Students will understand major approaches to leadership, examine their own values and approach to leadership and improve their leadership skills

MGMT 363 Sustainable Business Management (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
Course introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, ethical, and business cases for adopting sustainability. This course fulfills a MGMT elective.\\n
Course equivalencies: MGMT/ENVS 363/ENVS 463
Outcomes:
Understand the dimensions of sustainability; Understand economics for sustainability; Understand the tools and techniques to apply sustainability in each functional area of the business

MGMT 377 Family Business Management (3 Credit Hours)
Pre-requisites: Grade of C- or better in MGMT 201
This course examines family, ownership and management challenges in operating a family business, including governance and leadership succession. It is designed for students pursuing a career in family business or providing service to one. It will use a systems model of family and business to demonstrate connections among key stakeholders. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will understand the goals, characteristics, social and economic impact, and dynamics of family businesses; They will know how to integrate entrepreneurial/management concepts and available resources to strengthen business performance

MGMT 395 Independent Study in Management (1-3 Credit Hours)
Pre-requisites: Junior standing; Instructor and Dean permission
No course description is available

MGMT 399 Special Topics in Management (1-3 Credit Hours)
Pre-requisites: Junior standing
No course description is available

Quinlan Business (QUIN)

QUIN 101 Business Learning and Careers (0 Credit Hours)
Pre-requisites: Quinlan School of Business undergraduates only
This course provides an overview of business majors at Quinlan and related career outcomes for graduates in each major.
Outcomes:
Students will understand the different attributes of Quinlan majors, variation in skill development and focus, and pathways for career success

QUIN 102 Financial Literacy and Well-Being (1 Credit Hour)
Pre-requisites: Quinlan School of Business undergraduates only
Students develop a comprehensive understanding of financial literacy by learning practical knowledge and tactics for successful personal financial management. This course makes direct connections between financial literacy and financial well-being.
Outcomes:
Students will understand personal finance terminology and resources, know how to choose financial instruments, comprehend basic economic function and policies, and be able to make ethical financial decisions and set goals

QUIN 202 Career Preparation (2 Credit Hours)
Pre-requisites: Sophomore standing, Quinlan School of Business student
Career Preparation provides an introduction to the critical skills required for successful career development and job search navigation. Students will learn about career development; develop job/internship search skills; establish a job/internship search action plan and begin to become oriented to employer research. Topics addressed will include resume/job search correspondence; interviewing skills; network building; career & employer research and career development resource building.
Course equivalencies: QUIN 202 / QUIN 202H
Outcomes:
Develop skills that can be used for career and life planning both now and in the future, including resume & cover letter writing, interviewing, salary negotiation, maintaining a professional online presence, plus effective communication skills through class discussions and individual presentations, and personal responsibility

QUIN 202H Career Preparation - Honors (2 Credit Hours)
Pre-requisites: Quinlan Business Honors Student
Career Preparation provides an introduction to the critical skills required for successful career development and job search navigation. Students will learn about career development; develop job/internship search skills; establish a job/internship search action plan and begin to become oriented to employer research. Topics addressed will include resume/job search correspondence; interviewing skills; network building; career & employer research and career development resource building.
Course equivalencies: QUIN 202 / QUIN 202H
Outcomes:
Develop skills that can be used for career and life planning both now and in the future, including resume & cover letter writing, interviewing, salary negotiation, maintaining a professional online presence, plus effective communication skills through class discussions and individual presentations, and personal responsibility

QUIN 300 Business Internship - Elective Credit (1-3 Credit Hours)
Pre-requisites: Sophomore standing, Quinlan School of Business student
This course provides general elective credit for an approved internship, with credit based on hours worked for the term (1cr for 56-84 hours, 2cr for 85-119 hours, 3cr for 120+ hours). Internships must be approved by the instructor in advance, no later than last date of late/change registration.

QUIN 351 Business Internship-Engaged Learning (3 Credit Hours)
Pre-requisites: Junior standing, School of Business student, & "C-" or better in QUIN 202 or BSAD 220
This course satisfies the Engaged Learning requirement and connects an internship with academic learning and reflection. Topics include goal-setting, navigating the workplace, and career planning. Internships must be approved by instructor by the last date of late/change registration (required: work 120+ hours during term enrolled, submit name of supervisor). Students must be working in an internship during the term of enrollment into QUIN 351.
This course satisfies the Engaged Learning requirement.

QUIN 390 Capstone in Business of Applied Artificial Intelligence (3 Credit Hours)
Pre-requisites: ACCT 331
This immersive, hands-on course focuses on solving a real-world business problem in collaboration with a sponsoring firm. Students will work through all phases of an AI project lifecycle: defining the business problem, analyzing data, developing KPIs, preparing large data sets, building and refining AI models, and delivering actionable recommendations. The project emphasizes consultative team-based work, critical thinking, stakeholder management, and professional communication skills. Students will learn how to translate business objectives into technical solutions, leverage syndicated and government data, and apply best practices in AI model development and deployment. Students will present to the sponsoring firm at key milestones, culminating in a final presentation and required course deliverables including a detailed project description, model notebooks and related documentation, and a user guide.
Outcomes:
Translate business challenges into AI solutions; Acquire, clean, and integrate large and diverse data sets; Evaluate and select appropriate analytical and modeling techniques; Develop, validate, and refine AI models; Communicate findings effectively to technical and non-technical stakeholders; Understand and address ethical, legal, and societal issues in AI implementation

QUIN 399 Special Topics (3 Credit Hours)
This course will cover a variety of special topics in Economics.

Supply Chain Management (SCMG)

SCMG 232 Introduction to Supply Chain Management (3 Credit Hours)
Introduction to the concept of supply chain management, including a broad overview of main functional roles such as procurement, transportation, and inventory. Introduction to best practice methods for planning and managing supply chains, including how to do so efficiently, ethically, and sustainably. Methods include analytics and lean management.
Course equivalencies: SCMG332/332H/SCMG232/232H
Outcomes:
Understanding of fundamental activities in supply chain management, methodologies to support those activities, and how they impact a firm both in terms of its profit and its impact on society and the planet

SCMG 232H Introduction to Supply Chain Management-Honors (3 Credit Hours)
Introduction to the concept of supply chain management, including a broad overview of main functional roles such as procurement, transportation, and inventory. Introduction to best practice methods for planning and managing supply chains, including how to do so efficiently, ethically, and sustainably. Methods include analytics and lean management.
Course equivalencies: SCMG332/332H/SCMG232/232H
Outcomes:
Understanding of fundamental activities in supply chain management, methodologies to support those activities, and how they impact a firm both in terms of its profit and its impact on society and the planet

SCMG 332 Operations Management (3 Credit Hours)
Pre-requisites: Sophomore standing and minimum grade "C-" ISSCM 241
Introduction to concepts and methods for managing production and service operations. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, and logistics.
Course equivalencies: SCMG332/332H/SCMG232/232H
Outcomes:
Understanding of basic issues and role of operations management in organizations, and of tools for problem-solving in operations management

SCMG 332H Operations Management - Honors (3 Credit Hours)
Pre-requisites: Sophomore Standing or above; minimum grade of "C-" in ISSCM 241 or ISSCM 241H; Restricted to SBA Honors Students
Introduction to concepts and methods for managing production and service operations. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, and logistics.
Course equivalencies: SCMG332/332H/SCMG232/232H
Outcomes:
Understanding of basic issues and role of operations management in organizations, and of tools for problem-solving in operations management

SCMG 337 Inventory and Warehouse Management (3 Credit Hours)
Pre-requisites: Sophomore Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; INFS 247 or INFS 247H; ISSCM 241 or ISSCM 241H or STAT 103
This course explores strategies for efficient and environmentally sustainable management of inventory in supply chains. Topics include inventory tracking and classification, warehousing activities, and inventory replenishment strategies. Emphasis is placed on the development and implementation of quantitative decision-making models.
Course equivalencies: OPMG337 / MGSC337
Outcomes:
Students will understand how material flows through a warehouse and the primary tasks involved in a warehouse (receiving, order picking, put-away, etc); Understand how to measure and improve key performance indicators related to warehousing and inventory management (inventory turns, days of supply, etc); Identify, understand, and implement different inventory review strategies (periodic vs continuous) and replenishment policies; Gain experience with using spreadsheet tools and simulation software to support supply chain decision-making

SCMG 338 Global Transportation (3 Credit Hours)
Pre-requisites: Sophomore Standing; Minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; INFS 247 or INFS 247H; ISSCM 241 or ISSCM 241H or STAT 103
The goal of this course is to give students exposure to and understanding of how freight transportation is managed within the supply chain, with a special emphasis on sustainability. Students will learn how different modes of transport, cost structures, and environmental considerations interact to shape strategic and operational decisions in global logistics.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: OPMG338 / MGSC338
Outcomes:
Students will develop an understanding of the role of transportation within the supply chain and how it is managed; Gain familiarity with key transportation management techniques that support the creation of more sustainable and efficient supply chains

SCMG 340 Global Procurement (3 Credit Hours)
Pre-requisites: Sophomore Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; ISSCM 241 or ISSCM 241H or STAT 103
This course introduces students to the core principles of sourcing and supplier management, emphasizing real-world applications. It presents best practices in sourcing and supplier management and covers specific areas such as spend management, risk management, contract management, and supplier scorecards. It also highlights integral complementary processes such as inventory management, logistics and order fulfillment.
Outcomes:
Students will engage in discussions about best practices in global procurement and analyze their application; Research a global organization that performs sourcing and supplier management and present findings to the class; Participate in discussions on emerging topics like spend management, risk, contract management and scorecards; Analyze a sourcing and supplier management strategy to present to a Board of Directors

SCMG 341 Supply Chain Analytics (3 Credit Hours)
Pre-requisites: Junior Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; INFS 247 or INFS 247H; ISSCM 241 or ISSCM 241H or STAT 103
This course introduces students to the application of business and data analytics across key supply chain functions. Students learn to identify, manipulate, visualize, and model data to support strategic and operational decision-making in modern supply chains. Topics include demand forecasting, customer segmentation and cohort analysis, supplier selection and risk assessment, inventory classification and prediction, and supply chain performance measurement. Through hands-on use of a widely used programming software and real-world business cases, students develop the skills to design, execute, and communicate business analytics projects that enhance supply chain performance, profitability, and sustainability.
Course equivalencies: ISOM341 / MGSC341
Outcomes:
Students will develop an understanding of the fundamental concepts and tools used to analyze\\nand improve core supply chain functions through business and data analytics; Students will be able to identify and describe key data sources and performance metrics related to demand, customer, supply, and inventory management; Prepare, visualize, and analyze supply chain data using widely used programming software; Apply forecasting, segmentation, and classification techniques to real supply chain problems\\nsuch as demand prediction, customer analysis, supplier evaluation, and inventory classification; Interpret and communicate analytics results to support decision-making

SCMG 342 Supply Chain Optimization (3 Credit Hours)
Pre-requisites: Junior Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; INFS 247 or INFS 247H; ISSCM 241 or ISSCM 241H or STAT 103
This course studies various analytical methods and tools for making decisions that will lead to cost effective products, services and processes. Topics include developing decision-making optimization models and implementing those models in Excel. The course will highlight models used in supply chain management; including facility location, transportation network design and vehicle routing.
Outcomes:
Students will develop an understanding of optimization modeling, implementing optimization models in Excel and problem-solving techniques; Students will learn how to build and solve decision-making optimization and simulation models in Excel to develop skills in spreadsheet modeling/optimization/engineering

SCMG 346 Analytics for Social Good (3 Credit Hours)
Pre-requisites: Junior Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; INFS 247 or INFS 247H; ISSCM 241 or ISSCM 241H or STAT 103
This course introduces students to the application of analytics methods in the context of humanitarian, nonprofit, public health, and public service supply chains. Students will develop foundational skills in probability, descriptive analytics, data visualization, simulation, and predictive modeling using Excel and Python. Through cases and projects, students will apply these tools to analyze and address challenges in socially focused supply chain and operations settings.
Outcomes:
Students will be able to use data-driven methods to evaluate, interpret, and communicate solutions to operational problems in social-good contexts; Develop technical proficiency in key analytics methods, including descriptive analysis, data visualization, probability, simulation, predictive modeling, and clustering techniques, using Excel and Python; Understand the unique goals and challenges of humanitarian, nonprofit, public health, and public service supply chains, and apply analytics to address real-world problems in these contexts; Analyze, interpret, and solve operational problems by applying quantitative methods and evaluating the trade-offs between various objectives in social-good contexts; Communicate findings effectively through concise briefs, reports, and presentations tailored to both technical and non-technical stakeholders; Work collaboratively to design and evaluate data-driven solutions for case-based and project-based problems; Reflect on the broader ethical and societal implications of applying analytics in social-good contexts

SCMG 383 Service and Operations Management (3 Credit Hours)
Pre-requisites: Junior Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; ISSCM 241 or ISSCM 241H or STAT 103
This course introduces analytical methods and managerial tools for improving the design and control of service and operations systems. Topics include process analysis, capacity planning, queuing theory, Lean management, quality improvement, and forecasting. The course places special emphasis on applications in healthcare operations, such as patient flow, scheduling, and resource utilization.
Course equivalencies: ISOM383 / MGSC383
Outcomes:
Students will learn to analyze processes, evaluate capacity, manage variability, and enhance quality and efficiency in manufacturing and service operations; Understand and analyze processes using operations management concepts; Evaluate capacity and flow to identify bottlenecks and recommend improvements; Apply queuing theory to model waiting lines and design more effective service systems; Use Lean principles and statistical process control to reduce waste and improve quality in healthcare and service operations; Develop and interpret forecasts for demand and resource planning in service systems; Integrate analytical tools and managerial thinking to make evidence-based operational decisions

SCMG 395 Independent Study in Operations Management (1-3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member in a specialized area of Operations Management not otherwise covered by departmental course offerings. Variable Credit. May count for Operations Management major or minor. Permission of Assistant Dean required.

SCMG 396 Supply Chain Seminar (0 Credit Hours)
Professional speaker series for all students majoring in Supply Chain Management. Students will benefit from hearing professionals in the supply chain industry discuss current events, opportunities and challenges within the industry.

SCMG 399 Special Topics in Operations Management (1-3 Credit Hours)
Special topics are scheduled classes offered on an ad hoc basis. Specific titles, prerequisites and content will vary.

Sport Management (SPRT)

SPRT 130 The Business of Sports (3 Credit Hours)
An overview of the sport industry intended to increase student awareness of the structure and operations of sport organizations from a management and leadership perspective.

SPRT 320 Social Aspects of Sport Management (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130
This course provides an examination of the role and relevance of sport in modern American society; impact of sport on society and the influence which cultural institutions have on sport. Sport related issues and controversies in contemporary sport as framed from a sociological and ethical perspective will be discussed.

SPRT 330 Economics of Sport (3 Credit Hours)
Pre-requisites: Minimum grade of "C-" in ECON 201 and SPRT 130
Using the tools of economic analysis, this course will examine issues pertaining to professional and amateur sports. It will also address economic policy of various sport industry segments.
Outcomes:
Examine issues pertaining to professional and amateur sports; Address economic policy of various sport industry segments; Use economic analysis tool

SPRT 335 Fundamentals of Sport Finance (3 Credit Hours)
Pre-requisites: Junior standing, minimum grade of "C-" in SPRT 130
No course description is available

SPRT 339 Sports Facility Management and Operations (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of "C-" in SPRT 130
This course examines the comprehensive planning for development and operations of new and existing sport and fitness facilities and the management of those events.
Course equivalencies: X-SPRT339/ISOM339

SPRT 345 Globalization of Sport Industry (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130
The course provides an analysis of the impact of the globalization of sport in relation to the organization and management of international sport, including the Olympic movement and the examination of U.S. professional sports. A comprehensive investigation of international governance, political, social, and economic issues which leagues and corporations must consider in conducting business in foreign markets.
Interdisciplinary Option: Global Studies, International Business
Outcomes:
Students will be able to explain how sport is organized, managed, funded, and governed across the different regions of the world; Students will be able to identify the major forms of sport governance that exist worldwide; Students will analyze how different cultures interpret sport differently

SPRT 365 Fundamentals Sport Marketing (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130 and MARK 201
This course focuses on the application of marketing principles and practices to the sport industry. Consideration given to marketing sport both as a spectator and a participant.
Course equivalencies: X-SPRT365/MARK365

SPRT 375 Sport Media (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in SPRT 130
A course designed to expose students to sports media in the digital age. The course covers topics in journalism, broadcasting, and production and outlines best practices for success in the industry. The course also analyzes the market forces that control sports media as well as legal and ethical dilemmas in the field.

SPRT 380 Legal Aspects in Sport Management (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130
An examination of legal issues which arise in the sport industry, including both amateur and professional sports with a strong emphasis on ethical concerns.

SPRT 385 Sport Analytics (3 Credit Hours)
Pre-requisites: Junior standing, C- or better in SPRT 130 and BSAD 343
This course examines the collection and analysis of data to enhance decision making within sport. The course reviews analytic usage across different sport management segments such as finance, marketing, sales and logistics. Additionally, data and analytics within sport performance, wearable technology, coaching and player management are investigated.
Outcomes:
Obtain introductory knowledge and technical competence using statistical and analytical software; Determine and perform appropriate statistical analysis to think critically; reason, analyze and problem solve sport industry specific issues

SPRT 395 Independent Study (1-3 Credit Hours)
This course will provide independent study opportunity in Sports Management.

SPRT 399 Special Topics in Sport Management (1-3 Credit Hours)
Pre-requisites: Junior Standing & C- or better in SPRT 130
No course description is available

Accounting (BBA)

All businesses need skilled accountants to help them determine what they have to spend and how they should spend it to ensure a successful future.

You'll be well-prepared for these responsibilities with the Quinlan School of Business BBA in Accounting degree program. We'll also help you get ready for the CPA, CMA, CFM, and CIA.

Related Programs

Major

- Accounting and Analytics (BBA) (p. 777)

Minor

- Accounting Information Systems Minor (p. 780)

Curriculum

All Quinlan School of Business students must complete the University Core Curriculum, Business Core Curriculum, and Undergraduate School of Business program requirements. Students pursuing the BBA degree

in Accounting must also complete 24 required hours from the Major Requirements listed below.

Code	Title	Hours
Undergraduate Business Program Requirements		
COMM 103	Business & Professional Speaking [1]	3
MATH 110	Business Precalculus	3
or MATH 118	Precalculus II	
ETHC 341	Ethics in Business	3
QUIN 101	Business Learning and Careers	0
QUIN 102	Financial Literacy and Well-Being	1
QUIN 202	Career Preparation	2
Writing Intensive

	Total Hours	**84**

CPA Exam Requirements

Students taking the CPA examination in Illinois are required to have earned 120 semester hours of college credit. At least 150 earned credit hours are required for licensure. The additional credit hours can be earned at Loyola at either the undergraduate or the graduate-level MSA.

For more information about the CPA examination, visit the Illinois Board of Examiner's CPA Exam (https://www.ilboe.org/) page.

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Critical Analysis: Undergraduates will demonstrate the ability to critically analyze an accounting situation or problem and use technology where appropriate.
- Professional Knowledge: Undergraduates will possess fundamental professional accounting knowledge in the areas of: Strategic Cost Management, Financial Accounting, Audit and Business Risk, Tax, and Legal and Regulatory Knowledge.
- Communication: Undergraduates will possess the ability to document scope, findings and recommendations of accounting work both orally and in writing
- Professional Research: Undergraduates will illustrate professional research skills necessary to enter the accounting profession.

Accounting and Analytics (BBA)

The BBA in Accounting and Analytics at the Quinlan School of Business is a specialized degree program combining accounting skills with an understanding of broad data sets within a client firm's operations.

And the combined skills of accounting and analytics are much in demand. According to an American Institute of Certified Public Accountants (AICPA) trends report (https://us.aicpa.org/content/dam/aicpa/interestareas/accountingeducation/newsandpublications/downloadabledocuments/2019-trends-report.pdf):

"The accounting profession is rapidly evolving. Technological innovations, especially in data science and analytics, are becoming a more common part of the profession and are changing the way we do business and whom we hire to do it."

1. Accounting and Analytics majors with prior credit for COMM 101 Public Speaking & Critical Thinking who wish to take the CPA exam should take ENGL 210 Business Writing for Business Communication credit.
2. One must be a Quinlan course or ENGL 210 Business Writing. Writing Intensive courses must be taken in separate terms.
3. A study abroad experience will also satisfy this requirement.
4. Graduate business course taken senior year where 2 Quinlan graduate courses are permitted.

A student who is an accounting and analytics major may be administratively removed as an accounting and analytics major if the student earns a grade below "C-" in two or more upper-level accounting classes (ACCT 303 Intermediate Accounting I and beyond).

CPA Exam Requirements

Students taking the CPA examination in Illinois are required to have earned 120 semester hours of college credit. At least 150 earned credit hours are required for licensure. The additional credit hours can be earned at Loyola at either the undergraduate or the graduate-level MSA.

Accounting and Analytics majors planning to take the CPA exam are required to take the following, in addition to their Major Requirements:

Code	Title	Hours
ACCT 304	Intermediate Accounting II	3
Select three of the following:		9
ACCT 306	Advanced Financial Accounting	
ACCT 307	Adv Accounting: Not-For-Profit Entities & Adv Financial Accounting Topics	
ACCT 308	Accounting Information Systems and Sustainability Reporting	
ACCT 323	Advanced CPA Topics	
ACCT 326	Fraud Investigation	
ACCT 341	Advanced Studies in Taxation	
ACCT 399	Special Topics in Accounting	

For more information about the CPA examination, visit the Illinois Board of Examiner's CPA Exam (https://www.ilboe.org/) page.

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless

of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Managerial accounting
- Taxation concepts
- Database and data systems
- Data analytics
- Business intelligence
- CPA exam preparation

Accounting Information Systems Minor

Quinlan students who are pursuing other majors but who wish to expand their skills in accounting may pursue a minor in accounting information systems.

Related Programs

Major

- Accounting (BBA) (p. 775)
- Accounting and Analytics (BBA) (p. 777)

Curriculum

The requirements are 15 credit hours in the following courses:

Code	Title	Hours
ACCT 303	Intermediate Accounting I	3
ACCT 308	Accounting Information Systems and Sustainability Reporting	3
ACCT 317	Managerial Accounting	3
INFS 346	Database & Data Warehousing Systems	3
INFS 347	Systems Analysis & Design	3
or ISSCM 393	Requirements Analysis and Communication	
Total Hours		**15**

Of the courses required for the minor, Accounting majors may apply only ACCT 303 Intermediate Accounting I and ACCT 317 Managerial Accounting to their major requirements. ACCT 308 Accounting Information Systems and Sustainability Reporting may not be applied toward the Accounting major for students with this minor. A student majoring in both Accounting and Information Systems and Analytics is not eligible for this minor.

This minor is only available for students in the Quinlan School of Business.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for the minor. Students should consult their advisor for assistance with course selection.

All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Strengths and weaknesses of AIS approaches
- System and database analysis and design
- Accounting cycles, internal controls, and fraud
- Ethical issues related to the use of AIS

Business Administration Minor

Students who are not enrolled in the Quinlan School of Business may want to have working knowledge of business administration and may pursue a business administration minor.

Related Programs

Major

- Business Administration (AA) (p. 34)

Combined

- Business Analytics (MBA/MS) (p. 1862)

Curriculum

Requirements for this minor include 18 total credit hours taken from the following courses:

Code	Title	Hours

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Learn fundamentals of accounting and economics
- Understand data-driven decision making
- Gain competencies in managing people and organizations

Business of Applied Artificial Intelligence Minor

The minor helps students develop advanced skills in this burgeoning field through a blend of rigorous coursework and practical applications to business challenges. It develops knowledge of AI technologies and encourages students to engage in current research, fostering skills in

assessing AI models' applicability to business problems. Complementary courses enhance students' abilities to manipulate and analyze data, laying the groundwork for empirical research that supports business decision-making.

Related Programs

Master's

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- To prepare students to function as business translators who can effectively bridge the gap between technical AI capabilities and strategic business objectives.
- Graduates will possess a deep understanding of artificial intelligence technologies coupled with a strong grasp of business applications, enabling them to translate complex AI concepts into actionable business strategies.
- Graduates will be equipped to lead AI initiatives within diverse organizational contexts, ensuring that AI technologies are implemented ethically and effectively to drive innovation, efficiency, and competitive advantage.

Business Honors Program

Academics

Our Business Honors program is a four-year academic and professional program developed to be specifically tailored to the interests and needs of our most talented, motivated, and highest-achieving business students. Accordingly, we are intentionally small and selective—top students receive an invitation to apply to the Honors Program after admission to Quinlan. Business Honors is comprised of only approximately five percent of Quinlan's business students.

As a result, we are able to offer both a rigorous and enriching academic program as well as a supportive personal and professional community. And, ultimately, the goal is to provide a truly transformative experience for our Business Honors students.

Curriculum

To complete the Quinlan Honors curriculum requirement, 15 Quinlan Honors courses are offered with students required to complete at least 75 percent of their BBA Core (and the BHNR 357 study abroad) in Honors sections. Quinlan Honors courses are offered once per academic year (with occasional exceptions). Decisions to take non-Honors sections of the BBA Core should be discussed in advance with the student's

academic advisor. If a Quinlan Honors student is unable to complete 75 percent of the required curriculum in the Honors sections, they may appeal to the Quinlan Undergraduate Dean's office with an explanation for completing less than that share of the Honors sections.

Quinlan Honors Seminar

Every Thursday, Quinlan Honors students meet for a weekly seminar. Quinlan Honors Seminar (BHNR 300) is led by the program director and occurs at the Schreiber Center, unless an offsite event is planned for the week. This seminar is offered on a pass/no-pass basis and Honors students are expected to receive a passing grade for the seminar for each semester that they are in Chicago.

GPA and Graduation Requirements

Quinlan Honors students must complete the required honors coursework, attend and engage in the Quinlan Honors seminar, and achieve a minimum cumulative 3.5 GPA at the conclusion of their undergraduate career to successfully complete the Quinlan Honors program. In order to ensure Honors students are on track to meet this graduation requirement, the following GPAs must be attained after the completion of each level:

- 3.2 after the first year (30+ credit hours completed at Loyola)
- 3.3 after the second year (60+ credit hours completed at Loyola)
- 3.4 after the third year (90+ credit hours completed at Loyola)

Students who fall below these thresholds will be removed from the Quinlan Honors program, but may continue pursuing BBA degrees at Quinlan. If students wish to appeal this dismissal from the Quinlan Honors program, they may submit a written appeal with an explanation to the Quinlan Undergraduate Dean's Office.

Suggested Sequence of Courses

Below is a typical, but not required, course sequencing for Business Honors students. Your class sequencing will depend on factors such as major(s) and study abroad plans.

Learning Outcomes

- Graduates will be well-grounded in fundamental knowledge in our foundational business areas. They will demonstrate the ability to

collaborate across domains to deliver ethical solutions to complex business problems, particularly those relating to our Jesuit values, in pursuit of a more just society.

- Students will be able to interpret and critically analyze qualitative and quantitative information, to integrate new knowledge with existing knowledge, and to leverage cutting-edge technologies in pursuit of a more just society.
- Students will demonstrate a solid foundation of ethical reasoning in business decisions, in keeping with the Jesuit tradition of reflection and the pursuit of justice as pioneered by Father Baumhart. Students will reflect on their own values and principles, those of organizations they engage with, and of the broader social institutions to guide their decision making and leadership in the business world.
- Students will develop a clear understanding of the global context in which businesses operate via a study abroad experience and will demonstrate the ability to leverage the complex cultural, economic, political, ethical and social impacts of business decisions in a global economy. Students will value diverse lived experiences as a source of strength in teams and organizations.
- Graduates will be able to communicate effectively to a variety of audiences in traditional modes and emerging platforms.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

ACCT 201H Introductory Accounting I - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the Quinlan Business Honors program
The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include: preparation and use of financial statements, the accounting process, and the measurement and reporting of income, assets, liabilities, and owners' equity.
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
The student will be able to understand the underlying principles, design, concepts, limitations, and the necessity of accounting systems; The student will gain an appreciation of the uses of financial data and financial statements and their impact on business decisions

ACCT 202H Introductory Accounting II - Honors (3 Credit Hours)
Pre-requisites: C- or better grade in ACCT 201 or ACCT 201H; Restricted to SBA honors students
This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.
Course equivalencies: ACCT202/ACCT202H/ACACT201
Outcomes:
The student will be able to understand the differences between cash and accrual accounting, the use of ratio analysis in investing and managing decisions, the value and importance of identifying and allocating costs, and the methods involved in the budgeting process

ETHC 341H Ethics in Business - Honors (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of "C-" in (MGMT 201 or MGMT 201H) and (ECON 202 or ECON 202H); Restricted to students in the Quinlan School of Business Honors program
This course focuses on ethical issues in the world of business and commerce. This course will address a number of interrelated questions: What are the rights and obligations of business in society? Can businesses "do good" and "do well"? Is business ethics a viable goal or an unachievable ideal?
Course equivalencies: ETHC 321 / ETHC 341/ ETHC 341H
Outcomes:
Critically discuss (via well-grounded arguments) philosophical issues and questions from the perspective of multiple methods, traditions, and historical contexts; Evaluate philosophical issues, questions, and problems critically and analytically; Formulate and evaluate their own understanding of a diverse range of philosophical problems, in both writing and discussion

BHNR 300 Business Honors Seminar-Required (0 Credit Hours)
Pre-requisites: Restricted to students in the Quinlan Business Honors program
This seminar is a pass/no-pass program requirement providing honors students with opportunities to learn from and network with leaders at major companies and organizations. Seminar is primarily a speaker series presenting honors students with opportunities to attend corporate and organizational site visits, social activities, and other events. Through seminar, honors students are able to network with each other and build community.
Outcomes:
Encourage bonding, stimulate thoughtful interaction, provide connections with the faculty, and connect to the broader business and alumni community

BHNR 343 Integrated Analytical Decision Making (3 Credit Hours)
Pre-requisites: Enrollment is restricted to Business Honors students; Junior Standing; C- or better in ISSCM 241 or ISSCM 241H or STAT 103
This course will focus on the analysis of data, with applications of techniques to business problems. Students will conduct original research and create both a written analysis and presentation. This course satisfies the Engaged Learning requirement.
This course satisfies the Engaged Learning requirement.
Outcomes:
At the end of this course, the student will know how to formulate a business problem, then collect and analyze data, and interpret results that address the problem

BHNR 353 Research Practicum (3 Credit Hours)
This course introduces students to the process of business research, including research ethics as well as implications of research outcomes in the broader business and social context. Good research helps business managers understand issues and make informed decisions.
This course satisfies the Engaged Learning requirement.

BHNR 395 Independent Study in Business Honors (3 Credit Hours)
Pre-requisites: Sophomore standing, Department Consent Required
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member into a specialized area as determined between student and faculty member.
Outcomes:
Students will be able to demonstrate an in-depth understanding of a specialized area or topic of research

ECON 201H Principles of Microeconomics - Honors (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. Restricted to SBA honors students or Honors students. This course is an introduction to demand and supply, consumer choice, price analysis in alternative industrial organizations, and the distribution of income.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
Students will be able to think critically about price formation in different market structures, and how prices, household incomes and income distribution in a diverse society are determined with interpretations based on the concepts of opportunity costs and decision making under uncertainty

ECON 202H Principles of Macroeconomics - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Business Honors program
This course is an introduction to national product, its components, money and the real sectors and business fluctuations.
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
The students will be able to think critically about the economic environment of the nation and to measure growth, unemployment, inflation, and fiscal and monetary policies of the government to ultimately understand economic stability and the welfare of the individual citizen

FINC 334H Principles of Corporate Finance- Honors (3 Credit Hours)
Pre-requisites: Open to students in the Quinlan Honors Program; Sophomore standing; C- or better in ECON 201 or ECON 201H; ISSCM 241 or ISSCM 241H or STAT 103; ACCT 201 or ACCT 201H; and MATH 130 or MATH 131 or MATH 161; (ACCT 201 may taken as a co-requisite)
This course provides students with a foundational and integrated knowledge of corporate finance. Topics include discounted cash flows, firm valuation, capital budgeting, principals of the risk and return relationship, market efficiency, capital structure, and financing. Students will be asked to independently complete the Bloomberg Market Concepts (BMC) course.
Course equivalencies: FINC332/FINC 334/CPST271
Outcomes:
Students will demonstrate knowledge of valuation principles, raising funds for investment decisions, capital investment choices, risk and return relationship, capital markets and instruments, all in the context of real-world problems and situations

INFS 247H Business Information Systems - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Business Honors program
Focuses on using information technology to support business processes. The purpose and composition of information systems, the utilization of technology, and hands-on experience in developing microcomputer business applications with productivity tools (Microsoft Excel and Access).
Course equivalencies: INFS247/ISOM/MGSC247/ACINF247
Outcomes:
Understanding of using information technology to support business processes and of developing business spreadsheet and database applications

INFS 343H Business Analytics - Honors (3 Credit Hours)
Pre-requisites: Open to students in the Quinlan Honors Program; Requires C- or better in ISSCM 241H or ISSCM 241 or STAT 103, INFS 247 or INFS 247H, and one of the following: MATH 110, MATH 118, MATH 130, MATH 131, or MATH 161
This course covers basic principles in data modeling, and turning big data into intelligent actionable insights. Through the use of real business case studies and lab sessions students will develop a comprehensive, innovative and practical approach to data analytics that enables them to solve diverse and complex business problems.
Course equivalencies: BSAD343/BSAD343H
Outcomes:
Explain core design concepts, appraise various technological solutions, determine proper analytics methods, integrate data visualization, and make a compelling presentation of a novel use case depicting current market trends

ISSCM 241H Business Statistics - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Business Honors program
This course examines the steps and procedures required to solve problems in science, social science, and business where data are useful - from the definition of the managerial problems to the use of statistical analysis - to address these problems.
Course equivalencies: ISSCM/H/241/STAT103/ACST101/03
Outcomes:
Students will be able to demonstrate understanding of statistical thinking and data analysis technique for decision-making purposes

IBUS 201H Business Management: A Global and Social Perspective (3 Credit Hours)
Pre-requisites: Open to students in the Quinlan business honors program only
This course provides Honors students with opportunities to learn about managing international businesses in a sustainable global environment. The course contents cover the differences in economic, social, and political environments of countries around the world. The course features corporate and academic speakers and discussions of various aspects of international business.
Course equivalencies: IBUS 201/BSAD 202/BHNR 338
Outcomes:
An understanding of global economics, management, and sustainable business of nations and regions in our global economy and social and financial structures under which global businesses are conducted

LREB 315H Law and the Regulatory Environment of Business I - Honors (3 Credit Hours)
Pre-requisites: Junior standing; restricted to SBA honors students
This course is designed to familiarize the student with the American legal system. Intended primarily for students who have not previously studied law, the course includes a review of the concept of law, the function of the courts, and the dual judicial system of the United States. An appreciation of legal history and the operation of law are developed through the vehicle of a detailed analysis of contract law and a survey of other topical headings.
Course equivalencies: LREB315/315H
Outcomes:
The students should achieve an awareness of the necessity of voluntary compliance with general legal concepts in order for society to enable all persons to live together in harmony; An understanding of the court system as a substitute for self-help is deemed essential and knowledge of binding contract law is fostered as a basis for all agreements

MGMT 201H Managing People and Organizations - Honors (3 Credit Hours)
Pre-requisites: Sophomore standing or above; Restricted to students in the Quinlan School of Business Honors program
This course introduces students to the dynamics of human behavior in the workplace through the study of topics such as attitudes, personality, values, ethics, and leadership. The course also examines topics at the group and organizational levels, including culture, structure, change, decision making, power, and politics, as well as team development.
Course equivalencies: MGMT 201 / MGMT 201H
Outcomes:
Learn and apply organizational behavior concepts and theories to analyze how individuals work in teams/groups within organizations to achieve goals

MGMT 304H Strategic Management - Honors (3 Credit Hours)
Pre-requisites: Senior standing; minimum grade of "C-" in MGMT 201 or MGMT 201H, MARK 201 or MARK 201H, SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H, and FINC 301 or FINC 334 or FINC 334H; restricted to SBA honors students
This capstone course analyzes the responsibilities of general management in formulating and implementing business¿level and corporate¿level strategies. Strategic management addresses the strategic positioning, organizational structure, resources and capabilities of the organization to generate and sustain competitive advantage. The course applies strategic analysis principles to integrate all the BBA core courses.
Course equivalencies: MGMT304/304H
Outcomes:
Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole; Students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the competitive challenges of the market environment

MARK 201H Principles of Marketing - Honors (3 Credit Hours)
Pre-requisites: Sophomore standing or above; Restricted to SBA honors students
This course develops an understanding of the marketing systems by which organizations plan, price, promote and distribute products and services to selected target markets.
Course equivalencies: MARK201/201H/301/CPST340
Outcomes:
Students analyze market conditions and apply the basic tools to develop marketing strategies to successfully meet the customers' needs resulting in a viable, profitable organization

QUIN 202H Career Preparation - Honors (2 Credit Hours)
Pre-requisites: Quinlan Business Honors Student
Career Preparation provides an introduction to the critical skills required for successful career development and job search navigation. Students will learn about career development; develop job/internship search skills; establish a job/internship search action plan and begin to become oriented to employer research. Topics addressed will include resume/job search correspondence; interviewing skills; network building; career & employer research and career development resource building.
Course equivalencies: QUIN 202 / QUIN 202H
Outcomes:
Develop skills that can be used for career and life planning both now and in the future, including resume & cover letter writing, interviewing, salary negotiation, maintaining a professional online presence, plus effective communication skills through class discussions and individual presentations, and personal responsibility

SCMG 232H Introduction to Supply Chain Management-Honors (3 Credit Hours)
Introduction to the concept of supply chain management, including a broad overview of main functional roles such as procurement, transportation, and inventory. Introduction to best practice methods for planning and managing supply chains, including how to do so efficiently, ethically, and sustainably. Methods include analytics and lean management.
Course equivalencies: SCMG332/332H/SCMG232/232H
Outcomes:
Understanding of fundamental activities in supply chain management, methodologies to support those activities, and how they impact a firm both in terms of its profit and its impact on society and the planet

SCMG 332H Operations Management - Honors (3 Credit Hours)
Pre-requisites: Sophomore Standing or above; minimum grade of "C-" in ISSCM 241 or ISSCM 241H; Restricted to SBA Honors Students
Introduction to concepts and methods for managing production and service operations. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, and logistics.
Course equivalencies: SCMG332/332H/SCMG232/232H
Outcomes:
Understanding of basic issues and role of operations management in organizations, and of tools for problem-solving in operations management

Economics (BBA)

The BBA in Economics will equip you with a knowledge of principles, theories, and concepts of economics and business, which will help you to become a responsible and successful leader in your chosen fields. Our students who continue their education are accepted at many top universities.

Related Programs

ECON 328	Environmental Economics	
ECON 329	Health Economics	
ECON 334	Economics of Government Expenditures & Taxation	
ECON 336	Monetary and Fiscal Policy	
ECON 346	Econometrics [4]	
ECON 360	Labor Economics	
ECON 370	Pricing & Industrial Organization	
ECON 399	Special Topics in Economics [3]	
MATH 360	Introduction to Game Theory	
Total Hours		**78**

1. One must be a Quinlan course or ENGL 210 Business Writing. Writing Intensive courses must be taken in separate terms.
2. A study abroad experience will also satisfy this requirement.
3. Only one ECON 399 Special Topics in Economics class is allowed to count for this major.
4. If counting ECON 346 towards ECON-BBA requirements, then INFS 343 should be taken for BBA Core.

Students wishing to pursue doctoral study in economics are advised to take additional mathematics courses including the calculus course sequence (MATH 161 Calculus I, MATH 162 Calculus II and MATH 263 Multivariable Calculus); MATH 212 Linear Algebra; and two 300-level mathematical statistics courses (STAT 304 Introduction to Probability, STAT 305 Introduction to Mathematical Statistics). Students should consult with their economics advisor about completing mathematics courses.

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor. All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses.

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Students will explain, calculate, and analyze key concepts in microeconomics (consumer behavior, firm decision#making, market structure, pricing) and macroeconomics (GDP, inflation, unemployment, fiscal and monetary policy) to understand how economic forces shape business decisions and societal outcomes.
- Students will demonstrate proficiency in applying statistical and econometric methods to economic and business data, including formulating hypotheses, estimating models, and interpreting empirical results using tools such as Stata, R, or Python.
- Students will use core economic reasoning—opportunity cost, marginal analysis, incentives, and trade#offs—to evaluate public policies, business strategies, and organizational decisions, with attention to the ethical and socially responsible implications of such outcomes.
- Students will articulate complex economic concepts, models, and data-driven insights clearly and persuasively through written reports, visualizations, and oral presentations, demonstrating the ability to translate analysis into actionable recommendations for diverse audiences.
- Students will analyze contemporary economic challenges—including international trade, environmental sustainability, income and wealth inequality, government regulation, healthcare, urban development, industrial organization, and banking—and provide informed, professional, and ethically grounded advice that reflects a commitment to the common good and social justice.

Economics Minor

Any Loyola student who wishes to expand his or her skills in economics may pursue an economics minor.

Important Details

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy minor requirements. A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Understanding principles of economic reasoning
- Applying economic theory to policy analysis
- Quantifying benefits and costs of market structures

Entrepreneurship (BBA)

It takes more than a great idea to build a great business. The Quinlan School of Business BBA in Entrepreneurship degree program provides the real-world insights and skills you need to translate your creativity into a workable business plan. The skills you learn will help you as a new venture entrepreneur or a corporate professional.

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN

program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Students will be able to identify, evaluate, and articulate entrepreneurial opportunities by applying creative problem#solving, opportunity scanning methods, and iterative thinking.
- Students will be able to develop value propositions and design products or services that meet customer needs through research, experimentation, and market testing across the entrepreneurial lifecycle.
- Students will demonstrate the ability to apply ethical reasoning, integrate social justice principles, and design ventures that generate positive societal impact, including social enterprises and hybrid business models.
- Students will be able to develop and implement marketing, sales, and growth strategies that leverage entrepreneurial channels, customer insights, and resource#efficient tactics to scale new ventures.
- Students will demonstrate the ability to evaluate global markets, assess international business conditions, and adapt entrepreneurial strategies to diverse cultural and economic environments.

Entrepreneurship Minor

Students who wish to expand their skills in entrepreneurship may pursue a minor in this field. The minor in entrepreneurship provides excellent foundational knowledge of strategic aspects of the entrepreneurial process.

Coursework covers identifying business opportunities, developing unique business models, forming an entrepreneurial team, securing financial resources, and the importance and practical application of marketing, economics, accounting, finance, and management skills.

Important Details

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy minor requirements. A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Translating ideas into viable products or services
- Launching and growing a new venture
- Identifying and developing markets
- Develop problem-solving and critical thinking skills

Finance (BBA)

Invest in your future with our BBA in Finance.

The Quinlan School of Business has one of the finest undergraduate finance programs in Chicago. The finance faculty is especially well-known for its expertise in socially responsible investing and derivatives.

Related Programs

Major

- Accounting (BBA) (p. 775)
- Accounting and Analytics (BBA) (p. 777)

Minor

- Finance Minor (p. 795)

Combined

- Finance (MBA/MSF) (p. 1869)

Curriculum

All Quinlan School of Business students must complete the University Core Curriculum (https://www.luc.edu/core/index.shtml/#den240660), Business Core Curriculum, and Undergraduate School of Business program requirements. Students pursuing the BBA degree in Finance must also complete 18 required hours from the Major Requirements listed below.

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Students will apply core principles of corporate finance—including discounted cash flow analysis, capital budgeting, cost of capital, capital structure, corporate restrucruring, and firm valuation—to make informed, data driven decisions that enhance and sustain organizational value.
- Students will apply modern asset pricing and portfolio theories to evaluate financial securities including bonds, stocks, and options and construct diversified portfolios aiming to manage risk and return effectively.
- Students will identify, measure, and manage financial and operational risks using derivatives, asset liability management tools, and financial technology processes to design effective hedging and risk mitigation positions.
- Students will demonstrate an integrative understanding of financial markets, intermediation, and regulatory environments in managing inflation, employment, and overall economic growth domestically and globally.
- Students will integrate ethical reasoning and social responsibility into their financial analysis and professional decision#making, with attention to the broader societal implications of financial practices.

Finance Minor

Students who are pursuing other majors but who wish to expand their skills in this field may pursue a minor in finance.

Related Programs

Major

- Finance (BBA) (p. 793)

Combined

- Finance (MBA/MSF) (p. 1869)

Curriculum

The Finance minor requires the following credit hours for completion:

- Quinlan students require 9 credit hours (see footnotes below)
- Non-Quinlan students require 18 credit hours

Code	Title	Hours
Required Courses		
ACCT 201	Introductory Accounting I [1]	3
ECON 201	Principles of Microeconomics [1]	3

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Interpersonal skills theory
- Understanding of ethical perspectives and sustainable outcomes with respect to all aspects of HR management
- Methods for sustaining employee diversity
- Develop a global perspective as it relates to human resources
- Training, organizing, motivating, and evaluating people in work settings
- Compensation and benefits and employment relations

Information Systems and Analytics (BBA)

The ability to combine systems knowledge with an understanding of the "big picture" means job-ready value. Our BBA in Information Systems and Analytics degree program at the Quinlan School of Business prepares students for a professional career in the rapidly changing fields of information systems and data analysis.

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are

not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Students will design and implement a fully functional relational database— including an ERD, normalized schema, and database back and front ends. Students will create functioning SQL queries.
- Students will demonstrate the ability to use the systems development life cycle, including requirements analysis, process modeling, and system design.
- Students will correctly write and execute programs (such as Python or VBA) involving data structures, files, and basic data analysis.
- Students will create an interactive dashboard using modern BI tools (e.g., Tableau or Power BI) that communicates insights effectively.
- Students will demonstrate ethical reasoning and responsible decision-making in data analysis.

The Loyola student network provides the student with access to current systems development environments such as Oracle, Teradata, OLAP/BI Tools, Data Visualization Tools, VBA, and C#.

Information Systems Minor

Students who wish to expand their skills in information systems may pursue a minor in this field. The minor in information systems management provides excellent foundational knowledge of applications, data and systems used in business and nonprofit organizations.

The minor in information systems is designed to increase job opportunities and enhance your career path, regardless of your primary major. When it is combined with a liberal arts major, students gain a better understanding of the role of information systems in business and technology, particularly data management and project management systems.

Important Details

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to

matriculating at Loyola University Chicago may be allowed to satisfy minor requirements. A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Approaches to organizing, analyzing, and visualizing business data
- Integrating values and ethics into data analysis and information systems projects and solutions
- Develop skills in one or more programming languages used in the current business environment

International Business (BBA)

The BBA in International Business degree at the Quinlan School of Business prepares students to excel in positions involving global trade and commerce. We offer the business and communication skills needed to compete internationally.

The major combines courses in international accounting, marketing, economics, finance, management, supply chain management, some international political science choices and cultural anthropology choices with foreign-language study. A study abroad (http://www.luc.edu/studyabroad/) experience is required for the major.

The program draws on the resources of Chicago, which is a center of global commerce, including some of the country's largest venture capital firms, the Chicago Board of Trade, Chicago Mercantile Exchange, Chicago Board Options Exchange, corporate headquarters, and Fortune 500 companies.

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and

including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Through project-based learning, students will develop strategic management skills for multinational enterprises (MNEs)
- Students will understand and apply techniques of international financial management
- With coursework and a study abroad experience, students will enhance and develop their foreign language skills

International Business Minor

Students who wish to expand their skills in international business may elect to pursue a minor in this field.

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and

including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Management concepts and theories
- Leadership skills for career success
- Business ethics
- The dynamics of human behavior in the workplace
- Team processes and performance in organizations
- Team-based management and negotiation skills

Management Minor

Students who wish to expand their skills in management may pursue a minor in management.

Related Programs

Major

- Business Administration (AA) (p. 34)
- Management (BA) (p. 884)

Minor

- Nonprofit Management Minor (p. 811)

Curriculum

The Management minor requires the following credit hours for completion:

- Quinlan students require 9 credit hours[1]
- Non-Quinlan students require 18 credit hours

Code	Title	Hours
Required Courses		
MGMT 201	Managing People and Organizations [1]	3
Select two of the following: [1]		6
ACCT 201	Introductory Accounting I	
ECON 201	Principles of Microeconomics	
or ECON 202	Principles of Macroeconomics	
INFS 247	Business Information Systems	
MARK 201	Principles of Marketing	
Electives		
Select three of the following: [2]		9
IBUS 315	International Management	
MGMT 318	Organizational Development and Change	
MGMT 320	Leading and Managing Teams

Total Hours	**18**

Important Details

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy minor requirements. A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Management concepts and theories
- Leadership skills for career success
- Appreciation for applications of ethics to business decisions
- Comprehending dynamics of human behavior in the workplace

Marketing (BBA)

Marketing involves creating, communicating, delivering, and exchanging value, and can take various forms. From an Instagram influencer's posts to a vendor in an open market—marketing shapes our everyday lives.

The BBA in Marketing degree program at the Quinlan School of Business concentrates on developing difference-makers who value diversity, equity, inclusion, sustainability, and ethics in the aim to use marketing as a force for good in society.

Related Programs

Major

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted

to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Apply core principles of marketing to analyze exchange in markets and guide decision#making.
- Integrate social justice perspectives and a global stakeholder#oriented approach into strategic marketing decisions and practices.
- Formulate, integrate, and execute all components of a comprehensive marketing plan using evidence#based and ethical reasoning.
- Evaluate why and how consumers behave based on data and insights, trends, and shifting socio-cultural environments.
- Understand how digital tools, platforms, and analytics informs the design, implementation, and assessment of marketing strategies.
- Apply appropriate research methods to investigate consumer behavior, market trends, and social, environmental and economic dynamics.
- Demonstrate field#specific competencies in market research, consumer behavior, and digital marketing, marketing strategy and integrated marketing communications.

Marketing Minor

Students who wish to expand their skills in marketing may pursue a minor in this field.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Understanding models of consumer behavior and market research
- Developing and executing a marketing strategy
- Traditional and digital marketing approaches
- Marketing for the greater good, with an emphasis on ethics and social justice

Nonprofit Management Minor

The Nonprofit Management minor supports students in gaining the knowledge, skills, and values to be future leaders in the social sector, including at nonprofit institutions, philanthropies, and government agencies. Students will:

- Explore the principles and practices of successful leadership
- Examine how nonprofits develop their missions, strategic plans, fundraising initiatives, and program models
- Develop economic analysis and entrepreneurial skills that they can apply in nonprofit settings
- Participate in an internship at a nonprofit organization that provides hands-on exposure and experience in management

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for the minor. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Spring		
SPRT 130	The Business of Sports	3
	Hours	**3**

Year 2	
Fall

SPRT Elective	3
Hours	**3**
Total Hours	**18**

Important Details

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy minor requirements. A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Contrasting structures and operations of sports organizations
- Principal business functions (e.g., finance, marketing, management, data analysis) in sports-related organizations
- Legal, ethical, and social issues in sports and sports business
- Globalization in sports and related industries

Supply Chain Management (BBA)

Achieve a sustainable competitive advantage for your organization by learning how to manage its supply chains. Effective supply chain management helps provide quality products, outstanding customer service, and effective cost control.

Related Programs

Major

- Management (BBA) (p. 805)

Minor

- Management Minor (p. 807)
- Supply Chain Management Minor (p. 817)

Curriculum

All Quinlan School of Business students must complete the University Core Curriculum, Business Core Curriculum, and Undergraduate School of Business program requirements. Students pursuing the BBA degree in Supply Chain Management must also complete 18 required hours from the Major Requirements listed below.

Code	Title	Hours
Undergraduate Business Program Requirements		
COMM 103	Business & Professional Speaking	3
ETHC 341	Ethics in Business	3
MATH 110	Business Precalculus	3
or MATH 118	Precalculus II	
QUIN 101	Business Learning and Careers	0
QUIN 102	Financial Literacy and Well-Being	1
QUIN 202	Career Preparation	2
Writing Intensive		
Select two Writing Intensive courses [1]		6
Global Awareness		
Select one of the following: [2]		3
Any business course from the International Business Major Group, or: (p. 816)		
ANTH 100	Globalization and Local Cultures	
ANTH 102	Culture, Society, and Diversity	
ENTR 313	Entrepreneurship - Global Opportunity Scan	
GLST 101	Introduction to Global Studies	
PLSC 102	International Relations in an Age of Globalization	
Business Core Curriculum		
ACCT 201	Introductory Accounting I	3
ACCT 202	Introductory Accounting II	3
ECON 201	Principles of Microeconomics	3
ECON 202	Principles of Macroeconomics	3

Specialized Requirements

Transfer Students

At the discretion of the Quinlan School of Business, a maximum of one transfer course (https://www.luc.edu/quinlan/academics/studentresources/undergraduate/transfercredit/) taken prior to matriculating at Loyola University Chicago may be allowed to satisfy major requirements.

Study Abroad

Students planning to study abroad are encouraged to meet with their academic advisor early in the planning stage. A student will be permitted to take up to two approved courses in any Quinlan major or minor (and including BA Economics majors). All study abroad courses must be reviewed through the Study Abroad Office course approval process.

Important Details

A 2.0 average GPA is required for all attempted business courses. (BA in Economics students must also earn a 2.0 average GPA for all attempted Economics courses).

Quinlan students are limited to double dipping once (that is, counting one course twice) between any major or minor combination, regardless of what program the major or minor is taken in. Non-Quinlan students are limited to double dipping twice (that is, counting two courses twice) between business school minors and/or their respective majors.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Understand how analytics are applied in supply chain management: Students will understand how organizations in different industries develop analytics techniques for supply chain activities such as customer segmentation, demand forecasting, inventory classifications, and supplier selection. Students will develop foundational skills in probability, descriptive analytics, data visualization, and predictive modeling. Students will be able to identify, manipulate, visualize, and model data with widely-used software and successfully complete multiple business analytics-based assessments and a project.
- Understand and develop optimization models in supply chain management: Students will understand how organizations in different industries develop optimization models to make supply chain decisions related to production planning, distribution network design, routing, and scheduling. Students will implement optimization models in Excel and successfully complete multiple optimization-based assessments and a case study, with many based on or involving applications and data from an industry application.
- Discern the duties and responsibilities of the primary functional roles in supply chain management: Students will understand the different job functions that play a role in the design, planning, and execution of efficient and sustainable supply chains. Students will learn how to make effective decisions in at least three roles and assess how each would align with their longer-term career goals.
- Evaluate Global Supply Chain Strategies: Students will identify and assess the complexities that arise when executing a global supply chain. Students will learn how to manage and select overseas suppliers and manage global transportation operations. Students will successfully complete multiple assignments that assess their ability to assess the opportunities and risks of executing a global supply chain.
- Integrate Social Responsibility and Sustainability into Supply Chain Management: Students will understand how principles related to social responsibility and sustainability impact supply chain management decisions. Further, students will use the skills developed in supply chain analytics and optimization to analyze and address challenges in socially focused supply chain and operations settings. Students will successfully complete multiple assignments across five classes that assess student understanding of how issues goals related to social responsibility and sustainability can be achieved through supply chain decision-making

Supply Chain Management Minor

Students who wish to expand their skills in supply chain management may pursue a minor in this field.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Operational and analytical methods
- Ethics and the supply chain
- Process design and improvement
- Managing purchasing, logistics, and inventory

Sustainability Management Minor

Students who wish to learn how to manage for people, planet, and profit may pursue the Sustainability Management minor.

This minor provides foundational knowledge of the applications of sustainability in management, marketing, and economics. Students will:

- Learn the social, environmental, and economic impacts of current business systems and consumer society
- Explore alternatives to the current system
- Gain an understanding of the scientific, moral, and business case for sustainability
- Learn standards and metrics for gauging sustainability impacts

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Determining companies' role in doing business for people, the planet, and profit
- Potential positive and negative impact of business on the environment
- The scientific, ethical, and business cases for pursuing sustainable business
- How principles of sustainability take shape in specific business functions, such as marketing and the supply chain

U.S./Europe Double Degree (BBA)

The U.S./Europe Double Degree in Business is an immersive experience that will widen your marketability and extend your career possibilities in the U.S. and Europe.

As part of the program, you'll study two semesters in Spain, one semester in Rome, and your remaining semesters in Chicago.

Current Loyola freshmen are encouraged to apply to the program.

Learning Outcomes

- Foundational business knowledge for the U.S. and Europe
- How to live and interact with different cultures
- Global approaches to social justice and sustainability
- Unique challenges facing multinational corporations

School of Communication

Mission

The School of Communication is a community of learners that fosters critical thinking and innovation, integrates big ideas in communication theory and practice, tells stories across multiple platforms and adapts to changing technology and social needs. We develop ethical professionals with the knowledge and dedication to make a lasting contribution through communication and service in the world.

For more information on Loyola's Jesuit mission, visit:

- University Mission Statement (https://www.luc.edu/mission/mission_vision.shtml/)
- Transformative Education in the Jesuit Tradition (https://jobs.luc.edu/media/lucedu/president/pdfs/FINAL-LoyolaTransformativeEducation-2015.pdf)

Values Statement

Members of the SOC community are dedicated to the well-being, growth and success of our students and our colleagues.

We are guided by our mission statement and by the Jesuit vision of *cura personalis*.

We believe:

- Members of this community should treat others with empathy and kindness.
- Honesty and trust-building should define our interactions.
- Collaboration should be the signature of our work.
- The core of all we do must reflect values of ethics, social justice, diversity, equity, and inclusion.

Through these beliefs and the actions that bring them to life, the SOC community fosters an environment of learning and belonging for all.

Degree Requirements

Students must fulfill the following requirements in order to graduate from the School of Communication with a bachelor's degree:

- Core Requirements
- College Requirements: Writing Intensive Course Sections and the Language Requirement
- School of Communication Major Requirements
- General Electives
- Residency Requirement

Core Requirements

The university Core Curriculum (p. 989) seeks to play a key educational role in every Loyola student's undergraduate experience. Designed to provide both breadth and depth to a student's program of study, the Core Curriculum introduces students to key concepts and modes of thought in a variety of areas of human intellectual endeavors. In particular, the Core introduces students to ten central Knowledge Areas of university learning, with a consistent focus on learning outcomes for those Areas. Core coursework develops students' understanding through knowledge and experience in the Knowledge Areas of artistic, historical, literary, quantitative, scientific, societal and cultural, philosophical, theological and religious studies, and ethical learning, plus written communication. In addition, the Core reinforces the development of six Skills crucial to facing the challenges of contemporary society. Each core course promotes at least one of the following skills: communication, critical thinking, ethical awareness and decision-making, information literacy, quantitative and qualitative analysis and research methods, and technological literacy. Finally, the Core integrates the understanding and promoting of four Values essential to a Loyola education: understanding

diversity in the US or the world; understanding and promoting justice; understanding spirituality or faith in action in the world; and promoting engaged learning.

To complete the Core Curriculum, students will take 16 courses across ten Knowledge Areas. Two courses are required in six of these areas (Historical Knowledge, Literary Knowledge and Experience, Scientific Literacy, Societal and Cultural Knowledge, Philosophical Knowledge, and Theological and Religious Studies Knowledge). Students will begin their studies in these six areas with a Foundational (or Tier I) course that will introduce them to critical ideas and methods of analyses in that area. After completing the Foundational course, students will have an array of options to further their studies by taking one of a variety of Tier II classes to pursue their particular interests in more depth. The other four Knowledge Areas (College Writing, Artistic Knowledge and Experience, Quantitative Analysis, and Ethics) require one course each.

Additionally, students will have the opportunity to apply their Loyola education to real world experiences through the Engaged Learning requirement. This requirement may be satisfied by a course within the Core Curriculum, or in a student's major or minor, or through an elective course.

Note: As of Fall 2005, students must earn a 2.00 overall cumulative GPA in Core Knowledge Areas and Engaged Learning courses. To calculate your cumulative Core GPA, use the GPA calculator available at http://www.luc.edu/advising/gpa_calculator.html (https://www.luc.edu/advising/gpa_calculator.shtml/).

Click on the links below to view the guides and worksheets about Loyola's Core Curriculum and Values Across the Curriculum requirements.

- Core Curriculum (p. 989)
- Student Resources (https://www.luc.edu/core/studentresources.shtml/)

School Requirements

All SOC students are required to complete a language competency requirement and two writing-intensive sections of curses. These courses must be completed with a C- or better.

Writing Intensive Sections

Students should expect that virtually all of their courses will include a writing component. In addition, the college requirement for writing intensive courses is a means of strengthening the writing of all students throughout their years at Loyola.

In order to graduate with a degree from the School of Communication, students ordinarily must complete three writing courses. These include:

- UCWR 110 Writing Responsibly (3 credit hours) (Core Curriculum requirement)
- Two writing-intensive sections

Writing-intensive sections are designated sections of courses that are taught with a special emphasis on writing. They are identified by a "W" in the section number. Students in these course sections will have a variety of writing assignments that will be integrated closely with the learning objectives of the course. Often, students will be able to complete a writing-intensive course within their chosen major(s) and minor(s). The purpose of the program is to assure that students continue to give attention to writing as an essential component of education throughout their years at Loyola. Note: UCWR 110 Writing Responsibly must be taken in the freshman year and must be completed with a grade of "C-" or better before any writing-intensive course may be taken.

In order to ensure that training in writing is spread throughout the undergraduate years, the program specifies that no more than one writing-intensive course per semester may be applied to this requirement. Students must earn a C- or better in each writing intensive course in order for the requirement to be satisfied.

Transfer students who have taken and passed (with a C- or higher) both semesters of a two-semester requirement in college composition at their previous institutions or who have taken a composition course that is equivalent to UCWR 110 Writing Responsibly are not required to take UCWR 110 Writing Responsibly at Loyola. Transfer students with 59 or fewer transfer credit hours (completed prior to matriculation) must take two writing-intensive courses during their undergraduate career at Loyola; transfer students with 60-89 transfer credit hours must take one writing-intensive course during their undergraduate career at Loyola; transfer students with 90 or more transfer credit hours are exempt from taking writing-intensive courses. For further information, transfer students should consult their academic advisor.

Language

Competency in reading, writing, and speaking at the 102-level or higher in a language other than English is required for all SOC students. Students may complete this requirement in one of the following ways:

- In a language other than English, complete Loyola language coursework, earning a C- or better at the 102-level or above. (If a student wishes to study a language for which they have no background, this equates to taking two semesters of the same language, i.e. 101 and 102.). If coursework in a language is not offered at Loyola, a student may review eligibility and seek permission to take coursework at another college or university during the summer in accordance with the Policy on Prior Permission to Take Coursework at Other Universities (p. 1919). Students must first consult an academic advisor about this policy.
- Earn the 102-level or above equivalent in transfer credit from another college/university, prior to Loyola matriculation.
- If a student wishes to continue studying a language that is offered at Loyola, they may complete an online placement test that helps place them into the most appropriate language course. Scores are recorded for future reference and are valid for 15 months. (Past 15 months, students should retake the exam.) Students who take this exam must adhere to the Loyola policy on Academic Integrity —they should not receive help. This placement exam does not fulfill the language requirement. Rather, it determines at what level of a language a student should begin taking coursework.
- Earn a score of 4 or 5 on an Advanced Placement (https://www.luc.edu/undergrad/academics/creditbyexam/) examination (a score of 3 on an AP exam will satisfy the Language Requirement, but will not award academic credit). **or**
- Demonstrate competency by passing a Language Competency examination. Students are permitted to take only one competency exam. Multilingual students who wish to take this exam should test in the language they know best. If a student does not pass their one competency exam, they must take language coursework, adhering to the above rules. Note: Language Competency exam results may take up to six weeks to return. Students who wish to take an exam are strongly encouraged to schedule the exam as soon as possible upon matriculation, and no later than the end of their junior year.

For a list of Language Competency exams offered, please consult the Department of Modern Languages and Literatures website (https://www.luc.edu/modernlang/placementcompetency/foreignlanguagecompetencyexam/).

To schedule an appointment to take a Language Competency exam, send an email (from your Loyola account) to LanguageTesting@luc.edu. Include your Name, Student ID number, current SoC major, and the language in which you would like to be tested. The Department of Modern Languages and Literatures will reply with instructions on how to schedule your specific exam. Note: Students are responsible for the $100.00 cost of the exam. Language Competency exams that are conducted in the Language Learning Resource Center (LLRC) may not be scheduled during the first week of each semester or during registration week in each semester.

Requesting a Language Competency Exam in a Language Not Offered at Loyola

Students who would like to test in a language that is not offered at Loyola may submit a request (during their first semester in the SoC) to the Department of Modern Languages and Literatures by completing the Language Exam Request (https://www.luc.edu/media/lucedu/cas/pdfs/languageexamrequest.pdf) (PDF) for a competency exam in that language. The request form must be submitted to LanguageTesting@luc.edu. Once a request is submitted, the Department of Modern Languages and Literatures will make a reasonable effort to locate an academically qualified tester at Loyola or at another college or university. If a Language Competency exam is made available and the student passes the exam, they will meet the 102-level language requirement.

If no qualified tester can be found within one academic semester, the student's request will be denied, and the student will be required to satisfy the SoC language requirement via language coursework at the 102-level or higher.

Elective Courses

Students must complete at least 120 credit hours (as of Fall 2011) to graduate from Loyola. By definition, electives are courses not used toward completing the major, minor, or Core requirements, and which students take to complete the graduation requirement of 120 credits. We encourage students, when choosing electives, to think of the knowledge, values, and skills you hope to gain in exploring a particular academic interest or in anticipation of a career after graduation. For undeclared students, elective courses present an excellent opportunity to develop academic interests leading toward a major or minor. General electives also present an opportunity to broaden your liberal arts education, add to your skill set, or simply try a new subject for the joy of it.

Residency Requirement (Required Hours in Residence)

In-residence hours refers to the course credit hours taken at Loyola University, the Rome Center, or taken from any of the Loyola sponsored study abroad programs through the Office for International Programs.

Students must take their final, uninterrupted 45 hours of instruction or a minimum of 60 hours in residence at Loyola University Chicago.

