state, economy, institutions, and citizens

HIST 347D Modern Chinese History through Film (3 Credit Hours)
This course presents Chinese modern History through the lens of feature films and documentaries. Through a chronological approach, it focuses on the period from the Opium Wars to the present. It discusses political struggles, economic shifts, the encounter with Western Imperialism, the birth of Communist China, the shift to a market economy; it focuses on issues of war, gender, society, rural versus urban, and the environment. Acquire a non-Western Historical perspective; understand diversity in the World; be conversant in modern Chinese History; connect those notions to the historical development of the West; understand film theory and practice.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Film & Digital Media Studies, Global Studies, International Film & Media Studies

HIST 349 Contemporary Global Issues: Historical Perspectives (3 Credit Hours)
This course will introduce students to important contemporary issues such as globalization, resurgent ethnic and religious strife, racism, imperialism, and the crisis of the nation state, among others. Both thematic and chronological approaches will be employed in examining selected world regions.
Interdisciplinary Option: Global Studies
Course equivalencies: HIST299BCDE/INTS298
Outcomes:
Students will be able to demonstrate an understanding of the way history shapes pressing issues in the contemporary world, the way a historical approach helps make sense of these same issues, and the value of comparative study and analysis across time and place

HIST 349A Women in East Asia (3 Credit Hours)
This course studies the lives of Asian women in China, Japan, and Korea from early modern times to the present by examining changing roles of women and how these changes have come about.
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture, Women & Gender Studies
Course equivalencies: X-HIST296/ASIA296/INTS296/WOST
Outcomes:
Students will be able to explain how life reflects law in the political, social, economic and cultural history of Asian women; how imperialism and war have affected women; how women have effected change

HIST 350 Colonial Latin America (3 Credit Hours)
This course will introduce students to the major themes in the colonial history of the region known today as Latin America from conquest to independence.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-HIST352/LASP350
Outcomes:
Students will be able to demonstrate an understanding of the following broad themes: the nature and difficulties of colonial rule in culturally diverse societies; the different ways in which individuals from all walks of life fared in the colonies; and the role that religion and the church played in everyday life

HIST 351 Latin American Independence, 1750-1830 (3 Credit Hours)
This course examines independence movements and wars in the region known today as Latin America. Course readings and lectures will explore the impact of the Enlightenment on Bourbon Spain and Spanish America, new movements toward free trade, friction between the church and state, and crown policies toward indigenous peoples.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-HIST353/LASP351
Outcomes:
Students will be able to demonstrate an understanding of the basic contours of independence movements in Latin America

HIST 352 Latin America in the 19th Century (3 Credit Hours)
This is a survey course that introduces students to the history of Latin America during the nineteenth century through two: 1) Nation Formation: 1780s-1850s and 2) Liberal Reforms and Progress: 1850s-1910.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-HIST354/LASP352
Outcomes:
Students will demonstrate an understanding of the persistence of political instability, the problems of economic development, and elite and popular perceptions of race, class, and gender; Students will also be able to draw comparisons between different Latin American experiences

HIST 353 Latin America in Recent Times (3 Credit Hours)
This course examines major political, cultural and socio-economic developments in Latin America from the twentieth century to today. Topics to be covered include nationalism and revolution, military dictatorship and state oppression, and hemispheric relations.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-HIST355/INTS389/LASP353
Outcomes:
Students will be able to demonstrate a broad understanding of the impetus behind the following events and themes: the Mexican Revolution of 1910; Castro and the Cuban Revolution; Peronism; Dirty Wars in Chile, Argentina and Central America; Cold War politics and CIA operations; and the current Drug War in Colombia

HIST 355 The Caribbean & Central America in Colonial/Modern Times (3 Credit Hours)
This course examines the Caribbean and Central America from European conquest and colonization to the present day.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-HIST356/INTS380/LASP354
Outcomes:
Students will demonstrate an understanding of the significance of the Caribbean and Central America region in world, but especially US, politics since the nineteenth century and increasingly during the Cold War; Students will demonstrate an ability to draw comparisons and contrasts between nations in these regions, especially as they relate to the rest of Latin America and the United States

HIST 356 Mexican History-Ancient to Modern Times (3 Credit Hours)
This course will introduce students to the major themes in Mexican history from pre-Columbian to contemporary times based on three historical periods: Early Mexico, the Nineteenth Century, and Recent Mexico.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-HIST357/INTS379/LASP355
Outcomes:
Students will be able to demonstrate an ability to draw on the major themes in Mexico history as they relate to the Aztec empire, Spanish conquest and colonialism, independence, modernization, revolution, and democratization

HIST 357 The Mexican Revolution in Popular Imagination (3 Credit Hours)
This course explores debates about the Mexican Revolution (1910-1917) by analyzing its interpretation in scholarship and its representations in memoir, fiction, art and film.
Interdisciplinary Option: Global Studies, Latin American Studies
Outcomes:
Students will demonstrate an understanding of the Mexican Revolution as an event and as a myth in history and popular culture

HIST 358 Women in Latin American History (3 Credit Hours)
This course introduces students to the life experiences of women in Latin America through history, film, oral history, and their personal narratives.
Interdisciplinary Option: Global Studies, Latin American Studies, Women & Gender Studies
Course equivalencies: HIS358/INT368/LASP299/WSGS385
Outcomes:
Students will demonstrate an understanding of the way notions of femininity have been constructed and have changed over time throughout Latin American history, the various and sometimes subtle ways that women have empowered themselves, and the more overt politicization of women since the mid-twentieth century

HIST 359 Teaching World History (3 Credit Hours)
This course focuses on pedagogical approaches, curricular analysis, and methodological developments in the field of World (or Global) history. Students will become familiar with world history by developing a syllabus for a course they may teach in the future at the high school or college level.
Interdisciplinary Option: Global Studies

HIST 359D The Ottoman Empire: A Global Perspective (3 Credit Hours)
The main themes of the course include rise and development of the Ottoman Empire; relations between Muslims, Jews, Christians, and other communities; the practices of inclusion and exclusion along class, gender, and ethno-religious lines; the rise of nationalism; experiences of violence and war; and imperial legacies in post-Ottoman states.
Interdisciplinary Option: European Studies, Middle East and Islamic World Studies
Outcomes:
Gain factual knowledge; Learn to analyze different ideas and texts

HIST 359E Concentration Camps: A Global History (3 Credit Hours)
This course explores the underlying logic of extrajudicial encampment from the camps of 19th-century colonialism to the Soviet Gulag, Nazi death camps, and more contemporary detention centers for refugees and political prisoners. Why have modern states - across the ideological spectrum - made use of camps against real and perceived enemies? Students will understand the underlying political, racial, and economic motives that lead to concentration camps. A transnational approach will help students contextualize specific camp regimes within a larger global history.
Interdisciplinary Option: European Studies

HIST 359F Genocides in the Modern World (3 Credit Hours)
This class evaluates the motives and circumstances of global genocides and uncovers the experiences of those targeted by genocidal violence. The course will range widely from settler colonial violence in the Americas to the Armenian Genocide, the Holocaust, the Khmer Rouge, Rwanda, ISIL, and beyond.
Interdisciplinary Option: Global Studies, Race and Ethnicity
Outcomes:
Students will compare and contrast global genocides across space and time, evaluate the configurations of twentieth-century politics that have generated multiple genocides, and hone critical reading and writing skills

HIST 359H Anti-Colonial Resistance in the Twentieth Century (3 Credit Hours)
This course will explore the end of modern colonialism and the emergence of nation-states in Africa and Asia: one of the most significant transformations in modern history. It will consider how imperial agents justified their subjugation of colonized peoples and how colonial objects came to resist and end colonial rule.
Interdisciplinary Option: Asian Studies, Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will learn about theoretical, political, and historical explanations about the processes of resistance and decolonization; Further, they will develop critical analysis skills and historical knowledge

HIST 360 Community and Culture in Colonial America (3 Credit Hours)
This course covers the story of America's colonial past from its origins in the Atlantic world of the 16th century through its contact and conflicts with Native American peoples.
Outcomes:
Students will demonstrate an understanding of the process of colonial settlement, colonial labor and economic patterns, trans-Atlantic immigration, Colonial Wars of Empire and the conquest of native lands

HIST 360A Slavery and Abolition: Then & Now (3 Credit Hours)
This course will first examine the history of slavery in the ancient and medieval eras, but is devoted mainly to the rise and maturation of slavery and slave trading in the Atlantic world (ca. 1500-1865). The last third of the class charts the resurgence of post-abolition slavery.
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Students will learn about slavery past and present to fashion a moral philosophy of human freedom that can make a world without slavery a reality

HIST 361 The American Revolution, 1763-1815 (3 Credit Hours)
When British colonists in North America declared themselves independent from the British Crown in 1776, they affected the most successful revolution in modern history. This course covers the antecedents and outcomes of their actions from the Seven Years War through the American Revolution to the War of 1812.
Outcomes:
Students will demonstrate an understanding of the origins, actions and significance of the American Revolution; the development of the United States Constitution; and the development of the nation up the War of 1812

HIST 362 America in the Age of Slavery and Capitalism (3 Credit Hours)
This course covers United States social, cultural, economic, and political development during the first half of the nineteenth century.
Outcomes:
Students will demonstrate an understanding of how Modern America was built between 1800 and 1850 through the study of urban development, immigration, gender history, educational developments, wars of expansion, and the growth of a democratic society

HIST 363 Civil War & Reconstruction 1850-1877 (3 Credit Hours)
This course covers the crisis of the Union from the Compromise of 1850 through the Civil War and the era of Reconstruction.
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-HIST363/BWS 363
Outcomes:
Students will demonstrate an understanding of the institution of slavery, the rise of abolitionist sentiment, the failure of democratic political institutions, the military history of the war, its cultural impact on the nation, and the struggle for racial justice in the Reconstruction era

HIST 366A World War I and American Culture (3 Credit Hours)
Although World War I's impact on America paled in comparison to that of the European combatants, the wartime experiences affected the nation's economic, political, and cultural life for the remainder of the twentieth century. This course examines America's World War I experience and explores its legacy.
Outcomes:
Students will understand how the United States underwent the transformation from a relatively minor player on the international scene to an international presence, how those living through these years experienced social, cultural, economic, and political challenges associated with American life in the twentieth century; and how the roads taken and not taken during this period have shaped the options available to us today

HIST 367 United States from Great Depression to Recession (3 Credit Hours)
This course focuses on American history from 1929 to the present, a period of economic turmoil, domestic reform, and international engagement.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will demonstrate historical knowledge of the politics and government of the United States since the start of the Great Depression and develop critical thinking and communication skills

HIST 369 20th Century Popular Culture (3 Credit Hours)
This course examines the social and cultural patterns of twentieth century life as revealed in popular novels, vaudeville, movies, music, nightlife, and advertising.
Outcomes:
Students will be able to demonstrate historical knowledge of American traditions of success, family, home, consumption and culture, to draw links between gender and social life, and to develop critical thinking and communication skills

HIST 370 American Business, Wealth, and Inequality (3 Credit Hours)
Beginning with colonization and extending to the 2000s global expansion of Starbucks, this course outlines the history of American business, wealth, and the attendant inequality by exploring the interplay between business, labor, politics, and culture.
Interdisciplinary Option: Sociolegal Studies, Women & Gender Studies
Outcomes:
Students will improve their written communication skills; develop their critical thinking skills; and learn how to execute historical analysis

HIST 372 American Constitutional & Legal History to 1865 (3 Credit Hours)
This course focuses on the constitutional and legal history of the U. S. from colonial times to the end of the Civil War.
Outcomes:
Students will be able to demonstrate historical knowledge of American legal traditions of common law, federalism, and civil liberties, to draw links between social and legal change; to evaluate US Supreme Court decisions, and to develop critical thinking and communication skills

HIST 373 US Law & Public Policy (3 Credit Hours)
This course focuses on the constitutional, legal, & public policy history of the U. S. from the end of the Civil War to the twenty-first century
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will demonstrate knowledge of American legal traditions of federalism, civil rights, criminal justice, and civil liberties; understand social, legal, & policy changes; and evaluate US Supreme Court decisions

HIST 373A Crime and Punishment (3 Credit Hours)
This course examines how notions of crime and punishment have evolved between the nineteenth and twentieth centuries (with the early modern period serving as a backdrop).
Interdisciplinary Option: Sociolegal Studies
Course equivalencies: X-HIST373A/CRMJ345
Outcomes:
Students will be able to draw conclusions on what precisely caused the shifts in punishment, with attention to such things as the professionalization of the judiciary, industrialization and urbanization, the American Civil War, and Constitutional changes; Students will also gain an understanding of sociological and anthropological approaches to this topic

HIST 374 Black Politics (3 Credit Hours)
This course will present a general overview of black politics in America, including the major black political ideologies and their theoretical underpinnings and the role of race in urban politics in the late twentieth and early twenty-first centuries.
Interdisciplinary Option: African Studies and the African Diaspora, Race and Ethnicity
Course equivalencies: X-HIST374/PLSC393/BWS374
Outcomes:
Students will gain an understanding of how the circumstances of Reconstruction shaped black political ideologies; how blacks came into political power in major urban centers; and what the contours of debate are in the black community over provocative issues such as the criminal justice system, affirmative action, reparations, and education

HIST 375 Digital History (3 Credit Hours)
Digital resources make primary source material available while database, mapping, and text-mining applications allow us to ask new types of research questions. Digital history is more than just gaining familiarity with digital resources, applications, and platforms; it is about understanding how using these tools has changed the way we study history.
Outcomes:
Gain an introductory technical knowledge of digital tools or methods; Learn to apply technical knowledge about digital history tools to historical questions; Acquire experience managing and creating a team-based digital humanities

HIST 376 History of the American Frontier Movement (3 Credit Hours)
This course will cover the process of frontier expansion in American history.
Outcomes:
Students will understand the frontier as a social process that was part of the American experience from its earliest colonial origins to the end of the nineteenth century; Students will also understand the frontier as a place in the western United States where Americans engaged in cooperation, conflict, and conquest with native peoples, Mexicans, and Asians

HIST 376A History of the American Indian (3 Credit Hours)
This course is a survey of the history of American Indians, including the variety of Pre-Columbian societies, the encounter between Indians and European settlers, the impact of Eurasian diseases, American Indians' fight to avoid removal from their homelands, and the resurgence of Indians as sovereign peoples.
Outcomes:
The student is to emerge from the course with an enhanced ability to appreciate the unique cultures and experiences of American Indians; appreciate the many and important ways in which Indian peoples have changed and adapted over time; and understand the religious, racial, and cultural values that motivated European-American policies toward American Indians

HIST 377 African American Women's History (3 Credit Hours)
Course deepens students' understanding of African American History by emphasizing African American women's leadership, intellectualism, challenges, and social impact. Covering multiple eras from slavery, the civil rights movement to the present-day and difficult topics (including sexual assault), the course examines the diverse experiences of historically marginalized black women.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students become familiar with multiple important African American historical figures; increase their understanding of intersectionality (race, gender, sexuality, class) in American history; and gain essential research skills

HIST 378 Latina/o History (3 Credit Hours)
This course introduces the history of Latinos in the United States from the Spanish Colonial period to the present.
Interdisciplinary Option: Latin American Studies, Race and Ethnicity
Course equivalencies: X-HIST378/LASP378
Outcomes:
students will develop a greater appreciation and understanding of the important roles played by Latino men and women in U.S. society; the heterogeneity of the Latina/o population, including generational, regional, class, and gender divisions; and the formation of transnational immigrant communities

HIST 379B History of Italians in Chicago (3 Credit Hours)
The History of Italians in Chicago offers an in-depth look at one of Chicago's important ethnic groups. The course will utilize local resources and include a number of guest speakers from the fields of sociology, literature and political science.
Interdisciplinary Option: Italian American Studies, Italian Studies
Outcomes:
Students will understand the major social-economic forces shaping the history of Italians in Chicago; learn how to do primary research; see themselves and local institutions as a part of history

HIST 380 Introduction to African-American History (3 Credit Hours)
This course is a general survey of African-American history from its African origins to the Present.
Interdisciplinary Option: African Studies and the African Diaspora, Race and Ethnicity
Course equivalencies: X-HIST380/BWS 380
Outcomes:
Upon completion of this class students should have a broad understanding of African-American History from 17th to the early 21st century

HIST 380A Islam in the African-American Experience (3 Credit Hours)
This course traces the development of Islam among African Americans from West African societies prior to the trans-Atlantic slave trade to the influence of Islam on popular culture in the 21st century.
Interdisciplinary Option: African Studies and the African Diaspora, Middle East and Islamic World Studies
Course equivalencies: X-HIST380A/BWS302/IWS380
Outcomes:
Students will gain an understanding of how Islamic identity was maintained in the face of slavery, how and if African-American Muslim communities differ from their emigrant counterparts, and how black nationalist groups such as the Moorish Science Temple and Nation of Islam influenced the Islamization of black consciousness in the 20th century

HIST 381 Rebels & Reformers in U.S. History (3 Credit Hours)
This course explores the success and failure of radical political and social movements in the United States.
Interdisciplinary Option: African Studies and the African Diaspora, Peace, Justice, and Conflict Studies, Women & Gender Studies
Course equivalencies: HIST381/AFR388/PAX387/WSGS303
Outcomes:
Students will understand five major movements for social change in the United States: abolition, women's rights, socialism, peace, and the quest for racial equality

HIST 382 Teaching Race, Class, and Gender (3 Credit Hours)
What resources are there for future K-12 teachers wanting to explore the intersections of gender, race, ethnicity, and class into their classrooms and meet new requirements, like those in Chicago, to broaden the K-12 curriculum? This course is designed for primary and secondary education majors eager to explore digital resources.
Interdisciplinary Option: Latin American Studies, Sociolegal Studies, Women & Gender Studies
Outcomes:
Students will: discover a range of free, digital resources; hone their critical reading and writing skills; craft and share lesson plans and reflections; write and present a peer-reviewed research paper

HIST 384 Irish Diaspora in America (3 Credit Hours)
This course examines the origins and diversity of Irish migration to the United States since the eighteenth century.
Outcomes:
Students will use historical knowledge to develop critical thinking and communications skills about the first large American ethnic minority and its impact on the history of the United States

HIST 385 Chicago in America (3 Credit Hours)
This course surveys the history of Chicago from its origins to the present, using the city as a case study of American urbanization.
Interdisciplinary Option: Urban Studies
Course equivalencies: X-HIST385/URB385
Outcomes:
Students will be able to demonstrate historical knowledge of Chicago's environmental, economic, social, cultural, and political history, to draw links between race relations and urban change, and to develop critical thinking and communication skills

HIST 386 Creation the American Metropolis (3 Credit Hours)
This course examines the transformation of the United States from a simple agrarian and small-town society to a complex urban and suburban nation, covering the pre-Columbian period to the present.
Interdisciplinary Option: Urban Studies
Course equivalencies: X-HIST386/URB386
Outcomes:
Study history of American urbanization; improve writing and analytical thinking

HIST 388 U.S. Wars (3 Credit Hours)
This course will study United States Military history from the Revolutionary War to the War on Terror. We will study key battles, strategy, weapons and leaders. We will also focus on the individual soldier: his pay, recreation, benefits and equipment.
Outcomes:
Students will gain familiarity with the military aspects of warfare in U.S. history and the social aspects of warfare; They will be challenged to integrate those varying perspectives into a coherent synthesis of the topic

HIST 388A Vietnam War (3 Credit Hours)
This course offers a comprehensive examination of origin, execution, and failure of America's war in Vietnam.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-HIST/ASIA/PAX389/INTS388
Outcomes:
Students will understand the ancient origins of the Vietnamese nation, the rise and fall of the French colonial regime, the role of Vietnam in the Cold War, the peace movement, the political and cultural impact of the war on America, the success and failures of the United States military, the impact of the war on the Indo-China region, and the memory of the war in American culture

HIST 389B Topic: Gender, Race, & Class in US History (3 Credit Hours)
This course examines the historical interplay of gender, race and class in the lives of African-American and white women in the United States.
Interdisciplinary Option: Race and Ethnicity, Women & Gender Studies
Course equivalencies: X-HIST295/PAX295/WSGS299
Outcomes:
Students will understand critical themes and periods in the development of racism and sexism, especially the ways in which the two relate; differences and similarities in the manifestations of and reactions to racism and sexism in the lives and thought of African-American and white women of differing class backgrounds

HIST 389C Gender Benders (3 Credit Hours)
This course examines the changes in gender roles and the relationship between men and women from the colonial era to the present.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST294/WOST290/WSGS294
Outcomes:
Students will demonstrate understanding of the changing expectations about and definitions of men and women of how families were organized, how childrearing was handled, who made up the home, and how work and family production followed a sexual division of labor

HIST 389F The Sixties (3 Credit Hours)
This course focuses on the turbulent years from 1960 to 1974 in American history, a period of active social movements and foreign wars.
Outcomes:
Students will be able to demonstrate historical knowledge of American social, political, gender, and cultural change during the 1960s, to draw links between popular mobilizations, countercultures, and social change, and to develop critical thinking and communication skills

HIST 389K Autobiography and Memoir in Recent US History (3 Credit Hours)
Autobiography and Memoir in Recent US History uses personal recollections as a way to get at large themes in history. Topics include immigration, nativism, ethnicity, gender, regionalism, war, religion, and class. Students read intensively as a way of understanding how individuals live their lives within large historical forces and events. This is a writing intensive course. It is also a reading intensive course. It is run as a seminar - learning to discuss and engage with ideas is a key element.

HIST 389N Anti-Immigrant Politics in U.S. History (3 Credit Hours)
The course features studies of anti-immigrant politics sponsored by: 1. the Federalist Party (late 18th c); 2. the "Know Nothing" Party (mid-19th c); 3. the Populist Party (late 19th c); 4. the Ku Klux Klan (1920s); 5. the Republican Party (early 21st c).
Interdisciplinary Option: Italian American Studies, Latin American Studies
Outcomes:
Students will use historical perspective to deconstruct the rhetoric and analyze the socio-economic and political contexts of past and present nativist political movements

HIST 389W Races to the White House: Presidential History (3 Credit Hours)
This course aims to show how the president's election, job, power, and mystique has changed since the Founding. Students will delve into the modern primary and party system's origins, the fierce debates about the Electoral College, the controversies over executive power, the media's importance, and the first families' changing role.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will gain historical knowledge of the American presidency, federalism, and electoral politics and develop critical thinking and communication skills

HIST 390 Senior Capstone (3 Credit Hours)
Each participant will utilize the research skills, historical studies and writing abilities acquired to date to produce a significant paper based largely on historical research in primary sources and bolstered by appropriate secondary sources. Restricted to students in senior standing.
Outcomes:
Students will be able to demonstrate appropriate historical scholarship, analysis and writing skills

HIST 397 History Honors Tutorial (3 Credit Hours)
Students in this course will produce a significant research paper on a topic of their own choice (25-30 pages) based largely on primary sources through archival research and will present their work in a symposium at the end of the course.
This course satisfies the Engaged Learning requirement.
Outcomes:
Produce analytical arguments by using evidence and facts to interpret past events, behavior, and processes in your own historical research project; Identify the arguments put forth by historians in order to compare, evaluate, and criticize different interpretations of the past - In doing so, be able to evaluate the adequacy of evidence (including a variety of sources: documents, films, diaries, images, oral and digital histories, etc) that historians use to make truth claims about the past; Demonstrate an understanding of the processes of historical change and be able to discuss and evaluate causes, complexities, and consequences of change over time in relationship to historical events and processes; Demonstrate an understanding that human values and beliefs are shaped by historical context and they will gain the capacity to make informed judgements about past and present behavior and ideas with a goal of fashioning a more just world - In this endeavor, students will also gain an understanding of the ethical practices and standards for historical research and writing

HIST 398 History Internship (3 Credit Hours)
This course provides three hours credit for students engaged in history related internships in the public and private sectors.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to obtain an internship position, to learn on-the-job from an experienced practitioner in a wide variety of public and private sector settings, to draw links between their present situation and historical research, and to develop critical thinking and communication skills

HIST 399 Directed Study (1-3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest that is not part of the department's usual curriculum.
Outcomes:
Students will gain an understanding of a specific area of history through the close reading of selected texts and the preparation of a research paper

History (BA)

The History BA degree helps students develop broad and deep knowledge about the complexity and contingency of the past. History majors learn theories and read arguments that help explain both persistent continuity and enormous change in human civilizations. In courses and assignments, students learn to wrestle and unpack sources that provide the foundational evidence for interpretations of the past. Finally, the major develops skills of critical thinking, research, analysis, and communication that are essential for the modern world.

The History major prepares students for graduate and law schools as well as for careers in such fields as teaching in secondary schools, curatorial and educational positions in museums and historical associations, foreign service, library science, public administration and journalism. Moreover, history courses may be especially pertinent to students of language, business, science, or public health who wish to learn the traditions of other nations and cultures.

Curriculum

The major in history consists of a total of twelve (12) courses (36 hours) and a portfolio, detailed below.

Code	Title	Hours
Introductory Courses		
Select two courses, one from each of the following categories:		
Tier 1 Foundational Historical Knowledge		*3*
HIST 101	Culture, Power and Identity: Western Ideas & Institutions to 17th Century	
HIST 102	Culture, Power and Identity: Western Ideas & Institutions from 17th Century	
HIST 103	American Pluralism	
HIST 104	Global History Since 1500	
HONR 101	Western Traditions - Antiquity to the Middle Ages	
HONR 102	Western Traditions-Renaissance to Modernity	
Tier 2 Historical Knowledge		*3*
HIST 208	East Asian History: Themes & Issues	
HIST 209	Islamic History: Themes & Issues	
HIST 210	Latin American History: Themes & Issues	
HIST 211	US History to 1865: Themes & Issues	
HIST 212	US History since 1865: Themes & Issues	
HIST 213	African History: Themes & Issues	
Selected Honors Courses: HONR 203, HONR 208, HONR 209, HONR 210, HONR 212		
Methods Courses		
Select one of the following:		3
HIST 299	Historical Methods [1]	
INDS 380	Newberry Seminar [2]	
Required Areas		
Select four Upper-Level Courses, one from each of the following:		12
Upper-Level Pre-Modern History (p. 493) (see descriptions below)		
Upper-Level Modern European History (p. 494) (see descriptions below)		
Upper-Level U.S. History (p. 494) (see descriptions below)		
Upper-Level World History (p. 494) (see descriptions below)		
Elective Courses		
Select any five (5) history courses at any level: [3]		15
HIST 101 - HIST 399 [4]		
CLST 362	Roman Law	
ECON 327	American Economic & Business History	
THEO 317	Christian Thought: Ancient-Medieval	
THEO 318	Christian Thought: Reformation to Modern	
Selected Honors Classes: HONR 101, HONR 102, HONR 203, HONR 208, HONR 209, HONR 210, HONR 212		
Total Hours		**36**

1. To register for HIST 299 Historical Methods Historical Methods, please contact the History Department Administrative Assistant.
2. For information on the Newberry Seminar, please contact Dr. Shermer at eshermer@luc.edu.
3. One of which can be HIST 398 History Internship.
4. Any 100-Level, 200-Level, or 300-Level course can count toward the electives if not used for another requirement in the major. See History Courses (p. 476) for a complete list.

Required Areas: Upper-Level Pre-Modern History Courses

Code	Title	Hours
Students must take at least one of the courses below as part of the Required Areas		
HIST 253A	Barbarians and the Fall of the Roman Empire	3
HIST 254A	The Vikings	3
HIST 257A	Witchcraft and Science in Pre-Modern Europe	3
HIST 258A	Blood, Heresy, and Treason: The Tudors and Stuarts	3
HIST 300B	Topics in Premodern History	3

HIST 307	Greece to Alexander the Great	3
HIST 308A	History of Rome to Constantine	3
HIST 308B	Pompeii and Herculaneum	3
HIST 308C	History of Early Christianity	3
HIST 308D	Transformations of Rome in Late Antiquity	3
HIST 309	Shipwreck Archaeology	3
HIST 310	The Middle Ages	3
HIST 310A	Medieval World 1100-1500	3
HIST 310B	Medieval Culture	3
HIST 310C	Medieval Women	3
HIST 310D	Medieval Popular Religion	3
HIST 310F	Medieval Inquisitions and Heresy	3
HIST 310G	Supernatural in the Middle Ages	3
HIST 310L	Love and Violence in Medieval Culture and Society	3
HIST 311B	The Crusades: Christianity and Islam	3
HIST 312	England to 1485	3
HIST 314	Renaissance	3
HIST 314A	The Jesuits: Life and History	3
HIST 315	The Reformation	3
HIST 316	History of Poland	3
HIST 317	Age of Absolutism & the Enlightenment	3
HIST 318A	Early Modern England 1485-1760	3
HIST 318B	English Social History 1450-1750	3
HIST 318C	London 1550 - 1715	3
HIST 342A	African History to 1600	3
HIST 345A	Traditional China from Antiquity to 1550	3

CLST 362	Roman Law	3
THEO 317	Christian Thought: Ancient-Medieval	3

Required Areas: Upper-Level Modern Europe Courses

Code	Title	Hours
Students must take at least one of the courses below as part of the Required Areas		
HIST 265A	The First World War	3
HIST 267A	Modern German Culture and Ideas I	3
HIST 267B	Modern German Culture and Ideas II	3
HIST 300C	Topics in European History (Post-1700)	3
HIST 320	Era French Revolution & Napoleon	3
HIST 321	19th Century European Culture and Ideas	3
HIST 322	Modern France: From Empire to Postcolonial Nation	3
HIST 324	Italy 19th & 20th Centuries	3
HIST 325	Modern Britain: Empire, Industry, Democracy	3
HIST 325A	The British Empire: From Barbados to Brexit	3
HIST 326	Ireland: Colony to Nation State	3
HIST 327A	The Balkans: History, Fiction, Film	3
HIST 328	Russia Pre-1917: Empire Building	3
HIST 328A	Russian Empire and Literature	3
HIST 329	Women's Sphere in Past Society	3
HIST 329C	Empire, Sex, Violence: European Colonial History	3
HIST 329N	Modern European Nationalism: Myth and Reality	3
HIST 330	Europe in the Age of Catastrophe, 1900-1945	3
HIST 330F	Fascinating Fascism: 1919 to the Present	3
HIST 331A	Food, Hunger, and Power in the Modern World	3
HIST 334A	The Nazi Revolution	3
HIST 334B	The Holocaust: History and Memory	3
HIST 335	The Second World War	3
HIST 336	Contemporary Europe 1945 to Present	3
HIST 337	Rise & Fall of Soviet Union	3
HIST 337A	Women in Russia and Eurasia, 1860-Present	3
HIST 338A	History of European Communism	3
HIST 338B	Eastern Europe in the 20th Century	3
HIST 339C	Modern Europe and the Arts	3
HIST 339F	History of Feminist Thought and Social Action	3
THEO 318	Christian Thought: Reformation to Modern	3

Required Areas: Upper-Level World History Courses

Code	Title	Hours
Students must take at least one of the courses below as part of the Required Areas		
HIST 275A	The Silk Roads: Global Trade, Culture, & Politics	3
HIST 279C	History of Computing	3
HIST 279E	Climate and History	3
HIST 300E	Topics in World History	3
HIST 340B	Introduction to Islamic History	3
HIST 341	Modern Middle East	3
HIST 341B	Arab-Israeli Conflict	3
HIST 341C	Tunisia On-Site: Arab Spring, Democratic Change, Islam	3
HIST 342B	African History Post-1600	3
HIST 342C	The History of Islam in Africa	3
HIST 342D	African Diaspora in the Middle East and South Asia	3
HIST 342M	African Music's Influence on American Music	3
HIST 343	Modern South Asia	3
HIST 346A	Early Modern China: 1550-1800	3
HIST 346B	Reform & Revolution in China, 1800-1949	3
HIST 346C	History of Christianity in China	3
HIST 347A	China Since 1949: The People's Republic	3
HIST 347C	Cultural Revolution-China	3
HIST 347D	Modern Chinese History through Film	3
HIST 349	Contemporary Global Issues: Historical Perspectives	3
HIST 349A	Women in East Asia	3
HIST 350	Colonial Latin America	3
HIST 351	Latin American Independence, 1750-1830	3
HIST 352	Latin America in the 19th Century	3
HIST 353	Latin America in Recent Times	3
HIST 355	The Caribbean & Central America in Colonial/ Modern Times	3
HIST 356	Mexican History-Ancient to Modern Times	3
HIST 357	The Mexican Revolution in Popular Imagination	3
HIST 358	Women in Latin American History	3
HIST 359	Teaching World History	3
HIST 359D	The Ottoman Empire: A Global Perspective	3
HIST 359E	Concentration Camps: A Global History	3
HIST 359F	Genocides in the Modern World	3
HIST 359H	Anti-Colonial Resistance in the Twentieth Century	3

Required Areas: Upper-Level U.S. History Courses

Code	Title	Hours
Students must take at least one of the courses below as part of the Required Areas		
HIST 280A	Pirates and Sailors in the Revolutionary Atlantic	3
HIST 290A	History of Sexuality in the United States	3
HIST 291A	American Icons: Heroes, Images, Ideas	3

HIST 389F	The Sixties	3
HIST 389K	Autobiography and Memoir in Recent US History	3
HIST 389N	Anti-Immigrant Politics in U.S. History	3
HIST 389W	Races to the White House: Presidential History	3
ECON 327	American Economic & Business History	3

Optional Concentrations

History Majors have the option to declare a concentration, an area of interest. A concentration consists of at least three courses focused on a particular theme. Concentrations include: War & Peace; Law & Government; Gender, Sexuality, & Race; Teaching History; Globalization, Social Justice, & Human Rights; and Cultural & Intellectual History

Students may also build their own geographic or period-based concentration in consultation with their departmental adviser.

Portfolio

Every history major must build a portfolio over the course of his/her undergraduate studies. The student must upload the **two required documents** listed below to a History Department website by Friday of the last week of classes prior to graduation. For more information, please contact the History Department Undergraduate Program Director. The required documents are:

1. **A historiographical essay (typically a paper from** HIST 299 Historical Methods**).** This paper must both summarize and evaluate historians' principal arguments about a particular topic.
2. **A 300-level Research Paper with a *bibliography*.** This paper --- a minimum of 12-15 pages, usually from a 300-level course --- makes use of both primary and secondary sources to prove a historical thesis. All good historical writing has a thesis that the author seeks to establish through interpretation of the primary source evidence. In lieu of uploading a 300-level research paper, students have the option of submitting a platform appropriate project such as a public history or digital history project that makes an analytical argument based on both primary and secondary sources to prove a historical thesis.

Students should submit papers or projects that showcase their best work.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. While there is no set sequence of classes, students are encouraged to take at least two Introductory (Core) Courses before taking upper division classes. It is strongly suggested that students take HIST 299 Historical Methods at the end of their sophomore or beginning of their junior year. Once students have declared the major, they are encouraged to contact their History Advisor or the History Department's Undergraduate Program Director, Kelly O'Connor at kocon6@luc.edu for further guidance on how best to progress with their studies.

Residency Requirements

- At least 6 courses for this major must be successfully completed in residence at Loyola University Chicago.
- At least 4 300-level courses for this major must be successfully completed in residence at Loyola University Chicago.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Produce analytical arguments by using evidence and facts to interpret past events, behavior and processes in their own historical writing and projects.
- Identify the arguments put forth by historians in order to compare, evaluate and criticize different interpretations of the past. In doing so, our graduates will be able to evaluate the adequacy of evidence (including a variety of sources: documents, films, diaries, images, oral and digital histories, etc.) that historians use to make truth claims about the past.
- Demonstrate an understanding of the processes of historical change and be able to discuss and evaluate causes, complexities and consequences of change over time in relationship to historical events and processes.
- Demonstrate an understanding that human values and beliefs are shaped by historical context and they will gain the capacity to make informed judgements about past and present behavior and ideas with a goal of fashioning a more just world. In this endeavor, students will gain an understanding of the ethical practices and standards for historical research and writing.

History Minor

The minor in history, in conjunction with a major in a related field, will provide historical understandings desirable for a well-grounded liberal arts degree, the preferred background for admission to most professional programs.

In this endeavor, students will gain an understanding of the ethical practices and standards for historical research and writing.

Honors in History

Honors Program

The Department of History's honors program recognizes the work of outstanding History Majors and gives them an opportunity to dig deeper in the discipline. It is not the same as collegiate honors, and students do not need to belong to collegiate honors in order to participate in this program. Students are invited to apply to the history honors program during their junior year. The qualifications for the program are as follows:

- History major
- 3.67 GPA in history courses
- 3.50 overall GPA
- Completion of HIST 397 History Honors Tutorial

The required GPAs include courses taken elsewhere if the credits have been transferred. The major with History Honors consists of a total of twelve (12) courses (36 hours). HIST 397 History Honors Tutorial is typically offered in the Fall Semester. Students are invited to take the Tutorial at the end of their sophomore and/or junior years. The Tutorial involves writing a research paper, based on primary sources, of about 20–30 pages. The results of this research are presented in a short oral presentation at a final class to which friends, family, and other faculty are invited.

Here is the honors history major program in schematic form:

Code	Title	Hours
Introductory (Core) Courses		
Select two courses, one from each of the following categories:		**6**
Tier 1 Foundational Historical Knowledge		
HIST 101	Culture, Power and Identity: Western Ideas & Institutions to 17th Century	
HIST 102	Culture, Power and Identity: Western Ideas & Institutions from 17th Century	
HIST 103	American Pluralism	
HIST 104	Global History Since 1500	
HONR 101	Western Traditions - Antiquity to the Middle Ages	
HONR 102	Western Traditions-Renaissance to Modernity	
Tier 2 Historical Knowledge		
HIST 208	East Asian History: Themes & Issues	
HIST 209	Islamic History: Themes & Issues

ECON 327	American Economic & Business History	3

Residency Requirements

- At least 6 courses for this major must be successfully completed in residence at Loyola University Chicago.
- At least 4 300-level courses for this major must be successfully completed in residence at Loyola University Chicago.

Optional Concentrations

History Majors have the option to declare a concentration, an area of interest. A concentration consists of at least three courses focused on a particular theme. Concentrations include: War & Peace; Law & Government; Gender, Sexuality, & Race; Teaching History; Globalization, Social Justice, & Human Rights; and Cultural & Intellectual History

Students may also build their own geographic or period-based concentration in consultation with their departmental adviser.

Portfolio

Every history major must build a portfolio over the course of his/her undergraduate studies. The student must upload the **two required documents** listed below to a History Department website by Friday of the last week of classes prior to graduation. For more information, please contact the History Department Undergraduate Program Director. The required documents are:

1. **A historiographical essay (typically a paper from** HIST 299 Historical Methods**).** This paper must both summarize and evaluate historians' principal arguments about a particular topic.
2. **A 300-level Research Paper with a *bibliography*.** This paper --- a minimum of 12-15 pages, usually from a 300-level course --- makes use of both primary and secondary sources to prove a historical thesis. All good historical writing has a thesis that the author seeks to establish through interpretation of the primary source evidence. In lieu of uploading a 300-level research paper, students have the option of submitting a platform appropriate project such as a public history or digital history project that makes an analytical argument based on both primary and secondary sources to prove a historical thesis.

Students should submit papers or projects that showcase their best work.

Human Services

About Us

Social and human services assistant is a generic term for individuals with a wide variety of job titles, including human services worker, case management aide, social work assistant, community support worker, mental health aide, community outreach worker, life-skills counselor or gerontology aide.

Human services assistants provide direct and indirect client services to ensure that individuals in their care reach their maximum level of functioning. They assess clients' needs, establish eligibility for public benefits and help clients obtain them, arrange for transportation and escorts, monitor and keep case records, organize and lead group activities, assist clients in need of counseling or crisis intervention, administer food banks and emergency fuel programs, help clients with daily living and communication skills, and provide emotional support.

Although the human services field is broad and diverse, it is unified by the goal of meeting human needs by applying an interdisciplinary base of knowledge and skills, focusing on prevention as well as remediation of problems, and improving the overall quality of life of individuals, families and communities through direct services to clients. The human services profession also promotes improved service delivery systems by addressing the quality of direct services provided and by seeking to improve accessibility, accountability and coordination among professionals and agencies in delivering human services.

Undergraduate Programs

- Human Services (BS) (p. 500)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Human Services (HMSV)

HMSV 101 Survey of Human Services (3 Credit Hours)
Survey of Human Services will cover basic concepts and models of service delivery in the field. Primary emphasis will be on the growth and evolution of the field, types of services and needy populations, and issues that affect the delivery of human services in the United States.
Interdisciplinary Option: Human Services

HMSV 201 Human Services Practice (3 Credit Hours)
The purpose of this course is to prepare students for their future work in HMSV agencies and to introduce them to HMSV clients. The course will teach students about the basic issues that face HMSV providers and will help them put a human face on HMSV clients. In addition, the course will emphasize the importance of client diversity in formulating assessment and case management strategies for HMSV clients.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.

HMSV 390 Supervised Fieldwork II (6 Credit Hours)
No course description is available
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.

Human Services (BS)

Note: As of Fall 2026, this program is no longer accepting students.

The BS in Human Services degree program is a 45-credit-hour multidisciplinary program that draws courses from five Loyola departments: criminal justice, political science, psychology, sociology and social work.

Emphasizing Loyola's Jesuit, Catholic mission of knowledge in the care and service of others, coursework focuses on laying a strong foundation in the liberal arts and sciences while sharpening students' applied skills. Located near numerous human services organizations and professionals, the program takes full advantage of Chicago's many resources for students.

Total Hours		**45**

Major Specific Requirements

In keeping with Loyola's principles of values-based education, students take two service-learning courses. These classes, which pair classroom learning with active service in the community, may be selected from the list of basic, concentration or elective courses, or from courses outside the major.

Students obtain hands-on experience through two required fieldwork courses. A three-hour course introduces students to the operations of human services agencies, the mechanics of service delivery and the fundamentals of client contact. A six-hour course immerses students in agencies for more extensive and in-depth skills training and direct client contact.

To further ensure that the education of students will be both well-rounded and content-specific, all human services majors are required to minor in one of the major's five constituent fields: criminal justice, political science, psychology, sociology or social work. Also, students must take at least one course from each of these five departments; and for students who double major in human services and one of these departments, no more than six courses may count for both majors.

In addition to fulfilling major requirements to earn an undergraduate degree (usually 120 credit hours), students complete Loyola's Core Curriculum (p. 989), which teaches them important skills and values, and develop their own interests by taking general electives.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Interdisciplinary Honors Program

Academics

Interdisciplinary in design and international in scope, Loyola's Honors Program offers a dynamic general education that enables our students to bring many perspectives to real world problem-solving, in the Jesuit tradition. Faculty craft intensive courses that refine analytical and communication skills. The formal curriculum is supplemented with many cultural excursions and service opportunities.

Requirements

- The program requires 27 credit hours (9 classes) of honors courses.
- All honors courses must be completed with a grade of "C" or better.
- Students must have an overall GPA of 3.33 or better to graduate with honors.
- For more information on core requirements, visit Honors and the Core (p. 999).

Honors courses differ in structure and content from non-honors courses, and these courses are offered in a sequence. Honors students must complete the following courses:

Code	Title	Hours
Course Requirements		
HONR 101 & HONR D101	Western Traditions - Antiquity to the Middle Ages and Developments Western Thought I Discussion [1]	6
HONR 102 & HONR D102	Western Traditions-Renaissance to Modernity and Developments in Historical Western Thought II Discussion [2]	6
U.S. Experience (Anytime after 1st year) [3]		**3**
HONR 203	The United States Experience	3
Science and Society (Choose one of the following) [3]		**3**

HONR 204	Science and Society	3
Area Studies (Two of the following courses anytime after 1st year) [3]		**6**
HONR 208	Encountering Latin America and the Caribbean	3
HONR 209	Encountering Asia	3
HONR 210	Encountering Africa	3
HONR 212	Encountering the Middle East	3
HONR 216	Encountering Contemporary Europe	3
Capstone [4]		
HONR 301	Honors Capstone: Moral Responsibility	3

1 Course taken Fall Freshman Year.
2 Course taken Spring Freshman Year.
3 Course taken any time after 1st year. Students can take HONR 203, HONR 204, and the area studies in any order they desire.
4 Course taken 2nd semester of Junior year or during Senior year. Student must have 75 or more credit hours.

Program Description

Since 1936, the Honors Program has provided an enriched educational experience for the university's most talented students. Only a small percentage of freshmen are invited into the program each year. Honors students are academically and professionally aspirational and ethical leaders in their communities.

The Curriculum

Interdisciplinary in design and international in scope, Loyola's Honors Program offers a dynamic general education that enables our students to bring many perspectives to real world problem-solving, in the Jesuit tradition. Faculty craft intensive courses that refine analytic and communication skills. The formal curriculum is supplemented with many cultural excursions and service opportunities. You can read more about our award-winning teaching faculty on our website (https://www.luc.edu/honors/).

The Benefits

As an Honors student, you will come into contact with Loyola's most effective teachers, our most exciting researchers, and, of course, our most talented students. You'll benefit from priority registration each semester; individualized advising; small class sizes; and faculty mentorship. As the highest academic distinction awarded by the university, the Honors Degree commands special acknowledgement. Candidates are identified separately in the commencement program, and the official transcript identifies all Honors courses.

The Freshman Year Experience

Honors Freshmen are housed at Francis Hall and Regis Hall, modern facilities located on the southern end of campus, close to the lake and the city. In residence, you'll have many opportunities to connect intellectually and socially with students majoring in fields from across the university and joining us from across the US and the globe. Together, you and your friends will make your way through the Honors Freshman Seminars, reading Darwin's *The Origin of Species* and visiting the Art Institute of Chicago as a group. You can learn more about the freshman Honors residence experience here (https://www.luc.edu/honors/community/honorsresidenceexperience/).

For more information on our dynamic community and program, look through the online issues of the Honors Magazine (https://www.luc.edu/honors/honorsmagazine/).

University Policies

Please see University Policies for academic policies that supersede those of academic units within the University

Honors (HONR)

HONR D101 Developments Western Thought I Discussion (3 Credit Hours)
This is the discussion section that complements the Honors Freshman lecture course on the Western Intellectual Traditions: Antiquity to the Middle Ages. All students enrolled in HONR 101 must also be enrolled in a section of HONR D101.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-HONRD101/CATH101D

HONR D102 Developments in Historical Western Thought II Discussion (3 Credit Hours)
This is the discussion section that complements the Honors Freshman lecture course on the Western Intellectual Traditions: the Renaissance to Modernism. All students enrolled in HONR 102 must also be enrolled in a section of HONR D102.

HONR 101 Western Traditions - Antiquity to the Middle Ages (3 Credit Hours)
This course,(and its companion, HONR 102), opens perspectives on works that have shaped the self-understanding of the Western intellectual tradition. An interdisciplinary team of professors examines these works from a variety of disciplinary paradigms. Students will examine the recurring questions the works pose to each other and to our own culture: questions about the nature of human existence and destiny, and the characteristic problems and possibilities of humanity's struggle for justice, search for truth and hunger for beauty. These courses are structured as three hours of lecture and three hours of seminar each semester.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-HONR10/CATH102
Outcomes:
Studying a selection of major works from antiquity to the present, students learn how each text reflects its own period, how texts within each period present different views, and how ideas change over time; Written and visual expressions of these themes are examined in relation to the political and cultural background of each period: Ancient Greece and Rome, the Middle Ages, the Renaissance, the Enlightenment, the Romantic Period and modernism

HONR 102 Western Traditions-Renaissance to Modernity (3 Credit Hours)
This course (and its companion, HONR 101) opens perspectives on works that have shaped the self-understanding of the West. An interdisciplinary team of professors examines these works from a variety of disciplinary paradigms. Students will examine the recurring questions the works pose to each other and to our own culture: questions about the nature of human existence and destiny, and the characteristic problems and possibilities of humanity's struggle for justice, search for truth and hunger for beauty. These courses are structured as three hours of lecture and three hours of seminar each semester.
Outcomes:
Studying a selection of major works from antiquity to the present, students learn how each text reflects its own period, how texts within each period present different views, and how ideas change over time; Written and visual expressions of these themes are examined in relation to the political and cultural background of each period: Ancient Greece and Rome, the Middle Ages, the Renaissance, the Enlightenment, the Romantic Period and modernism

HONR 203 The United States Experience (3 Credit Hours)
Pre-requisites: HONR 101, HONR D101, HONR 102, HONR D102
Restricted to students in the Honors Program This course examines the formation and development of the United States. Focusing on selected topics, students learn how much is at stake in competing versions of the past. Students read influential political, literary and historical texts. Professors will introduce students to various ways of understanding the United States experience.
Outcomes:
Students will be able to demonstrate an understanding of the various ways in which the distinctive U.S. experience has been presented; Students will learn to use available public sources to conduct research on aspects of the American experience

HONR 204 Science and Society (3 Credit Hours)
Pre-requisites: Prerequisite HONR 101, HONR D101, HONR 102, HONR D102
Restricted to Honors students. Students will examine the ways natural science and social science address a particular issue as well as the effects of science on society. They will study scientific ways of knowing and organizing knowledge, and demonstrate the capacity to make reasoned and ethical judgments about the impact of science on society.
Outcomes:
Students will learn scientific principles and methods of producing knowledge and to make reasoned and ethical judgments about the impact of science on the individual, community and society

HONR 208 Encountering Latin America and the Caribbean (3 Credit Hours)
Pre-requisites: Completion of HONR 101, HONR D101, HONR 102, and HONR D102
Restricted to students in the Honors Program. This course introduces students to the history and culture of selected nations of Latin America and the Caribbean. Students will study significant ideas and events that have shaped this area. These might include indigenous cultures, colonization, slavery, race relations, independence and revolutionary movements, economic dependency and political instability.
Interdisciplinary Option: Global Studies
Outcomes:
Students will understand the relationships among cultural, economic, political, and social forces, and their impact on human behavior; Students will become aware of variations in human values and behavior, ideas of justice, and shared understandings in unfamiliar cultures

HONR 209 Encountering Asia (3 Credit Hours)
Pre-requisites: Completion of HONR 101, HONR D101, HONR 102, and HONR D102; Restricted to students in the Honors Program
This course will introduce students to various regions in Asia and some of the fundamental components of Asian civilizations as they have evolved historically and persist in the modern world. Regions might include East, South and Southeast Asia.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will learn different methods of interpreting cultural, economic, political, and social forces, and their impact on human behavior; Students will become aware of variations in human identities and values, ideas of justice, and shared understandings in unfamiliar cultures

HONR 210 Encountering Africa (3 Credit Hours)
Pre-requisites: Completion of HONR 101, HONR D101, HONR 102, and HONR D102; Restricted to students in the Honors Program
This course introduces students to various regions in Africa and some of the fundamental components of African civilizations as they have evolved historically and persist in the modern world. These might include classical African civilizations, origins of the slave trade, agriculture, ethnicities, colonialism, nationalism, the modern state.
Interdisciplinary Option: Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will learn different methods of interpreting cultural, economic, political, and social forces, and their impact on human behavior; Students will become aware of variations in human identities and values, ideas of justice, and shared understandings in unfamiliar cultures

HONR 212 Encountering the Middle East (3 Credit Hours)
Pre-requisites: Completion of HONR 101, HONR D101, HONR 102, and HONR D102; Restricted to students in the Honors Program
This course introduces students to various regions in the Middle East and some of the components of selected civilizations in this region as they have evolved historically and persist in the modern world. Topics might include monotheistic religions, the Ottoman Empire, Islamic culture, creation of the modern system of states after the First World War, the place of women in Middle Eastern societies, urban and rural cultures, the political and economic consequences of water scarcity and oil wealth.
Interdisciplinary Option: Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will learn different methods of interpreting cultural, economic, political, and social forces, and their impact on human behavior; Students will become aware of variations in human identities and values, ideas of justice, and methods of interpretation in unfamiliar cultures

HONR 216 Encountering Contemporary Europe (3 Credit Hours)
Pre-requisites: Completion of HONR 101, HONR D101, HONR 102, and HONR D102; Restricted to students in the Honors Program
This course introduces students to selected areas of Europe as they have evolved since World War II. Topics might include Europe's cultural history, nationalism, the European Union, immigration, economic development, and political life. Professors introduce students to various ways of approaching an area with many languages, ethnicities, nation-states and religions.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will learn different methods of interpreting cultural, economic, political, and social forces, and their impact on human behavior; Students will become aware of variations in human identities and values, ideas of justice, and shared understandings in unfamiliar cultures

HONR 290 Literacy Center (3 Credit Hours)
Pre-requisites: Students in or beyond their second semester; UCWR 110 or equivalent
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program. Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills.
This course satisfies the Engaged Learning requirement.

HONR 301 Honors Capstone: Moral Responsibility (3 Credit Hours)
This course is the capstone of the Interdisciplinary Honors Program and may be taught from the disciplinary perspectives of philosophy or theology. Students will be able to analyze ethical theories and to apply principles of ethical reasoning and individual moral responsibility to contemporary social issues and questions that arise in everyday life. Students must have 75 credit hours or more to enroll.
Knowledge Area: Ethics

HONR 370 Fieldwork in Honors - Internship (1-3 Credit Hours)
The main goal of this course is to provide students with valuable work experience in a professional field connected with their academic program. It allows students to apply and further develop their knowledge and skills through an internship in a non-academic setting. The course is also intended to serve as a "bridge" between college and career. This internship presents an opportunity for students to gain valuable professional experience as an intern in public or private institutions engaged in public service projects. HONR 370 will satisfy the "service" requirement for all Honors students.
This course satisfies the Engaged Learning requirement.

Latin American and Latino Studies Interdisciplinary Program

Our Minor Program offers an array of courses across disciplines dedicated to the study of the region of Latin America, the Caribbean, and the Latinx experience in the United States. With just six courses, students can enhance and deepen their undergraduate education at Loyola with a Hispanic / Latin@ American twist.

Undergraduate Programs

- Latin American and Latino Studies Minor (p. 504)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Latin American and Latino Studies (LASP)

LASP 196 Topics in Latin American Studies: Introductory (3 Credit Hours)
This is the 100-level special topics course. It is interdisciplinary in nature, and it may cover a wide variety of issues and topics related to Latin America and to Latinos in the U.S.
Outcomes:
Students who successfully finish this class will be able to demonstrate understanding of the topics covered in class, as shown in exams, papers, and other assignments designed to evaluate students

LASP 297 Special Topics (3 Credit Hours)
This is the 200-level special topics course. It is interdisciplinary in nature, and it may cover a wide variety of issues and topics related to Latin America. Topics will vary from semester to semester.

LASP 395 Capstone in Latin American Studies (3 Credit Hours)
Topics in Latin American Studies. Completes the minor in Latin American studies. This tutorial course serves an integrative purpose, requiring the student to focus on a specific issue or theme in Latin American studies research. Each student completes a research project integrating Latin American studies and his/her major field.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: LASP395/INTS395A

LASP 396 Topics in Latin American Studies-Advanced (3 Credit Hours)
This is the advanced special topics course. It is interdisciplinary in nature, and it may cover a wide variety of issues and topics related to Latin America and to Latinos in the U.S.
Outcomes:
Students who successfully finish this class will be able to demonstrate a more complex and nuanced understanding of the topics covered in class, as shown in exams, papers, and other assignments designed to test students at an advanced level

Latin American and Latino Studies Minor

As of Fall 2026, this minor is no longer accepting students.

Loyola University Chicago offers a minor in Latin American and Latino Studies.

Related Programs

Minor

- Spanish Language Minor (p. 564)
- Spanish Language and Literature Minor (p. 563)

Curriculum

To complete a minor in Latin American and Latino Studies students must complete 18 credit hours with an additional language competency requirement and the completion of an ePortfolio their senior year.

Code	Title	Hours
Language Requirement [1]		
Completion of SPAN 104 with a C- or better -or- passing a Language Competency Exam at or beyond the SPAN 104-level.		
Required Foundational Courses		**6**
Select two of the following:		
HIST 210	Latin American History: Themes & Issues	
ANTH 211	Peoples of Latin America	
SPAN 352	Masterpieces of Latin American Literature	
PLSC 343	Latin American Politics	
Electives (p. 505) [2]		**12**
See elective list below		
Total Hours		**18**

[1] Demonstration of language competency does not form part of the required 18 credit hours for this minor.

[2] No more than two elective courses can be taken from the same department

LASP Minor Electives

Code	Title	Hours
ANTH 211	Peoples of Latin America	3

SPAN 389	Latin American Short Story	3
SPAN 390	Latin American Culture and Civilization	3
SPAN 397	Topics in Hispanic Literature	3
THEO 330	Liberation Theology	3

ePortfolio Requirement

ePortfolio to be completed by the 13th week of the student's final semester. Graduating LASP students will present their ePortfolio at the *LASP ePortfolio Tertulia*. This reflective LASP ePortfolio will follow LUC ePortfolio Program (http://www.luc.edu/experiential/eportfolio/).

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Sophomore

	Hours	**3**
	Total Hours	**18**

Transfer-Student Residency Requirement

At least 9 credit hours of LASP-MINR requirements (excluding language course requirements) must be completed at Loyola.

Double-Dipping Policy

This department observes the CAS Double-Dipping Policy (https://www.luc.edu/cas/double-dippingpolicy/) regarding unique credits required for each declared major/minor. Not less than 9 credit hours in the individual student's transcript must be unique to each minor; that is, the courses in question are considered as actually fulfilling requirements of one minor, not of more than one minor or major.

Learning Outcomes

Upon graduating, students from our interdisciplinary undergraduate Latin American and Latinx Studies Program will be able to:

- Gain an appreciation for the cultural, economic, and ethnic diversity of Latin America and US Latinx communities by studying several academic disciplines from all LUC campuses which include, but are not limited to Anthropology, Communication, Sociology, History, Modern Languages and Literatures, Philosophy, Political Science, Women's Studies/Gender Studies, and Theology.
- Engage with the integrative, multidisciplinary nature of Latin American and US Latinx Studies and articulate how it is a connected to other interdisciplinary fields of study.
- Recognize the value of studying from an intersectionality perspective and intercultural framework while achieving a better understanding of the Latin American region and the growing US Latinx communities.
- Develop knowledge and identify key Latin American/US Latinx issues, including, but not limited to social (in)justice, mestizaje, (im)migration, language and identity, neo/postcolonialism, gender

and sexuality studies, grassroots movements, popular culture, and political resistance.
- Increase oral and written Spanish and/or Portuguese language proficiency.
- Prepare for graduate study and for work in professional fields both in the US and in Latin America.

Mathematics and Statistics

About Us

The Department of Mathematics and Statistics offers a wide variety of undergraduate and graduate degree programs designed for students with diverse career or higher educational goals. The faculty assists students achieve these goals with up-to-date courses, seminars, and research or internship projects. Our faculty members maintain highly productive research programs which regularly result in publications in leading journals and academic presses. Much of the faculty research is supported by external agencies. The faculty is also actively engaged in modernizing our elementary course offerings both in content and in the use of technology.

Mission

The Department of Mathematics and Statistics at Loyola University Chicago, in the College of Arts and Sciences, supports the Jesuit ideal of knowledge in the service of humanity. The department endeavors to advance knowledge in mathematics and statistics, engaged with Chicago, the nation and the world. To achieve this mission, the department participates in the discovery, development, demonstration and dissemination of professional knowledge and practice within a context of professional ethics and service to others.

Beyond honing students' analytical skills, the mathematics and statistics curricula also foster critical thinking and the ability to articulate it... skills that are in high demand in many diverse fields.

Commitment to Diversity, Equity, and Inclusion

The Department of Mathematics and Statistics will work to ensure that we invest in each student's success, sense of belonging, and cultural competency. We will strive to engage, empower, inform, and hold our faculty and students accountable for fostering an environment where every person shares in the responsibility for advancing diversity and inclusive excellence. Likewise, the department decisions and policies will be crafted with these goals in mind. We commit to this mission recognizing a definition of diversity that includes, but is not limited to, race, ethnicity, color, religion, national or ethnic origin, sex, age, military/veteran status, disability, marital status, sexual orientation, gender identity and expression, socio-economic background, and residency.

Mathematics and Statistics Department Policies

Registration Restrictions

Students who have successfully completed (with a grade of C- or higher) any 100-level course are not permitted to take or repeat a prerequisite of such course without explicit permission from the Chair or Assistant Chair of the Department of Mathematics and Statistics. For example, a student who earned a grade of B in MATH 161 Calculus I is not permitted to register for MATH 100 Intermediate Algebra, MATH 117 Precalculus I or MATH 118 Precalculus II.

Prerequisite Policy

A student's lack of appropriate course prerequisites constitutes **grounds for withdrawal** from the class at any time.

AP Course Credit Policies

Students may receive credit for the following courses if they earn an appropriate score on an Advanced Placement Test offered by the College Board (https://www.collegeboard.org/).

AP Calculus

Credit for the AP Calculus exams will be awarded as follows:

- 4–5 on AB Calculus Exam 4 credits for MATH 161 Calculus I;
- 4–5 on BC Calculus Exam 8 credits for MATH 161 Calculus I and MATH 162A Calculus II, Alternate;
- 4–5 on AB portion of BC Calculus Exam 4 credits for MATH 161 Calculus I.

AP Statistics

A score of 4 or 5 results in credit for STAT 103 Fundamentals of Statistics.

Policy on Multiple Majors or Minors

The following modifies and clarifies the "Double-Dipping" policy (https://www.luc.edu/cas/double-dippingpolicy/) of the College of Arts & Sciences, as it pertains to the Department of Mathematics & Statistics.

Most combinations of majors or minors are allowed. In particular, combinations of majors will be permitted as long as students respect the College of Arts & Sciences policy that each major should include 21 credit hours not being counted for another major, along with the following restrictions specific to the Department of Mathematics & Statistics:

1. MATH-BS *may* be paired with TPAM-BS, but **may not** be earned together with a *double-major* in TPAM-BS plus any Physics major (*e.g.*, BPHY-BS, PCSC-BS, PHYS-BS)
2. MATH-BS *may* be paired with MSCS-BS, but **may not** be earned together with a *double-major* in MCSC-BS plus any Computer Science major.
3. DSCI-BS *may* be paired with either STAS-BS or a computer science major, but not with a double major in statistics and computer science.

All Minors offered by the department must contain at least 6 credit hours at the 200 level or above not used to satisfy requirements of any other major or minor, and at least three of these must be at the 300 level. This

condition may be met by taking additional electives, if necessary, from the electives list for the minor. Furthermore, the following combinations are not allowed. All other combinations are allowed provided they meet the above criteria

- ACTU-MINR **may not** be earned together with STAS-BS or DSCI-BS
- BIOS-MINR **may not** be earned along with STAS-BS or DSCI-BS
- MATH-MINR **may not** be earned together with AMTH-BS, MATH-BS, MCSC-BS, MTED-BS, TPAM-BS
- STAT-MINR **may not** be earned together with STAS-BS. STAT-MINR **may** be earned with DSCI-BS but **only** if STAT 304 Introduction to Probability and STAT 305 Introduction to Mathematical Statistics are taken as electives.
- DSCI-MINR **may not** be earned along with DSCI-BS or a double major with STAS-BS and any computer science major.

Policy on students who fail a class repeatedly

Any student wishing to enroll in a math or stats class who has failed that class twice previously (with grades of D+ or lower) must obtain permission from the department. For students who have failed exactly twice permission can be obtained from the course coordinator or, for un-coordinated classes, from the undergraduate program director. For students who have failed three or more times permission is needed from the department chair. Permission will only be given if there is good reason to believe you can be successful with an additional attempt at the class.

Performance Withdrawal Policy

A student **may be withdrawn from any of our majors** if:

1. The student receives 2 grades less than C- in a two-year period in courses required for the major, or
2. The student has a GPA in the major < 2.0 after completion of all 100-level and 200-level requirements.
3. The chair has the right to reinstate students in the major for exceptional cases.

Requirements for Departmental Honors

In order to receive departmental honors, students graduating with any major (https://www.luc.edu/math/undergradprogs.shtml/) offered by the Department of Mathematics and Statistics must satisfy the following two criteria:

- Minimum 3.5 GPA for all program-required courses, at 200-level and higher;
- Have taken an extra 3-credit course, beyond major requirements(*), chosen from:
  - A standard MATH/STAT offering at 300-level or above
  - MATH/STAT 398
  - EXPL 391 (supporting a joint project with a department faculty member)

Interested students are encouraged to discuss this honor with their departmental academic advisor or the department chair. However, no application is required, as a full graduation audit will be conducted by the Awards Committee each year.

(*) In most cases this extra course may also be used to count towards another major or minor. So, for example, if you are pursuing a Math major and a Stats minor your 300-level Stats elective could fulfill this requirement. Please check with your department advisor if you are unsure.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Mathematical Sciences (MATH)

MATH 100 Intermediate Algebra (3 Credit Hours)
Pre-requisites: Math Placement Test
This course covers the fundamentals of algebra, ranging from linear equations and their graphs through exponents and systems of equations.
Course equivalencies: ACMAT100/MATH100
Outcomes:
Students will receive the preparation needed to use algebra in other courses or, if they plan to take calculus, to enroll in Precalculus I

MATH 108 Real World Modeling with Mathematics (3 Credit Hours)
This course investigates mathematical modeling applied to a variety of topics such as linear programming, coding information, probability and statistics, scheduling problems and social choice.
Knowledge Area: Quantitative Knowledge
Outcomes:
Students will understand the usefulness of mathematical modeling in a variety of disciplines within the life sciences, the social sciences, and business; This course satisfies the quantitative literacy requirement of the core curriculum

MATH 110 Business Precalculus (3 Credit Hours)
Pre-requisites: (MATH100 or math placement of MATH117 or above) AND (Declared major in the Quinlan School of Business OR the ECON-BA Major)
A one-semester course in precalculus designed for business students. It includes the study of functions, their graphs, and their basic properties. Techniques for solving equations involving linear, quadratic, polynomial, exponential and logarithmic functions are explored, and ideas like inverse functions are developed. An emphasis is placed on business applications.
Outcomes:
Students will be able to work with and analyze polynomial, logarithmic and exponential functions using a variety of techniques and apply those skills in a variety of contexts, especially business applications

MATH 117 Precalculus I (3 Credit Hours)
Pre-requisites: Math Placement Test or MATH 100
This course covers a variety of algebraic topics, including functions and their applications, graph transformations, composition and inverse functions, as well as polynomial and rational functions.
Course equivalencies: ACMAT 117/MATH 117
Outcomes:
Students who plan to study calculus will obtain the algebraic background needed to enroll in Precalculus II

MATH 118 Precalculus II (3 Credit Hours)
Pre-requisites: MATH 110, MATH 117, or Math Placement Test
This course covers topics ranging from exponential and logarithmic functions to trigonometric functions. It also considers applications of these topics in various settings.
Course equivalencies: MATH 118/ ACMAT 118
Outcomes:
Students will obtain the background needed to enroll in either of the department's calculus sequences

MATH 123 Topics (1-3 Credit Hours)
Freshman Mathematics/Statistics Seminar (1-3 Credit Hours): A freshman seminar with no prerequisites on topics in the mathematical sciences drawn from algebra, geometry, statistics, and their applications.

MATH 130 Business Calculus (4 Credit Hours)
Pre-requisites: (MATH110 or MATH118 or math placement of MATH131 or 161) AND (Declared major in the Quinlan School of Business OR the ECON-BA Major)
An introduction to calculus focused on business applications. The following topics are considered: modeling change using algebraic, exponential and logarithmic functions, derivatives, optimization, integration, functions of two variables, and partial derivatives.
Outcomes:
Students will understand and be able to use methods of calculus (especially differential calculus) and be able to apply these in a variety of contexts, especially business applications

MATH 131 Applied Calculus I (3 Credit Hours)
Pre-requisites: Math Placement Test or MATH 118
An introduction to differential and integral calculus, with an emphasis on applications. This course is intended for students in the life and social sciences, computer science, and business. Topics include: modeling change using functions including exponential and trigonometric functions, the concept of the derivative, computing the derivative, applications of the derivative to business and life, social and computer sciences, and an introduction to integration.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will obtain an understanding of calculus and methods for applying calculus (especially differential calculus), including modeling/analyzing processes (such as population growth and cooling), interpreting the derivative (numerical, graphical, and algebraic), and optimization (such as finding the time and level for a peak drug concentration)

MATH 132 Applied Calculus II (3 Credit Hours)
Pre-requisites: MATH 131
This course is a continuation of MATH 131. Topics include: definition and interpretations of the integral (numerically, graphically, and algebraically), basic techniques for computing anti-derivatives, applications to probability, an introduction to multi-variable calculus and optimization for functions of several variables, and mathematical modeling using differential equations. (This course is not a substitute for MATH 162.)
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will obtain an understanding of integral and multi-variable calculus, including modeling/analyzing processes with the integral, optimization of functions of several variables, and modeling with differential equations

MATH 147 Mathematics For Teachers I (3 Credit Hours)
For course description, see CIEP 104.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CIEP104/MATH147

MATH 148 Mathematics For Teachers II (3 Credit Hours)
For course description, see CIEP 105.
Course equivalencies: X-CIEP105/MATH148

MATH 160A Seminar A for Calculus Transition (1 Credit Hour)
Pre-requisites: (MATH 130 or MATH 131) and department consent
Co-requisites: MATH 162
This seminar is a corequisite support course for students transitioning from applied or business calculus (MATH 130 or MATH 131) to the more rigorous theoretical calculus sequence (MATH 162). Topics include applications of differentiation, optimization, implicit differentiation, related rates and techniques of integration. Designed to bridge the conceptual and technical gaps between the two calculus tracks, the seminar emphasizes conceptual understanding, problem-solving strategies, and mathematical communication.
Outcomes:
Students will obtain the background and skills needed in MATH 162 when they make the transition from MATH 130 or MATH 131, including concurrent support and enrichment for the corequisite course

MATH 160B Seminar B for Calculus Transition (2 Credit Hours)
Pre-requisites: MATH 132 and department consent
Co-requisites: MATH 263
This seminar is a corequisite support course for students transitioning from applied calculus (MATH 132) to the more rigorous theoretical calculus sequence (MATH 263). Topics include applications of differentiation, optimization, implicit differentiation, related rates, techniques of integration, vectors and matrices, and double integrals. Designed to bridge the conceptual and technical gaps between the two calculus tracks, the seminar emphasizes conceptual understanding, problem-solving strategies, and mathematical communication.
Outcomes:
Students will obtain the background and skills needed in MATH 263 when they make the transition from MATH 132, including concurrent support and enrichment for the corequisite course

MATH 161 Calculus I (4 Credit Hours)
Pre-requisites: Math Placement Test or MATH 118
This course provides a standard introduction to differential and integral calculus and covers topics ranging from functions and limits to derivatives and their applications to definite and indefinite integrals and the fundamental theorem of calculus and their applications.
Interdisciplinary Option: Bioinformatics, Forensic Science
Course equivalencies: ACMAT 161/MATH 161
Outcomes:
Students will obtain a theoretical understanding of principles of differential and integral calculus, will demonstrate computational skills in support of reasoning and interpretation, and will apply concepts such as the derivative and the integral to modeling processes; Students will be able to make use of a wide variety of techniques of differentiation

MATH 162 Calculus II (4 Credit Hours)
Pre-requisites: MATH 161
This course is a continuation of Calculus I and includes the calculus of various classes of functions, techniques of integration, applications of integral calculus, three-dimensional geometry, and differentiation and integration in two variables.
Interdisciplinary Option: Bioinformatics
Course equivalencies: ACMAT 162/MATH 162
Outcomes:
Students will obtain an understanding of techniques for finding anti-derivatives, and applications of the integral to questions in three-dimensional geometry and physics; Students will obtain conceptual understanding about functions of several variables and apply these concepts to optimization and integration questions for functions of two variables; Students will employ techniques for solving differential equations and their applications

MATH 162A Calculus II, Alternate (4 Credit Hours)
Pre-requisites: MATH 161
This course is a continuation of Calculus I and includes the calculus of various classes of functions, techniques of integration, applications of integral calculus, sequences and infinite series, and an introduction to differential equations. This course follows a traditional approach to calculus sequencing.
Interdisciplinary Option: Bioinformatics
Outcomes:
Students will obtain the background needed for further study in mathematics and to apply mathematics in the physical sciences

MATH 170 Service Learning in Mathematics (3 Credit Hours)
Pre-requisites: B+ or higher in any of the following (MATH 118 or MATH 131 or MATH 132 or MATH 161 or MATH 162 or MATH 263 or MATH 263A)
Students will learn best practices to communicate mathematical concepts and skills to diverse populations by engaging in tutoring mathematics to the undergraduate population at Loyola. This course is designed to promote and encourage engagement and rigor in mathematical concepts and skills among the diverse communities of learners at Loyola.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students in this course will deepen their understanding of mathematical concepts and skills and be able to communicate this effectively to diverse communities of learners

MATH 201 Introduction to Discrete Mathematics & Number Theory (3 Credit Hours)
Pre-requisites: MATH 161
This course covers topics from discrete mathematics and number theory, areas of mathematics not seen in calculus courses and abundant in applications, that provide students with the concepts and techniques of mathematical proof needed in 300 level courses in mathematics.
Outcomes:
Students will obtain an understanding of the basic concepts and techniques involved in constructing rigorous proofs of mathematical statements

MATH 212 Linear Algebra (3 Credit Hours)
Pre-requisites: MATH 132 or MATH 162 or MATH 162A
This course provides an introduction to linear algebra in abstract vector spaces with an emphasis on Rn, covering topics such as Gaussian elimination, matrix algebra, linear independence and spanning, linear transformations and eigenvalues; software packages such as MAPLE may be used.
Outcomes:
Students will receive an introduction to abstract mathematics in a setting that encourages the thinking needed in more advanced mathematics courses

MATH 215 Object-Oriented Programming with Mathematics (3 Credit Hours)
Pre-requisites: MATH 132 or MATH 162 or MATH 162A
This is an introductory programming course for students interested in mathematics and scientific computing. Students will program primarily in a general object-oriented language such as Python, with supplementary exercises in a computer algebra system. Examples will be drawn primarily from applications of calculus, elementary number theory, and cryptography.
Course equivalencies: X-COMP215/MATH215
Outcomes:
Students will learn basic scripting and object-oriented programming, with the goal of being able to solve mathematical and scientific problems

MATH 263 Multivariable Calculus (4 Credit Hours)
Pre-requisites: MATH 162
This course covers the differential and integral calculus of multivariable and vector valued functions, and sequences and infinite series, culminating with Green's Theorem, the Divergence Theorem, and Stokes' Theorem.
Outcomes:
Students will obtain an understanding of multivariable calculus and its applications, as well as background needed for the study of more advanced mathematics

MATH 263A Multivariable Calculus, Alternate (4 Credit Hours)
Pre-requisites: MATH 162A
This course covers the differential and integral calculus of multivariable and vector valued functions, culminating with Green's Theorem, the Divergence Theorem, and Stokes' Theorem. This course follows a traditional approach to calculus sequencing.
Outcomes:
Students will obtain an understanding of multivariable calculus and its applications, as well as background needed for the study of more advanced mathematics

MATH 264 Ordinary Differential Equations (3 Credit Hours)
Pre-requisites: MATH 263 or MATH 263A (Can also be a corequisite)
This course covers the theory, solution techniques, and applications surrounding linear and non-linear first- and second-order differential equations, including systems of equations.
Outcomes:
Students will obtain an understanding of elementary differential equations and their applications

MATH 266 Differential Equations and Linear Algebra (3 Credit Hours)
Co-requisites: MATH 263 or MATH 263A
This course provides an introduction to basic topics in ordinary differential equations and linear algebra. Topics include first and second-order differential equations, Laplace transform, systems of first-order differential equations, systems of linear algebraic equations, matrix algebra, bases and dimension for vector spaces, linear independence, linear transformations, determinants, eigenvalues, and eigenvectors.
Prerequisites or
Outcomes:
Students will learn fundamental results and methods in ordinary differential equations and linear algebra, with a strong emphasis on topics that are particularly relevant for Engineering Science

MATH 277 Problem-Solving Seminar (1 Credit Hour)
In a seminar setting, students discuss and present proofs (or computer examples) as solutions to regional and national mathematics contest problems usually involving techniques drawn from elementary logic, calculus of one and several variables, combinatorics, number theory, geometry, basic algebra, and abstract algebra.
Outcomes:
To improve a student's ability to communicate mathematically and to strengthen the student's problem-solving skills

MATH 298 Research Seminar in Mathematics (1 Credit Hour)
Pre-requisites: MATH 162 or MATH 162A
A seminar-style course that covers various topics about how to conduct research in mathematical sciences while engaging students in active research projects with faculty mentors.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will obtain an initial insight into a number of areas of advanced study in mathematics

MATH 301 History of Mathematics (3 Credit Hours)
Pre-requisites: MATH 132 or MATH 162 or MATH 162A
This course explores selected topics in the history of mathematics ranging from Babylonian and Egyptian mathematics to Pythagoras and Euclid to the Hindu-Arabic numeration system to Newton and Leibniz to geometries other that Euclid's to the mathematical art of Escher.
Outcomes:
Students will obtain a unique historical perspective on the various areas of mathematics that they are studying in their other courses

MATH 304 Introduction to Probability (3 Credit Hours)
Pre-requisites: MATH 263 or MATH 263A (may also be taken as Corequisites)
For description, see STAT 304.
Course equivalencies: X-MATH304/STAT304
Outcomes:
Students obtain the theoretical background in probability needed for further study in probability and statistics

MATH 305 Introduction to Mathematical Statistics (3 Credit Hours)
For prerequisites and description, see STAT 305.
Course equivalencies: X-MATH305/STAT305

MATH 306 Intro to Stochastic Processes (3 Credit Hours)
For prerequisites and description, see STAT 306.
Course equivalencies: X-MATH306/STAT306

MATH 309 Numerical Methods (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP 215) and [(MATH 212 and MATH 264) or MATH 266]
An introduction to numerical techniques for solving mathematical problems where exact solutions are impractical or computationally intensive. Topics include numerical errors, root finding, interpolation and approximation, solutions to systems of linear equations, numerical differentiation and integration, numerical solutions to ordinary and partial differential equations equations, and other selected topics.
Course equivalencies: X-COMP309/MATH309
Outcomes:
Students will obtain an understanding of how numerical methods can be used in a variety of areas of mathematics

MATH 313 Abstract Algebra (3 Credit Hours)
Pre-requisites: MATH 201 and 212
This course provides a rigorous introduction to the study of structures such as groups, rings, and fields; emphasis is on the theory of groups with topics such as subgroups, cyclic groups, Abelian groups, permutation groups, homomorphisms, cosets, and factor groups.
Outcomes:
Students will be able to read, understand, and communicate arguments about group theory and abstract algebraic structures, preparing them for further advanced work in mathematics

MATH 314 Advanced Topics Abstract Algebra (3 Credit Hours)
Pre-requisites: MATH 313
This course studies advanced algebraic systems with an emphasis on rings and fields, culminating with the Galois theory of equations.
Outcomes:
Students will be able to read, understand, and communicate arguments about rings, fields and abstract algebraic structures, preparing them for further advanced work in mathematics

MATH 315 Advanced Topics in Linear Algebra (3 Credit Hours)
Pre-requisites: MATH 313
This course offers a rigorous abstract approach to vector spaces and transformations, including similarity, duality, canonical forms, inner products, bilinear forms, Hermitian and unitary spaces, and other selected topics.
Outcomes:
Students will obtain an understanding of advanced linear algebra structures that will prepare them for graduate level work in mathematics and industry work involving mathematics

MATH 318 Combinatorics (3 Credit Hours)
Pre-requisites: (MATH 162 or MATH 162A) and MATH 201
This course offers a rigorous introduction to combinatorics, including topics such as induction, the pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, the inclusion-exclusion principle, and other selected topics.
Outcomes:
Students will obtain an understanding of the basic topics in combinatorics that will prepare them for advanced study of related topics in mathematics and computer science

MATH 320 Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 201
This course in modern mathematical logic begins with a study of propositional logic and leads to the study of first-order predicate logic, including quantifiers, models, syntax, semantics, the completeness and compactness theorems, and other selected topics.
Outcomes:
Students will develop a fuller understanding of mathematical logic and therefore of the underlying theory behind proofs of mathematical assertions

MATH 322 Advanced Number Theory (3 Credit Hours)
Pre-requisites: MATH 201
This course will cover Pythagorean triples, problems related to Fermat's Last Theorem, Pell's equation, Fermat's method of descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA public key encryption, quadratic residues, and quadratic reciprocity. Additional topics will be covered as time permits.
Outcomes:
Students will be able to solve important practical and theoretical number theory problems; Students will be exposed to both significant recently solved number theory problems and currently unsolved conjectures

MATH 328 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or MATH 266
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-MATH328/COMP328

MATH 331 Cryptography (3 Credit Hours)
Pre-requisites: Theoretical Foundations: MATH201 or COMP363; Programming Foundations: COMP125 or COMP150 or COMP170 or COMP/MATH 215
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP331/MATH331
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

MATH 344 Geometry (3 Credit Hours)
Pre-requisites: MATH 212
This course discusses axiomatic systems which define geometries and includes topics from synthetic and analytic projective geometry.
Outcomes:
Students will obtain an understanding of the many different geometries that are studied by teachers and researchers

MATH 345 Introduction to Financial Mathematics Derivatives (3 Credit Hours)
Pre-requisites: (MATH 264 or MATH 266) and MATH 304
The course provides an introduction to the mathematical theory of option pricing. We will rigorously derive option relationships using no arbitrage conditions, introduce rudimentary stochastic calculus and Brownian motion as models for stock prices, and give an introduction to methods for solving partial differential equations to give explicit Black-Scholes formulas.
Outcomes:
The students will gain knowledge of the theory of options, bond and stock pricing, portfolio optimization, and will be exposed to other relevant applications of Mathematics to Finance

MATH 351 Introduction to Real Analysis I (3 Credit Hours)
Pre-requisites: MATH 201 and (MATH 263 or MATH 263A) and (MATH 212 or MATH 266)
An introduction to the topology of, and to the functions on the real line or more general metric spaces. Topics include sequences, including sequences of functions, completeness, compactness, continuity, uniform continuity, and differentiation.
Outcomes:
Students will obtain an understanding of the fundamentals of real analysis that will prepare them for advanced work in mathematics

MATH 352 Introduction to Real Analysis II (3 Credit Hours)
Pre-requisites: MATH 351
A continuation of MATH 351. Topics include Riemann integration, series, including series of functions, and select topics in continuity and differentiation of multivariable functions, fixed point, implicit and inverse function theorems.
Outcomes:
Students will obtain an understanding of topics in advanced analysis that will prepare them for graduate level work in mathematics

MATH 353 Introduction to Complex Analysis (3 Credit Hours)
Pre-requisites: (MATH 264 or MATH 266) and MATH 351
An introduction to the algebra and geometry of complex numbers, topology of the complex plane, and the theory of functions of a complex variable, including: analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, the Fundamental Theorem of Algebra, and other selected topics.
Outcomes:
Students will obtain an understanding of the fundamentals of complex analysis that will prepare them for advanced work in mathematics

MATH 355 Methods of Applied Mathematics (3 Credit Hours)
Pre-requisites: MATH 264
Vector calculus, linear transformations, matrices, series solutions of differential equations, special functions; Fourier series, Fourier and Laplace transforms; Partial differential equations and topics from complex analysis, Green's functions, integral equations, the calculus of variations.
Course equivalencies: X-PHYS301/PHYS271/MATH355
Outcomes:
Facility with mathematical methods used in sciences and engineering

MATH 356 Introduction to Mathematical Modeling (3 Credit Hours)
Pre-requisites: MATH 266 or (MATH 264 and MATH 212)
This course will teach students how to use various areas of mathematics, such as vector calculus, linear algebra, and/or differential equations, to formulate and analyze mathematical models in, for example, mechanics, physics, biology, economics, etc.
Outcomes:
Students will learn how to use the tools from previous mathematics classes to formulate models of real world phenomena

MATH 358 Introduction to Optimization (3 Credit Hours)
Pre-requisites: (MATH 162 or MATH 263A) and (MATH 212 or MATH 266)
The course is an introduction to linear, nonlinear, and integer optimization, and may include optimization on graphs, stochastic optimization, etc. Modeling of real-life problems as optimization problems, mathematical analysis of resulting optimization problems, and computational approaches to solving the problems will be covered.
Course equivalencies: X-MATH358/STAT358
Outcomes:
Students will learn how to recognize optimization problems, model real-life challenges as optimization problems, perform mathematical analysis of the problems, and solve the problems using computational tools

MATH 360 Introduction to Game Theory (3 Credit Hours)
Pre-requisites: MATH 162 or MATH 162A
The noncooperative and cooperative theories of games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.
Outcomes:
Students will obtain an understanding of the fundamentals of mathematical game theory and will be able to apply this knowledge in a variety of settings

MATH 365 Introduction to Partial Differential Equations (3 Credit Hours)
Pre-requisites: MATH 264 or MATH 266
This course provides an introduction to basic topics in partial differential equations (PDE). In addition to first order PDE, such as the transport equation, the main types of second order PDE, including the Laplace equation, the heat equation, and the wave equation, will be studied in detail.
Outcomes:
Students will learn fundamental results and methods in partial differential equations and their applications

MATH 366 Applied Dynamical Systems (3 Credit Hours)
Pre-requisites: MATH 266 Linear Algebra and Differential Equations or (MATH 264 Ordinary Differential Equations and MATH 212 Linear Algebra)
Modeling, analysis, and prediction of short-term and asymptotic behavior of dynamical systems is studied. Continuous-time and discrete-time dynamical systems are considered, and modeled by differential and difference equations, respectively. Motivation comes from biological, chemical, mechanical, and engineering systems.
Outcomes:
Students will learn how to model dynamical systems and predict their behavior

MATH 376 Formal Language & Automata (3 Credit Hours)
Pre-requisites: COMP 163 or MATH 201 or MATH 212 or MATH 266
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP376/MATH376
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

MATH 386 Introduction to Topology (3 Credit Hours)
Pre-requisites: MATH 201 and 212 This first course in topology discusses topological spaces, continuity, connectedness and path-connectedness, compactness, product spaces, quotient spaces, metric spaces, countability and separation axioms, and other selected topics
No course description is available
Outcomes:
Students will obtain a background in topology that will allow them to apply this topic to other areas of mathematics or to pursue graduate studies

MATH 388 Special Topics in Mathematics (1-3 Credit Hours)
This course covers advanced topics in mathematics, including analysis, topology, algebra, applied mathematics, and logic.
Outcomes:
Students will obtain an understanding of an advanced topic in their major

MATH 390 Advanced Research Seminar in Mathematics (2 Credit Hours)
Pre-requisites: MATH 304/STAT 304 or MATH 313 or MATH 351
The seminar will cultivate students' presentation skills through participation in and critical discussion of brief lectures on familiar and unfamiliar topics; preparation and presentation of two brief lectures by the student (one on a familiar topic from the curriculum, one on a higher level material not customarily from the curriculum); and preparation of an extended abstract summarizing the advanced material presented.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain the ability to present material in Mathematics and applications to a general audience

MATH 395 Capstone Seminar (3 Credit Hours)
Pre-requisites: MATH 313 Abstract Algebra, MATH 351 Introduction to Real Analysis I, and MATH 390 Undergraduate Seminar
The course unifies the knowledge gained in previous Mathematics courses and provides an opportunity for in-depth study and presentation of advanced material not usually covered in the standard Mathematics curriculum.
Outcomes:
Students will learn how to integrate previous knowledge in exploring new topics in Mathematics, discover applications to other disciplines, and refine their mathematical writing and presentation skills

MATH 398 Independent Study (1-6 Credit Hours)
This course allows students to engage in independent study on selected topics in mathematics under the supervision of a faculty member.
Outcomes:
Students will obtain an understanding of an advanced topic in their major

Statistics (STAT)

STAT 103 Fundamentals of Statistics (3 Credit Hours)
This course provides an introduction to statistical reasoning and techniques in descriptive and inferential statistics and their applications in economics, education, genetics, medicine, physics, political science, and psychology. Not open to students who have completed ISOM 241.
Knowledge Area: Quantitative Knowledge
Course equivalencies: ISSCM/H/241/STAT103/ACST101/03
Outcomes:
Students will obtain a background in the fundamentals of descriptive and inferential statistics along with an understanding of their uses and misuses; This course satisfies the quantitative literacy requirement of the core curriculum

STAT 203 Introduction to Probability & Statistics (3 Credit Hours)
Pre-requisites: MATH 132 or MATH 162 or MATH 162A; MATH 162 may also be taken concurrently as a co-requisite
This course is a Calculus-based rigorous introduction to basic topics in probability (distributions, expectations, variance, central limit theorem and the law of large numbers) and statistics (estimation, hypothesis testing, regression, design of experiments) needed in engineering and science applications.
Outcomes:
Students will obtain required knowledge in probability and statistics useful in every area of engineering and science; They will learn how to assess data and outcomes of experiments

STAT 303 SAS Programming and Applied Statistics (3 Credit Hours)
Pre-requisites: STAT 103, STAT 203, or STAT 335
This course provides an introduction to SAS programming in the context of practical problems taken from applied statistics.
Outcomes:
Students obtain extensive experience with data-set manipulations, SAS procedures, and their application in contexts such as t-tests, simple and multiple regression, ANOVA, and regression

STAT 304 Introduction to Probability (3 Credit Hours)
Pre-requisites: MATH 263 or MATH 263A (may also be taken as Corequisites)
This course provides a calculus based introduction to probability theory, including topics such as combinatorial analysis, conditional probability, and a variety of statistical distributions.
Course equivalencies: X-MATH304/STAT304
Outcomes:
Students obtain the theoretical background in probability needed for further study in probability and statistics

STAT 305 Introduction to Mathematical Statistics (3 Credit Hours)
Pre-requisites: STAT 304
This course is a continuation of STAT 304 and applies the techniques of calculus and probability to the study of advanced topics in statistics.
Course equivalencies: X-MATH305/STAT305
Outcomes:
Students obtain the theoretical background in statistics needed for graduate level work in probability and statistics

STAT 306 Introduction to Stochastic Processes (3 Credit Hours)
Pre-requisites: (STAT 203 or STAT 335) and (MATH 212 or MATH 266)
This course addresses topics such as finite-state Markov chains, classification of states, long-run behavior, birth and death processes, random walks, Poisson processes and their variations, and Brownian motion.
Course equivalencies: X-MATH306/STAT306
Outcomes:
Students will obtain a background in stochastic processes and apply this in areas like biology, social science, sports, and finance

STAT 307 Statistical Design & Analysis of Experiments (3 Credit Hours)
Pre-requisites: (STAT 203 or STAT 335 with a C- or better) and STAT 308 with a C- or better
This course discusses comparative experiments, analysis of variance and covariance, fixed and random effects models, and a variety of experimental design models including cross-over and split plot designs; contemporary statistical software will be used extensively.
Outcomes:
Students will obtain the background in statistical design and analysis of experiments needed to apply them in their own areas of interest

STAT 308 Applied Regression Analysis (3 Credit Hours)
Pre-requisites: STAT 203 or 335
This course discusses simple and multiple linear regression methods, multiple comparison estimation procedures, residual analysis, and other methods for studying the aptness of a proposed regression model; contemporary statistical software will be used extensively.
Outcomes:
Students will obtain an extensive background in the applications of regression analysis and computer coding of regression models

STAT 310 Categorical Data Analysis (3 Credit Hours)
Pre-requisites: (STAT 203 or STAT 335) and (STAT 303 or STAT 308)
An introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modelling techniques based on generalized linear models. Methods for matched-pair, small datasets, ordinal and multi-category data also discussed. This course focuses on applications using real-life data sets, and uses popular software packages.
Outcomes:
Students will obtain an extensive background in the applications of categorical data analysis methods

STAT 311 Applied Survival Analysis (3 Credit Hours)
Pre-requisites: STAT 308 (Applied Regression Analysis)
This course focuses on methods for analyzing time-to-event data. The course will explore non-parametric methods for analyzing time-to-event data like Life tables, the Kaplan-Meier method, the Nelson-Aalen method and the log-rank test. This course will also explore semi-parametric models such as the Cox proportional hazards regression models and parametric models including exponential, Weibull and log-logistic regression model.
Outcomes:
Derive survival and hazard functions from an underlying distribution, calculate survival probabilities and hazard rates, compare survival probabilities and hazard ratios between two or more cohorts

STAT 321 Computational Aspects of Modeling and Simulation (3 Credit Hours)
Pre-requisites: STAT 308
This course uses SAS and R languages to address statistical modelling and to conduct statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs.
Course equivalencies: X-STAT356/COMP321/STAT321
Outcomes:
Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or intractable

STAT 335 Introduction to Biostatistics (3 Credit Hours)
Pre-requisites: For Bioinformatics majors: BIOL 101 and (MATH 132, MATH 162, or MATH 162A); For all others: BIOL 102 and (MATH 132, MATH 162, or MATH 162A); MATH 162 may be taken as a Corequisite for all majors
This course provides an introduction to descriptive and inferential statistics in the biological sciences. Topics include data visualization, probability, discrete and continuous probability distributions, confidence intervals, t-tests, tests of proportions, chi-square tests, correlation, linear regression, and ANOVA. Contemporary computer software will be used to apply the methods.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will be able to visualize data appropriately, properly design a statistical experiment, apply the correct statistical methods, and properly analyze the results

STAT 336 Advanced Biostatistics (3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335
This course overviews applied statistical methods useful in biomedical modelling chosen from: experimental design, categorical data analysis including logistic regression, nonlinear regression, bioassay and synergy modelling, multivariate methods, survival statistics, and longitudinal data analysis techniques. Modern statistical software methods will be extensively used and illustrated.
Outcomes:
Students are expected to obtain expertise in applying this course's advanced biostatistical methods application areas including knowing how best to implement these methods, interpret results, and use statistical software output

STAT 337 Quantitative Methods in Bioinformatics (3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335
This course develops the mathematical and statistical methods necessary to analyze and interpret genomic and proteomic data, including signal analysis, sequence alignment methods, data-base search methods useful in bioinformatics and data mining.
Interdisciplinary Option: Bioinformatics
Outcomes:
Students will obtain the quantitative skills used in BLAST, including inference, stochastic processes and hidden Markov models, random walks, microarray analysis and biological sequence analysis

STAT 338 Predictive Analytics (3 Credit Hours)
Pre-requisites: STAT 308
Students will study methods for predicting future events and properly classifying data using both supervised and unsupervised statistical learning techniques.
Outcomes:
Learn methods for predicting and classifying; Model Selection; Evaluate the effectiveness and accuracy of a model/prediction

STAT 344 Longitudinal Data Analysis and Mixed Modelling (3 Credit Hours)
Pre-requisites: (STAT 203 or STAT 335 with a C- or better) and STAT 308 with a C- or better or permission of the instructor
Repeated measures and longitudinal data are ubiquitous in studies, research and applications. This course explores methods for repeated measures, longitudinal (time-series), and nested/hierarchical data in a detailed manner. These methods take account of correlations between measurements by allowing each individual in a study to serve as their own control.
Outcomes:
Students are expected to master the analysis and interpretation of repeated measures, longitudinal, mixed, and nested/hierarchical data; This includes effectively using R, SAS or other software for these data analyses

STAT 351 Nonparametric Statistical Methods (3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335 with C- or better
This course will cover the basic principles of nonparametric methods in statistics including: one, two and K sample location methods; tests of randomness; tests of goodness of fit; nonlinear correlation; histogram; density estimation; nonparametric regression. Students should learn how to apply the nonparametric techniques in real datasets, interpret the results and draw conclusions.

STAT 360 Introduction to Bayesian Statistics (3 Credit Hours)
Pre-requisites: STAT 308
An introduction to Bayesian data analysis and statistical inference. Topics include single and multiple Bayesian models, hierarchical models, Bayesian linear regression models. The course will also consider computational methods related to Bayesian inference such as Markov Chain Monte Carlo methods. Emphasis is placed on both theoretical understanding and practical implementation using statistical software.
Outcomes:
Students will understand the principles of Bayesian inference; implement and evaluate Bayesian models using computational tools; and effectively communicate Bayesian results in applied contexts

STAT 364 Introduction to Multivariate Statistics (3 Credit Hours)
Pre-requisites: STAT 308
This course introduces students to the concepts and methods used to analyze multivariate data in an applied context. Topics include exploring and visualizing multivariate data, linear algebra for multivariate methods, principal components and factor analysis, canonical correlation, discriminant and cluster analysis, multivariate normal distributions, MANOVA, and other dimensionality reduction techniques. Emphasis will be placed on interpreting results and applying methods using real-world data. Statistical software such as R will be used for computation and visualization.
Outcomes:
Students will be able to: 1) describe and visualize relationships among multiple variables in multivariate datasets; 2) apply linear algebra concepts relevant to multivariate analysis; 3) perform and interpret principal component and factor analyses; 4) communicate results from multivariate analyses clearly and effectively

STAT 370 Data Science Consulting (3 Credit Hours)
Pre-requisites: STAT 308
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Apply methods learned in classes to a address a real world problem; 2) Oral and Written presentation skills; 3) Collaboration skills

STAT 388 Topics (1-3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335
This course covers advanced topics in statistics, such as multivariate analysis, sampling theory, non-parametric methods, decision theory, and Bayesian analysis.
Outcomes:
Students will obtain an understanding of an advanced topic in their major

STAT 390 Undergraduate Seminar (1 Credit Hour)
Pre-requisites: Senior Standing, including completion of MATH 304/ STAT 304
The seminar will cultivate students' presentation skills through participation in and critical discussion of brief lectures on familiar and unfamiliar topics; preparation and presentation of two brief lectures by the student (one on a familiar topic from the curriculum, one on a higher level material not customarily from the curriculum); and preparation of an extended abstract summarizing the advanced material presented.
Outcomes:
Students will gain the ability to present material in Statistics, and their applications to a general audience

STAT 391 Internship in Actuarial Science (1-3 Credit Hours)
Pre-requisites: STAT 304 and 396; approval of the internship director
This course offers an opportunity to obtain experience in actuarial science in a professional environment; placement requires approval of the internship coordinator and acceptance by an employer.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will obtain first hand experience doing actuarial work in a real world environment

STAT 396 Actuarial Seminar I (1 Credit Hour)
Pre-requisites: MATH 263
The seminar provides a comprehensive review of the probability topics that most commonly appear on the Actuarial Exam P. Topics covered include: axiomatic probability, combinatorial probability, conditional probability and Bayes' Theorem, independence, random variables and their various distributions, joint distributions, marginal distributions, conditional distributions of tow of more random variables.
Outcomes:
The purpose of the seminar is to prepare students for the Actuarial Exam P; The students will also learn test-taking strategies and will have the opportunity to take practice tests

STAT 397 Actuarial Seminar II (1 Credit Hour)
Pre-requisites: MATH 263
The seminar is a continuation of STAT 396. It provides a comprehensive review of topics in probability and risk management directed toward students preparing for the Actuarial Exam P. Additional topics may include order statistics, moment-generating functions, the Central Limit Theorem and risk analysis.
Outcomes:
The purpose of the seminar is to prepare students for the Actuarial Exam P; The students will also learn test-taking strategies and will have the opportunity to take practice tests

STAT 398 Independent Study (1-6 Credit Hours)
This course allows students to engage in independent study on selected topics in statistics under the supervision of a faculty member.
Outcomes:
Students will obtain an understanding of an advanced topic in their major

STAT 399H Honors Tutorial (1-3 Credit Hours)
This course allows students in the honors program to engage in independent study of selected topics in statistics for honors credit under the supervision of a faculty member.
Course equivalencies: STAT399H / STAT399
Outcomes:
Students will obtain an understanding of an advanced topic in their major

Actuarial Science Minor

As of Fall 2026, this program is no longer accepting students.

The discipline of actuarial science deals with the mathematical and statistical analysis of risk, especially as it pertains to the insurance and finance industries. Students pursuing a Minor in Actuarial Science will gain the foundation necessary to prepare for the first two Society of Actuaries exams.

Double-Dipping Policy

Per our double dipping policy, at least 6 credit hours must be unique to this minor.

Transfer-Student Residency Requirement

At least 13 credit hours of Actuarial Science Minor must be completed at Loyola

Learning Outcomes

- Students will understand the foundational mathematics used in the actuarial field including single and multivariable calculus as well as linear algebra.
- Students will learn foundational probability and statistics, enabling a solid understanding of actuarial principles and techniques.
- Students will be prepared for the first actuarial exam.

Applied Mathematics (BS)

Students earning a B.S. in Applied Mathematics will acquire foundational knowledge in the field, as well as competency in the critical thinking, technological, and communication skills necessary for its application. Applied math is a dynamic discipline with applications to many fields, including Systems Biology, Data Mining and Data Privacy, Materials Science, Computer Animation and Digital Imaging, Finance and Economics, Ecology, Epidemiology, and Climatology, among others.

Transfer-Student Residency Requirement

At least 21 credit hours of Applied Mathematics (BS) must be completed at Loyola.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Students will have wide knowledge of and strong skills in using the methods and tools that form the foundation of applied math. These include calculus, linear algebra, and differential equations, as well as statistics and computer sciences.
- Students will acquire foundational knowledge of the language of formal mathematics and the ability to read and write rigorous and logical mathematical arguments.
- Students will be able to use applied mathematical knowledge in a wide variety of contexts. They will be able to model real-world situations mathematically, making appropriate choices as to the models and methods to employ. They will analyze these models with a variety of tools and interpret the results in a meaningful way. They will be able to present their findings in clear, professional language.
- Students will understand how the different areas and methods of applied math fit together. They will understand how these are used in modern applied mathematical settings and will also be able to fit them into a historical context.

Mathematics (BS)

Students earning a B.S. in Mathematics will acquire foundational knowledge in the field, as well as competency in the critical thinking, technological, and communication skills necessary for its application. The prevalent use of increasingly complex mathematical models in every STEM field (and beyond), has made facility with the language and techniques of mathematics a highly desirable skill. Graduating students are prepared for industry jobs in finance, tech, risk analysis, climate science, criminal justice, and the like, as well as teaching careers in secondary school or junior college. Typical destinations for students wishing to pursue graduate studies are biology, chemistry, computer science, economics, engineering, finance, law, medicine, and of course, mathematics.

Learning Outcomes

- Students will have wide knowledge of and strong skills in using the methods and tools that form the foundation of math. These include calculus, linear algebra, and differential equations, as well as statistics and computer sciences.
- Students will acquire analytical and logical skills that form the basis of mathematical thinking and reasoning. These skills will enable problem solving, the abstraction to general principles from specific examples, and the ability to use formal mathematical language. Students will be able to apply these skills in a variety of contexts.
- Students will be fluent in the traditional mathematical subjects such as abstract algebra and real analysis. They will be able to use the methods and terminology in these field to read and write formal, logical proofs, and to communicate these both in writing and verbally.
- Students will understand how different sub-disciplines of mathematics fit together. They will be able to use their knowledge in a variety of modern applications, both within math and in related disciplines such as science, engineering and tech. They will also be able to place these in a historical context.

Mathematics - Education Track (BS)

This rigorous course of study in mathematics either coupled with a Major in Secondary Education (p. 919) or followed by a Master's Degree in Education (p. 889) prepares students for a career in teaching secondary school mathematics.

This program has been discontinued. No new admits are being accepted.

Learning Outcomes

- Students will have wide knowledge of and strong skills in using the methods and tools that form the foundation of math. These include calculus, linear algebra, and differential equations, as well as statistics and computer sciences.
- Students will acquire analytical and logical skills that form the basis of mathematical thinking and reasoning. These skills will enable problem solving, the abstraction to general principles from specific examples, and the ability to use formal mathematical language. Students will be able to apply these skills in written and verbal communication.
- Students will be exposed to the traditional areas of classical geometry and abstract algebra. They will be able to use the methods and terminology in these fields to understand the role of definitions, axioms and theorems that underlie all mathematical ideas. Students will be exposed to the history of mathematical thought across diverse cultures.
- Students will obtain an advanced perspective on a variety of mathematical topics and see how these can be generalized and employed in real world problems relevant to the high school curriculum.
- Students will acquire basic knowledge of the teaching and education profession. Students will be prepared to utilize a variety of teaching techniques to positively influence student learning and success.

Mathematics and Computer Science (BS)

As of Fall 2026, this program is no longer accepting applicants.

The B.S. in Mathematics and Computer Science provides students with a strong foundation in both fields. Core courses from the Mathematics and Computer Science curricula will aid students to develop critical thinking and communication skills, as well as a technical and practical understanding of programming and algorithm design. Graduating students will be prepared for any industry jobs requiring scientific computing skills and the ability to analyze, design, and implement algorithms, such as data mining, finance, and risk analysis. This major also prepares students for advanced degrees in computer science, mathematics, and the STEM fields.

Learning Outcomes

- Students will have wide knowledge of and strong skills in using the methods and tools that form the foundation of the mathematics and computer science disciplines. These include calculus, linear algebra, and differential equations, statistics, modern computer programming.
- Students will acquire analytical and logical skills in the mathematical and computer sciences. These skills will enable problem solving, the abstraction to general principles from specific examples as well as the ability to design, implement, and evaluate a computational system to meet a given set of requirements.
- Students will understand traditional mathematical subjects such as abstract algebra and real analysis. They will be able to use the methods and terminology in these fields to read and write formal, logical proofs, and to communicate these both in writing and verbally.
- Students will understand the design and analysis of computer algorithms. Students will be exposed to a variety of modern topics which heavily rely on these algorithms and other knowledge of computer science.
- Students will understand how different sub-disciplines of mathematics and different topics learned in computer science fit together. They will be able to use their knowledge in a variety of modern applications.

Mathematics Minor

Many majors at Loyola require a year of calculus; with the addition of just a few more courses you can earn a Mathematics Minor. Majors in biology, chemistry, economics, engineering and physics are especially encouraged to consider this option. The foundational training in mathematics offered by this minor will give students a deeper understanding of the theoretical underpinnings of their major discipline, and will equip them with critical thinking and technical communication skills that will prove invaluable in their pursuit of a STEM career.

Per our double dipping policy (p. 506), at least 6 credit hours must be unique to this minor.

Learning Outcomes

- Students will acquire knowledge of and strong skills in using the methods and tools that form the foundation of math. These include calculus, linear algebra, and differential equations.
- Students will acquire analytical and logical skills that form the basis of mathematical thinking and reasoning. These skills will enable problem solving and abstraction in a variety of contexts.
- Students will be exposed to an advanced subject in mathematics or applied mathematics. They will be able to use the methods and terminology in this subject to analyze complex mathematical problems and gain proficiency in higher-level mathematical reasoning.

Statistics (BS)

Students earning a B.S. in Statistics will acquire knowledge of a broad range of statistical techniques and methods, an understanding of the mathematical underpinnings of these methods and techniques, and the computational skills, such as R and SAS, to apply and implement these methods using real data. Statistics majors are in high demand in industry in a wide array of fields such as medical research, technology companies, pharmaceuticals, insurance, finance, government, genetics, public health, sports, and epidemiology to name a few.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- After completing STAT 203 and STAT 304, students majoring in statistics will understand the fundamentals of probability theory by applying them properly to statistical methods.
- After completing introductory statistics courses (STAT 203, STAT 303, STAT 308), students majoring in statistics will be able to analyze and interpret descriptive statistics through a report.
- Upon completing the program, students majoring in statistics will be able to properly use statistical reasoning as it applies to inferential methods in a written analysis and/or oral presentation.
- Upon completing the program, students majoring in statistics will be able to create and interpret statistical models including understanding the limitations of the model in a written analysis and/or oral presentation.
- Upon completing the program, students majoring in statistics will be able to use statistical software to generate appropriate output for data analysis.

Statistics Minor

Students earning a Minor in Statistics will acquire knowledge of statistical techniques and methods, and the computational skills, such as R and SAS, to apply and implement these methods using real data. Students with statistical training are in high demand in industry in a wide array of fields such as medical research, technology companies, pharmaceuticals, insurance, finance, government, genetics, public health, sports, and epidemiology to name a few.

Double-Dipping Policy

Per our double dipping policy (p. 506), at least 6 credit hours must be unique to this minor.

Learning Outcomes

- Students will understand the fundamentals of introductory probability and statistics and the mathematics necessary for these subjects.
- Students will develop a solid understanding of foundational statistical programming to effectively work with data, conduct statistical analyses, and generate meaningful insights, enhancing readiness for statistical roles in various professional settings.
- Students will understand several advanced statistical techniques. They will be able to use these to analyze and interpret data, and effectively communicate findings and conclusions.

Medieval Studies Interdisciplinary Program

The minor in Medieval Studies is designed for students who want to learn more about the Middle Ages in all its multicultural splendor, without limiting themselves to a single academic discipline. This program encourages students to explore the medieval world through a variety of approaches through courses taught in our four core departments of History, Theology, English and Philosophy, plus course offerings in Classical Studies, Modern Languages and the various areas of Fine Arts.

Undergraduate Programs

- Medieval Studies Minor (p. 523)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Medieval Studies (MSTU)

MSTU 300 Integrative Experience I (1.5 Credit Hours)
This course is the first in a two-semester sequence of courses designed to provide students with a synoptic view of the field of Medieval Studies and train them to do cross-disciplinary work within that field.
Interdisciplinary Option: Medieval Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to produce original research on some topic pertaining to the Middle Ages that utilizes and integrates no less than two methodologies drawn from diverse disciplines

MSTU 301 Integrative Experience II (1.5 Credit Hours)
This course is the second in a two-semester sequence of courses designed to provide students with a synoptic view of the field of Medieval Studies and train them to do cross-disciplinary work within that field.
Interdisciplinary Option: Medieval Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to produce original research on some topic pertaining to the Middle Ages that utilizes and integrates no less than two methodologies drawn from diverse disciplines

Medieval Studies Minor

As of Fall 2026, this minor is no longer accepting students.

The minor in Medieval Studies is designed for students who want to learn more about the Middle Ages in all its multicultural splendor, without limiting themselves to a single academic discipline. This program encourages students to explore the medieval world through a variety of approaches through courses taught in our four core departments of History, Theology, English and Philosophy, plus course offerings in Classical Studies, Modern Languages and the various areas of Fine Arts. The Medieval Seminar (MSTU 300 Integrative Experience I & MSTU 301 Integrative Experience II), taught over two semesters, is an exciting opportunity to work closely with medievalist faculty here at Loyola on an interdisciplinary project of your own design. Our associated annual lecture series, with a different theme every year, introduces students to cutting-edge medievalist scholars from across North America (and beyond, thanks to Zoom) and models the global, relevant and innovative work done in this fascinating field.