Undergraduate Programs

- Advertising & Public Relations (p. 840)
  - Advertising & Public Relations (BA) (p. 840)
  - Public Relations Minor (p. 842)
- Advertising Creative (p. 843)
  - Advertising Creative (BA) (p. 843)
  - Advertising Minor (p. 845)
- Communication Studies (p. 846)
  - Communication Studies (BA) (p. 846)
  - Communication Studies Minor (p. 847)
  - Environmental Communication Minor (p. 849)
  - Professional Communication Minor (p. 850)
- Film and Digital Media (p. 851)
  - Digital Media Minor (p. 851)
  - Film and Digital Media Minor (p. 852)
  - Film and Digital Media: Film and Media Production Track (BA) (p. 853)
  - Film and Digital Media: International Programming Track (BA) (p. 855)
- Multimedia Journalism (p. 857)
  - Multimedia Journalism (BA) (p. 857)
  - Multimedia Journalism Minor (p. 858)
- Public Communication and Advocacy (p. 859)
  - Advocacy and Social Change Minor (p. 859)
  - Public Communication and Advocacy (BA) (p. 860)
- Sports Media (p. 861)
  - Sports Media (BA) (p. 861)

Communication (COMM)

COMM 100 SOC Career Prep Seminar (1 Credit Hour)
This is a professional development course to help students expand their knowledge of communication fields and to begin career preparation for those fields.
Outcomes:
Develop and polish professional communication tools (resume, cover letters, LinkedIn, etc); prepare for professional interactions (interviews, etc); and make connections within the SOC and beyond

COMM 101 Public Speaking & Critical Thinking (3 Credit Hours)
Pre-requisites: Student can only take one of the following: ACCOM 101, ACCOM 103, COMM 101, COMM 103
This introductory course is designed to supply students with the skills of public address, a fundamental understanding of critical thinking practices, foundational tenets of communication theory, a grasp of the relationship between context and communication, and a sense of the social responsibility that comes with the capacity for communication.
Interdisciplinary Option: Forensic Science
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students gain skills in public speaking and an understanding of critical thinking

COMM 103 Business & Professional Speaking (3 Credit Hours)
Pre-requisites: Student can only take one of the following: ACCOM 101, ACCOM 103, COMM 101, COMM 103, Restricted to Quinlan School of Business Students
This class examines the theory and practice of audience analysis, message design, and oral presentation for professional speakers, with an emphasis on communication in organizational settings.
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students will demonstrate presentation skills in simulated organizational settings

COMM 130 Intro to Audio Production (3 Credit Hours)
This class offers a study of basic audio production methods across new media platforms. Topics include acoustics, recording methods, digital editing, and sound as an industry and art form.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM130/ICVM238/IFMS238
Outcomes:
Students will produce creative projects using the skills they have learned

COMM 135 Intro to Video Production (3 Credit Hours)
This course is a hands-on introduction to video field production. By designing and executing a series of short, creative production projects of varied forms, students explore how video techniques are used to structure meaning in media messages.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM135/ICVM235IFMS235
Outcomes:
Student will be able to demonstrate an understanding of basic video production skills, such as preproduction planning, lighting, filming and editing, by producing several video texts

COMM 140 Intercollegiate Debate (1 Credit Hour)
This course offers students active participation in Loyola Debating Society. A maximum of six hours in intercollegiate debate credit allowed.
Outcomes:
Students will gain experience in debate

COMM 145 Video for Journalists (3 Credit Hours)
Pre-requisites: MJRN majors and minors may enroll, as well as EVCM minors
Entry-level course that will serve as an introduction to basic video/audio journalism. The goal of the course is for the student to develop the ability to capture great video images and audio, and to be able to edit those two elements together to tell a non-fiction video story. For MJRN majors and minors only An understanding of how to operate a video camera; how to capture/edit video; how to tell a journalistic story with video, and the differences between journalistic videos and fictional videos.
Course equivalencies: X-COMM135/ICVM235IFMS235
Outcomes:
An understanding of how to operate a video camera; how to capture/edit video; how to tell a journalistic story with video, and the differences between journalistic videos and fictional videos

COMM 175 Introduction to Communication (3 Credit Hours)
This course gives a general historical and theoretical overview of communication. By looking at communication through a critical, historical, and theoretical lens, students will acquire an intellectual framework for further study and practice in communication.
Course equivalencies: ACCOM 201 / COMM 175
Outcomes:
Students will increase communication literacy

COMM 200 Digital Communication and Society (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course explores the ways technology affects personal, cultural, and mass communication through examining the historical, societal, and ethical implications of newer and interactive forms of media.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X - COMM / ACCOM 200
Outcomes:
Students use audio, video, and digital tools to research and produce essays, projects, and presentations that analyze the impact of technology on communication

COMM 201 Media Theory and Criticism (3 Credit Hours)
This course is an introduction to the study of traditional mass media and new media from a critical and interpretive perspective. Students taking the course should be able to understand and apply textual analysis methods to specific media texts, such as films, TV shows or videogames.
Course equivalencies: X-IFMS201/COMM201
Outcomes:
This course reviews semiotics and other methods of textual analysis of media

COMM 202 Story for Film and Television (3 Credit Hours)
Pre-requisites: COMM 274
An introduction to visual writing, story structure and character development for film and TV. Through in-class exercises, analysis of scripts, and assignments focused on storytelling fundamentals, students will learn what makes a compelling concept, where great ideas come from, and effective ways to build a narrative for the screen.
Outcomes:
Story will: write pitches, synopses, loglines and titles for the screen; create original characters; learn 3-act storytelling structure; develop original story treatments, outlines and pitches for film, TV or webseries

COMM 203 Topics in Cinema History (3 Credit Hours)
The course examines the aesthetic, social, technical, and theoretical evolution of cinema offered as specific topics that include, but are not limited to: war and revolution, social history and cinema, the role of women, Indian cinema, musicals, technology and style, and the realistic impulse.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM203/ICVM260IFMS260
Outcomes:
Students are offered a variety of topics, broadening their view of the film industry

COMM 204 Community as Story (3 Credit Hours)
This course uses children's literature as a means of understanding urban community and individual identities within that community. Students will though, community service, interaction with local experts and ethnographic research, explore communities surrounding Loyola's lake shore campus and create their own children's picture books in collaboration with experienced student artists.
This course satisfies the Engaged Learning requirement.

COMM 205 Reporting Basics I: Writing and Interviewing (3 Credit Hours)
Pre-requisites: UCWR 110 with a grade of C- or higher
This course examines current issues in US journalism with strong emphasis on developing skills in news reporting, interviewing, and writing.
Outcomes:
News judgment; Writing concisely and clearly; Writing on deadline; AP style; Interviewing techniques; Grammar, spelling, and punctuation; Ethics and legal issues; Basic research methods

COMM 206 Hip Hop Culture and Social Change (3 Credit Hours)
Pre-requisites: COMM 175 or 201
Grounded in Black studies, communication studies, critical cultural studies, political advocacy, popular culture, and the growing field of hip hop studies, we will investigate hip hop's evolving relationship with social change in the U.S. and beyond. Particular attention will be paid to Chicago's hip hop scene and its community building.
Outcomes:
1) Gaining a basic understanding of the subject; 2) Developing knowledge and understanding of diverse perspectives, global awareness, or other cultures; 3) Gaining a broader understanding and appreciation of intellectual/cultural activity (music, etc)

COMM 207 Photojournalism (3 Credit Hours)
Pre-requisites: COMM 205
Photojournalism introduces students to the art of photographic storytelling.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students learn to distinguish journalistic photography from self-expressive photography through editing, critique, and digital manipulation and also understand the ethics of photojournalism through graphic concepts and page design

COMM 208 Reporting Basics II: Technology for Journalists (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205
This course teaches 21st century journalism skills and how to use the equipment and software to report and edit across platforms, including radio, television, and the Internet. Instruction will include how to use audio and video recording equipment, basic Web design, use of audio and video editing software, blogging, and social media programs.
Outcomes:
News judgment; Writing concisely and clearly; Writing on deadline: AP style; Interviewing techniques; Grammar, spelling, and punctuation; Ethics and legal issues; Basic research methods

COMM 210 Principles of Public Relations (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM and EVCM minors
This course introduces the theory and practice of public relations in communicating and establishing relationships with diverse publics. Topics include professional roles and ethical responsibilities, strategies and tools, media resources, and public relations writing.
Outcomes:
Students will be able to demonstrate an understanding of the roles and practices of the public relations professional, develop PR plans, and create a portfolio or writing samples

COMM 211 Principles of Advertising (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM and EVCM minors
This course provides an overview of the theory and hands-on practice of advertising including planning, strategy, creative development, and media planning. Elements of direct response, promotion, internet, and public relations are also presented.
Outcomes:
Students will be able to demonstrate an understanding of the principles of advertising and practice creative and decision-making skills in developing an advertising campaign

COMM 212 International Advertising (3 Credit Hours)
This course will build an understanding of the cultural, language, social, national and business factors that drive international markets. A key outcome is to broaden student perspectives on how organizations communicate with Italian and other European audiences.
Interdisciplinary Option: Global Studies

COMM 213 Digital Foundations (3 Credit Hours)
Pre-requisites: COMM 175 or 201; EVCM minors are waived from pre-requisite
Students will be introduced to digital media tools, including online content creation, SEO, website management, email marketing, social media engagement, digital advertising, analytics and emerging technologies that are used to create and build integrated digital campaigns for advertising and public relations.
Outcomes:
Ability to demonstrate elementary knowledge of digital communication tools; Practical understanding and capabilities for creating content across a wide range of media platforms; Knowledge of digital media platform technical requirements

COMM 214 Creative Concepts (3 Credit Hours)
Pre-requisites: COMM 211
This course introduces students to the creative process and idea generating techniques. Students explore what constitutes strong advertising concepts through exposure to award-winning ads and work in teams to create ads for assigned products.
Outcomes:
The emphasis is on conceptual development with students expected to express their ideas in rough rather than tightly finished layouts; The course focuses on print advertising but also provides opportunities to work across various other media

COMM 215 Ethics & Communication (3 Credit Hours)
Pre-requisites: COMM 175
COMM 215 does not meet Core Ethics. This course explores various approaches to ethical decision-making and applies that process to diverse aspects of every day, contemporary life.
Outcomes:
Students learn to discern a wide variety of ethical issues concerning communication behavior, apply systematic ethical analysis to various communication situations, and clearly explain their analyses

COMM 220 Introduction to Rhetoric (3 Credit Hours)
Pre-requisites: COMM 175
This course introduces theories of rhetoric, emphasizing the relevance of classical disputes for understanding current controversies over the nature and function of discourse. A central theme is the tension between rhetoric's promise for constructing a rich and meaningful civic life and the dangers of its descent into demagoguery and irrationality.
Course equivalencies: ACENG 220 / COMM 220
Outcomes:
Students will work through theoretical issues by examining speeches, films, and other rhetorical artifacts

COMM 226 Public Interest Communication (3 Credit Hours)
Pre-requisites: COMM 175
This course introduces students to the field of public interest communication--an evidence-based, interdisciplinary approach to using strategic communication for social good. Drawing from research and practice in communication, psychology, political science, and systems thinking, students learn how communication can shape public understanding, influence behavior, and support collective action. Through theory, case studies, and applied assignments, students develop skills in audience analysis, message design, and campaign evaluation while considering ethical implications and real-world applications in areas such as nonprofit advocacy, journalism, and corporate responsibility.\\n
Outcomes:
Describe and analyze the key components of public interest communication; Assess the effectiveness of at least one public interest campaign using appropriate theoretical and methodological frameworks; Design a strategic, public interest communication campaign plan that includes clear goals, target audiences, strategies, timelines, ethical implications and evaluation metrics

COMM 227 Social Justice and Public Communication (3 Credit Hours)
Pre-requisites: COMM 175, Prerequisites waived for Environmental Communication minors
This course examines the implications of communication processes and practices for democracy and social justice.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Outcomes:
Students will be able to articulate and defend their conception of the role of communication in achieving a just society and demonstrate an understanding of how existing communication institutions, laws, and norms impede or assist movement towards that goal

COMM 230 Argumentation & Advocacy (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM minors
This course is an introduction to analyzing and critiquing arguments, and inventing extended arguments to advocate positions.
Outcomes:
Students will be able to analyze and critique both individual arguments and extended cases; demonstrate understanding of the relationship of argumentation to audience and context; and invent arguments and develop cases for advocacy

COMM 231 Conflict Management and Communication (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for Professional Communication minors
This course explores the role of communication in conflict resolution. Special attention is paid to mediation and other forms of alternative dispute resolution.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Outcomes:
Students will acquire methods of analyzing the nature of conflict and applying appropriate communicative strategies for managing conflict

COMM 232 Cinematography I (3 Credit Hours)
Pre-requisites: COMM 135 and COMM 274
In this course, students will demonstrate their ability to apply aesthetic and theoretical principles and cinema production skills. Topics include pre-visualizations, preproduction planning, digital cameras system, cinematography, and lighting. Students work on individual and group projects involving project development, filming, and editing.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM232/ICVM232/IFMS232
Outcomes:
Students will demonstrate deliberate control over cinematographic aesthetics, camera systems, production process and set protocols, lighting equipment, safety, and visual storytelling; Students will demonstrate an understanding of ethical issues related to the emotional, psychological, and spatial effects of imagery, and the role that lenses, lighting, and composition plays in conveying ideas; Students will engage in collaborative problem-solving and learn proper set protocols for the safe, efficient, and responsible execution of moving image production

COMM 234 Interviewing for Communication (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201; Prerequisites waived for PCOM minors
This course explores the crucial skill of interviewing necessary for many aspects of professional and daily life. Students will learn different ways of interviewing depending on communication context.
Outcomes:
These approaches will enhance students' interviewing ethics as they gain practical experience

COMM 236 Persuasive Presentations (3 Credit Hours)
Pre-requisites: COMM 220, COMM 230, or COMM 268; Prerequisites waived for Environmental Communication minors
This class focuses on the creation and delivery of persuasive messages to develop a variety of persuasive strategies and implement them in both individual and group presentations.
Outcomes:
Students engage in situation analysis and message critique

COMM 237 Small Group Communication (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM minors
This class is an introduction to theory, research, and practice of communication that contribute to effective task-group discussion and decision making.
Outcomes:
The development of personal leadership skills and observational/analytic skills through guided, structured group activities

COMM 239 Moving China (3 Credit Hours)
This course offers a unique opportunity to film and document China as it changes virtually before our eyes.
Interdisciplinary Option: Asian Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Outcomes:
Students will have an intimate knowledge of China and Chinese culture and the talent and skill to produce a 15-minute documentary video in digital format

COMM 240 Communication Research Design (3 Credit Hours)
Pre-requisites: COMM 175
Introduction to research design with a focus on public communication and real-world ethical application, designed for undergraduate students from a range of disciplines. The course will review qualitative and quantitative approaches to inquiry and apply these approaches to social and communication problems. Students will learn how to structure research projects, collect and analyze data, and critically reflect on the relationship between research questions and the methods we use to answer them. No prior experience with research methods is required.
Outcomes:
Describe the key components of a research design, including the problem statement, research questions, methodology, and data collection strategy; Evaluate at least two published research studies, identifying strengths and limitations in their design choices and analyzing how those choices affect interpretation of results; Develop and present a proposal for a small-scale research study that includes a clearly defined research question, identification of key variables, justification of selected methods, and a detailed data collection plan

COMM 241 Digital Platforms (3 Credit Hours)
Pre-requisites: COMM 175
This course explores the digital platforms that shape our everyday lives--from social media and search engines to shopping and streaming services. Students will examine how platforms operate as invisible infrastructures that organize communication, commerce, and culture, drawing on scholarship about their political and social impact. Through research, discussion, and a final project, students will critically analyze how platforms influence our behaviors--and how they, in turn, understand us.
Outcomes:
Analyze the historical development and social functions of major digital platforms\\n; Evaluate platform governance that shape user experience and media ecosystems; Interpret and apply key scholarly arguments about platform politics, labor, and participation; Produce a research-driven project centered on platforms' social, cultural, and economic importance

COMM 242 Rambler Sports Locker (3 Credit Hours)
Pre-requisites: SPRT 130 or COMM 175, Students must apply to enroll; SoC will enroll
The School of Communication offers students the opportunity to engage in real-world media opportunities via Rambler Sports Locker. RSL provides Sports Media students with the opportunity to earn credit and produce professional, publishable work. Students must get permission to enroll in the course. Students are required to apply to the activity during the prior semester. Students will be vetted for GPA and reporting plan, which should be included in the enrollment submission form. If accepted, the student will be enrolled in the course. Students enrolled in RSL for credit will be held to tight deadlines and standards embedded in the current organization. As these groups are student-run cocurricular activities, enrolled students will be expected to work within the rules and hierarchies of the organizations.
Outcomes:
Write compelling and professional scripts and narratives; Perfect broadcast delivery & persona; Work in a team-setting; Meet tight deadlines; Conduct insightful and meaningful interviews; Utilize industry-standard equipment and software to produce news stories

COMM 243 Leadership and Social Change in Sports (3 Credit Hours)
Pre-requisites: COMM 175
This course explores the historical and rhetorical means by which sports leaders influence the policies, practices, and performances affecting members of sports teams, communities, news, and social media. The focus is on controversies, speeches, interviews, and social media posts. This course will use sports as an entry point to discuss historical movements, leadership, advocacy, ethics, and social justice. Students will explore activism, advocacy, political and social movements, and awareness of athletes, sports leaders, and sport personalities throughout time in a variety of mediums, discussions, and activities.
Outcomes:
Develop a personal and professional leadership plan and identity; Deliver effective persuasive and informative speaking presentations; Produce professional and academic written assignments; Understand the intersection of sports and social justice; Understand the intersection of positionality and leadership; Produce creative content to deliver multimedia messages; Advance knowledge around sports, culture, and history

COMM 244 Sports Analytics & Visualization (3 Credit Hours)
Pre-requisites: SPRT 130 or COMM 265
This course will examine the importance of numbers in the world of sports and computer-generated visualizations. Students will use contemporary tools to organize, scrape, clean, and present data in a way that synthesizes numerical information and packages it in a way that a general audience can consume. Students will delve into player, team, and league stats as well as the numbers around the business of sports and how to use data as a sports reporting tool.
Outcomes:
Locate accurate, primary data from open sources; Utilize computer languages to analyze sports data; Synthesize and interrogate data to tell a story; Produce striking designs to visualize data; Marry writing with numbers in journalistic reporting; Produce publishable news packages that lead with data and visuals

COMM 245 Sports Advertising & Marketing (3 Credit Hours)
Pre-requisites: (SPRT 130 or COMM 175) and (COMM 211 or COMM 213)
The world of sports is a unique combination of news, business, and entertainment. This course teaches students the history and fundamentals of sports marketing, advertising, events, and media planning, while also taking a historical look at sports advertising and commercial marketing. Students will examine advertising and marketing strategies of sports across media and develop their own campaign or event plan around sports for any media of their choice.
Outcomes:
Evaluate messaging across multimedia platforms; Use industry standard equipment and software to deliver marketing artifacts; Make ethical and creative contributions to the sports marketing field; Execute event plans across audiences and channels

COMM 250 Foundational ADPR Research Methods (3 Credit Hours)
Pre-requisites: COMM 175
This course introduces foundational research methods used in advertising and public relations to inform strategic decision-making. Students will learn how research supports audience understanding, message development, campaign evaluation, and ethical communication practice. Emphasis is placed on research literacy, applied methods, and interpretation of findings rather than advanced statistical analysis. Through hands-on exercises and a guided applied project, students will gain practical experience using research to solve real-world communication problems.
Outcomes:
Identify common research methods used in advertising and public relations; Explain when and why different research methods are used in communication planning; Apply basic qualitative and quantitative methods to communication scenarios; Interpret research findings and translate them into strategic insights; Evaluate ethical considerations in communication research

COMM 256 Broadcast Newswriting (3 Credit Hours)
Pre-requisites: UCWR 110 with a C- or higher and COMM 205
This course introduces basics of broadcast news and broadcast writing style. Students learn script writing and formatting, an introduction to radio and TV reporting, standard terms and basic newscast production, and an introduction to the studio. This course also provides a foundation for more advanced courses in the broadcast curriculum.
Outcomes:
Students gain experience writing for radio and TV news, as well as basic knowledge of the broadcast news industry and contemporary issues pertinent to the field

COMM 258 Game Studies (3 Credit Hours)
Pre-requisites: COMM 200
This course examines games and their complex role within contemporary culture. Games are approached as "texts" that can be "read" using a variety of theoretical lenses. Students will explore what games say about the nature of identity, community presence, learning, and communication and reflect on their own experience in a blog.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM258/IFMS258
Outcomes:
Build their understanding of some key foundational concepts in the field of Game Studies; Articulate how the role of games are debated and discussed in governmental, industrial, and academic contexts around the world; Engage with the creation of their own games through a range of design tools and methods; Foster nuanced discussions of games and their relationship to our society; Gain insight into how cultural norms and values are embedded in games, their design/production, and how we think about play

COMM 259 News Editing (3 Credit Hours)
Pre-requisites: COMM 175
This course examines the skills needed to act as a newsroom leader and manager, including copy editing, researching, photo and visual editing, working as an assignment, project and online editor. This course will benefit those who want to be an editor, manage people, shape newsroom culture and build community trust.
Outcomes:
Students will gain experience with production skills in the print medium

COMM 260 Environmental Journalism (3 Credit Hours)
The mission of environmental journalism is to raise public awareness about environmental news and issues. It is about being ethical, accurate, fair, and clear, whether reporting, investigating, or advocating for change.
Course equivalencies: X-ENVS 260/ COMM 260
Outcomes:
Students will be able to find, report, and present challenging stories around this topic, in print and in broadcast writing

COMM 261 Social Media and Society (3 Credit Hours)
Pre-requisites: COMM 200
This course explores how individuals, organizations, and brands use social media to connect, communicate, and engage audiences in today's digital environment. Students will learn by observing and analyzing real-world social media practices, including interviews with professional practitioners who specialize in content creation, community management, and digital strategy. The course emphasizes what works--and what doesn't--in building connection and engagement online. Through hands-on projects, case studies, and self-assessment, students will gain a clearer understanding of the strategic choices behind social media activity and reflect on their own digital practices as communicators.
Outcomes:
Demonstrate understanding of how practitioner insights inform social media strategy by articulating key themes and lessons derived from professional practices; Understand and apply principles of social media evaluation, including identifying strategic goals, target audiences, and platform choices, and assessing their effectiveness using established criteria; Recognize and explain the strategic and contextual factors that influence successful and unsuccessful social media practices, as illustrated through case studies; Explain and critically reflect on the benefits and risks of social media use for individuals and organizations, particularly regarding engagement, reputation, reach, and sustainability; Audit and assess their own social media practices and produce a strategic plan that aligns their online behavior with defined personal or professional goals

COMM 262 Feature & Opinion Writing (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205
This course examines methods of researching and writing editorials, commentaries, and features for print media.
Outcomes:
Students will broaden their research and writing skills

COMM 263 Editorial Design I: Newspaper & Online (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
Editorial Design I is an introduction to information processing and readership, and basic principles of layout and editing.
Outcomes:
Students experiment with a variety of printed formats and practice copy fitting, typography, and photo-editing

COMM 265 Sports Broadcasting (3 Credit Hours)
This course will teach students how to report and produce broadcast stories about athletes and athletic events. Students will have access to players and coaches on the professional and collegiate levels, attending games, practices and training. Students will learn to produce stories for radio and television, as well as sound broadcast presentation skills.
Outcomes:
Students will learn to conduct journalistic research, interviewing techniques, public speaking skills and how to produce stories for radio and television

COMM 266 Advertising Copywriting (3 Credit Hours)
Pre-requisites: COMM 214
This course will focus on the art of copywriting for advertising, be it for TV, print, outdoor, social media and the ever changing landscape of digital media. Students will learn to craft their words to make creative advertising based on strategies and insights.
Outcomes:
Through a series of creativity building exercises, short lectures, and readings, learners develop both an understanding of creativity and increase their own ability

COMM 268 Persuasion (3 Credit Hours)
Pre-requisites: COMM 175
This course is designed to explore theories related to persuasion, social influence, and compliance-gaining. Students will get practical experience in the analysis, criticism, and application of persuasive discourse across a wide variety of contexts.
Outcomes:
Gain familiarity with findings from empirical investigations on persuasion, social influence, and compliance gaining; Learn about strategies and techniques of persuasion relating to a wide variety of real-life communication contexts, situations, and settings; Identify strategies and tactics used by persuaders; Understand the ethical implications of persuasive strategies and tactics

COMM 269 Observing China (3 Credit Hours)
This course is about street-level China, as it is seen and as it happens. This course is a practicum, in which students, through a mix of lectures, briefings and discussions, will delve into nature of observation and engagement with and in China.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will have a deeper understanding of how journalists and documentarians observe and write (or film) China, and over the course of the semester will make some efforts of their own to do original journalism and essay writing

COMM 271 Media Culture and Communication (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course examines contemporary US American culture from a critical-theoretical standpoint while examining popular icons and social practices with particular attention to their influence on individual and collective identities.
Outcomes:
Students will learn critical cultural theories and do projects where they reflect upon the influences of contemporary cultural texts and practices with an eye for their economic, social and political influence on individual and collective identities

COMM 272 Intercultural Communication (3 Credit Hours)
Pre-requisites: COMM 175
This course introduces students to intercultural communication theory and research. Students explore how differences in ethnic, religious, economic, and geographical experiences produce social biases and engender conflict. Students are expected to explore their own cultural histories to understand how they create meaning and adopt attitudes.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Latin American Studies, Peace, Justice, and Conflict Studies
Outcomes:
Accurately use key intercultural communication concepts such as culture, positionality, power, colonization, globalization, whiteness, avowed and ascribed identity, and interdependence; Use the process of inquiry, framing, positioning, dialogue, reflection, and action (that is, praxis) to make sense of intercultural communication situations and practices; Design and successfully conduct an interview with an intercultural communication focus; Demonstrate awareness of one's own cultural identity, assumptions, and positioning

COMM 273 Interpersonal Communication (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM minors
Students study speech to understand its role in human relationships. This course focuses on self-exploration of communication patterns by asking life's big questions about self and other. Students will gain competence in interpersonal communication through the development of perceptual accuracy, and clarification of values with regard to relational goals.
Outcomes:
Identify characteristics and types of communication and of interpersonal communication; Define communication competence; Discuss the roles of identity and the self in communication; Recognize the relationship between communication and culture/s; Discuss the linguistic, sociolinguistic, and psycholinguistic aspects of communication

COMM 274 Introduction to Cinema (3 Credit Hours)
This course is an introduction to the study of cinema as a complex medium of communication. This course will provide students with the basic terminology, observational skills, and theoretical background for the study of film aesthetics, language, cultural analysis, history, and the production of cinematic texts.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: ACCOM / COMM 274
Outcomes:
Become familiar with and apply the basic approaches to film studies, such as narrative studies analysis, formalist analysis, and critical practices; Acquire the basic film vocabulary (eg, shot/reverse shot, sequence, lighting, editing, narrative/narration, point of view/POV, sound) and tools for analyzing films as texts; Become familiar with and differentiate among a variety of film forms (eg, documentary, animation, experimental film), film genres (eg, horror, western, musical, melodrama), film movements and styles, and national cinema; Analyze and evaluate films from different eras and cultures verbally and in written form

COMM 275 Web Design and Usability (3 Credit Hours)
Pre-requisites: COMM 200; Prerequisites for Visual Communication majors and minors is FNAR 383; Prerequisites waived for Professional Communication and Environmental Communication minors
This course will explore the design and usability of websites from several perspectives: how they look (aesthetics), how they work (navigability and usability), and how they are made (tools and software). Lectures, demonstrations, and in-class lab time will introduce students to the creative tools and software that power contemporary web design and usability. Emphasis will be on using a variety of tools and resources to meet one's own goals, rather than achieving the level of expert in any one piece of software.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Explain the unique qualities of the web as a storytelling medium and how portfolio sites can communicate creative identity; Apply content-first and information architecture principles to organize and present work clearly for target audiences; Evaluate design choices--typography, color, imagery, and layout--for clarity, readability, and alignment with personal brand; Conduct and interpret user testing to refine and improve the digital experience; Design and present a personal portfolio website that showcases creative work and positions them for professional opportunities

COMM 277 Organizational Communication (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM minors
This course is an introduction to theory and practice of organizational communication, with an emphasis on organization contexts, culture, and systems, and the role of communication in building relationships with internal and external stakeholders.
Outcomes:
Students will be able to analyze organizational communication, and understand the impact of technology, globalization, community and diversity on organizational systems

COMM 278 International Public Relations (3 Credit Hours)
This course explores the growing impact of globalization on public relations. As multinationals grow and social, economic, and environmental issues become worldwide in focus, PR professionals work in increasingly interconnected world. Students will explore the growth of international public relations by comparing countries, analyzing and discussing cases, and learning best practices.
Interdisciplinary Option: Global Studies

COMM 279 Critical Issues in Journalism (3 Credit Hours)
Pre-requisites: COMM 175
This course examines different approaches to understanding the role of journalism in contemporary society, emphasizing the historical development of issues that surround journalism today.
Outcomes:
Students explore varied critical perspectives on news and news-gathering to gain a broader understanding of the role of journalism in society

COMM 280 Media Technology & Society (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
Through lectures, discussions, and assignments, learn the evolutionary history of media technologies from the telegraph through film, television, and digital media, and review contemporary theories about how technology shapes society.
Outcomes:
Learn histories of media technologies and their effects on the shape of societies; Review contemporary theories about how technology shapes the way people live; Demonstrate the ability to analyze and critically assess connections between media, technologies, and daily life

COMM 281 Communication, Language & Gender (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course explores the role of communication practices in the production, reinforcement, and transformation of gendered identities. Students will learn how gender expectations within cultural contexts are created. They will also learn some of the ways that deeply-rooted assumptions limit social change and guide communication.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Explain what gender/sex is, using biological, cultural, and psychological perspectives; Apply accurately key concepts related to the study of gender (eg, agency, standpoint theory, intersectionality, gender performance, heteronormativity, institutional limitations, and empowerment); Explain how gender/sex relates to language and communication; Describe how social institutions such as family, school, church, and work have influenced how we see and communicate about gender/sex; Reflect on their own gender performance

COMM 282 Media Law (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201; Prerequisites waived for EVCM minors
This course examines cases and issues in constitutional, statutory, and regulatory law affecting print and electronic media including First Amendment rights, libel, privacy, copyright and trademarks, Freedom of Information, and telecommunication regulations.
Course equivalencies: COMM282/CMUN252
Outcomes:
Students will be able to understand major legal precedents affecting current media communication and recognize their impact on professional practices in print, electronic media and the Internet

COMM 283 Global Media (3 Credit Hours)
Pre-requisites: COMM 175
This course examines how various forms of media and audiences travel and circulate in specific historical, political, and social conditions of consumption. We will learn about the global media flows, connections, and contexts of media markets through information, ideas about health/medicine, and popular culture.
Outcomes:
Evaluate the influence of historical, political, and social conditions on global media production, distribution, and consumption; Compare media systems and audiences across cultural and geographic boundaries to understand how local contexts shape global communication practices; Assess representations of health, medicine, and popular culture in transnational media, considering issues of power, identity, and accessibility; Apply theoretical frameworks of globalization and media studies to contemporary case studies involving global markets, platforms, and public discourse; Design and adapt a communication strategy or toolkit to address the needs of a defined audience

COMM 290 Branding and Positioning (3 Credit Hours)
Pre-requisites: COMM 210 or COMM 211
Examines the theory and practice of branding, target segmentation, and how the digital space and the rapid rise of consumer-generated content have impacted brand management. The course explores each stage of the communication planning process and introduces students to the way audience research, and the competitive sets are used to develop brand positions and benefits.
Outcomes:
Understand theories and practices of branding that impact brand management; Gain knowledge on how to evaluate, create, and improve brand positioning; Learn how to determine if a brand's advertising is consistent with its target audience and its brand positioning; Develop differentiating brand strategies for products and services by applying key branding and positioning principles

COMM 296 Themes in Advertising/Public Relations (3 Credit Hours)
Pre-requisites: COMM 175 or 201
Intermediate-level Advertising/Public Relations lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in AD/PR.

COMM 297 Themes in Communication Studies (3 Credit Hours)
Intermediate-level Communication Studies lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in COMM.

COMM 298 Themes in Multimedia Journalism (3 Credit Hours)
Pre-requisites: COMM 175
Intermediate-level multimedia journalism lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in MJRN.

COMM 299 Themes in Film and Digital Media (3 Credit Hours)
Beginner to Intermediate-level Film and Digital Media course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major.
Outcomes:
Students will gain access to a wide variety of topics in Film and Digital Media

COMM 300 Persuasive Campaigns (3 Credit Hours)
Pre-requisites: COMM 175
This course analyses the structure, development, and role of communication in political and advertising campaigns, with a focus on theories of media effects, message construction, and audience analysis.
Outcomes:
Students will use their analytic and research skills to broaden their understanding of the use and effects of communication as a means of public persuasion

COMM 301 Discovering China Through Film (3 Credit Hours)
This course will give an overview of major films produced in mainland China since 1949. Students will examine the genres of Chinese film better known in contemporary China and consider them a major source of reflection upon, and critique of, contemporary Chinese society and culture.
Interdisciplinary Option: Asian Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Course equivalencies: CMUN301/ASIA/INTS/AIFMS302
Outcomes:
All films chosen for the course will help inform students' understanding of modern China in terms of its material conditions and ideology

COMM 302 Sports on Screen (3 Credit Hours)
Pre-requisites: SPRT 130 or COMM 265 or COMM 274
This course will examine the portrayal of sports in film and television. From "Chariots of Fire" to "Ted Lasso," students will explore plots, performances, visuals effects, scenery, and more and produce their own reviews and analyses. Through a diverse selection of films and television shows, students will examine themes of personality, identity, culture, sportsmanship, community, and skill to analyze how this genre uses storytelling devices to deliver a narrative. Class discussion, writing assignments, and interviewing will encourage critical thinking about how film and TV influence our relationship with sports.
Outcomes:
Write compelling, persuasive reviews and news articles & using AP Style; Apply media theories and production techniques to sports film and TV productions; Analyze sports films and television series within their historical and cultural contexts, explaining how they reflect or contest prevailing societal attitudes toward sports; Evaluate how sports film and television narratives shape public understandings of athletes, competition, and the social role of sports, drawing on relevant theories of media and culture

COMM 303 Media, Politics, and Propaganda (3 Credit Hours)
Pre-requisites: (COMM 175 or COMM 201) and COMM 200
This course will enable students to understand the relationship between media and politics as well as be able to identify strategies used in propaganda, disinformation, and misinformation campaigns and the impact of technology on its history and evolution.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to articulate the media's impact on the circulation of propaganda as well as be able to identify disinformation/misinformation and understand its significance in the political process

COMM 304 Rhetorics of Utopia & Revolution (3 Credit Hours)
Pre-requisites: UCWR 110
This reading-intensive course will examine rhetorics of utopia, revolution, and strategies of change. Students will read a variety of texts from activists, scholars, and revolutionary thinkers to understand the ways (historically and presently) that utopias and revolutions are imagined and created through communication, media texts, and discourse.
Outcomes:
By the end of this course, students will have a better understanding of utopia and revolution, how ideology operates and solidifies via discourse, and ways to enact social change

COMM 305 Animation (3 Credit Hours)
Pre-requisites: COMM 135; FNAR 233 is also required for Visual Communication majors and minors
This course will focus on animation with specific emphasis on the creation, refinement, and publishing of a visual story. Students will learn 2D and 3D techniques, cameras, CGI, and other software and equipment to create animated works.
Course equivalencies: COMM 305/COMM 455
Outcomes:
Theories of visual and image-based storytelling; script writing; character development; storyboarding; creating visual stories from images; animation enhancement/manipulation; graphic design; and contemporary animation design options for visual storytelling/promotion

COMM 306 Environmental Communication & Advocacy (3 Credit Hours)
Pre-requisites: Sophomore standing; Prerequisite is waived for undergraduate students in the School of Environmental Sustainability and for Environmental Communication minors
This course explores the rhetorical means by which citizens influence the policies and practices affecting our natural and human environments. The focus is on current controversies.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: X - COMM 306 / COMM 406
Outcomes:
The course seeks to provide an understanding of the history and range of communication styles in the US environmental movement and to help students develop practical skills relevant to entering into environmental debates

COMM 307 Communication and Social Movements (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for Environmental Communication minors
This course explores the communication strategies used to promote and/or resist significant socio-political change. Students will demonstrate an understanding of how communication is used in particular societal struggles to effect socio-cultural change at an individual, community, institutional, or global level.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Outcomes:
Articulate and critically engage with the changing nature of movement and protest in regard to technology, media, and sociocultural forces; Students will understand the history of social movements and how their evolution has shifted the very nature of mobilization itself

COMM 308 Screen Directing (3 Credit Hours)
Pre-requisites: COMM 135 and COMM 274
This advanced course in screen directing is designed to further students' narrative filmmaking skills. Geared toward creating fiction films, the course focuses primarily on blocking for the camera, directing actors for the screen, and structuring dramatic scenes. Students should have a working knowledge of basic videography, nonlinear editing, shot composition, and film grammar.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Communicate effectively with talent and crew; Analyze a narrative scene for its dramatic and stylistic elements; Direct single-camera narrative scenes; Produce and construct narrative films/videos from a screenplay

COMM 309 Designing Media for Social Change (3 Credit Hours)
Pre-requisites: COMM 220, COMM 227, COMM 230, COMM 231, COMM 237, COMM 268, COMM 272, COMM 277, or COMM 281; Prerequisites waived for Environmental Communication Minor
This course examines media and social change at the intersection of theory and practice. The class will be dedicated to analyzing the way social change is catalyzed and communicated through various media platforms. Students will gain a historical and multi-media perspective on a variety of design and communication strategies tied to a range of social and cultural issues.
Outcomes:
Grounded in theories of media power, communication networks, political advocacy, engaged scholarship, and the digital, materials in this course will explore the past, present, and future of designing media and communication practices

COMM 310 Production Design (3 Credit Hours)
Pre-requisites: COMM 274 or COMM 135 or THTR 252
Students develop an understanding for the evolution and history of production design, as it relates to film production, from its inception to the present. Students will pre-visualize and implement art direction--sets, costumes, makeup, color palettes--for student films in production.
Outcomes:
Students acquire the visual language and historical precedents for production design in film and television; They learn pre-visualization techniques, script breakdowns and build-out processes for art direction on film sets

COMM 311 Health Communication (3 Credit Hours)
Pre-requisites: COMM 205 or COMM 210
This course focuses on the growing field of health communication. Building on students' knowledge of public relations, advertising, communication, and marketing, this class aims to help students develop an area of specialization that offers career opportunities in many settings. Through guest speakers and field trips, the class is designed to provide an overview of what health communicators do and where they work.
Course equivalencies: COMM 311/COMM 461
Outcomes:
Provide a foundation of knowledge about the US healthcare system and acquaint students with how communications can play a vital role in accomplishing public health objectives

COMM 312 Special Events Planning (3 Credit Hours)
Pre-requisites: COMM 210
Students will gain hands-on experience in event planning. They will learn to anticipate and execute the needs of an organization or community planning special events.
Outcomes:
Students will gain hands-on experience in event planning; They will learn to anticipate and execute the needs of an organization or community planning special events

COMM 313 Corporate and Organizational Communication (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 210; Prerequisites waived for Professional Communication Minors
Students will learn the theory and practice of responsive and strategic organizational communication in developing corporate identity and image.
Outcomes:
Students' understanding of the theory and practice of responsive and strategic organizational communication, public relations, and advertising will be enhanced

COMM 314 Public Relations Cases (3 Credit Hours)
Pre-requisites: COMM 210
The course focuses on issues, strategies, and solutions in creating and maintaining relationships with key publics including media relations, internal communications, community relations, public affairs, investor relations, and crisis communications.
Outcomes:
Students will gain experience analyzing, formulating and applying case-specific solutions and developing an integrated campaign

COMM 315 Advanced Reporting Topics (3 Credit Hours)
Pre-requisites: COMM 205 and 362; Junior Standing and above
This course offers in-depth attention to the challenges of writing complex stories characterized by careful research, use of sources, interviewing, and reporting and writing. Students examine writing for a "lay" audience in such areas as science and technology, finance, government, and religion. Can be repeated once with a different topic. Second completion can count as major elective in MJRN.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will broaden their writing and research experience

COMM 317 Media Planning (3 Credit Hours)
Pre-requisites: COMM 211
This course examines the advertising and marketing processes required to research, develop, and implement an effective media plan for budgeting appropriate advertising time and space.
Course equivalencies: COMM 317/COMM 417
Outcomes:
Student teams will develop competencies in decision-making processes and tools, including research methods, objectives, strategies, and tactics, to construct an advertising media plan

COMM 318 Public Relations Writing (3 Credit Hours)
Pre-requisites: UCWR 110 with a grade of C- or higher and COMM 210
This course focuses on strategic public relations, writing for publics including print, broadcast, and digital media with understanding of objectives, news values, and formats.
Outcomes:
Students develop competency writing and editing news releases, pitch letters, fact sheets, public service announcements, newsletters, and Web content to develop a portfolio of individual writing samples

COMM 320 Public Service Communication (3 Credit Hours)
Pre-requisites: COMM 210 and 211
This course examines public relations strategies and applications in cause-related campaigns, public service initiatives, and community relations activities for corporate and nonprofit organizations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to analyze current issues and advocacy campaigns, define ethical communication and social responsibility, and develop a public service campaign for an organization

COMM 321 Advertising Campaigns (3 Credit Hours)
Pre-requisites: COMM 211
This is an advanced advertising course in a simulated agency environment to provide practical experience in the campaign planning process.
Outcomes:
Student teams develop competencies in creating and producing a professional advertising campaign that includes market research, development of creative and media recommendations, and an integrated marketing communication strategy

COMM 322 Guerilla Media (3 Credit Hours)
Pre-requisites: COMM 200
This course covers provocative, unexpected, and alternative methods for distributing media and gaining new audiences. It includes the history, theories and ethics behind the appropriation of "guerrilla" strategies as found in artistic, civic, commercial and political media work. SES majors and EVCM minors are waived from pre-requisites.
Interdisciplinary Option: Film & Digital Media Studies
Outcomes:
Students gain experiences with understanding, creating and distributing media work with guerrilla strategies around environmental, journalistic and commercial themes of their choice

COMM 323 Remixing Culture (3 Credit Hours)
Pre-requisites: COMM 200
This course explores the remix culture as cultural exchange. While studying about remix culture and collaborative process, students will manifest projects that involve mashing up media using various web-based and mobile media creation, web-based editing, live online broadcasting and sharing and techniques of online presentation.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM323/ICVM323/IFMS323
Outcomes:
Students will learn about the intermixing of cultures through individual projects in which they will combine different types of media

COMM 324 Film Genre (3 Credit Hours)
Pre-requisites: COMM 274
Traces the evolution of independent filmmaking in the U.S, from the pioneering cinema of Maya Deren and John Cassavetes to seminal works of Spike Lee, Kelly Reichardt, and Barry Jenkins.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM324/ICVM324/IFMS324
Outcomes:
Students will be able to demonstrate knowledge what constitutes a genre and the varied approaches used to analyze films within the context of genre studies

COMM 326 Screenwriting (3 Credit Hours)
Pre-requisites: COMM 202
This course introduces students to the process of writing for the screen. Through exercises and analysis of structure and storytelling fundamentals, students will develop a working sense of the art of crafting a screenplay, learning how to build a script, step by step, from an original and compelling idea.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Extensive writing requirements cover all aspects of screenwriting, from creating a treatment and character bios to writing action and dialogue, culminating in the development of a detailed step outline and polished first act of a feature-length script (20+ pages); Students are required to bring an original movie idea to the first class

COMM 327 Mastering Video Reporting and Storytelling (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
This course prepares students to report and produce video stories for broadcast and other similar media distribution. It emphasizes information gathering, source development and visual storytelling, and builds on the video and editing skills students learn in the beginning video production class.
Outcomes:
Students will learn how to capture great video and audio, research, write, produce, edit complex, effective video stories and present in a variety of ways

COMM 328 Editorial Design II: Magazine & Interactive (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205
This course gives advanced instruction in multi-page editorial layout and design by incorporating writing and photography into a complete, full-color magazine. Students will work as editors and designers in applying principles of design and production to existing articles and understand ethical issues in serving the readers of the magazine.
Outcomes:
Advanced skills in visual design concepts of color, typeface, space, and other basics; Advanced skills in working in a team toward a singular goal; Develop advanced creative capacities in visual communication and journalism

COMM 329 Advertising and Public Relations Design (3 Credit Hours)
Pre-requisites: COMM 210 or COMM 211
This course is for AD/PR majors who want to understand the creative and design discipline of the fields. Students will learn the fundamentals of print-based messages used in advertising and public relations. Students will employ various design programs applied in today's industry to develop visual communications projects, which will culminate in a final portfolio.
Course equivalencies: COMM 329/COMM 429
Outcomes:
Students will learn and become competent in the following: Current design programs including InDesign and Photoshop; Basic design principles, such as color, space, and typography; Common formats for designing integrated marketing communication print materials

COMM 330 Intermediate Advertising Design (3 Credit Hours)
Pre-requisites: COMM 214
Builds on the creative skills and understanding acquired in the introductory advertising creative courses to enhance students' conceptual abilities. Utilizing Adobe InDesign and Photoshop, students learn to design for various advertising formats including digital, print, and for client presentations.
Course equivalencies: COMM 330/COMM 463
Outcomes:
The best work is finished on computers and reviewed by advertising professionals at the end of the semester

COMM 331 Social Media Campaigns (3 Credit Hours)
Pre-requisites: (COMM 210 or COMM 211) and COMM 213
This interactive, hands-on, strategy-meets-execution course is designed to help you think like a social media campaign planner and campaign creator, capable of building insight-driven strategies, selecting platforms, developing creative ideas, and understanding paid/owned/earned dynamics. The goal is that at the end of the semester, you have mastered the fundamentals of consumer behavior on social platforms, strategic campaign development, creative ideation, media planning, and performance management that spans across advertising, public relations, and communication practices.
Course equivalencies: COMM 331/COMM 444
Outcomes:
Develop comprehensive social media strategies based on consumer insights: Students will learn to identify target audiences, uncover behavioral and cultural insights, and translate these findings into high-impact social media campaign strategies; Assess specific platform nuances and audience expectations: No single platform is the same and serves different objectives for brand development, Students will examine how different social media platforms operate -- including their engagement patterns and algorithmic structures that shape content and communication strategies; Map customer journeys and identify high-impact touchpoints: Students will gain experience in mapping consumer paths across platforms and identify moments of opportunity for engagement, influence, and/or conversion within multi-platform journeys; Generate creative content strategies tailored to platform-specific audiences: Students will gain experience in creating platform-specific campaigns that are targeted to specific audiences, delivering on the client's brief expectations; Present professional-level social media campaign recommendations to clients: Students will get firsthand experience in presenting an industry-standard integrated social media campaign program

COMM 332 Investigative Reporting (3 Credit Hours)
Pre-requisites: COMM 205 and COMM 362; Junior Standing
This course will teach you how to do investigative reporting with a data journalism approach. Through discussion of examples and our own work, we will explore how to find, request, and use data that can reveal important information about society.
Outcomes:
Analyze and interpret data for journalistic purposes, using appropriate tools and methods to uncover patterns, trends, and anomalies that support investigative findings; Integrate data analysis with traditional reporting techniques (interviews, documents, field reporting) to construct accurate, compelling investigative narratives; Evaluate the ethical and legal implications of investigative and data-driven reporting, making informed decisions about privacy, harm, transparency, and accountability in their work; Locate, request, and obtain public records and datasets from governmental and institutional sources, using relevant laws and procedures (such as FOIA and open data portals)

COMM 333 Cinematography II (3 Credit Hours)
Pre-requisites: COMM 232
Students learn and demonstrate techniques and roles for advanced cinematography: virtual production, assistant directing, sound stages, and location lighting.
Outcomes:
Camera/lighting setups for commercial spaces, virtual locations, lens/cameras for advanced aesthetic choices, assistant directing role/practices, drones, cranes, Steadicams, and other mobile camera framing techniques

COMM 334 Mobile Advertising (3 Credit Hours)
Pre-requisites: COMM 211 and COMM 213
Mobile is one of the most valued investments for advertisers. This course covers the latest practices and trends of mobile advertising which includes 1) branded mobile application design and development; 2) advanced mobile experiences with AR/VR experiments; and 3) various practices, tactics, and ethical concerns for native mobile advertising experiences.
Course equivalencies: COMM 334/COMM 464
Outcomes:
Knowledge of relevant human-computer interaction theories and branded mobile design/development; Ability to use digital tools to create mobile advertising campaigns; Understanding of importance and implications of ethics in mobile advertising

COMM 335 Creating ADPR Content with AI (3 Credit Hours)
Pre-requisites: (COMM 210 or COMM 211) and COMM 213
This course explores the current practices, opportunities, challenges, and ethics of strategic integration of Artificial Intelligence (AI) and Generative AI (GAI) into advertising, public relations, and communication workflows. Students learn various AI platforms and how to use AI for audience research, content creation, and campaign optimization while navigating the ethical and legal implications of automated communication.
Course equivalencies: COMM 335 / COMM 445
Outcomes:
Know the AI platforms and tools used for creating effective strategic communication content; Learn how to integrate AI to reduce creative production time; Understand the ethical implementations for AI use including navigating transparency, data privacy, and other issues; Know the skills of working effectively in teams to prepare marketing communication programs

COMM 336 Search & Display Advertising (3 Credit Hours)
Pre-requisites: COMM 211 and COMM 213
This course covers search engine optimization and advertising practices through lectures and hands-on practices. Students will learn technical terms and tactics involved in optimizing the search result and user experience with brand websites. Google AdWords, search network campaigns, display network campaigns and Google merchandiser set-up training will be included. (Consider scheduling to coincide with Google Challenge.)
Outcomes:
Understand the major concepts in search engine optimization; Working knowledge of the structure and terms used in Google AdWords; Be able to develop effective search engine and display advertising campaigns

COMM 337 AD/PR Multimedia Commercial Production (3 Credit Hours)
Pre-requisites: COMM 135, COMM 145, or COMM 211
This is an advanced video and advertising course designed to give students an introduction to various types of multimedia commercials as well as practical considerations of producing branded content and television spots, including for real clients.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 337/COMM 437
Outcomes:
Build experience in effective multi-tasking and teamwork, gain skills with technology and strategy, creative, and application process of broadcast production, and practice engaging with the community in media development efforts

COMM 338 Narrative Production (3 Credit Hours)
Pre-requisites: COMM 232, COMM 308, or COMM 359; Junior standing
Students work in teams to create short-subject narrative films taking their projects from preproduction to exhibition. Students will experience working as a part of a film production crew, be exposed to a variety of jobs, and produce and exhibit original films.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Understand and experience the five phases of the narrative production process: development, pre-production, production, postproduction, and exhibition; Experience working as a part of a film production crew and be exposed to a variety of production jobs; Produce polished, original, short-subject films and arrange for their exhibition

COMM 339 Video Documentary (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X - COMM 339 / COMM 439
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 342 Human Rights Reporting (3 Credit Hours)
In this course, Students will study the history of the concept of human rights and the legal mechanisms for enforcing human rights law, and they will read work by reporters covering human rights worldwide.
Outcomes:
Students will learn how to report on international conflicts by finding local angles of interest to Chicago readers and how to approach articles on domestic human rights issues

COMM 344 Portfolio I (3 Credit Hours)
Pre-requisites: COMM 266; and (COMM 329 or COMM 330)
Builds on skills acquired in intermediate creative courses to help students enhance their conceptual abilities and generate both print and integrated multimedia campaigns. Students work in teams to develop an extensive body of work that's exhibited in an awards show judged by advertising professionals.

COMM 345 Student Agency (3 Credit Hours)
Pre-requisites: COMM 175 and Instructor Consent
Course involves actual client work in Inigo, the student-run communications agency. Students gain skills/put theory into action as they provide public relations, digital communication, strategy and other services to companies and non-profits. Students apply prior semester. Contact instructor at cmcphil@luc.edu for details. All majors encouraged.
This course satisfies the Engaged Learning requirement.
Outcomes:
A fundamental understanding of what agencies are and how they function; A heightened sense of professionalism; Advanced-level teamwork; Increased written and verbal communication skills

COMM 346 Analytics, Insights, and Strategy (3 Credit Hours)
Pre-requisites: (COMM 210 or COMM 211) and COMM 250
This course provides a comprehensive look at analytical tools and methodologies used to transform quantitative and qualitative data into strategic insights. Students will explore how to use data to uncover the cultural, psychological, and social factors that drive human behavior. By mastering the transition from data analysis to actionable communication strategies, students will learn to move beyond simple observations to understand the why behind the what. The course culminates in the development of a real-world strategic program that demonstrates an integration of data analytics with a promotional framework.
Outcomes:
Understand the roles and tools used for analyzing data, finding insights, and developing a strategy in the advertising, public relations, and communication planning and development process; Have a process for identifying social, cultural, and behavioral data from multiple sources to synthesize into a single strategy for a brand's communication program; Develop a communication strategy that leverages marketplace and target audience insights relevant to a specific brand; Know the skills of working effectively in teams to prepare marketing communication programs

COMM 347 Influencers & Social Economy (3 Credit Hours)
Pre-requisites: (COMM 210 or COMM 211) and COMM 213
Content creators and influencers are at the center of a rapidly growing global industry. This course bridges the gap between creative content and commercial viability by examining the evolution of influencers from content creators to product entrepreneurs and strategic brand partners. Students will analyze the roles of diverse influencers--from nano to mega--across the customer journey and develop the technical skills required to manage these partnerships, including the use of influencer analytics tools and messaging control strategies. The curriculum covers the business of the creator economy, including strategic goal setting, diverse revenue streams (from affiliate marketing to proprietary product lines), ethics, and legalities. Whether an aspiring communication entrepreneur or a future brand strategist, students will master the framework necessary to navigate, monetize, and manage the modern social economy. Students will develop a real-world influencer communication program that integrates data analysis with a cultural or psychological strategy framework.
Outcomes:
Identify and categorize influencer types based on reach, niche, and engagement; Develop a comprehensive communication plan for an influencer-based brand; Understand the advertising, public relations, and communication strategies and tools used to build a public image relevant for influencers; Develop a brand-specific influencer strategy that maps creator archetypes to the brand customer journey and use industry-standard KPIs to measure performance; Learn the diverse revenue streams, from affiliate marketing to proprietary product lines; Know the skills of working effectively in teams to prepare marketing communication programs

COMM 350 Producing for Film & Digital Media (3 Credit Hours)
Pre-requisites: COMM 135 OR COMM 274; COMM 405 (for DMST students); OR Instructor Consent
Aesthetic choices meet the ethics and business of filmmaking in COMM 350. Producing covers how to develop story ideas from conception to writing, financing, production and distribution. Relevant issues in script breakdowns, safety, communication and contracts are covered. Students create pitch decks, basic budgets and a longer prospectus for potential investors.
Outcomes:
Understanding DEI issues while choosing stories to produce, hiring performers or crew; templates for budgets; best practices for safety on the set; creating engaging pitch decks and treatments

COMM 357 Programming Film & Media: Festivals, TV & Digital (3 Credit Hours)
Pre-requisites: COMM 200
This course examines programming and curating (selecting) media for film festivals, museums, streaming services and other platforms. Through work on a festival or similar project, students examine how audiences are identified, learn about distribution, and explore the challenges facing media outlets in selecting, reviewing and archiving media.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM357/IFMS369
Outcomes:
Evaluate, curate and present media work; improve critical thinking and writing about media; learn legal, creative and financial implications of programming and curating media

COMM 358 Newscasting and Producing (3 Credit Hours)
Pre-requisites: COMM 145 and COMM 256
This is designed as a capstone course for the broadcast journalism emphasis. It covers all aspects of TV (or web) newscasts, including producing, anchoring, reporting, photography and editing, as well as studio production. The class produces and delivers newscasts, designed to prepare students for work in the TV news industry.
Course equivalencies: COMM 358/COMM 458
Outcomes:
Report, write, and present news stories, demonstrating clear delivery, news judgment, and adherence to accuracy and fairness; Monitor and synthesize current news developments at Loyola, in Chicago, and at the state, national, and global levels, and incorporate this knowledge into journalistic work; Produce news that represents diverse perspectives and avoids misrepresentation or harm to individuals, groups, or alternative viewpoints; Evaluate their own and peers' newscasts, identifying strengths, weaknesses, and areas for improvement in content, ethics, technical quality, and on-air performance

COMM 359 Advanced Post Production (3 Credit Hours)
Pre-requisites: COMM 135 and COMM 274
This course combines advanced editing theory and practice, aimed at providing students with the skills required for editing motion pictures of all genres and for all platforms.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X - COMM 359 / COMM 459
Outcomes:
Students will learn how to edit for motion pictures of all forms

COMM 360 Digital Media Ethics (3 Credit Hours)
Pre-requisites: COMM 200
This course is designed to familiarize students with a new set of ethical dilemmas that have sprung up in the last decade with the rise of new media. Using classical ethical theories, students will formulate appropriate and responsible solutions to ethical dilemmas emerging in a new/digital media context.
Outcomes:
Students will learn about current ethical issues and solve these issues using classical ethical theories

COMM 361 New Media Criticism (3 Credit Hours)
Pre-requisites: UCWR 110 with a grade of C- or better and COMM 200
Wikipedia, Google, YouTube, Twitter, and mobile applications are complex designed objects. Students will learn a critical language for thinking of new media as art, narrative, culture, and code. This course is Writing Intensive.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Introduce students to key theories and methods in new media criticism and digital humanities; Train students to critically read and interpret new media texts such as social media, online news, games, apps, and streaming content; Explain how technology, power, and culture interact in digital environments; Provide opportunities to conduct academic research and apply its findings through argumentative discussion and written criticism

COMM 362 Multimedia Journalism Research Methods (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205; Prerequisites waived for Environmental Communication minors
This course advances student knowledge of resources, methods, and credibility standards for gathering and reporting news stories.
Outcomes:
Students will learn how to conduct research that is both accurate and balanced

COMM 363 Research Methods in Advertising/Public Relations (3 Credit Hours)
Pre-requisites: COMM 210 or 211
Course will introduce majors to sound and effective social science research methods used in Ad/PR, including surveys, focus groups, content analysis, and audience analyses. It will also give students a chance to apply for the national PR student Bateman Competition that would continue in a designated course the following spring.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn the research process and how to apply it to establish, build, and evaluate Ad/PR strategies, goals, and campaigns

COMM 365 Naturalistic Methods Communication Research (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course examines how communication research is conducted in naturalistic settings using qualitative methods associated with observation and in-depth interviewing.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become familiar with the reading and evaluation of communication research, and apply the concepts studied in class to the design and development of a research project

COMM 366 Observing/Measuring Cmun Behavior (3 Credit Hours)
This course examines how communication processes and behaviors are studied, using the social-scientific techniques of observation and measurements. It also looks at the limitations of these methods; appropriate methodologies and ways of analyzing quantitative (numerical) data.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will become familiar with the analysis of quantitative data, and apply their knowledge to the design of a research project

COMM 367 Rhetorical Criticism (3 Credit Hours)
Pre-requisites: UCWR 110 with a grade of C- or higher and (COMM 175 or COMM 201)
This course examines theory, research, and application of critical methods for analyzing historical and contemporary persuasive discourse.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will be able to analyze rhetorical situations and critically assess efforts to respond to them

COMM 368 Ethnographic Research Methods in Communication (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201; Junior standing
This course teaches principles of participant-observation research as a critical practice to produce a 'thick description' of meanings, values, hierarchies of interests, power structures, and ideals of a particular cultural group or community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students learn to conduct ethnographic research and its procedures - taking field notes, conducting interviews, examination of data and artifacts, and producing research results to a public audience

COMM 370 Special Topics in Advertising & Public Relations (3 Credit Hours)
These are advanced courses in specialized AD/PR areas. Titles and content vary and prerequisites are established according to course content. May be repeated with different topics for a total of 9 credit hours, but only 6 may count toward the major.
Course equivalencies: COMM 370/COMM 470

COMM 371 Special Topics Communication Studies (3 Credit Hours)
Pre-requisites: COMM 175; DMST-MC and GSCM-MS students may enroll without prerequisites
These courses offer in-depth reading, research, and discussion in specialized areas dealing with current social issues and communication practices. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.

COMM 372 Special Topics: Multimedia Journalism (3 Credit Hours)
These courses offer in-depth reading, research, and discussion in specialized areas dealing with current issues in multimedia journalism. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.
Outcomes:
Apply core journalistic standards--including accuracy, fairness, source verification, and transparency--when creating multimedia content on the semester's special topic; Adapt content for multiple digital platforms, revising headlines, visuals, and formats to suit different modes of distribution; Analyze multimedia news work for newsworthiness, storytelling effectiveness, audience engagement, and ethical/legal considerations

COMM 373 Digital Storytelling Abroad (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography, and editing skills within another country and cultural context.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 373/COMM 473
Outcomes:
The course will require students to enterprise and execute a range of multimedia skills that help participants tell stories; The course will have an emphasis on community engagement and social justice; The course will give students an opportunity to apply technical knowledge and skills to a uniquely-designed study abroad experience

COMM 374 Special Topics: Film & Digital Media (3 Credit Hours)
These courses offer in-depth experiences in the production, design, writing and development of film and digital media. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.

COMM 375 Media Relations (3 Credit Hours)
Pre-requisites: COMM 210 or 211
Students learn to develop influence through earned media. Skills taught include identifying news values, writing/creating multimedia press releases and media alerts, AP style, media training, creating media lists using Cision, working with syndication services, search engine optimization for news releases, creating a social presence and working with social influencers.
Outcomes:
Students learn to develop influence through earned media and how to build relationships with the media and other influencers in order to amplify stories for clients

COMM 378 Advertising/Public Relations Practicum (3 Credit Hours)
Pre-requisites: COMM 100 and Department Consent required; Restricted to Juniors and Seniors in the Advertising and Public Relations major
Students will gain advanced practical experience advertising/public relations projects.
Outcomes:
Create an Advertising/PR capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public; Create and implement communication projects that are responsive to community needs and organizational goals in local and global contexts; Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media; Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community; Demonstrate the competencies to work as an entry-level professional in advertising or public relations

COMM 379 Digital Sustainability (3 Credit Hours)
Pre-requisites: Sophomore standing; SES undergrads can also enroll
Digital Sustainability explores the environmental impact of digital media. Mining precious metals to manufacture devices, burning fossil fuels to run data centers, global black market trading of e-waste are points where the digital world meets the physical world. Students will explore digital sustainability problems, and work toward creative solutions.
Course equivalencies: COMM 379 / COMM 479
Outcomes:
Learn about environmental issues stemming from digital media infrastructure; Critically evaluate different disciplinary perspectives to gain a broader understanding; Develop ethical reasoning regarding environmental impact resulting from digital media ecology

COMM 380 Debate Practicum (3 Credit Hours)
Pre-requisites: Instructor Consent
Students gain advanced practical experience in the Loyola Debate Society.
Outcomes:
To gain confidence as a speaker; To be able to construct well-reasoned arguments; To become an effective team member

COMM 381 Communication Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students gain advanced practical experience in service experiential learning projects. Student must develop a project with a full-time faculty member in COMM Studies. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf.
This course satisfies the Engaged Learning requirement.
Outcomes:
Create a capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public; Create and implement communication projects that are responsive to community needs and organizational goals in local and global contexts; Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media; Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community; Demonstrate the competencies to work as an entry-level professional in advertising or public relations

COMM 382 Multimedia Journalism Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students gain hands-on practical experience in developing multimedia journalism projects. Student must develop a project with a full-time faculty member in Multimedia Journalism. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf.
This course satisfies the Engaged Learning requirement.
Outcomes:
Create a capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public; Create and implement communication projects that are responsive to community needs; Produce journalistic stories to reach diverse publics and for distribution through multiple\ \nchannels, including both traditional and digital media; Practice ethical communication in professional practices that are socially responsible and\\nin the mutual interests of the organization and the community; Demonstrate the competencies to work as an entry-level professional in journalism

COMM 383 Radio Practicum (3 Credit Hours)
Pre-requisites: Department Consent
Students will work with WLUW radio station under the supervision of a faculty member participating in one or several of the following activities: generating story ideas, booking guests, interviewing guests, doing promotions using social networking and on-air productions, recording, editing and producing audio segments, and learning several facets of what it takes to produce a radio show.
This course satisfies the Engaged Learning requirement.
Outcomes:
Technical Proficiency: Operate studio and control-room equipment for live boards, automation, and remote recording, including digital audio workstations (eg, Adobe Audition, Pro Tools); Production Skills: Create, edit, and mix broadcast-ready content, including promos, PSAs, interviews, and news reports that meet industry loudness and quality standards; On-Air Performance: Demonstrate effective vocal techniques, interviewing skills, and show pacing while hosting live or pre-recorded shows; Content Creation: Develop and curate relevant, engaging content tailored for specific audiences

COMM 384 Film and Digital Media Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students will gain advanced practical experience creating digital cinema projects. They may choose to focus on a certain role and section: director/producer, writer, cinematographer, editor, production designer, sound designer, or publicist.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain advanced practical experience producing and collaborating on digital cinema projects

COMM 386 Advertising/Public Relations Capstone (3 Credit Hours)
Pre-requisites: Senior Standing; Restricted to Advertising & Public Relations majors
Students focus on integrating and applying knowledge and skills related to advertising and public relations. They will research a career interest area, interview working professionals, and create strategic communication portfolio materials. Students gain specialized industry knowledge, improve professional communication competence, and build contacts.
Outcomes:
Find, analyze, and synthesize information and prepare an academic research-style paper about a specific advertising or public relations practice and industry that you have the greatest interest in; Describe the professional practice and significant issues in your chosen field; Establish a relationship with professionals who are currently working in the area in which you want to develop a career; Develop a business portfolio (online if possible, IMC plan and work samples) that demonstrates a synthesis of the knowledge, competencies learned in the major and practical application that reflects responsible professional practices

COMM 387 New and Digital Media Capstone (3 Credit Hours)
Students focus on integrating and applying knowledge and skills related to new and digital media applications. They will gain specialized research and industry knowledge and skills, improve professional communication competencies, and build digital industry contacts.

COMM 388 Film and Digital Media Capstone (3 Credit Hours)
Pre-requisites: Department Consent; Senior Standing; Restricted to Film and Digital Media majors, Students must complete the COMM 388 form, describing your project, any participants/support materials/technology needed, and submit to Instructor
Project proposal must be approved by the program director and course supervisor by the end of the first week of the semester. A Public presentation of the project is required. Examples of appropriate capstone projects include assisting in the development of a film festival or presentation of a significant research project.
Outcomes:
Synthesize previous course work into a public presentation in the students' area of interest

COMM 389 Advertising Creative Capstone: Portfolio II (3 Credit Hours)
Pre-requisites: COMM 266 and COMM 344; Senior Standing; Restricted to Advertising Creative majors
Gives students an opportunity to develop new campaigns and refine existing work. Students receive feedback from advertising professionals throughout the semester to help them edit and develop their portfolios. Each member of the class creates a portfolio website and develops a job search plan. Final portfolios are critiqued by faculty and professionals.
Outcomes:
Develop a portfolio of innovative ideas and creative ads across multiple platforms; Learn skills to critique and edit portfolio material; Have a plan for pitching work to potential employees

COMM 390 Communication Studies Capstone (3 Credit Hours)
Pre-requisites: COMM 240 and (COMM 361, COMM 365, COMM 367 or COMM 368)
This course serves as a finishing academic experience which wraps up the student's academic work in Communication Studies, whether their concentration is Organizational Communication, Digital Media, or Social Media and Society. In this course, you will create a project on a topic that interests you within communication studies. The project should make an original contribution to communication studies by adding new ideas, insights, or perspectives. The project can take many forms, including an academic paper, a social media campaign, or a creative text such as a podcast, a performance, or a video. The student will determine the nature of their project in class and workshop ideas to peers and instructor.
Outcomes:
Design and produce an original research project, an applied communication project, or a creative text/performance that demonstrates intellectual rigor, methodological coherence, and ability to use creative skills; Integrate and apply key communication concepts and methods to make sense of a complex question, problem, or theme within their project; Present a project effectively using clear, engaging, and well-organized oral and mediated communication; Collaborate in workshop settings by giving and incorporating constructive feedback, demonstrating professional communication, reflective listening, and self-assessment of their own learning; Demonstrate professional competencies, work readiness and an understanding of the ethical implications of their academic or creative projects

COMM 391 Advertising/Public Relations Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Completed 18 credit hours in COMM courses; Restricted to ADPR majors; Instructor Consent; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 392 Multimedia Journalism Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to MJRN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 393 Communication Studies Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to CMAS and CMUN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 394 Film & Digital Media Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to FDMD majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

COMM 395 Sports Media Internship (3 Credit Hours)
Pre-requisites: Junior Standing; Restricted to Sports Media majors
This supervised field experience enables students to have hands-on professional learning at a wide range of sports-related roles and organizations, including but not limit to teams, venues, non-profits, agencies, and corporations as the basis for learning and refining professional communication skills in the sports industry.
Outcomes:
Work in collaborative environments; Synthesize academic and professional experiences; Market and present oneself as a communication professional

COMM 398 Directed Study (1-3 Credit Hours)
Pre-requisites: Department Consent, Student must develop a project with a full-time faculty member in their SOC major, Paperwork is required Course may be taken for variable credit (1-3 hours). Students will work independently in their area of interest with a supervising faculty member whose expertise is in that area. Projects may include, but are not limited to: a reading course, where a student contracts to read and create an annotated bibliography of research materials; a writing course, where a student has developed a strong paper for a course and wants to refine it for possible conference presentation and/or publication, etc.
Outcomes:
Conduct thorough research and collect quantitative and qualitative information for a research project or a creative project; Produce polished, professional-grade media content using the latest technology, such as 1) a documentary, experimental, or narrative film, 2) written long-form journalism, 3) a video or audio journalism project, 4) an advertising or public relations campaign, or 5) a marketing campaign for a non-profit organization; Apply advanced knowledge of narrative structure, visual storytelling, or media production equipment; Critically analyze, evaluate, and contextualize media messages or theoretical concepts in the field; Identify the social, historical, and ideological forces that shape media

Advertising & Public Relations

- Advertising & Public Relations (BA) (p. 840)
- Public Relations Minor (p. 842)

Advertising & Public Relations (BA)

In the Advertising/Public Relations Major you will learn to use strategic communication to develop creative and effective messages delivered across multiple media platforms for selected audiences. Loyola's Chicago location provides close proximity to agencies, brands, and organizations, giving students the opportunity to get first-hand exposure to the industry.

Related Programs

Major

- Advertising Creative (BA) (p. 843)

Minor

- Advertising Minor (p. 845)
- Public Relations Minor (p. 842)

Curriculum

Students must choose and declare a focus in Advertising, Public Relations, or Integrated, which determines the specific three courses they will take as part of their chosen focus.

School of Communication Graduation Requirements

All Undergraduate students in the School of Communication are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/soc/undergrad/soclanguagerequirement/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Create and implement strategic communication campaigns that integrate advertising, public relations and integrated marketing communication, and are responsive to community needs and organizational goals in local and global contexts.
- Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media.
- Apply appropriate research methods to plan, monitor and evaluate public relations, advertising and other communication campaigns and activities.
- Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community.
- Demonstrate the competencies to work as an entry-level professional in advertising or public relations.

Public Relations Minor

A Minor in Public Relations complements other majors as most careers require understanding of internal and external communications. Studying public relations will enable students to better communicate with customers, clients, audiences, supervisors, and teammates. Students will study the variety of communication strategies, tactics, and media platforms public relations practitioners use to build and maintain positive relationships and favorable images for clients. Common job areas include media relations, event planning, corporate communications, content creator, crises management, publicity, public affairs, and government relations. A Minor in Public Relations would offer benefits to students in multiple disciplines, including Business, Marketing, English, Theater, Fine Arts, Political Science, Healthcare, Environmental Sustainability, Education, Women and Gender Studies, and Social Work.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Learn how to create and implement strategic public relations communication campaigns for industry products and services that are relevant to consumer needs and wants.
- Write and design messages to reach diverse audiences and for distribution through multiple channels, including both traditional and digital media.
- Implement ethical communication practices that are socially responsible and in the mutual interests of the organization and the community.

Advertising Creative

- Advertising Creative (BA) (p. 843)
- Advertising Minor (p. 845)

Advertising Creative (BA)

The Advertising Creative program offers students the opportunity to earn a four-year degree and build a career-ready creative portfolio, all while developing a well-rounded set of critical skills and a deep sense of ethics and responsibility. Students in this program prepare for careers in art direction, copywriting, production, and other creative roles at agencies and other organizations.

School of Communication Graduation Requirements

All Undergraduate students in the School of Communication are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/soc/undergrad/soclanguagerequirement/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Gain knowledge for how creative strategies bring insights into focus to meet challenges and solve problems for industry and organizations.
- Understand the creative process employed for developing big ideas that can be used across multiple and changing communication platforms.
- Demonstrate skills for writing copy and designing messages in traditional and digital media.
- Enhance skills for creating content that is relevant and delivers strategy.
- Apply ethical and inclusive decision making throughout the creation of communications.
- Develop a professional portfolio of creative material.

Advertising Minor

Students pursuing an Advertising Minor learn about the dynamic and complex advertising industry, such as consumer insights, strategic planning, account management, design, media, creative, production, and branding. Typical job areas include market research, graphic design, account service, art director, copywriting, content creator, influencer management, media planning/buying, special event planning, and account management.

The Advertising Minor would be of interest to students in a variety of academics, such as Theater, Fine Arts, Graphic Design, English, Business, Marketing, Psychology, Sociology, Anthropology, Political Science, History, and Women and Gender Studies.

Communication Studies

- Communication Studies (BA) (p. 846)
- Communication Studies Minor (p. 847)
- Environmental Communication Minor (p. 849)
- Professional Communication Minor (p. 850)

Communication Studies (BA)

The communication studies major proudly places itself at the intersection of theory and practice. Its students are led to understand and to use, to critique and to appreciate, to embrace communication as it is presently practiced in society and to hone it for more effective service to the human community. Our communication studies majors benefit from our unparalleled location within the scholarly Loyola community and in the midst of the Chicago media hub.

Communication studies courses help students understand how communication can persuade, comfort, alienate, or bring the world together.

Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Identify the relationship between communication processes and practices and the construction and transformation of human identities, communities, and cultures.
- Build specialized expertise in a Communication sub-field through one of the major's concentrations in Organizational Communication, Media & Technology, or Social Media & Society.
- Apply communication knowledge to contexts beyond the classroom using appropriate methodologies.
- Interpret and conduct communication research across diverse contexts, cultures, and industries.
- Demonstrate advanced written, oral, and visual communication skills through a creative capstone project relevant to the student's career goals and interests.

Communication Studies Minor

The communication studies minor equips students to understand the fundamental communication social issues faced by our globalized

world. They come to appreciate how communication can persuade, comfort, alienate, or bring the world together.

This 18 credit minor will help students learn to use communication skills to produce messages, texts, campaigns, and projects in a way that is creative, culturally literate and convincing. Because of this, the minor is a very good complement for majors in the College of Arts and Sciences as well as Education, Business, and Social Work.

[1] Two (2) courses must come from different menus: Theory/Critical Analysis, Applied, Research Methods, any COMM class not previously taken.

Learning Outcomes

- Learn how the communication field interprets and approaches fundamental communication social issues faced by our globalized world.
- Understand the situated, contextual, and historical nature of communication processes and practices.
- Identify the relationship between communication processes and practices and the construction and transformation of human identities, communities, and cultures.
- Use communication skills and knowledge to produce messages, texts, campaigns, and projects.

- Formulate creative, culturally literate, and convincing oral, written, and multimodal arguments which are responsive to context and situation.

Environmental Communication Minor

As of Fall 2026, this program is no longer accepting applicants.

The Environmental Communication minor is a collaborative effort between the School of Communication and the School of Environmental Sustainability. This 18 credit minor equips students with a deeper understanding of the role of communication in effectively advocating for environmental sustainability.

The minor is enriched with access to state-of-the-art facilities at the Lakeshore and Water Tower campuses. At Lakeshore, the facilities of the School of Environmental Sustainability are designed to minimize energy use, reduce waste, and conserve water. At Water Tower, the School of Communication offers students on-site multi-media production facilities, labs, and specialized equipment.

The skills student acquire from this minor will prepare them for future work in environmental advocacy across diverse platforms.

COMM Option #1		3
	Hours	**3**
	Total Hours	**18**

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Understand the role that communication plays in upholding, changing, or transforming the dominant social and cultural understandings of the environment.
- Effectively use various communication strategies and technologies to advocate for environmental sustainability.
- Use communication skills to critique, change, and create environmental campaigns and projects.
- Serve the needs of diverse groups, communities and organizations which strive for equity, diversity, inclusion, and social justice.

Professional Communication Minor

As of Fall 2026, this program is no longer accepting applicants.

The Professional Communication minor is designed for students outside of the School of Communication who are seeking to improve their communication skills, including speaking, writing, and multi-media presentations.

The 18-credit-hour minor will help students improve their public speaking, persuasive abilities, understanding of organizational communication and creative use of media technologies.

Students with this minor will have an advantage in professional settings that reward excellence in communication.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Improve public speaking skills geared towards organizational settings.
- Produce creative, effective, and appropriate messages, texts, and projects using different types of media technologies.
- Formulate professional, persuasive, and culturally literate oral, written, and multimodal arguments which are responsive to organizational contexts.
- Understand the role of communication in our contemporary globalized world.

	Hours	**3**
	Total Hours	**21**

Learning Outcomes

- Similar to learning grammar to create sentences or speaking the sounds of a foreign language, students who minor in digital media will learn the "language" of film and how shot composition/framing aid in storytelling just as well as dialogue.
- You will be exploring non-fiction, narrative, and experimental genres and will be asked to demonstrate competency in visual storytelling, camera, editing, sound, lighting, scripting and design work.
- You will be asked to integrate theoretical and ethical ideas about the media into the creative context of visual/aural expression.
- In this minor, we will provide students with the basic terminology, observational and critical skills and theoretical background for the study of film aesthetics and language, history, cultural and formal analysis.
- Lastly, you will approach each assigned screening by performing a close analysis of each film that will explore its cinematic elements and properties such as mise-en-scene, cinematography, camera angles, editing, sound and image relation, narrative and other structures of organization, etc. and, furthermore, explore how different modes of composition and style develop over time.

Film and Digital Media Minor

Loyola's Film and Digital Media minor offers the opportunity to gain real-world experiences with award-winning filmmakers, producers, programmers and scholars. Students study and collaboratively create transformative media experiences for a variety of audiences and platforms.

School of Communication Graduation Requirements

All Undergraduate students in the School of Communication are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/soc/undergrad/soclanguagerequirement/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Develop fundamental knowledge and skills essential in media production, exhibition, and distribution.
- Connect theory, analysis, and hands-on work in the development of original ideas in film and digital media.
- Identify their aesthetic vision as a creator of media.
- Gain technical proficiency in audio and visual skills, and specialization in advanced production skills.

Film and Digital Media: International Programming Track (BA)

As of Fall 2026, this program is no longer accepting applicants.

Loyola's Film and Digital Media program offers the opportunity to gain real-world experiences with award-winning filmmakers, producers, programmers and scholars. Students collaboratively create transformative media experiences for a variety of audiences and platforms.

International Film Studies introduces students to the global markets for programming media, writing reviews and criticism, learning about media distribution, curation, film history and related professions.

- Identify their social values as a critical thinker.
- Gain proficiency in the story development, programming, financing and distribution of media works

Multimedia Journalism

- Multimedia Journalism (BA) (p. 857)
- Multimedia Journalism Minor (p. 858)

Multimedia Journalism (BA)

Loyola's multimedia journalism major engages students in the issues shaping today's media landscape, from the decline of newspapers, the rise of apps, virtual reality, and fake news. As part of Loyola's mission-based education, students learn to stand on Jesuit values and ethics in an uncertain and ever-changing world.

Multimedia journalism students practice the skills that every journalist must master, including researching, interviewing, reporting, and writing. Students also gain exposure to the latest technology, equipment, and software through Loyola's Convergence Studio, Owl Lab, and on-site radio station, WLUW.

Courses are offered at Loyola's Water Tower Campus, located in the heart of downtown Chicago. In addition to Loyola's on-campus media outlets, such as our student newspaper, *The Phoenix*, students can gain experience through professional internships at renowned media outlets like the *Chicago Tribune*, *Sun-Times*, WLS, and WMAQ, as well as major corporations, nonprofits, and agencies.

School of Communication Graduation Requirements

All Undergraduate students in the School of Communication are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/soc/undergrad/soclanguagerequirement/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Conduct thorough research using credible sources and investigative techniques involving numerical and statistical concepts
- Perform effective interviews to gather accurate and compelling information
- Produce accurate, fair, clear, and engaging journalistic content of professional standards across multiple platforms
- Apply ethical decision-making frameworks and demonstrate a commitment to social justice in journalistic practice
- Create compelling non-fiction stories through writing, video, photography, audio, web design, and other emerging technologies

Multimedia Journalism Minor

The minor in Multimedia Journalism is designed to help students in other majors learn how to communicate with the general public. The minor teaches students how to:

- write clearly and concisely as journalists do
- research using tools and databases that working journalists use
- relate facts through words, images, videos, podcasts and/or designs

The minor in Multimedia Journalism is perfect for any student who hopes to communicate effectively about their fields of interest.

- Promoting content and understanding metrics
- A willingness to explore emerging media

Public Communication and Advocacy

- Advocacy and Social Change Minor (p. 859)
- Public Communication and Advocacy (BA) (p. 860)

Advocacy and Social Change Minor

The mission of Loyola University Chicago calls for all of its members "to make a difference as "persons for others." The Advocacy and Social Change minor helps students understand how that mission can be carried on through engaged communication while at the University and for the rest of their lives.

Through a course load of 21 Credit Hours, students will gain a deeper understanding of the role of communication in advocating for others and in promoting positive social change.

The skills students acquire from this minor will enrich any course of study. They will also facilitate employment in pro-social areas such as media literacy groups, domestic and international service organizations, Internet start-ups, NGOs and government agencies concerned with social welfare.

Learning Outcomes

- Understand the role that communication plays in upholding, changing or transforming social hierarchies, institutions, and identities.
- Select and use various communication strategies (including persuasion, argumentation, conflict management, negotiation, and mediation) leading to ethical social change.
- Use communication skills and knowledge to create, define, analyze, interpret, and critique messages, texts, campaigns, and projects.
- Demonstrate effectiveness as rhetors, critics and decision makers.
- Serve the needs of diverse groups, communities and organizations which strive for equity, diversity, inclusion, and social justice.

Public Communication and Advocacy (BA)

The mission of Loyola University Chicago calls for all of its members "to make a difference as 'persons for others.'" The public communication and advocacy major helps students prepare for the fulfillment of that mission, not only while at the university, but also as they move into the rest of their lives.

The program's coursework and faculty help students understand everything from community organizing to lobbying to political campaigns, preparing them for a number of possible career paths. Students will explore and reflect on how to promote social justice in coursework, but also through engagement outside of the classroom.

Recent graduates have found employment with media literacy groups, domestic and international service organizations, Internet start-ups, and government officials, and gone on to pursue graduate and professional degrees.

For students admitted before Fall 2026, this program was previously called Advocacy and Social Change (BA). More information can be found here (p. 2662).

School of Communication Graduation Requirements

All Undergraduate students in the School of Communication are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/soc/undergrad/soclanguagerequirement/).

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Describe the relationship among public communication processes, policies and advocacy efforts.#
- Analyze how media culture and messages influence, reinforce, and legitimize beliefs, values, ethics and hierarchies.
- Design evidence-based social advocacy content that leverages effective storytelling and ethical practices.
- Interpret research on audience behavior, message effectiveness, and campaign outcomes.
- Develop interpersonal and leadership skills necessary for effective collaboration in advocacy and social change initiatives.

Sports Media

- Sports Media (BA) (p. 861)

Sports Media (BA)

The Sports Media major prepares students to become ethical, industry-ready storytellers, producers, and strategists in today's global sports industry. Blending communication theory, digital culture, and media ethics with specialized coursework in sports broadcasting, video journalism, leadership, analytics, and the business of sport, the major trains students to create professional-quality content for television, radio, digital, and social platforms while critically examining how sports shape culture, identity, and social change. Through required practicum work with Rambler Sports Locker and other student media, a supervised internship with teams, leagues, agencies, or venues, and opportunities for travel study in global sports contexts, students build robust portfolios and professional networks in Chicago's sports environment and beyond, graduating prepared for careers in sports journalism, on-air performance, production, social and digital content, and communication roles across the sports industry.

All Undergraduate students in the School of Communication are required to take two Writing Intensive courses (6 credit hours) as well as complete a foreign language requirement at 102-level or higher (3 credit hours) or a language competency test. More information can be found here (https://www.luc.edu/soc/undergrad/soclanguagerequirement/).

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Produce multimedia sports content that meets industry standards for journalism, broadcasting, and digital storytelling.
- Identify and apply relevant ethical principles and journalistic standards when creating and evaluating sports media content.
- Evaluate how sports media influences cultural narratives, social change, and global perspectives.
- Develop, and deliver cohesive sports media projects, demonstrating effective communication tailored to different audiences and platforms.
- Analyze trends, audience engagement, and the business of sports media, presenting their findings clearly and persuasively.

School of Continuing and Professional Studies

For more than a century, the School of Continuing and Professional Studies has been transforming the trajectory of student lives, driving professional and personal pursuits with high-quality academic offerings and engaging learning environments. A forward-thinking, responsive school, we have designed academic programs to meet market needs and offer online coursework to deliver the flexibility our students need. We

have emerged a highly ranked, national leader in online education, and we've created spirited learning environments where students develop tangible skills they can apply in today's workplace.

SCPS offers undergraduate programs to propel careers, enrich lives, and power social mobility, empowering adult learners through an accessible, impactful, and holistic education that positions them for success. With fully online classes and flexible 8-week schedules, students are able to balance their degree pursuits with life's other responsibilities. And with courses led by scholars and active practitioners in their respective fields, students will gain the relevant knowledge and practical skills to advance in their career.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

University Policies

Please see University Policies for academic policies that supersede those of academic units within the University

School of Continuing and Professional Studies Policies

The policies outlined here are additional policies that apply to all SCPS undergraduate students, both degree- and certificate-seeking students. All university policies outlined in the Undergraduate Academic Standards and Regulations section of the Academic Catalog apply to all undergraduate students, including SCPS students.

Academic Advising

The Senior Academic Advisor serves as the primary academic advisor for all undergraduate SCPS students, including both degree- and certificate-seeking students.

Upon admission, degree-seeking students are required to meet with their primary academic advisor to review an initial academic plan. They then meet with their advisor during their first session to create a formal degree outline. After this point, students may schedule advising appointments at any time for questions related to registration, enrollment, or academic planning. *It is recommended that students check in with their primary academic advisor at least once each academic year.*

The University uses LOCUS—and specifically the Academic Requirements Report (ARR)—as the official record of all completed and required coursework. An electronic audit in Microsoft Excel may also be used as a supplemental planning tool to help students visualize their path to graduation.

A file review is completed for all degree-seeking students who have earned 90 or more credits to confirm that all courses needed for graduation have been taken or are planned. A graduation audit is then completed and sent to students who have submitted the mandatory graduation application for their review.

Academic Standing

A cumulative GPA of at least 2.0 is required for a student to be considered in good academic standing. The following policies, and the university policies, apply to all SCPS undergraduate students, both degree- and certificate-seeking students.

Academic Probation

The review for academic standing is completed at the end of the term (fall and spring 16-week semester and 12-week summer semester) and not at the end of each 8-week session. When a student's cumulative GPA falls below 2.0 at the end of the term, they will be placed on academic probation and are required to complete an Academic Improvement Plan (https://forms.gle/18CkFWtUWWWa5C487/), and, may be restricted in enrollment. All students should be aware of the Academic Standing policies of the University as found in the Academic Catalog. SCPS follows the University policy parameters for academic probation, continued on probation, and dismissal for poor scholarship.

Students must be in good academic standing, cumulative GPA of 2.0 or higher, to graduate and have their degree and/or certificate conferred.

Dismissed for Poor Scholarship

Students who do not meet the requirements of academic probation and do not return to good academic standing will be dismissed for poor scholarship. SCPS follows university standards, as outlined in the academic catalog, for readmission consideration.

Once the requirement is met for readmission, students must apply for admission to SCPS, submitting official transcripts from all other schools. Grades from other institutions do not apply toward the computation of your Loyola GPA. Re-admission is not guaranteed and is subject to review. If a dismissed student is readmitted, it will be under the terms of continued academic probation and/or any other conditions established by the School of Continuing and Professional Studies Dean's Office.

Admission

Admission on Condition (Unofficial Transcripts)

Conditional admission may be offered to those who have submitted unofficial (self-submitted) or in-progress transcripts (applicant is still enrolled at previous institution at the time of admission). These admitted students must request that official transcripts be submitted to

gradapp@luc.edu before the end of the first term of enrollment, or a hold will be placed on their account so that they may not register for future terms.

Admission on Probation

Admission on probation may be offered to students who do not meet the academic requirements for admission. These students will have the opportunity to demonstrate their ability to succeed academically while on academic probation.

For **undergraduate students**, the terms for admission on probation are as follows:

- Students must pass CPST 200 Introduction to Degree Completion in their first session.
- Students must earn a cumulative grade point average of 2.5 in their first 12 credit hours of coursework.

At the completion of their first 12 credit hours, the student's record will be reviewed to determine if the GPA and CPST 200 requirements have been met and their status updated to one of the following:

- Good academic standing. If the student achieves the required 2.5 GPA on the 12 credit hours and their cumulative GPA is 2.0 or higher.
- Continued on probation. If the student achieves the required 2.5 GPA on the 12 credit hours but still needs to bring their cumulative GPA to 2.0 or higher, they will be given the opportunity to continue to improve their GPA with future enrollment.
- Dismissal for poor scholarship. If the student fails to earn a 2.5 GPA on the 12 credit hours, they will be dismissed from the university.

For **graduate students**, the terms of admission on probation are as follows:

- Students must earn a cumulative grade point average of 2.8 (good academic standing) by the end of their first semester.

At the completion of their first semester, the student's record will be reviewed to determine if the GPA requirement has been met and their status updated to one of the following:

- Good academic standing. If the student achieves the required 2.8 cumulative GPA or higher.
- Dismissal for poor scholarship. If the student fails to earn a 2.8 cumulative GPA, they will be dismissed from the university.

Admission on Probation (Paralegal Studies Certificate Students)

Students who do not meet the 2.5 minimum undergraduate GPA requirement for the post-baccalaureate certificate programs may be admitted on probation if the admission committee agrees that the student has the potential for success in paralegal studies at this level. These students will have the opportunity to demonstrate their abilities by achieving a 2.5 minimum GPA in the first two sessions of study. At that point, their files will be reviewed for a change in status to unconditional admission or dismissal for poor scholarship.

Auditing a Course

All degree and non-degree seeking students auditing a course must first receive approval from the SCPS Assistant Dean. Course auditing will be allowed only in rare and special circumstances. Students auditing a course will be assessed tuition on a per-credit basis at 50% of the normal tuition rate.

Students must complete the University's undergraduate audit request form, email it to the Assistant Dean, and on approval it will be submitted to the Office of Registration & Records. This form is found on the Registration & Records website here: https://www.luc.edu/regrec/aboutus/forms/

The completed form must be received by the SCPS Dean's office before the audit deadline as stated on the academic calendar on the SCPS website. SCPS will not approve a request received after the deadline. Please note: Paralegal (PLST) courses may not be audited.

All university policies on auditing undergraduate courses apply and can be found in the academic catalog.

Class Attendance / Student Accountability

Expectations of Students

Students are expected to treat their classroom and SCPS community obligations as they would treat any serious professional engagement. In addition to adhering to the university's undergraduate attendance policy, students must follow the SCPS attendance guidelines outlined in the SCPS policy catalog. The following expectations apply to all students within the SCPS community at all times:

- Students are expected to behave ethically and respectfully within the SCPS community, and according to the Academic Integrity policy and Community Standards as found in the Academic Catalog.
- Students must use and check Loyola email and Sakai for all correspondence with SCPS faculty and staff.
- Students are responsible for reviewing and understanding University and SCPS policies and calendars.
- Students should meet regularly with their academic advisor

Students should also adhere to the following expectations before and during their courses:

Before classes:

- Complete Mastering Learning Tools (new degree-seeking students).
- Attend the SCPS orientation, when applicable.
- Purchase books or obtain course materials prior to the start of the course.
- Review the syllabus carefully prior to the start of the course and contact instructor with questions.
- Enroll prior to the session/term start date. Late enrollment is highly discouraged. Instructors are not required to make accommodations or accept late assignments due to late enrollment.
- Students who have accessibility needs must work with the Student Accessibility Center (SAC) prior to the start of class. Students should start the process with SAC at least two months prior to the start of the 8-week session.

During Classes:

- Adhere to deadlines and timetables established by the instructor and submit work on time. Any variations/conflicts must be communicated in advance and approved by the instructor.

- Proactively communicate with instructors and academic advisor about any concerns, difficulties, or scheduling conflicts or missed sessions of the course.
- Prepare thoroughly for each session in accordance with the instructor's request.
- Arrive promptly for the start and remain until the end of each synchronous class meeting.
- Participate fully and constructively in all class activities and discussions.
- Display appropriate courtesy to all involved in the class sessions. Courteous behavior specifically entails communicating in a manner that respects, and is sensitive to, the cultural, religious, sexual, and other individual differences in the University community.
- Provide constructive feedback to faculty members regarding their performance, through the university's formal course evaluation, administered at the end of each 8-week session.

Class Attendance/Student Accountability

Due to the intensive nature of each course, students' success in SCPS courses will heavily depend on their attendance and participation in the course. The choice to pursue a degree or certificate will likely involve adjusting one's schedule to avoid conflicts whenever possible. The value placed on class participation as a component of the final grade in any course is at the discretion of the individual instructor and will be stated in the syllabus.

Courses may include both synchronous and asynchronous components. Asynchronous coursework is independent coursework students complete within a certain time frame, but students are not required to be online at a specific day or time. Synchronous coursework refers to online meetings that occur at a designated date and time as set by the course instructor. Required synchronous meetings will be communicated in advance of a student registering for a course and are included within the SCPS course schedule and are held in the evening (6-9pm, CST) or on Saturdays (9am-Noon, CST).

Students are expected to be present for every required synchronous meeting of the course. If they are unable to attend a class meeting or if they will be late for a class, they must notify the instructor in advance of the absence. Requests for missed class meetings should only occur for circumstances that are truly unavoidable and students are responsible for reaching out to their instructor in advance of the start of the session.

Each course's instructor reserves the right to make judgment on accepting and/or making up assignments missed because of class absence for a required meeting. That policy will be clearly expressed in the course syllabus. Unexcused absences may result in failing the course. Please understand, if an instructor allows an excused absence, even with an approved modification to the required meetings for a course, any change to the required components of a course will impact the student's experience and can impact a student's learning and performance.

SCPS adheres to the university class attendance policy and excused absences as found in the Academic Standards and Regulations (https://catalog.luc.edu/academic-standards-regulations/undergraduate/) within the Academic Catalog.

Understanding When a Class Begins

All classes start with the start of the 8-week session and not when the first required meeting date is scheduled for the course. Any required meeting a class has, whether it is a synchronous meeting for an online class or an on-campus meeting, will be clearly listed within the SCPS course schedule for the semester.

Non-Participation in Class and Withdrawal

Students must withdraw from a course within LOCUS to be considered withdrawn. Non-participation in a class, without formal withdrawal in LOCUS, does not constitute a withdrawal from a course. Students who do not withdraw from a course in LOCUS will have their grade computed on the basis of the work completed and may receive an 'F' grade.

Paralegal Studies Attendance and Participation Policy

Regular class attendance is required for Paralegal Studies (PLST) classes. Absences in PLST courses are excused only for serious, unavoidable situations, and you are expected to notify the instructor in advance of your absence. Absences from classes rescheduled because of public holidays are not excused, as these dates are provided at the time of registration. If you stop attending a class but do not officially withdraw from it, your grade will be computed on the basis of what work you did complete; you may receive an F if that is the resulting grade.

This accelerated program of paralegal studies requires a heavy commitment of time and energy. We are all balancing personal and professional demands. Our responsibility to you is specifically to prepare you for a paralegal career. When you miss a class, you lose the benefit of our knowledge and experience in the legal workplace, as well as our personal interest in your progress. Your absence may also be unfair to a group project.

In particular, your absence from class generally cannot be excused because of your job responsibilities. You are expected to register for a reasonable course load in light of other demands on your time.

Your success in this program will depend heavily on your attendance and participation in the classroom. The instructor has the discretion to decide whether to accept a late assignment or allow a makeup assignment, and if so to impose a deduction in the grade for that assignment. Also, the value placed on class participation as a component of the final grade in any course is at the discretion of the individual instructor.

Any student who has more than two absences, excused or unexcused, in a single 8-week session course will not be allowed to continue in that course without the Director's permission. The student will receive a final course grade calculated on the basis of zero scores on all subsequent tests and assignments.

The student must petition the Director for this permission in writing within three business days of the third absence. Relevant factors will include the student's performance in the class, the teacher's assessment of the student's ability to master the missed classes and assignments, and the reason for the absences. As noted above, absences from classes rescheduled because of holidays are not excused, as these dates are provided at the time of registration.

If some of the student's absences are excused, the student will have the opportunity to withdraw from the course, as long as the deadline for dropping a course has not yet passed. The student's grade will then be

recorded as W. However, the student is still responsible for the course tuition in accordance with the University's official withdrawal schedule.

Please note that teachers may continue to use class attendance as part of the grading criteria. Also, it is at the teacher's discretion to consider absent a student who arrives late to class or leaves early.

If you cannot attend a class, you are expected to make arrangements to obtain notes and assignments from other students, and to submit any assignments due by the appropriate deadline. It is not appropriate to expect your teacher to give you his or her class notes; this would be unfair to the students who attended the class. Nor is it appropriate to ask the teacher to review or summarize the class for you. Of course, you may ask the teacher questions after you have reviewed the material.

Students who miss exams or quizzes in a PLST course must immediately send a message requesting a makeup to both the instructor and the Director. The makeup will be allowed only on agreement of the Director and instructor that a serious, unavoidable situation (such as illness, family emergencies, or religious holidays) caused the absence. The Director and instructor have the discretion to impose a deduction in the grade for that exam or quiz.

The makeup exam or quiz must then be taken as soon as possible, before the next class meeting, and during regular office hours, 8:30 am to 5 pm. You will be expected to rearrange your work or personal schedule to accommodate the makeup. To schedule a makeup exam or quiz, please contact the Institute Office, 312-915-6820.

You may be asked to provide documentation of the reason for your absence before you will be allowed to make up any quiz or exam. A request to make up more than one missed quiz or exam within two 8-week sessions generally will not be approved by the Director.

Course Registration

Students register for courses via the University's LOCUS system. Registering for a course is the only way to guarantee a place in a course. Registration after the session start date will incur a late registration fee. SCPS does not operate waitlists for any of its courses.

When registration opens for a semester, SCPS students are advised to enroll in all sessions within that semester. For example, for fall and spring 16-week semesters, students should enroll in both 8-week session I and session II. Students who do not enroll in all available sessions may encounter billing and/or financial aid issues for the semester.

A student must be registered in a course before attending any classes or participating in the course. No student may register for a course after the late registration period.

Late Enrollments

Students may enroll in a course after it has begun only during the add/drop period in Week 1 of each 8-week session during the fall and spring semesters. The add/drop period for summer session courses are shorter, about 1-2 days. Late registration fees apply to enrollment completed during the add/drop period. Students should consult the academic calendar on the SCPS website to learn the dates for add/drop.

Students are strongly discouraged from enrolling after the start of an 8-week session as late enrollment may lead to missed class sessions and assignments. Students are responsible for informing instructors immediately of their late enrollment. Instructors are not required to make accommodations or accept late assignments due to late enrollment.

Additionally, students should be aware that it takes up to 24 hours for a student to be uploaded into a course's Sakai site after enrollment in LOCUS.

Directed Study

A directed study course is a version of an existing course run with fewer than 6 students.

Students in a directed study course must provide evidence of learning as in a regular course, i.e., they must meet learning outcomes and the minimum expectation for meetings and/or interactions with the instructor, depending on the number of credits needed. The course format and time frame may be variable and will be determined between the student and the instructor.

Students will pay regular tuition per credit for a directed study course.

Paralegal Studies (PLST) courses are not offered in a directed study format.

Double Dipping

Students are permitted to complete multiple programs (i.e. certificates, majors), even if program requirements overlap.

The exception to this is for students completing an individualized concentration (typically linked to the BA in Applied Studies). Students completing an individualized concentration may not double dip. Meaning courses that satisfy Core or other program requirements cannot be applied toward your individualized concentration.

For students completing multiple programs, conferral of your degree or certificate will not be done until program requirements for all programs have been completed. Please understand, while certificate requirements may be completed prior to finishing degree requirements, we are not able confer the certificate at an earlier point in a student's time at Loyola. Conferral for all programs is completed at the same time.

Full Time Status / Registration Limits

To be considered a full-time student, SCPS students must be enrolled for 12 credit hours per 16-week semester.

Students are not required to meet or maintain full-time status to be in good standing. However, some financial aid (student loans and scholarships), employer tuition reimbursement policies, and other situations may require full-time status in an educational program. It is recommended that students confirm the number of courses they are enrolled in for a given semester with Financial Aid to adjust their budgets accordingly.

SCPS students, except for paralegal certificate-seeking students, may register for no more than 9 credit hours in any one 8-week session. Students wanting to take more than the 9 credit hours in any 8-week session must submit the Session Over Limit Registration Appeal form (https://sites.google.com/view/scps-share-site/scps-students/student-forms/?authuser=0).

Paralegal Studies Certificate Registration Limit

Paralegal students may register for no more than 6 semester hours of courses (three 2-hour courses) in any one 8-week session. Certificate students must be enrolled half-time (three 2-hour courses) in any semester in which they obtain financial aid; the Fall I and Fall II sessions together are considered the Fall Semester, and the Spring I and Spring

II sessions together the Spring Semester. The Summer Session is considered a separate semester.

Grade and Grading Policies

The University uses letter grades and plus/minus indicators to indicate the quality of a student's achievement in a course. The chart below shows the standardized grading scale used by all SCPS faculty for converting numerical scores into letter grades. No "A+" or "D-" grade is available.

Grade	Grade Points
A	4.0
A-	3.67
B+	3.33
B	3.0
B-	2.67
C+	2.33
C	2.0
C-	1.67
D+	1.33
D	1.0
F	0

Minimum Grade Requirements

Minimum grades are also required in certain courses, as noted in the chart below:

*CPST 200 - Minimum required grade of "**P**"*

*CPST 201, CPST 397, and UCWR 110 - Minimum required grade of "**C-**"*

*Classes taken for LUC Core or IAI - Minimum required grade of "**D**"*

*Major Classes - Minimum Required grade of "**C-**"*

*Certificate or Concentration Classes - Minimum required grade of "**C-**"*

*If the student's grade is NP, the student must repeat the class and earn a passing (P) grade.

No Record (NR) Grade

The notation "NR" is assigned in LOCUS for any course in which the student is enrolled but has not participated. Criteria for determining participation includes, but is not limited to:

- Physically attending a class where there is an opportunity for direct interaction between the instructor and students.
- Submitting an academic assignment.
- Taking an exam, an interactive tutorial, or computer-assisted instruction.
- Attending a study group that is assigned by the institution.
- Participating in an online discussion about academic matters.
- Initiating contact with a faculty member to ask a question or discuss a matter related to the course.
- For online or blended course, participation and attendance is defined as any class activity, including logging into the course on Sakai and accessing any of the course materials.

Pass/No-Pass Option

Students may take a course on a pass (P)/no pass (NP) basis. SCPS students adhere to university policy and students should review the policy and process found in the Academic Catalog. The pass/no pass option is not available for program required courses (major, certificate, etc.)

CPST 200 Introduction to Degree Completion is graded P/NP and is counted in the total attempted credit hours.

Students should be aware that the appearance of "P" and "NP" grades on their transcripts may have an adverse effect on transferring to other schools and acceptance by graduate or professional schools.

Incomplete (I) Grade

SCPS expects students to complete all coursework by the end of the session or term during which a course is taken. However, if a student and the instructor make arrangements in advance, a student may receive a grade of Incomplete (I) at the end of the session/term. The student is to complete the outstanding work and submit it to the instructor according to a schedule approved by the instructor, subject to the following SCPS policies.

A grade of Incomplete for a course is assigned at the instructor's discretion, when justified by unexpected, disruptive situations or circumstances beyond the student's control. These may include personal illness or injury, a death in the immediate family, a natural disaster, or other such emergency. Documentation may be required, at the instructor's discretion.

Incomplete requests should only be submitted where a student has completed a significant portion of the course, and required coursework, and circumstances prevent the student from finishing remaining requirements by the end of the class. For example, if a student has been actively participating in and keeping up with coursework and they encounter life circumstances within the final few weeks of a course that prevents them from completing successfully, they should contact the instructor to request an incomplete. This request is not meant to be used in those situations where students have been non-participatory throughout the course and need additional time to make up missed assignments from the bulk of the course. In those cases, the student should contact their primary academic advisor to discuss their options.

For any incomplete request, the student must initiate the request by submitting the Incomplete form, found on the Registration and Records website, to the instructor. The instructor will then complete and submit the form according to its instructions and, if approved, enter the grade of Incomplete for the student in LOCUS.

The student must comply with all conditions specified on the form. The latest deadline permitted for submitting the missing work is six weeks after the start of the subsequent semester, but the instructor may specify an earlier due date. If the student does not submit the missing work by the deadline, the instructor enters a grade based on the work completed.

Late and Extra Credit Assignments

Instructors include an explanation of the grading criteria for each course on the syllabus. Late assignments (if accepted) and exams or quizzes taken late (if permitted) may be marked down, at the instructor's discretion.

If an instructor chooses to offer extra credit assignments (there is no obligation to do so), they will be noted on the course syllabus distributed

at the beginning of the course. Students should not expect to make up poor grades entirely through extra credit assignments.

Graduation / Commencement

The University awards degrees and certificates four times within each academic year, after every semester: fall semester (December), J-term(January), spring semester (May), and summer semester (August).

Prospective graduates must submit a graduation application in LOCUS. Deadlines for the LOCUS undergraduate application are as follows:

- Fall graduation: March 1
- Spring graduation: October 1
- Summer graduation: October 1
- J-term graduation: November 1

All financial obligations to the University must be satisfied before the diploma or certificate can be mailed.

Laudatory Status/Honors

Students with transfer credit applying toward their degree requirements must complete a minimum of 60 graded Loyola credit hours (excluding pass-no pass hours) to be eligible for academic honors. The computation of a student's Loyola cumulative GPA is based on the student's entire academic career at Loyola.

Laudatory honors will be determined per the qualifications noted in the Academic Catalog.

Paralegal Studies Certificate Graduates

Earning a certificate does not make a graduate a "certified paralegal." No school can award the status of "certified paralegal," which is a designation given only by professional associations (such as NALA and NFPA) to persons who meet their qualifications. Employers who ask for "certified paralegals" are almost always seeking paralegals with certificates; we know of no exceptions to this practice locally.

Commencement

The School of Continuing and Professional Studies has a commencement ceremony each year at the end of the spring semester in May on the Lake Shore Campus. Information can be found online at the University's Commencement website: https://www.luc.edu/commencement/

The May Commencement ceremony includes graduates from the fall, spring, and summer semesters within that academic year.

Honor Societies

Alpha Sigma Lambda (ASL)

Invitations are emailed each October or November, and inductees are honored at the SCPS induction ceremony in December. SCPS selects the top 20% of eligible undergraduate degree-seeking students and the top 35% of eligible graduate degree-seeking students. The minimum cumulative GPA is 3.2 for undergraduates and 3.8 for graduate students, though the actual GPA cutoff may be higher depending on the overall pool of eligible students.

Alpha Sigma Nu (ASN)

Alpha Sigma Nu inductees rank in the top 15%, academically, of students in the School of Continuing & Professional Studies. Loyola University Chicago inducts fewer than 5% of its students each year, so it considers Alpha Sigma Nu to be one of the highest honors the University can bestow.

Eligible students are sent an invitation to apply and must meet the following criteria:

- Actively enrolled at time of induction
- Undergraduate students must be juniors or seniors at the time of induction.
- Undergraduate transfers must have completed 1-1/2 semesters at a Jesuit institution.
- Graduate students must have completed 1/2 of their credit requirements at the time of induction
- Must be in the top 15% of their class
- Demonstrated participation in service activities

Lambda Epsilon Chi (LEX)

Lambda Epsilon Chi (LEX) is the National Honor Society in Paralegal/ Legal Assistant Studies sponsored by the American Association for Paralegal Education.

Paralegal students who have completed two-thirds of the program requirements toward their original certificate or degree at Loyola are eligible for induction into LEX if they demonstrate "superior academic performance." The Institute faculty has defined this standard as a minimum of a 3.7 cumulative grade point average and placement in the top 20% of eligible students. Two-thirds of the program requirements is calculated as 16 semester hours of PLST courses.

Only students working on their original paralegal certificates or degrees at Loyola will be considered for LEX membership, and no more than the first 28 hours of PLST courses will be considered in determining the student's GPA for this purpose. Also, only Institute PLST courses will be included in this GPA calculation.

LEX inductees are recognized at an annual induction ceremony hosted by SCPS in December.

SCPS Dean's List

For the fall and spring semesters, students who complete 12 credit hours during the semester and achieved a minimum semester GPA of 3.7 or higher are named to the SCPS Dean's List at the end of the semester.

Leave of Absence

Stop-Out Definition

A stop-out student is a student who has not enrolled for one semester/ term or more. Students who do not enroll in a single 8-week session within the semester but enroll in the other 8-week session will not be considered a stop-out student.

Leave of Absence Policy

We recommend that students remain continuously enrolled and complete courses within the time frame set within your initial advising appointment. However, we understand circumstances may require you to step away from classes.

Students who need to stop-out of enrollment for anywhere from one semester up to one year, may request a leave of absence. Students should request a leave of absence before the start of the fall or spring semester, and no later than the start of the 8-week second session for the

semester. Students choosing not to enroll in the summer semester do not need to request a leave of absence.

Students must submit the leave of absence form to their primary academic advisor to request a leave.

Paralegal Studies Certificate Students Time to Completion

Paralegal post-baccalaureate certificate students have up to three (3) calendar years to complete all program requirements and should consult with their advisor when making any adjustments to their schedule.

Returning from Leave/Extending Leave

Students on leave should contact their primary academic advisor when they are prepared to return to classes. Ideally, students should allow at least one month prior to the start of the semester to prepare for a return from leave.

If students need to extend their leave of absence, they should contact their primary academic advisor with this request. Extensions can only be provided to students who have requested a leave of less than one year, or three consecutive semesters.

Discontinuation & Readmission

Students who do not return from a leave of absence will be withdrawn from the university.

Withdrawn students may apply for admission to SCPS if they wish to return to classes. Students will be held to the degree requirements of the catalog year in which they are readmitted.

Applicants for readmission who have been dropped from Loyola for poor scholarship may apply for readmission only after complying with all terms outlined in their dismissal letter.

Applicants for readmission who have been dropped from Loyola for disciplinary reasons must have their applications for readmission reviewed by the Dean of Students Office. If the Dean approves readmission, the application will be reviewed according to the regulations stated above.

Non-Traditional Credit

Non-traditional credit is credit earned by demonstrating knowledge gained through experience, either personal or professional. Adult students, in particular, often have a reservoir of college-level learning gained through professional and personal accomplishments that they can use to earn non-traditional credit toward select SCPS program requirements.

Students may apply up to 36 non-traditional credit hours to the completion of their undergraduate degree with SCPS.

Non-Traditional Credit Parameters

Non-traditional credits may not be applied toward the mission-specific courses, SCPS school requirements, or to the Loyola residency requirement. Non-traditional credit does not factor into the Loyola GPA.

- Non-traditional credit may not be applied toward mission-specific requirements (THEO or PHIL courses) or school requirements (CPST 200, CPST 201, CPST 397, and UCWR 110).
- Non-traditional credit may be applied to no more than four (4) courses toward major requirements. If transfer credit is applied toward major requirements, the availability of non-traditional credit options toward the major may be reduced as half of the major must be completed with Loyola academic credit. (BA Management majors should refer to the major specific policy within the transfer credit policy section of the catalog.)
- Non-traditional credit may be applied to no more than two (2) courses of an 18 credit hour certificate or concentration
- Only select CLEP exams can complete specific CORE requirements

Accepted Forms of Non-Traditional Credit

SCPS has identified the following as accepted forms of non-traditional credit:

- Credit by examination (CLEP/DSST)
- American Council on Education (ACE) evaluated credit
- Military Training/Education (CCAF/JST)
- Police Academy Training

Credit by Examination (CLEP/DSST)

Students may take CLEP and/or DSST examinations only if they:

- have not previously completed, failed, or received credit from Loyola University Chicago (transfer or otherwise) in a comparable or more advanced course in the specific examination area
- will not receive comparable credit in the CLEP examination area in the same term the examination is taken or in a subsequent term.

Students must receive a passing score on a CLEP or DSST exams approved by the University to count for college-level credit:

- CLEP Exam List
- DSST Exam List

American Council on Education (ACE)

The American Council on Education (ACE) evaluates 35,000+ workplace, military and non-collegiate learning experiences and training programs for college credit. Depending on the program or experience completed and approved by ACE, students may apply those credits to major and/or general elective hours, if applicable.

- **For work already completed**, students can move forward with ordering the transcript from ACE. Once submitted, your transcript will be reviewed to determine how the credit will transfer.
- If a student is considering taking an exam or course that has been reviewed by ACE, and they **haven't yet completed the work**, they should work with their primary academic advisor first to determine if the credit will be accepted and how it may apply toward requirements.

Students who believe they have completed an evaluated program should review the ACE National Guide.

Year Up

The School of Continuing and Professional Studies is a partner with Year Up Chicago. Year Up courses have been reviewed by the American Council on Education (ACE). Students who have completed coursework through Year Up should submit an official ACE transcript. All Year Up courses will transfer as general elective credit and go toward the 120

credit hours students need to complete their bachelor's degree with Loyola.

Military Training/Education

Students who have completed military training should order their military transcript (both JST And CCAF) through the American Council on Education (ACE).

Police Training

Students who have completed the education provided by the Chicago Police Department (CPD) Police Academy will be awarded 20 credit hours to be applied as general elective credits.

Students must submit a copy of their CPD Academic certificate of completion to their academic advisor. This certificate of completion will also be cross-checked against the Illinois Law Enforcement Training and Standards Board database.

Paralegal Studies Instructional Hours

Most PLST courses award 2 semester hours of credit. The ABA Guidelines for the Approval of Paralegal Education Programs require that a 2-s.h. course include 25 instructional hours. Therefore, in addition to the 24 hours of classroom instruction (class meetings three hours each week for eight weeks), each in-person PLST course will include an additional hour of instruction, determined at the teacher's discretion. For example, a teacher may schedule a review session before an exam, a Forums (discussion board) posting assignment on Sakai, or something similar. Teachers will include this extra hour of instruction in their syllabi each session.

Repeated Courses

SCPS students must adhere to the repeated course policy found in the Academic Standards and Regulations (https://catalog.luc.edu/academic-standards-regulations/undergraduate/).

CPST 200: Admission on Probation

Students who are admitted on probation to SCPS must successfully pass CPST 200 in their first session. Students who receive an 'NP' grade will be dismissed from the program. Students on probation who withdraw from CPST 200 in their first session will be allowed to enroll in a subsequent session. Students on probation who withdraw from CPST 200 in their second attempt will be dismissed from the program.

CPST 200: Unconditional Admission

Students who are admitted unconditionally to SCPS must complete CPST 200 in their first session. Students who receive an 'NP' grade in their first attempt will be required to repeat the course in their next enrolled session and will not be permitted to enroll in any other courses unless permission is granted from the student's advisor.

Incomplete grades will not be granted for students taking the class for the second time. Students who do not pass CPST 200 on the second attempt will be dismissed from the program.

Residency Requirement

Degree-seeking students must take their final, uninterrupted 45 credit hours, or a minimum of 60 total credit hours, in residence at Loyola University Chicago. Residency requirements also apply to majors: half of the credits applied toward the major must be earned at Loyola. (BA Management majors should refer to the management major specific policy within the transfer credit policy section of the catalog.)

Transfer Credit

Loyola SCPS accepts transfer credit earned from regionally accredited institutions. We can accept up to 64 credit hours across all two-year institutions (community colleges), and an unlimited number of credit hours from four-year universities.

Students who have completed either an A.A., A.S., or General Education Core Curriculum will have met Loyola's Core Curriculum requirements, with the exception of mission-specific courses.

Loyola is a receiving institution in the Illinois Articulation Initiative program for awarding transfer credit. Students who have completed 30 or more transfer credits may follow either the Illinois General Education curriculum or the Loyola CORE requirements to satisfy general education requirements. Students with less than 30 will follow the CORE.

Transfer courses that are remedial, not college level, may not be used to satisfy degree requirements and will not transfer.

Grade Requirements

College-level credit courses from regionally accredited institutions will be accepted in SCPS if the student earned a passing grade. Courses received in transfer must also adhere to the grade requirements, found under Grade and Grading Policies section, in order to satisfy program requirements. When transfer courses do not meet the grade requirements for a program, a student may need to repeat the course at LUC.

Enrolling in Courses Elsewhere

Any coursework taken after a student starts courses with Loyola will not be considered for transfer unless the student submits an appeal and receives approval before enrolling in the course(s). Courses taken elsewhere must meet the requirements outlined in the Academic Catalog.

Certificates and Transfer Credit

For certificates consisting of 18 credit hours, up to 6 credits may be accepted in transfer or completed via non-traditional credit, and all other required credits must be earned at Loyola.

The following certificates must be completed entirely with Loyola academic credit:

- Computer Science certificate
- New Media Communication certificate.

New Media Communication students may apply transfer credit toward COMM 175, but an additional COMM course must be taken to earn the 9 total credit hours to complete the certificate.

The following certificates allow the application of 1 course (3 credit hours) in transfer credit*:

- Cybersecurity Fundamentals certificate
- Introduction to Data Science
- UI/UX Design and Accessibility certificate

**Credit must be from work completed within the last 5 years.*

Management BA Transfer Credit Policy

SCPS students completing a Management BA are limited in the number of business-related courses that can either be taken at Loyola or transferred from another institution. These limitations are set in response to the accreditation requirements determined by the Association to Advance Collegiate Schools of Business (AACSB). A business-related course is a course where course content includes:

- Accounting
- Economics
- Finance
- Management
- Marketing
- Quantitative methods
- Legal studies
- Management information systems

No more than 25% of a BA Management student's total program may include business-related courses. The total degree requirement for a BA student is 120 credit hours, which means BA Management students may not transfer or take at Loyola more than a combined 30 credit hours of business-related courses. Students should work with their primary academic advisor to understand how this impacts their program requirements.

Paralegal Studies Certificate Transfer Credit

Transfer credit may be available for courses taken at another paralegal program, or at an ABA-accredited law school, before applying to the Institute. The courses must be comparable to specific Institute paralegal courses, including instruction in practical paralegal skills.

Transfer credit towards the post-baccalaureate paralegal certificate is limited to 6 semester hours. University policy requires that the institution offering the paralegal program be regionally accredited and that the student have earned a grade of C- or higher. The student must submit an official transcript confirming the grade and may be required to provide documentation of the course content. The Director has the discretion to determine whether transfer credit will be awarded.

Students currently enrolled in the Institute will not receive transfer credit for courses taken elsewhere except with the advance approval of the Director, which is granted only in unusual situations and at the Director's discretion.

Special Note: Paralegal certificate students with transfer credit will have access to all career assistance services at the Institute once they have completed two-thirds of their required credit hours toward the Loyola paralegal certificate.

Withdrawal / Registration Changes

A grade of "W" indicates official withdrawal from a course during the withdrawal period (see academic calendar on SCPS website for dates). The grade of "W" is not counted in computation of academic standing as either attempted or earned credit hours, nor calculated in the grade point average.

The financial impact of changes after the late/change registration period is determined in accordance with the University's withdrawal schedule, available on the Bursar's website. The website provides the official schedule for each term, but generally, the schedule for fall and spring semester 8-week sessions is as follows:

First week of session - *100% of tuition credit*

Second week of session - *80% of tuition credit*

Third week of session - *40% of tuition credit*

Fourth week of session and after - *0% of tuition credit*

The effective date of withdrawal is determined by the date the course is dropped in LOCUS, not by class attendance. In an online or blended course, participation and attendance are defined as any class activity, including logging into the course on Sakai and accessing any of the course materials. A student who does not officially withdraw from a course will receive a grade based only on the work completed and will remain responsible for all charges for that course.

Students may not withdraw after the withdrawal deadline and, after the deadline date, will be assigned the grade earned based on work completed. For students dealing with extenuating circumstances preventing participation in a course, they may submit an appeal to change for change in academic record.

Students may work with their primary academic advisor to learn more about the appeal process and find further information in the university's academic catalog under Academic Appeals (https://catalog.luc.edu/academic-standards-regulations/undergraduate/).

The Financial Aid Office is required to recalculate financial aid eligibility for students who withdraw from classes before 60% of the course has been completed. This includes a recalculation for withdrawals where the effective date of withdrawal is adjusted after an approved appeal.

Writing Requirement

Upon admission, degree-seeking students who haven't satisfied UCWR 110 Writing Responsibly with either transfer credit or prior Loyola academic credit, must complete the Writing Placement Assessment (WPA). Students will be sent an email with further details about completing the WPA after admission.

Understanding the Writing Placement Assessment (WPA) Score

- If a student tests at 110 they will take UCWR 110 with Loyola in the next session available.
- If a student tests at 100 they take ENGL 100 (directed study) with Loyola in the next available session followed by UCWR 110 with Loyola in the next available session.
- If a student tests at 103 they take ENGL 103 (directed study) with Loyola in the next available session followed by UCWR 110 with Loyola in the next available session.
- If a student tests at 219 they take UCWR 109 (directed study) and UCWR 110 with Loyola concurrently in the next available session.

Continuing Professional Studies (CPST)

CPST 165 Special Topics (1-3 Credit Hours)
Course titles and content vary from term to term. Permission is required to enroll.

CPST 200 Introduction to Degree Completion (3 Credit Hours)
Enrollment is restricted to SCPS degree students only. CPST 200 exists to give newly admitted adult students a chance to ease themselves back into the academic environment while highlighting all of the tools and services available through the university. Improved academic writing through use of multiple drafts.
Outcomes:
Exposure to/familiarity with LUC resources

CPST 201 Civic Identity and Development (3 Credit Hours)
Pre-requisites: CPST 200; Co-requisite: UCWR 110; Enrollment is restricted to students in the School of Continuing and Professional Studies
In this course, students will examine their interconnected identities as engaged professionals in their communities using a variety of frameworks. They will learn to leverage the assets of their communities to enact positive change while also leveraging their own assets to grow as individuals. This course will also prepare students for the design and execution of the SCPS capstone project later on in their academic program.
Outcomes:
Students will develop civic awareness through examination of their identities and meaningful engagement with their communities

CPST 242 Design for the Web (3 Credit Hours)
This course prepares students to develop webpages through a study of Hypertext Markup Language (HTML), Cascading Style Sheets (CSS), Usability principles and Design principles. This course will teach students to plan, design, and construct webpages to work properly in modern web browsers, conforming to web standards while following best practices. Students will be able to: identify graphic design principles that relate to web design, develop webpages with HTML; style webpages with CSS; design and implement wireframes and mockups for websites.

CPST 243 Microeconomics (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Continuing and Professional Studies
Introduction to economic analysis of the smaller components of the economy, household, firm and industry. Topics include economic, socio-economic, and political economic issues; includes a focus on behavioral economics; and provides students with an opportunity to analyze real world economic and public policy decisions that have been influenced by non-economic factors included within its field.
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
Explain the law of supply and demand; Distinguish characteristics of different market structures; Analyze how consumers maximize utility; Apply behavioral theory to economic decision-making; Analyze real world microeconomic decisions; Research a topic and present recommendations

CPST 245 Macroeconomics (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Introduces economic analysis that studies system wide phenomena including inflation, economic growth and development and unemployment. Includes a focus on behavioral economics, and provides students with an opportunity to analyze real world economic and public policy decisions that have been influenced by non-economic factors included within its field.
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
1) Explain the law of supply and demand; 2) Describe the nature of macroeconomic issues and problems; 3) Articulate the objectives of monetary and fiscal policies and the function of the two principal policy makers; 4) Analyze historical macroeconomic crises; 5) Discuss basic macroeconomic goals such as GDP, CPI and unemployment; 6) Assess public policy decisions from a behavioral economic perspective

CPST 247 Computer Concepts and Applications (3 Credit Hours)
An introduction to computer and internet resources and skills with an emphasis on effective use of technology in the work place. Students will learn to identify and provide recommendations for technology-based issues in business using industry standard language, identify changes in information technologies and assess the impact on business and society. Restricted to students in the School of Continuing and Professional Studies.
Outcomes:
Understand the purpose and composition of information systems in business, and receive hands on experience developing business applications with tools such as Microsoft Office, social media, basic website construction

CPST 248 Web Accessibility and UX Strategy (3 Credit Hours)
This course explores the intersection of user experience (UX) design and web accessibility, emphasizing inclusive design principles and strategic UX planning. Students will learn how to evaluate and implement accessibility standards (e.g., WCAG), design user-centered interfaces, and develop strategies that enhance usability for diverse audiences, including individuals with disabilities. Students will understand the UX Design thinking process, including exploring personas, task analysis, and user journey mapping.
Outcomes:
Apply accessibility standards and UX principles to design and evaluate web interfaces that meet the needs of diverse user populations, including those with disabilities; Develop and communicate UX strategies that incorporate accessibility principles to support inclusive digital product design and user engagement; Analyze user personas, perform task analysis, and construct user journey maps to inform UX design decisions

CPST 249 User Experience Design Tools and Techniques (3 Credit Hours)
Pre-requisites: CPST 248 with C- or better
The course focuses on user and task analysis (goal setting and problem framing), field research (interviews, personas, planning, etc.), usability testing, the UX process (from wireframes through user journey mapping). These topics are explored through Design assignments that utilize the complete UX Design process. Students will be able to: apply the UX Prototyping process and UX Design Tools; apply the UX Design process, including the use of personas, task models, and user journey mapping.

CPST 250 Foundations of Organizations (3 Credit Hours)
Pre-requisites: CPST courses are restricted to students in the School of Continuing and Professional Studies
An introduction to contemporary management with emphasis on organizational culture, decision making, organizational structure and design, planning, communication and information technology.
Course equivalencies: MGMT201/201H/301/CPST250/ACMGT
Outcomes:
Students will demonstrate an understanding of the managerial roles in organizations, the four levels at which behavior is examined in organizations and will develop a framework for basic business operations

CPST 260 Artificial Intelligence in Practice: Tools, Ethics, and Strategy (3 Credit Hours)
This course examines the history and function of Large Language Models (LLMs), their ethical implications, and on-going societal impact. Students explore industry applications, evaluate real-world case studies, and develop strategies to integrate and utilize AI tools for responsible value creation. This course will provide practical experience in researching, analyzing, and adopting AI tools to enhance efficiency and task optimization.
Outcomes:
1) Describe fundamental artificial intelligence tools (generative, agentic, domain specific tools, etc), including their core functions, typical applications, and relevance across various domains; 2) Analyze the ethical implications of the transformative potential of AI and its impact on society; 3) Explain the History of AI and how Large Language Models Function; 4) Explore relevant industry applications that implement Large Language Models (LLMs) and how to harness value creation in the workplace; 5) Implement actionable strategies to integrate AI into an organization's culture

CPST 265 Special Topics (1-3 Credit Hours)
Course titles and content will vary from term to term. Permission is required to enroll.

CPST 291 Dynamic Programming Languages (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Introduction to programming in dynamically typed languages, sometimes known as scripting languages. The primary language example will be Python; the course will cover Python data types, control structures, function definitions, objects and lambda expressions. A second language may be Ruby, PHP, Scheme or a similar language. The course will also briefly address how Javascript fits into the category of dynamic languages. - Ability to create a dynamic web page using Python or some other language
Outcomes:
Ability to write short programs in Python, using loops, lists and dictionaries; Ability to create graphical effects using Python; Familiarity with the software-development process, and how software can be organized using classes and functions; Familiarity with the advantages and disadvantages of dynamic languages, versus static typing; Ability to compare Python to some other dynamic language, such as Ruby or PHP

CPST 295 The Internship Experience (3 Credit Hours)
Pre-requisites: CPST 200 and CPST 201 (minimum grade of C+); Enrollment is restricted to SCPS degree seeking students; Minimum 2.5 GPA is required
This course provides an opportunity to broaden work and experiential base through immersion within a selected organization. Students spend approximately 8 hours a week interning with their chosen company, institution, nonprofit, small business or other professional setting. Optional to extend the internship a second term.
Outcomes:
To gain real-world professional experience within a targeted work environment; To apply skills and knowledge within context of selected environment; To develop networking opportunities within new professional workplace

CPST 310 Accounting Principles and Application (3 Credit Hours)
CPST courses are restricted to students in the School of Continuing and Professional Studies. This course introduces major concepts in the areas of financial and managerial accounting and develops understanding of accounting process and principles. Students will gain a deeper understanding of financial statements, accounting mechanics, accrual accounting, financial planning, variance analysis, internal controls and financial and financial analysis.
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
Students will gain a deeper understanding of financial statements, accounting mechanics, accrual accounting, financial planning, variance analysis, internal controls and financial and financial analysis; The students will complete a final course project that demonstrates their ability to manage the financial data of a fictional organization

CPST 315 Professional Technical Writing (3 Credit Hours)
Pre-requisites: UCWR 110; Restricted to students in the School of Continuing and Professional Studies
Technical Writing prepares students to design effective technical documents for both written and digital media, with particular emphasis upon technical memos, problem-solving and decision-making reports, and organizational, product-support, and technical-information webs.
Outcomes:
Students able to write standard prose with appropriate citations, use a range of current online platforms and technology

CPST 320 Program Evaluation (3 Credit Hours)
Enrollment is restricted to students in the School of Continuing and Professional Studies. Conceptual frameworks and methods related to program evaluation will be covered including process, developmental, outcome, and impact evaluation. Students will be exposed to best practices to measure and document change on the individual, organizational, and macro level including the use of logic models. Quantitative, qualitative, and mixed methods design will be presented. Students will be exposed to analytical tools to interpret qualitative and quantitative data. The use of Big Data will be explored including the implications for behavioral change. Ethical issues in real world evaluation will be addressed. Course Objectives 1. Describe the main conceptual frameworks used in program evaluation including process(formative), developmental, outcome and impact. 2. Compare and contrast quantitative, qualitative, and mixed methods design for program evaluation. 3. Evaluate best practices in relation to the measurement and documentation of change (individual, organizational, and macro-level). 4. Develop process and outcome objectives and logic models. 5. Interpret data including Big Data to make judgements about the efficacy of program activities and intervention. 6. Describe ethical dilemmas with real world research.

CPST 322 Strategic Communication Tools for Applied Psych (3 Credit Hours)
Communication tools commonly employed in the behavioral sciences will be covered: interview development and implementation; best practices for conflict management, negotiation, consultation and persuasion; group facilitation best practices; change facilitation communication techniques including motivational interviewing; the impact of computer mediated communication on interpersonal dynamics; and cultural norms and interpersonal communication. Students interested in counseling and other helping professions, Human Resources, organizational development and the persuasion sciences will benefit from these tools. Enrollment is restricted to students in the School of Continuing and Professional Studies. Course Objectives 1. Identify best practices for core communication tools used in applied psychology (and behavioral sciences). 2. Develop skills in interview development and implementation, group facilitation, and motivational interviewing. 3. Evaluate techniques for conflict management, negotiation, consultation and persuasion. 4. Critique the impact of computer mediated communication of interpersonal dynamics. 5. Describe culturally agile communication techniques.

CPST 325 Data Processing, Analysis, and Visualization (3 Credit Hours)
Pre-requisites: STAT 103; CPST 291 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course studies the concepts, methods, and tools required to infer meaningful information and generate useful visualizations from large data sets. Visualize and analyze structured data using appropriate statistical data mining and visualization tools. Analyze distributed computing frameworks for processing large data sets.
Outcomes:
Implement scripting to convert raw data to structured data

CPST 335 Law and Regulations for Organizational Leaders (3 Credit Hours)
The role of the organization (for profit, non-profit and governmental) from the dual perspective of private and public law. Includes foundations of law and judicial process; contracts, torts, and property law; intellectual property rights; legal, securities and employment regulations; ethical considerations and policy issues.
Outcomes:
-Differentiate ethics and law/private and public law -Discuss Constitutional Law and government's role to regulate business -Apply basic legal principles to the private market -Explain legal principles of contracts

CPST 340 Marketing Concepts and Strategies (3 Credit Hours)
Pre-requisites: CPST 250; Restricted to SCPS
Students will demonstrate an understanding of the fundamental principles of marketing identifying organizational goals, marketing objectives, and variables that affect marketing. Students will examine the roles of advertising, public relations, and sales; integrated and strategic marketing within an organization.
Course equivalencies: MARK201/201H/301/CPST340
Outcomes:
Students will develop a comprehensive marketing plan analyzing a real marketing problem, determining strategies, developing sample materials and devising metrics to evaluate success for an organization

CPST 341 User Experience Design to Drive Business (3 Credit Hours)
Pre-requisites: CPST 249 with C- or better
In this course students will learn how to connect and align business objectives with UX Design goals. Students will learn how to bring high-level planning into concrete actionable steps. Students learn Strategy for continuously Developing Brand and Identity through Design. Students will be able to: Understand how effective UX is a strategic advantage for business; Connect and align business objectives with UX Design goals; Apply Design Thinking to create good UX.

CPST 342 Introduction to Web Application Development (3 Credit Hours)
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications. Specific topics include presentations, business, and data access layers, as well as integration with database systems. An introduction to webpage development using JavaScript, jQuery and associated client-side tools.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks; Familiarity with database integration and deployment environments; Create webpages using JavaScript and related tools and protocols, and interface a webpage with a database

CPST 343 Software Development for Mobile Devices (3 Credit Hours)
Pre-requisites: COMP 170 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course introduces software development for the Android environment, using the App Inventor framework. The course also introduces the basics of user-interface design and mobile architecture. Development work may be done on either an Android device or on an Android emulator running on a Windows/Mac/Linux laptop.
Outcomes:
Be able to develop simple Android applications using the App Inventor framework; Be able to explain the basics of mobile-application architecture and design; Be familiar with the basics of user-interface design; Understand the role of mobile-device sensors, such as the touchscreen, the accelerometer and GPS; Understand the use of Wi-Fi versus mobile wireless, and the use of the cloud in mobile applications; Be able to work with developers to create applications

CPST 345 Introduction to IT: Networking, Cloud & Security (3 Credit Hours)
Pre-requisites: COMP 170 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course covers the fundamentals of IT systems, networking, and security. The course will cover fundamental computer networking concepts and principles, including the basics of the TCP/IP model and packet-based networking. Other topics include an overview of Wireless Networking, Cloud Computing, and an introduction to Cybersecurity.
Course equivalencies: CPST 345 / ITLS 445
Outcomes:
Students will be able to: Describe how the Internet works; Make connections between devices Assess how data is transferred end to end; Perform basic Cloud Computing implementation and deployment; Describe essential features of Mobile Computing; and, identify and assess Cybersecurity threats and describe solutions to those threats

CPST 349 Project Management (3 Credit Hours)
Pre-requisites: CPST 250; Restricted to students in the School of Continuing and Professional Studies
The art and science of project management as applied to a variety of business, commercial, and public management situations. Covers all phases of the project life-cycle; techniques for planning, scheduling and control of projects; project organizations; and techniques for building effective project teams. Student will gain a working knowledge of the fundamental principles and techniques of effective project management, and how to apply these principles and techniques in the business environment.

CPST 350 Human Resources Principles and Practices (3 Credit Hours)
Pre-requisites: CPST 250; Restricted to students in the School of Continuing and Professional Studies
Students will gain understanding of human of resource management functions, including the legal environment; equal employment opportunities requirements; job design and analysis; recruiting, orientation, and training; performance appraisal; compensation systems; labor relations; collective bargaining and grievance processes; and health and safety.
Outcomes:
Students will make a presentation about human resource components for an organization, including job description, recruiting plan, hiring procedures, performance evaluation, and collective bargaining considerations

CPST 360 Development and Change in Organizations (3 Credit Hours)
Pre-requisites: CPST 250
Students will investigate the theory and practice of organizational development, examine assumptions, strategies, models, intervention techniques for organizational development and change processes. Students will also study the formation of collaborative relationships, overcoming resistance, gaining commitment and realigning culture.
Outcomes:
Students will provide case studies that integrate data; design interventions, change strategies and an evaluation for diagnosing organizations, groups and jobs

CPST 365 Advanced Special Topics (1-3 Credit Hours)
Course titles and content vary. Variable (1-3) credit hours. Permission required to enroll. Restricted to students in the School of Continuing & Professional Studies. SCPS permission required to enroll.

CPST 370 Leadership Theories and Applications (3 Credit Hours)
Pre-requisites: CPST 250
Students will study leadership theory, concepts and the practical application of leadership at all levels. Students will analyze historical approaches to leadership and focus on influential contemporary leadership perspectives such as servant leadership, situational leadership, transformational leadership, and principle-centered leadership.
Outcomes:
Students will complete a leadership development plan and apply leadership theories to workplace situations through reflection, real-life examples, and case studies

CPST 371 Organizational Finance (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201; Restricted to students in the School of Continuing & Professional Studies
Management involves the allocation and distribution of resources as well as an ongoing knowledge of the financial impact of the local, regional and national economies. This course offers an overview of the inter-relations of money and markets, investment, and financial management. It will focus on financial analysis, design and reporting from a managerial perspective, as well as organizational issues which have a financial impact on the entity. It will concentrate on organizational finance topics with an emphasis on financial analysis, fixed income securities, stocks, projects and their valuations, corporate valuation and governance and cash distribution.
Course equivalencies: FINC332/FINC 334/CPST271
Outcomes:
At the end of this course, the student will be able to 1) Read, develop and write financial analyses for managerial roles; 2) Develop concrete skills in regard to fiscal leadership; 3) Analyze cash flow and financial statements; 4) Describe the time value of money, bonds, and bond valuation regarding changes in interest rates; 5) Evaluate risk and return, valuation of stocks and corporations, and financial options in corporate finance; 6) Apply the cost of capital and cash flows to capital budgeting; 7) Describe how local, regional and national economies impact the success of the allocation of financial resources

CPST 377 Data in Management Decision-Making (3 Credit Hours)
Pre-requisites: CPST 250, STAT 103
Data, technology, and analytics capabilities have a direct impact on decision making. The integration of Financial/Enterprise Resource Planning (ERP) Systems and business analytics drives the ability to turn data into insights and action. This course will prepare students to understand, manage and visualize data, while also focusing on effective ways to communicate for decision-making. The course will introduce ERP systems and technology and the use of analytical tools in organizational decision-making.
Outcomes:
Utilize common enterprise systems and analytical tools in decision-making; Evaluate the use of databases in data management and data wrangling; Develop the ability to apply analytical techniques to data through mining; Practice important data visualization techniques and summary measures; Write to communicate insights gained from data analysis

CPST 380 Leadership, Culture and Ethics (3 Credit Hours)
Pre-requisites: CPST 250
Students examine organizational ethics, values, strategy, culture, leadership and coaching. Students self-assess and refine their own concept of leadership and decision-making in the context of attitudes, environments, cultures, and issues faced by leaders in organizations.
Outcomes:
Students will analyze descriptive and normative models of ethical decision making in business, leadership strengths and management style using real life situations, self-assessment and cases studies

CPST 381 Cybersecurity Governance (3 Credit Hours)
Effective Cybersecurity Leadership requires that there is a cogent Governance structure. Students in this course will learn how to manage Cybersecurity processes while meeting the needs of the Enterprise. Students will learn how to establish a Governance program, Cybersecurity management frameworks, how to develop and implement a Cybersecurity strategy. Students will be able to: Explain the strategic importance of effective, interdisciplinary, and multifunctional enterprise information security governance and information security management program and its execution.