Double-Dipping Policy

This department observes the CAS Double-Dipping Policy (https://www.luc.edu/cas/double-dippingpolicy/) regarding unique credits required for each declared major/minor. Not less than 6 credit hours in the individual student's transcript must be unique to this minor; that is, the courses in question are considered as actually fulfilling requirements of one minor, not of more than one minor or major.

Transfer-Student Residency Requirement

At least 9 credit hours of MSTU-MINR requirements must be completed at Loyola.

Learning Outcomes

Students who complete the Medieval Studies Minor will:

- Appreciate the multicultural, multireligious cultures of the global Middle Ages and recognize the roots of many modern global issues.
- Obtain hands-on experience integrating methods and approaches from various academic disciplines in their research into the Medieval period.
- Initiate and complete a multidisciplinary project of their own creation with support from appropriate scholars working in the field.

Middle East and Islamic World Studies Interdisciplinary Program

Loyola's Middle East and Islamic World Studies minor introduces students to the Middle East and Islamic civilization.

Undergraduate Programs

- Middle East and Islamic World Studies Minor (p. 524)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Middle East and Islamic World Studies Minor

Loyola's Middle East and Islamic World Studies minor introduces students to the Middle East and Islamic civilization. The minor offers a unique opportunity to think differently about the Middle East, Islam, Muslim societies, and their influence around the world. Through a rigorous interdisciplinary approach, students explore history, culture, politics, and religion across the Middle East and in Muslim societies around the world. Students are strongly encouraged to study abroad in a Middle Eastern or Muslim country and enhance their academic knowledge through real life exposure to Middle Eastern and Islamic cultures.

[1] These are topics courses. Only selected sections can count toward the minor.

[2] Cannot apply toward electives if used as a required course.

Additional Requirements

No more than four courses may be taken from any one department. Language courses such as Arabic or Hindi-Urdu at any level may count for up to six units (two courses) of the minor. Up to nine units (three courses) may be shared with any Major or Minor program. Waiver will be offered for courses taken during study abroad in a Middle Eastern or Muslim country.

Suggested Sequence of Courses

Students can begin the Middle East and Islamic World Studies minor at any point in their undergraduate studies, in consultation with their advisor. While there is no set sequence of classes, students are encouraged to take one of the foundational required courses early on, to gain a general understanding of the Middle East or Islamic history and culture. Once students have declared the minor, they are encouraged to contact their academic advisor or the Middle East and Islamic World Studies Program Director for further guidance on how best to progress with their studies.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- The minor enables students to appreciate the complexities of the Middle East and the Islamic civilization, and understand the past and present global networks linking these societies to the rest of the world. Through an interdisciplinary approach, students take courses on history, literature, art, language, philosophy, politics, and religion to gain knowledge about the Middle East and contemporary Islamic world.

Military Science

About Us

Located on Chicago's vibrant north side, the Rambler Battalion is proudly hosted at Loyola University Chicago and includes Cadets from our partner schools: DePaul University, Northwestern University, Northeastern Illinois University, and North Park University. Together, these institutions form one of the most diverse and academically rich Army ROTC programs in the region.

Cadets benefit from access to world#class university resources, professional development opportunities across the city, and the cultural breadth that only a major metropolitan area can provide. Our formation reflects this diversity, bringing together students from across the country, representing a wide range of backgrounds, academic interests, and leadership potential.

The Rambler Battalion cadre consists of highly experienced and professionally trained Army leaders supported by dedicated civilian staff who ensure the program runs smoothly and effectively. The program prepares future officers through a balanced program emphasizing leadership development, military skills, academic excellence, and physical readiness. The end result are well#rounded leaders of character ready to serve in the Army.

Military History Course- Any Semester

All ROTC cadets across the country are required to take a college level history course that focuses on U.S. military history and the history of the profession of arms. Specific courses that meet the requirements established by U.S. Army Training and Doctrine Command are determined by the Professor of Military Science. For a list of courses that fulfill the military history requirement at your university, please contact your Military Science Instructor.

In addition to these approved courses, the Military Science Department offers a three credit hour, independent study course that is taken online through the ROTC Blackboard learning system. This course can be found in Loyola's course catalog under:

MLSC 399

Military Science (MLSC)

MLSC 101 Introduction to the Army (1 Credit Hour)
Pre-requisites: This course is open to all students
MLSC 101 consists of both lecture and lab sections. Focuses on introduction to the Army and basic Soldier skills. Students receive an introduction to the Army Profession and examine what it means to be a professional in the U.S. Army.
Outcomes:
Understand the basic structure of the US Army and its customs and courtesies; Accept the Army as a Values-based organization and embrace the scholar-athlete-warrior ethos

MLSC 102 Foundations of Leadership (1 Credit Hour)
Pre-requisites: This course is open to all students
MLSC 102 consists of both lecture and lab sections. Introduces students to the personal challenges and competencies that are critical for effective leadership.
Outcomes:
Understand the basic structure of the US Army and its customs and courtesies; Accept the Army as a Values-based organization and embrace the scholar-athlete-warrior ethos

MLSC 201 Leadership and Ethics (2 Credit Hours)
Pre-requisites: This course is open to all students
MLSC 201 consists of both lecture and lab sections. Focuses on leadership and ethics. Adds depth to the student's knowledge of the different leadership styles.
Outcomes:
Student grounded in foundational leadership doctrine and skills, comprehends critical thinking, problem-solving, and value of diversity, understands the officer's role in leading change and the Army as a profession

MLSC 202 Army Doctrine and Decision Making (2 Credit Hours)
Pre-requisites: This course is open to all students
MLSC 202 consists of both lecture and lab sections. Focuses on Army doctrine and decision making. Begins with analytical techniques, creative thinking skills and the Army problem solving process as related to situations faced by leaders when making decisions.
Outcomes:
Student grounded in foundational leadership doctrine and skills, comprehends critical thinking, problem-solving, and value of diversity, understands the officer's role in leading change and the Army as a profession

MLSC 250 Physical Readiness Training (1 Credit Hour)
This course is designed to develop the fitness capabilities of future Army officers. Students will be introduced to and become proficient in the physical components of muscular strength, muscular endurance, aerobic endurance, anaerobic endurance, and power.
Outcomes:
Future Army officers ready to meet the physical demands of any duty or combat position, move lethally on the battlefield, accomplish the mission and continue to fight, win, and come home healthy

MLSC 301 Training Management and the Warfighting Functions (3 Credit Hours)
Pre-requisites: Restricted to ROTC students; MLSC 202 or departmental consent is required
MLSC 301 consists of both lecture and lab sections. Focuses on training management and the warfighting functions. Student will study, practice, and apply the fundamentals of Training Management and how the Army operates through the Warfighting Functions.
Outcomes:
Student who possesses enhanced individual and collective skills, effectively leads formations in various scenarios, effective at receiving and giving peer evaluations, committed and disciplined ethically, academically, physically, and socially

MLSC 302 Applied Leadership in Small Unit Operations (3 Credit Hours)
Pre-requisites: Restricted to ROTC students; MLSC 301 or departmental consent is required
MLSC 302 consists of both lecture and lab sections; focuses on applied leadership in small unit operations; analyze, test, and relate the fundamentals of direct level leadership and small unit tactics at the platoon level.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student who possesses enhanced individual and collective skills, effectively leads formations in various scenarios, effective at receiving and giving peer evaluations, committed and disciplined ethically, academically, physically, and socially; Successful completion of this course will help prepare contracted Army ROTC students for the Cadet Summer Training Advance Camp, which students normally attend summer of junior year at Fort Knox, KY

MLSC 311 The Army Officer (3 Credit Hours)
Pre-requisites: Restricted to ROTC students
MLSC 302 or departmental consent is required. MLSC 311 consists of both lecture and lab sections. Focuses on development of the Army Officer. Students will learn about Army programs that support counseling subordinates and evaluating performance, values and ethics, career planning, and legal responsibilities.
Outcomes:
Produces a leader of character possessing a professional identity, who thrives in operationally ambiguous environments and is a moral exemplar and skilled critical thinker, problem solver, and team builder

MLSC 312 Company Grade Leadership (3 Credit Hours)
Pre-requisites: Restricted to ROTC students
MLSC 311 or departmental consent is required. MLSC 312 consists of both lecture and lab sections. Develop knowledge, skills, and abilities required of junior officers pertaining to the Army in Multidomain Operations and Company Grade Officer roles and responsibilities.
Outcomes:
Produces a leader of character possessing a professional identity, who thrives in operationally ambiguous environments and is a moral exemplar and skilled critical thinker, problem solver, and team builder; Successful completion of this course will assist in preparing contracted ROTC students for the Basic Officer Leadership Course-B and is a mandatory requirement for commissioning

Modern Languages and Literatures

About Us

The Department of Modern Languages and Literatures offers coursework in many languages. Exact offerings vary each semester, but typical courses include Arabic, Chinese, French, German, Hebrew, Hindi/Urdu, Italian, Japanese, Polish, Russian and Spanish. We offer BA degree programs in French, Italian and Spanish, and an MA degree program in Hispanic Studies.

Several minors are offered in language study, while others combine language, literature and culture.

Our department also offers Literature in Translation (p. 2490) courses, which are courses taught in English with content from foreign literature and film.

Many of our courses fulfill interdisciplinary program requirements. Students may earn credit in Asian Studies, African Studies and the

African Diaspora, Catholic Studies, Global and International Studies, Islamic World Studies, Latin American Studies, and Women's Studies and Gender Studies. The department offers faculty-led summer programs https://www.luc.edu/modernlang/study_abroad.shtml (https://www.luc.edu/modernlang/study_abroad.shtml/) in Córdoba (Spain) and elsewhere, varying from year to year.

The department has full-time faculty members with strong dedication to undergraduate and graduate teaching, and a firm commitment to research. Study in the Department of Modern Languages and Literatures encourages close contact between faculty and students. In the tradition of the university at large, we value the individual.

We take pride in the diverse cultural, educational, intellectual and recreational opportunities available in the city of Chicago. Join us and experience all this for yourself.

For more information, please contact us (https://www.luc.edu/modernlang/contactus.shtml/).

Mission Statement

The Department of Modern Languages and Literatures is committed to teaching students to develop linguistic, cultural, and literary competencies in world languages that are critical to engaging in our diverse global society. Through an interdisciplinary approach, faculty members seek to educate students as world citizens by helping them acquire knowledge, awareness, and empathy that allows them to uphold Loyola University Chicago's Jesuit principles of service and social justice.

Modern Languages and Literatures Department Policies

Double Dipping Policy

1. Students may not major and minor in the same discipline.
2. Majors: Not less than 21 credit hours in the individual student's transcript must be unique to each major; that is, the courses in question are considered as actually fulfilling requirements of one major, not of more than one major.
3. Minors and interdisciplinary minors: not less than 8 credit hours in the individual student's transcript must be unique to each minor; that is, the courses in question are considered as actually fulfilling requirements of one minor, not of more than one minor or major.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

American Sign Language (ASL)

ASL 101 American Sign Language I (3 Credit Hours)
ASL 101 is the first class in the American Sign Language series at Loyola. It presents the basic skills and use of ASL and basic knowledge of Deaf & Hard of Hearing Culture.
Outcomes:
Students will: 1) demonstrate the basic abilities to comprehend and communicate in ASL; 2) demonstrate an understanding of Deaf & Hard of Hearing communities

ASL 102 American Sign Language II (3 Credit Hours)
Pre-requisites: ASL 101 or equivalent
This course is designed for students who have completed a college level ASL I course and have a basic knowledge of ASL. It is the second course in the ASL series at Loyola and presents intermediate skills and use of ASL and continued working knowledge of Deaf & Hard of Hearing culture.
Outcomes:
Students will: 1) demonstrate abilities to comprehend and communicate in ASL at an intermediate level; 2) demonstrate an understanding of Deaf & Hard of Hearing communities

ASL 103 American Sign Language III (3 Credit Hours)
Pre-requisites: Completion of ASL 102, or prior to enrolling in ASL 103, students must consult ASL professors for language placement, ensuring readiness based on prior experience
This course includes vocabulary-building and mastery of grammar through rigorous receptive and expressive activities. ASL skills development applied to complex grammatical structures. Topics include location and description of items in rooms and buildings, complaints, making suggestions, and making requests. Depicting /Indicating verb grammatical structures introduced. Discussions of Deaf culture. 2) Acquire adequate speed in expressive and receptive signing skills. 3) Expand sign terminology in areas such as classifiers, sentence types, numbers, NMS
Outcomes:
1) Demonstrate fluency in expressive, receptive fingerspelling/numbering in ASL

ASL 104 American Sign Language IV (3 Credit Hours)
Pre-requisites: Completion of ASL 103, or prior to enrolling in ASL 104, students must consult ASL professors for language placement, ensuring readiness based on prior experience
This intermediate ASL course refines students' expressive and receptive skills. Advanced linguistic structures introduced and put into practice. Vocabulary-building in specific challenging areas: academics, occupations, computer technologies, and abstract nouns. Current events discussed in ASL, giving students opportunities to apply linguistic-cultural knowledge while participating in open discussions.
Outcomes:
1) Comprehension and expression with intermediate ASL vocabulary and correct grammar; 2) Narrate and describe events in connected, paragraph-length ASL discourse; 3) Exchange information and perspectives in group settings at intermediate level

Arabic (ARAB)

ARAB 101 Arabic I (3 Credit Hours)
This course is designed for beginners and those with modest acquaintance to Arabic. Through a culturally rich context, it focuses on functional articulation of Modern Standard Arabic with a limited exposure to Damascene (Shaami) dialect.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
Course equivalencies: ARAB101/IWS101A
Outcomes:
Students will be able to write simple sentences, understand selected principles of basic grammar and vocabulary, and will be introduced to Modern Standard Arabic as well as to a modern spoken dialect; Students will learn aspects of Arab culture

ARAB 102 Arabic II (3 Credit Hours)
Pre-requisites: ARAB 101 completed with C- or higher; Students with equivalent preparation must be assessed for placement
This course continues focusing on active functional use of Modern Standard Arabic and Damascene dialect to help students develop speaking, listening, reading comprehension, and writing skills in diverse sociocultural contexts.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
Course equivalencies: X-ARAB102/IWS102A
Outcomes:
Students are expected to be able to sustain conversations on daily life topics, to comprehend and compose simple authentic multimodal texts, and integrate interdisciplinary knowledge of the Arab world (language, religion, history, geography, or cultures) through a project

ARAB 103 Arabic III (3 Credit Hours)
Pre-requisites: ARAB 102 completed with C- or higher; Students with equivalent preparation must be assessed for placement
This course continues focusing on active functional use of Modern Standard Arabic and Damascene dialect in familiar topics reflecting the behavior of native speakers. Students are expected to reach low-mid intermediate proficiency levels.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
Course equivalencies: ARAB103/IWS103A
Outcomes:
Students are expected to be able to initiate and sustain simple social interactions about self and immediate environment; Students will be able to comprehend and compose simple authentic multimodal texts and apply such interdisciplinary knowledge of the Arab world (language, religion, history, geography, or cultures) through a final project

ARAB 104 Arabic IV (3 Credit Hours)
Pre-requisites: ARAB 103 completed with C- or higher; Students with equivalent preparation must be assessed for placement
The course help students build an active learning solid foundation in the intermediate level of functional use of Arabic. Students are expected to learn how to own their learning process and engage critically in representations of self and others.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
Course equivalencies: X-ARAB104/IWS104A
Outcomes:
Students are expected to be able to compose and comprehend more complex authentic multi modal texts in topics of relevance to student, investments and fields of study; They will articulate their integrative interdisciplinary knowledge of the Arab world through a final project

ARAB 250 Advanced Composition and Conversation (3 Credit Hours)
Pre-requisites: ARAB 104 or equivalent; Students' self-assessment is not sufficient for placement in an appropriate level of Arabic class
The focus of the course assignments is to connect classroom work and community-based service learning into a constructive coordinated dual relationship. Bedsides classroom language learning, students will complete 20 hours in community-based work at an organization of service to Arab and Muslim immigrants and refugees. Some readings may be in English.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: ARAB250/IWS250A
Outcomes:
Students will synthesize classroom and community-based learning contexts to reflect on collective and individual explorations of concepts of civic engagement with Arab/Muslim communities; They will demonstrate awareness of self and community through learning portfolios and public presentations

ARAB 251 Advanced Composition and Conversation II (3 Credit Hours)
This course emphasizes the development of advanced Arabic speaking and writing skills and examines grammar and vocabulary in relation to advanced skill development. Conducted entirely in Arabic.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
Course equivalencies: X-ARAB251/IWS251A
Outcomes:
Students will be able to demonstrate advanced reading, writing, listening, and speaking skills in Arabic; Students will also be able to demonstrate knowledge of significant aspects of the Arab world and culture in relation to their major field of study

Asian Studies (ASIA)

ASIA 130 Introduction to Martial Arts (3 Credit Hours)
This course introduces the student to Chinese Wushu. Two forms of Wushu will be selected for in depth study each semester. Students will explore the origins of the sports studied and their importance to Chinese culture and philosophy while learning the specific physical techniques.
Course equivalencies: THTR130/ASIA130
Outcomes:
Students will improve their balance, flexibility and coordination while learning the basic moves of two forms of Wushu; They will develop a reference for appreciating the place of Wushu in Chinese culture and create a foundation for further Wushu training

ASIA 152 Drawing China (3 Credit Hours)
This is an introductory drawing course. There are no pre-requisites nor prior experience need to succeed in this course. Beijing is our laboratory and the topic of all class drawings.
Course equivalencies: FNAR152/ASIA152
Outcomes:
Students will be able to draw trees, buildings, automobiles, vegetables, human beings in real life situations and in perspective

ASIA 160 The Crafts of China (3 Credit Hours)
This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historical trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.
Course equivalencies: FNAR160/ASIA160
Outcomes:
Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China; Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture

ASIA 167 Religions in China (3 Credit Hours)
This course is a survey of various religions in China that may include, not only Confucianism and Taoism, but also Buddhism, Christianity, Islam, Judaism, Zoroastrianism, Manicheism and popular or "folk" religion. The course will consider the function of these various religions in the development of Chinese society and their significance in Chinese civilization from ancient mythology to contemporary practices and developments."
Course equivalencies: X-THEO167/ASIA167/INTS167
Outcomes:
Students will be able to demonstrate knowledge of the beliefs, practices, and institutions in varied contexts and historical periods in China, of various religions, both indigenous and "foreign

ASIA 168 Sacred Texts of China (3 Credit Hours)
Through the study of primary sacred texts of China (in translation), this class will provide a basic understanding of Chinese thought and its historical development. Interconnections among the various periods and different schools of Chinese philosophy such as Confucianism, Taoism, Buddhism and Neo-Confucianism will be demonstrated and discussed from ancient through the medieval and modern periods.
Course equivalencies: X-THEO168/ASIA168/INTS168
Outcomes:
Students will be able to demonstrate knowledge of the major Chinese sacred texts and teachings of various religious and philosophical traditions, and how they developed and interacted historically

ASIA 169 Taoism (3 Credit Hours)
Students will study the history and main ideas and practices of Taoism, meet the sages who wrote the Taoist texts, be introduced to the various schools of Taoist philosophy, and get a feel for what it means to practice Taoism today. The course will illustrate how religious Taoism established a relationship with Confucian thought and practice as well as how at each stage of its historical development, Taoism exerted a profound influence on Chinese politics, economy, culture, art, natural sciences, and social life.
Course equivalencies: X-THEO169/ASIA169/INTS169
Outcomes:
Students will be able to demonstrate knowledge of philosophical and religious Taoist beliefs, practices, and institutions in varied contexts and historical periods

ASIA 191 Traditional Chinese Philosophy (3 Credit Hours)
Students will investigate Chinese ancient philosophy in a way to let its own tendencies be sensed and appreciated. Topics include Confucianism, Mencius, Sunzi, Taoism, Legalism, Yin-Yang School, Tung Chung-shu, Chinese Buddhism and Neo-Confucianism. In addition, students learn about the relations among different schools or different thinkers in the same school. Comparisons between Chinese philosophies and western ones are encouraged.

ASIA 192 Chinese Ethics and Asian Values (3 Credit Hours)
This course offers an overview of the spirit of Chinese ethics, covering sacred and secular as well as intellectual and practical elements.

ASIA 193 Contemporary Chinese Philosophy (3 Credit Hours)
Students will analyze the development of Chinese contemporary thought in its different stages: rejection of the tradition and its recent reevaluation.
Course equivalencies: X-PHIL193/ASIA193/INTS193

ASIA 252 Peoples of China (3 Credit Hours)
This class introduces China's cultural diversity and unity as a whole. It provides a general overview of cultural mappings in China, and a detailed study of significant ethnic minorities.
Course equivalencies: SOCL251/ASIA252/INTS251
Outcomes:
Students will gain the ability to perceive cultural phenomena in a comparative framework and understand cultural differences more deeply

ASIA 263 Political and Social Movements in China (3 Credit Hours)
This course examines historical and contemporary movements pursuing political, economic and social reforms in China. It studies both state-sponsored and voluntary movements.
Course equivalencies: SOCL263/INTS263
Outcomes:
Students will gain a deeper understanding of China's ongoing transformation, and will learn how to develop their own scholarly analysis of such social change

ASIA 266 Development and Social Change in Modern China (3 Credit Hours)
This course examines change and development in modern China from the late Qing period to the present, focusing on the movement from a planned economy to a market-based economy.
Course equivalencies: SOCL266/ASIA266/INTS266WSGS297
Outcomes:
Students will gain knowledge of China's economic development path, and will apply gender and/or class-based analysis to patterns of social change

ASIA 272 Environment of China (3 Credit Hours)
This course provides a systematic introduction to major environmental issues in the context of recent social and economic development in China
Course equivalencies: X-NTSC270/ASIA272/INTS270

ASIA 292 Modern Chinese Fiction (3 Credit Hours)
This course introduces selected fictional works by some of the most insightful writers of modern China. The course focuses on significant aspects of these works with an objective to enhance students' fascination with and skill in the reading and analysis of modern Chinese fiction. Knowledge of modern Chinese fiction will enable students to understand central aspects of 20th century Chinese culture.
Course equivalencies: X-LITR292/ASIA292/INTS290
Outcomes:
Students will be able to analyze literary texts of a particular historical period and write critical essays on works read in the course

ASIA 297 Topics in Asia (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course may be used to fulfill the Asian minor requirement for a 300-level course in Asia-related topics. Students may repeat the course for credit when the topic changes.
Interdisciplinary Option: Asian Studies
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

ASIA 302 Discovering China Through Film (3 Credit Hours)
This course will give an overview of major films produced in mainland China since 1949. Students will examine the genres of Chinese film better known in contemporary China and consider them a major source of reflection upon, and critique of, contemporary Chinese society and culture.
Course equivalencies: CMUN301/ASIA/INTS/AIFMS302
Outcomes:
All films chosen for the course will help inform students' understanding of modern China in terms of its material conditions and ideology

ASIA 314 Modern Chinese Literature in Chinese (3 Credit Hours)
This course is a survey of modern Chinese literature from 1918 to the present. It requires the close reading of famous Chinese writers and poets as well as some of the avant-garde writers. Students will have the opportunity to explore their own ideas of the aesthetic characteristics of the Chinese literature in the 20th century, as well as its historical and social background and learn about one of the important aspects of modern Chinese culture.
Course equivalencies: X-CHIN341/ASIA314/INTS341A
Outcomes:
Students will demonstrate knowledge of principal, genres, themes and forms of modern Chinese literature through analytical oral and written arguments

Chinese (CHIN)

CHIN 101 Chinese I (3 Credit Hours)
This is an introductory course in Modern Standard Chinese (Mandarin) for students with none or little prior experience in Chinese. This course introduces the four basic communicative skills in Chinese: listening, speaking, reading and writing, and emphasizes on conversation. They will be able to understand and respond to greetings, as well as talk about family members, time, hobbies and friends. They will learn nearly 200 characters.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN101/ASIAC01
Outcomes:
Students will achieve active control of Chinese sound system and writing system

CHIN 102 Chinese II (3 Credit Hours)
Pre-requisites: CHIN 101
CHIN 102 is a continuation of CHIN 101. Students will expand their knowledge of Chinese characters, vocabulary and grammar, improve their skills on listening, speaking, reading, and writing skills, and learn more cultural knowledge. Aside from dialogues, they will also read a short dairy and a letter. They will learn some 200 new characters.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN102/ASIAC02
Outcomes:
Students will be able to make appointments, talk about Chinese learning experience, school life, shopping, weather and transportation

CHIN 103 Chinese III (3 Credit Hours)
Pre-requisites: CHIN 102
CHIN 103 builds on the knowledge and skills gained in CHIN 101-CHIN 102. This course develops conversational skills by using fundamental grammatical patterns and vocabulary in functional contexts.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN103/ASIAC03
Outcomes:
Students will learn dialogues used in the contexts of dinning out, studying in library, asking directions, attending birthday party, seeing a doctor, and dating

CHIN 104 Chinese IV (3 Credit Hours)
Pre-requisites: CHIN 103
CHIN 104 is the continuation of CHIN 103. This course further extends students' knowledge of Chinese vocabulary and grammar, and improves their skills in listening, speaking, reading, and writing.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN104/ASIAC04
Outcomes:
Students will learn expressions in the contexts of renting an apartment, mailing a letter and traveling in both mainland China and Taiwan, talking about hometown and sports, and checking in at the airport

CHIN 190 Business Chinese I (3 Credit Hours)
Pre-requisites: CHIN 101
Business Chinese I is primarily intended for students who are interested in pursuing a career that may involve working in China or doing business with Chinese corporate partners. Examples of topics include meeting with a manager, being introduced to colleagues, and attending social events.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
1) An expanded vocabulary (500-600 characters in total); 2) deeper knowledge of Chinese grammar; and 3) a multi-faceted introduction to Chinese business culture

CHIN 191 Business Chinese II (3 Credit Hours)
As a follow-on course to Business Chinese I (CHIN 190), this course is primarily intended for students who are interested in pursuing a career that may involve working in China or doing business with Chinese corporate partners. In CHIN 191, all the topics are practical for a "real world" business environment, for instance, making an appointment, visiting a company, introducing production facilities and products, dining etiquette, and socializing with colleagues after work.
Outcomes:
Upon completion of Business Chinese II, the student should have 1) an expanded vocabulary frequently encountered in a business environment, 2) deeper knowledge of Chinese syntax (sentence patterns and habitual usages), morphology (character construction and combinations), and other aspects of grammar (eg, verb tense markers, positioning of prepositional phrases and adverbials), and 3) a multifaceted introduction to Chinese business culture

CHIN 250 Composition and Conversation (3 Credit Hours)
Pre-requisites: CHIN 104
This course focuses on different aspects of Chinese life and society, enhancing students' ability to understand Chinese culture and Chinese ways of socializing, thinking, lifestyle, etc.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will increase their vocabulary and improve their ability to compose formal speech and carry on discussions

CHIN 251 Advanced Composition & Conversation (3 Credit Hours)
Pre-requisites: CHIN 250
This course focuses contemporary aspects of Chinese life and society.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will increase their vocabulary and improve their ability to compose formal speech and carry on discussions

CHIN 252 Advanced Composition and Conversation II (3 Credit Hours)
Pre-requisites: Students must have completed CHIN 251 or equivalent
In this course students will further expand their vocabulary, acquire more-advanced grammatical structures and usage patterns, learn to communicate in Chinese both in the classroom and in social settings and deepen their understanding of Chinese culture.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will be able to further enhance their listening, reading, speaking and writing skills as well as appreciate the cultural nuances of the Chinese language

CHIN 253 Advanced Composition and Conversation III (3 Credit Hours)
Pre-requisites: Students must have completed CHIN 252 or equivalent
In this course students will further expand their vocabulary, acquire more-advanced grammatical structures and usage patterns, learn to communicate in Chinese both in the classroom and in social settings and deepen their understanding of Chinese culture.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will be able to further enhance their listening, reading, speaking and writing skills as well as appreciate the cultural nuances of the Chinese language

CHIN 395 Tutorial (1-6 Credit Hours)
This independent study course provides an opportunity to explore a topic of interest to the student related to Chinese language and culture under the guidance of a faculty member.

French (FREN)

FREN 101 Elementary French I (3 Credit Hours)
Pre-requisites: No previous knowledge of French is expected; Please go to http://www.luc.edu/modernlang/exam.shtml for placement test instructions, especially if you took any French courses in high school or college
Taught in French. Instructs basic communicative French, the people and cultures where it is spoken, using formal and informal registers, and speaking in present and future time. Students will listen and respond, read and write, ask and answer simple questions in basic functional French. Content: personal topics, everyday living.
Outcomes:
Student will successfully interpret and express needs pertaining to home, work, college, leisure, and dining; Achievement level desired: Novice Low, American Council on the Teaching of Foreign Languages (ACTFL*) standards

FREN 102 Elementary French II (3 Credit Hours)
Pre-requisites: FREN 101 or one semester college French with C- or better, or placement test score; Please go to Modern Languages home page for placement test instructions; You must take the placement test if you took any French courses in high school

Outcomes:
Students become more fluent and precise in expressing opinions, asking and answering more probing and data-driven questions, on topic; Achievement level desired ACTFL* Novice Mid to High

FREN 104 Intermediate French II (3 Credit Hours)
Pre-requisites: FREN 103, or equivalent French at another college, with C- or better, or placement test score; Placement test on the basis of high-school work required: please go to Modern languages home page for placement test instructions
Taught in French. Students will comprehend and produce French in more complex contexts (literary and cultural) while reviewing intermediate grammar structures to improve fluency and accuracy. Students present and debate cultural, historical or current events topics; practice expressing emotion, opinion, judgment, necessity, hypotheticals, and regret.
Outcomes:
Students will skillfully interpret and write about literature excerpts or French and francophone media; They will summarize, narrate, and offer opinions; Achievement level desired ACTFL* Novice High to Intermediate Low

FREN 250 French Composition and Conversation I (3 Credit Hours)
Pre-requisites: FREN 104, or college transfer equivalent, with C- or better, or placement test score; Placement test based on high-school work is required: please go to Modern Languages home page for placement test instructions
Taught entirely in French. Students develop advanced interpretive and presentation skills, detecting sequencing, time frames and chronology in texts, whether heard or viewed. Format is discussion, presentation, role plays, several compositions written in a process.
Outcomes:
Students will share points of view verbally and in writing on contemporary topics discovered in current media of French and francophone cultures; Achieved level desired ACTFL* Intermediate Low to Mid

FREN 251 French Composition and Conversation II (3 Credit Hours)
Pre-requisites: FREN 104, or college transfer equivalent, with C- or better or placement test score; Placement test based on high-school work is required: please go to Modern Languages home page for placement test instructions
Taught entirely in French. Via classic, French New Wave, francophone to contemporary French-speaking film students discover and compare cultural differences, discuss global or local concerns, spanning the disciplines. Writing in a process leads to more sophisticated writing skills.
Outcomes:
Students become ever-precise and effective in communicating facts, opinions, and concerns about French-speaking communities in relationship to their own; Achieved level desired ACTFL* Intermediate Low to Mid

FREN 270 Main Currents of French Literature & Culture I (3 Credit Hours)
Pre-requisites: Pass FREN 250 and/or FREN 251 with C- or better or AP credit for both 250 and 251, or with instructor's consent
Survey of representative works of French literature from the Middle Ages, the Renaissance, and the 17th and 18th centuries, examining the formation of French cultural identity up through the Enlightenment and the French Revolution.
Interdisciplinary Option: European Studies
Outcomes:
Students will identify literary and cultural trends and ruptures across these centuries, and explain them in some detail; Achievement level desired: ACTFL* Intermediate Mid to High

FREN 271 Main Currents of French Literature & Culture II (3 Credit Hours)
Pre-requisites: Pass FREN 250 and/or FREN 251 with C or better, acquire AP credit, or instructor's consent
Survey of representative works of French literature in all genres, from Romanticism through narrative realism and the modernist innovations of Surrealism and existentialism in the 20th century.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will learn to identify these literary and cultural movements, and explain in some detail their importance regarding French cultural identity; Achievement level desired: ACTFL* Intermediate Mid to High

FREN 300 Tutorial for Credit (1-6 Credit Hours)
Pre-requisites: FREN 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
Eligible students majoring in French may elect tutorial for credit; topic chosen in consultation with faculty member.
Outcomes:
Student may choose their own topic to explore

FREN 301 Stylistics (3 Credit Hours)
Pre-requisites: FREN 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
This is advanced work in writing expository prose is based on intensive study of advanced grammar and syntax with attention to peculiar features of the French idiom. Students examine phonology and phonetics with attention to French speech patterns and rhythms whilst enhancing vocabulary development through the varieties of lexical references and other dictionaries.
Outcomes:
Students will be able to demonstrate a sophisticated, comprehensive command of the complexities of written and spoken French; Achievement level desired: ACTFL* Advanced Low

FREN 302 French for Professions (3 Credit Hours)
Pre-requisites: FREN 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
Surviving in global careers--commerce, law, diplomacy, communications, health--requires knowledge of business terminology and organism structures. Students study current events, and present on francophone companies, institutions, and NGO's. Résumés are perfected in French, interview questions are drilled. Students conduct detailed analysis of the outstanding stylistic features of France's great prose writers from the XVIth century to the present day. Works may include writings by Rabelais, Montaigne, Pascal, Voltaire, Flaubert, Balzac, Michelet, Proust, Camus, Malraux and Lévi-Strauss, among others.
Interdisciplinary Option: European Studies
Outcomes:
Appreciation of the rich variety of expressive skills and moral penetration among France's great prose writers; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 369 Introduction to French for Reading Knowledge (3 Credit Hours)
This course will prepare students for reading and conducting research in French. Fundamentals of grammar, syntax, and vocabulary essential to reading competence will be covered, using materials drawn from a wide range of fields. Completion of this course with a passing grade fulfills the Graduate School language competency requirement. This course is restricted to graduate students.
Course equivalencies: FREN369 / FREN109

FREN 390 French & Francophone Cultures & Civilizations (3 Credit Hours)
Pre-requisites: FREN 271 with C or better, and instructor's consent
This multidisciplinary study of French and Francophone cultures as they have developed over the centuries will focus on the historical, institutional, religious, and artistic manifestations that have contributed to the formation of these identities. Special attention will be given to their revolutionary role in politics, painting, intellectual life, and cinema.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Course equivalencies: X-FREN390/INTS390
Outcomes:
Students will be able to identify and discuss the revolutionary roles these cultures have had in politics, painting, intellectual life, and cinema; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 395 Internship (3 Credit Hours)
Pre-requisites: Completion of at least one 300-level French course and instructor's consent
Eligible students who have secured an internship related to the field of study may complete an internship for credit, with the approval of a faculty member. Students complete reflective assignments and a final project in French, in consultation with the faculty member.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience while working with the French language and Francophone cultures and applying skills they have learned in the classroom

FREN 399 French Honors Tutorial (3 Credit Hours)
Eligible students majoring in French and with departmental honors may elect tutorial for credit; topic chosen in consultation with faculty member. Instructor's consent, restricted to students in French BA.
Course equivalencies: FREN399H / FREN399
Outcomes:
Students will explore a topic of their choice guided by a faculty member, and will conduct a research project that will result in a final paper

German (GERM)

GERM 101 Elementary German I (3 Credit Hours)
This course is an introduction to German, designed for students with no previous experience. Students develop communicative language skills and acquire a fundamental knowledge of German-speaking cultures.
Outcomes:
Students will be able to understand simple sentences and short narratives, respond to basic inquiries about themselves and others, formulate basic questions, comprehend basic written texts, and write simple German sentences

GERM 102 Elementary German II (3 Credit Hours)
Pre-requisites: GERM 101
Students will further develop communicative language skills and knowledge of German-speaking cultures, and will finish learning all the basic grammatical structures of the language.
Outcomes:
Students will have learned to express themselves through a wider range of vocabulary and grammatical structures; They will be able to express appropriate reactions to ordinary situations, read more complex texts, and write sentences in short but cohesive paragraphs

GERM 103 Intermediate German I (3 Credit Hours)
Pre-requisites: GERM 102 Students will review and develop their understanding of German grammar and vocabulary
Students will read and discuss a variety of short readings, including short stories and poetry.
Outcomes:
Students will have gained a wider range of oral expression, both lexical and grammatical; They will be able to express more complex reactions, read more complex narrative and literary texts, and write sentences in longer paragraphs

GERM 104 Intermediate German II (3 Credit Hours)
Pre-requisites: GERM 103 This course focuses on review and practice of more complex grammatical elements
Students will read texts of greater length and complexity, expand their vocabulary, and increase their ability to communicate, both orally and in writing.
Outcomes:
Students will have gained a wider range of oral expression, both lexical and grammatical; They will be able to express more complex reactions, read more complex narrative and literary texts, and write sentences in cohesive paragraphs and short essays

GERM 250 Composition & Conversation I (3 Credit Hours)
Pre-requisites: GERM 104
This is a briskly paced class in which students engage in learning to express themselves effectively, both orally and in writing, in German. All work is carried out in German.
Interdisciplinary Option: German Studies
Outcomes:
Students gain confidence in their ability to speak, read and write modern German, and will gain a wider range of oral expression, both lexical and grammatical

GERM 251 Composition & Conversation II (3 Credit Hours)
Pre-requisites: GERM 250
Students will learn to express themselves with increasing sophistication in both oral and written German. Course materials are challenging and may include a full length literary text.
Interdisciplinary Option: German Studies
Outcomes:
Students will gain further confidence in their ability to speak, read and write modern German, and will have gain a wider range of oral expression, both lexical and grammatical

GERM 270 Modern German Literature and Culture I (3 Credit Hours)
Pre-requisites: GERM 103 or equivalent
Representative works in literature, philosophy, and fine arts, with sociopolitical backgrounds, 1830-1900.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to understand revolutionary post-romanticism, realism, and naturalism in German literature and culture

GERM 271 Modern German Literature and Culture II (3 Credit Hours)
Pre-requisites: GERM 271
Representative works in literature, philosophy, and fine arts, with sociological backgrounds, 1900-present.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to understand neoromanticism, expressionism, literature and fascism, socialist realism, and postwar culture in West and East Germany

GERM 300 Tutorial for Credit (1-6 Credit Hours)
Pre-requisites: Permission of chairperson
Eligible students minoring in German may elect tutorial for credit.
Outcomes:
Students will be able to focus on a specific aspect of German literature or culture

GERM 320 German-American History: Focus on Chicago (3 Credit Hours)
This engaged-learning course traces the history of German-speaking immigrants in the United States from its very beginnings in 1608, through the 19th century heyday of German immigration, and to the present day. Chicago will function as a case study. Students will interact with the DANK Haus and the German community in Chicago.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn about the historical chronology of German-speaking immigration to the United States, assimilation, and German-American cultural contributions to the US, with a focus on Chicago; Students will interact with the DANK Haus and the German community in Chicago

GERM 369 German Reading Knowledge (3 Credit Hours)
This course provides graduate students in the humanities, arts and social sciences with the fundamentals of German grammar for the purposes of reading and translating academic German. Students will work through German grammar explanations, vocabulary, strategies for negotiating meaning, and translation exercises.
Course equivalencies: GERM369 / GERM109

GERM 370 German Cinema (3 Credit Hours)
The course provides an overview of German film from its beginnings until the present time. Movies will be screened and discussed chronologically from the various eras of German film: Silent Movies, Weimar Sound Movies, Film in the Third Reich, Post-War Films, New German Cinema and Movies of Unified Germany. Taught in English.
Interdisciplinary Option: European Studies, Film & Digital Media Studies, Global Studies, German Studies, International Film & Media Studies
Course equivalencies: X-GERM370/ICVM370/IFMS370

Hebrew (HEBR)

HEBR 101 Modern Hebrew I (3 Credit Hours)
An introduction to the fundamentals of modern Hebrew, together with study of the distinctive culture of the Jewish state of Israel.
Outcomes:
Students will be able to understand basic Hebrew sentences and to give basic information about themselves in Hebrew, and will demonstrate knowledge of the culture of modern Israel

HEBR 102 Modern Hebrew II (3 Credit Hours)
Pre-requisites: HEBR 101
A continued introduction to the fundamentals of modern Hebrew, together with study of distinctive culture of the Jewish state of Israel.
Outcomes:
Students will be able to understand basic Hebrew sentences and to give basic information about themselves in Hebrew, and will demonstrate knowledge of the culture modern Israel

HEBR 103 Modern Hebrew III (3 Credit Hours)
Taught in Hebrew. Course focuses on pronunciation, grammar, and developing conversational and writing fluency.

HEBR 104 Modern Hebrew IV (3 Credit Hours)
Taught in Hebrew. Students will comprehend and produce Hebrew in more complex contexts (literary and cultural) while reviewing intermediate grammar structures to improve fluency and accuracy. Students present and debate cultural, historical or current events topics; practice expressing emotion, opinion, judgment, necessity, hypotheticals, and regret.

Italian (ITAL)

ITAL 101 Italian I (3 Credit Hours)
This course provides an introduction to the basic grammatical elements of Italian, promoting the development of listening comprehension, speaking, reading and writing skills while examining the geography and culture of Italy.
Outcomes:
Students will be able to understand and write basic Italian sentences and to produce orally and in writing short sentences providing basic personal information about themselves, their activities and plans in Italian

ITAL 102 Italian II (3 Credit Hours)
Pre-requisites: ITAL 101
This course continues the introduction to the basic grammatical elements of Italian, promoting the further development of listening comprehension, speaking, reading and writing skills while examining the geography and culture of Italy.
Outcomes:
Students will be able to understand and write basic Italian sentences and to produce orally and in writing short sentences providing basic personal information about themselves, their activities and plans in Italian

ITAL 103 Italian III (3 Credit Hours)
Pre-requisites: ITAL 102
This course examines more complex grammatical elements of Italian, and promotes the development of intermediate listening comprehension, speaking, reading and writing skills.
Outcomes:
Students will be able to understand and write more complex Italian sentences and paragraphs, and to produce orally and in writing paragraphs and longer pieces providing accounts of their present past and future activities, and oral and written reactions to Italian cultural products

ITAL 104 Italian IV (3 Credit Hours)
Pre-requisites: ITAL 103
This course is a comprehensive review of the basic grammatical elements of Italian, while continuing to promote all language skills with particular emphasis on reading and writing proficiency in areas of cultural and societal investigation.
Outcomes:
Students will be able to understand and write increasingly complex Italian sentences and paragraphs and to produce orally and in writing utterances and texts about Italy, its cultural distinctness and its differences from the United States

ITAL 250 Composition & Conversation I (3 Credit Hours)
Pre-requisites: ITAL 104
This advanced conversation and composition course emphasizes the development of advanced Italian speaking and writing skills and examines advanced grammar and vocabulary in relation to advanced skill development.
Outcomes:
Students will further develop their Italian language skill acquired in previous courses and through experience and will strive for functional conversational fluency and the ability to write with clarity, precision and control of grammatical elements

ITAL 251 Composition & Conversation II (3 Credit Hours)
Pre-requisites: ITAL 104
This advanced conversation and composition course can either be taken as a continuation of ITAL 250 or independently. It also emphasizes the development of advanced Italian speaking and writing skills and examines advanced grammar and vocabulary in relation to advanced skill development.
Interdisciplinary Option: Italian Studies
Outcomes:
Students will further develop their Italian language skill acquired in previous courses and through experience and will strive for functional conversational fluency and the ability to write with clarity, precision and control of grammatical elements

ITAL 270 Main Currents of Italian Literature I (3 Credit Hours)
This course, taught in Italian, is an introduction to Italian literary texts of the Middle Ages and early Renaissance in relation to the cultural and social and political history of Italy during its most noteworthy period of development.
Interdisciplinary Option: European Studies, Italian Studies
Outcomes:
Students will demonstrate knowledge of how medieval and Renaissance Italian literary text reflect in a profound way Italy's cultural, artistic and political history in a systematic manner

ITAL 271 Main Currents of Italian Literature II (3 Credit Hours)
This course, taught in Italian, is an introduction to Italian literary texts and films in relation to the cultural and political history of Italy from 1700 to the present.
Interdisciplinary Option: European Studies, Global Studies, Italian Studies
Outcomes:
Students will demonstrate knowledge of how Italian literary texts and film reflect in a profound way Italy's social, cultural, economic and political history in a systematic manner

ITAL 280 Masterpieces of Italian Literature (3 Credit Hours)
Pre-requisites: ITAL 250 and ITAL 251, with C or better; If either 250 or 251 have been completed, the other may be taken simultaneously with this course
This course is dedicated to the study of selected literary masterpieces written in Italian. Canonical and non-canonical works may be included, alongside essays that reflect on the definition and the history of Italian literature and its canon.
Outcomes:
By the end of the course, students will be able to describe, discuss, and present works of literature in expository writing; Students will demonstrate adequate reading and writing skills at level through oral presentations and term papers; Achievement level desired: ACTFL* Intermediate High to Advanced Low

ITAL 282 Studies in a Theme (3 Credit Hours)
Pre-requisites: ITAL 250 and ITAL 251, with C or better; If either 250 or 251 have been completed, the other may be taken simultaneously with this course
This course explores a theme chosen by the instructor on any social, artistic, and intellectual currents in the cultural history of Italy. The course may include cultural expressions such as the visual arts, music, theatre, performance, and film. It may consider different communication platforms such as - but not limited to - social media and pop culture. It may examine different genres and periods.
Outcomes:

ITAL 283 Studies in Italian Authors (3 Credit Hours)
Pre-requisites: ITAL 250 and ITAL 251, with C or better; If either 250 or 251 have been completed, the other may be taken simultaneously with this course
This course is dedicated to the study of selected Italian authors. Canonical and non-canonical writers may be included, alongside authors of the Italian diaspora.
Course equivalencies: X-ITAL283/MSTU376
Outcomes:
By the end of the course, students will be able to describe, discuss, and present the works of Italian authors in expository writing; Students will demonstrate adequate reading and writing skills at level through oral presentations and term papers; Achievement level desired: ACTFL* Intermediate High to Advanced Low

ITAL 284 Studies in Italian Film (3 Credit Hours)
Pre-requisites: ITAL 250 and ITAL 251, with C or better; If either 250 or 251 have been completed, the other may be taken simultaneously with this course
This course will focus on one or more aspects of Italian films and may concentrate on narrative structure, genre, authorship, cinematography, casting, setting, and so on. The course may include a diverse selection of Italian high-brow and popular films, alongside readings that highlight their societal and cultural roots.
Interdisciplinary Option: Global Studies
Outcomes:
By the end of the course, students will be able to describe, discuss, and present on various aspects of Italian cinema and the work of Italian filmmakers; Students will demonstrate adequate reading and writing skills at level through oral presentations and term papers; Achievement level desired: ACTFL* Intermediate High to Advanced Low

ITAL 290 The Italians (3 Credit Hours)
Pre-requisites: ITAL 250 and ITAL 251, with C or better; If either 250 or 251 have been completed, the other may be taken simultaneously with this course
This course aims at the acquisition of the Italian language for professional purposes in conducting business in Italy or with Italian companies. It will provide students with professional opportunities in an international and global environment.
Interdisciplinary Option: Italian American Studies
Outcomes:
By the end of the course, students will be familiar with business etiquette and the organization of Italian companies and corporations; Students will demonstrate use of appropriate written professional language in business letters and CV writing, and in oral communication; Achievement level desired: ACTFL* Intermediate High to Advanced Low

ITAL 300 Tutorial for Credit (1-6 Credit Hours)
Students will cover a specially designed program of study through regular meeting with Italian faculty.
Interdisciplinary Option: Italian Studies
Outcomes:
Students will demonstrate knowledge of literature and culture and will improve their language skills

ITAL 301 Stylistics (3 Credit Hours)
Pre-requisites: ITAL 270 and ITAL 271, with C or better; If either 270 or 271 have been completed, the other may be taken simultaneously with this course
This course helps students develop writing skills in expository prose. Based on intensive study of advanced grammar and syntax, the course enhances students' vocabulary through prose, poetry, and essay readings.
Outcomes:
By the end of the course, students will demonstrate a firm and comprehensive command of the complexities of written and spoken Italian in expository writing and oral presentations; Achievement level desired: ACTFL* Advanced Low

ITAL 305 Advanced Grammar (3 Credit Hours)
This course, taught in Italian, is a study of advanced Italian composition and rhetoric, with advanced study of Italian grammar.
Interdisciplinary Option: Italian Studies
Outcomes:
Students will further develop their Italian language skills acquired in previous courses and through experience and will strive to achieve as high a proficiency level as personally possible in their advanced Italian reading and writing ability

ITAL 308 Literary Criticism (3 Credit Hours)
Pre-requisites: ITAL 270 and ITAL 271, with C or better; If either 270 or 271 have been completed, the other may be taken simultaneously with this course
Students will study major schools and themes in literary theory, both historical and contemporary. Rhetorical, philosophical, and cultural approaches to literature will be studied in conjunction with specific literary texts drawn from several linguistic and cultural traditions.
Course equivalencies: X-FREN/GERM/ITAL/SPAN308
Outcomes:

ITAL 399 Italian Honors Tutorial (3 Credit Hours)
Pre-requisites: Instructor's consent, restricted to students in Italian BA Eligible students majoring in Italian and with departmental honors may elect tutorial for credit; topic chosen in consultation with faculty member.
Interdisciplinary Option: Italian Studies
Course equivalencies: ITAL399H / ITAL399
Outcomes:
Students will explore a topic of their choice guided by a faculty member, and will conduct a research project that will result in a final paper; Achievement level desired: ACTFL* Advanced Low to Advanced-Mid

Japanese (JAPN)

JAPN 101 Japanese I (3 Credit Hours)
This course introduces the four basic communicative skills in Japanese: listening, speaking, reading, and writing. Students gain knowledge of Japanese culture and ways of thinking which provide the context for communicating in Japanese. No previous knowledge of Japanese is required.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture
Course equivalencies: X-JAPN101/ASIAJ01
Outcomes:
Students will be able to understand and respond to greetings, introductions, and basic question about time, location, and directions and will be able to read and write hiragana and katakana, the two phonetic Japanese scripts as well as about 25 ideographic characters

JAPN 102 Japanese II (3 Credit Hours)
Pre-requisites: JAPN 101
Students will build on the skills in listening comprehension, speaking, reading and writing gained in JAPN 101.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture
Course equivalencies: X-JAPN102/ASIAJ02
Outcomes:
Students will be able to introduce themselves and others, discuss daily life, and read and write simple paragraph length compositions with the aid of vocabulary lists

JAPN 103 Japanese III (3 Credit Hours)
Pre-requisites: JAPN 102
Students will expand their knowledge of Japanese vocabulary, grammar, usage, and speech levels, using Japanese as a medium for learning Japanese.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture
Course equivalencies: X-JAPN103/ASIAJ03
Outcomes:
Students will use written and spoken Japanese to ask for and express opinions, to ask for assistance, and to participate in a variety of written and verbal social routines

JAPN 104 Japanese IV (3 Credit Hours)
Pre-requisites: JAPN 103
This course extends students' knowledge of Japanese grammar, vocabulary, verbal routines, and cultural patterns. Students will read and respond in Japanese to short works of fiction and non-fiction.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture
Course equivalencies: X-JAPN104/ASIAJ04
Outcomes:
Students will converse in Japanese for extended periods and be able to decode and create many written items from daily life such as application forms, catalogs, and recipes

JAPN 250 Composition & Conversation I (3 Credit Hours)
Students gain mastery of intermediate Japanese grammar and increase their ability to use honorific and humble speech, with increasing use of Japanese as the medium of instruction.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture

JAPN 251 Composition & Conversation II (3 Credit Hours)
This class is conducted mostly in Japanese with students developing the ability to read and discuss longer texts, including primary sources, to gain greater knowledge and understanding of Japan.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture

Literature in Translation (LITR)

LITR 161 Introduction to Italian Culture (3 Credit Hours)
This course introduces students to major social, artistic, and intellectual currents in the cultural history of Italy from antiquity to contemporary times. The overall goal is to reflect on how Italian culture has transcended the strict confines of its national origin to become a source of universal values and inspiration.

Major European literary texts will be examined in a historical and cultural context and in their transhistorical, universal aspects that make them masterpieces. Students will understand how literary masterpieces help us develop critical consciousness of our experience.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: LITR200/INTS200

LITR 202 European Novel (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course will focus on major EUROPEAN novels.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: LITR202/INTS204
Outcomes:
Students will gain an overview of the literary production of representative EUROPEAN novelists studied in the historical and societal context

LITR 203 European Drama (3 Credit Hours)
This course will focus on major European novels.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: X-LITR203/INTS205
Outcomes:
Students will learn how drama enhances our understanding of human interaction, violence, social order and the margins of individual freedom

LITR 204 European Film (3 Credit Hours)
This course will focus on major European films in order to give students an overview of the film production of representative European filmmakers studied in the historical and societal context.
Interdisciplinary Option: European Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Course equivalencies: X-LITR204/INTS206/IFMS205
Outcomes:
Students will gain an understanding of the distinctive aspects of the major European movements such as Italian neorealism, French new wave, New German Cinema and old and new Spanish surrealism

LITR 211 Latina Authors (3 Credit Hours)
The course will examine the writings of Latina authors: women writers from diverse Hispanic backgrounds who make their home in the United States and publish their writings in a particular form of English full of offerings from standard Spanish, "street Spanish", regional speech, and Spanglish.
Interdisciplinary Option: Global Studies
Course equivalencies: LITR211/INTS207
Outcomes:
Students will gain an understanding of the principal thematic and formal differences and similarities that characterize today's writings by Latina authors

LITR 219 African Film (3 Credit Hours)
This course will survey African film from the 1960s to the present, concentrating on the cinema of Francophone West Africa, the center of the African film industry.
Interdisciplinary Option: Film & Digital Media Studies, Global Studies, International Film & Media Studies
Course equivalencies: X-LITR219/INTS219/IFMS219
Outcomes:
Students will gain an understanding of the legacies of colonialism, identity formation, corruption and violence in post-colonial society, globalization, the positive and negative effects of tradition, and changing sex roles in modern Africa

LITR 221 Polish Authors (3 Credit Hours)
This course focuses on the major Polish writers from the Renaissance through the Enlightenment and Romantic periods, and into the modern era.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Course equivalencies: X-LITR221/INTS221
Outcomes:
Students will gain an understanding of the Polish cultural traditional and the basis of Polish cultural identity

LITR 225 Russian Masterpieces (3 Credit Hours)
This course will study 18th, 19th, and 20th century Russian literature, including poetry, drama, and fiction.
Interdisciplinary Option: Global Studies
Course equivalencies: X-LITR225/INTS225
Outcomes:
Students will learn of the importance of Pushkin, Russia's most influential poet and about influential Russian psychological realists - Gogol, Turgenev, Dostoevsky, Tolstoy and Chekhov

LITR 230 German Masterpieces (3 Credit Hours)

Interdisciplinary Option: European Studies, Global Studies, Italian American Studies, Italian Studies

LITR 280 World Masterpieces in Translation (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course will study literary masterpieces, in translation, of a selected culture or nation.
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: LITR280/INTS280
Outcomes:
Students will gain an appreciation of the literary masterpieces of another culture or nation

LITR 283 Major Authors in Translation (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
G3This course will study the works of selected authors, in translation, of a selected culture or nation.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Global Studies
Course equivalencies: LITR283/INTS283
Outcomes:
Students will gain an appreciation of the writings of authors of another culture or nation

LITR 284 International Film (3 Credit Hours)
This course will study selected films of a specific nation, region, or culture.
Interdisciplinary Option: Film & Digital Media Studies, Global Studies, International Film & Media Studies
Course equivalencies: X-LITR284/INTS284
Outcomes:
Students will gain an appreciation of the cinematic themes and techniques of another culture or nation

LITR 287 Topics in Asian Literature (3 Credit Hours)
This course introduces students to representative works of Asian literature within their cultural, historical, and aesthetic contexts.
Interdisciplinary Option: Global Studies
Course equivalencies: X-LITR287/INTS287
Outcomes:
Students will be able to analyze literary texts of a particular genre and write critical essays on the works read in the course

LITR 290 Classical Chinese Literature (3 Credit Hours)
This course is a survey of the classical Chinese literature from ancient time to the fall of Qing Dynasty.
Interdisciplinary Option: Chinese Language & Culture, Global Studies
Outcomes:

The course focuses on significant aspects of these works with an objective to enhance students' fascination with and skill in the reading and analysis of modern Chinese fiction. Knowledge of modern Chinese fiction will enable students to understand central aspects of 20th century Chinese culture.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Global Studies
Course equivalencies: X-LITR292/ASIA292/INTS290
Outcomes:
Students will be able to analyze literary texts of a particular historical period and write critical essays on works read in the course

LITR 299 Comparative Literature (3 Credit Hours)
This course will examine literary themes and problems of the instructor's choice in multiple literary traditions. Literary theory will be an important component of the course.
Interdisciplinary Option: Global Studies
Course equivalencies: X-LITR299/INTS299

LITR 392 Theories of Myth (3 Credit Hours)
This course surveys important models used to interpret the mythology of Classical Greece and Rome and other cultures.
Course equivalencies: X-CLST392/LITR392
Outcomes:
Students should be able to demonstrate a sophisticated understanding of different interpretive theories applicable to mythology, their advantages and limitations; They should be able to apply these theories and to demonstrate what learning may be derived from them

Polish (POLS)

POLS 101 Polish I (3 Credit Hours)
This course focuses on introducing the student to the basics of Polish, through conversation, pronunciation and grammar. Primary emphasis is on enabling the student to speak and understand basic Polish.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to use correctly and understand the basic grammatical forms of the verbs, nouns and adjectives of Polish as an inflected language; They will be appropriately prepared to complete the full view of Polish structures in Polish

POLS 102 Polish II (3 Credit Hours)
This course focuses on introducing the student to the basics of Polish, through conversation, pronunciation and grammar. Primary emphasis is on enabling the student to speak and understand basic Polish.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to use correctly and understand the basic grammatical forms of the verbs, nouns and adjectives of Polish as an inflected language; They will be appropriately prepared to complete the full view of Polish structures in Polish

POLS 103 Polish III (3 Credit Hours)
Pre-requisites: POLS 102
This course is designed to further develop and improve student's ability to speak and read Polish, by introducing advanced grammar, vocabulary, idioms, phraseology and syntax structures.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to use correctly and understand various grammatical forms of verbs, nouns, adjectives, adverbs and numbers; They will be appropriately prepared to use Polish grammatical and stylistic structures required in POLS 104

POLS 104 Polish IV (3 Credit Hours)
Pre-requisites: POLS 103
This course focuses on improving the student's ability to communicate in Polish both oral and written. Primary emphasis is on speaking and basic writing in Polish using proper grammatical and stylistic structures.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to express themselves in spoken and written Polish with the level of fluency appropriate for POLS 250

POLS 201 Polish Medical Terminology (3 Credit Hours)
Pre-requisites: POLS 104 or equivalent
This course is designed to prepare students for medical and healthcare related professions, future physicians and nurses, healthcare administrators and health insurance specialists. We will study Polish vocabulary for anatomy and physiology, and introduced Polish terms for medical procedures and tests. We will use phraseology common for taking medical history. Students will practice using medical terminology in patient interviews, reading articles from healthcare publications as well as understanding and formulating medical instructions. In this course we will also talk about cultural issues in practicing medicine, including the cultural differences between Polish and American approach. There will be strong emphasis on speaking, listening, and reading Polish.
Outcomes:
Students will expand their Polish vocabulary, including body parts and functions, diseases and their manifestations; They will practice taking a medical history in dialogues between medical professionals and their clients as well as use medical names and description

POLS 202 Polish for Healthcare (3 Credit Hours)
Pre-requisites: POLS 104 or equivalent
This course is designed to prepare students for medical professions, future physicians, dentists, and nurses. We will practice vocabulary for anatomy and physiology, Polish terms for medical procedure and test as well as phraseology used in every day in doctor-patient communication. This course will cover medical specializations such as: pediatrician, nutritionist, internist, immunologist, neurologist, psychiatrist and surgeon. We will also talk about cultural issues in practicing medicine. There will be strong emphasis on speaking, listening, and reading Polish and using more advanced aspects of Polish grammar.
Outcomes:
Students will learn medical vocabulary, including body parts and organs, physiology and functions of various systems; They will practice taking medical history in dialogues between medical professionals and their patients, and they will write descriptions of medical conditions

POLS 250 Composition & Conversation I (3 Credit Hours)
Pre-requisites: POLS 104
This course focuses on improving and further developing student's ability to converse and write in literary Polish language. Primary emphasis is on proper grammatical and stylistic expression in Polish with extended vocabulary and phraseology.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to express themselves in spoken and written Polish by making oral presentations and writing short compositions; They will be appropriately prepared for POLS 251

POLS 251 Composition & Conversation II (3 Credit Hours)
Pre-requisites: POLS 250
This course focuses on enhancing and polishing student's ability to converse and write in contemporary Polish language. Primary emphasis is on standard, literary Polish with its grammatical, orthographical and stylistic level expected of an educated Polish speaker.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to speak fluently, make oral presentations and write essays in standard literary Polish language with fluency of an educated Polish speaker

POLS 270 Contemporary Polish Culture in the Original Language (3 Credit Hours)
Pre-requisites: POLS 104 or equivalent
We will discuss the key elements of Polish culture as it is evolving in the fast changing social, technological, and economic circumstances after the political transformation of Central Europe. Students will explore the cultural traditions and values of the pre-WWII generation and the Soviet era generation, which led many to emigrate from Poland.
Interdisciplinary Option: Polish Studies

Russian (RUSS)

RUSS 101 Russian I (3 Credit Hours)
This course is an introduction to the basic elements of the Russian language and to Russian culture.
Outcomes:
Students will develop communicative skills and a fundamental knowledge of the Russian people, language and culture

RUSS 102 Russian II (3 Credit Hours)
Pre-requisites: RUSS 101
This course continues the study of the Russian language and culture.
Outcomes:
Students will continue developing communicative skills and further their knowledge of the Russian people, language and culture

RUSS 103 Russian III (3 Credit Hours)
Pre-requisites: RUSS 102
This course is an intensive review of speaking, listening, reading, and writing Russian.
Outcomes:
Students will develop audio-lingual facility in communication and the ability to read simple texts in Russian

RUSS 104 Russian IV (3 Credit Hours)
Pre-requisites: RUSS 103
This course continues the intensive review of speaking, listening, reading, and writing Russian.
Outcomes:
Students will develop audio-lingual facility in communication and the ability to read short literary and cultural texts in Russian

RUSS 290 Russia and Russians in the World (3 Credit Hours)
RUSS 290 is a service learning course focusing on leadership through service learning and the study of the Russian language and history. This course satisfies the Engaged Learning requirement.
Outcomes:
1) Students will develop Russian language skills (speaking, listening, reading, writing) and expand their knowledge of Russian history and culture; 2) Student will develop civic engagement leadership skills through practical service work and reflection

Spanish (SPAN)

SPAN 101 Spanish I (3 Credit Hours)
This course is an introduction to the basic elements of Spanish language and culture. It is designed for students with no previous experience in Spanish.
Outcomes:
Students will be able to understand simple messages and short narratives, respond to basic inquiries about themselves and others, formulate basic questions, as well as understand basic written texts

SPAN 102 Spanish II (3 Credit Hours)
Pre-requisites: SPAN 101
This course builds on SPAN 101, and introduces students to new topics and grammatical structures.
Interdisciplinary Option: Latin American Studies
Outcomes:
Students will be able to produce sounds in Spanish more accurately, express appropriate reactions to ordinary situations, understand basic oral commands, read more complex texts, and write sentences in cohesive paragraphs

SPAN 103 Spanish III (3 Credit Hours)
Pre-requisites: SPAN 102
This course is the first semester of second-year Spanish.
Outcomes:
Students will increase their knowledge of Spanish grammar and vocabulary, and their Spanish communication skills

SPAN 104 Spanish IV (3 Credit Hours)
Pre-requisites: SPAN 103
This course is the second semester of second-year Spanish.
Outcomes:
Students will continue to perfect their knowledge of Spanish grammar and vocabulary, with greater stress on reading and speaking

SPAN 190 Spanish for Medical Professionals I (3 Credit Hours)
This course develops intermediate-level skills in comprehension and conversation for the health professions. It is for students who have completed at least Spanish 104 who have intermediate-level Spanish language skills.
Outcomes:
Students will be able to understand and use appropriate Spanish expressions in a variety of situations involving use of Medical Spanish; Students will understand essential information about the dialects and cultural characteristics of major Spanish speaking populations in Chicago

SPAN 195 Spanish for Medical Interpretation (3 Credit Hours)
This course is part of an intermediate advanced sequence focusing on (mainly) advanced oral intercultural skills in Spanish language oriented to preparing students for the interaction with Spanish speaking patients with none or little English skills. Students will develop a strong cultural sensitivity to improve future patient-doctor communications, while reflecting on the role of medical interpreters in successful medical outcomes. An intensive speaking, translating and interpreting training will help to strengthen students' knowledge of language and their confidence in its use.

SPAN 250 Composition & Conversation I (3 Credit Hours)
Pre-requisites: SPAN 104
This course is the first in an intermediate-level sequence designed to develop greater fluency in speech and writing through diverse readings and activities and is taught in Spanish.
Outcomes:
Students will be able to speak, read, write, and comprehend readings in Spanish at the intermediate level

SPAN 251 Composition & Conversation II (3 Credit Hours)
Pre-requisites: SPAN 250
Advanced conversation and composition course designed to develop greater fluency in speech and writing through diverse readings and activities. Taught in Spanish and required for Spanish majors.
Outcomes:
Students will be able to speak, read, write, and comprehend readings in Spanish at the advanced, third-year college level

SPAN 252 Composition & Conversation: Native Speakers (3 Credit Hours)
Pre-requisites: fluency in Spanish
This course is designed for Spanish-speaking students, and is an Intensive study of grammar and composition.
Outcomes:
Students will develop greater fluency in written Spanish

SPAN 253 Advanced Composition & Conversation: Native Speakers (3 Credit Hours)
Pre-requisites: SPAN 252 or equivalent
This course is a continuation of SPAN 252.
Outcomes:
Students will develop greater fluency in written Spanish

SPAN 270 Introduction to Critical Analysis in Spanish (3 Credit Hours)
This course reviews and sharpens the essential skills and techniques necessary to critically read, interpret, and write and speak about all genres of Hispanic literature (narrative, poetry, drama, and essay) in Spanish. In so doing, students refine their linguistic skills, and gain awareness of the complexities of the Spanish-speaking world.
Interdisciplinary Option: European Studies
Outcomes:
Students will gain the necessary skills for critically reading, writing and discussing all genres of Hispanic literature

SPAN 271 Introduction to Iberian Literature and Culture (3 Credit Hours)
An introduction to Iberian literature, film, and cultural production, designed to provide students with an understanding of Iberian culture, history, and society, while also honing their linguistic and analytical skills.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will gain a grounding in Iberian literary and cultural production, an understanding of various literary and cultural forms, and an awareness of their context of production

SPAN 272 Introduction to Spanish American Literature and Culture (3 Credit Hours)
An introduction to Spanish-speaking Latin American literature, film, and other forms of cultural production, designed to provide students with an understanding of the region's variety and complexity while also honing their linguistic and analytical skills.
Outcomes:
Students will obtain a grounding in Spanish-speaking Latin American literary and cultural production, an understanding of various literary and cultural forms, and an awareness of their context of production

SPAN 282 Studies in a Theme (3 Credit Hours)
Pre-requisites: SPAN 104 or equivalent, and/or intermediate or above proficiency in Spanish as indicated by the foreign language placement exam
Close examination of a particular theme within the contemporary Spanish-speaking world not covered by the Department's regular course offerings. Focus may vary from term to term and depending on the instructor. This course counts towards the SPAN-MINR but not the SPAN-BA or SLIT-MINR. This course also counts towards satisfying the CAS language competency requirement.
Outcomes:
Describe a variety of social values, traditions, texts, artifacts, and other cultural expressions within historical contexts; Compare cultural phenomena across Spanish-speaking communities; Evaluate critical perspectives within cultural, literary, and social contexts

SPAN 300 Tutorial for Credit (1-6 Credit Hours)
Pre-requisites: permission of chairperson
Course material will be agreed upon by the student and instructor.
Outcomes:
Students will explore an aspect of Spanish language, culture and civilization, or literature not present in the curriculum or not offered that semester

SPAN 302 Business Spanish (3 Credit Hours)
Introduction to the fundamentals of the Spanish language and Hispanic culture as it relates to business practices.
Outcomes:
Students will learn the language of commerce in Spanish

SPAN 305 Advanced Spanish Grammar (3 Credit Hours)
Pre-requisites: SPAN 251 and permission of chairperson
This course is an overview of the most important aspects of Spanish grammar: sentence components, verbal systems, pronominal system, sentence structure, and paragraph structure.
Outcomes:
Students will be able to analyze words, sentences, both simple and compound, and to properly use pertinent linguistic terminology

SPAN 308 Literary Criticism (3 Credit Hours)
Introduction to various theories and methods of literary criticism and textual analysis. Conducted in English.
Course equivalencies: X-FREN/GERM/ITAL/SPAN308
Outcomes:
Students will be able to demonstrate a comprehensive critical knowledge of major currents and themes in international literary criticism and theory

SPAN 311 Generation of 1898 (3 Credit Hours)
Pre-requisites: Permission of chairperson
This course studies the distinctive group of turn-of-the-century Spanish writers known as the 'Generation of 1898': Unamuno, Baroja, Valle-Inclán, Machado, etc.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to discern the similarities and differences among the writers of this generation, as well as their relationship to modernism

SPAN 314 Survey of Medieval Literature (3 Credit Hours)
This course is a survey of the more prominent works of the Spanish Middle Ages - El Cantar de Mío Cid, El libro del buen amor, El conde Lucanor, and La tragicomedia de Calisto y Melibea o La Celestina - which reflect the religious, spiritual, and intellectual currents of Medieval Spain. In the form of seminar discussions and independent study, students will examine the aesthetic, social, and political trends of the ninth through fifteenth centuries, as well as the most important themes writers developed in pre-modern Iberia: honor, authority, vice and virtue, pilgrimage, devotion, and humor. These themes will be explored in the major works (primary sources), which will be complemented by secondary source readings and each student's independent research. The writers and texts studied in this course will also be viewed in the context of the greater artistic production in Spain and Medieval Europe.
Interdisciplinary Option: European Studies, Medieval Studies

SPAN 319 Romanticism (3 Credit Hours)
Pre-requisites: permission of chairperson
Study of the principle philosophical and esthetic characteristics of romanticism through readings in the major Spanish and/or Latin American romantic authors.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to recognize the principle characteristics of romanticism, its foreign influences, and its historical development in a variety of genres, including drama, prose fiction, essay, and poetry

SPAN 321 20th Century Theatre (3 Credit Hours)
Pre-requisites: permission of chairperson
An examination of 20th Century Theater in Spain covering such dramatists as Valle-Inclán, J. Benavente, M. Mihura, García Lorca, Buero Vallejo, and others.
Interdisciplinary Option: Global Studies
Outcomes:
Students will gain an understanding of dramatic genres and the contribution of Spanish playwrights to contemporary discussions on political and aesthetic issues

SPAN 326 Theater of The Golden Age (3 Credit Hours)
Pre-requisites: permission of chairperson
A study of major Renaissance and Baroque plays by Calderón, Lope de Vega, Tirso de Molina, Mira de Amescua, Juan Ruiz de Alarcón, and others.
Interdisciplinary Option: European Studies
Outcomes:
Students will learn to recognize mythological and historical themes while discussing the ethics of tragedy, the evolution of comic characters, and social concerns in the era of absolutism

SPAN 330 Survey-Poetry Theory & Practice (3 Credit Hours)
The poetry of the 19th century in Spain and Latin America derives from two literary, artistic and cultural movements: romanticism and modernism.

SPAN 331 20th Century Poetry (3 Credit Hours)
Pre-requisites: Permission of chairperson
A study of the development of modern Spanish poetry from post-modernism to the present with a special emphasis on the Hispanic poets of the avant garde.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will able to recognize the major poetic trends, forms, themes, and movements in 20th century Spanish verse

SPAN 336 Poetry of The Golden Age (3 Credit Hours)
Pre-requisites: permission of chairperson
An exploration of the influence of the Italian Renaissance on the Spanish tradition: Garsilaso de la Vega, Herrera, San Juan de la Cruz, Fray Luis de León, Quevedo, Góngora and others.
Outcomes:
Students will learn to recognize classical themes and rhetorical techniques, and to trace the development of such genres as epic, satire, and the lyric

SPAN 339 19th Century Poetry (3 Credit Hours)
Pre-requisites: permission of chairperson
This course is a survey of 19th-century literature, with emphasis on Romanticism and Realism.
Outcomes:
Students will become acquainted with the rich literature of the nineteenth century and will improve their critical and analytical skills

SPAN 340 Survey Prose-Fictional & Nonfiction (3 Credit Hours)
Pre-requisites: permission of chairperson
This course traces the development of Spanish prose from the Middle Ages to the present day. All prose genres are included.
Interdisciplinary Option: European Studies
Outcomes:
Students will come to appreciate and understand how peninsular prose has developed

SPAN 341 20th Century Spanish Literature (3 Credit Hours)
Pre-requisites: permission of chairperson
Beginning with the Generation of 1898 and concluding with post-modernism, this course studies the rich literature of modern Spain.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will better understand and appreciate the complexities of modern Spanish literature, as well as improve their critical and analytical skills

SPAN 346 Prose of The Golden Age (3 Credit Hours)
Pre-requisites: permission of chairperson
An approach to the picaresque, the pastoral novel and the essay with their concern with power and submission in everyday life. A study of the growing role of individual experience in fictional modes.
Interdisciplinary Option: European Studies
Outcomes:
Students will recognize the confluence of different prose styles, and the creation of individual voices in fiction; They will also become familiar with emerging concerns with religious and scientific issues during the period

SPAN 347 Cervantes Don Quijote (3 Credit Hours)
Pre-requisites: permission of chairperson
This course reads Cervantes' masterpiece with an emphasis on critical approaches, and on the book's impact on the invention of the modern novel.
Interdisciplinary Option: European Studies
Outcomes:
Students will learn about Cervantes's contribution to the development of modern fiction; They will become familiar with the novel's connection to other literary genres, and the role of metafiction and textuality

SPAN 349 Realism and Naturalism (3 Credit Hours)
Pre-requisites: permission of chairperson
This course is primarily a study of the novel of Realism and Naturalism, as well as of the short story.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to understand the goals of the great Realists and Naturalists and see their relationship to the major European masters of the nineteenth century

SPAN 352 Masterpieces of Latin American Literature (3 Credit Hours)
Pre-requisites: permission of chairperson
This course is a survey of representative works from pre-Colombian times to the present day, and an introduction to literary genres and defining themes in Latin American literature. It is taught in Spanish.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-SPAN352/LASP372
Outcomes:
Students will be able to understand the principal works, movements, and genres in Latin American literature

SPAN 353 Literary Masterpieces of Spain (3 Credit Hours)
This course is a survey of representative works of Spanish literature from the Middle Ages to the present, that is, from the first texts in the Castilian Spanish language (eleventh century), to works of the Renaissance and Baroque, and beyond, to key works of modern and contemporary times.
Outcomes:
Students will obtain a firm grasp of Iberian literary production, and an awareness of their context of production

SPAN 360 Intro to Hispanic Linguistics (3 Credit Hours)
Pre-requisites: SPAN 271 or 272
Introduction to Hispanic Linguistics is an introductory course on the structure of Spanish and its use in the Spanish-speaking world. Introducing the linguistic terminology and the basis for this science, helping the student analyze the grammatical structure and sounds of Spanish, and familiarizing the student with the different varieties of Spanish.

SPAN 361 Hispanic Women Writers (3 Credit Hours)
Pre-requisites: SPAN 271 or SPAN 272
A comparative study of 20th century Spanish and Latin American women writers who practice a variety of genres: autobiography, memoir, novel, short story, poetry, and testimonio.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will be able to recognize the major concerns of 20th century Hispanic women's writing

SPAN 362 History of Hispanic Feminism (3 Credit Hours)
This course challenges the usual view of feminism in Hispanic societies - that it played a minimal role in the revolutionary movements of the 20th century - through the reading of a series of works from the colonial period to the present, that chart the Hispanic woman's struggle to achieve liberation and self-realization.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to trace the true history of Hispanic feminism, beginning with Sor Juanna Ines de la Cruz, and ending with such contemporary feminist writers as Rosario Ferre, Rosario Castellanos, Montserrat Roig, and Rosa Montero

SPAN 363 Borges (3 Credit Hours)
This course focuses on the poetry and prose of Jorge Luis Borges, one of the central figures in 20th century Latin American literature, and one of the major writers of modern times.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to recognize the major themes and forms of Borges, as well as appreciate his seminal role in the creation of the so-called literature of the "boom" in Latin America

SPAN 364 Advanced Spanish Oral Expression (3 Credit Hours)
This advanced Spanish course will induce students to acquire more sophisticated tools for conversational management and oral expression, and in enlarging their vocabulary through structured practice.
Outcomes:
Students will gain more sophisticated skills and fluency in Spanish

SPAN 365 Latin American Cinema (3 Credit Hours)
This course will focus on Latin American cinema, from its early beginnings in silent cinema to the present. Instructor's consent required to enroll.
Interdisciplinary Option: Global Studies, Latin American Studies
Outcomes:
Students will gain an understanding of the formation of national film industries, the emergence of larger regional trends, and the cinematic treatment of social, political and economic aspects of various Latin American countries

SPAN 366 Spanish Cinema (3 Credit Hours)
Spanish film from early Surrealistic cinema to contemporary pastiche: Bunuel, Berlanga, Erice, Borau, Saura, Aranda, Almadovar, etc.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will gain an understanding of the development of cinema in Spanish society, and how it incorporated old genres such as comedy or melodrama

SPAN 367 Spanish Sociolinguistics (3 Credit Hours)
This course is an introduction to sociolinguistics.

Interdisciplinary Option: European Studies
Outcomes:
Students will understand the aspects of XVII century literature that relate to visual and spatial contexts, and the transformation that literature into a new style

SPAN 370 Latin American Poetry (3 Credit Hours)
Pre-requisites: permission of chairperson
Panoramic view of Latin American poetry with special emphasis on modernism, the avant-garde, and the post-World War II period. Selected authors include Gabriela Mistral, Delmira Agustini, César Vallejo, Vicente Huidobro, Octavio Paz, Pablo Neruda, and Gio
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-SPAN370/LASP370
Outcomes:
Students will understand the principle forms, trends, themes and movements in Latin American verse through the work of poets from Sor Juana Inés de la Cruz to Ernesto Cardenal

SPAN 371 Latin-American Poetesses (3 Credit Hours)
Pre-requisites: permission of chairperson
Survey of Latin American women's poetry from Sor Juana Inés de la Cruz to Gioconda Belli.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-SPAN371/LASP371
Outcomes:
Students will be able to discern a distinctive female voice in Latin American verse, while familiarizing themselves with the principle women poets from the colonial period to the present

SPAN 380 Latin American Prose Fiction (3 Credit Hours)
Pre-requisites: SPAN 270 or 271
Representative selection of Latin American fiction from first half of twentieth century. Taught in Spanish.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-SPAN380/LASP380
Outcomes:
Students will be able to comment knowledgeably on content, form, and context of selected Latin American works of fiction

SPAN 381 Contemporary Spanish-American Novel (3 Credit Hours)
Pre-requisites: SPAN 270 or 271
This course covers a representative selection of Latin American fiction from second half of twentieth century. Taught in Spanish.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-SPAN381/INTS383/LASP381
Outcomes:
Students will be able to identify and assess both the contextual and the formal features of modern Latin American fiction

SPAN 382 Latin American Theatre (3 Credit Hours)
An introduction to major playwrights from Argentina, Chile, Cuba, México, Venezuela and Colombia from the early baroque to the 20th Century. Topics include realism, existentialism, meta-theatre, performance art, and female dramatists.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-SPAN382/LASP382
Outcomes:
Students will be able to discuss different schools of drama and their impact on the stage in South America; They will also become familiar with playwrights who have used theater to approach social problems and critique contemporary mores

SPAN 385 Caribbean Literature (3 Credit Hours)
The course covers novelists and/or poets from Cuba, the Dominican Republic and Puerto Rico: Cabrera Infante, Alejo Carpentier, Reinaldo Arenas, Luis Rafael Sánchez, Ana Lidia Vega, Zoe Valdés, Lezama Lima, Severo Sarduy and others.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: SPAN385/LASP385
Outcomes:
Students will explore the role of Afro-Caribbean mythology, and learn about the use of humor and music forms in fiction; They will recognize certain historical patterns (slavery, dictatorship) and how they shape the creation of extreme characters and situation

SPAN 389 Latin American Short Story (3 Credit Hours)
Survey of the Latin American short story from the middle of the 19th century to the present.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-SPAN389/LASP389
Outcomes:
Students will be able to contextualize short stories, to analyze them both formally and thematically, and to recognize the different types of short story written in Latin American: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 390 Latin American Culture and Civilization (3 Credit Hours)
Pre-requisites: SPAN 270 or 271
This is a survey course of Latin American culture and civilization and examines the main cultural, intellectual and political currents that have taken shape in Latin America. Special attention is given to the art and literature that has come to from contemporary Latin American culture within the context of colonization and independence.
Interdisciplinary Option: Catholic Studies, Global Studies, Latin American Studies
Course equivalencies: X-SPAN390/INTS397/LASP390
Outcomes:
To gain knowledge, analyze and understand the main characteristics which define Latin American culture; This will be accomplished through the study of texts, art and film

SPAN 391 Spanish Culture and Civilization (3 Credit Hours)
Pre-requisites: SPAN 270 & SPAN 271
This is a survey course of Spanish culture and civilization and examines the main cultural, intellectual and political currents that have taken shape in Iberia and Spain. Special attention is given to the art and literature that has come to from contemporary Spanish culture within the context of European history.
Interdisciplinary Option: Catholic Studies, Global Studies
Outcomes:
To gain knowledge, analyze and understand the main characteristics which define Latin Spanish culture; This will be accomplished through the study of primary texts, back-ground reading, art and film

SPAN 395 Internship (3 Credit Hours)
The internship will allow students to work in a variety of settings using Spanish - business, education, government, or social service agencies. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain practical experience in speaking and writing Spanish

SPAN 396 Saints and Sinners of Spain (3 Credit Hours)
Pre-requisites: SPAN 270 and SPAN 271 or 272
This course surveys prominent Spanish Golden Age authors whose writings reflect the religious, spiritual, and intellectual currents of early Modern Spain, with a concentration on the culture of the Counter-Reformation. Its primary focus is how Christian life in reflected in literature and art and the portrayal of virtue and vice. To comprehend religious, spiritual and intellectual currents in Spanish culture, as reflected in literature and art.
Interdisciplinary Option: Catholic Studies

SPAN 397 Topics in Hispanic Literature (3 Credit Hours)
This revolving-topics course allows students to focus on a specific theme, such as Hispanic Feminism, Visions of America, or The Literature, Cinema ad Music of 21st century Spain. It also provides for in-depth study of a single author, such as Federico Garcia Lorca, Miguel de Unamuno or Jorge Luis Borges.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-SPAN397/LASP397

Arabic Language and Culture Minor

The Arabic program at Loyola University Chicago, established in 2012, serves a hybrid body of students from a variety of linguistic, socio-cultural, and religious backgrounds. Our program has common interdisciplinary interests with several fields including History, Political Science, Theology, Literature, Global and International Studies, and Communication.

For more information please contact:

Dr. Sawsan Abbadi (https://www.luc.edu/modernlang/profiles/sawsanabbadi.shtml/)
Arabic Language Program Director

PLSC 368	Politics of the Middle East	
THEO 295	Islam	
THEO 365	Women, Gender and Embodiment in Islam	
Total Hours		**18**

[1] Other course options may become available for this requirement on a rotating basis. Students should consult with the program director before enrolling for a course not on this list.

Suggested Sequence of Courses

Language courses must be taken in sequence. The courses satisfying the Literature in Translation and Culture Courses requirements of the Arabic minor can be taken in any order. More than one Literature in Translation and Culture Courses can be taken during the same term and Language and Literature in Translation and Culture Courses can be taken during the same semester. Terms for course offerings may vary.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
First Semester

Total Hours	**18**

Double Dipping

There is no limit for double dipping. Please consult with program director for any questions.

Transfer-Student Residency Requirement

At least 9 credit hours of Arabic Language and Culture Minor (ARLC-MINR) requirements must be completed at Loyola.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Students graduating from our program are expected to reach an Intermediate High to Advanced Low proficiency level as described by the American Council on the Teaching of Foreign Languages ACTFL. Although Formal Educated Arabic is emphasized, our program incorporates basic elements of Levantine dialect to reflect the reality of the Arab World. The Arabic program is restructuring its curricula to meet the National Standards of Teaching Foreign Languages in the 21st century described by ACTFL and highlighting the following outcomes/standards:

- Communication
- Cultural knowledge and critical perception (or awareness) of other cultures and people.
- Connections with other related disciplines to reinforce and further the students' knowledge
- Comparisons among the nature of the target language and culture(s) in comparison to other languages and cultures
- Communities: Become life-long learners involved in the functional use of language and culture worldwide.

Chinese Language and Culture Minor

The Chinese program offers more than 10 Chinese language courses and several Chinese Literature in Translation courses leading to a minor in Chinese language and culture.

A minor in Chinese language and culture should open doors to a variety of career options, for example, working in a position where Chinese language skills and cultural/business knowledge are desirable, teaching at a school or working for a multinational company in China, or pursuing advanced studies in Chinese, Asian studies, international relations, or related disciplines.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- For students taking the one- or two-literature-course option, demonstrate knowledge of some of the most important genres and works of literature associated with the major historical periods, for example, selections from the works of Confucius and Mencius.
- For students taking a course with an emphasis on China (e.g., in history, philosophy, political science) in partial fulfillment of the minor's requirements, gain a basic understanding of the relevant historical periods and be able to discuss major events and their significance in China's development.
- Be able to engage in conversations involving common topics such as study, work, career aspirations, family, and hobbies and demonstrate essential knowledge of Chinese culture.
- Be able to read and write routine documents such as email, letters, and applications using complete and grammatical sentences following appropriate cultural norms.

French (BA)

The Major in French offers students the opportunity to master skills of language acquisition and textual analysis while developing multicultural awareness of the diversity inherent in the Francophone world. Our program prepares students to think critically, and allows them to gain a broad appreciation and deep understanding of French and Francophone literatures and cultures. Our curriculum includes courses in literature from the Middle Ages until the present day, as well as interdisciplinary courses that look at cultural and historical movements. Most French majors take advantage of the study abroad opportunities offered in conjunction with the Office for International Programs, and participate in extracurricular activities such as French Club or language tutoring and coaching.

For more information about our programs in French, please contact us (https://www.luc.edu/modernlang/contactus.shtml/).

A senior Capstone E-Portfolio is required for graduation.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Upon completion of the Major in French, students will be able to:

- Demonstrate proficiency in speaking, understanding, reading, and writing skills
- Develop analytical skills that will allow them to read and write in French as well as write organized essays with developed arguments
- Develop skills of literary analysis that will allow them to understand major topics in French and Francophone literatures and cultures
- Trace developments over time in literary and cultural movements as well as transformations of political and historical institutions
- Analyze and interpret numerous literary texts in order to better comprehend the representations of cultural identity and make cross-cultural, intercultural connections
- Establish connections between literature, film, and history in France and the Francophone world
- Attain better cultural competency
- Foster a lifelong interest and enthusiasm for French-speaking cultural production

French Language and Literature Minor

As of Fall 2026, this minor is no longer accepting students.

The minor in French Language and Literature offers students the opportunity to master skills of language acquisition and textual analysis while developing multicultural awareness of the diversity inherent in the Francophone world. Our program prepares students to think critically, and allows them to gain knowledge of literary and cultural expressions of French and Francophone cultures. Students may take courses in literature from the Middle Ages until the present day, as well as interdisciplinary courses that look at cultural and historical movements.

GRMS 300	German Studies Minor Capstone	1

Electives		
Students choose four courses from the following. In order to qualify as an elective, a course must have at least one-third of its content devoted to German cultural history.		12
GERM 250	Composition & Conversation I (offered every fall semester) [2]	
GERM 251	Composition & Conversation II (offered every spring semester) [2]	
GERM 320	German-American History: Focus on Chicago	
GERM 369	German Reading Knowledge	
GERM 370	German Cinema	
HIST 300B	Topics in Premodern History (offered every other or third year)	
HIST 300C	Topics in European History (Post-1700) (Poland and Germany (offered every other or third year)	
HIST 300C	Topics in European History (Post-1700) (offered every other or third year)	
HIST 310A	Medieval World 1100-1500	
HIST 310B	Medieval Culture (offered every other year)	
HIST 315	The Reformation	
HIST 321	19th Century European Culture and Ideas (offered every other year)	
HIST 330	Europe in the Age of Catastrophe, 1900-1945 (offered every other or third year)	
HIST 335	The Second World War (offered every other or third year)	
HIST 336	Contemporary Europe 1945 to Present (offered every other or third year)	
HIST 338A	History of European Communism	
PHIL 306	19th Century Philosophy (offered every other year)	
PHIL 309	Classical Modern Philosophy (offered annually)	
PHIL 375	Philosophy of Marxism (offered irregularly)	
PLSC 308	Contemporary Political Thought (offered every other semester)	
SOCL 205	Sociological Thought (offered every semester)	
THEO 281	Christianity Through Time (offered annually)	
Total Hours		**19**

[1] This course may be waived by placement examination or by the Program Director.

[2] This is a preferred elective and must be taken unless waived by placement examination or by the Program Director.

Not less than 8 credit hours in the individual student's transcript must be unique to the German Studies Minor; that is, the courses in question are considered as actually fulfilling requirements of one minor, not of more than one minor or major.

Students may wish to satisfy some of the requirements through study abroad in a German-speaking country.

The final component of the program is a one-credit hour capstone project and paper, done in consultation with a German faculty member. It may also involve an internship at the DANK Haus in Chicago.

Suggested Sequence of Courses

Language courses must be taken in sequence and may be waived by placement examination or by the Program Director. The courses satisfying electives can be taken in any order. More than one elective course can be taken during the same term and language and elective courses can be taken during the same semester. Terms for course offerings may vary.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Option 1

Course	Title	Hours

Learning Outcomes

Students completing the German Studies Minor will:

- Achieve a mid-intermediate level of German language proficiency in speaking, reading, writing and listening according to the Proficiency Guidelines of the American Council of Teachers of Foreign Languages;
- Have specific knowledge of the cultural history of the German-speaking world based on the elective courses taken;
- Expand their horizons by virtue of having studied a foreign language and culture, and will be able bring those perspectives to bear on a more critical view of their own culture.

Italian Language and Literature Minor

As of Fall 2026, this minor is no longer accepting students.

The minor in Italian Language & Literature offers students the opportunity to master skills of language acquisition and cross-cultural communicative competence while developing multicultural awareness of Italian-speaking communities in Italy and beyond its borders. Our program prepares students to think critically, and allows them to gain knowledge of cultural expressions produced on the Italian peninsula and in its diasporas throughout the world.

Minor

- Italian Language Minor (p. 557)

Curriculum

A student pursuing the Minor in Italian Language and Literature is required to take six courses in Italian excluding ITAL 101 Italian I through ITAL 104 Italian IV.

Students normally take:

Code	Title	Hours
Required Courses		
ITAL 250	Composition & Conversation I	3
ITAL 251	Composition & Conversation II	3
ITAL 270	Main Currents of Italian Literature I [1]	3
ITAL 271	Main Currents of Italian Literature II	3
Two ITAL 300-Level Courses [1]		6
Total Hours		**18**

[1] Students who are fluent in the language may being the sequence at the 270-level with the Italian Undergraduate Program Director's permission. Students would be required to take two additional ITAL 300-level courses in order to meet the minimum 18 credit hours.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Upon completion of the program, students will be able to:

- Show intermediate to advanced proficiency in speaking, understanding, reading and writing skills
- Demonstrate knowledge of content areas (Italian grammar, Italian cultural expressions, Italian cinema etc.)
- Establish connections between literature, film, and society in the Italian-speaking world
- Acquire a lifelong interest and enthusiasm for Italian-speaking cultural production

Italian Language Minor

The minor in Italian Language offers students the opportunity to master skills of language acquisition and cross-cultural communicative competence while developing multicultural awareness of Italian-speaking communities in Italy and beyond its borders. Our program prepares students to think critically, and allows them to gain knowledge of cultural expressions of various level of the people of Italy and those of Italian heritage throughout the world.

- Demonstrate knowledge of content areas (Italian grammar, Italian cultural expressions, Italian cinema etc.)
- Establish connections between literature, film, and society in the Italian-speaking world
- Acquire a lifelong interest and enthusiasm for Italian-speaking cultural production

Italian Studies (BA)

The Italian Studies Major at Loyola University Chicago is an interdisciplinary program that offers students a learning experience in the field of the humanities with a focus on broader cultural, historical, and societal contexts beyond language studies. Since antiquity, Italy has been a crossroad of civilizations connecting the ancient, medieval, and modern world of Europe and the Mediterranean. It continues to be an international cultural destination and a central passage connecting the Global North and South. For these reasons, while the mission of teaching and promoting the language and literature of Italy is at the core of our Program, the Italian Studies major extends its scope to include multiple interdisciplinary perspectives (Classics, Environmental Studies, Fine Arts, Global Studies, History, Philosophy, Theology, Music, and Sociology), placing the country, its language, and its peoples in a Mediterranean, European, and global contexts.

The Italian Studies curriculum includes courses in the Italian language; Italian literature courses both in Italian and in translation; a 300-level internship course, with the possibility of completing it with international firms in Italy; and courses in other disciplines taught at Loyola. The Italian Studies major prepares students to work in a variety of fields that require an international background and solid intercultural skills.

Related Programs

Curriculum

Completion of the BA in Italian degree program requires ten courses totaling 30 credits. Requirements include a 3-credit hour introductory, interdisciplinary course, five courses of Italian Language, 9 credit-hours (3 courses) of electives to be chosen from a variety of Core courses, and a 3-hour Internship or service-learning course, which can be taken in Chicago or at the John Felice Rome Center.

Code	Title	Hours
Introductory Interdisciplinary Course		
LITR 161	Introduction to Italian Culture	3
Italian Language Courses [1]		**15**
Italian Studies Elective Courses (p. 559)		**9**
Internship or Service Learning (Chicago or Rome)		**3**
ITAL 395	Internship	
Portfolio		
A senior portfolio is required for student reflection on their achievement in the major and for program assessment		
Total Hours		**30**

[1] Students take five classes in Italian after placement determined by their competency. If they have had no Italian, they begin with ITAL 101 Italian I and take the next four classes: ITAL 102 Italian II, ITAL 103 Italian III, ITAL 104 Italian IV, and ITAL 250 Composition & Conversation I. Students who place higher than 104 chose from ITAL 251 Composition & Conversation II, ITAL 270 Main Currents of Italian Literature I, ITAL 271 Main Currents of Italian Literature II, and any 300-level ITAL course to ensure that 5 of the 10 courses taken for the major are taken in the Italian language.

Double-Dipping Policy

This department observes the CAS Double-Dipping Policy (p. 54) regarding unique credits required for each declared major/minor.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Upon completion of the program, students majoring in Italian Studies will be able to:

- Produce communication in the Italian language at high-intermediate/low advanced level
- Identify major themes and patterns in the historical and cultural heritage of Italy by linking its classical past to contemporary times
- Demonstrate first-hand experience of Italian culture in both academic and nonacademic settings
- Apply an intercultural perspective to professional global affairs acquired through immersion learning experiences, including an internship
- Integrate the Jesuit principles of service, inclusion, and self-knowledge into practice

These outcomes will be evidenced in the students' senior capstone project (ePortfolio).

Japanese Language and Culture Minor

Loyola's Japanese Program offers three years of Japanese language instruction, courses in Japanese literature in translation, and courses on Japanese film, history, culture, contemporary society, religion and art.

Related Programs

Minor

- Asian Studies Minor (p. 267)
- Chinese Language and Culture Minor (p. 550)

Curriculum

The Japanese Language and Culture minor requires students to complete 18 credit hours. A minimum of 12 credit hours (4 courses) must be Japanese language courses. The remaining 6 credit hours can be additional language courses, courses in Japanese Literature in Translation or other courses focused on Japanese society and culture.

Code	Title	Hours
Courses Satisfying the Japanese Language Requirement		
Select a minimum of four of the following:		12
JAPN 101	Japanese I

Semester V		
Literature and Culture Component Elective #1		3
	Hours	**3**
Semester VI		
Literature and Culture Component Elective #2		3
	Hours	**3**
	Total Hours	**18**

[1] Students are allowed opt out of JAPN coursework based on proficiency. Students should consult with the Japanese Language and Culture Program Director to be placed in the correct starting course for the language sequence. Should a student opt out of JAPN 101 and JAPN 102, they must take JAPN 250 and JAPN 251 to complete Option 2 sequence.

Study in Japan

Students minoring in Japanese are encouraged to study in Japan. Many attend our prestigious sister Jesuit school, Sophia University in Tokyo, for one or two semesters. Others students have studied at Kansai Gaidai University in Osaka, and International Christian University in Tokyo. Study abroad programs are available in many parts of Japan.

Learning Outcomes

Upon completion of this program, students will be able to:

- Understand, speak, read, and write Japanese at the advanced novice level or higher
- Employ social routines used by Japanese in daily life
- Apply their knowledge and appreciation of Japanese history, culture, and society to understand the contexts in which contemporary Japanese is used
- Use the language learning skills they acquire for continuing self-directed study of Japanese

Literature in Translation Minor

As of Fall 2026, this minor is no longer accepting students.

Students may minor in literature in translation. The minor in literature in translation was designed for students who wish to major in a field related to literature (for example: classics, English, history or philosophy), as well as for science majors who are interested in doing concentrated work in a particular area of humanities.

Knowledge of a foreign language is not required. All courses are taught in English and cross-listed with Global and International Studies. Courses are three semester hours each and may be applied to the literature requirement of the Core Curriculum (p. 989).

Related Programs

Minor

- Italian Language and Literature Minor (p. 557)
- Spanish Language and Literature Minor (p. 563)

Curriculum

The requirements for the minor are six courses in literature in translation offered by the Department of Modern Languages and Literatures, to be chosen in consultation with the department advisor.

A maximum of four courses in any one literature will be accepted toward the minor.

For students who qualify to take courses in the original language, a combination of courses in the original language and in translation will be arranged by the department.

Code	Title	Hours
Six Courses in LITR		**18**
Examples include, but are not limited to:		
LITR 200	European Masterpieces	
LITR 202	European Novel	
LITR 204	European Film	
LITR 219	African Film	
LITR 221	Polish Authors	
LITR 238	Arabic Literature in Translation	
LITR 243	South Asian Literature	
LITR 245	Asian Masterpieces	
LITR 264	Italian Film Genre	
LITR 290	Classical Chinese Literature	
Total Hours		**18**

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Upon completion of the Minor in Literature in Translation, students will be able to:

- Develop skills of literary analysis that will allow them to understand major topics in a range of literatures and cultures
- Trace developments over time in literary and cultural movements
- Analyze and interpret numerous literary texts in order to better comprehend the representations of cultural identity and make cross-cultural, intercultural connections
- Establish connections between literature, film, and history in a range of literatures and cultures
- Attain better cultural competency
- Foster a lifelong interest and enthusiasm for cultural production in a range of literatures and cultures

Spanish (BA)

The BA in Spanish degree program is a lively, flexible and intellectually challenging way of developing language skills in Spanish while gaining knowledge of the literatures and cultures of Spain, Latin America, and of Hispanics in the United States. At Loyola, Spanish majors learn the essential skills and techniques with which to critically read, interpret, and write and speak about all genres of Hispanic literature and of cinema and visual arts in Spanish. In so doing, students refine their linguistic skills, and gain awareness of the complexities of the Spanish-speaking world.

Related Programs

Minor

Select one of the following:		6
SPAN 250 & SPAN 251	Composition & Conversation I and Composition & Conversation II (for native heritage speakers)	

SPAN 252 & SPAN 253	Composition & Conversation: Native Speakers and Advanced Composition & Conversation: Native Speakers	
SPAN 270	Introduction to Critical Analysis in Spanish [1]	3
Select one of the following:		3
SPAN 271	Introduction to Iberian Literature and Culture (Spain) [1]	
SPAN 272	Introduction to Spanish American Literature and Culture (Latin America) [1]	
Any six courses at the 300-level, of which one must focus **exclusively** on Latin America and one must focus **exclusively** on Spain		18
Completion and presentation of an e-portfolio, as per program guidelines		
Total Hours		**30**

[1] Prerequisite for Spanish 300-level courses

E-Portfolio Requirement

All majors are asked to complete a e-portfolio prior to graduation for evaluative purposes. Students are encouraged to include a variety of representative assignments from their Spanish courses (syllabi, papers, exams, media files), as well as materials from creative projects, foreign travel, study abroad, or internships.

Students are also requested to prepare a brief (1-2 pages) personal statement in Spanish assessing their learning experiences in the major. Students will be responsible for assembling, updating, revising, and presenting their e-portfolios.

Click here (https://www.luc.edu/modernlang/baprograms/capstonee-portfolioontaskstreamforfrenchitalianandspanishba/) at the beginning of your major for details.

For questions about the Spanish e-portfolio requirements, please contact your assigned Spanish major advisor.

Students with prior knowledge of Spanish

Please see information regarding the placement exam (https://www.luc.edu/modernlang/exam.shtml/) before registering for a class.

Departmental Honors

Students graduating with departmental honors have a GPA of 3.5 or higher and take one Honors Tutorial, in addition to the above requirements.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Upon completion of this program, graduates will be able to:

- Demonstrate familiarity with key works of Latin American and Peninsular literature and with the social and political environments of present-day Latin America and Spain.
- Have the ability to discuss literature critically.
- Interpret the representation and impact of broad historical events in Peninsular, Latin American, and Latinx culture, art, and literature.
- Read, write, and speak Spanish fluently.
- Have the ability to sustain a coherent discussion of complex ideas in both oral and written Spanish.
- Articulate how social and cultural identities impact community engagement and intercultural communication.
- Integrate the Jesuit principles of service, inclusion, and self-knowledge into practice.

These outcomes will be evidenced in the students' senior capstone project (ePortfolio).

Spanish Language and Literature Minor

As of Fall 2026, this minor is no longer accepting students.

The minor in Spanish Language and Literatures offers students the opportunity to master skills of language acquisition and textual analysis while developing multicultural awareness of the diversity inherent in Spanish-speaking communities. Our program prepares students to think critically, and allows them to gain knowledge of literary and cultural expressions of Latin America, Spain, and the Latino/a and Hispanic communities in the United States.

Related Programs

Major

- Spanish (BA) (p. 562)

Minor

- Spanish Language Minor (p. 564)

Curriculum

Requirements

The minor requires six courses in Spanish excluding SPAN 101 Spanish I through SPAN 104 Spanish IV. Students normally take:

Code	Title	Hours
Required Courses		
SPAN 250	Composition & Conversation I	3
or SPAN 252	Composition & Conversation: Native Speakers	
SPAN 251	Composition & Conversation II	3
or SPAN 253	Advanced Composition & Conversation: Native Speakers	
SPAN 270	Introduction to Critical Analysis in Spanish [1]	3
SPAN 271	Introduction to Iberian Literature and Culture	3

or SPAN 272	Introduction to Spanish American Literature and Culture	
Two SPAN 300-Level Courses [1]		6
Total Hours		**18**

[1] Students who are fluent in the language may begin the sequence at the 270-level with the Spanish Undergraduate Program Director's permission. Students would be required to take two additional SPAN 300-level courses in order to meet the minimum 18 credit hours.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Show proficiency in speaking, understanding, reading and writing skills
- Develop and sustain a coherent argument in both oral and written Spanish
- Demonstrate knowledge of content areas (literary movements, linguistics, grammar, etc.)
- Understand the principal characteristics which define diverse Hispanic histories and cultures
- Trace change over time in literary styles and cultural values
- Examine and interpret numerous literary texts in order to better comprehend the representations of cultural identity and make cross-cultural, intercultural connections
- Establish connections between literature, film, and history in the Spanish-speaking world
- Attain better cultural competency
- Foster a lifelong interest and enthusiasm for Spanish-speaking cultural production

Spanish Language Minor

Loyola offers a Spanish Language Minor. Its objectives are based on the National Standards for Foreign Language Learning and on the ACTFL Proficiency guidelines. With the introductory to intermediate level courses required in the language minor students can expect to develop an intermediate-high level of proficiency. These goals are integrated into all individual courses as well as the Spanish program in its entirety.

Minor

- Spanish Language and Literature Minor (p. 563)

Curriculum

Code	Title	Hours
Six (6) SPAN Courses [1]		18
Total Hours		**18**

[1] Courses will be selected by the student in consultation with the departmental advisor. Students with no background in Spanish will begin the sequence with SPAN 101 Spanish I. Students with high school or other language background will be placed in SPAN 102 Spanish II, SPAN 103 Spanish III, or SPAN 104 Spanish IV. Course descriptions for all SPAN courses can be found here (p. 528).

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for the major. Students should consult the undergraduate program director for assistance with course selection.

Course	Title	Hours
Year One		
Semester I		
One (1) SPAN course		3
	Hours	**3**
Semester II		
One (1) SPAN course		3
	Hours	**3**
Year Two		
Semester I		
One (1) SPAN course		3
	Hours	**3**
Semester II		
One (1) SPAN course		3
	Hours	**3**
Year Three		
Semester I		
One (1) SPAN course		3
	Hours	**3**
Semester II		
One (1) SPAN course		3
	Hours	**3**
	Total Hours	**18**

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Content Knowledge: Students acquire linguistic and cultural knowledge in the beginning sequence courses that pertain to the countries where the language is spoken. Students use the linguistic system (grammar and vocabulary) to relate to and expand their knowledge in reference to daily routines, university life, art, music, travel, family relationships and medical treatments. Students will apply these concepts to the Spanish speaking countries studied and reflect upon their own cultural comparisons made through the learning process.
- Communication: Our communicative teaching approach provides the ideal basis for students to learn the language via the four

communication skills essential to proficiency that include reading, writing, listening and speaking. Students will engage in conversations, provide and obtain information and express themselves orally in reference to society, free time activities and everyday experiences in work and study. Students will present information, concepts, and ideas to an audience of listeners or readers on health, Hispanic arts, travel, job skills, environmental issues and relevant immigration topics that inspire reflections related to the reading passages used in the courses. Students will talk about future plans and hypothetical situations related to the today's society and the Spanish speaking world, express feelings and emotions, exchange opinions, express wishes and recommendations.

- Critical Thinking and Analysis: The move from using the linguistic system in basic conversation towards reading, analyzing and interpreting written texts will help develop more formal competency at the intermediate level. Students will gain interpretive and analytic skills through the close readings of short stories, articles, poems and songs to acquire cultural knowledge of important historical concepts, social justice issues, cultural traditions and overall relevant themes in many Spanish speaking countries. Students will improve writing skills in Spanish through attention to the principles and techniques of composition, and through the editing of their own work.
- Civic engagement and study abroad opportunities: Students acquire intercultural competency which includes an awareness and appreciation of diverse Hispanic cultures and communities. Students will engage with social and environmental issues via audio-visual resources and study abroad opportunities. Students will research and lead class discussions on cultural topics related to politics, history, geography, literature and films.

Neuroscience

The Interdisciplinary Neuroscience Majors and Minor

The Interdisciplinary Neuroscience Majors and Minor provide students with an unusual flexibility. For students committed to in-depth neuroscience education, they can major in either of two tracks: a cognitive/behavioral track that emphasizes the outcome of neural processing and circuit level mechanisms supporting cognition and behavior, and a molecular/cellular track that emphasizes the genetic, biochemical, and cell biological underpinnings of the development and function of the nervous system. Students who wish to focus on another area of study, but gain substantial exposure to the field of neuroscience, may minor in neuroscience.

For additional information, please contact:

- *Dr. Eric W. Gobel,* egobel@luc.edu *Director, Cognitive/Behavioral Neuroscience*
- *Dr. Bill Rochlin,* wrochli@luc.edu *Director, Molecular/Cellular Neuroscience*

Coursework

All three options require three core courses in neuroscience fundamentals: NEUR 101 Introduction to Neuroscience, BIOL 362 Neurobiology, and PSYC 382 Behavorial and Cognitive Neuroscience. After completing these courses, students may choose among numerous upper-level lecture and lab courses that span the field. Neuroscience majors must also complete basic science and math foundation courses, 2-3 track-specific courses, and a track-specific capstone course.

Undergraduate Research

In addition, there are currently 20 neuroscience faculty conducting research on the LUC Lake Shore Campus (https://www.luc.edu/neuroscience/aboutus/facultydirectoryandresearch/), providing opportunities for independent undergraduate research. Students are also welcome to arrange research internships with faculty at the Stritch School of Medicine (https://www.luc.edu/stritch/pharmacology/people/faculty/) or at other research institutions in the Chicago area.

Objectives for Neuroscience Coursework

Because the nervous system is the organ for behavior, neuroscience cuts across traditional fields in the biological and behavioral sciences. Owing to this breadth, we have designed two major tracks for students who wish to focus on neuroscience in their course of study at LUC. Completing either of these options will prepare students well for a variety of careers, including but not limited to medicine and life sciences research, particularly in neuroscience-related fields. Both options require at least two semesters of courses in biology, chemistry, and physics.