CPST 382 Cybersecurity Incident Response Management (3 Credit Hours)
Students in this course learn key aspects of Cybersecurity Incident Response Management (CIRM). Students in this course will learn how to plan for, respond to, investigate, and report on Cybersecurity Incidents. Students in this course will learn from case studies of past cyber incidents. Skills developed include the developing of an Incident Response Plan; ethical, best practices on handling communications/ disclosures after an incident; incident investigation techniques (forensics); interfacing with law enforcement; and post-incident recovery.

CPST 383 Cloud Security Strategy and Architecture (3 Credit Hours)
This course leverages cloud computing security guidelines set forth by the International Organization for Standardization (ISO), National Institute of Standards and Technology (NIST), European Union Agency for Network and Information Security (ENISA), and Cloud Security Alliance (CSA) to develop a Strategic perspective for the Cybersecurity practitioner. Skills developed include knowing best practices and standards; the ability to design and implement a cloud security architecture; and carefully working with 3rd party cloud infrastructure providers and other stakeholders.

CPST 390 Organizational Theory and Practice (3 Credit Hours)
Pre-requisites: CPST 380
This course extends knowledge of organizations by examining organizational behavior at the macro-level. Students will gain a deeper understanding of organizational theory and research including historical and modern era approaches. Students will also analyze organizational behavior and settings including an in-depth case study of a single company.
Outcomes:
Students will be able to explain and apply concepts within the main areas of organizational structure, culture, communication and process

CPST 397 Capstone (3 Credit Hours)
This course must be taken by SCPS students during the last semester prior to graduation. Students will collaborate with a community organization of their choosing to design and execute a capstone project that fulfills the University Engaged Learning requirement. This includes completing at least 20 hours of civic engagement, all necessary Center for Engaged Learning, Teaching, and Scholarship (CELTS) documentation, and a capstone project report. Grounded in Ignatian pedagogy, the course emphasizes reflection, discernment, and action, guiding students through individual and group exercises to deepen their learning and refine their project. By integrating knowledge from their SCPS coursework, students will develop their capstone projects while preparing for life after graduation as Civic-Minded Professionals.
This course satisfies the Engaged Learning requirement.
Outcomes:
Design and execute a capstone project with a community partner organization of their choosing; Complete a minimum of 20 hours of civic engagement with a community partner to satisfy the University Engaged Learning requirement; Present a capstone project report

CPST 398 Professional Studies Internship Seminar (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 398 must take CPST 399 the following session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Applied experience in a professional setting

CPST 399 Professional Studies Internship Seminar II (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 399 must first take CPST 398 the previous session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Outcomes:
Applied experience in a professional setting

Institute of Paralegal Studies (PLST)

PLST 331 Introduction to Paralegal Studies (2 Credit Hours)
Required of all students in their first session of study. An introduction to the function and sources of American law (including the U.S. Constitution), the American legal system, the civil litigation process, and legal practice, focusing on the role of the paralegal. Trends in the paralegal field, including regulation and career issues.
Outcomes:
Students will recognize typical paralegal responsibilities in various areas of legal practice and be aware of recent developments in the field, especially regulatory proposals affecting paralegals

PLST 332 Legal Research and Writing I (2 Credit Hours)
Required of all students. An introduction to the fundamentals of legal research, focusing on locating, analyzing and updating case law (court opinions). Practice in researching case law in hard copy and online, and in writing case briefs.
Outcomes:
Students will be able to use various reference books and online services (LEXIS and WESTLAW) to locate, analyze, and update case law, and will be able to write case briefs

PLST 333 Legal Research and Writing II (2 Credit Hours)
Pre-requisites: PLST 332
Required of all students. Further instruction in legal research skills, focusing on locating, analyzing and updating statutory and administrative law. Practice in researching statutory and administrative law in hard copy and online. Drafting routine legal correspondence.

PLST 334 Legal Analysis: Practical Applications (2 Credit Hours)
Pre-requisites: PLST 332 and PLST 333
This writing intensive course will provide extensive practice analyzing factual scenarios, summarizing and applying legal authority and developing written legal arguments. Drafts and rewrites are required.
Outcomes:
To demonstrate comprehension of legal texts of varying levels of complexity; To apply legal rules to factual situations to predict legal outcomes; To use typical legal analytical tools to develop solutions to legal issues; To write clear explanations of the process of analysis used to resolve legal issues

PLST 335 Legal Ethics (2 Credit Hours)
Pre-requisites: PLST 331
Required of all students. Ethical considerations in the practice of law that paralegals are likely to encounter, especially the unauthorized practice of law, client confidentiality and conflicts of interest. Review of ethical codes for attorneys and paralegals.

PLST 336 Corporate Topics for Litigation Paralegals (2 Credit Hours)
Required for the Litigation Practice Certificate. An introduction to the basic principles of agency law, contract law, and the forms of business organizations: sole proprietorships, partnerships (general, registered limited liability and limited), limited liability companies, and corporations.

PLST 339 Secured Transactions and Bankruptcy (2 Credit Hours)
Pre-requisites: PLST 336 or PLST 362; Required for the Corporate Practice Certificate (Water Tower Campus)
An introduction to transactions under Uniform Commercial Code Article 9 (Secured Transactions) and federal bankruptcy law, primarily as it applies to businesses.
Outcomes:
Students will be able to draft UCC forms to perfect security interests as well as bankruptcy forms

PLST 340 Civil Litigation I (2 Credit Hours)
Required for the Litigation Practice Certificate. An introduction to the civil litigation process in state (Illinois) and federal courts, and proceedings in administrative agencies generally, focusing on the initial phases. Instruction in client interviews and pre-litigation investigations, evidentiary issues, and practice in drafting pleadings initiating lawsuits and proceedings through pre-trial motion practice.
Outcomes:
Students will understand the structure and basic operations of these courts, and will be familiar with the rules of procedure governing civil litigation proceedings

PLST 341 Civil Litigation II (2 Credit Hours)
Pre-requisites: PLST 340
Required for the Litigation Practice Certificate. Further instruction in the litigation process, focusing on the discovery, trial, and post-trial stages. Topics include interrogatories, depositions, document production and inspection requests, other discovery tools, settlement negotiations, organization of case files, document control systems, trial preparation, trial procedure, and post-trial proceedings. Overview of alternative dispute resolution.
Outcomes:
Students will be able to conduct client interviews and pre-litigation investigations, and to draft the pleadings initiating lawsuits and proceeding through pre-trial motion practice

PLST 342 Litigation Technology & eDiscovery (2 Credit Hours)
Pre-requisites: PLST 340 and PLST 341; Previous completion of PLST 345 strongly recommended
Required for the Litigation Practice Certificate. Hands-on instruction in software programs (Relativity) commonly used for litigation support, including electronic court filing, eDiscovery, case management, document control and trial presentation.
Outcomes:
Students will be able to assist attorneys in preparing for and conducting trials

PLST 343 Real Estate Transactions I (2 Credit Hours)
Pre-requisites: PLST 336 or PLST 362
An introduction to the concepts of real estate ownership and real estate sales transactions. Practice in preparing standard documents required for real estate transactions: purchase/sale agreements, deeds and other closing documents, title insurance commitments and policies, and surveys.
Outcomes:
Students will be able to draft documents for basic real estate transactions and to assist attorneys in conducting real estate closings

PLST 344 Real Estate Transactions II (2 Credit Hours)
Pre-requisites: PLST 343
Further instruction in real estate transactions, examining issues that arise in all real estate transactions and especially the documentation and closing of these transactions. Commercial real estate leasing.
Outcomes:
Students will be able to prepare documents for these transactions, and to assist attorneys in conducting commercial real estate closings and other transactions

PLST 345 Law Office Computer Applications (2 Credit Hours)
Required of all students. Hands-on instruction in software programs commonly used in law offices: word processing (templates, redlining, tables), spreadsheets (financial data, charts and graphs), pdf management (creating and combining pdfs, creating a portfolio, redacting, adding security) and presentation graphics.
Outcomes:
Students will be proficient in the fundamentals of word processing (templates, redlining, tables), spreadsheets (financial data, charts and graphs), database management (organizing, sorting, and retrieving information), and presentation graphics

PLST 346 Advanced Litigation Technology (2 Credit Hours)
Pre-requisites: PLST 340, PLST 341, PLST 342
Additional instruction in online resources and software typically used in litigation support (e.g. Relativity).
Outcomes:
Students will prepared to use typical litigation resources and software at a basic to intermediate level

PLST 348 Advanced Online Research Skills (2 Credit Hours)
Pre-requisites: PLST 332
This course focuses on research strategies for paralegals and specifically develops skills in the area of online public database research. Students practice researching within publically available online resources in a wide variety of subject areas including court procedure and docketing, business entities, real property, criminal law, environmental compliance, etc. Multiple practical assignments as well as one main research assignment.
Outcomes:
Students will research and write memoranda in support of motions, and will be familiar with the mechanics of appellate court briefs

PLST 349 Torts (2 Credit Hours)
An introduction to civil tort liability, including the intentional torts, negligence, strict liability, and product liability. Role of the paralegal in personal injury litigation. Practice in client interviewing techniques. Basic factual investigation techniques.
Outcomes:
Students will be familiar with the paralegal's role in personal injury litigation from both the plaintiff's and defendant's viewpoints, including typical pleadings and other documents

PLST 350 Medical Malpractice (2 Credit Hours)
Negligence lawsuits brought against health care organizations and health care professionals, from both the plaintiff's and defendant's viewpoints. Illinois law and rules of procedure for medical malpractice cases. Practical skills for locating and organizing medical information.
Outcomes:
The student will be familiar with Illinois law and rules of procedure governing medical malpractice lawsuits and will be able to draft a malpractice complaint as well as locate and organize medical information

PLST 351 Intellectual Property: Patents and Trade Secrets (2 Credit Hours)
An introduction to the terminology, basic principles and documentation requirements of patent protection. Subject matter of patents, the concept of patentability, the patent application process and patent infringement litigation. Trade secret misappropriation.
Outcomes:
Students will be familiar with the concept of patentability, the patent application process (including preparation of basic forms and documents), and patent infringement litigation

PLST 352 Intellectual Property: Trademarks and Copyrights (2 Credit Hours)
An introduction to the terminology, basic principles and documentation requirements of trademark and copyright protection. Registration procedures and infringement disputes.
Outcomes:
Students will be familiar with registration procedures (including preparation of basic forms and documents) and infringement disputes

PLST 353 Securities Regulation (2 Credit Hours)
Pre-requisites: PLST 336 or PLST 362
Federal and state regulation of securities transactions. The stock market and the roles of brokers, specialists and underwriters. Requirements for public offerings of stock, notably the registration statement and prospectus, as well as the anti-fraud provisions.
Outcomes:
Students will be familiar with the requirements for public offerings of stock, notably the registration statement and prospectus, and will be able to complete basic forms required under these laws

PLST 355 Estates, Trusts & Wills (2 Credit Hours)
An introduction to basic principles of estate and trust administration. Practical aspects of administration of estates and trusts for the paralegal. Probate proceedings in Illinois, including the preparation of probate court pleadings, inventories, collection and valuation of assets, distribution of assets to beneficiaries, and accountings. Overview of tax considerations.
Outcomes:
Students will be familiar with wills and will be able to prepare the documents required to administer estates in Illinois

PLST 357 Family Law (2 Credit Hours)
An introduction to the laws governing family relationships, specifically the Illinois Marriage and Dissolution of Marriage Act and related statutes. Factual investigation, preparation of pleadings and other documents, court procedures, settlement agreements, and post-decree modifications. Brief overview of adoption and paternity proceedings.
Outcomes:
Students will be able to prepare pleadings, notices, settlement agreements, and other documents, and to assist the attorney in domestic relations court proceedings

PLST 358 Criminal Law and Litigation (2 Credit Hours)
An introduction to the purpose and scope of substantive criminal law, considering various crimes against persons and property, criminal liability and punishment, and defenses to crimes. Procedural topics, including court forms and pleadings commonly used in the Illinois criminal trial process.
Outcomes:
Students will be able to prepare court forms and pleadings commonly used in the criminal trial process, and to assist attorneys preparing for trial

PLST 359 Environmental Law (2 Credit Hours)
An introduction to federal environmental statutes regulating water quality, waste management and remediation of hazardous substances (Superfund). Issues leading to enforcement proceedings. Research strategies for this technical area.
Outcomes:
Students will be familiar with permit applications, enforcement proceedings, and research strategies for this technical area

PLST 360 Employment Law (2 Credit Hours)
An overview of the legal relationship between employers and employees, including the employment-at-will doctrine, employment contracts, federal and state anti-discrimination laws, and worker's compensation proceedings. Administrative procedures and trial court actions.
Outcomes:
Students will be familiar with federal and Illinois law regulating employment status, employment contracts, anti-discrimination claims, and worker's compensation, and will be able to assist attorneys in administrative agency proceedings and civil lawsuits

PLST 361 Immigration Law (2 Credit Hours)
An overview of U.S. immigration law with emphasis on the paralegal's role. History of immigration law and current policy considerations. Preparation of visa applications, admission and removal of immigrants and non-immigrants, citizenship and naturalization, and humanitarian relief. Document organization and preparation, working with clients, litigation assistance, legal research, and ethical dilemmas.
Outcomes:
Students will be able to prepare various visa applications

PLST 362 Business Organizations (2 Credit Hours)
Required for Corporate Practice Certificate (Water Tower Campus and Cuneo Cohort). This course focuses on the formation and operation of sole proprietorships, partnerships (general, limited, and limited liability), limited liability companies, and corporations. Preparation of standard forms and agreements will be emphasized. Due diligence procedures for mergers and acquisitions and other transactions will be covered.

PLST 363 Contract Administration & Analysis (2 Credit Hours)
Required for Corporate Practice Certificate (Water Tower Campus and Cuneo Cohort). This course focuses on both common-law and Uniform Commercial Code (UCC) Article 2 contracts. The elements of a valid contract will be studied, as well as standard contractual provisions and basic principles of contract interpretation. Students will work with several sample contracts: a confidentiality/nondisclosure agreement, a licensing agreement, and a general trade agreement.

PLST 364 Topics in Corporate Practice (2 Credit Hours)
Pre-requisites: PLST 362 Business Organizations
This course provides an overview of laws relating to business operations, including secured transactions (Uniform Commercial Code Article 9), federal bankruptcy law, and employment law. Compliance with various regulatory requirements will also be covered.

PLST 366 Litigation Topics for Corporate Paralegals (2 Credit Hours)
Required for Corporate Practice Certificate (Water Tower Campus and Cuneo Cohort). This course introduces the civil litigation process in state (Illinois) and federal courts, from the initial phases of pre-litigation investigations and pleadings through the discovery, trial, and post-trial phases. Technological innovations affecting civil litigation, such as electronic court filing and e-discovery procedures, will be given special emphasis.

PLST 368 Corporate Compliance Topics (2 Credit Hours)
Pre-requisites: PLST 362 or PLST 336
This course provides an overview of various regulatory provisions applicable to the financial services industry, including the Anti-Money Laundering (AML) and Business Continuity Plans (BCP) rules, the Foreign Corrupt Practices Act, and insider trading prohibitions. Compliance with the requirements of these laws will be the focus of the course.
Outcomes:
Students will learn practices and procedures to monitor and document compliance with these laws

PLST 369 Advanced Topics in American Law (3 Credit Hours)
Pre-requisites: CPST 200; Enrollment is limited to students in the BA in PLST degree program
This course will build on students' knowledge of the American legal system, examining the role of law in 21st century American society. The course will focus on the interpretation of selected portions of the U.S. Constitution and their effect on American life.
Outcomes:
Students will learn how the US Constitution governs the American legal system and protects individual rights

PLST 370 Advanced Legal Analysis & Writing I (3 Credit Hours)
Pre-requisites: UCWR 110; Enrollment is limited to students in the BA in PLST degree program
This course will provide students with extensive practice in reading and summarizing case law, with particular attention to the rationale for court decisions and the use of precedent, as well as statutory and administrative law. This course will focus on analysis rather than retrieval of legal reference sources.
Course equivalencies: PLST334/PLST370
Outcomes:
Students will learn how to prepare summaries of court decisions, statutes, and administrative regulations

PLST 371 Advanced Legal Analysis & Writing II (3 Credit Hours)
Pre-requisites: PLST 370; Enrollment is limited to students in the BA in PLST degree program
This course will focus on the interaction of case law, statutory law, and administrative law in resolving legal issues. Students will learn to develop legal arguments and write a legal memorandum.
Outcomes:
Students will learn how to use court decisions, statutes, and administrative regulations to develop legal arguments

PLST 395 Applied Paralegal Study (1 Credit Hour)
Pre-requisites: Director's permission required; this course is limited to students in the BA in Paralegal Studies program
This course will require students to explore a contemporary issue in the paralegal field or the practice of law generally. Students will be expected to participate in a minimum of two class meetings and several online activities, concluding with a presentation of their research.

PLST 398 Internship (2 Credit Hours)
Consent of Director and completion of 14-16 semester hours of study. Limited to student's last or second-last term of study. Practical experience (120 hours on site) for advanced students in applying paralegal skills within selected law firms, corporate law departments and governmental agencies. One mandatory class meeting, online journal, online discussions, and final paper. All internships are unpaid; only one internship may be completed for credit toward certificate.

PLST 399 Internship (3 Credit Hours)
Consent of Director and completion of 14-16 semester hours of study. Limited to student's last or second-last term of study. Practical experience (160 hours on site) for advanced students in applying paralegal skills within selected law firms, corporate law departments and governmental agencies. One mandatory class meeting, online journal, online discussions, and final paper. All internships are unpaid; only one internship may be completed for credit toward certificate.

Applied Psychology (BA)

Individual, organizational, and global problems require innovative solutions based on psychological research concerning what motivates people to change. Moreover, robotics and increased automation continues heightening demand for employees who are adept at systems thinking to address the complexity of human behavior.

The BA in Applied Psychology program is a differentiated, high-quality program tuned to the needs of adult learners. Expert faculty provide training in the scientific study of human behavior, emotion, cognition, and motivation and prepare students for occupations applying psychological theory and methods to promote creative, evidence-based problem solving, critical systems thinking, cultural agility, and persuasive communication.

CPST 397	Capstone	3
Core Requirements		
The number of hours remaining toward Core requirements can vary due to transfer credit. [1]		
Mission Specific Requirements		
Mission specific requirements can vary from 0 to 15 credit hours based on your prior credit.		
General Elective Requirements		
Students may have some general elective coursework to complete if their transfer credit and remaining required hours (Core, mission specific, major, etc.) do not total 120.		

[1] Core Requirements - Learn More (p. 989)

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Apply scientific thinking to solve individual, interpersonal, organizational and social problems in real world case studies and organizational/community projects.
- Analyze theories in human behavior, cognition, emotion, and motivation in written assignments and oral presentations.
- Use strategic communication and persuasion skills based in the behavioral sciences in role plays and real-world applications.
- Interpret statistical and evaluation data to discern meaningful patterns and assess the impact of interventions in course work and organizational/community applications.
- Recognize best practices including ethical and pragmatic constraints of applied research with people in course work and organizational/community projects.

Applied Studies (BA)

As of Fall 2026, this program is no longer accepting applicants.

The B.A. in Applied Studies degree provides a strong foundation in communication and business. The Applied Studies major represents the best way to make the most of your prior credit in a particular subject and accelerate your path to graduation. The required certificate may also allow each student to focus on a complimentary discipline preparing them to excel in the professional world. SCPS understands that adult students often wish to take a wide range of courses to meet their professional and personal interests, so we have designed this degree to enhance your current career or establish a new one.

Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Apply communication theories to promote change in personal and professional settings.
- Demonstrate effective business writing in written narratives, memos, argumentative narratives, and collaborative documents.
- Analyze organizational theory, structure, power dynamics and culture in persuasive written and oral presentations.
- Describe the basic components of an organization's control structure and the role of accounting in an organization, through the analysis of organizational financial statements.
- Develop leadership skills through self-assessment exercises, reflection activities, and critical thinking assignments.

Computer Science Certificate

As of Fall 2026, this program is no longer accepting applicants.

This concise, nine-hour certificate program prepares you to enter the computer science field. It also positions you to complete a master's degree in Information Technology or Software Engineering as well. In this program, you will: develop a thorough understanding of the principles of object-orientation, such as abstraction, delegation, inheritance, and polymorphism; learn basic design patterns; and gain programming experience in mainstream object-oriented languages such as C++ and Java.

In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Learning Outcomes

- Develop programs using fundamental programming constructs, data structures, and algorithms, while demonstrating the ability to choose appropriate solutions and justify their selections.
- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency in programming, testing, and debugging using a mainstream object-oriented language.

Cybersecurity Fundamentals Certificate

This program is designed for individuals seeking to develop the skills necessary to transition into the cybersecurity field or gain foundational Cybersecurity skills. This program equips students with foundational

skills in programming, cybersecurity, and cloud security architecture. Starting with object-oriented programming in Python, learners progress through secure coding, penetration testing, and system administration, culminating in advanced training in network and cloud security. Emphasis is placed on real-world application, secure design, and ethical defense of digital systems. The course curriculum is CompTIA-aligned, making it an ideal choice for those seeking to pursue cybersecurity credentials upon completion.

Optional:

- CPST 265 Special Topics: Advanced Topics in Cybersecurity Technology Management: The optional course is included to address up-to-the-minute topics, such as emerging threats, insider threats, latest application delivery processes, and practices, etc.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Design and develop secure software solutions using object-oriented programming principles, secure coding practices, and foundational software development skills.
- Analyze and protect computer systems and networks by applying core cybersecurity concepts, performing vulnerability assessments, and implementing secure configurations across various platforms.
- Implement and manage secure cloud architectures utilizing industry standards and tools, with a focus on identity management, data protection, incident response, and third-party risk mitigation.

Information Technology (BA)

The B.A. in Information Technology is designed for those interested in leadership roles in the growing and ever-critical IT job market. You can begin the program with a minimal understanding of computers and finish with skills to be an effective IT or software development practitioner. Students have the option to pursue admission into the dual BA/MS Information Technology program once they have completed 90 credit hours toward their undergraduate degree. This positions students for even more robust opportunities in their respective careers.

Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Upon degree completion, graduates will be able to:

- Demonstrate a high level of proficiency in making informed and strategic decisions, applying quantitative analysis, and implementing project management strategies to effectively impact organizational goals.
- Demonstrate knowledge of legal and ethical considerations in information technology and apply technical and ethical solutions.
- Apply foundational knowledge of IT systems, computer networking, and security, including cloud computing concepts, TCP/IP model, packet-based networking, wireless networking, and cybersecurity principles.
- Organize data in ways to emphasize relationships to elicit information from a database that allows data to be mined, visualized and graphically display via web interfaces.
- Develop programs using fundamental programming constructs, data structures, and algorithms, while demonstrating the ability to choose appropriate solutions and justify their selections.
- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency in programming, testing, and debugging using a mainstream object-oriented language.

Introduction to Data Science Certificate

As of Fall 2026, this program is no longer accepting applicants.

This 3-course certificate introduces students to the key elements of Data Science: Python programming, SQL & database design, data processing, and analysis & visualization. The certificate provides any professional valuable, widely applicable, and transferable skills.

Coursework explores the topics of data ethics and digital ethics. The certificate is intended to help prepare the student for a dynamic career in data analytic work, whether they seek to grow their existing career, switch to a career within the data science realm, or explore data science as a field before committing to a degree program or advanced study in the topic.

Optional:

- CPST 265 Special Topics – 1-3 credits of directed study. Student will solve a data science problem for a community non-profit organization under the guidance of a faculty member. Larger projects will be 3 credit hours held only on the 16-week semester schedule for either fall or spring. Summer will not be an option for a 3-credit hour special topics course. Interested students should start the process at least 6-weeks before the semester where you will potentially complete the course.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Learning Outcomes

Upon completion of the certificate, graduates will be able to:

- Create data analytic programs that perform rigorous statistical analyses to address real-world questions in the social sciences.
- Evaluate datasets to determine how variables have been measured and encoded, which statistical analyses can be performed upon them, and which data cleaning and preparation protocols are necessary in order to proceed.
- Apply the relational model to solving real-world problems using SQL on standard DBMS platforms.
- Apply the programming languages of Python and SQL to specific data analytic and visualization challenges, as well as to generate novel code.
- Analyze the ethical considerations relevant to accurate data analysis and reporting.

Management (BA)

The B.A. in Management degree program offers adult learners training in critical skills, such as management principles, ethical leadership, critical thinking and strategic planning. The grounding in these principles elevates the impact our students have in their business environments and positions them to pursue new career opportunities in communications, community relations, and project management.

1 These courses are eligible for waiver to Loyola's Quinlan School of Business M.B.A. program. Final approval of waivers are determined by a Quinlan academic advisor upon admission to the graduate program.

2 Core Requirements - Learn More (p. 989)

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Upon degree completion, graduates will be able to:

- Demonstrate effective business communication in written narratives, memos, argumentative narratives, oral presentations, and collaborative documents.
- Develop productive team processes, team building, and leadership skills through self-assessment exercises, reflection activities, role playing and critical thinking assignments.
- Analyze organizational theory, structure, power dynamics and culture in persuasive written documents and oral presentations.
- Describe the basic components of an organization's control structure and the role of accounting in an organization, through the analysis of organizational financial statements.
- Creatively solve business problems as evidenced by project management simulations, strategic decision making, and quantitative analysis.
- Apply an understanding of law and regulation to business processes as evidenced by course assignments.

New Media Communication Certificate

As of Fall 2026, this program is no longer accepting applicants.

This 3-course certificate will provide students with a foundation in communication and marketing principles, with an emphasis on social media and new digital media principles and tools. It introduces students to the principles and tools of communicating in the digital space and includes coursework in communication theory and history, communication literacy, digital media production, digital media ethics, social media communication, online content production, and social media literacy.

The certificate benefits those who are seeking to remain current and competitive within careers that are becoming increasingly digital, as well as those seeking to pivot into positions involving digital strategy or social media account management.

Learning Outcomes

Upon completion of the certificate, graduates will be able to:

- Explain how technology affects communication.
- Create audiovisual content using a variety of audio, visual, video, and technical tools.
- Analyze communication research and audience data to tailor a media outreach campaign.
- Understand how social media can contribute to organizational and personal success.
- Create internet-optimized work (writing, audiovisual work, and social media content) for the effective promotion of a business, nonprofit, or personal project.

Organizational Development and Leadership Certificate

As of Fall 2026, this program is no longer accepting applicants.

This Organizational Development and Leadership Certificate is designed for students looking to learn more about the theories, research and practical applications of organizational development in the workplace. Students explore how organizations work and acquire skills to assess, diagnose and address structural and cultural problems. Students also study human behavior in the workplace, which offers valuable knowledge and skills for conflict management, motivation and morale, and employee development.

Please Note: This certificate can only be completed by students working toward an undergraduate degree within the School of Continuing & Professional Studies.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Learning Outcomes

Upon successful completion of the certificate, candidates will be able to:

- Explain organizational theory, structure, and power dynamics in contemporary work settings.
- Demonstrate effective business writing in written narratives, memos, argumentative narratives, and collaborative documents.
- Evaluate best practices in relation to assessment and solutions of structural and cultural problems in the workplace.
- Analyze leadership best practices to promote productive organizations.

Organizational Psychology Certificate

As of Fall 2026, this program is no longer accepting applicants.

The Organizational Psychology Certificate provides training on social psychology, personality studies and industrial psychology. This certificate is designed for those pursuing careers involving worker productivity, assessment, training and human resources.

Please Note: This certificate can only be completed by students working toward an undergraduate degree within the School of Continuing & Professional Studies.

Learning Outcomes

Upon successful completion of the Organizational Psychology Certificate, candidates will be able to:

- Formulate analyses of organizational problems based on psychological theory and propose evidenced based solution.
- Analyze key dynamics in employee personality, behavior, and motivation.
- Critique leadership styles, group behavior and team dynamics.
- Practice effective organizational communication strategies related to interviewing, persuasion, conflict resolution, and negotiation.
- Design evaluation to assess the impact of workplace programs.
- Evaluate best practices in relation to employee recruitment, selection, performance evaluation, motivation, retention and training.
- Describe contemporary issues and approaches related to behavioral health and counseling.

Paralegal Studies (BA)

From investigating facts and obtaining affidavits to conducting legal research and drafting documents, paralegals play a key role in supporting the work of legal offices around the country. Successful attorneys, meanwhile, understand the immense value a capable, skilled, and knowledgeable paralegal brings to their organization, which heightens competition for those with proven skills.

With a BA in Paralegal Studies, you position yourself to become a prized, indispensable member of a legal team and create new career opportunities for yourself.

Note: Paralegals may not provide legal services directly to the public except as authorized by law.

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Learning Outcomes

Upon completion of All BA in Paralegal Studies students will be able to:

- Locate relevant legal sources from federal and state jurisdictions and prepare summaries of these sources.
- Develop legal arguments using court decisions, statutes, and administrative regulations.
- Apply paralegal and attorney code of ethics to situations typically encountered by paralegals.
- Demonstrate intermediate competence using typical office software including Word, Excel, Adobe and PowerPoint.
- Draft pleadings, collect and organize factual information and pleadings to assist with investigation of the case, discovery and preparation for trial.
- Assist attorneys who work for corporate clients document the organization and operation of business entities.
- Draft contract provisions and coordinate the administrative process for contracts.

Strategic Digital Communication (BA)

Curriculum

The B.A. in Strategic Digital Communication comprises 120 credit hours. Courses are offered in an 8-week session format with online, evening, and weekend options.

Note*: *The following program is no longer accepting new students

In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

Upon degree completion, graduates will be able to:

- Analyze communication through a critical, historical, and theoretical lens.
- Create effective communications in a variety of formats including essays, news releases, pitch letters, fact sheets, public service announcements, and web content.
- Apply theories regarding communication best practices to specific audiences and messaging goals.
- Evaluate a message for its clarity, efficacy, persuasive ability, and utilization of digital technology.
- Understand the ethical issues involved in crafting an effective and socially responsible message.

UI/UX Design & Accessibility Certificate

The UI/UX Design & Accessibility Certificate equips learners with the creative, technical, and ethical skills needed to design inclusive, engaging, and user-friendly digital experiences.

This program prepares students to design digital products that serve diverse users, meet modern web standards, and leverage AI-enabled design tools. Through hands-on projects, students explore user interface (UI) design principles, user experience (UX) research methods, and accessibility best practices based on WCAG and ADA guidelines — while also learning how to integrate artificial intelligence into the design process to enhance efficiency and personalization.

Ideal for professionals seeking to expand their design and technology skills, this program blends design thinking, usability testing, and inclusive design to ensure graduates can confidently contribute to cross-functional design and development teams.

Optional:

- CPST 265 Special Topics — 1-3 credits of directed study. Students will complete a UX Design project for a community non-profit organization or another client under the guidance of a Faculty member.

Suggested Sequence of Courses

The School of Continuing and Professional Studies provides a high-touch advising model in order to incorporate the professional and educational outcomes of the student as well as any transfer credit accepted. In order to provide students with maximum flexibility in their education and because everyone's academic background will vary, advisors will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and expected time to completion.

Learning Outcomes

Upon successful completion of the certificate, candidates will be able to:

- Critique website aesthetics, accessibility, and usability and apply graphic design principles to strategically align business objectives with UX Design goals by effectively utilizing the User Experience (UX) Design process.
- Effectively apply the User Experience (UX) Design process, utilizing personas, task models, and user journey mapping techniques, to connect and align business objectives with UX Design goals.

Web Technologies (BA)

As of Fall 2026, this program is no longer accepting applicants.

Web technologies are ever evolving. New tools, apps, sites, and algorithms constantly change norms and best practices in the field shift on a constant basis. Earning a degree in Web Technologies from the School of Continuing and Professional Studies (SCPS) at Loyola University Chicago prepares you for this fast-paced, ever-changing world.

Designed for those interested in careers in web development or design, web or social media analytics, or software engineering, SCPS's Web Technologies degree program provides students a strong foundation in the design and development of websites and web applications.

Learning Outcomes

Upon degree completion, graduates will be able to:

- Develop modern, standards-compliant web applications while demonstrating proficiency in best practices, utilizing contemporary web technology solutions, and effectively managing software project versions through version control techniques.
- Critique website aesthetics, accessibility, and usability and apply graphic design principles to strategically align business objectives with UX Design goals by effectively utilizing the User Experience (UX) Design process.
- Utilize client-side services to interact with server-side APIs, model and implement structured and unstructured data, and perform data analysis using standard toolkits and libraries.
- Develop programs using fundamental programming constructs, data structures, and algorithms, while demonstrating the ability to choose appropriate solutions and justify their selections.
- Apply object-oriented principles (abstraction, delegation, inheritance, and polymorphism) and design patterns, and demonstrate proficiency in programming, testing, and debugging using a mainstream object-oriented language.
- Demonstrate knowledge of legal and ethical considerations in information technology and apply technical and ethical solutions.

School of Education

Mission and Vision

Our Vision

At the School of Education of Loyola University Chicago, future education leaders will have a transformational experience, one that prepares them to address social inequalities in both their local and global communities through the power of education and research.

Our Mission

The School of Education at Loyola University Chicago, a Jesuit Catholic urban university, supports the Jesuit ideal of knowledge in the service of humanity. We endeavor to advance equity in education in service of social justice, engaged with Chicago, the nation, and the world. In pursuit of our vision, the School of Education participates in the discovery, development, demonstration, and dissemination of professional knowledge and practice within a context of ethics, service to others, and social justice.

Our mission is social justice, but our responsibility is social action through education and research. We fulfill our responsibility by preparing professionals to serve as teachers, administrators, counselors, psychologists, and policymakers who work across the human developmental continuum, and by conducting research on issues of professional practice in schools, families, and communities. In our immersive learning environment, students gain both second-to-none foundational knowledge and a strategic system-wide vision working alongside some of the top scholars and teachers in the nation. Through our rigorous curriculum, students learn to be comfortable with the uncomfortable, supported by our passionate and dedicated faculty, staff, and administrators. And they leave with lasting relationships with each other and an extensive alumni network of leaders in education across Illinois, the U.S., and the world.

Counseling Psychology (CPSY)

CPSY 100 Intro Var Chd Dev&Impl Sp Educ (3 Credit Hours)
No course description is available

CPSY 200 Psyc Acad & Persnl Effect (3 Credit Hours)
No course description is available

CPSY 220 Speech & Language Development (3 Credit Hours)
No course description is available

CPSY 224 Career and Life Planning Seminar (3 Credit Hours)
Because most students will make several career or job changes during their lives, the purpose of this course is to teach students a decision-making process that can be used when making career-related decisions. planning; and planning an effective job search campaign.
Course equivalencies: CPSY 224/UNIV 224
Outcomes:
Students will be able to apply the decision-making process to a decision they are trying to make (eg, choosing a major, choosing a career)

CPSY 273 Developmental Psychology (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY273/PSYC273

CPSY 323 Theories of Counseling and Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Course equivalencies: X - CPSY 323 / 423
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice, and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 324 Career Counseling and Development (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Course equivalencies: X - CPSY 324 / 424
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed, major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 332 Multicultural Counseling (3 Credit Hours)
The course provides an overview of the experiences of various cultural groups with the United States, concerning issues of oppression, identity development, and acculturation, for instance. The course aims to develop multicultural competence by increasing students' awareness, knowledge and skill base.
Course equivalencies: X - CPSY 332 / 433
Outcomes:
Students will increase their awareness of their own cultural background, biases, and world view and their knowledge of the world view of culturally diverse clients and will begin to develop appropriate interventions strategies to work effectively with diverse populations

CPSY 333 Abnormal Psychology (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY333/PSYC331/ACPSY280

CPSY 334 Child, Family, and Community (3 Credit Hours)
No course description is available

CPSY 335 Attitudes, Values & Sexual Behavior (3 Credit Hours)
No course description is available

CPSY 337 Adolescent Development (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. This course introduces students to developmental processes, social context, variance (diversity), and psychological/educational implications of the life stage called "adolescence".
Outcomes:
Students will be expected to demonstrate an understanding the stages of normal adolescent development within a variety of cultural contexts as well as situations which compromise adolescent mental health and well being

CPSY 338 Psychology of Personality (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY338/PSYC338

CPSY 341 Principles of Guidance (3 Credit Hours)
No course description is available

CPSY 342 Identity and Pluralism (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. A critical examination of theory and research on the role of culture in identity development. Particular emphasis will be given to such concepts as racism, sexism, ethnicity, culture, class prejudice, and ethnocentrism and how these help shape an individual's identity and society's conceptualization of culture.
Outcomes:
Students will demonstrate ability to think critically about issues of race, class, culture, and gender, and to analyze how these issues play themselves out in our schools and school systems

Curriculum, Instruction & Educational Psychology (CIEP)

CIEP LM62 Secondary Methods: Mathematics Lab (1 Credit Hour)
No course description is available

CIEP M16 K-2 Literacy Methods for EC (2 Credit Hours)
This course is to introduce the preservice teacher candidate to the teaching and learning processes associated with research based comprehensive literacy instruction in K-2 elementary classrooms and will emphasize the scientific foundations of reading instruction: phonics, vocabulary, text comprehension and fluency.
Outcomes:
A student enrolled in CIEP M16 will demonstrate beginning competence in the knowledge base, skills, and strategies stated in the Illinois Professional Teaching Standards and ECE standards

CIEP M17 Early Childhood Math Methods (2 Credit Hours)
Two credit hour math methods course specifically for early childhood special education majors. this course is designed to reflect current ISBE standards, and best practices in early math. It addresses mathematical thinking, concepts, and skills across the birth to grade 2 continuum.
Outcomes:
It addresses mathematical thinking, concepts, and skills across the birth to grade 2 continuum

CIEP M30 Academic Assessments and Interventions (3 Credit Hours)
In this course, students will learn about psychological and educational assessment with a special focus on issues related to non-biased assessment and the link between assessment and intervention in the instructional consultative process.
Outcomes:
Students will develop and administer appropriate intervention plans related to the instructional needs of students with disabilities

CIEP M31 Behavior Interventions: Assessments and Supports (3 Credit Hours)
The purpose of this course is to develop the students ability to provide positive support to learners whose behavior(s) impedes their learning or the learning of others.
Outcomes:
The student will be able to plan and develop school wide group and individual supports, make adjustments as needed to IEPS, and assess the on-going progress being made by students for whom behavioral interventions have been planned

CIEP M32 Exceptional Learner II (3 Credit Hours)
This course provides in depth understanding of the ethical and professional issues related to collaborative service provision for children with disabilities.
Outcomes:
By viewing ability within the broader context of human diversity, students will learn instructional strategies that foster a student's meaningful participation in heterogeneous classrooms as well as the larger communities in which they live

CIEP M33 Accessing and Adapting the General Education Curriculum (3 Credit Hours)
Within this course, candidates explore methods to adapt the general education curriculum in order to meet the individual needs of students with disabilities. Issues of differentiating student needs, long and short-term planning, technology-assisted learning, and vocational and social skills curricula will be addressed along with behaviors and modification related to low incidence exceptionalities.
Outcomes:
Candidates will demonstrate an understanding of adapting the general education curriculum for students with special needs through the design of a universalized lesson plan, a synthesis of relevant literature, and researching assistive technology

CIEP M34 Family, Community and School-Based Consultation (3 Credit Hours)
Within this course, candidates explore how members of families affected by disability and school/community professionals can enter into productive partnerships and create positive outcomes for students in elementary and secondary schools. Different approaches to work on school or community based teams, the different aspects of planning and implementing team process, and the challenges and threats to that process, are examined.
Outcomes:
Candidates will demonstrate an understanding of collaborative relationships, and design and evaluate a wraparound plan for a student with a disability based on case study information and research

CIEP M42 K-2 Special Education Methods for ECSE (2 Credit Hours)
In this context, methods to adapt the curriculum to individualize instruction to meet the needs of students with special needs will be discussed. Issues of differentiating student needs, long and short-term planning, technology-assisted learning, and social skills curriculum will be addressed. Students will also learn how to actively create learning environments which promote positive learning results in general and special curricula by modifying the learning environment, using direct motivational and instructional interventions.
Outcomes:
Demonstrates current knowledge of integrated learning experiences for children from birth through grade three and understands the central concepts and tools of inquiry in each of the following content area: language and literacy (English language arts); mathematics; science; health, safety, nutrition, and movement (physical development and health); art, music, and drama (fine arts); and social science; understands how to plan developmentally and culturally appropriate curriculum; understands how to use and integrate appropriate technological resources into classroom instruction

CIEP M43 Special Education Methods: Infants, Toddlers and Preschoolers (3 Credit Hours)
This course provides an overview in curricular adaptations and instructional strategies that address the needs of young children.
Outcomes:
Candidates will gain experience in developing strategies for meeting the educational and developmental needs of infants and young children with disabilities, as well as those who experience circumstances and conditions that potentially interfere with optimal growth and development

CIEP 104 Mathematics for Teachers I (3 Credit Hours)
This course provides the foundation for teaching standards based mathematics in the elementary school classroom. In this first course, students study geometry, measurement, data analysis and probability and fulfill the civic engagement value of core by tutoring in the Chicago Public Schools.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CIEP104/MATH147
Outcomes:
Students will broaden their understanding of elementary school mathematics instruction and tutor elementary-aged students

CIEP 105 Mathematics for Teachers II (3 Credit Hours)
This course provides the foundation for teaching standards based mathematics in the elementary school classroom. In this second course, students study algebra and numbers and operations.
Course equivalencies: X-CIEP105/MATH148
Outcomes:
Students will broaden their understanding of elementary school mathematics instruction and teach math lessons in middle school classrooms

CIEP 206 Children's Literature (3 Credit Hours)
This course is designed to explore the genres of children's literature. Coursework involves reading and responding to various genre and engaging in professional book discussions to learn key strategies for teaching.
IAI code: H3918
Course equivalencies: X-CIEP206/ENGL206
Outcomes:
Students will read and respond to multiple texts written for the adolescent reader, design instructional strategies to encourage reader response in classroom settings, and create a thematic literature-based teaching unit

CIEP 229 Introductions of Educational Psychology (3 Credit Hours)
Students will learn basic to apply psychological principles in varied instructional settings, including theories of learning and development.
Outcomes:
Students will demonstrate an understanding of basic educational psychological principles and their application to learning and instruction in the classroom

CIEP 260 Interdisciplinary Wrkshp: Sqnc Two-Intro Responsive & Inclusive Classrooms (1-4 Credit Hours)
The modules in Sequence Two explore how the school is itself a community and how the organization and environment of a school influence student learning. exploration of the local communities that schools are situated in. This course builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning, The sequence addresses TLLSC Enduring Understandings 1, 3, 7, and 9.
Outcomes:
TLSC 140: Teaching, Learning and Leading for Social Justice: This module builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; TLSC 150: Constructive Learning Environments for Diverse Students: This module deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; TLSC 160: Analyzing Culturally Responsive Classroom Instruction: This module builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning

CIEP 290 Debunking Classroom Myths: Investigating Common Beliefs Around Learning (3 Credit Hours)
The course investigates misconceptions about science, math, humanities, and social sciences through the lens of learners' varied social identities, prior knowledge and lived experiences, and research about how people learn. Students will identify misconceptions commonly learned in K-12 classes, reflect on how those misconceptions may shape ones' current understandings, and explore approaches for uncovering and confronting misconceptions and false beliefs in productive ways.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students who take this course will understand that 1) Misconceptions are derived from a variety of sources including information environments, prior experiences, peers, culture, language, teachers' explanations, and instructional materials and are often resistant to change; 2) Effective instruction is guided by research-based principles of how people learn; 3) Student learning is facilitated through effective instruction and assessment; 4) Instruction that promotes intellectual virtues, including open-mindedness and intellectual humility, courage, and diligence, can help prepare students to better resist misinformation and also promote empathy, caring, and responsibility

CIEP 305 Reading Teacher Practicum (3 Credit Hours)
This course is the culminating experience in the reading teacher endorsement minor.

CIEP 315 Language Development and Literacy (3 Credit Hours)
This course develops candidates' understanding of typical and atypical language development and principles that govern the process.
Outcomes:
Candidates learn how quality children's literature in early childhood programs can be used to maximize language and literacy development through authentic group experiences and activities

CIEP 327 Teaching English Language Arts in the Middle Grades (3 Credit Hours)
This course is based on the fundamental beliefs that people learn to write by writing; writing is a process; writing is a tool for thinking, and that writing is a social process. Candidates will be introduced to research based strategies, design effective writing lessons, develop a philosophy of teaching writing based on best practices, and recognize elements of valid writing assessment.
Outcomes:
Teacher candidates will recognize the significance of their role as writing models and will recognize and create connections to literacy instruction across the curriculum; Teacher candidates will become familiar with developmental issues related to learning to write across grades K -12, and issues related to struggling writers and students with culturally and linguistically diverse backgrounds

CIEP 328 Assessment and Diagnosis of Reading Problems (3 Credit Hours)
This assessment and diagnosis course provides the foundation knowledge and experiences in reading assessment and diagnosis that would be necessary for elementary or secondary classroom reading teachers.
Outcomes:
Reading teachers will recognize that reading is an active and complex process that involves skills, strategies, prior knowledge and purposes for reading within a goal-oriented process

CIEP 329 Materials, Resources, & Strategies for Reading Teacher (3 Credit Hours)
The purpose of this course is to provide teacher candidates in the reading teacher endorsement minor with an in depth knowledge and understanding of materials, resources, and strategies available to teachers whose primary teaching responsibility is the teaching of literacy.

CIEP 330 Typical and Atypical Development (3 Credit Hours)
The purpose of this course is to study the stages of psychological and cognitive development in children and adolescents with special attention to the similarities and differences among individuals with and without disabilities.
Outcomes:
Students will use their knowledge of typical/atypical development to design lessons, arrange learning environments, and select instructional strategies to promote their students' learning and social/emotional development

CIEP 332 School Wide Applications (3 Credit Hours)
This course focuses on the needs of a school as it develops and implements a LRE plan. It examines the planning involved in the development of comprehensive, school wide positive behavior support programs, the application of universal design to curriculum development, and the on-going evaluation of progress made by students for whom intervention is needed Outcome: Students will develop and school-wide behavior support plan.
Course equivalencies: CIEP 341 / CIEP 331 / CIEP 332

CIEP 336 Child Development and Implications for Education (3 Credit Hours)
Survey of theory and research relevant to the cognitive, emotional and social development of children.

CIEP 339 The Exceptional Child (3 Credit Hours)
This course is an introduction to the concept of exceptionality dealing with the educational implications of atypical child growth and development. Focus is given to the psychology and teaching of culturally diverse and atypical children including those with learning disorders.
Outcomes:
Students will have an increased understanding and demonstrate skills in: the connection between civil-rights issues and people with exceptionalities, and where the field of education has been, is now, and is going with regard to providing supports for people with special needs, their teachers, and family members

CIEP 340 Professional Applications in Special Education (3 Credit Hours)
This course will introduce candidates to research-based, hands-on teaching and learning tools to be implemented in the classroom. Designed to be taken during the special education student teaching experience, candidates will create appropriate learning tools to meet students' abilities and needs. Course
Outcomes:
Candidates will 1) develop competencies in the collaborative and consultative roles of special educators in the integration of individuals with disabilities into the general curriculum as well as educational and alternative settings; 2) reflect on their own practice to improve instruction and guide professional growth

CIEP 342 Transition Planning (3 Credit Hours)
The purpose of this course is to provide a background for transition education services-from childhood to adulthood- for individuals with disabilities. Students will look at legal mandates for transition planning and service provision, as well as how the People First movement has led to changes in our thinking and talking about people with disabilities and the specific challenges faced by adolescents with disabilities as they transition to adulthood. Students will examine instructional strategies for teaching functional, occupational, and career identification skills in The purpose of this course is to provide a background for transition education services-from childhood to adulthood- for individuals with disabilities. Students will look at legal mandates for transition planning and service provision, as well as how the People First movement has led to changes in our thinking and talking about people with disabilities and the specific challenges faced by adolescents with disabilities as they transition to adulthood. Students will examine instructional strategies for teaching functional, occupational, and career identification skills in secondary school and community settings. Current perspectives on self-determination and quality of life issues as they relate to individuals transitioning to adulthood will be introduced.

CIEP 343 Adaptive and Assistive Technology (3 Credit Hours)
In this course, students will learn how to make all physical and virtual aspects of school fully accessible for their students, other faculty, and family members. They will have hands-on experience with a wide range of assistive and adaptive technologies (low, medium, and high tech) and become familiar with the A/A terminology and the most recent legislation related to AAT.
Outcomes:
Students will be able to integrate AAT into assessment plans, the IEP process, lesson planning and review, and daily classroom routines; Keeping in mind the specific characteristics of individual students, they will choose and then make use of appropriate technology to accomplish specific instructional/academic, physical, and social/emotional objectives

CIEP 350 Adolescent Literature (3 Credit Hours)
This course introduces the languages arts education student to the relevance and need for incorporating adolescent literature in the middle/secondary classroom and to the development and strengthening of literacy.
Outcomes:
Students will have broad and detailed understanding of the realities and intellectual context of middle/secondary language arts education and the role of adolescent literature within this context

CIEP 351 Curriculum and Teaching in the Middle School (3 Credit Hours)
The purpose of the course is to help students construct a conceptual framework within which they can effectively respond to the needs of middle school students.
Course equivalencies: X - CIEP 351 / CIEP 455
Outcomes:
Students will learn the middle level philosophy and will examine how those beliefs and values affect both teaching and learning

CIEP 359 Teaching Reading (3 Credit Hours)
The purpose of this course is to introduce the preservice teacher candidate to the teaching and learning processes associated with research-based comprehensive literacy instruction and will emphasize the scientific foundations of literacy instruction: phonemic awareness, phonics, vocabulary, text comprehension and fluency. Developmental stages of learning to read and write, interactive teaching strategies, and instructional materials, methods and assessments will be presented. Emphasis will be placed on the development of a knowledge base needed to assist beginning teachers in making insightful decisions regarding their objectives and practices. Updated information on current trends, research, and state and national standards will be emphasized. Tier 1 classroom literacy instruction in accordance with a multi-tiered system of support philosophy and practice will be highlighted. An asset-based approach to understanding language and literacy development will ground all course experiences alongside content that supports candidates' ability to plan scaffolded instruction that incorporates students' linguistic and cultural identities and meets students' diverse learning needs. Current multi-cultural children's literature will be used in simulated classroom teaching experiences.
Outcomes:
Students will be able to make informed decisions regarding literacy instruction; They will be able to apply curriculum knowledge and instructional strategies in the development and teaching of literacy lessons

CIEP 360 Interdisciplinary Workshop: Culture & Identity TLSC 140/150/160 Rome, Italy (3 Credit Hours)
The modules in Sequence 2 explore how the school is itself a community and how the organization and environment of a school influence student learning. This sequence builds off of Sequence 1's exploration of the local communities that schools are situated in. The sequence addresses TLLSC Enduring Understandings 1, 3, 7, and 9.
Outcomes:
TLSC 140: Teaching, Learning and Leading for Social Justice: This module builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; TLSC 150: Constructive Learning Environments for Diverse Students: This module deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; TLSC 160: Analyzing Culturally Responsive Classroom Instruction: This module builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning

CIEP 366 Special Topic Seminar (3 Credit Hours)
This course is a seminar for Special Topics for SOE undergraduate students. This seminar will allow SOE to pilot newly developed and approved courses. This seminar will be used by SOE - ADSU, TL, and SPSY - programs covering various educational subjects and interdisciplinary topics.
This course satisfies the Engaged Learning requirement.
Outcomes:
Seminar outcomes will be specific to the topic and program

CIEP 390 Field Study in Education (3 Credit Hours)
This course provides an opportunity to work with a small group of 8th graders from underserved Chicago public schools to improve their math achievement.
This course satisfies the Engaged Learning requirement.

CIEP 398 Independent Study (1-3 Credit Hours)
The student and a sponsoring faculty member will determine an advanced topic for the student to work on. Independent study of selected topics in Education under the supervision of a faculty member.

Educational Leadership & Policy Studies (ELPS)

ELPS 125 Introduction to Leadership Studies (3 Credit Hours)
This course is designed to provide an introduction to foundational theory and perspectives related to leadership. This includes an exploration of contemporary leadership knowledge and skills that are transferable to a variety of disciplinary contexts.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to describe various historical and contemporary perspectives on leadership as well as recognize critical knowledge and skills associated with leadership practice across various disciplines

ELPS 219 History of American Education (3 Credit Hours)
Pre-requisites: HIST 101 or HIST 102
No requirement for students with a declared major or minor in History. This course examines the history, aims, organization, and control of public and private schools in the United States. Emphasis is placed on the historical examination of issues of diversity, inclusion and exclusion as they relate to education.
Outcomes:
Students will demonstrate the ability to evaluate and explain the forces of historical continuity and change in American education

ELPS 222 Foundations of Ethics and Social Justice in Leadership (3 Credit Hours)
Pre-requisites: ELPS 125
This course introduces theories of ethics and social justice as critical frameworks through which to interpret leadership. Attention toward the process of ethical decision-making, using critical reflection as a tool for understanding complex leadership issues, and strategies for advancing leadership focused on social responsibility.
Outcomes:
Students will demonstrate competence in applying ethical and social justice frameworks in the interpretation and analysis of complex leadership issues as well as in the practice of leadership across a variety of disciplines

ELPS 223 Contextual Influences in Applied Leadership: Internship (3 Credit Hours)
Pre-requisites: ELPS 125 and ELPS 222; Leadership Minor
This online and experiential course provides a platform for students to apply learning associated with leadership theory, ethics, and social justice in practice through an applied internship experience. The internship site will provide a discipline specific experience through which to integrate and refine core skills and competencies associated with socially responsible leadership.
Outcomes:
Students will increase their capacity to engage effectively in socially responsible leadership in a discipline specific work context

ELPS 224 Cross Cultural Leadership: Lessons from Rome (3 Credit Hours)
Pre-requisites: ELPS 125
This course is designed to examine global and cultural influences on the manifestation of leadership using Rome as a historical and contextual reference point and learning laboratory. The course will examine cultural influences in the understanding of power, authority, and social justice as they relate to leadership and the development of cross-cultural competence.
Outcomes:
Students will be able to identify and describe cultural and global influences associated with power, authority, and social justice on leadership in social contexts

ELPS 230 Globalization, Education and Childhood (3 Credit Hours)
This course examines contemporary global shifts and transformations in how schools and other educational settings are set up and operate. In tandem with this the course examines the experience of childhood and notions of what it means to be a child both in terms of how this varies culturally, socioeconomically, and regionally, as well as how these experiences and conceptualizations are presently being transformed.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate an understanding of how global and local issues are interwoven with regard to education; Students will be able to articulate a nuanced understanding (as regards schooling and education) of the ways that social justice concerns are being both advanced and hindered in our contemporary globalized world

ELPS 240 Urban Education: Policy and Practice (3 Credit Hours)
This course introduces students to some of the central policy questions currently afoot in American public education through consideration of one particular field of concern, Urban Education. Explores the sociological dimensions of schooling, the important questions of how race, social class and ethnicity impact American education, and the relationship between resources and outcomes at the heart of arguments about schools. Students will be able to demonstrate an understanding of the ways that policy is connected to practice in urban education.
Outcomes:
Students will be able to analyze the multiple and contested factors that influence urban education in the US

ELPS 265 Cultural and Educational Policy Studies Internship (3 Credit Hours)
The Internship in Cultural and Educational Policy Studies course is intended to help students integrate theoretical and research coursework with a practical field-based experience to reflect on their own development as professionals working in the field of education. This course satisfies the Engaged Learning requirement.
Outcomes:
Students develop and refine their professional skills and competencies; Students will be able to identify key education issues domestically and/or internationally and critically analyze them in terms of the relationship(s) between policy and practice

ELPS 300 History of Education (3 Credit Hours)
This course introduces students to the history of education in the United States, exploring the ideologies and theoretical frameworks that have been paramount in different historical periods and the ways they have shaped the social, cultural, economic, and political dimensions of educational institutions in America.

ELPS 301 History of Western Education (3 Credit Hours)
A historical analysis of the rise and development of educational movements, trends, institutions, and policies in the multicultural context of American society.
Course equivalencies: X-ELPS301/HIST302
Outcomes:
Students will be able to demonstrate a historical understanding of the development of educational policy and schooling institutions, and demonstrate a knowledge of the historiographic approaches and debates in the history of education

ELPS 302 Philosophy of Education (3 Credit Hours)
Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. Study of major philosophical theories about educational practice, especially as these relate to pedagogical practice, curriculum development, and the response of schools to particular individual, community, and societal interests.
Outcomes:
The student will become adept at identifying philosophical issues embedded in current educational practice and controversies, especially as these relate to promoting the values of a democratic society, accommodating the interests of the society and particular groups within it, and the realization of social justice

ELPS 310 Leadership: Group Dynamics and a Mission Centered Approach (1 Credit Hour)
This course is designed to familiarize Resident Assistants/Managers with a variety of topics that have been formulated to assist them in building community, developing interpersonal relationships, creating intentional programs, and improving their crisis intervention skills. Topics may include, but are not limited to: identity formation, counseling, ethics, diversity, health, and current events in higher education.
Outcomes:
To inform and therefore improve students performance within university housing through reflection exercises and solution-based problem solving skills

ELPS 311 Student Leadership: Using Social Justice in Developmental Models (1 Credit Hour)
This class will examine social justice as it relates to building communities and creating positive interpersonal relationships between both the Resident Assistant/Manager and hall residents as well as among residents themselves. Topics may include, but are not limited to: program planning, the use of technology, service learning, vocation, career development, and the RA/RM impact on students.
Outcomes:
To inform and therefore improve students performance within university housing through reflection exercises and solution-based problem solving skills

ELPS 325 Leadership Studies Capstone (3 Credit Hours)
Pre-requisites: ELPS 125; ELPS 222; ELPS 223; and enrollment in the Leadership Minor
This course will explore topics such as social change and globalization, creative conflict resolution, the nature of power, oppression and influence, and systemic leadership.
Outcomes:
Students will understand the role of and capacities associated with leading personal and social transformation within their career fields and communities

ELPS 350 Finding Jesuit Jesus:Preparing Prof Life-Live Sprtual Exercise St. Ignatius (3 Credit Hours)
An adapted version of the Spiritual Exercises of St. Ignatius of Loyola, founder of the Jesuits, this 14-day course in Rome, Italy@JFRC provides students the structured time and study to reflect more deeply on faith, the power of God's love and relationships with others as they frame their professional life design. Time for personal prayer, reflection, liturgies, thematic walks and talks are embedded in this course and all of which will help assist students in their faith journey and as they discern, plan and prepare for a professional life. The course intends to advance opportunity for student exploration and understanding of Jesuit history, values and principles - what does it mean to walk, live, discern and work, as people of Ignatius regardless of faith origin. This course is an invitation to imagine and to plan to live a life of service regardless of profession or career choice.
Course equivalencies: ELPS 350/ELPS 450
Outcomes:
To further student understanding of diversity of ideas and beliefs in the world; To enhance student knowledge of concepts and designs of social justice while exploring the ancient history of Rome; To better understand Ignatian spirituality and faith in action in our global and diverse world; To engage in service learning to better understand the plight of refugees around the world and expand student knowledge in the service of humanity through learning, discerning and faith; To advance opportunity for student discernment and understanding of personal and professional vocation; what does it mean to walk, and work as people of and with Ignatius - regardless of faith origin

ELPS 398 Independent Study (1-3 Credit Hours)
This course is an independent study under the supervision of a faculty member.
Outcomes:
The outcome for this course is an independent project, paper or other product that demonstrates advanced knowledge of a topic

Research Methods (RMTD)

RMTD 380 Statistical Methods (3 Credit Hours)
This undergraduate course provides an introduction to descriptive and inferential statistical methods used in education, psychology and the health professions.
Course equivalencies: RMTD380 / CPSY380
Outcomes:
Students will be able to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to understand the assumptions and limitations of using statistical methods for analysis

Teaching, Learning & Leading (TLSC)

TLSC 110 The Profession and Our Program (TLLSC) (1 Credit Hour)
This module (course) introduces teacher candidates (students) to the profession and our program (TLLSC) with a focus on collaborative relationships within and among schools, families, and communities. This module (course) will expose teacher candidates (students) to specific knowledge and skill indicators necessary for educators to embody the dispositions of the profession.
This course satisfies the Engaged Learning requirement.
Outcomes:
Teacher candidates (students) will reflect on the knowledge, skills, and dispositions of educators with regard to teaching diverse students, the mission of Professionalism in Service of Social Justice, and the connection between research and practice related to collaborative relationships

TLSC 120 Bringing Language, Learning & Development Theory into Practice (2 Credit Hours)
In this module, students will observe and learn key principles and stages developmental and learning theories via clinical experiences in birth to grade 12 settings (including infant/toddler, preschool, elementary, middle, and high schools). The primary focus of these experiences is to explore the ways in which physical characteristics, communication skills, cognitive capacities, and social-emotional needs of children be used to understand theory and inform adult-child interaction and developmentally appropriate pedagogical practices in birth to grade 12 settings with both typically and atypically developing children.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through guided observation, students will explore the ways in which social, cultural, and environmental contexts shape the development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with every age range from birth through grade 12

TLSC 130 Sequence One: 130 Community Immersion (1 Credit Hour)
This module (course) is designed to engage teacher candidates (students) in an authentic exploration of the inherent relationship between P-12 schools and the surrounding community. Teacher candidates (students) are introduced to the concepts of cultural and social capital as they work in small groups to explore a thematic component of these communities. Must be registered for TLSC 110 and TLSC 120 concurrently.
This course satisfies the Engaged Learning requirement.
Outcomes:
Teacher candidates (students) will complete a Community Map Project, which includes a map of community elements, concept map depicting the relationship between elements and resources, narrative analysis of findings, and personal reflection

TLSC 140 Teaching, Learning and Leading for Social Justice (1 Credit Hour)
Pre-requisites: (TLSC 110, 120, and 130 (may also be taken as Corequisites)) OR CIEP 360; Restricted to All SOE Undergraduate Majors
This module (course) builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy. Candidates will complete a self-documentation project in which they explore their own identities and recognize how their thinking, behavior, and being are influenced by their own personal experiences, race/ethnicity, social class, language, religion, age, etc.

TLSC 150 Constructive Learning Environments For Diverse Students (1 Credit Hour)
Pre-requisites: (TLSC 110, 120, and 130 (may also be taken as Corequisites)) OR CIEP 360; Restricted to All SOE Undergraduate Majors
This module (course) deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments. Candidates will complete a classroom management self-assessment and develop a related action plan for enhancing a constructive classroom environment.

TLSC 160 Analyzing Culturally-Responsive Classroom Instruction (1 Credit Hour)
Pre-requisites: (TLSC 110, 120, and 130 (may be taken as Corequisites)) OR CIEP 360; Restricted to All SOE Undergraduate Majors
This module (course) builds on candidates' initial explorations of learning and development and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning. Candidates will conduct a lesson analysis to assess the effectiveness of a lesson based on established criteria for culturally responsive teaching.

TLSC 210 Educational Policy For Diverse Students (2 Credit Hours)
Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better; Restricted to All SOE Undergraduate Majors
This module (course) specifically engages teachers in looking at the policy related to diverse students in schools, particularly language policy (affecting ELLs and bilingual students) and special education policy (affecting students with special needs). Candidates will learn the policies, laws and court cases that impact classrooms, see how educational policies are enacted into classroom practice to support students, and make suggestions on continued ways to improve the achievement of students in urban classrooms and schools. Teacher candidates will explain the role of policy in educational practice, including the role of the teacher in advocating for change within the educational institution.

TLSC 221 Individualized Instruction and Assessment for Diverse Learners (1-2 Credit Hours)
Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better; Restricted to all SOE Undergraduate Majors
This module is designed for teacher candidates to appreciate, discern, and utilize the individual needs of students to plan instruction and support student achievement, particularly students with diverse learning and behavioral needs. Through the use of case study research to conduct individualized assessments with diverse learners, candidates will work with students with special needs or those at risk of this being identified as having a disability. Candidates will apply learning to the instructional context with academically, behaviorally, culturally, cognitively, and socially/emotionally diverse students.
Outcomes:
Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Use data to drive instruction and assess teaching and learning effectiveness; Apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; Hold high expectations and build on the assets of diverse students (including, but not limited to, race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, gender identity); Explicitly integrate the teaching of reading, writing, communication and technology across content area; Create and support safe and healthy learning environments for all students

TLSC 222 Authentic Assessment and Instruction for Bilingual Learners (2 Credit Hours)
Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better; Restricted to All SOE Undergraduate Majors
This module is designed for teacher candidates to appreciate, discern, and utilize the individual strengths and needs of students who speak a language other than English to plan instruction and support student achievement. Through the use of case study research, candidates conduct individualized, authentic assessments that focus on cultural backgrounds and language development of focal students. Candidates apply their learning with bilingual learners to support language and literacy development and acclimation to learning in the academic context
Outcomes:
Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Use data to drive instruction and assess the effectiveness of their teaching and students' learning; Apply deep understandings of both content and language pedagogy to provide developmentally appropriate instruction to students who are learning English as an added language, who may have interrupted schooling, and/or who may have experienced trauma as a result of their immigration experiences and/or dangerous issues in their home country; Hold high expectations and build on the assets of students from different cultural and linguistic backgrounds (including, but not limited to, ethnicity, culture, language, SES, immigration status); Integrate the teaching of language and literacy across all content areas and in ways that use a variety of media to do; and Create and support safe and supportive learning contexts for all students

TLSC 231 Teaching Science/Writing in Elem and Middle Grades (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, TLSC 222, Co-requisite TLSC 232; Minimum grade of "C"; Restricted to ELMS-BSED, SPED-BSED, BILI-BSED majors
This course introduces candidates (students) to the discipline and culture of science; provides experiences that engage candidates in the teaching and learning of science across varied school and non-school contexts; develops knowledge and skills to teach science through an inquiry approach and integrate writing.
This course satisfies the Engaged Learning requirement.
Outcomes:
Candidates will develop, implement, analyze, and reflect upon instructional and materials that ensure rigorous, relevant, inquiry-based science instruction is accessible to all students; Candidates complete an authentic personal inquiry project

TLSC 232 Integrated Teaching/Learning Social Studies & Writing in Elementary Grades (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, TLSC 222, Corequisite TLSC 231; Minimum grade of "C"; Restricted to ELMS-BSED, SPED-BSED, BILI-BSED majors
This introduces candidates (students) to the disciplines of the social studies; provides experiences engaging in the teaching and learning of elementary social studies across varied school and non-school contexts; develops knowledge and skills to teach social studies through an inquiry approach and integrate writing.
Outcomes:
Candidates will develop, implement, analyze, and reflect upon instruction that ensure rigorous, relevant, inquiry-based social studies instruction is accessible to all students; Candidates complete an authentic personal inquiry project

TLSC 240 Language, Culture, and Pedagogy in Bilingual Classrooms (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, AND TLSC 222 (Grade "C" or better); Restricted to BILI-BSED, and BILI-MINR
This module deals with bilingual education, schools, classrooms, and learners, with an emphasis on building off of students' cultural and linguistic resources to utilize and maintain native language. In order to accomplish these important building blocks of bilingual education, teacher candidates will inquire into and analyze the school's approach to family and community involvement with a specific lens on L1 maintenance and bilingualism. Candidates will engage with parents, families, and communities to inform the analysis of the school and classroom's alignment to language use in homes and communities.