Lecture Course Objectives

Both of the majors require three courses in neuroscience fundamentals: NEUR 101 Introduction to Neuroscience, BIOL 362 Neurobiology (which stresses cellular and electrophysiological mechanisms of neural function), and PSYC 382 Behavorial and Cognitive Neuroscience (which stresses the neural substrates underlying mental processing and behavior). After completing this sequence, majors can design their own course of study within cognitive/behavioral or molecular/cellular neuroscience. There is some overlap in the list of lecture courses from which students may choose to complete their elective requirements, but there is also great diversity in the topics that are available in each major track.

Lab Course Objectives

Aside from first-year labs in chemistry and biology, and organic chemistry lab for molecular/cellular neuroscience majors, neuroscience majors choose their own lab experiences. Because the nervous system is cellular, computational, and a control center, the range of techniques that are useful is extremely broad, from cellular/molecular to behavioral, and the student can decide which techniques will be most helpful in answering the questions they want to address. Students who are interested in conducting independent neuroscience research have several neuroscience labs from which to choose, and may also seek permission to carry out a neuroscience-relevant project in a lab that is not focused on neuroscience. Independent research is the best preparation for doctoral programs, and is also regarded highly by medical, dental and other life science professional schools. For this reason, getting an independent research position in a lab is competitive.

Seminar Courses

There are three seminar style courses available to neuroscience undergraduates. In these courses, students tackle the primary literature and react to seminars given by neuroscientists on their research. Cognitive/Behavioral Neuroscience majors and Neuroscience minors are required (and Molecular/Cellular Neuroscience majors are invited) to take the 1-credit hour NEUR 300 Seminar in Neuroscience course, providing basic exposure to the primary literature and a wide range of research talks. Both major tracks culminate with a required capstone seminar class, which immerses the students in the primary literature and encourages development of critical thinking and presentation skills.

Undergraduate Programs

- Cognitive and Behavioral Neuroscience (BS) (p. 566)
- Molecular and Cellular Neuroscience (BS) (p. 569)
- Neuroscience Minor (p. 572)

Neuroscience Department Policies

Double-Dipping with Other Majors/Minors

For students in either track of the Neuroscience Major or the Neuroscience Minor, any courses taken that count toward their Neuroscience Major/Minor may also count toward the following majors and minors:

- BS in Biology (BIOL-BS) (p. 285)
- BS in Biology with Ecology Emphasis (BIOE-BS) (p. 291)
- BS in Biology with Molecular Emphasis (BIOM-BS) (p. 295)
- BS in Psychology (PSYC-BS) (p. 629)
- Minor in Biology (BIOL-MINR) (p. 289)
- Minor in Psychology (PSYC-MINR) (p. 632)

Students may not double-major in both tracks of the Neuroscience Major or combine the Neuroscience Major with the Neuroscience Minor. For all other majors/minors, the CAS Academic Council's double-dipping policy (p. 54) shall apply.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Neuroscience (NEUR)

NEUR 101 Introduction to Neuroscience (3 Credit Hours)
Pre-requisites: None; Recommended: BIOL 101 and PSYC 101
This course will introduce students to basic concepts and the variety of topics in the field of neuroscience, including neuroanatomy (gross and cellular), neurophysiology, the neural basis of behavior, malfunctions due to disease and injury, and methods used to study these areas, laying a foundation for advanced coursework in neuroscience.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-BIOL 202/PSYC202/NEUR 101
Outcomes:
Knowledge of the organization of the nervous system, neural processes underlying cognitive functioning and behavior, and awareness of research methods and techniques for advancing the interdisciplinary field of neuroscience

NEUR 300 Seminar in Neuroscience (1 Credit Hour)
Pre-requisites: NEUR 101 with grade of C- or better; Restricted to Neuroscience Majors or Minors
The seminar introduces students to the interdisciplinary nature of modern neuroscience with an emphasis on the various neuroscience research activities employed in the field both at Loyola University Chicago and other academic and professional environments.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will become proficient in reading and listening to primary neuroscience research; Students will also reflect on current neuroscience research with respect to contemporary issues in society

Cognitive and Behavioral Neuroscience (BS)

The B.S. in Cognitive/Behavioral Neuroscience focuses on the neural substrates of cognitive processes and behavior, utilizing methods from cognitive psychology, behavioral analysis, psychobiology, and computer science to account for empirical data about the brain.

Our neuroscience majors are designed to provide both breadth and depth to the neuroscience knowledge base of our students, and afford ample opportunities for developing creative and critical thinking skills needed to advance neuroscience (or any other life science field).

Undergraduate Research

Neuroscience students have numerous opportunities to conduct scientific research in the labs of our neuroscience-affiliated faculty at Loyola's Lake Shore Campus (https://www.luc.edu/neuroscience/aboutus/facultydirectoryandresearch/#den422313), in the labs of other faculty on any of Loyola's campuses, or at other institutions in the Chicago area. Depending on the applicability of the research project to the student's Neuroscience Major or Minor, independent research may be able to qualify for course credit as one of the required specialty labs (see below).

Cognitive/Behavioral Neuroscience Majors Research Credit

Cognitive/Behavioral Neuroscience (NRCB) majors can earn specialty lab credit for conducting **independent research that has a neuroscience or cognitive/behavioral focus** in labs within the psychology or biology departments. Your research project must be approved by the NRCB Director for NRCB credit through one of the 3-credit courses below:

- PSYC 397 Independent Research (relevant research with faculty in Psychology)
- PSYC 369 Psychology Honors Readings/PSYC 370 Psychology Honors Research (relevant research with faculty in Psychology for NRCB credit; additionally must use neuroscientific technique if desire NRCB Honors)
- BIOL 396 Research (relevant research with faculty in Biology)

Please contact the NRCB Director for questions about earning credit from cognitive/behavioral or neuroscience-related research in other departments (e.g., computer science, engineering, chemistry) or at other institutions.

Course Objectives

Because the nervous system is the organ for behavior, neuroscience cuts across traditional fields in the biological and behavioral sciences. Owing to this breadth, we have designed two major tracks for students who wish to focus on neuroscience in their course of study at LUC. Completing either of these options will prepare students well for a variety of careers, including but not limited to medicine and life sciences research, particularly in neuroscience-related fields. Both options require at least two semesters of courses in biology, chemistry, and physics.

Lecture Course Objectives

Both of the majors require three courses in neuroscience fundamentals: NEUR 101 Introduction to Neuroscience, BIOL 362 Neurobiology (which stresses cellular and electrophysiological mechanisms of neural function), and PSYC 382 Behavorial and Cognitive Neuroscience (which stresses the neural substrates underlying mental processing and behavior). After completing this sequence, majors can design their own course of study within cognitive/behavioral or molecular/cellular neuroscience. There is some overlap in the list of lecture courses from which students may choose to complete their elective requirements, but there is also great diversity in the topics that are available in each major track.

Lab Course Objectives

Aside from first-year labs in chemistry and biology, and organic chemistry lab for molecular/cellular neuroscience majors, neuroscience majors choose their own lab experiences. Because the nervous system is cellular, computational, and a control center, the range of techniques that are useful is extremely broad, from cellular/molecular to behavioral, and the student can decide which techniques will be most helpful in answering the questions they want to address. Students who are interested in conducting independent neuroscience research have several neuroscience labs from which to choose, and may also seek permission to carry out a neuroscience-relevant project in a lab that is not focused on neuroscience. Independent research is the best preparation for doctoral programs, and is also regarded highly by medical, dental and other life science professional schools. For this reason, getting an independent research position in a lab is competitive.

Seminar Courses

There are three seminar style courses available to neuroscience undergraduates. In these courses, students tackle the primary literature and react to seminars given by neuroscientists on their research. Cognitive/Behavioral Neuroscience majors are required to take the 1-credit hour NEUR 300 Seminar in Neuroscience course, providing basic exposure to the primary literature and a wide range of research talks.

Both major tracks culminate with a required capstone seminar class, which immerses the students in the primary literature and encourages development of critical thinking and presentation skills.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

By the end of this program of study, students will be able to:

- demonstrate a proficiency in understanding the structure, function, and dysfunction of the nervous system at various levels of organization (i.e., molecular, cellular, systems, behavioral, cognitive), including knowledge of (a) neuroanatomy, (b) neurophysiology, (c) neuroscience methods, (d) neural basis of sensory/behavioral aspects, (e) neural basis of cognitive/affective aspects, (f) neural development/plasticity, and (g) clinical disorders. [Cellular Basis of Neuronal Function and Integration of Neuroscience and Behavior]
- read, understand, critically evaluate, and draw appropriate conclusions from reports of neuroscientific investigations. [Critical Analysis]
- effectively communicate findings from neuroscience research studies to both scientific and nonscientific audiences in multiple formats. [Scientific Communication]
- formulate scientific questions, construct testable hypotheses, and design scientific investigations that contribute to neuroscience. [Research Design]
- engage in scientific investigations using appropriate neuroscientific laboratory or computational techniques, statistically analyze the data, and interpret the findings. [Laboratory Skills & Inquiry/Statistical Analysis]
- develop awareness of the philosophical, moral, and ethical issues raised by neuroscience and influences of neuroscience on other fields such as medicine, education, and social sciences. [Science & Society]

Molecular and Cellular Neuroscience (BS)

The B.S. in Molecular/Cellular Neuroscience focuses on the genetic, biochemical, and electrophysiological underpinnings of the development, function, plasticity, pathology, and repair of the nervous system.

Our neuroscience majors are designed to provide both breadth and depth to the neuroscience knowledge base of our students, and afford ample opportunities for developing creative and critical thinking skills needed to advance neuroscience (or any other life science field).

Molecular/Cellular Neuroscience Lecture Electives		
Select three of the following:		7-9
BIOL 307	Biology of Stem Cells	
BIOL 351	Sleep/Circadian Rhythms	
BIOL 352		
BIOL 357	Neural Disease, Degeneration, and Regeneration	
BIOL 358	Developmental Neurobiology	
BIOL 361	Cellular and Gross Neuroanatomy	
BIOL 381	Epigenetics	
BIOL 382	Molecular Genetics	
BIOL 395	Special Topics in Biology (select topics related to neuroscience)	
CHEM 361 / BIOL 366	Principles of Biochemistry	
or CHEM 370	Biochemistry I	
NEUR 300	Seminar in Neuroscience	
PSYC 240 / BIOL 240	Psychology-Biology of Perception	
PSYC 378	Drugs and Behavior	
PSYC 383 / COMP 386	Methods in Computational Neuroscience	
Molecular/Cellular Neuroscience Lab Electives		
Select two of the following:		2-8
BIOL 252	Cell Biology Laboratory	
or BIOL 283	Genetics Laboratory	
BIOL 315	Introductory Immunology Lec/Lab	
BIOL 361L	Cellular and Gross Neuroanatomy Lab	
BIOL 366L	Cell Physiology and Biochemistry Lab	
or CHEM 372	Biochemistry Laboratory I	
BIOL 367		
BIOL 390	Molecular Biology Laboratory	
BIOL 395L	Special Topics Laboratory (select topics related to neuroscience)	
NEUR 301 / BIOL 373 / PSYC 388		
PSYC 311 / BIOL 313	Lab in Psychobiology	
or PSYC 316	Lab in Experimental Psychology: Sense & Perception	
PSYC 384 / COMP 389	Computational Modeling of the Brain	
May include one of the following independent research options:		
BIOL 396	Research (with a Molecular/Cellular focus)	
BIOL 398	Internship in Biology (with a Molecular/Cellular focus)	
Molecular/Cellular Neuroscience Capstone		
BIOL 376	Seminar in Molecular/Cellular Neuroscience	3
or BIOL 358	Developmental Neurobiology	
Total Hours		**67**

Undergraduate Research

Neuroscience students have numerous opportunities to conduct scientific research in the labs of our neuroscience-affiliated faculty at Loyola's Lake Shore Campus (https://www.luc.edu/neuroscience/aboutus/facultydirectoryandresearch/#den422313), in the labs of other faculty on any of Loyola's campuses, or at other institutions in the Chicago area. Depending on the applicability of the research project to the student's Neuroscience Major or Minor, independent research may be able to qualify for course credit as one of the required specialty labs (see below).

Molecular/Cellular Neuroscience Majors Research Credit

Molecular/Cellular Neuroscience (NRMC) majors can earn specialty lab credit for conducting **independent research that has a molecular/cellular focus** in labs within the biology department or at an appropriate external internship site. Please see the Specialty lab credit for independent research--NRMC document on the Neuroscience program website (https://www.luc.edu/neuroscience/undergraduateresearch/) for a more thorough explanation of earning NRMC credit through one of the 3-credit courses below:

- BIOL 396 Research (relevant research with faculty in Biology)
- BIOL 398 Internship in Biology (relevant research at an external site)

Please contact the NRMC Director for questions about earning credit from molecular/cellular or neuroscience-related research in other departments (e.g., chemistry, psychology).

Suggested Sequence of Courses

Course	Title	Hours
Freshman		
Fall		
BIOL 101	General Biology I	3
BIOL 111	General Biology I Lab	1
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
PSYC 101	General Psychology	3
MATH 131	Applied Calculus I	3
	Hours	**14**
Spring		
BIOL 102	General Biology II	3
BIOL 112	General Biology II Lab	1
CHEM 180	Chemical Reactivity I	3
CHEM 181	Chemical Reactivity I Lab	1

BIOL 376 or BIOL 358	Seminar in Molecular/Cellular Neuroscience or Developmental Neurobiology	3
Specialty Lab		1-3
	Hours	**4**
	Total Hours	**67**

Course Objectives

Because the nervous system is the organ for behavior, neuroscience cuts across traditional fields in the biological and behavioral sciences. Owing to this breadth, we have designed two major tracks for students who wish to focus on neuroscience in their course of study at LUC. Completing either of these options will prepare students well for a variety of careers, including but not limited to medicine and life sciences research, particularly in neuroscience-related fields. Both options require at least two semesters of courses in biology, chemistry, and physics.

Lecture Course Objectives

Both of the majors require three courses in neuroscience fundamentals: NEUR 101 Introduction to Neuroscience, BIOL 362 Neurobiology (which stresses cellular and electrophysiological mechanisms of neural function), and PSYC 382 Behavorial and Cognitive Neuroscience (which stresses the neural substrates underlying mental processing and behavior). After completing this sequence, majors can design their own course of study within cognitive/behavioral or molecular/cellular neuroscience. There is some overlap in the list of lecture courses from which students may choose to complete their elective requirements, but there is also great diversity in the topics that are available in each major track.

Lab Course Objectives

Aside from first-year labs in chemistry and biology, and organic chemistry lab for molecular/cellular neuroscience majors, neuroscience majors choose their own lab experiences. Because the nervous system is cellular, computational, and a control center, the range of techniques that are useful is extremely broad, from cellular/molecular to behavioral, and the student can decide which techniques will be most helpful in answering the questions they want to address. Students who are interested in conducting independent neuroscience research have several neuroscience labs from which to choose, and may also seek permission to carry out a neuroscience-relevant project in a lab that is not focused on neuroscience. Independent research is the best preparation for doctoral programs, and is also regarded highly by medical, dental and other life science professional schools. For this reason, getting an independent research position in a lab is competitive.

Seminar Courses

There are three seminar style courses available to neuroscience undergraduates. In these courses, students tackle the primary literature and react to seminars given by neuroscientists on their research. Molecular/Cellular Neuroscience majors are invited to take the 1 credit hour NEUR 300 Seminar in Neuroscience course, providing basic exposure to the primary literature and a wide range of research talks. Both major tracks culminate with a required capstone seminar class, which immerses the students in the primary literature and encourages development of critical thinking and presentation skills.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

By the end of this program of study, students will be able to:

- demonstrate a proficiency in understanding the structure, function, and dysfunction of the nervous system at various levels of organization (i.e., molecular, cellular, systems, behavioral, cognitive), including knowledge of (a) neuroanatomy, (b) neurophysiology, (c) neuroscience methods, (d) neural basis of sensory/behavioral

aspects, (e) neural basis of cognitive/affective aspects, (f) neural development/plasticity, and (g) clinical disorders. [Cellular Basis of Neuronal Function and Integration of Neuroscience and Behavior]

- read, understand, critically evaluate, and draw appropriate conclusions from reports of neuroscientific investigations. [Critical Analysis]
- effectively communicate findings from neuroscience research studies to both scientific and nonscientific audiences in multiple formats. [Scientific Communication]
- formulate scientific questions, construct testable hypotheses, and design scientific investigations that contribute to neuroscience. [Research Design]
- engage in scientific investigations using appropriate neuroscientific laboratory or computational techniques, statistically analyze the data, and interpret the findings. [Laboratory Skills & Inquiry/Statistical Analysis]
- develop awareness of the philosophical, moral, and ethical issues raised by neuroscience and influences of neuroscience on other fields such as medicine, education, and social sciences. [Science & Society]

Neuroscience Minor

The interdisciplinary Minor in Neuroscience requires seven courses (16-21 credit hours), including four required courses (three foundational lecture courses and one seminar), at least two neuroscience lab courses, and one additional neuroscience lecture or lab course. Please note that some courses in the minor require additional pre-requisite coursework.

Curriculum

Code	Title	Hours
Required Interdisciplinary Neuroscience Courses		
BIOL 362	Neurobiology	3
NEUR 101	Introduction to Neuroscience [1]	3
NEUR 300	Seminar in Neuroscience [2]	1
PSYC 382 / BIOL 284	Behavorial and Cognitive Neuroscience	3
Required Laboratory Experience		
Select two of the following:		3-8
BIOL 361L	Cellular and Gross Neuroanatomy Lab	
BIOL 366L	Cell Physiology and Biochemistry Lab	
BIOL 373 / NEUR 301 / PSYC 388	Laboratory in Neurophysiology and Behavior	
BIOL 390	Molecular Biology Laboratory	
BIOL 395L	Special Topics Laboratory (select topics related to neuroscience)	
PSYC 311 / BIOL 313	Lab in Psychobiology	
PSYC 312	Lab in Cognitive Neuroscience	
PSYC 313	Lab in Behavioral Neuroscience	
PSYC 314	Lab in Experimental Psychology: Cognition	
PSYC 316	Lab in Experimental Psychology: Sense & Perception	
PSYC 384 / COMP 389	Computational Modeling of the Brain	
May include one of the following independent research options:		
BIOL 396	Research (with a Molecular/Cellular or Cognitive/Behavioral focus)	
PSYC 370	Psychology Honors Research (with a Cognitive/Behavioral focus; PSYC 369 is pre-req)	
PSYC 397	Independent Research (with a Cognitive/Behavioral focus)	
Electives		
Select one of the following lectures or an additional lab course:		3
BIOL 320		
BIOL 351	Sleep/Circadian Rhythms	
BIOL 352		
BIOL 357	Neural Disease, Degeneration, and Regeneration	
BIOL 358	Developmental Neurobiology	
BIOL 361	Cellular and Gross Neuroanatomy	
BIOL 395	Special Topics in Biology (select topics related to neuroscience)	
PSYC 240 / BIOL 240	Psychology-Biology of Perception	
PSYC 251	Learning and Memory	
PSYC 332	Affective Neuroscience	
PSYC 350	Developmental Cognitive Neuroscience	
PSYC 352	Neuropsychology	
PSYC 378	Drugs and Behavior	
PSYC 383 / COMP 386	Methods in Computational Neuroscience	
Total Hours		**16-21**

[1] Note: NEUR 101 was formerly BIOL 202/PSYC 202.

[2] Neuroscience minors enrolled in independent research in Biology or Psychology with a neuroscientist are not required to take NEUR 300.

Pre-Requisite Coursework for Required Courses

Due to pre-requisite requirements for required courses, you will need to take at least the following courses (17 credits) in addition to the seven courses that are part of the Neuroscience Minor:

- PSYC 101 (3 credits)
- One year of Biology with labs (8 credits): BIOL 101 with BIOL 111 and BIOL 102 with BIOL 112
- At least one semester of Chemistry (3 credits): CHEM 160
- BIOL 251 (3 credits)
- Any additional pre-requisites required for the additional three specialty neuroscience labs/lectures (e.g., BIOL 282, (PSYC 304 or STAT 335), PSYC 306)

Students should always validate the pre-reqs in the LOCUS catalog, as they can depend on the student's major.

Undergraduate Research

Neuroscience students have numerous opportunities to conduct scientific research in the labs of our neuroscience-affiliated faculty at Loyola's Lake Shore Campus (https://www.luc.edu/neuroscience/aboutus/facultydirectoryandresearch/#den422313), in the labs of other faculty on any of Loyola's campuses, or at other institutions in the Chicago area. Depending on the applicability of the research project to the student's Neuroscience Major or Minor, independent research may be able to qualify for course credit as one of the required specialty labs (see below).

Neuroscience Minor Research Credit

Neuroscience minors can earn NRSC specialty lab credit for conducting **independent research that has a neuroscience, cognitive/behavioral, or molecular/cellular focus** in labs within the psychology or biology departments or at an appropriate external internship site. Your research project must be approved by the NRSC Co-Directors for NRSC credit through one of the 3-credit courses below:

- BIOL 396 Research (relevant research with faculty in Biology)
- BIOL 398 Internship in Biology (relevant research at an external site)
- PSYC 397 Independent Research (relevant research with faculty in Psychology)
- PSYC 369 Psychology Honors Readings/PSYC 370 Psychology Honors Research (relevant research with faculty in Psychology)

Please contact the NRSC Co-Directors for questions about earning credit from cognitive/behavioral, molecular/cellular, or neuroscience-related research in other departments (e.g., computer science, engineering, chemistry).

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

By the end of this program of study, students will be able to:

- demonstrate a proficiency in understanding the structure, function, and dysfunction of the nervous system at various levels of organization (i.e., molecular, cellular, systems, behavioral, cognitive), including knowledge of (a) neuroanatomy, (b) neurophysiology, (c) neuroscience methods, (d) neural basis of sensory/behavioral aspects, (e) neural basis of cognitive/affective aspects, (f) neural development/plasticity, and (g) clinical disorders. [Cellular Basis of Neuronal Function and Integration of Neuroscience and Behavior]
- read, understand, critically evaluate, and draw appropriate conclusions from reports of neuroscientific investigations. [Critical Analysis]
- effectively communicate findings from neuroscience research studies to both scientific and nonscientific audiences in multiple formats. [Scientific Communication]
- formulate scientific questions, construct testable hypotheses, and design scientific investigations that contribute to neuroscience. [Research Design]
- engage in scientific investigations using appropriate neuroscientific laboratory or computational techniques, statistically analyze the

data, and interpret the findings. [Laboratory Skills & Inquiry/Statistical Analysis]

- develop awareness of the philosophical, moral, and ethical issues raised by neuroscience and influences of neuroscience on other fields such as medicine, education, and social sciences. [Science & Society]

Peace, Justice and Conflict Studies Interdisciplinary Program

The Peace, Justice and Conflict Studies minor is organized around a broad definition of peace, encompassing societal peace (including work to reduce violence and inequalities within the United States), international peace (focusing on ending wars, terrorist acts, unequal distribution of resources, and other infringements on human rights and dignity worldwide), and environmental peace (involving work on sustainable resources, global warming, and response to natural and human-made disasters).

Undergraduate Programs

- Peace, Justice and Conflict Studies Minor (p. 574)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Peace Studies (PAX)

PAX 201 Peace Studies Overview (3 Credit Hours)
A general introduction to peace studies as an area of inquiry. Students identify concrete social justice issues and their relevance to domains of societal, international and ecological spheres of violence and address literature on nonviolence or limited use of violence through a critical research paper and other course applications.
Interdisciplinary Option: Interreligious and Interfaith Studies, Peace, Justice, and Conflict Studies

PAX 390 Directed Readings in Peace Studies (3 Credit Hours)
An independent program of reading and research developed in consultation with a supervising faculty member and the PAX director. It usually includes a review of the peace studies literature in the student's major field, with a final research project that integrates the student's major with peace studies.
Interdisciplinary Option: Peace, Justice, and Conflict Studies

Peace, Justice and Conflict Studies Minor

The Peace, Justice and Conflict Studies minor is organized around a broad definition of peace, encompassing societal peace (including work to reduce violence and inequalities within the United States), international peace (focusing on ending wars, terrorist acts, unequal distribution of resources, and other infringements on human rights and dignity worldwide), and environmental peace (involving work on sustainable resources, global warming, and response to natural and human-made disasters). Students can enroll in internships classes and become involved with projects and program on campus focused on war and peace concerns, social justice, and environmental responsibility.

Related Programs

Major

- Human Services (BS) (p. 500)

Minor

- Race Ethnicity Interdisciplinary Minor (p. 634)

Curriculum

The Peace, Justice and Conflict Studies Minor consists of six courses (18 credit hours). All students must complete PAX 201 Peace Studies Overview, which provides a comprehensive summary of the international, societal, and ecological spheres of violence and peace.

Code	Title	Hours
Required Course		
PAX 201	Peace Studies Overview	3
International Conflict and Peacemaking		**3**

THEO 204	Religious Ethics and the Ecological Crisis	
General Electives [1]		**6**
Total Hours		**18**

[1] Students may fulfill the general elective requirement by taking any two of the cross-listed courses in the three program areas of International Conflict and Peacemaking, Societal Violence and Conflict Resolution, and Environmental Violence and Ecological Concerns. In addition, students may choose to fulfill the general elective requirement by taking the following PAX Course: PAX 390 Directed Readings in Peace Studies.

Suggested Sequence of Courses

An individual student's completion of requirements depends on course offerings in a given term as well as the start term for the minor. Students should consult the Peace, Justice, and Conflict Studies director for assistance with course selection.

Learning Outcomes

- Demonstrate an ability to analyze, interpret, or describe two strategies of peacemaking.
- Interpret, analyze, and describe important contemporary of at least two global concerns (e.g., the environment, war, inequity and poverty, human rights).
- Demonstrate historical knowledge of some distinguished national and international leaders in peacemaking.
- Interpret and analyze and describe at least two global ecological concerns (e.g., the environment, war, inequity and poverty, human rights).
- Demonstrate an ability to analyze or describe the significance of the major core categories and discussions in the field of peace and justice studies.

Philosophy

Welcome to the Undergraduate Program at LUC Philosophy!

Our philosophy undergraduate programs prepare students for successful careers in a wide variety of fields, and it is well-documented that philosophy undergraduates are extremely competitive in applications for law school, medical school, and other graduate programs. (See BA in Philosophy (https://www.luc.edu/philosophy/ba.shtml/) for further information.) We pride ourselves in our diverse department, with deep strengths in multiple traditions of philosophy and an extensive range of course offerings, which are relevant to many different professions and interests.

Undergraduate Programs

- Artificial Intelligence and Human Flourishing Interdisciplinary Minor (p. 583)
- Ethics and Moral Philosophy Minor (p. 584)
- Honors in Philosophy (p. 585)
- Philosophy (BA) (p. 586)
- Philosophy Minor (p. 590)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Philosophy (PHIL)

PHIL 130 Philosophy & Persons (3 Credit Hours)
This course introduces students to the fundamental philosophical issues that bear on our understanding of persons in three equally weighted components, namely, Persons & Knowledge, Persons & Values, and Persons & Reality.
Knowledge Area: Foundational Philosophical Knowledge
Course equivalencies: PHIL120/130/180/ACPHI130
Outcomes:
Students will be able to explain a claim to truth, to explain theories of value in human life, and to describe theories of the metaphysical nature of human persons

PHIL 180 Being Human: Philosophical Perspectives (3 Credit Hours)
The course examines the way philosophy looks for fundamental characteristics that identify life as a properly human life, asks about its ultimate meaning or purpose, and raises questions about what counts as a good life.
Course equivalencies: PHIL120/130/180/ACPHI130
Outcomes:
Students will be able to demonstrate understanding of the various approaches of the philosophical question of what it means to be human

PHIL 181 Ethics (3 Credit Hours)
This course is a general introduction to ethics and moral philosophy.
Knowledge Area: Ethics
Course equivalencies: PHIL 181 / PHIL 281 /ACPHI 281
Outcomes:
Students will be able to demonstrate understanding of criteria for choosing between conflicting ethical theories, moral disagreement, the justification of moral judgments, and the application of ethical standards to practical decision-making and ethical questions that arise in everyday life

PHIL 182 Social and Political Philosophy (3 Credit Hours)
This course will investigate one of the central questions of philosophy and social theory: how we, as human beings, should live together.
Knowledge Area: Ethics
Course equivalencies: PHIL162/182/262/282/ACPHI205
Outcomes:
Students will be able to demonstrate understanding of the major philosophical questions in the area of social philosophy with attention to the historical and conceptual development of these questions and be able to articulate some of the major problems and responses central to this area of philosophy

PHIL 190 Loyola's Mission: The Philosophical Vision (3 Credit Hours)
Enrollment is limited to transfer students with 30 or more credit hours. The course introduces transfer students to the mission of LUC, especially "Transformative Education," by means of the methodology of philosophy."
Outcomes:
Students who take the course acquire an intellectual and experiential assimilation of LUC's mission, especially as it relates to "Transformative Education

PHIL 193 Contemporary Chinese Philosophy (3 Credit Hours)
Students will analyze the development of Chinese contemporary thought in its different stages: rejection of the tradition and its recent reevaluation.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-PHIL193/ASIA193/INTS193

PHIL 262 Social & Political Philosophy - Civic Engagement (3 Credit Hours)
Pre-requisites: PHIL 130
This course will investigate one of the central questions of philosophy and social theory: how we, as human beings, should live together. Because it includes a service learning experience it satisfies the civic engagement core requirement.
Knowledge Area: Ethics
This course satisfies the Engaged Learning requirement.
Course equivalencies: PHIL162/182/262/282/ACPHI205
Outcomes:
Students will be able to demonstrate understanding of the major philosophical questions in the area of social philosophy with attention to the historical and conceptual development of these questions, and be able to articulate some of the major problems and responses central to this area of philosophy

PHIL 263 Contemporary Ethical Issues - Civic Engagement (3 Credit Hours)
Pre-requisites: PHIL 130
This course explores ethical reasoning by considering a variety of contemporary issues in ethics. Because it includes a service learning experience it satisfies the civic engagement core requirement.
Outcomes:
Students will develop a deeper appreciation of moral problems, and will gain practice in using philosophical moral reasoning

PHIL 264 Health Care Ethics - Civic Engagement (3 Credit Hours)
Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course studies philosophical ethics as practiced in the health care setting. It includes a service-learning experience and satisfies the civic engagement core requirement.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Bioethics
This course satisfies the Engaged Learning requirement.
Course equivalencies: ACPHI 284 / PHIL 264/ PHIL 284
Outcomes:
Students will be able to demonstrate understanding of traditional moral theories in a health care framework, as well as the varieties of ethical challenges facing contemporary health care

PHIL 267 Aesthetics - Civic Engagement (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
The course explores philosophical issues in aesthetics like the nature of art and beauty through, in part, service-learning in retirement communities and theaters, as examples.
Outcomes:
Students will be able to demonstrate their understanding of aesthetics and the value of leadership development and civic engagement

PHIL 271 Philosophy of Religion (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the development, not only of some classic positions within the philosophy of religion, but also of how these views have affected the formulation of more contemporary discussions.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 171 / PHIL 271
Outcomes:
Students will be able to demonstrate understanding of the enterprise of using reason, broadly construed, to articulate issues arising out of religious belief and practice and to formulate and defend positions with respect to those issues

PHIL 272 Metaphysics (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the fundamental principles by which the nature of reality can be explained.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 172 / PHIL 272
Outcomes:
Students will be able to demonstrate understanding of the central issues surrounding the field of metaphysics

PHIL 273 Philosophy of Science (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the nature of scientific knowledge and its claim to possess a distinctive method of inquiry.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Neuroscience
Course equivalencies: PHIL 173 / PHIL 273
Outcomes:
Students will be able to demonstrate understanding of the mode of inquiry which is the scientific method

PHIL 274 Logic (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course is a detailed study of the deductive methods and principles of correct reasoning, from both the traditional and modern point of view.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 174/PHIL 274/ACPHI 274
Outcomes:
Students will be able to formally analyze, evaluate, and demonstrate the various aspects of argumentation

PHIL 275 Theory of Knowledge (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines both the nature and the reliability of human knowledge.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 175 / PHIL 275
Outcomes:
Students will be able to demonstrate understanding of the various approaches to the study of knowledge

PHIL 276 Philosophy of Mind (3 Credit Hours)
This course is a study of the different philosophical views regarding the nature and the existence of the mind and its relation to material bodies.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-PSYC 276/ PHIL 276/PHIL 176
Outcomes:
Students will be able to demonstrate understanding of the various philosophical views and problems regarding the mind and its relation to matter

PHIL 277 Aesthetics (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course will explore one or more of the following philosophical questions in aesthetics: What is art? What is good art (art evaluation or critical theory)? What is beauty? What is it about human nature that allows us to experience beauty?
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 277/PHIL 277R
Outcomes:
Students will be able to demonstrate understanding of the various approaches to the philosophical study of beauty and the arts

PHIL 277R Aesthetics: the Aesthetic Experience in Rome (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course will explore one or more of the following philosophical questions in aesthetics, with reference particularly to aesthetic experience in Rome: What is art? What is good art (art evaluation or critical theory)? What is beauty? What is it about human nature that allows us to experience beauty? Outcomes: Students will be able to demonstrate understanding of the various approaches to the philosophical study of beauty and the arts.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Italian Studies
Course equivalencies: PHIL 277/PHIL 277R
Outcomes:
Students will be able to demonstrate understanding of the various approaches to the philosophical study of beauty and the arts

PHIL 279 Judgment and Decision-Making (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
Students can take only one course from PHIL 279, PSYC 279, PSYC 280.
This course examines the philosophical and psychological foundations of decision-making.
Knowledge Area: Tier 2 Philosophical Knowledge
Outcomes:
Students will be able to demonstrate understanding of the principles of reasoning and decision-making

PHIL 283 Business Ethics (3 Credit Hours)
Effective Spring 2007 students who have taken and successfully passed PHIL 185 are not eligible to take MGMT 341. This course is an introduction to ethics which focuses on ethical issues in the world of business and commerce.
Outcomes:
Students will be able to examine and assess various ethical theories and apply those theories to ethical issues in business

PHIL 284 Health Care Ethics (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent, Please check requirements for declared majors/minors for exceptions
This course studies philosophical ethics as practiced in the health care setting.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Bioethics
Course equivalencies: ACPHI 284 / PHIL 264/ PHIL 284
Outcomes:
Students will be able to demonstrate understanding of traditional moral theories in a health care framework, as well as the varieties of ethical challenges facing contemporary health care

PHIL 285 Contemporary Ethical Issues (3 Credit Hours)
This course explores ethical reasoning through consideration of a variety of contemporary issues in ethics, such as: abortion, euthanasia, corruption, discrimination, poverty, and justice.
Interdisciplinary Option: Bioethics
Outcomes:
Students will develop a deeper appreciation of moral problems and will gain practice at using philosophical moral reasoning to come to justifiable ethical choices and answers

PHIL 286 Ethics and Education (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines philosophical ethics as it informs and guides the activity of teaching.
Knowledge Area: Tier 2 Philosophical Knowledge
Outcomes:
Students will be able to examine and assess various ethical theories and apply those theories to ethical issues in teaching

PHIL 287 Environmental Ethics (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to ethical reasoning and to various topics in environmental ethics. Topics may include: pollution, animal rights, and natural resources.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Bioethics
Course equivalencies: PHIL187/BIET187
Outcomes:
Students will demonstrate an understanding of diverse ethical theories and an ability to use philosophical reasoning to defend positions in topics covered

PHIL 288 Culture and Civilization (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the nature, causes, and possible future development of human culture and civilization.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 288/288R
Outcomes:
Students will be able to demonstrate understanding of the various approaches to the philosophical study of human culture and civilization

PHIL 288R Culture & Civilization in Rome (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the nature, causes, and possible future development of human culture and civilization with an emphasis on Italian philosophers during the Renaissance.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Italian American Studies, Italian Studies
Course equivalencies: PHIL 288/288R
Outcomes:
Students will be able to demonstrate understanding of the various approaches to the philosophical study of human culture and civilization

PHIL 289 Philosophy and Gender (3 Credit Hours)
This course considers gender as a philosophical question. Is gender simply a biological truth, or is it a social construct? How does gender affect our roles and opportunities in society? Should gender play a role in discussion of human rights?
Outcomes:
The student will develop a philosophical understanding of gender and will be able to articulate in a thoughtful manner understanding of issues concerning ethics, society and biology concerning gender

PHIL 301 Symbolic Logic (3 Credit Hours)
This course is an introduction to the study of modern symbolic logic, emphasizing formalization and proof construction. The student is introduced to the terminology and chief concepts of modern logic.
Outcomes:
Students will be able to symbolically analyze, evaluate, and demonstrate the various aspects of formal reasoning

PHIL 302 Topics in Formal Logic (3 Credit Hours)
Selected topic regarding logical theory or metatheory, such as the completeness of formal systems, non-standard logics, computability, foundational issues regarding mathematics.
Outcomes:
Students will develop an advanced understanding of the selected topic in formal logic

PHIL 304 History of Ancient Philosophy (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies the philosophies of the ancient Greeks, including the pre-Socratics, Plato, and Aristotle.
Interdisciplinary Option: European Studies, Italian Studies
Course equivalencies: X-PHIL304/CLST304
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of the ancient Greek philosophers

PHIL 305 Medieval Philosophy (3 Credit Hours)
This course studies the philosophies of the major thinkers of the 4th to the 12th centuries, such as Augustine, Scotus, Boethius, Avicenna, Anselm, Abelard, Maimonides, and Averroes.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-PHIL305/CATH305/MSTU344
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of the early medieval philosophers

PHIL 306 19th Century Philosophy (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies 19th century post-Kantian philosophy from idealism toward phenomenology. May include philosophers such as Hegel, Nietzsche, and Husserl.
Interdisciplinary Option: European Studies, German Studies
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of 19th century post-Kantian philosophy

PHIL 307 13th & 14th Century Philosophy (3 Credit Hours)
This course studies major thinkers of the 13th and 14th centuries, such as Albertus Magnus, Aquinas, Scotus, William of Ockham, Roger Bacon.
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: X-PHIL307/CATH307
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of the late medieval philosophers

PHIL 308 Islamic Philosophy (3 Credit Hours)
Covers the development of classical Islamic philosophy from 800 to 1200 CE. Attention will be given to the central topics (God, the cosmos, knowledge, the human good) with which Muslim philosophers were concerned and to major figures such as Al-Kindi, Al-Farabi, Ibn Sina (Avicenna). Al-Ghazali and Ibn Rushd (Averroes).
Interdisciplinary Option: Middle East and Islamic World Studies
Course equivalencies: X-PHIL308THEO357MSTU334IWS308
Outcomes:
Students will be able to articulate and discuss major philosophical problems of concern to Muslim philosophers of the classical period

PHIL 309 Classical Modern Philosophy (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies selected philosophers from the early modern period, such as Descartes, Spinoza, Leibniz, Locke, Hume, Berkeley, Kant.
Interdisciplinary Option: European Studies, German Studies
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of the early modern philosophers

PHIL 310 Issues in Philosophy of Human Nature (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course gives intensive consideration to various issues that pertain to being human, such as freedom, determinism, person, society, mind-body, immortality, etc.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding key issues of human nature

PHIL 311 Issues in Metaphysics (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies various philosophical issues regarding the nature of all reality, including existence, causality, relations, abstract entities, purpose, the possibility of knowledge of reality.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding key metaphysical issues

PHIL 312 Problems in the Philosophy of God (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies classical and contemporary approaches to knowledge of the existence of God, divine attributes, good and evil, providence and human freedom.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding philosophical views of God

PHIL 318 Philosophy of Art (3 Credit Hours)
Reading and discussion of selected philosophical texts concerning the nature of art and artistic experience.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding the nature of art and artistic experience

PHIL 319 Studies in Philososphy & Literature (3 Credit Hours)
This course is a study of selected works of literature and a discussion of philosophical issues in relation to these works.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding the nature of literary work, the relations of philosophical and literary language, and methods of interpretation

PHIL 320 The Philosophy of St Augustine (3 Credit Hours)
This course is a study of the principal works of Augustine, such as the Confessions, City of God.
Interdisciplinary Option: Catholic Studies, Medieval Studies
Course equivalencies: X-PHIL320/CATH320/MSTU346
Outcomes:
Students will be able to understand and articulate philosophical problems and answers found in the works of Augustine

PHIL 321 Ethics and Society (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course is a study of the rights, duties, and virtues of individuals as members of societies, covering issues such as family and state, social justice, international society, war, and globalization.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding ethics in social contexts

PHIL 322 Feminist Philosophies (3 Credit Hours)
This course will examine a variety of philosophical frameworks for thinking about gender, sexuality, the problems of sexism, and proposed solutions to those problems. Students will explore the complexity and diversity of feminist thought by examining many different feminist philosophies including liberal, radical, cultural, Marxist/socialist, existentialist, postmodern, ecological, and indigenous perspectives.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will demonstrate competence in the terminology, concepts, methodologies, and theories used by feminist philosophers; Students will learn to analyze feminist philosophies from multiple perspectives and will develop reasoned solutions to problems; Students will learn to communicate knowledge, ideas, and reasoning clearly and effectively in written or oral forms

PHIL 323 Philosophy of Law (3 Credit Hours)
This course pursues a philosophical analysis of law. It deals with topics such as philosophical presuppositions of law, origin and purpose of law, law as social control, current legal problems involving ethical issues.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding law and its applications

PHIL 324 Topics in Ethics (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies a particular topic selected from the field of ethics.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding the selected topic

PHIL 324B Bioethics Minor Capstone: Philosophical Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This course number will only be used when PHIL 324 is tagged with the Bioethics Minor Capstone course.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and scientific issues with regard to the special topic in philosophy

PHIL 325 Ethics & Case Based Reasoning (3 Credit Hours)
Pre-requisites: Two previous philosophy courses
This course is an engaged learning course that provides students with a unique opportunity to practice applying moral theories and argumentative principles to personal and social- ethical problems, and to teach middle school students how to do the same. The course focuses on presenting solutions to cases and hence involves research, writing, and oral presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions using a case based system

PHIL 326 Political Philosophy (3 Credit Hours)
This course is an examination of the major theories of political society, studying important aspects of political society and their relationships to human nature.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding the nature of political society in relation to its members

PHIL 327 Topics in Political Philosophy (3 Credit Hours)
This course will concentrate on a specific issue or issues in political philosophy. Typical topics include civil disobedience, war and peace, political revolution, punishment, and criminal justice.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding the selected topic

PHIL 328 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Two prior courses in Philosophy
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 329 International Ethics (3 Credit Hours)
Pre-requisites: Two prior courses in either Philosophy or Political Science
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 330 Theory of Knowledge (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course will study major philosophical positions regarding knowledge, belief, thought and language, truth, evidence, reason, perception, skepticism.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding the field of knowledge and related issues

PHIL 331 Philosophy of Technology (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course introduces students to various philosophical approaches to technology with a special emphasis on computation and artificial intelligence.
Outcomes:
Describe and evaluate various approaches to technology's capacity to frame or shape human life; Describe and evaluate various philosophical approaches to artificial intelligence

PHIL 333 Language: Theories Ancient & Modern (3 Credit Hours)
Classical, modern, and contemporary philosophical theories on the nature and structure of human language.
Course equivalencies: X-LING333/PHIL333
Outcomes:
Students will be able to understand and articulate some philosophical problems and answers regarding the nature and structure of human language

PHIL 335 Asian Philosophy (3 Credit Hours)
A study of fundamental tenets of major Eastern philosophies (Chinese, Japanese, Indian) in comparison to Western tradition. Course may vary in emphasis on particular philosophies and themes.
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: X-PHIL335/ASIA335/INTS334
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding Eastern philosophical thought

PHIL 340 Philosophy of St Thomas Aquinas (3 Credit Hours)
A study of the philosophy of Thomas Aquinas, including background regarding his life and medieval context.
Interdisciplinary Option: Catholic Studies, Medieval Studies
Course equivalencies: X-PHIL340/MSTU348
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding the thought of Aquinas and its medieval context

PHIL 342 Topics in the Catholic Philosophical Tradition (3 Credit Hours)
Pre-requisites: One class in philosophy or permission of instructor
This course examines the Catholic philosophical tradition, beginning with its roots in ancient Greek philosophy, through the medieval period in the work of figures such as St. Augustine and St. Thomas Aquinas, and up to and including contemporary Catholic philosophy.
Course equivalencies: X-CATH 303 / PHIL 342
Outcomes:
Students will be conversant and familiar with the Catholic philosophical tradition throughout its history, demonstrating proficiency in operating within the philosophical framework of this tradition

PHIL 344 Philosophy of Human Nature (3 Credit Hours)
The course explores at an advanced level the relation of human nature and aesthetics through, in part, service-learning in retirement communities and theaters, as examples.
Outcomes:
Students will be able to demonstrate advanced understanding of the relation between human nature and aesthetics and the value of leadership development and civic engagement

PHIL 350 Directed Reading (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
Independent research according to program developed jointly by the student and a faculty director. Open to majors and to non-majors with the permission of the chairperson.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding the selected topic

PHIL 354 Topics in Bioethics (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies a particular topic selected from the field of bioethics.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding the selected topic in bioethics; Students will develop effective philosophical writing and presentation skills

PHIL 355 Neuroethics (3 Credit Hours)
Pre-requisites: students must have taken at least two philosophy courses
This course focuses on ethical considerations emerging from contemporary research in neuroscience, as well as neuroscientific techniques for studying ethical questions. Students will be able to demonstrate understanding of the ways in which the study of ethics and neuroscience inform each other
Interdisciplinary Option: Bioethics
Course equivalencies: X - PSYC355/PHIL355

PHIL 360 Contemporary European Philosophy (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
Readings and discussion drawn from contemporary French and German philosophers, such as Merleau-Ponty, Sartre, Heidegger, Derrida, Foucault.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of contemporary French and German philosophy

PHIL 362 The British Philosophers (3 Credit Hours)
Readings and discussion drawn from early modern and modern British philosophers such as Hobbes, Locke, Hutcheson, Hume, Smith, Bentham, Mill.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of early British philosophy

PHIL 369 Philosophy of Medicine (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course investigates philosophical questions concerning the practice of medicine, such as the epistemology of medicine, the nature of health and disease, what is a profession, and the nature of suffering.
Interdisciplinary Option: Bioethics
Course equivalencies: X-PHIL369/BIET369
Outcomes:
The student will develop a critical understanding of the practice of medicine from a philosophical point of view

PHIL 370 Intro to American Philosophy (3 Credit Hours)
This course studies American Philosophers such as Peirce, James, Dewey, with an evaluation of their principles.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of American philosophy

PHIL 374 Philosophy of History (3 Credit Hours)
Study of the nature of historical knowledge and of theories concerning historical process.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding history as a discipline and a historical process

PHIL 375 Philosophy of Marxism (3 Credit Hours)
A study of the philosophical dimensions of the thought of Karl Marx, his 19th century precursors and 20th century interpreters.
Interdisciplinary Option: German Studies
Course equivalencies: PHIL394/PHIL375
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding the thought of Karl Marx and Marxism

PHIL 379 John F. Grant, M.D., Symposium on Health Care Ethics (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course explores contemporary philosophical, ethical, and social policy questions concerning issues in health care and biomedical ethics.
Interdisciplinary Option: Bioethics
Outcomes:
Students will develop a more advanced understanding of contemporary health care ethics and bioethics through direct student participation in an interactive seminar environment; Students will learn to apply ethical reasoning and ethical judgment (concepts, theories, methods) to discuss issues in health care and biomedical ethics; Students will develop effective writing and oral presentation skills

PHIL 380 Topics in Philosophy of Religion (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies various philosophical issues regarding religion. May include issues such as religious concepts, types of religion, divine attributes, free will and providence, problem of evil.
Course equivalencies: PHIL391/PHIL380
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding key religious issues

PHIL 381 Philosophy of Science (3 Credit Hours)
Readings and discussion of selected texts regarding theories of scientific methods, scientific reasoning, metaphysical foundations of science, philosophical problems of scientific theories about physical reality.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding scientific inquiry and theory

PHIL 382 Philosophy of Social Science (3 Credit Hours)
Study of philosophical issues in the practice of contemporary behavioral sciences: theory, fact and value, causality, relativism, functionalism, statistical generalization, social planning.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding issues in the behavioral sciences

PHIL 383 Philosophy of Psychology (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
A philosophical analysis of theoretical positions in psychology. May include issues regarding methodology, perception, learning theory, rationality, emotions.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding issues in the field of psychology

PHIL 384 Topics in Philosophy & Science (3 Credit Hours)
Particular topics selected from philosophy and science. Typical topics include the Scientific Revolution, positivism, space and time, relativity theory, cosmology, evolution.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding the selected topic

PHIL 385 Environmental Ethics (3 Credit Hours)
This course will examine a number of controversial moral issues involving our environment. Theoretical and applied topics may include animal rights and species rights, nonwestern environmental perspectives, ecofeminism, duties to future generations, overpopulation, pollution, nuclear power, and environmental issues in policy making and business ethics.

PHIL 386 Analytic Philosophy (3 Credit Hours)
A survey of 20th century British and American philosophy in the analytic tradition, including philosophers such as Russell, Moore, Wittgenstein, Carnap, Quine.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding the analytic tradition in philosophy

PHIL 387 Topics in Philosophy of Mind (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course is a critical study of issues such as the mind-body problem, personal identity, knowledge of other minds, consciousness, and perception.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding issues in the philosophy of mind

PHIL 388 History of Ethics (3 Credit Hours)
An intensive study of the ethical theories of several major figures in the history of western moral philosophy, including, for example, the systems of Aristotle, Kant, and Mill.
Outcomes:
Students will develop a more advanced understanding of philosophical problems and answers to questions in the field of ethics by means of this historical study

PHIL 389 Contemporary Issues (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
Study of a selected topic in some area of contemporary philosophy.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding the selected topic

PHIL 390 Independent Study for Majors (3 Credit Hours)
Pre-requisites: Students must be a philosophy major with adequate background
In-depth independent research developed jointly by the student and a faculty director. The topic should be one with which the student has some familiarity so that the research can be an examination of it in-depth.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding the selected topic

PHIL 391 Topics in Philosophy of Religion (3 Credit Hours)
PHIL 391 was re-numbered to PHIL 380.
Course equivalencies: PHIL391/PHIL380

PHIL 393 Philosophy & The Human Sciences (0 Credit Hours)
This seminar explores a selected theme in health care ethics. Extensive use is made of visiting guest experts. Students should have completed four courses in philosophy, including a course in health care ethics.
Outcomes:
Students will develop a more advanced philosophical understanding of health care ethics, through direct student participation in an interactive seminar environment

PHIL 395 Seminar in Ancient Philosophy (3 Credit Hours)
This course will study selected issues from ancient philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses, including PHIL 304.
Outcomes:
Students will develop a more advanced understanding of ancient philosophy, through direct student participation in an interactive seminar environment

PHIL 396 Seminar in Medieval Philosophy (3 Credit Hours)
This course will study selected issues from ancient philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses, including a course in medieval philosophy.
Interdisciplinary Option: Medieval Studies
Course equivalencies: X-PHIL396/MSTU350
Outcomes:
Students will develop a more advanced understanding of medieval philosophy, through direct student participation in an interactive seminar environment

PHIL 397 Capstone Seminar in Classical Modern Philosophy (3 Credit Hours)
This course will study selected issues from early modern philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses, including PHIL 309.
Outcomes:
Students will develop a more advanced understanding of early modern philosophy, through direct student participation in an interactive seminar environment

PHIL 398 Capstone Seminar in Contemporary Philosophy (3 Credit Hours)
Pre-requisites: Course intended for philosophy majors
Students should have completed at least five philosophy courses. This course will study selected issues in contemporary philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses.
Outcomes:
Students will develop a more advanced understanding of contemporary philosophy, through direct student participation in an interactive seminar environment

PHIL 399 Capstone Seminar on a Topic in Philosophy (3 Credit Hours)
Pre-requisites: Course intended for philosophy majors
Students should have completed at least five philosophy courses. This course engages the student in an analysis and discussion of special problems found in various areas of philosophy. Student should have completed five philosophy courses.
Outcomes:
Students will develop a more advanced understanding of the philosophical enterprise, through direct student participation in an interactive seminar environment

Artificial Intelligence and Human Flourishing Interdisciplinary Minor

Loyola University Chicago offers an interdisciplinary minor in Artificial Intelligence and Human Flourishing. It seeks to bridge the technical and scientific expertise of Computer Science with philosophical reflection on the ethical and social impacts of current and emerging technologies. The social and ethical impact of computational technologies from social media to big data to emerging generative AI has had an undeniably profound impact on the contemporary world across nearly all personal, professional, and even spiritual domains, an impact that will only increase.

Related Programs

Major

- Computer Science (BS) (p. 348)
- Software Engineering (BS) (p. 356)

Minor

- Artificial Intelligence Minor (p. 348)

Curriculum

Code	Title	Hours
Technological Foundations [1]		
Students must complete at least two (2) of the following:		6
COMP 111	History of Computing	
COMP 150	Introduction to Computing	
COMP 170	Introduction to Object-Oriented Programming	
COMP 180	Computing and Data Analysis for the Sciences	
COMP 215	Object Oriented Programming with Mathematics	
COMP 379	Machine Learning	
COMP 388	Topics in Computer Science [2]	
PHIL 302	Topics in Formal Logic [2]	
Ethical Foundations [3]		
Students must complete at least two (2) of the following:		6
COMM 360	Digital Media Ethics	
COMP 111	History of Computing	
COMP 317	Social, Legal, and Ethical Issues in Computing	
PHIL 276	Philosophy of Mind	
PHIL 310	Issues in Philosophy of Human Nature [2]	
PHIL 311	Issues in Metaphysics [2]	
PHIL 324	Topics in Ethics [2]	
PHIL 331	Philosophy of Technology	
PHIL 387	Topics in Philosophy of Mind	
Philosophy and Humanities Foundations		
Students must complete at least one (1) of the following:		3
COMP 111	History of Computing	
PHIL 276	Philosophy of Mind	
PHIL 301	Symbolic Logic	
PHIL 302	Topics in Formal Logic [2]	
PHIL 310	Issues in Philosophy of Human Nature [2]	
PHIL 311	Issues in Metaphysics [2]	
PHIL 330	Theory of Knowledge	
PHIL 331	Philosophy of Technology	
PHIL 387	Topics in Philosophy of Mind	
Electives		**3**
Students take one additional (1) course of their choice from any of the three "foundations" lists above. Some courses accomplish multiple outcomes but can only fulfill one requirement.		
Total Hours		**18**

[1] At least one (1) Technological Foundations course must be a Computer Science course.
[2] With director approval of topic.
[3] At least one (1) Ethical Foundations course must be a Philosophy course.

	Total Hours	**18**

[1] The discipline areas can be taken in any order, but it is recommended that students complete one course from each area before taking a second course.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Students will learn the principles and practice of programming needed for basic AI.
- Students will learn the social, ethical, and/or legal impacts of AI on individual and social flourishing.
- Students will learn the philosophical and historical roots of AI, as well as the ongoing philosophical problems posed by AI.

Ethics and Moral Philosophy Minor

As of Fall 2026, this minor is no longer accepting students.

Ethics is a central area of human concern and human inquiry. A special concern with ethics and human values is one of the things that defines Loyola University Chicago and the Jesuit Tradition. Philosophy and philosophical treatments of ethics and ethical theory are foundational for the critical discussion of ethical issues in other fields. The Minor in Ethics and Moral Philosophy can prove to be a significant credential for some students, both for finding employment and for admission to graduate or professional school, as there is increasing attention to the study of ethics in professional schools. Please note that Philosophy Majors cannot receive the Minor in Ethics and Moral Philosophy.

For further information, please contact the Philosophy Undergraduate Program Director (https://www.luc.edu/philosophy/departmentadministration/).

Related Programs

Major

- Philosophy (BA) (p. 586)

Minor

- Philosophy Minor (p. 590)

Curriculum

For this minor a student must take six courses in ethics. At least four of these six courses must be taken from the Philosophy Department, and at least two of them must be at the 300-level. As many as two ethics courses can be taken outside of the Philosophy Department.

Each student's minor program must include:

Code	Title	Hours
Minor Requirements		
Select two lower-level philosophy courses in ethics: [1]		6
PHIL 181	Ethics	
PHIL 182	Social and Political Philosophy	
PHIL 284	Health Care Ethics	
PHIL 285	Contemporary Ethical Issues	
PHIL 286	Ethics and Education	
PHIL 288	Culture and Civilization	
PHIL 289	Philosophy and Gender	
Select two 300-level philosophy courses in ethics: [1]		6
PHIL 321	Ethics and Society	
PHIL 323	Philosophy of Law	
PHIL 324	Topics in Ethics [2]	
PHIL 369	Philosophy of Medicine	
PHIL 385	Environmental Ethics	
PHIL 388	History of Ethics	
PHIL 389	Contemporary Issues [3]	
PHIL 398	Capstone Seminar in Contemporary Philosophy [3]	
PHIL 399	Capstone Seminar on a Topic in Philosophy [3]	
Select two courses from the following:		6
THEO 340	Foundations of Christian Morality	
THEO 342	Perspectives on Life and Death	
THEO 344	Theology and Ecology	
Up to two additional elective philosophy courses in ethics at any level (e.g.100-, 200- or 300-level)		
Total Hours		**18**

[1] Note that, in addition to the courses listed here, individual sections of philosophy courses that are not on this list but which are taught as ethics classes can count towards the minor on a case by case basis.

[2] Two or more sections of PHIL 324 Topics in Ethics can count towards the minor, if those sections are different ethics courses.

[3] Some sections of PHIL 389 Contemporary Issues, PHIL 398 Capstone Seminar in Contemporary Philosophy, and PHIL 399 Capstone Seminar on a Topic in Philosophy can count toward the minor, provided such sections are ethics courses.

Note that a student can incorporate the courses taken for the Core Curriculum into this minor, in such a way that only some additional courses are needed to complete this minor. For example, a student can take two Core philosophy area courses in ethics and one Core theology area course in ethics. That student would then take three additional ethics courses (of which two are from Philosophy at the 300-level) in order to receive the Minor in Ethics and Moral Philosophy.

Course	Title	Hours
Freshman		
Fall		
Ethics Course (100- or 200-level)		3
	Hours	**3**
Spring		
Ethics Course (100- or 200-level)		3
	Hours	**3**
Sophomore		
Fall		
Ethics Course (100-, 200-, or 300-level) [1]		3
	Hours	**3**
Spring		
Ethics Course (100-, 200-, or 300-level) [1]		3
	Hours	**3**
Junior		
Spring		
Ethics Course (300-level)		3

Ethics Course (300-level)	3
Hours	**6**
Total Hours	**18**

[1] Students may also take THEO 340 Foundations of Christian Morality, THEO 342 Perspectives on Life and Death, or THEO 344 Theology and Ecology.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Upon completion of the Minor in Ethics and Moral Philosophy students will be able to:

- Analyze major texts in the history of philosophy.
- Articulate major philosophical problems and their solutions, such as questions concerning truth and knowledge, reality, moral values, and justice.
- Distinguish and explain different philosophical methodologies or approaches.
- Explain and apply ethical frameworks.
- Evaluate or construct arguments.

Honors in Philosophy

Requirements and Steps

1. **Be a philosophy major and have a GPA of at least 3.5 in Philosophy**
2. **Write an Honors Thesis and pass an Oral Defense on the thesis**
3. **Take one extra upper-level Philosophy course**

Start by contacting the Philosophy Undergraduate Program Director (https://www.luc.edu/philosophy/departmentadministration/). A student pursuing honors in philosophy chooses a topic to research and selects a faculty member who agrees to supervise the student's work on the thesis. The Undergraduate Program Director assists the student in setting up a committee for the oral defense consisting of the faculty member who supervised the thesis and two additional faculty members.

The student may develop the thesis from an earlier paper written for a philosophy course. Also, the student may take the required extra philosophy course as a directed readings course with his or her faculty supervisor.

A draft of the thesis must be completed early enough in the semester that the faculty supervisor can make comments for possible revision. The other members of the defense committee may offer feedback if they wish.

When the thesis is completed, an oral defense of the thesis is scheduled, usually by the student and his or her faculty supervisor. The three faculty members participating in the oral defense then vote on whether the student has passed the defense.

For more information contact the Philosophy Undergraduate Program Director (https://www.luc.edu/philosophy/departmentadministration/).

Frequently Asked Questions

Do I need to be a member of the Interdisciplinary Honors Program in order to graduate with honors in philosophy?

No. The two programs are completely independent of each other.

When do I need to sign up or declare that I want to graduate with honors in philosophy?

For a student graduating in the spring, it is a good idea to start the process sometime in the fall semester of one's final year in order to allow ample time to get things done. However, a student may sign up as late as the first few weeks of the spring semester.

How do I sign up?

Contact the Philosophy Undergraduate Program Director (https://www.luc.edu/philosophy/departmentadministration/).

How long does the honors thesis need to be?

There is no set page minimum or maximum. The thesis should be a substantial paper. A student's faculty supervisor will help the student determine what is required in her or his chosen area of study.

Do I need to write the thesis "from scratch"?

No. Doing so is permitted, but students often start with a paper they have written for a philosophy class and revise, expand, deepen, and develop it into a bigger, better paper.

Do the above deadlines mean that I can submit my thesis during finals week?

No. The normal procedure is for a student to submit a draft of the thesis to the supervising faculty member (or to all three faculty members on the defense committee, if they are willing) of the student's thesis. The faculty supervisor (and perhaps the other faculty on the defense committee) critique the paper and return it to the student for revisions. The revised version of the thesis is then given to all three members of the committee approximately one week before the scheduled defense of the thesis. As a general rule, the student should expect to submit a draft by the tenth week of classes.

Who decides if the honors thesis and oral defense satisfy the requirements?

That determination is made by the three faculty members who take part in the student's oral defense of the thesis.

How long is the oral defense?

There is no required time limit, but typically the defense lasts between one and two hours. Usually, the student begins by summarizing the thesis (this might take 5–10 minutes) and then the faculty members ask the student questions about the thesis (or the research for it, or its applications) for about an hour. The student then leaves the room while the faculty members decide whether the student passed. The defense is not so much an examination as it is a discussion.

The Honors Thesis

The Honors Thesis is more than a paper written for a class. In general, it is longer, better developed, and more sophisticated. It should be similar to a paper written by a first year graduate student.

Minimally, the Honors Thesis must be a good philosophy paper, although we expect that a major working at honors will aim to make his or her thesis even better than that. The descriptions below indicate what to aim for and also what sort of work falls short.

Outstanding:

- The thesis statement is clearly and fully articulated
- The paper presents a clearly structured argument that is complete and easy to follow
- The reasons/premises are stated clearly and are relevant and internally coherent
- The reasons/premises directly support the argument and the explanation makes it clear why this is so
- The paper acknowledges and explicitly responds to counterarguments with sophistication
- The paper uses appropriate textual references whose presence is clearly helpful and explicitly explained
- The paper uses an accurate and insightful interpretation of the texts it uses
- The paper offers a thoughtful and persuasive critical evaluation of the various positions and arguments presented

Good:

- The thesis statement is clear and fully articulated
- The paper presents a well-reasoned argument without important steps in the argument being left out or difficult to find
- The reasons/premises are stated and relevant
- The reasons/premises support the argument, even if the reasons why they support the conclusions are not fully or clearly articulated
- The paper notes that there are counterarguments to its thesis and indicates how they might be responded to
- The paper uses textual references that contribute to its argument or its discussion of counterarguments
- The paper accurately interprets the texts it uses
- The paper offers some critical evaluation of its own thesis and/or arguments and/or of the counterarguments it identifies

Less Than Adequate:

- There is a thesis that is evident, but it is not clear and/or is not easy to find
- Argumentation is present, but is incomplete and/or its elements are difficult to find
- The reasons/premises of the argument are evident, but are incompletely or unclearly stated
- The reasons/premises lend support for the conclusions, but the conclusions do not follow unless other reasons/premises are assumed which are not stated and/or the relation between the stated reasons and their conclusions is not explained
- Some obvious counterarguments are noted, but others are missed and/or possible responses to those that are mentioned are absent
- Textual references are made but they are either not necessarily appropriate or their connection to the reasoning in the paper is unclear
- The interpretation of the texts that are used is fairly accurate and does not force the texts to fit a certain role in the paper
- The paper shows a few signs of critical evaluation regarding the various positions and arguments presented, but it is spotty and incomplete in this respect

Philosophy (BA)

The philosophy major at Loyola is *extremely* customizable and easily suited to your goals. Of the 11 courses required for the major, only 3 are fixed: PHIL 274 Logic, PHIL 304 History of Ancient Philosophy, and PHIL 309 Classical Modern Philosophy. Beyond that, you have flexibility to chart your own course. You can also choose to specialize in one of four areas: Ethics & Values (E&V); Law, Society, & Social Justice (LSSJ); Mind & Science (M&S); or Existence, Meaning, & Culture (EMC). (See Philosophy Major Specializations (p. 586) for more details.)

For further information, please contact the Philosophy Undergraduate Program Director (https://www.luc.edu/philosophy/departmentadministration/).

Related Programs

Minor

- Ethics and Moral Philosophy Minor (p. 584)
- Philosophy Minor (p. 590)

Curriculum

Note that Philosophy majors are exempt from the general LUC PHIL 130 *CORE requirement.*

All majors must take at least eleven (11) courses in philosophy. Seven of these courses must be at the 300-level (eight, if PHIL 301 is taken). Note that 300-level courses have a prerequisite of two philosophy courses. Each student's major program must include:

Code	Title	Hours
Major Requirements		
Ethics (p. 587)		
Select one course from the Ethics Course Options.		3
Metaphysics/Epistemology (p. 587)		
Select one course from the Epistemology Course Options.		3
Formal Logic		
PHIL 274	Logic	3
or PHIL 301	Symbolic Logic	
Ancient Philosophy		
PHIL 304	History of Ancient Philosophy	3
Classical Modern Philosophy		
PHIL 309	Classical Modern Philosophy	3
Philosophy Capstone Seminar		
Select one philosophy capstone seminar in a historical period or on a contemporary issue: [1]		3
PHIL 395	Seminar in Ancient Philosophy	
PHIL 396	Seminar in Medieval Philosophy	
PHIL 397	Capstone Seminar in Classical Modern Philosophy	
PHIL 398	Capstone Seminar in Contemporary Philosophy	
PHIL 399	Capstone Seminar on a Topic in Philosophy	
Philosophy Electives		
Five other elective philosophy courses, of which at least four must be at the 300-level		15
Total Hours		**33**

[1] The department offers one capstone in each Philosophy Major Specialization each year.

Ethics Course Options

Code	Title	Hours
PHIL 181	Ethics	3
PHIL 182	Social and Political Philosophy	3
PHIL 283	Business Ethics	3

PHIL 325	Topics in Bioethics	3
PHIL 330	Theory of Knowledge	3
PHIL 380	Topics in Philosophy of Religion	3
PHIL 381	Philosophy of Science	3
PHIL 382	Philosophy of Social Science	3
PHIL 384	Topics in Philosophy & Science	3
PHIL 386	Analytic Philosophy	3
PHIL 387	Topics in Philosophy of Mind	3
PHIL 391	Topics in Philosophy of Religion	3
PHIL 393	Philosophy & The Human Sciences	0

(Optional) Philosophy Major Specializations

Specializing within the major is *not* required. Declaring a general philosophy major is common and allows for the greatest flexibility in your course selection.

That said, choosing to pursue a philosophy specialization can help you to identify what fields within philosophy you find most fascinating and relevant, and plan a course of study within your major that emphasizes your interests.

The four areas of specialization within the philosophy major are: **Ethics & Values** (E&V); **Law, Society, & Social Justice** (LSSJ); **Mind & Science** (M&S); and **Existence, Meaning, & Culture** (EMC). To declare a Philosophy Major Specialization, contact the Philosophy Undergraduate Program Director.

Students pursuing a Philosophy Major Specialization must complete the Philosophy Major Requirements (p.), listed above. Students should select elective courses that best align with their chosen Philosophy Major Specialization (see the Suggested Sequence of Courses for each specialization for more information).

Specialization in Ethics and Values (E&V)

Courses in the E&V specialization focus on ethical and moral issues, investigating how meaning, value, and moral responsibility operate to constitute an ethical human life. E&V courses each address some of the following topics: meta questions about value, the status of moral judgments, the nature of freedom, etc.; normative questions that encompass personal ethical choices, how individuals and groups should live together in a society, or ways to make ethical judgments; and applied questions about, for example, health care, education, or the environment. Potential topics include: Is moral value culturally relative? What makes something good? What is a good human life? Should voluntary euthanasia be legalized? What obligations does each person have, both to themselves and each other? Here concerns about moral rights, needs, capabilities, and character often play a role in deciding how we should go about making choices, especially when other people's interests are involved.

Suggested Sequence of Courses

Freshman		
Fall		**Hours**

	Hours	**3**
	Total Hours	**33**

1. PHIL 181 Ethics (suggested)
2. Suggested E&V 300-level Elective Courses: PHIL 310 Issues in Philosophy of Human Nature, PHIL 321 Ethics and Society, PHIL 324 Topics in Ethics, PHIL 388 History of Ethics

Specialization in Law, Society and Social Justice (LSSJ)

Courses in the LSSJ specialization focus on questions of justice—which is to say questions of how we should best live together, structure our societies, and justify our systems of law— developing the ability to critically examine our existing communities, societies, and laws. Students with an LSSJ specialization gain a solid understanding of the philosophical foundations of law, politics, and governance, as well as insight into theories of social justice, economic justice, racial justice, gender justice, environmental justice, etc. LSSJ specialists are thus well-equipped to pursue advanced study of these questions (for example, in law school), to engage in socio-political critique, and/or to strive for positive social and political change.

2. Suggested LSSJ 300-level Elective Courses: PHIL 321 Ethics and Society, PHIL 323 Philosophy of Law, PHIL 326 Political Philosophy, PHIL 327 Topics in Political Philosophy

Specialization in Mind and Science (M&S)

Courses in the M&S specialization focus on topics in epistemology (the study of knowledge) and metaphysics (the study of reality and first principles), with a particular emphasis on philosophy of science and the philosophy of mind. Topics in epistemology include the nature of justification, certainty, belief, truth, and good reasoning; the nature of scientific inquiry; the roles of values in science; and decolonizing knowledge. Metaphysics covers issues that lie at the foundation of other disciplines, including the nature or existence of reality, soul, body, mind, God, freedom, and human persons. Addressing both historical and contemporary approaches to these topics, an M&S specialization complements further study in the fields of neuroscience, psychology, biology, physics, chemistry, medicine, mathematics, and other related disciplines.

Suggested Sequence of Courses

Freshman		
Fall		**Hours**

Specialization in Existence, Meaning and Culture (EMC)

Courses in the EMC specialization ask about how we find meaning, both as individuals and as parts of communities and cultures that precede and might outlast us. What does it mean to be a person? What is it like to be a person? How do we respond to, critique, and carry on the past? EMC courses are broadly conversant with and build upon 19th and 20th century European philosophy, focusing on issues in phenomenology (the study of experience), hermeneutics (the study of interpretation), existentialism, philosophical anthropology, feminist philosophy, gender theory, critical race theory, and aesthetics. Topics in these areas intersect with, but are not reducible to, issues in metaphysics, epistemology, and ethics. Specific approaches may be historical and/or conceptual, analytic and/or continental, intradisciplinary and/or interdisciplinary.

Learning Outcomes

Upon completion of the BA in Philosophy students will be able to:

- Analyze major texts in the history of philosophy.
- Articulate major philosophical problems and their solutions, such as questions concerning truth and knowledge, reality, moral values, and justice.
- Distinguish and explain different philosophical methodologies or approaches.
- Explain and apply ethical frameworks.
- Evaluate or construct arguments.

Philosophy Minor

In every major area of study there are questions about values or methodology that philosophy can explore. So, philosophy can deepen your understanding of your major field of study. In addition, philosophy trains a person to think rigorously about fundamental questions—to express ideas clearly and logically—to understand and evaluate conflicting points of view—to reason in a careful way. These intellectual skills are useful in almost any career. And of course, like every minor, philosophy is an area of knowledge that has its own intrinsic value.

For further information, please contact the Philosophy Undergraduate Program Director (https://www.luc.edu/philosophy/departmentadministration/).

Major

- Philosophy (BA) (p. 586)

Minor

- Ethics and Moral Philosophy Minor (p. 584)

Curriculum

All minors must take at least six courses in philosophy, at least two of these being 300-level courses.

Each student's minor program must include:

Code	Title	Hours
Minor Requirements		
Select one lower-level philosophy course from the ethics group:		3
PHIL 181	Ethics	
PHIL 182	Social and Political Philosophy	
PHIL 283	Business Ethics	
PHIL 284	Health Care Ethics	
PHIL 285	Contemporary Ethical Issues	
PHIL 286	Ethics and Education	
PHIL 287	Environmental Ethics	
PHIL 288	Culture and Civilization	
PHIL 289	Philosophy and Gender	
Select one lower-level philosophy course from the epistemology group:		3
PHIL 130	Philosophy & Persons	
PHIL 271	Philosophy of Religion	
PHIL 272	Metaphysics	
PHIL 273	Philosophy of Science	
PHIL 274	Logic	
PHIL 275	Theory of Knowledge	
PHIL 276	Philosophy of Mind	
PHIL 277	Aesthetics	
PHIL 279	Judgment and Decision-Making	
Two PHIL Elective Courses at any level (100-, 200-, or 300-level)		6
Two PHIL 300-level Elective Courses		6
Total Hours		**18**

You can design a program to fit your own needs. If you plan a law career, for example, you would likely want to emphasize areas like reasoning, evidence and political theory. Academic counselors can help you design a program. What follows are some suggested sequences for students preparing for careers in law, business, medicine, or religion. Of course, the general requirements stated above must be incorporated in these suggested sequences.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for study. Students should consult their advisor for assistance with course selection.

Suggested Minor Sequence in Pre-Law

Code	Title	Hours
Select one lower-level philosophy course from the ethics group:		3

or PHIL 327	Topics in Political Philosophy	
PHIL 323	Philosophy of Law	
PHIL 375	Philosophy of Marxism	
Total Hours		**18**

Suggested Minor Sequence in Pre-Health

Code	Title	Hours
Select one lower-level philosophy course from the ethics group:		3
PHIL 181	Ethics	
Select one lower-level philosophy course from the metaphysics/epistemology group:		3
PHIL 273	Philosophy of Science	
or PHIL 381	Philosophy of Science	
Select two PHIL Elective Courses at any level, with the following being recommendations:		6
PHIL 182	Social and Political Philosophy	
PHIL 284	Health Care Ethics	
Select two PHIL 300-level Elective Courses, with the following being recommendations:		6
PHIL 321	Ethics and Society	
PHIL 369	Philosophy of Medicine	
Total Hours		**18**

Suggested Minor Sequence in Religion

Code	Title	Hours
Select one lower-level philosophy course from the ethics group:		3
PHIL 181	Ethics	
Select one lower-level philosophy course from the metaphysics/epistemology group:		3
PHIL 271	Philosophy of Religion	
Select two PHIL Elective Courses at any level, with the following being recommendations:		6
PHIL 305	Medieval Philosophy	
PHIL 340	Philosophy of St Thomas Aquinas	
Select two PHIL 300-level Elective Courses, with the following being recommendations:		6
PHIL 310	Issues in Philosophy of Human Nature	
PHIL 312	Problems in the Philosophy of God	
PHIL 380	Topics in Philosophy of Religion	
Total Hours		**18**

Learning Outcomes

Upon completion of the Minor in Philosophy students will be able to:

- Analyze major texts in the history of philosophy.
- Articulate major philosophical problems and their solutions, such as questions concerning truth and knowledge, reality, moral values, and justice.
- Distinguish and explain different philosophical methodologies or approaches.
- Explain and apply ethical frameworks.
- Evaluate or construct arguments.

Physics

About Us

Located on the beautiful, Lakeshore campus of Loyola Univeristy Chicago in Cudahy Science Hall, the Department of Physics prepares students for future STEM careers. Students in the Department of Physics will learn the principles of physics, contribute to new physical knowledge and seek to foster scientific integrity. These goals are consistent with the mission of Loyola University Chicago: searching for truth and living for others. The Department strives to create a welcoming environment for its students that encourages student success and supports their well being as they work toward their career goals at Loyola. The Department and the Physics Club hold several social events each year to build community among the Loyola physics students and faculty.

We offer several undergraduate degree plans (p. 592) with BS degree programs in Physics, Biophysics, Theoretical Physics/Applied Mathematics and Physics/Computer Science. We also offer a special dual degree in physics and engineering, wherein students receive a BS in Physics from Loyola and a bachelor of engineering degree from an affiliated school. In collaboration with the School of Education, the department also offers a BS/MEd degree that prepares students to teach in high schools. In addition, the department serves a large number of students seeking to satisfy ancillary requirements for other majors, core curriculum requirements, as well as pre-health-professional requirements for medical, dental, and pharmacy schools.

The Department has several areas of active physics research, including astroparticle physics, computational physics, cosmology, biophysics, fluid dynamics, optics, and quantum mechanics. Students have the opportunity to explore these different areas of physics research with faculty (https://www.luc.edu/physics/research/) and are encouraged to participate in projects. Students often present their research at local and national conferences, and they can receive fellowships (https://

www.luc.edu/physics/undergraduateexperiences/researchfellowships/) from LUC to support their research.

You can read more about the undergraduate experience offered by the Physics Department here. Please explore the website or contact the department chair for more information about our department.

Physics in the Science Core

The Physics Department offers several courses for non-science majors seeking to satisfy natural science core curriculum requirements: PHYS 101 Liberal Arts Physics, PHYS 102 Planetary and Stellar Astronomy, and PHYS 106 Physics of Music. These courses emphasize an appreciation of the basic laws, overall structure, and beauty of the physical universe. In addition, as part of the natural science core, these courses discuss the scientific method, and stress the importance of methodological competence as well as ethics in forming critical judgments on technically oriented societal issues. More information on Loyola's Core Curriculum can be found here (https://www.luc.edu/physics/undergraduateexperiences/).

Undergraduate Programs

- Biophysics (BS) (p. 596)
- Physics (BS) (p. 598)
- Physics (BS) + Engineering (BS) (p. 599)
- Physics Minor (p. 601)
- Physics with Computer Science (BS) (p. 602)
- Theoretical Physics and Applied Mathematics (BS) (p. 604)

Physics Department Academic Policies

Mathematics Readiness

Entering students with American College Test (ACT) mathematics scores of 25 or higher, or Scholastic Aptitude Test (SAT) mathematics scores of 570 or higher, automatically qualify to start the sequence of physics courses for the major in physics. Students who do not so qualify should consult the physics chairperson to determine the appropriate sequence of courses.

Policy on Multiple Majors and Minors

The following modifies and clarifies the "Double-Dipping (https://www.luc.edu/media/lucedu/cas/pdfs/Double%20Dipping%20Policy.pdf)" policy of the College of Arts & Sciences, as it pertains to the Department of Physics.

The following degree programs are housed in or jointly housed in the Physics Department:

1. Bachelor of Science in Physics (PHYS-BS)
2. Bachelor of Science in Biophysics (BPHY-BS)
3. Bachelor of Science in Physics with Computer Science (PCSC-BS)
4. Bachelor of Science in Theoretical Physics/Applied Mathematics (TPAM-BS)
5. Physics Minor (PHYS-MINR)

They will be referred to as “majors or minor in the Physics Department” in this document.

- A combination of PHYS-BS and PCSC-BS **is not allowed**.
- Any other combination of two majors in the Physics Department (aside from PCSC-BS) **is allowed.**
- Any combination of three majors in the Physics Department **is not allowed**.
- PHYS-MINR **is not allowed** together with any major housed in Physics Department.
- A Mathematics Minor (MATH-MINR) **is not allowed** together with TPAM-BS, but **is allowed** with any other major in the Physics Department. For qualifying students, the MATH-MINR may be earned by taking **one** additional, upper-level mathematics course (MATH 3XX).
- A Computer Science Minor (COMP-MINR) **is not allowed** together with PCSC-BS.
- An Information Technology Minor (ITEC-MINR) **is not allowed** together with PCSC-BS.
- The combination of a B.S. in Mathematics (MATH-BS) and any single major housed in the Physics department **is allowed**.
- A triple major of MATH-BS, TPAM-BS, and any other major housed in the Physics Department **is not allowed**.
- A triple-major combination of PCSC-BS, PHYS-BS, and any of the following: B.S. in “Communication Networks and Security” (CNWS-BS), “Computer Science” (COMP-BS), “Information Technology” (ITEC-BS), or “Software Engineering” (SWEN-BS) is **not allowed**.
- A triple-major combination of PHYS-BS, BPHY-BS, and any of the following: B.S. in Biology (BIOL-BS), Biology with Molecular Biology Emphasis (BIOM-BS), or Biology with Ecology Emphasis (BIOE-BS) **is not allowed**.

Grade Requirements

A grade of "C-" or better must be earned in all physics courses required for the major or minor in physics.

Continuation in the Major

A student will be withdrawn from any major offered by the Physics Department if either of the following conditions exist:

1. The student receives two grades less than C- (excluding grades of W but including grades of WF) in a two year period in courses required for the major (including courses offered by the Math and Computer Science departments).
2. The student has a cumulative GPA in majors’ courses (including the ancillary courses) less than 2.00 after completion of the first two year sequence (i.e., upon completion of MATH 264 Ordinary Differential Equations and PHYS 301 Mathematical Methods in Physics and PHYS 314 Theoretical Mechanics I).

The chair of the Physics Department may reinstate the student in exceptional cases.

Prerequisite Courses

PHYS 121 College Physics I with Calculus Lecture/Discussion and PHYS 122 College Physics II with Calculus Lecture/Discussion are

basic prerequisites for all physics courses. PHYS 111 College Physics I Lec / Dis, PHYS 112 College Physics II Lec/Disc will be accepted in lieu of these courses with the permission of the department chairperson. Mathematics courses listed as prerequisites to a physics course may, with the permission of the chairperson, be taken concurrently with the physics course or may be excluded in special instances. MATH 264 Ordinary Differential Equations is a prerequisite to all 300 level physics courses. Part II of a given course may not be taken before Part I.

Advanced Placement in Physics

Entering non-majors who have received scores of 4 or higher on the Physics B or Physics C Advanced Placement examinations of the College Entrance Examination Board are eligible to receive college credit for the corresponding lecture courses. A score of 4 or higher in the Physics C examination, plus departmental approval, are necessary for receipt of credit by majors. No credit is available for laboratory courses.

Requirements for Departmental Honors

In addition to the general requirements for the major, a student seeking departmental honors must satisfy the following two criteria:

- Minimum overall GPA of 3.7
- Department-approved research project that culminates in a journal article, seminar presentation, or conference proceeding.

Qualifying students must email the Department Chair (Constantin Rasinariu) for departmental approval. Students should then submit the approval to their CAS advisor.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Physics (PHYS)

PHYS 101 Liberal Arts Physics (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
For non-science majors. Selected topics from classical and modern physics emphasizing beauty, symmetry, and simplicity. Contemporary issues of physics and society.
Knowledge Area: Tier 2 Scientific Knowledge
Outcomes:
Understanding of interaction between theory and experiment, role of physics in society, science vs. nonscience; solve problems using algebra, geometry, vectors, and graphs; synthesize disparate physics topics

PHYS 102 Planetary and Stellar Astronomy (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course covers the astronomy of the solar system and planetary science as well as the astronomy of stars and galaxies. This includes study of earth and comparative study of all the planets, as well as the birth, evolution, and death of stars, the clustering of stars and galaxies, the expanding universe and cosmology.
Knowledge Area: Tier 2 Scientific Knowledge
Outcomes:
Students will demonstrate an understanding of the fundamental knowledge and concepts in astronomy, the qualitative and quantitative reasoning used, and how this science can be applied

PHYS 106 Physics of Music (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Language, structure, history and styles of music; motion, force, energy and waves applied to production of sound; physical properties of instruments and musical acoustics.
Knowledge Area: Tier 2 Scientific Knowledge
Outcomes:
Knowledge of music fundamentals; understand how instruments function; apply physics concepts and experimentation to analyze the production of music and acoustics

PHYS 111 College Physics I Lec / Dis (3 Credit Hours)
Pre-requisites: Math Placement Test or MATH 118
Non-calculus introduction to vectors, kinematics, Newtonian mechanics of translational, rotational, and oscillatory motion, energy and momentum conservation, and thermodynamics.
Interdisciplinary Option: Forensic Science
Outcomes:
Understanding of analytical description of motion and application of conservation laws; develop scientific insight and proficiency in solving representative problems

PHYS 111L College Physics Laboratory I (1 Credit Hour)
Pre- or co-requisites: PHYS 111 or PHYS 121; Prerequisite: MATH 118 or MDT
Laboratories cover selected topics in introductory mechanics, including freefall, uniform circular motion, work-energy, collisions, rotational motion, and harmonic motion.
Interdisciplinary Option: Forensic Science
Outcomes:
Experience and familiarity with basic measuring devices and simple mechanics equipment; Understand measurement errors and their propagation, plotting and interpretation of data, the connection between theory and experiment for selected topics in elementary mechanics

PHYS 112 College Physics II Lec/Disc (3 Credit Hours)
Pre-requisites: PHYS 111 or equivalent
PHYS 111 and 112 provide a non-calculus introduction to physics. Topics include electricity and magnetism, sound, optics, and selected topics from modern physics.
Interdisciplinary Option: Forensic Science
Course equivalencies: PHYS112/PHYS112K/PHYS122
Outcomes:
Understand and apply electromagnetism to 2- and 3-dimensional problems in physical and biological sciences

PHYS 112L College Physics Lab II (1 Credit Hour)
Pre-requisites: PHYS 112 or PHYS 122 (may also be taken as corequisite); also prerequisite PHYS 111L; For ESBE, ESCE, and ESEE majors only: Prerequisite or corequisite of PHYS 122
Laboratories cover selected topics in electrical circuits and optics, including DC circuits, resonance in AC circuits, ray optics, and prism and grating spectrometers.
Interdisciplinary Option: Forensic Science
Outcomes:
Understand the connection between theory and experiment for selected topics in elementary electrical circuits and optics; Experience and familiarity with DC power supplies, digital multi-meters, function generators, oscilloscopes, mirrors, lenses, and spectrometers; Ability to correlate simple electronic schematic diagrams with actual circuits

PHYS 121 College Physics I with Calculus Lecture/Discussion (3 Credit Hours)
Co-requisites: MATH 131 or MATH 161
Calculus-based introduction to vectors, kinematics, Newtonian mechanics of translational, rotational, and oscillatory motion, energy and momentum conservation, and thermodynamics.
Interdisciplinary Option: Forensic Science
Outcomes:
Understanding of analytical description of motion and application of conservation laws; develop scientific insight and proficiency in solving representative problems

PHYS 122 College Physics II with Calculus Lecture/Discussion (3 Credit Hours)
Pre-requisites: PHYS 121; Corequisite: MATH 132 or MATH 162
Calculus-based introduction to electricity and magnetism, sound, optics, and selected topics from modern physics.
Interdisciplinary Option: Forensic Science
Course equivalencies: PHYS112/PHYS112K/PHYS122
Outcomes:
Understand and apply electromagnetism to 2- and 3-dimensional problems in physical and biological sciences

PHYS 126F Freshman Projects (1 Credit Hour)
Pre-requisites: PHYS 111 or 121 (C- or better); Enrollment restricted to PHYS, BPHY, TPAM, and PCSC majors Outcomes: Students should gain a deeper understanding of the material covered in introductory physics and learn about research methods employed by physicists
Under the guidance of a faculty member, students perform research on a physics-related topic through a semester-long project. The project involves development of a proposal, building of experimental apparatus, data collection/analysis, and theoretical calculations.
This course satisfies the Engaged Learning requirement.

PHYS 130 Introduction to Computational Physics (3 Credit Hours)
Pre-requisites: PHYS 121 (C- or better); Corequisite: PHYS 122
This is an introductory computational physics course. The course will cover basic computational skills using Python and common scientific Python packages. We will solve a set of programming exercises that enhances both the understanding of introductory physics (Newton's laws, work, energy, momentum) and physics problem solving skills.
Outcomes:
Students should be able to write a Python program to perform numerical calculations in physics and gain computational skills that would be utilized in upper division physics coursework and research

PHYS 235 Modern Physics (3 Credit Hours)
Pre-requisites: PHYS 122 (C- or better); Corequisites: PHYS 235L and MATH 263; Enrollment is restricted to PHYS, BPHY, TPAM and PCSC majors and PHYS minors
This course covers the Special Theory of Relativity and Introductory Quantum Mechanics.
Outcomes:
Understand the relative nature of space and time; the duality of waves and particles; the microscopic structure of matter and its macroscopic consequences

PHYS 235L Modern Physics Laboratory (1 Credit Hour)
Co-requisites: PHYS 235
Modern physics experiments including electromagnetic waves (microwaves), interferometry, spectroscopy, electron and quantum physics, and solid-state physics.
Outcomes:
Students will gain hands on experience and familiarity with experiments from early modern physics, the ability to use spreadsheets and symbolic algebraic software for problem solving and data interpretation, and experience documenting and reporting results including historical background searches

PHYS 301 Mathematical Methods in Physics (3 Credit Hours)
Pre-requisites: PHYS 235; Corequisite: MATH 264
Lecture and computer laboratory; Mathematical and computer methods in physics and engineering; Topics include vector calculus, functions of a complex variable, phasors, Fourier analysis, linear transformations, matrices, first and second order differential equations, special functions, numerical and symbolic computer applications.
Course equivalencies: X-PHYS301/PHYS271/MATH355

PHYS 303 Electronics I (3 Credit Hours)
Pre-requisites: PHYS 122 (C- or better); Corequisite: PHYS 303L; Enrollment restricted to PHYS, BPHY, TPAM, PCSC majors and PHYS minors
Study of analog electronics, including direct and alternating circuit analysis, resonant circuits, diodes, transistors, amplifiers, operational amplifiers, noise, feedback and oscillators.
Outcomes:
Students will understand and manipulate equations and concepts, and gain experience with electronics equipment, plotting and interpretation of data, synthesizing and writing laboratory results, and the formal verbal presentation of results

PHYS 303L Electronics Laboratory (1 Credit Hour)
Pre-requisites: PHYS 122 (C- or better); Corequisite: PHYS 303; Enrollment restricted to PHYS, BPHY, TPAM, PCSC majors and PHYS minors
Students will learn to use various electronic components, instruments, techniques, and applications. This course is the lab component for PHYS 303.
Outcomes:
Students should get a deeper understanding of the material covered in PHYS 303 (Analog and digital electronics) by experimentally verifying many of the concepts covered in that course; Students will also learn to recognize various components and develop confidence in using them

PHYS 310 Optics (3 Credit Hours)
Pre-requisites: PHYS 235 (C- or better); Corequisite: PHYS 310L; Enrollment restricted to PHYS, BPHY, TPAM, PCSC majors and PHYS minors
The course covers electromagnetic nature of light, geometrical optics, polarization, Fresnel relations, interference, Fraunhofer and Fresnel diffraction, Fourier optics, lasers, and holography.
Outcomes:
Students will gain knowledge of the principles of classical and modern optics, the role of optics in the development of quantum mechanics and its applications to modern technology

PHYS 310L Optics Lab (1 Credit Hour)
Pre-requisites: PHYS 235 (C- or better); Corequisite: PHYS 310; Enrollment restricted to PHYS, BPHY, TPAM, PCSC majors and PHYS minors
Students will learn to use various optical components, instruments, techniques, and applications. This course is the lab component to PHYS 310.
Outcomes:
Students should get a deeper understanding of the material covered in PHYS 310 (Geometrical and wave optics) by experimentally verifying many of the concepts covered in that course; Students will also learn to recognize various components and develop confidence in using them

PHYS 314 Theoretical Mechanics I (3 Credit Hours)
Pre-requisites: PHYS 122 (C- or better); Corequisites: MATH 264 and PHYS 301 Outcomes: Students will gain understanding of analytical and numerical methods of mechanics, understanding of principles in dynamics, and experience in applying formalisms of Lagrange and Hamilton to mechanics in preparation for other areas of physics and engineering
Newtonian particle dynamics, conservation theorems, oscillations, gravitation, generalized coordinates, Lagrange and Hamilton formalisms.

PHYS 315 Theoretical Mechanics II (3 Credit Hours)
Pre-requisites: PHYS 314
This course is a continuation of PHYS 314 and covers dynamics of system of particles, moving coordinates, rigid body dynamics, systems of oscillators, motion in a central force field, relativity.
Outcomes:
Students will gain understanding of analytical and numerical methods of mechanics, and of the laws of dynamics and their applications

PHYS 328 Thermal Physical & Statistical Mechanics (3 Credit Hours)
Pre-requisites: PHYS 235 and PHYS 301
This course examines the fundamental concepts of temperature, entropy, and thermodynamic equilibrium, the first and second law, engines, the third law, and Boltzmann, Fermi-Dirac, and Bose-Einstein statistics.
Outcomes:
Students will learn to compare thermodynamical versus statistical characterizations of macroscopic systems with applications ranging from analyzing Fermi gases and black body radiation to information theory

PHYS 338 Advanced Physics Laboratory (2 Credit Hours)
Pre-requisites: PHYS 301 and PHYS 314; Restricted to PHYS, TPAM, PCSC, and BPHY majors
Lab course with advanced experiments in mechanics, biophysics, electromagnetism, quantum mechanics, solid state, and particle physics. Students will receive training in data analysis methods, data acquisition systems, signal processing, and 3D fabrication. Students will work in teams on a final independent project.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain an understanding of experiment design, data analysis, and error estimation in the context of investigating physical principles and using different instrumentation

PHYS 351 Electricity and Magnetism I (3 Credit Hours)
Pre-requisites: PHYS 235, 301 & MATH 264
Electrostatics and magnetostatics in a vacuum as well as in linear media, and an introduction to electrodynamics.
Outcomes:
Students will gain an understanding of mathematical methods of electrodynamics, of static electricity and magnetism including Coulomb's, Gauss', Ampere's, and Faraday's laws and their applications, and of solutions of Laplace's and Maxwell's equations

PHYS 352 Electricity and Magnetism II (3 Credit Hours)
Pre-requisites: PHYS 351
Introduction to electrodynamics and the special theory of relativity.
Outcomes:
Students will gain an understanding of electromagnetic field energy and momentum, Maxwell's equations and their applications including electromagnetic radiation and emission, involving retarded potentials and Lorentz covariance

PHYS 361 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: PHYS 235 & PHYS 301
Non-relativistic quantum mechanics.
Outcomes:
Students will understand and use separation of variables, finite polynomials, and matrix algebra to solve the Schroedinger equation, explain microscopic structure of matter, and describe philosophical interpretations of quantum mechanics

PHYS 371 Biophysics (3 Credit Hours)
Pre-requisites: For Biology and Molecular Biology majors: BIOL 251, (PHYS 112 or 122), and (MATH 132 or 162); For all other majors: PHYS 235 and BIOL 101
An upper-level course in biological physics focused on a quantitative description of the physical processes driving molecular and cellular processes with an emphasis on experiment design and analysis.
Outcomes:
Students will understand how to apply physical principles and probabilistic analysis toward the study of biological phenomena at molecular and cellular levels

PHYS 380 Special Topics in Physics (1-3 Credit Hours)
Pre-requisites: Instructor's permission
This variable (1-3) credit enrichment course introduces students to a topic not generally covered in other courses. This course can be repeated.
Outcomes:
Students will understand the material of the course and develop an ability to apply the knowledge gained to other contexts

PHYS 381 Special Topics in Physics (1-3 Credit Hours)
Pre-requisites: Instructor's permission
This variable (1-3) credit enrichment course introduces students to a topic not generally covered in other courses. This course can be repeated.
Outcomes:
Students understand the material of the course and develop an ability to apply the knowledge gained to other contexts

PHYS 391 Research (1-12 Credit Hours)
Research in physics or an associated field. This is a variable credit course and can be repeated.
This course satisfies the Engaged Learning requirement.
Course equivalencies: PHYS391 / PHYS385 / PHYS386
Outcomes:
Under the guidance of a faculty member, students study and understand research methods employed by physicists and gain a deeper understanding of a particular area of physics

PHYS 394 Argonne Lab Research (3 Credit Hours)
Pre-requisites: Chairperson's permission and acceptance by appropriate program
Study and research at the Argonne National Laboratory. Only those students who are accepted into the Argonne National Laboratory's student program (or similar programs elsewhere) are eligible. No tuition is charged.
Outcomes:
Students will work with a research group at Argonne or other laboratory to understand research methods employed by physicists and get a deeper understanding of a particular area of physics

PHYS 395 Argonne Lab Research (3 Credit Hours)
Pre-requisites: Chairperson's permission and acceptance by appropriate program
Study and research at the Argonne National Laboratory. Only those students who are accepted into the Argonne National Laboratory's student program (or similar programs elsewhere) are eligible. No tuition is charged.
Outcomes:
Students will work with a research group at Argonne or other laboratory to understand research methods employed by physicists and get a deeper understanding of a particular area of physics

Biophysics (BS)

The Biophysics major is an interdisciplinary program on the cutting edge of new developments in the biosciences. Offered by the Departments of Physics and Biology, the biophysics major provides rigorous training in biosciences, mathematics, and lab skills. The degree prepares students for research careers in biophysics, biochemistry, biomedical engineering, and physics. Biophysics is an ideal major for students considering careers in medicine, optometry, dentistry, and other applied health sciences.

Related Programs

Major

- Biology (BS) (p. 285)
- Physics (BS) (p. 598)

Minor

- Biostatistics Minor (p. 297)
- Physics Minor (p. 601)

Curriculum

This course of study prepares one for careers in medicine, medical research, nano-sciences, biophysics, medical physics, biomedical engineering, and biotechnology. A strong physics and mathematics background is fortified with biology and chemistry classes. A minimum grade of C- must be earned to satisfy a course requirement and a 2.0 minimum overall GPA is required for each

Code	Title	Hours
Required Courses		
Physics		
PHYS 121	College Physics I with Calculus Lecture/ Discussion	3
PHYS 111L	College Physics Laboratory I	1
PHYS 122	College Physics II with Calculus Lecture/ Discussion	3
PHYS 126F	Freshman Projects	1
PHYS 112L	College Physics Lab II	1
PHYS 235	Modern Physics	3
PHYS 235L	Modern Physics Laboratory	1
PHYS 301	Mathematical Methods in Physics	3
PHYS 314	Theoretical Mechanics I	3
PHYS 351	Electricity and Magnetism I	3
Physics Elective		
Select one of the following:		3
PHYS 310	Optics	
PHYS 328	Thermal Physical & Statistical Mechanics	
PHYS 361	Quantum Mechanics I	
Biology		
Select one of the following:		1-3
BIOL 101	General Biology I	
BIOL 111	General Biology I Lab	
BIOL 251	Cell Biology	
BIOL 282	Genetics	
Biophysics Elective Options		
Students must complete 10 credit hours to fulfill this requirement from the following:		10
BIOL 102	General Biology II [1]	
or COMP 18(	Computing and Data Analysis for the Sciences	
BIOL 112	General Biology II Lab	
BIOL 252	Cell Biology Laboratory	
BIOL 283	Genetics Laboratory	
BIOL 317	Models of Human Disease	
BIOL 335 / STAT 335		
BIOL 366	Cell Physiology & Biochemistry	
BIOL 366L	Cell Physiology and Biochemistry Lab	
BIOL 387	Genomics	
BIOL 388	Bioinformatics	
BIOL 390	Molecular Biology Laboratory	
BIOL 382	Molecular Genetics	
COMP 180	Computing and Data Analysis for the Sciences [1]	
PHYS 130	Introduction to Computational Physics [1]	
PHYS 310L	Optics Lab	
PHYS 338	Advanced Physics Laboratory	
PHYS 371	Biophysics	
PHYS 391	Research [2]	
Chemistry		
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
CHEM 180	Chemical Reactivity I	3
CHEM 181	Chemical Reactivity I Lab	1
CHEM 240	Chemical Reactivity II	3
CHEM 241	Chemical Reactivity II Laboratory	1
CHEM 260	Quantitative Methods in Chemistry	3
CHEM 261	Quantitative Methods in Chemistry Laboratory	1
Mathematics		
MATH 161	Calculus I	4

MATH 162	Calculus II	4
MATH 263	Multivariable Calculus	4
MATH 264	Ordinary Differential Equations	3
Total Hours		**67-69**

[1] Students may receive degree credit for only one of the following: BIOL 102, COMP 180, or PHYS 130.

[2] Students may only count 1 credit hour of PHYS 391 Research toward the degree.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
First Year		
Fall		
PHYS 121	College Physics I with Calculus Lecture/ Discussion	3
PHYS 111L	College Physics Laboratory I	1
MATH 161	Calculus I	4

	Total Hours	**122**

[1] Students can take MATH 264 in the spring semester of their second year, but it would be best taken before PHYS 301.

[2] PHYS 310 Optics/PHYS 310L Optics Lab can be taken in the spring of the fourth year

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Demonstrate foundational knowledge in physics and biology, and the acquisition of new knowledge via the scientific method.
- Develop a deeper understanding of the connection between the biological and the physical sciences.
- Understand and be able to employ laboratory techniques and computer skills used in biological and physical science labs.
- Possess an understanding of the intermediate level mathematics needed to model and solve problems based in the physical and biological sciences.
- Collect and analyze data to develop, refine, or falsify scientific theories.
- Learn effective and ethical methods for collaborating with others on scientific and technical projects.

Physics (BS)

The Physics major provides rigorous training in mathematics and physics with courses in statistical thermodynamics, electricity and magnetism and quantum mechanics as well as labs in optics, and electronics. Physics graduates pursue careers in industry, government labs, economics, and medicine. The program also prepares students for graduate education in physics, computer science, engineering, and law. Pre-health physics majors often receive high placement scores on the MCAT and other entrance exams.

Combined

- Physics (BS) + Engineering (BS) (p. 599)

Curriculum

The physics major includes courses in all the fundamental areas of physics at the beginning and intermediate level. Students have the opportunity to take special topics courses that provide an advanced background in specific areas of physics. The curriculum includes a strong background in mathematics, laboratory experience, and computer methods. A minimum grade of C- must be earned to satisfy a course requirement and a 2.0 minimum overall GPA is required for each major or minor. Final confirmation of degree requirements is subject to department, school, and university approval.

[1] Students can take MATH 264 in the spring semester of their second year, but it would be best taken before PHYS 301.

[2] Students can take PHYS 303 & PHYS 303L in the fall semester of their third or fourth year. Many choose to take it in the fourth year if the third year spring is already challenging.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Demonstrate foundational knowledge in the physical sciences and the acquisition of new knowledge via the scientific method
- Understand and be able to employ laboratory techniques and computer skills used in physical science labs.
- Use mathematical techniques to model physical systems and extract both quantitative and qualitative descriptions of their behavior.
- Collect and analyze data to develop, refine, or falsify scientific theories.
- Learn effective and ethical methods for collaborating with others on scientific and technical projects.

Physics (BS) + Engineering (BS)

If you are a student who recognizes the value of broadening your educational experience to include one of the fundamental sciences, as well as liberal arts and engineering, Loyola University Chicago's Dual-Degree Physics/Engineering Program may be just right for you.

Through the Physics (BS) + Engineering (BS) program, students can earn two baccalaureate degrees: a BS in Physics from Loyola and a bachelor's in Engineering from an affiliated engineering school. In this five-year program, students complete a three-year degree plan in physics at Loyola and then two years of concentrated engineering studies at the partner institution. This is an excellent route for students interested in careers in aerospace, civil, electrical, and mechanical engineering.

Related Programs

Major

- Physics (BS) (p. 598)
- Physics with Computer Science (BS) (p. 602)

Minor

- Physics Minor (p. 601)

Curriculum

The physics major includes courses in all the fundamental areas of physics at the beginning and intermediate level. The curriculum includes a strong background in mathematics, laboratory experience, and computer methods. A minimum grade of C- must be earned to satisfy a course requirement and a 2.0 minimum overall GPA is required for each major or minor. The engineering partner schools have minimum GPA requirements that must be met for acceptance into their programs. Additional coursework may be required by the engineering partner school to satisfy pre-requisites for engineering courses. Final confirmation of degree requirements is subject to department, school, and university approval.

1 PHYS 130 Introduction to Computational Physics should be substituted with COMP 170 Introduction to Object-Oriented Programming for students interested in electrical engineering or computer engineering programs.

2 ECON 202 Principles of Macroeconomics is required for students planning to apply to Columbia Engineering Program.

3 At least one semester of chemistry is generally required by engineering partner schools.

Learning Outcomes

In this program, a student can earn two baccalaureate degrees: a Bachelor of Science in Physics from Loyola University Chicago and a Bachelor in Engineering from an affiliated engineering school. Typically, three years of study in the social sciences, humanities, mathematics and physical sciences at Loyola are required, followed by two years of concentrated engineering studies at the school of engineering.

Loyola University Chicago has formal affiliations with Washington University in St. Louis, Columbia University in New York City, and with Notre Dame University in South Bend, Indiana.

Students can also choose other schools that suit their interest to complete the engineering degree. Many of our students have completed their engineering degrees at other universities such as University of Illinois Urbana-Champaign, University of Illinois at Chicago, Northwestern University, University of Michigan, and Iowa State University to complete their engineering studies.

Using as starting point the outstanding education in the Jesuit tradition offered by Loyola, which emphasizes breadth and depth of training in the liberal arts, humanities, and social sciences, upon completion of this dual degree program students will:

- Gain foundational understanding of physics, a fundamental science that has broad application in existing and emerging technologies;
- Acquire the intermediate level of mathematical tools needed to effectively address physics and engineering problems;
- Possess an understanding of the fundamental engineering fields, and the ability to apply their combined Physics/Engineering knowledge to solve real world problems in the engineering field of their choosing (mechanical, chemical, biomedical, electrical, civil industrial, computer, systems, environmental, and financial–engineering);
- Gain an understanding and appreciation of interdisciplinary approach in the physical and engineering sciences.

Physics Minor

The minor in Physics is a perfect fit for students interested in science and with aptitude in mathematics, but who do not wish to pursue a career in physics. A minor in physics gives a strong basic background in physics and mathematics that will enhance a career in other areas such as: chemistry, biology, social sciences, computational sciences, humanities, or business.

Learning Outcomes

The minor in Physics is a perfect fit for students interested in science and with aptitude in mathematics, but who do not wish to pursue a career in physics. A minor in physics gives a strong basic background in physics and mathematics that will enhance a career in other areas such as: chemistry, biology, social sciences, computational sciences, humanities, or business.

Students take the basic lecture and laboratory physics courses with the physics majors, including a participation in the Freshman Projects; they also take the basic mathematics courses.

By completing the Minor in Physics, students will:

- Acquire foundational knowledge in the physical sciences
- Possess an understanding of the basic mathematics needed to solve problems
- Acquire basic skills for analytical thinking and problem solving
- Gain an understanding and appreciation of interdisciplinary approach involving physical sciences, mathematics and other disciplines.

Physics with Computer Science (BS)

As of Fall 2026, this program is no longer accepting applicants.

Physics is understood in terms of many mathematical relationships that are much easier to state than solve, and computer science has become a major part of many physicists' work to solve enormous problems. This major is preparation for graduate study in physics, applied physics, computer science, and especially in the burgeoning research field of computational physics, as well as in many branches of engineering. Employment opportunities are in the industries of R&D and manufacturing, research and teaching in academic institutions, and research in government and private laboratories.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Interdisciplinary fields involving science and technology continuously change and present exciting challenges. If you are a student interested in these fields, then a degree in Physics with Computer Science may be just right for you.

By completing the Physics with Computer Science degree, students will:

- Demonstrate foundational knowledge in the physical sciences and the acquisition of new knowledge via the scientific method.
- Use mathematical techniques to model physical systems and extract both quantitative and qualitative descriptions of their behavior.
- Acquire specific knowledge in the computational sciences.
- Gain an understanding and appreciation of interdisciplinary approach in the physical and computational sciences.
- Learn effective and ethical methods for collaborating with others on scientific and technical projects.

Theoretical Physics and Applied Mathematics (BS)

The laws and theories of modern physics are formulated in the language of modern mathematics. In the past, students wishing to study the basic physical laws governing our universe might have gotten away with proficiency in multivariable calculus; but no longer. Since the advent of statistical mechanics, quantum mechanics, and the like, a solid foundation in analysis, abstract algebra, and statistics is also essential. Students pursuing a B.S. in Theoretical Physics and Applied Mathematics with gain exposure to these modern physical theories and to the abstract mathematics underpinning them. Graduating students will be well-prepared for advanced degrees in applied mathematics, physics, or engineering.

Learning Outcomes

Loyola University Chicago's major in Theoretical Physics / Applied Mathematics is an interdisciplinary program that provides extensive training in both physics and mathematics. It prepares students for graduate study in physics, mathematics, or applied mathematics; careers in fields such as engineering or computer science that value quantitative reasoning and mathematical modeling; or technical training in professions like medicine, dentistry, or law.

Students majoring in Theoretical Physics / Applied Mathematics possess a versatile set of skills that are well-suited to data science, numerical modeling, and quantitative analysis. They may pursue careers in higher education, at research institutes or government labs, or in high-tech industries. Recent majors have gone on to world class graduate programs in fields ranging from physics to neuroscience, and programming jobs at major tech companies.

The course of study for the Theoretical Physics / Applied Mathematics major covers the core classes in the Physics major, provides laboratory experience, and adds a comprehensive mathematics component. Upon completion of this program, students will:

- Exhibit foundational knowledge in both physics and mathematics.
- Be able to develop and interpret mathematical models that provide both quantitative and qualitative understanding of physical systems.
- Possess intermediate level laboratory skills that will serve as a foundation for more advanced training in graduate or professional school.

- Recognize how careful data collection and analysis helps develop or falsify scientific theories.
- Demonstrate effective and ethical decision-making abilities in issues related to the sciences.

Polish Studies Interdisciplinary Program

Loyola University Chicago Minor in Polish Studies is an interdisciplinary program that includes a comprehensive range of courses designed to provide students with an enriched and valuable learning experience. This minor appeals to the growing number of Loyola students who come from Polish and Eastern/Central European backgrounds, and those who are interested in studying this particular culture. The curriculum consists of courses in Polish language and literature, with additional course offerings in related history, political science, women studies, and gender studies, as well as global and international studies.