TLSC 250 Developmentally Appropriate Practice with Infants/Toddlers & Their Families (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: 251, 252, 253; Restricted to ECSE-BSED
Infants-Toddlers-EI 1 is the first of two clinically-based modules emphasizing specialized knowledge and skills for working with children from birth to age three in early intervention (EI) and EHS (Early Head Start) settings. This course explore current knowledge and research findings about high-quality, developmentally appropriate early childhood care and education in the context of programs for infants and toddlers (including those with special needs) and their families and is designed to prepare future teachers to fill the role of an effective early interventionist and infant/toddler specialist.
Outcomes:
As a result of this experience (which includes components related to assessment, intervention, work with families, and infant/toddler development), students will demonstrate proficiency at designing safe, supportive environments of nurturing care for infants and toddlers (including those with special needs) and their families by applying the principles of developmentally appropriate practice in curriculum design/delivery, assessment, and intervention

TLSC 251 Family-Centered Assessment and Intervention in Early Intervention (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: 250, 252, 253; Restricted to ECSE-BSED
Infants-Toddlers-EI 1 is the second of two clinically-based modules emphasizing specialized knowledge and skills for working with children from birth to age three in early intervention (EI) and EHS (Early Head Start) settings. This course includes intensive clinical experiences in EI with infants and toddlers with special needs and their families, and is designed to complement Infants-Toddlers-EI 1 (Developmentally Appropriate Practice (DAP) with Infants/Toddlers and their Families) in preparing future teachers to fill the role of an effective early interventionist and infant/toddler specialist.
Outcomes:
As a result of this experience which (like I-T-EI 1) includes components related to assessment, intervention, diverse families, and infant/toddler development, students will develop their skills in working directly with families in designing assessment systems and interventions for infants and toddlers with special needs that address family resources, priorities, and needs

TLSC 252 Foundations, Settings, and Studies of Effective Early Childhood Education (1 Credit Hour)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: TLSC 250, TLSC 251, TLSC 253; Restricted to ECSE-BSED
This field-based module provides an introduction to the diverse settings in which children birth-8 are served. Candidates will investigate the interlaced professions of early childhood education and early childhood special education.
Outcomes:
Students will interpret and analyze trends in early care and education

TLSC 253 Developmentally Approp Practice Assmt&Intervention Young Children Spcl Nds (2 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: TLSC 250, TLSC 251, TLSC 252; Restricted to ECSE-BSED
This course frames sequence 4 in the TLLSC teacher preparation program. It addresses knowledge and skills in understanding the development of young children with special needs and the implications of that understanding for assessment and intervention in birth to five.
Outcomes:
Candidates will develop classroom environments, curriculum, and instructional strategies for working with infants, toddlers, and preschoolers, as well as demonstrating mastery of authentic assessments required for IL state credentialing

TLSC 260 Typical and A-Typical Development (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding and application typical and a-typical development of youth. Candidates use information about human development to develop individualized support plans for students with special needs.
Outcomes:
Teacher candidates (students) will reflect information related to the ways children develop a-typically and develop a mock individualized support plan for review

TLSC 261 Significant Disabilities and Life Planning (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding and application of the develop support for people with disabilities. Candidates use information regarding special needs to identify appropriate support and intervention models.
Outcomes:
Teacher candidates (students) will apply information related to students with significant support needs within individualize education plans

TLSC 262 Assistive and Adaptive Technology (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to identify appropriate assistive and adaptive technology supports.
Outcomes:
Teacher candidates (students) will apply information related to students with significant support needs when identifying assistive and adaptive technology to be incorporated within individualize education plans

TLSC 263 Transition Planning (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to develop transition support plans.
Outcomes:
Teacher candidates (students) will apply information related to students with significant support needs when supporting the development of the transition components of individualized education plans

TLSC 300A Professional Learning Communities (0 Credit Hours)
Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners - discussing and making meaning of all learning and experiences in schools and communities. At the close of each semester, following the completion of the PLCs by specialty area and submission of the summative assessments for other sequences, teacher candidates will reflect upon their personal and professional learning during that semester. Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions.

TLSC 300B Professional Learning Communities (1 Credit Hour)
Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners - discussing and making meaning of all learning and experiences in schools and communities. At the close of each semester, following the completion of the PLCs by specialty area and submission of the summative assessments for other sequences, teacher candidates will reflect upon their personal and professional learning during that semester. Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions.

TLSC 310 Language and Literacy for Diverse Students (2 Credit Hours)
This module (course) introduces teacher candidates (students) to essential foundations in teaching reading. Emphasized will be skills developmentally appropriate for the candidate's teaching endorsement level including phonological awareness, phonics, vocabulary, fluency and text comprehension. A balance of instructional practices appropriate for a variety of narrative and informational texts will be included.
Outcomes:
Teacher candidates (students) will learn to design and teach lessons, focusing on standards based reading skills to linguistically diverse students, through use of research based reading strategies

TLSC 320 Using Classroom Data in a Collaborative Env to Advance Student Achievement (2 Credit Hours)
This module (course) develops candidates' ability to collect, represent, and analyze appropriate classroom data. Students will use this ability to determine the level of objective mastery and measure student growth. Reflection on the analysis will guide candidates' decisions regarding instructional adjustment and individual student needs
Outcomes:
Teacher candidates will be proficient in the use of data based decision making that informs instruction and guides students' academic and behavioral modifications

TLSC 325 Teaching Internship in Informal Education Settings (3 Credit Hours)
The internship experience builds on experiences teacher candidates have in the TLLSC program working with local museums. Candidates will complete internship hours on site at assigned museum, working directly with the museum's Ed department. In addition, they will participate in online seminar meetings designed to make sense of the internship experiences , digest the relevant literature and draw research to practice connections. Develop and assess personal learning objectives following Loyola Center for Experiential Learning protocols.

TLSC 326 Informal Science Education Seminar (3 Credit Hours)
This course examines current issues around teaching and learning in informal science education (ISE). Students will develop and apply an understanding of learning theories related to learning in informal science, collaborations between informal and formal science education, issues around access and equity, and research and evaluation related to informal science education.
Outcomes:
Describe characteristics of teaching and learning in informal science settings; Describe practices that support learning and development in informal science settings; Summarize theories and frameworks relevant to understanding teaching, learning and development in informal science settings; Explain the ways in which out-of-school science programs collaborate with and support in-school science teaching and learning; Explain challenges and barriers to collaboration between in and out of school science teaching and learning; Debate the strengths and challenges of particular programs and/or institutions in terms of promoting science interest, engagement, and learning; Critique efforts to broaden participation in informal science and learning, including people with physical disabilities, diverse learning needs, and from minority backgrounds; Summarize current and historical research and evaluation priorities, approaches and findings related to informal science education

TLSC 330 Discipline-Specific Literacy for Diverse Students (2 Credit Hours)
This module (course) supports teacher candidates (students) in developing their knowledge and skills in teaching and assessing literacy in discipline specific contexts. Emphasized will be the identification and use of culturally responsive texts, evidence based strategies, data based decision making skills and new literacies (technology and online resources) designed to target all students' literacy needs, including those with linguistically diverse backgrounds.
Outcomes:
Teacher candidates (students) will apply understanding of literacy lesson design, assessment and instruction in discipline specific contexts, They will be required to collect and utilize data to teach targeted standards based reading skills to linguistically diverse students and to utilize technology in their lesson delivery

TLSC 340 Teaching and Learning in an Area of Specialization (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding and application of designing instruction in an area of specialization. Candidates use data, select essential content, implement strategic pedagogy, and integrate technology to meet the needs of PreK-12
Outcomes:
Teacher candidates (students) will reflect on their implementation of the full instructional cycle and after analysis of the data generated from that instruction will identify research that informs instruction future teaching

TLSC 350 Teaching and Learning with a Global Framework (4 Credit Hours)
Teacher candidates (students) will work with PreK-12 teachers to develop and implement a transdisciplinary/interdisciplinary curriculum unit with a service component. This module's (course) experiences are specifically designed to prepare candidates (students) for teaching in schools that offer an International Baccalaureate program.
Outcomes:
Teacher candidates (students) assess their instruction using a global framework in this module (course) and develop an action plan to improve practice as they move into the final phase of the teacher preparation program

TLSC 360 Developing Rigorous and Relevant Instruction & Assessment (2-3 Credit Hours)
Pre-requisites: TLSC 350
Co-requisites: TLSC 370; TLSC 360 and 370 must be taken together; Register for TLSC 370 first
This module (course) requires candidates, with increasing independence and more limited support from a mentor teacher, to develop rigorous and relevant instruction and assessment. Candidates will demonstrate their ability to use individual student data to plan appropriate and relevant instruction and assessment for all.
Outcomes:
Teacher candidates will obtain and analyze a variety of individual and whole class data and use this data to inform their development of differentiated and rigorous instruction and assessment

TLSC 370 Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep (2-3 Credit Hours)
This module (course) requires candidates, with increasing independence and more limited support from a mentor teacher, to implement rigorous and relevant instruction and assessment. Candidates will, while delivering the instructional unit designed in Module 7.1, be required to use a variety of assessments, provide reflection and feedback on the results of assessment using assessment data and make adaptations in order to improve student achievement.
Outcomes:
Teacher candidates will explain how what they have learned from the assessment data will influence their planning and future instruction for students

TLSC 380 Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching (6-12 Credit Hours)
This module (course) represents the candidates' full-time student teaching experience. Candidates will complete three of the edTPA tasks required for certification (edTPA: Designing Instruction Task; edTPA: Assessing Learning Task; and edTPA: The Culminating Teaching Experience Task) in order to document and demonstrate each candidate's ability to effectively teach his/her subject matter. Candidates will also engage in focused reflection on student teaching and their entire teacher preparation program. Candidates will complete the School of Education's Professional Practice Profile (PPP) essay at the end of the module. This course satisfies the Engaged Learning requirement.
Outcomes:
Utilize research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students EU3; Create and support safe and healthy learning environments for all students EU9; Utilize information from theories and related research based practices when making decisions and taking action in their professional practice EU10; Maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement EU11; Enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups EU1; Hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity) EU7; Engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students EU2; Design and implement standards-based units and lesson plans to maximize learning for all students by using an appropriate variety of assessments, culturally responsive practices, multiple resources/representations and questioning to encourage critical/high-order thinking inquiry and problem solving based on high expectations for each student's learning and behavior (3H, 3I, 3N, 3Q, 5I, 5L, 5M, 5Q, 5S, 7K, 7P, 8N, 9A) (IB) EU3 S2, S3, S5, S6, S9; Use data to evaluate and monitor students' needs, instruction and collaboration for impact on teaching and learning, (1C, 4L, 4N, 4Q, 5M, 5N, 5J, 8I, 8O, 8S, 9K, 9N) (IB) EU9 S7, S8; Demonstrate understanding and proficiency in core concepts, constructs and working principles from theories and research when making decisions and taking actions related to specific TLLSC EUs and EU indicators, (1C, 2A, 2B, 2C, 2I, 2J, 2G, 3A, 3Q, 4A, 4L, 5A, 5B, 5E, 5F, 5S, 6B, 6C, 7A, 7B, 7C, 7F, 9L) (IB) EU10 K1, K2, K3, K4, S1, S2; Demonstrate the ability to recognize and value student diversity and the differences in how students learn and provide instruction to accommodate such diversity, (1K, 2K, 5M, 7M, 8J) (IB) EU11 S2, S3, S4, S6; Support and deliver instruction in cooperation with their assigned co-teacher, (1H, 1I, 1L, 3I, 3J, 3M, 3P, 4C, 4K, 4N, 5I, 7P, 9J)(IB) EU1 S7, EU2 S8, EU4 S7; Provide a written analysis of each observed lesson, with a focus on their ability to make content accessible, the level of student engagement, the use of developmentally appropriate teaching practices, and the teaching of English language learners and students with special needs, (1H, 3J, 5H, 5K, 5M, 5P,7Q)(IB) EU3 S10, S11, S16, S18 EU4 S5; Reflect in writing and discussion on their ability to deliver and adapt relevant instruction and assessments, classroom management and professional interaction with teachers, students and families, (5H, 5J, 9K) (IB) EU6 S12 EU2 S9; Conduct regular pre- and post-observation conferences with Internship Coaches and Co-teachers to evaluate personal instructional style, preparation, use of technology, collaboration to promote learning and professional interactions to determine their impact on barriers to student learning, student success, self-esteem and inclusion (4K, 4N, 5K, 5M, 5N, 8I, 8J,8O, 8P,8S, 9C, 9K, 9N) (IB) EU9 S6, S8

Bilingual/Bicultural Education (BSEd)

As of Fall 2026, this program is no longer accepting applicants.

The BSEd program in Bilingual/Bicultural Education was designed for students who seek to become licensed bilingual teachers of elementary-aged children. Loyola's Bilingual/Bicultural Education program prepares candidates to teach in two languages in the growing number of bilingual programs in the Chicago area and across the country. Building from candidates' rich bilingualism, they are prepared with knowledge and pedagogy to make a positive impact on the lives of multilingual students.

All of Loyola's Bachelor of Science in Education (BSEd) majors complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum. This unique, research-based approach emphasizes authentic practices in field-based learning experiences in school and community settings. These modules were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

Upon program completion, Bilingual/Bicultural Education majors earn a BSEd in Bilingual/Bicultural Education. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) in Elementary Education (grades 1 through 6), as well as the Bilingual Education and English as Second Language (ESL) endorsements. Graduates are also entitled to the International Baccalaureate certificate. All of these credentials are built into the Elementary Education major.

- Special Education (BSEd) (p. 928)

Minor

- Education Policy Studies Minor (p. 907)

Curriculum

The Bilingual/Bicultural Education (BLBC) major includes Core Curriculum and School of Education courses. In addition, all majors complete field-based learning modules carrying a TLSC prefix. Each of these types of requirements is explained in the table below. Specialized BLBC Education sections begin in Phase Two of the program. Consult the SOE undergraduate advisor and the Suggested Sequence of Classes table for the specific requirements of the BLBC Education major.

Course Requirements

Code	Title	Hours
University Core Courses		
University Core requirements are typically met by taking 16 courses across ten central areas of knowledge and inquiry. Some Core requirements are met by taking pre-approved courses within the School of Education: CIEP 104 (Quantitative), CIEP 206 (Tier 2 Literacy), ELPS 219 (Tier 2 Historical) and ELPS 302 (Tier 2 Philosophical). Tier 1 Literacy Core requirements are also waived for BLBC majors. Consult the SOE undergraduate advisor and Suggested Sequence of Classes table to identify Core requirements that apply to each student's pathway.		
School of Education CIEP and ELPS courses		

Education degree requirements include a number of courses offered within the School of Education and designed for all Education majors. At times, these courses will also address a specific portion of the Core (CIEP 206, ELPS 219, ELPS 302). Other courses address key knowledge and instructional skills (CIEP 104, CIEP 105, CIEP 359).		
CIEP 104	Mathematics for Teachers I	3
CIEP 105	Mathematics for Teachers II	3
CIEP 206	Children's Literature	3
CIEP 359	Teaching Reading	3
ELPS 219	History of American Education	3
ELPS 302	Philosophy of Education	3
School of Education field-based TLSC modules		
TLSC modules must be taken in order and in established groups (called Sequences) each semester. As students move through the TLLSC Phases, they gain extensive field experience, as well as knowledge and skills to effectively support elementary aged students. Specialized modules for BLBC majors begin with Phase Two. The TLLSC curriculum includes a one-year internship (TLSC 360, TLSC 370, TLSC 380) under the supervision of a licensed and experienced bilingual teacher and University supervisor. In addition, students must enroll in Professional Learning Communities (PLCs) each fall (TLSC 300A) and spring (TLSC 300B) and collaborate with the others in the major. PLCs are led by a faculty member with expertise in bilingual education. Consult the SOE undergraduate advisor and visit the Suggested Sequence of Classes tables to learn more about the four-year BLBC BSEd curriculum.		
Phase One: Exploration		
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
TLSC 140	Teaching, Learning and Leading for Social Justice	1
TLSC 150	Constructive Learning Environments For Diverse Students	1
TLSC 160	Analyzing Culturally-Responsive Classroom Instruction	1
TLSC 210	Educational Policy For Diverse Students	2
TLSC 221	Individualized Instruction and Assessment for Diverse Learners	2
TLSC 222	Authentic Assessment and Instruction for Bilingual Learners	2
TLSC 300A	Professional Learning Communities ((4 @ 0 credits) BLBC Education majors must enroll each fall in the TLSC 300B section that corresponds with their major. Fall/Spring PLC credit is issued in the spring. Students must enroll in PLCs every semester for all four years.)	0
TLSC 300B	Professional Learning Communities ((4 @ 1 credit) BLBC Education majors must enroll each spring in the TLSC 300B section that corresponds with their major. Students must enroll in PLCs every semester for all four years.)	1
Phase Two: Concentration		
TLSC 231	Teaching Science/Writing in Elem and Middle Grades	3
TLSC 232	Integrated Teaching/Learning Social Studies & Writing in Elementary Grades	3
TLSC 240	Language, Culture, and Pedagogy in Bilingual Classrooms	3
TLSC 310	Language and Literacy for Diverse Students	2
TLSC 320	Using Classroom Data in a Collaborative Env to Advance Student Achievement	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2
TLSC 340	Teaching and Learning in an Area of Specialization	2
TLSC 350	Teaching and Learning with a Global Framework	4
Phase Three: Specialization		
TLSC 360	Developing Rigorous and Relevant Instruction & Assessment	3
TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep	3
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching	12
Total Hours		**74**

Suggested Sequence of Courses

This sequence of courses is meant to be used as a suggested path for completing coursework. Bilingual/Bicultural Education majors must consult their SOE advisor for assistance with course selection and to ensure that all Education degree requirements are met. Note that TLSC modules must be taken in a prescribed order. Students must complete each sequence before moving on to the next. Major-specific CIEP courses are linked to a sequence and must be taken within that semester.

Course	Title	Hours
Sequence 1		
TLSC 300A	Professional Learning Communities (BLBC)	0
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
UCWR 110	Writing Responsibly	3
CORE	Theological and Religious Studies Tier I	3
SPAN 250	Composition & Conversation I	3
UNIV 101	First Year Seminar	1
Must required l documentation and background check prior to program entry		
	Hours	**14**
Sequence 2		
TLSC 300B	Professional Learning Communities (BLBC)	1
TLSC 140	Teaching, Learning and Leading for Social Justice	1
TLSC 150	Constructive Learning Environments For Diverse Students	1
TLSC 160	Analyzing Culturally-Responsive Classroom Instruction	1
CIEP 104	Mathematics for Teachers I	3
CIEP 206	Children's Literature (Tier II Literary)	3
SPAN 251	Composition & Conversation II	3
CORE	Historical Knowledge Tier I	3
	Hours	**16**
Sequence 3		
TLSC 300A	Professional Learning Communities (BLBC)	0

TLSC 210	Educational Policy For Diverse Students	2
TLSC 221	Individualized Instruction and Assessment for Diverse Learners	2
TLSC 222	Authentic Assessment and Instruction for Bilingual Learners	2
ELPS 219	History of American Education (Tier II Historical)	3
SPAN 270	Introduction to Critical Analysis in Spanish	3
CORE	Scientific Literacy Tier I	3
	Hours	**15**
Sequence 4		
TLSC 300B	Professional Learning Communities (BLBC)	1
CIEP 359	Teaching Reading	3
CIEP 105	Mathematics for Teachers II (Core Quantitative)	3
TLSC 231	Teaching Science/Writing in Elem and Middle Grades	3
TLSC 232	Integrated Teaching/Learning Social Studies & Writing in Elementary Grades	3
SPAN 271	Introduction to Iberian Literature and Culture	3
Recommended to take the Language Proficiency Test for Transitional Bilingual Spanish from IL Licensure Testing Service		
All candidates must pass Elementary Education licensure test & Language Proficiency Test prior to Licensure.		
	Hours	**16**
Sequence 5		
TLSC 300A	Professional Learning Communities (BLBC)	0
TLSC 310	Language and Literacy for Diverse Students	2
TLSC 320	Using Classroom Data in a Collaborative Env to Advance Student Achievement	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2
TLSC 240	Language, Culture, and Pedagogy in Bilingual Classrooms	3
PHIL 130	Philosophy & Persons (Tier I Philosophical)	3
CORE	Societal & Cultural Knowledge: Tier I	3
Apply for One-Year Internship by October 1		
	Hours	**15**
Sequence 6		
TLSC 300B	Professional Learning Communities (BLBC)	1
TLSC 340	Teaching and Learning in an Area of Specialization	2
TLSC 350	Teaching and Learning with a Global Framework	4
PHYS 101	Liberal Arts Physics (Tier II Scientific)	3
PLSC 101	American Politics (Tier II Societal)	3
CORE	Artistic Knowledge	3

TLSC 360	Developing Rigorous and Relevant Instruction & Assessment	3
TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep	3
ELPS 302	Philosophy of Education (Philosophical Tier II)	3
CORE	Theological and Religious Studies Tier II	3
CORE	Ethics	3
Apply for May Graduation in LOCUS by October 1		
	Hours	**15**
Sequence 8		
TLSC 300B	Professional Learning Communities (BLBC)	1
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching (Engaged Learning)	12
All candidates must pass Elementary Education licensure test & Language Proficiency Test prior to licensure.		
	Hours	**13**
	Total Hours	**120**

School of Education Requirements

Undergraduate students in the School of Education must complete all degree requirements with a grade of C or better in order to graduate and be entitled for the Illinois State Professional Educator License (PEL). They must also enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to be entitled for the Illinois State Professional Educator License (PEL), students must pass the Illinois Elementary Education licensure exam prior to their final internship semester. Bilingual/Bicultural Education majors must also demonstrate proficiency in their selected language by passing the appropriate Language Proficiency test. This test is waived for students who have the Seal of Biliteracy on file in School of Education. Program faculty can provide more specific information on these requirements.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- After the first three semesters of the program, candidates will articulate and apply principles of social justice and theories of learning to critically reflect upon their own identities and emerging teaching practices.
- After the first three semesters of the program, candidates will analyze educational policies to suggest instructional practices that support individual students in equitably accessing curriculum and instruction.
- After the first six semesters of the program, candidates will analyze assessment data and curriculum to make instructional decisions to

support multilingual students' learning, language development, and social-emotional well-being.
- After the first six semesters of the program, candidates will design bilingual instruction that articulates clear learning goals, aligned assessments, and engaging instruction in response to multilingual students' backgrounds, abilities, and needs.
- By program completion, candidates will apply culturally and linguistically responsive teaching strategies to create inclusive learning environments that promote multilingual students' engagement, positive behavior, and equitable participation.
- By program completion, candidates will demonstrate content, language, and pedagogical expertise by developing and delivering instruction that supports multilingual students' academic achievement, biliteracy development, and sociocultural competence.
- By program completion, candidates will reflect on teaching practice in two languages and use evidence of multilingual students' learning to identify areas for instructional adjustments, stakeholder collaboration, and professional development.

Early Childhood Education (BSEd)

The Early Childhood Education program is designed for any student who is interested in working with the youngest children, whether in general education or inclusive settings from birth to age 8. It emphasizes inclusive, specialized teaching practices to develop meaningful learning experiences for both typically developing children and those with disabilities.

Upon program completion, graduates earn a BSEd in Early Childhood Education. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) in ECE, which includes general education across the full range of birth to age 8. The ECE also includes the English as Second Language (ESL) endorsement and three other Illinois early childhood credentials:

- The Illinois Early Intervention credential in Developmental Therapy
- Gateways Level 5 Infant/Toddler credential
- Gateways Level 5 Early Childhood credential

All of Loyola's Bachelor of Science in Education (BSEd) students complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum as their foundation. For ECE majors, this unique, research-based approach emphasizes authentic learning of practices through direct work with infants/toddlers, preschoolers, and school-aged children. TLSC modules largely take place in school and community settings and were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities. Learn more by reading through the **Early Childhood Education Program Viewbook**.

For students admitted before Fall 2026, this program was previously called Early Childhood Special Education (BSEd). More information can be found here (p. 2662).

Curriculum

The Early Childhood Education (ECE) BSEd program includes Core Curriculum and School of Education courses, as well as field-based learning modules that carry a TLSC prefix. Each of these types of requirements is explained in the table below. ECE-specific sections begin in Phase Two. Consult the SOE undergraduate advisor and the Suggested Sequence of Classes table for complete information on the requirements of this major pathway.

Course Requirements

Code	Title	Hours
University Core Courses		
University Core requirements are typically met by taking 16 courses across ten central areas of knowledge and inquiry. Some Core requirements are met by taking pre-approved courses within the ECE major (e.g., CIEP 104 (Quantitative), CIEP 206 (Tier 2 Literacy), ELPS 219 (Tier 2 Historical) and ELPS 302 (Tier 2 Philosophical). Consult the SOE undergraduate advisor and Suggested Sequence of Classes table to identify Core requirements that apply to you.		
School of Education CIEP and ELPS courses		
Your Education degree requirements include a number of courses offered within the School of Education and designed for all Education majors and minors. At times, these courses will also address a specific portion of the Core (see above). CIEP 315 and all CIEP M courses were designed specifically for ECE majors. These courses are linked with specific Sequences and field experiences and must be taken when indicated in the Suggested Sequence of Classes table.		
CIEP 104	Mathematics for Teachers I [1]	3
CIEP 206	Children's Literature [1]	3
CIEP 315	Language Development and Literacy	3
CIEP M16	K-2 Literacy Methods for EC	2
CIEP M17	Early Childhood Math Methods	2
CIEP M42	K-2 Special Education Methods for ECSE	2
CIEP M43	Special Education Methods: Infants, Toddlers and Preschoolers	3
ELPS 219	History of American Education [1]	3
ELPS 302	Philosophy of Education [1]	3
School of Education field-based TLSC modules		
TLSC modules must be taken in order and in established groups (called Sequences) each semester. As students move through the TLLSC Phases, they gain extensive field experience, as well as knowledge and skills for working effectively with young children and their families. The TLLSC curriculum includes a one-year internship (TLSC 360, TLSC 370, TLSC 380) in a preschool setting under the supervision of a licensed and experienced ECE teacher. In addition, students must enroll in Professional Learning Communities (PLCs) each fall (TLSC 300A) and spring (TLSC 300B) and collaborate with all others in the ECE major. PLCs are led by a faculty member who specialized in early childhood education. Consult the SOE undergraduate advisor and visit the Suggested Sequence of Classes tables to learn more about the four-year ECE curriculum.

Track 2: 2+2 Transfer Program

After completing an Associate of Arts degree Associate of Arts degree in Child Development or Early Childhood Education or an equivalent area from any two-year institution, students will complete two years of continuous enrollment and academic progress to earn a Bachelor's in Early Childhood Education from Loyola University Chicago. This pathway includes licensure with an endorsement for early childhood education, English as a Second Language (ESL), and either the Early Childhood Special Education approval or endorsement. Students will need to complete the 60 hours of SOE coursework at Loyola, engage in a semester of student teaching, and will pass required exams for licensure and certification. During years 1 and 2, candidates complete an Associate of Arts Degree in Child Development or Early Childhood Education or an equivalent area from any two-year institution.

Pathway for Transfer Students coming into Loyola with a two year degree (associate's degree or 60 credits):

School of Education Graduation Requirements

Undergraduate students in the School of Education must complete all degree requirements with a grade of C or better. Grades of C- or below do not count toward degree requirements. Students must enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. For ECE majors, these processes occur prior to the start of Sequences 1, 4, and 7. TLSC modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to be entitled for the Illinois State Professional Educator License (PEL), students must pass the Illinois Early Childhood Special Education licensure exam prior to their final internship semester. In order to receive the Illinois Gateways and Early Intervention credentials, graduates must apply to the institutions that grant them. While the ECE BSEd program is approved by those institutions, these credentials were developed and are offered outside the system to educator licensure. They are not entitled through the SOE licensure office and may require application fees.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Reflect and carry out the School of Education's mission of professionalism in service of social justice in the school and the community by promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups
- Engage and promote reflection and collaboration among teachers, students, administrators, families and communities to improve achievement for all students.
- Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments, and instructional strategies to meet the individual needs of students.
- Use data to drive instruction and assess teaching and learning effectiveness.
- Apply knowledge of policy and local, state, and national educational contexts to advocate with and for students and families.
- Apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students.
- Hold high expectations and build on the assets of diverse students (including, but not limited to race and ethnicity, culture, language, socioeconomic status, exceptionalities, sexual orientation, gender, gender identity).
- Explicitly integrate the teaching of reading, writing, communication and technology across content areas.
- Create and support safe and healthy learning environments for all students.
- Utilize information from theories and related research-based practices when making decisions and taking action in their professional practice.

Education Policy Studies Minor

Designed for future teachers, educational policymakers, school district partner organization professionals, community organizers, and nonprofit professionals, the Education Policy Studies Minor prepares students with cross-disciplinary, field-informed knowledge of education policy within American and international school systems. This minor is open to all Loyola University Chicago undergraduates.

Loyola's Educational Policy Studies Minor program introduces students to the policies, ideas and decision-making that has created and can create change in our educational system. This program is a great choice for students who want to study, critically analyze, and confront systemic equalities in our education systems. And for those who want to prepare for work in education in a non-classroom setting, this minor is especially useful.

Upon completion of the minor in Educational Policy Studies, graduates will possess knowledge, skills, and professional values necessary to work in non-classroom educational settings, including after-school programs, nonprofit organizations, community-based organizations, or government offices.

Related Programs

Major

- Elementary Education (BSEd) (p. 908)

Minor

- Reading Teacher Minor (p. 918)
- Special Education Minor (p. 931)

Curriculum

The Education Policy Studies minor program supports students who envision themselves working in one or more education policy roles, including: activists, administrators, advocates, educators, policymakers, and/or researchers.

Throughout the program, students engage with colleagues, professionals, research, and theories to develop a critical understanding systemic inequalities in education systems and opportunities to advance social justice. In courses students discuss: the roles of pluralism and democracies in policy; the effects and intersections of race, nationality, immigration status, class, religion, gender identity and presentation, sexuality, disability, veteran status, and other identities on education policy, and; the unique challenges and opportunities of developing and implementing education policy in urban areas.

This minor includes School of Education CIEP and ELPS courses, an internship (ELPS 265), field-based learning modules that carry a TLSC

prefix, and elective course options from other departments across the university.

School of Education Requirements

Required Education Policy Studies Internship

The Education Policy Studies Internship experience helps students integrate and take action upon policy, theoretical and research coursework with a practical field-based experience. The internship requires 120 hours of field work. The internship course will meet periodically (but not weekly) throughout the semester to support students in their internship. Students are encouraged to begin researching internship sites the semester before they plan to take the internship course, and can work with the internship course instructor to identify prospective internship sites and develop a plan along with the site supervisor. Students are given permission to register for this course once they have confirmed an internship site in conversation with the internship course instructor.

It is recommended that students make use of resources available through Loyola's Office of Experiential Education in locating an internship site. Possible sites for ELPS 265 Cultural and Educational Policy Studies Internship include, but are not limited to, nonprofit organizations, school-based after school programs, community centers, education policy institutes, and religious organizations. Within these sites, student interns could work in the areas of educational programming, international development, humanitarian assistance, fundraising, grant writing, policy formation, program development, program evaluation, and advocacy. Student interns do not primarily work as direct service providers because this internship is intended to provide exposure to various dimensions of education policy work. Accommodations can be made for students who would like to do their internship while studying abroad.

Optional Concentrations

Education Policy minor students have the option to declare a concentration, which is an identified selection of elective courses that develop expertise in one area of the field. Concentrations are optional; students can select a sequence of elective courses that meet their own interests in consultation with their advisor and program director.

Concentrations include:

- Language Policy Leadership - ANTH 332, CIEP 213, PSYC 374
- Policy Advocacy - MGMT 331, COMM 372, SOCL 231
- Policy Analysis - PLSC 380, SOCL 245, ELPS 219
- Teacher Policy Leadership - CIEP 336, ELPS 302, SOCL 231

Suggested Sequence of Classes

Educational Policy Studies minor courses may be taken in any order; we only require that ELPS 265 (https://catalog.luc.edu/search/?P=ELPS%20265) Cultural and Educational Policy Studies Internship be taken after a student has completed at least two other courses required for the minor. TLSC modules must be taken together in a single semester.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Develop a critical perspective on advancing equity, inclusion, and social justice through education policy.
- Gain practical and theoretical understandings of education policy: how it is made; how it is implemented; how it affects youths, adults, institutions, and educational systems; the social, spacial, and political factors that inform policy and practice, and; the unique challenges and opportunities of urban regions.
- Examine education policy from multiple disciplinary perspectives, critically review education policy research, and analyze educational systems.
- Gain hands-on policy analysis and implementation skills through a supervised internship.

Elementary Education (BSEd)

Overview

The BSEd program in Elementary Education was designed for students who seek to become licensed elementary school teachers. This major focuses on laying the foundation for children's lifelong learning and development. Elementary majors are prepared to teach essential knowledge and skills (including literacy, numeracy, critical thinking, and social interaction), but also to foster children's curiosity, creativity, and thirst for knowledge. These students learn to create nurturing

and inclusive classroom environments where children feel valued and supported. In the Elementary major, students will learn to tailor their instruction to meet the diverse needs of each student, employing innovative teaching methods to engage and inspire curiosity.

All of Loyola's Bachelor of Science in Education (BSEd) majors complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum. This unique, research-based approach emphasizes authentic practices in field-based learning experiences in K-12 school and community settings. These modules were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

Upon program completion, Elementary Education majors earn a BSEd in Elementary Education. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) in Elementary Education (grades 1 through 6), as well as the English as Second Language (ESL) endorsement and the International Baccalaureate certificate. All credentials are built into the Elementary Education major.

Related Programs

Major

- Elementary Education (BSEd) (p. 908)

Master's

- Elementary Education (MEd) (p. 1691)

Curriculum

The Elementary Education major includes Core Curriculum and School of Education courses. In addition, all Education majors complete field-based learning modules carrying a TLSC prefix. Each of these types of requirements is explained in the table below. Elementary Education-specific sections begin in Phase Two of the program. Consult the SOE undergraduate advisor and the Suggested Sequence of Classes table for the specific requirements of the Elementary Education major.

Course Requirements

Code	Title	Hours
University Core Courses		
University Core requirements are typically met by taking 16 courses across ten central areas of knowledge and inquiry. Some Core requirements are met by taking pre-approved courses within the School of Education: CIEP 206 (Tier 2 Literacy), ELPS 219 (Tier 2 Historical) and ELPS 302 (Tier 2 Philosophical). Consult the SOE undergraduate advisor and Suggested Sequence of Classes table to identify Core requirements that apply to each student's pathway.		
School of Education CIEP and ELPS courses		
Education degree requirements include a number of courses offered within the School of Education and designed for all Education majors. At times, these courses will also address a specific portion of the Core (CIEP 206, ELPS 219, ELPS 302). Other courses address key knowledge and instructional skills (CIEP 104, CIEP 105, CIEP 359).		
CIEP 104	Mathematics for Teachers I [1]	3
CIEP 105	Mathematics for Teachers II	3
CIEP 206	Children's Literature	3
CIEP 359	Teaching Reading	3
ELPS 219	History of American Education	3
ELPS 302	Philosophy of Education	3
School of Education field-based TLSC modules		
TLSC modules must be taken in order and in established groups (called Sequences) each semester. As students move through the TLLSC Phases, they gain extensive field experience, as well as knowledge and skills to effectively support elementary aged students. Specialized modules for Elementary majors begin with Phase Two. The TLLSC curriculum includes a one-year internship (TLSC 360, TLSC 370, TLSC 380) in an elementary school classroom under the supervision of a licensed and experienced teacher and University supervisor. In addition, students must enroll in Professional Learning Communities (PLCs) each fall (TLSC 300A) and spring (TLSC 300B) and collaborate with the others in the major. PLCs are led by a faculty member with expertise in elementary education. Consult the SOE undergraduate advisor and visit the Suggested Sequence of Classes tables to learn more about the four-year Elementary BSEd curriculum.		
Phase One: Exploration		
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1

TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep [3]	3
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching [4]	12
Total Hours		**71**

1 This course is waived for students admitted into Track 2: 2+2 Transfer Program.
2 Students in the 2+2 Transfer Program take this course for 1 credit hour.
3 Students in the 2+2 Transfer Program for 2 credit hours.
4 Students in the 2+2 Transfer Program take this course for 8 credit hours.

Suggested Sequence of Courses

This sequence of courses is meant to be used as a suggested path for completing coursework. Elementary Education majors must consult their SOE advisor for assistance with course selection and to ensure that all Education degree requirements are met. Note that TLSC modules must be taken in a prescribed order. Students must complete each sequence before moving on to the next. Major-specific CIEP courses are linked to a sequence and must be taken within that semester.

School of Education Requirements

Undergraduate students in the School of Education must complete all degree requirements with a grade of C or better in order to graduate and be entitled for the Illinois State Professional Educator License (PEL). They must also enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to be entitled for the Illinois State Professional Educator License (PEL), students must pass the Illinois Elementary Education licensure exam prior to their final internship semester.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- After the first three semesters of the program, candidates will articulate and apply principles of social justice and theories of learning to critically reflect upon their own identities and emerging teaching practices.
- After the first three semesters of the program, candidates will analyze educational policies to suggest instructional practices that support individual students in equitably accessing curriculum and instruction.
- After the first six semesters of the program, candidates will analyze assessment data and curriculum to make instructional decisions to support students' learning, language development, and social-emotional well-being.
- After the first six semesters of the program, candidates will design instruction that articulates clear learning goals, aligned assessments,

and engaging instruction in response to students' backgrounds, abilities, and needs.

- By program completion, candidates will apply culturally and linguistically responsive teaching strategies to create inclusive learning environments that promote student engagement, positive behavior, and equitable participation.
- By program completion, candidates will demonstrate content and pedagogical knowledge by developing and delivering instruction that accurately represents disciplinary concepts and supports student understanding.
- By program completion, candidates will reflect on teaching practice using evidence of student learning to identify areas for instructional adjustments, stakeholder collaboration, and professional development.

Leadership Studies Minor

Leadership Studies Minor is designed as an interdisciplinary course of study to complement a wide range of academic majors. Leadership Studies exposes students to the theory and practice of leadership across interdisciplinary boundaries to better prepare for professional and personal success. Students will study diverse theories and perspectives on leadership, examine the interplay of social justice and ethics in the practice of leadership, and develop a deeper understanding of contextual influences on leadership in an increasingly complex and global society. An emphasis is placed on cultivating critical self-reflection as well as analytical skills to enhance the application of the students' evolving conceptualizations of leadership in organizational and career contexts. Students will engage in an exciting internship experience and also have the opportunity to study abroad at Loyola's John Felice Rome Center. Leadership Studies courses are delivered online, hybrid, and also on-site at the Rome Center for a two-week immersive study abroad opportunity every summer.

Suggested Sequence of Courses

Course	Title	Hours
Sequence 1		
Semester I		
ELPS 125	Introduction to Leadership Studies	3
	Hours	**3**
Semester II		
ELPS 222	Foundations of Ethics and Social Justice in Leadership	3
	Hours	**3**

Semester III		
Elective Course		3
	Hours	**3**
Semester IV		
Elective Course		3
	Hours	**3**
Semester V		
ELPS 223	Contextual Influences in Applied Leadership: Internship	3
	Hours	**3**
Semester VI		
ELPS 325	Leadership Studies Capstone	3
	Hours	**3**
	Total Hours	**18**

Learning Outcomes

- Graduates will demonstrate an understanding of leadership theory along with contextual influences on the practice of leadership.
- Graduates will demonstrate an understanding of ethical considerations in the pursuit of leadership for social justice.
- Graduates will demonstrate the capacity to apply knowledge and skills related to leadership in their unique disciplinary contexts and career fields.

Middle Grades (BSEd)

As of Fall 2026, this program is no longer accepting applicants.

Loyola's Middle Grades Education program is designed for undergraduates seeking to become licensed middle school educators. The three Middle Grades Education pathways include a Middle Grades Education major and an additional content area (Language Arts, Social Studies, or Science). Mathematics is presently NOT available as a middle grades content area. However, if a candidate is an Elementary or Secondary Education major, they can add a Middle Grades endorsement to their IL Professional Educator License in any of the above areas (including Mathematics) by taking a small number of courses and passing the appropriate Illinois content area test in the Middle Grades content area. The SOE Undergraduate Advisor can provide details on endorsement requirements. Middle Grades majors require a greater number of courses in these content areas.

All of Loyola's Bachelor of Science in Education (BSEd) students complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum. This approach emphasizes authentic practices in real classrooms. TLSC modules largely take place in school and community settings across the City of Chicago and were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

Upon graduation, Middle Grades Education majors earn a BSEd in Middle Grades Education. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) that includes an endorsement in their content area, as well as the English as a Second Language (ESL) endorsement and the International Baccalaureate (IB) certificate.

Related Programs

Major

- Elementary Education (BSEd) (p. 908)
- Secondary Education (BSEd) (p. 919)
- Special Education (BSEd) (p. 928)

Curriculum

The Middle Grades major includes Core Curriculum and School of Education courses. In addition, all Education majors complete field-based learning modules carrying a TLSC prefix. Each of these types of requirements is explained in the table below. Consult the SOE undergraduate advisor and the Suggested Sequence of Classes table for the specific requirements of the major.

The order of the TLLSC curriculum is fixed; it is strongly recommended that students refer to the Suggested Sequence of Courses (p. 914) to locate specific requirements of the major.

Code	Title	Hours
University Core courses		
Core requirements are typically met by taking 16 courses across ten central areas of knowledge and inquiry. Some Core requirements may be met by taking pre-approved courses within the Secondary Education major (e.g., ELPS 219 and ELPS 302). Certain Core requirements may be met by taking the courses in your content area major or through transfer credit. Consult the Suggested Sequence of Classes tables below to identify the Core requirements for each content area, and always consult with the SOE undergraduate advisor about which Core requirements apply to your major.		
Content area major courses		
These courses provide you with required foundational knowledge of the content area you plan to teach (e.g., mathematics, social sciences, English). Content area courses are usually offered through the College of Arts and Sciences and include students from other majors across the University. The specific required courses within your content area major (as well as any electives) are indicated in the Suggested Sequence of Classes tables below. Because of the strong concentration of this coursework in your content area, your content area major courses typically address not only degree and licensure requirements, but an area of the University Core as well. The SOE undergraduate advisor will guide you through these requirements.		
School of Education CIEP and ELPS Courses		
Education degree requirements include a small number of courses offered within the School of Education and designed for Education majors. At times, these courses address a specific University Core requirement; for example, all Secondary Education majors meet the Philosophical Tier 2 Core requirement by taking ELPS 302. Secondary English and Math majors must take ELPS 219 (Tier 2 Historical), and only Secondary English majors must take CIEP 350.		
CIEP 305	Reading Teacher Practicum	3
CIEP 327	Teaching English Language Arts in the Middle Grades	3
CIEP 328	Assessment and Diagnosis of Reading Problems	3
CIEP 329	Materials, Resources, & Strategies for Reading Teacher	3
CIEP 350	Adolescent Literature	3
CIEP 351	Curriculum and Teaching in the Middle School	3
CIEP 359	Teaching Reading	3

ELPS 219	History of American Education	3
ELPS 302	Philosophy of Education	3
School of Education field-based TLSC modules		

TLSC modules must be taken in order and in established groups each semester, called Sequences. As you move through the three TLLSC Phases, you will gain extensive field experience, as well as knowledge and skills that will help you stand out from graduates of other teacher education programs. You will enter the field prepared to work in today's diverse classrooms with students of many backgrounds. The TLLSC secondary curriculum includes a one-year internship (TLSC 360, TLSC 370, TLSC 380) in a high school under the supervision of a licensed and experienced teacher in your content area in collaboration with a University Supervisor. You must also enroll in Professional Learning Communities (PLCs) each fall (TLSC 300A) and spring (TLSC 300B). In these PLCs, you will collaborate with the other students in your major and content area. PLCs are led by faculty experts in each content areas. To better understand how this curriculum will look over your four-year undergraduate experience, you should visit the Suggested Sequence of Classes table for your content area. TLSC modules are listed below in numerical order.

Phase One - Exploration		
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
TLSC 140	Teaching, Learning and Leading for Social Justice	1
TLSC 150	Constructive Learning Environments For Diverse Students	1
TLSC 160	Analyzing Culturally-Responsive Classroom Instruction	1
TLSC 210	Educational Policy For Diverse Students	2
TLSC 221	Individualized Instruction and Assessment for Diverse Learners	2
TLSC 222	Authentic Assessment and Instruction for Bilingual Learners	2
TLSC 300A	Professional Learning Communities (Secondary Education majors must enroll each fall in the TLSC 300A section that corresponds with their major/content area. Fall/Spring PLC credit is issued in the spring. Students must enroll in PLCs every semester.)	0
TLSC 300B	Professional Learning Communities (Secondary Education majors must enroll each spring in the TLSC 300B section that corresponds with their major/content area. Students must enroll in PLCs every semester.)	1
Phase Two - Concentration		
Phase Two includes one full semester (usually the fourth) of content area coursework and no TLSC modules.		
TLSC 310	Language and Literacy for Diverse Students	2
TLSC 320	Using Classroom Data in a Collaborative Env to Advance Student Achievement	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2
TLSC 340	Teaching and Learning in an Area of Specialization	2
TLSC 350	Teaching and Learning with a Global Framework	4
Phase Three - Specialization		
TLSC 360	Developing Rigorous and Relevant Instruction & Assessment	3
TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep	3
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching	12
Total Hours		**71**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Social Sciences Concentration

Course	Title	Hours

	Hours	**13**
	Total Hours	**126**

[1] Topic depends on semester.

[2] Offered irregularly; if it is not offered during Sequence 4, students must take in Sequence 6.

Math Concentration

This major is not accepting students at this time.

School of Education Requirements

Each Undergraduate student in the School of Education must complete all degree requirements with a grade of C or better in order to meet degree requirements. They must also enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC field-based learning modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to be entitled for the Illinois State Professional Educator License (PEL), students must also pass the Illinois licensure test(s) for their secondary content area prior to their final internship semester. Information about licensure tests will be provided by teacher education faculty.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- You'll have accrued the equivalent of one year of full-time teaching experience through all the hands-on, experiential learning opportunities in Chicago's classrooms and community organizations, so you will be ready to be at the head of your own classroom. With the foundational knowledge from your Loyola education, you will utilize theories, data, and research practices when making decisions in your classroom and for your students and when assessing the effectiveness of teaching on learning.

Reading Teacher Minor

The Reading Teacher Minor supports educators in developing a strong knowledge base in the area of literacy. Strong literacy skills are essential for success across all content areas and grade levels. Our program prepares you with the foundational knowledge of language and literacy learning with a focus on social justice and an aim to help students become empowered through their own literacy skills. The Reading Teacher minor includes 19 credit hours in targeted aspects of literacy.

Upon completion of the BSEd from the School of Education, students meeting the Reading Teacher minor requirements are eligible to receive the Illinois State Reading Teacher Endorsement (for grades PK-12). This endorsement can only be added to a Professional Educator license; therefore, this minor is only open to students who are enrolled as Education majors and seeking to become licensed educators. Students with majors in Elementary Education, Middle Grades English Language Arts and Social Studies, and Secondary English Education can complete this minor within their four-year program plan. All other Education majors will likely require additional semesters to be added to their undergraduate program. Always consult with your SOE advisor to discuss how to complete minor requirements.

Minor

- Education Policy Studies Minor (p. 907)

Combined

- English (BA/BSED) (p. 394)

Curriculum

The table below lists all requirements for the Reading Teacher minor. These include School of Education courses, TLSC field-based learning modules, and a practicum, all of which should be taken in the order displayed in the Suggested Sequence of Classes table. This ensures that students meet prerequisite requirements and enroll in minor courses intended to be aligned with particular semesters of the Education major. The Reading minor meets the Tier 1 Literary requirement from the University Core.

Reading Teacher minors who are majoring in Elementary Education also enroll in a specialized Professional Learning Community (PLC), where they collaborate each semester with all Elementary Reading Teacher minors and a faculty expert in literacy instruction.

Course Requirements

[1]
- Elementary Education majors should take CIEP 359.
- Middle Grades majors already take CIEP 327 and CIEP 359 as major requirements
- Secondary Education majors should take CIEP 327

[2]
- Note that TLSC 310/320/330 are always taken together. TLSC 310 and 330 are aligned with minor requirements.
- Prior to enrolling in TLSC 310/320/330, Reading Minors should pass CIEP 206/359 or CIEP 350/327

School of Education Policies

All Education majors enroll each semester in the TLSC 300A (fall) and TLSC 300B (spring) section designed for their major. Reading minors majoring in Elementary Education enroll in a specialized section of the PLC. PLCs meet on three Monday evenings at the end of each semester, and fall/spring PLC credit is issued in the spring. Grades of "C-" or lower

in any course or module are not counted toward fulfillment of minor requirements. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites.

Required Illinois Testing

In order to be entitled by ISBE for the Reading Teacher endorsement, all minors must pass the Illinois Reading Teacher Content Exam (Exam 222) prior to graduation.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

Students who complete the Reading Teacher minor will:

- Demonstrate a knowledge of theories and instructional strategies to promote language and literacy learning in schools
- Reflectively critique and implement a variety of literacy curricula, analyzing how to meet the needs of all learners
- Evaluate evidence-based literacy instruction and reflect on the approaches that help students grow in literacy
- Understand, select, and utilize valid and appropriate assessment tools to screen, diagnose, and measure student literacy growth and performance, while reflectively using the data to make instructional decisions and evaluate interventions
- Evaluate, select, and use inclusive texts and culturally responsive curriculum and materials to support diversity and equity in the classroom, school, and community.
- Demonstrate effective literacy instruction in a variety of settings in the PK-12 range (dependent on certification range)

Secondary Education (BSEd)

Loyola's secondary education program is designed for undergraduates seeking to become licensed high school educators. Secondary Education pathways include both a secondary education major and a major in an additional content area (English, History, Mathematics, Political Science, or Psychology). To be a Science teacher, you can specialize in Biology, Chemistry, or Physics in our dual bachelor's/master's degree program (presently on hold).

All of Loyola's Bachelor of Science in Education (BSEd) students complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum. This approach emphasizes authentic practices in real classrooms. TLSC modules largely take place in school and community settings across the City of Chicago, and were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

Upon graduation, Secondary Education majors earn a BSEd in Secondary Education, and a BSEd or BA in their content area. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) in their secondary content area, as well as the English as a Second Language (ESL) endorsement and the International Baccalaureate (IB) certificate.

Curriculum

The order of the TLLSC curriculum is fixed; therefore we recommend that you refer to the Suggested Sequence of Classes tables (further down on this page) to locate the specific requirements of your major. The Curriculum table below provides general information about requirements for all Secondary Education majors.

Course Requirements

Your degree program as a Secondary Education major will include Core Curriculum, School of Education, and content area major courses. These requirements vary by major, and you should consult the Suggested Sequence of Classes table for your major's unique requirements. Each of these types of requirements is explained in the table below.

Code	Title	Hours
University Core courses		
Core requirements are typically met by taking 16 courses across ten central areas of knowledge and inquiry. Some Core requirements may be met by taking pre-approved courses within the Secondary Education major (e.g., ELPS 219 and ELPS 302). Certain Core requirements may be met by taking the courses in your content area major or through transfer credit. Consult the Suggested Sequence of Classes tables below to identify the Core requirements for each content area, and always consult with the SOE undergraduate advisor about which Core requirements apply to your major.		
Content area major courses		
These courses provide you with required foundational knowledge of the content area you plan to teach (e.g., mathematics, social sciences, English). Content area courses are usually offered through the College of Arts and Sciences and include students from other majors across the University. The specific required courses within your content area major (as well as any electives) are indicated in the Suggested Sequence of Classes tables below. Because of the strong concentration of this coursework in your content area, your content area major courses typically address not only degree and licensure requirements, but an area of the University Core as well. The SOE undergraduate advisor will guide you through these requirements.		
School of Education CIEP and ELPS Courses		
Education degree requirements include a small number of courses offered within the School of Education and designed for Education majors. At times, these courses address a specific University Core requirement; for example, all Secondary Education majors meet the Philosophical Tier 2 Core requirement by taking ELPS 302. Secondary English and Math majors must take ELPS 219 (Tier 2 Historical), and only Secondary English majors must take CIEP 350.		
CIEP 350	Adolescent Literature	3
ELPS 219	History of American Education	3
ELPS 302	Philosophy of Education	3
School of Education field-based TLSC modules		

TLSC modules must be taken in order and in established groups each semester, called Sequences. As you move through the three TLLSC Phases, you will gain extensive field experience, as well as knowledge and skills that will help you stand out from graduates of other teacher education programs. You will enter the field prepared to work in today's diverse classrooms with students of many backgrounds. The TLLSC secondary curriculum includes a one-year internship (TLSC 360, TLSC 370, TLSC 380) in a high school under the supervision of a licensed and experienced teacher in your content area in collaboration with a University Supervisor. You must also enroll in Professional Learning Communities (PLCs) each fall (TLSC 300A) and spring (TLSC 300B). In these PLCs, you will collaborate with the other students in your major and content area. PLCs are led by faculty experts in each content areas. To better understand how this curriculum will look over your four-year undergraduate experience, you should visit the Suggested Sequence of Classes table for your content area. TLSC modules are listed below in numerical order.

Phase One - Exploration		
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
TLSC 140	Teaching, Learning and Leading for Social Justice	1
TLSC 150	Constructive Learning Environments For Diverse Students	1
TLSC 160	Analyzing Culturally-Responsive Classroom Instruction	1
TLSC 210	Educational Policy For Diverse Students	2
TLSC 221	Individualized Instruction and Assessment for Diverse Learners [2]	2
TLSC 222	Authentic Assessment and Instruction for Bilingual Learners	2
TLSC 300A	Professional Learning Communities (Secondary Education majors must enroll each fall in the TLSC 300A section that corresponds with their major/content area. Fall/Spring PLC credit is issued in the spring. Students must enroll in PLCs every semester.) [1]	0
TLSC 300B	Professional Learning Communities (Secondary Education majors must enroll each spring in the TLSC 300B section that corresponds with their major/content area. Students must enroll in PLCs every semester.) [1]	1
Phase Two - Concentration		
Phase Two includes one full semester (usually the fourth) of content area coursework and no TLSC modules.		
TLSC 310	Language and Literacy for Diverse Students	2
TLSC 320	Using Classroom Data in a Collaborative Env to Advance Student Achievement	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2
TLSC 340	Teaching and Learning in an Area of Specialization	2
TLSC 350	Teaching and Learning with a Global Framework	4
Phase Three - Specialization		
TLSC 360	Developing Rigorous and Relevant Instruction & Assessment [3]	3
TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep [3]	3
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching [4]	12
Total Hours		**53**

1. This course is waived for students admitted into Track 2: 2+2 Transfer Program.
2. Students in the 2+2 Transfer Program take this course for 1 credit hour.
3. Students in the 2+2 Transfer Program for 2 credit hours.
4. Students in the 2+2 Transfer Program take this course for 8 credit hours.

Content Area Options

English Language Arts

Option 1: Double major in Secondary Education and English

You will graduate with two degrees: a BSEd in Secondary Education and B.A. in English (p. 393). This option meets requirements for state licensure. Upon graduation you will earn the Professional Educator License (PEL) in Secondary Education with an endorsement to teach secondary English. This option includes the English as a Second Language (ESL) endorsement and entitlement for the International Baccalaureate (IB) certificate. This option leaves little very room for coursework outside of your majors. You must take the English coursework required in that major and will likely not have time to take additional relevant courses. Completing these two degrees within four years is not guaranteed due to scheduling conflicts between extensive CAS English requirements and the Secondary Education pathway, and the possibility of needing to withdraw from and/or retake courses for any reason. Note that a dual degree may seem like a more attractive option to district administrators who are hiring English teachers for their schools. However, you will need to consider whether the requirements for (and restrictions of) the English degree align sufficiently with the key knowledge and skills you will need to support students' learning of the high school curriculum.

Option 2: Secondary Education major with a minor in English

If you pursue this option, you will graduate with a BSEd in Secondary Education with an English Minor (p. 396). This option meets requirements for state licensure. Upon graduation you will earn the Professional Educator License (PEL) in Secondary Education with an endorsement to teach secondary English. This option includes the English as a Second Language (ESL) endorsement and entitlement for the International Baccalaureate (IB) certificate. It is recommended that you take as many English courses as possible by the end of Sequence 4 (fourth semester), including completion of the minor requirement. You can take additional courses after this point. This option can be completed within four years. It enables you to take additional English (or other) courses during your four year pathway, and you can pursue other teaching endorsements if desired (see Section 3 on Endorsements for information about these requirements).

Courses for Minor: 18 or more hours of English courses, which you can select with your specialty area faculty's support and that of your SOE advisor. In order to qualify for the minor, four courses (12 hours) should be 300-level. Up to two courses may be drawn from UCLR-100E and advanced 200-level (ENGL 270 and above) courses.

Code	Title	Hours
Possible Courses for the English Minor:		
Up to two (2) courses can come from this list:		*6*
UCLR 100E	Interpreting Literature - English	

ENGL 271	Exploring Poetry	
ENGL 272	Exploring Drama	
ENGL 273	Exploring Fiction	
ENGL 274	Exploring Shakespeare	
ENGL 282	African-American Literature	
ENGL 282B	African-American Literature 1700-1900	
ENGL 282C	African-American Literature since 1900	
ENGL 283	Women in Literature	
ENGL 284	Asian American Literature	
ENGL 288	Nature in Literature	
ENGL 290	Human Values in Literature	
ENGL 292	South Asian Literature and Civilizations	
ENGL 293	Advanced Writing	
ENGL 294	Writing in/with New Media	
ENGL 295	Writing Toward Social Justice: Eloquentia Perfecta	
Four (4) courses should come from this list:		*12*
Some courses have prerequisites.		
ENGL 300	History of English Language [1]	
ENGL 303	Grammar: Principles & Pedagogy [1]	
ENGL 306	Studies in Women Writers	
ENGL 307	Topics in Feminist and Gender Studies	
ENGL 311	U.S. Latino/a Literature	
ENGL 312	Studies in World Literature in English	
ENGL 313	Border Literatures	
ENGL 315	South Asian Literatures in English	
ENGL 317	The Writing of Poetry [2]	
ENGL 318	The Writing of Fiction [2]	
ENGL 318R	The Writing of Fiction: Writing Rome [2]	
ENGL 319	Writing Creative Nonfiction [2]	
ENGL 320	English Literature: Medieval Period	
ENGL 321	Intro to Old English	
ENGL 322	Chaucer	
ENGL 323	Studies in Medieval Literature	
ENGL 325	British Literature-The Renaissance	
ENGL 326	Shakespeare: Selected Major Plays	
ENGL 327	Studies in Shakespeare	
ENGL 328	Studies in The Renaissance	
ENGL 329	Milton	
ENGL 335	British Literature - The Romantic Period	
ENGL 338	Studies in The Romantic Movmnt	
ENGL 340	British Literature - The Victorian Period	
ENGL 343	Studies in the Victorian Period	
ENGL 344	Studies in Modernism	
ENGL 345	British Literature Since 1900	
ENGL 348	Studies in British Literature Since 1900	
ENGL 350	Studies in Postmodernism	
ENGL 351	Contemporary Literature	
ENGL 354	Contemporary Critical Theory	
ENGL 355	Studies in Literary Criticism	
ENGL 357	Literature from a Writer's Perspective	
ENGL 361	Modernist Poetry	
ENGL 362	Studies in Poetry	
ENGL 363A	Major Author, Before 1700	
ENGL 363B	Major Author, 1700-1900	
ENGL 363C	Major Author, After 1900	
ENGL 367	Modern Drama	
ENGL 368	Studies in Drama	
ENGL 369A	Women in Drama Before 1700	
ENGL 371	The Modern Novel	
ENGL 372	Studies in Fiction	
ENGL 375	American Literature to 1865	
ENGL 376	American Literature 1865-1914	
ENGL 377	American Literature 1914-1945	
ENGL 379	Studies in American Literature	
ENGL 381	Comparative American Literature	
ENGL 382	Studies in American Culture	
ENGL 383	Theology and Literature	
ENGL 384	Studies in African American Literature	
ENGL 390	Advanced Seminar	
ENGL 399	Special Studies in Literature	
Total Hours		**18**

[1] Secondary Ed students strongly encouraged to take either ENGL 300 or ENGL 303.

[2] Secondary Ed students strongly encouraged to take a writing course.

Mathematics

Option 1: Double Major in Secondary Education and Math

You may prefer to complete both the Education and Mathematics degrees; this option also meets all requirements for IL educator licensure for teaching secondary math. You may need extra time beyond a typical four-year pathway to complete the requirements for both degrees. See suggested sequence below for a roadmap to the BSEd in Secondary Education and Mathematics (double major). SOE faculty and your Education advisor cannot guarantee that you will be able to complete all of these requirements within four years. Scheduling conflicts and extensive Mathematics BS (p. 517) requirements will likely necessitate adding a fifth year to your undergraduate program.

Option 2: Major in Secondary Education and a Minor in Math

You also have the option of completing a minor in Mathematics, which also meets all requirements for IL educator licensure for teaching secondary math. This option allows you to enroll in additional Mathematics courses that fit your interests and the needs of the high school math curriculum; select these courses under the guidance of math education faculty. To complete this option, you will complete the Secondary Education pathway and complete the College of Arts and Sciences requirements for a Mathematics Minor (p. 520). Note that Math Minor courses are prescribed by the Math Department in the College of Arts and Sciences, whereas the endorsement option (option three) allows you greater flexibility to craft and individualized pathway to building your expertise. Where you have room in your four-year plan, it is recommended that you enroll in additional relevant Mathematics courses.

Code	Title	Hours
Required Courses		
MATH 161	Calculus I	4
MATH 162	Calculus II	4
MATH 263	Multivariable Calculus	4

Select one of the following three options:		6
MATH 212 & MATH 264	Linear Algebra and Ordinary Differential Equations	
MATH 201 & MATH 264	Introduction to Discrete Mathematics & Number Theory and Ordinary Differential Equations	
MATH 201 & MATH 266	Introduction to Discrete Mathematics & Number Theory and Differential Equations and Linear Algebra	
Any 300-level Mathematics course		3
MATH 301	History of Mathematics	
MATH 304	Introduction to Probability	
MATH 305	Introduction to Mathematical Statistics	
MATH 309	Numerical Methods	
MATH 313	Abstract Algebra	
MATH 314	Advanced Topics Abstract Algebra	
MATH 315	Advanced Topics in Linear Algebra	
MATH 318	Combinatorics	
MATH 320	Mathematical Logic	
MATH 322	Advanced Number Theory	
MATH 328	Algebraic Coding Theory	
MATH 331	Cryptography	
MATH 344	Geometry	
MATH 345	Introduction to Financial Mathematics Derivatives	
MATH 351	Introduction to Real Analysis I	
MATH 352	Introduction to Real Analysis II	
MATH 353	Introduction to Complex Analysis	
MATH 355	Methods of Applied Mathematics	
MATH 356	Introduction to Mathematical Modeling	
MATH 358	Introduction to Optimization	
MATH 360	Introduction to Game Theory	
MATH 365	Introduction to Partial Differential Equations	
MATH 366	Applied Dynamical Systems	
MATH 376	Formal Language & Automata	
MATH 386	Introduction to Topology	
Total Hours		**21**

Option 3: Math Concentration Option

To ensure that you complete your educator preparation program within four years, we recommend that you select 18 hours of Math courses with the assistance of the math education faculty member in the School of Education (Dr. Barcus) and your SOE Advisor. Teaching high school math requires a minimum of 18 hours of Math courses and meets the requirements for IL educator licensure in secondary math. This option allows you to enroll in additional Mathematics courses that fit your interests and the needs of the high school math curriculum; select these courses under the guidance of math education faculty. Where you have room in your four-year plan, it is recommended that you enroll in additional relevant Mathematics courses. Students have flexibility to choose Math courses that align with their educational interests. Faculty Advisors should be consulted before registration as they can help shape your interests with course selection.

Students may choose from the options in the below list, but other available courses might be used with consultation from the math education faculty. All courses have prerequisites that will need to be completed before registration.

Code	Title	Hours
Six (6) MATH Courses		**18**
MATH 161	Calculus I	
MATH 162	Calculus II	
MATH 201	Introduction to Discrete Mathematics & Number Theory	
MATH 212	Linear Algebra	
MATH 263	Multivariable Calculus

MATH 358	Introduction to Optimization	
MATH 360	Introduction to Game Theory	
MATH 365	Introduction to Partial Differential Equations	
MATH 366	Applied Dynamical Systems	
MATH 376	Formal Language & Automata	
MATH 386	Introduction to Topology	
Total Hours		**18**

Social Studies

Option 1: Double Major in Secondary Education and either History or Political Science

You may prefer to complete both the Secondary Education and History BA (p. 492), OR Secondary Education and Political Science BA (p. 619) degrees; this option meets all requirements for IL educator licensure for teaching secondary history or political science. You may need extra time beyond a typical four-year pathway to complete the requirements for both degrees. SOE faculty and your Education advisor cannot guarantee that you will be able to complete all of these requirements within four years. Double major programs are the result of collaboration between the School of Education and the History Department in the College of Arts and Sciences. These programs provide the deep content area knowledge in these areas that is necessary to serve as an effective educator.

Option 2: Secondary Education Major with Content Area Minor Programs

If you are interested in teaching in the following areas, you may add a minor in the appropriate content area. Your resulting IL licensure will be the same as in dual major options, except that you will earn an endorsement only in the content area(s) of your choice. If you are in a dual major program, you can add one of these minors as well, provided you are willing to add a year to your undergraduate pathway. Additional endorsements require only the corresponding minor and no additional degree.

Secondary Education and Anthropology: BSEd in Secondary Education, Anthropology Minor (p. 264)

Code	Title	Hours
A minor in anthropology consists of 15 credits		
Two (2) ANTH 100, 200, or 300 level course		6
Three (3) ANTH 200 or 300 level course		9
Possible Courses (Some courses have prerequisites):		
ANTH 100	Globalization and Local Cultures	
ANTH 101	Human Origins	
ANTH 102	Culture, Society, and Diversity	
ANTH 103	Biological Background Human Social Behavior	
ANTH 104	The Human Ecological Footprint	
ANTH 105	Human Biocultural Diversity	
ANTH 106	Sex, Science and Anthropological Inquiry	
ANTH 107	Ancient Worlds	
ANTH 203	Violence, Social Suffering, and Justice	
ANTH 205	Gender in Cross-Cultural Perspective	
ANTH 207	Economies, Culture, and Development	
ANTH 208	Language and Identity	
ANTH 210	Visual Representation of Culture	
ANTH 211	Peoples of Latin America	
ANTH 212	Peoples of Native North America

ANTH 366	Lithic Technology	
ANTH 375	Archaeology of Early Greece	
Total Hours		**15**

Secondary Education and Psychology: BSED in Secondary Education, Psychology Minor (p. 632)

A total of 6 psychology courses (18 credit hours) are required for the Psychology Minor. Students must take 101, and 5 additional psychology courses. Courses may be any 200 (except PSYC 201) or 300 level psychology courses or NEUR 101.Three courses of the minor can be fulfilled with courses transferred into Loyola. Some courses have prerequisites.

Code	Title	Hours
Required Course		
PSYC 101	General Psychology	3
Five (5) PSYC 200 or 300 level courses or NEUR 101		15
Possible Courses:		
NEUR 101	Introduction to Neuroscience	
PSYC 235	Psychology of Human Sexuality	
PSYC 237	Cross-Cultural Psychology	
PSYC 238	Psychology of Gender	
PSYC 239	Understanding Bias and Inclusivity	
PSYC 250	Cognitive Psychology	
PSYC 251	Learning and Memory	
PSYC 273	Developmental Psychology	

PSYC 274	Lifespan Development
PSYC 276	Philosophy of Mind
PSYC 280	Psychology of Judgment and Decision-Making
PSYC 307	Psychology of Language
PSYC 311	Lab in Psychobiology
PSYC 312	Lab in Cognitive Neuroscience
PSYC 314	Lab in Experimental Psychology: Cognition
PSYC 315	Lab in Tests & Measurements
PSYC 316	Lab in Experimental Psychology: Sense & Perception
PSYC 318	Lab in Developmental Psychology
PSYC 321	Laboratory-Social Psychology
PSYC 327	Lab on Body Image
PSYC 332	Affective Neuroscience
PSYC 340	Psychology of Women
PSYC 348	Psychology of Adolescence
PSYC 349	Maturity and Aging
PSYC 350	Developmental Cognitive Neuroscience
PSYC 352	Neuropsychology
PSYC 355	Neuroethics
PSYC 360	Understanding Prejudice
PSYC 362	Industrial/Organizational Psychology
PSYC 368	Counseling
PSYC 371	Psychology of Political Behavior
PSYC 372	Psychology & Law
PSYC 373	Health Psychology
PSYC 374	Community Psychology
PSYC 375	Psychology of Addiction
PSYC 376	Psychology of Religion
PSYC 377	Psychology of Music
PSYC 378	Drugs and Behavior
PSYC 386	Psychology Seminar: Selected Topics
PSYC 387	Seminar in Behavorial and Cognitive Neurosciences
PSYC 390	Internship in Psychology
PSYC 397	Independent Research
PSYC 399	Special Studies in Psychology
Total Hours	**18**

Secondary Education and Sociology: BSEd in Secondary Education, Sociology Minor (p. 647)

Students may earn a minor in Sociology by completing five courses in Sociology in addition to SOCL 101 Society in a Global Age (or its equivalent). Students who minor in Sociology are advised to choose electives with some focus in mind (e.g., health in society, social justice in society, urban problems and policies). Only one semester of SOCL 380 and one 100-level course in addition to SOCL 101 (or its equivalent) can count for the minor. In completing minor requirements, only three courses (nine semester credit hours) will be accepted in transfer from other colleges and universities.

Code	Title	Hours
Required Course		
Elective Courses		15
List of possible courses:		
SOCL 121	Social Problems	
SOCL 122	Race and Ethnic Relations	
SOCL 123	Mass Media and Popular Culture	
SOCL 125	Chicago: Urban Metropolis	
SOCL 127	Social Analysis and Social Action	
SOCL 145	Religion & Society	
SOCL 171	Sociology of Sex and Gender	
SOCL 205	Sociological Thought	
SOCL 206	Principles of Social Research	
SOCL 210	Gender and Work	
SOCL 215	Law & Society	
SOCL 216	The Sociology of Violence	
SOCL 221	Sociology and Culture of the Life Course	
SOCL 222	Poverty & Welfare in America	
SOCL 225	Sociology of Health Care	
SOCL 226	Science, Technology, & Society	
SOCL 228	Sociology of the African American Experience	
SOCL 230	Self & Society	
SOCL 231	Childhood and Society	
SOCL 234	City, Suburbs & Beyond	
SOCL 235	Communities in a Global Age	
SOCL 236	Population Studies	
SOCL 237	Professions and Society	
SOCL 239	Understanding Bias and Inclusivity	
SOCL 240	Families	
SOCL 245	Sociology of Education	
SOCL 247	Sociology of Culture	
SOCL 250	Inequality in Society	
SOCL 252	Global Inequalities	
SOCL 254	Sociology of Migration	
SOCL 255	Deviance and Social Control	
SOCL 258	Confronting Homelessness: Local to Global	
SOCL 260	Power in Society	
SOCL 261	Social Movements & Social Change	
SOCL 265	Globalization & Society	
SOCL 267	Italy Today	
SOCL 272	Environmental Sociology	
SOCL 276	The Sociology and Politics of Food	
SOCL 278	Global Health	
SOCL 280	Topics in Contemporary Sociology	
SOCL 281	Current Issues in Medical Education	
SOCL 301	Statistics for Social Research	
SOCL 302	Qualitative Research	
SOCL 304	Global Civil Society and Social Movements	
SOCL 306	International Development	
SOCL 311	Social Science Research Practicum: Cook County Community Survey	
SOCL 334	Latinas/os/xs in Space	
SOCL 335	Urban Semester Seminar	
SOCL 365	Social Theory & Social Research	
SOCL 370	Undergrad Seminar-Special Topics	
SOCL 101	Society in a Global Age	3

Science

Option 1: Double Major in Secondary Education and a Science (Biology (p. 285), Chemistry (p. 304), Physics (p. 598), or Environmental Science (https://catalog.luc.edu/undergraduate/environmental-sustainability/environmental-science/environmental-science-bs/))

You may prefer to complete both the Education and science degrees; this option also meets all requirements for IL educator licensure for teaching secondary science. You will likely need extra time beyond a typical four-year pathway to complete the requirements for both degrees. SOE faculty and your Education advisor cannot guarantee that you will be able to complete all of these requirements within four years. Scheduling conflicts and extensive science BS requirements will likely necessitate adding a fifth year to your undergraduate program.

Option 2: Major in Secondary Education and a Minor in one of the Sciences

You also have the option of completing a minor in one of the sciences listed below, which also meets all requirements for IL educator licensure for teaching secondary science. This option allows you to enroll in additional science courses that fit your interests and the needs of the high school curriculum; select these courses under the guidance of science education faculty. To complete this option, you will complete the Secondary Education pathway and complete the College of Arts and Sciences requirements for a science minor in an area listed below. Where you have room in your four-year plan, it is recommended that you enroll in additional relevant science courses. NOTE: All Science candidates should also take TLSC 231 to add middle grades endorsement as well. **NOTE: Some of these courses have prerequisites

Secondary Education and Environmental Science: BSEd in Secondary Education, Environmental Science Minor (https://catalog.luc.edu/undergraduate/environmental-sustainability/environmental-science/environmental-science-minor/)

The Environmental Science Minor would be eligible ONLY if the student selects 18 hours (6 courses) from the ENVIRONMENTAL/ECOLOGICAL SCIENCE list. This would go above the 4 courses that the minor requires but would get students to the 18 credit hours required by ISBE for a secondary endorsement. Alternatively, someone could do the Environmental Science Minor as stated and pursue the middle grades science licensure. In order to meet licensure requirements and minor requirements, students would have to complete 27 credit hours, the requirements for the minor and two additional courses in the Environmental/Ecological Science list.

Possible courses:

Code	Title	Hours
ENVS 207	Plants and Civilization	3
ENVS 218	Biodiversity & Biogeography	3
ENVS 223	Soil Ecology	3
ENVS 224	Climate & Climate Change	3
ENVS 226	Science & Conservation of Freshwater Ecosystems	3
ENVS 237	Foundations of Environmental Chemistry	3
ENVS 267	Bird Conservation and Ecology	3
ENVS 273	Energy and the Environment	3
ENVS 283	Environmental Sustainability	3

Secondary Education and Biology: BSEd in Secondary Education, Biology Minor (p. 289)

Students take the basic lecture and laboratory biology courses with the Biology majors, as well as a limited number of biology electives. Students may satisfy requirements for a minor concentration in biology by completing a minimum of 24 credit hours of biology with grades of "C-" or better with an overall minor GPA of 2.0 or higher. The minor in biology requires 24 credit hours including 17 credit hours of required biology courses and seven credit hours of biology electives.

Code	Title	Hours
Required Courses		
BIOL 101	General Biology I	3

MATH 263	Multivariable Calculus	4
Total Hours		**30**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Track 1: Traditional 4-Year Program

Course	Title	Hours
Freshman		
Fall		
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
TLSC 300A	Professional Learning Communities	0
	Hours	**4**
Spring		
TLSC 140	Teaching, Learning and Leading for Social Justice	1
TLSC 150	Constructive Learning Environments For Diverse Students	1
TLSC 160	Analyzing Culturally-Responsive Classroom Instruction	1
TLSC 300B	Professional Learning Communities	1
	Hours	**4**
Sophomore		
Fall		
CIEP 350	Adolescent Literature	3
ELPS 219	History of American Education	3
TLSC 210	Educational Policy For Diverse Students	2
TLSC 221	Individualized Instruction and Assessment for Diverse Learners	2
TLSC 222	Authentic Assessment and Instruction for Bilingual Learners	2
TLSC 300A	Professional Learning Communities	0
	Hours	**12**
Spring		
TLSC 300B	Professional Learning Communities	1
	Hours	**0**
Junior		
Fall

	Hours	**12**
	Total Hours	**45**

School of Education Requirements

Each Undergraduate student in the School of Education must complete all degree requirements with a grade of C or better in order to meet degree requirements. They must also enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC field-based learning modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to be entitled for the Illinois State Professional Educator License (PEL), students must also pass the Illinois licensure test(s) for their secondary content area prior to their final internship semester. Information about licensure tests will be provided by teacher education faculty.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- After the first three semesters of the program, candidates will articulate and apply principles of social justice and theories of learning to critically reflect upon their own identities and emerging teaching practices in middle and high schools.
- After the first three semesters of the program, candidates will analyze educational policies to suggest instructional practices that support individual students in equitably accessing curriculum and instruction in middle and high schools.
- After the first six semesters of the program, candidates will analyze assessment data and curriculum to make instructional decisions to support adolescent students' disciplinary learning, language development, and social-emotional well-being.
- After the first six semesters of the program, candidates will design instruction that articulates clear disciplinary learning goals, aligned assessments, and engaging instruction in response to adolescent students' backgrounds, abilities, and needs.
- By program completion, candidates will use culturally and linguistically responsive teaching strategies to create inclusive learning environments in content-specific secondary settings that promote adolescent student engagement, motivation, and participation.
- By program completion, candidates will demonstrate content and pedagogical knowledge by developing and delivering content-specific instruction (e.g., history, biology, English) that accurately represents disciplinary concepts and supports student understanding.
- By program completion, candidates will reflect on middle and high school teaching practice using evidence of student learning to identify areas for instructional adjustments, stakeholder collaboration, and professional development.

Special Education (BSEd)

The BSEd in Special Education is designed for students who seek to become licensed educators of children with disabilities. The SPED major emphasizes skills and strategies to support students with a variety of academic, social, and behavioral needs, from ages 3 to 21. Preparation focuses on knowledge and skills to create supports and programming that prevent special education students from being overlooked or falling behind and enable them to develop to their fullest potential.

All of Loyola's Bachelor of Science in Education (BSEd) majors complete the Teaching, Learning, and Leading with Schools and Communities (TLLSC) curriculum. This unique, research-based approach emphasizes authentic practices in field-based learning experiences in K-12 school and community settings. These modules were designed with four Cornerstones in mind—partnering with schools and communities, classroom diversity, ongoing classroom experience, and participating in professional learning communities.

Upon program completion, Special Education majors earn a BSEd in Special Education. They are eligible for the Illinois State Board of Education Professional Educator License (PEL) in Special Education (ages 3 to 21), as well as the English as Second Language (ESL) endorsement. By adding two courses to their pathway, SPED majors can also be entitled for an endorsement to teach Elementary Education

(grades 1 through 6), enabling them to work as both a special education and elementary education teacher.

Related Programs

Minor

- Special Education Minor (p. 931)

Curriculum

The Special Education (SPED) major includes Core Curriculum and School of Education courses. In addition, all Education majors complete field-based learning modules carrying a TLSC prefix. Each of these types of requirements is explained in the table below. SPED-specific sections begin in Phase Two of the program. Consult the SOE undergraduate advisor and the Suggested Sequence of Classes table for the specific requirements of the SPED major.

Course Requirements

Code	Title	Hours
University Core Courses		
University Core requirements are typically met by taking 16 courses across ten central areas of knowledge and inquiry. Some Core requirements are met by taking pre-approved courses within the School of Education: CIEP 104 (Quantitative), CIEP 206 (Tier 2 Literacy), ELPS 219 (Tier 2 Historical) and ELPS 302 (Tier 2 Philosophical). Consult the SOE undergraduate advisor and Suggested Sequence of Classes table to identify Core requirements that apply to each student's pathway.		
School of Education CIEP and ELPS courses		
Education degree requirements include a number of courses offered within the School of Education and designed for all Education majors. At times, these courses will also address a specific portion of the Core (CIEP 104, CIEP 206, ELPS 219, ELPS 302). CIEP 332 is a course designed specifically for SPED majors.		
CIEP 104	Mathematics for Teachers I	3
CIEP 206	Children's Literature	3
CIEP 332	School Wide Applications	3
CIEP 359	Teaching Reading	3
ELPS 219	History of American Education	3
ELPS 302	Philosophy of Education	3
School of Education field-based TLSC modules		
TLSC modules must be taken in order and in established groups (called Sequences) each semester. As students move through the TLLSC Phases, they gain extensive field experience, as well as knowledge and skills to effectively support children with disabilities across the continuum from elementary age to adulthood. Specialized modules for SPED majors begin with TLSC 260. The TLLSC curriculum includes a one-year internship (TLSC 360, TLSC 370, TLSC 380) in a special education classroom under the supervision of a licensed and experienced teacher and University supervisor. In addition, students must enroll in Professional Learning Communities (PLCs) each fall (TLSC 300A) and spring (TLSC 300B) and collaborate with the others in the major. PLCs are led by a faculty member with expertise in special education. Consult the SOE undergraduate advisor and visit the Suggested Sequence of Classes tables to learn more about the four-year SPED curriculum.		
Phase One - Exploration		
TLSC 110	The Profession and Our Program (TLLSC)	1
TLSC 120	Bringing Language, Learning & Development Theory into Practice	2
TLSC 130	Sequence One: 130 Community Immersion	1
TLSC 140	Teaching, Learning and Leading for Social Justice	1

TLSC 320	Using Classroom Data in a Collaborative Env to Advance Student Achievement	2
TLSC 330	Discipline-Specific Literacy for Diverse Students	2
TLSC 340	Teaching and Learning in an Area of Specialization	2
TLSC 350	Teaching and Learning with a Global Framework	4
Phase Three - Specialization		
TLSC 360	Developing Rigorous and Relevant Instruction & Assessment	3
TLSC 370	Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep	3
TLSC 380	Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching	12
Total Hours		**73**

Optional Endorsement Pathways

Students can take additional coursework to add optional endorsements beyond the Special Education licensure. Students should consult with their advisor if there is interest in additional endorsements such as Elementary Education or Secondary Education, among other options.

Suggested Sequence of Courses

This sequence of courses is meant to be used as a suggested path for completing coursework. SPED majors must consult their SOE advisor for assistance with course selection and to ensure that all Education degree requirements are met. Note that TLSC modules must be taken in a prescribed order. Students must complete each sequence before moving

on to the next. Major-specific CIEP courses are linked to a sequence and must be taken within that semester.

Standard 4-Year Program

Course	Title	Hours
Sequence 1		
TLSC 300A	Professional Learning Communities (SPED)	0

[1] Student takes 6 credit hours of TLSC 380 in Spring and 6 credit hours of TLSC 380 in Summer.

School of Education Requirements

Undergraduate students in the School of Education must complete all degree requirements with a grade of C or better in order to graduate and be entitled for the Illinois State Professional Educator License (PEL). They must also enroll in and pass PLCs each semester. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to be entitled for the Illinois State Professional Educator License (PEL), students must pass the Special Education licensure exam prior to their final internship semester.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Design differentiated instruction for diverse learning needs, including multilingual learners and students with disabilities, that center students' funds of knowledge.
- Utilize data from a variety of assessments to guide instructional decision making and to monitor and support students' learning.
- Explain major theories of learning and development and apply them to instructional planning.
- Develop content specific instructional methods that also support the literacy knowledge and learning needed in each individualized discipline.

Special Education Minor

A program for Education majors that prepares you to serve the needs of all students and qualify for an endorsement in special education on Illinois Professional Educator License (PEL). Illinois refers to this endorsement as the Learning Behavior Specialist – 1 (LBS-1).

There is a nationwide shortage of special education teachers, at a time when students with different academic, behavioral, and social needs are

often overlooked or fall behind. Adding a special education minor to your education major can help you address this important need in the field.

Related Programs

Major

- Special Education (BSEd) (p. 928)

Curriculum

This minor is open only to Education majors. Note that while this minor includes 40 total hours, most of these are already included in the Education major.

	Total Hours	**40**

School of Education Requirements

Grades of "C-" or lower are not counted toward fulfillment of minor requirements. In order to enroll in TLSC modules, all students must complete required documentation procedures, including background checks, at designated points in their pathway and as required by field sites. TLSC modules address the University requirement for Engaged Learning.

Licensure Requirements

In order to apply for the Learning Behavior Specialist 1 endorsement, candidates must pass the Illinois Learning Behavior Specialist I Content

Area Test (#290). It is recommended that students pass this before beginning their final internship semester.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

A candidate who completes the Special Education minor will have:

- A Comprehensive Understanding of Special Education: Candidates grasp diverse instructional strategies, cultural influences, and collaboration techniques to address individual learning needs of students with disabilities.
- Proficient Assessment and Planning Skills: Candidates proficiently administer assessments, interpret results, and develop personalized education plans while adhering to ethical standards and staying abreast of research-based practices.
- Effective Collaboration and Professionalism: Candidates foster inclusive partnerships, navigate cultural differences, and engage in reflective practice to continually enhance teaching methods while advocating for social justice in education.
- Leadership and Advocacy for Exceptional Needs: Candidates demonstrate leadership in implementing school-wide initiatives, promoting positive behavior, and advocating ethically for appropriate services to maximize the potential of individuals with disabilities.

Teaching and Learning Minor

The Teaching and Learning minor provides access to foundational field-based learning experiences in our undergraduate teacher education program to students in other majors who are interested in schooling and in working with teachers, educators, and/or families but who do not intend to work as classroom teachers themselves. The minor will also provide foundational learning experiences for non-Education majors who are interested in substitute teaching, and it includes electives allowing students to specialize in areas of interest in education, as well as internships and other experiences that are tailored to those interests.

CIEP 105	Mathematics for Teachers II	3
CIEP 206	Children's Literature [2]	3
CIEP 359	Teaching Reading	3
Other Electives		
ELPS 219	History of American Education	3

[1] Students pursuing the Teaching and Learning Minor (in particular, those who select the museum education interest area) have the option

of taking this internship twice if they choose to. They are not required to do so and may enroll in other elective courses instead if desired.

2 Must be taken concurrently in the same sequence with Sequence 2.

3 Fall (Secondary), Spring (Middle Grades)

4 These two modules must be taken concurrently (in a single semester) for a total of four (4) credit hours.

5 Must take TLSC 300A in the Fall and TLSC 300B in the Spring in a single academic year.

Residency Requirement

At least half of minor hours must be completed at LUC and may not transferred in. Any potential transfer hours are reviewed by the T&L program chair.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Students interested in a profession that requires educating others or providing professional development will learn principles and strategies of effective educational systems and strategies for working with diverse children, families and communities.
- Students will participate in alternative experiences in a variety of educational settings, including multiple site visits to a variety of schools or internships that are missing from many related LUC majors, even in cases where graduates will go on to do work that relates to or intersects with that of schools.
- Undergraduates will be better prepared for roles as short-term substitute teachers under recent ISBE guidelines with a better foundational and pedagogical knowledge than those who apply for that license with no background or coursework in education.

School of Environmental Sustainability

Our Mission

The mission of Loyola University Chicago's School of Environmental Sustainability (SES) is to engage students in understanding and responding to local and global environmental issues by:

- Delivering Core environmental science courses to raise awareness and action in all LUC undergraduates,
- Preparing SES baccalaureate and graduate students for socially responsible professions in environmental science, policy, education, business, and health, and
- Advancing our knowledge of environmental problems and developing solutions through original research and community outreach.

The SES strives to advance sustainability in operations across all university campuses and to:

- Develop an environmentally conscious culture throughout the university.
- Advance the University's mission of seeking God in all things
- Work to expand knowledge in the service of humanity through learning, justice, and faith
- Provide a rich and transformative educational experience grounded in teaching and research excellence
- Promote experiential learning, and student entrepreneurial action in the service of nature, humanity, and the planet

Our Sustainability Mission

Sustainability at Loyola is driven by our Jesuit tradition of social justice, our service to humanity, and our role as an institution of higher education. It is embodied in an educational experience for our students and activities that seek to meet the needs of the present generation without compromising the ability of future generations to meet their own needs. We are committed to an inclusive process considering social, economic, and environmental impacts and exemplified in a transformative education for our students.

Our Commitment to Racial and Social Justice

We acknowledge that the multi-century legacy of racism against people of color -- particularly against those who are Black, Indigenous, Latinx, and Asian -- pervades environmentalism, where White voices and agendas continue to dominate. Environmentalist doctrines have been – and continue to be – used to justify eugenics, genocide, and the displacement of indigenous people from their ancestral homelands.

We affirm that social justice and ecological justice are both integral to achieving sustainability. We commit ourselves to deep reflection on the many ways that we as individuals are socialized into white supremacy and that our organizational culture, policies, and practices reflect it. This intentional process of study will enable us to identify the changes required of IES as we move towards becoming an anti-racist, multicultural organization that advances racial, social, and environmental justice through our teaching, research, and service.

Undergraduate Programs

- Environmental Action and Leadership Minor (p. 947)
- Environmental Economics & Sustainability: Governance (BA) (p. 948)
- Environmental Economics & Sustainability: Management (BA) (p. 950)
- Environmental Economics and Sustainability Minor (p. 951)
- Environmental Policy (BA) (p. 952)
- Environmental Science (BS) (p. 955)
- Environmental Science Minor (p. 960)
- Environmental Studies (BA) (p. 961)
- Food Systems and Sustainable Agriculture Minor (p. 964)

Curriculum Overview

The School of Environmental Sustainability offers four undergraduate degree programs. These include a BS in Environmental Science and BAs in Environmental Policy, Environmental Studies, and Environmental Economics and Sustainability.

Students in the Environmental Economics and Sustainability BA program can choose a concentration in either Governance or Management. Students in the Environmental Science BS program may select an optional concentration. Those who do not select a concentration will have greater latitude in their elective choices, making this a good option for those seeking a more flexible course of study. BS students who wish to deepen their knowledge of a specific subject can choose a concentration in Conservation and Restoration Ecology or Climate and Energy.

Environmental problems are multifaceted and require a multidisciplinary approach. As such, all SES majors share ten common environmental courses, including an introduction to environmental science, environmental statistics, ecology with a lab, environmental or ecological economics, environmental politics, environmental justice or ethics, environmental careers, an engaged learning experience, and a capstone experience.

SES students have access to enriching hands-on opportunities through independent faculty-mentored research, internships within SES or with external internship partners, and a diversity of engaged learning course options. Students can also participate in hands-on learning at the Loyola University Retreat and Ecology Campus (LUREC). Opportunities at LUREC include three-week for-credit courses at the end of May, workshop weekends, and volunteer habitat restoration activities. There are also many fun and engaging student clubs that offer rewarding experiences advancing sustainability on campus and in the community.

Students wishing to add an SES minor can apply 9 of 21 credits needed for the minors in Environmental Action and Leadership, Environmental Science, or Food Systems and Sustainable Agriculture toward both their SES major and the minor. Students minoring in Sustainability Management, administered by the Quinlan School of Business, can share 6 of the 18 credits required for either of those minors with their SES major.

Shared Core Courses

Code	Title	Hours
ENVS 137	Foundations of Environmental Science I	3
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 203	Environmental Statistics	3
ENVS 280	Principles of Ecology	3
ENVS 286	Principles of Ecology Lab	1
or ENVS 286S	Principles of Ecology Lab	
Justice & Ethics Choice		3
ENVS 335	Ecological Economics	3
or ECON 328	Environmental Economics	
PLSC 392	Environmental Politics	3
Engaged Learning Choice		3
Capstone Choice		3

Double-Dipping Policy

1. SES students may not major and minor in the same discipline.
2. Majors: No fewer than 15 credit hours in the individual student's transcript must be unique to each major; that is, the courses in question are considered as actually fulfilling requirements of one major, not of more than one major.
3. Minors and interdisciplinary minors: no fewer than 8 credit hours in the individual student's transcript must be unique to each minor; that is, the courses in question are considered as actually fulfilling requirements of one minor, not of more than one minor or major.

Writing Requirement

SES students must complete two writing intensive courses. UCWR 110 Writing Responsibly must be taken in the first year and must be completed with a grade of "C-" or better before any writing-intensive section may be taken. Please note that these two courses cannot be taken simultaneously. Students who transfer in more than 60 credit hours are waived from one writing intensive course.

Language Competency Requirement

Competency at the 102-level or higher in reading, writing, and speaking a language other than English is required of all SES students. This requirement can be met by:

1. Passing (C- or higher) a 102-level or higher course in a language other than English.
2. Obtaining a waiver through Advanced Placement examination. A passing AP score does not earn course credit, but waives a student from the Foreign Language requirement of SES.

3. Demonstrating language competency by passing a 102-level (or above) language competency exam. Schedule a competency exam with the Department of Modern Languages and Literatures online: https://www.luc.edu/modernlang/placementcompetency/foreignlanguagecompetencyexam/.

Academic Advising

All junior, senior, and transfer students will be advised by the SES. First and Second Year students will be advised by First and Second Year Advising (FSYA). Eligible students can declare or drop a major or minor in LOCUS. Students who want to switch to SES from another school at Loyola (or vice versa) must apply for an internal transfer.

Graduation and Commencement

SES students who have earned at least 85 credit hours are eligible to apply for graduation. To be eligible to graduate, you must complete a Graduation Application. The application is available online through LOCUS. Early application ensures that you will receive an audit of your remaining degree requirements prior to enrolling in your final semester's classes. When you submit your application, you initiate an "audit" of your Core, major, minor, and school requirements by your SES academic advisor. Your advisor will e-mail you a copy of the graduation degree audit, which details your remaining requirements for graduation. You may also choose to schedule an appointment to review your remaining requirements with your academic advisor. Deadlines for graduation applications are as follows:
Fall (December) Graduation = applications due by March 1
Spring (May) Graduation = applications due by October 1
Summer (August) Graduation = applications due by October 1
Students who do not apply by the application deadline must contact their academic advisor for a late application form.

Students earning 60 or more graded Loyola credits are eligible to graduate with laudatory honors. This outstanding accomplishment will be noted on the student's diploma and official transcript. Note: GPA is not rounded up for laudatory honors. Students who are eligible for Commencement will receive an invitation to participate in the ceremony. Commencement ceremonies are held only in May. Students who complete their degrees in December, May, or August may participate in the May ceremony if they wish.

University Policies

Please see University Policies for academic policies that supersede those of academic units within the University

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Environmental Science (ENVS)

ENVS 101 The Scientific Basis of Environmental Issues (3 Credit Hours)
The foundational course in science is predicated on the view that understanding environmental issues and their underlying scientific principles will occupy a central role in our students' lives and will be critical in their development as informed and participating members of society. The overarching strategy of the course will be to frame environmental science in terms of a series of interacting systems to allow students to analyze a variety of environmental issues. This is a foundational Tier I class; it is prerequisite to all Tier II science core classes.
Knowledge Area: Foundational Scientific Knowledge
Course equivalencies: ENVS 101 / ACISC 101 / ENVS137
Outcomes:
1) Describe scientific principles underlying the causes, consequences, and approaches to mitigation of ongoing environmental crises related to biodiversity, water, agriculture, energy, and climate change; 2) Apply the scientific method to collect, analyze, and interpret data relevant to biodiversity, water, agriculture, energy, and climate change and other scientific topics encountered in their lives; 3) Assess the accuracy of scientific information in different contexts and communicate it effectively to different audiences; 4) Understand sustainability and environmental solutions through an integral ecology lens

ENVS 137 Foundations of Environmental Science I (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Environmental Sustainability major and minor programs
This course will introduce concepts that form the basis of environmental science, including elemental cycling, energy flow/transformation, and the interconnectivity among atmosphere, lithosphere, hydrosphere and biosphere, and within ecosystems. Ways in which knowledge of these concepts informs policy, management and social perception to produce positive change will also be examined.
Course equivalencies: ENVS 101 / ACISC 101 / ENVS137
Outcomes:
Recognize interconnections among scientific disciplines and how their principles are used to investigate and address environmental issues; Understand physical, chemical, and ecological principles underlying environmental science and how these interact

ENVS 200 Environmental Careers and Professional Skills (1 Credit Hour)
Pre-requisites: ENVS 101 or ENVS 137; Restricted to Majors and Minors in the School of Environmental Sustainability at the Sophomore level or above
Introduction to environmental professions and determining skills and individual traits best suited for professions in policy, science, business, community organizing, etc. Begin developing a professional network.
Outcomes:
Select appropriate internships, curriculum, projects to enhance knowledge, skills and experience; develop job hunting and communication skills specific to environmental fields, including resumes, cover letters, presentations

ENVS 203 Environmental Statistics (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability
This course introduces basic statistics from probability through multiple regression, employing computer programs with ecological, environmental, and relevant social science examples and data sets.
Outcomes:
Programming/spreadsheet skills; data structure practices and diagnosis; data visualization; appropriate test selection; test execution and interpretation; introduction to qualitative data analysis

ENVS 204 Gender, Health & Environment (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Exploration of connections between social justice and environmental health using scientific tools of analysis. Focus on experiences of those at intersection of marginalized social locations. Issues include impacts of modern disposable culture and how socially constructed gender roles affect exposure to environmental health risks while biological sex shapes their impacts.
Interdisciplinary Option: Bioethics
Outcomes:
Understanding the web of causality (relationships among scientific, medical, ecological, cultural, behavioral, economic, political, and ethical dimensions) of environmental health problems and how to ameliorate the disproportionate burden of risk

ENVS 207 Plants and Civilization (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Examines the structure, function, ecology, and diversity of plants, their importance to human civilization, and the impact of societal decisions regarding their use and exploitation.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will demonstrate an understanding of the critical role of plants in the biosphere, their physiological processes, adaptations for specialization, and linkages to humans including agriculture, pest control, and extraction/use of plant-derived products

ENVS 215 Ornithology (3 Credit Hours)
Pre-requisites: ENVS 101, ENVS 137, or BIOL 101
An introduction to the biology of birds including the topics of anatomy, physiology, behavior, ecology, and evolution. Includes some field trips to learn how to identify species and to collect behavioral information.
Outcomes:
Students will demonstrate an understanding of the biology of birds and be able to identify some of the commoner species of birds in our area

ENVS 218 Biodiversity & Biogeography (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course covers the creation and maintenance of biodiversity across taxonomic, temporal and spatial scales. It will provide an overview of the history of biogeography, increase understanding of the evolutionary processes that create biodiversity, the influence of biodiversity on ecosystem services, and the rapid biodiversity loss resulting from human actions.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will gain knowledge of and appreciation for the biodiversity of life, its formation through the process of evolution, and the importance of biodiversity to ecosystem function and human welfare

ENVS 220 Conservation Genetics (3 Credit Hours)
Students will gain foundational knowledge of population genetics principals. Throughout the course we will apply the population genetics principals to conservation issues and case studies to gain skills in conservation and management. Students will also evaluate several natural mechanisms of evolutionary change as well as evolutionary responses to anthropogenetic change.
Outcomes:
Learn foundational theories in population genetics; Apply population genetics theory to issues in conservation biology; Understand tools and interpret data sets in conservation genetics; Analyze and disseminate literature in the field of conservation genetics; Gain hands on experience with genetic techniques and analyses

ENVS 223 Soil Ecology (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the properties, functions, and conservation of soil. Topics include belowground ecosystem services, soil biodiversity, biogeochemical cycles, and conservation, human impacts to soils, and the socioeconomic implications of soil degradation. Lectures, laboratory/field soil testing, field trips, and presentations by experts in sustainable soil management are employed.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will understand the properties, functions and methods of conservation/remediation of soils, learn how human activities affect soils and associated socioeconomic consequences, and develop analytical skills to assess soil health

ENVS 224 Climate & Climate Change (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to basic principles and knowledge to explain climate change. Students will learn about natural and anthropogenic causes of climate change, the interactions between earth-atmosphere-ocean systems, climate feedback mechanisms, and impacts of climate change on the natural physical environment.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will develop cognitive and mathematical skills to draw valid, logical conclusions regarding various observed phenomena such as observed changes in the climate system and observed impacts of climate change

ENVS 226 Science & Conservation of Freshwater Ecosystems (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Freshwater ecosystems are threatened by water extraction, pollution, invasive species, and many other pressures. This course covers physical, chemical, and biological processes in freshwaters, and the benefits that humans derive from these ecosystems. Major issues for conservation will be covered at global and Great Lakes scales.
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will gain understanding of different types of freshwater ecosystems, their functioning and importance for human societies, and the range of pressures they currently face

ENVS 230 Feeding the Planet: Global Perspectives on Sustainability, Culture and Food (3 Credit Hours)
Cross-cultural policies, practices, and beliefs about the production, preparation, consumption, and distribution of food vary widely. This course examines food in historical, political, social, and cultural contexts around the globe. It is divided into four sections that require students to apply concepts in food studies to international case studies and global examples: Cross-Cultural & Global Perspectives on Food; Culture, Identity, and Food; The Political Economy of Food; and Social, Cultural, Political, and Economic Responses to Hunger. Course topics include subsistence patterns and cultural patterns of food preparation and consumption; cultural practices involving food preferences and taboos; the globalization of foods and cuisines; labor practices in industrial agriculture; alternative economies of food; global policies and practices developed to eliminate hunger and malnutrition; the use/misuse of global food aid, and others.
Outcomes:
Explain the rationales of cross-cultural beliefs and practices of our own and others' foodways; Apply interdisciplinary perspectives to analyze the historical, cultural, and political roots of social phenomena and world problems involving food and society; Assess various dimensions of the forms and mechanisms of oppression, discrimination, or privilege in global and local food systems; Investigate coalitions and key ideas, past and present, which address and advocate for economic and social justice in the food system

ENVS 237 Foundations of Environmental Chemistry (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; Restricted to BA majors in the School of Environmental Sustainability
This course is the second in a three-course sequence required of all ENVS BA majors. These courses provide the basic scientific grounding needed to intelligently discuss environmental issues and to prepare students for more advanced study on the environment. ENVS 237 focuses on the physical and chemical science needed to understand environmental processes. Students will build their quantitative skills in evaluating energy and chemical transactions that impact our environment.
The course will also work on building skills in interpreting scientific information, including using academic peer-reviewed journal articles.
Outcomes:
Be able to quantitatively assess environmental systems and anthropogenic processes that impact the environment; Gain understanding of the physical and chemical processes of environmental systems to be able to describe global climate dynamics, chemical reactions that contribute to environmental issues, the energetics of different energy sources, and technological aspects of alternative energy sources; Appreciate the importance of chemistry and physics as applied to different environmental issues and used by different environmental fields

ENVS 238 Foundations of Environmental Science Lab (1 Credit Hour)
Pre-requisites: ENVS 237 (pre- or co-requisite); Restricted to BA majors in the School of Environmental Sustainability
A lab course designed to be associated with ENVS 237, this course is designed to introduce all ENVS majors to lab safety, basic lab techniques such as use of balances and microscopes, data analysis, and the application of these techniques to the study of environmental science.
Outcomes:
Students will understand and demonstrate safe lab practices and learn to use basic lab equipment to take and analyze environmental science data

ENVS 260 Environmental Journalism (3 Credit Hours)
Pre-requisites: Department Consent Required
The mission of environmental journalism is to raise public awareness about environmental news and issues. It is about being ethical, accurate, fair, and clear, whether reporting, investigating, or advocating for change.
Course equivalencies: X-ENVS 260/ COMM 260
Outcomes:
Students will be able to find, report, and present challenging stories around this topic, in print and in broadcast writing

ENVS 267 Bird Conservation and Ecology (3 Credit Hours)
Pre-requisites: ENVS 101, ENVS 137, or BIOL 102
This engaged-learning course provides an introduction to the theory and practice of avian conservation, ecology and management. Field trips for viewing birds in the wild, observing behavior and collecting data on habitat assessments are highlighted. Students participate in a community service project to gather data for avian conservation and management
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning and some bird monitoring techniques, and demonstrate an understanding of the many facets of bird conservation

ENVS 273 Energy and the Environment (3 Credit Hours)
Pre-requisites: ENVS 101, ENVS 137, or BIOL 101, Please check requirements for declared majors/minors for exceptions
The concept of energy developed from antiquity through the present day and applied to national and worldwide energy use patterns, the technologies supporting their use, as well as the societal impact and environmental consequences of energy usage.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Peace, Justice, and Conflict Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning and methods of inquiry; Students will demonstrate an understanding of critical concepts and knowledge, including heat and energy, the laws of thermodynamics, and current and future technologies and their impact

ENVS 274 Chemistry of the Natural Environment (3 Credit Hours)
Pre-requisites: ENVS 137, MATH 118 and CHEM 160; Restricted to Majors and Minors in the School of Environmental Sustainability
Environmental Chemistry is the study of how materials move through the environment and interact within different environmental systems, including the atmosphere, hydrosphere, lithosphere, and biosphere. In this course, we will use this approach to better understand the chemical and physical reactions taking place and their equilibrium in the natural environment on Earth. The course will investigate these chemical and physical interactions in the three unique environmental compartments of the atmosphere, hydrosphere, and the soil environment, where the lithosphere and biosphere overlap, as we learn more about the materials and reactions that make up the natural environment. Students will utilize problem solving to explore the materials and reactions of the major compartments.
Interdisciplinary Option: Bioethics
Outcomes:
Apply key equations, concepts, and physical laws relevant to environmental chemistry to analyze how materials move through the environment between different environmental compartments (atmosphere, hydrosphere, lithosphere, biosphere); Quantitatively assess materials in air, water, soil, and cells across a range of scales appropriate in environmental science, from the microscopic to the global range; Describe underlying ecosystem functions that establish the chemistry of natural waters, air, and soil

ENVS 275 Chemistry of the Environment Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and (CHEM 102 or CHEM 161); ENVS 274 as pre- or co-requisite; Restricted to Majors and Minors in the School of Environmental Sustainability
Basic techniques for chemical analysis of environmental samples, including air, water and soil. Learn to use electronic data acquisition systems and further develop scientific writing skills.
Outcomes:
Plan experiments, develop good lab techniques, conduct accurate chemical analyses on environmental samples, interpret chemical data, short and long reports describing work and interpreting significance of results

ENVS 276 Chemistry of Environmental Pollution (3 Credit Hours)
Pre-requisites: ENVS 137, CHEM 160, MATH 118, and SES Major
Environmental Chemistry is the study of how materials move through the environment and interact within different environmental systems, including the atmosphere, hydrosphere, lithosphere, and biosphere. In this course, we will use this approach to better understand the chemical and physical reactions that influence the transport and fate of chemical pollutants in our environment. This course will identify major sources of environmental pollutants and technologies for source pollution control as well as understanding how pollutants move through the environment to potentially impact ecosystems and human health. The course will cover pollutants in all environmental compartments including air pollution from combustion sources, water quality issues and water treatment, and soil pollutants with a focus on agrochemicals and their impact on both soil environments and groundwater.
Outcomes:
Apply key equations, concepts, and physical laws relevant to environmental chemistry to analyze how pollutants move through and between different environmental compartments (atmosphere, hydrosphere, lithosphere, biosphere); Describe underlying chemistry of technologies and policies that would address key sources of major pollutants; Be able to utilize physical chemical properties of pollutants as a tool for assessing their persistence and potential to do harm in natural ecosystems

ENVS 278 Hydrology (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Study of processes which cycle water between oceans, atmosphere, and land surface. This course examines precipitation, evaporation, infiltration, transpiration, groundwater and surface water flow. Understanding these processes is fundamental to managing our resources in the face of mounting environmental challenges and natural resource pressures.
Outcomes:
Understanding of key physical processes and multidirectional complex interactions between different components of the water cycle; ability to apply fundamental equations of conservation to quantify flows

ENVS 279 Climate and History (3 Credit Hours)
Pre-requisites: Department Consent Required
Explores the role of climate in history, from the emergence of homo sapiens to recent anthropogenic climate change. Major topics include the social impact of climate variability, sources of resilience, origins of scientific knowledge, and the use of historical knowledge in the present.
Course equivalencies: X-HIST279E/ ENVS279
Outcomes:
Students will analyze examples of climate shaping history, learn different ways that scholars have treated this relationship, and reflect on how this knowledge might be useful today

ENVS 280 Principles of Ecology (3 Credit Hours)
Pre-requisites: (ENVS 101 or ENVS 137) and (ENVS 237 or CHEM 101 or CHEM 160); Restricted to Majors and Minors in the School of Environmental Sustainability
The purpose of this course is to foster an in-depth understanding of ecology, the study of relationships between organisms and the environment at organizational scales ranging from genes, individuals, and populations to communities, ecosystems, and landscapes. Topics include population dynamics, species interactions, community dynamics, food webs, ecosystem functions, and landscape ecology with a strong emphasis on scientific inquiry and data interpretation.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand key concepts and principles concerning ecological processes in nature at the gene, individual, population, community, ecosystem and landscape scales and apply knowledge of ecological concepts to current environmental challenges

ENVS 281 Environmental Sustainability & Science in China (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
This course provides students with an understanding of how sustainable systems work and how the structure and function of these systems is altered by human activities. Students will gain first-hand experience studying environmental issues in China, including air pollution, loss of biodiversity, energy, and climate change, through lectures & field trips to China.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Chinese Language & Culture
This course satisfies the Engaged Learning requirement.
Outcomes:
a) Describe the characteristics of subtropical climate and ecosystems; b) Explain the interactions between human activities and the environment in China; c) Discuss China's approaches to environmental protection and economic development; d) Recognize the interconnectedness of natural systems, including the role of humans within them; e) Work effectively with people from diverse backgrounds, both individually and in teams, and communicate findings effectively in writing and speech

ENVS 283 Environmental Sustainability (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Examines the impact of humans as consumers on the environment and how these interactions affect the probability of establishing sustainability for human and non-humans on Earth.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning and methods of inquiry, and demonstrate an understanding of knowledge critical to the field including current human consumptive practices and their effects on the health and well-being of living organisms

ENVS 284 Environmental Justice (3 Credit Hours)
This course examines how policy interacts with race and class to affect differentially people's access to a clean, safe, productive environment. Reviews history of the environmental justice movement, and community, policy, and legal responses. Develops students' ability to work across diverse social groups to advance environmental justice and sustainability.
Interdisciplinary Option: Bioethics
Outcomes:
Describe the history, central aims, practices, and continuing evolution of modern-day environmental justice movements; Identify theories of justice underlying environmental justice movements; Analyze structures and processes of inequality, exclusion, colonization, capitalism, and speciesism as they relate to environmental degradation; Describe how communities build power to address environmental injustices; Reflect upon your own social positionality and consider the value of environmental justice theory and action for your own life

ENVS 285 Eco-spirituality (3 Credit Hours)
Eco-spirituality is an emerging field in ecology, conservation, and religion that recognizes the spiritual component of environmentalism and Earth stewardship. This course explores how ecological efforts are enhanced by including a spiritual dimension and spirituality and religion must include awareness and engagement with ecology and ecological issues.
Outcomes:
1) Draw connections between ecology, spirituality, and Loyola¿s mission; 2) Implement tools and practices that foster personal awareness and reflection; 3) Demonstrate how reflection leads to necessary action

ENVS 286 Principles of Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 203 and (ENVS 238 or CHEM 111 or CHEM 161) and ENVS 280 (pre- or co-requisite); Restricted to BA Majors in the School of Environmental Sustainability
This course will allow students to develop experience and skills employed in ecological studies, with an emphasis on field work, laboratory analysis, and hypothesis testing. Topics for lab exercises will correspond closely with material from Ecology (ENVS 280) lecture. Course does not satisfy requirements for BIOL major.
Outcomes:
Students will understand basic ecological principles, apply these to design experiments, develop skills in data analysis and interpretation, and learn techniques used to characterize ecosystem properties and human environmental impacts

ENVS 286S Principles of Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 203 and (CHEM 111 or CHEM 161) and ENVS 280 (pre- or co-requisite); Restricted to BS Majors in the School of Environmental Sustainability
Course content includes lab skills and analytical techniques commonly employed in ecological studies; emphasizes sampling, research design, field work, laboratory technique, data analysis, project development, hypothesis testing, and scientific report writing.
Outcomes:
Understand ecological principles, apply knowledge to ecological experiments, observational studies, and entry-level mathematical models; assess biotic responses to the abiotic environment and to anthropogenic impacts

ENVS 288 Applied Interdisciplinary Data Analysis (3 Credit Hours)
Pre-requisites: (ENVS 280 or BIOL 265) and (STAT 103 or STAT 203)
Restricted to students in SES majors. This course teaches students to approach environmental problem-solving from a systems perspective by understanding the complex adaptive nature of socio-ecological. It introduces analytic techniques used in the natural/social sciences, and provides opportunity to analyze and connect data from various disciplines (e.g., ecology, economics, sociology) to address pressing environmental concerns.
Outcomes:
Students will be able to describe characteristics of complex adaptive systems, become familiar with analytical approaches suited to different sub-disciplines, and apply numerous analytical techniques to real data sets

ENVS 297 North American Environmental History (3 Credit Hours)
Pre-requisites: Department Consent Required
This course surveys the environment and environmentalism in United States history, from the transformation of New England into a farm ecology, the expansion of the cotton South, the settlement of the West, to the rise of industrial cities, suburban sprawl, and the globalization of the economy.
Course equivalencies: X-ENVS297/HIST297E
Outcomes:
Students will be able to demonstrate historical knowledge of environmental thought and ecological science, to draw links between environmental concerns and public policies, and to develop critical thinking and communication skills

ENVS 298 Special Topics (1-12 Credit Hours)
Specific titles and contents vary from semester to semester. Variable credit hours.

ENVS 298L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes lab component.

ENVS 300 Introduction to Public Health (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
Public health is the science of preventing disease and protecting and promoting the health of populations and communities. Through interactive exercises and application of concepts, this course considers its history; ethical principles; scientific foundation and tools; biomedical bases; socioeconomic and behavioral factors; environmental issues; and relationship to medical care.
Course equivalencies: X -PUBH 300/ ENVS 300
Outcomes:
Describe the history, core concepts, functions, and methods of public health; Define health disparities and explain how they are produced; Synthesize public health information and communicate it effectively

ENVS 301 Environmental Health (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
This course is designed as an introduction to the field of environmental health, including regulations, research, disease prevention, and advocacy.
Interdisciplinary Option: Bioethics
Course equivalencies: X-ENVS301/PUBH301/MBPH401
Outcomes:
Students will be able to outline approaches for assessing and controlling environmental hazards that affect community health and discuss major local, national, and global health challenges

ENVS 303 Introduction to Epidemiology (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.
Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403

ENVS 310 Introduction to Environmental Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137
This introduction to environmental law surveys some critical federal environmental statutes, rules, and regulations in the United States; important case law decided under those statutes; interaction between federal, state, and local jurisdictions; and impacts on air, land, water, and natural resources.
Outcomes:
Understands how the natural environment is controlled, managed and promoted through the legal system

ENVS 311 Natural Resources and Land Use Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
Focus on legal and policy processes used to govern pollution, water use, endangered species, toxic substances, and environmental impact and risk.
Outcomes:
Students will understand how the natural environment is controlled, managed and promoted through the legal system and how land use laws and policy impact social and economic issues

ENVS 312 Water Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
This course looks at how the law allocates and protects one of our most crucial natural resources -- water. Understanding development and regulation of water ownership and use and how those decisions impact current environmental and socio-economic issues.
Outcomes:
Understand how key laws and policies impact protection and use of water in the United States; understand key legal concepts that shape the management of our water resources

ENVS 313 Energy Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy.
Outcomes:
Understand how key laws and policies impact production and use of energy; and how energy is controlled by federal and local regulations and policies

ENVS 316 Energy and Power Systems (3 Credit Hours)
Pre-requisites: Junior or Senior standing; MATH 118
This course introduces the fundamental concepts of energy and power systems, covering essential principles, grid components, and generation technologies through a multidisciplinary lens. Students will explore current and future challenges in energy systems by applying mathematical tools, software, and programming to analyze the topics covered.
Outcomes:
Comprehend Basic Energy and Electrical Concepts: Explain the fundamental principles of electricity, energy, power, voltage, current, and resistance; Differential Generation Technologies: Compare and contrast conventional and renewable generation technologies, and assess their environmental, economic, and social impacts; Understand Grid Operations: Explain the basics of power flow analysis, load balancing, and grid operation; Analyze Energy Markets and Pricing: Discuss how electricity markets function, how electricity is priced, and how the grid is managed; Assess Further Grid Challenges: Evaluate the challenges of integrating renewable energy sources, managing load shifting, and electrifying other sectors, while considering social and equity implications; Apply Long-Term Grid Planning Tools: Identify and apply tools and methodologies used in generation expansion planning, and assess strategic considerations for achieving long-term goals in energy systems

ENVS 320 Conservation Biology (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266
Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.
Outcomes:
Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems

ENVS 321 Conservation Biology Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266; and ENVS 320 (pre- or co-requisite)
Students will apply principles learned in ENVS 320 to conservation problems in the Chicago region and elsewhere, through visits to conservation sites and discuss concerns/initiatives with land managers and policy makers. They will develop skills in species identification, ecosystem delineation and description, and the use of field equipment and methods.
Outcomes:
This course will provide practical field and lab experience in population, community and ecosystem conservation; Students will learn how the principles of Conservation Biology are applied, and the associated challenges

ENVS 322 Invasive Species (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause.
Outcomes:
Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem

ENVS 323 Environmental Microbiology (3 Credit Hours)
Pre-requisites: BIOL 101, BIOL 102, CHEM 101, and (CHEM 102 or ENVS 274)
This course introduces the significant role of microorganisms in numerous environmental and human-engineered processes. It covers microbiology and its basic methods to orient students to this field of science and the importance of microbial diversity relevant to agriculture, public health, and ecological restoration.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ENVS 323/ENVS 423
Outcomes:
Students will learn to isolate and characterize environmental microorganisms; Students will investigate the role of microorganisms in nutrient cycling, remediation of soils, and transmission of existing and emerging pathogens

ENVS 324 Climate Science (3 Credit Hours)
Pre-requisites: ENVS 224 and MATH 118
The focus of this course is Earth's climate system, including the role of the atmosphere, ocean, cryosphere and land-atmosphere interaction. This course digs deeper into the physical principles underlying climate processes, energy balance, feedback mechanisms, climate variability and climate dynamics, including large-scale atmospheric and ocean circulation. This course will discuss recent climate change, and projections for future climate scenarios. Students will have hands-on experience with practicing climate modelling tools, analyzing climate data, and exploring current research in climate science. Thus, this course will involve quantitative analysis and will reinforce students' reading, writing, and public-speaking skills through the class project on climate change.
Outcomes:
Understand Earth's Climate Systems: Students will gain an in-depth understanding of Earth's climate system, including the atmosphere, ocean, cryosphere, and land-atmosphere interactions, as well as the physical principles underlying climate processes such as energy balance, feedback mechanisms, and climate variability; Develop Quantitative Analysis Skills: Students will engage in quantitative analysis through climate modeling tools and data interpretation, enabling them to critically analyze climate data and understand large-scale climate dynamics like atmospheric and ocean circulation; Evaluate Climate Change Impacts and Projections: Students will explore recent scientific developments in climate change, assess current climate change impacts, and understand projections for future climate scenarios, preparing them to engage in informed discussions and decision-making related to climate policy and research; Enhance Communication and Research Skills: Through scientific paper reviews and presentations, students will enhance their ability to critically evaluate research, improve their public-speaking skills, and effectively communicate scientific findings to peers, fostering collaboration and scientific literacy

ENVS 325 Sustainable Agriculture (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored.
Outcomes:
Students will be able to explain the characteristics of the US agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system

ENVS 326 Agroecosystems (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266; and ENVS 223 (recommended)
In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad.
Outcomes:
Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating scientific information to diverse audiences

ENVS 327 Food Systems Analysis (3 Credit Hours)
Pre-requisites: ENVS 203
This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change.
Outcomes:
Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis

ENVS 330 Restoration Ecology (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266
This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types.
Outcomes:
Students will apply knowledge from ecology and other disciplines to the practice of ecosystem restoration, and learn to integrate information from multiple disciplines, and stakeholder input, to design/manage restoration projects

ENVS 331 Restoration Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and 286/s; or BIOL 265 and 266; and ENVS 330 (pre- or co-requisite)
Students will apply principles learned in ENVS 330 to restoration sites in Chicago and beyond. They will visit restoration sites and discuss strategies and initiatives with land managers and policy makers. Students will develop skills in ecological-site description, and in the analytical methods required to determine success of restoration projects.
Outcomes:
Students will gain an understanding of how the science of restoration ecology is applied in practical settings and learn methods used in restoration and assessment of actual restoration projects

ENVS 333 Introduction to the Circular Economy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
This course introduces principles and concepts of a circular economy that can support a more sustainable future. The course reviews circular design, materials management, business models, supply chains, policy, financing, metrics, and applications. This course may include speakers and/or field trips to learn about companies with circular business practices.
Outcomes:
Explain circular economy; identify applications of circularity; understand role of policy, finance, and design in system-wide change; understand social, environmental, economic impacts of linear economic system

ENVS 335 Ecological Economics (3 Credit Hours)
Pre-requisites: ECON 201 or ECON 202
Ecological Economics is a trans disciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges. Topics include sustainable scale, just distribution, efficient allocation and relationships between economic and ecological systems.
Outcomes:
Understanding of ecological economics history, conceptual foundations, principles, tools, indicators, and applications

ENVS 336 Design for Circular & Sustainable Business (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. Understand and apply: (1) circular design methods (2) biomimicry design methods; and (3) human-centered design (design thinking) methods.
Outcomes:
Understand the role of design in creating a sustainable future

ENVS 338 Climate Change and Human Health (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing.
Outcomes:
1) Outline fundamental public health concerns that have been associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

ENVS 340 Natural History of Belize (3 Credit Hours)
Pre-requisites: For SES majors and minors, ENVS 101 or ENVS 137; For BIOL majors and minors, BIOL 102 and BIOL 112; For ANTH or GLST majors and minors, Junior or Senior Standing
This Study Abroad field course is designed to build on the foundations learned in Ecology, Environmental Science, and Anthropology classes by examining the biodiversity and tropical ecosystems of Belize, by exploring the cultural traditions of some of its peoples, particularly the Mayans; and learn how local communities are involved in protecting and sustaining ecological and natural sites through community based conservation and sustainability practices.
This course satisfies the Engaged Learning requirement.
Outcomes:
Provide a working understanding of the structure, function, and ecology of tropical ecosystems; their importance to local communities; and the social dimensions of environmental issues, especially those related to justice

ENVS 344 Ecuadorian Ecosystems: Geography, Diversity, and Conservation (3 Credit Hours)
Ecuador is aptly known as "The Country of Four Worlds" due to its four distinct biogeographical landscapes: the Andean highlands, Amazonia, Coastal Region, and the Galapagos Islands. This immersive field-based course will take students to three of these four regions. Class begins during spring semester where students will learn the foundations of the natural history of Ecuadorian Ecosystems. The course then follows with a 3-week field component. Travel will begin in the Andean capital of Quito, from there we will venture to the heart of the Amazon within Yasuni Biosphere Reserve, next we move to the Andean Cloud forests, and finally, the course finishes in the world-famous Galapagos Islands. This course is designed to provide tangible, real-world exposure to the biology and ecosystems of Ecuador.
This course satisfies the Engaged Learning requirement.
Outcomes:
Develop a working understanding of the geographical diversity and distinction of three ecosystems: Andean highlands, Amazonia, and the Galapagos Islands; Develop a working understanding of the unique biota and endemic species of Ecuador and the complexity of the environments that gave rise to these organisms; Learn field techniques and monitoring for understanding ecological condition and species: behavioral monitoring, transects/plots/quadrants, and GPS points/tracking; Develop a working understanding of conservation methodology, especially which techniques have worked for each ecoregion and how conservationists, ecologists, government officials, and local people can do more to preserve the species and habitats of Ecuador; Learn and appreciate cultures of the Ecuadorian people while expanding one's own worldview, tolerance and acceptance

ENVS 345 Conservation and Sustainability of Neotropical Ecosystems (3 Credit Hours)
Pre-requisites: BIOL 265 or ENVS 280; Instructor Consent Required
This course provides an introduction to conservation ecology in Neotropical ecosystems via classroom sessions and experiential learning activities during a Spring-Break field trip to Belize. Students will gain experience in environmental monitoring and biological survey methods. Ecosystems studied: coral reefs, mangrove forests, subtropical rain and dry forests, savannas, rivers, wetlands.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain an understanding of tropical climates, neotropical terrestrial/aquatic ecosystems and applied conservation and environmental practices such as nature reserve design and management, community-based resource management, ecotourism, and ecoagriculture

ENVS 350A Solutions to Environmental Problems: Water (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Water' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to water and then develop and implement projects that address the problem on campus and in the local community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop understanding of water-related environmental problems, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 350B Solutions to Environmental Problems: Biogas (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Biogas' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to biogas production, processing and transport and then develop and implement projects that address the problem on campus and in the local community.
Outcomes:
Students will develop understanding of environmental problems related to biogas, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 350C Solutions to Environmental Problems: Climate Action (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; and ENVS 224 (recommended)
Consideration of environmental, political, economic, historical, and cultural contexts of climate change. Examination of actions occurring at varying geographic scales to mitigate and/or adapt to climate change impacts. Problem- and solution-based learning of how to invest resources effectively to deal with a changing climate and its consequences.
This course satisfies the Engaged Learning requirement.
Outcomes:
Develop understanding of environmental problems related to climate change, demonstrate skills/knowledge needed to address those problems and recognize/articulate future possibilities for environmental leadership/civic engagement

ENVS 350F Solutions to Environmental Problems: Food Systems (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Food Systems' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to food production, processing and transport and then develop and implement projects that address the problem on campus and in the local community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop understanding of environmental problems related to food systems, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 351 Introduction to Sustainability Concepts & Impacts (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Examines environmental, economic, social and political impacts of sustainable practices on general public and global and local organizations. Provides students with understanding of importance to corporations and other entities of measuring, monitoring, and reporting resource use to customers and stakeholders.
Outcomes:
Explaining basic concepts of sustainability and how they relate to operations and goals of institutions and organizations; interaction of social, economic, and ecological systems to influence sustainability challenges and solutions

ENVS 352 Sustainability Assessment & Reporting I (3 Credit Hours)
Pre-requisites: ENVS 351
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of energy, air, buildings and transportation.
Outcomes:
Ability to assess and report sustainability metrics related to energy, air, buildings, and transportation

ENVS 353 Sustainability Assessment & Reporting II (3 Credit Hours)
Pre-requisites: ENVS 351
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of water, land, food and waste. Environmental and social impacts of water use and sources, land use practices, food sourcing and production, and waste production and recovery.
Outcomes:
Ability to assess and report sustainability metrics related to water, land, food, and waste

ENVS 354 Sustainability Plan Development & Reporting (3 Credit Hours)
Pre-requisites: ENVS 351, ENVS 352, and ENVS 353
Capstone course in the four course sequence on Sustainability Assessment & Planning. Using concepts and methodology to create a comprehensive sustainability plan including stakeholder engagement, life cycle analyses, set resource baselines, short- and long-term sustainability goals, budgets and draft sustainability plan for a representative entity.
Outcomes:
Learn best practices to inspire and engage partners and stakeholders to advance environmental sustainability in different types of organizations; Ability to create a comprehensive sustainability plan for organizations and institutions

ENVS 363 Sustainable Business Management (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
Course introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, ethical, and business cases for adopting sustainability. This course fulfills a MGMT elective.
Course equivalencies: MGMT/ENVS 363/ENVS 463
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

ENVS 367 Mammalogy (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
This course will focus on the ecology, evolution, behavior, and conservation of the class, Mammalia. Students will gain insight how this unique group evolved over time and became the dominate lineage over the Tertiary period. Furthermore, we will investigate how mammals hold special social and cultural relationship with humans, and why we have such complicated relationships with mammals, from revering them in religious contexts, to keeping them in our homes, to consuming them as nutrition.
Outcomes:
Working knowledge and mastery of the traits, evolutionary timescale, ecology, and conservation of mammals; Students will also gain experience collecting data (on museum samples as well as observations of living samples) to learn current techniques scientists and conservationists use to advance our understanding of this group

ENVS 369 Field Ornithology (3 Credit Hours)
Pre-requisites: (ENVS 280, ENVS 286, and ENVS 286S) or (BIOL 265 and BIOL 266); ENVS 215 recommended
Field ornithology is an intensive 3-week engaged-learning course at the Loyola University Retreat and Ecology Campus during the peak of the migratory season intended to provide an introduction to the theory and practice of field ornithology. Emphasis will be on field identification and song recognition, census techniques, and avian behavior.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning, field techniques, and scientific investigation that demonstrate an understanding of knowledge and techniques used in field ornithology

ENVS 380 Introduction to Geographic Information Systems (3 Credit Hours)
Pre-requisites: Junior or Senior standing
Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations.
Interdisciplinary Option: Urban Studies
Course equivalencies: ENVS380/ENVS480
Outcomes:
Describe the conceptual/theoretical and practical/technological background of GIS; Describe ethical issues germane to GIS; Prepare/analyze GIS data in research; Apply GIS in community-service projects

ENVS 381 Advanced GIS Applications (3 Credit Hours)
Pre-requisites: ENVS 380 and Restricted to Junior and Senior standing
Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data.
Outcomes:
Understand various spatial relationship concepts and their applications; identify and address common methodological challenges; understand how to use spatial data to make sound arguments in spatial problem solving and planning/policy

ENVS 382 Remote Sensing (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; Restricted to Juniors and Seniors
Science of obtaining information about objects or areas using data from remote sensors on satellites or mounted on aircraft that can detect energy reflected from Earth. Topics include data collection; digital image processing, assessment, evaluation, and enhancement; display alternatives and visualization; electromagnetic radiation principles and radiometric correction; and geometric correction.
Outcomes:
Understand concepts, data, and methods of remotely sensed geographic data; Learn how to obtain and analyze remote sensing data, produce thematic maps, learn landscape patterns, and methods to decipher them

ENVS 383 Human Dimensions of Conservation (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
This course will increase student knowledge of the social, political, economic, psychological, and cultural dimensions that influence the success of conservation projects and develop skills in conducting human dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute to preparation for employment in the conservation field and/or graduate study.
Outcomes:
Students will understand the importance of treating the human dimensions of conservation problems with the same scientific rigor customarily given to the ecological dimensions

ENVS 384 Conservation Economics (3 Credit Hours)
Pre-requisites: ECON 201
Explores resource conservation issues using economic principles. Topics include management of forests, wildlife and mineral resources; the demand for parks and outdoor recreation; the debate between environmental preservation and conservation; valuation of ecosystem services; the economics of biodiversity and endangered species; and policies to promote conservation in agriculture.
Outcomes:
Students will learn how natural resource use is affected by economic values, how to critically evaluate natural resource management problems, and evaluate models of dynamic resource extraction and user preferences

ENVS 385 Introduction to Global Health (3 Credit Hours)
Pre-requisites: ENVS 101, ENVS 137, or BIOL 101
This course introduces students to epidemiological and policy aspects of global health with a focus on health disparities at the international level.
Interdisciplinary Option: Bioethics
Course equivalencies: HSM 210 / PUBH 314 / ENVS 385
Outcomes:
Understand approaches to existing and emerging health problems and the relationships between health, poverty, and development

ENVS 386 Python Programming for GIS (3 Credit Hours)
Pre-requisites: Junior or Senior Standing
This course aims to provide students with a comprehensive understanding of Python programming for Geographic Information Systems. Through a combination of lectures, hands-on exercises, and projects, students will develop the skills necessary to leverage Python in GIS applications, automate geospatial workflows, and analyze spatial data. ENVS 380 pre- or co-requisite
Outcomes:
Understand Python programming language, loops and conditional statements; acquire a foundation knowledge of GIS; apply Python programming skills to perform spatial analysis; develop Python scripts to automate common GIS tasks

ENVS 387 Principles of Ecotoxicology (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265; and ENVS 274
This course will provide information on how pollutants affect ecosystems and how we might ameliorate their negative effects in our world. The emphasis of this course will be the fate and effects of pollutants in the ecosystem. The effects will be from molecular level to individual organism, community, and ecosystem levels.
Interdisciplinary Option: Bioethics
Outcomes:
This course will provide students with scientific knowledge in the cause and effects of pollutants in ecosystems and to prepare them for graduate study/future career

ENVS 389 Ecological Risk Assessment (3 Credit Hours)
Pre-requisites: ENVS 274 and ENVS 275
This course covers the area of potential effects of pollutants to ecosystems and practices on risk assessment for pollutants based on exposure and effect data in the literature. Different approaches for assessing the potential ecological impacts and risks of pollutants in support of environmental management will be discussed and practiced.
Outcomes:
Learn toxic effects of pollutants, acquire, organize, and synthesize monitoring and effect data using advanced analysis methods and skills in support of environmental impact and risk assessment via case studies

ENVS 390 Integrative Seminar (3 Credit Hours)
This course requires students to focus on a specific environmental issue or theme, integrating multidisciplinary perspectives, through individual or group presentations, discussion, and analysis of presentations by outside speakers.
Outcomes:
Students will demonstrate an understanding of the multi-faceted and interdisciplinary nature of environmental issues

ENVS 391 Environmental Research (1-3 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. Enrollment Conditions: Administrative Permission.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to design and carry out the research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 391C Independent Environmental Research (Capstone) (3 Credit Hours)
Pre-requisites: Senior standing and Instructor Consent
Fulfills capstone requirement for SES majors. Through independent research experience, examine how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts. Research projects must use a multi-disciplinary perspective in analysis and interpretation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Design and carry out research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 391K Independent Environmental Research (Capstone - L) (3 Credit Hours)
Pre-requisites: Senior standing and Instructor consent
Fulfills capstone requirement for SES majors. Through independent research experience, examine how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts. Research projects must use a multi-disciplinary perspective in analysis and interpretation. This version is used when funds must be drawn from a 'lab fees' budget line to conduct the research.
This course satisfies the Engaged Learning requirement.
Outcomes:
Design and carry out research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 391L Independent Environmental Research-Lab (1-3 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. This version is used when funds must be drawn from a 'lab fees' budget line to conduct the research. Requires Administrative Permission to enroll.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to design and carry out research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 395 Environmental Internship (3 Credit Hours)
Students seek out and engage in a semester- or summer-long internship with a civic, business, governmental, or academic group providing hands-on experience in work on environmental issues.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate, through daily activity logs and a comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience

ENVS 395C Environmental Internship (Capstone) (3 Credit Hours)
Pre-requisites: Senior standing and Department Consent
Fulfills capstone requirement for SES majors. Through internship experience, students reflect upon academic and extra-curricular activities in their degree program and learn how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts.
This course satisfies the Engaged Learning requirement.
Outcomes:
Guided reflection on relationship between coursework and internship experience, relate learning to specific activities and experiences in the internship, assess value of internship to future career plans

ENVS 398 Special Topics (3 Credit Hours)
Specific titles and contents vary from semester to semester.

ENVS 398B Environmental Science Topics for BIET Minor Capstone (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include biotechnologies, concepts of race and gender, the environment, reproduction, and others. This course number provides a cross-listed elective for Environmental Science students when the Bioethics capstone's topic is environmental.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and environmental science issues with regard to the special topic in environmental science

ENVS 398L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes lab component.

ENVS 399 Directed Readings (1-3 Credit Hours)
Pre-requisites: Instructor Consent
Directed by an ESP faculty member, students will read, analyze, and discuss a publications focusing on different aspects of a specific environmental issue or theme.
Outcomes:
Students will demonstrate comprehension of, and the ability to apply information from, scientific literature and be able to synthesize information to produce a cogent, synthetic analysis of their topic based on these readings

Environmental Action and Leadership Minor

The Environmental Action & Leadership Minor provides knowledge of and insight into environmental issues, and develops skills in communication, group management and leadership to facilitate action toward solving environmental problems and the development of sustainable practices in society.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Demonstrate an understanding of scientific, social, and humanistic approaches to environmental questions.
- Appraise the interactions and synergies between the natural world, social systems, and human cultures.
- Advance environmental and social sustainability that integrates scientific research, social analysis, and cultural awareness.

Environmental Economics & Sustainability: Governance (BA)

The Environmental Economics and Sustainability major provides students rigorous training in economics and awareness of sustainability challenges, including global climate change, food production, environmental conservation, and social justice. Training in economics provides knowledge of how individuals and governments make decisions and the ways in which the economy can be structured and managed for the common good, training that is a crucial part of solving sustainability challenges. The Governance concentration is intended for students seeking a career in government, non-governmental organization (NGO), or law.

School of Environmental Sustainability Graduation Requirements

All SES students are required to complete a foreign language requirement and a writing intensive requirement. The SES language requirement can be fulfilled by 1) earning college credit at the 102-level or above; or 2) demonstrating proficiency via the SES foreign language proficiency examination. The SES writing intensive requirement is fulfilled by successfully completing two Loyola WI courses (max of one per semester). Writing intensive courses have a "W" in the section number.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Explain the interconnections between human development, the economy, and the environment and articulate how economic theory and analysis can be used to evaluate social and economic outcomes.
- Describe how policy affects business and economic activity to achieve human development and environmental sustainability goals.
- Analyze how policy interventions can shift an economy to achieve a balance of ecological and socioeconomic objectives.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Economics & Sustainability: Management (BA)

The Environmental Economics and Sustainability major provides students rigorous training in economics and awareness of sustainability challenges, including global climate change, food production, environmental conservation, and social justice. Training in economics provides knowledge of how individuals and governments make decisions and the ways in which the economy can be structured and managed for the common good, training that is a crucial part of solving sustainability challenges. The Management concentration is intended for students seeking a business or consulting career.

Learning Outcomes

- Explain the interconnection between human development, the economy, and the environment and understand how economic theory and analysis can be used to evaluate social and economic outcomes.
- Analyze how businesses can integrate environmental and social considerations into decision-making that aligns financial sustainability with environmental sustainability.
- Describe the impacts of business and industry on social outcomes, the economy, and environmental sustainability.