Undergraduate Programs

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Polish (POLS)

POLS 101 Polish I (3 Credit Hours)
This course focuses on introducing the student to the basics of Polish, through conversation, pronunciation and grammar. Primary emphasis is on enabling the student to speak and understand basic Polish.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to use correctly and understand the basic grammatical forms of the verbs, nouns and adjectives of Polish as an inflected language; They will be appropriately prepared to complete the full view of Polish structures in Polish

POLS 102 Polish II (3 Credit Hours)
This course focuses on introducing the student to the basics of Polish, through conversation, pronunciation and grammar. Primary emphasis is on enabling the student to speak and understand basic Polish.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to use correctly and understand the basic grammatical forms of the verbs, nouns and adjectives of Polish as an inflected language; They will be appropriately prepared to complete the full view of Polish structures in Polish

POLS 103 Polish III (3 Credit Hours)
Pre-requisites: POLS 102
This course is designed to further develop and improve student's ability to speak and read Polish, by introducing advanced grammar, vocabulary, idioms, phraseology and syntax structures.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to use correctly and understand various grammatical forms of verbs, nouns, adjectives, adverbs and numbers; They will be appropriately prepared to use Polish grammatical and stylistic structures required in POLS 104

POLS 104 Polish IV (3 Credit Hours)
Pre-requisites: POLS 103
This course focuses on improving the student's ability to communicate in Polish both oral and written. Primary emphasis is on speaking and basic writing in Polish using proper grammatical and stylistic structures.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to express themselves in spoken and written Polish with the level of fluency appropriate for POLS 250

POLS 201 Polish Medical Terminology (3 Credit Hours)
Pre-requisites: POLS 104 or equivalent
This course is designed to prepare students for medical and healthcare related professions, future physicians and nurses, healthcare administrators and health insurance specialists. We will study Polish vocabulary for anatomy and physiology, and introduced Polish terms for medical procedures and tests. We will use phraseology common for taking medical history. Students will practice using medical terminology in patient interviews, reading articles from healthcare publications as well as understanding and formulating medical instructions. In this course we will also talk about cultural issues in practicing medicine, including the cultural differences between Polish and American approach. There will be strong emphasis on speaking, listening, and reading Polish.
Outcomes:
Students will expand their Polish vocabulary, including body parts and functions, diseases and their manifestations; They will practice taking a medical history in dialogues between medical professionals and their clients as well as use medical names and description

POLS 202 Polish for Healthcare (3 Credit Hours)
Pre-requisites: POLS 104 or equivalent
This course is designed to prepare students for medical professions, future physicians, dentists, and nurses. We will practice vocabulary for anatomy and physiology, Polish terms for medical procedure and test as well as phraseology used in every day in doctor-patient communication. This course will cover medical specializations such as: pediatrician, nutritionist, internist, immunologist, neurologist, psychiatrist and surgeon. We will also talk about cultural issues in practicing medicine. There will be strong emphasis on speaking, listening, and reading Polish and using more advanced aspects of Polish grammar.
Outcomes:
Students will learn medical vocabulary, including body parts and organs, physiology and functions of various systems; They will practice taking medical history in dialogues between medical professionals and their patients, and they will write descriptions of medical conditions

POLS 250 Composition & Conversation I (3 Credit Hours)
Pre-requisites: POLS 104
This course focuses on improving and further developing student's ability to converse and write in literary Polish language. Primary emphasis is on proper grammatical and stylistic expression in Polish with extended vocabulary and phraseology.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to express themselves in spoken and written Polish by making oral presentations and writing short compositions; They will be appropriately prepared for POLS 251

POLS 251 Composition & Conversation II (3 Credit Hours)
Pre-requisites: POLS 250
This course focuses on enhancing and polishing student's ability to converse and write in contemporary Polish language. Primary emphasis is on standard, literary Polish with its grammatical, orthographical and stylistic level expected of an educated Polish speaker.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to speak fluently, make oral presentations and write essays in standard literary Polish language with fluency of an educated Polish speaker

POLS 270 Contemporary Polish Culture in the Original Language (3 Credit Hours)
Pre-requisites: POLS 104 or equivalent
We will discuss the key elements of Polish culture as it is evolving in the fast changing social, technological, and economic circumstances after the political transformation of Central Europe. Students will explore the cultural traditions and values of the pre-WWII generation and the Soviet era generation, which led many to emigrate from Poland.
Interdisciplinary Option: Polish Studies

Polish Studies (POST)

POST 199 Topics in Polish Studies: Introductory (1-6 Credit Hours)
Introduction to a specific theme in Polish Studies, e.g. Polish immigration, emergent Poland after World War II, etc.
Interdisciplinary Option: Polish Studies
Outcomes:
To gain a basic knowledge of Poland through its art, history, politics, religion, philosophy, or cinema

POST 299 Topics in Polish Studies: Intermediate Topics (1-6 Credit Hours)
Exploration of important themes in Polish Studies, such as Polish immigration, emergent Poland after World War II, etc.
Interdisciplinary Option: Polish Studies
Outcomes:
To enhance knowledge of Polish Studies through different disciplines: art, history, politics, religion, philosophy, or cinema

POST 395 Polish Studies Capstone (3 Credit Hours)
Capstone course to the POST Minor program. This is a tutorial course with a service learning component that serves an integrative purpose. In the tutorial students will focus on a specific issue or theme in POST. The syllabus will reflect the research interests of the faculty member who administers the course.
Interdisciplinary Option: Polish Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to integrate their coursework in the POST minor with their major concentration

POST 399 Topics in Polish Studies: Advanced (1-6 Credit Hours)
Intensive study of a specific theme or themes in the broad field of Polish Studies: language, art, literature & film, politics, music, and history.
Interdisciplinary Option: Polish Studies
Outcomes:
To provide an in-depth knowledge of Polish Studies

Polish Studies Minor

Loyola University Chicago Minor in Polish Studies is an interdisciplinary program that includes a comprehensive range of courses designed to provide students with an enriched and valuable learning experience. This minor appeals to the growing number of Loyola students who come from Polish and Eastern/Central European backgrounds, and those who are interested in studying this particular culture. The curriculum consists of courses in Polish language and literature, with additional course offerings in related history, political science, women studies, and gender studies, as well as global and international studies.

We look forward to seeing you in Polish Classes!

Language Requirement

A minimum of **two courses** (six credit hours) must be in the study of the Polish language. These courses may be at any level and can include: POLS 101 Polish I - POLS 102 Polish II (elementary), POLS 103 Polish III - POLS 104 Polish IV (intermediate), POLS 201 Polish Medical Terminology-POLS 202 Polish for Healthcare (medical & advanced) or POLS 250 Composition & Conversation I - POLS 251 Composition & Conversation II (advanced), as well as POLS 270 Contemporary Polish Culture in the Original Language. Students must be assessed by a Polish specialist in the Department of Modern Languages and Literatures in order to guarantee placement in the appropriate course level.

Capstone Course

Students must complete POST 395 Polish Studies Capstone, during their junior or senior year. The course complements the minor program with an integrated service-learning component. Students focus on a specific issue or theme in Polish Studies and complete a research project that integrates the minor with their major field. Additionally, the course contains a service-learning component of the student's choosing that takes place in one of institutions or organizations in Chicago's Polish American community, including the Polish Museum and Library, Consulate General of the Republic of Poland, the Kosciuszko Foundation, Chopin Theatre, Trap Door Theatre, Copernicus Center, Polish Film Festival, LIRA Ensemble, Paderewski Symphony Orchestra, Polish American Association, Polish Community-based Schools, Polish radio and television, as well as Community Health Clinics serving Polish-speaking population, and the Polish American Chamber of Commerce.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Learning Outcomes

Upon completion of the Polish Minor, students will be able to:

Political Science

About Us

Loyola University Chicago's Political Science Department offers dozens of courses each semester on various aspects of politics, including the institutions of American government; constitutional law; political systems in Africa, Asia, Europe and Latin America; foreign policy and international relations; and political theory, past and present.

The department also sponsors extensive internship experiences, making use of the extraordinary resources available in the city of Chicago and in Washington, D.C. Every member of the political science faculty teaches undergraduate courses and engages in scholarly research.

Undergraduate Programs

- Honors in Political Science (p. 617)
- Law and Politics Minor (p. 617)
- Political Science (BA) (p. 619)
- Political Science Minor (p. 621)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Political Science (PLSC)

PLSC 100 Political Theory (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
An introduction to political theory, covering the principal ideas, controversies and institutions of political society.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: ACPOL 200 / PLSC 100
Outcomes:
Students will be able to demonstrate an understanding of major approaches to the normative study of politics; to identify the assumptions underlying philosophical arguments; and to critically assess different theories of political justice

PLSC 101 American Politics (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
American national government and politics, including institutions, group and electoral processes, and public policy.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ACPOL 101 / PLSC 101
Outcomes:
Students will be able to demonstrate an understanding of the American political system, the patterns of political participation and behavior of diverse individuals and groups in American society, and evaluate the roles and processes of US political institutions

PLSC 102 International Relations in an Age of Globalization (3 Credit Hours)
Competing perspectives on international politics and global issues such as North-South relations, human rights, war and peace, population growth, and environmentalism.
Knowledge Area: Foundational Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Peace, Justice, and Conflict Studies
Course equivalencies: ACPOL 202 / PLSC 102
Outcomes:
Students will be able to demonstrate an understanding of the main approaches to the study of international politics and to analyze and assess such major substantive issues as interstate war, terrorism, arms control, international political economy, and sustainable development

PLSC 103 Comparative Politics (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
A cross-national comparison of political institutions and political behavior.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Global Studies
Outcomes:
Students will learn why political systems differ and how different political systems function and change

PLSC 123 Speak Up Democracy (0-3 Credit Hours)
"Speak Up Democracy" is a course on perennial questions about the workings of democracies. Participating students will investigate the connection between speech and political power, ruminating on whose voices are heard (and silenced) in a democracy. This summer program is animated by a central question: how should we speak to one another in a democracy? The course is open to high school students participating in the summer program.

PLSC 202 Mock Trial (3 Credit Hours)
Students will study the trial as a process for finding truth and administering justice by learning the dynamics of the trial, by developing trial strategy, by learning how to conduct and respond to direct and cross examination and by delivering effective opening and closing arguments. Mock trial is an engaged learning course. Prior Permission is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Mock trials are an activity that promotes critical thinking and reasoning; They call upon students to employ their problem-solving and public-speaking skills, and students gain knowledge of legal practices and procedures

PLSC 203 Moot Court (3 Credit Hours)
Students will study the appeal as a process for finding truth and administering justice by learning the dynamics of appellate advocacy, by developing oral argument strategies, by learning how to respond to questions posed by judges in competition, and by delivering effective summations and rebuttal arguments. Moot court is an engaged learning course.
This course satisfies the Engaged Learning requirement.
Outcomes:
Moot court competitions are an activity that promotes critical thinking and reasoning; They will enhance their ability-to-think- on-their-feet skills, their legal research skills, and their public-speaking skills; Students gain knowledge of legal argumentation and constitutional law

PLSC 204 Conflict Management (3 Credit Hours)
This course considers a variety of different approaches to international conflict management: direct bargaining, mediation, military intervention, economic sanctions, arbitration, adjudication, and peacekeeping. In addition to learning about the differences among these various conflict resolution techniques.
Interdisciplinary Option: Global Studies
Outcomes:
This course will treat state conflict as a natural phenomenon that must be understood before it can be mitigated; Doing so requires scientific investigation

PLSC 208 Representation in the United States (3 Credit Hours)
Considers what "political representation" means and how scholars study how well representation works in the contemporary United States.
Outcomes:
Understanding of concept of political representation and tools scholars use to study representation

PLSC 213 International Human Rights (3 Credit Hours)
This course focuses on the theoretical foundations of such international human rights as well as their practical implications. It discusses the roles of states, intergovernmental organizations, and nongovernmental organizations in shaping human rights norms and practices. They will also understand practical causes and consequences of human rights policies.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to identify assumptions of arguments and critically assess different theories of international human rights

PLSC 215 Politics of Marginalized Groups (3 Credit Hours)
This course focuses on the role that race, ethnicity, and marginalized status plays in American politics and public policy. It will provide a general overview of several groups, including Blacks, Latinxs, Asian and Muslim Americans, Women, LGBTQ, immigrants and refugees, indigenous peoples and other groups.
Outcomes:
Students will acquire an understanding of the historical exclusion of various groups from the political system and the resulting political participation and behavior patterns of minoritized groups in American society

PLSC 216 Political Numbers (3 Credit Hours)
This course will train participants to be critical consumers of political arguments that cite quantitative evidence. The course will take a hands-on approach where students learn how to conduct, interpret, and critique quantitative analysis using common statistical software packages.
Knowledge Area: Quantitative Knowledge
Outcomes:
Students will learn to critically engage with the numbers-based claims they encounter in the political arena and beyond; They will also learn how to conduct and present quantitative analysis

PLSC 218 African-American Politics (3 Credit Hours)
The political goals, behavior, voting patterns, group structures, values, and attitudes of various segments of the African-American population, and how these affect the political system.
Interdisciplinary Option: African Studies and the African Diaspora, Human Services, Race and Ethnicity
Course equivalencies: X-PLSC218/BWS 218
Outcomes:
Students will be able to demonstrate an understanding of the patterns of political participation and behavior of African-American individuals and groups in American society

PLSC 232 Politics of the United Kingdom (3 Credit Hours)
This course offers an introduction to politics in the United Kingdom (officially known as the United Kingdom of Great Britain and Northern Ireland, and unofficially referred to as Britain).
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to demonstrate an understanding of the structure and operation of the United Kingdom's domestic political system, as well as its relations with the rest of the world, especially the European Union

PLSC 236 Political Communication (3 Credit Hours)
The purpose of this course is to explore and examine how elected officials and institutions communicate to the public - and the role journalists and PR professionals play in the process--through readings, seminar, and practicum. The class will challenge students to grapple with questions like - What is the meaning of the "truth" in today's media environment?
Outcomes:
Students will understand how and why journalists cover what they cover, and the roles PR professionals/spin doctors attempt to shape the media narrative

PLSC 238 Political Advocacy (3 Credit Hours)
Policy-making and implementation in the United States is a complicated process. In any given year laws are passed by elected officials, decisions that guide our implementation of the law are made by government agencies, and rulings handed down by the courts shape our interpretation of those laws.
Outcomes:
Students will understand their place in the policy-making ecosystem, and the efficacy of those efforts

PLSC 251 Women in American Politics (3 Credit Hours)
This course focuses on Women and Politics in the United States. It looks at women's movements both historical and current, how women and men in the United States act differently in politics in terms of voting behavior, as political candidates, and as elected leaders. Students will gain a better understanding of the U.S. political system and how and when women are treated equally and unequally when compared with men.
Interdisciplinary Option: Women & Gender Studies

PLSC 252 Capitalism and Its Discontents (3 Credit Hours)
This course analyzes the intersection of capitalist economics and politics from a critical perspective. Capitalism and Marxism will be reviewed, followed by a critical examination of how capitalism has played out in economic/political practice in the world today. Includes discussions of many economic topics recently in the news, and the potential for change in a variety of directions. Students will learn to critically analyze the ways in which modern economics leads to less than optimal solutions, including economic inequality. They will also learn to identify other options that may lead to greater equality and economic success.
Interdisciplinary Option: Global Studies

PLSC 300 Contemporary Political Issues (3 Credit Hours)
Variable titles. Investigation of selected topics or methods in politics. This course may apply to any of the four areas of the department, and may be repeated depending on subject matter.
Outcomes:
Students will gain an in-depth knowledge of a unique topic in contemporary politics

PLSC 300A Contemporary Political Issues: American Politics (3 Credit Hours)
Investigation of selected topics or methods in American Politics. This course may be repeated depending on subject matter.

PLSC 300B Contemporary Political Issues: Political Theory (3 Credit Hours)
Investigation of selected topics or methods in Political Theory. This course may be repeated depending on subject matter.

PLSC 300C Contemporary Political Issues: Comparative Politics (3 Credit Hours)
Investigation of selected topics or methods in Comparative Politics. This course may be repeated depending on subject matter.

PLSC 300D Contemporary Political issues in International Relations (3 Credit Hours)
Investigation of selected topics or methods in International Relations. This course may be repeated depending on subject matter.

PLSC 301 Political Justice (3 Credit Hours)
A study of alternative conceptions of political justice and the attempts to institutionalize them in various political systems.
Outcomes:
Students will be required to demonstrate a mastery of competing theories about how various goods should be distributed fairly, and apply the just-war doctrine to various real-world cases; This course will help students to analyze and appraise social practices and policies that claim to be consistent with principles of justice

PLSC 302 American Political Thought (3 Credit Hours)
Major political themes from the founding era to the present.
Outcomes:
Students will learn to interpret and evaluate the assumptions and principles guiding the writings of major American political theorists, and to reflect on their significance in the evolution of American politics and society

PLSC 304 Ancient Political Thought (3 Credit Hours)
(CLST 305) A study of major political theorists from Plato to the fall of the Roman republic.
Outcomes:
Students will learn to interpret and evaluate the assumptions and principles guiding the writings of major Ancient Greek and early Roman political theorists

PLSC 306 Modern Political Thought (3 Credit Hours)
A study of major political theorists from Machiavelli to the French Revolution.
Interdisciplinary Option: European Studies
Outcomes:
Students will learn to interpret and evaluate the assumptions and principles guiding the writings of the major political theorists from Machiavelli to Rousseau

PLSC 307 Democratic Theory (3 Credit Hours)
This course examines normative arguments for and against popular rule.
Outcomes:
Students will be able to explain and assess critically arguments for and against democratic government

PLSC 308 Contemporary Political Thought (3 Credit Hours)
A study of major political theorists from the nineteenth century to the present.
Interdisciplinary Option: German Studies
Outcomes:
Students will learn to interpret and evaluate the assumptions and guiding principles of the writings of major political theorists from the nineteenth century to the present

PLSC 310B Catholic Political Thought (3 Credit Hours)
A survey of classic and contemporary political thinkers in the Roman Catholic tradition. The problems examined include religious pluralism, moral decay, natural law, distributive justice, political obligation, war, and peace.

PLSC 311 Social Science Research Practicum: Cook County Community Survey (3 Credit Hours)
Pre-requisites: PLSC 216 or equivalent
Familiarity with R, Stata, SAS, or SPSS necessary. Students will analyze this year's iteration of the annual Cook County Community Survey. They will draw on the data to prepare written, public-facing reports, public presentations, and scholarly research.
This course satisfies the Engaged Learning requirement.
Course equivalencies: PLSC 311/SOCL 311
Outcomes:
Describe the strengths and limitations of modern polling techniques; Use statistical software to analyze survey data; Communicate findings from surveys to a broad audience orally and in written form

PLSC 312 Feminist Theory (3 Credit Hours)
(WOST 318) A survey of classical and contemporary feminist political theory.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-PLSC312/WOST318/WSGS318
Outcomes:
Students will learn to interpret and evaluate the assumptions and principles guiding the writings of influential feminist political theorists and their critics, and to reflect on the significance of feminist political theory in promoting a more just society

PLSC 313 Resistance and Obligation (3 Credit Hours)
This course examines normative arguments about the source of political obligation and the right to resist government through various means, both violent and nonviolent.
Outcomes:
Students will be able to explain and assess critically various arguments about the duty to obey and the right to disobey government

PLSC 314 Liberalism (3 Credit Hours)
A survey of classical and contemporary political theorists in the liberal tradition.
Outcomes:
Students will learn to interpret and evaluate the assumptions and principles guiding the writings of major liberal political theorists and their critics, and to reflect on the significance of liberal political theory in promoting a more just society

PLSC 316 Politics of Genocide (3 Credit Hours)
This course analyzes the politics surrounding genocide, war crimes and crimes against humanity in contemporary times. The primary focus is on occurrences since the end of the Cold War, including the former Yugoslavia, Rwanda, Sudan and the Democratic Republic of the Congo.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Race and Ethnicity
Outcomes:
Students will be able to demonstrate an understanding of genocide and other massive human rights violations, along with the role of the international community in preventing future atrocities

PLSC 317 Politics of International Health (3 Credit Hours)
This course discusses political issues in the field of international health, including comparing health care systems in the industrialized world, and treatment of diseases in the developing world, particularly Africa (HIV/AIDs, TB, Malaria, etc). Students will be able to demonstrate an understanding of international health and comparative health systems.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies

PLSC 319 Women, Law & Public Policy (3 Credit Hours)
The legal arrangements and public policies that structure the relationships of women and men in American society.
Interdisciplinary Option: Human Services, Women & Gender Studies
Course equivalencies: X-PLSC319/WOST319/WSGS319
Outcomes:
Students will be able to analyze and appraise the impact of judicial decisions and public policies on women in the United States

PLSC 320 Constitutional Law-Due Process (3 Credit Hours)
The Supreme Court's role in defining substantive and procedural due process issues such as criminal procedure, individual autonomy, and economic regulation.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to demonstrate an understanding of the meaning and application of due process in American law and its impact in safeguarding individual freedoms and civil rights

PLSC 321 Constitutional Law-Powers of Government (3 Credit Hours)
The Supreme Court's role in allocating power among the three branches of the national government and between the state and federal governments.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to demonstrate an understanding of alternative judicial approaches to the separation of governmental powers

PLSC 322 Constitutional Law-Rights and Liberties (3 Credit Hours)
The Supreme Court's role in defining constitutional guarantees of equal protection and individual freedom.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to demonstrate an understanding of the meaning, protection and boundaries of civil rights and individual liberties in American law

PLSC 325 American Foreign Policy (3 Credit Hours)
(INTS 375) Origins and development of American foreign policies; the method of their formulation and conduct.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC325/INTS375
Outcomes:
Students will be able to demonstrate an understanding of the formulation, adoption and implementation of American foreign policy and its impact on domestic and international affairs

PLSC 326 American National Security (3 Credit Hours)
American national security policy, including the role of major political actors, the defense budgetary process, and the capability and effectiveness of the military.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Course equivalencies: X-PLSC326/PAX 327
Outcomes:
Students will be able to analyze and assess the formation, adoption and implementation of national security policies in the United States and their impact on domestic and international affairs

PLSC 327 Political Psychology (3 Credit Hours)
Political attitudes from a social psychological perspective with emphasis on cognitive development models.
Outcomes:
Students will be able to understand the psychological sources of political decision making

PLSC 329 Interest Group Politics (3 Credit Hours)
A study of the role of interest groups in American politics and policy.
Outcomes:
Students will be able to analyze and assess the patterns of political participation and behavior of diverse interest groups and their impact on the American political system

PLSC 330 Global Justice (3 Credit Hours)
This course explores debates about global justice such as immigration, climate change, free trade, and humanitarian interventions. Rooted in political theory, the course also includes readings from sociology, philosophy, and economics.
Interdisciplinary Option: Global Studies
Outcomes:
Students will learn to critically assess different theories of political justice and learn how to evaluate the moral and political justifications of international practices and policies

PLSC 331 Islamic Political Thought (3 Credit Hours)
An introduction to Islamic political thought, covering main ideas, questions, debates of the Islamic religio-political society, from the Qur'an to the present. Among the authors studied include al-Farabi, al-Mawardi, Ibn Khaldun, Islamic feminists, Islamic modernists, and Islamists.
Interdisciplinary Option: Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will be able to identify assumptions of arguments, critically assess different theories, and, having been familiarized with the inherent entanglement of religion and politics, will be able to identify what is specific to Islamic governance and what may be universalized

PLSC 332 Politics of American Bureaucracies (3 Credit Hours)
The political and social aspects of American bureaucracies at the local, state and national levels with emphasis on the roles of administrators and administrative institutions in the political system and policy process.
Outcomes:
Students will be able understand the role of the federal bureaucracy in the formulation, adoption and implementation of public policies, and their impact on the everyday lives of citizens

PLSC 333 Crossing Borders: The Politics of Immigration (3 Credit Hours)
This course explores immigration policies and practices around the world. The primary goal is to gain a better understanding of the choices both countries and would-be immigrants face, as well as the consequences of the laws and policies enacted to regulate the movement of people across borders.
Interdisciplinary Option: Global Studies
Outcomes:
Understand the range of motivations that cause people to migrate, the laws and policies to regulate this movement, the consequences of migration, and contribute to societal debates about migration

PLSC 334 Urban Policies and Problems (3 Credit Hours)
An analysis of selected problems confronting governments in urban America as well as the range of public policies that address urban problems. (May be repeated with different issues.)
Interdisciplinary Option: Human Services, Race and Ethnicity, Urban Studies
Outcomes:
Students will obtain in-depth knowledge of a unique topic in the area of urban policy-making

PLSC 335 Urban Semester Seminar (3 Credit Hours)
See course description for SOCL 335.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-SOCL335/PLSC335
Outcomes:
See outcome for SOCL 335

PLSC 336 Politics in Contemporary China (3 Credit Hours)
This course primarily focuses on domestic politics in post-1978 China. It introduces and examines China's key political institutions and players, various forms of political participation by political elites and ordinary citizens, and issues on governance and political reforms.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will be able to make informed use of China as a case in more general arguments and have a solid footing from which to pursue more in-depth study of particular topics in China

PLSC 337 Terrorism (3 Credit Hours)
An analysis of different types of terrorist insurgencies across the globe and of the efforts by governments to combat terrorism
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC337/INTS337/CJC337
Outcomes:
Students will be able to explain what motives the turn to terror as a method of struggle and to assess the morality and effectiveness of the counterterrorism tactics adopted by various governments

PLSC 339 Political Ideologies (3 Credit Hours)
(INTS 369) A comparative analysis of important modern political ideologies and the functions they serve in the political system. Attention will be devoted to the ideologies of non-Western regimes and movements.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC339/INTS339
Outcomes:
Students will be able to analyze and assess the role and impact of political ideologies in the foundation, development, and justification of various political regimes

PLSC 340 International Relations of Africa (3 Credit Hours)
An introduction to the international relations of the countries that comprise the African continent. The primary focus is the evolution of African international relations during the post-colonial period (c. 1960-present).
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-PLSC340/BWS 340/INTS340
Outcomes:
Students will be able to demonstrate an understanding of the nature and evolution of African international relations with the major northern industrialized democracies and various regions of the developing world

PLSC 342 African Politics (3 Credit Hours)
Forces shaping political societies south of the Sahara: the heritage of colonialism, the sociology of modernization, race related stresses, economic factors, and political movements.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Middle East and Islamic World Studies
Course equivalencies: PLSC342/BWS 342/INTS342/IWS342
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of African political systems, the patterns of political participation and behavior of diverse individuals, groups, and governments in African societies, and evaluate the roles and processes of African political institutions

PLSC 343 Latin American Politics (3 Credit Hours)
(INTS 343) (LASP 343) Historical, cultural, economic and political forces in the governments of Latin America and the Caribbean.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-PLSC343/INTS343/LASP343
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of Latin American and Caribbean political systems, the patterns of political participation and behavior of diverse individuals, groups, and governments in Latin American and Caribbean societies, and evaluate the roles and processes of Latin American and Caribbean political institutions

PLSC 346 East Asian Politics (3 Credit Hours)
(ASIA 342) (INTS 346) The social forces and structure of politics and government of East Asia.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-PLSC346/ASIA342/INTS346
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of East Asian political systems, the patterns of political participation and behavior of diverse individuals and groups in East Asian societies, and evaluate the roles and processes of East Asian political institutions

PLSC 347 The European Union (3 Credit Hours)
(INTS 381) An introduction to the European Union, a regional organization linking the nations of Europe.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Course equivalencies: X-PLSC347/INTS381
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of the European Union, the patterns of political participation and behavior of diverse individuals, groups, and governments in the European Union, and evaluate the roles and processes of the European Union's political institutions

PLSC 348 Soviet & Post-Soviet Politics (3 Credit Hours)
(INTS 382) An examination of the institutions, processes, and policies of the former Soviet Union and its successor states.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Course equivalencies: X-PLSC348/INTS382
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of the former Soviet Union, the patterns of political participation and behavior of diverse individuals and groups in the former Soviet Union, and evaluate the roles and processes of the former Soviet Union's political institutions; Students will also be able to understand the collapse of the former Soviet Union and the formation and structure of its successor states

PLSC 349 Eastern European Politics (3 Credit Hours)
(INTS 382) An examination of the institutions, processes, and policies of the former Soviet Union and its successor states.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Course equivalencies: X-PLSC349/INTS349
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of the former Soviet Union, the patterns of political participation and behavior of diverse individuals and groups in the former Soviet Union, and evaluate the roles and processes of the former Soviet Union's political institutions; Students will also be able to understand the collapse of the former Soviet Union and the formation and structure of its successor states

PLSC 350 Global Political Economy (3 Credit Hours)
An examination of the modern global economy with attention to the interrelationship between the economic and political orders.
Course equivalencies: GLST 309 / PLSC 350
Outcomes:
Students will be able to demonstrate knowledge of the global economy and the interrelationship between economic and political systems in the modern world

PLSC 353 International Law (3 Credit Hours)
(INTS 353) (PAX 353) Introduction to legal principles and procedures of recognized international law.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies, Sociolegal Studies
Course equivalencies: X-PLSC353/INTS353/PAX 353
Outcomes:
Students will be able to demonstrate an understanding of the role and impact of law and legal principles and institutions in international relations

PLSC 354 Global Environmental Politics (3 Credit Hours)
(ESP 354) (INTS 354) (PAX 354) Examines the linkages between the world's natural environment and the global political system.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
Course equivalencies: X-PLSC/ESP/INTS/PAX 354
Outcomes:
Students will be able to demonstrate an understanding of the role of various private, national and international actors in the formulation, adoption and implementation of environmental public policies

PLSC 355C Women and Politics: A Cross-National Perspective (3 Credit Hours)
This course offers a cross-national perspective of women's status in the political world, as voters, activists, and officeholders. It examines women's participation in the developed and developing world. Students will acquire knowledge of the role of women as political actors in a multitude of nations in the world.
Interdisciplinary Option: Global Studies, Women & Gender Studies
Course equivalencies: PLSC355C/WSGS355C/INTS361C

PLSC 356 Intervent in World Politics (3 Credit Hours)
(INTS 356) (PAX 356) Examines the purposeful use of political, economic, and military instruments by one country to influence the domestic or the foreign policies of another country.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
Course equivalencies: X-PLSC356/INTS356/PAX 356
Outcomes:
Students will obtain an in-depth knowledge of the historical evolution, potential constraints, and case studies of U.S. intervention in the post World-War II era

PLSC 357 Hollywood and Law (3 Credit Hours)
This course analyzes films that focus on justice, the law, and the legal system, to see what they tell us about political and legal culture, and what messages (if any) they have for contemporary politics.
Outcomes:
Student will analyze how Hollywood portrays law, policy, and major trials and court decisions as well as be able to locate and ask questions about how the depiction of law, politics, and civic responsibility have changed across time

PLSC 358 War, Peace and Politics (3 Credit Hours)
(PAX 358) The historical evolution of war, the nature of wars in the 20th century and into the 21st century, the nature of threats, sources of conflict, and procedures for peaceful resolution of disputes.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC358/INTS358/PAX 358
Outcomes:
Students will be able to demonstrate an understanding of the principal causes of wars, the means and ends of warfare, and the process and prospects of reestablishing peace

PLSC 358D The Scientific Study of War (3 Credit Hours)
This course provides an introduction to & overview of the concepts & approaches related to the causes of war, conflict, and peace in the international system. The main topics of the course are: (1) an introduction to understanding war as a social science topic, (2) the origins of the demands and disputes that can lead to war, (3) the escalation of these, (4) the expansion of war, (5) the consequences of war, and (6) the possibility of peace.
Interdisciplinary Option: Global Studies

PLSC 359 Revolutions (3 Credit Hours)
(INTS 368) A critical examination of different empirical theories of revolution. Case studies will be drawn from Europe, Asia, Africa, and the Americas.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC359/INTS384
Outcomes:
Students will be able to analyze and assess the causes, development, and consequences of modern revolutionary movements and revolutions

PLSC 360 Western European Politics (3 Credit Hours)
(INTS 360) Comparative study of the structures, processes, and functions of the parties and governments of the western powers with emphasis on the United Kingdom, France and the German Federal Republic.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: PLSC360/INTS360
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of West European political systems, the patterns of political participation and behavior of diverse individuals and groups in West European societies, and evaluate the roles and processes of West European political institutions

PLSC 362 Politics Developing Societies (3 Credit Hours)
(INTS 362) Social, economic, and ideological factors influencing political developments in emerging nations.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC362/INTS362
Outcomes:
Students will be able to demonstrate an understanding of the foundation and structure of emerging nations, the patterns of political participation and behavior of diverse individuals, groups, and governments in developing societies, and evaluate the roles and processes of political institutions in developing societies

PLSC 363 International Politics (3 Credit Hours)
This course is intended to serve as an advanced exploration of the field of international politics. Students will explore the most recent developments in international relations theory and select political developments within the international system, including the evolution of these developments in various regions of the world.
Interdisciplinary Option: Global Studies
Outcomes:
Students will hone their ability to assess/critique cutting edge theories and developments within the field of international politics

PLSC 364 UN & International Organization (3 Credit Hours)
(INTS 364) (PAX 364) An examination of the purposes, organization, background, and operations of existing international organizations.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
Course equivalencies: X-PLSC364/INTS364/PAX 364
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of various International Organizations, especially the United Nations, the patterns of political participation and behavior of individuals, private and public groups, and governments in International Organizations, and evaluate the roles and processes of International Organizations

PLSC 365 Italian Politics & Government (3 Credit Hours)
(INTS 365) (ROST 365) An examination of the institutions, processes, and practices of Italian political life. Major concern is with post-1945 Italian politics.
Interdisciplinary Option: European Studies, Global Studies, Italian Studies
Course equivalencies: X-PLSC365/INTS365/ROST365
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of Italy's contemporary political system, the patterns of political participation and behavior of diverse individuals and groups in Italian society, and evaluate the roles and processes of Italian political institutions

PLSC 366 Dictatorship (3 Credit Hours)
This comparative politics course examines the origins, dynamics, and contradictions of various nondemocratic forms of government, including military and party dictatorships.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC366/INTS366
Outcomes:
Students will be able to explain why authoritarian systems rise and fall and how politics in these systems compares to the political process in democratic states

PLSC 367 Model United Nations (3 Credit Hours)
Introduction to the operations and practices of United Nations, including training for student participation in the Model U.N. program. Students taking PLSC 367 Model UN class and act as leaders of the team that represents Loyola at the New York conference. Prior permission required to enroll.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-PLSC367/INTS367/PAX 367
Outcomes:
Students will demonstrate an understanding of the formation and structure of the United Nations; Understanding in enhanced by the practical experience gained by participating in Loyola's Model UN program

PLSC 368 Politics of the Middle East (3 Credit Hours)
This course will draw upon the theoretical insights of comparative politics to examine politics in the Middle East and North Africa. The seminar focuses on issues that are important for understanding the contemporary politics of the region, from the persistence of authoritarianism, petropolitics, political Islam, Arab-Israeli conflict, and the rise of ISIS to ethnic divisions, gender relations, and social movements.
Interdisciplinary Option: Arabic Language and Culture, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-PLSC368/INTS391/IWS368

PLSC 369 Politics of Energy (3 Credit Hours)
The course will discuss how the challenges of climate change, energy security, and poverty alleviation are being tackled by politicians and the public. It will also assess the degree to which changes in energy resources bring changes in economic, political, and social power.
Interdisciplinary Option: Global Studies
Outcomes:
Students will gain a firm understanding of the various global and regional trends that are shaping 21st Century foreign policy behavior generally, and energy diplomacy specifically

PLSC 370 Fieldwork in Political Science-Internship (1-6 Credit Hours)
Practical experience in political and governmental agencies and organizations in Chicago and Washington, D.C.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students learn about different forms of public service and the ethical responsibilities of civic engagement; Working in a professional office for fifteen weeks allows students to experience the world of public service first-hand; Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 371 Roman Law (3 Credit Hours)
(CLST 362) An introduction to the general principles and basic concepts of Roman civil law with emphasis upon the Late Republican-Early Imperial period.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST362/PLSC371/ROST362
Outcomes:
Students will be able to demonstrate an understanding of the assumptions and principles guiding the formulation and implementation of Roman civil law

PLSC 372 Crime, Race & Violence (3 Credit Hours)
This course discusses the political aspects that affect crime and violence in the United states, with a special focus on questions of race.
Interdisciplinary Option: African Studies and the African Diaspora, Human Services, Peace, Justice, and Conflict Studies, Psychology of Crime and Justice, Sociolegal Studies, Urban Studies
Course equivalencies: X-CJC/BWS/AFR/PLSC372/PAX373

PLSC 373 Politics and Literature (3 Credit Hours)
Literature as a medium of political analysis and political criticism. The literary tradition examined may vary, and the course may be repeated for credit, depending on the subject matter.
Outcomes:
Students will learn to interpret and evaluate the political assumptions and principles underlying the writings of major literary figures, and to reflect on the role and significance of literature in promoting a more just society

PLSC 374 Democracy (3 Credit Hours)
A critical examination of the theory and practice of democratic government. The subfield to which this course belongs varies depending on its content.
Outcomes:
Students will be able to analyze and assess the theoretical arguments for and against democracy, and to demonstrate an understanding of the various institutional arrangements of democratic government

PLSC 376 Political Behavior and Public Opinion (3 Credit Hours)
This course will cover a range of topics pertaining to public opinion and political behavior in the United States. Topics will include how public opinion is measured, research on the factors that shape public attitudes about political matters, and work that examines who participates in politics and why.
Outcomes:
Students will learn about substantive scholarly findings on these topics, as well as the methodologies researchers use to answer questions about public opinion and political participation

PLSC 377 American Public Policies (3 Credit Hours)
Public policy-making at the national and state government levels; includes social, economic, fiscal, judicial, and moral policies.
Course equivalencies: PLSC377 / PLSC205
Outcomes:
Students will obtain in-depth knowledge of a unique topic in the area of American public policy adoption and implementation

PLSC 379 The Legislative Process (3 Credit Hours)
Legislative campaigns and elections, the formal procedures of law making, the influence of political parties and interest groups, and the interaction with the president, the judiciary, and the bureaucracy.
Course equivalencies: PLSC379 / PLSC210
Outcomes:
Students will be able to analyze and assess the role and processes of the US Congress in the deliberation and formulation of domestic policies and their impact on the everyday lives of citizens

PLSC 380 Public Policy Analysis (3 Credit Hours)
The course offers a broad approach to the study of public policy.

PLSC 381 The American Presidency (3 Credit Hours)
The powers, roles, and responsibilities of the presidential office with special attention to political leadership, the bureaucracy, and political parties.
Course equivalencies: PLSC381 / PLSC211
Outcomes:
Students will be able to analyze and assess the role and impact of the U.S. presidency on domestic policy and foreign affairs

PLSC 384 The Judicial Process (3 Credit Hours)
The judicial process in the American court system from the Supreme Court to local trial courts, civil and criminal procedure, appellate court decision-making, and the impact of judicial policies on American politics and society.
Interdisciplinary Option: Sociolegal Studies
Course equivalencies: PLSC384 / PLSC212
Outcomes:
Students will be able analyze and assess the role and impact of the U.S. court system on the protection of individual freedoms and civil rights

PLSC 385 Introduction to Law (3 Credit Hours)
The nature of law in society, including the constitutional origins and institutional structure of legal systems, the practices of the legal profession, and the substance of selected areas of case law.
Interdisciplinary Option: Sociolegal Studies
Course equivalencies: CRMJ375/PLSC385/PLSC214
Outcomes:
Students will be able to understand the role of law and the legal system in American politics and its impact on the everyday lives of citizens

PLSC 386 Campaigns and Elections (3 Credit Hours)
The organization, functions, and behavior of political parties and elections in the United States.
Course equivalencies: PLSC386 / PLSC217
Outcomes:
Students will be able to analyze and evaluate the role and impact of political parties and elections on the American political system

PLSC 387 Politics and the Press (3 Credit Hours)
A study of the dynamics between politics and the press, including its impact on campaigns, elections, and public policy.
Course equivalencies: X-PLSC387/CMUN340
Outcomes:
Students will be able to analyze and assess the role and impact of the press on the American politics

PLSC 388 The Morality and Legality of War (3 Credit Hours)
Competing perspectives on the moral, legal, and practical challenges of military force as a tool of foreign policy, especially focused on the complexity of using force to pursue humanitarian goals.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate an understanding of just war theory, international humanitarian law, and major theories of humanitarianism, to analyze the stakes and trade-offs involved in decisions about war and peace, and to critically engage with contemporary foreign policy events

PLSC 389 State Politics (3 Credit Hours)
A comparative study of the composition and powers of state governments.
Course equivalencies: PLSC389 / PLSC221
Outcomes:
Students will be able to demonstrate an understanding of state governments, the patterns of political participation and behavior of diverse individuals and groups in state politics, and evaluate the roles and processes of state political institutions

PLSC 390 Urban Politics (3 Credit Hours)
Political processes in cities and other local governments, Examination of mayors, city councils, bureaucrats, and their interaction with local citizens and interest groups.
Interdisciplinary Option: Human Services, Race and Ethnicity, Urban Studies
Course equivalencies: PLSC390 / PLSC222
Outcomes:
Students will be able to demonstrate an understanding of urban governments, the patterns of political participation and behavior of diverse individuals and groups in urban politics, and evaluate the roles and processes of urban political institutions

PLSC 391 Chicago Politics (3 Credit Hours)
The political groups in Chicago, their political power and impact on city politics and policy. Attention will be given to the powers and roles of city council and the mayor's office.
Interdisciplinary Option: Human Services, Italian American Studies
Course equivalencies: PLSC391 / PLSC224
Outcomes:
Students will be able to demonstrate an understanding of Chicago government, the patterns of political participation and behavior of diverse individuals and groups in Chicago politics, and evaluate the roles and processes of Chicago's political institutions

PLSC 392 Environmental Politics (3 Credit Hours)
The issues, significant actors, and public policies relating to the environment. (ESP 235) (PAX 235)
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: PLSC392/PLSC/ESP/PAX235
Outcomes:
Students will be able to analyze and assess the role of various actors in the formulation, adoption and implementation of environmental public policies, and their impact on the everyday lives of citizens

PLSC 395 Political Science Honors Seminar (3 Credit Hours)
Variable titles. Investigation of selected topics or methods in Political Science.
Outcomes:
Students will gain an in-depth knowledge of a unique topic or method in Political Science

PLSC 396 Directed Readings (1-3 Credit Hours)
Opportunity for an unusually accomplished student to pursue a discrete area of knowledge in political studies in a format designed to stimulate highly productive effort.
Outcomes:
Students will hone research and writing skills in close collaboration with a faculty sponsor

PLSC 397 Urban Studies Research (3 Credit Hours)
The course allows students to engage in research-related projects related to urban studies.
Interdisciplinary Option: Urban Studies
Course equivalencies: X-PLSC397/URB397

PLSC 398 Washington DC Internship Seminar (3 Credit Hours)
This course requires you to combine your academic interests and your internship, allowing you to reflect on and think deeply about the relationship between your internship, experience and academic learning. This course will also explore political Washington.
Outcomes:
This course will clarify students' career goals, and demonstrate how these goals can be enhanced by their academic work

PLSC 399 Tunisia On-Site: Arab Spring, Democratic Change, Islam (3 Credit Hours)
A combination of site visits, lectures, and group discussions throughout Tunisia provides a unique experiential understanding of the relationship between the Arab spring, democratic change, Islam, gender relations, and U.S. foreign policy amidst the historical inheritances of the Carthaginian, Roman, Islamic, and French empires in North Africa.
Interdisciplinary Option: African Studies and the African Diaspora, Arabic Language and Culture, Global Studies, Middle East and Islamic World Studies, Women & Gender Studies
Course equivalencies: X-PLSC 399/HIST 313T
Outcomes:
Experientially based knowledge of the politics, society, culture, history, and international relations of a country (Tunisia) in a region (North Africa) at the intersection of Africa and the Middle East

Honors in Political Science

Qualified political science majors may graduate with honors in political science. This program honors students who achieve academic excellence in their studies and who successfully complete additional training in a special topics research seminar (PLSC 395 Political Science Honors Seminar). This course is offered each spring and students may enroll in it in their junior or senior year. Admission requires a 3.7 GPA overall and in political science. Applications are emailed to all PLSC majors in early-/mid-October. Admitted students may register for PLSC 395 Political Science Honors Seminar in the spring semester of their junior or senior year provided they have successfully completed seven political science classes (21 credit hours). The Honors Seminar will not count toward the 33 credit hours required for a political science major or as one of the required subfield courses.

Law and Politics Minor

The Minor in Law and Politics features courses meant to serve students who are interested in the intersection of Political Science, law, and legal institutions. Students are required to take an Introductory Political Science course and the Introduction to Law course. After that students take at least one course in the three fields of: American Law, International Law, and an experiential learning course related to the legal field.

For inquiries, please contact Professor Amanda Savage (abryan2@luc.edu), director of the Minor in Law and Politics.

PLSC 371	Roman Law	
PLSC 388	The Morality and Legality of War	
(3) Law-related Engaged Learning Course		
PLSC 202	Mock Trial	
PLSC 203	Moot Court	
PLSC 369	Politics of Energy	
Select one more upper-division course from one of the three (3) focus areas.		3
Total Hours		**18**

[1] This course is not a prerequisite and can be completed at any time.

Special Note for Political Science Majors: Students majoring political science may double-count the introductory (PLSC 100 Political Theory, PLSC 101 American Politics, PLSC 102 International Relations in an Age of Globalization, or PLSC 103 Comparative Politics) course from their political science major. However, the rest of the credit requirements for a Law and Politics minor are in addition to the requirements of a Political Science major.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Sophomore		
Fall

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Acquire a foundational understanding of the interactions between law and politic and be able to demonstrate a complex understanding of the political and legal processes and their impact on societies and individuals.
- By taking at least one course focusing on legal and political aspects of the American system, students will learn and demonstrate an understanding of differences of class, gender, and race in our legal and political system, with a view to fashioning a more humane and just society.
- By taking at least one course focusing on political and legal interactions in other nations, students will be expected to demonstrate an awareness that human values and behavior, ideas of justice, and methods of interpretation are influenced by culture and time.
- Through engaged learning courses, students will integrate learning through reflection, connecting and synthesizing disciplinary

knowledge and out of classroom experiences to generate new understanding.

The program has a strong emphasis on engaged learning. This will allow students not just to read about legal and political causes and effects on the way societies function, but also to experience firsthand the intricacies of such interactions. Consequently, upon completion of the program, students are expected to develop a better understanding of themselves and their role in society and the world, beyond their aforementioned demonstrated social understanding.

Political Science (BA)

The Political Science major encompasses four subfields: political theory, international relations, comparative politics, and American politics. The major allows students flexibility to explore their interests by taking a variety of classes across subfields or to dive deeper into one or two subfields that interest them. Students can also participate in our robust internship programs both in Chicago and in Washington, DC.

One (1) course in American Politics Subfield (p. 619)		3
One (1) course in Political Theory Subfield (p. 620)		3
One (1) course in Comparative Politics Subfield (p. 620)		3
One (1) course in International Relations Subfield (p. 620)		3
Four (4) PLSC Electives		*12*
Total Hours		**33**

[1] If students take PLSC 100, 101, or 102 as the three required courses for the major, they can also take PLSC 103 and have it count as an elective in the major. Students admitted to the Accelerated Master's Pathway (AMP) program leading to the MA in Political Science may take up to four 400-level PLSC courses from among the list on the MA page (p. 1251). These courses may be counted as PLSC electives in the PLSC-BA (but not BA Requirement courses or BA Subfield Requirement courses), or they may count as general electives toward the minimum of 120 credit hours required to complete a Bachelor's degree, outside the student's Bachelor's program.

Curricular Notes

- The Political Science internship program (PLSC 370), a 3- or 6-credit hour course, counts as one of the four Political Science electives. Only 3 credits of PLSC 370 may count toward the PLSC major, the other three will be counted as general electives. An exception is made for students who complete an internship in Chicago as well as an internship via the Washington, DC program. In that case, 3 credit hours from each internship may be applied to the major.
- The following courses do not fulfill subfield requirements but do count as electives toward the PLSC major: PLSC 396 Directed Readings and PLSC 216 Political Numbers (PLSC 216 also fulfills the core quantitative reasoning requirement.)
- The following courses neither fulfill subfield requirements nor count as electives toward the PLSC major: PLSC 395 Political Science Honors Seminar. This is an extra course that students take beyond the major requirements in order to graduate with Honors in Political Science.

Subfield Courses

American Politics

Code	Title	Hours
PLSC 202	Mock Trial [1]	3
PLSC 203	Moot Court [1]	3
PLSC 208	Representation in the United States	3
PLSC 215	Politics of Marginalized Groups	3
PLSC 218	African-American Politics	3
PLSC 236	Political Communication	3
PLSC 238	Political Advocacy	3
PLSC 251	Women in American Politics	3
PLSC 300A	Contemporary Political Issues: American Politics	3
PLSC 319	Women, Law & Public Policy	3
PLSC 320	Constitutional Law-Due Process	3
PLSC 321	Constitutional Law-Powers of Government	3
PLSC 322	Constitutional Law-Rights and Liberties	3
PLSC 326	American National Security	3
PLSC 327	Political Psychology	3
PLSC 329	Interest Group Politics	3
PLSC 332	Politics of American Bureaucracies	3
PLSC 334	Urban Policies and Problems	3
PLSC 335	Urban Semester Seminar	3
PLSC 357	Hollywood and Law	3
PLSC 372	Crime, Race & Violence	3
PLSC 376	Political Behavior and Public Opinion	3
PLSC 377	American Public Policies	3
PLSC 379	The Legislative Process	3
PLSC 380	Public Policy Analysis	3
PLSC 381	The American Presidency	3
PLSC 384	The Judicial Process	3
PLSC 385	Introduction to Law	3
PLSC 386	Campaigns and Elections	3
PLSC 387	Politics and the Press	3
PLSC 389	State Politics	3
PLSC 390	Urban Politics	3
PLSC 391	Chicago Politics	3

PLSC 392	Environmental Politics	3
PLSC 398	Washington DC Internship Seminar [2]	3

[1] This course is Engaged Learning.
[2] This course is Writing Intensive.

Political Theory

Code	Title	Hours
PLSC 300B	Contemporary Political Issues: Political Theory	3
PLSC 301	Political Justice	3
PLSC 302	American Political Thought	3
PLSC 304	Ancient Political Thought	3
PLSC 306	Modern Political Thought	3
PLSC 307	Democratic Theory	3
PLSC 308	Contemporary Political Thought	3
PLSC 310B	Catholic Political Thought	3
PLSC 312	Feminist Theory	3
PLSC 313	Resistance and Obligation	3
PLSC 314	Liberalism	3
PLSC 330	Global Justice	3
PLSC 331	Islamic Political Thought	3
PLSC 339	Political Ideologies	3
PLSC 371	Roman Law	3
PLSC 373	Politics and Literature	3
PLSC 388	The Morality and Legality of War	3

Comparative Politics

Code	Title	Hours
PLSC 232	Politics of the United Kingdom	3
PLSC 300C	Contemporary Political Issues: Comparative Politics	3
PLSC 336	Politics in Contemporary China	3
PLSC 337	Terrorism	3
PLSC 339	Political Ideologies	3
PLSC 342	African Politics	3
PLSC 343	Latin American Politics	3
PLSC 346	East Asian Politics	3
PLSC 347	The European Union	3
PLSC 348	Soviet & Post-Soviet Politics	3
PLSC 349	Eastern European Politics	3
PLSC 355C	Women and Politics: A Cross-National Perspective	3
PLSC 359	Revolutions	3
PLSC 360	Western European Politics	3
PLSC 362	Politics Developing Societies	3
PLSC 365	Italian Politics & Government	3
PLSC 366	Dictatorship	3
PLSC 368	Politics of the Middle East	3
PLSC 374	Democracy	3
GLST 303	Technological Change and Society	3

International Relations

Code	Title	Hours
PLSC 204	Conflict Management	3
PLSC 213	International Human Rights	3
PLSC 252	Capitalism and Its Discontents	3
PLSC 300D	Contemporary Political issues in International Relations	3
PLSC 316	Politics of Genocide	3
PLSC 317	Politics of International Health	3
PLSC 325	American Foreign Policy	3
PLSC 333	Crossing Borders: The Politics of Immigration	3
PLSC 340	International Relations of Africa	3
PLSC 350	Global Political Economy	3
PLSC 353	International Law	3
PLSC 354	Global Environmental Politics	3
PLSC 356	Intervent in World Politics	3
PLSC 358	War, Peace and Politics	3
PLSC 358D	The Scientific Study of War	3
PLSC 363	International Politics	3
PLSC 364	UN & International Organization	3
PLSC 367	Model United Nations [1]	3
PLSC 369	Politics of Energy	3
GLST 302	States and Firms	3
GLST 305	Globalization and Environmental Sustainability	3

[1] This course is Engaged Learning.

Suggested Sequence of Courses

Students can begin the Political Science (BA) degree at any point in their undergraduate studies, in consultation with their advisor. While there is no set sequence of classes, students are encouraged to take introductory classes (PLSC 100, PLSC 101, PLSC 102, and PLSC 103) before taking upper division classes in those subfields. For example, although it is not required, students may benefit from taking PLSC 101 American Politics before taking an upper division class on Campaigns and Elections in the United States. Once students have declared the major, they are encouraged to contact the Political Science Department's Undergraduate Program Director for further guidance on how best to progress with their studies.

Transferring Credit

At least 17 credit hours of PLSC courses must be completed at Loyola.

Double Dipping Policy

Political Science adheres to the CAS Double Dipping Policy (p. 54).

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN

program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

The BA in Political Science is designed to achieve the following learning outcomes:

- Demonstrate an understanding of the structures and functions of political systems.
- Be able to apply political theories and concepts when interpreting past and current events.
- Recognize the influence of cultural, social, and historical contexts on political behavior, values, institutions, or policies.
- Characterize the roots of enduring social disagreements and conflicts.
- Evaluate normative or empirical claims about political phenomena.
- Demonstrate an ability to communicate effectively about complex political issues.
- Develop research skills to gather, evaluate, and synthesize information from multiple sources to support arguments or theories in political science.

Political Science Minor

The Political Science minor invites students to learn about four subfields: political theory, international relations, comparative politics, and American politics. Students have the flexibility to explore their interests by taking a variety of classes across subfields or to dive deeper into one or two subfields that interest them. Students can also participate in our robust internship programs both in Chicago and in Washington, DC.

Related Programs

Major

- Political Science (BA) (p. 619)

Minor

- Law and Politics Minor (p. 617)

Curriculum

To graduate with a minor in Political Science, students must complete 18 hours of course work (6 courses) in the department or through transfer or advanced placement credit.

Code	Title	Hours
Required Courses		
Select two of the following:		6
PLSC 100	Political Theory	
PLSC 101	American Politics	
PLSC 102	International Relations in an Age of Globalization	
PLSC 103	Comparative Politics	
Select four additional PLSC courses, either introductory or upper-level classes, regardless of the subfield.		12
Total Hours		**18**

Suggested Sequence of Courses

Students can begin the Political Science minor at any point in their undergraduate studies, in consultation with their advisor. While there is no set sequence of classes, students are encouraged to take introductory classes (PLSC 100, PLSC 101, PLSC 102, and PLSC 103) before taking upper division classes in those subfields. For example, although it is not required, students may benefit from taking PLSC 101 American Politics before taking an upper division class on Campaigns and Elections in the United States. Once students have declared their minor, they are encouraged to contact the Political Science Department's Undergraduate Program Director for further guidance on how best to progress with their studies.

Learning Outcomes

The Minor in Political Science is designed to achieve the following learning outcomes:

- Demonstrate an understanding of the structures and functions of political systems.
- Be able to apply political theories and concepts when interpreting past and current events.
- Recognize the influence of cultural, social, and historical contexts on political behavior, values, institutions, or policies.
- Characterize the roots of enduring social disagreements and conflicts.
- Evaluate normative or empirical claims about political phenomena.
- Demonstrate an ability to communicate effectively about complex political issues.
- Develop research skills to gather, evaluate, and synthesize information from multiple sources to support arguments or theories in political science.

Psychology

Career Opportunities

After completing their undergraduate degrees, psychology graduates typically earn graduate or professional degrees or pursue employment. Graduate studies include specializations within the field in clinical, cognitive, industrial, social, educational, counseling, or developmental psychology. Employment in psychology-related professional positions include alcohol/drug counselor, child-care worker, geriatric counselor, hospital ombudsman, management trainee, market researcher, mental health specialist, human resources professional, sales representative, and teacher. For more details on the types of careers graduate pursue and details on how to pursue them please visit our Psychology Career Finder (https://www.luc.edu/psychology/resources/psychologycareerfinder/).

Prospective Students

If you are interested in learning more about undergraduate studies in the Loyola University Chicago Department of Psychology, please request additional information about Loyola and our program using the Undergraduate Request Form (https://uao.luc.edu/register/?id=09e1ac8b-c620-43cc-afe7-325cad54eec2).

Undergraduate Programs

- Honors in Psychology (p. 629)
- Psychology (BS) (p. 629)
- Psychology Minor (p. 632)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Psychology (PSYC)

PSYC 100 Psychological Perspectives on the Experience of Globalization (3 Credit Hours)
Globalization from a psychological perspective. Applying core psychological concepts, research and theory to cross-cultural issues of behavior and development. Topics may include human rights of children, human trafficking, immigration, moral issues of international trade, parenting across cultures.
Outcomes:
Students will learn basic concepts and theories and apply them to real-world globalization problems

PSYC 101 General Psychology (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
Introduction to concepts, theories, and methods in psychology. Emphasis is given to the scientific study of consciousness and human behavior. Topics include: human development, learning, thinking, perception, personality, testing, mental illness and mental health, biological and social aspects of behavior.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Course equivalencies: ACPSY 201 / PSYC 101
Outcomes:
Students will master basic concepts and key theories and learn to apply them to real-world situations

PSYC 201 Psychology Advising and Career Development (1 Credit Hour)
Pre-requisites: PSYC 101, PSYC-BS major
Overview of the psychology major at Loyola and career options in psychology. Introduces students to psychology career development resources. Students will also prepare for opportunities in independent research and internships and plan for a career including creating a resume and CV.
Outcomes:
Students will learn about career options in psychology and plan their psychology major to support and develop their career interests

PSYC 225 Psychology of Peace (3 Credit Hours)
Application of psychological theories, concepts, and research to issues of peace and conflict. Areas covered include international conflicts and international peacebuilding (including war, terrorism, and global environmental issues) as well as interpersonal conflicts and conflict resolution (including crime, family violence, and conflict arising from prejudice and perceived threat). Classic theories of peace are also analyzed and connected to psychological theory and research.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Course equivalencies: PSYC 225/PAX225

PSYC 235 Psychology of Human Sexuality (3 Credit Hours)
Pre-requisites: PSYC 101
This course will explore sexuality as a multi-faceted and diverse phenomenon structured by individual experience, interpersonal relationships, and societal institutions. Topics include anatomy and physiology, intersectionality, power and privilege, sexual diversity, attraction and love, relationships, and sexual health education.
Interdisciplinary Option: Bioethics, Human Services, Women & Gender Studies
Outcomes:
Students will demonstrate an understanding of the biological, psychological and socio-cultural aspects of human sexuality, along with gender and sexual diversity

PSYC 237 Cross-Cultural Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Students will learn about cultural factors that influence cognition, perception, emotion, behavior, motivation, and mental health. Similarities and difference in both explicit and implicit cultural factors will be emphasized. Students will explore their identities, values, and biases. Students will engage in reflection to increase cultural awareness and sensitivity towards others.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of concepts and research methodologies in cross-cultural psychology; Students will develop critical thinking skills, as well as increased cultural awareness and sensitivity towards others

PSYC 238 Psychology of Gender (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course reviews psychological research and theory concerning gender and sex from a biopsychosocial perspective. Course material emphasizes how gender as an identity, social role, and system of power affects nearly every aspect of our lives.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Bioethics, Human Services, Women & Gender Studies
Outcomes:
Students will learn about the diversity of gender within and across cultures, gender socialization and its effects, the role of gender inequality in multiple contexts, and how gender intersects with other identities

PSYC 239 Understanding Bias and Inclusivity (3 Credit Hours)
Using an intersectional lens, students learn about how privilege, power, and oppression shape ourselves, perceptions of others, and our social world. They consider how ourselves and others are shaped by and operate within the larger social system. Students explore their identities, values, and biases. Students engage in self-reflection to increase self-awareness. Articulate how personal power can be used to create change.
Interdisciplinary Option: Race and Ethnicity, Women & Gender Studies
Course equivalencies: X - PSYC 239/ SOCL 239
Outcomes:
Identify feelings about course topics; Demonstrate self-awareness of identities and values, including the value of difference; Engage in intergroup dialogue

PSYC 240 Psychology-Biology of Perception (3 Credit Hours)
Pre-requisites: For Biology majors: BIOL 102, BIOL 112, and PSYC 101; For all others: PSYC 101
Introduction to the study of sensory systems, especially vision and audition, emphasizing historical development of the field, multi-disciplinary scientific approaches, recent research and theory on the mechanisms of seeing and hearing, and applications of research to real-world problems.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will understand and be able to explain how knowledge of the functioning of sensory systems is obtained using a variety of experimental methods, how stimulus energy is translated into neural signals, how the brain processes sensory information, and how these processes determine conscious perception

PSYC 250 Cognitive Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Overview of cognitive psychology. Topics include: human information processing, object recognition, memory, attention, language production and comprehension, reasoning and problem solving.
Outcomes:
Students will understand and be able to explain how knowledge about mental events is obtained using a variety of experimental methods, discuss current empirical research and theories of cognition, understand well established cognitive theories about attention, memory, language processing, reasoning and decision-making

PSYC 251 Learning and Memory (3 Credit Hours)
Pre-requisites: Grade of C- or better in PSYC 101 and NEUR 101
This course surveys the field of learning and memory, including working, episodic, and semantic memory, nonassociative learning, classical and operant conditioning, skill learning, and neuroplasticity. Behavioral, neuroscientific, and clinical perspectives will be considered.
Interdisciplinary Option: Neuroscience

PSYC 273 Developmental Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Survey of theory and research relevant to human growth and development with emphasis on physical, cognitive, and social development from infancy through adolescence.
Interdisciplinary Option: Human Services
Course equivalencies: X-CPSY273/PSYC273
Outcomes:
Students will demonstrate understanding of basic theory and research in human development, and will develop skills in critical examination of psychological research as applied to current issues in human development

PSYC 274 Lifespan Development (3 Credit Hours)
Pre-requisites: PSYC 101
This course provides a survey of current theory, research, and applications on development (physical, cognitive, and social/emotional development) that are present at each stage of the lifespan. Normal development is emphasized; however, special human circumstances are also explored.
Outcomes:
Students will demonstrate an understanding of theory and research in development across the lifespan; Students will develop critical thinking skills, applying research to contemporary issues in lifespan development

PSYC 275 Social Psychology (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
Introduction to the field of social psychology; including topics such as social cognition, impression formation, social influence, attitude formation and change, stereotyping and prejudice, aggression, pro-social behavior, and group behavior.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Course equivalencies: ACPSY 275 / PSYC 275
Outcomes:
Students will demonstrate the ability to think critically about fundamental theoretical approaches within social psychology, scientific methods of hypothesis testing, and potential applications of social psychology that address real-world problems

PSYC 276 Philosophy of Mind (3 Credit Hours)
Pre-requisites: PHIL 130
This course is a study of the different philosophical views regarding the nature and the existence of the mind and its relation to material bodies. Students will be able to demonstrate understanding of the various philosophical views and problems regarding the mind and its relation to matter.
Course equivalencies: X-PSYC 276/ PHIL 276/PHIL 176

PSYC 277 Environmental Psychology (3 Credit Hours)
Human behavior is at the root of environmental degradation. This course examines how psychological processes influence behaviors that help or hurt the environment and how psychology can promote conservation. The course identifies theory-based interventions and evaluates their effectiveness. Class activities allow students to practice applying psychology to promote environmental sustainability.
Outcomes:
Students will be able to identify the psychological bases of environmental problems; Students will be introduced to theories and practical strategies to change behavior as it relates to environmental issues

PSYC 280 Psychology of Judgment and Decision-Making (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions; Students can only take one course from PHIL 279, PSYC 279, PSYC 280
This course examines the forces that shape decision-making, from the individual and day-to-day to the shaping of public policy. Psychological research on cognitive biases, economic models, and philosophical perspectives on deductive reasoning and what makes a good decision will be discussed.
Knowledge Area: Tier 2 Philosophical Knowledge
Outcomes:
Students will learn fundamental principles and theories - including various biases and decision-making errors, and learn to apply the course to improve thinking, problem-solving, and decisions

PSYC 302 History & Systems in Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
A systematic treatment of the historical roots and foundation of psychology. Special emphasis is placed on relating past trends to current developments in the field.
Outcomes:
Students will demonstrate knowledge of the foundations of psychology as a science, including major schools and theoretical frameworks, and make connections between past trends and current approaches

PSYC 304 Statistics (3 Credit Hours)
Pre-requisites: PSYC 101
This course is an introduction to fundamentals of statistical analysis in psychology.
Interdisciplinary Option: Human Services
Outcomes:
Students will demonstrate the ability to analyze data, interpret the results of research using basic statistical methods, and understand the conceptual foundation, appropriate use, and limitations of these statistical methods

PSYC 306 Research Methods in Psychology (3 Credit Hours)
Pre-requisites: PSYC 304 or STAT 335
Logic and theory of the scientific method. Basic principles of scientific research methodologies employed in approaching major problem areas in psychology. This class is writing intensive.
Interdisciplinary Option: Human Services, Neuroscience, Urban Studies
Outcomes:
Students will demonstrate knowledge and skills necessary to: formulate research questions and hypotheses, develop research designs, operationalize variables, and gather data in an ethical manner; choose appropriate statistical methods for analyzing data and interpret results of statistical analyses; write a scientific paper in APA style; and critically evaluate research

PSYC 307 Psychology of Language (3 Credit Hours)
Pre-requisites: PSYC 101
Analysis of language as symbol-behavior specific to humans, language structure and competence, language performance, and the neurophysiological basis of language. Methods for investigating language processing, acquisition, bilingualism, and language disorders will be considered.
Outcomes:
Students will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of language

PSYC 310 Lab in Program Evaluation (3 Credit Hours)
Pre-requisites: PSYC 306; PSYC 275 is also recommended
Special attention is given to the fundamental skills needed to evaluate human service programs including research methodology and research diplomacy. The strengths and weaknesses of several evaluation strategies will be discussed in terms of scientific validity, ethical constraints, and political acceptability.
Outcomes:
Students apply their developing evaluation skills in a class project and present the data in a written report

PSYC 311 Lab in Psychobiology (3 Credit Hours)
Pre-requisites: For Psychology BS and Cognitive & Behavioral Neuroscience majors: PSYC 306 and (NEUR 101, PSYC 240, or PSYC 382) with minimum grades of C-; For all others: (STAT 335 or PSYC 304) and (NEUR 101, PSYC 240, or PSYC 382) with minimum grades of C-
Introduction to the structures and functions of vertebrate nervous systems and how these systems compute and process information. Laboratory experience with concepts and methods in the neurophysiological study of the bases of perception and other behaviors. Hearing is used as an example.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will learn the concepts of basic neurophysiology and the theory of signal detectability and have experience applying the logic and formulation of neurophysiological theories of perception

PSYC 312 Lab in Cognitive Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 306 and PSYC 382
This course is a laboratory practicum in the techniques of cognitive neuroscience, with an emphasis on electrophysiological and hemodynamic methods of measuring nervous system function during cognitive and behavioral tasks and the effects of noninvasive brain stimulation.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will develop scientific research skills as they relate to the field of cognitive neuroscience, including experimental design, physiological methods of data collection, statistical analysis and interpretation, and reporting findings

PSYC 313 Lab in Behavioral Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 306 and either PSYC 251 or PSYC 382
Provides an understanding of the structure and function of the brain as it relates to behavior through empirical data collection and analyses. Course objectives will be met through demonstrations, hands-on laboratory experience with different behavioral assays, histology, an evaluation of scientific literature, and scientific communication via poster presentations.
Outcomes:
Develop a breadth of neuroscientific knowledge and skills involving critical thinking, research ethics, experimental design, animal behavior, data collection and analysis, and dissemination of scientific findings in different formats

PSYC 314 Lab in Experimental Psychology: Cognition (3 Credit Hours)
Pre-requisites: PSYC 306 (C-) and (C- in PSYC 250, PSYC 251, PSCY 307, or PSYC 382)
Laboratory demonstrations, experiments, and microcomputer applications in the area of human cognition. Topics vary, but include learning, memory, thinking and language processing.
Interdisciplinary Option: Neuroscience
Outcomes:
Students gain skills and experience in experimental design, measurement, statistical analyses, and report writing as they relate to research on human cognition

PSYC 315 Lab in Tests & Measurements (3 Credit Hours)
Pre-requisites: PSYC 306 and either PSYC 331 or PSYC 346
Topics include: theory of psychological testing and assessment; historical context and related legal and ethical considerations; basics of test construction and evaluation, including reliability, validity, and standardization; and common measures of personality, attitudes, and ability and their psychometric properties. PSYC 338 is recommended.
Outcomes:
Students will learn to demonstrate proficiency with psychological testing terminology and concepts

PSYC 316 Lab in Experimental Psychology: Sense & Perception (3 Credit Hours)
Pre-requisites: PSYC 306, NEUR 101 (formerly PSYC/BIOL 202) or PSYC 240
Laboratory demonstrations, experiments, and microcomputer applications to the psychophysical and physiological study of sensory systems. The course stresses the research methods and quantitative measures that are used in characterizing sensory processes, especially visual and auditory systems.
Interdisciplinary Option: Neuroscience
Outcomes:
Students gain skills and experience in experimental design, measurement, statistical analyses, and report writing as they relate to research in sensory processes

PSYC 318 Lab in Developmental Psychology (3 Credit Hours)
Pre-requisites: C- or better in PSYC 306 and either PSYC 273 or PSYC 274
Lecture and laboratory on empirical studies of developmental processes in humans. Focus is on research in particular content areas within developmental stages (e.g., infancy, childhood, adolescence, adulthood) and research on changes in behavior across time.
Outcomes:
Students will demonstrate skills and knowledge of developmental methodology, designing, conducting, and analyzing and interpreting the results of a research project, and writing a research paper in APA format

PSYC 321 Laboratory-Social Psychology (3 Credit Hours)
Pre-requisites: PSYC 275 and 306
Lectures, demonstrations, readings, and individual or group research projects illustrating various methods, such as observation, interviewing, archives, standardized tests, and experimentation, are used to learn about topics such as group influences on the individual, attitudes, prosocial and antisocial behavior, and perception of self and others.
Outcomes:
Students will demonstrate skills and knowledge of methodology in social psychological research; designing, conducting, and analyzing and interpreting the results of a research project, and writing a research paper in APA format

PSYC 327 Lab on Body Image (3 Credit Hours)
Pre-requisites: C- or better in PSYC 306 and either PSYC 275 or PSYC 338
Lab on Body Image focuses on the scholarly study of body image and eating disorders, as well as how research is conducted in the field. Students will complete smaller labs and a larger research project in the field.
Outcomes:
1) Learn about the scholarly study of body image and eating disorders; 2) Learn general research methods in Psychology and specific ones pertaining to the topic; 3) Learn about computer packages, including SPSS to analyze data

PSYC 331 Psychopathology (3 Credit Hours)
Pre-requisites: PSYC 101
Nature and causes of maladjustment and mental disorders. History of mental illness, diagnosis, research, and treatment of mental disorders.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Course equivalencies: X-CPSY333/PSYC331/ACPSY280
Outcomes:
Students will demonstrate understanding of current approaches to researching maladaptive behavior, current views of maladaptive behavior, major categories of "mental disorders", factors contributing to development of problems, different types of intervention strategies, and appreciation of social, ethical, and legal issues

PSYC 332 Affective Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 101 or NEUR 101 (formerly PSYC/BIOL 202)
Affective experiences promote human adaptability and survival, and healthy emotion function is critical to promoting physical and psychological well being. The course will provide an overview of fundamental neurobiological correlates associated with emotion function and processing affective stimuli.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms

PSYC 338 Psychology of Personality (3 Credit Hours)
Pre-requisites: PSYC 101 Facts and principles of personality study
Nature of personality, its structure, development, expression, and measurement. Exposition and evaluation of personality study methods with critical review of traditional and modern theories of personality.
Interdisciplinary Option: Psychology of Crime and Justice
Course equivalencies: X-CPSY338/PSYC338
Outcomes:
Students will acquire an understanding of different personality theories, critically evaluate these theories, and apply what they have learned

PSYC 340 Psychology of Women (3 Credit Hours)
Pre-requisites: PSYC 101
Review of psychological aspects of women's experiences. Topics include psychological aspects of biological events such as menarche, pregnancy, menopause; aspects of women's work and family roles; and mental health issues relevant to women.
Interdisciplinary Option: Human Services, Women & Gender Studies
Course equivalencies: PSYC340/WOST340/WSGS340
Outcomes:
Students will demonstrate knowledge of critical contemporary issues impacting women and girls, and critically evaluate/analyze academic theory, social institutions, and media

PSYC 346 Psychopathology of Childhood (3 Credit Hours)
Pre-requisites: PSYC 273
Consideration of the nature and causes of maladjustment, emotional disorders, and learning disabilities in children in conjunction with approaches to prevention and remediation.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Outcomes:
Students will demonstrate knowledge of the major categories of childhood psychopathology and methods of diagnosis, theories of causes of maladjustment and mental illness in children and adolescents, and types of intervention strategies

PSYC 348 Psychology of Adolescence (3 Credit Hours)
Pre-requisites: PSYC 273
In-depth study of adolescence using an interdisciplinary approach. Integration of cultural, social, psychological, and biological perspectives.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Outcomes:
Students will appreciate the various factors leading to similarities and differences in the experience of adolescence in America and in other cultures, and will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of adolescence

PSYC 349 Maturity and Aging (3 Credit Hours)
Pre-requisites: PSYC 273 or PSYC 274 with a C- or better
Overview of theory and research relevant to middle age and aging. Topics include personality, cognitive and social functioning as well as biological functioning. Applications to life situations such as living arrangements, provision of health services, and retirement are discussed.
Interdisciplinary Option: Bioethics, Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of maturity and aging, and learn to recognize and reject myths and stereotypes associated with adult development and aging

PSYC 350 Developmental Cognitive Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 101, NEUR 101 (formerly PSYC/BIOL 202)
An overview of theory and research relevant to the study of the developing child through the use of neuroscience methods; topics may include: brain plasticity and maturation, sensorimotor systems, attention, memory, executive function, language, social cognition, and typical and atypical development.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will gain knowledge of basic theory and research in the field of developmental cognitive neuroscience and will acquire understanding of brain and behavior relationships in a developmental context

PSYC 352 Neuropsychology (3 Credit Hours)
Pre-requisites: PSYC 101 and NEUR 101
Neuropsychology is the interdisciplinary study of the relation between human brain function and behavior. This course is an undergraduate survey of topics related to neuropsychology, including neuroanatomy, psychophysiology, and cognitive neuroscience. A primary goal of the course is to introduce undergraduate students to neuropsychological concepts in research and applied settings.
Interdisciplinary Option: Neuroscience
Outcomes:
Successful completion of this course leads to mastery of CNS function and structure; The ability to integrate this information will allow students to develop and test hypotheses about brain-behavior relationships

PSYC 353 Applied Social Psychology (3 Credit Hours)
Pre-requisites: PSYC 275
Applications of principles and methods of social psychology to social issues and problems in such areas as: law and justice, health and health care, education, natural and built environments, population, work, life and intergroup relations.
Outcomes:
Students will demonstrate the ability to apply knowledge of major theories, research methodologies, and empirical knowledge in social psychology to real-world issues and problems

PSYC 355 Neuroethics (3 Credit Hours)
Pre-requisites: students must have taken at least two philosophy courses
This course focuses on ethical considerations emerging from contemporary research in neuroscience, as well as neuroscientific techniques for studying ethical questions. Students will be able to demonstrate understanding of the ways in which the study of ethics and neuroscience inform each other
Interdisciplinary Option: Bioethics
Course equivalencies: X - PSYC355/PHIL355

PSYC 356 Consumer Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Introduction to the field of consumer psychology; including topics such as consumer attitude formation and change, persuasive communication and consumer behavior, the psychology of advertising, consumer decision making, personality and consumer behavior, identity and consumer behavior, and culture and consumer behavior.
Outcomes:
Students will understand and apply theoretical approaches within consumer psychology and the psychology of advertising

PSYC 360 Understanding Prejudice (3 Credit Hours)
Pre-requisites: PSYC 101
Prejudice from a psychological perspective. Applying psychological concepts, research, and theory to understand the origins and consequences of prejudice as well as potential remedies.
Interdisciplinary Option: African Studies and the African Diaspora, Psychology of Crime and Justice, Race and Ethnicity, Women & Gender Studies
Course equivalencies: BWS360/WSGS360
Outcomes:
Students will learn the origins of stereotypes and prejudice, the nature of prejudice against different social groups, how people are affected by prejudice and cope with prejudice, and the processes that may change stereotypes, reduce prejudice, and improve intergroup relations

PSYC 362 Industrial/Organizational Psychology (3 Credit Hours)
Pre-requisites: C- or better in PSYC 101 Outcomes: Students will demonstrate understanding and ability to think critically about how the science of behavior is applied to work environments
Study of human behavior in work settings. Topics include principles of employee selection, job analysis, motivation and morale, managerial behavior, organization development and socialization, leadership, conflict management, work design and group process.
Course equivalencies: PSYC362 / PSYC364

PSYC 368 Counseling (3 Credit Hours)
Pre-requisites: PSYC 101; PSYC 331 or 338 is also recommended
Introduction to the theory, techniques, and research behind major helping interventions, focusing on individual psychotherapy with adults.
Interdisciplinary Option: Human Services
Outcomes:
Students will critically evaluate different approaches to intervention in terms of their theoretical underpinnings, applications, goals and effectiveness, and will develop the ability to utilize some basic counseling skills

PSYC 369 Psychology Honors Readings (3 Credit Hours)
Pre-requisites: Membership in the Psychology Honors award program and approval of the Department Honors Advisor
Directed readings and development of a formal research proposal on a topic of interest to the student and the faculty member with whom he/she has chosen to work. Students are not restricted to working with the faculty member whose name is listed in the schedule of classes.
Outcomes:
Students will write a literature review and research proposal for the honors thesis

PSYC 370 Psychology Honors Research (3 Credit Hours)
Pre-requisites: PSYC 369
Students carry out the research proposed in PSYC 369 and prepare a formal report constituting the honors thesis. Approval of the thesis by the honors committee earns the psychology honors award. PSYC 370 is a capstone course.
This course satisfies the Engaged Learning requirement.
Course equivalencies: PSYC370H / PSYC370
Outcomes:
Students will conduct research, analyze and interpret data, and write a thesis

PSYC 371 Psychology of Political Behavior (3 Credit Hours)
Examination of the determinants of political judgments and decision; including topics such as voting preference, stereotypes and political thinking, racism and political behavior, ideology and public opinion, the effect of the media on political thought.
Outcomes:
Understanding of core theoretical and methodological approaches commonly applied to the study of political psychology

PSYC 372 Psychology & Law (3 Credit Hours)
Pre-requisites: PSYC 101
Introduction to the areas of overlap between psychology and the law. Topics include roles of psychologists in legal settings, accuracy of eyewitness testimony, jury processes, accuracy of polygraph examinations, and issues surrounding the insanity defense.
Interdisciplinary Option: Psychology of Crime and Justice, Sociolegal Studies
Course equivalencies: X- CJC 377 / PSYC 372
Outcomes:
Students will learn to analyze biases in the U.S. jury system, elucidate the weaknesses of eyewitness testimony, outline the issues in the insanity defense, understand the issues in Rape Trauma Syndrome and Battered Spouse Syndrome, understand the methods and effects of scientific jury selection, understand the complex issues surrounding confessions, and view the US justice system in a social justice context

PSYC 373 Health Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Survey of psychological and behavioral influences on how people stay healthy, why they become ill, and how they respond when they do become ill. Topics include: health behavior and primary prevention, stress and coping, patient-physician interaction, and management of chronic illness.
Interdisciplinary Option: Bioethics, Human Services
Outcomes:
Students will demonstrate an understanding of the complex interaction of an individual's psychology and physical health, as well as understanding of different intervention and prevention programs, the structure of the health care system, and the various roles psychologists play in this system

PSYC 374 Community Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Prevention of mental disorder and promotion of well-being, primarily through creating more mentally healthy environments, but also by enhancing individual resilience. Recognizing the toxicity of psychosocial stressors such as inequality, poverty, alienation, and discrimination, community psychologists also fight for social justice through empowerment of oppressed groups and policy advocacy. Understanding of the methods of community psychology; effects of societal, cultural, and environmental influences on psychological and community well-being.
Interdisciplinary Option: Human Services, Neuroscience

PSYC 375 Psychology of Addiction (3 Credit Hours)
Pre-requisites: PSYC 101
Survey of historical, demographical, and statistical aspects of substance abuse. Abuse of alcohol and drugs, as well as eating disorders, may be considered. A variety of theoretical models and interventions are discussed.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Students will demonstrate understanding of the psychopharmacological effects of various substances, major research findings in the area of substance abuse, and prevention and intervention techniques

PSYC 376 Psychology of Religion (3 Credit Hours)
Introduction to the major issues, theories and empirical approaches in the psychology of religion; effect of religion on beliefs, motivations, emotions and behaviors.
Outcomes:
Understanding of the relationship between religion and psychological variables (eg, adjustment, prejudice, and prosocial behavior)

PSYC 377 Psychology of Music (3 Credit Hours)
Pre-requisites: PSYC 101
Engagement in musical activities is common across all human cultures. This course will introduce students to the interdisciplinary field of psychology of music and will focus on how humans perceive and are affected by music, how we create music, and how music is integrated into human life.
Outcomes:
Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms

PSYC 378 Drugs and Behavior (3 Credit Hours)
Pre-requisites: NEUR 101
This course will introduce students to neuropsychopharmacology. Acute and long term effects of addictive drugs and drugs used to treat psychiatric disorders on neural function and behavior are discussed by integrating human and preclinical animal studies. Major types of drugs of abuse, antidepressants, antipsychotics, and anxiolytics will be discussed.
Outcomes:
Knowledge of the mechanisms of action of drugs, including illicit drugs and drugs used to treat psychiatric disorders

PSYC 381 Advanced Statistical Analysis-Computer:Social Science (3 Credit Hours)
Pre-requisites: PSYC 304 or SOCL 301
Expanded treatment of topics covered in PSYC 304 with emphasis on using standard computer analysis packages (SPSS).
Outcomes:
Students will demonstrate the ability to discuss theoretical assumptions of various statistical techniques, choose the appropriate statistical test in a variety of situations, use SPSS to enter data and perform a statistical analysis, and interpret the results of statistical analyses

PSYC 382 Behavorial and Cognitive Neuroscience (3 Credit Hours)
Pre-requisites: For BIOL-BS, BIOL-MINR, and BIOE-BS students: BIOL 102 and NEUR 101; For all others: NEUR 101
Overview of topics and methodologies used in behavioral and cognitive neuroscience including: attention, learning and memory, language, reasoning, decision making, intelligence, emotions, social cognition, and consciousness.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will understand theories regarding brain mechanisms, underlying mental events and the technologies used for studying these mechanisms

PSYC 383 Methods in Computational Neuroscience (3 Credit Hours)
Pre-requisites: NEUR 101; (MATH 131 or MATH 161); and (COMP 150, COMP 170, COMP 180, or DSCI 101) This course introduces the methods necessary to work with computational models of neural processing in the brain
These methods include differential equations for neuroscience, Simulink programming, linear algebra for neural networks, MATLAB coding, and probability theory for neuroscience. For each method, classes will include lectures, and computer exercises or illustrations.
Interdisciplinary Option: Neuroscience
Course equivalencies: X - COMP 386/PSYC 383
Outcomes:
Appreciation of the mathematical and computational techniques used to understand the brain, specially differential equations to model neurons, linear algebra used for neural networks, and probability theory capturing brain performance

PSYC 384 Computational Modeling of the Brain (3 Credit Hours)
Pre-requisites: PSYC 383/COMP 386 or instructor permission This course uses a mix of lectures and computer labs to introduce computational models of the neural processing in the brain
These models capture single neurons and synapses, biological neural networks, and high-level computational theory. Each class will cover the models with lectures and computer labs, the latter using MATLAB and Simulink.
Interdisciplinary Option: Neuroscience
Course equivalencies: X - COMP 389/PSYC 384
Outcomes:
Appreciation that brain function cannot be understood without proper mathematical and computational frameworks, and ability to apply these frameworks adeptly in the various domains of neuroscience from neurons to cognition

PSYC 385 Practicum in Peace Activism (3 Credit Hours)
Students will learn how to recognize and navigate the psychological pitfalls that accompany work as a peace activist. Topics include building programs, recruiting volunteers, managing media messages, avoiding burnout, handling conflict within organizations, and securing funding for peace activities. Psychological constructs and theories such as group dynamics, perceived control, learned helplessness, attitude change, and altruism will be used to increase understanding of processes related to peace activism.
Course equivalencies: PSYC385/PAX385

PSYC 386 Psychology Seminar: Selected Topics (3 Credit Hours)
Pre-requisites: PSYC 101
An upper-level, intensive seminar on selected aspects of psychology.
Outcomes:
Students will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the selected topic

PSYC 387 Seminar in Behavorial and Cognitive Neurosciences (3 Credit Hours)
Pre-requisites: NEUR 101 (formerly PSYC/BIOL 202); PSYC 382/BIOL 284, limited to NRCB-BS seniors
Lecture/discussions will focus on issues central to behavioral neuroscience, emphasizing human and animal mental processes and neural information processing mechanisms. Students will read primary research papers and practice analytical skills in class discussion and presentations. Presentations and exams will promote critical thinking and a general understanding of current issues in behavioral and cognitive neurosciences.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will become familiar with principles of cognitive and behavioral approaches to the study of the neural bases of behavior; Students will also learn how to critically read primary research papers and present these papers to the class

PSYC 390 Internship in Psychology (3 Credit Hours)
Pre-requisites: PSYC 304 and approval via an internship application due on the 5th Friday of the previous semester
Capstone service-learning experience for psychology majors, involving application and development of psychological knowledge and skills through an internship (100 hours) in a human service organization or applied research setting, combined with regular class meetings, reading and writing assignments. Students arrange placements and complete a project on site. Application details may be found here: https://luc.edu/psychology/undergraduate/internshipinpsychology. Practical, pre-professional job skills, critical analysis and connection between theory and practice, on topics of: human service agency operation; effective working relationships; professional communication; cultural competence; values and ethics.
This course satisfies the Engaged Learning requirement.

PSYC 396 Teaching Internship in Psychology (3 Credit Hours)
Pre-requisites: Junior or Senior standing; Department consent required
This course provides undergraduate students serving as teaching assistants in psychology academic structure and guided reflection. Through readings, discussions, and reflective assignments, students will develop skills in supporting student learning and managing classroom responsibilities. The course complements practical work as teaching assistants in psychology courses, integrating theory and practice.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate understanding of how students learn and how to facilitate effective classroom engagement; Connect teaching experiences to psychological and educational theory; Develop transferable professional skills such as leadership and organization

PSYC 397 Independent Research (3 Credit Hours)
Pre-requisites: PSYC 306 and approval of internship coordinator
Limited to psychology majors with senior standing. Capstone opportunity to conduct research under the guidance of a psychology faculty member. Only one of PSYC 397 and 399 may count toward the psychology major.
Interdisciplinary Option: Neuroscience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain experience in all aspects of psychological research, including literature review, formulating hypotheses, designing and conducting research, analyzing data and interpreting results, communicating the results of research in written reports

PSYC 399 Special Studies in Psychology (1-3 Credit Hours)
Pre-requisites: permission of instructor and department
Opportunity for individual reading or research in a specialized area not otherwise covered by the Department's course offerings. Only one of PSYC 397 and 399 may count toward the psychology major.
Outcomes:
Students will gain experience (eg, integrating research results from various sources, conducting research) working directly with a faculty member on a current topic in psychology

Honors in Psychology

The Psychology Honors Program is a program for outstanding students in which each student spends a minimum of two semesters working on a research project with a Psychology professor. The end result of that collaboration is an honors thesis, an activity in which the student completes an individual research project under the guidance of his/her professor.

In the first semester, the student registers for PSYC 369 Psychology Honors Readings. In this semester, the student does background reading in his/her subject of interest, meets periodically with his/her professor, and by the end of the semester has collaboratively designed an original research project with the professor and obtained IRB approval for the project.

In the second semester, the student registers for PSYC 370 Psychology Honors Research. In this semester, the student carries out the research project, collecting and analyzing data, writing up the results, submitting an honors thesis, and presenting the results of their project at a poster session at the end of the semester. On occasion, an honors theses has been presented at a professional meeting and/or published in a professional journal. All of these activities are completed with close guidance from and in collaboration with the student's thesis director.

Advantages

Graduate schools and potential employers look very favorably at research experience, particularly if that research experience is of such merit that it leads to a professional presentation or publication. In addition, students who complete the honors thesis are presented at the annual department awards ceremony. Further, it is indicated on the students' transcripts that they have been awarded Psychology Honors. Perhaps most importantly, students get to pull together much of what they have learned as a Psychology major in an integrative, capstone experience. In this experience, the student moves into a research colleague relationship with an experienced researcher and gets a real taste of what it is to be a research psychologist. This course sequence also satisfies the university's engaged learning requirement.

Requirements

To receive the psychology honors award, students must fulfill three requirements. Honors students must:

- Maintain a 3.5 cumulative GPA
- Receive grades of "B" or better in PSYC 369 Psychology Honors Readings / PSYC 370 Psychology Honors Research
- Complete 13 Psychology courses, including PSYC 369 Psychology Honors Readings / PSYC 370 Psychology Honors Research
- Submit an Honors Thesis

Interdisciplinary Honors Program

You do not have to be in the University's Interdisciplinary Honors Program (https://www.luc.edu/honors/) to participate in the psychology honors program, and if you are in the Interdisciplinary Honors Program (https://www.luc.edu/honors/), you are not required to participate in the psychology honors program.

Eligibility

To be eligible for the Psychology Honors Program, you must:

- Be a declared Psychology major (or co-major)
- Have an overall GPA of 3.5 or better
- Have taken the following Psychology courses (or their equivalents if you are a transfer student): Identify a faculty member in the department who agrees to supervise your honors work (the honors director can help you identify such a person)
  - PSYC 101 General Psychology
  - PSYC 304 Statistics
  - PSYC 306 Research Methods in Psychology
  - One Psychology laboratory course (recommended, but not mandatory)
- Formally apply for acceptance in the Psychology Honors Program
- Have at least two more semesters of course work to complete at Loyola before graduation

Application Procedures

The application process is simple. Just submit a letter indicating your interest in applying along with a copy of your transcript to:

Dr. Jeffrey Huntsinger
jhuntsinger@luc.edu
Honors Director
Psychology Department

In the letter, indicate which faculty member has agreed to direct your honors thesis. If you don't know who to approach to be your thesis director, please consult the faculty research profiles (https://www.luc.edu/psychology/people/facultyandstaffdirectory/) or description of research labs (https://www.luc.edu/psychology/research/researchlaboratories/).

Application during your junior year is strongly preferred. This way, students will start the honors thesis during Spring Semester of their junior year, and complete the honors thesis by the end of of their senior year. This gives the student more time to get their research reviewed by the Loyola Institutional Review Board (which must approve research with human participants.)

Contact Us

For more information about the psychology honors program, please contact Dr. Jeff Huntsinger, Honors Director, at jhuntsinger@luc.edu

Psychology (BS)

Loyola offers the Bachelor of Science in Psychology which provides students with a broad-based introduction to the science of psychology as well as opportunities to learn how psychology is applied to solving individual and social problems. Students may also want to consider pairing the Psychology BS with the Neuroscience major to focus on the

biological aspects of psychology or the 5-year BSW/MSW program in Social Work if they are interested in a career in Mental Health Therapy.

Related Programs

Major

- Applied Psychology (BA) (p. 879)

Doctoral

- Clinical Psychology (PhD) (p. 1264)
- Counseling Psychology (PhD) (p. 1327)

Minor

- Psychology Minor (p. 632)

Curriculum

A total of 14 psychology courses plus two ancillary quantitative courses are required. Psychology Honors requires 15 courses including PSYC 369 / PSYC 370, plus two ancillary quantitative courses.

Code	Title	Hours
Required Psychology Courses		
PSYC 101	General Psychology	3
PSYC 201	Psychology Advising and Career Development	1
PSYC 304	Statistics	3
or STAT 335	Introduction to Biostatistics	
PSYC 306	Research Methods in Psychology	3
Diversity and Inclusion Requirement Course		**3**
Choose one of the following:		
PSYC 235	Psychology of Human Sexuality	
PSYC 237	Cross-Cultural Psychology	
PSYC 238	Psychology of Gender	
PSYC 239	Understanding Bias and Inclusivity	
PSYC 360	Understanding Prejudice	
PSYC 374	Community Psychology	
Biological Pillar		**3**
Choose one of the following:		
NEUR 101	Introduction to Neuroscience	
PSYC 240	Psychology-Biology of Perception	
Cognitive Pillar		**3**
Choose one of the following:		
PSYC 250	Cognitive Psychology	
PSYC 251	Learning and Memory	
PSYC 307	Psychology of Language	
PSYC 382	Behavorial and Cognitive Neuroscience	
Developmental Pillar		**3**
Choose one of the following:		
PSYC 273	Developmental Psychology	
PSYC 274	Lifespan Development	
Mental Health Pillar		**3**
Choose one of the following:		
PSYC 331	Psychopathology	
PSYC 346	Psychopathology of Childhood	
Social Pillar		**3**
PSYC 275	Social Psychology	
Advanced Lab		**3**
Choose one of the following:		
PSYC 311	Lab in Psychobiology	
PSYC 312	Lab in Cognitive Neuroscience	
PSYC 313	Lab in Behavioral Neuroscience	
PSYC 314	Lab in Experimental Psychology: Cognition	
PSYC 315	Lab in Tests & Measurements	
PSYC 316	Lab in Experimental Psychology: Sense & Perception	
PSYC 318	Lab in Developmental Psychology	
PSYC 321	Laboratory-Social Psychology	
PSYC 327	Lab on Body Image	
Two (2) Electives (p. 630)		**6**
Select one of the following:		**3**
PSYC 390	Internship in Psychology (Capstone)	
PSYC 396	Teaching Internship in Psychology (Capstone)	
PSYC 397	Independent Research (Capstone)	
PSYC 370	Psychology Honors Research (Capstone)	
2nd Advanced Lab Course		
Ancillary Quantitative Requirement		
Select two of the following:		6-8
COMP 125	Visual Information Processing	
COMP 150	Introduction to Computing	
COMP 170	Introduction to Object-Oriented Programming	
COMP 180	Computing and Data Analysis for the Sciences	
DSCI 101	Fundamentals of Modern Data Science with R	
MATH 108	Real World Modeling with Mathematics	
MATH 110	Business Precalculus	
MATH 117	Precalculus I	
MATH 118	Precalculus II	
MATH 130	Business Calculus	
MATH 131	Applied Calculus I	
MATH 132	Applied Calculus II	
MATH 161	Calculus I	
MATH 162	Calculus II	
MATH 215	Object-Oriented Programming with Mathematics	
STAT 103	Fundamentals of Statistics	
Total Hours		**46**

List of Elective Courses

Code	Title	Hours
PSYC 276	Philosophy of Mind	3
PSYC 280	Psychology of Judgment and Decision-Making	3
PSYC 332	Affective Neuroscience	3
PSYC 340	Psychology of Women	3
PSYC 348	Psychology of Adolescence	3
PSYC 350	Developmental Cognitive Neuroscience	3
PSYC 352	Neuropsychology	3
PSYC 355	Neuroethics	3
PSYC 362	Industrial/Organizational Psychology	3
PSYC 368	Counseling	3
PSYC 371	Psychology of Political Behavior	3

PSYC 372	Psychology & Law	3
PSYC 373	Health Psychology	3
PSYC 375	Psychology of Addiction	3
PSYC 376	Psychology of Religion	3
PSYC 377	Psychology of Music	3
PSYC 378	Drugs and Behavior	3
PSYC 386	Psychology Seminar: Selected Topics	3
PSYC 383 / COMP 386	Methods in Computational Neuroscience	3
PSYC 384 / COMP 389	Computational Modeling of the Brain	3
PSYC 387	Seminar in Behavorial and Cognitive Neurosciences	3
PSYC 399	Special Studies in Psychology	1-3

Independent Study Opportunities

Loyola's psychology department offers countless opportunities for undergraduates to participate in research under the supervision of faculty members—an experience that is highly valued by employers and graduate schools. More information on Research in the department can be found under the Research Tab of the Psychology Department Website. Students can earn course credit for this research experience through independent studies and research courses, PSYC 397 and PSYC 399. Qualified students may also plan and conduct psychological research by enrolling in the two-course honors sequence (PSYC 369 and PSYC 370). PSYC 397 and PSYC 370 count towards the Loyola's engaged learning requirement, while PSYC 399 does not. More information on Independent Study courses in Psychology are available on the Independent Research webpage or by clicking the hyperlinks for the individual courses above.

Internship in Psychology

PSYC 390 is an intensive, work/academic experience that combines 100 hours (minimum) of supervised work at a psychology-related job site, arranged by the student prior to the start of the semester. PSYC 390 class meetings include class discussions and activities, reading and writing assignments, and an independent project. This is a unique and time-intensive opportunity that allows students to learn how psychology is applied in real-world settings. The course is open to psychology juniors and seniors. Students interested in the program should learn more by visiting the Internship in Psychology Webpage (https://www.luc.edu/psychology/undergraduate/internshipinpsychology/). Questions about the program should be addressed to the internship coordinator (psyc-internship@luc.edu). *Admission to the internship course is by application only. Applications are due midway through the* ***semester before*** *the internship is to be taken.*

Suggested Sequence of Courses

Recommended Sequence of Psychology Courses

Students should take PSYC 101 General Psychology and PSYC 201 Psychology Advising and Career Development their first year. Students should then take their Knowledge Pillar courses. It is recommended that students complete at least one of their Ancillary Quantitative Courses prior to beginning the PSYC 304 Statistics-PSYC 306 Research Methods in Psychology sequence. Note that PSYC 304 Statistics is a prerequisite for PSYC 306 Research Methods in Psychology. No other statistics course (including STAT 103 Fundamentals of Statistics) or a statistics course from another Loyola department can serve as a prerequisite for PSYC 306 if you are a Psychology Major. Students may not take PSYC 304 Statistics and PSYC 306 Research Methods in Psychology at the same time. Electives may be any 200 or 300 level psychology courses or NEUR 101 Introduction to Neuroscience. PSYC 306 Research Methods in Psychology and their specified Knowledge Pillar courses serve as prerequisites for advanced lab courses.

Recommended Sequence of Math Courses

Students should discuss the Ancillary Quantitative Requirement with their Psychology Faculty advisor as early as possible after declaring the major. It is expected that students will have completed at least one, and preferably both courses *before* beginning the PSYC 304 Statistics-PSYC 306 Research Methods in Psychology sequence. Thus, students should plan to take these courses during their first two years. Assuming a strong background in math, a computer science course is strongly recommended to prepare students for future academic and non-academic careers.

Advising for Psychology Majors

Students must take PSYC 101 General Psychology, PSYC 201 Psychology Advising and Career Development, PSYC 304 Statistics, PSYC 306 Research Methods in Psychology, one course for the Diversity and Inclusion Requirement, one course for each of the five Knowledge Pillars, one Advanced Lab Course, and one capstone course (or a 2nd Advanced Lab Course). Students graduating with Psychology Honors must take PSYC 369 Psychology Honors Readings / PSYC 370 Psychology Honors Research as their Capstone. Remaining courses may be any psychology course except PSYC 100 Psychological Perspectives on the Experience of Globalization.

When planning your course schedule with your Psychology Department Faculty Advisor, please consult the Psychology Major Checklist (https://www.luc.edu/psychology/undergraduate/psychologymajorafterjuly2021/). The Psychology Course Matrix (https://www.luc.edu/psychology/undergraduate/psychologymajorafterjuly2021/) may also be of use in planning your course schedule. You can also view Psychology Course Descriptions (p. 2569) or look at many past Psychology Course Syllabi (https://www.luc.edu/psychology/undergraduate/psychologymajorafterjuly2021/).

Psychology Majors should complete PSYC 201 Psychology Advising and Career Development as soon after taking PSYC 101 General Psychology as possible. During that course you will receive a Psychology Faculty Advisor, but if you want to be assigned an advisor before you take the class please fill out this form (https://docs.google.com/forms/d/e/1FAIpQLSf5acxsvrb0-QmprGP6r075_pb4OgXyQOBiloV3wLqL4szsMg/viewform/). It is your responsibility to contact your advisor. Before meeting with your Advisor please take time to review the requirements found on this page and the Psychology Career Finder (https://www.luc.edu/psychology/resources/psychologycareerfinder/). More information on student advising at Loyola maybe found by visiting the Advising Webpage (https://www.luc.edu/psychology/undergraduate/advising/).

Co-Majoring

Psychology majors are to abide by Academic Council's double dipping policy (p. 54) which instructs that not more than three courses offered by one department may count towards two different majors. There are two notable exceptions for the Psychology Department:

- **Co-Majoring in Neuroscience.** Neuroscience Majors/Minors may count any psychology courses they take that count towards the Neuroscience Major/Minor towards both majors.
- **Co-Majoring in Social Work.** Social Work Majors may count PSYC 101 General Psychology and PSYC 304 Statistics and any other three PSYC classes approved by the School of Social Work towards both the Psychology and Social Work Majors.

Core Course Exemptions for Psychology Majors

Psychology majors are exempt from the "Societal and Cultural Knowledge" and "Quantitative Literacy" areas of the core. Additional information about the Core can be found here (p. 989).

Transferring Courses

Three courses of the major (or the minor) can be fulfilled with courses transferred into Loyola. Please consult with your CAS Advisor to ensure that you have received transfer credit for courses taken at other universities.

Honors in Psychology

Students able to maintain a cumulative 3.5 GPA and interested in psychology independent research, should discuss the possibility of participating in the Honors in Psychology program with their Psychology Faculty Advisor or ideally their psychology research mentor. For more information on the program please visit the Honors in Psychology Webpage (https://www.luc.edu/psychology/undergraduate/). Questions about the program should be addressed to the program director, Dr. Jeff Huntsinger (jhuntsinger@luc.edu).

Answers to additional questions about the major may be found on the Department Website (https://www.luc.edu/psychology/) or by visiting the Frequently Asked Questions Webpage (https://www.luc.edu/psychology/undergraduate/faq/).

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Acquire a broad understanding of fundamental psychological principles and concepts, including the biological, cognitive, developmental, mental health, and social pillars of psychological science.
- Learn to use scientific knowledge to make reasoned and ethical judgments promoting the health and well-being of the individual, community, and society.
- Develop the ability to design, conduct, and communicate the results, both orally and in writing, of basic psychological research.
- Develop the ability to think quantitatively about psychological concepts, and to quantitatively analyze experimental results.
- Participate in scientific inquiry using the methodologies and tools of psychological science in laboratory and field settings.
- Expose students to theoretical approaches that deal with privilege, oppression, and social justice and encourage appreciation of differences in psychology across cultures.

Psychology Minor

Loyola offers the Minor in Psychology which provides students with an opportunity to develop psychology course coverage related to their specific career interests.

Students may also want to consider pairing the Psychology Minor with the Neuroscience major to focus on the biological aspects of psychology or the 5-year BSW/MSW program in Social Work if they are interested in a career in Mental Health Therapy.

Related Programs

Major

- Psychology (BS) (p. 629)

Minor

- Sociology Minor (p. 647)

Curriculum

Code	Title	Hours
Required Courses		
PSYC 101	General Psychology	3
Five 200+ level Psychology courses [1,2]		15
Total Hours		**18**

[1] Except PSYC 201 Psychology Advising and Career Development
[2] NEUR 101 Introduction to Neuroscience may be taken.

Mathematics and Statistics Prerequisites

While there is no explicit math requirement for the Psychology Minor, it is expected that students will have a solid background in basic math (including algebra and preferably probability) prior to taking PSYC 304 Statistics. If the student has tested out of math they may enroll in PSYC 304 Statistics immediately after taking PSYC 101 General Psychology.

Transferring Courses from other Institutions

Three courses of the minor can be fulfilled with courses transferred into Loyola. Please consult with your CAS Advisor to ensure that you have received transfer credit for courses taken at other universities.

Independent Study Opportunities

Loyola's psychology department offers countless opportunities for undergraduates to participate in research under the supervision of faculty members—an experience that is highly valued by employers and graduate schools. More information on Research in the department can be found under the Research Tab of the Psychology Department Website. Students can earn course credit for this research experience through independent

studies and research courses, PSYC 397 Independent Research and PSYC 399 Special Studies in Psychology. Qualified students may also plan and conduct psychological research by enrolling in the two-course honors sequence (PSYC 369 Psychology Honors Readings and PSYC 370 Psychology Honors Research). PSYC 397 Independent Research and PSYC 370 Psychology Honors Research count towards the Loyola's engaged learning requirement, while PSYC 399 Special Studies in Psychology does not. More information on Independent Study courses in Psychology are available on the Independent Research webpage under the Undergraduate Tab on the department website or by clicking the hyperlinks for the individual courses above.

Internship in Psychology

PSYC 390 Internship in Psychology is an intensive, work/academic experience that combines 100 hours (minimum) of supervised work at a psychology-related job site, arranged by the student prior to the start of the semester. PSYC 390 Internship in Psychology class meetings include class discussions and activities, reading and writing assignments, and an independent project. This is a unique and time-intensive opportunity that allows students to learn how psychology is applied in real-world settings. The course is open to psychology juniors and seniors. Students interested in the program should learn more by visiting the Internship in Psychology Webpage found under the Undergraduate Tab on the department website. Questions about the program should be addressed to the internship coordinator (psyc-internship@luc.edu). *Admission to the internship course is by application only. Applications are due midway through the* ***semester before*** *the internship is to be taken.*

Double-Dipping Policy

Psychology minors are to abide by Academic Council's double dipping policy which instructs that 8 credit hours must be unique to a minor.

Learning Outcomes

- Acquire a broad understanding of fundamental psychological principles and concepts, including the biological, cognitive, developmental, mental health, and social pillars of psychological science.
- Learn to use scientific knowledge to make reasoned and ethical judgments promoting the health and well-being of the individual, community, and society.
- Develop the ability to design, conduct, and communicate the results, both orally and in writing, of basic psychological research.
- Develop the ability to think quantitatively about psychological concepts, and to quantitatively analyze experimental results.
- Participate in scientific inquiry using the methodologies and tools of psychological science in laboratory and field settings.
- Expose students to theoretical approaches that deal with privilege, oppression, and social justice and encourage appreciation of differences in psychology across cultures.

Psychology of Crime and Justice Interdisciplinary Program

This interdisciplinary program allows students to focus on the classes that are most relevant to the field of psychology and law. The constellation of classes will deepen and complement their chosen professional practice with justice-involved persons or their wider professional careers in the fields of cybersecurity, mental health, social work, forensic science, law, and others.

Undergraduate Programs

- Psychology of Crime and Justice Minor (p. 633)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Psychology of Crime and Justice (PSCJ)

PSCJ 399 Independent Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest that is not part of the Psychology of Crime and Justice minor's usual curriculum. Program permission required.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Gain supervised research experience in a specific area of psychology and law

Psychology of Crime and Justice Minor

This interdisciplinary minor allows students to focus on the classes that are most relevant to the field of psychology and law. The constellation of classes will deepen and complement their chosen professional practice with justice-involved persons or their wider professional careers in the fields of cybersecurity, mental health, social work, forensic science, law, and others. The minor provides foundational knowledge for professional practice and advanced graduate or professional degrees where the fields of psychology and criminal justice intersect.

Related Programs

Major

- Criminal Justice and Criminology (BS) (p. 363)
- Psychology (BS) (p. 629)

Minor

- Criminal Justice and Criminology Minor (p. 365)
- Psychology Minor (p. 632)
- Sociolegal Studies Minor (p. 636)

Curriculum

The minor requires the completion of 18 credit hours. Three classes may double dip and count toward a major or another interdisciplinary minor.

Code	Title	Hours
Required Courses		
Select one of the following:		3
PSYC 331	Psychopathology	
PSYC 372 / CJC 377	Psychology & Law	
Select one of the following:		3
CJC 345	Social Justice and Crime	
CJC 346	Mental Illness and Crime	
Additional Requirements		**12**

Additional requirements are determined by majors.

Psychology Majors		
	CJC 101	Criminal Justice in a Global Context
	Electives (p. 634) (Choose 3 from the approved list below) [1]	
Criminal Justice & Criminology Majors		
	PSYC 101	General Psychology
	Electives (p. 634) (Choose 3 from the approved list below) [2]	
All Other Majors		
	CJC 101	Criminal Justice in a Global Context
	PSYC 101	General Psychology
	Electives (p. 634) (Choose 2 from the approved list below)	
Total Hours		**18**

[1] Psychology Majors must select two CJC electives and one PSYC elective. It is recommended that if PSCJ 399 is taken as an elective, it should substitute for the PSYC elective.

[2] CJC Majors must select two PSYC electives and one CJC elective. It is recommended that if PSCJ 399 is taken as an elective, it should substitute for the CJC elective.

Internship

We strongly recommend that psychology and criminal justice and criminology majors completing the minor do an internship, field work or research project focused on the psychology of crime and justice by participating in one of the capstone experiences which include a practicum experience:

- CJC 390 Capstone Experience Internship
- PSYC 390 Internship in Psychology (prerequisites: PSYC 304 Statistics and PSYC 306 Research Methods in Psychology)

These courses will count toward the psychology or criminal justice and criminology major, but not the minor in the psychology of crime and justice.

Students may obtain credit for engaged learning and participate in Psychology and Law research through PSCJ 399 Independent Study, which counts as an approved elective in the minor.

Approved Electives for all PSCJ Minors

Code	Title	Hours
CJC 201	Theories of Criminal Behavior	3
CJC 202	Criminal Courts	3
CJC 204	Corrections	3
CJC 302	Juvenile Justice System	3
CJC 322	Criminal Law	3
CJC 345	Social Justice and Crime	3
CJC 346	Mental Illness and Crime	3

PSYC 338	Psychology of Personality	3
PSYC 346	Psychopathology of Childhood	3
PSYC 348	Psychology of Adolescence	3
PSYC 360	Understanding Prejudice	3
PSYC 368	Counseling	3
PSYC 375	Psychology of Addiction	3
PSYC 378	Drugs and Behavior	3

Double Dipping Rule

Three (3) courses can count toward credit for another minor or major; thus, three (3) unique classes are required.

Learning Outcomes

Upon completion of the minor in the Psychology of Crime and Justice, students will:

- Exhibit foundational knowledge in the field of psychology and law.
- Recognize how empirically-based research has improved the legal system, and has future applications to improve the legal system.
- Understand how professionals in the legal system and treatment fields interact, assist, and hinder persons who belong to marginalized and vulnerable groups.
- Appreciate the possible graduate school options and career pathways at the intersection of the psychology and law field.

Race & Ethnicity Interdisciplinary Program

Race and ethnicity are meaningful characteristics created through social processes. Individuals and institutions use race and ethnicity to establish cultural and material hierarchies of power and privilege in a society. It is necessary to continue studying race and ethnicity, especially in the United States, a country whose foundations are built upon ethnic and racial issues that continue to persist.

Loyola's minor in Race and Ethnicity was developed to provide an interdisciplinary theoretical background on relevant ethnic and racial issues and train students to develop analytic tools for studying ethnic and racial issues.

Undergraduate Programs

- Race & Ethnicity Interdisciplinary Minor (p. 634)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Race & Ethnicity Interdisciplinary Minor

The interdisciplinary minor in race and ethnicity will provide an interdisciplinary theoretical background on relevant ethnic and racial

issues and train students to develop analytic tools for studying ethnic and racial issues. The minor provides opportunities for students to develop nuanced understandings of race and ethnicity in cross-cultural and comparative perspectives.

Related Programs

Minor

- Asian Studies Minor (p. 267)
- Middle East and Islamic World Studies Minor (p. 524)

Curriculum

Students enrolling in the minor will be required to complete 18 credit hours.

Code	Title	Hours
Introduction to Race and Ethnicity		
One Required Course		
SOCL 122	Race and Ethnic Relations	3
Theories of Race and Ethnicity		
Choose one at least one of the following		3
ANTH 105	Human Biocultural Diversity	
ANTH 304	Anthropological Theory	
CJC 372	Race, Ethnicity, and Criminal Justice	
HIST 374	Black Politics	
HIST 378	Latina/o History	
HIST 380	Introduction to African-American History	
PHIL 389	Contemporary Issues (Critical Philosophy of Race)

PLSC 334	Urban Policies and Problems	
ROST 382	Human Rights: View from Rome	
SOCL 234	City, Suburbs & Beyond	
SOCL 245	Sociology of Education	
SOCL 280	Topics in Contemporary Sociology (U.S. Immigration)	
Additional Elective		
Choose one additional elective course from either the Theories of Race and Ethnicity; Racial and Ethnic Inequality and Racism; or Historical, Cultural, and Contemporary Perspectives on Racial and Ethnic Issues areas		3
Race and Ethnicity Capstone		
One required course		
SOCL 380	Internship	3-6
Total Hours		**18**

Additional Requirements

As an interdisciplinary minor, students are required to count no more than two of the six courses from the same major/discipline towards the minor, with the exception of the capstone class.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Term 1		
SOCL 122	Race and Ethnic Relations	3
	Hours	**3**
Term 2		
Theories of Race and Ethnicity Elective		3
Racial and Ethnic Inequality and Racism Elective		3
	Hours	**6**
Year 2		
Term 3		
Historical, Cultural, and Contemporary Perspectives on Racial and Ethnic Issues Elective		3
Additional Elective Course		3
	Hours	**6**
Term 4		
SOCL 380	Internship	3-6
	Hours	**3**
	Total Hours	**18**

Learning Outcomes

At the conclusion of their studies, students minoring in this minor will be able to:

- Understand theories of race and ethnicity;
- Evaluate racial and ethnic inequality; and
- Apply a race and ethnicity lens to the analysis of historical, cultural, and contemporary issues.

Sociolegal Studies Interdisciplinary Program

The Sociolegal Studies minor provides an introduction to the relationships between law and other human activity and serves as a broad liberal education in the humanities and social sciences. It is an opportunity for students within a liberal arts curriculum to engage in a broad critical understanding of the nature and function of law from an interdisciplinary perspective. Students will learn basic legal concepts and be able to apply those concepts to legal phenomena; understand the nature and function of law, including legal theory, institutions, and analysis; understand the unique nature of legal institutions and practices from a variety of interdisciplinary perspectives; and acquire a deeper understanding of the different types of law, how law is shaped, how people think about law, and the role of law in society.

Undergraduate Programs

- Sociolegal Studies Minor (p. 636)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Sociolegal Studies (SLGL)

SLGL 200 Introduction to Sociolegal Studies (3 Credit Hours)
The course will introduce students to several complementary perspectives from the interdisciplinary "Law and Society" movement: the sociology of law; the psychology of justice; the anthropology of disputing; the economics of rulemaking; and the institutional politics of courts and legislatures.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Compare & critique different social science theories of law; understand the role of law in society and the intersection of law, politics, economics, and culture

SLGL 399 Independent Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest that is not part of the Sociolegal Studies minor's usual curriculum. Program permission required. Students will gain an understanding of a specific area of sociolegal studies through the close reading of selected texts or through directed research.
Interdisciplinary Option: Sociolegal Studies

Sociolegal Studies Minor

The Sociolegal Studies minor provides an introduction to the relationships between law and other human activity and serves as a broad liberal education in the humanities and social sciences. It is an opportunity for students within a liberal arts curriculum to engage in a broad critical understanding of the nature and function of law from an interdisciplinary perspective. Students will learn basic legal concepts and be able to apply those concepts to legal phenomena; understand the nature and function of law, including legal theory, institutions, and analysis; understand the unique nature of legal institutions and practices from a variety of interdisciplinary perspectives; and acquire a deeper understanding of the different types of law, how law is shaped, how people think about law, and the role of law in society.

Transfer-Student Residency Requirement

At least 9 credit hours of SLGL-MINR requirements must be completed at Loyola.

Double Dipping Policy

Observes the CAS Double-Dipping policy with the additional restriction: Students minoring in Sociolegal Studies (SLGL-MINR) may use only one course (total) toward the SLGL minor and any other declared majors/minors.

Learning Outcomes

Upon completion of this program, students will:

- Evidence a deeper understanding of the many forms of law, how law is shaped, how people think about law, the role of law in society, and the intersection of law and politics
- Compare, apply, and critique different social science and humanities perspectives on law
- Understand the cultural, political, economic, and social aspects of law
- Employ an interdisciplinary approach to the study of law and society
- Understand the structure and purpose of legal institutions
- Comprehend basic legal concepts and be able to apply those concepts to legal phenomena
- Develop strong logical and critical thinking skills

Sociology

Welcome to the Department of Sociology at Loyola University Chicago! (https://www.luc.edu/sociology/index.shtml/)

Here, our vibrant community--spanning faculty, graduate students, and undergraduate majors and minors--fosters intellectual growth, collaboration, and a deep commitment to addressing the pressing challenges of our society. Rooted in the rich traditions of sociology and the Jesuit mission of social justice, our department combines rigorous research, impactful publications, dynamic classroom instruction, and immersive experiences beyond the classroom. Together, we strive to make a meaningful difference both within and beyond our university.

What Is Sociology?

Sociology explores the many ways people interact and organize themselves—within families and nations, cities and suburbs, factories, schools, churches, and even gangs. Its subject matter is the world around us. Sociologists at Loyola explore questions such as how play in public parks can build community life, effective activism to protect the environment, and the integration of immigrants into American society. Sociologists tackle complex issues such as the causes of high infant mortality rates among Black women, the impact of real estate speculation on the creation of ghettos, the realities of gig economy work, or the spread of rumors in social networks. This perspective challenges us to see the world in new ways, uncovering the deeper patterns and forces shaping everyday life. By introducing sociology as a social science, our department fosters a critical understanding of how individuals connect through societal structures and how those structures profoundly influence our lives.

Department History & Overview

Founded in 1914, Loyola University Chicago's Department of Sociology has a proud legacy of excellence in teaching, research, and community engagement. Undergraduate students joining our program become part of a vibrant academic community supported by fifteen full-time sociologists who are dedicated to both advancing knowledge and providing personalized mentorship. With small class sizes and meaningful faculty-student collaborations, our department offers an enriching learning environment tailored to our students' success.

Our faculty conduct cutting-edge research and teach across a wide range of sociological subfields, including:

- Urban, Environment, and Community
- Health and Medicine
- Politics, Power, and Social Justice
- Global and Transnational Sociology
- Race, Ethnicity, Gender, and Sexuality
- Religion, Science, and Knowledge

We take pride not only in our research contributions but also in the high-quality academic and personal experiences we offer to our majors and minors, preparing them for success in both their studies and their future endeavors. Students can gain "real world" experience in survey design with the Cook County Community Survey (https://cccs.sites.luc.edu/), engage in community-partnered research with our City STAR Lab, or earn course credit through an internship with an agency here in Chicago or in their hometown.

Careers in Sociology

A sociology major offers valuable insights into the world while equipping students with data analysis, communication, and critical thinking skills that are highly adaptable and sought after in today's workplace. Through a Loyola Sociology education, majors and minors develop key competencies, including:

- Engaging with diverse ideas and perspectives while interacting thoughtfully and respectfully, even in disagreement.
- Assessing data and evaluating claims with a critical eye.
- Conducting research and forming valid, data-driven conclusions about the social world.

Our graduates pursue a variety of paths, including advanced degrees in fields such as law and medicine. They also secure impactful roles in government, nonprofits, business, marketing, technology, and more. A sociology degree opens the door to meaningful careers that make a difference in society.

Undergraduate Programs

- Honors in Sociology or Sociology/Anthropology (p. 644)
- Sociology (BA) (p. 644)
- Sociology Minor (p. 647)
- Sociology-Anthropology (BA) (p. 649)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Sociology (SOCL)

SOCL 101 Society in a Global Age (3 Credit Hours)
This foundational course in the social sciences introduces students to key sociological perspectives and methods to examine global issues. Students explore how institutions, culture, and systems of power and inequality shape people's lives across diverse communities and contexts.
Knowledge Area: Foundational Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Identify examples of the relationship between institutions and individuals; Explain the impact that culture has on group dynamics and social interactions within local, national, and global settings; Summarize how people's identities are formed through a complex interaction of biographical, societal, or cultural contexts; Describe the experiences of underrepresented, marginalized, or oppressed communities within various contexts, including inequality in outcomes and resistance to systems of oppression; Analyze how systems of power, privilege, and oppression (eg, racism, sexism, heterosexism, ableism) operate to create and maintain inequality as well as how resistance to these systems is enacted

SOCL 121 Social Problems (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an opportunity to examine major issues facing society. In addition to analyzing the roots of social problems, the course addresses social policy concerns and explores solutions.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Human Services, Peace, Justice, and Conflict Studies
Course equivalencies: SOCL121/PAX 121
Outcomes:
Students will be able to critically examine the impact of a social problem and its possible solutions; to integrate knowledge gleaned from a variety of disciplines; to find and utilize relevant data and research in defining issues and solutions; and to view social problems from macro and micro perspectives as a means of applying workable solutions for the issues facing society

SOCL 122 Race and Ethnic Relations (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the development of cultural, society, and self-understanding by exploring the social construction of race in the United States. The course explores how social constructions of race affect interpersonal relations, laws, policies, and practices in various racial and ethnic communities.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, Human Services, Italian American Studies, Peace, Justice, and Conflict Studies, Race and Ethnicity
Course equivalencies: X-SOCL122/ASIA122/BWS 122/PAX
Outcomes:
Students will be able to demonstrate understanding of the conditions which have worsened racial tensions as well as how social movements have been successful at eradicating racially oppressive laws and working towards a just society

SOCL 123 Mass Media and Popular Culture (3 Credit Hours)
This course examines the connections between the media of mass communication and multiple forms of popular art and culture. Topics considered include the social, political, and cultural organization of mass communication and its impact on values, expectations, and life styles of contemporary society.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies, Women & Gender Studies
Course equivalencies: SOCL123/WSGS123/IFMS123
Outcomes:
Students will be able to demonstrate understanding of the social relationships between mass media and the general population

SOCL 125 Chicago: Urban Metropolis (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the development of Chicago metropolitan region from the 1830's to the present day. Students will explore the urban area not only through texts, but also through fieldwork.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Urban Studies
Course equivalencies: SOCL125/URB125
Outcomes:
Students will be able to demonstrate understanding of the geography, history, and people of the Chicago metropolitan region

SOCL 127 Social Analysis and Social Action (3 Credit Hours)
This course helps students who are volunteering at local congregations and agencies better understand the communities and issues they will encounter in Chicago. It emphasizes the analysis of "social solutions" to social problems as well as personal reflection and action.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-SOCL127/PAX127
Outcomes:
Analyzing and acting on social issues

SOCL 145 Religion & Society (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines how religion and society interact.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will be able to demonstrate understanding of how individual behavior, organizations, and society as a whole are affected by religious ideas and institutions, and how religion is itself changed by its encounter with changing social circumstances

SOCL 171 Sociology of Sex and Gender (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the social organization of sex and gender.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Human Services, Women & Gender Studies
Course equivalencies: X-SOCL271/WOST271/WSGS271
Outcomes:
Students will be able to situate their pre-conceived experiences of the naturalness of gender in a particular historical and cultural context

SOCL 205 Sociological Thought (3 Credit Hours)
This course examines classical and contemporary sociological theories and uses them as frameworks for understanding modern society. Such social theories attempt to explain and understand the world, as well as inspire further research and theory.
Interdisciplinary Option: German Studies
Outcomes:
The class provides students with theoretical foundations for understanding social organizations as well as the social processes that transform societies

SOCL 206 Principles of Social Research (3 Credit Hours)
This course is an introduction to the basic research methodologies of sociology. A variety of methods used in sociological analysis and data generation will be considered. Students learn how to select and use methodologies appropriate for various research projects. They will be able to critically evaluate existing research and select appropriate techniques to undertake original research.
Interdisciplinary Option: Human Services, Urban Studies
Outcomes:
Students will learn how social science research is conducted

SOCL 210 Gender and Work (3 Credit Hours)
This course looks at the nature of work through the lens of gender. It considers how male and female labor force participation has changed over time. It examines the ways working families are transformed when women combine employment with domestic responsibilities and child care, or when men's jobs no longer provide a family wage.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-SOCL210/WOST210/WSGS210
Outcomes:
Students learn how gender has been and remains a fundamental organizational principle in the workplace and the labor force

SOCL 215 Law & Society (3 Credit Hours)
This course trains students to examine the law as a sociological concept and to look at the relationship between the legal system and society. A critical concern is whether changes in the legal system reflect societal change or do changes in the legal system stimulate change in society.
Interdisciplinary Option: Global Studies, Sociolegal Studies
Outcomes:
Students learn to recognize the close linkage between the law and social structure; They also gain experience examining legal texts and decisions

SOCL 216 The Sociology of Violence (3 Credit Hours)
The threat of violence is a significant concern for individuals in many societies. In this course, violence will be studied as a social phenomenon. Topics of particular concern include: family violence, gang violence, and terrorism.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: X-SOCL216/PAX 291
Outcomes:
Students learn to examine the causes of violence from a sociological perspective; They also learn methods to reduce violence and the harm it causes

SOCL 221 Sociology and Culture of the Life Course (3 Credit Hours)
Life course studies emerged in response to the sociological need to understand how social change intersects with the aging process. Social and cultural contexts, individual experience and agency, and historical time and place are elements in the construction of a life and the social relationships that make it up.
Interdisciplinary Option: Bioethics, Human Services
Course equivalencies: X-ANTH221/SOCL221
Outcomes:
Students learn sociological concepts and theories relevant to the life course and how they help us understand local and global changes; Learn about programs and policies pertinent to an aging society

SOCL 222 Poverty & Welfare in America (3 Credit Hours)
In this course, students learn to think critically about the character, causes and responses to poverty in American society, using both historical and contemporary evidence.
Outcomes:
Students will understand the strengths and limitations of American welfare policy in relation to poverty

SOCL 225 Sociology of Health Care (3 Credit Hours)
This course examines the sociology of health care with particular attention to: social and psychological factors; health care professionals; inter-personal relations in health care; the organization and use of health services; and the relationship between aging and health.
Interdisciplinary Option: Bioethics, Race and Ethnicity
Course equivalencies: X-SOCL225/BIET225
Outcomes:
Students will understand the role that social forces play in the health and wellness of individuals, the community and society; Students will engage with different theoretical perspectives to examine how race, ethnicity, and gender shape health outcomes and access to health care in the US and other countries; Students will learn about empirical patterns of racial and ethnic disparities in health, health care delivery, and health policy

SOCL 226 Science, Technology, & Society (3 Credit Hours)
This course serves as a broad introduction to the social study and analysis of science and technology in society. It examines how scientific knowledge and technologies are created and constructed and how they influence and are influenced by society.
Outcomes:
Students will be able to understand how scientific knowledge and technologies are developed in particular historical and cultural contexts and analyze their impact on our daily lives

SOCL 228 Sociology of the African American Experience (3 Credit Hours)
A sociological inquiry into the historical and contemporary experience of African Americans. Social movements and social change, urban and institutional processes, social values and collective behavior, and African Americans and public policy are among the topics explored.
Interdisciplinary Option: African Studies and the African Diaspora, Race and Ethnicity
Course equivalencies: X-SOCL228/BWS 228
Outcomes:
Students will gain a deeper understanding of the experiences that African Americans have in American society and of the social, political and institutional forces that have contributed to the historical and contemporary experience of African Americans

SOCL 230 Self & Society (3 Credit Hours)
This course examines the relationships between the self as a social product and the larger society in which that self is socialized, develops and expresses itself. Various theories of selfhood are explored.
Outcomes:
Students will come to appreciate how selfhood, their own and others, is a product of historical factors as well as social contexts such as class, gender, race and ethnicity

SOCL 231 Childhood and Society (3 Credit Hours)
This course looks at the social construction of childhood, the impact of parents, the media, peer groups, and educational institutions as well as changing social attitudes about the place of children in society.
Interdisciplinary Option: Human Services
Outcomes:
Students will gain a better understanding of the historical and social manner in which childhood is constructed and the impacts of various social institutions, family, religion, media, education on childhood development

SOCL 234 City, Suburbs & Beyond (3 Credit Hours)
This course studies the historical emergence of cities, focusing on the ecological, demographic, and organizational processes involved in the continuing growth and change of metropolitan areas and in the relationship of a metropolitan area to the surrounding region.
Interdisciplinary Option: Human Services, Race and Ethnicity, Urban Studies
Course equivalencies: X-SOCL234/URB234
Outcomes:
Students will understand fundamental facts and theories about the character and development of cities and urban regions

SOCL 235 Communities in a Global Age (3 Credit Hours)
This course examines communities sociologically, both as a concept and as they exist in society. The course covers urban, racial/ethnic, religious, territorial, utopian, ideological, and web-based communities, and their strengths and limitations in a rapidly changing global world.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will identify, describe, and analyze communities using sociological concepts and be able to assess the mechanisms by which old and new communities are being formed as well as their consequences for social life

SOCL 236 Population Studies (3 Credit Hours)
This course introduces the study of demography by examining trends of fertility, work, marriage, migration and mortality.
Interdisciplinary Option: Bioethics, Human Services
Course equivalencies: SOCL236 / SOCL285
Outcomes:
Students will gain an understanding of how the size, composition, and dynamics of a population influence the social, economic, and political structure of individual nations and the world

SOCL 237 Professions and Society (3 Credit Hours)
Work involving high levels of expertise - medical, legal, technical, and much else - is a critical component of modern society. This course examines how professional work is structured, the way professionals are trained and organized, the privileges and responsibilities of professional work, and the role of conflicts over expertise in modern society.
Outcomes:
Students will gain an understanding of how work based on knowledge and expertise is organized and on the social and economic factors that contribute to the position of professionals in society

SOCL 239 Understanding Bias and Inclusivity (3 Credit Hours)
Using an intersectional lens, students learn about how privilege, power, and oppression shape ourselves, perceptions of others, and our social world. They consider how ourselves and others are shaped by and operate within the larger social system. Students explore their identities, values, and biases. Students engage in self-reflection to increase self-awareness.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X - PSYC 239/ SOCL 239
Outcomes:
Identify feelings about course topics; Demonstrate self-awareness of identities and values, including the value of difference; Engage in intergroup dialogue; Articulate how personal power can be used to create change

SOCL 240 Families (3 Credit Hours)
Contemporary family structures encompass a variety of living arrangements and social relationships. This course considers differences and similarities among the various family types and explores the social, cultural, and economic forces structuring family life.
Interdisciplinary Option: Human Services, Women & Gender Studies
Course equivalencies: X-SOCL240/WOST242/WSGS242
Outcomes:
Students will develop an expanded understanding of the varieties of family arrangements and the connections between family life and the wider social, political, and economic environment

SOCL 245 Sociology of Education (3 Credit Hours)
This course is a rigorous introduction into the scholarly traditions and contemporary research developments in the sociology of education. Topics include: educational stratification and inequality, how educational institutions function and with what policy implications, and social psychology/human development.
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Identify areas of research interest; trace connections to studies in the field; analyze and evaluate policy effectiveness; evaluate the capacity and potential for institutions to support efforts at social justice

SOCL 247 Sociology of Culture (3 Credit Hours)
This course examines the social production, consumption, and use of culture and cultural objects, especially in the fields of literature, art, music, mass media and religion.
Outcomes:
Students will learn sociological methods of analyzing culture and cultural objects, and will understand the social organization of cultural production and consumption

SOCL 250 Inequality in Society (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the manner in which contemporary society is divided by race, ethnicity, class, sexuality and gender, and the impact of social institutions on these divisions. An emphasis will be placed on income/wealth differences, status differences, class conflict and social conflict over time.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, Human Services, Peace, Justice, and Conflict Studies, Race and Ethnicity, Women & Gender Studies
Course equivalencies: ASIA/AFR/SOCL/WSGS 250
Outcomes:
Students will acquire a better understanding of social inequality and what can be done to make society more just

SOCL 252 Global Inequalities (3 Credit Hours)
This course examines inequality on a global scale, focusing on the impact of globalization processes on race, class, and gender inequalities here and abroad.
Interdisciplinary Option: Global Studies, Human Services, Race and Ethnicity
Outcomes:
Students will analyze how race, class, and gender inequalities influence each other across national boundaries, and will recognize global causes and consequences of inequality

SOCL 254 Sociology of Migration (3 Credit Hours)
This course is designed to provide a sociological understanding concerning various impacts of immigration in the United States. International migration patterns have significantly affected the development of US society since its inception. In recent decades, the United States experienced a record number of new immigrants from a variety of countries. In this course, we examine fundamental concepts for studying migration and theories that explain international migration. We also discuss how immigrants have redefined - and will keep redefining - local and foreign demographic dynamics in receiving and sending societies, transnational networks, and a more complex ethno-racial diversity with meaningful international roots.
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, Global Studies, Latin American Studies, Race and Ethnicity, Women & Gender Studies
Outcomes:
Be familiar with key theories, concepts, and analyses that explain migration issues in the United States; Understand the relevance of historical and contemporary associations among cultural, economic, political, and social forces, as well as their impact on immigration; Understand the relevance of sociological knowledge on migration issues for dealing with current social problems at different levels (ex: remedial policies, activism, educational objectives)

SOCL 255 Deviance and Social Control (3 Credit Hours)
This course is a socio-historical look at definitions of deviant behavior and individuals, an examination of techniques of social control, and an analysis of specific forms of deviant behavior such as crime and mental illness.
Interdisciplinary Option: Human Services
Outcomes:
Students learn to analyze how history, science, and philosophy combine to define the nature of deviant behavior and to identify deviant individuals

SOCL 258 Confronting Homelessness: Local to Global (3 Credit Hours)
Pre-requisites: SOCL 101 or PSYC 100 or PLS 102 or ANTH 100
Who are homeless people in the United States and beyond? Why are they homeless? What is being done to address the issues of homelessness? This course addresses these questions from a variety of disciplinary perspectives. As an "engaged learning" course, students will also learn by assisting at various agencies. The student will be able to discuss framings of the causes of homelessness and evaluate different policy approaches for addressing it while contributing work to a local agency.
Interdisciplinary Option: Urban Studies

SOCL 260 Power in Society (3 Credit Hours)
This course focuses on sociological theories and case studies of power, authority, and social change. It explores the ways in which power relations perpetuate social inequality and the ways in which social conflicts and power struggles transforms society.
Outcomes:
Students learn about the structures of power in economic systems, political systems, and organizations; the cultural and ideological underpinnings of power relationships; and political struggles for social change

SOCL 261 Social Movements & Social Change (3 Credit Hours)
This course examines the dynamics of collective behavior and movements promoting social change.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Sociolegal Studies
Outcomes:
Students will demonstrate understanding of competing explanations of social movements and social change and will be able to test various theories by analyzing historical movements for change

SOCL 265 Globalization & Society (3 Credit Hours)
This course examines the nature of contemporary globalization and considers how it influences communities, nations and the world.
The course examines the positive and negative consequences of globalization and the global justice movements that have emerged seeking more equality, tolerance and environmental stewardship.
Interdisciplinary Option: Global Studies, Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students learn how economic, political and cultural aspect of globalization impact society in an increasingly interconnected world

SOCL 267 Italy Today (3 Credit Hours)
Pre-requisites: One Tier I Foundational Social and Cultural Knowledge Core course: SOCL 101, ANTH 100, PLSC 102, or PSYC 100
Italy Today traces the nation's extraordinary transformation from the ashes of World War II to the leading economic and cultural power it is today and analyses a broad range of issues in contemporary Italy, such as Catholicism, gender, family, emigration and immigration, regional identities, media and material culture.
Interdisciplinary Option: Global Studies, Italian American Studies, Italian Studies
Outcomes:
Understand the transformation of Italy since WWII Think critically about issues such as stereotypes, regional identities, and diversity

SOCL 272 Environmental Sociology (3 Credit Hours)
This course examines the distinctively social aspect of the relationship of people to their environments, both built and natural.
Interdisciplinary Option: Bioethics, Global Studies, Human Services, Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: X-SOCL272/ESP272PAX 272BIET272
Outcomes:
Students will recognize the role that both social and physical factors play in the environmental problems facing the world; Students will also develop critical thinking skills needed to evaluate statements and policy proposal to improve environmental quality

SOCL 276 The Sociology and Politics of Food (3 Credit Hours)
Explores the impact of globalized economic, political, and social relationships through the prism of food. Considers the cultural and ideological dimensions of food, the structure of food production and consumption, and responses to the global food system.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will gain awareness of themselves as consumers of food and food products

SOCL 278 Global Health (3 Credit Hours)
This course addresses the underlying social, economic, political, and cultural mechanisms driving some of the leading issues in global health today, including the rise of non-communicable diseases in low and middle income countries, neglected infectious diseases, human resources for health, and access to global pharmaceuticals.
Interdisciplinary Option: Bioethics
Outcomes:
Students will become familiar with evaluating the global health policy process and debating possible routes to achieving health equity

SOCL 280 Topics in Contemporary Sociology (3 Credit Hours)
The course examines selected contemporary sociological issues. Topics addressed represent specialized or newly developing areas of sociological inquiry. Topics will vary from semester to semester.
Outcomes:
Students gain insights into contemporary social issues and learn how to use the concepts, theory and methods of sociology to examine them

SOCL 281 Current Issues in Medical Education (1 Credit Hour)
Pre-requisites: Sophomore Standing or Above; Instructor Permission
This class is an opportunity to examine selected reform and innovation movements facing health professional education and training. Sophomore standing or above is required.
Outcomes:
Students will demonstrate critical analysis of selected reforms and innovations in health professional education and training

SOCL 301 Statistics for Social Research (4 Credit Hours)
Pre-requisites: SOCL 206
The course is a comprehensive introduction to statistical analysis in social research. Topics include: univariate, bivariate, and multivariate analysis, computer statistical applications and interpretation of results.
Interdisciplinary Option: Human Services
Outcomes:
Students will demonstrate understanding of statistical thinking and data analysis techniques and be able to use them to evaluate existing research and conduct original research

SOCL 302 Qualitative Research (3 Credit Hours)
An introduction to the major qualitative methods of social inquiry. Participant observation, interviewing, historical analysis, and content analysis, as well as ethical issues of field research are studied.
Outcomes:
Students will gain understanding of important methods of data collection and analysis common in social science research; Students will gain experience using these techniques to conduct research and evaluate the research of others

SOCL 304 Global Civil Society and Social Movements (3 Credit Hours)
This course focuses on global civil society groups (both advocacy groups or apolitical) and on social movements that seek to fight injustices.
We discuss a variety of examples of civil society projects ranging from monitoring government corruption and promoting micro-credit to organizing transnational protest campaigns.
Interdisciplinary Option: Global Studies
Course equivalencies: X-GLST 304/SOCL 304
Outcomes:
Students will demonstrate a comprehension of the dynamics of global civil society and social movements, both for cases discussed in class and to material from outside class

SOCL 306 International Development (3 Credit Hours)
This course provides an interdisciplinary overview of the international development system and issues related to development in those countries variously referred to as third world, developing, underdeveloped, or peripheral countries.
Interdisciplinary Option: Global Studies
Course equivalencies: X-GLST 306/SOCL 306
Outcomes:
Students will develop a fundamental knowledge of the various factors that are considered to help or hinder development

SOCL 311 Social Science Research Practicum: Cook County Community Survey (3 Credit Hours)
Pre-requisites: SOCL 301 or equivalent
Familiarity with R, Stata, SAS, or SPSS necessary. Students will analyze this year's iteration of the annual Cook County Community Survey. They will draw on the data to prepare written, public-facing reports, public presentations, and scholarly research.
This course satisfies the Engaged Learning requirement.
Course equivalencies: PLSC 311/SOCL 311
Outcomes:
Describe the strengths and limitations of modern polling techniques; Use statistical software to analyze survey data; Communicate findings from surveys to a broad audience orally and in written form

SOCL 334 Latinas/os/xs in Space (3 Credit Hours)
Latinas/os/xs are the largest minoritized population in the United States with a population of more than 60 million. As the fasting growing demographic in the U.S., how is this complex and variegated population (re)conceptualizing, (re)framing, (re)making, and (de)constructing spatial boundaries? Further, how are Latinas/os/xs both transforming and challenging U.S. physical and conceptual landscapes? Drawing from spatial, decolonial, and feminist of color theories, we will engage these questions through a thematic exploration of the ways that Latinas/os/xs have influenced, shaped, and (re)used space as a struggle to maintain dignity and engage in place-making. We will connect these ideas to geography, citizenship, civil rights, social justice, and cultural practices. This is a discussion and project-based course.
Interdisciplinary Option: Latin American Studies, Race and Ethnicity, Women & Gender Studies
Outcomes:
Identify and describe the impact Latinas/os/xs have on US culture, history, and geography; Critically analyze political, social, and cultural treatment of Latinas/os/xs in the US; Critically analyze US culture using spatial and decolonial theories; Understand the intersection(s) of space, race, and opportunity within the US; Link social issues and responses to creative outlets/endeavors; Work in small teams; Gain oral presentation skills

SOCL 335 Urban Semester Seminar (3 Credit Hours)
Pre-requisites: Junior or senior standing
Students explore how cities work through texts, field trips, and guest speakers, and help find solutions to pressing urban issues. They fulfill civic engagement core value requirement.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-SOCL335/PLSC335
Outcomes:
Students will understand and address inequities in urban communities, and identify avenues of leadership and civic engagement in contemporary cities

SOCL 365 Social Theory & Social Research (3 Credit Hours)
Pre-requisites: SOCL 205, 206, 301, and senior standing, or permission of instructor or chair
In this capstone course, each student designs and conducts an empirical research project resulting in a senior research paper.
Outcomes:
Student demonstrate mastery of sociological theory and methods by writing a research paper bringing a full complement of sociological skills to bear on an issue of substantial theoretical and/or practical importance

SOCL 370 Undergrad Seminar-Special Topics (3 Credit Hours)
Using a seminar format, the course undertakes an in-depth study of selected contemporary sociological issues in depth. Topics addressed represent specialized or newly emerging areas of sociological inquiry and will vary from semester to semester.
Outcomes:
Students have opportunity to examine contemporary social issues in a seminar environment and learn how to use the concepts, theory and methods of sociology to examine them

SOCL 372 Directed Readings (3 Credit Hours)
Pre-requisites: Permission of instructor or chair
Independent study of a selected body of sociological literature on a topic defined by the student in collaboration with a faculty advisor.
Outcomes:
Student gains in-depth knowledge of a selected sub-field of sociology

SOCL 380 Internship (3-6 Credit Hours)
Pre-requisites: Permission of instructor or chair
Supervised field experience for students working in a selected community organization, government agency, social agency, or business.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students have opportunity to apply the skills and analysis of sociology to a concrete situation

SOCL 397 Independent Study Projects (3 Credit Hours)
Independent study of a topic delineated by the student in collaboration with an individual faculty member.
Outcomes:
Student gains experience and expertise in defining and conducting independent scholarly work

SOCL 398 Independent Study Projects (1-6 Credit Hours)
Independent research done in collaboration with a faculty member on a sociological topic defined by the student in consultation with a faculty member.
Outcomes:
Student gains experience and expertise conducting independent research

SOCL 399 Independent Study Projects (3 Credit Hours)
Advanced independent research in collaboration with a faculty member on a sociological topic relevant to the student. Limited to senior Sociology majors.
Outcomes:
Student gains experience and expertise conducting independent research

Honors in Sociology or Sociology/Anthropology

Department Honors and Awards

1. **Alpha Kappa Delta**
   Loyola's Sociology Department started a chapter of Alpha Kappa Delta, (AKD) the International Sociology Honor Society, in 1928. Membership is open to students who are at least juniors, have an overall GPA of 3.4 and a 3.6 GPA in Sociology, and have completed five or more Sociology courses.

   Sociology students inducted into AKD must be advanced students with demonstrated excellence in both the major and the university at large. New initiates join a long line of distinguished sociology students at Loyola and around the world. Each initiate receives a lifetime membership certificate and a year's subscription to AKD's journal, Sociological Inquiry. Graduating AKD members receive AKD cords, which they wear proudly during graduation ceremonies.

   In early April the department will send a letter to eligible students, inviting them to join AKD. Students may accept or decline the invitation. Students who wish to join will be inducted into the society at the annual Sociology awards reception in late April. Graduating seniors receive a cord to wear with their academic apparel at the university graduation ceremony.
   2018 Seniors Receiving Cords & New Initiates *(*https://www.luc.edu/sociology/akdseniorsreceivingcordsandnewinitiates/*)*
2. **Honors in Sociology or Sociology/Anthropology**
   Students majoring in Sociology or Sociology/Anthropology can earn honors in the major. This option is available to students both in the College of Arts and Sciences Honors program and those who are not in that program, and may strengthen the academic background of students planning to go on to graduate or professional school.

   Honors in the major are available to students who achieve a 3.4 grade point average overall and in their major and: either
   1. write a satisfactory Honor's Thesis under the supervision of a faculty member in SOCL 365 Social Theory & Social Research or
   2. take two graduate courses in the Sociology program (as electives toward their undergraduate major) and receive a grade of B or better.
      Permission to enroll in graduate courses must be obtained from the course instructor and the Graduate Program Director. Interested students should complete this form (https://www.luc.edu/media/lucedu/sociology/pdfs/undergrad/Dept_Honors_reg(2).pdf) and speak to the Undergraduate Program Director
3. **Ross P. Scherer Award for Outstanding Sociology Junior**
   At the end of each academic year, the department recognizes an outstanding junior who has demonstrated the highest level of achievement in Sociology. The award is named for Ross P. Scherer, a former chair and longtime professor in Loyola's Department of Sociology.
4. **Wittner Award for Social Justice in Action**
   At the end of each academic year, the department recognizes an outstanding senior who is engaged and committed to social justice who has demonstrated the highest level of achievement in Sociology. The award is named for Judith Wittner, a longtime professor in Loyola's Department of Sociology.

Sociology (BA)

Sociology explores the many ways people interact and organize themselves—within families and nations, cities and suburbs, factories, schools, churches, and even gangs. Its subject matter is the world around us. Sociologists at Loyola explore questions such as how play in public parks can build community life, effective activism to protect the environment, and the integration of immigrants into American society.

Undergraduate students entering the department become part of a distinguished program with a long history of teaching, research, and service to the community beginning in 1914. With fifteen full-time sociologists, our department supports both an active research agenda and a teaching program that grants personal attention to our students, small class sizes, and opportunities for faculty-student collaborations.

Curriculum

Code	Title	Hours
Required Courses		
SOCL 101	Society in a Global Age	3
SOCL 205	Sociological Thought [1]	3
SOCL 206	Principles of Social Research	3
SOCL 301	Statistics for Social Research	4
SOCL 365	Social Theory & Social Research [2]	3
Electives		
Complete six total electives; five must be from SOCL 210-SOCL 380. [3,4,5]		18
Total Hours		**34**

1. Any Sociology 100-level course is considered to be a prerequisite for SOCL 205, except by special permission of the instructor.
2. SOCL 205, SOCL 206, and SOCL 301 are prerequisites for SOCL 365. These courses provide social science students with the theory and methodology background needed for more advanced work.
3. Only one semester of SOCL 380 may be counted toward the major (although this is a six credit hour course, it counts as one course).
4. In choosing electives, majors should consult with their department advisor. One course from another social science may be substituted with departmental permission.
5. A list of all Sociology (SOCL) course descriptions can be found here (p. 2608).

Optional Concentrations

Health and Community Concentration

The Health and Community Concentration gives students a broad background in the discipline overall while allowing students to focus their coursework on the substantive areas of healthcare institutions, medical sociology, and the social sources of health-related inequalities

across communities, including attention to race, ethnicity, gender, social class and neighborhoods. The Health and Community Concentration is well suited for students interested in a broad range of careers and courses of graduate study in health-related fields, including: medical school, medicine, and other careers in medical care (terrific MCAT prep); healthcare administration and healthcare policy; graduate study in medical sociology and/or gerontology; graduate study and careers in counseling; advocacy and/or non-profit work focused on populations facing health-based risks and inequalities both in the U.S. and overseas.

Code	Title	Hours

[2] Indicates experiential learning

Social Justice Concentration

The Social Justice Concentration gives students a broad background in the discipline overall, and in keeping with the centrality of social justice to Loyola's mission, this concentration allows students to focus their coursework on the substantive topics of social inequality, social change, and social justice. The Social Justice concentration is well suited for students interested in a broad range of careers, advocacy, and courses of graduate study in fields including: law school and legal practice in areas such as civil rights law, gender-based violence, immigration law; public policy and public administration concerning issues for marginalized populations (e.g., homelessness, education, job training/placement, housing, residency status, post-incarceration reentry, voting rights, etc.); social work and human services; teaching and educational leadership and policy; higher education and student affairs; advocacy and non-profit management in organizations that serve marginalized populations; labor organizing and collective bargaining; research for labor unions, social service agencies, and/or non-profit organizations.

Research Methods Concentration

The Research Methods Concentration gives students a broad background in the discipline overall, while providing students the opportunity to focus their coursework on the principles and practices of social research methodology. This concentration emphasizes both quantitative and qualitative research methodologies, equipping students with the skills to design, conduct, and analyze studies in the social sciences. The Research Methods Concentration is well suited for students interested in advanced degrees in business, graduate school, and a broad range of careers, including social science research, market research, data analytics, policy analyst, user experience/design, statistician, census researcher, survey research technician, and non-profit or private organizational management.

Double Majors

For students with a broad range of interests, a double major may offer a desirable option.
Sociology is most frequently combined with another social science (political science, psychology, etc.), but students in philosophy, biology, and languages have also found a second major in Sociology useful.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

In the suggested sequence, courses can either be taken in Fall or Spring semester dependent on student's schedules.

Course	Title	Hours

	Hours	**6**
Spring		
Sociology Elective [1]		3
	Hours	**3**
	Total Hours	**34**

[1] During this semester, students may pursue a possible internship as an elective credit.

Transferring Credit

In completing major requirements, not more than five (5) courses or 15 semester hours will be accepted in transfer from other colleges and universities.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Critical Thinking - demonstrate the ability to analyze and evaluate multiple and competing social, political, and/or cultural arguments.
- Sociological Imagination - the ability to articulate and evaluate how individual biographies are shaped by social structures, social institutions, cultural routines, and multiple of elements of social difference and/or inequality.
- Communication - the ability to formulate effective and convincing written and verbal arguments.
- Diversity — an awareness of how people of different cultural, religious, and political belief systems interpret the world around them through those beliefs.
- Sociological Theory - the ability to use and evaluate both classical and contemporary perspectives in sociological theory.
- Methodology - the ability to interpret and evaluate several of the major social science research methodologies, as well as the relationship between research questions and appropriate methods.
- Substantive Areas - the ability to demonstrate knowledge of multiple key substantive areas within the field of sociology and evaluate competing perspectives.
- Social Justice in the Jesuit Tradition - the ability to articulate and evaluate how sociological insights should inform a commitment to social justice.

Sociology Minor

A minor in Sociology is a good way to apply the sociological imagination to a specific segment of social life. The department offers three concentrations that can serve as a guide to students.

- Our **Health and Community Concentration** allows students to focus their coursework on the substantive areas of healthcare institutions, medical sociology, and the social sources of health-related inequalities across communities, including attention to race, ethnicity, gender, social class and neighborhoods. This concentration is a great way to complement careers and graduate work in medicine, healthcare administration and policy, and work with populations facing health-based risks in the U.S. or overseas.
- Our **Social Justice Concentration** allows students to focus their coursework on the substantive topics of social inequality, social change, and social justice, in keeping with Loyola's mission. This concentration can help students prepare for careers in law, legal aid and advocacy, public policy and administration, social work and human services, and many other areas.
- Our **Research Methods Concentration** emphasizes both quantitative and qualitative research methodologies, equipping students with the skills to design, conduct, and analyze studies in the social sciences. This concentration is well-suited for students thinking about careers in social science, market research, policy analysis, and related fields.

Students can also create their own elective path through the minor. Those doing so may wish to consult the Department Chairperson or the Department's Undergraduate Program Director in deciding which electives to take.

Related Programs

Major

- Sociology (BA) (p. 644)
- Sociology-Anthropology (BA) (p. 649)

Minor

- Psychology Minor (p. 632)

Curriculum

Students minoring in Sociology complete five elective courses in Sociology in addition to SOCL 101 Society in a Global Age (or its equivalent). The Sociology Department's concentrations can serve as a guide to students, although they can also select their own course of electives. Students wishing to do this may want to consult the Department Chairperson or the Department's Undergraduate Program Director in deciding which electives to take.

Only one semester of SOCL 380 and one 100-level course in addition to SOCL 101 Society in a Global Age (or its equivalent) can count for the minor. Any courses taken for a minor in Sociology may be applied to the Department's major requirements, if the student should decide to take sociology as a major. In completing minor requirements, only three courses (nine semester credit hours) will be accepted in transfer from other colleges and universities.

Code	Title	Hours
Required Courses		
SOCL 101	Society in a Global Age (or other 100-level class)	3
Elective Courses (p.) [1, 2]		
SOCL Elective		3
SOCL Elective		3
SOCL Elective		3
SOCL Elective		3
SOCL Elective		3
Total Hours		**18**

1 May count only one semester of SOCL 380 Internship and one 100-level course. Only two courses (six semester hours) will be accepted in transfer credit toward the minor.

2 See Sociology Courses (p. 638) for a complete list.

Optional Concentrations

Students may use the below concentrations as a way to complete the minor while also enhancing their knowledge in a specific area. Students are not required to choose a below concentration and can fulfill major requirements with elective courses of their choice.

Health and Community Concentration

The Health and Community Concentration gives students a broad background in the discipline overall while allowing students to focus their coursework on the substantive areas of healthcare institutions, medical sociology, and ~~and~~ the social sources of health-related inequalities across communities, including attention to race, ethnicity, gender, social class and neighborhoods. The Health and Community Concentration is well suited for students interested in a broad range of careers and courses of graduate study in health-related fields, including: medical school, medicine, and other careers in medical care (terrific MCAT prep); healthcare administration and healthcare policy; graduate study in

medical sociology and/or gerontology; graduate study and careers in counseling; advocacy and/or non-profit work focused on populations facing health-based risks and inequalities both in the U.S. and overseas.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Critical Thinking - demonstrate the ability to analyze and evaluate multiple and competing social, political, and/or cultural arguments.
- Sociological Imagination - the ability to articulate and evaluate how individual biographies are shaped by social structures, social institutions, cultural routines, and multiple of elements of social difference and/or inequality.
- Communication - the ability to formulate effective and convincing written and verbal arguments.
- Diversity – an awareness of how people of different cultural, religious, and political belief systems interpret the world around them through those beliefs.
- Sociological Theory - the ability to use and evaluate both classical and contemporary perspectives in sociological theory.
- Methodology - the ability to interpret and evaluate several of the major social science research methodologies, as well as the relationship between research questions and appropriate methods.
- Substantive Areas - the ability to demonstrate knowledge of multiple key substantive areas within the field of sociology and evaluate competing perspectives.
- Social Justice in the Jesuit Tradition - the ability to articulate and evaluate how sociological insights should inform a commitment to social justice.

Sociology-Anthropology (BA)

This combined BA degree is designed for those students who are interested in both sociology and anthropology. It focuses on those areas of the two disciplines where there is convergence in theory and methods. Through the SANT major, students are introduced to major substantive areas in both disciplines. The major allows enough choice in electives that students may focus on a broader perspective in social science than is available in either the single sociology major or the single anthropology major.

SOCL 365	Social Theory & Social Research (EL, WI)	
Total Hours		**36**

Students interested in pursuing the joint Sociology-Anthropology major should consult one of the departmental Chairpersons or Undergraduate Program Directors.

Suggested Sequence of Courses

Students can begin the Sociology-Anthropology (BA) degree at any point in their undergraduate studies, in consultation with their advisor. While there is no set sequence of classes, students are encouraged to take SOCL 101 Society in a Global Age and ANTH 100 Globalization and Local Cultures or ANTH 102 Culture, Society, and Diversity early on, since these classes are often (but not always) pre-requisites for higher level classes. Once students have declared the major, they are encouraged to contact their advisor for further guidance on how best to progress with their studies.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Students who complete the combined Sociology-Anthropology degree will:

- Acquire an understanding of the major substantive areas in both anthropology and sociology

- Become familiar with areas where there is convergence in theory and methods in the two disciplines as well as how the disciplines are distinct
- Gain a broader perspective in social science than is available in either the single Sociology major or the single Anthropology major
- Develop skills to analyze multiple kinds of social science data and communicate social science knowledge verbally and in writing

Theology

Thinking Theologically

All the degree programs offered by the Department of Theology, from undergraduate core classes to advanced Ph.D. seminars are designed to provide students with resources for the analysis of religion; for investigation of the sources, historical development and contemporary practices of particular religious traditions - principally the Roman Catholic tradition, although attention is given to other Christian traditions as well as Judaism, Islam and eastern religions; and for the critical appropriation of these traditions for one's personal faith and for sympathetic appreciation of the beliefs of others.

The best of contemporary Roman Catholic thought embraces dialogue and engagement with multiple religious traditions. And, so, the Theology Department at Loyola University Chicago welcomes dialogue with the diverse Christian and non-Christian traditions.

Theological thinking seeks not only an understanding of the nature of religion. It also seeks an understanding of the relationship of the Christian tradition to a contemporary world where social, political, and economic structures are often unjust; where secular faiths arise and challenge the self-evidentness of the Christian faith; and where scientific and technological advances pose new problems for human self-understanding.

Statement of Current Department Undergraduate Learning Goals

As teacher-scholars in the fields of Theology and Religious Studies within Loyola University Chicago's Department of Theology, we identify the following as fundamental learning goals for the undergraduate students whom we have the privilege to teach and learn. These goals express our hopes for, and our promise to, our students throughout their learning experience with us; while no single one of our courses likely achieves all of these goals (or even necessarily all of any one goal), we aim to provide a learning environment across the sum of our courses in which students may achieve all four.

- Expand awareness and critical openness to the complex interaction of religion and human experience, the diverse ways that this experience has been expressed by individuals and communities around the world, and the theological reflection on that experience in the Christian tradition.
- Deepen understanding and interpretation in the areas of religious studies and Christian theology using the fields' best methods and the best interdisciplinary resources within the university.
- Sharpen evaluative skills regarding the cognitive, ethical, and aesthetic impact of religions on human life and the natural world.
- Encourage action utilizing theological and religious studies backgrounds for the betterment of human society and the natural world.

Theology Department Policies

Double-Dipping Policy

- Students may not major and minor in the same discipline.
- Majors: Not less than 21 credit hours in the individual student's transcript must be unique to each major; that is, the courses in question are considered as actually fulfilling requirements of one major, not of more than one major
- Minors and interdisciplinary minors: not less than 8 credit hours in the individual student's transcript must be unique to each minor; that is, the courses in question are considered as actually fulfilling requirements of one minor, not of more than one minor or major.
- General exceptions to Rules 2 and 3 will be made if approved by the chairs/directors of the department(s)/program(s) housing each affected major and minor. A list of standing general exceptions will be maintained by the Dean's office.
- Individual student exceptions may be made in appropriate cases by department chairs and program directors.
- Departments and Programs may enforce stricter double-dipping policies than those stated above, which also should be provided to the Dean's Office.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Theology (THEO)

THEO 100 Christian Theology (3 Credit Hours)
This course is an introduction to reflection on and analysis of the Christian theological tradition.
Knowledge Area: Foundational Theological Knowledge
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: ACTHE 101 / THEO 100
Outcomes:
Students will be able to demonstrate understanding of the tasks of Christian theology in its efforts to understand the human situation from the perspective of faith, various challenges to theology in the contemporary world, and will focus on one or more current theological issues

THEO 107 Introduction to Religious Studies (3 Credit Hours)
This course is an introduction to the contemporary field of religious studies, focusing on both the theoretical investigations of religious traditions, as well as on the study of selected religious texts and practices (such as creation stories, sacred biographies, sacred scriptures of a religious tradition(s) rituals, ritual taboos, religiously motivated behaviors.
Knowledge Area: Foundational Theological Knowledge
Course equivalencies: THEO170 / THEO270 / ACTHE 107
Outcomes:
Students will be able to analyze and interpret various ways in which religious traditions intersect with contemporary issues

THEO 185 Christian Ethics (3 Credit Hours)
Introduction to Christian Ethics is a core course that explores the major sources, methods, and insights of Christian social and theological ethics. Particular attention is given to Roman Catholic thought. The course will concentrate on the foundational sources in Christian ethics and examine the moral significance of major theological themes and affirmations.
Knowledge Area: Ethics
Outcomes:
Students will identify the major sources of Christian ethics (Scripture, Church tradition, philosophy, the social and human sciences, and human experience), and gain practice in identifying how different thinkers use, interpret, and prioritize these sources

THEO 186 Global Religious Ethics (3 Credit Hours)
Religious Ethics explores fundamental moral sources and methods in Christian ethics in dialogue with the ethical understandings of at least one other religious tradition, and with special attention to Roman Catholic thought. In doing so, it explores moral issues faced by individuals and communities from theological perspectives, particularly mindful of how the economic, political and cultural structures in a religiously plural world affect those issues.
Knowledge Area: Ethics
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Outcomes:
In this course, students will explore and compare the ethical understandings of Christianity and at least one other religious tradition; With respect to each tradition, students will learn about the foundational sources, doctrines and questions that guide its ethical thinking

THEO 190 Loyola's Mission: Ignatian Traditions (3 Credit Hours)
The course introduces students to LUC's mission through theological reflection on the main themes of the Transformative Education mission-statement: spirituality and faith, interlinked human knowing, moral compass, civic and environmental responsibility.
Course equivalencies: THEO190 / THEO290
Outcomes:
Integration into the LUC community, ethos, and vision

THEO 203 Social Justice and Injustice (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
The course introduces students to Catholic and Protestant approaches to social justice. Students will also study theories and analyses of social injustice. Students will study specific instances of social injustice (gender, race, and class). It will increase student awareness of diversity, in the United States and globally.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Bioethics, Peace, Justice, and Conflict Studies, Race and Ethnicity
Outcomes:
Summarize relevant social, economic, policy history/context that related to current sites of injustice related to racial-ethnic inequalities, economic inequality, immigration status, healthcare, and sex/gender inequality; Distinguish among distinct theories of justice in both theological and philosophical thought; Describe the moral challenges posed by injustice; Relate key ideas, traditions, & practices in Christian theological, philosophical, and other religious thought that may help individuals and societies move closer to approximating justice in society/world

THEO 204 Religious Ethics and the Ecological Crisis (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
Advances in technology and industry confront us with unprecedented abilities for altering long standing climate patterns. These capacities challenge many traditional religious and ethical assumptions about humanity and our relationship to the nonhuman world. We will examine the resources that religious traditions of the world offer for promoting ecological responsibility.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Bioethics, Catholic Studies, Peace, Justice, and Conflict Studies
Outcomes:
students will be able to:*Summarize relevant history related to scientific, policy & political data and decisions *Describe central scientific and ethical challenges posed by the climate crisis *Relate key ideas, traditions, & practices in Christian theological, philosophical, and other religious thought that may help address this crisis

THEO 214 Introduction to the Qur'an (3 Credit Hours)
This course provides an introduction to the central Islamic scripture, the Qur'an in terms of its main features and themes, and as a basis for the theological and ethical teachings of Islam, employing both classical interpretive traditions and contemporary academic approaches. Outcome: Students will be able to demonstrate and understanding of the nature of the main Islamic scripture, the Qur'an, and its influence on Muslim beliefs, ethical understandings, and social and religious practices.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Black World Studies

THEO 231 Hebrew Bible/Old Testament (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to the Old Testament / Tanakh (Hebrew Scriptures).
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Middle East and Islamic World Studies
Outcomes:
Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 232 New Testament (3 Credit Hours)
Pre-requisites: THEO 100 or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to the historical and theological reading of the various documents of early Christianity known as the New Testament.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-THEO112/CATH112
Outcomes:
Students will be able to demonstrate understanding of the literary genres found in the New Testament and explain why the recognition of genre is essential to the interpretation of the New Testament, as well as the importance of how the New Testament documents have reached their present state

THEO 265 Sacraments and the Christian Imagination (3 Credit Hours)
Pre-requisites: THEO 100 or equivalent; please check requirements for declared majors/minors for exceptions
This course studies the realities of Christian faith life as expressed and celebrated in the concrete rituals of the Christian communities.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-THEO265/CATH106
Outcomes:
Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts such as poetry, music, painting, literature, and film, and recognize and interpret the impact of history and cultures on the development of Christian doctrine and practices

THEO 266 Church & Global Cultures (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to ways in which the Christian churches, and primarily the Roman Catholic Church, understand and enact their identity in relation to the secular world of culture, economics, and politics, both nationally and globally.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies, Italian Studies
Course equivalencies: X-THEO105/CATH105
Outcomes:
Students will be able to analyze and interpret contrasting Christian understandings of the notion of original sin, and demonstrate knowledge, with attention to historical development, of the central texts, beliefs, ethical understandings, and practices of at least one religious tradition

THEO 267 Jesus Christ (3 Credit Hours)
Pre-requisites: THEO 100 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the life of Jesus Christ, utilizing the Gospels, the writings of Paul and other biblical authors, the early ecumenical councils, and the history of church doctrine, including contemporary scholarship.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies
Course equivalencies: THEO104/CATH104
Outcomes:
This course examines the life of Jesus Christ, utilizing the Gospels, the writings of Paul and other biblical authors, the early ecumenical councils, and the history of church doctrine, including contemporary scholarship

THEO 272 Judaism (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to Judaism.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Global Studies, Middle East and Islamic World Studies
Course equivalencies: THEO172/THEO272/INTS172
Outcomes:
Students will be able to name and discuss some of the most important Jewish scriptures, articulate the general outline of the historical evolution of Judaism, and define and discuss key concepts, terms, values, and religious practices foundational to Judaism

THEO 276 Black World Religion (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the revelatory manner in which the divine comes to unique presence and expression among African peoples throughout human history. It will examine the religious experiences and traditions of: Africa's ancient Nile valley civilizations, long recognized as cradling the world's spiritual and philosophical wisdom and as influencing the formative development of Judaism, Christianity, and Islam.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will demonstrate their knowledge of African peoples' religious experiences within their various historical and cultural contexts

THEO 278 Religion & Gender (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course will study the role of women in at least one (if not more) of the major world religious traditions.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: THEO178/THEO278/WSGS278
Outcomes:
Students will be able to demonstrate understanding of the influence of religion on gender roles, and how women in the contemporary world are reinterpreting their religious traditions

THEO 279 Roman Catholicism (3 Credit Hours)
Pre-requisites: THEO 100 or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to Roman Catholicism.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies, Italian Studies
Course equivalencies: THEO179/THEO279/CATH179
Outcomes:
Students will be able to demonstrate understanding of the most important Roman Catholic beliefs, the historical evolution of Roman Catholicism, the key Roman Catholic concepts, terms, values, and religious practices, and the main lines of current Roman Catholic identity in today's world

THEO 280 Religion & Interdisciplinary Studies (3 Credit Hours)
Course topics will rotate to incorporate the study of religion in a variety of other disciplines. Focus will be on the influence or application of religious teachings and traditions in the fields of healthcare, politics, education, etc.
Knowledge Area: Tier 2 Theological Knowledge
Course equivalencies: THEO180 / THEO280
Outcomes:
Describe the ethical implications of the religious beliefs and traditions of at least one religion for the primary field of study

THEO 281 Christianity Through Time (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
The course is a survey course in the history of Christian thought. Not a course in Church history, this is a course whose primary goal is to investigate the major interactions between Christian thought and practice and the cultures that it has been a part of in its two thousand year history.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies, German Studies, Medieval Studies
Course equivalencies: THEO181/ THEO281/CATH181
Outcomes:
Students will learn to analyze and interpret religious texts, beliefs and practices using standard scholarly methods and tools

THEO 282 Hinduism (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to Hinduism.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: THEO196/ASIA196/INTS294
Outcomes:
Students will be able to demonstrate understanding of the most important Hindu scriptures, the general outline of the historical evolution of Hinduism, the key Hindu concepts, terms, values, and religious practices, and the basic narratives and imagery of Hinduism

THEO 293 Christian Marriage (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the Christian understanding of marriage.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies
Course equivalencies: THEO193/THEO293/CATH193
Outcomes:
Students will be able to demonstrate understanding of historical & ethical principles used to evaluate particular issues relevant to the understanding of the Christian tradition of marriage

THEO 295 Islam (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course will provide an introduction to Islam.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Arabic Language and Culture, Asian Studies, Global Studies, Middle East and Islamic World Studies
Course equivalencies: THEO195/ASIA195/INTS295/IWS195
Outcomes:
Students will be able to demonstrate understanding of the most important Muslim scriptures, the general outline of the historical evolution of Islam, the key Islamic concepts, terms, values, and religious practices, and the diversity within Islam

THEO 297 Buddhism (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to Buddhism.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: THEO197/ASIA197/INTS297
Outcomes:
Students will be able to demonstrate understanding of the most important Buddhist scriptures, the general outline of the historical evolution of Buddhism, including its different major branches, and the key Buddhist concepts, terms, values, and religious practices

THEO 299 Religions of Asia (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
An introductory survey of selected teachings, institutions, and practices of the great religious traditions of South Asia and East Asia placed in historical context.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Asian Studies, Global Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-THEO199/ASIA199/INTS199
Outcomes:
Students will be able to demonstrate understanding of the central texts, beliefs, ethical understandings, and practices of at least three Asian religions

THEO 302 Wisdom Literature and Psalms (3 Credit Hours)
Pre-requisites: THEO 111
A study of the wisdom literature of the Old Testament, attention to the nature of the wisdom tradition in Israel; study of the Psalms as the prayer of Israel.
Outcomes:
Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 303 Pentateuch (3 Credit Hours)
Pre-requisites: THEO 111
The literary structure of the first five books of the Bible.
Outcomes:
Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 304 Israel Conquest to Exile (3 Credit Hours)
Pre-requisites: THEO 111
A study of the so-called historical books of the Bible (Joshua, Judges, Samuel, Kings) with attention to the history of Israel from conquest to exile.
Outcomes:
Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 308 Biblical Hebrew I (3 Credit Hours)
The sound, forms and grammar of biblical language. Selected readings from the Old Testament.
Course equivalencies: X-THEO308/CLST101
Outcomes:
Students will demonstrate an understanding of Biblical Hebrew

THEO 309 Biblical Hebrew II (3 Credit Hours)
Pre-requisites: THEO 308
Further study of biblical language. Selected readings from the Old Testament.
Course equivalencies: X-THEO309/CLST102
Outcomes:
Students will demonstrate an understanding of Biblical Hebrew

THEO 311 The Meaning of Jesus Christ (3 Credit Hours)
Pre-requisites: THEO 104
Interpretations of the person and work of Jesus.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will be able to demonstrate understanding of the nature of Jesus Christ as both human and divine, what this might mean, how this formulation was derived, and the varieties of understanding of Christ within the Scriptures, the church, and modern scholarship

THEO 313 Gospels of Matthew, Mark & Luke (3 Credit Hours)
Pre-requisites: THEO 112
An analysis of the development of the synoptic tradition (the gospels of Matthew, Mark and Luke).
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will be able to demonstrate understanding of the various literary elements found in these particular gospels

THEO 314 Topics in Biblical Studies (3 Credit Hours)
This variable-topics course will focus on a specific method, theme, or topic in biblical scholarship. Areas of focus may include methods in biblical scholarship, thematic studies of the biblical canon, extracanonical literature, traditions of commentary on the biblical text, and historical, social, cultural, and economic realities pertinent to understanding and interpreting biblical texts.
Outcomes:
Students will analyze the relevant biblical and related ancient literature in light of the course's special topic, theme, or method; Students will critically evaluate biblical and ancient studies scholarship on the course topic, demonstrating awareness of the current state of scholarly debates; If the special topic is (or includes) a method of biblical or ancient scholarship, students will understand and utilize the method in the study of biblical literature and/or ancient literature relevant to biblical studies

THEO 317 Christian Thought: Ancient-Medieval (3 Credit Hours)
The development of various Christian doctrines in light of their historical milieu during the first fourteen centuries of Christian thought.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-THEO317/CATH317/MSTU360
Outcomes:
Students will be able to assess how various configurations of theological perspectives can both expand and foreshorten the way human thinking has gone on

THEO 318 Christian Thought: Reformation to Modern (3 Credit Hours)
The development of various Christian doctrines in light of their historical milieu during the last six centuries of Christian thought.
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: X-THEO318/CATH318
Outcomes:
Students will be able to assess how various configurations of theological perspectives can both expand and foreshorten the way human thinking has gone on

THEO 330 Liberation Theology (3 Credit Hours)
An introduction to the contemporary theologies of liberation emerging in Latin American, African, and Asian Christian.
Interdisciplinary Option: Catholic Studies, Global Studies, Latin American Studies
Course equivalencies: X-THEO/INTS/LASP330/PAX332
Outcomes:
Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 331 Theology of Secularization (3 Credit Hours)
An exploration of the history of secularization and the context it establishes for American Christianity. Focus on practical issues of Christian living.
Outcomes:
Students will be able to analyze and interpret various ways in which religious traditions intersect with contemporary issues

THEO 340 Foundations of Christian Morality (3 Credit Hours)
A survey of theological and philosophical issues which shape the articulation of specific moral principles.
Outcomes:
Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 342 Perspectives on Life and Death (3 Credit Hours)
Examination of the exploration of our perception of the life range for possible reevaluation and rearticulation, in view of modern scientific developments.
Interdisciplinary Option: Bioethics
Course equivalencies: X-THEO342/BIET342
Outcomes:
Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 343 Contemporary Christian Sexuality (3 Credit Hours)
Examination of inter-religious perspectives in contemporary sexual ethics.
Interdisciplinary Option: Bioethics
Course equivalencies: X-THEO343/BIET343
Outcomes:
Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 344 Theology and Ecology (3 Credit Hours)
Examination of the ecological, ethical and theological analyses of humanity's relationship to the natural world.
Interdisciplinary Option: Bioethics
Course equivalencies: X-THEO344/ESP 344/BIET344
Outcomes:
Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 348 Supervised Ministry (3 Credit Hours)
Placement in a ministerial position, on-site supervision, and biweekly individual or group meetings with the course director is required. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts

THEO 349 Theological Topics for the Bioethics Capstone (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include bio-technologies, concepts of race and gender, the environment, reproduction, and others. This course number provides an elective for Theology students when the Bioethics capstone's topic is theological.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and scientific issues with regard to the special topic in theology

THEO 350 Topics in Islam (3 Credit Hours)
A deeper and more focused study of significant aspects of the religion of Islam.
Interdisciplinary Option: Asian Studies, Global Studies, Middle East and Islamic World Studies
Course equivalencies: XTHEO350INTS387ASIA350IWS350
Outcomes:
Students will be able to demonstrate understanding of Islam

THEO 352 Topics in Buddhism (3 Credit Hours)
A deeper and more focused study of significant aspects of Buddhism.
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: X-THEO352/INTS352/ASIA352
Outcomes:
Students will be able to demonstrate understanding of Buddhism

THEO 353 Religious Traditions (3 Credit Hours)
This course investigates the historical, social, ritual and reflective positions of one or more religious traditions. It likewise develops the student's abilities to use contemporary methods of historical, theological, and social scientific analysis of religious traditions.

THEO 356 Topics in Judaism (3 Credit Hours)
A deeper and more focused study of significant aspects of Judaism.
Outcomes:
Students will be able to demonstrate understanding of Judaism

THEO 365 Women, Gender and Embodiment in Islam (3 Credit Hours)
This course will consider gender both as articulated in normative Islamic religious and legal systems and as embodied during various historical periods in a range of Muslim societies.
Interdisciplinary Option: Arabic Language and Culture, Asian Studies, Global Studies, Middle East and Islamic World Studies, Women & Gender Studies
Course equivalencies: THEO/ASIA/INTS/WSGS/IWS365
Outcomes:
Students will read a number of the most important academic studies in this field and consider anthropological and cultural materials including films and short stories that disclose Muslim practices and concepts of maleness, femaleness, and gender relations

THEO 366 Contemporary Islamic Thought and Movements (3 Credit Hours)
This course will consider contemporary Islamic thought and movements world-wide. After a brief introduction to Islam and the historical development of the tradition up to the present, students will learn about a range of contemporary Muslim intellectual and activist movements and thinkers through the study of original writings and secondary analysis. Some major figures to be considered include: Syed Maududi, Sayyid Qutb, Fazlur Rahman, and other Muslim intellectuals representing movements such as Jama'at-i Islami, the Muslim Brotherhood, and Islamic liberalism. We will focus on the 20th century up to the most current trends. Some of the theological and social issues that will be discussed are gender, the ideal political order, Islamic law and its role in society, and pluralism.
Interdisciplinary Option: Asian Studies, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-THEO/ASIA/IWS366/INTS366A

THEO 373 Theology Capstone (3 Credit Hours)
Students enrolling in this course must have junior status and be Theology majors. This 3 credit capstone course gives students an opportunity to integrate various aspects of their theological education, drawing upon the major sources of Christian and Catholic tradition, including Scripture, History, Systematic Theology, and Ethics.
Outcomes:
Students will be able to demonstrate an understanding of the varied sources within Christian theological traditions and how to make reasoned theological arguments

THEO 378 Theology and Culture (3 Credit Hours)
This course can count as an elective for the major or minor. The course will be divided into three parts: (1) an exploration of the interaction between theological reflection & culture; (2) a look at some theological texts that compare Christian and non-Christian practices and practices in the U.S. where different cultural understandings interact; (3) a study of postmodernism.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 382 Readings-Liturgy (3 Credit Hours)
Examination of the readings, prayers, songs, rites of contemporary liturgies. Comparison of these materials with those of traditional liturgies and evaluation of the underlying principles.
Outcomes:
Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts

THEO 383 Theology Arts & Literature (1-3 Credit Hours)
Study of theological and religious symbols and themes in modern literature and/or in the arts.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-THEO383/ENGL383/CATH383
Outcomes:
The student who successfully completes this course will be able to demonstrate knowledge about religion and its intersections with selected contemporary ethical, social, political, economic, or cultural issues

THEO 392 Readings in Theology (3 Credit Hours)
A reading course with variable content in the area of theology. Open to major and non-majors with permission of instructor.

THEO 393 Seminar (3 Credit Hours)
An undergraduate seminar course for majors and minors in the Theology department; variable content, addressing topical issues that are not covered by the regular offerings at the 300 level.
Outcomes:
Students will gain an in-depth understanding of a selected topic

THEO 395 Theology Tutorial (3 Credit Hours)
Tutorials for seniors on selected topics in biblical, systematic, historical or moral theology.
Outcomes:
Students will gain an in-depth understanding of a selected topic

Honors/Distinction in Theology

Awards, Honors & Graduates

Undergraduate Paper Contest

Three prizes are awarded annually to encourage publication-level work in the fields of theology and religious studies.

The Karl Rahner Award for Excellence in Theological Studies

Awarded to the Theology Major with the highest GPA in their Major and the highest GPA in their Academic Program, overall.

The Ninian Smart Award for Excellence in Religious Studies

Awarded to the Religious Studies Major with the highest GPA in their Major and the highest GPA in their Academic Program, overall.

First Honors

First Honors in Theology is awarded to students with an overall GPA of 3.5 and a GPA of 3.7 in their theology courses.

Second Honors

Second Honors in Theology is awarded to students with an overall GPA of 3.3 and a GPA of 3.5 in their theology courses.

Departmental Distinction

Graduation with Departmental Distinction is awarded to students who qualify for First Honors and who have taken two additional Theology courses at the 300 level beyond the requirements for the major.

Certificate of Merit

This award is given to a graduating senior with an average above 3.5 in the Theology major. No minimum overall GPA is specified.

Pastoral Leadership Minor

As of Fall 2026, this minor is no longer accepting students.

True to its Jesuit Catholic heritage, Loyola adheres to its promise of preparing people to lead extraordinary lives. The Pastoral Leadership minor provides students with academic opportunities through a structured curriculum that supports the university's mission of seeking God in all things and working to expand knowledge in the service of humanity through learning, justice and faith. Students benefit from supervised leadership and service experiences that equip them with the knowledge and skills necessary for contemporary pastoral leadership.

The Pastoral Leadership minor affords a structured curriculum for students from all religious traditions to gain academic capacities commensurate with their leadership experience in Loyola's University Ministry and in other co-curricular and community contexts. Though the program has its foundations in the Christian (Catholic) tradition, it is open to all who are interested in experiencing what pastoral ministry could mean for their future.

In particular, the minor helps students:

- Understand the foundation of Christian theology in areas such as scripture, sacrament, ecclesiology and tradition in forming pastoral leadership.
- Gain skills in the areas of leadership practices, social and cultural analysis, and organizational development as applied to pastoral leadership.
- Demonstrate an understanding of one's faith and its call to leadership.
- Articulate a personal pastoral theology and model of pastoral leadership as it applies to a particular religious mission or identity.

Related Programs

Major

- Theology (BA) (p. 662)

Minor

- Religious Studies Minor (p. 661)
- Theology Minor (p. 665)

Curriculum

The Pastoral Leadership Minor requires six courses. Students must complete three courses at the 100/200 level, preferably in the areas of Christian doctrine, Biblical Literature, and Christian Ethics, though the final selection is up to the individual student. Three courses at the 300-level are required. THEO 347 Creative Ministry and THEO 348 Supervised Ministry are required.

The pastoral leadership minor is offered by the Department of Theology (LSC) in conjunction with the Institute for Pastoral Studies located downtown (WTC).

Please note that students who complete the minor will also be granted 'advanced standing' towards a MA degree in Pastoral Studies or in Social Justice at the Institute for Pastoral Studies should they wish to pursue a graduate degree in one of their programs at a later date.

Transfer-Student Residency Requirement

At least 9 credit hours of PASL-MINR requirements must be completed at Loyola.

Learning Outcomes

Students completing the Pastoral Leadership Minor should be able to:

- the sources and historical development of beliefs and practices of Christianity with particular attention to the Roman Catholic tradition;
- the application of scholarly methods to the understanding of scripture;
- key theological concepts and doctrines of the Christian faith (e.g., Christology, trinity, ecclesiology, sacramental theology, etc.);
- foundational knowledge of at least one other religious tradition outside of Christianity.
- Demonstrate an understanding of how Christian perspectives and sources inform responses to pressing ethical questions.
- Display basic good practices of service and leadership within a supervised pastoral setting.

Religious Studies (BA)

As of Fall 2026, this program is no longer accepting applicants.

Students in the field of religious studies gain a basic knowledge of the history, central texts (where applicable), beliefs, and practices of religious traditions and develop skills that enable them to discern the religious dimensions of our political, social, and cultural life.

Related Programs

Major

- Theology (BA) (p. 662)

Minor

- Pastoral Leadership Minor (p. 657)
- Religious Studies Minor (p. 661)

Curriculum

Students may pursue one of three tracks in the religious studies major:

- the standard major;
- an honors track; and
- an interdisciplinary studies track

The honors track is a more rigorous version of the standard major and is intended for students seeking to pursue graduate studies in the field of religious studies or who plan to teach religious studies in high school. Students in the field of religious studies gain a basic knowledge of the history, central texts (where applicable), beliefs, and practices of religious traditions and develop skills that enable them to discern the religious dimensions of our political, social, and cultural life. This new

interdisciplinary studies track is designed so that students may take the religious literacy gained from their religious studies coursework and relate that knowledge to other areas of study such as health, political science and global studies, education, the various areas within the humanities, and journalism. One course in the interdisciplinary studies major in particular is designed to help students with this task of relating knowledge gained from religious studies to other disciplines. In THEO 280, students will undertake a research project that integrates knowledge gained from their coursework in religious studies with another discipline.

Requirements

All major tracks require 36 hours of coursework - seven (7) required courses and five (5) electives. At least five (5) of the 12 courses required for the major must be at the 300-level or higher.

Code	Title	Hours
Christian Traditions		
Select one of the following:		3
THEO 100	Christian Theology [1,2]

THEO 353	Religious Traditions [5]	
For the Interdisciplinary Studies track:		
THEO 280	Religion & Interdisciplinary Studies [6]	
Total Hours		**36**

1 Eligible students in the **Standard Major and the Interdisciplinary Studies Track** may substitute HONR 101 Western Traditions - Antiquity to the Middle Ages/HONR D101 Developments Western Thought I Discussion, THEO 190 Loyola's Mission: Ignatian Traditions, or PHIL 190 Loyola's Mission: The Philosophical Vision for THEO 100 Christian Theology.

2 Eligible students in the **the Honors Track** may substitute HONR 101 Western Traditions - Antiquity to the Middle Ages/HONR D101 Developments Western Thought I Discussion for the Doctrine requirement.

3 THEO 200 level or higher. Up to three (3) courses may be taken outside of the Theology department with prior permission from the undergraduate program director. For students in the **Interdisciplinary Studies track**, two 300 level electives courses must be taken in a single discipline if outside of Theology.

4 With prior approval from the undergraduate program director, students may replace THEO 353 Religious Traditions with THEO 373 Theology Capstone. THEO 280 Religion & Interdisciplinary Studies must be taken as an **Engaged Learning Course**.

5 With prior approval from the undergraduate program director, students may replace THEO 353 Religious Traditions with THEO 373 Theology Capstone

6 THEO 280 Religion & Interdisciplinary Studies must be taken as an **Engaged Learning Course**.

THEO 280 Religion & Interdisciplinary Studies may be taken to fulfill a major requirement, depending on the course topic. Please consult your department for more information.

Suggested Sequence of Courses

The Standard Major

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for the major. Students should consult the undergraduate program director for assistance with course selection.

Hours	**3**
Total Hours	**36**

Additional Requirements for the Honors Track

Students may apply for the Honors track after the completion of Theology Core.
At least a 3.5 GPA in the major and in overall coursework is required.

Transfer-Student Residency Requirement

At least 18 credit hours of RELS-BA requirements must be completed at Loyola

Double-Dipping Policy

This department observes the CAS Double-Dipping Policy (p. 54) regarding unique credits required for each declared major/minor.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Students completing the major should be able to:

- Explain the history of different ways of defining the category of religion.
- Compare aspects of two or more religions within their particular contexts.
- Identify relationships between aspects of a religion and other social contexts.
- Analyze approaches to ethics in two or more religions while noting internal diversities.
- Produce an original research paper using theory and methods found in religious studies.

Religious Studies Minor

Loyola University Chicago offers a minor in Religious Studies in the Department of Theology.

Related Programs

Major

- Religious Studies (BA) (p. 658)
- Theology (BA) (p. 662)

Minor

- Pastoral Leadership Minor (p. 657)
- Theology Minor (p. 665)

Curriculum

A minor in Religious Studies requires 6 courses taken from within the Theology department. In addition to the three required Core-level courses, three electives must be taken at the 300 level. Students must study at least two (2) major world religions and take a range of other courses. Each program is individually tailored to fit the student's plans in consultation with the undergraduate program director.

Transfer-Student Residency Requirement

At least 9 credit hours of RELS-MINR requirements must be completed at Loyola.

Double-Dipping Policy

This department observes the CAS Double-Dipping Policy (p. 54) regarding unique credits required for each declared major/minor.

Learning Outcomes

Students completing the Religious Studies Minor should be able to:

- Explain the history of different ways of understanding the category of religion.
- Describe two or more religions within their particular contexts.
- Describe relationships between a religion and other social contexts.
- Describe approaches to ethics in two or more religions while noting internal diversities.
- Write a research paper using academic sources and methods in Religious Studies.

Theology (BA)

Loyola University Chicago offers a Bachelor of Arts degree in Theology.

Related Programs

Major

- Religious Studies (BA) (p. 658)

Minor

- Religious Studies Minor (p. 661)
- Theology Minor (p. 665)

Curriculum

Students may pursue one of three tracks in the theology major - the standard major, an honors track, and an interdisciplinary studies track. The honors track is a more rigorous version of the standard major and is intended for students seeking to pursue graduate studies in the field of theology or who plan to teach theology in a Jesuit high school. The interdisciplinary studies track is intended for two cohorts of students - students seeking to integrate knowledge from another discipline into their studies in theology; students seeking to bring knowledge from theology into their studies in another discipline (many of whom will be students who wish to double major in theology and another discipline).

Requirements

The Standard theology major requires 36 hours of coursework - seven (7) required courses and five (5) electives.

For the Standard Major, at least five (5) of the 12 courses required for the major must be at the 300-level or higher. **For the Honors Track and Interdisciplinary Track,** At least seven (7) of the 12 courses required for the major must be at the 300-level or higher.

Transfer-Student Residency Requirement

At least 18 credit hours of THEO-BA requirements must be completed at Loyola

Double-Dipping Policy

This department observes the CAS Double-Dipping Policy (p. 54) regarding unique credits required for each declared major/minor.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Students completing the major should be able to:

- Analyze a biblical text using academic tools.
- Accurately identify basic sources and key historical moments in the development of beliefs and practices of Christianity, with a particular focus on the Roman Catholic tradition.
- Demonstrate foundational knowledge of at least one other religious tradition outside of Christianity.
- Analyze multiple approaches to a key theological concept or doctrine of the Christian faith (e.g., Christology, trinity, theological anthropology, ecclesiology, sacramental theology, etc.).
- Evaluate multiple Christian thinkers use sources (e.g. scripture, tradition, reason, experience, the natural and social sciences) in Christian ethics.
- Produce research that integrates theological, ethical, and religious knowledge.

Theology Minor

Loyola University Chicago offers a minor in Theology.

Related Programs

Transfer-Student Residency Requirement

At least 9 credit hours of THEO-MINR requirements must be completed at Loyola.

Double-Dipping Policy

This department observes the CAS Double-Dipping Policy (p. 54) regarding unique credits required for each declared major/minor.

Learning Outcomes

Students completing the Theology Minor should be able to:

- Accurately describe basic sources and historical development of beliefs and practices of Christianity, with a particular focus on the Roman Catholic tradition.
- Analyze a biblical text using academic tools.
- Compare at least two different approaches to basic theological concepts.
- Analyze and critically evaluate arguments from at least two different Christian ethicists on a contemporary ethical issue.
- Describe beliefs and practices of one religion other than Christianity.

Urban Studies Interdisciplinary Program

Seeking Solutions to Pressing Urban Issues in Partnership with Chicago Communities.

The Urban Studies minor provides students with a unique opportunity to gain an understanding of how a city works. An interdisciplinary program

of the College of Arts and Sciences, Urban Studies combines coursework in fields like sociology, psychology, history, philosophy, criminal justice, economy, environmental studies, and political science. Not only do students study social, political, economic, and cultural institutions in Chicago (and beyond), but they also get involved in research projects with community organizations seeking solutions to pressing urban issues.

The minor consists of two tracks:

- General Track (p. 667): Receive a broad introduction to themes and issues such as urban politics and community life, as well as racial, ethnic, and economic inequality.
- Environmental Sustainability Track (p. 668): Focus on both sustainability in the social world (e.g. health, housing, education, jobs, and community) and in the physical environment (e.g. water, air, and soil).

Undergraduate Programs

- Urban Studies Minor (p. 667)
- Urban Studies Sustainability Minor (p. 668)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Urban Studies (URB)

URB 397 Urban Studies Research (3 Credit Hours)
Pre-requisites: Junior or Senior standing
In Urban Studies Research, undergraduates work on collaborative, community-based research projects through CURL (Center for Urban Research and Learning). The research teams include graduate students, faculty, and community leaders. This course must be taken concurrently with SOC/PLSC 335 Students will contribute to a research project that addresses inequities in urban communities.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-PLSC397/URB397

Urban Studies Minor

Seeking Solutions to Pressing Urban Issues in Partnership with Chicago Communities.

The Urban Studies minor provides students with a unique opportunity to gain an understanding of how a city works. An interdisciplinary program of the College of Arts and Sciences, Urban Studies combines coursework in fields like sociology, psychology, history, philosophy, criminal justice, economy, environmental studies, and political science. Not only do students study social, political, economic, and cultural institutions in Chicago (and beyond), but they also get involved in research projects with community organizations seeking solutions to pressing urban issues.

The distinctive capstone of the minor consists of two courses: Urban Studies Seminar and Urban Studies Research. In the seminar, students learn about contemporary urban policy from readings, discussions, guest speakers, and neighborhood tours. In the research course, students contribute to a community-based, collaborative research project (housed at the Center for Urban Research and Learning – CURL (https://www.luc.edu/curl/)) where they work with graduate students, faculty, community organizations, and government agencies.

Related Programs

Minor

- Race Ethnicity Interdisciplinary Minor (p. 634)
- Sociology Minor (p. 647)
- Urban Studies Sustainability Minor (p. 668)

Curriculum

The General track gives students a broad introduction into themes and issues within the broader field of Urban Studies. As an interdisciplinary minor, students in the General track are able to select from several disciplinary lenses to better understand urban areas and the issues they face. In addition, students will – in the capstone research course – contribute to active solutions to many of the issues facing local communities.

Course Requirements

Double Dipping Policy

Urban Studies follows the College policy for Double Dipping: Not less than 8 credit hours in the individual student's transcript must be unique to each minor; that is, the courses in question are considered as actually fulfilling requirements of one minor, not of more than one minor or major.

Learning Outcomes

Students in the Urban Studies minor will:

- Understand the major developments, conflicts, and events that have shaped urban life
- Contribute to active solutions to many of the issues facing local communities
- Recognize the roots of urban social problems
- Develop a deeper understanding of the methods researchers use to study urban life

Urban Studies Sustainability Minor

As of Fall 2026, this program is no longer accepting students.

Seeking Solutions to Pressing Urban Issues in Partnership with Chicago Communities.

The Urban Studies minor provides students with a unique opportunity to gain an understanding of how a city works. An interdisciplinary program of the College of Arts and Sciences, Urban Studies combines coursework in fields like sociology, psychology, history, philosophy, criminal justice, economy, environmental studies, and political science. Not only do students study social, political, economic, and cultural institutions in Chicago (and beyond), but they also get involved in research projects with community organizations seeking solutions to pressing urban issues.

The distinctive capstone of the minor consists of two courses: Urban Studies Seminar and Urban Studies Research. In the seminar, students learn about contemporary urban policy from readings, discussions, guest speakers, and neighborhood tours. In the research course, students contribute to a community-based, collaborative research project (housed at the Center for Urban Research and Learning – CURL (https://www.luc.edu/curl/)) where they work with graduate students, faculty, community organizations, and government agencies.

Double Dipping Policy

Urban Studies follows the College policy for Double Dipping: Not less than 8 credit hours in the individual student's transcript must be unique to each minor; that is, the courses in question are considered as actually fulfilling requirements of one minor, not of more than one minor or major.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

With more than 8 million people, the Chicago Metropolitan area reflects the many complexities of urban life. Problems and solutions in the realm of politics, social life, education, and economics present themselves in a variety of subtle and not-so-subtle ways. Students in the Urban Studies minor will:

- Understand the major developments, conflicts, and events that have shaped urban life
- Contribute to active solutions to many of the issues facing local communities
- Recognize the roots of urban social problems
- Develop a deeper understanding of the methods researchers use to study urban life
- Appreciate the links among social and physical dimensions of the urban environment (Environmental Sustainability Track)
- Gain an understanding of sustainable policy solutions that bridge social science and natural science approaches (Environmental Sustainability Track)

Women's Studies and Gender Studies

Our mission is to introduce students to feminist scholarship and gender theory across the disciplines and the professional schools; to provide innovative, challenging, and thoughtful approaches to learning; and to promote social justice. The 2024-25 academic year marks our 45th year at Loyola.

The WSGS program is interdisciplinary, offering many cross-listed courses in the humanities, social sciences, and other disciplines. Additionally, we offer a dual-degree program at the graduate level in conjunction with the School of Social Work and actively pursue collaborations with other programs. WSGS faculty seek to integrate knowledge about women, gender, and sexuality into the theories and practices of various disciplines and professions across the university.

To contact us, click here (wsgsprogram@luc.edu).

Mission

- To promote deeper understandings of feminist scholarship and gender theory across the humanities, social sciences, and applied professions.
- To provide innovative, challenging, and thoughtful approaches to teaching and learning for both students and faculty.
- To acknowledge and honor the diversity of our human community—especially regarding gender, race, class, and sexuality—while working toward social justice.

- To build and cultivate a community of scholars who are supportive of one another and who carry out our mission in daily practice.

Undergraduate Programs

- Women's Studies and Gender Studies (BA) (p. 671)
- Women's Studies and Gender Studies Minor (p. 674)

Women's Studies and Gender Studies Program Policies

Double Dipping Policy

Per recommendations from the CAS's Academic Council, WSGS will adhere to and enforce the following policies:

- Students may not major and minor in the same discipline.
- Majors: Not less than 21 credit hours in the individual student's transcript must be unique to each major; that is, the courses in question are considered as actually fulfilling requirements of one major, not of more than one major.
- Minors and interdisciplinary minors: not less than 8 credit hours in the individual student's transcript must be unique to each minor; that is, the courses in question are considered as actually fulfilling requirements of one minor, not of more than one minor or major.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Women's and Gender Studies (WSGS) Courses

WSGS 101 Introduction to WSGS from a Global Perspective (3 Credit Hours)
This is an introduction to the interdisciplinary fields of both Women's Studies and Gender Studies which explore the ways that sex and gender manifest themselves in social, cultural, and political arenas. It draws upon scholarship in women's studies, masculinities studies, and queer studies which themselves draw upon a variety of intellectual perspectives, including historical, psychological, rhetorical, sociological, literary, and biological.
Knowledge Area: Foundational Societal Knowledge
Interdisciplinary Option: Women & Gender Studies
Outcomes:
students will demonstrate understanding of historical developments, key concepts, theories and themes in women's studies and gender studies, the impact that gender can have on social, cultural, political and economic material conditions

WSGS 201 Contemporary Issues in WSGS (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores issues in women's studies, feminism, and gender studies from the perspective of a particular discipline, depending on the faculty member teaching the course. This may, for example, include Communication, English, History, Sociology, or Theology.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST201/WSGS201
Outcomes:
Students will examine the subjects of women and gender, as well as the challenges of conducting feminist or gender scholarship, within the discipline and how new research changes or transforms that scholarship

WSGS 297 Topics in WSGS (3 Credit Hours)
This course allows students to explore intermediate courses or seminars focused on the intersection of gender, sexuality, race, class, and other categories of power, privilege, and oppression.
Interdisciplinary Option: Women & Gender Studies

WSGS 330 History of Feminist Thought and Social Action (3 Credit Hours)
This course focuses on the history and development of feminist thought and activism since the late eighteenth century. Attention goes beyond just U.S. and European feminist history, exploring Indigenous, Black, and postcolonial feminism to investigate their unique feminist ideas and the challenges they pose to "traditional" feminist thought and action.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X - WSGS 330 / HIST 339F
Outcomes:
Students will learn to identify key concepts, thinkers, activists; analyze and critique some of the major works; and develop an integrated understanding of the history of feminist thought, broadly conceived

WSGS 350 Global Feminisms (3 Credit Hours)
Pre-requisites: WSGS 101 or WSGS 201
This course offers critical and theoretical tools to evaluate feminist theories by women of color in the global South. Adopting a decolonial, anti-racist approach, the course evaluates how women and gender relations are affected by economic, cultural, and political changes related to the racial regimes of globalization and migratory movements.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will acquire and utilize key theoretical concepts in the study of feminisms, race theory, border studies, postcolonial studies, transnationalism, and migration studies

WSGS 360 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: WSGS 101 or WSGS 201
In this seminar WSGS course we will explore how crossing borders, identity politics, and sexuality intersect to produce a rich and necessary conversation on contemporary global immigration issues. We will explore the gendered dynamics and experiences of recent immigrants.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Acquire and utilize key theoretical concepts in the study of borders, identity politics, transnationalism, and sexuality from an intersectional lens

WSGS 370 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: WSGS 101 or WSGS 201
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 375 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: WSGS 101
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 380 Queer Theory: Beyond the Binary (3 Credit Hours)
Pre-requisites: WSGS 101 or 201
This course maps the field of Queer Theory from an interdisciplinary, global perspective in order to cover a wide range of theoretical and disciplinary approaches (race theory, transnational theory, postmodernism, Latinx-American Studies, among others) and interpretative applications (film, literature).
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will be able to identify key concepts and thinkers of this influential field of study; they will develop an intersectional, global understanding of this field of critical theory

WSGS 388 Women's Studies Practicum (3 Credit Hours)
This supervised field experience uses experiential learning at a wide variety uses experiential learning at a variety of women's political, cultural or educational organization as the basis for learning and refining skills which cab benefit gender equity.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST388/WSGS388
Outcomes:
Students demonstrate skill proficiency, professional conduct, and systematic reflection on their experience; Students learn about public and private sector responses to women's issues and concerns

WSGS 389 Independent Study (1-3 Credit Hours)
This course consists of independent research or engaged learning in a specific area of WSGS; work must be completed under the supervision of a WSGS faculty member.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain a deeper understanding of a specific WSGS topic through research, service, reading, or other mode of learning; The product of this work will vary depending on the interests of the student

WSGS 390 Directed Readings Women Studies (3 Credit Hours)
An independent program of reading and research arranged between the student and the supervising faculty member in the student's major department. Students will complete a final research project integrating their major fields with women's studies. Permission of women's studies director is required.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST390/WSGS390

WSGS 391 WSGS Methodologies (3 Credit Hours)
Pre-requisites: WSGS 101 or WSGS 201, and WSGS 330
This course is part of a two-semester sequence for the final year of the WSGS major and minor. In this course we review several approaches to feminist research methods and consider ways to put them into practice, individually or combined with other methods. Enrollment by permission.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will produce a project proposal that (1) demonstrates an interdisciplinary approach; (2) draws on theory and scholarship in WSGS; and (3) reflects the use of feminist methodologies in practice

WSGS 397 Special Topics in WSGS (3 Credit Hours)
This course allows students to explore advanced courses or seminars focused on the intersection of gender, sexuality, race, class, and other categories of power, privilege, and oppression.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST397/WSGS397
Outcomes:
Students demonstrate an understanding of a unique topic in women's studies

WSGS 398 Women's Studies Internship (3 Credit Hours)
This course uses supervised project-based experiential learning to allow students the opportunity to apply feminist analysis and practical skills to a student-designed project that will be completed within the timeframe of a course term.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST398/WSGS398
Outcomes:
Students learn application of feminist concepts and principles to pragmatic outcomes; leadership, planning, time management, and assessment skills

WSGS 399 WSGS Capstone (3 Credit Hours)
Pre-requisites: WSGS 330 and WSGS 391; Enrollment by permission
This is a project-oriented course that represents the culmination of the WSGS major. Students build on their work in WSGS 391/WSGS Methodologies to complete a project under the direction of a faculty or community organization mentor, either individually or as a group.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST399/WSGS399
Outcomes:
Students will complete a project that (1) demonstrates an interdisciplinary approach; (2) draws on theory and scholarship in WSGS; and (3) reflects the intentional use of feminist methodologies in practice

Women's Studies and Gender Studies (BA)

The WSGS BA program provides students with a broad and deep understanding of feminist scholarship and gender theory from an interdisciplinary perspective. Through the WSGS lens of intersectionality,

students acquire analytical skills that enable them to see the world in new ways and offer innovative solutions to social and theoretical problems. Service-learning courses, internships, and capstone projects provide opportunities to link theory and practice and advocate for social justice.

Many students combine the WSGS major with a major or minor in another discipline to further hone their skills in that area and integrate their learning in innovative ways. The BA program also provides a robust list of elective options in other disciplines, such as Anthropology, English, History, Psychology, Sociology, and Theology (among others) that enhance the foundational curriculum. In these ways, the program sustains its interdisciplinary character, honors diversity, and continually builds a community of scholars who collaborate and support one another. Our graduates go on to fulfilling careers in education, law, medicine, the non-profit sector, and a number of other fields.

College of Arts and Sciences Graduation Requirements

All Undergraduate students in the College of Arts and Sciences are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit

hours) or a language competency test. More information can be found here (https://www.luc.edu/cas/college-requirements/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Identify major influences within key historic feminist movements.
- Understand gender, race, sexuality, and class as intersecting structures of power and identity that appear differently throughout history and around the world.
- Interpret major theories of and research in feminist and gender studies through a culturally responsive, global, and intersectional lens.
- Demonstrate critical thinking skills through research and creative work integrating feminist theory, practice, and reflection.
- Develop collaborative relationships with mentors, peers, and community partners.

Women's Studies and Gender Studies Minor

The WSGS Minor serves to enhance and deepen student learning within the discipline of their major program. Through the WSGS lens of intersectionality, students acquire analytical skills that enable them to see the world in new ways and offer innovative solutions to social and theoretical problems. Minors may also engage in WSGS service-learning or internship opportunities that help them link theory and practice and advocate for social justice.

In the spirit of interdisciplinarity, the WSGS Minor includes a robust list of elective options in Anthropology, Criminal Justice, English, History, Psychology, Sociology, and Theology (among other programs) that enhance the foundational curriculum. In this way, students integrate their learning with one or more disciplines to prepare for graduate school or the professions.

Related Programs

Major

- Women's Studies and Gender Studies (BA) (p. 671)

Master's

- Women's Studies and Gender Studies (MA) (p. 1289)

Curriculum

A minor in the Women's Studies and Gender Studies Program consists of six courses (or 18 hours):

Code	Title	Hours
Required Courses		
WSGS 101	Introduction to WSGS from a Global Perspective	3
or WSGS 201	Contemporary Issues in WSGS	
Electives		
Select five (5) elective courses from WSGS and cross-listed offerings with at least 2 of these at the 300 level. (p.)		15
Total Hours		**18**

Interdisciplinary Elective Courses

These are courses outside of the Women's Studies and Gender Studies (WSGS) department that permanently count toward elective requirements. For a full list of WSGS courses, click here (p. 2658). There may also be courses that are temporarily tagged to count toward interdisciplinary elective requirements. These can be found in LOCUS (https://locus.luc.edu/) in the class schedule.

Code	Title	Hours

SOCL 240	Families	3
HIST 290A	History of Sexuality in the United States	3
SOCL 276	The Sociology and Politics of Food	3

For students obtaining a Theology degree:

Code	Title	Hours
WSGS 201	Contemporary Issues in WSGS	3
WSGS 375	Masculinity Studies: Equity, Race, Transformation	3
THEO 186	Global Religious Ethics	3
THEO 365	Women, Gender and Embodiment in Islam	3
SOCL 250	Inequality in Society	3

Learning Outcomes

- Identify major influences within key historic feminist movements.
- Understand gender, race, sexuality, and class as intersecting structures of power and identity that appear differently throughout history and around the world.
- Interpret major theories of and research in feminist and gender studies through a culturally responsive, global, and intersectional lens.
- Demonstrate critical thinking skills through research and creative work integrating feminist theory, practice, and reflection.
- Develop collaborative relationships with mentors, peers, and community partners.

John Felice Rome Center

Academic Policies

General Academic Information & Registration

All students at Loyola University Chicago's John Felice Rome Center are continuing or visiting students of Loyola University Chicago. As such, they fall under the academic regulations as stated in Loyola's undergraduate catalog, unless there are published exceptions to these regulations specifically for students at the John Felice Rome Center.

All students must be enrolled full-time in a minimum of four (4) classes, amounting to twelve (12) credit hours. This is the minimum course load required for all students in order to comply with the terms of the student visa provided by the Italian government. Dropping below four (4) classes is considered part-time study, and thus, not in compliance with Italian law. The maximum course load is six (6) courses for a total of eighteen (18) credit hours. *Internships carry three semester credits and require 100 hours of work experience.*

It is the students' responsibility to know their home schools' academic requirements and how the courses they propose to take at the Rome Center fit into those requirements. The Rome Center will not contact schools for information regarding core curriculum requirements, honors agreements, graduation requirements, pass-fail policies, withdrawal policies, etc. Before coming to Rome, students should have a clear understanding of their home schools' approval of courses they will or might take while at the Center. Alternate course selections should also be approved in the event a first choice is not available, i.e., closed courses, cancelled courses, etc. It is mandatory for all students to seek appropriate advice and counseling for any special academic situation, i.e., graduating seniors, core or other special course requirements, tutorial courses, pass- fail requirements, transfer of credit, course approval, etc.

Loyola University of Chicago reserves the right to cancel, modify or otherwise change the academic calendar, scheduling, credit or content of the courses, the books used, the final exam schedule, the fees charged, and regulations affecting the students, as announced in its schedule. Always refer to Locus for the most up-to-date and accurate listings.

Program Criteria

All students must have a 2.75 grade point average at the time of application and maintain this GPA during the semester before studying abroad at the Rome Center. It is not permitted to study at the John Felice Rome Center with multiple outstanding incompletes. Any student with a pending incomplete in the previous semester before attending the Rome Center will be required to submit an appeal to the Office of the Associate Dean of Academic Affairs at the Rome Center.

Campus Health

The collective health of the Rome Center community is everyone's responsibility. The Rome Center will conduct all activity according to policies and best practices as prescribed by the Italian Ministries of Health and Education and in consultation with the Loyola University Chicago main campus. These policies will be subject to change as the situation warrants.

Pre-requisites

Students are responsible to ensure that all pre-requisites have been met with the assistance of their academic advisor at the main campus (for Loyola students) or at their home school (partnering students) before coming abroad.

Italian Language

Except for those students who have previously successfully completed the equivalent of a university-level course in the Italian language or those who demonstrate native fluency and proficiency, all students are required to register for ITAL 101 Italian I. Enrollment in ITAL 101 Italian I is the Rome Center's program requirement and it cannot be waived or replaced by another language. Auditing ITAL 101 Italian I and/or withdrawing from it is not permitted.

E-mail

The Rome Center considers electronic mail an official form of communication between the Rome Center and the student, using the official @luc.edu e-mail address that is provided by the university to every enrolled student. Students are responsible for all communications sent by the Rome Center to their Loyola e-mail accounts.

Course Fees

Certain courses at the John Felice Rome Center are subject to supplemental fees. These fees are in addition to the tuition and room and board fees that appear on a student's bill for the semester, and they are charged to the student's Locus account shown as "Course Fees." These mandatory fees are highlighted on the course schedule and on the Rome Center website. They are required for various reasons including covering the costs of course materials, on-site visits and entrance fees, and other expenses related to courses.

Course Materials and Textbooks

Some Rome Center courses require textbooks, novels and other course materials that need to be purchased by the student. It is the student's responsibility to confirm the required materials needed in their classes and to purchase those within a timely manner at the start of the semester in Rome. Rome Center faculty will provide their students with recommendations and suggestions about where to find required materials.

Student Travel

No special accommodations will be made for individual student travel. The Rome Center supports travel as an opportunity for personal growth by offering excursions and trips throughout Italy and Europe. In addition, there are no classes on Friday (with the exception of 2-3 Friday class days per semester) to facilitate individual travel. Personal travel, including travel that incurs delays back to campus, is not a permitted excuse for absences or lateness. For that reason, no exams or quizzes are to be made up if missed for reasons of travel. Students are responsible for communicating any lateness or absence due to travel to the correct parties at the Rome Center (Student Life, faculty, etc.).

Simultaneous Enrollment/Online Courses

Simultaneous enrollment in Rome Center courses and LSC/WTC courses is not permitted while studying at the Rome Center. Simultaneous enrollment in Rome Center courses and any online sections (at LUC or any other institution) is not permitted while studying at the Rome Center. The minimum of 4 courses must be taken at the Rome Center campus in person to comply with student visa regulations. Enrollment in sections outside of the Rome Center is not permitted.

Fridays Class Days

The Rome Center holds classes four days a week, Monday through Thursday. On average, 2-3 Friday class days will be scheduled during any given semester. These Fridays will be indicated in the semester's academic calendar (both on the website and on campus, on the academic bulletin board on campus, and on course syllabi. The purpose of these Friday class days is to recuperate any class time lost from any holidays. These classes are obligatory for all students and no exemptions will be granted for travel or any other personal reason. Should a student choose to travel during these or any other scheduled class days, he or she will simply be marked absent. Note that individual courses may occasionally include events or visits on Fridays or otherwise outside the typical schedule that are obligatory for that course; students should check syllabi for such instances in order to avoid unexcused absences.

Examination Policy

Final examinations are given during the scheduled examination period each semester. Additional tests or examinations may be given during the semester as often as deemed helpful by the instructor. Students who miss any scheduled exam or quiz, including a final exam at the assigned hours will not be permitted to sit for a make-up examination without approval of the Associate Dean of Academic Affairs. Permission is given rarely and only for grave reason; travel is not considered a grave reason. Make-up exams will only be given for documented absences.

Mid-term examinations and/or assignments are administered around the mid-semester break. Student progress is assessed after mid-term so that students who are not performing to established academic standards may be informed of their academic progress far enough in advance to take corrective steps. Early academic alert notices are issued to students who are not performing at acceptable levels; notices may also be sent to the students' deans and/or study abroad coordinators if deemed appropriate. The policy concerning travel and make-up examinations for missed mid-term exams is identical to that for all exams.

Absence due to a serious illness must be reported to the Associate Dean of Academic Affairs prior to the examination and later substantiated by a written statement from the physician in attendance. Absences due to quarantine will be handled on a case-by-case basis. In cases where proper permission has not been granted, a grade of "F" will be assigned. In instances where proper authorization has been granted, the student may take a make-up exam by following the make-up procedure outlined above.

Final Exam Policy

In accordance with established policy at the home campus, exams must be held at the time and location indicated on the academic calendar and final exam schedule. Faculty have been instructed not to hold exams during the last week of class. With the exception of a short quiz, no exams are permitted during the last week of classes before final exams.

If students have more than three examinations in the same day, they may appeal to the Associate Dean of Academic Affairs to shift one of the exams to another day. After securing advance permission and in consultation with the Associate Dean and faculty member, an alternative time can be arranged at a mutually agreed upon time.

Student Attendance Policy

In accordance with the Rome Center mission to promote academic rigor and to comply with requirements associated with full-time student visa status, all courses adhere to the following attendance policy.

Prompt attendance, preparation and active participation in class discussions are expected from every student. Attendance is mandatory at every class meeting for each course. Faculty will include a statement in the syllabus that explains how arriving late or leaving class early will impact the course grade. All absences, including medical absences, will be treated the same. Documented long-term conditions or emergencies will be evaluated case-by-case by the Academic Affairs office. Students with approved accommodations in relation to attendance should consult with the Student Accessibility Center before traveling to Rome and consult with the Rome Center Academic Affairs office upon arrival.

The course syllabus will include the following information as it pertains to the course:

Once-a-week classes:

- After 1 absence, a 2% final grade reduction will be applied for each missed class.
- Missing 3 classes or more will result in an automatic failure (F).

Twice-a-week classes:

- After 2 absences, a 2% final grade reduction will be applied for each missed class.
- Missing 6 classes or more will result in an automatic failure (F).

Three-times-a week classes:

- After 2 absences, a 2% final grade reduction will be applied for each missed class.
- Missing 6 classes or more will result in an automatic failure (F).

Students from Partner Institutions

Should a student's home university have certain requirements or regulations regarding academics while abroad, it is the students' responsibility to familiarize themselves with such policies. While studying at the Rome Center, all students are considered Loyola University Chicago students, and are therefore subject to LUC policies and requirements.

Student Accessibility Center (SAC) Services

Any student that is registered with the Student Accessibility Center (SAC) at Loyola Chicago's home campus, or any comparable office at another institution, will be accommodated at the Rome Center as reasonably and as closely to their accommodations at their home campus as possible.

To request academic accommodations, official documentation from LUC's Student Accessibility Center is required. Verification of such services must come directly from Student Accessibility Center personnel (not the student) to the Office of the Academic Dean at the Rome Center. It will then be the students' responsibility to confirm the use of their academic accommodations where applicable at the Rome Center, after which the Office of the Academic Dean will provide written verification of the approved accommodations to the students' faculty members. Examples of applicable accommodations may include extended time for tests and quizzes, priority seating, use of audio recording software, and a distraction-reduced testing space. Students should know that certain accommodations are not applicable while studying at the Rome Center.

Specific instructions for coordinating accommodations related to a distraction-reduced testing space will be provided by the Office of the Academic Dean, but students should note the following:

- Scheduling and proctoring of exams and quizzes in a distracted-reduced testing space will require coordination between the student, instructor and the Academic Dean's Office. Please note that the Rome Center does not have access to the "Accommodate" system.
- Students are responsible for communicating with their individual instructors and the Dean's Office to schedule their examinations. Accommodations will not be provided to students who neglect to reach out about scheduling. Below please find the timeline for scheduling a distraction-reduced testing space and proctor.

Type of Exam	Scheduling
Regularly scheduled quizzes/ exams	7 days in advance
Midterms	2 weeks in advance of midterm date
Finals	2 weeks in advance of final date

- Students can choose to opt out of using SAC accommodations and/or opt back in, but only if the request comes seven (7) days before the exam/quiz (for those other than midterm/final) or two (2) weeks before the midterm/final exam. No petitions for SAC accommodations will be granted beyond those dates and no accommodations are retroactive.

With the Rome Center's limited resources, collaboration and flexibility is appreciated during this procedure. The Rome Center is committed to providing all reasonable accommodations where possible.

Academic Integrity/Plagiarism

As one of the campuses of Loyola University Chicago, the Rome Center is committed to academic rigor and excellence. Plagiarism and academic dishonesty of any kind are unacceptable and will not tolerated. Students are advised to familiarize themselves with Loyola's standards here: http://www.luc.edu/academics/catalog/undergrad/reg_academicintegrity.shtml (http://www.luc.edu/academics/catalog/undergrad/reg_academicintegrity.shtml/). Students are responsible to comply with the LUC Student Handbook.

Pass/Fail and Audit Policy

Students should register for all courses as regularly graded courses. For inquiries about pass-no pass and/or audit, please inquire with the Rome Center dean's office for additional information.

Withdrawal from Class

Students may withdraw from class with the final grade of "W" provided this is done before the conclusion of the tenth week of class. Withdrawal after the change of registration period but before the withdraw deadline will result as a "W" on a student's transcript. Withdrawal after the deadline will result in a "WF" on a student's transcript. Please refer to the Academic Calendar for further information on dates and deadlines.

Students may not withdraw from class if doing so will drop them below the 12 semester hour credit minimum required of students in attendance at the Rome Center. Official withdrawals can be made via the LOCUS system or with guidance from the Assistant Dean of Academic Programs.

Please note that withdrawal from ITAL 101 Italian I is not permitted, as this course is a requirement for all Rome Center students with no previous Italian experience.

Academic Grievances and Grade Appeals

Students are encouraged to seek resolutions for any course-related complaints directly with their course instructor. If a student feels that the issue has not been sufficiently resolved, they can bring their issue forward to the attention of the Dean's office. If a resolution cannot be found between the student and the instructor, students are required to follow Loyola University's Academic Grievance Policies as indicated here: https://www.luc.edu/academics/catalog/undergrad/reg_academicgrievance.shtml (https://www.luc.edu/academics/catalog/undergrad/reg_academicgrievance.shtml/)

Student Summer Session Academic Policies

Summer Registration Procedure

Students must register for a total of 6 credits (2 courses) as regularly graded courses. During the first two days of classes, students will be permitted to elect a change of registration with the Assistant Dean of Academic Programs. After that publicized deadline, no changes will be made to a student's schedule.