Environmental Economics and Sustainability Minor

As of Fall 2026, this program is no longer accepting students.

The Environmental Economics and Sustainability Minor provides a broad understanding of how the environment and the economy are linked; to prepare students for careers in government, consulting, law and for-profit business. The program also offers the essential courses to prepare for a masters in environmental economics, agricultural economics or environmental management.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Understand how the economy, the environment, and human development goals are linked.
- Understand how economic theory and quantitative analysis can be used to evaluate social and economic outcomes.
- Analyze who benefits or is harmed by economic and environmental policies; identify how benefits and harms are distributed in a population.
- Communicate with professionals about tradeoffs, property rights, ecosystem services, values and related economic measures, inequities, externalities, environmental degradation, and systems thinking.

Environmental Policy (BA)

Well-designed public policies are critical in maintaining and restoring a healthy environment. Public policies influence air and water quality, land use, biodiversity, and public health and shape crucial efforts to fight climate change. Our environmental policy program prepares students to craft and implement public policies that promote ecological conservation, environmental justice, and innovation toward a green economy.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
ENVS 137	Foundations of Environmental Science I	3
PLSC 101	American Politics	3
	Hours	**6**
Spring		
ENVS 203	Environmental Statistics	3
ENVS 237	Foundations of Environmental Chemistry	3
ENVS 238	Foundations of Environmental Science Lab	1
Justice & Ethics Choice		3
	Hours	**10**
Year Two		
Fall		
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 280	Principles of Ecology	3
ENVS 286	Principles of Ecology Lab	1
	Hours	**5**
Spring		
ENVS 310 or PLSC 392	Introduction to Environmental Law & Policy or Environmental Politics	3
Environmental Science Elective		3
	Hours	**6**
Year Three		
Fall		
ENVS 310 or PLSC 392	Introduction to Environmental Law & Policy or Environmental Politics	3
	Hours	**3**
Spring		
ENVS 335 or ECON 328	Ecological Economics or Environmental Economics	3
Society, Ethics, & Justice Elective		3
	Hours	**6**
Year Four		
Fall		
Engaged Learning Choice		3
Policy, Economics, & Resource Management Elective		3
Methods & Analysis Elective		3
	Hours	**9**
Spring		
Capstone Choice		3
Policy, Economics, & Resource Management Elective		3
Environmental Science Elective		3
	Hours	**9**
	Total Hours	**54**

School of Environmental Sustainability Graduation Requirements

All SES students are required to complete a foreign language requirement and a writing intensive requirement. The SES language requirement can be fulfilled by 1) earning college credit at the 102-level or above; or 2) demonstrating proficiency via the SES foreign language proficiency examination. The SES writing intensive requirement is fulfilled by successfully completing two Loyola WI courses (max of one per semester). Writing intensive courses have a "W" in the section number.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Describe the social and environmental impacts of government intervention and the policy process
- Appraise major environmental laws and international agreements.
- Analyze policy solutions that address pressing environmental problems.

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Science (BS)

Solving the world's most pressing environmental problems requires understanding the scientific aspects of sustainability. Our program in environmental science prepares students to develop innovative solutions to challenges such as climate change, air and water pollution, and biodiversity loss.

This program has optional concentrations in **Conservation & Restoration Ecology** or **Climate & Energy**.

Related Programs

No results found.

Curriculum

Environmental Science students complete coursework that includes both a heavy dose of basic science requirements and courses spanning a variety of disciplines pertinent to understanding the context in which environmental challenges reside.

Students may take the program without a concentration [66 credit hours] or choose a concentration in Conservation and Restoration Ecology [68 credit hours]; or Climate & Energy [70 credit hours].

Code	Title	Hours
Foundational Curriculum		
BIOL 101	General Biology I	3
BIOL 111	General Biology I Lab	1
CHEM 160	Chemical Structure and Properties	3
CHEM 161	Chemical Structure and Properties Laboratory	1
ENVS 137	Foundations of Environmental Science I	3
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 203	Environmental Statistics	3
ENVS 274	Chemistry of the Natural Environment	3
ENVS 275	Chemistry of the Environment Lab	1
ENVS 276	Chemistry of Environmental Pollution	3
ENVS 280	Principles of Ecology	3
ENVS 286	Principles of Ecology Lab	1
PLSC 392	Environmental Politics	3
Students take one of the following sequences based on concentration:		4
BIOL 102 & BIOL 112	General Biology II and General Biology II Lab [1]	
PHYS 111 & 111L	College Physics I Lec / Dis and College Physics Laboratory I [2]	
Justice and Ethics Choice		
Select one of the following:		3
ENVS 284	Environmental Justice	
PHIL 287	Environmental Ethics	
THEO 204	Religious Ethics and the Ecological Crisis	
Economics Choice		
ENVS 335	Ecological Economics	3
or ECON 328	Environmental Economics	
Engaged Learning Choice [3,4]		
Select one of the following:		3
ENVS 226	Science & Conservation of Freshwater Ecosystems	
ENVS 267	Bird Conservation and Ecology	
ENVS 273	Energy and the Environment	
ENVS 281	Environmental Sustainability & Science in China	
ENVS 283	Environmental Sustainability	
ENVS 345	Conservation and Sustainability of Neotropical Ecosystems	
ENVS 350A	Solutions to Environmental Problems: Water	
ENVS 350C	Solutions to Environmental Problems: Climate Action	
ENVS 350F	Solutions to Environmental Problems: Food Systems	
ENVS 369	Field Ornithology	
ENVS 391	Environmental Research (with SES approval)	
ENVS 395	Environmental Internship (with SES approval)	
Capstone Choice		
Select one of the following:		3
ENVS 390	Integrative Seminar	
ENVS 391C	Independent Environmental Research (Capstone)	
ENVS 395C	Environmental Internship (Capstone)	
Concentration Courses and Electives (p. 956)		**21-28**
Total Hours		**66-70**

[1] Students with the Conservation and Restoration Ecology and without concentration must take BIOL 102 and BIOL 112.

[2] Students in the Climate and Energy Concentration must take PHYS 111 and PHYS 111L. Students in this concentration also take an additional PHYS course outlined in the Concentration requirements.

[3] Students in the Climate and Energy Concentration have limited options to satisfy the Engaged Learning requirement.

[4] Students in the Climate and Energy Concentration must take ENVS 273 for the Engaged Learning Requirement within the major. This requirement is outlined in the Concentration requirements.

Concentration Requirements and Elective Course Options

Environmental Science (Without Concentration)

Code	Title	Hours
Electives		
One (1) course in Society, Ethics, and Justice Electives		3
One (1) course in Policy, Economics, and Resource Management Electives		3
Five (5) courses in Environmental Science Electives, at least three (3) of which must be at 300-level		15
Total Hours		**21**

Environmental Science: Conservation and Restoration Ecology Concentration

Code	Title	Hours
Required Courses		
ENVS 218	Biodiversity & Biogeography	3
ENVS 220	Conservation Genetics	3
ENVS 320	Conservation Biology	3
ENVS 321	Conservation Biology Lab	1
ENVS 330	Restoration Ecology	3
ENVS 331	Restoration Ecology Lab	1
ENVS 383	Human Dimensions of Conservation	3
Electives		
One (1) course in Conservation and Society Electives		3
One (1) course in Environmental Science Choice Electives		3
Total Hours		**23**

Environmental Science: Climate and Energy Concentration

Code	Title	Hours
Required Physics Core Course		
PHYS 112	College Physics II Lec/Disc	3
PHYS 112L	College Physics Lab II	1
Required Climate and Energy Courses		
ENVS 224	Climate & Climate Change	3
ENVS 273	Energy and the Environment [1]	3
ENVS 313	Energy Law & Policy	3
ENVS 316	Energy and Power Systems	3
ENVS 324	Climate Science	3
Electives		
One (1) course in Business, Economics, & Management Electives		3
One (1) course in Communication Electives		3
One (1) course in Methods & Analysis Electives		3
Total Hours		**28**

[1] This course satisfies the Engaged Learning requirement.

All SES students are required to complete a foreign language requirement and a writing intensive requirement. The SES language requirement can be fulfilled by 1) earning college credit at the 102-level or above; or 2) demonstrating proficiency via the SES foreign language proficiency examination. The SES writing intensive requirement is fulfilled by successfully completing two Loyola WI courses (max of one per semester). Writing intensive courses have a "W" in the section number.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Examine the causes and consequences of environmental change at local to global scales. [no concentration]
- Apply scientific knowledge to evaluate policy, management, and other solutions that aim to enhance environmental sustainability. [no concentration]
- Create an action plan for leading a professional and personal life that promotes environmental sustainability. [no concentration]
- Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems. [both no concentration and all concentrations]
- Critically evaluate the accuracy and credibility of information relating to environmental topics. [both no concentration and all concentrations]
- Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world. [both no concentration and all concentrations]
- Exemplify the values of environmental and social justice through actions to care for our common home and one another. [both no concentration and all concentrations]
- Explain fundamental connections among ecological processes that are the basis of unity and diversity of life. [Conservation and Restoration Ecology concentration]
- Analyze ecological and societal data to apply best management practices in conservation and restoration ecology. [Conservation and Restoration Ecology concentration]
- Synthesize the social, historical, economic, political, and biological causes, consequences, and solutions to our current biodiversity crisis. [Conservation and Restoration Ecology concentration]
- Develop and express a personal philosophy that values protecting and restoring our global bicultural diversity and vital ecosystems. [Conservation and Restoration Ecology concentration]
- Understand the fundamental concepts of climate science and the impacts of climate change on society and the natural environment. [Climate and Energy concentration]
- Assess the state of energy production, consumption, and the deployment of sustainable technologies as part of a just energy transition. [Climate and Energy concentration]
- Evaluate the role of governmental policy and regulation in solving climate and energy related problems. [Climate and Energy concentration]
- Apply techniques from both the natural and social sciences to design practical and innovative solutions to contemporary climate and energy issues. [Climate and Energy concentration]

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Environmental Science Minor

The Environmental Science Minor provides a base in the science, social & political issues, and methods relevant to understanding environmental issues and working to solve environmental problems.

Related Programs

Minor

- Environmental Action and Leadership Minor (p. 947)
- Sustainability Management Minor (p. 818)

Curriculum

Requirements: 7 courses (21 credit hours); *at least 3 courses must be ENVS.* A maximum of 3 courses can count toward this minor and an SES major.

Code	Title	Hours
Environmental/Ecological Science [1]		
Select four of the following:		12
ANTH 104	The Human Ecological Footprint	
ENVS 207	Plants and Civilization	
ENVS 215	Ornithology	
ENVS 218	Biodiversity & Biogeography	
ENVS 223	Soil Ecology	
ENVS 224	Climate & Climate Change	
ENVS 226	Science & Conservation of Freshwater Ecosystems	
ENVS 237	Foundations of Environmental Chemistry	
ENVS 267	Bird Conservation and Ecology	
ENVS 273	Energy and the Environment	

ENVS 281	Environmental Sustainability & Science in China	
ENVS 280	Principles of Ecology	
or BIOL 265	Ecology	
ENVS 283	Environmental Sustainability	
ENVS 345	Conservation and Sustainability of Neotropical Ecosystems	
ENVS 369	Field Ornithology	
Policy, Business & Society		
Select one of the following:		3
ENVS 260 / COMM 260	Environmental Journalism	
ENVS 279	Climate and History	
ENVS 284	Environmental Justice	
ENVS 297	North American Environmental History	
ENVS 310	Introduction to Environmental Law & Policy	
ENVS 311	Natural Resources and Land Use Law & Policy	
ENVS 312	Water Law & Policy	
ENVS 313	Energy Law & Policy	
ENVS 333	Introduction to the Circular Economy	
ENVS 335	Ecological Economics	
ENVS 336	Design for Circular & Sustainable Business	
ENVS 363	Sustainable Business Management	
ENVS 383	Human Dimensions of Conservation	
ECON 328	Environmental Economics	
GLST 305	Globalization and Environmental Sustainability	
PLSC 354	Global Environmental Politics	
PLSC 392	Environmental Politics	
SOCL 272	Environmental Sociology	
Methods & Application		
Select two of the following:		6
ENVS 203	Environmental Statistics	
ENVS 350A	Solutions to Environmental Problems: Water	
ENVS 350C	Solutions to Environmental Problems: Climate Action	
ENVS 350F	Solutions to Environmental Problems: Food Systems	
ENVS 380	Introduction to Geographic Information Systems	
ENVS 381	Advanced GIS Applications	
ENVS 382	Remote Sensing	
ENVS 386	Python Programming for GIS	
ENVS 391	Environmental Research (with SES approval)	
ENVS 395	Environmental Internship	
SOCL 301	Statistics for Social Research	
STAT 303	SAS Programming and Applied Statistics	
STAT 307	Statistical Design & Analysis of Experiments	
STAT 308	Applied Regression Analysis	
STAT 310	Categorical Data Analysis	
STAT 335	Introduction to Biostatistics	
Total Hours		**21**

[1] All ENVS 200-level courses, except COMM 260, ENVS 279, ENVS 284, and ENVS 297, have ENVS 101 or ENVS 137 as a pre-requisite; ENVS 280 also has ENVS 237 as a pre-requisite.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Explain the physical, biological, and chemical structure and function of ecosystems.
- Examine the causes and consequences of environmental change at local to global scales.
- Apply scientific knowledge to evaluate policy, management, and other solutions that aim to enhance environmental sustainability.
- Create an action plan for leading a professional and personal life that promotes environmental sustainability.

Environmental Studies (BA)

Loyola's BA in Environmental Studies combines a solid base of courses in the natural sciences with course work in the social sciences to prepare students for careers in government, business, education, non-profit organizations or the media.

BIOL, CHEM, PHYS 300-level courses (with SES approval)	
Total Hours	**21**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
ENVS 137	Foundations of Environmental Science I	3
	Hours	**3**
Spring		
ENVS 203	Environmental Statistics	3
ENVS 237	Foundations of Environmental Chemistry	3
ENVS 238	Foundations of Environmental Science Lab	1
Justice & Ethics Choice		3
	Hours	**10**
Year Two		
Fall		
ENVS 200	Environmental Careers and Professional Skills	1
ENVS 280	Principles of Ecology	3
ENVS 286	Principles of Ecology Lab	1
	Hours	**5**
Spring		
Environmental Elective List A		3
	Hours	**3**
Year Three		
Fall		
Environmental Elective List A or B		3
	Hours	**3**
Spring		
PLSC 392	Environmental Politics	3
Society, Ethics, & Justice Elective		3
	Hours	**6**
Year Four		
Fall		
ENVS 335 or ECON 328	Ecological Economics or Environmental Economics	3
Engaged Learning Choice		3
Policy, Economics, & Resource Management Elective		3
Environmental Elective List A or B		3
	Hours	**12**
Spring		
Capstone Choice		3
Methods & Analysis Elective		3
300 Level Environmental Science Elective List A or B		3
	Hours	**9**
	Total Hours	**51**

School of Environmental Sustainability Graduation Requirements

All SES students are required to complete a foreign language requirement and a writing intensive requirement. The SES language requirement can be fulfilled by 1) earning college credit at the 102-level or above; or 2) demonstrating proficiency via the SES foreign language proficiency examination. The SES writing intensive requirement is fulfilled by successfully completing two Loyola WI courses (max of one per semester). Writing intensive courses have a "W" in the section number.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Evaluate scientific, social, and humanistic approaches to issues that interconnect environment and society.
- Develop strategies and actionable steps to create environmental sustainability within select contexts
- Understand the forms of environmental justice and the specific environmental rights these forms of justice ensure

SES Shared Learning Outcomes

All SES majors share the following Program Learning Objectives, in addition to their unique major-specific Program Learning Objectives:

1. Articulate the foundational principles of natural and social sciences and humanities essential to solving environmental problems.

2. Critically evaluate the accuracy and credibility of information relating to environmental topics.

3. Employ knowledge and skills to design and implement solutions that contribute to a just and sustainable world.

4. Exemplify the values of environmental and social justice through actions to care for our common home and one another.

Food Systems and Sustainable Agriculture Minor

The Food Systems and Sustainable Agriculture Minor allows students to gain knowledge on the ecological, societal, economic and cultural components of food systems and gain hands-on experience working in an urban agricultural system, allowing them to ultimately employ those skills and knowledge to enrich their lives and the lives of others.

Related Programs

Minor

- Environmental Action and Leadership Minor (p. 947)

Curriculum

Seven (7) Courses (21 credit hours) are required. At least 5 courses must be ENVS. A maximum of 3 courses can count toward both this minor and an SES major. If a student with an SES major is pursuing more than one minor housed in SES, classes taken for one minor cannot overlap with those taken for the second. For students majoring in a non-SES degree pursuing two minors housed in SES may share a maximum of two courses between minors.

Code	Title	Hours
Food Systems Courses		
Select five (5) of the following courses:		15
ENVS 207	Plants and Civilization	
ENVS 223	Soil Ecology	
ENVS 230	Feeding the Planet: Global Perspectives on Sustainability, Culture and Food	
ENVS 325	Sustainable Agriculture	
ENVS 326	Agroecosystems	
ENVS 327	Food Systems Analysis	
ENVS 350F	Solutions to Environmental Problems: Food Systems	
FONU 110	Culinary Explorations	
FONU 215	Fundamentals of Nutrition	
FONU 225	Food as Culture	
ANTH 281	Evolution of the Human Diet	
Social Change Course		
Choose one (1) of the following:		3
ENVS 284	Environmental Justice	
ENVS 310	Introduction to Environmental Law & Policy	
ENVS 311	Natural Resources and Land Use Law & Policy	
SOCL 261	Social Movements & Social Change	
COMM 237	Small Group Communication	
COMM 277	Organizational Communication	
COMM 306	Environmental Communication & Advocacy	
PSYC 277	Environmental Psychology	
Application Course		
Choose one (1) of the following:		3
ENVS 350F	Solutions to Environmental Problems: Food Systems	
ENVS 391	Environmental Research [1,2]	
ENVS 395	Environmental Internship [1]	
Total Hours		**21**

[1] Food/Agriculture related courses only.

[2] ENVS 391 Environmental Research must be taken for 3 credit hours and requires a faculty mentor.

Suggested Sequence of Courses

Course	Title	Hours
Year 1		
Spring		
200-Level Food Systems Course		3
	Hours	**3**
Year 2		
Fall		
200-Level Food Systems Course		3
	Hours	**3**
Spring		
200-Level Food Systems Course		3
	Hours	**3**
Year 3		
Fall		
Social Change Course		3
	Hours	**3**
Spring		
Choose one (1) of the following: [1]		3
300-Level Food Systems Course [2]		
Application Course [3]		
	Hours	**3**
Year 4		
Fall		
Choose one (1) of the following: [1]		3
300-Level Food Systems Course [2]		
Application Course [3]		
	Hours	**3**
Spring		
Choose one (1) of the following: [1]		3
300-Level Food Systems Course [2]		
Application Course [3]		
	Hours	**3**
	Total Hours	**21**

[1] Students need only take two (2) 300-level Food Systems courses and one (1) Application course. The last three semesters of this suggested sequence allow for flexibility to take these requirements based on what courses are offered in the given term.

[2] ENVS 325 Sustainable Agriculture is only offered in the Spring semester. ENVS 326 Agroecosystems and ENVS 327 Food Systems Analysis are taught intermittently.

[3] ENVS 391 Environmental Research must be taken for 3 credit hours and requires a faculty mentor.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

Learning Outcomes

- Describe the structure, function, and ecology of plants, animals, and soils as they apply to industrial and regenerative agrifood systems.
- Describe the system-wide inputs, material-based circularities, and outputs as they apply to industrial and regenerative agrifood systems.
- Develop knowledge, skills, and operational experience of sustainable food production methods and the metrics that define their value.

- Explain the concept of food justice, equity impacts of different food system practices, and ways to ensure healthy, culturally relevant food for all.

School of Social Work

About Us

Founded in 1914, Loyola University Chicago's School of Social Work educates students to become leaders in the profession. Within a learning community dedicated to excellence in scholarship and service, students select a curriculum focused on clinical, organizational, community, and social justice issues.

BSW Program

Loyola University Chicago's School of Social Work's Bachelor of Social Work (p. 987) (BSW) program introduces students to the dynamic, changing, and challenging profession of social work. Loyola University Chicago offers a combined BSW/MSW degree that allows full-time students to complete both an undergraduate and graduate degree in social work in just five years. Students earn a BSW in Social Work degree, blending a top-quality social work curriculum with a strong liberal arts base. Because many first-year MSW requirements are completed during students' senior year, the MSW degree portion of the program can be completed in less time than normally required to earn a master's degree in social work.

Internships

Through relationships with over 1,000 agencies, non-profit organizations, hospitals, and schools in the Chicagoland area, Loyola provides outstanding access to supervised internships.

Continuing Education

The School of Social Work offers a variety of continuing education programs (https://cms4.luc.edu/socialwork/resources-initiatives/).

PRAXIS

Established in 2000, Praxis (https://cms4.luc.edu/socialwork/student-support/journals/) is one of the only student published journals of social work in the nation. The journal offers the scholarly work of students and alumni, providing a forum for the expression of diverse viewpoints and timely research.

Undergraduate Programs

- Social Work (BSW) (p. 987)
- Social Work Minor (p. 988)

Academic Policies

Academic Planning for BSW

Academic planning involves the student, and the social work designated advisor, creating a degree plan, which is a visual term by term pathway to graduation, just like the templates in the MSW program. It involves a working relationship with an advisor who can provide guidance and support through the social work program to ensure that the student is meeting the requirements needed to successfully complete the BSW degree.

Freshman and sophomore students are assigned an advisor in First and Second Year Advising (FSYA); junior and senior students are assigned an advisor in the School of Social Work. Transfer students (students who enter Loyola with 20 or more credits earned in a college or university setting) are assigned an advisor in the School of Social Work.

For advising purposes, first-year students are defined as those students who enter Loyola with fewer than 20 credits hours earned in a college or university setting. Sophomores have at least 30 earned credit hours, including credit earned at other colleges or universities; juniors at least 60 credit hours; and seniors at least 90 credit hours earned. Advanced Placement and International Baccalaureate credits are not counted in the determination of class standing for advising purposes.

Each semester, the School of Social Work advisor notifies all social work majors via e-mail regarding the need to plan their courses for the following semester. Students may schedule course registration advising appointments through the Navigate system. Students are encouraged to schedule individual advising sessions throughout the academic year for general advising, degree completion planning, and urgent academic or personal issues related to matriculation.

Academic Probation

Probation is a status assigned to students when their performance falls under required standards of good academic standing. It is a warning but also a time-limited opportunity for students to work toward improvement. Probationary status is a step that can lead to dismissal if a student does not demonstrate progress or satisfactory growth. The university's formal procedures for dismissal will be applied. Academic probationary status and academic dismissal should be understood as necessary consequences for those students directly involved.

During the period of academic probation, students are not allowed to represent the university publicly. Any exception to this restriction must come explicitly from the BSW Program Director. The student's BSW Program Director determines when a student is placed on academic probation or dismissed for academic reasons.

Generally, academic standing is determined using a basic grade point average (GPA) criterion:

- Students must maintain a grade point average of at least 2.00 to be in good academic standing with the university.
- Students must maintain a minimum grade point average of 2.50 in their required SOWK classes to be in good academic standing with the BSW program.
- Graduation from the university requires at least a 2.00 average for all coursework attempted and a minimum of a least a 2.50 average in a BSW student's required SOWK courses.

There are 2 types of academic probation: Academic Standing and Progress Toward a Degree.

- Any student whose cumulative GPA falls below 2.00 or whose SOWK GPA falls below 2.50 will be placed on probation.
- Students may also be placed on probation for not making progress toward degree completion. Any student whose cumulative GPA is 2.00 or better but who fails to show timely progression toward completion of their degree requirements may, at the discretion of the dean, be placed on probation. In such cases, the dean may require a contract defining the terms under which the student can remove themselves from probation.

Continued Probation

Any student on university probation (GPA below 2.00) and who achieves a term GPA of at least 2.33 during the probationary semester, while not yet achieving a cumulative GPA will be continued on university probation.

Students on SOWK probation (SOWK GPA below 2.50), must achieve a Term SOWK GPA of 2.50 or better at the end of the first probationary semester or they will be dismissed from the program and the School of Social Work. Any student who achieves a Term SOWK GPA of 2.50 or better at the end of their initial probationary semester, while not yet achieving a Cumulative SOWK GPA of 2.50 will be continued on probation for one more semester. A student will be allowed this one additional semester to return to good standing, defined as achieving a Cumulative SOWK GPA of 2.50 or better.

Academic Suspension

Suspension is the temporary removal of a student from class or their internship site due to violation of school or university policies. During a suspension period students will not be allowed to enroll in classes. Suspensions are treated as a time for the student to reflect and gain awareness of areas of growth.

Suspension status is monitored by the Associate Dean for Academics. The student is informed by the Associate Dean when they are placed on suspension, the terms of the suspension, as well as when students have fully met the conditions of their suspension.

Appeal Procedures

Appeal Request for a Change of Academic Record or Status

A student's **Request for Change to Academic Record or Status** (e.g., withdrawal date, emergency withdrawal, leave of absence) must be submitted to describe mitigating circumstances as to why the academic record or status should be changed. Requests made via this form have various deadlines depending on the type of request. Check the University Standards and Regulations (https://catalog.luc.edu/academic-standards-regulations/undergraduate/) under the Withdrawal, Withdrawal from the University (emergency withdrawal), and Leave of Absence sections for the specific request.

Appeal of Final Grade for Courses Outside of Social Work

With very rare exceptions, the final decision on all grades rests with the professor. Students have the right to protection, through fair procedures, against arbitrary and capricious academic evaluations. Arbitrary and capricious means that there is no relation between the grade given and the student's performance in the class. Disagreement or dissatisfaction with a grade thus does not constitute a basis for grievance.

The student's first step in the event of a grade dispute is to confer directly with the instructor.

If the grade dispute is not resolved, a student must submit a formal request using the Academic Appeal Form: Course Grade Dispute (https://catalog.luc.edu/academic-standards-regulations/undergraduate/) for a grade change no later than 30 days into the following semester explaining in detail why the grade is arbitrary and capricious. This form is the only approved process to submit such a request.

If the final grade is assigned in spring or summer semester, the student must submit the appeal no later than 30 days into the fall semester.

If the final grade is assigned in fall or J-term, the student must submit the appeal no later than 30 days into the spring semester.

To provide a forum for the fair resolution of academic disputes involving individual student complaints of the appropriateness of course grades and accusations of academic dishonesty, follow the university process (https://catalog.luc.edu/academic-standards-regulations/undergraduate/). The instructions to appeal are listed under Academic Appeals and the Academic Appeals process has information about the grade dispute and hearing process.

Grade Grievance Policy for Social Work Courses

Academic appeals include questions regarding evaluation of students, cheating on examinations, falsification of research data, and plagiarism. Non-academic appeals include those that arise from matters involving scholarly competence and professional behavior.

Students and faculty are strongly encouraged to attempt to informally resolve problems arising from academic matters. The school hopes that open communication between all parties and mutual confidence in each other's goodwill will lead to the resolution of problems in this manner. When informal attempts at resolution fail, the management of academic grievances involving students in the School of Social Work will proceed according to the procedures set forth below.

Regarding evaluation of students, the academic appeal procedure applies only to those cases in which the evaluation of the student is alleged to be inconsistent with the grading polices outlined in the course syllabus, or in significant violation of clearly established written school and university policies. Appeals regarding final grades must meet one or any of these criteria:

1. based partially or entirely on criteria other than the student's performance.
2. based on a substantial departure from stated standards of evaluation.

In cases other than those noted above, there is not a basis for an appeal. In addition, academic appeals do not include disagreements related to school policy. Students that have constructive feedback regarding school policy may contact the Associate Dean.

Procedures:

1. Students should first attempt to resolve the issue by discussing it directly with their instructor no later than 10 working days after the final grade has been posted.
2. If a resolution cannot be reached with the instructor, students should consult their advisor who will guide the grade grievance policy and the associated procedures. While advisors can provide guidance and support, they cannot contact instructors on students' behalf to advocate for them. All communication regarding the grade grievance must occur between the student and instructor only. The student should include their advisor in all emails with the instructor, so their advisor has up-to-date information about the situation.
3. If the situation cannot be resolved with the instructor, the student submits the *Grade Appeal Form* outlining basis for their grade grievance in their request for an appeal to the BSW Program Director. The appeal should include evidence supporting the student's assertions and must be submitted via email no later than 21 working days after the final grade has been posted. Regarding BSW students, follow the appeal process using *Course Grade Dispute Form*.
4. The BSW Program Director Programs will carefully review the student's grade appeal materials and documentation. To gather relevant information, the Assistant Dean will consult with the instructor who assigned the student's final grade. The Assistant Dean will decide within 10 business days from receipt of the appeal. In

the event the student is appealing a grade for a course taught by the MSW Program Director; to avoid a conflict of interest, the student will submit their appeal materials to the Associate Dean. The decision will be to:
   - Uphold the students' final grade if no computational error occurred and the grade was assigned in a fair and consistent manner; or
   - With the instructor, adjust the final grade if the grade was assigned in an arbitrary or capricious manner.
5. If a student disagrees with the decision of the BSW Program Director, they have the option to appeal to the Associate Dean. The Associate Dean will then review the materials and make a final decision. This decision will be communicated directly to the student, with a copy sent to the Assistant Dean and the student's advisor. This decision of Associate Dean is final and binding. In the event the student is appealed their grade to the Associate Dean, the secondary appeal would be reviewed by the Dean. No further appeals will be considered.

Dismissal from the Major Appeal

Grievances regarding Social Work dismissal decisions are submitted to the BSW Director. The student must submit the Grievance form within thirty days of the dismissal from the major. Students also submit an appeal letter that outlines the nature of the issue or complaint and the results of the student's efforts to resolve them up to the point of the appeal (e.g., time and date of informal meetings, etc.) The letter should provide a short description of the appeal to include the requested outcome. The appeal letter should be no longer than two pages total. In addition, students may attach any documentation to support their claim.

Other information that is required is a copy of the student's unofficial transcript, a contact number, and current mailing address. A meeting with the BSW Program Director to discuss the appeal is optional. If the student would like to request a meeting, they should include their availability within their appeal letter. Otherwise, the BSW Program Director will review the appeal materials and decide. All required information is submitted to the BSW Program Director within the parameters stated above. The BSW Director's contact information is posted on the SSW website on the forms page.

If the BSW Director's determination is not to the student's satisfaction, the student has the right to a final appeal to the Dean. The student must make the final appeal within 30 days of the notification from the BSW Director. The Dean may affirm, modify, or reverse the decision. The Dean will notify the parties of the disposition of the appeal within thirty days of receiving the final appeal. The Dean's decision is final in all cases.

Students who are dismissed but re-admitted to their program must meet all conditions of their re- admission within the outlined timeframes without exception. Students who do not meet all conditions of readmission are dismissed again with no further option to appeal.

Attendance Policy, School of Social Work

Attendance and participation are essential elements of learning in a professional school such as the School of Social Work, whether the class is in-person, asynchronous, or synchronous. Regular and punctual class attendance, as determined by the instructor, is required in all courses.

Each instructor will in their syllabus have the policies for their class. Students are responsible for reading the syllabus for course content and policies like attendance and participation. When something is not clear students should request clarification from the instructor. Students having been approved for an accommodation by the Student Accessibility Center (SAC) (https://www.luc.edu/sac/applywithsac/) are responsible for both following the protocol of the SAC as well as speaking with the instructor at the beginning of the semester to address any questions from the instructor. Should circumstances change during the semester, students must inform the instructor.

All social work students at LUC SSW are expected to arrive on time and remain present until the end of each class, actively participating throughout. Students should always be prepared to fully engage and participate in class discussions, small group activities, lectures, etc., whether in person or online. Late arrivals and early departures disrupt learning and classroom experiences for all students and may result in grade reductions. Undergraduate social work students who are taking non-social work classes will also need to consider attendance policies in the relevant departments of their other classes.

University-Wide Excused Absences

Per Loyola University Chicago policy, students will be excused without penalty for absences due to:

- Religious observance
- Short-term military obligations
- Title IX considerations
- Jury duty

BSW Program Internal and External Transfer Admission Requirements

Students wishing to transfer to Loyola University Chicago's bachelor's in social work (BSW) program from an outside college or university or from another college within Loyola must have a minimum cumulative GPA of 2.00.

If a student has taken any social work classes prior to admission to the BSW Program, the class(es) will only count towards the major if the student earned a "C" or higher. If a student earns a C- or below in a required social work course, the student must retake the course.

BSW Program Transfer Credit

For undergraduate students, Loyola University Chicago offers Transfer Guides (https://www.transferology.com/school/luc/) for students transferring from several Illinois-based community colleges, indicating courses that satisfy Loyola's undergraduate Core Curriculum and specific requirements for the School of Social Work.

Other academic courses not listed on the Transfer Guides may transfer as electives. A maximum of 64 semester hours can be transferred from community colleges, and there's no maximum number of credits that can be transferred from four-year institutions. The BSW Program Director conducts a review of the social work courses intended to transfer as credit into the social work program. The School of Social Work does not give academic credit for work/practice or life experience.

In addition to meeting the Core Requirements of Loyola University and the requirements of the BSW degree program, a minimum total of 120 credits is required for the Loyola Bachelor's in Social Work Degree. The School of Social Work does not give credit for work/practice experience.

The undergraduate studies catalog states that current degree-seeking Loyola students may not take courses at another college or university without previous written consent.

Students should begin the process by meeting with their academic advisor. If the student has compelling reasons for taking a course elsewhere, the student should bring a catalog description of the course

to their academic advisor and request permission. Permission to enroll in a course at an institution other than Loyola is driven by a student's academic need to take a specific course, during a specific term, in combination with extenuating circumstances that prevent the student from being able to take the course(s) at Loyola. Prior to enrolling in a class outside Loyola, students must obtain a signed approval on the "Permission to Take Course Elsewhere" form (https://www.luc.edu/media/lucedu/registrationrecords/pdfs/permission-to-enroll-at-another-university.pdf).

Transferring to the School of Social WOrk from within Loyola
To transfer to the School of Social Work within Loyola, students must complete an internal transfer application, which is available on the School of Social Work website Forms & Handbooks (https://www.luc.edu/socialwork/academics/studentresources/forms/) page, and submit the application to SOWK-Advising@LUC.edu. (SOWK-Advising@LUC.edu) Students will be notified of acceptance, conditional acceptance or denial.

Multiple Degree Seeking Students or Students who Wish to Drop a Second Major
Students who wish to declare a second major along with social work in a different school must complete *Multiple Degree Application* from the School of Social Work's Forms & Handbooks (https://www.luc.edu/socialwork/academics/studentresources/forms/) page. Students who are currently enrolled in multiple schools across the university who wish to discontinue one of the school's major/programs must complete a Request to Discontinue School/College Form (also available on Forms & Handbooks page (https://www.luc.edu/socialwork/academics/studentresources/forms/). Both forms can be submitted to SOWK-Advising@luc.edu.

Dismissals

Dismissal is an outcome that results when a student fails to meet academic and programmatic outcomes. There are several reasons why students may be dismissed, such as failing to meet probation requirements, or if their behaviors in class or during their internship do not meet ethical and professional standards. Students have the right to appeal and can do so following the process established by the university (p. 12).

Dismissal for Insufficient Academic Performance

Any student who fails to achieve a term GPA of at least 2.33 for a probationary semester (unless they restore their cumulative GPA to a minimum of 2.00 at the end of that semester) will be dismissed for insufficient academic performance.

Email Communication Policy

The primary means of communication with students in the School of Social Work is by email, utilizing Loyola-issued email addresses. Students are expected to use Loyola email to communicate with faculty and staff. Announcements, events, changes in procedure, or schedule changes are broadcast by the administration via email. It is the student's responsibility to check email messages on a regular basis.

Grading

Policy in the School of Social Work

Earned credit hours are those that a student receives by successfully passing a course. Attempted credit hours indicate the amount of work the student attempted without reference to grades received. The hours for any course with a final grade other than "W" (withdrawal), "WE" (Emergency Withdrawal) or "AU" (audit) are included in attempted credit hours. Attempted credit hours (except for pass/no pass courses) are used in computing a student's academic average or standing.

The grade "W" is not counted in computation of academic standing as either attempted or earned credit hours, nor calculated in the grade point average. With a complete emergency term withdrawal, the grade of "WE" does not count towards attempted credit hours or in GPA (effective Fall 2022). However, both the "W" and the "WE" count towards attempted hours when determining **Satisfactory Academic Progress** for continued financial aid eligibility.

NR: The notation of "NR" is assigned in instances where the student is registered at Loyola but never attended the course in question and never completed any work for the course. A grade of "NR" does not impact attempted hours or the grade point average.

Course credits for each class vary across the university. When a student registers for a course, the credit hours will be noted in the course description. Independent studies are the exception and can be taken for one, two or three credit hours in consultation with the faculty member who is supervising the independent study.

Letter grades and plus/minus indicators (suffixes) are used by instructors to indicate a student's quality of achievement in each academic course. The grading system below used in the Loyola School of Social Work is the same that is used within Loyola University. As noted in course syllabi, the primary letter grades are assigned using the criteria below.

Grading Rubric
Note: Other majors and minors may use a different grading schedule.

Grades	Grade Points	Percentages	Description
A	4.00	96-100%	Overall performance is **Exceptional**.
A-	3.67	92-95%	Overall performance is **Exceptional**.
B+	3.33	88-91%	Overall performance is **Good**.
B	3.00	84-87%	Overall performance is **Good**.
B-	2.67	80-83%	Overall performance is **Good**.
C+	2.33	76-79%	Overall performance is **Acceptable**; work meets basic expectations set by instructor.
C	2.00	72-75%	Overall performance is **Acceptable**; work meets basic expectations set by instructor.

C-	1.67	68-71%	Overall performance is **Acceptable**; work meets basic expectations set by instructor. A grade of C- requires that social work majors retake the course.
D+	1.33	64-67%	Overall performance is **Poor**; student must retake course.
D	1.00	63-60%	Overall performance is **Poor**; student must retake course.
F	0.00	Below 60%	Overall performance is **Unsatisfactory**; student fails course. Effect of a final grade of F may vary by academic program.
I			Incomplete
W			Withdrew from class within university timeframe
NR			Student has never shown up for class or submitted assignments.

Credit Hour Defined

The credit hour, sometimes called the semester hour, is the standard for computing the amount of a student's scholastic work. One credit hour represents the expected equivalent of one hour of classroom instruction and a minimum of two hours of out-of-class student work each week for the duration of a semester or approximately 15 weeks.

Earned credit hours are those that a student receives by successfully passing a course. Attempted credit hours indicate the amount of work the student attempted without reference to grades received. The hours for any course with a final grade other than "W" (withdrawal) or "AU" (audit) are included in attempted credit hours. Attempted credit hours (with the exception of pass/no pass courses) are used in computing a student's academic average or standing.

Grades and Credit Points

Letter grades and plus/minus indicators (suffixes) are used by instructors to indicate a student's quality of achievement in a given academic course.

Grading for Internships

If a student's performance is considered marginal or problematic, a meeting with the Loyola Internship Liaison, Internship Supervisor and the student (collectively or individually) is held to discuss the evaluation and to help the student use the learning process more effectively.

If a student is asked to leave their internship for any reason or chooses to end their internship prematurely, this is a cause for great concern. In this situation the Internship Coordinator, Loyola Internship Liaison and the Assistant Dean for Student Affairs will initiate a meeting. Every effort will be made to preserve the internship and to maximize the educational benefit of the student's experience through an active collaboration between the Loyola Internship Liaison, the Internship Supervisor and the student.

If removal from the internship is the outcome, it is the responsibility of the Internship Coordinator and Assistant Dean of Student Affairs to meet with the student and to understand the reason for the dismissal. Depending on the circumstances and the outcome of the meeting, one of the following courses of action may be taken:

- The student may be referred to another internship site.
- The student's internship may be deferred to a subsequent semester.
- The student may receive a grade of "F" that will affect their academic standing and ability to continue in their academic program.

A student may appeal any final assigned grade by following the procedures outlined in the Undergraduate Catalog Standards and Regulations (p. 1919) Academic Appeal section.

Quality Points Defined

Quality points are determined by multiplying letter grade credit point value by the credit hours of a course. If a student earns the grade of "A" in a 3-credit hour course, he or she has earned a total of 12 quality points for the course (4 credit points for the "A" multiplied by 3 credit hours for the course). A student who earns a "B+" for a three credit-hour course, therefore, earns a total of 9.99 quality points for the course. Courses in which "F" is earned are counted in the total attempted credit hours and receive zero quality hours.

Grade and GPA Requirements

In accordance with university policy, BSW students must maintain an overall GPA of 2.00. If the GPA falls below 2.0, the university policy for probationary status and/or termination from the university will be followed. For an explanation of this policy, see the Loyola Catalog (https://catalog.luc.edu/academic-standards-regulations/undergraduate/) web page.

All SOWK courses for the major need to be passed with a grade of "C" or above. If the student receives a grade of "C- "or lower in a Social Work course, the course must be retaken. Students may earn a "C-"in social science courses required for the major.

Students must maintain a 2.5 GPA in required social work courses.

Any student whose required social work course (SOWK) GPA falls below 2.5 will be placed on School of Social Work academic probation. Students are allowed no more than two semesters on academic probation. Students placed on probation are limited to enrolling in a maximum of 15 credit hours during the semester of probation, with students encouraged to take 12 credits during their first probation semester.

Honors Awards

Laudatory Status

A student who earns a minimum of 60 credit hours at Loyola and:

- A minimum cumulative Loyola GPA of 3.50 will graduate cum laude (with honors);
- A minimum cumulative Loyola GPA of 3.70, will graduate magna cum laude (with high honors);
- A minimum cumulative Loyola GPA of 3.90, will graduate summa cum laude (with highest honors). Further information can be found at the Loyola Graduation Honors (https://www.luc.edu/academics/catalog/undergrad/reg_graduation.shtml/) web page.

Dean's List

The Dean's List is a semester-by-semester acknowledgement of BSW students taking 12 semester hours or more who obtain at least a 3.50 grade point average in any given academic semester. Students on the Dean's list receive a letter from the Dean.

Pass-No Pass Option

BSW courses do not offer a Pass/No-Pass option. Students should be aware that the appearance of "P" and "NP" grades on their transcripts may have an adverse effect on changing their major or minor curriculum, transferring to other schools, and acceptance by graduate or professional schools. Electives that fulfill other BSW requirements must be taken receiving a course grade. Students taking courses to fulfill requirements for other majors should consult with that school/department.

Auditing Courses

Students wishing to take a course without receiving credit may audit the course. Applicable tuition will be charged. Though a course that is audited does not count as hours attempted, auditors are required to attend class and will be awarded the mark of "AU" upon completion. "AU" does not affect a student's GPA. Failure to attend class will result in the final mark of "W." Assignments, including examinations and term papers, are not required, but auditors have the right to participate in class discussion. Only students who are registered and rostered as auditors will be granted access to Sakai and other course specific media for which registration is required. A course may not be converted to audit status after the first two weeks of the semester or the first week of a summer session.

Permission to audit a course must be obtained from the Associate Dean for Academics and the course instructor. The request form can be obtained from the School (https://www.luc.edu/media/lucedu/socialwork/pdfs/academicadvising/bswforms/Course_Audit_Request.pdf) of Social Work (https://www.luc.edu/socialwork/) web page.

Incomplete Grades

Students are expected to complete coursework by the end of the semester. If the professor agrees in advance, however, students may be awarded the grade of "I" at the end of the semester. Students must obtain written permission from the instructor for an incomplete grade to be entered into LOCUS.

Policy for Granting Incomplete Request

- Attendance, participation in class and completing work in the class has been satisfactory and the student's work to date meets the minimum requirements to pass the course.
- At least 75% of the coursework has been completed.
- A documented extenuating circumstance legitimately prevents completion of the required work by the due date.
- The required work will be able to be completed in the time frame allotted for the make-up work, six weeks into the next semester.
- The student will complete the same work that the class completed. If there is any possibility that academic integrity would be violated by this process, an equivalent assignment(s) or examinations may be administered by the faculty.
- The student may not retake any portion of the class to complete the incomplete.
- For an understanding of how a grade of incomplete affects financial aid, please visit **here**.

Process to Request an Incomplete Grade

- A faculty member may not enter a grade of "I" or incomplete without first having the student request the incomplete using this **form**. The grade of Incomplete is not a substitute for a failing grade in a course
- Should a student fail to sit for a final exam or project, the faculty member includes a grade of zero on the exam or project in the calculation of the final grade. If the student was unable to request the incomplete during the term and requests the incomplete after grades have been posted **AND** the request for an incomplete is approved, the faculty member will request a change of grade in LOCUS for the posted grade and change that grade to an "I".
- The student submits this **form** to each instructor where an incomplete is being requested. The form must be filled out to include all deliverables and their respective due dates that the student owes. Both the faculty member and the student must sign the form. Faculty members must submit the completed incomplete form to the student's school/college.
- If the Incomplete course is a prerequisite to a course the student has enrolled in for the following term, either the incomplete must be completed and a final passing grade posted, or the student must withdraw from the next course in the sequence.
- If the coursework for the incomplete has not been completed by the deadlines agreed to with the student, the faculty member shall submit a change of grade in LOCUS that includes a complete calculation of work completed plus zero for all work not completed.
- If a change of grade is not submitted by the faculty member at the end of the time period to complete the Incomplete, a grade of "F" will be assigned.
- A student may not graduate with a grade of incomplete on their transcript.

The incomplete work should be finished according to the schedule approved by the professor but no later than six weeks into the next semester. For an incomplete approved in the spring, the work should be finished no later than 6 weeks into the fall semester. If the coursework for the incomplete has not been completed by the deadlines agreed to with the student, the faculty member shall submit a change of grade in LOCUS that includes a complete calculation of work completed plus zero for all work not completed.

Students who have been granted an incomplete in a social work course and then take a leave of absence from the program are still responsible for submitting all work within the designated time frames for their incomplete coursework unless formal approval is obtained from the BSW Program Director and the Associate Dean for Academics. The Undergraduate Request for Incomplete (https://www.luc.edu/media/lucedu/registrationrecords/pdfs/UGRD_Request_%20for_Incomplete%20-%20August272024.pdf) for can be found on the School of Social (https://

www.luc.edu/socialwork/academics/studentresources/forms/) Work web page.

Students may also receive an "I" grade in their internship if they have not completed their internship hours prior to the end of the semester. To be eligible for an incomplete grade, 75% of the internship hours (150 hours generalist level) need to be completed and submitted. An incomplete grade (p.) allows an additional 6 weeks into the next semester to complete the hours and internship documentation. If the deadline is not met, the course grade will become a failing (F) grade.

If there is a need for additional time to complete internship hours, students must first speak with their Internship Supervisor to determine a plan for completion. It is the student's responsibility to inform their liaison of this plan.

Students who are granted an incomplete grade and subsequently take a leave of absence from the program are still responsible for submitting all required work within the designated periods indicated on their incomplete form. Students granted an incomplete grade and subsequently withdraw from the program will receive a final grade based on the work completed and submitted.

Graduation

Students must complete 120 hours to graduate. Students must have a minimum cumulative 2.00 GPA. They must also have a minimum cumulative 2.00 GPA in their Core Curriculum.

Students must have a minimum of 2.50 GPA in required Social Work courses.

Students must file an application for their degree before the assigned dates: Fall graduation: March 1, Spring graduation: October 1, Summer graduation: October 1.

Students apply for graduation in LOCUS. They are responsible for adhering to the time frames that are listed on the Registration and Records website for application. Students that miss the deadline will be required to submit a late graduation application and $30 late fee.

Required Hours in Residence Needed for Graduation

In-residence hours refer to the course credit hours taken at Loyola University, the Rome Center, or taken from any of the Loyola sponsored study abroad programs through the Office for International Programs.

Students must take their final, uninterrupted 45 hours of instruction or a minimum of 60 hours in residence at Loyola University Chicago.

Independent Study

Independent study is an optional component of the social work curriculum that is developed by the student and a faculty member committed to directing the independent study course. Together with a faculty member, students may devise a research/writing/activity program appropriate for an independent study. The student develops a plan and performs activities, then reports their implementation and results to the designated faculty member.

Independent study is intended to supplement and enrich the elective course selection of the curriculum. Independent studies are NOT used to substitute required courses. An independent study course may offer one, two, or three credits. Students can only do one independent study per semester.

The maximum number of credits that can be earned by a student through independent study is six credits. Note: students with majors/minors in departments/schools outside of social work should check with that department for rules.

An independent study is formalized when:

- After a student presents a potential course of study to the chosen full-time faculty member, the faculty member must agree to sponsor the course of study proposed by the student.
- The faculty member and student contract together regarding the expectations for the course. A major product is required but will vary depending on the nature of the proposed course agreed upon with the faculty member. For specific information, including timelines, about the independent study process, students should consult with their advisor. All independent studies must be formally approved by the BSW Program Director.
- An Independent Study Request Form can be found on the School of Social Work website (https://www.luc.edu/socialwork/academics/studentresources/forms/). A copy of the completed form with the faculty member's signature, including a written proposal summarizing the final product to be submitted should be given to the BSW Program Director for formal review and approval. Other copies should be kept by the student and the instructor. The BSW Program Director will register the student for the course via LOCUS after the above procedure has been completed. Note that students will need to report the number of credit hours requested on the independent study form if it is beyond one credit hour. For registration purposes, SOWK 360 represents the BSW independent study course.

Internships

Overview of Generalist Internship Requirements

Loyola School of Social Work BSW students complete a first-level generalist internship. In this generalist internship, students learn and gain experience with foundational elements of social work practice. Students in a first-level generalist internship are expected to gain a general sense of an agency's programs, services and policies. Potential internship tasks involving direct service include administering paperwork; conducting intakes, assessments, and documentation; practicing case management; and engaging in research projects. Students in first-level generalist internships will not conduct individual or group counseling on their own, since this is considered a second-level specialized-level skill set. Students should spend 50% of their time in direct service.

At our school we use an online platform to manage internships called SONIA and it is through this system that students apply and get access to listings of sites. Once potential sites are chosen students undergo a process similar to interviewing for a job and both students and internships decide if they are a good fit. You will find internship application instructions on the internship page (https://www.luc.edu/socialwork/academics/internships/).

Objectives for BSW Generalist Internships

The internship experience is the signature pedagogy of social work education and is, accordingly, an integral and essential component of the curriculum. The BSW internship is considered a first-level generalist experience identical to the MSW first-level generalist internship experience. Students pursuing a BSW first-level generalist internship will be concurrently enrolled in, or have previously completed, the prerequisite generalist-level courses. In these internships, students gain experience in agency settings and engage in first-level generalist-supervised social work direct practice. These positions provide valuable opportunities to apply classroom learning in the internship. Through the internship, BSW students refine their professional social work skills and integrate

classroom course content with on-the-job experience with service provision, outreach, networking, and resource development.

Attendance at Internship

- Consistent attendance at the internship is critical to the success of the student. Unless other arrangements are made, a student should follow the agreed-upon work schedule. Note that lunch hours and breaks do not count towards internship hours unless a different arrangement is made with the student's Internship Supervisor.
- An average scheduled internship day typically is seven to eight hours, excluding the lunch hour, and is based on the schedule of the student's internship site. Some sites require students to make a school year or full-year internship commitment from August-August. If students accept an internship with this type of schedule, they are required to honor that commitment through the end of the internship.
- It is the student's responsibility to inform their Internship Supervisor about illnesses, medical needs, and personal matters which may affect the student's attendance or performance and to work with the Internship Supervisor to adjust their schedule or arrange make-up hours. Students are expected to discuss any implications of religious holidays on their internship schedule. If students observe religious holidays, they must request time off from their supervisor for these holidays in advance. Students are expected to make up these holiday hours.
- Inconsistent attendance or other issues can lead to a student's receiving a Supportive Learning Plan and/or being terminated from the internship.

Travel to Internship

Students may be asked to travel up to one hour or more to their internship site using CTA, Metra, or car. Travel time to and from the internship site does not count toward the total internship hours required. Travel to the internship is the responsibility of the student and must be paid for by the student using a university UPASS transportation account or personal funds.

BSW Generalist Internship Process

- The SONIA Online database is Loyola University's School of Social Works internship management system. Students enrolled in the School of Social Work are automatically added to the database. However, the internship process begins when the student completes the BSW/first-level generalist internship application through the SONIA database. To see internship sites in SONIA, students must submit their application before the "access date." Students who apply after the access date will be added to SONIA as soon as their internship application is processed. Note that while students can apply for internships throughout the year, opportunities become more limited close to the start of the semester. We, therefore, recommend that students start the internship process as soon as SONIA's access is available. Please review the relevant dates on the Loyola School of Social Work internship page (https://www.luc.edu/socialwork/academics/internships/). When a student submits an internship application, they will be added to the internship group in SONIA as well as to the Sakai BSW/first-level generalist site. On the Sakai site, students will be able to view a tutorial with more information about the BSW/first-level generalist internship.
- Students review potential internship sites in the SONIA database. BSW/first-level generalist students should focus on commuting distance to the site and use the SONIA filters to identify potential opportunities. Prospective interns should keep in mind that they may be required to travel up to an hour or more each way to the site, that this time does not count toward internship hours, and that they are not reimbursed for travel costs. Students can initially indicate a preference for up to five sites, and each site's preferred contact process is included in the database. It is recommended that students continue to contact two or three sites per week until they secure an internship.
- If the internship site responds to an application by stating that they are no longer accepting interns for the current semester, please forward the information to the Internship team so that the SONIA database can be updated.
- If a student uses their personal vehicle to travel to and from the internship site or during their internship work, the student is responsible for maintaining auto insurance coverage. Loyola University's auto insurance policy does not apply to student internships. Students are not permitted to transport agency clients in their own or others' personal vehicles. Students may use an agency vehicle during internship if the student is covered by the agency's insurance policy and the activity is related to the student's learning agreement. If driving an agency vehicle is an internship requirement, students must confirm that the agency maintains insurance on its vehicles and clarify relevant policies (e.g., who is authorized to drive agency vehicles, gas reimbursement, etc.).
- Agencies screen students for interviews based on their cover letter, resume, student needs, and site needs. Not all referrals or student outreaches will result in an interview. Students should approach an invitation to interview for an internship as they would an employment interview. Students should be on time for the interview, dress appropriately (in business attire), research the site, bring multiple copies of their resumes, and be prepared with a list of questions about the position or agency. Students are expected to send thank you emails after interviewing.
- Note that an interview does not guarantee an internship. Many sites are selective, and the process can be competitive. Keep in mind that sites are interviewing students from many programs and schools.
- Students are expected to accept internships if they are offered one. If a student does not feel comfortable with an internship because they feel the location is unsafe, they should contact the Internship Coordinator to discuss their concerns. Note that students cannot accept two offers or accept an offer and continue to interview with other agencies. Once a student accepts an offer, the internship selection process is over. If a student is simultaneously offered internships at two sites, the student must decide which offer they will accept and then respond professionally and decline the other offer. The student must do this in a timely fashion so that sites may continue their search. If a student has concerns or questions about an offer, they should contact the Internship Coordinator.
- Once the student has accepted an internship, they should complete the Internship Confirmation Form on the SONIA database. This form asks for the supervisor's contact information as well as the internship's start and end dates. The student and the supervisor should decide the starting and ending dates together, and the dates should be as specific as possible. Once the Internship Coordinator receives the Internship Confirmation, the internship allocation in SONIA is concluded and the student and Internship Supervisor will receive an internship confirmation email. A Loyola Internship Liaison for the internship will be assigned before the semester begins.
- Internship schedules are agreed upon between Internship Supervisors and students. Students in their first-level generalist internship can expect to be at their site on Tuesdays and Thursdays (15 hours per week) for a total of 400 hours over two 15-week

semesters. Note that some sites may ask students to be available on days outside of the days listed above.

- If a student is unable to secure an internship after interviewing with multiple sites, we recommend the student contact the Internship Team to schedule a meeting to discuss the process, review the student's approach to interviewing and their application materials, and share any feedback offered by agencies. The goal of such a meeting is to plan the next steps to ensure a student's success in the internship.

Professional and Ethical Expectations for Internships

- Students must abide by the NASW Code of Ethics (https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/) throughout their academic career at Loyola University, both in the classroom and at their internships.
- Students should communicate often with their Internship Supervisors to obtain maximum benefit from the student-instructor relationship. It is appropriate for students to look to Internship Supervisors for supervision and for help developing the knowledge, skills, values, and techniques relevant to the practice of social work.
- Students are responsible for communicating their educational needs and interests to Internship Supervisors. This includes requesting more extensive learning opportunities, as well as expressing interest in being involved in other services or programs offered by the internship site.
- Students are responsible for discussing with Internship Supervisors and/or Loyola Internship Liaisons any areas of disagreement, dissatisfaction, or confusion with respect to any part of the internship learning experience. It must be emphasized that if a student is having problems or struggling during an internship, it is the student's responsibility to communicate such information promptly and thoroughly to the Internship Supervisor and/or the Loyola Internship Liaison so the student's needs may be addressed in the internship's early stages. Additionally, if a student is asked to do something during an internship that feels unsafe or uncomfortable or that is prohibited by this manual or another LUC policy, the student should immediately inform the Loyola Internship Liaison or Internship Coordinator.
- Information shared by the student and the Internship Supervisor and/or Loyola Internship Liaison is not considered confidential as it is considered part of your overall education. (Client specific information is considered confidential).
- Students are not permitted to use personal phones or other communication devices during internship hours except for emergencies or safety concerns. Any personal device used during internship hours should be discussed and approved by an Internship Supervisor.
- Students may have access to computers and confidential information at an internship site. Students must follow the agency policy on the use of their computers and follow internship site policies related to confidential information and records. See the Loyola Information Technology Services (https://www.luc.edu/its/) site for more information.
- Students must maintain professionalism at their internship site. Inappropriate online comments or photos may be considered a breach of ethics and could result in dismissal from the program.

Students must dress appropriately during internships. Standards of dress are determined by the internship site. Internship is the component of the curriculum that is considered the signature pedagogy of social work education. As a professional school students need to demonstrate not only classroom-based knowledge but an ability to integrate theoretical knowledge into practice. Internships provide a learning environment in real-world social work settings while receiving guidance and supervision.

Internship instruction is designed to:

- Enable students to acquire, integrate, and further develop knowledge and skills related to social work practice through a practicum experience.
- Educate on how to use a biopsychosocial spiritual framework to understand and improve the adaptive functioning of individuals, families, and small groups.
- Apply interventions in larger societal systems and developing and managing agency programs and staff.
- Implement a "person in environment" lens and understand that clients are affected by a number of elements that interact in highly complex ways across various system levels.

In the internship experience, the student focuses on first-level generalist elements at the first-level generalist and on specialized practice at the second-level specialized while integrating the knowledge and skills learned in other parts of the curriculum. Within a practice setting, the student can operationalize values regarding the inherent dignity of all human beings and the importance of social justice and social responsibility that have traditionally been central, not only to the School of Social Work at Loyola, but to the social work profession itself. For this reason, it is a matter of importance to ensure that Loyola's internship program includes service to a variety of client groups, including people of different ages, genders, races, ethnic backgrounds, socioeconomic levels, and lifestyles, as well as addressing a variety of presenting problems and systems beyond the individual client or family.

In concert with the curriculum, the focus of the Loyola program includes outreach, prevention, advocacy, community involvement, program and staff development and management, as well as intervention methodologies with individuals, families, and small groups. Throughout the internship sequence, there is an emphasis on the formation and the utilization of the professional helping relationship regardless of the methodology to be utilized within that relationship or the system level engaged by the student and agency.

Class and Internship Scheduling Conflicts

The Internship Team and Student Affairs acknowledge that orientations and other training or learning activities provided by internship sites may be available only during class times. Students are not excused from class in order to attend internship events or complete internship-related activities. However, students are free to choose whether to miss class or the internship activity. Students should communicate with their instructors and Internship Supervisors ahead of time about any time conflicts and should ask for more information about how missing class or an internship activity could affect them. If students choose to miss class, they may be marked absent and may not be permitted to make up attendance points for missing a class session. Making choices and decisions is part of the learning process, and students should do what they feel is best for their learning and their future social work career.

Evaluations

Evaluations by the student's Internship Supervisor are used to measure the student's progress in their internship. Evaluations offer the student feedback, inform them of their progress and level of performance, and provide them with opportunities for learning and development. The student will have two written evaluations: the midterm evaluation,

completed at the halfway point of the internship, and the final evaluation, completed at the end of the internship.

The Internship Supervisor will initiate both the midterm and final evaluations on the SONIA database (these evaluations are part of the "3 in 1" form). The Internship Supervisor and the student should meet to discuss the evaluation and the student's progress toward learning goals and objectives, which are defined by nine CSWE competencies (p.). The midterm evaluation should help the student identify where they can grow and enhance their practice, so that they can use the second half of the internship to integrate the Internship Supervisor's feedback and improve their skills in line with it. The student and the Internship Supervisor should review the evaluation before the Internship Supervisor enters it online.

Students' level of competency in their internship activities and learning goals is evaluated on the following Likert point scale:

1. **Not Applicable:** Does not relate to the student's internship experience, or there is insufficient experience to evaluate skill level.
2. **No Competency:** Demonstrates no competency in this area.
3. **Demonstrates Minimal Competency:** little knowledge or skill, limited evidence of growth or change, rarely demonstrates progress on tasks and behaviors, and takes little initiative for learning.
4. **Developing Competency:** with some coaching or prompting, demonstrates some skill; marginal competency in working towards improvement; there is a beginning level of skill development; needs continued practice and assistance; progress on tasks and behaviors is inconsistent; and inconsistently takes initiative.
5. **Emerging Competency:** demonstrates the ability to independently apply skills in simple situations; moderate competency; demonstrating ongoing progress; adequate performance and just needs more practice; and takes initiative for learning.
6. **Demonstrates Competency:** beginning to independently apply skills in simple or complex situations; there is moderate competency and ongoing progress; adequate performance with a need for more practice; and takes initiative for learning.

Please note that both the 1 and 2 ratings indicate that the student is performing at an unacceptable level in that area, and that performance improvement is necessary. Receiving a rating of 1 or 2 in the first semester of an internship may be appropriate if a student is in the early phase of developing these skills and is still learning about their specific internship and the internship of social work. If a student receives several scores of 1 ("Demonstrates No Competency"), the Internship Supervisor is responsible for contacting the Loyola Internship Liaison to express concerns about specific competencies towards which the student is not making progress.

If a student's evaluation shows cause for concern, the Internship Supervisor should work with the Loyola Internship Liaison to develop a written Supportive Learning Plan, which will be uploaded to the SONIA database. This plan should include specific information about the behavioral changes necessary and a time period within which the problems noted will be addressed and rectified. The Supportive Learning Plan template is available on the Loyola School of Social Work's Forms (https://www.luc.edu/socialwork/academics/studentresources/forms/) page.

Internship Forms and Due Dates

All internship forms can be found in the SONIA database or on the Loyola School of Social Work Forms & Handbooks (https://www.luc.edu/socialwork/academics/studentresources/forms/) page. Note the important due dates below:

Learning Agreement: Due within 30 days of beginning an internship (within 60 hours for Summer Block internship).

Student Self-Evaluation: Due at the end of the internship

Evaluation Due Dates

- **Fall-Spring Internship:** Midterm evaluation due in December; Final evaluation due in May
- **Spring-Summer Internship:** Midterm evaluation due in May; Final evaluation due in August
- **Summer Block Internship:** Midterm evaluation due in July; Final by August for first-level generalist students
- **SWEAP Assessment:** Due within one week after the final evaluation is submitted
- **Student Self-Evaluation:** Due within one month after the SWEAP assessment is submitted

Internship Requirements and Expectations

Internship Course Enrollment

Students must enroll in an internship course for each semester that they participate in an internship. BSW students are required to complete two semesters or a summer block of internship courses in order to graduate. Students must enroll in the internship course before the first day of the internship. Failure to enroll in the internship course will directly affect the start date of the student's internship. Please note that the internship course provides liability insurance through the duration of the internship. Students should review their course templates with their academic advisors.

Internship Site Requirements

As part of pre-orientation before an internship's scheduled start date, internship sites may ask students to complete and submit additional application materials and screenings. These may include immunization records, additional references, letters of recommendation, drug tests, background checks, documentation for physical exams, proof of health insurance coverage, or medical tests (e.g., tuberculosis screening). Students are responsible for completing these requirements and submitting records to their Internship Coordinator or site contact as needed.

Many agencies pay the cost of required background checks or drug tests, but some require students to pay these fees. Loyola does not have the resources to pay for the cost of these tests. If questions come up regarding any agency tests or requirements, students should contact their Internship Coordinator.

Felony and misdemeanor convictions can affect students pursuing certain internships. Students should work closely with their internship coordinator in seeking an internship location.

Internship Timeframes

Internships must be completed within the available timeframes in order to ensure students can meet this requirement as part of their academic plan. Students may complete their internship fall-spring, spring-summer, or as a summer block. The first-level generalist internship requires 400 hours.

Fall to Spring Internship

These internships start at the beginning of the fall semester and go through the end of the spring semester. They typically begin in late

August or early September and continue through late April or early May. Students typically complete 15 hours per week over the 15-week semester.

Spring to Summer Internship
These internships start at the beginning of the spring semester and go through the end of the summer semester. They typically begin in January and continue through August. Students typically complete 15 hours per week over the 15-week semester.

Summer Block
Summer Block internships are a full-time intensive immersion. These internships are the equivalent of two semesters of internship, and students are required to work 35-40 hours per week. Note that students cannot work more than 40 hours/week. Generalist summer internships usually begin in mid-May and end in August (an average of 35 hours per week over 12 weeks totals 400 hours).

Learning Agreement

The Council on Social Work Education (CSWE) establishes competencies or learning outcomes for the generalist year and students are assessed based on them. Students in the BSW program are required to complete 400 internship hours toward their degree. The School of Social Work recognizes that each site provides various learning opportunities and that therefore supervisors can tailor students' learning agreements to reflect the agency's specific mission and goals. The required internship courses are: SOWK 330 Internship I and Simulated Experience, and SOWK 340 Internship II and Simulated Experience.

At the School of Social Work, we use an online platform to manage internships called SONIA and it is through this system that students apply and get access to listings of sites. Once potential sites are chosen, students undergo a process similar to interviewing for a job and both students and internships decide if they are a good fit. You will find internship application instructions on the Loyola internship website (https://www.luc.edu/socialwork/fieldwork/deadlines/).

Within 30 days of the start of the internship (about 60 hours into 400 hours of the internship), the student and their Internship Supervisor will complete a Learning Agreement (https://www.luc.edu/socialwork/academics/studentresources/forms/) in the SONIA database. (The Learning Agreement is part of the "3 in 1" form.) This agreement defines the learning goals and objectives for the internship, and these goals and objectives will form the basis for the student's evaluations at the end of each semester. The student and their Internship Supervisor should discuss the student's learning style, the agency's expectations, and the learning goals that the student and Internship Supervisor want to accomplish.

Failure to complete the Learning Agreement within the 30-day timeframe may result in the student's inability to count internship hours occurring after the first 30 days and until the Learning Agreement is completed. For hours to count towards completion of the internship, the Learning Agreement must be completed and signed by the student, Internship Supervisor and Loyola Internship Liaison through the SONIA database within the 30-day timeframe.

If a student does not meet the expectations outlined in the Learning Agreement, the internship site may request a meeting with the student, their Internship Supervisor and the Loyola Liaison to fill out a Supportive Learning Plan, which will clarify the internship requirements and make any changes that are necessary to maintain the internship and ensure success. The Supportive Learning Plan template can be found on the home page of the SONIA database under "resources," as well as on the Loyola School of Social Work Forms & Handbooks (https://www.luc.edu/socialwork/academics/studentresources/forms/) page.

Procedures for Resolving Conflicts in Internships

As in any professional setting, issues may arise during internship that require additional attention and support to resolve. Students and their Internship Supervisors shall follow this general process when working to resolve areas of conflict or concern.

1. The student and Internship Supervisor will attempt to resolve the conflict or concern through the supervisory process. The timeline will be defined on a case-by-case basis.
2. If Step 1 proves unsatisfactory for either party, the student and/or Internship Supervisor can request a meeting with the Loyola Internship Liaison. The Loyola Internship Liaison will meet with the student and Internship Supervisor and help resolve the conflict or concern.
3. One outcome of Step 2 can be a Supportive Learning Plan in which the specific concerns are formally outlined along with the corrective actions that the student must make within a certain time frame. The Supportive Learning Plan also outlines how the Internship Supervisor will support the student to move forward and make progress. The Supportive Learning Plan template is available on the home page of the SONIA database and on the Loyola School of Social Work Forms & Handbooks (https://www.luc.edu/socialwork/academics/studentresources/forms/) page.
4. If Step 3 proves unsatisfactory, any of the parties involved can request a meeting with the Internship Coordinator and the Director of Internships & Career Services. The Internship Coordinators can set up meetings with any of the parties involved and help resolve the conflict or concern.
5. If Step 4 proves unsatisfactory, any of the parties involved can request a meeting with the Assistant Dean for Student Affairs. The Assistant Dean can set up meetings with any of the parties involved and help resolve the conflict or concern.

Requesting Time Off

Students must formally request time off in advance during an internship, just as one would request time off during professional employment. All time off requests during the internship must be approved by the Internship Supervisor. Students must discuss exact vacation dates with the Internship Supervisor and take into account the needs of the agency and the clients. Note that students are expected to continue with internships through fall, winter, spring, and summer breaks when class is not in session, unless otherwise specified by the internship site. Some internships give students time off during breaks or when classes are not in session, while others expect students to work at the internship site during their academic break(s). When taking approved time off, students who carry caseloads should inform clients ahead of time about when they will be away. Before time-off begins, students have the responsibility to keep case notes up-to-date and to inform the Internship Supervisor of any substitute client activities which should occur while the student is away. Students are responsible for making up any hours they miss from the internship due to illness or pre-approved time off.

Securing an Internship Site

Students are required to complete their internship hours during the 16-week semester. Students are required to start their internship by the first day of the semester. Students can start their internship up to two weeks prior to the first day of classes. Exceptions to this may be select hospitals, the VA or schools that have an alternative schedule. This will

be highlighted in the internship database. Students must complete their internship hours as per policy.

Students are allowed to do one remote internship only. If a student is in a remote internship for the BSW program and then pursues the Advanced Standing program, the second internship for the MSW degree cannot be remote.

Student Self-Evaluation of Internship

BSW students are asked to evaluate their progress in their internship through self-evaluation. These evaluations should be completed at the end of each semester, and the forms will be made available to students through e-mail. Self-evaluations are submitted only to the Internship Coordinator and Student Services staff (i.e., School of Social Work advisor) and are not shared with the Internship Supervisor or Loyola Internship Liaison.

Supervision, Feedback, and Evaluations

- Students should have one hour of weekly supervision with their assigned Internship Supervisor. Some agencies may offer group supervision in addition to individual supervision. Alternative supervision arrangements or options may also be approved by the Internship Coordinators. Students have the responsibility to attend supervision meetings with the Internship Supervisors and be prepared for these meetings. Students are expected to maintain their scheduled meeting times and should communicate directly with their supervisor if they must miss an appointed supervision. Students should take the initiative to follow up with Internship Supervisors to reschedule if supervision meetings are canceled.
- Students are responsible for ensuring that their assigned Internship Supervisor has access to evaluation links and other required forms. Students should meet with their Internship Supervisor to review and discuss both the midterm and final evaluations. Evaluating the students' performance in the internship should be a joint process between the student and the Internship Supervisor.
- Students should evaluate their learning experience, performance, and professional development with their Internship Supervisor and Loyola Internship Liaison throughout the internship experience.

Termination of Internship Policy

A student who self-terminates an internship without approval of the Internship Team or is terminated by an agency will receive a failing grade in the corresponding internship course (SOWK 330 or 340).

If it is determined that the student is allowed to retake the SWII course, the student will first participate in a Professional Improvement Plan (PIP) meeting with the Internship Team and complete a Professional Learning Plan (PLP). The student should also work with their Internship Coordinator to identify another internship. The Internship Team will determine if a Professional Transition Plan (PTP) is necessary.

Description of Required Meetings and Documents:

- **Professional Improvement Plan (PIP):** A meeting with members of the Internship Team to review the circumstances related to the student's termination. A Professional Learning Plan will be assigned during this meeting.
- **Professional Learning Plan (PLP):** A document based on the Social Work Competencies; the details of the assignment will be specific to the student's termination situation.
- **Professional Transition Plan (PTP):** A meeting with members of the LUC SSW administration to discuss the student's challenges in the internship and to review the student's next steps related to the MSW program, utilizing a strength-based approach.

Tracking Internship Hours

- Students must submit their time sheets weekly through the SONIA online database. The Internship Supervisor will review and sign off on the agreed-upon hours on a weekly basis. It is the student's responsibility to ensure that timesheets are being approved, and students should contact their Loyola Internship Liaison with any concerns. Students should also keep a copy of their time sheets for their records.
- Internship hours consist of approved training and learning opportunities provided by the internship site. Internship hours should also include a weekly scheduled supervision time with an assigned Internship Supervisor and appropriate amounts of time to complete tasks and projects relevant to the internship level.
- It is important to complete and submit documentation in a timely manner. Students must submit timesheets and internship hours during the internship timeframe in order to have them approved. Hours submitted but not approved and hours submitted after the internship concludes will not be included.

Incomplete Grade for Internship

Students may receive an "I" grade in their internship if they have not completed their internship hours prior to the end of the semester. To be eligible for an incomplete grade, 75% of the internship hours (150 hours at the generalist level) need to be completed and submitted. An incomplete grade allows an additional 6 weeks into the next semester to complete the hours and internship documentation. If the deadline is not met, the course grade will become a failing (F) grade.

If there is a need for additional time to complete internship hours, students must first speak with their Internship Supervisor to determine a plan for completion. It is the student's responsibility to inform their liaison of this plan.

Students who are granted an incomplete grade and subsequently take a leave of absence from the program are still responsible for submitting all required work within the designated periods indicated on their incomplete form. Students granted an incomplete grade and subsequently withdraw from the program will receive a final grade based on the work completed and submitted.

NP Grade for Internship

Circumstances may arise during an internship where there is insufficient time to create an educational plan to remedy a student's difficulties, or where there is a violation of sound practice or ethics that requires immediate action to protect the client, the agency, or the school. This may be the case if a student exhibits behavior which indicates unsuitability for the social work profession, such as: inability to engage clients; inability to follow the Internship Supervisor's directions; inability to respect agency structures and negotiate within them; continuous errors in judgment; inability and/or unwillingness to explore and utilize modalities and theories learned in the classroom as appropriate to the client and situations; or other inappropriate behavior. These behaviors may result in an "NP" grade.

In such a situation, the Internship Supervisor or Loyola Internship Liaison shall immediately notify the student that the internship course has been terminated, and the grade of "NP" will be entered. The Internship Supervisor will submit, with or without the student's signature, a termination evaluation for the semester that describes the problem in detail along with the recommended grade of "NP."

The NP grade is a failing grade in an internship. Students in the generalist internship who earn NP will have to re-enroll in the class and start their internship again. In addition, the student will be placed on academic probation while repeating the internship. There is only one opportunity to repeat the internship. If a student earns a second NP grade, they are dismissed from the program.

Students can appeal the dismissal by writing an appeal letter to the Dean within 10 business days of receiving the dismissal letter from the Associate Dean. The Dean will respond with a decision within 10 business days of receiving the appeal letter. The Dean's decision is final and will be issued in writing within 10 business days.

Leave of Absence

Students may request a one-semester leave of absence. A leave of absence should be requested prior to the start of a fall or spring term, and no later than the final date to withdraw from said term with 100% refund. A student's tuition and fees will be based upon the date of withdrawal. To request a leave of absence, a student must submit the **Request for Change to Academic Record or Status** form indicating the reason (e.g., illness, family crisis, etc.) for the request. The Associate Dean of Academics of the School of Social Work, acting on a case-by-case basis, will have sole authority to grant leave requests. During a leave of absence and at least one month prior to the subsequent semester, the student must inform their academic advisor in writing of an intention to return, through the Loyola email or the Navigate systems. Students who request and receive a leave of absence for one semester will not need to reapply through the Office of Undergraduate Admissions unless they have attended a college or university elsewhere. Students who receive a leave of absence will return to their same academic program under the catalog year requirements that were in place when they took the leave of absence, provided they did not attend another college or university while on leave. Students who do not return after the agreed upon semester, for the leave of absence, will be administratively withdrawn from the university. Withdrawn students will need to apply for readmission and will be held to the degree requirements of the catalog year in which they are readmitted. Students should reach out to the financial aid office (lufinaid@luc.edu) with questions regarding how a student's financial aid package will be affected by a leave of absence.

Students who leave the BSW program to take a leave of absence or who withdraw from the program are not guaranteed the same internship upon return or readmission to the School of Social Work and their designated academic program. Upon taking a leave of absence, students are encouraged to speak to their current Internship Supervisor to see if the site would be willing to let them return to the internship when they return to the program. A student returning from a leave of absence should reach out to their Internship Coordinator after enrolling in classes to explore internship options.

Military Service

Students who have been called into the armed services of the United States and who are consequently withdrawing from the university before the end of the withdrawal period will receive a refund of all tuition and fees paid for the period in question but no academic credit. If they withdraw after the end of the withdrawal period, they will receive full academic credit for the semester with grades as of the date of withdrawal but no refund of tuition.

Non-Academic Dismissal and Professional Behavior

All students at Loyola University Chicago School of Social Work are expected to adhere to the ethics of the profession as presented in the Code of Ethics of the National Association of Social Workers. Students are expected to adhere to the school's policies on professional conduct and on academic honesty, which include:

Academic Integrity

Plagiarism is a serious form of violation of the standards of academic dishonesty. Plagiarism is the appropriation of ideas, language, work, or intellectual property of another, either by intent or by negligence, without sufficient public acknowledgement and appropriate citation noting the material is not one's own. It is true that every thought probably has been influenced to some degree by the thoughts and actions of others. Such influences can be thought of as affecting the ways we see things and express all thoughts. Plagiarism, however, involves the taking and use of specific words and ideas of others without proper acknowledgement or credit of the sources, and includes the following:

Submitting as one's own material copied from a published source, such as print, internet, audio, video, etc.

- Submitting as one's own work another person's unpublished work or examination material
- Allowing another or paying another to write or research a paper for one's own benefit
- Purchasing, acquiring, and using a pre-written paper for course credit

These guidelines include the use of generative Artificial Intelligence (AI) tools (e.g., ChatGPT, Bing, etc.). Using AI tools for academic work is prohibited unless explicitly stated by the professor. AI tools that provide spelling or grammatical assistance are not prohibited.

Ethical writers explicitly acknowledge sources in accordance with the contexts and genres of their writing. A student who attempts to identify and credit his or her source but misuses a specific citation format or incorrectly uses quotation marks or other forms of identifying material taken from other sources, has not plagiarized. Instead, such a student should be considered to have failed to cite and document sources appropriately. (Defining and Avoiding Plagiarism: The WPA Statement on Best Practices, retrieved from http://wpacouncil.org/files/wpa-plagiarism-statement.pdf).

According to Defining and Avoiding Plagiarism: the WPA Statement on Best Practices (http://wpacouncil.org/files/wpa-plagiarism-statement.pdf), students should understand research assignments as opportunities for genuine and rigorous inquiry and learning. Such an understanding involves:

- Assembling and analyzing a set of sources that they have themselves determined are relevant to the issues they are investigating;
- Acknowledging clearly when and how they are drawing on the ideas or phrasings of others;
- Learning the conventions for citing documents and acknowledging sources appropriate to the field they are studying;
- Consulting their instructors when they are unsure about how to acknowledge the contributions of others to their thought and writing.

It is inappropriate for students to use the same paper to fulfill requirements for more than one course. Doing so may affect the student's grades in any of the courses involved.

Students are encouraged to utilize the Writing Center as well as the American Psychological Association Publication Guide to ensure that all work is cited appropriately. The SSW uses the APA format for all courses

and expects students to use available library resources to gain this knowledge.

Beyond plagiarism, students are expected to be honest when completing take-home and in-class exams. This means that unless they have permission to do so, they may not complete exams with other students or copy the work of other students and submit it as their own.

Students who are caught plagiarizing or cheating on exams may be given an F for that assignment and may also risk receipt of a failing grade for the class, resulting in dismissal from the BSW program.

- Students are expected to read each course syllabus thoroughly and consult with instructor if they need further explanation.
- Majors and non-majors are expected to follow instructions in BSW courses

Professional Ethics in the Classroom and Internship

All students in the School of Social Work must adhere to the ethics of the profession as presented in the National Association of Social Worker's Code of Ethics. Students are expected to adhere to the behavioral expectations of the University, which are respect for others, fitness of the student role, and honesty in all aspects of student conduct. Further, student conduct is governed by the terms and provisions of the University's Community Standards. These can be found at: Community Standards | Office of the Dean of Students: Loyola University Chicago (https://www.luc.edu/deanofstudents/communitystandards/). Sanctions for violation of these standards may range from recommendations for specific behavior changes ranging from probation to dismissal from the program.

The school views its students as mature individuals preparing to be members of an honorable profession. Students are expected to maintain a high level of personal integrity. The School of Social Work reserves the right to dismiss students for unprofessional conduct such as, but not limited to, infraction of school rules and regulations, dishonesty, or unprofessional treatment of clients, faculty, other professionals, or other students. Professors in the program may have additional instructions that will be listed in the syllabus and/or given verbally in class that students are expected to follow.

Integrity as a social work student includes:

- Ability to develop professional relationships with clients and/or client systems
- Having the capacity to be aware of their own behavior(s) and its impact in client-worker transactions
- Assuming the management of their presence in the client-worker relationship
- Ability to evaluate the effects of practice interventions through the process of treatment

In addition, social workers do not:

- Lie to clients
- Abandon their clients
- Have sexual or other exploitive involvement with clients
- Share information about clients and/or client systems without appropriate rationale (Confidentiality)

In internship, students are expected to maintain professional standards of conduct. This means showing up on time, notifying and obtaining approval of absences from Internship Supervisors in a timely manner, professional attire as required, and using professional language in all written and verbal communications with agency professionals, collaterals, and clients.

The following material, from Western Illinois University, defines problematic behaviors.

[Lamb, Cochran, & Jackson (1991). Professional Psychology: Research and Practice*, 22*, 291- 296.]

> *Problematic behaviors refer to a student's behaviors, attitudes, or characteristics that may require remediation, but are perceived as not excessive or unexpected for professionals in training.*
>
> *Performance anxiety, discomfort with clients' diverse lifestyles and ethnic backgrounds, and lack of appreciation of agency norms are examples of problematic behaviors that are usually remedied and not likely to progress into ethical misconduct, impairment, or incompetence.*
>
> *Ethical misconduct occurs when the NASW Code of Ethics is not followed. This code is intended to provide both the general principles and the specific decision rules to cover most situations encountered by professional social workers in their professional activities. It has as its primary goal the welfare and protection of individuals, families, groups, organizations, and communities. It is the individual responsibility of each social worker to aspire to the highest possible standards of conduct. Social workers promote social justice and social change, respect and protect human and civil rights, and do not knowingly participate in or condone unfair discriminatory practices.*
>
> *Impairment is defined as an interference in professional functioning that is reflected in one or more of the following ways:*

- *Inability or unwillingness to acquire and integrate professional standards into one's repertoire of professional behavior.*
- *Inability or unwillingness to acquire professional skills and reach an accepted level of competency*
- *Inability or unwillingness to control personal stress, psychological disorder, or emotional reactions that may affect professional functioning.*
- *Incompetence is defined as a lack of ability. This lack of ability may include inadequate professional or interpersonal skills, or academic deficiency. When students continue to provide social work services beyond their current level of competence*

Sanctions for violation of these standards within social work classes or internship may range from recommendations for specific behavior changes ranging from probation to dismissal from the program.

Non-Discrimination Policy

Loyola University Chicago admits students without regard to their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by the applicable law to all the rights, privileges, programs, and other activities generally accorded or made available to students at the school. Loyola University Chicago does not discriminate on the basis of race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school-administered programs, or in any aspects of its employment of faculty and staff.

Procedure for Readmission

Students in good academic and disciplinary standing who have been absent from Loyola University Chicago for not more than one semester may be readmitted with no change in degree requirements, provided they have not attended another college or university during their absence from Loyola. Applicants for readmission should contact the School of Social Work's Academic Advising Office for directions regarding registration. However, if a student wishes to enter another division of the university, the application for readmission must be filed, and the student will be held to the degree and curriculum requirements in force at the time of entrance to the division.

Applicants for readmission who have attended other schools during their absence from Loyola must submit official transcripts of their work from each institution to the Undergraduate Admission Office before their applications can be considered. The application for readmission will be judged according to the admission regulations of each college.

Applicants for readmission to full-time divisions who have been dismissed from Loyola for insufficient academic performance may apply for readmission after one year of absence.

Applicants for readmission who have been dismissed from Loyola for disciplinary reasons must have their applications for readmission reviewed by Loyola's Office of the Dean of Students. If the Office of the Dean of Students approves readmission, the application will be reviewed according to the regulations stated above. Notification of readmission is usually mailed about four to five weeks after the admission office receives all necessary transcripts.

Professional Behavior in the Educational Setting

All students in the School of Social Work must adhere to the ethics of the profession as presented in the National Association of Social Workers' Code of Ethics. Students are expected to adhere to the behavioral expectations of the University, which are respect for others, the fitness of the student role, and honesty in all aspects of student conduct. Further, as a student, your conduct is governed by the terms and provisions of the **University's Community Standards (https://www.luc.edu/deanofstudents/communitystandards/)**.

Registration

Students self-register into Loyola's Online Connectivity to University Services (LOCUS) system. Use the following link for more information about the LOCUS system and login guidelines. https://www.luc.edu/aboutlocus/

Two weeks prior to registration, the University assigns enrollment times based on completed credit hours earned. Students can visit the "Manage Classes" tile in LOCUS and click the enrollment dates to view their enrollment appointment. Students are encouraged to put courses in their shopping cart prior to their enrollment appointment to make the enrollment process faster on registration day. Students in the undergraduate Honors Program and athletes have priority registration times.

Registration Holds

Students are responsible for reviewing their "Hold" status in LOCUS to ensure that they do not have outstanding tasks that would create registration holds. Registration holds occur for a variety of reasons including but not limited to outstanding tuition, missing local address, and missing/ incomplete immunizations. Students can learn how to resolve Holds on their account by clicking on the Hold tab in LOCUS to view the details.

Override Policy for BSW

Once a course has reached capacity, it will close registration. On rare occasions, Academic Advisors can override a student in a closed/full class or an open graduate equivalent under the following conditions:

- If it is a student's final semester, and the student needs the course for graduation.
- If the course is required for a student to graduate on time, but the course will not be offered again prior to the student's anticipated final semester.
- If the student needs the course as a prerequisite to courses in the following semester.
- All undergraduate sections of the course are full.
- The undergraduate course is canceled for low enrollment.

Withdrawing and Adding Courses

Students should refer to the University's Academic Calendar which outlines the deadlines for dropping and withdrawing from classes.

After the last day to drop a class without a "W" (Withdrawal) appearing on official transcripts, students may withdraw from a class or classes with the grade of "W" based on calendar dates noted for each term on the official university academic calendar.

Most students do not need permission to withdraw from a class or classes during any term. Students that are blocked from dropping a class or classes during an academic term should contact their academic advisor.

Students who stop attending a class but have not officially withdrawn will not earn a grade of "W". A student in this situation will earn a grade based on completed coursework and other course requirements (i.e., attendance policy). This expectation includes students that make the decision to stop attending after the final date to earn a "W".

The bursar maintains the withdrawal schedule for any tuition credit for a class or classes that a student withdraws from during any term. This schedule is posted on the Loyola Bursar website (https://www.luc.edu/bursar/withdrawalschedulechangecalendars/).

Students contemplating an official withdrawal from a class or classes and receiving or expecting to receive financial assistance should consult with the Financial Aid Office.

Resilience, Inclusion, Support, and Engagement (RISE) Process

RISE is an internal, collaborative, student-centered staff group within the School of Social Work dedicated to fostering student success and professional growth through early connection, proactive engagement, and support. Assistance can include referrals to university resources such as but not limited to the Wellness Center, Tutoring/Writing Center, or the university Dean of Students office. The group will meet as needed to discuss students that have been referred as needing additional outreach or follow-up. Students will receive the added supports with an invitation via email to discuss and prioritize needs and next steps.

Referrals to the RISE group are made by faculty and/or School of Social Work Student Affairs staff.

Services for Students with Disabilities and Accommodations

The Student Accessibility Center (http://www.luc.edu/sac/) (SAC (https://www.luc.edu/sac/applywithsac/)) supports, services, and

empowers Loyola University Chicago students with disabilities. Students with documented disabilities are encouraged to register with the SAC office to receive support and accommodations (academic, meal plan, or housing) during their time at LUC. All requests for accommodations are determined on an individual case-by-case basis by an accessibility specialist.

After meeting with an accessibility specialist, student accommodations are formalized via a letter from the SAC office. All registered SAC students must activate their accommodations each semester by submitting a semester request through the Accommodate system. Once submitted, Accommodate will send a copy of the student's academic accommodation letter directly to their faculty. Some accommodation will require additional forms or action on the student's part. Students should see the information provided in their letter for details or contact SAC@luc.edu.

Students can register with the SAC at any point during their academic career, but it is strongly recommended that this process begin as early as possible, as accommodations are not retroactive and may involve various approval timelines.

The SAC is committed to maintaining the confidentiality of students with disabilities. Once the student has registered for classes, students must activate their accommodations through SAC each semester. For more information, visit the Student Accessibility Center Website (http://www.luc.edu/sac/).

The SAC Office serves students with a variety of disabilities, including but not limited to learning disabilities, attention-deficit/hyperactivity disorder, chronic health impairments, or psychological disabilities. If you are not sure about your eligibility for services, have concerns about your current accommodation, or have further questions, please contact SAC at (773) 508-3700 or visit the Student Accessibility Center Website (https://www.luc.edu/sac/).

Student Professional Practice (SPP) Policy

Students in Loyola University Chicago's School of Social Work (SSW) are expected to uphold both the university's Community Standards and the BSW Program's Policy on Student Professional Practice. This policy aligns with the National Association of Social Workers (NASW) Code of Ethics, which applies to all practicing social workers, including students in training.

BSW students must follow the NASW Code of Ethics in all academic, internship, and professional settings related to their education and training.

As an accredited program by the Council on Social Work Education (CSWE), the BSW program adheres to the core values of the profession: service, social justice, dignity and worth of the person, the importance of human relationships, integrity, and competence. As discussed earlier in this handbook, these values are reflected in the nine key areas of performance and behavior that students must meet for promotion and graduation:

CSWE Educational Policies and Accreditation Standards

- Competency 1: Demonstrate Ethical and Professional Behavior
- Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice
- Competency 3: Engage in Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice
- Competency 4: Engage In Practice-informed Research and Research-informed Practice
- Competency 5: Engage with Individuals, Families, Groups, Organizations, and Communities
- Competency 6: Assess with Individuals, Families, Groups, Organizations, and Communities
- Competency 7: Intervene Individuals, Families, Groups, Organizations, and Communities
- Competency 8: Evaluate Individuals, Families, Groups, Organizations, and Communities
- Competency 9: Engage in Policy Practice

The BSW program also recognizes and follows the values of Jesuit pedagogy. Jesuit pedagogy emphasizes the development of the whole person (*cura personalis*)—mind, body, and spirit—and is rooted in values such as reflection, critical thinking, service, and social justice. In social work education, these principles align closely with the profession's core mission to promote human dignity, equity, and the well-being of marginalized populations. Jesuit education challenges students to engage deeply with complex social issues, reflect on their own values and experiences, and commit to ethical and compassionate service. At Loyola University Chicago's School of Social Work, this integration of Jesuit values and social work education fosters a learning environment that prepares students to become reflective, competent, and socially responsible practitioners.

Core Ethical Expectations for Social Work Students at Loyola University Chicago

Grounding Frameworks:

- **NASW Code of Ethics**: Foundation for ethical practice in social work.
- **Loyola University Chicago Community Standards**: Rules and in expected of all students.
- **School of Social Work's Professional Practice Standards**: Specific expectations within the BSW program.

Professional Behaviors & Expectations

Students are expected to adhere to the guiding policies listed above. These principles reflect the core values of the social work profession: service, integrity, respect, competence, and social justice. Adhering to these principles ensures students develop into trustworthy, ethical, and compassionate practitioners.

The following illustrate how student behavior needs to be guided by the NASW Code of Ethics:

1. **Professional Conduct & Communication**
   - Present yourself with **respect and professionalism** in all settings.
   - Includes **appearance**, **grooming**, **body language**, **eye contact**, and **verbal/written communication**.

   (Aligned with NASW 5.01 Integrity of the Profession)

2. **Academic & Professional Integrity**
   - Maintain **honesty** in exams, assignments, internships.
   - Never engage in or condone **dishonesty, fraud, or deception**.
   - Be honest about client care matters and never falsify information.

   (NASW 4.04 Dishonesty, Fraud, and Deception)

3. **Reliability & Responsibility**
   - Be **punctual and dependable**.
   - Notify relevant parties about absences and provide documentation if needed.
   - Understand how your presence (or absence) affects others.

   (NASW 4.03 Private Conduct)

4. **Respectful Collaboration**
   - Engage in **collegial and inclusive discussions**; avoid dominating conversations.

   (NASW 2.01 Respect)

5. **Zero Tolerance for Abuse or Harassment**
   - No verbal, physical, or sexual harassment will be tolerated.
   - Avoid profanity, offensive comments, and disrespectful behavior online or offline.

   (NASW 2.01 Respect)

6. **Client-Centered Ethical Practice**
   - Uphold the **highest standards of care** for clients in all settings.
   - Prioritize client **well-being, safety, and dignity**.

   (NASW 1.01 Commitment to Clients)

7. **Respect for Clients' Families and Care Teams**
   - Communicate with **empathy and professionalism**.
   - Demonstrate respect through time management, demeanor, and adherence to dress codes.

   (NASW 2.01 Respect)

8. **Representation of the Profession**
   - Avoid actions that could be seen as **unethical or compromising** to the school, university, or profession.

   (NASW 5.01 Integrity of the Profession)

9. **Use of technology in Social Work Practice**
   - Maintain professional practice standards as it relates to boundaries, sharing confidential information, and using personal electronic devices for work/internship purposes, including texting about clients and posting on social media.

   (*NASW, Standards 2.06, 2.07, 2.09, 2.11, 2.18, 2.19*)

Failure to Adhere to Policy

Failure to meet behavioral and ethical expectations may result in dismissal from the BSW program. While not exhaustive, the following guidelines reflect the professional conduct required in both academic and internship settings. Students may also be included in a disciplinary process with the university if they have violated any of the community standards as outlined in those policies. The university procedures would be followed by those students.

Faculty and Staff may consult with the BSW Program Director to see if they suspect a violation of ethical or professional standards. If warranted, the faculty member submits a written referral and supporting documentation. The BSW Program Director then convenes a meeting with the involved faculty and staff and proceeds to notify the student and their advisor.

Referral Process

Within five business days, the BSW Program Director will provide the student with written notice, including the referral and procedures. The student must respond in writing within five business days and meet with their advisor, if they choose, to review the concern.

Students are encouraged to engage their advisor throughout the process. Based on the undergraduate standards and regulations, the role of an advisor is to provide a comforting presence for the student and/or instructor. An advisor may only speak to the advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee. Even if an advisor is an attorney, the advisor may not function as legal counsel or "represent" an advisee during the hearing process.

The BSW Director compiles a report summarizing the concern and all materials for committee review, shared five business days prior to the meeting. The committee may request additional documentation or invite the referring faculty to attend.

Committee Meeting and Outcomes

The committee of involved faculty and staff meet in a closed session. The student is invited to participate but may decline. If the committee substantiates a violation, it may issue one or more of the following outcomes:

1. Continue in program with no conditions
2. Warning or reprimand
3. Continue in program with conditions (e.g., written reflections, research tasks)
4. Further sanctions for non-compliance with conditions, including:
   - Withdrawal from internship/co-requisite courses
   - Academic probation with terms
   - Leave of Absence (recommended only)
   - Suspension from BSW program
   - Dismissal

Meeting minutes are documented and reviewed by the committee. The BSW Director will issue a written outcome letter to the student and advisor within 10 business days, including appeal information.

Appeals

Students may submit a final written appeal to the Dean within 10 business days of receiving the committee decision. The Dean's review is limited to:

1. Unsupported conclusion
2. Procedural error impacting fairness
3. New, significant information
4. Disproportionate sanction

Dean's decision is final and will be issued in writing within 10 business days.

Confidentiality & Safety

The BSW Director and the Associate Dean monitor all procedures to ensure compliance with school policy. In the event there is a conflict of interest due to the student being enrolled in a course taught by the BSW Director in which professional behavior is a concern, the Associate Dean would monitor to ensure compliance with school policy. Committee decisions are private and shared only with those who have a legitimate need to know. If at any point a safety risk is identified, appropriate university or community authorities will be contacted.

Study Abroad

BSW students can participate in the School of Social Work's "Mini-abroad" programs which take place for a limited number of weeks over Spring Break and in the summer each year. If they choose to take part in the University's Study Abroad programs, they must may do so with freshman, sophomore or junior standing. If a student studies abroad junior year, it may only be for a semester because junior level social work courses must be taken at Loyola. Refer to the School of Social Work's and the University's websites for further information about study abroad programs.

Title IX Disclosure and Rights

The University's Title IX policies are published within the Comprehensive Policy and Procedures for Addressing Discrimination, Sexual Misconduct, and Retaliation (https://www.luc.edu/comprehensivepolicy/) ("Comprehensive Policy"), which includes information and instructions on how to submit a report or file a formal complaint of sex discrimination, including sexual harassment. Inquiries about the application of Title IX at Loyola can be directed internally to the Title IX Coordinator and/or externally to the Assistant Secretary for Civil Rights in the United States Department of Education.

The Title IX Coordinator for Loyola University Chicago is the Executive Director for Equity & Compliance in the Office for Equity & Compliance (http://www.luc.edu/equity/). Any person may report sex discrimination, including sexual harassment, by using the online reporting form (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=9) (powered by Maxient™), or in person, by mail, by telephone, or by email, using the contact information listed through the Office for Equity & Compliance (https://www.luc.edu/equity/titleixequitylaws/titleix/).

Inquiries or reports may be made externally to:

University Support Services for Students

Writing Center

Students are expected to demonstrate good writing skills both in school and internship settings. They are also expected to demonstrate a working knowledge of APA format. The ability to express oneself clearly and concisely in written form is considered by Loyola to be an essential attribute because social workers are continually called upon to prepare written case summaries, psychosocial assessments, and other documents that convey information about clients. The School of Social Work does not expect students to write for publication. However, a high level of proficiency is expected and will serve students well in future career endeavors. Students who would like assistance in improving their writing skills are encouraged to utilize the Loyola Writing Center (https://www.luc.edu/writing/).

Note: Courses in other schools or departments may have different requirements. Students should consult with the course instructor if they are unclear about requirements for a specific class.

University Libraries

The libraries at Loyola provide materials to assist students with studies and research, as well as a space for quiet study. Lewis Library has a general undergraduate collection and materials to support the social work program. Resources from all university libraries are available to students. Students may request materials from libraries on other campuses be delivered to a library on their home campus. The Reference Desk is staffed most of the hours that the library is open, and reference librarians are available to help you get the most out of your academic experience.

Students will be required to present their Loyola University Chicago ID cards when entering the libraries. The student ID is also required to check out books. Students will need their Universal ID login name and password to access online library resources.

The Loyola library system has an online catalog that provides more flexible access to books and periodical titles and to other materials held by the library. The catalog also includes links to other electronic resources, such as online journals and databases. For more information, please visit the Loyola University Libraries (https://libraries.luc.edu/) web page.

Students can also access the library catalog online. Contact the library (http://libraries.luc.edu/ask-librarian-chat/) or ask at a reference desk for more information on accessing the catalog off campus. Reference librarians are available to help students use all library resources.

Health Insurance and Student Wellness Center

Loyola University Chicago's Board of Trustees requires undergraduate students enrolled for 12 or more credit hours at the start of the fall semester have individual healthcare insurance. Students that meet the enrollment criteria will be enrolled automatically in Loyola's healthcare plan for students and will be billed accordingly unless they submit a waiver before the deadline date.

Students must actively attend classes for at least the first 45 days after the date for which coverage is purchased.

For more information about Loyola's Student Health Insurance Plan (SHIP) and to obtain the wavier, please refer to the Office of the Bursar Health Insurance (https://www.luc.edu/bursar/insurance.shtml/) page.

Shuttle Bus and Ventra U-Pass

The University provides shuttle bus services between the two lakeside campuses. Shuttle buses run at approximately 20-30 minutes intervals, Monday through Friday, 7 a.m. - 12:10 a.m.

CTA Ventra U-Pass offers all full-time undergraduate and graduate students enrolled in the School of Social Work unlimited use of CTA buses and trains during the fall and spring semesters.

Distribution: The Ventra U-Pass is distributed two weeks before classes begin. Students should check Loyola's Upass Webpage (https://www.luc.edu/upass/u-passdistribution/) for specific dates and times.

Student eligibility: All full-time (12 hours or more) undergraduate students at the Water Tower and Lake Shore Campuses are eligible for the Ventra U-Pass. The amount is included in student fees and is valid from the first day of classes until the last day of final exams. This fee is non-refundable.

Withdrawal from the University

An enrolled student who wishes to completely withdraw from the university during any term must notify their academic advisor, academic program director, or assistant/associate dean of their college/school of their intent. The student must complete the **Request for Change to Academic Record or Status** form. The form will be routed to the student's academic advisor, program director, or assistant/associate dean. A student is considered to be in attendance until such notice has been received by the academic advisor, program director, or assistant/associate dean and appropriate steps have been taken to completely withdraw a student from a term. The last date of class activity is the date utilized for both the "W" or "WE" grade and The Office of the Bursar's withdrawal refund calendar (https://www.luc.edu/bursar/withdrawalschedulechangecalendars/).

A student may be required to withdraw from the university because of academic deficiency, lack of sufficient progress toward completion of degree requirements, failure to adhere to university requirements and/or degree requirements, failure to adhere to university requirements and regulations for conduct, or failure to meet financial obligations to the university.

Emergency Withdrawal from the University

Students facing a significant emergency circumstance (that prevents them from continuing in or completing an academic term) may submit a **Request for Change to Academic Record or Status** form. All requests must be supported by appropriate documentation. The Intent to Withdraw form is reviewed by the Associate Dean's office of the student's primary college/school for approval and processing. Please see the university policy (https://catalog.luc.edu/academic-standards-regulations/undergraduate/) on emergency withdrawal for more information.

Undergraduate Policies and Procedures

Please see Undergraduate Policies and Procedures (p. 1919) for academic policies that supersede those of academic units within the University.

University Policies

Please see University Policies for academic policies that supersede those of academic units within the University

Social Work (SOWK)

SOWK 200 Introduction to Social Work (3 Credit Hours)
This course is an introduction to the social work profession through the identification of some of the human problems in society and the role of both society and social services in response to the problems. Students have the opportunity to observe several social service agencies and to evaluate current ways in which agencies interpret social problems and administer services. Students will be able to evaluate current ways in which agencies interpret social problems and administer services. This course satisfies the Engaged Learning requirement.
Outcomes:
1) Describe and apply the mission, values, and roles of the social work profession and demonstrate ethical and professional behavior through participation in service-learning experiences; 2) Analyze social problems and human needs within historical, cultural, and structural contexts to explain how social, racial, and economic injustice affects individuals and communities; 3) Apply the person-in-environment perspective to engage with individuals, groups, organizations, and communities and reflect on civic responsibility and community involvement

SOWK 301 Practice Skills with Individuals and Families (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior Standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350
Co-requisites: SOWK 380
This introductory micro practice course begins by focusing on the development of core skills for social workers in their encounters with individuals and families.
Course equivalencies: SOWK 301/SOWK 503
Outcomes:
1) Apply ethical standards, professional values, and cultural humility to social work practice situations involving individuals, families, groups, organizations, and communities; 2) Engage and assess individuals, families, groups, organizations, and communities by integrating biopsychosocial perspectives and evidence-informed practice frameworks; 3) Develop and implement appropriate intervention strategies that respond to client needs and promote well-being across social work practice settings

SOWK 302 Integrated Micro/Mezzo/Macro Theory and Practice (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior Standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350
This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community engaged practices. While integrating theories of sociology, political science, anthropology, public health, and urban studies; as well as practice knowledge; the class examines relationships between social, economic, political, and cultural structures, collective action, and individual attitudes and behaviors.
Outcomes:
1) Apply integrated micro, mezzo, and macro practice frameworks to analyze social problems affecting marginalized populations using ethical, anti-racist, and justice-oriented perspectives; 2) Engage and assess individuals, families, groups, organizations, and communities by synthesizing theory, research, and contextual factors within an integrated practice model; 3) Design and evaluate integrated interventions that address social problems through coordinated micro, mezzo, and macro strategies informed by research and reflective practice

SOWK 303 Group Work Practice in Social Work: Micro/Mezzo/Macro (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses - SOWK 200, (SOWK 201 or 307), SOWK 370, SOWK 305, and SOWK 350; SOWK 301 is also required as a pre or corequisite
This course presents theoretical and practical approaches to social work with groups, with a focus on group development, dynamics, and processes.
Course equivalencies: SOWK 303/SOWK 505
Outcomes:
1) Demonstrate and apply ethical and professional behavior by integrating social work values, self-awareness, and group facilitation skills that promote inclusivity, collaboration, and mutual support among diverse group members; 2) Analyze and synthesize group dynamics, theories, and evidence-based practices to assess group needs, develop goals, and implement interventions that foster empowerment and social justice; 3) Engage and collaborate with individuals and groups to plan, lead, and evaluate group processes that enhance collective well-being, inclusion, and effective problem-solving across diverse settings

SOWK 305 Life Span Development, Human Behavior, Trauma, & Theory (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors, Social Work minors, or Human Services majors; Junior standing; For Social Work majors only, SOWK 200, SOWK 370 (these courses may also be a corequisite); For SW minors only, SOWK 200 and SOWK 370 (courses may also be a corequisite)
This course will consider bio-psycho-social-spiritual theories across the life-course, with a focus on trauma and resilience and an understanding of the role of neuroscience in development.
Course equivalencies: SOWK 305/SOWK 500
Outcomes:
1) Analyze biopsychosocial-spiritual development across the life span by examining how trauma, resilience, culture, and social environments influence individuals and families at different developmental stages; 2) Apply human development and social work theories to real-life contexts in order to interpret individual and family experiences across the life course, with attention to diversity, oppression, and resilience; 3) Evaluate how social work knowledge of life span development informs ethical, culturally responsive practice and contributes to effective engagement, assessment, and intervention across systems

SOWK 307 Social Work Policy and Community Intervention (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors, Social Work minors, or Human Services majors; Junior standing
Co-requisites: SOWK 200 and SOWK 370
Drawing from social work theory, research, and practice, Social Work Policy and Community Interventions examines the roles of social workers in policy practice as well as change agents within community and organizational contexts.
Outcomes:
1) Analyze how social, racial, economic, and environmental injustices are embedded in existing policies and evaluate their impacts on individuals, families, and communities; 2) Design and advocate for equitable, evidence-informed policies that promote social change and address systemic inequities at local, national, and global levels; 3) Apply policy analysis frameworks and research evidence to assess the effectiveness of policy interventions and design strategies for implementation that improve service delivery and community well-being

SOWK 308 Integrated Micro, Mezzo, and Macro Practice (3 Credit Hours)
Pre-requisites: Undergraduate Social Work students; BSW major; Senior Standing; "C" or higher in the following courses: SOWK 200, 370, 305, (201 or 307), and 350
This course focuses on integrated practice approaches that span three frameworks, including micro (e.g. individuals, families, and groups), mezzo (e.g. communities), and macro (e.g. systems, society) levels. It will examine various theories and models, the quality and utility of empirical research, as well as the impact of interprofessional and interdisciplinary collaboration efforts.
Outcomes:
1) Critically analyze social work research studies for ethical rigor, cultural responsiveness, anti-racist practice, and methodological quality using established research standards, Aligned with Competency 3: Engage in Anti-Racism, Diversity, Equity, and Inclusion in Practice, Aligned Assignments: Research Ethics Tutorial (CITI Training Certification), Article Critique, Midterm Exam; 2) Apply practice-informed research principles to formulate research questions, select appropriate qualitative, quantitative, or mixed-methods designs, and justify methodological choices relevant to social work practice, Aligned with Competency 4: Engage in Practice-Informed Research and Research-Informed Practice, Aligned Assignments: Midterm Exam, Article Critique, Evaluation Research Proposal\\n; 3) Design and evaluate a research or program evaluation proposal that includes ethical considerations, sampling strategies, data collection plans, and analysis approaches to assess practice and program effectiveness, Aligned with Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities, Aligned Assignments: Evaluation Research Proposal, Article Critique, Research Ethics Tutorial (CITI Training Certification)

SOWK 330 Internship I and Simulated Experience (4 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate ethical and professional behavior in field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining professional responsibility in internship settings; Engage and assess individuals, families, groups, organizations, and communities using culturally responsive, anti-racist, and person-in-environment frameworks to inform social work practice and policy-relevant decision-making; Implement, evaluate, and advocate for evidence-informed and policy-relevant interventions in collaboration with clients and constituencies to achieve practice goals and improve outcomes

SOWK 340 Internship II and Simulated Experience (4 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, (SOWK 201 or 307), SOWK 370, SOWK 305, and SOWK 350
Co-requisites: SOWK 330
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate ethical and professional behavior in field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining professional responsibility in internship settings; Engage and assess individuals, families, groups, organizations, and communities using culturally responsive, anti-racist, and person-in-environment frameworks to inform social work practice and policy-relevant decision-making; Implement, evaluate, and advocate for evidence-informed and policy-relevant interventions in collaboration with clients and constituencies to achieve practice goals and improve outcomes

SOWK 350 Preparation for Practice (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Junior standing
Co-requisites: SOWK 200 and SOWK 370; If SOWK 200 or SOWK 370 have been taken previously, a grade of C or higher is needed
Students will strengthen professional identification and to facilitate the transfer from social work education to professional practice or graduate studies.
Outcomes:
1) Demonstrate ethical and professional behavior by applying social work values, self-awareness, and reflective practice to the development of a professional social work identity and readiness for field placement; 2) Apply an understanding of diversity, difference, and systems of oppression to analyze social work practice areas and ethical dilemmas across micro, mezzo, and macro contexts; 3) Examine the role of policy, organizations, and professional systems in shaping social work practice and prepare for effective engagement in field and inter-professional settings

SOWK 360 Independent Study (1-3 Credit Hours)
Pre-requisites: Junior standing
A course designed for individuals or small groups to focus on selected issues and problems in social work practice beyond course offerings.

SOWK 361 Special Topics (3 Credit Hours)
Pre-requisites: Sophomore standing
A survey course on a particular topic, such as aging, alcoholism and drug dependency, family process, group process, African-American men, gender, race, and culture. Students will understand how these issues affect social work practice.

SOWK 370 Power, Oppression, Privilege, and Social Justice (3 Credit Hours)
Pre-requisites: Sophomore standing
This course is designed to assist social work students with understanding the concepts of power, privilege, oppression, and social justice in their work with historically marginalized and oppressed populations.
Outcomes:
Analyze how their personal identities, values, and biases influence professional behavior, and apply ethical principles and cultural humility to evaluate their practice within diverse and oppressive systems; Evaluate how systems of power, privilege, and oppression shape human rights and opportunities, and create strategies to advance social, economic, and environmental justice through advocacy and allyship at the micro, mezzo, and macro levels; Synthesize theoretical frameworks (critical race theory, intersectionality, anti-oppressive and strengths-based practice) to design and apply culturally responsive, collaborative interventions that promote empowerment and systemic change

SOWK 380 Assessment of Client Concerns in Context (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, (SOWK 201 or 307), SOWK 370, SOWK 305, and SOWK 350
Co-requisites: SOWK 301
Course will teach students to conduct a strengths-based and contextual assessment of client concerns. Students will learn to conduct a culturally informed bio-psycho-social-spiritual assessment in which they gather information about presenting concerns from the perspective of clients and collateral sources.
Course equivalencies: SOWK 380/SOWK 501
Outcomes:
1) Demonstrate and apply knowledge and skills for conducting a biopsychosocial-spiritual assessment; 2) Conceptualize culturally-informed diagnostic assessment; 3) Develop and apply DSM-5-TR diagnostic assessment to a simulated patient, producing a culturally-informed DSM-5-TR diagnosis

SOWK 390 Research and Evaluation in Social Work Practice (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors, Social Work minors, or Human Services majors; Senior standing; For Social Work majors only: A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, (SOWK 201 or 307), and SOWK 305
This course introduces the methods of social work research, including problem formulation, research ethics, research designs, measurement, data collection, sampling, and data analysis through a social justice/anti-racist/global perspective.
Interdisciplinary Option: Human Services, Urban Studies
Course equivalencies: SOWK 390/SOWK 506
Outcomes:
1) Critically analyze social work research studies for ethical rigor, cultural responsiveness, anti-racist practice, and methodological quality using established research standards; 2) Apply practice-informed research principles to formulate research questions, select appropriate qualitative, quantitative, or mixed-methods designs, and justify methodological choices relevant to social work practice; 3) Design and evaluate a research or program evaluation proposal that includes ethical considerations, sampling strategies, data collection plans, and analysis approaches to assess practice and program effectiveness

Social Work (BSW)

The Bachelor in Social Work degree is a four-year program offering generalist training in variety of social service settings in diverse communities. Graduates of this program are well positioned for roles in social services, including child welfare, community mental health, drug/alcohol rehabilitation, and developmental disabilities.

Additional Undergraduate Graduation Requirements

All Undergraduate students are required to complete the University Core, at least one Engaged Learning course, and UNIV 101. SCPS students are not required to take UNIV 101. Nursing students in the Accelerated BSN program are not required to take core or UNIV 101. You can find more information in the University Requirements (p. 988) area.

Learning Outcomes

- Demonstrate ethical and professional behavior.
- Engage diversity and difference in practice, including promoting social and economic justice.
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities.

Social Work Minor

Students interested in a social work minor are required to take a sequence of six courses (totaling 18 credit hours) which must include four required courses and two social work electives. Grades of "C" or better must be earned in all minor courses.

University Core

University Core Curriculum

The Loyola University Chicago Core Curriculum plays a central educational role in every Loyola student's undergraduate experience. Designed to provide both breadth and depth to a student's program of study, the Core Curriculum introduces students to key concepts and modes of thought in a variety of areas of human intellectual endeavors. The Core Curriculum actualizes transformative education in the Jesuit tradition, helping students to define their values, discover their gifts and passions, and look at their role in society as being one in service of humanity and for the common good.

About the Core

About the Core

The University Core Curriculum introduces students to ten central Core Areas of university learning, with a consistent focus on learning outcomes for those Core Areas. Core coursework develops students' understanding through knowledge and experience in the Core Areas of Artistic, Ethical, Historical, Literary, Quantitative, Philosophical, Scientific, Societal and Cultural, and Theological and Religious Knowledge and Inquiry, plus written communication in the College Writing Seminar. In addition to knowledge and skills development, Core courses integrate and promote values essential to a Loyola education, such as understanding diversity in the US or the world, understanding and promoting justice, and understanding spirituality or faith in action in the world. Many courses in the Core were specifically designed to highlight the value of diversity (https://catalog.luc.edu/undergraduate/university-requirements/university-core/diversity-core/).

To complete the University Core Curriculum, students will take 16 3-credit courses across ten Core Areas. Two courses are required in six of these areas (Historical, Literary, Scientific, Societal and Cultural, Philosophical, and Theological and Religious Knowledge and Inquiry). Students will begin their studies in these six areas with a foundational (or Tier I) course that will introduce them to critical ideas and methods of analyses in that area. After completing the foundational course, students will have an array of options to further their studies by taking one of a variety of Tier II classes to pursue particular interests in more depth. The other four areas (College Writing Seminar and Artistic, Quantitative, and Ethical Knowledge and Inquiry) require one course each; in some instances, students take 3 1-credit Artistic Knowledge and Inquiry courses.

Some Core Area requirements can be satisfied by virtue of completing a major or minor program of study, given the extensive work a student must do in a particular knowledge area while pursuing such a program of study. Please see the Core and your major and minor (https://catalog.luc.edu/undergraduate/university-requirements/university-core/core-major-minor/) for more information. Students in the Interdisciplinary Honors Program should note the relationship between the Honors Program and Core Curriculum (https://catalog.luc.edu/undergraduate/university-requirements/university-core/honors-core/).

Please note that these requirements apply to students obtaining a bachelor's degree. Students entering as freshmen (https://catalog.luc.edu/undergraduate/university-requirements/university-core/students-entering-freshmen/), transfer students (https://catalog.luc.edu/undergraduate/university-requirements/university-core/transfer-students/), and Arrupe College (https://www.luc.edu/arrupe/academics/degrees/) students have distinct requirements for completing the Core Curriculum. Additional policies are listed on the academic standards and regulations (https://catalog.luc.edu/academic-standards-regulations/undergraduate/) page.

What's next? Head to the Core Curriculum Guide (p. 989) to find out more about the specific Core requirements and learn about courses being offered.

Core Area and Courses

To complete the University Core Curriculum, students will take 16 3-credit courses across ten Core Areas. Two courses are required in six of these areas (Historical, Literary, Scientific, Societal and Cultural, Philosophical, and Theological and Religious Knowledge and Inquiry). Students will begin their studies in these six areas with a foundational (or Tier I) course that will introduce them to critical ideas and methods of analyses in that area. After completing the foundational course, students will have an array of options to further their studies by taking one of a variety of Tier II classes to pursue particular interests in more depth. The other four areas (College Writing Seminar and Artistic, Quantitative, and Ethical

Knowledge and Inquiry) require one course each; in some instances, students take 3 1-credit Artistic Knowledge and Inquiry courses.

In addition to knowledge and skills development, Core courses integrate and promote values essential to a Loyola education, such as understanding diversity in the US or the world, understanding and promoting justice, and understanding spirituality or faith in action in the world.

Required Core Areas	Required Courses	Credit Hours

Scientific Knowledge and Inquiry (p. 993)	2	6
Societal and Cultural Knowledge and Inquiry (p. 994)	2	6
Theological & Religious Knowledge and Inquiry (p. 995)	2	6
Total	**16 courses**	**48 hours**

Artistic Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore artistic traditions and expressions.

Area Objectives: The study of art is essential for a complete education of the whole person because it fosters a search for truth, respect for the person, and encourages students to develop critical habits of the mind and ethical standards of behavior. "Art" is understood to encompass any and all forms of artistic expression, including but not limited to, dance, music, theater, film, and visual and plastic arts. The courses in this Core Area will provide students with the opportunity to engage in the arts through formal study or creative processes, and to explore non-linear modes of thinking, problem-solving, and expression. Students will have the opportunity to acquire collaborative skills through group problem solving and engaged dialog where applicable.

Curriculum

Courses (3 credit hours required)

In order to satisfy the Core Artistic Knowledge and Experience requirement, a student must successfully complete three credit hours. This may be accomplished by taking one three credit hour class or by taking a combination of one credit hour classes.

Code	Title	Hours
Choose one or more of the following:		3
CLST 206	Art of Ancient Greece	
CLST 207	Art of the Roman World

MUSC 154R	Introduction to Opera in Rome	
THTR 100	Intro to Theatre Experience	
THTR 252	Theatrical Design I	
THTR 261	Beginning Acting	

Area Learning Outcomes

After completing the course in this Area, students will be able to:

1. analyze, interpret, create, or participate in the creation or performance of some forms of artistic expression as a means of exploring human experience and understanding the creative process.
2. use critical and technical vocabulary to describe, analyze, and formulate an argument about artistic productions.
3. assess how various forms of artistic expression shape the experience and response of the audience.
4. evaluate works of art within their aesthetic, historical, or cultural contexts.
5. recognize or participate in the artistic-cultural life of their communities.

College Writing Seminar

Area Goal: This Core Area of Inquiry will invite students to explore strategies for process-based drafting, research, and argumentation in academic writing.

Area Objectives: The complexity of contemporary global society requires that individuals demonstrate effective written communication and rhetorical skills to engage in dialogue, whether in their undergraduate courses, in their careers, or in civic and public discourse. Through this course, students will explore academic practices and strategies--including critical reading and thinking, rhetorical argumentation, the recursive writing process, and information/research literacy--that will develop their writing skills and offer them the opportunity to understand their responsibility to their readers, their sources, and themselves as writers.

Curriculum

Core College Writing Seminar (1 course required)

Code	Title	Hours
UCWR 109	University Core Writing Seminar: Writing Responsibly Writing Lab [1]	6
UCWR 110	Writing Responsibly	3

[1] Applicable starting Fall 2026 moving forward for students who place in this course based on the Writing Placement Test. Students must have take this course for 6 credit hours, a lecture and laboratory to meet the College Writing Seminar requirement. Students who took UCWR 109 before Fall 2026 must complete UCWR 110 to meet the College Writing Seminar requirement.

Area Learning Outcomes

After completing the course in this Area, students will be able to:

1. summarize, analyze, synthesize, and evaluate texts through informal and formal writing assignments.
2. use a variety of sources to formulate and support a clear claim: this includes finding, evaluating, analyzing, synthesizing, and documenting sources appropriately.
3. apply recursive and reflective processes in writing, including strategies for invention, drafting, organization, peer review, revision, and editing.
4. articulate rhetorical strategies in a range of media and texts.
5. write clearly and effectively, tailoring writing and rhetorical strategies to the goals and audience of a given project.

Ethical Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore topics in Ethics such as the nature of human flourishing, moral responsibility, and justice through critical reflection on a range of ethical frameworks and methodologies.

Area Objectives: Developing a student's ethical awareness and reflection is central to the Core Curriculum. By completing the Core Ethics course, students will explore the differences and similarities between ethical frameworks, the complexities of ethical frameworks and their applications, and historical or contemporary issues that can be interpreted through the lens of ethical frameworks.

Curriculum

Courses (1 course required)

Code	Title	Hours
Choose one of the following:		
PHIL 181	Ethics	3
PHIL 182	Social and Political Philosophy	3
THEO 185	Christian Ethics	3
THEO 186	Global Religious Ethics	3

Area Learning Outcomes

After completing the course in this Area, students will be able to:

1. describe and discuss the central features (e.g., concepts, constructs, and principles) that comprise different ethical frameworks or schools of thought.
2. compare and contrast various ethical frameworks, for example, how these frameworks can be applied to living well and promoting the flourishing of others.
3. identify central features of historical or contemporary ethical issues.
4. apply an ethical framework or school of thought to analyze a historical or contemporary issue, defend their analysis by explaining how the framework/school is present, and the advantages and disadvantages of using it.

Historical Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the human experience from a historical perspective.

Area Objectives: History is a form of inquiry, critical thinking, and understanding that encompasses all aspects of human experience and illuminates how the past shapes the present and thus the future. Through these courses, students will explore historical and contemporary perspectives with a view to fashioning a humane and just world. Students will have the opportunity to examine a range of historical evidence in multiple forms such as documents, films, diaries, images, artifacts, empirical data, and oral and digital histories.

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. recognize the importance of chronology, sequential development, and geography in shaping history.
2. explain processes of historical continuity and change.
3. assess and explain the relationship between historical events and cultural, social, and political forces.
4. interpret varied forms of sources as historical evidence.
5. illustrate how human and societal values, as well as methods of analysis and interpretation, shape and are shaped by historical context

Literary Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore literary traditions and expressions.

Area Objectives: Through these courses, students will examine how literary expression manifests in different types of texts. The kinds of texts students can study are expansive: e.g., poems, plays, novels, stories, memoirs, essays, magazines, newspapers, and more in print and online formats. Students have opportunities to select courses that cover literature from a range of time periods, places, perspectives, cultures, languages, identities, and social positions that have generated and continue to generate rich literature. This range extends across literatures produced in a variety of languages by the many cultures and social groups of Africa, the Americas, Asia, Europe, and Oceania as well as the diasporas and migrations within and between these regions. Students will explore the forms that shape literary expressions; the creative processes that produce them; the concepts and terms that facilitate their interpretation; and the cultural, social, linguistic, and historical contexts in which they are produced.

Curriculum

Foundational/Tier I

Code	Title	Hours
Choose one of the following:		3
UCLR 100C	Interpreting Literature - Classical Studies [1]	
UCLR 100E	Interpreting Literature - English [2]	
UCLR 100M	Interpreting Literature - Modern Langs&Literatures [3]	

1 Taught by member of the faculty of Classical Studies, CAS.
2 Taught by members of the faculty of English, CAS.
3 Taught by members of the faculty of Modern Languages & Literatures, CAS.

Tier II

Requirement for all Tier II Courses: UCLR 100. Please check requirements for declared majors/minors for exceptions.

LITR 202	European Novel	
LITR 238	Arabic Literature in Translation [D]	
LITR 245	Asian Masterpieces [D]	
LITR 280	World Masterpieces in Translation [D]	
LITR 283	Major Authors in Translation	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. identify, explain, and analyze carefully key components of various literary productions that deepen understanding of human experiences and creative processes.

2. use critical and technical vocabulary to describe, analyze, and formulate an argument about literary productions.
3. assess how various forms of literary expression shape the experience and response of the audience.
4. examine multiple interpretive possibilities of any literary work.
5. articulate the relationships of works of literature to the cultures and histories in which they were created and used.

Philosophical Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore key philosophical questions and traditions.

Area Objectives: Through these courses, students will explore influential philosophical questions, positions, and methods of inquiry. Students will develop intellectual attitudes that enable them to identify and assess implicit presuppositions and formulate and defend responses to philosophical issues, including ethical issues.

Curriculum

Foundational/Tier I

Code	Title	Hours
PHIL 130	Philosophy & Persons	3

Tier II

Requirement for all Tier II Courses: PHIL 130 Philosophy & Persons

Please check requirements for declared majors/minors for exceptions.

Code	Title	Hours
Choose one of the following:		3
PHIL 271	Philosophy of Religion	
PHIL 272	Metaphysics	
PHIL 273	Philosophy of Science	
PHIL 274	Logic	
PHIL 275	Theory of Knowledge	
PHIL 277	Aesthetics	
PHIL 277R	Aesthetics: the Aesthetic Experience in Rome	
PHIL 279	Judgment and Decision-Making	
PHIL 284	Health Care Ethics	
PHIL 286	Ethics and Education	
PHIL 287	Environmental Ethics	
PHIL 288	Culture and Civilization	
PHIL 288R	Culture & Civilization in Rome	
PLSC 100	Political Theory	
PSYC 280	Psychology of Judgment and Decision-Making	

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. describe the historical or conceptual development of major philosophical questions.
2. explain the contributions major philosophical questions make to the understanding of ourselves as humans.
3. articulate some of the major problems and range of responses central to philosophical inquiry, including questions concerning truth and knowledge, reality, moral values, or social justice.
4. construct philosophical arguments, which means students will support their ideas with reasons, assess critically the underlying assumptions of their positions, and evaluate the strengths and weaknesses of alternative positions.

Quantitative Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the major concepts and methods involved in the analysis of quantitative data.

Area Objectives: Through these courses, students will explore how one or more fields--mathematics, statistics, computing, and the social sciences--understand and analyze quantitative information. This involves reasoning by symbolic, numerical, or geometrical means, and determining various ways to solve problems while predicting possible consequences.

Curriculum

Courses (1 course required)

Code	Title	Hours
Choose one of the following:		3
CJC 206	Statistics	
COMP 122 / MUSC 122	Introduction to Digital Music	
COMP 125	Visual Information Processing	
COMP 150	Introduction to Computing	
ISSCM 241	Business Statistics	
MATH 108	Real World Modeling with Mathematics	
PLSC 216	Political Numbers	
STAT 103	Fundamentals of Statistics	

Area Learning Outcomes

After completing the course in this Area, students will be able to:

1. represent and interpret quantitative information symbolically, graphically, numerically, verbally, and in written form.
2. describe the strengths and limitations of various types of quantitative models.
3. describe the utility of quantitative methods for scientific inquiry or technological progress.
4. apply quantitative methods to solve problems or model situations arising in scientific, political, social, or personal contexts.

Scientific Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the fundamental principles, concepts, questions, and methods of science.

Area Objectives: In the study of scientific knowledge and inquiry, students will explore how empirical questions are addressed using the iterative methods and tools of science. Students will also examine the scientific underpinnings of environmental processes. This Core Area will prepare students to make reasoned decisions and informed judgments about the role science plays for people, communities, societies, and life on Earth.

Curriculum

Foundational/Tier I

Code	Title	Hours
ENVS 101	The Scientific Basis of Environmental Issues	3

Tier II

A requirement for all Tier II Courses: ENVS 101 The Scientific Basis of Environmental Issues. Please check requirements for declared majors/minors for exceptions.

Code	Title	Hours
Choose one of the following:		3
ANTH 101	Human Origins [D]	
ANTH 103	Biological Background Human Social Behavior [D]	
ANTH 104	The Human Ecological Footprint	
ANTH 105	Human Biocultural Diversity [D]	
ANTH 106	Sex, Science and Anthropological Inquiry [D]	
BIOL 110	Liberal Arts Biology	
ENVS 207	Plants and Civilization	
ENVS 218	Biodiversity & Biogeography

ENVS 281	Environmental Sustainability & Science in China	
ENVS 283	Environmental Sustainability	
PHYS 101	Liberal Arts Physics	
PHYS 102	Planetary and Stellar Astronomy	
PHYS 106	Physics of Music	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. explain Earths' physical, chemical, and biological systems and the implications of their alteration by human activities.
2. describe how scientific data are collected, analyzed, and interpreted using the Scientific Method and fundamental scientific principles and concepts.
3. collect, analyze, and interpret scientific data to explore empirical questions.
4. communicate scientific processes and results.
5. articulate the philosophical or historical foundations of one or more contemporary scientific disciplines.

Societal and Cultural Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore the study of society, culture, and people and the distinct disciplinary approaches within the social sciences.

Area Objectives: Through these courses, students will learn about various political, economic, and social systems across the globe and their interconnections, as well as the beliefs, rituals, structures, and values that constitute societies and cultures. In addition, students will learn about the experiences of underrepresented communities (e.g., related to socioeconomic status, ability, gender, sexual orientation, race/ethnicity, or religion) within a particular cultural and societal context, and how people shape and are shaped by society. Students will explore concepts such as power, privilege, oppression, inequality, and social justice, critical to fashioning a humane and just world.

SOCL 171	Sociology of Sex and Gender [D]	
SOCL 250	Inequality in Society [D]	
WSGS 201	Contemporary Issues in WSGS [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. describe and analyze the key processes and components of cultural, economic, political, or social forces across time or place.
2. summarize the various ways that people, groups, or communities shape and are shaped by cultural or social forces.
3. analyze the various ways in which identities are formed through a complex interaction of biographical, societal, or cultural contexts.
4. describe the experiences of underrepresented, marginalized, or oppressed communities within various contexts, including inequality in outcomes and resistance to systems of oppression.
5. analyze how systems of power, privilege, and oppression (e.g., racism, sexism, heterosexism, ableism) operate to create and maintain inequality as well as how resistance to these systems is enacted.
6. apply concepts from above to analyze contemporary or historical issues of inequality and justice.

Theological & Religious Knowledge and Inquiry

Area Goal: This Core Area of Inquiry will invite students to explore a range of theological and religious questions and traditions, taking into account the roles these questions and traditions can play in human life and quests for meaning.

Area Objectives: Through these two courses, students will engage in critical thinking and informed reflection on theology and religion. Students will gain familiarity with the basic content of, and modes of scholarly inquiry into, selected religious and theological systems.

Curriculum

Foundational/Tier I

Code	Title	Hours
Choose one of the following:		3
THEO 100	Christian Theology	
THEO 107	Introduction to Religious Studies [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Tier II

Requirement for Tier II Courses: THEO 100 Christian Theology or THEO 107 Introduction to Religious Studies. Note that some Tier II courses specifically require THEO 100 to ensure students have the appropriate preparation for the course. Please see prerequisites listed with each Tier II course.

Code	Title	Hours
Choose one of the following:		3
THEO 203	Social Justice and Injustice [D]	
THEO 204	Religious Ethics and the Ecological Crisis [D]	
THEO 214	Introduction to the Qur'an	
THEO 231	Hebrew Bible/Old Testament	
THEO 232	New Testament	
THEO 265	Sacraments and the Christian Imagination	
THEO 266	Church & Global Cultures	
THEO 267	Jesus Christ	
THEO 272	Judaism [D]	
THEO 276	Black World Religion [D]	
THEO 278	Religion & Gender [D]	
THEO 279	Roman Catholicism	
THEO 280	Religion & Interdisciplinary Studies	
THEO 281	Christianity Through Time	
THEO 282	Hinduism [D]	
THEO 293	Christian Marriage	
THEO 295	Islam [D]	
THEO 297	Buddhism [D]	
THEO 299	Religions of Asia [D]	

D Courses with a Diversity Designation (https://www.luc.edu/core/core-diversity/) are indicated with a (D).

Area Learning Outcomes

After completing the two courses in this Area, students will be able to:

1. compare and contrast multiple answers to these questions that have been offered within the respective fields of Religious Studies and Theology: "What is religion?" and "What is the academic study of religion?"
2. demonstrate knowledge, with attention to historical development, of the texts, beliefs, ethical understandings, and practices of at least one religious tradition, including the diversity of perspectives within that tradition.
3. analyze the interdisciplinary intersections between religion and selected contemporary issues (e.g., ethical, social, political, economic, cultural issues, or other academic disciplines).
4. explain some of the ways in which religious thought and practices can both reinforce oppressive structures and also enable possibilities for resistance, paying particular attention to various perspectives of marginalized and oppressed groups.
5. critically reflect on religious perspectives, their own and those of others, and the implications of those perspectives.

Requirements for Students Entering as Freshmen

All Loyola students who enter as freshmen will follow the University Core Curriculum, which will entail completion of courses in the Core Areas (p. 989).

Please refer to the transfer credit policy for new (first time) freshman (p. 1919) administered by the Office of Registration and Records for more information on the credits that may count toward undergraduate degree requirements.

Requirements for Transfer Students

We strongly encourage all transfer students to work closely with their academic advisor to plan course selections to maximize the credit received from Loyola.

Loyola University Chicago is a participant in the Illinois Articulation Initiative (IAI), a statewide agreement that allows transfer students to complete the IAI General Education Core Curriculum (GECC) in lieu of a receiving institution's core curriculum. For more information on the Illinois Articulation Initiative, please visit their webpage (https://itransfer.org/).

Students Who Have Completed the GECC Requirements

At Loyola, all transfer students (**both in-state and out-of-state**) who have received an Associate of Arts (AA) or Associate of Science (AS) degree from a public community college, 4-year college, or university will have met Loyola's Core Curriculum requirements, with the exception of mission-specific courses. In addition, transfer students who attended an Illinois 2-year or 4-year institution, who enter Loyola without a degree but who have completed the IAI General Education Core Curriculum (GECC) requirements will also have satisfied Loyola's Core Curriculum requirements and only need to complete the mission-specific and Engaged Learning requirements as described below.

In-State Transfer Students Who Have Not Completed the GECC

If you are a transfer student from an in-state school entering Loyola with **30 or more hours of credit** but have not satisfied the GECC requirements, you may choose to complete core requirements either by completing the GECC or Loyola's Core Curriculum. If you choose to complete Loyola's Core Curriculum, you can find descriptions of the various Core Areas and courses that satisfy them on this webpage (p. 989). If you choose to complete your core requirements through the GECC option, you will need to select Loyola courses that articulate with the approved GECC courses from your prior institution(s). In addition, you will be required to complete the mission-specific courses and Engaged Learning requirement as described below.

If you enter Loyola with **fewer than 30 hours of credit** your courses will be articulated to Loyola courses on a course-by-course basis. You will then complete Loyola's Core Curriculum and Engaged Learning (p. 1000) requirements. You can find complete descriptions of the various Core Areas and courses that satisfy them on this webpage (p. 989).

Out-of-State Transfer Students Who Have Not Earned an AA or AS Degree

If you are a transfer student from an out-of-state school entering Loyola without an AA or AS degree, your courses will be articulated to Loyola courses on a course-by-course basis. You will then complete Loyola's Core Curriculum and Engaged Learning (p. 1000) requirements. You can find complete descriptions of the various Core Areas and courses that satisfy them, on this webpage (p. 989).

Mission-Specific Core Requirements

Transfer students who enter Loyola University having satisfied the general Core Curriculum requirements must complete mission-specific courses that are central to Jesuit education. These courses are not covered by the IAI/GECC. These mission-specific requirements may be transferred to Loyola or completed at Loyola, and include courses in the following Core Areas:

- Philosophical Knowledge and Inquiry (https://catalog.luc.edu/undergraduate/university-requirements/university-core/core-area-and-courses/philosophical-knowledge-inquiry/)
- Theological and