Pass/Fail Policy

To promote the academic rigor of the John Felice Rome Center curriculum, students are not permitted to elect the pass/fail option during a summer session.

Course Materials and Texts

Students are expected to arrive in Rome with their required course materials already in their possession. Summer course texts are available for purchase at the LUC bookstore (both online and in person). There is no guarantee that the required materials will be available in Rome if a student neglects to obtain them before they come.

Attendance Policy

In accordance with the Rome Center mission to promote a higher level of academic rigor, all courses adhere to the following attendance policy. Prompt attendance, preparation and active participation in course discussions are expected from every student. Any lateness or leaving class early will impact the final course grade.

Attendance is mandatory at every class meeting for each course. Absence due to sickness or injury needs to be corroborated by a doctor's note. Students late to class twice will be credited with one absence in accordance with the Rome Center's Attendance policy. Three (3) absences will result in an automatic failure (F). Travel does not constitute reason to miss class.

Withdrawal from Class

Students studying at the Rome Center during the summer semester must be enrolled in two (2) classes for credit. Students will have until the end of the business day on the second day of classes to make any changes to their course schedule. Any changes after the second day of classes may result in "W" or "WF." Students may not withdraw from a class if doing so will drop them below the six (6) semester credit hour minimum required of students in attendance at the Rome Center summer program.

Final Examination Policy

All students must sit for their final examinations on the day and time scheduled. No exams are to be given on another day or at another time without consent from the Associate Dean of Academic Affairs. Travel plans or other personal commitments may not interfere with already scheduled finals.

Marcella Niehoff School of Nursing

Mission, Vision & Core Values

Our Jesuit values guide us to shape the future of health and health care

Our mission at the Marcella Niehoff School of Nursing is to advance the science of nursing and provide a transformative education in the Jesuit Catholic tradition that prepares compassionate, innovative, diverse nurse leaders who provide care for the whole person and partner locally and globally to promote social justice and health for all.

Our vision at the Marcella Niehoff School of Nursing is to be a preeminent leader in transforming the health of persons, families, communities and populations, while promoting social justice, health equity and quality care for all.

In keeping with the University's Ignatian heritage, the School of Nursing is committed to the five hallmark characteristics of a Jesuit education. These characteristics provide the foundation for our core values, helping guide and motivate our administrators, faculty, students, and graduates to think differently about their approach to health care.

Core Values

Commitment to Excellence

Apply well-learned lessons and skills to achieve new ideas, better solutions, and vital answers.

- Promote dialogue, critical thinking, and the discernment of meaning in the process of enhancing health of persons and communities, both locally and globally.
- Foster an academic environment that supports and guides students in their transformation toward becoming health care leaders.

Faith in God and the Religious Tradition

Promote well-formed and strongly held beliefs in one's faith tradition to deepen others' relationship with God.

- Acknowledge that humans are physical, psychosocial, and spiritual beings
- Recognize that spirituality affects health.
- Respect that spirituality is lived out differently through diverse faiths, beliefs, and religious traditions.
- Create a safe place to search for meaning in the process of discovery and transformation, as well as social change.
- Respect our potential for achievement while accepting our human limitations in the pursuit of good.

Service that Promotes Justice

Use learning and leadership in openhanded and generous ways to ensure freedom of inquiry, the pursuit of truth, and care for others.

- Commit to social justice by engaging individuals, families, and communities, both locally and globally, to improve and promote health.
- Recognize that health disparities exist; those with the greatest need and with the least access hold a higher priority for action.
- Engage in research and application of evidence-based practice or best practices that limit health disparities.

Values-Based Leadership

Ensure a consistent focus on personal integrity, ethical behavior in business and in all professions, and the appropriate balance between justice and fairness.

- Foster synergistic collaborations within and between professions, disciplines, programs, and partners.
- Respect the dignity and fundamental rights of all.
- Embrace the tension that exists between competing priorities (e.g., mission-driven, financially-driven, Ethical & Religious Directives for Catholic Health Care Services) when making choices.
- Accept responsibility to make choices and act through discernment, being wise stewards of resources.
- Actively seek diversity in people, programs, professions, and practice to strengthen the communities of which we are a part.
- Promote a culture of purposeful transparency.

Global Awareness

Demonstrate an understanding that the world's people and societies are interrelated and interdependent.

- Understand that individuals are intimately connected to, live within, and operate within community.
- Recognize that communities have cultural capital with unique strengths.
- Foster relationships and engaging in partnerships in order to promote health.
- Embrace culture as a means to serve and to lead change toward better health.
- Apply the lessons we learn locally to global milieus and applying lessons learned globally to local initiatives.

Accreditation

The baccalaureate degree program in nursing at Loyola University Chicago is accredited by:

Commission on Collegiate Nursing Education
655 K Street, NW
Suite 750
Washington, DC 20001
202-887-6791.

The BSN program has approval from the Illinois Department of Financial and Professional Regulation (IDFPR), Division of Professional Regulation.

Undergraduate Programs

- Nursing (BSN) (p. 710)

Academic Policies

Marcella Niehoff School of Nursing (MNSON) Mission and Vision

OUR MISSION at the Marcella Niehoff School of Nursing is to advance the science of nursing and provide a transformative education in the Jesuit Catholic tradition that prepares compassionate, innovative, diverse nurse leaders who provide care for the whole person and partner locally and globally to promote social justice and health for all.

OUR VISION at the Marcella Niehoff School of Nursing is to be a preeminent leader in transforming the health of persons, families, communities, and populations, while promoting social justice, health equity and quality care for all.

More information can be found here (https://www.luc.edu/nursing/about/missionvisioncorevalues/).

Marcella Niehoff School of Nursing Core Values

The MNSON is committed to the five "hallmark characteristics of a Jesuit education." These characteristics provide the foundation for our core values. The MNSON core values challenge administrators, faculty, students, communities, and partners to think differently. Graduating professionals who are technically proficient is necessary, but not sufficient. Our graduates will shape the future of health and health care. To prepare them, we implement the following values:

- "Commitment to Excellence: Applying well-learned lessons and skills to achieve new ideas, better solutions and vital answers." This is what it means in the MNSON:

    - Promoting dialogue, critical thinking, and the discernment of meaning in the process of enhancing health of persons and communities, both locally and globally.
    - Fostering an academic environment that supports and guides students in their transformation toward becoming health care leaders.
- "Faith in God and the religious tradition: Promoting well-formed and strongly held beliefs in one's faith tradition to deepen others' relationship with God." This is what it means in the MNSON:
    - Acknowledging that humans are physical, psychosocial, and spiritual beings.
    - Recognizing that spirituality affects health.
    - Respecting that spirituality is lived out differently through diverse faiths, beliefs, and religious traditions.
    - Creating a safe place to search for meaning in the process of discovery and transformation, as well as social change.
    - Respecting our potential for achievement while accepting our human limitations in the pursuit of good.
- "Service that promotes justice: Using learning and leadership in openhanded and generous ways to ensure freedom of inquiry, the pursuit of truth and care for others." This is what it means in the MNSON:
    - Committing to social justice by engaging individuals, families, and communities, both locally and globally, to improve and promote health.
    - Recognizing that health disparities exist; those with the greatest need and with the least access hold a higher priority for action.
    - Engaging in research and application of evidence-based practice or best practices that limit health disparities.
- "Values-based leadership: Ensuring a consistent focus on personal integrity, ethical behavior in business and in all professions, and the appropriate balance between justice and fairness." This is what it means in the MNSON:
    - Fostering synergistic collaborations within and between professions, disciplines, programs, and partners.
    - Respecting the dignity and fundamental rights of all.
    - Embracing the tension that exists between competing priorities (e.g., mission-driven, financially-driven, Ethical & Religious Directives for Catholic Health Care Services) when making choices.
    - Accepting responsibility to make choices and act through discernment, being wise stewards of resources.
    - Actively seeking diversity in people, programs, professions, and practice to strengthen the communities of which we are a part.
    - Promoting a culture of purposeful transparency.
- "Global Awareness: Demonstrating an understanding that the world's people and societies are interrelated and interdependent." This is what it means in the MNSON:
    - Understanding that individuals are intimately connected to, live within, and operate within community.
    - Recognizing that communities have cultural capital with unique strengths.
    - Fostering relationships and engaging in partnerships in order to promote health.
    - Embracing culture as a means to serve and to lead change toward better health.
    - Applying the lessons we learn locally to global milieus and applying lessons learned globally to local initiatives.

Standards of the Profession

Exemplary behavior, consistent with the standards of the nursing profession, is expected at all times. The student is expected to maintain integrity and abide by the standards of clinical education and of the nursing profession, as further discussed in the following sections. The student is responsible for adhering to the policies in this manual and acknowledges acceptance of this student handbook by acknowledging that they have read and received the Student Handbook.

Inclusive Excellence Statement

Working toward inclusive excellence includes building intrapersonal and interpersonal awareness, engaging in curriculum transformation, teaching with an inclusive pedagogy, and building inclusive learning environments. We recognize that our community is strengthened by the diversity of our students, faculty, and staff along the social dimensions of race, color, religion, biological sex, age, sexual orientation, gender identity or expression, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law. We are especially committed to helping our nation create a culture of health, promote health equity to reduce health disparities, and improve the health and well-being of all, especially for those who experience the health system disparately due to systemic oppressions.

Chosen Name and Pronouns Statement

Class rosters and university data systems are provided to instructors with only students' legal names presented. Knowing that not all students use their legal names or identify with a gender that aligns with their sex assigned at birth, faculty members will use the name and/or personal pronouns you use. If you choose, you may email the faculty member directly to share your information. Additionally, if these change at any point during the semester, please let the faculty member know. For more information on how to change your name in LOCUS, please visit the Preferred Name Policy. https://www.luc.edu/dos/services/preferrednamepolicy/

History and Overview of the Marcella Niehoff School of Nursing (MNSON)

The MNSON was founded in 1935. It is the oldest baccalaureate nursing program in the state of Illinois. The MNSON was the first school in the university in which women attended classes. At its inception, education focused on preparing nurses to assume leadership roles in meeting the health care needs of Chicago residents. The following programs are housed in the MNSON.

Bachelor of Science in Nursing (BSN)

The BSN program educates and graduates competent and caring nursing professionals to meet the health care needs of patients in a variety of national and international settings. The program is science-based and focuses on the knowledge and skills necessary to provide safe and competent nursing care to individuals, families and communities. Students are prepared to analyze complex health care situations using critical thinking to optimize health outcomes.

There are two program tracks in the BSN program. The 4-year BSN program track is a direct entry academic degree program. The Accelerated BSN (ABSN) program track offers a fast-track to professional nursing for those who have already earned a baccalaureate degree or

higher in another field of study. Information about the BSN Program can be found at: Degree Programs | School of Nursing: Loyola University Chicago

Graduate Nursing Programs

In 1964, a Master of Science in Nursing (MSN) program was initiated to prepare professional nurses for advanced practice and leadership roles in health care delivery. The MSN programs currently include the following track: Nursing and Healthcare Administration Nurses with an Associate Degree or Diploma in Nursing can pursue this track via the RN-MSN program. In 2009, the Doctor of Nursing

Practice (DNP) program was initiated. The DNP is a practice-focused degree designed to provide advanced knowledge and skills required to enhance the health and well-being of individuals and communities. Practice doctorate preparation includes options for a systems/leadership focus or advanced practice nursing with a specialty focus. The PhD program was initiated in 1988 to meet the need for nurse scholars, teachers, and leaders. Loyola PhD in Nursing graduates have assumed leadership roles in research, education, clinical practice, and health care administration nationally and internationally. Loyola graduates have distinguished themselves through postdoctoral fellowships and research supported through National Institutes of Health (NIH) funding. Information about Graduate Nursing Programs may be found at: Degree Programs | School of Nursing: Loyola University Chicago

Certificate Programs

The Marcella Niehoff School of Nursing offers certificate programs for post-Baccalaureate and post-Master's nurses and other health professionals looking to advance their knowledge and skills in their practice areas or to expand their career options. Post-graduate Advanced Practice Registered Nurse (APRN) certificate programs are available for master's prepared nurses who wish to gain needed content and clinical expertise to prepare for a Nurse Practitioner (NP) or Clinical Nurse Specialist (CNS) national certification examination. Information about Certificate Programs can be found at Degree Programs | School of Nursing: Loyola University Chicago

Overview of the BSN Program

Program Accreditation

The baccalaureate degree program in nursing (BSN), master's degree program in nursing (MSN), Doctor of Nursing Practice (DNP) program, and the post-graduate APRN certificate program at Loyola University Chicago are accredited by the Commission on Collegiate Nursing Education (CCNE), 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791. The BSN program has approval from the Illinois Department of Financial and Professional Regulation (IDFPR), Division of Professional Regulation. The MNSON holds membership in the American Association of Colleges of Nursing (AACN) and the National League for Nursing (NLN).

Program Goals and Outcomes

The goal of the BSN program is to prepare baccalaureate generalist nurses.

At the completion of the program, graduates are expected to:

1. Synthesize knowledge from liberal arts, sciences, and nursing science as a basis for professional nursing practice.
2. Integrate levels of prevention, quality, safety concepts and principles and leadership into professional nursing practice.
3. Provide culturally competent, effective and patient-centered professional nursing care to individuals, families and communities across the lifespan.
4. Demonstrate the ability to effectively communicate and collaborate with the patient and interprofessional team to deliver evidence-based, safe, patient-centered care to individuals, families and communities.
5. Integrate values, ethics and legal knowledge into nursing practice.
6. Integrate scientific evidence and patient, family and community preferences into the planning, implementation and evaluation of professional nursing care.
7. Apply skills of information technology and information management effectively in professional nursing practice.
8. Analyze ways governmental, institutional and professional policies directly and indirectly influence the healthcare system and population health.

Admissions

The Bachelor of Science in Nursing (BSN) program is offered by the Marcella Niehoff School of Nursing (MNSON) at Loyola University Chicago. There are two distinct tracks into the BSN program:

- The 4-Year BSN Track – for first-year and transfer undergraduate students.
- The Accelerated BSN (ABSN) Track – for students who already hold a non-nursing bachelor's degree.

Regardless of the track, all students meet the same program outcomes and graduate with a BSN degree.

4-Year BSN Track (Including Transfer Students)

Students in the 4-Year BSN track begin the program in the Fall (August) semester. This track includes:

- First-year students entering directly from high school
- Transfer students, either from other Loyola programs or external institutions

Admission for transfer students is based on space availability and is competitive. In some years, external transfer students may not be admitted due to program capacity. Even when space is available, the number of qualified applicants often exceeds the number of open spots, so admission is not guaranteed.

Transfer credit is evaluated based on Loyola University Chicago transfer credit policy. Only courses in the arts, sciences, and humanities may be accepted. Nursing major courses are not accepted for transfer credit.

- For external transfer inquiries, please contact the Undergraduate Admission Office at 800.262.2373 or email admissions@luc.edu.
- For internal transfer inquiries, contact the MNSON office at schoolofnursing@luc.edu.

Accelerated BSN (ABSN) Track

The ABSN track is for students who already hold a bachelor's degree in a non-nursing field and are seeking a second degree in nursing. Students may start in either the Fall (August) or Spring (January) semester. There are two study options within the ABSN track—both based at the Health Sciences Campus (HSC) in Maywood:

- On-Campus ABSN: In-person lectures, labs, and clinical experiences.
- Hybrid ABSN: Online coursework combined with in-person labs and clinical experiences at the HSC.

All ABSN students are enrolled in the same BSN degree program and meet the same competencies and outcomes as students in the 4-Year BSN track.

Program Plans

Sample program plans of required coursework for the 4-year BSN and ABSN Program Tracks can be found on their respective catalog pages.

Academic Advising and Student Services

Academic Advising

The role of academic advising is to support students in their academic endeavors, in making informed and responsible decisions, and in setting and achieving short- and long-term goals. Advisors provide counsel and resources to students on a variety of topics, including:

- A course of study plan at Loyola, and deciding what courses to take in the upcoming semesters
- Degree requirements for all MNSON majors and minors
- University policies and procedures and other important academic information
- University offices and resources
- Academic success strategies
- Registration concerns and LOCUS help
- Graduation Audits
- Transfer credit
- Academic performance
- Academic probation and dismissal
- Course overload (more than 18 credit hours) or part-time status (fewer than 12 credit hours)
- Pass/no-pass or audit courses
- Repeating courses
- Late registration
- Incomplete grades
- Dropping a class

Academic Advisors

Students may view their assigned academic advisor's information by logging in to their LOCUS Student Center and viewing the "Program Advisor" box on the right side of the page. All students may schedule appointments with their assigned academic advisor using Navigate, which is accessible at www.luc.edu/navigate (http://www.luc.edu/navigate/)

First and Second year students are advised by the Office of First and Second Year Advising (FSYA). All 4-year students will be assigned an academic advisor in the Office of the FSYA at the start of their first semester where they will be advised for their first two years at Loyola.

First and Second Year Advising

Sullivan Center for Student Services

6339 N. Sheridan Rd. Suite 260

773-508-7714, FSYAdvising@luc.edu

Third- and Fourth-year students are advised by an Academic Advisor in the MNSON.

Michael Saraceno, MA, LPC

MNSON Senior Academic Advisor

LSC – BVM, Room 803

773-508-3270, msaraceno@luc.edu

SONadvising@luc.edu

ABSN (Hybrid and On-ground study options) students are advised by an Academic Advisor in the MNSON.

Jennifer Chiavola, MA

MNSON Senior Academic Advisor

HSC – MNSON Room 4530

708-216-8213, jchiavola@luc.edu

Office of the Dean of Students (ODOS)

The Office of the Dean of Students (ODOS) serves as a central hub for student support, providing resources, guidance, and advocacy to foster student success and well-being. ODOS helps students navigate academic and personal challenges, empowering them to build self-awareness, accountability, and a sense of responsibility to themselves and others.

The office is made up of two collaborative teams that support students in different but complementary ways:

- The Student Rights, Responsibilities, and Conflict Resolution (SRCR) Team supports students in upholding community standards and are seeking guidance and resources related to conflict resolution and alleged violations of LUC's Community Standards.
- The Student Outreach and Support (SOS) Team assists students facing personal, emotional, or academic difficulties by connecting them to appropriate support services. More information is available here (https://www.luc.edu/deanofstudents/).

Changing a Major (4-year BSN Program Track only)

The nursing student may change their major. The student will not be able to return to the nursing program once they change their major. The student should contact their Academic Advisor for information.

BSN Program Pre-requisite Course Requirements

Certain courses within the nursing major have pre-requisite requirements and these requirements must be taken into consideration as part of the overall academic planning process.

Financial Implications for Alterations in Program Plan – ABSN Program Track

The tuition of the ABSN program track is contingent upon completion of the designated 4 consecutive semesters beginning on the date of program initiation. If a student is unable to complete the ABSN program track within this time frame, the student will incur an increase of the tuition fee. The designated increase of the tuition fee is based on whether the student is on an approved leave of absence (LOA), or if the student has withdrawn from a required course or failed a required course. Situations that may occur resulting in an increase in tuition fees are delineated below:

- If the student receives an approved LOA, the student will incur the tuition fee in accordance with the tuition fee assigned to the ABSN cohort to which the student will be anticipated to graduate.
- If the program plan is adjusted, and the student is not taking the regular schedule of courses under which they were admitted, and is not engaged in full time study (12 credits or greater), the student will be charged the per credit hour tuition rate, until they reach a point where the student is either back with a cohort's schedule of courses or is enrolled in 12 or more credits per semester.

Academic Center for Excellence (ACE) – ABSN

The Academic Center for Excellence (ACE) at the Health Sciences Campus is a learner-centered service designed to support the ongoing academic development, lifelong learning, and overall well-being of the adult learner. The mission of the ACE is to enhance the academic performance of all students in the Stritch School of Medicine (SSOM) and the Marcella Niehoff School of Nursing (MNSON) through individual and group services. More information is available at here (https://ssom.luc.edu/ace/).

Academic Honors and Awards

President's Medallion

The MNSON submits a single nominee for the President's Medallion. The nominee pool includes students enrolled in all program tracks of the BSN program. The top 25% of MNSON students is provided and nominations are requested from faculty. Nominations are reviewed by the Awards Committee and interviews are conducted. A candidate recommendation selected by the Awards Committee is given to the Dean. The Dean makes the final recommendation to the University Committee.

Dean's List

The MNSON Dean's List is a semester-by-semester acknowledgement of those full-time students (taking 12 semester hours or more) who obtain at least a 3.5 grade point average in any given academic semester. Students on the Dean's List receive a letter from the Dean.

Sigma Theta Tau International (STTI) – Alpha Beta Chapter

The mission of the Honor Society of Nursing, Sigma Theta Tau International, is advancing world health and celebrating nursing excellence in scholarship, leadership, and service. STTI membership is by invitation to baccalaureate and graduate nursing students who demonstrate excellence in scholarship. More information can be found here (https://www.sigmanursing.org/why-sigma/).

Alpha Sigma Nu

Alpha Sigma Nu is the international honor society of Jesuit institutions of higher education. The society was founded in 1915 to honor a select number of students each year on the basis of scholarship, loyalty, and service. Alpha Sigma Nu is unique among honor societies in that it seeks to identify the most promising students in Jesuit schools. Inductees demonstrate an intelligent appreciation of and commitment to the ideals - intellectual, social, moral, and religious - of Jesuit higher education. Selection to Alpha Sigma Nu is one of the highest honors that can be given on a Jesuit campus. Junior and Senior students who are in the top 15% of their class academically and have a demonstrated record of service and loyalty to the Jesuit ideals of education, are considered for membership. More information can be found here (https://www.luc.edu/alphasigmanu/index.shtml/).

4-Year BSN Honors/Awards

- Dean's Gold Medallion
- Scholastic Honors Certificates (3.5 – 3.69 GPA)
- Scholastic Silver Medallion (>3.7 GPA)
- Gladys Kiniery Clinical Excellence
- Carol Kraft Memorial Award (LUMC CRT related)
- Spirit of St. Ignatius Award
- Nursing Advocacy and Leadership Award ABSN Honors/Awards
- Dean's Gold Medallion
- Laura Difiglio Klink Scholarship (HSC ABSN)
- Gladys Kiniery Clinical Excellence
- Carol Kraft Memorial Award (LUMC CRT related)
- Julia Lane Medallion for Academic Excellence (>3.8 GPA)
- Spirit of St. Ignatius Award

Academic Integrity and Academic Appeals

Academic Integrity

Academic integrity is the pursuit of scholarly activity in an open, honest, and responsible manner. Academic integrity is a guiding principle for all academic activity at LUC, and all members of the University community are expected to act in accordance with this principle.

Standards

The MNSON abides by the University Academic Integrity Standards. Failing to meet these standards is a serious violation of personal honesty and the academic ideals. The standards apply to both individual and group assignments. Individuals working in a group may be held responsible if one of the group members has violated one or more of these standards:

1. Students may not plagiarize. Plagiarism involves taking and using specific words, phrases, or ideas of others without proper acknowledgement of the sources. Students may not:
    1. Submit material copied from a published or unpublished source.
    2. Submit material that is not cited appropriately.
    3. Use another person's unpublished work or examination material.
    4. Allow or pay another party to prepare or write an assignment.
    5. Purchase, acquire, or use a pre-written assignment for credit.
    6. Use generative artificial intelligence to complete or write assignments or exams, partially or fully, without prior permission of the instructor.
2. Students may not submit the same work for credit for more than one assignment (known as self-plagiarism). If a student plans to submit work with similar or overlapping content two or more times for any purpose, the student should consult with all instructors prior to submission of the work to make certain that such submission will not violate this standard.
3. Students may not fabricate data. All experimental data, observations, interviews, statistical surveys, and other information collected and reported as part of academic work must be authentic. Any alteration, e.g., the removal of statistical outliers, must be clearly documented. Data must not be falsified in any way.
4. Students may not collude.

1. Students may not work with others on any exam, assignment or portion of an assignment without permission from the instructor.
2. Students' work with one another on an exam or assignments may not exceed the terms of their instructors' directions for collaboration as part of the assignment.
3. Students may not use work submitted by another student in a previous semester of a course.

5. Students may not cheat.
    1. Students may not obtain, distribute, or communicate examination materials prior to the scheduled examination without the consent of the instructor.
    2. Students may not take an examination by proxy.
    3. Students may not attempt to change answers after an examination or an assignment has been submitted.
    4. Students may not falsify medical or other documents for any reason.
    5. Students may not use unauthorized study aids in an exam. Examples include, but are not limited to:
        1. Bringing notes into an exam that does not allow outside materials.
        2. Programming equations into a calculator when the instructor has indicated that students are to be tested on the recall of those same equations.
        3. Using any electronic device that allows students to look up, translate, calculate, or communicate information with someone else.
    6. Students may not facilitate academic misconduct: for example, a student may not allow another student to copy from their exam or give their own work to another student.

Process

1. Instructors will gather the appropriate information and documentation when they suspect an instance of academic misconduct has occurred. The standard of evidence required for an instructor to determine responsibility is known as a "preponderance of the evidence." This means the instructor must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
2. If instructors conclude an instance of academic misconduct has occurred, then they will determine the sanction as it relates to the course.
3. Instructors will notify the student of their findings and sanction. Instructors should allow the student an opportunity to respond before reporting the incident.
4. If after talking with the student or the student fails to respond to the instructor's outreach within two business days and instructors have determined that academic misconduct has occurred, instructors will then report the instance of academic misconduct, including supporting documentation, to the Program Track Director and the Assistant Dean for the BSN Program.
5. The case is reported through the Academic Misconduct Report form. This form is the only approved process to submit such a request.
6. The Executive Associate Dean for Academic Affairs for the MNSON will notify the student that the instance of academic misconduct has been reported and the final sanction will be included in the notification.
7. All of the cases of academic misconduct and academic appeals are managed through Maxient (the University system for these cases) and are part of the student's academic record. The academic record is not a transcript; this academic record is maintained by the Office of the Dean of Students for a period of seven years from the date of the incident with the exception of cases resulting in University Expulsion (such files are retained indefinitely).

Sanctions

An instructor is responsible for determining the sanctions for academic misconduct in the course sections they teach. Sanctions are assigned on a case-by-case basis while considering precedent and the following standards below. The Assistant Dean for the BSN Program may add to or elevate the initial sanctions assigned by the instructor based on the student's prior academic misconduct history:

- the context and seriousness of the violation
- the student's demonstrated commitment not to engage in the same behavior in the future;
- and sanctions that appropriately foster accountability for one's behavior and prevent recurrence of similar behaviors.

Below is a list of commonly assigned sanctions and instructors may choose from this entire list:

1. Educational Experiences or Projects allow students to reflect upon their conduct and how their action harmed themselves, others, and the community; and/or to explore why such conduct is unacceptable. Examples include but are not limited to:
    1. Attendance and participation at a required meeting, workshop, special project, or other initiative.
    2. Completing an online tutorial focused on academic integrity.
    3. A written reflection about a specific topic or issue.
    4. Resubmission of the assignment or exam for partial credit.
    5. A required meeting with the appropriate dean to discuss the misconduct and the consequences.
    6. Completing restorative service hours and/or a Values Workshop.
2. Failing Grade on the assignment: A letter grade of F or zero points will be issued for the assignment or examination.
3. Failing Grade in a course: A letter grade of F will be issued for the course.
4. University Suspension or Expulsion. The MNSON Dean may recommend suspension from the University for a period of time, or expulsion from the University, depending on the severity of the misconduct, or in

Academic Integrity Agreement Form Text

The basic commitment of a university is to search for and to communicate the truth as it is honestly perceived. The university could not accomplish its purpose in the absence of this demanding standard. To the extent that this standard is respected, a genuine learning community can exist. Students of this university are called upon to know, to respect, and to practice this standard of personal honesty.

The faculty and administration of Loyola University Chicago wish to make it clear that the following acts are regarded as serious violations of personal honesty and the academic ideal that binds the university into a learning community. These standards apply to both individual and group assignments. Individuals working in a group may be held responsible if one of the group members has violated one or more of these standards.

1. Students may not plagiarize. Plagiarism involves taking and using specific words, phrases, or ideas of others without proper acknowledgement of the sources. Students may not:

   a. Submit material copied from a published or unpublished source.
   b. Submit material that is not cited appropriately.
   c. Use another person's unpublished work or examination material.
   d. Allow or pay another party to prepare or write an assignment.
   e. Purchase, acquire, or use a pre-written assignment for credit.
   f. Use generative artificial intelligence to complete or write assignments or exams, partially or fully, without prior permission of the instructor.
2. Students may not submit the same work for credit for more than one assignment (known as self-plagiarism). If a student plans to submit work with similar or overlapping content two or more times for any purpose, the student should consult with all instructors prior to submission of the work to make certain that such submission will not violate this standard.
3. Students may not fabricate data. All experimental data, observations, interviews, statistical surveys, and other information collected and reported as part of academic work must be authentic. Any alteration, e.g., the removal of statistical outliers, must be clearly documented. Data must not be falsified in any way.
4. Students may not collude.
   a. Students may not work with others on any exam, assignment or portion of an assignment without permission from the instructor.
   b. Students' work with one another on an exam or assignments may not exceed the terms of their instructors' directions for collaboration as part of the assignment.
   c. Students may not use work submitted by another student in a previous semester of a course.
5. Students may not cheat.
   a. Students may not obtain, distribute, or communicate examination materials prior to the scheduled examination without the consent of the instructor.
   b. Students may not take an examination by proxy.
   c. Students may not attempt to change answers after an examination or an assignment has been submitted.
   d. Students may not falsify medical or other documents for any reason.
   e. Students may not use unauthorized study aids in an exam. Examples include, but are not limited to:
      i. Bringing notes into an exam that does not allow outside materials.
      ii. Programming equations into a calculator when the instructor has indicated that students are to be tested on the recall of those same equations.
      iii. Using any electronic device that allows students to look up, translate, calculate, or communicate information with someone else.
   f. Students may not facilitate academic misconduct.
      i. For example, a student may not allow another student to copy from their exam or give their own work to another student.

In the case of multiple instances of academic dishonesty across departments, the academic dean of the student's college may convene a hearing board. Students retain the right to appeal the decision of the hearing board to the academic dean of the college in which they are registered. The decision of the dean is final in all cases except expulsion. The sanction of expulsion for academic dishonesty may be imposed only by the Provost upon recommendation of the dean.

Academic Appeals

The Marcella Niehoff School of Nursing (the "MNSON") has developed an Academic Appeals Process that is consistent with the Loyola University Chicago (the "University") Academic Appeals Procedure Undergraduate: Loyola University Chicago. This process is meant to supplement, and may not supersede, any portion of the University Academic Appeals process.

The MNSON Academic Appeals Process provides specific direction for the academic grievance hearing and for appeals and is designed to achieve clarity, uniformity, and fairness in the handling of all academic disputes involving individual student complaints regarding course grades and accusations of academic misconduct. Any MNSON student may initiate the formal academic grievance procedure in order to have a complaint or appeal regarding a course grade or charge of academic misconduct reviewed in an impartial and thorough manner. In accordance with best educational practices and University policy, this process must be based on relevant information and afford both parties (student and involved faculty member(s) an equal voice in the proceedings.

Appeal of Course Grade

Consistent with the University Academic Appeals Procedure, a disputed grade will be changed only if the grading meets one or more of the following criteria:

1. Is found to be in significant violation of clearly established written school policies; or
2. Is a result of improper procedures; or
3. Is found to be arbitrary and/or capricious. Arbitrary and/or capricious grading is the assignment of a grade to a student which is:
   1. Based partially or entirely on criteria other than the student's performance in the course; or
   2. Based on standards different from those standards of grading applied to other students registered in the same course; or
   3. Based on a substantial departure from the announced grading standards for the course.

Appeal of Finding of Academic Misconduct

The student retains the right to appeal the determination of academic misconduct using the academic Appeal Procedures outlined below.

Appeal Procedures within the MNSON

1. In all cases, a sincere attempt should be made by the student to resolve the issue through discussion with the involved faculty member(s). The student first discusses the course grade or charge of academic misconduct with the involved faculty member(s) of the course. Every attempt is made by the involved faculty member(s) to answer fully the student's concerns at this level.

If the involved faculty member(s) decides that a change-of-grade is appropriate (e.g., due to error by the involved faculty member[s]), the involved faculty member(s) will submit a grade-change request via the student information system. The grade change will be reviewed by the Assistant Dean for the BSN Program.

1. If the student and instructor are unable to resolve the issue related to course grade and/or academic misconduct, and the student still chooses to contest the findings, the student may appeal by submitting the appropriate form:

The Academic Appeal Form: Course Grade Dispute (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=102)

The Academic Appeal Form: Finding of Academic Misconduct (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=100)

The electronic form is the only accepted method to request an appeal. The form must be submitted no later than 30 days into the following semester. Failure to submit a request within this period and with this electronic form waives the right to appeal and renders the decision final.

The student's request must:

1. Specify the nature of the dispute; and
2. Explain in detail how the issue falls within the established criteria for an academic grievance (e.g., the grading was in significant violation of clearly established written school policies; the grading is arbitrary and/or capricious);
3. Describe the attempts made to resolve the matter; and
4. Attach all relevant information or documentation to support the grievance.

1. The Assistant Dean for the BSN Program or the Dean's designee determines whether or not there are grounds for an appeal.
    1. Declines the case for a hearing: The Assistant Dean for the BSN Program and/or Dean's designee may decline to forward the case for a hearing if it is determined that there are no grounds for an appeal. In such instances the Assistant Dean for the BSN Program or Dean's designee must justify, in writing, the reason for this decision and communicate the decision to the student, involved faculty member(s), Program Track Director, and Dean via Loyola email.

    If the student disagrees with the determination by the Assistant Dean for the BSN Program and/or Dean's designee, the student may appeal to the appropriate academic Dean. In cases where the student is enrolled in a school other than the one in which the course is taught, the academic Deans of the two schools will review the appeal together. The student's academic Dean's office will notify the student of the final decision via Loyola email.

1. Approves the case for a hearing: If the Assistant Dean for the BSN Program or Dean's designee determines there are grounds for an appeal, the student, involved faculty members(s), Program Track Director, and Dean will be notified via Loyola email that a hearing board will be convened.
2. It is up to the discretion of the Dean or his/her designee if a student may continue taking courses in a sequence where the course grade under review is a pre-requisite.

Hearing Procedures Pre-hearing

1. If the Assistant Dean for the BSN Program and/or the Dean's designee determines that the academic grievance is sufficient to proceed with a hearing, the Dean shall be notified.
2. Within two weeks of the notification to the Dean, the Dean shall appoint a Chairperson and four faculty members to a Hearing Board. Every effort shall be made to appoint faculty to the Hearing Board who are not familiar with the student.
3. The Chairperson of the Hearing Board sets the calendar, notifies all involved parties of the dates and times of the hearing and informs students by written notice of the decisions of the Hearing Board.
4. The hearing will be held within 10 business days of the receipt of the request for a hearing, if practicable. The hearing will be private, and all information will be held confidential.
5. All parties, including the student, involved faculty member(s), and Hearing Committee members, will receive the student's name, written request for a grievance hearing, information identifying the charge of academic misconduct and related information submitted by the student, and information related to the hearing date/time/location, at least three business days in advance of the scheduled hearing date.
6. The student and/or faculty member(s) have the option of submitting other relevant materials to the hearing board prior to or at the time of the hearing. Individuals in the hearing process have the responsibility of presenting truthful information.
7. The faculty member(s) shall provide the Hearing Board Chairperson with:
    1. A copy of the course syllabus to include course outcomes if the hearing is focused on a grade dispute.
    2. Documentation and relevant information pertaining to the student's performance in the course or clinical learning experience or related to the allegation of the student's academic dishonesty.
    3. The names of any witnesses the involved faculty member(s) wishes to present and the name of any representative of the University community who will assist the involved faculty member(s) in presenting the case at the hearing.
8. Both the student and the faculty member(s) involved may be accompanied by one advisor of their choice throughout the hearing process. The individual must inform the chairperson of the hearing board of the name of the advisor at least 3 business days before the hearing date.
    1. The role of an advisor is to provide a comforting presence for the student and/or instructor. An advisor may only speak to the advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee.
    2. Even if an advisor is an attorney, the advisor may not function as legal counsel or "represent" an advisee during the hearing process.
    3. If any advisor conducts themselves in a manner inconsistent with these guidelines, or if the advisor's behavior obstructs or interferes with the hearing process, the advisor will be warned by the board.
    4. If the advisor's interfering behavior continues or if the advisor engages in a manner that harasses, abuses, or intimidates any other participant, the advisor will be excused from the hearing immediately.

The Hearing

1. The hearing will include: the student, involved faculty member(s), and designated advisor.
2. The Chairperson determines the hearing processes (e.g. location, order of proceedings, determining what evidence is relevant, determining if additional information is needed, etc.). The standard of evidence required for a board to determine responsibility is known as a "preponderance of the evidence." This means the board must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
3. Hearings for refuting a charge of academic misconduct generally include an introduction of all parties present, an overview of the hearing process, review of the nature of the alleged conduct and policies potentially violated. Students (and faculty member(s) when applicable will provide their account of the reported incident. Hearing Board members may ask questions to the parties present (including witnesses, if applicable).

4. All decisions of the Board must be determined by a majority vote of the hearing board members. A final decision must be rendered by the Board by the end of the hearing process. All deliberations among the hearing board members are private.

Notice of Decision

1. The student (and faculty member(s) when applicable) are notified of the decision and any related outcomes either immediately after deliberation or, when further deliberation is needed, in writing, via Loyola email by the Chairperson of the Board's decision within 10 business days of the hearing. The decision is also shared with the Program Track Director, Assistant Dean and/or Dean's designee, and Dean.
    1. In cases of a grade dispute, if the Hearing Board renders a decision in support of the student's petition, the faculty member submits a grade-change request consistent with the Hearing Board's findings. If the Hearing Board finds that the student's petition is without merit, the grade shall remain unchanged.
    2. If a student is grieving a grade associated with a clinical experience, and the Hearing Board determines that the faculty grading was in significant violation of clearly established written school policies, or the result of improper procedures, or was capricious, the Hearing Board will communicate the decision to the Assistant Dean for the BSN Program. Notwithstanding this decision, the Hearing Board and/or the Assistant Dean for the BSN Program may require an independent re-evaluation of the student's performance (knowledge, skills, or behavior).
        1. If it is judged by the Hearing Board or the Assistant Dean for the BSN Program that an independent reevaluation of the student's performance is warranted, the Assistant Dean for the BSN Program will communicate the need for the evaluation to the Program Director, who will arrange for an independent reevaluation of the student that may involve a clinical, lab, or simulation session by a faculty member not known to the student. This independent reevaluation summary will be forwarded to the Hearing Board and the Assistant Dean for the BSN Program for a final determination of the course grade.

Contesting the Hearing Board's Decision

Should the student or the instructor wish to contest the Hearing Board's decision, an appeal to the Dean within 30 days of notice of the hearing board's decision may be sent using the Academic Hearing Board Appeal form. This form is the only approved process to submit such a request.

1. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
2. The grounds to appeal the board's decision must include one or more of the following criteria:
    1. New substantive information is available that was not reasonably available at the time of the hearing and could substantially impact the original findings or outcomes of the case.
    2. A substantive procedural error or error in the interpretation of University policy occurred that denied the student or instructor the right to a fair hearing and decision.
    3. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or the established Undergraduate Academic Catalog.
3. Upon receipt of the appeal letter, the Dean will review the appeal to determine whether or not to uphold the decision of the hearing board.
4. The student and the instructor will be notified via Loyola email by the Dean's office of the final decision. The Dean's decision is final and binding.

Academic Probation

Probation is an academic status whereby the student is notified of not being in compliance with academic standards.

4-year BSN Program Track

If a student's cumulative GPA falls below 2.0, the student is placed on probation for the next semester (excluding summer sessions). If the student does not then raise the cumulative GPA to ≥ 2.0 after completing at least 9 credit hours of graded study (excluding pass/no pass courses) from the BSN Curriculum Plan, the student will be dismissed from the program.

Following the semester of probation, the student must maintain a minimum cumulative GPA of 2.0 through the end of their program. Failure to maintain a cumulative GPA > 2.0 after the period of probation will result in dismissal from the program. Students on probation during their final semester of study must have a minimum GPA of 2.0 to be eligible for degree conferral.

The student is placed on probation for the next semester when the student withdraws (W) from the same course twice under any of the following courses listed below:

- Required Nursing courses
- PSYC 273 Developmental Psychology, PSYC 274 Lifespan Development
- PSYC 304 Statistics or STAT 103 Fundamentals of Statistics

For probation to be lifted, the course must be successfully completed (C- or higher) during the next semester in which the course is offered, according to the revised program plan. If the course is not successfully completed, or the student withdraws a third time from the same course, the student will be dismissed from the BSN program.

ABSN Program Track

If a student's cumulative GPA falls below 2.0, the student is placed on probation for the next semester. If the student does not then raise the cumulative GPA to ≥ 2.0 after completing at least 9 credit hours of graded study (excluding pass/no pass courses) the ABSN curriculum plan, the student will be dismissed from the program.

The student is placed on probation for the next semester (including summer sessions) when the student withdraws (W) from the same course twice from any of the nursing courses listed in the curriculum plan. For this probation to be lifted, the course must be successfully completed (C- or higher) during the next semester in which the course is offered (including summer sessions). If the course is not successfully completed, or the student withdraws a third time from the same course, the student will be dismissed from the program.

Following the semester of probation, the student must maintain a minimum cumulative GPA of 2.0 through the end of their program. Failure to maintain a cumulative GPA > 2.0 after the period of probation will result in dismissal from the program. The student must have a minimum cumulative GPA of 2.0 to be eligible for degree conferral.

The student is expected to adhere to all academic standards, regulations, and policies set forth by the Marcella Niehoff School of Nursing (MNSON) and Loyola University Chicago (LUC).

For details, refer to the applicable LUC academic policies (p. 1919).

Academic Standards

Each student is required to abide by Loyola University Chicago policies as well as MNSON policies. LUC policies may be found in the university catalog Undergraduate: Loyola University Chicago. MNSON policies are identified below:

Grading System

The grading scale for nursing courses in the BSN program in the MNSON is as follows:

Grade	Grade Points
A	94-100
A-	92-93
B+	89-91
B	86-88
B-	84-85
C+	80-83
C	77-79
C-	75-76 (Minimum passing standard for required Nursing courses)
D+	72-74
D	69-71
F	68 and below
WE	Withdrawal/Emergency
W	Withdrawal
I	Incomplete
P	Pass
NP	No Pass
NR	Registered Never Attended

Clinical and Lab Nursing Course

Each clinical and lab nursing course is graded “P” for Pass or “NP” for No Pass. All required clinical assignments must be submitted completely and satisfactorily by the assigned due date in order to receive a passing grade for the clinical experience.

Quizzes, Exams and Assignments

Below are general policies related to quizzes, exams and assignments. Specific course policies are detailed in course syllabi.

1. Exams and quizzes must be taken on the day scheduled. If illness or other serious circumstance arises, the faculty is to be notified via email or voicemail before the exam or quiz begins.
2. Assignments are due on the date specified unless an extension is negotiated with the course instructor prior to the due date.
3. Faculty will determine the consequence of late or missing assignments.
4. Materials not permitted during exams include, but are not limited to cell phones, iPhone watches, water bottles, hats (excluding religious head covering), and pocketed sweatshirts. Only 4 function calculators are permitted.
5. Faculty will notify students of specific exam policies for each class.
6. All exam scores are reported to 2 decimal places. Scores for unit and final examinations are not rounded up or down.
7. All non-examination assignments, such as papers, are reported in whole numbers, unless the rubric for the assignment specifically includes point allocations other than whole numbers. Most non-examination assignments use a rubric for evaluation. A rubric is provided to students in advance of assignment submission.

Taping/Recording of Classes

Students are to request permission from the faculty to record lectures/classes. The recordings are to be used only by the class member who has requested and received permission during the current term. The recordings are not to be forwarded to other students in the current or subsequent terms.

Use of Generative AI Tools

Students may not use generative artificial intelligence tools (such as ChatGPT or similar platforms) to complete or assist with assignments, quizzes, or exams unless explicitly permitted by the instructor. This includes, but is not limited to, using AI to generate or revise any portion of a discussion post, paper, quiz, ATI remediation, lab reports, exam, or project.

The use of AI tools without permission is a violation of the Loyola University Chicago (LUC) and Marcella Niehoff School of Nursing (MNSON) academic integrity policies. According to these policies, using generative AI to produce academic work constitutes a form of plagiarism and will be treated as such.

Examples of violations include (but are not limited to):

- Submitting work that was partially or fully written by an AI tool.
- Using AI to generate exam or quiz responses.
- Having AI revise or rewrite your work for submission.
- Using AI without citation in any work where its use has been approved.

Consequences

Violations of this policy will be addressed as academic misconduct. Consequences may include:

- A failing grade on the assignment.
- A failing grade in the course.
- Referral to the Academic Integrity Review process for further disciplinary action.

Students who are uncertain whether a specific tool or resource (including generative AI, tutoring platforms, or editing software) are appropriate for an assignment are responsible for consulting the instructor before proceeding. Misuse may result in a violation of academic integrity policies.

ATI Testing and Resources

The MNSON partners with ATI to integrate tests into the nursing curriculum. These integrated standardized tests help prepare students for the NCLEX. Throughout the program students complete an ATI test for the following courses:

Course	Test Name
GNUR 238: The Foundations of Clinical Practice in Nursing	RN Fundamentals

MSN 277: Adult Health I – Medical-Surgical Nursing	RN Adult Medical Surgical
GNUR 294: Foundations of Pharmacology	RN Pharmacology
GNUR 297: Clinical Nutrition for Nursing	RN Nutrition for Nursing
MCN 273: Family Health Patterns I	RN Maternal Newborn
MCN 374: Family Health Patterns II: Care of the Child and Family	RN Nursing Care of Children
CMAN 272: Mental Health Patterns	RN Mental Health
MSN 377: Adult Health II - Advanced Medical-Surgical Nursing	RN Adult Medical Surgical
GNUR 383: Leadership for Professional Nursing Practice	RN Leadership
GNUR 384: Clinical Role Transition	RN Comprehensive Predictor

ATI standardized testing accounts for 5% of the final course grade for GNUR 238, GNUR 294, MSN 277, CMAN 272, MCN 273, MSN 377, MCN 374 and GNUR 383.

Students will need to create a new account and view the orientation module in order to access the ATI resources and tests. The 4-year BSN students create this account in their Sophomore year; ABSN students create this account in the first semester of their program. Information about how to create a new account is posted in the BSN Program Student Info Sakai Site.

Final Examinations

Final examinations are given during the scheduled final examination period in each session. The student is expected to take their exams as scheduled; students are expected to be available for final exams through the last day of the final exam schedule. Students with four Final Exams on a given day may contact the Office of the Dean for their school to request that one Final Exam be rescheduled. The student who is unable to attend a final examination because of illness or other serious circumstances must contact their instructor prior to the exam. Alternative arrangements to complete a final exam will not be granted for personal or leisure travel plans.

Final Course Grades

- Rounding and reporting of Scores and Grades
- The final course grade, which includes all evaluation elements for the course, is rounded based on the following guidelines:
  - If the decimal is 0.50 or greater, the score is rounded to the next whole number (e.g., 84.52 is rounded to 85.0)
  - If the decimal is less than or equal to .49, the score is rounded down to the next lowest whole number (e.g., 84.40 is rounded to 84.0)
- The letter grade corresponding to the numeric final course grade is entered into LOCUS.
- Posting of Final Course Grades
- In courses with a final examination, the final course grades are entered into LOCUS within 72 hours, excluding weekends and holidays, after completion of the final examination in the final section meeting of the course.
- In courses with no final examination, the final course grade is entered into LOCUS within 72 hours, excluding weekends and holidays, of the beginning of the final exam period.

Incomplete Grade

An incomplete is a temporary grade. To request an incomplete, the student must complete the Undergraduate Request for Mark of Incomplete form and present it to their instructor. Approval of this request is at the discretion of the instructor. If approved, the student will receive a temporary grade of "I" for the course. Form can be found here: Undergraduate Request for Mark of Incomplete Form.

Course work that is incomplete must be finished and submitted within 6 weeks of the start of the following term. The instructor may, at their discretion, set an earlier date.

If a student has taken an incomplete grade in a course that is a pre-requisite for a subsequent course(s), the incomplete work must be completed before the student can progress to that subsequent course(s). Failure to complete required coursework within the allotted time will result in the grade "F".

*More information and Undergraduate Request for a Mark of Incomplete form can be found at: Undergraduate: Loyola University Chicago

Student Performance Improvement Plan (SPIP) and Remediation

A Student Performance Improvement Plan (SPIP) is initiated to document student knowledge, skill, behavior or attitude deficits. These deficits require specific and individualized activities, in addition to the usual learning activities involved in the course. The SPIP may be initiated by the faculty (clinical, lecture, simulation, lab), or the Course Director. Areas that may be the focus of a SPIP include knowledge, skills, attitude, and/or behavior. Other areas may be identified in specific situations.

Procedure

1. The initiating faculty completes the SPIP and forwards to the Course Director and Program Track Director for review and recommendation.
   1. The SPIP must clearly identify the learning deficit(s).
   2. The SPIP must identify specific, measurable, and time-limited criteria that the student is expected to achieve.
   3. The SPIP must detail specific activities that will be undertaken, and the resources employed in those activities.
2. After review by the Course Director and Program Track Director, the SPIP is reviewed with the student with the initiating faculty. The initiating faculty member and student sign the form, after review. A copy of the signed form is sent to the Course Director and Program Track Director. The Assistant Dean for the BSN Program is notified of the initiation of the SPIP.
3. Upon completion of the time period identified in the SPIP, the student is re-assessed by the initiating faculty to determine if the knowledge, skill, behavior, or attitude deficit has been resolved.
   1. If the specific deficit has been resolved, the resolution is documented on the SPIP. Specific data are required to support the judgment of resolution of a deficit.
   2. If the specific deficit has not been resolved, the SPIP is modified with the date of modification and the reason for the modification noted. If a new deficit has been discovered through the course of activities in the improvement plan, an additional SPIP is generated, following the process outlined in this policy.
4. Once a performance deficit is resolved, the faculty member and student sign the SPIP. The signed copy is forwarded to the Course Director and Program Track Director for review and signature. The

final signed copy is then forwarded to the Assistant Dean for the BSN Program.

Example areas that may be a focus of a Student Performance Improvement Plan are identified below. Other areas may be included. A SPIP is initiated for any identified deficit.

- Concept mapping; developing a plan of care
- Dosage calculations
- Medication administration
- Psychomotor skills
- Problem solving and decision making
- Prioritization
- Written and verbal communication
- Professional behavior
- Documentation
- Synthesis of data
- Teamwork and collaboration

Academic Standing

Students must maintain a cumulative GPA of 2.00 to be in good academic standing. Graduation from the university requires at least a 2.00 average for all coursework attempted and a minimum of a least a 2.00 average in the nursing.

Achieving College Excellence (ACE) Program – 4-year BSN

Designed to serve first-generation college students, students with high financial need, and/or students with a documented disability, the ACE program is committed to helping students succeed in their college journey at Loyola University Chicago and beyond. More information, including eligibility, is available at here (https://www.luc.edu/ace/).

Career Services

Loyola's Career Services office provides holistic support to all students exploring careers and graduate education. Career Services provides one-on-one career advising, career events, resume and cover letter support, job search strategies, interview preparation, internship and research guidance, and student employment opportunities. More information is available here (https://www.luc.edu/career/).

Clinical and Simulation Experiences – 4-year BSN and ABSN Program tracks

General Expectations of Professional Behavior

Professional conduct by the student facilitates learning opportunities and fosters a good working relationship between the MNSON and the clinical agencies. The student is expected to abide by the policies that are detailed in the syllabi for each clinical course as well as standards and guidelines of the institutions or agencies where they are assigned for clinical. The student is expected to demonstrate professional behaviors in attendance, punctuality, dress, demeanor, integrity, and ethical concerns.

Examples of Professional Behaviors include, but are not limited to, the following:

1. Completes any preparatory work
2. Arrives to clinical or simulation site as scheduled
3. Maintains professional appearance and behavior
4. Conforms to university, school and agency policies
5. Treats all individuals with dignity and respect
6. Uses the Code of Ethics for Nurses with Interpretative Statements to guide practice
7. Assumes accountability for own actions and practices
8. Seeks additional learning opportunities and experiences to enhance knowledge base and professional practice
9. Engages in self-evaluation and analysis
10. Incorporates constructive feedback to achieve goals and rectify deficiencies

Attendance and Clinical Make-Up

General Attendance

The MNSON expects that its students will recognize that they have entered a profession in which commitment to full participation in the learning environment is an essential component of preparation for professional nursing practice.

The Loyola University Chicago (LUC) policy states that “Every registered student is expected to attend all classroom and laboratory sessions.” Consistent with the LUC policy, attendance is expected in all educational activities, including, but not limited to all classroom, lab, clinical and simulation experiences.

When conditions warrant, the Loyola University Chicago (LUC) Campus Safety will issue a statement on severe weather/hazardous conditions. Updates on severe weather, cancellations, and closure are available on the LUC website.

The MNSON follows the LUC severe weather policy. When the University makes the decision to close and cancel classes, MNSON will follow that decision and will be closed.

Attendance Policy for Clinical, Lab, and Simulation Experiences

This policy establishes expectations for attendance and formalizes guidelines and procedures for BSN clinical, lab, or simulation absences across all study tracks.

Rationale: Attendance and participation in clinical, lab, and simulation experiences is an essential component of nursing education, ensuring that students gain the hands-on experience necessary to develop the competencies required for safe and effective patient care.

Policy Statement

1. Attendance Requirement
    1. Students are expected to attend all scheduled clinical, lab, and simulation shifts. Arriving on time, staying for the entire duration of the shift, and participating fully is required.
    2. Simulation experiences are considered equivalent to clinical experiences and are subject to the same expectations.
    3. In addition to mandatory attendance, students are expected to meet all course outcomes to earn a Pass grade.
2. Absences
    1. More than one absence, regardless of the reason, will result in a failure of the clinical course.
    2. In the event of an emergency/urgent situation, students must notify their course faculty (clinical instructor and course director) as soon as possible prior to the start of their scheduled shift if

they are unable to attend. Supporting documentation should also be included. Failure to notify the course faculty may result in additional disciplinary action.

3. Tracking of Absences:
    1. All clinical absences, including those from simulation, will be reported to the Program Director and Assistant Dean of the BSN Program to be recorded in a central database. This record will be tracked over the duration of the student's enrollment in the BSN Program.
    2. Patterns of repeated clinical absences will warrant disciplinary action, including clinical failure and possible dismissal from the BSN Program.
4. Tardiness and Early Departures: It is expected that students will be on time, prepared, and spend the entire clinical/simulation/lab shift on site. Tardiness or early departure disrupts learning, compromises safety, and violates BSN Program standards of professional conduct.
    1. Definitions:
        1. Tardiness: Arrival after the scheduled start time for clinical, lab, or simulation.
        2. Early Departure: Leaving before the scheduled end time without prior approval.
    2. The supervising faculty determines whether the student may safely join the clinical experience based on patient care, site protocols, and learning environment considerations.
    3. Simulation-specific guidance:
        1. Arrival up to 15 minutes late: Supervising faculty will determine whether participation is possible without disrupting the experience.
        2. Arrival 15 minutes or more past the start time: Student may not join the session. This will be counted as an unexcused absence.
    4. Tardiness and/or early departures will be documented and entered into the clinical attendance tracking data base.
    5. More than one tardy and/or early departure will count as an unexcused absence and result in the initiation of a Student Performance Improvement Plan (SPIP) and may require a clinical make-up as determined the clinical instructor and course director.
5. Religious observances and Emergency/Urgent situations
    1. Planned vacation absences during the clinical term are not accommodated.
    2. Students who anticipate the need for absences for religious observances must submit a written request to the clinical instructor and course director at least two weeks in advance
    3. Absences due to emergency should include the reason for the absence and any supporting documentation submitted to the clinical instructor and course director. An emergency or urgent situation is any unforeseen event that requires immediate attention due to its potential to significantly impact health, safety, or well-being. In the context of this policy, it refers to circumstances that disrupt a student's ability to attend scheduled clinical sessions. Examples include:
        1. Sudden illness or injury: For the student or an immediate family member, such as unexpected hospitalization or severe medical conditions.
        2. Accidents: Incidents that result in injury or require immediate care.
        3. Unexpected bereavement: The sudden death of a close family member.
        4. Other critical events: Any situation that demands immediate action and precludes the student's normal attendance.

    * Even if absences are deemed excused, students remain responsible for meeting all required clinical hours and course outcomes. Absences—whether for religious observance or emergency—may still require a clinical make-up, as determined by the Course Director.

6. Make-up Opportunities

A missed clinical day will require a make-up experience that accounts for the clinical hours missed. The make-up will be conducted on site at a clinical facility to provide additional hands-on learning. The site and date of the make-up session will depend on availability and may differ from the original clinical site.

If an alternative assignment is required for any missed clinical time, the nature of the assignment will be determined by the course faculty in collaboration with program leadership. Students will be responsible for any associated fees.

Consequences
Failure to meet the attendance policy will result in failure of the clinical course, irrespective of performance in other areas of the curriculum. This policy ensures students meet clinical hours mandated for competency development and licensure requirements.

Acknowledgment: By enrolling in this clinical course, students acknowledge that they understand and agree to comply with the attendance policy as outlined above.

Proper Notification of Absence
In the event of an illness or other circumstance leading to a lab/simulation/clinical absence, the student is responsible for notifying his or her clinical faculty prior to the start of the lab/simulation/clinical learning experience.

Students who arrive at lab/simulation/clinical with a fever or contagious illness will be sent home and may receive a clinical Unsatisfactory under Professionalism/Personal Responsibility for arriving to clinical in a condition compromising the potential safety of the client.

Failure to use proper notification procedures (e.g. "no call – no show") for lab/simulation/clinical absence, and/or tardiness will require a SPIP which will become a part of the student's record. The student will be required to meet with their Program Track Director to discuss strategies to prevent a recurrence of absenteeism or tardiness. A pattern of this unprofessional behavior may put the student at risk for failure of the course.

Daily Clinical Expectations

The student is expected to be prepared to provide safe and effective care for their assigned patient(s) during each clinical experience. Preparation may include, but is not limited to, the review of their assigned patient's care summary, history and physical, medical and nursing progress notes, medications, laboratory results, vital signs and assessment findings. The time involved preparing for the clinical experience is independent of scheduled clinical time. Course Directors and Clinical Instructors will notify students regarding preparatory assignments.

Medication Administration

The student may administer oral, intramuscular, subcutaneous and IV medications and IV fluids only when they have successfully completed

the skill competency in the Clinical Simulation Learning Lab (CSLL). The faculty or preceptor must supervise the student when administering all medications and IV fluids. The MNSON abides by the policies of each affiliating agency regarding student administration of medications.

Clinical Simulation

Beginning in the Nursing Foundations course (GNUR 238L), and in each subsequent clinical course, students will spend a portion of the lab/clinical experience in the Clinical Simulation Learning Lab. Simulation experiences may also be a requirement for other nursing courses (e.g., GNUR 290). The clinical simulation centers are located on the third floor of the MNSON building (Walgreen Family Virtual Hospital) at the Health Sciences Campus (HSC) and the third floor of Mundelein Hall, Room 317, at the Lake Shore Campus (LSC).

The CSLL provides a safe learning environment where students are encouraged to practice newly and previously acquired psychomotor skills, enhance critical thinking and clinical judgement abilities and increase clinical competence. Students participate in course-based simulation scenarios using various methods, including role-playing, low and high-fidelity patient simulators (mannequins), task-trainers, and virtual simulation. The CSLL includes state-of-the-art technology and hospital equipment to closely simulate a real patient care environment.

Because participation in learning activities in the CSLL is integrated with clinical courses, it is expected that students will adhere to the same standards of performance and behavior in both clinical and the CSLL. Students are expected to attend CSLL activities wearing their MNSON uniform, demonstrate evidence of preparation, timeliness, professional collegial behavior and confidentiality. Consequences of not meeting any of these expectations will be determined on an individual basis by the Assistant Dean of Innovative Educational Strategies and Simulation. Consequences of not meeting expectations may result in failure to progress in the program.

Interprofessional Education (IPE) Simulation Requirement

All BSN students, including those in the 4-year track and the ABSN track (on-ground and hybrid ABSN study options), are required to participate in Interprofessional Education (IPE) Simulation Experiences as part of the BSN curriculum. These experiences are in addition to simulation activities within individual clinical nursing courses.

IPE provides students with the opportunity to participate on an interprofessional team that collaborates in the planning and implementation of patient care, simulating real-life team situations. These simulations are learning experiences and are not graded, yet they are essential for preparing students to assume the role of the registered professional nurse. This requirement aligns with the AACN Essentials (2021), Domain 6: Interprofessional Partnerships, which emphasizes effective collaboration, communication, and shared decision-making across health professions to improve health outcomes and ensure safe, high-quality care.

Student Expectations

- Attend all scheduled IPE simulation experiences.
- Arrive on time, fully prepared, and actively participate.
- Complete all assigned preparation in advance.
- Make up any missed session as directed by the course director in collaboration with the Assistant Dean for Innovative Educational Strategies and Simulation.

Clinical Performance Feedback and Evaluations

The clinical instructor and student will review and discuss the student's clinical performance at mid-term and completion of each clinical experience. Additional evaluations may be completed as needed. Documentation of student clinical performance is completed on the Student Clinical Evaluation form, which is filed with the student records and maintained at the MNSON.

Injury and Accidental Exposure

1. In the event of an injury and/or accidental exposure to blood, bodily fluid or other potentially infectious material, the student will require prompt medical attention. Faculty and students are encouraged to refer to the Centers for Disease Control (CDC) (https://www.cdc.gov) guidelines for the most current guidelines for prevention of occupationally acquired infections.
2. At the time of exposure, immediately flood the exposed area with water and cleanse the wound with soap and water or a skin disinfectant, if available, as stated by the Office of Safety and Health Administration (OSHA).
3. If the injury or exposure occurs within a hospital agency, the student must report the exposure to their Clinical Instructor (or charge nurse if the faculty is not immediately available). The Clinical Instructor and/or charge nurse will follow agency policy and the student will be directed to the emergency or occupational health department, preferably within one hour after the incident. When the student presents to the emergency or occupational health department, the student must identify themselves to the healthcare provider as a Loyola nursing student who has had an injury or potential exposure to a blood borne pathogen.
4. If the injury or exposure occurs outside of a hospital agency, as in the community, the student must report the incident to their Clinical Instructor (or charge nurse if the faculty is not immediately available). The student is required to seek medical attention at the nearest Emergency Department, preferably within one hour after the incident, in addition to the guidelines identified above.
5. All injuries and accidental exposures require documentation and follow-up. The student will complete the agency Incident Report. The instructor and student will jointly complete and submit a copy of the MNSON Reportable Event Form (posted in Sakai under the tab, "SON: Clinical Faculty) to the Course Director and the Assistant Dean for the BSN Program.
6. The student should seek follow-up care as directed by the provider in the Emergency Department either through the student's private health care plan or through a referral by the health provider in the Emergency Department.
7. The Student Health Service does not provide care for accidental exposures but can be contacted for referrals for follow-up care.
8. The student is responsible for all costs incurred whenever medical care is required as a result of an injury or accidental exposure. The university does not assume responsibility for any costs incurred due to an injury or accidental exposure.

Safe and Ethical Clinical Practice

The student is expected to ensure patient safety and maintain behavior that is consistent with the standards of the nursing profession at all times during clinical experiences. Safety and fitness for clinical practice means that the student is able to perform their clinical educational responsibilities in a safe, appropriate and effective manner, free from the adverse effects of physical, mental, emotional or personal problems. The student is required to uphold the policies within the MNSON and all

affiliating clinical agencies. Failure to meet these expectations may result in the student being removed from the clinical area, and possibly, failure of the course.

Examples of Unsafe and/or Unfit Practice include, but are not limited to, the following:

1. Inability to participate in the clinical education experience in a safe and timely manner necessary for a patient's health and well-being.
2. Failure to display stable mental, physical, or emotional behavior(s) which may affect the well-being of self or others.
3. Failure to follow through on suggested referrals or interventions to correct deficit areas which may result in harm to self or others.
4. Acts of omission or commission while participating in the clinical education experience include, but are not limited to:
   - Abandoning an assigned patient
   - Committing physical or emotional abuse
   - Placing a patient in an unsafe situation
   - Committing a medication error
   - Engaging in disruptive or inadequate communication

Examples of breaches of Integrity associated with the standards of the nursing profession include, but are not limited to, the following:

1. Failure to notify the agency and/or instructor of clinical absence.
2. Failure to adhere to MNSON and agency policy related to dress code.
3. Use of cell phone and personal use of agency computers and electronic equipment.
4. Presenting to the clinical site under the influence of drugs or alcohol.
5. Repeated tardiness to clinical site.
6. Failure to inform the Clinical Instructor with a change in clinical assignment or patient condition.
7. Leaving the clinical unit or agency without notifying the Clinical Instructor and assigned Registered Nurse or appropriate personnel.
8. Failure to uphold Health Insurance Portability and Accountability Act (HIPAA) guidelines.
9. Breach of information using social media.

Examples of breaches in Ethical Practice include, but are not limited to, the following:

1. Refusal to care for a patient or family based on diagnosis, race, culture, religious, sexual orientation, or gender preference.
2. Failure to report unethical behavior on the part of health care personnel.
3. Conduct that shows disrespect for the patient, family, health care team member, or faculty, including but not limited to, religious, ethical, and cultural issues.
4. Failure to maintain confidentiality of records. Copying the patient's record or any part of the record is strictly prohibited.
5. Failure to recognize and promote patient's rights.

Social Media and Social Networking

Federal law prohibits disclosing patient information outside the accepted learning environment. This includes disclosing patient information by way of social media. Students are expected to follow the guidelines put forth by the National Council of State Boards of Nursing in their brochure: A Nurse's Guide to the Use of Social Media | NCSBN.

Students are also expected to follow the American Nurses Association's guidelines for social networking in their brochure: ANA's Principles for Social Networking and the Nurse, Social Media Principles for the Nursing Profession | ANA. A summary of these principles are:

- Be aware of your audience. Make sure that the content of your posts is appropriate for the people who will be seeing it and may share it with others.
- Maintain your professionalism. Avoid posting anything that could be considered unprofessional or inappropriate, such as photos or videos of patients.
- Know your social media policy. Familiarize yourself with your employer's social media policy and adhere to it across all the social media platforms that you choose to use.
- Secure your social media profiles. Review and set-up the respective privacy settings for the social media platforms that you choose to use.
- Share credible information only. The dissemination of credible and reliable information protects the health and well-being of the public.
- Engage with respectful content. Do not share content that is harmful, disparaging, racist, homophobic, or derogatory.

The student who violates the guidelines regarding the use of social media and social networking are subject to review and possible dismissal from the program.

Communication Systems

Loyola's Universal ID (UVID)

Loyola's Universal ID (UVID) is the primary means of authentication and identification throughout the University. The UVID provides access to most of Loyola's resources. This includes, but is not limited to, LOCUS, Sakai, Microsoft Outlook email, Lawson, Kronos, campus wireless access and campus networked computers.

Loyola's Online Connection to University Services (LOCUS)

LOCUS (https://locus.luc.edu/) is an integrated, web-based student information system that provides information access 24 hours a day. LOCUS (https://locus.luc.edu/) allows the student to view course descriptions, enroll in courses, view and process financial aid information, change addresses and phone numbers, and request official transcripts.

LUC Learning System - SAKAI

The learning management system, SAKAI, provides the student with all course information including the syllabus, course documents, calendar, assignments, grades, and at times, lectures. SAKAI can be accessed online from the LUC homepage. The student can access SAKAI for each course once they have registered through LOCUS. The Loyola University Chicago UVID and password must be used to access web-based course information.

Email Policy

The MNSON will only send e-mails to the student's LUC e-mail account. The student is responsible for checking their LUC accounts daily for important course, clinical and MNSON information and announcements. If the student chooses to forward their LUC e-mail to another account, they may go to this site (https://www.luc.edu/its/services/microsoft365/) to learn about this process.

Community Standards

Each student of Loyola University Chicago is expected to uphold the Community Standards (Loyola's Student Code of Conduct). Students have the responsibility to familiarize themselves with Community Standards, which provide a simple baseline for acceptable student conduct. Commonly referenced policies include, but are not limited to: a) alcohol, drugs, and smoking, b) identification policies, c) physical or emotional harm, d) residence hall regulations. For a complete list of policies, please refer to the Loyola Community Standards. More information can be found on the Student Rights, Responsibilities and Conflict Resolution site (https://www.luc.edu/deanofstudents/communitystandards/).

Coursework completed outside of LUC

4-year BSN Program Track

The MNSON abides by the policies of LUC regarding coursework taken outside of LUC. If a student anticipates transfer course credit from a course taken outside of LUC, the student must obtain approval from the School of Nursing prior to enrolling in coursework outside of LUC.

ABSN Program Tracks

All coursework toward the BSN degree must be completed at LUC.

CURA Network

CURA Network is a centralized website for reporting student concerns, led by the Office of the Dean of Students (DOS). The CURA Network provides support, coordination, case management, and resource referrals for student concerns across the university. Behavioral, academic, personal, equity, Title IX, student conduct, conflict resolution, and general student concerns can be reported using this one website location. More information is available at https://www.luc.edu/cura/

1. **Coordinated Assistance & Resource Education (CARE)** - CARE is a part of the CURA Network that is designed to assist and support students through challenging times. Examples include students experiencing serious personal difficulties, struggling with general mental health concerns, or managing economic hardships. When a student requests CARE services, or is referred for CARE services, they are given an opportunity to work with a member of the Office of the Dean of Students staff to gain awareness of, or access to, various resources, engage in dialogue about solutions, and ultimately gain support to assist with navigating difficult or challenging situations. More information is available here (https://www.luc.edu/cura/about/coordinatedassistanceresourceeducationcare/).
2. **Office of Equity and Compliance (OEC)** - The OEC promotes a culture of inclusion, safety, and accessibility at Loyola by implementing equitable and person-centered policies, coordinating impartial and reliable investigations, and providing relevant and practical training. The OEC is comprised of the Executive Director for Equity & Compliance (Title IX Coordinator), three Deputy Title IX Coordinators, and a Paralegal/Case Management Specialist. The Deputy Title IX Coordinators serve as full-time, professional Equity Investigators who contribute to all aspects of the office's operations. The work of the OEC is also supported University-wide by several key partners, including but not limited to the Office of the Dean of Students, the Wellness Center, Campus Safety, Human Resources, and the Office of the Provost. More information is available here (https://www.luc.edu/equity/about/).
3. **Student Academic Services (SAS)** - SAS provides students with opportunities for learning, growth, and reflection. SAS helps students learn about themselves and fundamentally evolve in the way they perceive, think and act in our global society, becoming driven toward action that leads to more just communities. More information is available here (https://www.luc.edu/sas/).

Degree Conferral and Graduation

The conferral of the BSN degree occurs after an audit confirms that the student has completed all program plan requirements. The BSN degree is conferred following the date specified by Loyola University Chicago and is noted on the student's official transcript. The process of BSN degree conferral is separate from the application for, and participation in, the Loyola University Chicago commencement ceremony.

All students must apply for degree conferral in LOCUS (https://locus.luc.edu), regardless of the semester in which they complete the program, or their intent to participate in the commencement ceremony. Deadlines for graduation application are posted on the Loyola University Chicago website. If a student applies for graduation but does not complete the degree requirements by the end of the intended graduation semester, the student must submit a new graduation application. The Loyola University Chicago commencement ceremony is held once each year, in May, at the Lake Shore Campus. Students receive an invitation to participate in the commencement ceremony.

Dismissal for Academic Reasons

Dismissal is removal from MNSON and possibly LUC according to their respective policies.

4-year BSN Program Track

The student is dismissed from the BSN Program under the following conditions:

- Failure to achieve a minimum cumulative GPA of 2.0 following a period of probation
- Receiving a grade of NP, or less than a C- (or any combination thereof) in any two of the following courses:
  - Any required nursing course
  - PSYC 273 Developmental Psychology, PSYC 274 Lifespan Development
  - PSYC 304 Statistics or STAT 103 Fundamentals of Statistics
- Withdrawing (W) a third time from the same course
- Repeating a failed course and does not achieve a minimum of "C-" or "P" or withdraws from the course
- Failure to meet conditions in the Undergraduate Student Handbook (Section XVII-F Academic Probation)

ABSN Program Track

The student is dismissed from the BSN Program under the following conditions:

- Failure to achieve a minimum cumulative GPA of 2.0 following a period of probation
- Receiving a grade of NP, or less than a C- (or any combination thereof) in any two courses
- Withdrawing (W) a third time from the same course
- Repeating a failed course and does not achieve a minimum of "C-" or "P" or withdraws from the course

- Failure to meet conditions in the Undergraduate Student Handbook (Academic Probation)

The MNSON reserves the right to dismiss a student regardless of GPA for reasons related to violations in nursing professional role responsibilities, academic integrity or ethical practice. The student who is subject to dismissal from the MNSON is advised to meet with their Academic Advisor for support and guidance.

If a student is dismissed from the BSN program for any of the reasons listed above and has a cumulative GPA below 2.0 at the time of dismissal, the student may also be dismissed from Loyola University Chicago in accordance with University Academic Standards and Regulations: Undergraduate: Loyola University Chicago

Readmission Application following a Dismissal

General Readmission Process

Readmission is the process by which a student seeks to re-enter the Marcella Niehoff School of Nursing (MNSON) following dismissal.

- A student may apply for readmission only once. A second application is permitted only if the student is entering or completing their final semester of study.
- Prior to applying, the student must meet with their Academic Advisor to review the process. The Advisor will collect and forward the necessary information to the Chair of the Undergraduate Nursing Admission, Progression, and Retention (UNAPR) Committee.
- The student must appear before the UNAPR Committee to answer brief questions. No one other than the student may attend this meeting.
- The UNAPR Committee will notify the student of its decision by email within 72 hours.

Conditions After Readmission

Following readmission to the BSN program:

- If the student earns grade of NP or below C- in any required nursing course, Developmental Psychology (PSYC 273), PSYC 274 (Lifespan Development), Statistics (PSYC 304 or STAT 103), the student will be permanently dismissed from the program.
- A cumulative GPA of ≥ 2.0 must be maintained for the remainder of the program. Failure to achieve or maintain this GPA standard will result in permanent dismissal from the program.
- No further readmission will be permitted, except that a second application may be considered if the student is entering or completing their final semester of study.

Essential Qualifications/Technical Standards

Loyola University Chicago is committed to excellence in accessibility. The University actively collaborates with students to develop innovative ways to ensure accessibility and create a respectful and accountable culture through our confidential and specialized disability support. We encourage students with disabilities to disclose and seek accommodation through the Student Accessibility Center.

The Marcella Niehoff School of Nursing (MNSON) of Loyola University Chicago provides the following examples of technical standards to inform incoming and enrolled students of the performance abilities and characteristics that are necessary to successfully complete the requirements of the nursing curriculum and provide effective and safe health care. To matriculate (enroll) a student must meet technical standards with or without reasonable accommodations and maintain related satisfactory demonstration of these standards for progression through the program.

Nursing education requires assimilation of knowledge, acquisition of skills and development of judgment through patient care experiences in preparation for independent, semi-autonomous, and collaborative practice, and making appropriate decisions required in such practice. In order to fully participate in MNSON programs, a student must be able to perform the following core functions in theory courses, clinical, simulation, and lab experiences with or without reasonable accommodation:

- Acquire Information
- Use and Interpret Information
- Communication
- Motor
- Cognitive/Conceptual-Integrative
- Behavioral-Social/Emotional
- Professional Conduct

The MNSON prepares students to be able to perform the following essential qualifications:

Acquire Information

- Acquire information presented through demonstrations and experiences in nursing courses such as lecture, group, and physical demonstrations.
- Acquire information from written documents and computer systems (e.g., literature searches & data retrieval).
- Identify information presented in images from paper, slides, videos, and transparencies.
- Recognize and assess patient changes in mood, activity, cognition, verbal, and non-verbal communication.

Use and Interpret Information

- Communicate therapeutically with Use and interpret information from assessment techniques/maneuvers such as those involved in assessing all physiologic and psychologic systems.
- Use and interpret information related to physiologic phenomena generated from diagnostic tools during a comprehensive examination of a client or patient.
- Use and interpret non-verbal communications when performing an assessment, intervention or evaluation of a patient.

Communication

- Sensitivity and empathy with students, faculty, staff, patients, family, other professionals, and the public, using English in classroom, clinical, simulation, and lab settings.
- Accurately elicit information including a medical history & other information to adequately and effectively evaluate a client or patient's condition.
- Express ideas and feelings clearly and demonstrate a willingness and ability to give and receive feedback.
- Elicit information, describe changes, and perceive nonverbal communications.
- Communicate in multiple modes of speech, reading, writing, and electronic systems.

Motor

- Demonstrate sufficient motor function to elicit information from patients by palpation, auscultation, and other assessment techniques.
- Execute motor movements reasonably required to provide nursing care, medication administration, and treatments during patient care.
- Execute motor movement to participate in various patient lifting and transfer activities.
- Practice in a safe manner and appropriately implement universal precautions against contamination.
- Provide emergency and life support measures, as needed, to patients in all health care settings.

Cognitive/Conceptual-Integrative

- Measure, calculate, reason, analyze, integrate, synthesize, and retain complex information related to the diagnosis, treatment, and evaluation of patient care.
- Evaluate and apply information and engage in critical thinking in the classroom and clinical judgment in clinical, simulation, and lab settings.
- Exercise appropriate clinical judgment and complete responsibilities in a timely and accurate manner according to the generalist nursing role.
- Synthesize information, problem solve, and think critically to judge the most appropriate theory or assessment strategy.
- Incorporate appropriate judgment in seeking assistance and determining when a nursing task can or cannot be carried out independently.
- Seek assistance when needed and make appropriate judgments in a timely manner.

Behavioral / Social / Emotional

- Possess attributes that include accountability, motivation, compassion, empathy, altruism, integrity, honesty, responsibility, and tolerance.
- Possess the emotional health required for the full use of intellectual abilities, the exercise of sound clinical judgment, the prompt completion of all responsibilities attendant to the care of patients, and the development of mature, sensitive, effective, and therapeutic relations with others.
- Possess the emotional stability to function effectively under stress in the classroom, clinical, simulation, and lab areas.
- Adapt to changing environments, display flexibility, and learn to function in the face of uncertainties inherent in the clinical environment.
- Recognize that personal values, attitudes, beliefs, emotions, and experiences affect perceptions and relationships with others.
- Be able and willing to examine and modify behavior when it interferes with productive individual, interpersonal, or team relationships.
- Possess skills and experiences necessary for effective and harmonious relationships in diverse environments.
- Maintain mature, sensitive, and effective relationships with clients/patients, families, students, faculty, staff, preceptors and other professionals under all circumstances.
- Exercise skills of diplomacy to advocate for patients in need.

Professional Conduct

- Possess the ability to reason morally and practice in an ethical manner.
- Demonstrate a willingness to learn and abide by professional standards of practice.
- Engage in patient care delivery in all healthcare settings and be able to deliver care to all patient populations.
- Demonstrate the intent and desire to follow the ANA Standards of Care and Nursing Code of Ethics.

Formal Complaint by Student Policy

A formal complaint is defined by Loyola University Chicago's (the "University") Marcella Niehoff School of Nursing (the "MNSON") as any substantive complaint or concern, put forth in writing, by a student which requires a response from the administration of the MNSON. Formal complaints may originate within the MNSON, or through a mechanism external to the MNSON, such as a University grievance process or the EthicsLine Reporting Hotline. The MNSON adheres to all applicable University policies regarding the filing, review and resolution of formal complaints, as defined herein. The nature of the complaint dictates the review and resolution processes, as detailed further in this policy.

General Guidelines

1. Student Complaints Related to Academic Issues.

   Formal student complaints related to academic disputes involving the appropriateness of course grades and accusations of academic dishonesty are addressed through the MNSON's Academic Grievance and Appeals Process.

   Formal student complaints relating to decisions affecting undergraduate academic standing or progress are addressed through the University's General Academic Appeals process here (https://catalog.luc.edu/academic-standards-regulations/undergraduate/).

   Formal student complaints relating to undergraduate changes of academic records or dismissal for poor scholarship are addressed through the University's Academic Appeals Process here (https://catalog.luc.edu/academic-standards-regulations/undergraduate/).

2. Student Complaints Related to Non-Academic Issues.

   The University admits students without regard to their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law to all the rights, privileges, programs, and other activities generally accorded or made available to students at the school. The University does not discriminate on the basis of race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school-administered programs, or in any aspects of its employment of faculty and staff. Students within the MNSON with questions about this policy or who believe they have been discriminated against because of their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law,

may contact the EthicsLine Reporting Hotline at (855) 603-6988 or submit a report online (https://www.luc.edu/ethicsline/).

Inquiries about Title IX as implemented at Loyola may be directed internally to: Tim Love, Executive Director for Equity & Compliance and Title IX Coordinator for Equity & Compliance, who can be reached at (773) 508-7766 or via email (tlove@luc.edu.).

Inquiries may be made externally to: Office for Civil Rights (OCR) at (800) 421-3481, TDD (877) 521-2172, OCR@ed.gov. Additional information regarding Title IX can be found here (https://www.luc.edu/equity/titleixequitylaws/titleix/).

The Office for Equity and Compliance (OEC) oversees the University's compliance with Title VI of the Civil Rights Act of 1964, which protects people against discrimination based on race, color or national origin in programs that receive federal financial assistance. Please contact the OEC at (773) 508-7766 or equity@luc.edu if you have any questions or concerns regarding Title VI compliance at Loyola. Additional information regarding Title VI can be found here.

Questions regarding Section 504 of the Vocational Rehabilitation Act of 1973 ("Section 504") may also be referred to Tim Love, Executive Director for Equity & Compliance, or another member of the Office for Equity & Compliance, at (773) 508-7766 or equity@luc.edu or the Department of Education's Office for Civil Rights. Additional information can be found here (https://www.luc.edu/equity/titleixequitylaws/ada504/).

EthicsLine Reporting Hotline

Loyola University Chicago has implemented EthicsLine Reporting Hotline, through a third-party internet & telephone hotline provider, to provide you with an automated and anonymous way to report activities that may involve misconduct or violations of Loyola University policy. You may file an anonymous report on-line or by dialing 855-603-6988.

As explained online (https://secure.ethicspoint.com/domain/media/en/gui/34712/):

The University is committed to the highest ethical and professional standards of conduct as an integral part of its mission of expanding knowledge in the service of humanity through learning, justice and faith. To achieve this goal, the University relies on each community member's ethical behavior, honesty, integrity and good judgment. Each community member should demonstrate respect for the rights of others.

The University strongly encourages all faculty, staff, students, administrators or other concerned parties to use this Reporting Hotline to report suspected or wrongful acts of conduct by Loyola University Chicago community members. No University administrator, faculty, staff or student may interfere with the good faith reporting of suspected or actual wrongful conduct; no individual who makes such a good faith report shall be subject to retaliation, including harassment or any adverse employment, academic or educational consequence, as a result of making a report.

Reports submitted via this Reporting Hotline will be handled as promptly and discreetly as possible, with facts made available only to those who need to investigate and resolve the matter. Loyola University Chicago is committed to safeguarding the confidentiality of individuals who submit reports. Due to the nature of certain claims, the University may be limited with respect to the actions it may be able to take in response to a report if the individual submitting the report does not wish to make his or her identity known.

All reports submitted through this Reporting Hotline will be carefully reviewed by Loyola University Chicago personnel. We encourage anyone making a report to return to this web site within 3-5 business days of filing a report using the Report Key assigned by the Reporting Hotline and your private password. The University may have information on your report or may require further information from you in order to proceed with an investigation. On an annual basis a report will be compiled regarding misconduct or violations of Loyola University policy to the President and the Audit Committee of the Board of Trustees.

Health Insurance Portability and Accountability Act of 1996 (HIPAA)

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) is a federal law that provides for the protection and privacy of personal health information. The Privacy Rule and the Security Rule of this law affect health care providers, including students enrolled in clinical education activities. The Privacy Rule of the HIPAA defines protected health information as:

"information, including demographic data, that relates to the individual's past, present, or future physical or mental health or condition; the provision of health care to the individual; or the past, present, or future payment for the provision of health care to the individual; and, that identifies the individual or for which there is a reasonable basis to believe it can be used to identify the individual" (Citation (https://www.hhs.gov/hipaa/for-professionals/privacy/laws-regulations/?language=en))

All students must follow the HIPAA Privacy Rules and Guidelines when participating in clinical educational activities. Compliance with these rules and guidelines includes, but is not limited to, maintaining confidentiality of paper and electronic health records and protected health information.

All students are required to complete HIPAA training as mandated by their educational program. In addition to program-specific training, all students are required to complete any additional training mandated by the clinical facility where their clinical education is occurring.

When a concern is raised that a student has violated the confidentiality and privacy of patient information, the concern is addressed through the formal disciplinary process of the MNSON and the university.

Immunizations (University-mandated)

Proof of immunity is an Illinois state requirement. All Loyola students enrolled in seven or more credit hours must complete the process to verify proof of immunity. Incomplete immunization information will block access to registering or changing classes. All students must enter immunization requirements into Loyola Health and upload supporting documents before the 10th day of the term. All immunizations are to be uploaded to Loyola Health.

Required Illinois state immunizations are Tetanus, Measles, Mumps, Rubella, and Meningococcal.

- A series of three tetanus vaccines is required; One of them must be a TDAP that was given within the past ten years of enrollment.
- Two MMR vaccines are required; the first dose must be given four days before your first birthday or after. The second dose must be given at least 28 days after the first dose.

- Students who cannot provide proof of immunization may provide laboratory (serologic) evidence of measles, mumps, rubella immunity.
- A Meningococcal ACWY vaccine that was given four days before your 16th birthday or after is required for students who enrolling under the age of 22.
- Meningitis B does NOT meet this requirement.

All immunization records must be in English or accompanied by a certified translation or they will not be approved.

Guide to Upload Immunization Record

1. Go to Loyola Health
2. Sign in with UVID and password
3. Click UPLOAD HEALTH RECORDS then UPLOAD VACCINE RECORDS
4. Select 'STATE MANDATED IMMUNIZATION' under Vaccine Type
5. Select your Vaccine Name (Tdap, MMR, Meningococcal)
6. Input the date you received the vaccines (this must be done for each section)
7. Upload photo file (ONLY PDF, JPEG, JPG, JPNG, DOCX, or MOV) of record
8. Click 'Submit for Approval'
9. You will receive an upload confirmation email.

For more information, please visit the Loyola University Chicago Wellness Center immunization page (https://www.luc.edu/wellness/medical/immunizations/).

Independent Study

The student may have the opportunity to register for Independent Study. The purpose of Independent Study is to provide a focused experience in an area of nursing interest. Independent studies can vary in credit (1-3 credits) and may be applied to LUC credit hour requirements. The student will meet with their Academic Advisor to discuss how the Independent Study will fit into their total curriculum plan. If the Independent Study meets the program plan, the student completes the Independent Study Form on SAKAI and submits this to the Assistant Dean of BSN Programs.

International Experiences/Study Abroad

Detailed below are some international experiences that BSN students have pursued.

Full Semester Study Abroad

Students who are in the 4-year BSN program track can study abroad for a full semester during either the fall or spring semester of their sophomore year. Interested students should meet with their assigned Academic Advisor as soon as possible to discuss alterations in their program plan to accommodate their study abroad experience.

In the fall semesters, the MNSON teaches the Global Health Professions program at the John Felice Rome Center. This program allows Sophomore 4-year students to study abroad in Rome while taking nursing courses required for their major. Interested students should meet with their assigned academic advisor as soon as possible to discuss course planning. Spaces in the Global Health Professions program are limited; students must apply online to the John Felice Rome Center using the Global Health Professions program application.

Due to the accelerated nature of the ABSN program track, opportunities for international experiences may be limited. More information can be found here (https://www.luc.edu/studyabroad/index.shtml/).

England

A two-week long segment of the required Community Health Nursing course (CMAN 380L) is offered in England during the Spring Semester of the student's junior year. Clinical experiences are provided through a division of the British National Health Service, and through other clinical learning opportunities in the town of Guildford, a 45-minute train trip from London, and in London. Under the supervision of an MNSON faculty member, experiences include work with British community health nurses employed by the British National Health Service. Prior to their departure for England, students have class and clinical experiences in Chicago. The experience provides students with the opportunity to become better acquainted with the people, culture, and health system of the UK and the role of the community health nurse in caring for specific aggregates. Differences and similarities between health care delivery models in the US and in the UK are explored.

France

A service immersion with a focus on spiritual care is offered annually to Lourdes, France. Traditionally, this offering occurs during the middle to end of May, following graduation. An application process for interested students begins in the fall semester. Information sessions are held prior to the application process to provide students with information about this service experience. No academic credit is offered for this international service experience which is focused on assisting the sick that come from around the world to participate in the religious rituals offered through the shrine in Lourdes.

Rome: Nursing Ethics course

The Marcella Niehoff School of Nursing provides an opportunity for a limited number of students (juniors and seniors in the 4-year BSN program track; students entering their 4th semester in the ABSN program track) to apply to take the required Nursing Ethics course in Rome, Italy. This program is a collaborative effort with Australian Catholic University (ACU), and Loyola students will live with and participate in this course with health sciences students from that university. Classes and dorm space are located at ACU's campus near Trastevere in Rome. The program takes place in January (before the start of the Spring Semester), and, in addition to the classroom experience, the students may participate in a New Year's Day Peace March with the San Egidio social justice community and a walking tour of the center of Rome. Taking Ethics with the Australian students in Italy enhances the understanding of similarities and differences in global healthcare systems and how these similarities and differences affect the provision of ethical nursing practice.

Additional International Opportunities

Ignatian Service Immersions - https://www.luc.edu/hsc/ministry/ignatianserviceimmersion/isi/

International Studies - http://www.luc.edu/studyabroad/

Progression Guidelines

Progression Requirements

4-year BSN Program Track

To progress in the 4-year BSN program track, students must:

- Maintain a minimum cumulative GPA of 2.0
- Earn a minimum grade of "C-" in the following:
  - Nursing Courses: Courses with the CMAN, GNUR, MCN, and MSN designation
  - Psychology or Statistics Courses: PSYC 273, PSYC 274, PSYC 304 or STAT 103 (Note: A minimum grade may be required in the prerequisites for these courses, e.g., a grade of C- in PSYC 101 is required for PSYC 273. These requirements are set by the offering departments and will not be waived by the MNSON.)
- Earn a passing grade ("P") in all clinical and lab courses
- Resolve any incomplete grade (I) in accordance with LUC policy

ABSN Program Track

To progress in the ABSN program, students must:

- Maintain a minimum cumulative GPA of 2.0
- Earn a minimum grade of C- in all required nursing courses: Courses with the CMAN, GNUR, MCN, and MSN designation
- Earn a passing grade (P) in all clinical and lab courses
- Resolve any incomplete grade (I) in accordance with LUC policy

Continuous Registration - ABSN program track

All students are required to register for courses throughout the calendar year (Fall, Spring, and Summer terms) until all degree requirements are met, unless they have received an approved leave of absence or are unable to take courses in accordance with their program track.

Leave of Absence (LOA)

It is expected that the student will maintain registration within the University from the time of initial enrollment until graduation. If this is not possible, a leave of absence (LOA) must be requested prior to the anticipated date of the leave. The student is required to contact their MNSON Academic Advisor when considering a LOA. When the student returns from the LOA, they will be assigned to courses according to the current program plan, on a space available basis. Information about Leave of Absence can be found here (p. 1919).

4-year BSN Program Track

Consistent with the University Policy, if the student is leaving Loyola in good standing, are only gone for a semester, and do not enroll in another college/university during the semester they are gone, they may be readmitted without having to reapply. However, if the student is absent from Loyola for more than one semester, and/or have attended other schools during their absence, they must fill out an application for re-admission from the Office of Undergraduate Admissions.

ABSN Program Tracks

The student may request a leave of absence that is not to exceed two academic semesters consecutively or interspersed throughout the program. Accruing more than two semesters of LOA will result in dismissal from the program.

Opportunities within the MNSON

Student Organizations and Service

Participation in extra-curricular activities provides an opportunity for personal growth while enhancing the student's experience during their BSN program. Current opportunities include the following:

- Nursing Student Councils (all program tracks)
- Student Nurse Association of Illinois (SNAIL)
- Undergraduate Nursing Program Committee
- Community-based service
- International service

Health Sciences Division Organizations and Service Opportunities

The Health Sciences Division at the Maywood Campus offers many opportunities to be involved in and experience health care and service work in a variety of settings. Participation in an organization and/or volunteer opportunity allows the student to become acquainted with other students studying at the Health Science Campus and enhances the student's experience while progressing through the BSN curriculum.

Scholarship Opportunities

The School of Nursing offers several scholarships to BSN students. Information about scholarship opportunities can be found on our MNSON webpage.

Preparation for Clinical Experience (4-year and ABSN program tracks)

The MNSON is committed to fostering a safe learning environment for our students and protecting the health and well-being of patients, families and health care staff. All nursing students are required to submit documentation of compliance with the clinical requirements by the specified deadline and prior to the start of clinical experiences. Qualified First© is the platform used to track and manage immunizations and other clinical requirements. Detailed instructions are provided in the Clinical Information section of the BSN Student Sakai site. Clinical agencies require verification that the student has met all health and pre-clinical screening requirements. Failure to comply with these requirements by the specified dates may result in having a Dean's hold placed on their student account that will prevent registration for classes and clinical participation. These clinical absences will be considered unexcused. The MNSON Clinical Placement (sonclinicalreqs@luc.edu) informs students of all requirements and expected dates of completion.

Health Requirements

The student must be in compliance with all health requirements for the entirety of their academic experience. The MNSON updates immunization requirements as indicated by the Center for Disease Control (CDC) and our affiliating agencies. The student will be informed of any changes that take place during their program. Documentation of these requirements must be uploaded to Qualified First©.

Requirements include the following:

1. Physical Examination
   1. Submit documentation of a physical examination by your health care provider
   2. Physical examination must be within the last 12 months from the start of your first clinical experience
2. Measles, Mumps & Rubella (MMR)
   1. Submit positive antibody titers for all three components (Measles, Mumps, and Rubella)
   2. If any of the titers are negative or equivocal, a series of immunizations, and a repeat titer, are required

3. If the second titer is negative or equivocal, contact the School of Nursing for next steps

3. Varicella (Chicken Pox)
    1. Submit a positive antibody titer
    2. If the titer is negative or equivocal, the Varicella series of immunizations, and a repeat titer, are required
    3. If the second titer is negative or equivocal, contact the School of Nursing for next steps
4. Hepatitis B
    1. Submit a positive antibody titer – the correct titer to obtain is the Hepatitis B Surface Antibody (anti-HBs)
    2. If the titer is negative or equivocal, the Hepatitis B series of immunizations, and a repeat titer, are required
    3. If the titer is negative or equivocal, the Hepatitis B series of immunizations is repeated, and then the titer is also repeated.
    4. If the second titer is negative or equivocal, contact the School of Nursing for next steps.
5. Tuberculosis (TB) - There must be documentation of one of the following:
    1. QuantiFERON Gold Blood Test (lab report required and must be uploaded to Qualified First©)
    2. If positive results, provide a clear Chest X-Ray (documentation of results are required and must be uploaded to Qualified First©) AND additional follow-up with School of Nursing
    3. 1-step TB test annually
6. Tetanus, Diphtheria, and Pertussis (Tdap)
    1. Submit documentation of a Tdap booster within the past 10 years.
    2. International students MUST have a series of three tetanus injections. One injection must be within 10 years. First and second injections must be at least 28 days apart AND the second and third injections must be at least six months apart.
7. Influenza (Flu Vaccine)
    1. Submit documentation of annual vaccination against influenza
    2. Flu vaccination should be obtained soon after it becomes available (generally around September), by October 12. Immunization information must include the lot number and the location where the immunization was administered. Please check Qualified First® for due dates.
8. COVID-19 Vaccination
    1. Submit documentation of your COVID-19 vaccination(s).
    2. If you are receiving the two-dose series, BOTH vaccines must be submitted at the same time for approval.
9. N-95 Fit-Testing
10. Submit documentation of annual N95 fit-testing to Qualified First©

Students are responsible for ongoing monitoring of due dates and renewal dates in their Qualified First® account. Failure to meet these due dates, or renewal dates, means the student is out of compliance, and subject to removal from any scheduled clinical learning experiences. Any removal from a clinical learning experience due to not being in compliance, is treated as an unexcused absence. Unexcused absences place the student at risk for not meeting the outcomes of the course and may warrant the initiation of a Student Performance Improvement Plan.

Criminal Background Check

Clinical agencies require that the student complete a criminal background check prior to clinical placement. The student is required to complete a background check through the vendor used by the MNSON.

1. The Criminal Background Check must be deemed acceptable in order to progress in nursing courses and in accordance with agency policies for clinical placement.
2. The student may be required by MNSON administration or their assigned clinical learning site to complete additional criminal background checks or urine drug screens.
3. The student will be responsible for fees incurred with additional screening.
4. The student will be required to provide an additional background check as part of the application for RN licensure.

Ten Panel Urine Drug Screen

The MNSON is obligated to comply with the Loyola University Chicago Alcohol and Other Drugs Policy, as well as all federal and state laws and regulations dealing with usage and detection of drugs. Loyola will not permit the possession or use of marijuana at educational or other activities sponsored, conducted, or authorized by Loyola or its student organizations, whether on or off campus, in any on-campus housing, or in any other Loyola buildings or other property. Any positive drug screening results may result in a referral to the Student Rights, Responsibilities and Conflict Resolution (SRCR) in the Office of the Dean of Students.

A number of states, including Illinois, have passed laws that make the use of marijuana for some medical conditions and recreational use legitimate under the law of that state. However, the possession or use of marijuana remains an offense under the Controlled Substances Act, a federal law.

Clinical agencies affiliated with the MNSON also have drug and substance use policies and require that nursing students comply with their drug testing policies. The drug testing policies and procedures of the hospital, clinic, nursing home, or facility will be followed while students are engaged in clinical activities as part of the program of study at LUC. Clinical agencies have the right to refuse any student for clinical placement based on concerns about that student's ability to deliver safe practice.

Procedures

All nursing students will undergo a Ten Panel Urine Drug Screen for the following substances:

1. Amphetamine/methamphetamine
2. Barbituates
3. Benzodiazepines
4. Cocaine metabolite (BZE)
5. Codeine/Morphine
6. Marijuana Metabolite (THCA)
7. Marijuana Metabolite Quant.
8. Methadone
9. Phencyclidine
10. Propoxyphene

Types of Drug Testing

Requirement for Clinical Placement - The MNSON requires that the student complete a ten-panel urine drug screen prior to clinical

placement. Safety in the delivery of care to patient/client populations is the basis for drug testing.

- Retesting - Retesting may be required if a clinical site requires a more recent test than is provided for by the MNSON policy.
- Reasonable suspicion - Any nursing student participating in clinical practice is subject to drug testing upon request if there is reasonable cause to believe that the student may be using illegal drugs, misusing legal drugs, or misusing alcohol products. Circumstances which constitute reasonable cause, include but are not limited to: notification from OSSCR of any report that includes possession, use transfer, distribution, manufacture , or sale of illicit drugs (https://www.luc.edu/osccr/communitystandards/alcoholdrugsandsmoking/): physiological signs of possible impairment from drugs.
- Follow-up Testing - Any student testing positive may be subject to repeated follow-up testing.

Negative Test Result

A negative result requires no further screens, and the student may participate in their clinical activities. A test result of "dilute negative" is not acceptable and will require retesting at the student's expense. The student will not be cleared to attend clinical as long as their drug screen result is dilute negative.

Positive Test Result

If the student's drug screen is positive, they are not able to participate in a clinical placement until further documentation is provided and processed by the Medical Review Officer (MRO) of the drug screening vendor. If the MRO does not clear the result, the results may be acted upon by the MNSON and the LUC. A dilute positive drug screen result will be treated as if the test result is positive.

Refusal to Test

If a student fails to produce the requested sample by the date and time designated, the student will be treated as if the test result was positive.

Medical Review Process

The MNSON recognizes that some substances are used for legitimate medical purposes and the following procedures will be followed:

- Once the drug screen result is posted, any positive drug screen result will be referred to the Medical Review Officer (MRO) of the drug screening vendor. MNSON will be notified that there will be a delay of 3-5 days until the drug screen result
- The MRO will contact the student to conduct an interview
- Documentation from the student's health care provider will be required to show proof that a prescribed medication/drug (a copy of the prescription or verification from the healthcare provider that they are taking the medication/drug under supervision) lead to a positive drug screen, the MRO will note the outcome of the review.

Documentation Requirements

1. CPR Certification: Documentation of Healthcare Provider BLS Certification with skills check off completed through an American Heart Association Healthcare Provider course must be uploaded to Qualified First©.
2. Health Insurance Certification: Documentation of current health insurance plan (copy of both sides of health insurance card) or the Health Insurance Certification School form must be uploaded to Qualified First©. The student is responsible for updating any insurance information changes to Qualified First© within 30 days of the change.

Clinical Agency-Specific Requirements

Clinical agency-specific requirements can be found in the BSN Student Information SAKAI site. The student is responsible for completing all agency-specific requirements prior to the start of the clinical experience by the specified dates. Students who fail to complete the requirements by the specified dates will not be allowed to participate in clinical which may jeopardize their progression in the program.

Clinical Placement

The student is assigned to clinical placements in collaboration with our affiliating agencies. Specific clinical placement requests will not be accommodated. Students are expected to be flexible and may be scheduled for morning shifts, evening shifts, and/or shifts on Saturdays. MNSON reserves the right to make changes to posted schedules and/or placements at any time and will only do so when unavoidable. Student requests to change placement assignments are not permitted.

Identification of clinical sites and selection of preceptors for the GNUR 384 Clinical Role Transition (CRT) course involves a joint effort between the MNSON and the site. Students must not reach out to the managers or nurses of a clinical site to secure preceptors or make arrangements for their CRT experience.

Clinical Transportation

The student is responsible for arranging their own transportation to clinical sites. The student should make transportation plans as soon as they are notified of their clinical placement. The student is encouraged to plan accordingly for their transportation in order to be on time for classes, simulation and/or clinical experiences

Dress Code

The student's personal appearance may have a significant impact on the safety, infection control, and comfort of patients, families, and other staff. For this reason, appropriate attire and appearance in all clinical, lab, and simulation areas is the standard. Ethnicity, national origin, and cultural traditions will be considered and reviewed when patient or student safety is not at risk.

1. All students are required to be clean, well-groomed, and wear a Loyola photo identification badge above the waist with their picture clearly visible.
2. Hair must be kept off face, above collar or pulled back. Beard and mustaches must be neatly groomed. In restricted and semi-restricted areas any facial and head hair must be covered.
3. Fragrances (cologne/perfume/lotions) should be subtle. All students and employees should be sensitive and respectful of the fact that some individuals are allergic to and/or have sensitivity to fragrances. Therefore, if someone brings to an individual's attention that a fragrance they are wearing is problematic, they should refrain from wearing it.
4. Piercings should be kept to a minimum. While providing direct patient care, earrings should be limited to studs. Some departments may be more restrictive based on patient safety and infection control requirements.
5. Fingernails should be trimmed, clean and neat, and should not interfere with skill performance. While providing direct patient care students are prohibited from wearing artificial nails, including acrylic, silk wraps, nail tips, or nail decorations. If polish is worn, clear nail

polish that is not chipped or visibly worn is permitted in order to inspect nails for infection related concerns.

6. Tattoos should be covered by clothing wherever possible. It is up to the Clinical Faculty and Clinical site if there are situations where the number and visibility of tattoos are inappropriate for the setting. In no event may obscene, inflammatory, discriminatory, or other similarly inappropriate tattoos be exhibited on campus or at a clinical site.

Uniform Guidelines

The student is expected to be dressed in a manner consistent with the MNSON uniform guidelines. All students are required to wear uniforms at all clinical settings, including the MNSON skills lab and simulation. The uniform requirements may be modified at specific sites so that students are in compliance with clinical site policy. Please be mindful of the fact that as a student you are representing the MNSON at all of your clinical sites.

Uniform items are available through the LUC Bookstore at the Lake Shore Campus (orders may be completed online) or from a local vendor. Scrubs should be Cherokee brand in wine color.

Uniform guidelines for clinical experiences are as follows:

Inpatient Clinical Nursing, Clinical Lab and Simulation

- Loyola student ID and Agency-Required ID, if applicable
- Cherokee brand, wine color uniform (student may wear a plain white cotton t-shirt under the uniform top)
- Cherokee brand, wine color jacket (may be worn over the uniform)
- Scrub tops and jackets must be plain (e.g. not be embroidered with the MNSON logo nor student name)
- White lab coat with MNSON insignia patch on the upper left arm sleeve
- Shoes should be clean, well-polished, in good repair, and dedicated to work setting (no clogs, Crocs or similar footwear). Shoes must be closed-toe, flat, or heels 1 inch or less, made of sturdy material that will not absorb body fluids or potentially hazardous materials and be of solid color white, brown, or black. Please note that some institutions may require white shoes so you must be prepared to purchase a pair of white shoes that comply with their regulations if you choose to purchase brown or black shoes.

Community Health and Mental Health Nursing

- Loyola student ID
- Conservative street clothes with nylons or socks and low-heeled closed-toe shoes, slacks and shirt; no tie
- Attire not permitted: jeans, leggings, T-shirts, clogs, sandals, short skirts, sweatshirts, low-cut necklines, bare midriff

Equipment

The following list of equipment is required for lab and clinical experience.

- Bandage scissors
- Black pen
- Penlight
- Stethoscope with a bell and diaphragm
- Stethoscope must be independent of the blood pressure cuff
- Manual blood pressure cuff (preferably latex free)
- Wristwatch with second hand
- Four function calculator

Reasonable Accommodations

Loyola University wishes to ensure that access to its facilities, programs, and services are available to students with disabilities. The University provides reasonable accommodations to students on a nondiscriminatory basis consistent with legal requirements as outlined in the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990, and the Americans with Disabilities Act Amendments ACT (ADAAA) of 2008.

A reasonable accommodation is a modification or adjustment to an instructional activity, facility, program or service that enables a qualified student with a disability to have an equal opportunity to participate in all Loyola University student activities. To be eligible for accommodations, a student must have a documented disability as defined by the ADA and Section 504 of the Rehabilitation Act of 1973. The ADA, the ADAAA and Section 504 all define disability as

1. A physical or mental impairment that substantially limits one or more major life activities of such individual;
2. A record of such impairment; or
3. Being regarded as having such a condition.

Decisions regarding reasonable accommodation are determined on a case-by-case basis taking into consideration each student's disability-related needs, disability documentation and program requirements. While Loyola University will make every effort to work with students with disabilities to accommodate their disability-related needs, the university is not required to provide accommodations that fundamentally alter or waive essential program requirements.

Students who, after review of the technical standards, determine that they require accommodation to fully engage in the program should contact the Student Accessibility Center (SAC) to confidentially discuss their accommodation needs. Given the clinical nature of our programs, additional time may be needed to implement accommodations. Accommodations are never retroactive; therefore, timely requests are essential and encouraged.

Special Health Accommodations

Documentation from a healthcare provider is required whenever a student has a health issue or injury that demands certain precautions or accommodations. These situations may include other medical conditions that require modification and/or restrictions for student participation in clinical experiences. Documentation from a healthcare provider is required when the accommodations are no longer necessary. Approval from the program director and review of agency guidelines by the clinical partners is required and will be addressed on a case-by-case basis.

Student Accessibility Center (SAC)

The Student Accessibility Center (SAC) supports students with disabilities by fostering equitable access to all aspects of student life at Loyola University Chicago. In alignment with Loyola's Jesuit mission and the value of Cura Personalis—care for the whole person—SAC partners with students, faculty, and campus offices to remove barriers and support academic, personal, and professional success.

Loyola University Chicago provides reasonable academic and student life accommodations for students with disabilities. Students interested

in receiving academic accommodations related to a disability or other health condition are invited to register with the Student Accessibility Center (SAC) at https://www.luc.edu/sac/applywithsac/. Students may register with the SAC at any point in their academic career, however the SAC encourages students to register as early as possible to reduce delay in delivery of accommodations. This is especially important for students needing accommodations in clinical or laboratory settings, which may require additional coordination.

Once registered, the student, SAC, and faculty will engage in an interactive process to determine how accommodations will be applied in each course. SAC staff work one-on-one with students to review documentation, determine reasonable accommodations, and support self-advocacy. Accommodations are not retroactive and must be renewed each semester through SAC's formal process.

Accommodation Letters

- Students must send accommodation letters to their instructors each term.
- Letters should ideally be shared within the first two weeks of the semester but may be sent at any point.
- Faculty will receive an official notification from SAC with access to the accommodation letter.
- If needs change during the term, students may request modifications and submit an updated letter.

Students are encouraged to meet with each professor individually to discuss how accommodations will be implemented in their course. All information is handled with confidentiality.

Audio Recording of Lectures

In some classes, students with approved accommodations may use audio-recording software to ensure equal access. These recordings are for personal study use only. They may not be shared, distributed, or used against faculty, lecturers, or classmates. All recordings must be deleted at the end of the semester.

Contact SAC

Website (https://www.luc.edu/sac/) & Registration (https://www.luc.edu/sac/applywithsac/) • Email (SAC@luc.edu) • Phone: 773-508-3700 • Office Location: Sullivan Center, Suite 117, Lake Shore Campus

Tutoring Center - Lake Shore and Health Sciences Campuses

The purpose of the Tutoring Center is to support the mission of Loyola University Chicago by providing academic services and resources which will foster development of skills and attitudes necessary to increase the knowledge and academic independence of all students. Through collaborative learning services, the Tutoring Center helps to contribute toward student success and the retention efforts that are made by Loyola University Chicago. The Tutoring Center offers Supplemental Instruction, small group tutoring, success coaching, and a 1-credit learning strategies course (UNIV 112). The list of nursing major courses supported by the Tutoring Center can be found here (https://www.luc.edu/tutoring/subject-specificsupport/nursing/). Information about all of the Tutoring Center's services can be found at here (https://www.luc.edu/tutoring/index.shtml/).

Tutoring for Senior Level 4-year BSN and Semester 4 ABSN Students

Senior Level 4-year BSN and Semester 4 ABSN students receive tutoring services for MSN 377 (Adult Health II) through the MNSON from adjunct nursing faculty or prior graduates of the program, upon recommendation of the faculty.

Unprofessional Behavior and Conduct of Marcella Niehoff School of Nursing Students

Professional conduct by the student facilitates learning opportunities and fosters good working relationships within the MNSON and between the MNSON and clinical agencies or institutions. Complaints related to unprofessional behavior and conduct by students within the MNSON may originate from faculty, staff, other students, or from outside the University, such as a clinical site.

Issues of unprofessional behavior or conduct that occur during a clinical learning experience will be addressed immediately as well as through the evaluation of student performance in the clinical course, as detailed in the course syllabus.

Complaints of unprofessional behavior or conduct within a classroom, simulation, or lab experience, or outside a clinical learning experience, are addressed through a formal complaint resolution process, as specified below.

1. The first attempt at resolution of the complaint should occur between the student and the other parties involved.
2. If the complaint of unprofessional behavior or conduct is not resolved among the parties involved, a formal complaint, in written form, is forwarded to the Program Director.
3. The Program Director reviews the complaint, any supporting documentation submitted by any of the parties, and meets with the parties involved individually. If the Program Director is directly involved in the complaint, the complaint instead is forwarded to the Assistant Dean for the BSN Program.
4. If the complaint is not resolved at the level of the Program Director, the Program Director submits a recommendation for any action to be taken, along with any supporting documentation, to the Assistant Dean for the BSN Program with jurisdiction over the degree program in which the student is enrolled.
5. The Assistant Dean for the BSN Program, upon review of the recommendation, complaint and supporting documentation, meets with the parties to the complaint.
6. The Assistant Dean for the BSN Program may dismiss the complaint or, upon finding that the student has engaged in unprofessional behavior and conduct, institute progressive corrective action with the student. Progressive corrective action typically begins with a verbal warning (documented) to the student, which details the nature of the complaint, corrective actions to be taken, and notifies the student that failure to correct the unprofessional behavior or conduct may result in more severe corrective action. The nature of the behavior dictates the severity of the action. The behavior may warrant immediate action beyond a verbal warning.
7. If the unprofessional behavior or conduct continues, the Assistant Dean for the BSN Program may issue a written warning, which details the nature of the continuing concern related to unprofessional behavior or conduct, further corrective actions that are required, and

notifies the student that failure to correct the unprofessional behavior or conduct may result in the student's withdrawal from a course or a recommendation for dismissal from the academic program. The decision to recommend a withdrawal or dismissal is based on the nature and severity of the unprofessional behavior.

8. If the unprofessional behavior or conduct continues, the Assistant Dean for the BSN Program will either withdraw the student from a course or make a recommendation for dismissal from the academic program.
9. If the student is withdrawn from the course, the student will receive a W for the course depending on the time the decision is made.
10. In the event that unprofessional behavior or conduct continues following verbal and written warnings, the Assistant Dean for the BSN Program may submit to the Dean a recommendation for the student's dismissal from the academic program. The Executive Associate Dean for Academic Affairs may authorize the student's dismissal from the program of study, in all cases except where expulsion from the University is also recommended.

Wellness Center

The Wellness Center provides high quality interdisciplinary medical, mental health, and health promotion services that enable the student to more fully participate and succeed in the college experience. Students currently attending classes (full or part time) are eligible to use the services provided at the Wellness Center at no charge. Wellness Center services are covered by Student Development Fee. Students who are not charged the Student Development Fee but would like to receive services must submit the Optional Enrollment form. A fee for the Wellness Center is assessed at the beginning of the Fall and Spring semesters and appears on every student's bill as part of the student activity fee. This covers medical assessment and short-term treatment by a staff nurse, physician, or nurse practitioner; assessment and either brief counseling with a mental health professional at the Wellness Center or assistance connecting to a community mental health provider; telephone advice from a nurse; and health education and wellness programs and resources at the Wellness Center, including unlimited group therapy visits. Some lab tests, immunizations, prescription medications, and materials are provided for an additional fee. More information about the Wellness Center resources is available here (https://www.luc.edu/wellness/).

Note: The Wellness Center does not provide medical clearance for return to clinical/simulation/classroom sessions.

Withdrawal

Withdrawal is the election of a student to change enrollment status by removing themselves from the official class roster. Withdrawal from specific courses in the BSN program may impact a student's ability to progress in the program. For more information about withdrawing from a course, or assistance, please see your assigned Academic Advisor.

According to University policy: Complete withdrawal before the beginning of the term start date will result in no financial responsibility. Complete withdrawal from all classes after the term start date will result in tuition charges according to the withdrawal schedule of the university.

According to University policy: During the late and change of registration period, a student may withdraw from a course without penalty, or notation, on their academic record. After the late and change of registration period, a designation of "W" will appear on the academic record. Students facing a significant emergency circumstance that prevents them from continuing in or completing an academic term may submit an Intent to Withdraw form to their primary academic advisor, program director or assistant/associate dean. All requests must be supported by appropriate documentation. Requests for complete emergency term withdrawals are considered after the last day of a term to drop a course or courses without a grade of "W." Complete emergency term withdrawals constitute a withdrawal from all classes and may result in final grades of "WE" in all classes for the given academic term. The University does not grant partial withdrawals (i.e., requests to withdraw from some classes but not others) for emergencies. Grades of "WE" have no impact on a student's cumulative GPA. Dates for these withdrawal conditions are published in the university academic calendar.

More information about the University Policy is available here (p. 1919).

Students may withdraw, with a grade of "W", one time from any of the following courses without penalty to their academic standing in the BSN program:

- Nursing Courses: Courses with the CMAN, GNUR, MCN, and MSN designation
- Psychology or Statistics Courses: PSYC 273, PSYC 274, PSYC 304 or STAT 103

A student who withdraws twice, from any of the courses listed, and receives a notation of "W" on their academic record, will be placed on probation. For the probation to be lifted, the student must complete the course with a grade of C- or higher during the next semester in which the course is taken.

If the course is not successfully completed with a C- or higher, or if the student withdraws a third time from this same course, the student will be dismissed from the BSN program.

Refer to "'Dismissal from the MNSON"' section of the handbook for specific application of the withdrawal policy.

The Writing Center - Lake Shore and Water Tower Campuses

The main goal of the Writing Center is to help the student become a better writer. The Writing Center offers writing assistance to meet the student's individual needs. Tutors are available to help at any point of the writing process—from brainstorming, to organizing, to putting the final touches on a bibliography. All LUC students are eligible to use their services. Online writing center services are also available to students. More information and writing resources are available online (https://www.luc.edu/writing/).

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

University Policies

Please see University Policies for academic policies that supersede those of academic units within the University

CM/MH/AD Nursing (CMAN)

CMAN 272 Mental Health Patterns (3 Credit Hours)
Co-requisites: CMAN 272L
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 272L Mental Health Patterns: Lab (3 Credit Hours)
Co-requisites: Must also enroll in CMAN 272
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 380 Community Health (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 294, and GNUR 290 with a C- or better; Must also enroll in CMAN 380L
Nursing and public health concepts provide theoretical basis for care of families, aggregates, and communities outside institutional settings. Role of community health nurses in caring for specific aggregates is described. Clinical experiences are provided for application of concepts and implementation of nursing interventions in a variety of community settings.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN380/CMAN380A/CMAN375

CMAN 380L Community Health: Lab (3 Credit Hours)
Must also enroll in CMAN 380.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN375L/CMAN380C/CMAN380L

General Nursing (GNUR)

GNUR XXX Comprehensive Exam Semester 1 (0 Credit Hours)
Course designation for program planning master's students into the comprehensive examination requirement; First semester of the process.

GNUR YYY Comprehensive Exam Semester 2 (0 Credit Hours)
Course designation for program planning master's students into the comprehensive examination requirement; Second semester of the process.

GNUR 102 Introduction to Professional Nursing Practice (1 Credit Hour)
This course introduces the mission of the MNSON and the foundations of nursing practice. Nursing is presented as a scientific profession with a heritage of strong values-based leadership based on critical thinking and evidence based practice.
Outcomes:
Describe the mission of the MNSON and discuss the ANA Scope of Standards of Nursing Practice

GNUR 157 Human Anatomy and Physiology I Theory (3 Credit Hours)
Co-requisites: GNUR 157L The first in a two-part sequence, this course is designed to give students a detailed understanding of the structure of the major organs and systems of the human body from the cellular to the system level
It includes the integumentary system, the skeletal system, the skeletal muscles, the nervous system, and the special senses (sight, hearing, smell, taste). By the end of the course, students will be able to demonstrate understanding of the workings of the above systems from an anatomical and physiological viewpoint.
Outcomes:
Use appropriate terminology to discuss anatomy and physiology; Identify anatomical structures and describe the complex interrelationships between structure and function; Explain how body systems work together to maintain homeostasis; Describe the general structure and function of the integumentary system, the skeletal system, the skeletal muscles, the nervous system, and the special senses and their interactions with each other; Recognize and apply patterns that unify, organize, and simplify the abundant detail of anatomy and physiology

GNUR 157L Human Anatomy and Physiology I Lab (1 Credit Hour)
Co-requisites: GNUR 157 This course is the companion laboratory course for GNUR 157, Anatomy and Physiology I
This course is designed to give students a basic understanding of the structure and function of the major organs and systems of the human body from the cellular to the system level of the integumentary, skeletal, muscle and nervous systems. By the end of the course, students will be able to demonstrate understanding of the workings of the systems from an anatomical and physiological viewpoint.
Outcomes:
Identify anatomical structures using appropriate terminology and describe the complex interrelationships between structure and function of the system level of the integumentary, skeletal, muscle and nervous systems; Use appropriate laboratory tools and techniques to examine anatomical structures and physiological functions; Work collaboratively with peers during lab and communicate results of lab work effectively

GNUR 158 Human Anatomy and Physiology II Theory (3 Credit Hours)
Co-requisites: GNUR 158L The second in a two-part sequence, this course is designed to give students a detailed understanding of the structure of the major organs and systems of the human body from the cellular to the system level
It includes the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems, as well as the concepts of development, metabolism, fluid and electrolyte balance, and acid-base balance. By the end of the course, students will be able to demonstrate understanding of the workings of the above systems from an anatomical and physiological viewpoint.
Outcomes:
Use appropriate terminology to discuss anatomy and physiology; Identify anatomical structures and describe the complex interrelationships between structure and function; Explain how body systems work together to maintain homeostasis; Describe the general structure and function of endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems, as well as the concepts of development, metabolism, fluid and electrolyte balance, and acid-base balance and their interactions with each other; Recognize and apply patterns that unify, organize, and simplify the abundant detail of anatomy and physiology

GNUR 158L Human Anatomy and Physiology II Lab (1 Credit Hour)
Co-requisites: GNUR 158 This course is the companion laboratory course for GNUR 158, Anatomy and Physiology II
This course is designed to give students a basic understanding of the structure and function of the major organs and systems of the human body from the cellular to the system level of the endocrine, cardiovascular, respiratory, digestive, urinary, and reproductive systems. By the end of the course, students will be able to demonstrate understanding of the workings of the systems from an anatomical and physiological viewpoint.
Outcomes:
Identify anatomical structures using appropriate terminology and describe the complex interrelationships between structure and function of the system level of the endocrine, cardiovascular, respiratory, digestive, urinary, and reproductive systems; Use appropriate laboratory tools and techniques to examine anatomical structures or physiological functions; Work collaboratively with peers during lab and communicate results of lab work effectively

GNUR 160 Chemistry for Health Professions (3 Credit Hours)
Introduction to general chemistry and elements of organic chemistry and biochemistry include the review of families of simple organic molecules and simple sugars, the role of enzymes in biochemical reactions, and the metabolism of carbohydrates, proteins, and lipids. Must also enroll in GNUR 160L.
Course equivalencies: GNUR160/CHEM151

GNUR 160L Chemistry for Health Professions Lab (1 Credit Hour)
Companion laboratory course for GNUR 160, Chemistry for Health Professions Must also enroll in GNUR 160.

GNUR 203 Microbiology for Health Professions with Lab (3 Credit Hours)
This course examines basic concepts of microbial metabolism, genetics, and classification in order to understand their effects on human health. Clinically relevant microbial diseases will be explored, with a focus on microbe-human interactions, epidemiology, and methods to control microbes. The course includes a laboratory component designed to complement lecture topics.
Outcomes:
Identify the association between the major groups of microorganisms, the portals of entry and exit of microorganisms that cause disease, and disease processes; Describe the components and functions of the human immune system, the role it plays in protecting the host, and methods that microorganisms use to evade or defeat the immune system; Apply microbial control principles to aseptic technique, antimicrobial treatments, drug resistance, and antibiotic stewardship; Explain the magnitude of the global impact of microbes on human illness, and the factors that hamper effective global public health efforts; Implement microbiological techniques such as isolation of organisms, counting microbial populations, staining, ELISA, and metabolic identification of organisms

GNUR 207 Concepts of Professional Nursing Practice (2 Credit Hours)
This course explores nursing concepts for professional nursing practice in the care of individuals, families, communities, and populations, along the health-illness continuum. Content includes client and family- centered care, client teaching, levels of prevention, the determinants of health and illness, and the principles of population- focused and culturally sensitive care. Students are introduced to the historical and political influences of the current US health care delivery system with an emphasis on the issues of health care access, health care disparities, social determinants of health, biases in the healthcare setting, and health literacy among culturally diverse and vulnerable populations.
Outcomes:
1) Describe the role of the professional nurse in health promotion and risk reduction for individuals, families, communities, and populations, with an emphasis on the impact of values, lifestyle, and cultural influences; 2) Understand the cultural basis for health beliefs and practices for individuals, families, communities, and populations; 3) Understand the epidemiological model for diseases, including the levels of prevention and population-based approaches; 4) Explain the structure and function of the US health care delivery system and the impact of these factors on access, quality, and cost of health care; 5) Understand the health goals for the nation identified by Healthy People initiative

GNUR 230 Success in Nursing I (1 Credit Hour)
This course is designed to help students to understand and develop the vocabulary and critical thinking skills necessary to increase their success in nursing courses, the nursing program, and the university.
Outcomes:
The student will be able to increase their mathematical, verbal, critical thinking, and study skills; The student will learn to use the nursing process as a problem solving method

GNUR 238 The Foundations of Clinical Practice in Nursing (3 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 155, GNUR 156, and GNUR 160 with a C- or better; Must also enroll in GNUR 238L
This course introduces basic nursing concepts such as critical thinking, the nursing process, physiologic and safety needs of the client, health assessment, and fundamental nursing skills, including safe medication administration. The course prepares students for the role of the professional nurse in the clinical setting.

GNUR 238L Foundations of Clinical Practice in Nursing Lab (1 Credit Hour)
The students will utilize critical thinking skills and the nursing process to apply basic nursing concepts in the performance of health assessment and fundamental nursing skills. The course prepares students for the role of the professional nurse in the clinical setting. Must enroll in GNUR 238.

GNUR 290 Concepts in Older Adult Health (2 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 238, GNUR 293 and GNUR 297 with a C- or better, OR be enrolled in GNUR 238, GNUR 293 and GNUR 297
This course introduces students to the care of older adults. It is designed to explore current concepts and practices pertaining to aging. This course provides an overview of the normal physical, psychological, and social-cultural aspects of the aging process. It addresses health and health alterations of aging and exploration of attitudes toward care of the older adult. Enrollment is restricted to students admitted to the BSN program.

GNUR 293 Pathophysiology (4 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 155, GNUR 156 and GNUR 160 with a C - or better
This course provides the student with knowledge of the basic mechanisms involved in pathophysiological processes.
Outcomes:
The student will be able to use critical thinking skills in the application of pathophysiological processes to clinical practice

GNUR 294 Foundations of Pharmacology (3 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 293, GNUR 203, GNUR 238, GNUR 297 with a C- or better; Must have taken and passed GNUR 238L with a P
This course introduces nursing students to pharmacology and provides them with the foundation needed to administer medications.

GNUR 297 Clinical Nutrition for Nursing Practice (2 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 155, GNUR 156, and GNUR 160 with a C- or better
This course introduces foundations of nutrition for nursing practice. Evidence-based nutrition is applied across the life-span and health continuum. Nutritional assessment, cultural practices and health policies are explored.

GNUR 360 Nursing Research: For Evidence-Based Practice (3 Credit Hours)
Pre-requisites: Must have taken and passed PSYC 304 or STAT 103 with a C- or better
This course provides basic knowledge regarding the research process and the importance of evidence-based nursing practices. Students learn to analyze how evidence is generated to make clinical judgments that inform practice in a variety of settings.
Course equivalencies: GNUR350/GNUR3660

GNUR 361 Nursing Ethics (3 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 360, MSN 277, MSN 277L, GNUR 294, GNUR 290 with a C- or better
This course offers students, as future health care professionals and as health care recipients, opportunities to think philosophically, demonstrate ethical awareness, do ethical reflection, and apply ethical principles in decision-making.
Outcomes:
The student will be able to recognize and respond to ethical challenges inherent in the delivery of health care to individuals with differing philosophical views and diverse backgrounds providing reasoned arguments for views held/positions taken

GNUR 383 Leadership for Professional Nursing Practice (3 Credit Hours)
Pre-requisites: Must have taken and passed MCN 273, MCN 374, CMAN 272, CMAN 380, GNUR 360 with a C- or better , OR MCN 273L, MCN374L, CMAN 272L, CMAN 380L with a P
This course prepares the student to provide leadership in the practice setting and profession. Personal identity and role as nurse leader is addressed from unit-based to organizational and policy environments. Principles of leadership are developed and applied in clinical settings. Legal, regulatory and professional standards related to nursing practice are presented.

GNUR 384 Clinical Role Transition (3 Credit Hours)
Pre-requisites: Must have taken and passed MCN 273, MCN 374, CMAN 272, CMAN 380, GNUR 360,with a C- or better; Must have taken and passed MCN 273L, MCN 374L, CMAN 272L, and CMAN 380L with a P; Must also enroll in GNUR 383
Through preceptor-based learning and seminars, this experience focuses on assimilating the role behaviors of a professional nurse as a provider, designer, manager, and coordinator of care in health care systems, and a member of a profession. Clinical reasoning, critical thinking, prioritization, and the integration of knowledge are emphasized in this experience, focusing on the provision of patient-centered, evidence-based care as a member of an interprofessional health care team.
This course satisfies the Engaged Learning requirement.
Outcomes:
Upon successful completion of this course, the student is able to: 1) Incorporate standards of practice into the development, implementation, and evaluation of evidence-based, patient-centered care; 2) Apply principles of quality and safety in patient care settings; 3) Apply knowledge of prioritization and delegation in the management of care; 4) Collaborate with patients, families, and members of the interprofessional health care team in the design, delivery, and evaluation of evidence-based, patient-centered care; 5) Exemplify role behaviors consistent with a member of a profession; 6) Incorporate ethical, legal, regulatory, financial, and economic considerations into the design, delivery, management, and evaluation of care

GNUR 399 Independent Study (1-5 Credit Hours)
Requires approval of Associate Dean Academic Programs in Nursing.

Maternal/Child Nursing (MCN)

MCN 273 Family Health Patterns I (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, GNUR 294 with a C- or better; Must have taken and passed MSN 277L with a P; Must also enroll in MCN 273L
This course allows students to apply concepts from systems theory and the levels of prevention models to structure the presentation of selected concepts related to health promotion and health maintenance of childbearing and parenting families.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of childbearing and parenting families

MCN 273L Family Health Patterns I: Lab (3 Credit Hours)
Co-requisites: Must enroll on MCN 273
No course description is available

MCN 374 Family Health Patterns II: Care of the Child and Family (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277 and 277L, GNUR 294 with a C- or better; Must also enroll in MCN 374L
This course uses the Health People 2010 initiative to structure the presentation of selected concepts related to the health promotion, health maintenance and health restoration of infants, children, adolescents and their families.
Outcomes:
Students will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of infants, children, adolescents and their families

MCN 374L Family Health Patterns II: Lab (3 Credit Hours)
Co-requisites: Must also enroll in MCN 374
No course description is available

Medical/Surgical Nursing (MSN)

MSN 277 Medical/Surgical Nursing: Adult Health I (4 Credit Hours)
Pre-requisites: Must have taken and passed PSYC 273 or PSYC 274 and GNUR 294 with a C- or better OR Must have taken and passed PSYC 273 or PSYC 274 with a C- or better and be enrolled in GNUR 294
This course is designed to use levels of prevention to provide nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families and communities across the health care continuum.

MSN 277L Medical/Surgical Nursing: Adult Health Lab I (3 Credit Hours)
Must also enroll in MSN 277. This course is designed to apply levels of prevention in nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families, and communities across the health care continuum.

MSN 377 Adult Health II - Advanced Medical-Surgical (4 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 290, GNUR 294, GNUR 360,with a C- or better; Must also enroll in MSN 377L
This course builds on MSN 277, Adult Health I, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are incorporated into the identification of interventions within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.
Outcomes:
Nursing care of adults experiencing selected critical health issues

MSN 377L Adult Health II - Advanced Medical Surgical Clinical (3 Credit Hours)
Must also enroll in MSN 377. This course builds on MSN 277L, Adult Health I Clinical, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are obtained and interventions are provided within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.
Outcomes:
Nursing care of adults experiencing selected critical health issues - clinical

Nursing (Accelerated BSN)

The Accelerated BSN track of the BSN program is designed for college graduates who want to transition to a career as a professional registered nurse. Pre-requisite arts and sciences courses are completed prior to admission. The 16-month full-time program includes the major courses of the BSN program.

The Accelerated BSN track of the BSN program is offered in two learning options.

Onsite Option

Courses meet in person on the Health Sciences Campus in Maywood, Illinois. Laboratory and simulation experiences are completed at the Health Sciences Campus and clinical learning experiences are completed throughout the Chicagoland area.

Hybrid Learning Option

The hybrid learning option includes online coursework, laboratory, simulation, and class meeting times at the Health Sciences Campus in Maywood, Illinois and clinical learning experiences at Chicago area healthcare facilities.

Contact us (https://absn.luc.edu/contact-us/) to learn more about our Accelerated BSN program options near Chicago.

MSN 377L	Adult Health II - Advanced Medical Surgical Clinical	3
	Hours	**15**
	Total Hours	**66**

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

The ABSN track has the same learning outcomes as the BSN Program. The goal of the BSN program is to prepare baccalaureate generalist nurses. At the completion of the program, graduates are expected to:

- Synthesize knowledge from liberal arts, sciences, and nursing science as a basis for professional nursing practice.
- Integrate levels of prevention, quality, safety concepts and principles and leadership into professional nursing practice.
- Provide culturally competent, effective and patient-centered professional nursing care to individuals, families and communities across the lifespan.
- Demonstrate the ability to effectively communicate and collaborate with the patient and interprofessional team to deliver evidence-based, safe, patient-centered care to individuals, families and communities.
- Integrate values, ethics and legal knowledge into nursing practice.
- Integrate scientific evidence and patient, family and community preferences into the planning, implementation and evaluation of professional nursing care.
- Apply skills of information technology and information management effectively in professional nursing practice.
- Analyze ways governmental, institutional and professional policies directly and indirectly influence the healthcare system and population health.

Nursing (BSN)

Preparing the next generation of nurses.

Bachelor of Science in Nursing students have the opportunity to take part in a traditional college experience at Loyola University Chicago's Lake Shore Campus, while gaining experience at world-class clinical sites in the Chicago area. Under the mentorship, supervision, and guidance of faculty, students will learn to think critically, analyze complex situations, make sound clinical decisions, and deliver safe nursing care. Beyond the requisite nursing competencies needed to care for clients, Loyola's BSN program truly prepares graduates to learn, adapt, and grow in their nursing career.

Not a graduating high school senior? Loyola also offers an Accelerated BSN program (p. 709).

GNUR 383	Leadership for Professional Nursing Practice (3 credits over 7 weeks)	3
GNUR 384	Clinical Role Transition (3 credits over 7 weeks)	3
	Hours	**13**
	Total Hours	**123**

Total credits in program: 123
Total credits from major: 92

Clinical Rotations

Students complete seven clinical rotations at a variety of acute care, community based, and primary care health care organizations.

Clinical Role Transition (CRT)

Through preceptor-based learning and seminars, this experience focuses on assimilating the role behaviors of a professional nurse as a provider, designer, manager, and coordinator of care in health care systems. Clinical reasoning, critical thinking, prioritization, and the integration of knowledge are emphasized in this experience, focusing on the provision of patient-centered, evidence-based care as a member of an inter-professional health care team.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

The goal of the BSN program is to prepare baccalaureate generalist nurses.

At the completion of the program, graduates are expected to:

- Synthesize knowledge from liberal arts, sciences, and nursing science as a basis for professional nursing practice.
- Integrate levels of prevention, quality, safety concepts and principles and leadership into professional nursing practice.
- Provide culturally competent, effective and patient-centered professional nursing care to individuals, families and communities across the lifespan.
- Demonstrate the ability to effectively communicate and collaborate with the patient and interprofessional team to deliver evidence-based, safe, patient-centered care to individuals, families and communities.
- Integrate values, ethics and legal knowledge into nursing practice.
- Integrate scientific evidence and patient, family and community preferences into the planning, implementation and evaluation of professional nursing care.
- Apply skills of information technology and information management effectively in professional nursing practice.
- Analyze ways governmental, institutional and professional policies directly and indirectly influence the healthcare system and population health.

Parkinson School of Health Sciences and Public Health

Loyola University Chicago's Parkinson School of Health Sciences and Public Health brings together our call as a Jesuit institution to go to the frontiers of education, research, and practice, and help people who live at the margins.

An established leader in health care education with the Stritch School of Medicine and the Marcella Niehoff School of Nursing, the Parkinson School of Health Sciences and Public Health draws on those strengths to address today's public health challenges and train the next generation of experts in public health, health systems and informatics, dietetics, exercise science, and medical laboratory science.

Flexible degree programs as well as certificates in applied health sciences, health care administration, and public health meet student, community, and industry needs. The Parkinson School includes programs for undergraduate and graduate students, as well as career professionals who seek additional skills or a career change. Innovative and accessible program formats for adult learners along with traditional undergraduates include online instruction and hybrid learning programs on Loyola's Health Sciences Campus and Lakeshore campuses.

Undergraduate Programs

- Exercise Science (BS) (p. 733)
- Exercise Science Minor (p. 735)
- Health Science (BS) (p. 735)
- Healthcare Administration (BS) (p. 737)
- Healthcare Administration Minor (p. 739)
- Nutrition Minor (p. 739)
- Public Health (BA) (p. 740)
- Public Health (BS) (p. 744)

Parkinson School of Health Sciences and Public Health Policies

Each student is required to abide by Loyola University Chicago policies in addition to Parkinson School of Health Sciences and Public Health policies. Loyola policies for undergraduate students may be found in the University Catalog. Parkinson School handbooks and policies are listed below:

Academic Advising and Program Planning

Program Directors for each of the study options provide support and guidance to the student during their program of study. Program Directors

are available to discuss professional growth, career guidance, and professional opportunities.

In the Loyola undergraduate academic advising model, the First and Second Year Advising (FSYA) Office serves the academic advising and support needs of students in all academic programs through the first two years of their college experience. This central advising office provides students with academic advising services and referrals to campus partners (accessibility services, wellness center, career services, tutoring center, writing center, study abroad, international student services, etc.) that contribute to a successful transition from high school to college.

Academic advising for the junior and senior undergraduate students is conducted by an academic advisor within the Parkinson School with all the same services and academic counsel targeted specifically to the student academic program.

The role of academic advising within the Parkinson School of Health Sciences and Public Health is to support students in their academic endeavors, in making informed and responsible decisions, and in setting and achieving short- and long-term goals. Advisors provide counsel and resources to students on a variety of topics, including:

- A course of study plan at Loyola, and deciding what courses to take in the upcoming semesters
- Degree requirements for all majors and minors
- University policies and procedures and other important academic information
- Academic success strategies
- Registration concerns and LOCUS help
- Graduation audits
- Transfer credit
- Academic performance
- Academic probation and dismissal
- Repeating courses
- Incomplete grades
- Dropping a class
- Change of Major

Academic Dismissal

Any student who has been on probation for at least two consecutive terms and has not achieved a cumulative GPA of 2.0 will be dismissed from Loyola University Chicago due to insufficient academic performance. A student may appeal their dismissal to their Academic Dean's Office. Academic dismissal is stated on a student's transcript. A student who has been academically dismissed may not apply for readmission to the University until one fall or spring term has elapsed. A student dismissed for academic insufficiency may be required to demonstrate acceptable academic achievement at another accredited college or university before readmission is approved. Courses to be taken elsewhere must be pre-approved by the student's advising dean or director and a minimum grade of "C+" or higher must be earned in all such coursework. A student readmitted to the University after academic dismissal will be readmitted on academic probation.

Dismissal for Poor Scholarship

Students who fail to achieve the required GPA for the undergraduate program in Parkinson will be dismissed for poor scholarship unless placed on probation.

Students dismissed due to poor scholarship may appeal their dismissal by submitting the Academic Form: Course Grade Dispute - Undergraduate Students (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=102). Students enrolled in more than one school may only submit one appeal to the Dean's office of their choosing from which they were dismissed. This form is the student's opportunity to explain any mitigating circumstances as to why the student's dismissal should be reconsidered. Documentation must be provided to support the student's position. This form is the only approved process to submit such a request.

A dismissal will be overturned only when a student is able to produce specific documentation that proves University error or extraordinary circumstances beyond the student's control that warrant an exception to University academic policies.

The appeal must be made within 10 business days of the date of email notification of academic dismissal. The academic Dean's office may determine that a student meeting is required after the appeal is submitted. Appeal decisions will be made within 10 business days of the receipt of the appeal.

A student may request an appeal decision made by an Assistant or Associate Dean to be considered by the Dean. Appeal decisions made by the Dean are final.

Dismissal for Non-Academic Reasons

Definition: Dismissal is removal from Parkinson School and possibly LUC according to their respective policies.

The Parkinson School reserves the right to dismiss a student regardless of GPA for reasons related to violations in professional role responsibilities, academic integrity or ethical practice. The student who is subject to dismissal from the Parkinson School is advised to meet with their Academic Advisor for support and guidance.

Readmission Application following a Dismissal

A student may apply for readmission into Parkinson one time. The student who seeks readmission to the Parkinson School is required to meet with their Academic Advisor to discuss the process. The Academic Advisor will then meet with the respective program director and the student will be informed of the decision within one business week via email.

- A student may apply for readmission to the program after 1 semester (excluding summer sessions) but no later than 1 calendar year from the date of dismissal.
- Following readmission after dismissal, if a student receives a grade of WF, NP, or less than a C- in a single course required for the major, the student will be dismissed from the program without an option for readmission.
- Following readmission after dismissal, if the student does not raise the cumulative GPA to ≥2.00 at the end of the next semester or after 9 credit hours of graded study, and maintain the cumulative GPA ≥2.00 for the duration of the program, the student will be dismissed from the program without an option for readmission.

Students in their first semester at Loyola University Chicago cannot be dismissed from their program due to low GPA and/or poor grades. The first semester is a grace period for new students to adapt to their program and/or college life. These students can include first semester freshmen or first semester external transfer students.

Academic Expectations

The Parkinson School is committed to providing its students, faculty, staff and guests with an environment that is respectful, safe, and conducive to learning, teaching, and employment. Students agree to be honest and ethical in all academic and clinical work. The student is obligated to report any observed dishonesty to the Course Instructor, Program Director or Department Chair. A consequence of academic dishonesty may result in failure in the course in which the dishonesty occurred. Greater sanctions may be imposed, including dismissal from the Parkinson School. The Parkinson School abides by the University Academic Integrity policy that clearly defines plagiarism and academic cheating and the consequence of academic dishonesty.

Exemplary behavior, consistent with the standards of the profession, is expected at all times. The student is expected to maintain integrity and abide by the standards of professional practice as further discussed in the following sections. The student is responsible for adhering to the policies in this handbook and acknowledges acceptance of this student handbook.

These standards and regulations are found here (p. 1919).

Academic Honors, Awards, and Scholarships

President's Medallion

The Parkinson School submits a single nominee for President's Medallion. The nominee pool Includes students enrolled in BS Healthcare Administration, BS Exercise Science and BS in Public Health. The top 25% of Parkinson School students are considered and nominations are requested from faculty. Nominations are reviewed by the appropriate committee and interviews are conducted. Committee recommendations are given to Dean. The Dean makes final recommendation to the University Committee.

Dean's List

The Parkinson School Dean's List is a semester-by-semester acknowledgement of fulltime students (taking 12 credit hours or more) who obtain a 3.5 term grade point average or higher in any given academic semester. Students on the Dean's List receive a personal acknowledgement from the Dean. Note: only students majoring within Parkinson can make the Parkinson's Dean's List.

Alpha Sigma Nu

Alpha Sigma Nu is the international honor society of Jesuit institutions of higher education. The society was founded in 1915 to honor a select number of students each year on the basis of scholarship, loyalty, and service. Alpha Sigma Nu is unique among honor societies in that it seeks to identify the most promising students in Jesuit schools. Inductees demonstrate an intelligent appreciation of and commitment to the ideals - intellectual, social, moral, and religious - of Jesuit higher education.

Selection to Alpha Sigma Nu is one of the highest honors that can be given on a Jesuit campus. Junior and Senior students who are in the top 15% of their class academically, and have a demonstrated record of service and loyalty to the Jesuit ideals of education, are considered for membership. Academic and service honors and awards specific to the Exercise Science, Healthcare Administration or Public Health majors are detailed in the Program specific policies.

Celebration of the Magis

Celebration of the Magis, a wonderful tradition that honors all graduating seniors from Parkinson's three undergraduate programs: Exercise Science, Healthcare Administration, and Public Health. Students are honored in several ways including the following awards:

- The **Research Excellence Award** is given to students who has demonstrated exemplary commitment and accomplishment while completing their senior research project. Nominations for this award are solicited from faculty.
- The **Internship Excellence Award** is bestowed upon Exercise Science, Healthcare Administration, and Public Health students who have demonstrated exemplary commitment and accomplishment while completing their academic internships. Nominations for this award are solicited each year from faculty in each program. Faculty take into consideration their own experiences with the student, as well as feedback from the student's internship preceptor.
- The **Spirit of Saint Ignatius Award** honors a student or group of students from each of the Parkinson programs who best exemplify the "Spirit of Saint Ignatius." The awardees demonstrate a positive influence on their peers and the community, as well as demonstrate Jesuit values. Nominations for this award are solicited from faculty.
- The **Advocacy and Leadership Award** is presented to students from the Parkinson programs who demonstrate loyalty to the philosophy of their program. Awardees demonstrate leadership abilities, as well as service to their community. Awardees advocate for quality healthcare that is accessible to those in need. Final selection is based on leadership, service, and scholarship.
- The **Dean's Gold Medallion** is the highest honor awarded by Parkinson School of Health Sciences and Public Health. It is presented to one graduating student from each Parkinson program who exemplifies Jesuit values and who demonstrates excellence in scholarship, leadership, and service.

Academic Integrity

Failing to meet the following standards is a serious violation of personal honesty and the academic ideals that bind the University into a learning community. These standards apply to both individual and group assignments. Individuals working in a group may be held responsible if one of the group members has violated one or more of these standards.

To maintain our culture of excellence and integrity, students are not to use AI assisted technology in the classroom unless they are specifically authorized to do so by their faculty for an assignment, a test, a quiz, or any deliverable that will be graded. The use of AI tools may be grounds for an F on the assignment, the course or potential dismissal from the university.

1. Students may not plagiarize. Plagiarism involves taking and using specific words, phrases, or ideas of others without proper acknowledgement of the sources. Students may not:
   a. Submit material copied from a published or unpublished source.
   b. Submit material that is not cited appropriately.
   c. Use another person's unpublished work or examination material.
   d. Allow or pay another party to prepare or write an assignment.
   e. Purchase, acquire, or use a pre-written assignment for credit.
   f. Use generative artificial intelligence to complete or write assignments or exams, partially or fully, without prior permission of the instructor.
2. Students may not submit the same work for credit for more than one assignment (known as self-plagiarism). If a student plans to submit work with similar or overlapping content two or more times for any purpose, the student should consult with all instructors prior to

submission of the work to make certain that such submission will not violate this standard.

3. Students may not fabricate data. All experimental data, observations, interviews, statistical surveys, and other information collected and reported as part of academic work must be authentic. Any alteration, e.g., the removal of statistical outliers, must be clearly documented. Data must not be falsified in any way.
4. Students may not collude.
    a. Students may not work with others on any exam, assignment or portion of an assignment without permission from the instructor.
    b. Students' work with one another on an exam or assignments may not exceed the terms of their instructors' directions for collaboration as part of the assignment.
    c. Students may not use work submitted by another student in a previous semester of a course.
5. Students may not cheat.
    a. Students may not obtain, distribute, or communicate examination materials prior to the scheduled examination without the consent of the instructor.
    b. Students may not take an examination by proxy.
    c. Students may not attempt to change answers after an examination or an assignment has been submitted.
    d. Students may not falsify medical or other documents for any reason.
    e. Students may not use unauthorized study aids in an exam. Examples include, but are not limited to:
        1. Bringing notes into an exam that does not allow outside materials.
        2. Programming equations into a calculator when the instructor has indicated that students are to be tested on the recall of those same equations.
        3. Using any electronic device that allows students to look up, translate, calculate, or communicate information with someone else.
    f. Students may not facilitate academic misconduct.
        1. For example, a student may not allow another student to copy from their exam or give their own work to another student.

To maintain our culture of excellence and integrity, students are not to use AI assisted technology in the classroom unless they are specifically authorized to do so by their faculty for an assignment, a test, a quiz, or any deliverable that will be graded.

Academic Probation

There are 2 types of academic probation: Academic Standing and Progress Toward a Degree.

Any undergraduate student who fails to maintain a 2.0 cumulative GPA (C Average) is placed on academic probation. To calculate the grade point average (GPA), averages are NOT rounded, i.e., 3.490 is not rounded to 3.50. While on academic probation, a student must earn a minimum term GPA of 2.3 in the next term enrolled. A student may continue on academic probation for as long as in each term of enrollment, a minimum term GPA of 2.3 is achieved. If a student is not able to earn the minimum GPA of 2.3 after being placed on probation and does not achieve a minimum cumulative GPA of 2.0, they may be dismissed from Loyola University Chicago due to insufficient academic performance. While on academic probation, a student will be limited to 15 credit hours in a fall or spring term until the 2.0 is reached.

Students may also be placed on academic probation for not making progress toward degree completion. Any student whose cumulative GPA is 2.0 or better but who fails to show timely progression toward completion of their degree requirements may, at the discretion of their dean, be placed on probation. In such cases, the dean may require a contract defining the terms under which the student can remove themselves from probation.

Continued Probation

Any student who achieves a term GPA of at least 2.3 during the term of probation, while not yet achieving a cumulative GPA of 2.0, will be continued on probation. To calculate the grade point average (GPA), averages are NOT rounded, i.e., 1.99 is not rounded to 2.0.

Academic Standards and Regulations

Each student is required to abide by Loyola University Chicago policies as well as Parkinson School policies. University policies may be found in the university catalog here (p. 1919).

Student may be admitted to the major as freshmen, internal or external transfers. A minimum cumulative GPA of 2.00 is required to transfer into Parkinson from another Loyola undergraduate degree or as an external transfer. Internal transfers (https://www.luc.edu/media/lucedu/parkinson/departments/publichealthsciences/Internal_Transfer_Application_19-20.pdf) need an established LUC GPA in order to be admitted (i.e. first year students in their first semester need to wait until final grades post in order to apply for an internal transfer).

Grade Requirements

A minimum GPA of 2.00 is required to progress in the undergraduate programs with a minimum grade of C minus in all major courses required for the major. If a student fails to achieve a "C minus" grade, the course must be retaken. A course may be taken two times without permission. If a student needs to retake a course for the third time they must have that approved by their program director. Students cannot take required major courses for Pass/ No Pass.

Appeal to Register Over the Credit Hour Limit

Students may not enroll in more than 18 credit hours in one semester (Fall or Spring) and may not enroll in more than 8 credit hours in one 6-week summer session (Summer) without approval from their program of study. Students should contact their academic advisors and complete the required form. If approved, the maximum number of credits that may be taken in a fall/spring semester is 21 credits.

Juniors and seniors must have a 3.00 cumulative GPA in order to appeal to register for over the credit hour limit. First-year students and sophomores ordinarily are not given permission to enroll in excess hours.

Attendance Policy

The undergraduate attendance policy specifies the role of students, instructors and university administrators in cases when students are absent from one or more classes.

The university does not require faculty to take attendance; however, if faculty use participation/ attendance in their grading rubric, they must include this policy on the course syllabus which must clearly define the consequences for non-attendance. If participation/attendance is identified as a portion of the students' final grade, faculty must maintain a record of students' attendance throughout the term.

Excused Absences

The university recognizes there are times when students must miss class due to extenuating circumstances. Regardless of the attendance policy of the faculty, the following are considered excused obligations and are not to be counted as absences in the class. Excused absences do not preclude the need to fulfill specific program requirements.

1. Jury duty, with appropriate documentation.
2. Short Term Military Obligation - Veterans Current Students (https://www.luc.edu/veterans/currentstudents/reservistsguardsmen/)
   a. This activity must be documented and provided to the faculty in advance of the activity.
   b. The documentation must be verified by the director or assistant director in the Military Veteran Student Services Office, who has confirmed that the student has orders to report for a short-term military obligation.
3. Day(s) for Religious Observances
4. Participation in Division-1 athletics or other university-sanctioned events: Travel & Competition Policy (https://www.luc.edu/athleteadvising/travelcompetitionpolicy/)
   a. This activity must be documented and provided to the faculty in advance of the activity.
   b. The documentation must be verified by an administrator who is directly related to the activity (e.g. Division-1 athletics representative; musical group director; student development representative, etc.).
5. Absences resulting from legally mandated accommodation requirements (e.g., Title IX, ADA, etc.).
6. In the event of a state or national pandemic, the institution retains the right to amend this attendance policy.

Making Up Work from a Missed Class

The excused absences outlined above require the faculty to facilitate alternative means for students to make up classwork and/or get notes from a lecture. Labs, clinical hours, group work, performance, studio art, and other field-based classes are the exceptions to this because it may be impossible to make up classwork.

Unexcused Absences

Absences not listed above are unexcused. The ability to make up class work because of an unexcused absence is at the discretion of the faculty, as outlined in the faculty's attendance policy noted on syllabi. Note that the Loyola University Chicago Wellness Center does not provide documentation for absences.

Coursework completed outside of LUC

The Parkinson School abides by the policies of LUC regarding coursework taken outside of LUC. If a student anticipates transfer course credit from a course taken outside of LUC, the student must obtain approval from their Academic Advisor and their Program Director prior to enrolling in coursework outside of LUC. Failure to obtain prior approval may result in non-acceptance of transferred credit hours. The form to request approval of courses taken outside of Loyola can be found: Appeal For Permission to Take Courses Elsewhere (https://www.luc.edu/media/lucedu/registrationrecords/pdfs/permission-to-enroll-at-another-university.pdf).

Cumulative GPA Requirement

Students must maintain a grade point average of at least 2.00 to be in good academic standing. Graduation from the university requires at least a 2.00 average for all coursework attempted and a minimum of a least a 2.00 average in a student's major.

Degree Conferral and Graduation

The conferral of the BS degree occurs after an audit confirms that the student has completed all program plan requirements. The degree is conferred following the date specified by Loyola University Chicago and is noted on the student's official transcript.

The process of degree conferral is different than the application for, and participation in, the Loyola University Chicago commencement ceremony.

All students must apply for graduation (degree conferral) in LOCUS, regardless of the semester in which they complete the program, or their intent to participate in the commencement ceremony. Deadlines for graduation application are posted on the Loyola University Chicago website. If a student applies for graduation but does not complete the degree requirements by the end of the intended graduation semester, the student must submit a new graduation application. The Loyola University Chicago commencement ceremony is held once each year, in May, at the Lake Shore Campus. Students receive an invitation to participate in the commencement ceremony from Graduation Services. For all inquiries pertaining to commencement, students should email here (commencement@luc.edu) for assistance.

Email Policy

The Parkinson School will only send e-mails to the student's LUC e-mail account. The student is responsible for checking their LUC accounts daily for important course, clinical and Parkinson School information and announcements. If the student chooses to forward their LUC e-mail to another account they may go here (https://www.luc.edu/its/loyoladigitalexperience/datalossprevention/) to learn about this process.

Experiential Learning - Academic Internships, Capstones, or Other Field Experience

The Parkinson School is committed to fostering a safe experiential learning environment for our students and protecting the health and well-being of patients, clients, families, and health care staff. Prior to a student starting their experiential experience, specific information may be required to meet compliance for a specific external organization. In advance of an experiential learning experience, students will be contacted by the Director of Experiential Learning and their Program Director to verify any requirements. Detailed instructions are provided in the Academic Internship Information section of the Undergraduate Student Sakai site.

Clinical and some non-clinical agencies require verification that the student has met all health and pre-clinical screening requirements. Failure to comply with these requirements by the specified dates will prevent academic internship, capstone or field placement. The student will be informed of all requirements and expected dates of completion by the Experiential Learning Team in the Parkinson School.

Internship Specific Requirements

Academic Internship requirements can be found in the undergraduate program SAKAI site and program specific handbooks. The student is responsible for completing all academic internship requirements prior to the start of the field experience by the specified dates. Students who fail to complete the requirements by the specified dates will not be allowed to participate in the academic internship and may jeopardize their progression in the program.

Academic Internship Placement

The student will have to attend all orientations, career workshops, and/or completion of additional requirements before being assigned to an academic internship site. The student is assigned to an academic internship site in collaboration with our affiliating agencies. Students can choose their own academic internship site upon the approval of all site requirements by the Director of Experiential Learning and Program Director within the specified deadline in Sakai and program handbook. Students are required to secure an interview with the assigned academic internship site after assigned placement. Based on site, students are expected to be flexible and may be scheduled for morning shifts, evening shifts, and/or shifts on weekends.

Parkinson School reserves the right to make changes to posted schedules and/or placements at any time, but will only do so when unavoidable. Student requests to change placement assignments are not permitted.

Academic Internship Transportation

The student is responsible for arranging their own transportation to academic internship sites. The student should make transportation plans as soon as they are notified of their academic internship placement. The student is encouraged to plan accordingly for their transportation in order to be on time for classes, simulation and/or field experiences.
More information about experiential learning and opportunities may be found on the Center for Engaged Learned, Teaching and Scholarship (CELTS) web page (https://www.luc.edu/celts/programs/engagedlearning/).

Final Examinations

Final examinations are given during the scheduled examination period in each session. Students are expected to take their exams as scheduled. If a student needs to deviate from the exam schedule in any way, the student must contact his or her dean. Students with more than 3 exams on a given day may contact their Dean. Tests or examinations may be given during the semester or summer sessions as often as deemed advisable by the instructor. Students who miss a final examination should contact their instructor.

Formal Complaint by Student Policy

A formal complaint is defined by Loyola University Chicago's (the "University") Parkinson School of Health Sciences and Public Health (the "Parkinson School") as any substantive complaint or concern, put forth in writing, by a student which requires a response from the administration of the Parkinson School.

Formal complaints may originate within the Parkinson School, or through a mechanism external to the Parkinson School, such as a University grievance process or the Ethics Line Reporting Hotline.

The Parkinson School adheres to all applicable University policies regarding the filing, review and resolution of formal complaints, as defined herein. The nature of the complaint dictates the review and resolution processes, as detailed further in this policy.

General Guidelines

a. Student Complaints Related to Academic Issues.

   Formal student complaints related to academic disputes involving the appropriateness of course grades and accusations of academic dishonesty are addressed through the Parkinson School's Academic Grievance and Appeals Process. For information about this process please go here (p. 1919).

b. Student Complaints Related to Non-Academic Issues.

   The University admits students without regard to their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law to all the rights, privileges, programs, and other activities generally accorded or made available to students at the school.

   The University does not discriminate on the basis of race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school- administered programs, or in any aspects of its employment of faculty and staff

   Students within the Parkinson School with questions about this policy or who believe they have been discriminated against because of their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law, may contact the Ethics Line Reporting Hotline at (855) 603- 6988 or submit a report online (https://www.luc.edu/ethicsline/).

Grade Policy

Incomplete Grades

For undergraduate courses Incomplete is a temporary grade. To request an incomplete, the student must complete the "Undergraduate Request for a Mark of Incomplete (https://www.luc.edu/media/lucedu/registrationrecords/pdfs/UGRD_Request_%20for_Incomplete%20-%20FORM%202026.pdf)" form and present it to their instructor. Approval of this request is at the discretion of the instructor. If approved, the student will receive a temporary grade of "I" for the course. The student must complete all coursework within six weeks of the beginning of the next term. An incomplete granted during the Spring and Summer terms must be completed within six weeks of the beginning of the Fall term. Please note that the instructor may choose an earlier deadline than six weeks into the next semester. The student must follow the deadline set by the instructor. Failure to complete required coursework within the allotted time will result in the grade "F". The completion date, as negotiated, is considered a contract. If the course for which the student is requesting a grade of "I" is a prerequisite for another course, the student may not register for the succeeding course until the "I" is replaced with an evaluative grade. Should an "I" grade be converted to an "F", this grade will be considered in the student's overall plan progression and may result in the student's dismissal from their program.

More information and Undergraduate Request for a Mark of Incomplete form can be found here (p. 1919).

Pass/No Pass Policy

All required major courses must be successfully completed with a grade of a C- or better. Students cannot take required major courses for Pass/No Pass.

Posting of Final Course Grades

In courses with a final examination, the final course grade is entered into LOCUS within 72 hours, excluding weekends and holidays, after completion of the final examination in the final section meeting of the course. In courses with no final examination, the final course grade is entered into LOCUS within 72 hours, excluding weekends and holidays, of the beginning of the final exam period.

Health Insurance Portability and Accountability Act of 1996 (HIPAA)

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) is a federal law that provides for the protection and privacy of personal health information. The Privacy Rule and the Security Rule of this law affect health care providers, including students enrolled in clinical education activities. The Privacy Rule (https://www.hhs.gov/hipaa/for-professionals/privacy/laws- regulations/?language=en) of the HIPAA defines protected health information as:

> "information, including demographic data, that relates to the individual's past, present, or future physical or mental health or condition; the provision of health care to the individual; or the past, present, or future payment for the provision of health care to the individual; and, that identifies the individual or for which there is a reasonable basis to believe it can be used to identify the individual"

All students must follow the HIPAA Privacy Rules and Guidelines when participating in clinical/experiential learning activities (research, academic internships and service- learning opportunities). Compliance with these rules and guidelines includes, but is not limited to, maintaining confidentiality of paper and electronic health records and protected health information.

All students are required to complete HIPAA training, as mandated by their educational program. In addition, all students are required to complete any additional training mandated by the facility where internship or service-learning education is occurring.

When a concern is raised that a student has violated the confidentiality and privacy of patient information, the concern is addressed through the formal disciplinary process of the student's school or college of Loyola University Chicago.

Immunizations Required for All Loyola Students

Proof of immunity is an Illinois state requirement. All Loyola students enrolled in seven or more credit hours must complete the process to verify proof of immunity. Incomplete immunization information **will block access to registering or changing classes**. All students must enter immunization requirements into Loyola Health and upload supporting documents **before the 10th day of the term**.

All immunizations are to be uploaded to Loyola Health. Required Illinois state immunizations are Tetanus, Measles, Mumps, Rubella, and Meningococcal.

A series of three tetanus vaccines is required; one of them must be a TDAP that was given within the past ten years of enrollment.

Two MMR vaccines are required; the first dose must be given four days before your first birthday or after. The second dose must be given a least 28 days after the first dose. Students who cannot provide proof of immunization may provide laboratory (serologic) evidence of measles, mumps, rubella immunity.

A Meningococcal ACWY vaccine that was given four days before your 16th birthday or after is required for students who enrolling under the age of 22. Meningitis B does NOT meet this requirement.

An annual flu vaccine is required for any student who will be spending time (i.e. class) at the Health Science campus.

All immunization records must be in English or accompanied by a certified translation or they will not be approved.

Guide to Upload Immunization Record

1. Go to Loyola Health
2. Sign in with UVID and password
3. Click UPLOAD HEALTH RECORDS then UPLOAD VACCINE RECORDS
4. Select 'STATE MANDATED IMMUNIZATION' under Vaccine Type
5. Select your Vaccine Name (Tdap, MMR, Meningococcal)
6. Input the date you received the vaccines (this must be done for each section)
7. Upload photo file (ONLY PDF, JPEG, JPG, JPNG, DOCX, or MOV) of record
8. Click 'Submit for Approval'
9. You will receive an upload confirmation email.

Independent Study

The student may have the opportunity to register for Independent Study. The purpose of Independent Study is to provide a focused experience in an area of interest. Independent studies can vary in credit (1-3 credits) and may be applied to LUC credit hour requirements. The student will meet with their Academic Advisor to discuss how the Independent Study will fit into their total curriculum plan. **Important:** An Independent Study does not substitute for a required course.

Leave of Absence (LOA)

It is expected that the student will maintain registration within the University from the time of initial enrollment until graduation. If this is not possible, a leave of absence (LOA) must be requested prior to the anticipated date of the leave.

The student may request a leave of absence that is not to exceed two academic years, consecutively, or interspersed throughout the program. Accruing more than two years of LOA will result in automatic dismissal from the program.

The student is advised to contact their Academic Advisor when considering a LOA to fill out the required paperwork. When the student returns from the LOA, they will be assigned to courses according to the current program plan, on a space available basis. The form to change an academic record can be found at: Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104).

Study Abroad/International Experiences

Students interested in studying abroad must meet all the requirements for study prescribed by the Office of International Programs located in the Sullivan Center. Interested students should meet with both their academic advisor and study abroad advisor to discuss possible international opportunities. Students are advised to participate in study abroad opportunities prior to the start of their junior year. Exercise Science students are limited to studying abroad during the summer

session only unless otherwise advised by their academic advisor. Additional international opportunities include:

- Alternative Break Immersions (ABI) (https://news.luc.edu/stories/jesuit-mission/exp-alternative-break-immersion/)
- Ignatian Service Immersions (https://ramblersraise.luc.edu/campaigns/ignatian-service- immersion-2023/)
- International Studies (http://www.luc.edu/studyabroad/)

Support & Communication Systems

Writing Center

Located at Lake Shore and Water Tower Campuses. The main goal of the Writing Center is to help the student become a better writer. The Writing Center offers writing assistance to meet the student's individual needs. Tutors are available to help at any point of the writing process —from brainstorming, to organizing, to putting the final touches on a bibliography. All LUC students are eligible to use their services. Online writing center services are also available to students.

Tutoring Center

Located at Lake Shore and Health Sciences Campuses. The purpose of the Tutoring Center is to support the mission of Loyola University Chicago by providing academic services and resources which will foster development of skills and attitudes necessary to increase the knowledge and academic independence of all students. Through collaborative learning services, the Tutoring Center helps to contribute toward student success and the retention efforts that are made by Loyola University Chicago. Small Group Tutoring matches you with students from your course and a peer tutor for a regular meeting to enhance your understanding of course material. Other services include Supplemental Instructor (SI) and academic coaching. All LUC students are eligible to use their services.

Achieving College Excellence (ACE) Program

Designed to serve first-generation college students, students with high financial need, and/or students with a documented disability, the ACE program is committed to helping students succeed in their college journey at Loyola University Chicago and beyond.

Center for Engaged Learning, Teaching, and Scholarship (CELTS)

The Center for Engaged Learning, Teaching, and Scholarship serves students, faculty, staff, and community partners of Loyola as a resource for experiential learning opportunities and partnership in several key areas: Academic Internship Program, Service-Learning Program, Undergraduate Research Program, and Learning Portfolios (portfolio) Program.

Coordinated Assistance & Resource Education (CARE)

CARE services are designed to assist and support students through challenging times. When a student requests CARE services, or is referred for CARE services, they are given an opportunity to work with a member of the Office of the Dean of Students staff to gain awareness of, or access to, various resources, engage in dialogue about solutions, and ultimately gain support to assist with navigating difficult or challenging situations. CARE services can be conducted through formal and informal means. Such services may include outreach on behalf of a student to faculty or other campus partners, connecting students with appropriate campus or community resources, or simply checking in with a student to offer guidance and support, among other actions.

Career Services

Located at the Lake Shore and Water Tower Campuses. Loyola's Career Services counsels, educates, and empowers the Loyola student and alumni community. Counselors are available to provide guidance, support, resources and opportunities that assist students and alumni to reach their personal and professional goals. Contact Career Advisor at 773-508-7716 or by email (careercenter@luc.edu) for resume feedback, interview tips, job search strategy and more.

Student Accessibility Center (SAC)

SAC serves students with disabilities by creating and fostering an accessible learning environment. Their aim is to empower students with diverse needs by enhancing their self- awareness, self-determination and self-advocacy. SAC works closely with campus partners, students, families, and the Chicago community to create a safe environment for students to succeed academically and personally. All requests for accommodations are considered on a case-by-case basis. The student requesting accommodations should meet with a SAC staff member, as early as possible, preferably before the beginning of their first term at the University. Please note that Loyola does not provide aides, services, or devices for personal use or study. Any accommodation that fundamentally alters the nature of the course work, or the materials assigned, or is unduly burdensome financially or administratively will not be provided. Reasonable accommodations do not ensure academic success; rather they provide equal access to success during a student's time at Loyola University. The student is required to provide official documentation of their disability from an appropriate professional.

Special Health Accommodations

Documentation from a healthcare provider is required whenever a student has a health issue that demands certain precautions or accommodations that do not violate agency policies, yet allow the student to fulfill the objectives of the course. These situations may include other medical conditions that require modification and/or restrictions for student participation in clinical experiences. Documentation from a healthcare provider is required when the accommodations are no longer necessary.

Wellness Center

Lake Shore Campus and Health Science Campus. The Wellness Center provides high quality interdisciplinary medical, mental health, and health promotion services that enable the student to more fully participate and succeed in the college experience. All students are eligible for services provided at the Wellness Center.

Loyola's Universal ID (UVID)

Loyola's Universal ID (UVID) is the primary means of authentication and identification throughout the University. The UVID provides access to most of Loyola's resources. This includes, but is not limited to, LOCUS, Sakai, Microsoft Outlook email, Lawson, Kronos, campus wireless access and campus networked computers. UVID provisioning is automated for all students at Loyola.

Loyola's Online Connection to University Services (LOCUS)

LOCUS (http://www.luc.edu/locus/) is an integrated, web-based student information system that provides information access 24 hours a day. LOCUS allows the student to view course descriptions, enroll in courses, view and process financial aid information, change addresses and phone numbers, and request official transcripts.

LUC Learning System - SAKAI

The learning management system, SAKAI, provides the student with all course information including the syllabus, course documents, calendar, assignments, grades, and at times, lectures. SAKAI can be accessed online from the LUC homepage. The student can access SAKAI for each course once they have registered through LOCUS (http://www.luc.edu/locus/) (Loyola's Online Connection to University Services).

The Loyola University Chicago UVID and password must be used to access web-based course information. Each undergraduate Parkinson School program maintains SAKAI sites for students with program announcements, calendars, and other information.

The Parkinson School Web Pages

In addition to the above methods of providing information to students, students may visit the Parkinson School programs here (https://www.luc.edu/parkinson/).

Title IX

Loyola University Chicago does not discriminate on the basis of sex in any education program or activity that the University operates, and is required by Title IX of the Educational Amendments of 1972 and 34 CFR Part 106 (collectively referred to as "Title IX") not to discriminate in such a manner. This requirement extends to admission and employment. For more information please go to the Office for Equity and Inclusion (https://www.luc.edu/equity/).

1. Complaint Referral

    University administrators may refer certain formal complaints from Parkinson School students, including complaints made through the Ethics Line Reporting Hotline, to the Parkinson School Dean's office for appropriate action, including assistance in the investigation of a report. Where appropriate, the Dean will assign an administrator from the Parkinson School to assist in the investigation. Such assignments are made with consideration of the need for the investigation to proceed in an objective and non- biased manner.

b. Complaints Received through the Ethics Line Reporting Hotline

    The Ethics Line Reporting Hotline exists as a means for University faculty, staff, students, administrators, or other concerned parties to report activities that involve misconduct or violation of University policies. Reports may be made online (https://www.luc.edu/ethicsline/) or by dialing 855-603-6988.

    As explained at Ethics Line (https://www.luc.edu/ethicsline/):

    The University is committed to the highest ethical and professional standards of conduct as an integral part of its mission of expanding knowledge in the service of humanity through learning, justice and faith. To achieve this goal, the University relies on each community member's ethical behavior, honesty, integrity and good judgment. Each community member should demonstrate respect for the rights of others.

    The University strongly encourages all faculty, staff, students, administrators or other concerned parties to use this Reporting Hotline to report suspected or wrongful acts of conduct by Loyola University Chicago community members. No University administrator, faculty, staff or student may interfere with the good faith reporting of suspected or actual wrongful conduct; no individual who makes such a good faith report shall be subject to retaliation, including harassment or any adverse employment, academic or educational consequence, as a result of making a report.

    All reports to the Ethics Line Reporting Hotline are made available to specific individuals within the University on the University's Ethics Line Reporting Hotline Resource Team (the "Resource Team") who are charged with carefully reviewing and evaluating the report and assigning it to an appropriate case manager/investigator on the Resource Team, based on the type of alleged violation and location of the incident. The Ethics Line Reporting Hotline System does not create a new category of prohibited behavior or a new process for members of the University community to be disciplined or sanctioned. The Resource Team has no authority to discipline any student or member of the faculty or staff. When reported conduct is subject to existing University disciplinary or judicial procedures, appropriate referrals will be made by the Resource Team.

    Reports submitted through the Ethics Line Reporting Hotline are handled as promptly and discreetly as possible, with facts made available only to those who need to investigate and resolve the matter. Individuals filing a report may follow-up online on the status of a report and to determine if further information is needed to proceed with an investigation.

Transfer Students

Transfer students must take their final, uninterrupted 45 hours of instruction or a minimum of 60 hours in residence at Loyola University Chicago. Transfer students seeking a degree from the Parkinson School must complete at least half of the credit hours required for a major (excluding ancillary requirements) with Loyola course work. Additionally, students must complete 60 credit hours at Loyola University of Chicago in order to be eligible for laudatory honors upon graduating. More information for transfer students can be found on the Transfer Center pages (https://www.luc.edu/undergrad/apply/transfer/transferrequirements/).

Unprofessional Behavior and Conduct of Parkinson School of Health Sciences and Public Health Students

Exemplary behavior of students in Loyola University Chicago (the "University") is expected at all times. Students in the Parkinson School are expected to abide by the policies regarding professionalism in applicable student handbooks as well as the syllabi for each course, including professional behaviors with respect to attendance, punctuality, dress, demeanor, integrity and ethical conduct relative to health professions. Professional conduct by the student facilitates learning opportunities and fosters good working relationships within the Parkinson School and between the Parkinson School and clinical agencies or institutions.

Complaints related to unprofessional behavior and conduct by students within the Parkinson School may originate from faculty, staff, other students, or from outside the University, such as an academic internship or service-learning site.

Issues of unprofessional behavior or conduct that occur during an experiential learning experience will be addressed immediately as well as through the evaluation of student performance in the academic internship or service-learning course, as detailed in the course syllabus. If a student believes the grading related to his/her professional behavior and conduct is the result of a significant violation of clearly established written school policies, is the result of improper procedures, or is capricious, the student may pursue a grievance in accordance with the Parkinson School Academic Grievances and Appeals Procedure as written in the Undergraduate and Graduate Program Student Handbooks.

Complaints of unprofessional behavior or conduct within a classroom, simulation, or lab experience, or outside an academic internship or service-learning experience, are addressed through a formal complaint resolution process, as specified below.

a. The first attempt at resolution of the complaint should occur between the student and the other parties involved.
b. If the complaint of unprofessional behavior or conduct is not resolved among the parties involved, a formal complaint, in written form, is forwarded to the Program Director of the student's degree program.
c. The Program Director reviews the complaint, any supporting documentation submitted by any of the parties, and meets with the parties involved individually. If the Program Director is directly involved in the complaint, the complaint instead is forwarded to the Department Chair.
d. If the complaint is not resolved at the level of the Program Director, the Program Director submits a recommendation for any action to be taken, along with any supporting documentation, to the Department Chair.
e. The Department Chair, upon review of the recommendation, complaint and supporting documentation, meets with the parties to the complaint.
f. The Department Chair may dismiss the complaint or, upon finding that the student has engaged in unprofessional behavior and conduct, institute progressive corrective action with the student. Progressive corrective action typically begins with a verbal warning (documented) to the student, which details the nature of the complaint, corrective actions to be taken, and notifies the student that failure to correct the unprofessional behavior or conduct may result in more severe corrective action.
g. The nature of the behavior dictates the severity of the action. The behavior may warrant immediate action beyond a verbal warning.
h. If the unprofessional behavior or conduct continues, the Department Chair may issue a written warning, which details the nature of the continuing concern related to unprofessional behavior or conduct, further corrective actions that are required, and notifies the student that failure to correct the unprofessional behavior or conduct may result in the student's withdrawal from a course or a recommendation for dismissal from the academic program. The decision to recommend a withdrawal or dismissal is based on the nature and severity of the unprofessional behavior.
i. If the unprofessional behavior or conduct continues, the Department Chair will either withdraw the student from a course or make a recommendation for dismissal from the academic program.
j. If the student is withdrawn from the course, the student will receive a W or F for the course depending on the time the decision is made.
k. A student who wishes to appeal a decision impacting his/her academic standing or progress at the University may make a written request for an appeal within 30 calendar days of the disputed decision being rendered, consistent with the University's policy on General Academic Appeals (p. 1919): The appeal will be reviewed and considered by the Parkinson School Dean within 30 calendar days of the receipt of the written student request for an appeal. The appeal decision made by the Dean is final and is ineligible for further appeal. Upon recommendation from the Dean, an action of expulsion from the University rests with the Senior Academic Officer.

Withdrawal Policy

Definition: The election of a student to change enrollment status by removing themselves from the official class roster. Withdrawal from specific courses in the undergraduate programs may impact a student's ability to progress in the program. For more information about withdrawing from a course, or assistance, please see your assigned Academic Advisor.

According to University policy: Complete withdrawal before the beginning of the term start date will result in no financial responsibility. Complete withdrawal from all classes after the term start date will result in tuition charges according to the withdrawal schedule of the university.

According to University policy: During the late and change registration period, a student may withdraw from a course without penalty, or notation, on their academic record. After the late and change registration period, a designation of "W" will appear on the academic record.

More information about the University Policy is available here (p. 1919).

A student who withdraws from the same required course twice and receives a notation of "W" on their academic record, will be placed on probation. For the probation to be lifted, the student must complete the course with a grade of C- or higher during the next semester in which the course is offered.

If the course is not successfully completed with a C- or higher, or if the student withdraws a third time from this same course, the student will be dismissed from the program. Additionally, if a student previously withdraws from the same course twice and fails the course on their third attempt, the student is dismissed from the program.

Important: Students who transfer into a Parkinson program will still be required to follow the above policy (i.e. if the student withdrew twice from a required course for their new Parkinson major, prior to transferring in, the student will not be admitted into the program.

University Withdrawal

An enrolled student who wishes to completely withdraw from the university during any term must notify their academic advisor, academic program director, or assistant/associate dean of their college/school of their intent. Please complete the Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104) form. The form will be routed to your academic advisor, program director, or assistant/associate dean. A student is considered to be in attendance until such notice has been received by the academic advisor, program director, or assistant/associate dean and appropriate steps have been taken to completely withdraw a student from a term. The last date of class activity is the date utilized for both the "W" or "WE" grade and the Office of the Bursar's withdrawal refund calendar (https://www.luc.edu/bursar/withdrawalschedulechangecalendars/).

A student may be required to withdraw from the university because of academic deficiency, lack of sufficient progress toward completion of degree requirements, failure to adhere to university requirements and/or degree requirements, failure to adhere to university requirements and regulations for conduct, or failure to meet financial obligations to the university.

Students facing a significant emergency circumstance (see "Definitions" section below) that prevents them from continuing in or completing an academic term may submit an Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104) form to their primary academic advisor, program director or assistant/associate dean. All requests must be supported by appropriate documentation. The form is reviewed by the academic dean's office of the student's primary college/school for approval and processing.

Requests for complete emergency term withdrawals are considered after the last day of a term to drop a course or courses without a grade

of "W." In cases where the student is incapacitated (see "Emergencies Resulting in Student Incapacitation" below for more details), the requests for complete emergency term withdrawals may be submitted by a parent, spouse or legal guardian.

Complete emergency term withdrawals constitute a withdrawal from all classes and may result in final grades of "WE" in all classes for the given academic term. The University does not grant partial withdrawals (i.e., requests to withdraw from some classes but not others) for emergencies. Grades of "WE" have no impact on a student's cumulative GPA. The "WE" grade has no earned or attempted hours associated with the grade; however, "WE" counts towards attempted hours when determining Satisfactory Academic Progress (https://www.luc.edu/finaid/aid-process/responsibilities/academic-progress/) for continued financial aid eligibility. This policy does not apply in cases where the student has completed final exams or final projects for classes in the term impacted by the significant emergency circumstance. When final grades have posted, students should also utilize the Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104) form, and it will be routed to their primary academic advisor, program director or assistant/associate Dean.

The Office of the Bursar will determine the impact of the Withdrawal on the students account balance in LOCUS. The Student Account Balance will be determined by the University withdrawal calendar Loyola Withdrawal Schedule (https://www.luc.edu/bursar/withdrawalschedulechangecalendars/). The Bursar will not assess any late payment fees after the date of Withdrawal.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

University Policies

Please see University Policies for academic policies that supersede those of academic units within the University

Exercise Physiology (EXCM)

EXCM 101 Introduction to Exercise Physiology (3 Credit Hours)
Introduction to the major; also includes a lab component covering Emergency Procedures and Safety Skills, introduction to common safety principles, predisposing factors and common causes of accidents, injuries and illnesses.
This course satisfies the Engaged Learning requirement.

EXCM 110 Soccer Skill and Strategy Activity Lab (1 Credit Hour)
Soccer, the most popular sport played worldwide, is a team game that requires skill, communication, and strategy to maximize success. This course is designed to provide students with a comprehensive understanding of the fundamental skills, techniques, and strategic aspects of soccer. Through practical training sessions and tactical discussions, students will develop individual and team-based competencies necessary for success on the soccer field. This course is suitable for students of all skill levels, from beginners with minimal soccer experience to those with prior playing backgrounds. 2) Understand physical fitness components of playing soccer. 3) Perform drills to train a soccer player.
Outcomes:
1) Describe the technical and tactical skills needed to play a soccer match

EXCM 111 Weight Training and Conditioning Activity Lab (1 Credit Hour)
This course combines practical training sessions with theoretical knowledge to help students understand the principles of developing strength, endurance, and overall physical fitness through weightlifting and conditioning exercises. Throughout the semester, students will engage in resistance training exercises using free weights and bodyweight exercises. Emphasis will be placed on proper form, technique, and safety to ensure a foundation for long-term success in weight training. Additionally, students will learn how to set realistic fitness goals, and track their progress over time. 2) Understand implementation of weightlifting and aerobic conditioning exercise to improve health outcomes. 3) Perform training exercises with proper technique.
Outcomes:
1) Describe proper technique for weight training and conditioning exercises

EXCM 112 Yoga and Mindfulness Activity Lab (1 Credit Hour)
This course offers students an opportunity to explore the transformative practices of yoga and mindfulness, fostering physical well-being, mental clarity, and emotional balance. The course integrates yoga-based practices with contemporary mindfulness techniques, providing a holistic approach to enhancing overall health and wellness. The classes will focus on developing flexibility, strength, and balance through yoga postures (asanas), breath control (pranayama), and meditation.
Outcomes:
1) Describe yoga philosophy and its relevance in modern day living; 2) Understand yoga-based postures to counteract movement deficiencies associated with modern living; 3) Perform yoga postures with proper technique

EXCM 113 Fitness Boxing Activity Lab (1 Credit Hour)
This is an activity-based course that provides students the opportunity to learn and perform boxing techniques. Stances, punching, combinations, blocks, and non-contact sparring drills will be presented. The rules of boxing are introduced. Engage in boxing while observing safety guidelines. 2. Perform offensive and defensive techniques. 3. Demonstrate proper non-contact sparring techniques.
Outcomes:
1

EXCM 114 Basics of Power Lifting Activity Lab (1 Credit Hour)
This is an activity-based course that provides students with the opportunity to learn and perform powerlifting exercises. The focus is on teaching competition rules and standards on the back squat, bench press and deadlift as well as variations that may improve performance. Understand the physiological adaptations that occur because of Powerlifting. 2. Perform proper technique for Powerlifting lifts and variations of those lifts. 3. Identify competition rules and stipulations of the Powerlifting lifts.
Outcomes:
1

EXCM 115 NCCA Personal Training Elective (1 Credit Hour)
This course encompasses an overview of key Exercise Science, training methodology and health behavior change principles. Students will then apply each principle into practice through screening and evaluation, exercise program design, and ethical, legal and professional responsibilities and guidelines.
Outcomes:
Upon successful completion of the course, the student will be able to: Apply key exercise science, training methodology and health behavior change principles in context to the provision of exercise; Apply the practice of exercise and fitness screening and assessment, health appraisal and risk stratification, while simultaneously integrating ethical considerations and client preferences

EXCM 117 NCCA Group Fitness (1 Credit Hour)
This course encompasses an overview of group exercise; to include cardiovascular exercise, strength training and stretching. Students will learn how to lead, instruct and motivate individuals or groups in exercise activities.
Outcomes:
Upon successful completion of the course, the student will be able to: Apply effective, exercise science-based group sessions for different fitness levels; Explain proper technique, demonstrate exercise, and teach appropriate methods to strengthen and stretch certain muscles

EXCM 125 Faith, Sports, and Fitness (3 Credit Hours)
Explore the relationship between faith and sports through a historical context, develop a theological model for engaging in sports and physical activity, and discover ways to improve the mind-body-spirit connection through fitness. Through examination of books, articles, podcasts, documentaries, and current events, this course will discuss topics such as Muscular Christianity, spirituality, athlete identity, sports ministries, cura personalis, and faith-based physical activity.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Identify basic terminology and knowledge about faith, sports, and fitness; 2) Examine the history of Catholicism, Christianity, and other religions, and how they impact sports and human well-being; 3) Interpret sports and religion through the five areas: social, historical, cultural, theological and ethical

EXCM 155 Anatomy and Physiology I (3 Credit Hours)
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Identify major anatomical components of each human system covered; Describe major anatomical components of each human system covered; Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms; Describe the regulation of the human body and how body systems are integrated; Identify concepts from the lecture to the laboratory activities; Demonstrate learned anatomical concepts through hands-on laboratory assessments

EXCM 155L Anatomy and Physiology I Lab (1 Credit Hour)
Pre-requisites: Restricted to Undergraduate Exercise Science Majors
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms

EXCM 156 Anatomy and Physiology II (3 Credit Hours)
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Identify major anatomical components of each human system covered; Describe major anatomical components of each human system covered; Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms; Describe the regulation of the human body and how body systems are integrated; Identify concepts from the lecture to the laboratory activities

EXCM 156L Anatomy and Physiology II Lab (1 Credit Hour)
Pre-requisites: Restricted to Undergraduate Exercise Science Majors
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms

EXCM 170 Women's Health and Exercise (1 Credit Hour)
This course presents perspectives on physical activity and exercise science specific to women. It will include the identification of issues during various stages of development in the female body and barriers and benefits of exercise unique to women. Students will apply these perspectives to exercise program design and health care interactions with all clients.
Outcomes:
1) Understand the unique circumstances and outcomes of working with women in the field of wellness and fitness; 2) Identify preventative strategies (such as exercise prescription and nutrition guidance) that can compensate for health risks, issues, and deficiencies that female clients and patients may experience throughout their life; 3) Explain exercise modifications and varied benefits during specific periods in a woman's life (adolescents, pregnancy, postpartum, menopause)

EXCM 201 Physiology of Exercise (3 Credit Hours)
Pre-requisites: EXCM 101, EXCM 156, and EXCM 156L
This course covers the energy supply of movement, systemic effects of exercise, and adaptations to exercise training through the lens of physiology. The role of the major physiological systems of the body in maintaining homeostasis during exercise will be studied along with the adaptations that occur in these systems following exercise training. Practical applications of this knowledge will be explored with regards to the role of exercise in maintaining and improving human health and performance.
Outcomes:
Define the structure and function of physiological systems in the body that are essential for the maintenance of homeostasis during exercise; Identify the important physiological responses that occur during exercise and adaptations to chronic exercise training; Interpret practical knowledge of exercise physiology to various health, fitness and athletic scenarios; Outline the assessment of health-related physical fitness and performance tests

EXCM 201L Physiology of Exercise Laboratory (1 Credit Hour)
Pre-requisites: EXCM 201 (may also be taken as a Corequisite)
The purpose of this course is to provide a practical and hands-on approach to studying the body's response to exercise congruent with material learned in EXCM 201 Lecture. This is accomplished through a combination of exercise-related lab activities, in-lab discussions, and written lab assignments. Students will also develop skills in data organization and visualization.
Outcomes:
Interpret metabolic, vascular, respiratory, and skeletal muscle assessment outcomes; Perform basic data organization and visualization techniques in a computer based spreadsheet

EXCM 210 Program Design in Exercise (2 Credit Hours)
Pre-requisites: EXCM 201
This course focuses on the design, implementation and evaluation of exercise programs through case-based application and classroom activities. Health-related components of fitness and fitness assessments are reviewed. Individual and group exercise program designs within community-based settings for individuals through the life cycle are discussed. Evidence-based content is identified to critically analyze and develop conditioning programs and techniques for a broad range of sports and activities. Important elements of program design are used to emphasize desired client program outcomes.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Lead designed group exercises and activities which consider individual needs and differences; 2) Apply training principles and program variables to increase strength, endurance, power, or hypertrophy for the identified client or population; 3) Evaluate the designed exercise prescribed over time for an individual and/ special population; 4) Integrate cognate materials necessary to support the full development of physical performance including nutrition, environment, mobility, clothing and equipment; 5) Design individualized exercise programs for individuals and special groups; 6) Adjust exercise programs based on individual performance and safety considerations

EXCM 301 Advanced Physiology of Exercise (3 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
An advanced course in exercise physiology covering exercise metabolism, temperature regulation and fluid balance.

EXCM 342 Physical Growth, Development and Nutrition (3 Credit Hours)
Pre-requisites: EXCM 101
A survey of the various components involved in personal health and wellness, such as personal fitness, sexuality, mental health, and environmental health as related to the stages of life development.

EXCM 345 Therapeutic Exercise and Rehabilitation (3 Credit Hours)
Pre-requisites: (EXCM 101 & 201) and (BIOL 243 or GNUR 156 &156L)
Explanation and demonstration of the use of therapeutic modalities in the healing process. This will include discussion of the use of therapeutic modalities to enhance the rehabilitation process after athletic injury.

EXCM 350 Sports Nutrition (3 Credit Hours)
Pre-requisites: EXCM 201, CHEM 102 & CHEM 112
This course introduces the essentials of human nutrition for health and emphasizes the roles of key nutrients for athletic performance. This foundational material will be applied to athletic performance including adaptation and recommendations for training and competition. Nutrient recommendations will be reviewed for specific types of sports, exercise and other athletic concerns. The metabolic basis for sports nutrition recommendations is examined.

EXCM 352 Musculoskeletal Assessment and Strength Training (4 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
This course will present the general principal and foundational skills for each component of the injury examination. These general principles will be applied to the recognition and examination of injuries/conditions specific to each body region. Address general medical conditions will likely encounter with patients.

EXCM 364 Intro to Clinical Exercise Testing and Prescription (3 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
This class summarizes recommended procedures, including EKG and other stress testing modalities, for exercise testing and exercise prescription in healthy and diseased individuals.

EXCM 368 Advanced Clinical Testing and Prescriptions (3 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
This course focuses on physiological implications of metabolic conditions such as diabetes, cardiac and pulmonary disease on exercise. The course includes modifications to exercise testing and in-depth preparation for exercise prescription based on diseases and special conditions. The course reviews contraindications and considerations for exercise, EKG interpretation and implications of physiological responses to exercise. Behavioral strategies to implement in client exercise planning and education are addressed. Exercise prescription is discussed as part of the ongoing evaluation of client performance.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Create patient/client focused exercise programs, with modifications and progressive programming based on physiologic alterations; 2) Understand the effect of exercise on the physiological systems of the body and disease states; 3) Analyze exercise testing data from healthy individuals and individuals with physiological alterations; 4) Evaluate EKG responses to exercise; 5) Implement testing protocols and modifications for individuals with physiological alterations; 6) Understand acute responses and chronic adaptations to exercise and the impact on individuals with physiological adaptations

EXCM 375 Special Populations in Exercise Science (2 Credit Hours)
Pre-requisites: EXCM 201 and EXCM 364
This course provides practical information on exercise for persons with a wide range of health conditions, diseases and disabilities. Best-practice exercise prescription protocols for individuals across the life span will be addressed. An overview of unique physiology, effects of the condition on the exercise response, and effects of exercise training on the condition will be discussed. Recommendations for exercise testing and programming are presented for select populations.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Understand the relations between health conditions, disease, disability and physical activity; 2) Establish physical activity outcomes in individuals with health conditions, diseases or disabilities; 3) Modify existing physical activity prescriptions to match individual capabilities and needs; 4) Demonstrate an understanding of the risks and benefits associated with exercise participation: 5) Analyze the results of exercise tests and fitness evaluations in various populations; 6) Modify equipment arrangement and facility resources to accommodate use by individuals with special needs

EXCM 382 Clinical Research: Methods, Design and Ethics w/Lab (3 Credit Hours)
Pre-requisites: EXCM 201 and STAT 103
Study of current literature with implications for exercise and sport science specializations; use of library resources and retrieval systems; evaluation of professional competencies.

EXCM 385 Kinesiology and Sports Biomechanics w/Lab (4 Credit Hours)
Pre-requisites: PHYS 112 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
Analysis of human movement with emphasis on the biomechanics of exercise and sport movement patterns.

EXCM 387 Movement Anatomy in Exercise (3 Credit Hours)
Concepts and principles from anatomy and biomechanics are integrated into the analysis of human movement. This course focuses on application of the principles of human movement for normal function and application to different levels of physical performance through case based applications and classroom activities. Content includes anatomical lever systems, moment arms, stability and laws of motion. Systematic analysis of human movement in clinical conditions, performance, and wellness settings will be reviewed. Development of individual plans to improve movement is woven throughout the course.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Explain the relationship between biomechanics, anatomy and human movement; 2) Understand upper and lower limb musculoskeletal anatomy, physiology, and function; 3) Apply functional anatomy in the analysis of normal physical performance; 4) Develop individualized plans to correct movement based on the assessment of the individual; 5) Evaluate movement techniques in various populations; 6) Evaluate client outcomes as a result of prescribed exercise modifications to improve movement patterns

EXCM 390 Psychology of Health and Exercise (3 Credit Hours)
Pre-requisites: EXCM 201 and PSYC 273
This course will present current research with focus on the leading theories and applications in health and exercise psychology. The implications and applications of research and practice for health behavior change by health and fitness professionals in diverse populations at the societal and individual levels will also be reviewed.

EXCM 395 Clinical Internship and Patient Management (6 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L), 4 of 8 upper division EXCM courses
Practical experience working with exercise physiologists, physical therapists, occupational therapists, rehabilitation therapists, and others, in cardiac care and orthopedic rehabilitation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Understand development and implementation of population-based exercise science programs; Demonstrate competency in fitness assessments; Explain management structure(s), staffing patterns and operations of exercise and fitness sites; Implement regular and specific-focus exercise programs; Evaluate regular and specific-focus exercise programming; Demonstrate oral and written communication skills consistent with a leadership role in exercise science

EXCM 399 Special Topics in Physical Therapy (2 Credit Hours)
This course covers the general areas of physical therapy, as well as a relevant topic in physical therapy. This course will be offered as an elective and open to all students. Recommend evidence-based practices using cases studies (ie exercise prescription, patient education, society level affects).
Outcomes:
Examine various research and writing to gain understanding and knowledge in the areas of physical therapy; Evaluate scientific literature; Explore the impact a physical therapist has on their patient through movement improvement, pain management and prevention

Food and Nutrition (FONU)

FONU 110 Culinary Explorations (3 Credit Hours)
Translate food and nutrition recommendations into delicious and realistic, food-based meals using basic culinary techniques. Examine the major food groups including both common and uncommon foods in each category. Explore ways to incorporate a variety of foods into meals considering budget, health, availability, personal values and preference.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) describe foods in major food category; 2) explain food based recommendations to promote nutritional adequacy and health; 3) demonstrate culinary competence by recipe preparation; 4) critique a unique recipe that they developed; 5) plan menus for a week that meet specified criteria

FONU 215 Fundamentals of Nutrition (3 Credit Hours)
For non-majors. Nutrients essential to a healthy diet, consideration of nutrition issues of public concern.

FONU 225 Food as Culture (3 Credit Hours)
Explore culture through foods and food ways across the globe. This course examines food patterns of each continent using a multidimensional approach. Ethnic, geographical, religious, historical, geographical, and societal influences on food patterns of various regions and people will be presented through didactic and experiential activities. Information will be presented with the perspective of enhancing engagement and build positive relationships with future clients and communities served.
Course equivalencies: FONU 225 / FONU 226R
Outcomes:
Upon successful completion of this course, the student will be able to: identify common food sources of nutrients in the eating patterns of selected cultures; Describe foods, dishes, and preparation methods common to selected nations and cultures; Explain traditional food use in selected cultures, including infant feeding and illness; Compare and contrast typical American to specialized ethnic retail food markets; Discuss experiences with ethnic food

FONU 226R The Mediterranean Diet: Culture, Health, and Nutrition (3 Credit Hours)
Explore culture through foods and foodways of the Mediterranean Diet. Through didactic and experiential activities, this course examines food patterns of the Mediterranean areas using a multidimensional approach, including its historical roots, cultural significance, dietary patterns, nutrient profile, and associated health outcomes by exploring the most iconic foods of Italy and the wider Mediterranean. The course will explore their origins, methods of production, nutritional values, and impact on health and the environment. A key focus will be the contrast between Italian and American eating habits, highlighting how these cultural differences may influence public health in both countries. Core Mediterranean staples across different cultures will be examined in depth, covering their manufacturing processes, nutritional makeup, consumption trends, and potential health implications.
Interdisciplinary Option: European Studies, Global Studies, Italian Studies
Course equivalencies: FONU 225 / FONU 226R
Outcomes:
Identify common food sources of nutrients in the eating patterns of selected cultures of the Mediterranean; Describe foods, dishes, and preparation methods common to selected nations and cultures of the Mediterranean; Explain traditional food use in selected areas of the Mediterranean, including health and illness; Compare and contrast typical eating habits of the US and the Mediterranean, including the culture food markets; Discuss experiences with Mediterranean food and wine

FONU 320 Nutrition Through the Life Cycle (3 Credit Hours)
Pre-requisites: FONU 215 Fundamentals of Nutrition
Learn about nutrient needs through the lifecycle from birth through aging to support optimal health and human potential. Key nutrition concepts to support normal growth and development, health maintenance, and disease prevention will be included. Nutrient needs will be translated to food-based solutions as an integral component of health habits. Community resources will be examined.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) describe the needs and roles of key nutrients at various stages of the life cycle; 2) translate nutrient needs into food-based solutions appropriate for life cycle stage; 3) explain common issues related to nutrition and food patterns specific to life cycle stage; 4) recommend community resources appropriate to life cycle stage

Health Systems Management (HSM)

HSM 110 Healthcare in America (3 Credit Hours)
This course introduces the U.S. healthcare system and compares it to systems in other developed nations. Emphasis is given to the government's dominant role in health care delivery, payment and regulation, as well as the differences between public health and health care systems. The social justice implications of cost, quality and access are highlighted.
Interdisciplinary Option: Bioethics
This course satisfies the Engaged Learning requirement.
Outcomes:
Describe the evolution of health care in America and the influence of history on the current health care system; Demonstrate knowledge of the structure and functions of the US health care system; Identify at an introductory level the political, economic and social factors that shape the US health care system; Describe the inter-relationships among healthcare stakeholders including providers, suppliers, payers' workforce, and consumers; Recognize the issues of health care disparities, access to care and social justice present in the current US health care system; Identify criteria for evaluating the evolving and changing US health care system; Compare the US health care system to those of other developed nations

HSM 120 Essentials of Medical Terminology for Health Professionals (1 Credit Hour)
This course introduces students to the language of the health professions. Word structure, prefixes and suffixes, and rules of building and analyzing medical words are introduced. Students explore terms relating to anatomy, pathology, diagnostic and clinical procedures, and select medical specialties. Emphasis is given to defining, interpreting and pronouncing medical terminology.
Outcomes:
Identify structure of medical vocabulary including prefixes, suffixes and root words; Apply the rules of building medical terms; Recognize and define medical terms relating to anatomical structure and function, pathology, diagnostic and clinical procedures, and medical specialties; Use medical terminology accurately in context

HSM 200 Careers in Healthcare Administration (2 Credit Hours)
This course provides an introduction to healthcare administration careers. Students explore the various sectors and supporting industries making up the larger healthcare enterprise. Administrative career options and industry growth patterns are presented. Students are introduced to working professionals and professional organizations representing various sectors of the healthcare industry. Class discussions integrate healthcare industry vocabulary and jargon.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Distinguish healthcare sectors and supporting industries; 2) Describe a variety of roles and functions within healthcare administration; 3) Identify various entry points into a healthcare administration career; and 4) Explore areas of interest for career consideration

HSM 210 Introduction to Global Healthcare Delivery (3 Credit Hours)
Social determinants of health, comparative health systems, global health initiatives and their effects on health outcomes are addressed. Students examine current issues impacting global population health and improvements in care locally and worldwide. Roles of governmental, institutional and corporate organizations in financing, governing and delivering worldwide healthcare are studied.
Interdisciplinary Option: Bioethics, Global Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: HSM 210 / PUBH 314 / ENVS 385
Outcomes:
At the successful completion of the course, the student will be able to: 1) Identify major global health care strengths and challenges; 2) Develop a broad worldview of communities and countries with different lifestyles, economics, and geopolitical systems and how these differences impact health care; 3) Explain the characteristics and roles of governments, non-governmental organizations (NGO's) and public/private partnerships as relates to health and health care around the world; 4) Analyze the impact of globalization on health and healthcare systems; 5) Assess the ethical and social justice issues associated with health inequities around the world; 6) Address a global health care issue, analyze the issue using relevant theoretical concepts and recommend a course of action

HSM 220 Post-Acute & Long-Term Care Management (3 Credit Hours)
This course examines healthcare delivery models designed to meet the needs of older adults and those with disabilities and chronic health conditions. It explores the experience of the patients and caregivers receiving these services as well as the professional workforce who provides them. It also examines the methodologies used to make decisions that impact internal and external customers.
Interdisciplinary Option: Bioethics
This course satisfies the Engaged Learning requirement.
Outcomes:
Analyze the challenges and opportunities faced by the US healthcare system related to changing demographics; Apply theories of aging and disability to the management of post-acute and long-term care services; Compare healthcare delivery models used in post-acute and long-term care services; Articulate the roles, responsibilities, and challenges faced by post-acute and long-term care professionals; Articulate the social justice and ethical issues associated with aging and disability in the context \\nof post-acute and long-term care environments

HSM 230 Fundamentals of Health Equity (3 Credit Hours)
Pre-requisites: HSM 110 (Can also be taken as a corequisite)
This course introduces the concept of health equity and provides an overview of health disparities in the U.S. Students examine the root causes of and explore populations most affected by health inequities. The course explores system approaches and strategies aimed at improving health equity.
Interdisciplinary Option: Bioethics
Outcomes:
Analyze pathways of causality leading to health inequities; Differentiate between disease causation and disparity causation; Compare and contrast strategies to improve health equity in the US; Identify roles and responsibilities of healthcare professionals as agents of change; Explain the relationship between community, social justice and health status; Describe philosophical principles that underlie social justice priorities; Generate ideas for programs and policies that promote health equity

HSM 240 Healthcare Workforce Management and Professionalism (3 Credit Hours)
Co-requisites: HSM 110
This course offers a comprehensive examination of human resources management (HRM) in healthcare, emphasizing its strategic application. It addresses the technical and legal facets of HRM while also fostering the development of professionalism and equipping students to thrive in the ever-evolving healthcare environment.
Outcomes:
Examine the impact of human resources management (HRM) and organizational development principles on healthcare administration practices; Describe how internal and external environments impact the healthcare workforce environment; Identify the key elements of professionalism in healthcare administration, including ethical standards, communication, and teamwork; Analyze scenarios to assess the impact of HRM decisions on healthcare organizations, including their financial and operational outcomes; Evaluate the impact of professionalism on healthcare administration practices; Demonstrate engagement in HRM activities, including negotiation and communication

HSM 280 Healthcare Ethics in Practice (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent
This course provides an in-depth exploration of ethical leadership within healthcare management. Students will examine historical and contemporary ethical issues that impact the management of healthcare organizations, gaining a comprehensive understanding of the challenges and responsibilities faced by healthcare leaders. The course emphasizes the importance of personal moral perspectives, encouraging students to compare their views with those of their peers and the dominant positions of the day to foster a nuanced appreciation of diverse ethical opinions.
Outcomes:
Describe historical and contemporary ethical issues affecting management of healthcare organizations; Analyze key characteristics of healthcare administrators that contribute to ethical and effective leadership; Apply critical thinking to decision-making models when managing differing opinions and justifying ethical decisions; Reflect on personal values to gain insight into one's vocation and career path in the health sciences, integrating self-awareness with future professional responsibilities

HSM 310 Healthcare Project Management (3 Credit Hours)
Pre-requisites: HSM 110; Course is restricted to Healthcare Administration and Public Health majors
This course introduces the fundamental principles of project management in healthcare organizations, emphasizing the processes, tools, and methodologies necessary for successful project execution. Students will learn how to initiate, plan, execute, monitor, and close projects in healthcare settings, with a focus on strategic alignment, risk management, and stakeholder communication. The course also emphasizes the development of teamwork, leadership, and managerial skills required to effectively manage diverse teams and navigate challenges in dynamic healthcare environments. Through practical applications, students will gain hands-on experience in creating project plans, managing resources, and ensuring successful project outcomes.
Outcomes:
Explain key project management principles, tools, methodologies, and frameworks, with a focus on healthcare projects; Distinguish between the roles and responsibilities of functional managers and project managers; Develop comprehensive healthcare project plans that address scope, goals, timelines, budgets, and stakeholder communication; Identify potential risks for healthcare projects and risk mitigation strategies; Apply leadership and collaboration skills to lead teams and achieve project goals and objectives

HSM 315 Healthcare Quality & Performance Improvement (3 Credit Hours)
Pre-requisites: HSM 240 and HSM 368
This course examines the role of management in measuring performance and achieving quality in healthcare organizations. Emphasis is on the historical evolution, current concepts and future trends associated with measuring and evaluating health care quality. Students explore fundamental concepts of quality improvement design, planning, and methodology.
Outcomes:
1) Articulate the historical evolution and current forces driving changes in healthcare quality; 2) Describe major quality improvement models that provide a framework for change; 3) Differentiate the use of structural, process and outcome indicators for measuring quality; 4) Apply quantitative and qualitative performance measurement approaches to healthcare processes; 5) Apply quality improvement tools and techniques to healthcare processes; 6) Explain operational and clinical quality improvement data; and 7) Apply a systematic quality improvement approach to healthcare processes

HSM 325 Healthcare Fiscal Management (3 Credit Hours)
Pre-requisites: HSM 110 and FINC 301
This course introduces principles of financial management in healthcare organizations. Students will explore budgeting, cost accounting, revenue cycle management, and reimbursement models, including Medicare and Medicaid. Topics also include financial condition assessment, capital planning, and the financial challenges of non-profits, such as uncompensated care. Ethical considerations and future trends, like lean management and innovative payment models, prepare students for dynamic decision-making in healthcare finance.
Outcomes:
Analyze how political, social, economic, and healthcare payment system factors influence financial health and cost structure within US healthcare organizations; Evaluate the financial health and performance of healthcare organizations through analysis and interpretation of financial statements, including the ability to defend financial conclusions; Apply principles of healthcare accounting, cost analysis, budgeting, revenue cycle management, insurance, and reimbursement to support organizational decision-making and strategic planning; Explain the legal, ethical, and social justice considerations in healthcare financial management, including the role of nonprofit organizations, uncompensated care, and their impact on fiscal decision-making

HSM 330 Healthcare Legal & Regulatory Environment (3 Credit Hours)
Pre-requisites: HSM 240 and either HSM 280 or PHIL 284
This course explores the foundations of healthcare law. Key topics include informed consent, joint ventures, medical staff issues, credentialing, liability, and bioethical concerns such as end-of-life decision-making. Additionally, the course explores risk management strategies, fraud and abuse regulations, and other critical healthcare laws. Students will gain insight into the law-making process, the role of regulatory bodies, and their impact on healthcare operations. Emphasis is placed on understanding and applying these concepts to case studies and real-world healthcare management scenarios.
Outcomes:
Examine the structure of the US legal system and its application to healthcare regulations and judicial processes; Describe the principles of liability as they pertain to healthcare organizations, medical staff, and joint ventures; Identify key government regulations impacting healthcare services, professionals, and organizational compliance; Analyze bioethical issues in healthcare regulations, including end-of-life decision-making, negligence, malpractice, informed consent, and the use of human research subjects and their connection to healthcare regulation; Discuss risk management practices and strategies to prevent healthcare fraud, abuse, and regulatory violations

HSM 338 Healthcare Strategy and Marketing (3 Credit Hours)
Pre-requisites: HSM 110, HSM 230, and HSM 310
This course offers an overview of healthcare strategy and marketing, focused on strategic management and marketing fundamentals and tools. Students work individually and in groups to apply strategies specific to healthcare consumers, markets, products and services; developing and presenting the marketing component of a healthcare business plan at the end of the semester.
Outcomes:
Apply principles of strategic management in the context of a healthcare organization; Utilize basis healthcare market research approaches, techniques and tools; Identify ethical and legal issues related to strategy and marketing in healthcare organizations; Develop a strategic marketing campaign for a healthcare product, program or service; Demonstrate effective teamwork skills in producing and presenting multimedia-based strategy and marketing materials and plans

HSM 340 Health Care Policy (3 Credit Hours)
Pre-requisites: HSM 110 and HSM 230; HSM 230 may also be taken as a corequisite
This course explores government's role in organizing, financing and delivering healthcare. With an emphasis on policy formation, advocacy and change, students apply policy analysis tools to contemporary public health and healthcare problems. Using examples such as Medicare, Medicaid or mental health policy, the course highlights the role of leadership as a key component of successful policymaking.
Outcomes:
Explain how federal, state, and local health policy is formulated and implemented; Assess the balance between public good and individual rights in the policy process; Analyze the impact of specific healthcare policy on health outcomes and the delivery of healthcare; Identify future health policy directions that would improve the health status of Americans; Describe the role of individual and organizational leadership in influencing and improving policy outcomes

HSM 345 Healthcare Data Analytics (3 Credit Hours)
Pre-requisites: ACCT 201 and ISSCM 241/PSYC 304 This course explores the use of clinical and operational data to improve outcomes and achieve greater efficiencies in healthcare systems
The role of data analytics in supporting informed decision-making is emphasized. Topics include data manipulation, analysis, and visualization. Practical business intelligence tools, such as Microsoft Excel® or Tableau®, are used.
Outcomes:
Discuss the role of data analytics in clinical and operational improvement efforts; Apply analytic techniques to health and healthcare data using business intelligence tools or applications; Identify meaningful patterns and trends in data sets to inform business decisions; Understand and interpret business needs and extract appropriate data necessary to solve problems; Propose solutions to complex business problems that are supported by data analysis & visualizations

HSM 350 Healthcare Administration Capstone (3 Credit Hours)
Pre-requisites: HSM 240, HSM 310, HSM 315, HSM 325, and HSM 338
The capstone course serves as a culminating experience for undergraduate healthcare administration majors, showcasing their comprehensive knowledge and skills. Through an original team project, students synthesize and apply core concepts - including operations, strategy, quality, finance, project management, marketing, and human resources - to address a problem across diverse service types and care settings in the healthcare system. The course emphasizes solutions aligned with the Jesuit values of social justice and care for others and encourages ethical and equitable approaches to healthcare challenges.
Outcomes:
Apply knowledge of healthcare administration to analyze challenges in a healthcare delivery project; Synthesize data from diverse sources to meet complex project objectives; Incorporate mentor feedback to revise project plans; Manage a large-scale healthcare project to achieve specified outcomes; Demonstrate teamwork and collaboration skills to achieve shared project goals

HSM 355 Special Topics (1-3 Credit Hours)
Pre-requisites: Variable, used as needed,
Variable hours and topics.

HSM 358 Research Literacy for Health Decision-Makers (3 Credit Hours)
Pre-requisites: ISSCM 241 or STAT 103
This course explores the research process and the regulatory requirements in health sciences research. It provides a foundation for application of evidence-based practices in healthcare services. The fundamentals of research design, methodology, interpretation, and critical appraisal are introduced. The course requires critical thinking to determine the relevance of novel research. Emphasis is given to practical applications to decision-making in healthcare administration. Students will present a critical analysis of multiple types of research studies.
Course equivalencies: X - HSM 358 / MHA 450
Outcomes:
Outline research processes; Discuss the strengths and weaknesses of specific levels of evidence; Describe ethical doctrine and regulations impacting human participant protection; Assess study design, measures, and data collection techniques; Critically evaluate health-related research, including analysis and conclusions; Evaluate the relevance of novel research

HSM 360 Healthcare Administration Experiential Learning Practicum (6 Credit Hours)
Pre-requisites: HSM 310, HSM 315, HSM 330, HSM 338, HSM 345, HSM 358, HSM 368, and HSM 386
This course offers students an immersive professional experience within a healthcare setting, providing the opportunity to apply theoretical knowledge gained from prior healthcare administration coursework in a real-world context. Under the guidance of the course instructor(s) and a field preceptor, students collaborate with a healthcare organization to complete goal-oriented projects that align with the organization's needs and objectives. These projects are developed in partnership with the student, faculty advisor, and field preceptor, ensuring both practical relevance and academic rigor. Students are required to complete a minimum of 196 on-site hours, scheduled in coordination with the preceptor. This hands-on engagement allows students to refine their skills, deepen their understanding of healthcare administration, and contribute meaningful outcomes to their host organization.
This course satisfies the Engaged Learning requirement.
Outcomes:
Apply healthcare administration theoretical knowledge, concepts, and skills; Utilize analytical tools to address problems of practice; Exhibit critical thinking and advanced communication skills; Apply ethical reasoning to make at principled decisions in alignment with the Jesuit tradition; Incorporate feedback to enhance improve personal and professional effectiveness; Demonstrate independence, resourcefulness, and thoughtfulness in the workplace

HSM 365 Health Innovation and Entrepreneurship (3 Credit Hours)
This course introduces basic concepts and methods of design thinking and entrepreneurial training through lecture, discussion and experiential activities. Students will form collaborative teams to develop innovative healthcare products, processes or services especially relevant to promoting health equity and reducing health disparities - by practicing customer discovery, problem identification, ideation, prototyping, testing and pitching. Course is open to Juniors and Seniors at the Parkinson School as well as students in the LUC Interdisciplinary Honors Program.
Outcomes:
Students will be able to define basic principles of design thinking and entrepreneurial business model generation, and explain how they can be applied in a variety of healthcare settings as tools for innovation especially related to promoting health equity and reducing health disparities

HSM 368 Management of Healthcare Organizations (3 Credit Hours)
Pre-requisites: HSM 110
This course familiarizes students with the profession of healthcare administration by providing an overview to leadership, management, organizational development and change. Reflecting the uniqueness of the healthcare sector, students are introduced to key principles, practices and theories that support the socially just and ethical management of healthcare organizations.
Outcomes:
1) Differentiate between the roles of healthcare manager and healthcare leader; 2) Describe how management principles are applied in healthcare organizations; 3) Articulate organizational development challenges faced by healthcare entities; 4) Formulate strategies to manage a change intervention; and 5) Explain ethical and social justice responsibilities in healthcare management

HSM 386 Health Information Systems Management (3 Credit Hours)
Pre-requisites: HSM 110 (Can also be taken as a corequisite)
This course explores the management and leadership of health information systems in the healthcare industry. Students will examine the types, purposes, and attributes of clinical and administrative systems used in healthcare organizations. Topics include the value of health information systems in enhancing organizational performance, the systems development lifecycle, and the role of management and leadership in system implementation. Additional focus is placed on addressing privacy, security, and ethical challenges, as well as evaluating the impact of emerging trends on healthcare delivery.
Outcomes:
Describe the major types, purposes, and attributes of clinical and administrative information systems used in health care organizations; Explain the value of health information systems, including their role in supporting organizational performance, strategy, and effective management; Evaluate risks related to privacy, security, and ethical considerations in the use and management of health information systems; Explain how the systems development lifecycle supports the effective management of health information systems; Evaluate the potential impact of emerging trends in health information systems

HSM 390 Applied Decision-Making in Interprofessional Education (3 Credit Hours)
Pre-requisites: Senior standing in Health Science BS program
This course explores the principles and practices of decision-making in interprofessional contexts within the health sciences. Students will examine frameworks for collaborative problem-solving, ethical considerations, and evidence-informed decision-making across diverse professional roles. Emphasis will be placed on applying decision-making models to real-world scenarios, enhancing communication, and fostering teamwork to improve outcomes in health and community settings. Through case studies, simulations, and a team based project, students will develop skills to make effective, equitable, and context-sensitive decisions in interprofessional teams.
Outcomes:
Analyze decision-making theories and models relevant to interprofessional collaboration in health and public health contexts; Apply evidence-based frameworks to make informed decisions in complex, real-world scenarios; Demonstrate effective communication strategies that support shared decision-making among diverse professional roles; Evaluate ethical, cultural, and equity considerations that influence decision-making in interprofessional practice

HSM 391 Interprofessional Internship (3 Credit Hours)
Pre-requisites: Senior standing in Health Science BS program
This internship course provides students with the opportunity to integrate academic learning with professional practice through 200 hours of supervised field experience in health organizations. Students will engage in interprofessional settings where they apply theoretical knowledge, develop professional competencies, and contribute to collaborative practice. Emphasis is placed on reflective practice, professional identity formation, and the development of skills essential for effective teamwork and leadership in health and public health contexts.
Outcomes:
Apply discipline-specific knowledge and interprofessional competencies in a professional health organization setting; Demonstrate effective communication, teamwork, and collaboration skills in interprofessional practice; Evaluate the role of interprofessional collaboration in improving health outcomes and organizational effectiveness; Develop professional skills, networks, and career readiness through supervised experiential learning

HSM 399 Independent Study in Healthcare Administration (1-4 Credit Hours)
Pre-requisites: Permission of the Program Director, Must be enrolled in the undergraduate Healthcare Administration program
This is a directed study course in public health for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines.
Outcomes:
Upon successful completion of this course, the student will be able to articulate a general understanding of the selected topic

Public Health (PUBH)

PUBH 199 Service-Learning in Health Sciences Leadership (3 Credit Hours)
This introductory course aims to teach students the fundamental concepts, principles, and practices associated with interprofessional health approaches. The course will emphasize the importance of teamwork, communication, and respect among various health professionals in delivering holistic care across the health continuum.
Outcomes:
Compare roles, responsibilities, values, ethics, communication, and teamwork of various health professions; Discuss evidence-based impact of interprofessional research, practice, and education; Communicate effectively across professions; Participate in interprofessional teams and case-based activities

PUBH 300 Introduction to Public Health (3 Credit Hours)
Public health is the science of preventing disease and protecting and promoting the health of populations and communities. Through interactive exercises and application of concepts, this course considers its history; ethical principles; scientific foundation and tools; biomedical bases; socioeconomic and behavioral factors; environmental issues; and relationship to medical care.
Course equivalencies: X -PUBH 300/ ENVS 300
Outcomes:
Describe the history, core concepts, functions, and methods of public health; Define health disparities and explain how they are produced; Synthesize public health information and communicate it effectively

PUBH 301 Health and the Environment (3 Credit Hours)
This course is designed as an introduction to the field of environmental health, including regulations, research, disease prevention, and advocacy.
Course equivalencies: X-ENVS301/PUBH301/MBPH401
Outcomes:
Students will be able to outline approaches for assessing and controlling environmental hazards that affect community health and discuss major local, national, and global health challenges

PUBH 303 Fundamentals of Epidemiology (3 Credit Hours)
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including study design and measures of association.
Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403
Outcomes:
Apply epidemiological methods to public health problems; select appropriate quantitative data collection, study designs, and analytical methods; apply adjustment techniques; and calculate measures of association; and interpret and communicate results

PUBH 304 Health Behavior and Health Promotion (3 Credit Hours)
This introductory course is designed to provide students with a foundation in behavioral theory as applied to public health practice, including health education and health promotion. Health education strategies will be examined from the perspective of health literacy, cultural competency, and adult learning behaviors among other dynamics.
This course satisfies the Engaged Learning requirement.
Outcomes:
Describe a range of health behavior theories and frameworks commonly incorporated into public health interventions on the individual, interpersonal, and community level

PUBH 305 Public Health Communication (3 Credit Hours)
This course will teach students effective use of health literacy and health communication tools, including the use of mass media, online social media, and health professions' communication with patients in clinical settings.
Outcomes:
Students will be able to develop communication tools such as infographics and brief web-based videos and evaluate public health information

PUBH 306 Critical Thinking in Public Health (3 Credit Hours)
This course is designed to prepare students to make reasoned, intelligent decisions about public health matters by learning about and practicing how to think, read, write, and speak critically.
Outcomes:
Be able to evaluate the credibility of sources of information, scrutinize arguments, recognize biases in oneself and in others, and take a stand on public health issues and support it

PUBH 307 Foundations of Public Health Policy (3 Credit Hours)
Provides students with theoretical frameworks to understand public health policy issues, introduces public policy making processes, and enables students to analyze position papers on policy topics. Drawing from law, economics, political science, ethics and epidemiology, the course provides students with the knowledge and skills to understand policy-making processes.
Course equivalencies: PUBH 307/MPBH 407
Outcomes:
Explain how federal, state, and local health policy is formulated, implemented and evaluated; Assess the balance between the public good and individual rights in the policy process in public health

PUBH 309 Introduction to Biostatistical Methods for Public Health (3 Credit Hours)
This course offers an introductory overview of the fundamental and foundational biostatistical concepts and methods that are critical in the field of public health. Emphasizing the application and interpretation of biostatistical methods, it covers a broad spectrum of topics including graphical and numerical descriptive statistics for data summarization and exploration; probability theory with an emphasis on the binomial (discrete) and normal (continuous) distributions, which are crucial for understanding statistical inference; and inferential statistics, encompassing point estimation, interval estimation, and hypothesis testing to support evidence-based decision-making. The course also introduces nonparametric statistical methods for analyzing data without assuming a specific distribution.
Outcomes:
Explain the fundamental concepts of probability and statistics as they apply to public health data; Analyze graphical and numerical descriptive statistics to effectively summarize public health data; Evaluate basic inferential statistical methods, including hypothesis testing and confidence intervals, to draw and justify conclusions from public health data; Justify the appropriate statistical methods for specific public health research scenarios based on the data type and research question; Communicate statistical information effectively to various audiences within the field of public health

PUBH 310 Public Health Internship (3 Credit Hours)
This practical internship course will integrate theory, where students will unpack the complexities of Public Health and gain an understanding of the roles and responsibilities of professionals. Careers in Public Health are multidimensional, students will integrate real world experience reflecting on experiences of leadership, health equity, community engagement, and professional development.
This course satisfies the Engaged Learning requirement.
Outcomes:
Integrate academic internship experience with course curriculum academic content through critical reflection of leadership theory and development; assess leadership identity, leadership behavior, and civic role in a public health framework

PUBH 313 Community Assessment and Program Planning (3 Credit Hours)
This course will teach the basics of community health assessment and public health program planning, implementation, monitoring, and evaluation. This will include learning data collection techniques, program design, data analysis strategies, and how to present evaluation findings to different audiences. Students will then apply the lessons learned in class by developing a project plan for a hypothetical public health program.
Outcomes:
Describe a community health assessment; Define conceptual frameworks and logic models and their purpose in the context of public health programs; Design data collection tools for community health assessment and program evaluation purposes; Determine the best evaluation strategy to use in various programmatic scenarios; Apply program planning, implementation, monitoring, and evaluation methods to case study assessment

PUBH 314 Global Public Health (3 Credit Hours)
This course is an introduction to global health at the undergraduate level to provide the students with an understanding of global health goals and governance, health surveillance systems, and the determinants, consequences and trends of disease in low- and middle-income countries, with some reference to high-income countries and regions. Both infectious and non-communicable diseases will be addressed, as will reproductive and women's health, children's health, nutrition, immigration, and environmental health.
Course equivalencies: HSM 210 / PUBH 314 / ENVS 385
Outcomes:
Define the most commonly used global health metrics, international goals, and common global health issues; Describe the various ways historical colonialism and modern globalization impact global health outcomes and programs; Analyze case studies of existing global health interventions and policies; Apply knowledge of global health statistics, common health issues, and public health interventions in the development of a country health profile; Identify reasons for health inequities/disparities which exist in low- and middle-income countries, as well as higher-income countries; Compare current global health funding and implementation systems, such as foreign aid, the United Nations, public/private partnerships

PUBH 315 Public Health Advocacy (3 Credit Hours)
This course is designed to equip students with a foundational understanding of the essential role of advocacy in informing and advancing public health policy, as well as skills necessary to engage in that process. Students will examine public health advocacy campaigns, the legislative process at the local, state, and federal level, the need for evidence-based research in shaping public health policy, the importance of critically evaluating policy proposals, and the incorporation of health equity in the process. The course will cover assessment of the political landscape, stakeholder engagement, and the development of strong written, verbal, and multi-media communication skills. The class will address current public health issues through lectures, class discussions, and projects, including projects aimed at engaging legislators.
Outcomes:
Develop effective advocacy strategies tailored to public health issues; Evaluate evidence-based research to support policy recommendations; Engage diverse stakeholders to advance public health initiatives; Craft persuasive advocacy messages for diverse audiences; Explain the legislative and policy-making processes involved in implementing public health changes

PUBH 320 Global Health Internship (3 Credit Hours)
Pre-requisites: Restricted to students accepted into an official Parkinson School study abroad program
Co-requisites: PUBH 321 (may also be taken as a Prerequisite)
This internship course is for students selected for the global health field experience. Students will travel to an international site and collaborate, either individually or in groups, with a local community partner on a practical public health project that will result in a deliverable students will provide to the partner. Each student is expected to complete at least 100 hours of fieldwork and fulfill all project requirements while abroad. Students will use an asset-based assessment modality, as opposed to deficit-based, when developing their projects. Upon return, students will share their experience with the Loyola University Chicago community through a final presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Collaborate with a host or partner organization to determine a local project that will meet their programmatic needs; Co-create strategies with the partner organization and implementation community to address the assigned health issue; Summarize lessons learned and project plans for the local partner, implementation community, and LUC community via a presentation; Demonstrate interprofessional values and communication skills that demonstrate respect for, and awareness of, the unique cultures, values, roles/responsibilities, and expertise represented by other professionals and groups that work in global health

PUBH 321 Global Health Experience Seminar (1 Credit Hour)
Pre-requisites: Only for students accepted into an official Parkinson School study abroad
This 1-credit seminar course prepares students selected for the summer global health internship to engage ethically, professionally, and effectively in international public health settings. Through interactive sessions, students will explore foundational global health concepts, complete ethics and safety training, analyze key public health indicators for their assigned site, and reflect on the role of culture in shaping health beliefs and health systems. Emphasis will be placed on responsible global engagement, cultural humility, and comparative analysis of health systems. Successful completion of this course is required for participation in the summer field internship abroad.
Outcomes:
Analyze the health status of populations using available data for your assigned local site; Describe how cultural context influences perceptions of health and disease in your local implementation context; Compare and contrast the local national model or health system for provision of healthcare to the US system, including their respective effects on health and healthcare expenditure; Define local, national, and international codes of ethics and how they are relevant to one's working environment

PUBH 390 Special Topics: Public Health Intelligence (3 Credit Hours)
Pre-requisites: Students must have completed one statistics course including STAT 103, PSYC 304, STAT 335, ISSCM 241 equivalent
This course provides both a conceptual foundation and a hands-on introduction for PH informatics - the science of collecting, organizing, and using information to promote and protect the health of all people. Students will work with real-life data sets, from food safety to crime reports, while furthering their understanding of the intersection of public health practice and informatics.
Outcomes:
After taking this course, students will have developed a conceptual foundation for quickly assessing data sets and evaluating informatics approaches to produce high-quality information resources for decision makers

PUBH 391 Leadership and Public Health Entrepreneurship (3 Credit Hours)
Public health entrepreneurship provides a pathway for action to solving public health challenges. Students will learn how to identify public health challenges, ideate, develop sustainable solutions rooted in evidence, cultivate partnerships, lead with authenticity, communicate through the art of storytelling, and champion community well-being.
Outcomes:
Define public health entrepreneurship and explore its role in addressing health disparities with communities

PUBH 392 Special Topics In Public Health (1-3 Credit Hours)
Pre-requisites: Restricted to students in the Bachelor of Public Health (BSPH) program, or with permission of the instructor
This course covers a specific topic in public health.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

PUBH 395 Independent Study in Public Health (1-4 Credit Hours)
This is a directed study course in public health for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines. Students must have permission from the Public Health Program Director to enroll.
Outcomes:
Upon successful completion of this course, the student will be able to articulate a general understanding of the selected topic

PUBH 399 Public Health Capstone Experience (3 Credit Hours)
This course is a cumulative, integrative and scholarly or applied experience or inquiry project. It may include internships, service-learning projects, senior seminars, portfolio projects, or research paper. The project provides the opportunity for students to demonstrate proficiency in effective communication skills through a written report and oral presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate in written report and oral presentation the knowledge and skills acquired during the undergraduate program through selected projects which translate gained information into public health practice, including research

Exercise Science (BS)

Pursue a career in fitness, exercise, and physical performance, working with athletes, individuals, or people with health challenges.

Whether it is fitness training at a gym or exercise physiology in a health care setting, an exercise science graduate helps people improve their health and wellness with physical activity. Through coursework and hands-on experience, students in the Loyola Exercise Science program will develop skills to evaluate health behaviors and risk factors, conduct fitness assessments, write exercise prescriptions, and motivate individuals to practice positive health behaviors.

Exercise science majors at Loyola can enroll in the five-year combined bachelor's/master's degree program and earn both degrees in only five years.

EXCM 395	Clinical Internship and Patient Management	6
Total Hours		**89**

Suggested Sequence of Courses

EXCM students must complete this list of core areas:

- **Artistic Knowledge** (1 course/3 credit hours)
- **Historical Knowledge** (2 courses/6 credit hours)
- **Literary Knowledge** (2 courses/6 credit hours)
- **Societal & Cultural Knowledge** (1 course/3 credit hours)
- **Theological Knowledge** (2 courses/6 credit hours)
- **Philosophical Knowledge** (2 courses/6 credit hours)
- **Ethics** (1 course/3 credit hours)

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

1 Prerequisite: MATH 117 Precalculus I or equivalent. Co-requisite: CHEM 161 Chemical Structure and Properties Laboratory and MATH 118 Precalculus II.

2 Prerequisite: EXCM 156 Anatomy and Physiology II/EXCM 156 Anatomy and Physiology II

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Evaluate human physiological responses to exercise across diverse populations using evidence-based assessment methods.
- Design health and fitness assessment strategies to enhance health and wellness across diverse populations.
- Communicate effective ethical decision making and cultural sensitivity in developing health promotion, behavior change, and disease prevention strategies.
- Analyze components of the research process to understand and apply evidence-based practices in exercise science.
- Demonstrate professional leadership and collaborative skills in exercise science, health, and community-based settings.

Exercise Science Minor

The Minor in Exercise Science from Loyola's Parkinson School of Health Sciences and Public Health prepares students for enhanced careers in the growing fields of allied health, wellness, and fitness. Students develop skills in:

- Evaluating health behaviors and risk factors
- Conducting fitness assessments
- Designing exercise prescriptions
- Motivating others to live healthier lives
- Identifying the essentials of sports nutrition

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Develop a foundational understanding of human movement and health
- Examine the role of exercise in promoting wellness and performance
- Discover opportunities in applied health sciences and wellness fields

Health Science (BS)

The Health Science (BS) provides a holistic experiential educational experience that prepares students for a variety of potential careers and professional degrees serving healthcare. The program is designed to facilitate pursuit of cross-disciplinary coursework to prepare students for healthcare careers.

Related Programs

Major

- Exercise Science (BS) (p. 733)
- Healthcare Administration (BS) (p. 737)

Curriculum

The BSHS program draws on courses in healthcare administration, public health, exercise science, nutrition, biology, chemistry, mathematics, and social sciences.

The program requires 61 credit hours towards the minimum 120 credits needed for graduation. In addition to the 61 major credits, students complete 30 credits in the University core and may use the remaining elective credits towards the optional selection of a pre-health advising pathway, a minor, second major or elective credits towards pursuing other courses of interest.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Demonstrate a comprehensive understanding of core biological, physical, social science and liberal arts principles and their applications to contemporary health challenges.
- Utilize critical thinking and problem-solving skills to address complex health challenges through interdisciplinary collaboration and culturally responsive approaches.
- Integrate knowledge of healthcare systems, public health, policy, and ethics to evaluate health disparities and propose solutions that promote equitable access to care.
- Develop effective written and verbal communication skills to convey health information accurately to diverse audiences including patients, communities, and healthcare professionals.

Healthcare Administration (BS)

Be a leader in the business of health care.

Are you interested in health care with a role in operations and business? With a healthcare administration degree, you can work in the management and organization of healthcare delivery systems and health services.

Loyola's Bachelor of Science in Healthcare Administration (BSHCA) teaches the latest health industry knowledge, such as healthcare finance, quality management, and health information systems, with a solid grounding in ethics and liberal arts. Graduates are prepared for careers in the growing field of healthcare management, and are employed in hospitals systems, post-acute care agencies, insurance companies, healthcare consulting firms, and more.

Major

- Exercise Science (BS) (p. 733)

Master's

- Healthcare Administration (MHA) (p. 1536)

Minor

- Healthcare Administration Minor (p. 739)

Curriculum

The BS in Healthcare Administration differs from a traditional business degree in that it focuses on understanding how the health care delivery system functions and how to best manage those functions. Students must complete 121 total credit hours to graduate. The BS in Healthcare Administration major has 78 credit hours of required courses.

The Healthcare Administration program is guided by the External Advisory Board (https://www.luc.edu/parkinson/academics/departments/healthcareadministration/bshealthcareadministration/externaladvisoryboard/) (EAB) and is fully certified by the Association of University Programs in Health Administration (https://www.aupha.org/certification/certification/) (AUPHA).

The following list includes all required major Healthcare Administration courses. Healthcare Administration majors will take these courses, as well as University Core, electives, business courses in the Quinlan School of Business, field internship, and a culminating capstone course. Students also have room in their program of study to add a minor, in complementary areas such as global and international studies, marketing, or bioethics. Please see the Suggested Sequence of Courses (p. 738) for all courses required for a B.S. in Healthcare Administration.

Total Hours		**78**

Internship

During their senior year, students complete a field-based internship under the supervision of a preceptor. As a result of extensive relationships between the Parkinson School and Chicago area healthcare executives and organizations, students have the opportunity to complete their internship in key segments of the health care industry. The internship

consists of a goal-based project of value to the organization, plus opportunities that include shadowing and networking.

Transfer Credit

Courses taken outside of Loyola may be transferred for appropriate credit upon approval of the program advisor and provided a minimum grade of C is earned for the course. External students wishing to transfer into Loyola and the HCA program must provide official transcripts indicating a minimum 2.5 grade point average (GPA) on a four-point scale. Internal students wishing to transfer to a major in Healthcare Administration must have a minimum cumulative 2.5 GPA.

Healthcare Administration University Core Curriculum 2024-2025

HCA students must complete this list of core areas:

Historical Knowledge (2 courses/6 credit hours)
Literary Knowledge (2 courses/6 credit hours)
Theological Knowledge (2 courses/6 credit hours)
Artistic Knowledge (1 course/3 credit hours)
Philosophical Knowledge (1 course/PHIL 130 Philosophy & Persons)
Scientific Knowledge (2 course/6 credit hours)
Ethics (1 course/3 credit hours)

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

1. Students assigned to UCWR 110 Writing Responsibly for spring should take a CORE in the fall
2. Students assigned to UCWR 110 Writing Responsibly for fall should take a CORE in the spring
3. PHIL 284 Health Care Ethics or HSM 280 Healthcare Ethics in Practice is a pre-requisite to HSM 330 Healthcare Legal & Regulatory Environment.
4. Statistics (ISSCM 241 Business Statisticsor PSYC 304 Statistics), ECON 201 Principles of Microeconomics and ACCT 201 Introductory Accounting I are prerequisites to FINC 301 Introductory Business Finance.
5. Business Selectives: ECON 329 Health Economics, ENTR 201 Essentials of Entrepreneurship, HRER 201 Principles of HR Management, or SCMG 232 Introduction to Supply Chain Management.
6. FINC 301 Introductory Business Finance is a prerequisite to HSM 325 Healthcare Fiscal Management.
7. Students are strongly encouraged to use program electives toward the following course HSM 210 Introduction to Global Healthcare Delivery.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Demonstrate effective oral and written communication
- Apply organizational management and leadership theories in a variety of healthcare settings
- Analyze quantitative and qualitative information to identify healthcare challenges, evaluate alternative approaches, and develop data-informed, evidence-based recommendations
- Demonstrate ethical reasoning, cultural competence, and professional standards to support sound decision-making, ensure compliance, and accountability in healthcare practice
- Compare healthcare policies, systems and finance models, and evaluate their strategic implications for quality, access, equity, and population health outcomes

Healthcare Administration Minor

The Healthcare Administration minor prepares students to work in healthcare settings and to understand the business side of public health and health care. The minor is built upon a foundation of Jesuit-based liberal arts, business, and public policy courses. Students adding the Healthcare Administration minor to their course of study choose from a range of classes related to the health system: healthcare fiscal management, health information technology, health policy, health equity, healthcare data analytics and more.

Related Programs

Major

- Healthcare Administration (BS) (p. 737)

Certificate

- Bioethics and Health Policy Certificate (p. 1380)

Curriculum

One course (three credit hours) are required and five courses (15 credit hours) are to be selected from the elective course list. You must complete the required course before enrolling in Group 1 or Group 2 electives.

Code	Title	Hours
Required Courses		
HSM 110	Healthcare in America	3
Select two courses from Group 1 (six credit hours).		*6*
HSM 200	Careers in Healthcare Administration	
HSM 210	Introduction to Global Healthcare Delivery	
HSM 220	Post-Acute & Long-Term Care Management	
HSM 230	Fundamentals of Health Equity	
HSM 240	Healthcare Workforce Management and Professionalism	
HSM 280	Healthcare Ethics in Practice	
Select three courses from Group 2 (9 credit hours).		*9*
HSM 310	Healthcare Project Management	
HSM 315	Healthcare Quality & Performance Improvement	
HSM 325	Healthcare Fiscal Management	
HSM 330	Healthcare Legal & Regulatory Environment	
HSM 338	Healthcare Strategy and Marketing	
HSM 340	Health Care Policy	
HSM 345	Healthcare Data Analytics	
HSM 358	Research Literacy for Health Decision-Makers	
HSM 365	Health Innovation and Entrepreneurship	
HSM 368	Management of Healthcare Organizations	
HSM 386	Health Information Systems Management	
ECON 329	Health Economics	
Total Hours		**18**

Suggested Sequence of Courses

Students have flexibility in selecting five of the six required courses.

Course	Title	Hours
Junior		
Fall		
HSM 110	Healthcare in America	3
HSM 210 or HSM 200	Introduction to Global Healthcare Delivery or Careers in Healthcare Administration	3
	Hours	**6**
Spring		
HSM 310	Healthcare Project Management	3
HSM 340	Health Care Policy	3
	Hours	**6**
Senior		
Fall		
HSM 230	Fundamentals of Health Equity	3
HSM 365	Health Innovation and Entrepreneurship	3
	Hours	**6**
	Total Hours	**18**

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Compare healthcare policies and systems and their strategic implications for quality, access, equity, and population health outcomes
- Identify healthcare challenges, evaluate alternative approaches, and develop data-informed, evidence-based recommendations.

Nutrition Minor

Nutrition and food are integral to life. Relevant dimensions in contemporary society include those related to health, the environment, the economy and culture. Strategies to optimize nutrition include not only individual choice but also policy, systems and environmental initiatives with an interprofessional approach.

Several undergraduate majors may be enhanced by foundational nutritional knowledge to foster this interprofessional approach, such as public health, exercise science, pre-health, education (early childhood, elementary, special education), environmental sciences, health systems management, business and marketing.

FONU 320	Nutrition Through the Life Cycle	3
	Hours	**6**
Spring		
Elective		3
	Hours	**3**
	Total Hours	**18**

Learning Outcomes

- Describe role, rich sources, and needs of essential nutrients
- Incorporate food-based recommendations into meal plans
- Demonstrate competence in basic food preparation
- Compare key nutrient needs through the life cycle
- Summarize food-based strategies to meet nutrition needs to support health

Public Health (BA)

The Public Health BA degree prioritizes the integration of a broader array of social and behavioral sciences alongside field-specific coursework that also incorporates content such as biology, epidemiology, and public health biostatistics. Our BAPH offers an interdisciplinary approach and is designed for non-pre-health professional students.

Minor

- Medieval Studies Minor (p. 523)

Certificate

- Public Health Certificate (p. 1544)

Combined

- Medicine/Public Health (MD/MPH) (p. 1879)

Curriculum

The BA in Public Health (BAPH) program draws on courses in ethics, environmental sciences, biology, mathematics, healthcare administration, social sciences, and the humanities alongside epidemiology, biostatistics, health behavior and promotion, health communication, policy, and global health.

The BAPH degree has 72 credits, of which 12 credit hours are taken directly from the University Core, leaving 60 unique credit hours, which are spread across 51 credit hours of required courses and 9 credits of concentration elective credits. Students will take an additional 33 credits of University Core courses plus UNIV 101 (1 credit) and 14 general elective credits to achieve 120 credit hours.

Students in the BAPH program will select one of five elective concentrations of 9 credit hours each, which are springboards to numerous minors. These concentrations include: Gender, Sexuality & Health; Global Health; Health Equity & Social Justice; Policy & Advocacy and Program Management.

Code	Title	Hours
ANTH 280	Evolution of Human Disease	3
or ANTH 353	Epidemics and Pandemics

Elective Concentration Courses (p. 741)		9
Total Hours		**72**

1 This course satisfies the engaged learning requirement

2 HSM 210 and PUBH 310 are also Engaged Learning Designated courses

3 Writing intensive designation

4 If interested in the BAPH/MPH Accelerated Masters Pathway (p. 1540) program, see Keith Kramer (kkramer4@luc.edu), Senior Program Advisor for the B.S. in Public Health Program, first before taking PUBH 303, 307, 309, 314/HSM 210, or ENVS 380.

5 PUBH 320 is a summer study abroad opportunity. Students must talk to their program advisor, see Keith Kramer (kkramer4@luc.edu) to determine which internship requirement may fulfill the major requirement. If a student takes PUBH 320, they are also required to take PUBH 321 in the prior Spring semester.

Elective Concentrations

Policy and Advocacy Concentration (9 credits)

Code	Title	Hours
Choose one course from the following		3
COMM 230	Argumentation & Advocacy	
COMM 306	Environmental Communication & Advocacy	
PUBH 391	Leadership and Public Health Entrepreneurship

	Total Hours	**72**

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Demonstrate a thorough understanding of public health frameworks, core principles, and scientific foundations, including the fields of epidemiology, biostatistics, environmental health, and health behavior, to effectively apply this knowledge in addressing health challenges.
- Analyze the impact of social, economic, behavioral, and environmental factors on public health, particularly among marginalized communities, and identify root causes of health disparities to promote health equity.
- Apply techniques to conduct and assess public health interventions that address community needs and promote social justice.
- Communicate effectively to convey public health information clearly to diverse audiences, influence policy, and engage in community-based initiatives for promoting health equity and social justice.

Public Health (BS)

Creating healthy people and communities

Grounded in the basic sciences with an emphasis on population health, the B.S. in Public Health (BSPH) degree prepares students for positions in fields such as health education, epidemiology, and environmental health, across nonprofit, industry, and government sectors. Pre-health students who seek a medical or health professions degree can broaden their experience with a multidisciplinary public health major.

Accreditation

Loyola University Chicago Public Health Programs are accredited by the **Council on Education for Public Health** (CEPH). In March 2021, CEPH Board of Councilors acted to renew our BSPH and MPH programs' accreditation for a seven-year period. For questions on accreditation, please email Dr. Ruth Kafensztok (rkafens@luc.edu).

Related Programs

Major

- Exercise Science (BS) (p. 733)
- Healthcare Administration (BS) (p. 737)
- Public Health (BA) (p. 740)

Curriculum

The BSPH program draws on courses in ethics, environmental sciences, biology, mathematics, healthcare administration, social sciences, and the humanities alongside epidemiology, biostatistics, health behavior and promotion, health communication, policy, and global health.

The program requires 71 credit hours towards the minimum 120 credits needed for graduation. In addition to the 71 major credits, students complete 34 credits in the University Core, and may use the remaining 15 general elective credits towards pursing minors or other courses of interest. Several Knowledge Areas within the **University Core** are waived for BSPH students as they are already included in the major (Quantitative, Scientific Literacy, etc.).

Each course above is three credits except where noted. PUBH 310 Public Health Internship, Public Health Internship, is a great elective option.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Analyze population health data using quantitative, qualitative, statistical, and computational tools to inform public health decisions.
- Evaluate public health information from multiple credible sources to support evidence-based conclusions about population health issues.

- Communicate public health information effectively in oral, written, and digital formats for professional and non-specialist audiences.
- Apply public health theory and principles to examine how social, environmental, behavioral, and policy factors affect population health and health equity.

Pre-Professional Programs

- Pre-Law Advising (p. 747)
- Pre-Medicine Advising (p. 747)

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

University Policies

Please see University Policies for academic policies that supersede those of academic units within the University

Pre-Law Advising

About Us

Loyola Career Services provides support and guidance to students who are exploring a legal career and applying to law school. Students can schedule an appointment through Handshake to meet with their dedicated career advisor. More information and resources (https://app.joinhandshake.com/edu/article_categories/1071/) about Career Service's offerings for pre-law students can be found here: Pre-Law Advising: Loyola University Chicago (luc.edu)

Pre-Medicine Advising

About Us

Loyola Career Services provides support and guidance to students exploring, considering, and applying to programs in the healthcare field including medical school, dental school, and other allied health professions. Students can schedule an appointment through Handshake to meet with their dedicated career advisor. More information about Career Service's offerings for pre-medical and pre-health students, including a list of typical course requirements and recommendations, can be found on the Health, Medicine, and Natural Sciences website (https://www.luc.edu/prehealth/index.shtml/).

Commonly Required Courses

These are typical requirements and recommendations for applying to medical schools. If you are interested in applying to programs in one of the other health profession areas (dental, pharmacy, PA, PT, OT, optometry, podiatry, etc.) please review the resources included below.

The health professional schools themselves provide the most accurate and up-to-date source of information. Students should begin researching specific requirements of health professional schools they are interested in early in their academic careers and continue this research through their academic careers as health professional schools typically update their required and recommended courses on an annual basis.

Students should also review Loyola department websites and LOCUS to determine relevant pre-requisites for courses listed below and what terms these courses are typically offered.

These professional association websites are additional resources that will likely be of value:

- AAMC Medical School Pre-Requisites (https://students-residents.aamc.org/medical-school-admission-requirements/admission-requirements/) (Allopathic Medicine/MD)
- ADEA-Dental School Pre-Requisites (https://www.adea.org/GoDental/Application_Prep/Preparing_for_Dental_School/Prerequisites.aspx) (Dentistry)
- AACOMAS Pre-Requisites (https://www.aacom.org/become-a-doctor/apply-to-medical-school/admissions-requirements/) (Osteopathic Medicine/DO)
- AAPA Pre-Requisites (https://www.aapa.org/career-central/become-a-pa/) (Physician's Assistant)
- AACP Pre-Requisites (https://www.aacp.org/resource/pharmacy-school-admission-requirements/) (Pharmacy)
- ASCO Information (https://optometriceducation.org/) (Optometry)
- AACPM Information (https://aacpm.org/) (Podiatry)
- AAVMC Information (https://www.aavmc.org/) (Veterinary)

Area	Subject	Loyola Equivalent

	Upper Level Composition Course	One Writing Intensive Course
Psychology	Psychology	PSYC 101
Social Science	Sociology	SOCL 101

* The "New Track" for the Chemistry sequence denotes the new course structure beginning in Fall 2023 that will reorganize the presentation of topics but still reflect the AAMC standards of Chemistry courses. Students who have completed the "Previous Track" have still completed the necessary chemistry requirements for health professional schools.

** The 240/241 and 260/261 levels of courses in the New Track of Chemistry are interchangeable and can be taken in either order once the 160/161 and 180/181 sequences are complete.

Occasionally required courses include (but are not limited to):
Molecular Genetics, Molecular Biology, Calculus, Additional Behavioral Sciences

Quinlan School of Business

Mission & Vision

Mission

We are an academic and scholarly community in a Jesuit Catholic University, inspiring intellectual curiosity, a concern for others and the common good. We prepare leaders to contribute to society through ethical, sustainable, and socially responsible conduct and to act effectively in complex organizational settings in a diverse global economy.

Vision

We are difference makers. We are a leading Jesuit institution of transformative learning that empowers students to discern their life's purpose while preparing them to make an impact in the world through data-driven decision making, critical thinking and innovation. We develop ethical, responsible and forward-thinking leaders who value diversity, equity and inclusion to drive sustainable business growth and inspire positive change in organizations, communities and in society. As scholars and life-long learners, we foster a rigorous, experiential learning culture in the heart of Chicago and around the world to pursue knowledge in the service of others.

Quinlan School of Business Academic Policies

Learn more about the Quinlan School of Business policies regarding program details, transfer credits and more.

About the Quinlan School of Business

The Bachelor of Business Administration (BBA) program integrates a foundation of education through the University Core Curriculum (p. 989) that includes a total of 16 courses (48 credit hours of coursework), primarily in the arts and sciences, which develop important college-level skills and integrate an understanding of values through 10 required areas of knowledge as well as one course that satisfies Loyola's commitment to Engaged Learning. In addition, each student completes required courses in business that serve to develop individual intellect and character. Our goal is to prepare skilled business professionals who will develop into socially responsible, ethical leaders.

The Quinlan School of Business is fully accredited by AACSB International, the Association to Advance Collegiate Schools of Business. In addition, the accounting programs are separately accredited by AACSB International.

Senior Assistant Dean, Undergraduate Operations: Nicole Gesualdo, PhD
Assistant Dean, Undergraduate Programs: Matt Rombach

Academic Advising

First-year and second-year students are advised through the office of First and Second Year Advising (https://www.luc.edu/fsya/?utm_medium=redirect&utm_campaign=undergrad-redirects&utm_soure=firstandsecondyearadvising/).

Academic advising for juniors, seniors, and transfer students is handled in the undergraduate programs office of the Quinlan School of Business. The initiation of timely class withdrawals, changes in courses, and filing of degree applications are all matters specifically requiring the dean's approval.

The undergraduate office is the primary point of contact for all matters that relate to degree requirements in the Quinlan School of Business. Students with any questions or concerns regarding academics, such as courses, scheduling, majors or minors, etc., should consult with their academic advisor.

School Requirements

Writing and Writing-Intensive Courses

In order to graduate from the Quinlan School of Business, students ordinarily must complete three writing courses. These include: UCWR 110 Writing Responsibly, or the equivalent; and two writing-intensive courses. UCWR 110 Writing Responsibly must be taken in the freshman year and must be completed with a grade of "C-" or better before any writing-intensive course may be taken.

Designated sections of courses are taught with a special emphasis on writing (e.g. WI courses may not be contracted or be independent study courses). They are easily identified by a "W" in the section number. Students in these courses will have a variety of writing assignments that will be integrated closely with the learning objectives of the course. The purpose of the program is to assure that students continue to give attention to writing as an essential component of education throughout their years at Loyola.

In order to ensure that training in writing is spread throughout the undergraduate years, the program specifies that no more than one writing-intensive course per semester may be applied to this requirement. Students may register for only one writing intensive course per semester. Each student must complete at least one of their writing intensive courses with a Quinlan School of Business course or ENGL 210 Business Writing. The other writing intensive course may come from any discipline.

Freshmen and transfer students with 59 or fewer transfer credit hours must take two writing-intensive courses during their undergraduate career at Loyola; transfer students with 60–89 transfer credit hours must take one writing-intensive course during their undergraduate career at Loyola; transfer students with 90 or more transfer credit hours are exempt from taking writing-intensive courses. For further information, transfer students should consult their academic advisor.

Math Requirements

Students are encouraged to satisfactorily complete the mathematics requirement of their program during their first year or as early in their time at Quinlan as possible. All students must have math credit on their transcript through MATH 110 Business Precalculus (via coursework with a grade of C- or better, transfer credit, or a placement exam), and students who are majoring in Economics, Finance, or the U.S./Europe double degree program must have math credit on their transcript through MATH 130 Business Calculus.

University Core Curriculum

For specific information, please refer to the University Core section in University Requirements (p. 989). Specific suggestions on how to fulfill the Core through the Quinlan School of Business are detailed below.

Core Areas	School Recommended Courses
College Writing Seminar (3 credit hours)	UCWR 110 (Required as a prerequisite for writing-intensive courses)
Artistic Knowledge and Inquiry (3 credit hours)	
Historical Knowledge and Inquiry (6 credit hours)	
Literary Knowledge and Inquiry (6 credit hours)	
Quantitative Knowledge and Inquiry (3 credit hours)	ISSCM 241 and STAT 103
Scientific Knowledge and Inquiry (6 credit hours)	
Societal and Cultural Knowledge and Inquiry (6 credit hours)	ECON 201 and ECON 202 (6 credit hours)
Philosophical Knowledge and Inquiry (6 credit hours)	ETHC 341 (3 credit hours)
Theological and Religious Knowledge and Inquiry (6 credit hours)	
Ethical Knowledge and Inquiry (3 credit hours)	

Engaged Learning Requirement	School Recommended Courses
Engaged Learning (1 course)	QUIN 351 (may only be taken concurrently with an approved internship experience)

Required Quinlan Business Courses

Each Quinlan School of Business student must complete the following required business administration courses plus the required courses for one area of concentration. A student may choose to complete the courses for additional areas of concentration or for a minor.

Code	Title	Hours
ACCT 201	Introductory Accounting I	3
ACCT 202	Introductory Accounting II	3
ECON 201	Principles of Microeconomics	3
ECON 202	Principles of Macroeconomics	3
Select one of the following:		3
FINC 301	Introductory Business Finance	
FINC 334	Principles of Corporate Finance (required for Finance majors and minors)	
INFS 247	Business Information Systems	3
INFS 343	Business Analytics	3

ISSCM 241	Business Statistics	3
LREB 315	Law and the Regulatory Environment of Business I	3
MARK 201	Principles of Marketing	3
MGMT 201	Managing People and Organizations	3
MGMT 304	Strategic Management	3
SCMG 232	Introduction to Supply Chain Management	3

Note: Area of concentration and major are used interchangeably in the Quinlan School of Business.

Code	Title	Hours
Other School of Business Requirements		
COMM 103	Business & Professional Speaking [1]	3
MATH 110	Business Precalculus	3
MATH 130	Business Calculus [2]	4
ETHC 341	Ethics in Business	3
or ETHC 321	International Business Ethics	
QUIN 202	Career Preparation	2
Global Awareness		
Select one of the following: [3]		3
Any business course from the International Business major group, or:		
ANTH 100	Globalization and Local Cultures	
ANTH 102	Culture, Society, and Diversity	
ENTR 313	Entrepreneurship - Global Opportunity Scan	
GLST 101	Introduction to Global Studies	
PLSC 102	International Relations in an Age of Globalization	
Elective Courses (p.)		
Free electives	Any courses from the undergraduate curriculum for which all prerequisites and/or restrictions have been met. Elective credit may be needed to reach 120 credit hours required for graduation.	

1 Accounting majors with prior credit for COMM 101 Public Speaking & Critical Thinking must take ENGL 210 Business Writing to complete this requirement.
Accounting and Analytics majors with prior credit for COMM 101 Public Speaking & Critical Thinking who wish to take the CPA exam should take ENGL 210 Business Writing for Business Communication credit.

2 Students majoring in Economics, Finance, and the U.S./Europe double degree must MATH 110 Business Precalculus as well as MATH 130 Business Calculus.

3 A study abroad experience will also satisfy this requirement.

Students planning to study abroad are encouraged to meet with a Quinlan academic advisor early in the planning stage in order to select a program that offers appropriate courses toward University Core, Business Core, majors and/or minors. A student will be permitted to take up to two courses abroad toward a Quinlan major or minor (this includes students pursuing the BA in Economics). All study abroad courses (except those taken for general elective credit) must be reviewed through the Study Abroad Office course approval process.

Majors and Program Details

All Quinlan School of Business undergraduate students complete a broad-based core of foundation courses, followed by advanced study in at least one area of concentration, leading to the Bachelor in Business Administration (BBA) degree in the following:

- Accounting (BBA) (p. 775)
- Accounting and Analytics (BBA) (p. 777)
- Business Honors Program (p. 782)
- Economics (BBA) (p. 787)
- Entrepreneurship (BBA) (p. 790)
- Finance (BBA) (p. 793)
- Human Resource Management (BBA) (p. 797)
- Information Systems and Analytics (BBA) (p. 799)
- International Business (BBA) (p. 802)
- Management (BBA) (p. 805)
- Marketing (BBA) (p. 808)
- Sport Management (BBA) (p. 812)
- Supply Chain Management (BBA) (p. 815)
- U.S./Europe Double Degree (BBA) (p. 819)

Minors

The Quinlan School of Business offers a variety of minors for both business students and non-business students. Choosing a minor offers students a chance to gain working knowledge in an area in addition to their major field of concentration. All students may declare their minor. A maximum of one transfer course taken prior to matriculating at Loyola University Chicago may be allowed for non-Quinlan school students at the discretion of the Assistant Dean of the Quinlan School of Business. For non-Quinlan students double minoring in any two (or more) concentrations, only two applicable courses may be applied to both concentrations. For Quinlan School of Business students double minoring in any two (or more) concentrations, only one applicable course may be applied to both concentrations.

- Accounting Information Systems Minor (p. 780)
- Business Administration Minor (p. 781)
- Business of Applied Artificial Intelligence Minor (p. 781)
- Economics Minor (p. 789)
- Entrepreneurship Minor (p. 792)
- Finance Minor (p. 795)
- Human Resource and Employment Relations Minor (p. 796)
- Information Systems Minor (p. 801)
- International Business Minor (p. 804)
- Management Minor (p. 807)
- Marketing Minor (p. 810)
- Nonprofit Management Minor (p. 811)
- Sport Management Minor (p. 814)
- Supply Chain Management Minor (p. 817)
- Sustainability Management Minor (p. 818)

Grade Requirements

All Business Core, business school requirements, Writing Intensive courses, major and minor courses, and UCWR 110 must be successfully completed with a grade of C- or better. In addition, the overall GPA and any major or minor GPA must be greater than or equal to 2.0. All grades from courses attempted in a major or minor are calculated into the major or minor GPA. University Core classes (with the exception of UCWR 110) may be completed with a grade of D or better.

Students are expected to adhere to all course prerequisites for any course as listed in the online schedule of classes each term. Specific information can be found in LOCUS.

Curriculum for Transfer Students

Students seeking admission to Loyola University's Quinlan School of Business as a transfer student may have their transcripts from prior institutions reviewed by the Undergraduate Dean's office. Business coursework taken elsewhere that was taken more than eight years prior to enrolling at Loyola University's Quinlan School of Business will not be considered for transfer credit. Coursework taken within the previous eight years will be considered for transfer credit.

All transfer students must complete a minimum of 50% of all business courses at Loyola University Chicago. Additionally, 80% of a major or minor must be completed at Loyola University Chicago. This typically translates into the possibility of one course permitted for a major or minor at the discretion of the Quinlan School of Business. Please consult with the Assistant Dean of the Quinlan School of Business with any questions.

Transfer students should note that accepting courses for credit from other institutions is done at the discretion of the Quinlan School of Business. Curricular changes do occur within the Quinlan School of Business. However, transfer credit is articulated at the time of a student's matriculation to Loyola University Chicago with what curricular policies were in place at that time. The Quinlan School of Business reserves the right to not re-articulate transfer credit once a student has matriculated.

Taking Courses Elsewhere

The Quinlan School of Business adheres to the university policy on permission to take coursework at other universities (p. 1919). In conjunction with the university policy, the Quinlan School of Business will not approve any courses from the Quinlan School of Business curriculum to be taken elsewhere during any semester or summer session.

Readmission to the Quinlan School of Business

A student who leaves Loyola University Chicago's Quinlan School of Business without completing their degree requirements may reapply for admission through the Office of Undergraduate Admission for a period of 8 years from the date of separation. If the application for readmission is for a term that is within the 8 year period, the student will be able to have their transcript reviewed by the Assistant Dean. Those courses previously taken at Loyola University Chicago and at other accredited institutions, which received passing grades based on the grading policies in place at the time of readmission, may be counted toward current degree requirements.

A student who leaves Loyola University Chicago's Quinlan School of Business without completing their degree requirements and is separated from the university for greater than 8 years will need to reapply for admission and will not be able to count past business coursework toward current degree requirements.

Honors and Awards

Dean's List

Each Fall and Spring Semester, the Quinlan School of Business acknowledges those full-time (12 or more hours) students who obtain at least a 3.5 grade point average for the term. Students on the dean's list receive personal acknowledgement from the dean.

Dean's Key

Ordinarily given to the business administration senior or seniors who, in the estimation of the dean, have made the most outstanding contributions in both leadership and scholarship to the reputation of the school. It is awarded to whomever may be expected in the years after graduation to exemplify, both as citizens and as successful business professionals, the highest ideals of the university.

Departmental Keys

Each academic major in the Quinlan School of Business ordinarily awards one silver honor key annually to the graduating senior who has demonstrated outstanding academic ability in that major field of concentration. Those considered for this award usually will have earned the highest academic average for all coursework in their particular field of concentration. Other factors such as, but not limited to, leadership achievement, cumulative grade point average, and graduation honors may, at the full discretion of the faculty, be recognized in the selection process.

Community Engagement Award

This award celebrates an individual who has demonstrated exceptional dedication to making a positive impact on the community by addressing relevant social issues and promoting positive change.

Commitment to Student Organizations Award

This award recognizes a student who had demonstrated exceptional dedication to student life through active involvement and leadership in various student organizations. It celebrates the recipient's commitment to fostering a sense of community, collaboration, and personal development within the Quinlan School of Business.

Leadership Awards

Certificates of merit may be awarded to those full time Quinlan School of Business students who have distinguished themselves by active and meritorious participation in various extracurricular activities within the university.

Alpha Kappa Psi Scholarship Key

A key which is merited by the senior student in the fraternity who has demonstrated outstanding academic excellence in all undergraduate courses taken at Loyola. Ordinarily this means the highest cumulative grade point average achieved for all courses attempted at Loyola.

Delta Sigma Pi Scholarship Key

A key which is merited by the senior student in the Quinlan School of Business who has demonstrated outstanding academic excellence in all courses taken at Loyola. Ordinarily, this means the highest cumulative grade point average achieved in all courses attempted at Loyola.

Departmental Honors

The Quinlan School of Business offers departmental honors in the following departments with the requirements for each as listed. Departmental honors are available to students with majors in the Quinlan School of Business. Students must apply to a department for honors consideration. Contact the chairperson of the specific department for more information.

Honor Societies and Fraternities

The university honorary societies and professional fraternities for which business administration students may qualify are:

- **Alpha Kappa Psi**: A national professional fraternity founded with the purpose of stimulating and developing scientific research in the field of commerce and business administration.

- **Beta Alpha Psi**: A national honorary accounting fraternity with membership limited to juniors and seniors in the full- and part-time business administration programs. Students must be majoring in accounting, finance or information systems, and display high scholastic and personal character requirements.
- **Beta Gamma Sigma**: A national scholastic honor society for business administration students. Membership in the Loyola chapter is available to qualified junior and senior Quinlan School of Business students.
- **Delta Sigma Pi**: A national professional business fraternity, organized to promote closer affiliation of Quinlan students to the business community.

Accounting (ACCT)

ACCT 201 Introductory Accounting I (3 Credit Hours)
Pre-requisites: Minimum 15 earned hours
The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process, and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include: preparation and use of financial statements; the accounting process; and the measurement and reporting of income, assets, liabilities, and owner's equity.
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
The student will be able to understand the underlying principles, design, concepts, limitations, and the necessity of accounting systems; The student will gain an appreciation of the uses of financial data and financial statements and their impact on business decisions

ACCT 201H Introductory Accounting I - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the Quinlan Business Honors program
The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include: preparation and use of financial statements, the accounting process, and the measurement and reporting of income, assets, liabilities, and owners' equity.
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
The student will be able to understand the underlying principles, design, concepts, limitations, and the necessity of accounting systems; The student will gain an appreciation of the uses of financial data and financial statements and their impact on business decisions

ACCT 202 Introductory Accounting II (3 Credit Hours)
Pre-requisites: A minimum grade of "C-" in ACCT 201
This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.
Course equivalencies: ACCT202/ACCT202H/ACACT201
Outcomes:
The student will be able to understand the differences between cash and accrual accounting, the use of ratio analysis in investing and managing decisions, the value and importance of identifying and allocating costs, and the methods involved in the budgeting process

ACCT 202H Introductory Accounting II - Honors (3 Credit Hours)
Pre-requisites: C- or better grade in ACCT 201 or ACCT 201H; Restricted to SBA honors students
This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.
Course equivalencies: ACCT202/ACCT202H/ACACT201
Outcomes:
The student will be able to understand the differences between cash and accrual accounting, the use of ratio analysis in investing and managing decisions, the value and importance of identifying and allocating costs, and the methods involved in the budgeting process

ACCT 303 Intermediate Accounting I (3 Credit Hours)
Pre-requisites: Sophomore Standing and ACCT 202 with grade of C- or higher; ACCT 202 may also be taken as a corequisite
The first in a series of courses designed to provide in-depth coverage of the generally accepted principles underlying financial statements and financial reporting, from conceptual framework to application. Topics include alternatives for measurement of revenue and asset valuation, and presentation of financial statements. Lectures, discussions, and technical readings are supplemented with extensive problem and written assignments.
Outcomes:
Students will demonstrate their understanding of the accounting process leading to financial reports; Furthermore students will also develop the ability to apply critical thinking and analytical skills toward the solution of problems concerning valuation of assets, and revenue and expense recognition

ACCT 304 Intermediate Accounting II (3 Credit Hours)
Pre-requisites: Sophomore standing, a minimum grade of "C-" in ACCT 303 or Graduate Business student
This course is an extension of Intermediate I where students use the conceptual framework to consistently evaluate and explain accounting practice. This allows the student to not only understand the accounting methodologies but also recognize why these approaches are generally superior to alternative accounting treatments. Topics include concepts of present and future value, investments in financial instruments (debt and equity), leases, pensions, income taxes, earnings per share, and the statement of cash flow.
Outcomes:
Students will be able to demonstrate an understanding of the professional pronouncements as they relate to the measurement, recognition, and reporting of financial information; Students will also be able to demonstrate an understanding of how to research relevant accounting issues to better prepare for professional certification

ACCT 306 Advanced Financial Accounting (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of C- in ACCT 304
Topics include accounting for business combinations, cost & equity method investments, consolidated financial statements, governmental & not-for-profit, & accounting for multinational entities. Course includes extensive problem assignments.
Interdisciplinary Option: International Business
Outcomes:
Students will understand the accounting for corporate acquisitions, corporate consolidations including intercompany transactions, governmental and not-for-profit and international accounting issues

ACCT 307 Adv Accounting: Not-For-Profit Entities & Adv Financial Accounting Topics (3 Credit Hours)
Pre-requisites: Sophomore standing, a minimum grade of "C-" in ACCT 303
Topics include accounting concepts as applied to state and local government, along with financial reporting for other not-for-profit entities including hospitals, universities, and voluntary health and welfare organizations. Class may be taken prior to ACCT 306.
Outcomes:
Students will gain a comprehensive knowledge of the reporting requirements of not-for-profit entities

ACCT 308 Accounting Information Systems and Sustainability Reporting (3 Credit Hours)
Pre-requisites: Minimum grade of "C-" in ACCT 303 & INFS 247; Sophomore standing; Enrollment is open to Graduate Business Students
Included among the topics covered in this course are the primary accounting cycles, accounting information system internal controls, and selective fraud issues. Students will also build flowcharting skills and gain experience working on an enterprise resource planning system (ERP) with real-world company data.
Outcomes:
Students develop an application and analysis level of learning regarding the function of an accounting information system in business with specific emphasis on risk management, along with the ability to work with and deploy ERP tools

ACCT 309 Data Analytics for Accounting (3 Credit Hours)
Pre-requisites: Grade of C- or better in ACCT 303
This course provides students with an understanding of data analytic thinking and terminology as well as hands-on experience with data analytics tools and techniques applied to accounting. Students should leave this course with the skills necessary to translate accounting and business problems into actionable proposals that they can competently present to managers and data scientists.
Outcomes:
Students will learn database theory and how to convert the conceptual models into a physical database implementation that will record, maintain, and report financial and nonfinancial information; Students will learn how to leverage Tableau's (or other data visualization software) visual analytics capabilities to explore, analyze, and present accounting and business data effectively; Students will learn how to assess business process and information risks and apply the general, system, and application controls necessary to prevent or detect fraud and inaccuracies

ACCT 311 Auditing & Internal Control Systems (3 Credit Hours)
Course involves an in-depth investigation of internal control structure and systems and the theory of audit evidence. Theoretical principles and practical issues involved in planning and executing an audit are explored. Internal control policies and procedures and principal evidence techniques for major transaction cycles or account groups are studied in depth. Study of appropriate AICPA professional standards is an integral part of this course.
Outcomes:
Students who successfully complete this course will be able to: understand the role of professional standards in the audit of financial statements; demonstrate their ability to research those standards; and demonstrate their understanding of the audit process in particular the roles of evidence and internal control

ACCT 317 Managerial Accounting (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ACCT 303
This course critically evaluates product cost for inventory valuation and income determination, with an emphasis on budgeting and control procedures. Topics discussed include job order costing, process costing, activity-based costing, full absorption and direct costing, overhead allocation, and more. The course incorporates computer applications to managerial accounting analysis.
Course equivalencies: ACCT 317/ACCT 301

ACCT 323 Advanced CPA Topics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ACCT 311
Topics include: audit and other reports, statistical sampling in auditing, attestation standards, reporting on future-oriented information, accountant's legal liability, Securities & Exchange Commission practice, professional ethics and using technology in auditing.
Outcomes:
Students will be familiar with issues under the AICPA Code of Professional Conduct, pronouncements of the Public Companies Accounting Oversight Board, the Sarbanes-Oxley Act, federal securities laws, and cases relating to CPA malpractice; Students will have a thorough professional knowledge of CPA reports on financial statements and special reports; Students will also learn how to apply statistical sampling in auditing

ACCT 326 Fraud Investigation (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ACCT 311
Theoretical principles and practical issues involved in planning and executing an investigation are explored including internal control structure and evidence.
Outcomes:
Understand fraud investigation and the role it plays in the legal process; Understand and be able to apply investigative techniques in solving financial crimes

ACCT 328 Concepts in Taxation (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ACCT 201 and 202
This course provides a thorough exposure to federal income tax concepts and planning principles, with particular reference to individual taxpayers.
Outcomes:
Students will be able to demonstrate a basic core of technical knowledge concerning the federal income tax as it applies to individuals, an understanding of the conceptual and tax policy issues that underlie tax legislation, and fundamental skills in tax compliance, tax planning, and tax research

ACCT 331 Introduction to the Business of Applied Artificial Intelligence (3 Credit Hours)
Pre-requisites: ISSCM 241 or STAT 103
This course provides a concise introduction to Artificial Intelligence (AI) with a focus on applied business applications of machine learning and generative AI. Through engaging lectures, interactive labs, and exposure to real-world use cases, students will gain a deep understanding of the key concepts and practical business applications of AI. Students will also gain a fundamental understanding of how AI models are built and deployed to enhance their skills and career advancement. The latest applications of AI in marketing, accounting, finance, and retail will also be explored.
Outcomes:
Students will develop an understanding of how AI is executed in business settings, from ideation to deployment, and the tools and frameworks applied; Students will gain an understanding of core AI concepts, including machine learning and generative AI; Students will discover how models are built and evaluated to analyze data for prediction and generative AI to deliver actionable insights; Students will gain insights into ethical AI practices to be able to recognize and address ethical and social considerations to deploy AI responsibly; Students will explore business use cases to understand AI solutions applied to business challenges across domains such as accounting, finance, and retail; This course will foster collaboration and communication skills development by having students present AI-driven solutions effectively, translating solutions into impactful business narratives

ACCT 341 Advanced Studies in Taxation (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ACCT 328
This course provides a thorough exposure to the federal income tax concepts and planning principles applicable to business entities, trusts, and estates and to federal transfer taxes.
Outcomes:
Students will be able to demonstrate a basic core of technical knowledge concerning the federal income tax as it applies to business entities and to the federal gift, estate, and generation-skipping-transfer taxes, an enhanced understanding of the conceptual and tax policy issues that underlie tax legislation, and enhanced skills in tax compliance, tax research, and tax planning

ACCT 350 Accounting Full Time Winter Internship (6 Credit Hours)
Department Chair permission is required for registration. Students enrolled in this course are participating in a full time internship experience with an accounting firm.
Outcomes:
Students will work 40+ hours for an accounting firm during the spring semester

ACCT 395 Independent Study in Accounting (1-3 Credit Hours)
Pre-requisites: Junior standing, Instructor and Dean permission required
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of accounting not otherwise covered by department course offerings. Variable credit is allowed for the course. This course will not count toward major requirements. Permission of dean required.
Outcomes:
Students will demonstrate an in-depth understanding of a technical accounting topic

ACCT 399 Special Topics in Accounting (1-3 Credit Hours)
Pre-requisites: Sophomore standing or above
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Business Ethics (ETHC)

ETHC 321 International Business Ethics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of C- in MGMT 201 and ECON 202
This course addresses the ethical challenges of international business for managerial decision making. The main emphasis of the course is on implementation, and standards, for operating ethically within multinational corporations and on ethical problems in specific countries or regions of the world.
Course equivalencies: ETHC 321 / ETHC 341/ ETHC 341H
Outcomes:
Students will develop ethical decision-making skills in global business by understanding complex interactions among market, policy, and society, analyzing personal decision-making, and improving communication abilities

ETHC 341 Ethics in Business (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of C- in (MGMT 201 or HSM 368) and ECON 202
This course focuses on ethical issues in the world of business and commerce. This course will address a number of interrelated questions: What are the rights and obligations of business in society? Can businesses "do good" and "do well"? Is business ethics a viable goal or an unachievable ideal?
Course equivalencies: ETHC 321 / ETHC 341/ ETHC 341H
Outcomes:
Critically discuss (via well-grounded arguments) philosophical issues and questions from the perspective of multiple methods, traditions, and historical contexts; Evaluate philosophical issues, questions, and problems critically and analytically; Formulate and evaluate their own understanding of a diverse range of philosophical problems, in both writing and discussion

ETHC 341H Ethics in Business - Honors (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of "C-" in (MGMT 201 or MGMT 201H) and (ECON 202 or ECON 202H); Restricted to students in the Quinlan School of Business Honors program
This course focuses on ethical issues in the world of business and commerce. This course will address a number of interrelated questions: What are the rights and obligations of business in society? Can businesses "do good" and "do well"? Is business ethics a viable goal or an unachievable ideal?
Course equivalencies: ETHC 321 / ETHC 341/ ETHC 341H
Outcomes:
Critically discuss (via well-grounded arguments) philosophical issues and questions from the perspective of multiple methods, traditions, and historical contexts; Evaluate philosophical issues, questions, and problems critically and analytically; Formulate and evaluate their own understanding of a diverse range of philosophical problems, in both writing and discussion

ETHC 399 Special Topics in Business Ethics (3 Credit Hours)
Pre-requisites: Junior standing
Special topics are scheduled classes offered on an ad hoc basis. Specific titles and content will vary.
Outcomes:
Varies with topic

Business Honors (BHNR)

BHNR 300 Business Honors Seminar-Required (0 Credit Hours)
Pre-requisites: Restricted to students in the Quinlan Business Honors program
This seminar is a pass/no-pass program requirement providing honors students with opportunities to learn from and network with leaders at major companies and organizations. Seminar is primarily a speaker series presenting honors students with opportunities to attend corporate and organizational site visits, social activities, and other events. Through seminar, honors students are able to network with each other and build community.
Outcomes:
Encourage bonding, stimulate thoughtful interaction, provide connections with the faculty, and connect to the broader business and alumni community

BHNR 343 Integrated Analytical Decision Making (3 Credit Hours)
Pre-requisites: Enrollment is restricted to Business Honors students; Junior Standing; C- or better in ISSCM 241 or ISSCM 241H or STAT 103
This course will focus on the analysis of data, with applications of techniques to business problems. Students will conduct original research and create both a written analysis and presentation. This course satisfies the Engaged Learning requirement.
This course satisfies the Engaged Learning requirement.
Outcomes:
At the end of this course, the student will know how to formulate a business problem, then collect and analyze data, and interpret results that address the problem

BHNR 353 Research Practicum (3 Credit Hours)
This course introduces students to the process of business research, including research ethics as well as implications of research outcomes in the broader business and social context. Good research helps business managers understand issues and make informed decisions.
This course satisfies the Engaged Learning requirement.

BHNR 357 International Perspectives on the Social Impact of Business (3 Credit Hours)
Pre-requisites: Junior standing; Students in good standing in Quinlan Business Honors program
Through pre-trip classes developing an understanding of international business and a week-long study abroad, students will observe how foreign businesses navigate the unique dynamics of the country in which they operate, contribute to the country's development, and deploy innovative technologies that help the society become more equitable and sustainable. In pursuit of these learning outcomes, students will engage with several foreign companies. Additionally, daily reflection discussions and activities will aid students in connecting their day-to-day experiences in the foreign country with their understanding of the specific local context of political and economic development and the global context of international business. Through cultural activities, students will also develop a fuller appreciation of the challenges and opportunities of business in a foreign country, with an eye towards promoting positive and sustainable social and environmental impact.
Interdisciplinary Option: International Business
Outcomes:
Developing an understanding of the challenges and opportunities for foreign companies investing in underdeveloped markets, including the strategies companies use to enter and succeed in the market; Fostering an appreciation for the role of business in promoting economic and social development; Becoming aware of how investments in technology can promote equality and environmental sustainability

BHNR 395 Independent Study in Business Honors (3 Credit Hours)
Pre-requisites: Sophomore standing, Department Consent Required
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member into a specialized area as determined between student and faculty member.
Outcomes:
Students will be able to demonstrate an in-depth understanding of a specialized area or topic of research

Economics (ECON)

ECON 201 Principles of Microeconomics (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to demand and supply, consumer choice, price analysis in alternative industrial organizations, and the distribution of income.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
Students will be able to think critically about price formation in different market structures, and how prices, household incomes and income distribution in a diverse society are determined with interpretations based on the concepts of opportunity costs and decision making under uncertainty

ECON 201H Principles of Microeconomics - Honors (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. Restricted to SBA honors students or Honors students. This course is an introduction to demand and supply, consumer choice, price analysis in alternative industrial organizations, and the distribution of income.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
Students will be able to think critically about price formation in different market structures, and how prices, household incomes and income distribution in a diverse society are determined with interpretations based on the concepts of opportunity costs and decision making under uncertainty

ECON 202 Principles of Macroeconomics (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to national product, its components, money and the real sectors and business fluctuations.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
The students will be able to think critically about the economic environment of the nation and to measure growth, unemployment, inflation, fiscal and monetary policies of the government, to ultimately understand economic stability and the welfare of the individual citizen

ECON 202H Principles of Macroeconomics - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Business Honors program
This course is an introduction to national product, its components, money and the real sectors and business fluctuations.
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
The students will be able to think critically about the economic environment of the nation and to measure growth, unemployment, inflation, and fiscal and monetary policies of the government to ultimately understand economic stability and the welfare of the individual citizen

ECON 303 Intermediate Microeconomics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of C- in (ECON 201 or ECON 201H) and (ECON 202 or ECON 202H) and one of the following: MATH 130 (Recommended), MATH 131, or MATH 161
This course is a detailed study of consumer and firm behavior, market structures, and the elementary propositions concerning welfare economics.
Outcomes:
Students will develop analytical skills to understand and predict consumer and firm behavior, understand the underlying pinning of antitrust legislation and dynamic market strategies

ECON 304 Intermediate Macroeconomics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of C- in (ECON 201 or ECON 201H) and (ECON 202 or ECON 202H) and one of the following: MATH 130 (Recommended), MATH 131, or MATH 161
This course develops the framework used by economists in government, business, and academia to analyze the key determinants of economic growth, the business cycle, unemployment, inflation, the level of interest, and exchange rates, as well as explaining how all these variables are influenced by monetary and fiscal policy.
Outcomes:
Students are able to understand and critically analyze business cycles and financial market fluctuations; Students are able to study inflation and unemployment policies

ECON 320 Urban Economics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ECON 201, ECON 202, and ECON 303
This course analyzes the economic role and functioning of cities and examines urban issues such as real estate markets, transportation, economic development, and crime.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will understand the economic forces that shape urban agglomerations; Students will understand the economic and ethical trade-offs of various urban economic policies; Students will be able to think critically about the economic forces that make a city grow and contract over time

ECON 323 International Economics (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
This course analyzes microeconomic and macroeconomic theories of global trade; balance of payments, adjustment problems and the international monetary system.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-ECON323/INTS323
Outcomes:
Students will be able to demonstrate the ability to critically apply microeconomic and macroeconomic concepts to the understanding of international economic phenomena/problems; This course emphasizes the role of economic leadership to promote peace and justice in a global diverse world

ECON 324 International Monetary Relations (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
Examination of the operation of the international monetary system and an analysis of the determination of currency flows between countries, with topics of balance of payments statements, currency flows between countries, determination of exchange rates, and international liquidity problems.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-ECON324/INTS324
Outcomes:
Student will be able to demonstrate an understanding of the operation of the international currency market and be able to analyze exchange rates with an emphasis on international liquidity and currency problems, and risk management of currency fluctuations

ECON 325 Economics of Growth & Development (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
This course describes and analyzes the problems and policy issues facing developing countries and the third world with respect to their economic and social policies and programs.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-ECON325/INTS325
Outcomes:
The students are trained to evaluate the economic conditions that are conducive to economic growth and critically assess ethical arguments as they relate to growth, trade, and poverty in emerging countries; The role of leadership is emphasized

ECON 327 American Economic & Business History (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
This course emphasizes the evolution and the role of past business leaders of the American economy from the colonial times to the present, emphasizing the entrepreneurs and the environments in which they operated. Economic and business change in the period 1865-1914 receives particular attention, as do the enterprises of Chicago-area entrepreneurs.
Outcomes:
Students learn the skills required of entrepreneurs and business leaders and their contribution to society; Students will develop an awareness of the historical dynamics that produced the current economy, and how its institutions evolved and the importance of markets in allocating resources

ECON 328 Environmental Economics (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201
This course applies economic theory to environmental and natural resource problems and policies, investigates the role economic incentives play, and discusses externalities, property rights, common property problems, pollution and pollution control, and renewable and non-renewable resource management.
Course equivalencies: X-ECON328/ESP 328
Outcomes:
Students will understand that environmental problems are fundamentally economic problems that come about because there is a market failure (eg, an externality or public good) and that environmental problems have economic solutions

ECON 329 Health Economics (3 Credit Hours)
Pre-requisites: Sophomore standing and a minimum grade of "C-" in ECON 201
This course provides an understanding of the unique economic complexities of the health care industry and individual health behaviors. Relying on economic principles of scarcity, efficiency, productivity, and market behavior, demand and supply of health care, the role of government in determining health care policy, and medical practices are explored.

ECON 334 Economics of Government Expenditures & Taxation (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 303 and 304
This course is an analysis of taxation and expenditure, instruments and policies as they relate to the allocative, distributive, and stabilization functions of government and society and ethical responsibilities of each.
Outcomes:
The student are able to understand and analyze public policy issues, specifically as it relates to the voting process, size of government, tax policy debates, and long-term problems of transfer payments in an aging society

ECON 336 Monetary and Fiscal Policy (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201, 202 and 304
This course uses macroeconomics to critically analyze the evolution of monetary and fiscal policy from the late 19th century to the present as well as current trends and topics relating to monetary and fiscal policy.
Outcomes:
Students will develop critical economic thinking skills as they apply macroeconomic theory to historical events and discuss the potential future paths of the world economy and for assessing the leadership role of the government and Federal Reserve System in stabilizing the domestic and world economy

ECON 346 Econometrics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ISSCM 241 or ISSCM 241H or STAT 103; ECON 202; ECON 303; and MATH 130 or MATH 131 or MATH 161
This course teaches students how to use statistical tools to evaluate hypotheses about economic models.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to interpret and critically analyze quantitative information related to economics; Students will understand regression analysis and understand how to use it to test economic models and to measure important economic parameters, and to predict economic relationships

ECON 360 Labor Economics (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 303
This course is an intensive examination of the market for labor services, and discusses wage determination, occupational and earnings differentials, diversity, investments in education, collective bargaining, and the ethical implications of labor market inequality.
Outcomes:
Students will gain a broad understanding of how economists study labor market issues and outcomes, and be able to use critical economic reasoning to better appreciate such issues as labor force participation decisions, human capital, and the variation in wages across individuals

ECON 370 Pricing & Industrial Organization (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 303
This course investigates firm behavior, strategies and market outcomes in settings of less than perfect competition.
Outcomes:
Students learn to evaluate various strategies both in terms of firm profitability as well as consumer surplus

ECON 395 Independent Study in Economics (1-3 Credit Hours)
Pre-requisites: Sophomore standing, instructor and dean permission required
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Economics not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in Economics

ECON 399 Special Topics in Economics (1-3 Credit Hours)
Pre-requisites: Sophomore standing
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Entrepreneurship (ENTR)

ENTR 201 Essentials of Entrepreneurship (3 Credit Hours)
Introduces students to the process of entrepreneurship and how to think like an entrepreneur. Students will learn how new entrepreneurial opportunities are conceived, vetted, and acted upon. Course knowledge and skills are presented through a combination of theory and application that will prepare students to move to next level of entrepreneurial studies.
Course equivalencies: MGMT381/ENTR310/ENTR201
Outcomes:
Students will gain insight into the process of entrepreneurship and entrepreneurial mindset; Students will learn to identify problems in the marketplace and discover how to turn these ideas into viable products and services

ENTR 311 Social Entrepreneurship (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ENTR 201 or ETHC 341
Explore how innovative solutions can address social issues and create sustainable impact. Learn to design, implement, and scale ventures that combine business principles with social change. Engage with case studies, develop entrepreneurial skills, and build a framework for launching ventures that contribute to societal well being.
This course satisfies the Engaged Learning requirement.
Outcomes:
An understanding of what is social entrepreneurship and how it differs from traditional entrepreneurship and non-profit organizations; An understanding of how to build and manage a successful social venture

ENTR 313 Entrepreneurship - Global Opportunity Scan (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ENTR 201 or IBUS 201
With the power of the Internet, entrepreneurs can quickly research, find, and reach new markets. However, successfully and profitably engaging in a global marketplace requires understanding conflicting and changing business dynamics, barriers to entry into the international arena, and challenging management practices.
Interdisciplinary Option: Global Studies
Outcomes:
An understanding of the characteristics of international markets, including the critical challenges of global expansion and the barriers that exist; Ability to apply the appropriate frameworks to scan for international business opportunities

ENTR 345 Entrepreneurial Marketing (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ENTR 201 or MARK 201
This course will explore the whole marketing concept, starting with understanding the customer and how the customer changes over the product lifecycle. The course will then explore common marketing channels and sales methods entrepreneurs use and debate their effectiveness at each stage of business.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate an understanding of marketing of entrepreneurial ventures, the various channels and tactics entrepreneurs use to attract customers and changes over time, and product lifecycle management and customer engagement

ENTR 390 Entrepreneurship Strategies - Capstone (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in ENTR 201 or ENTR 310
Students will understand how to build a product/service that is attractive to customers yet differentiates it from its competitors. The students will learn how to grow the venture using sales and marketing channels, strong team building, and the financial implications of their decisions.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate understanding of the importance of core business operational areas, how to launch and grow a new venture, and problem¿solving and critical thinking skills through case analysis, experiential activities, and team¿based project work

ENTR 391 New Venture Lab (3 Credit Hours)
Pre-requisites: Sophomore standing, grade of C- or higher in ENTR 201
This course is for students who want to turn a business idea into a viable new venture or grow an existing one. It is intensive, fast-paced, and hands-on, and students will learn to adapt to the uncertainty and ambiguity of entrepreneurship.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn how to systematically approach your startup/idea to maximize learning and minimize waste; Students will test the core assumptions they have about their business idea and conclude whether the assumptions are valid or not; Students will build a product/service based on what they learn from actual customers rather than what students think is best for the customers; Students will learn from peers' experiences in class and the local startup community

ENTR 395 Independent Study (1-3 Credit Hours)
Pre-requisites: Junior standing; Instructor and Dean permission
Independent Study is an in¿depth research or reading project initiated by the student and jointly developed with a faculty member into a specialized area of entrepreneurship not otherwise covered by the department course offerings.
Outcomes:
Varies with topic

ENTR 399 Selected Topics in Entrepreneurship (3 Credit Hours)
Pre-requisites: Junior standing
Special Topics are scheduled classes offered on an ad hoc basis. Specific titles and content will vary.
Outcomes:
Varies with topic

Executive Education (EXED)

EXED 101 High-Impact Leadership: Maximizing Your Leadership Potential (0 Credit Hours)
High-Impact Leadership: Maximizing Your Leadership Potential combines the best practices and principles behind the art and science of leadership, decision-making, problem solving and organizational effectiveness.
Outcomes:

EXED 170 McShane Companies Leadership Emphasis (0 Credit Hours)
Formal leadership training provided as a component of the McShane Future Leaders Program.
Outcomes:
Improved leadership and strategy acumen

EXED 173 American College of Surgeons - Leadership (0 Credit Hours)
Customized leadership training for the executive leadership team at American College of Surgeons, includes Leadership Legacy and Decision-Making.
Outcomes:
Provide senior leaders with ongoing leadership skill development

EXED 174 The Cradle (0 Credit Hours)
Participants will learn Leadership Development and Change Management Essentials.
Outcomes:
To have more leadership team at The Cradle

EXED 175 Yaskawa America Inc. (0 Credit Hours)
Participants will learn Negotiation Skills for their Supply Chain team.
Outcomes:
To have more knowledge on negotiations skills for their sales team

EXED 176 MorrisAnderson (0 Credit Hours)
Participants will learn Leadership skills in a 3 hour workshop.
Outcomes:
To assist their team with new managers getting up to speed on their leadership soft skill

EXED 177 Family Business Center Learning Institutes (0 Credit Hours)
Three institutes from FBC are moving their education to EE. This includes Family Business Stewardship Institute, Next Generation Leadership Institute and Governance Institute.
Outcomes:
To assist family business staff with challenges they face within their family organization

EXED 178 Cook County State's Attorney's Office Leadership (0 Credit Hours)
Participants will learn leadership skills during their 3-hour seminar.
Outcomes:
to have more knowledge on managing their teams with the CCSAO

EXED 179 C.H. Robinson Professional Development Programs (0 Credit Hours)
Participants will learn negotiations and sales training.
Outcomes:
To have more knowledge for their team on sale tactics

EXED 180 World's Finest Chocolate Anti Harasssment Training (0 Credit Hours)
The entire staff of WFC will participate in a Loyola created and moderated Anti-Harassment Training.
Outcomes:
To have more knowledge to speak up against harassment in the workplace

EXED 181 Campus Brasil MBA International Program (0 Credit Hours)
Campus Brasil is partnering with a University in Brazil to send 40 MBA students to Loyola this summer.
Outcomes:
To have more knowledge on business global affairs in America vs Brazil

EXED 182 Centene Corporation (0 Credit Hours)
Participants will learn Strategy skills for the management team.
Outcomes:
To have more knowledge on negotiations skills for their sales team

EXED 183 Litera Microsystems (0 Credit Hours)
Participants will learn leadership development skills during an off-site three-day program for their team.
Outcomes:
To have more knowledge of leadership skills for their sales team

EXED 184 Medline Industries (0 Credit Hours)
Participants will learn negotiation skills during an off-site two-day program for their engineering team.
Outcomes:
To have more knowledge of negotiation skills for their team

EXED 185 Anthony Marano Company (0 Credit Hours)
Participants will learn leadership development skills during a two month program for their Executive Team and Sales Team.
Outcomes:
To have more knowledge of leadership and negotiation skills for their team

EXED 186 Box Studio (0 Credit Hours)
Participants will learn project management skills during a two day program for executive team of their small business.
Outcomes:
To have a company wide understanding for a project management model

EXED 187 Triple S (0 Credit Hours)
Participants will learn business soft skills for their family owned businesses who are identified as "emerging leaders" via an association called Triple S.
Outcomes:
To have a good business background when finishing the program

EXED 188 Real Estate Investment Strategy (0 Credit Hours)
Participants will learn from industry experts on how to invest smartly in real estate.
Outcomes:
To have more knowledge of the real estate industry and the Chicago market

EXED 189 Edelman Procurement 101 Program (0 Credit Hours)
Participants will learn best practices in procurement.
Outcomes:
To have more knowledge of the real estate industry and the Chicago market

EXED 190 FBC Peer Advisory Group (0 Credit Hours)
FBC Peer Advisory Group for Family Business Center Members.
Outcomes:
Resolution of family business issues thru discussion

EXED 191 Fundraising for Good (0 Credit Hours)
Baumhart Center Fundraising Sessions.
Outcomes:
Social Impact Fundraising Seminar

EXED 192 Ciena 1 - Day Negotiations Conference Program (0 Credit Hours)
Participants will learn negotiations strategies and skills.
Outcomes:
To have more knowledge on negotiation skills for their sales team

EXED 193 Cook County Sheriff's Office - Executive Leadership Management Program (0 Credit Hours)
Participants will learn management / leadership strategies and skills.
Outcomes:
To have more knowledge on negotiation skills for their sales team

EXED 194 Next Generation Leadership Institute (0 Credit Hours)
Next generation leadership class for family businesses.

Pre-requisites: Junior standing; Minimum grade of "C-" in FINC 335
This is an advanced course in corporate finance where students are given a thorough grounding in firm valuation and exposed to various financial decisions including raising capital, mergers and acquisitions, leveraged buyouts, spin-offs, and carve-outs, all in the context of their impact on firm value.
Outcomes:
Students will be able to demonstrate an understanding of firm valuation, as well as the impact of various corporate decisions on firm value

FINC 345 Portfolio Management (3 Credit Hours)
Pre-requisites: Junior standing; Minimum grade of "C-" in FINC 335
Topics include a critical appraisal of the efficient market hypothesis, asset allocation using the Markowitz mean-variance framework, fundamental and technical analysis, and mutual fund performance evaluation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will understand how stocks and other assets are selected; how economic and company information is monitored and used to adjust portfolio holdings; and how portfolios can be optimized to achieve targeted risk/return characteristics

FINC 346 Introduction to Options (3 Credit Hours)
Pre-requisites: Junior standing; Minimum grade of "C-" in FINC 335
This class offers a comprehensive introduction to options, including a detailed examination of option markets, option properties, trading strategies using options, binomial tree and Black-Scholes valuation models, and hedging strategies using options.
Outcomes:
Students will be able to demonstrate an understanding of option markets, option pricing models and how options can be used to hedge risks

FINC 347 Financial Institutions (3 Credit Hours)
Pre-requisites: Junior Standing, Minimum grade of "C-" in FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H
A study of the crucial role played by financial institutions. The course will be a blend of theory and analysis of the present institutional structure.
Outcomes:
Students will demonstrate an understanding of the following: the important role of financial intermediaries, interest rate risks, credit risks, market risk, and also risk management through capital adequacy and hedging risk with financial derivatives

FINC 349 Real Estate Finance & Investments (3 Credit Hours)
Pre-requisites: Junior standing, Minimum C- in FINC 334
Basic principles of real estate finance as well as practical applications. Learn topics, theories and current developments in real estate. Solve quantitative problems.
Outcomes:
General & working knowledge of real estate jargon and legal documents; Calculate mathematical solutions to problems in real estate; Understand time value of money related to real estate; Valuation of residential and commercial properties

FINC 355 International Finance Management (3 Credit Hours)
Pre-requisites: Junior Standing, Minimum grade of "C-" in FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H
This course examines the international dimensions of financial management. It introduces additional economic and financial opportunities/challenges faced by multinational corporations.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-FINC355/INTS369
Outcomes:
Students will be able to demonstrate understanding of foreign exchange markets, fundamental international parity relationships, reasons for international diversification, steps in foreign exchange risk management, and capital budgeting for multinational corporation

FINC 356 Advanced Topics in Investment Banking and Asset Management (3 Credit Hours)
Pre-requisites: B- or higher in FINC 335
This course examines selected topics in investment banking and asset management, including stock and bond offerings, private equity, buyouts, mergers and acquisitions. Students in the course research publicly traded companies, write equity research reports and pitch investment ideas; they also mentor junior analysts in the Rambler Investment Fund (RIF).
This course satisfies the Engaged Learning requirement.
Outcomes:
Conduct research; Write an equity investment report and pitch a trade idea; Value companies; Analyze investment banking transactions

FINC 357 Cases in Corporate Finance (3 Credit Hours)
Pre-requisites: Senior standing; Minimum grade of "C-" in FINC 335
This cases based course is designed to explore the practical application of the major corporate finance topics.
Outcomes:
Students will be able to understand how corporations use the conceptual aspects of corporate finance in real life settings; They will also learn to use the necessary tools in evaluating various corporate investment and financing decisions; They will apply these tools in solving the cases involving investment (such as building a new plant, or acquiring another firm) and financing (such as capital structure policy, and cost of capital) decisions

FINC 358 Financial Analytics (3 Credit Hours)
Pre-requisites: Junior Standing and minimum "C-" in FINC 335
This course focuses on how to use Python to build financial models. The course will examine financial securities, portfolio optimization, and valuation problems.
Outcomes:
Building financial models with Python; Translating raw data into meaningful variables for statistical analysis; Estimating statistical models to drive investment decisions; Valuation of securities; Portfolio optimization and implementing trading strategies

FINC 359 Introduction to Fintech (3 Credit Hours)
Pre-requisites: Junior Standing
Minimum grade of "C-" in FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H. The primary objective of this course is to equip students with economic insights to explore the current developments and future opportunities for disruptive technologies in the financial institutions and financial service sector. The course will take a financial economic and analytic perspective to augment financial talents and entrepreneurship with the necessary tools to understand the interaction of finance, technology, and regulations. It will cover detailed topics of decentralized finance (DeFi) infrastructure including blockchain technologies, cryptocurrencies, and non-fungible tokens (NFTs). Further, it will explore how the DeFi infrastructure together with artificial intelligence (AI) are reshaping the current ecosystem of payments, capital raising, credit and lending, investment, and risk management.
Outcomes:
Students will understand the key concepts of the disruptive technologies in Fintech: blockchain technology, Non-fungible tokens, and Defi infrastructure; Students will comprehend the impacts on financial services through application of disruptive technology; Students will develop the ability to outline the near and long-term possibilities for Decentralized Finance (Defi) and Fintech industry; Students will understand the pricing methodologies for crypto assets and investments; Students will understand the applications of Artificial Intelligence (AI) and Machine Learning in investment and risk management

FINC 365 Advanced International Financial Management (3 Credit Hours)
Pre-requisites: A minimum grade of "C-" in FINC 335 and FINC 355
This course covers advanced topics in international financial management. The course builds on materials discussed in International Financial Management (FINC 355). Specifically, this course exposes the students to: foreign exchange risk management, currency swaps, foreign exchange rate forecasting, efficiency of foreign exchange markets, international capital structure and cost of capital, global investment, multinational capital budgeting, multinational cash management, cross-border acquisitions, and international trade finance.
Outcomes:
Understand the global financial markets, perform multinational capital budgeting, and understand global portfolio management

FINC 395 Independent Study in Finance (1-3 Credit Hours)
Pre-requisites: Junior standing; instructor and dean permission required
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Finance not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in finance

FINC 396 Speaker Series: Risk Management and Insurance (0 Credit Hours)
Professional speaker series for all students majoring in Finance.
Outcomes:
Students will benefit from hearing professionals in the finance industry discuss current events, opportunities and challenges within the industry

FINC 399 Special Topics in Finance (1-3 Credit Hours)
Pre-requisites: Junior standing
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate an understanding of specialized topics not otherwise covered by department regular course offerings

Human Resources & Employment Relations (HRER)

HRER 201 Principles of HR Management (3 Credit Hours)
This course provides an overview of the various functional areas within the field of human resource management for those who will be working in general management positions as well as in the human resources function. Topics will follow a logical sequence beginning with pre-employment planning and continuing through organizational exit. Specifically, topics will include forecasting human resource needs, employee recruitment and selection, training, performance evaluation, wage and salary administration, collective bargaining, legal constraints on personnel practices and organizational exit.
Course equivalencies: HRER 301/HRER 375
Outcomes:
Students will examine the importance of contemporary Human Resources Management; Students will be able to select compensation strategies to support organizational goals

HRER 311 Employment Relations (3 Credit Hours)
Pre-requisites: Junior Standing
This course provides an introduction to employee relations, and how companies, labor unions, human resources professionals and the law shape the contemporary relationship between employees and their employers in the United States.
Course equivalencies: MGMT311/HRER311
Outcomes:
Students will demonstrate how management representatives, unions, and government dynamically interact to provide employees voice, balance group interests and power, and resolve workplace conflict

HRER 313 Compensation Management (3 Credit Hours)
Pre-requisites: Junior standing; C- or better in ISSCM 241 or ISSCM 241H or STAT 103; and C- or better in HRER 301
This course examines reward policies, programs and practices over such matters as base-pay, employee benefits and incentive in private and public organizations.
Course equivalencies: MGMT313/HRER313
Outcomes:
Students will learn how to design and implement reward programs that will give their employers a competitive advantage; to resolve compensation problems from both a human resource professional and managerial perspective; and to negotiate fair pay packages with their employers; Students will improve their team leadership, analytical and writing skills

HRER 317 Human Resource Staffing (3 Credit Hours)
Pre-requisites: Junior Standing, "C-" or better in HRER 301
This course covers topics related to organizational staffing, including job analysis, forecasting, use of biographical information, interviewing, statistical analysis, performance evaluation and legal issues related to selection.
Course equivalencies: MGMT317/HRER317
Outcomes:
Students will acquire the knowledge and skills necessary for the development, implementation and evaluation of a staffing system

HRER 322 Human Resource Development (3 Credit Hours)
Pre-requisites: Junior Standing, "C-" or better in HRER 301
This course examines how organizations develop employees with the technical, interpersonal and leadership skills to be effective in their jobs. The course will incorporate training, development, and performance management topics.
Outcomes:
Students will learn how to conduct a training needs assessment, set learning objectives, establish evaluation criteria, select the best instructional methods, conduct a training program and evaluate the impact of the program on the learner and organization; Students will also improve their presentation, team leadership, analytical and writing skills

HRER 325 Global Employment Relations (3 Credit Hours)
Pre-requisites: Junior Standing, C- or better in HRER 301
This course has two basic objectives: to familiarize students with different employment relations systems in advanced industrial economies in North America, Europe, and Asia; and to introduce students to labor problems associated with a global economy (e.g., sweatshops, child labor, slavery and other coercive labor systems) and to proposed approaches to redressing these problems (e.g., transnational institutions like the ILO, trade agreements, voluntary codes of conduct, labor unions).
Interdisciplinary Option: International Business

HRER 329 Global HR and Organizational Behavior (3 Credit Hours)
Pre-requisites: Junior standing, C- or better in HRER 201, HRER 301, or MGMT 201
This course provides an understanding of the critical roles of Human Resource professionals throughout the strategic globalization process. The course will also teach one to become aware of cross-cultural issues that affect organizational dynamics and behaviors central to management processes, such as staffing, motivation, negotiation, communication, and leadership.
Interdisciplinary Option: Global Studies, International Business
Outcomes:
Survey the three types of topics covered by the field of Global HRM: 1) Management of human resources in global corporations, 2) Management of expatriate employees, and 3) Comparison of HRM practices in a variety of different countries

HRER 364 Negotiation and Conflict Management (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of "C-" in MGMT 201
Negotiation and conflict management are pervasive in the workplace and in business, occurring between co-workers, managers, vendors, and parties whenever interests diverge. This class focuses on generating self-insight through the experience of engaging in negotiation simulations in each class, and by applying theory of negotiations to class exercises and personal experience.
Outcomes:
Students will learn fundamental principles and theories of negotiations and conflict management; Students will apply course materials to improve problem solving and decision-making; Students will develop specific skills and competencies needed by professionals in the field of management

HRER 395 Independent Study in Human Resources and Employment Relations (1-3 Credit Hours)
Pre-requisites: Junior Standing, C- or better in HRER 301, department consent required
No course description is available

HRER 399 Special Topics in Human Resources and Employment Relations (1-3 Credit Hours)
Pre-requisites: Junior Standing , C- or better in HRER 301
No course description is available

International Business (IBUS)

IBUS 201 Introduction to International Business (3 Credit Hours)
This course will introduce students to the theory and practice of international business with a focus on international environments and activities of multinational enterprises (MNEs). Topics to be included: cultural, social, legal, trade, and financial characteristics in the world markets. The course will also discuss diverse functional areas of MNEs across national borders such as international: production, logistics, finance, human resource management, and marketing.
Interdisciplinary Option: Global Studies
Course equivalencies: IBUS 201/BSAD 202/BHNR 338
Outcomes:
Develop students' theoretical and practical insights for understanding the real world of international business in terms of both external environmental forces and internal strategic management issues surrounding multinational enterprises (MNEs) in the world markets

IBUS 201H Business Management: A Global and Social Perspective (3 Credit Hours)
Pre-requisites: Open to students in the Quinlan business honors program only
This course provides Honors students with opportunities to learn about managing international businesses in a sustainable global environment. The course contents cover the differences in economic, social, and political environments of countries around the world. The course features corporate and academic speakers and discussions of various aspects of international business.
Course equivalencies: IBUS 201/BSAD 202/BHNR 338
Outcomes:
An understanding of global economics, management, and sustainable business of nations and regions in our global economy and social and financial structures under which global businesses are conducted

IBUS 315 International Management (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201
This course deals with analyzing, formulating, and implementing firm strategies that involve an international component and, accordingly, focuses on the cultural differences, political/economic influences, global market factors, and other contingencies specific to the international marketplace and different host countries/regions that are served by multinational enterprises (MNEs).
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-MGMT315/INTS315
Outcomes:
Students will practice skills for formulating and implementing an international strategy using case discussions and group projects that simulate the decision-making process for international market selection and entry by MNEs

IBUS 370 Inernational Business Internship - Engaged Learning (3-6 Credit Hours)
Pre-requisites: Sophomore standing, Permission of Instructor
IBUS 370 is a seminar course that challenges students to analyze the theory and practices from the world of work that impact the ethics of leading, interpersonal and organizational dynamics, and competent work place contributions required for success in the modern business world. Concepts associated with internship/engaged learning as related to career development will be addressed. Students are required to work a minimum of 120 hours over the course of one semester. All internships must be supervised by professionals and may be paid or unpaid.
This course satisfies the Engaged Learning requirement.
Outcomes:
a) Developing a foundation on which a student may build a career; b) Understanding the role of the Jesuit tradition as it relates to leadership and service

IBUS 399 Special Topics in International Business (3 Credit Hours)
Special Topics are classes offered on an ad hoc basis. Specific titles, prerequisites and content will vary.

Information Systems (INFS)

INFS 247 Business Information Systems (3 Credit Hours)
Focuses on using information technology to support business processes. The purpose and composition of information systems, the utilization of technology and hands-on experience in developing microcomputer business applications with productivity tools (Microsoft Excel and Access).
Course equivalencies: INFS247/ISOM/MGSC247/ACINF247
Outcomes:
Understanding of using information technology to support business processes, and of developing business spreadsheet and database applications

INFS 247H Business Information Systems - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Business Honors program
Focuses on using information technology to support business processes. The purpose and composition of information systems, the utilization of technology, and hands-on experience in developing microcomputer business applications with productivity tools (Microsoft Excel and Access).
Course equivalencies: INFS247/ISOM/MGSC247/ACINF247
Outcomes:
Understanding of using information technology to support business processes and of developing business spreadsheet and database applications

INFS 336 Global Perspectives on Digital Business (3 Credit Hours)
Pre-requisites: Minimum grade of "C-" in INFS 247
This course will present topics related to managing information systems projects and digital business from a global perspective. Project management issues such as analyzing stakeholders, defining expectations, defining project deliverables, analyzing scope, collecting requirements, developing schedules, and mitigating risk, will be covered. Also, variety of digital business issues, such as digital business models, disruptive forces, and digital strategies will be covered from a global perspective.
Outcomes:
Understanding of concepts and steps related management of digital business project in a global environment; Understanding of general and global digital business concepts and issues

INFS 343 Business Analytics (3 Credit Hours)
Pre-requisites: Sophomore standing; C- or better in (ISSCM 241 or ISSCM 241H or STAT 103), (INFS 247 or INFS 247H), and one of the following: MATH 110, MATH 118, MATH 130, MATH 131, or MATH 161
This course covers basic principles in data modelling, and turning big data into intelligent actionable insights. Through the use of real business case studies and lab sessions students will develop a comprehensive, innovative and practical approach to data analytics that enables them to solve diverse and complex business problems.
Course equivalencies: BSAD343/BSAD343H
Outcomes:
Explain core design concepts, appraise various technological solutions, determine proper analytics methods, integrate data visualization, and make a compelling presentation of a novel use case depicting current market trends

INFS 343H Business Analytics - Honors (3 Credit Hours)
Pre-requisites: Open to students in the Quinlan Honors Program; Requires C- or better in ISSCM 241H or ISSCM 241 or STAT 103, INFS 247 or INFS 247H, and one of the following: MATH 110, MATH 118, MATH 130, MATH 131, or MATH 161
This course covers basic principles in data modeling, and turning big data into intelligent actionable insights. Through the use of real business case studies and lab sessions students will develop a comprehensive, innovative and practical approach to data analytics that enables them to solve diverse and complex business problems.
Course equivalencies: BSAD343/BSAD343H
Outcomes:
Explain core design concepts, appraise various technological solutions, determine proper analytics methods, integrate data visualization, and make a compelling presentation of a novel use case depicting current market trends

INFS 346 Database & Data Warehousing Systems (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in INFS/ISSCM 247
Covers current concepts in database theory and use. The course teaches design, implementation, and utilization of relational database management systems by covering the processes, tools, and methodologies such as business requirement collection, ER modeling, relational modeling, normalization, SQL, and MS Access.
Course equivalencies: ISOM346 / MGSC346
Outcomes:
Students will be able to demonstrate understanding of how to effectively develop and use business database system

INFS 347 Systems Analysis & Design (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in INFS 247
This course studies methods for analyzing, developing and implementing business information systems. Stages of the systems development life cycle are explored in depth. Tools and techniques for structured and object-oriented analysis and design are discussed.
Outcomes:
Understanding of the development and implementation of business information systems

INFS 348 Advanced Data Analytics and AI (3 Credit Hours)
Pre-requisites: Minimum grade of C- in INFS 346 and INFS 343
This course focuses on extracting insights from complex datasets and progresses from data mining and R principles to data transformation and data mining techniques. Using deep learning and large language models, it addresses challenges in AI analytics, emphasizing ensemble learning techniques, model evaluation, and the handling of big data.
Course equivalencies: ISOM348 / MGSC348
Outcomes:
To be able to effectively use technologies such as Hadoop (Map Reduce) & R for solving data-dependent business problems of varying levels of complexity

INFS 360 Data Visualization & Business Intelligence (3 Credit Hours)
Pre-requisites: Minimum grade of "C-" in INFS 346
The amount of data that our world generates is growing at a torrid pace. Sifting through & making sense of these humongous mountains of data is crucial to ensuring business growth, success and to making scientific discoveries & advancements. Data visualization plays an important role in this process.
Outcomes:
Students will be able to process & visualize large amounts of data in order to enable efficient & effective analysis using industry standard software

INFS 362 User Experience (UX) and Biometrics (3 Credit Hours)
This experiential and research-focused course explores the newest developments in the field of user experience (UX) & biometrics (e.g., collecting and analyzing human behavior data through eye tracking, galvanic skin response, facial expression, voice, and brain activity) and introduces various methods used in cutting-edge research laboratories to study human insight in business contexts. Theoretical UX concepts and practical skills in biometric data collection and analysis will be explored using the latest academic research and hands-on work with biometric hardware, software, and data. Students will complete and present the original human subject research project (team-based and with IRB approval) using biometric trackers and biosensors. The research project will be documented in the format of a full academic article.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to communicate the value of User Experience in design; Describe the value of human insights through biometric data; Critically evaluate biometric data-focused research studies; Design and implement a biometric data-focused research study; Analyze and interpret human insights through fundamental biometric data such as gaze, facial expressions, and galvanic skin response; Develop proficiency in working with leading biometric trackers/biosensors and software platform; Write a complete empirical academic article using biometric data

INFS 394 Programming in Python (3 Credit Hours)
Pre-requisites: Junior standing and a minimum grade of C- in INFS 346
This course focuses on how to effectively use the Python computer programming language to support decision making in business. We will particularly focus on using Python for manipulating and analyzing data. In addition to covering the concepts of programming, this course covers working with external data, debugging code and developing user interfaces.
Outcomes:
To learn how to develop computer programs in the Python programming language; To understand the process of debugging code to resolve errors; To read data from external files including from an external database using embedded SQL within Python code

INFS 395 Independent Study in Information Systems (1-3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member in a specialized area of Information Systems not otherwise covered by departmental course offerings. Variable Credit. May count for Information Systems major or minor. Permission of Assistant Dean required.

INFS 397 VBA Programming with MS Office (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in INFS 346
This course focuses on how to effectively use Microsoft Office's built-in programming language, Visual Basic for Applications (VBA), to build models, primarily in Excel. We will cover issues that facilitate the construction of robust and readily understandable models in the VBA language. Starting with basic modeling functions, the course will progress through complex modeling skills. This course assumes that you are familiar with Basic Excel operations.
Outcomes:
By the end of this course, the student should be able to: build models using Excel built-in functions, build, customize and store Excel macros, design and build accurate, robust models with VBA, build custom VBA procedures, and create user-defined financial functions in VBA

INFS 399 Special Topics in Information Systems (1-3 Credit Hours)
Special topics are scheduled classes offered on an ad hoc basis. Specific titles, prerequisites and content will vary.

Information Systems and Supply Chain Management (ISSCM)

ISSCM 241 Business Statistics (3 Credit Hours)
This course examines the steps and procedures required to solve problems in science, social science, and business where data are useful - from the definition of the managerial problems to the use of statistical analysis to address these problems.
Knowledge Area: Quantitative Knowledge
Course equivalencies: ISSCM/H/241/STAT103/ACST101/03
Outcomes:
Students will be able to demonstrate understanding of statistical thinking and data analysis technique for decision-making purposes

ISSCM 241H Business Statistics - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Business Honors program
This course examines the steps and procedures required to solve problems in science, social science, and business where data are useful - from the definition of the managerial problems to the use of statistical analysis - to address these problems.
Course equivalencies: ISSCM/H/241/STAT103/ACST101/03
Outcomes:
Students will be able to demonstrate understanding of statistical thinking and data analysis technique for decision-making purposes

ISSCM 349 Project Management (3 Credit Hours)
Pre-requisites: Junior Standing; Grade of C- or higher in ACCT 201 & MGMT 201
The art and science of project management as applied to business, industrial, and public projects. Covers: the project life cycle; project teambuilding; techniques for planning, scheduling and controlling projects; project organizations; project leadership and stakeholders.
Course equivalencies: ISOM 349/ISOM 357/MGSC 349
Outcomes:
Understanding of the broader role of the project manager with regard to all project stakeholders, and of methods and steps for initiating, defining, and executing projects

ISSCM 393 Requirements Analysis and Communication (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" or better in ISSCM 247
This course focuses on Information Systems requirements and related communication skills. Students will learn how to gather requirements for Information Systems from an organization's users and executives based on a general understanding of organizations and business goals. Students learn techniques of how to translate between organizational needs and requirements for systems and processes, and how to analyze, validate, and prioritize those requirements. A special focus of the course will be to improve business communication skills such as interviewing, listening, presenting and negotiating.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ISOM393 / MGSC393

ISSCM 395 Independent Study in ISSCM (1-3 Credit Hours)
Pre-requisites: Junior Standing, Instructor and Dean permission
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of information Systems and Operations Management not otherwise covered by department course offerings. Variable credit. This course is for students who major in either Information Systems or Operations Management. Will count toward major requirements. Permission of Assistant Dean required.

ISSCM 399 Special Topics in ISSCM (1-3 Credit Hours)
Pre-requisites: Junior Standing
Special Topics are scheduled classes offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Course equivalencies: ISOM399 / MGSC399

Legal Environment of Business (LREB)

LREB 315 Law and the Regulatory Environment of Business I (3 Credit Hours)
Pre-requisites: Junior standing
This course is designed to familiarize the student with the American legal system. Intended primarily for students who have not previously studied law, the course includes a review of the concept of law, the function of the courts, and the dual judicial system of the United States. An appreciation of legal history and the operation of law are developed through the vehicle of a detailed analysis of contract law and a survey of other topical headings.
Course equivalencies: LREB315/315H
Outcomes:
The students should achieve an awareness of the necessity of voluntary compliance with general legal concepts in order for society to enable all persons to live together in harmony; An understanding of the court system as a substitute for self-help is deemed essential and knowledge of binding contract law is fostered as a basis for all agreements

LREB 315H Law and the Regulatory Environment of Business I - Honors (3 Credit Hours)
Pre-requisites: Junior standing; restricted to SBA honors students
This course is designed to familiarize the student with the American legal system. Intended primarily for students who have not previously studied law, the course includes a review of the concept of law, the function of the courts, and the dual judicial system of the United States. An appreciation of legal history and the operation of law are developed through the vehicle of a detailed analysis of contract law and a survey of other topical headings.
Course equivalencies: LREB315/315H
Outcomes:
The students should achieve an awareness of the necessity of voluntary compliance with general legal concepts in order for society to enable all persons to live together in harmony; An understanding of the court system as a substitute for self-help is deemed essential and knowledge of binding contract law is fostered as a basis for all agreements

Marketing (MARK)

MARK 201 Principles of Marketing (3 Credit Hours)
Pre-requisites: Sophomore standing or first-year students with a declared Marketing BBA
This course develops an understanding of the marketing systems by which organizations plan, price, promote, and distribute products and services to selected target markets.
Course equivalencies: MARK201/201H/301/CPST340
Outcomes:
Students analyze market conditions and apply the basic tools to develop marketing strategies to successfully meet the customers' needs resulting in a viable, profitable organization

MARK 201H Principles of Marketing - Honors (3 Credit Hours)
Pre-requisites: Sophomore standing or above; Restricted to SBA honors students
This course develops an understanding of the marketing systems by which organizations plan, price, promote and distribute products and services to selected target markets.
Course equivalencies: MARK201/201H/301/CPST340
Outcomes:
Students analyze market conditions and apply the basic tools to develop marketing strategies to successfully meet the customers' needs resulting in a viable, profitable organization

MARK 310 Consumer Behavior (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
This course develops an understanding of how consumers behave before, during, and after the consumption process through a discussion of cultural, social, and perceptual factors.
Outcomes:
Students evaluate consumer behavior and apply their understanding in the creation of a marketing plan designed to improve the brand equity of a firm

MARK 311 Marketing Research (3 Credit Hours)
Pre-requisites: Junior standing, minimum grade of "C-" in MARK 310 and (ISSCM 241 or ISSCM 241H or STAT 103)
This course develops an understanding of the research process from problem formulation through research report preparation. Both qualitative and quantitative research methodologies are discussed. The focus is on using research results in marketing decision making. Empirical data are analyzed using state of the art analytical tools.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students identify managerial problems, research objectives, design data collection instruments, and sampling procedures; Data collection and analysis is discussed; Cases, exercises and/or a written research proposal or report is a primary outcome of the course

MARK 312 Gender and Marketing (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
How do the 4Ps of Marketing - product, price, place, and promotion - influence gender, and how does gender influence the 4Ps? Students will learn how to address the relationship between Gender and Marketing. Example topics may include, but are not limited to: Masculinity, Media, and Marketing; Women, Media, and Marketing; and Millennials, Gender, and Marketing.
Outcomes:
Understand how marketing strategy reflects and shapes socio-cultural norms so that you can build strategies that reflect and shape those norms; Learn how research on social trends is conducted and how it is used in strategy, so that you can perform such research in marketing contexts

MARK 320 Marketing for Environmental Sustainability (3 Credit Hours)
Pre-requisites: Sophomore Standing; minimum grade of "C-" in MARK 201
The course shows students how to use marketing to address the complexities of sustainability including: climate change, poverty, food shortages, oil depletion, and species extinction. Design-for-environment, full-cost pricing, greening the channels of distribution, and life-cycle impact are some of the concepts covered in this course.
Outcomes:
Provide students with the knowledge and skills needed to develop marketing products that contribute to environmental sustainability

MARK 321 Ignatian Design Thinking (3 Credit Hours)
Pre-requisites: Minimum grade of C- in MARK 201 and Junior standing
This course will provide an in-depth look into the role design thinking plays in our Ignatian tradition for servant leadership. Through human-centered design practices, we will explore our Ignatian imagination to seek and solve for our world's grandest challenges.
This course satisfies the Engaged Learning requirement.
Outcomes:
An understanding in the scope and application of human-centered design as a Mindset and a Method

MARK 323 Personal Selling (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
This course develops an understanding of the role of personal selling and sales force management, which are extremely critical in business-to-business marketing strategies, and the ethical and legal responsibilities of sales managers.
Outcomes:
Students develop skills in sales force organization and sales techniques as well as in the recruiting, selecting, training, motivating, compensating, and evaluating sales people

MARK 334 Services Marketing (3 Credit Hours)
Pre-requisites: Sophomore Standing; minimum grade of "C-" in MARK 201
Service organizations (eg banks, transportation companies, hotels, hospitals, educational institutions, and professional services) require a distinctive approach to marketing strategy in both development and execution. Also, the course focuses on the role of service in manufacturing businesses. The course will cover why people are essential to service success. Differentiate between product and service characteristics; understand, analyze, develop, modify employee behavior in a service environment, identify critical issues to service design, understand importance of facility location.
Outcomes:
Identify the differences between marketing in service versus manufacturing organizations and understand how "service" can be a competitive advantage in manufacturing organizations; Understand the unique challenges involved in marketing and managing services

MARK 360 Retailing Management (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
This course develops an understanding of retailing and the role that retailing plays in the marketing system and in marketing strategies.
Outcomes:
Students analyze and develop retail strategies that fit and support overall marketing strategies

MARK 363 International Marketing (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
This course develops an understanding of how marketing strategies are developed in the global environment.
Interdisciplinary Option: Global Studies, International Business
Outcomes:
Students evaluate cultural, governmental, economic, and competitive conditions to illustrate how these factors impact an organization's marketing strategy; Attention is paid to the positive and negative consequences of globalization

MARK 367 Multicultural Marketing (3 Credit Hours)
Pre-requisites: Sophomore Standing; minimum grade of "C-" in MARK 201
In this course, we address (1) past and current knowledge on multicultural marketing, (2) important challenges with respect to marketplace diversity and inclusion, and (3) what approaches can be used to construct better marketing plans and tactics.
Outcomes:
Students should have a working knowledge of the principal theories and research findings in multicultural marketing and should be able to integrate and apply this knowledge with respect to effective strategies for marketplace diversity and inclusion

MARK 370 Political Marketing (3 Credit Hours)
Pre-requisites: Junior standing, minimum grade of "C-" in MARK 201
No course description is available

MARK 373 Integrated Marketing Communications (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
This course develops an understanding of advertising strategy and advertising campaigns, including the external environment, how agencies are structured, and how consumer metrics are integrated.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students develop skills in managing the integration of media, strategy, and creative design in developing sound advertising campaigns

MARK 380 Digital Marketing (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
Emphasis is on strategies and tactics for creating, retaining, and enhancing customer relationships via the internet, including social media, and on integrating the digital environment into the marketing mix. In addition to learning fundamental principles of the digital channel, students will apply the learned principles of the digital channel in a class project. Readings, lectures, and industry professionals may be used to provide insights and relevance to this area of marketing.
Outcomes:
Students will be able to analyze and assess online marketing platforms and develop an integrated digital marketing plan

MARK 390 Marketing Strategies (3 Credit Hours)
Pre-requisites: Senior standing, minimum grade of "C-" in MARK 310, (FINC 301 or FINC 334 or FINC 334H), (SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H), and prior or concurrent enrollment in MARK 311
This capstone course develops an understanding of all marketing decisions involved in planning marketing strategies.
Course equivalencies: MARK390 / MARK324
Outcomes:
Students develop a comprehensive marketing plan by applying skills in financial analysis, competitive scanning, and appropriate marketing strategies

MARK 395 Independent Study (1-3 Credit Hours)
Pre-requisites: Junior standing; Instructor and Dean permission
Independent Study is an in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of marketing not otherwise covered by the department course offerings.
Outcomes:
Varies with topic

MARK 399 Special Topics in Marketing (1-3 Credit Hours)
Pre-requisites: Junior standing
Special Topics are scheduled classes offered on an ad hoc basis. Specific titles and content will vary.
Outcomes:
Varies with topic

Management (MGMT)

MGMT 201 Managing People and Organizations (3 Credit Hours)
Pre-requisites: Sophomore standing or above OR first-year students with a declared Management BBA
This course introduces students to the dynamics of human behavior in the workplace through the study of topics such as attitudes, personality, values, ethics, and leadership. The course also examines topics at the group and organizational levels, including culture, structure, change, decision making, power, and politics, as well as team development.
Course equivalencies: MGMT 201 / MGMT 201H
Outcomes:
Learn and apply organizational behavior concepts and theories to analyze how individuals work in teams/groups within organizations to achieve goals

MGMT 201H Managing People and Organizations - Honors (3 Credit Hours)
Pre-requisites: Sophomore standing or above; Restricted to students in the Quinlan School of Business Honors program
This course introduces students to the dynamics of human behavior in the workplace through the study of topics such as attitudes, personality, values, ethics, and leadership. The course also examines topics at the group and organizational levels, including culture, structure, change, decision making, power, and politics, as well as team development.
Course equivalencies: MGMT 201 / MGMT 201H
Outcomes:
Learn and apply organizational behavior concepts and theories to analyze how individuals work in teams/groups within organizations to achieve goals

MGMT 304 Strategic Management (3 Credit Hours)
Pre-requisites: Senior Standing; C- in MGMT 201, MARK 201, (SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H), and (FINC 301 or FINC 334)
This capstone course analyzes the responsibilities of general management in formulating and implementing business¿level and corporate¿level strategies. Strategic management addresses the strategic positioning, organizational structure, resources and capabilities of the organization to generate and sustain competitive advantage. The course applies strategic analysis principles to integrate all the BBA core courses.
Course equivalencies: MGMT304/304H
Outcomes:
Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole; Students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the competitive challenges of the market environment

MGMT 304H Strategic Management - Honors (3 Credit Hours)
Pre-requisites: Senior standing; minimum grade of "C-" in MGMT 201 or MGMT 201H, MARK 201 or MARK 201H, SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H, and FINC 301 or FINC 334 or FINC 334H; restricted to SBA honors students
This capstone course analyzes the responsibilities of general management in formulating and implementing business¿level and corporate¿level strategies. Strategic management addresses the strategic positioning, organizational structure, resources and capabilities of the organization to generate and sustain competitive advantage. The course applies strategic analysis principles to integrate all the BBA core courses.
Course equivalencies: MGMT304/304H
Outcomes:
Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole; Students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the competitive challenges of the market environment

MGMT 318 Organizational Development and Change (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201 or HSM 368
This course examines the theory and practice of organizational development and change, with an emphasis on effective change management.
Outcomes:
Students will understand the complexity of change in organizations and learn how to use change interventions to manage different types of organizational changes, including the redesign of jobs and restructuring

MGMT 320 Leading and Managing Teams (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201
This course examines the characteristics of effective teams and team players in an organizational context and covers theories and concepts of team composition, roles and leadership, decision making, team charters, conflict management, team networks and international teams.
Outcomes:
Students will gain an understanding of team processes and team performance in organizations, learn tools that make teams effective, develop team skills and practice creating, monitoring and improving an ongoing team effort

MGMT 331 Managing Nonprofit Organizations (3 Credit Hours)
Pre- or co-requisites: MGMT 201
Students will learn the knowledge, skills, and values for managing nonprofit organizations. We will examine how non-profits develop their mission, strategic plan, and program model, as well as how they fund their efforts and continuously improve their performance. Students will apply their knowledge through case study explorations of different Chicagoland non-profits. Students will demonstrate an understanding of the evolving non-profit sector; students will demonstrate an analytic ability to assess non-profit strategy; students will understand the management skills needed at high-performing non-profits
This course satisfies the Engaged Learning requirement.

MGMT 335 Micro-Enterprise Consulting (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201; Instructor permission
In the Jesuit tradition of using knowledge to serve humanity, students utilize and improve their business knowledge and skills by meeting the real-life business consulting needs of individual entrepreneurial and not-for-profit clients starting up or operating businesses in economically distressed communities.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve skills in service-oriented communication, project management, teamwork, and cross-functional business analysis; and learn how locally-owned business can foster community economic development; Consulting clients receive a feasibility analysis or business plan to help guide business operations and obtain financing for a new or struggling business

MGMT 345 Ethics, Economics & Entrepreneurship (3 Credit Hours)
Pre-requisites: Junior Standing, 'C-' or better in MGMT 201
The entrepreneur has been reviled as a social parasite and cheered as a moral hero. Through an examination of some classic works on entrepreneurship and the writings of our guest speakers, in Ethics, Economics, and Entrepreneurship we will take up three main questions: Who is the entrepreneur - that is, what activities or characteristics make one an entrepreneur?; Why did the entrepreneur largely disappear from intellectual discourse in the middle 20th century?; How ought we to evaluate the entrepreneur morally - and does the answer depend upon who we understand the entrepreneur to be?
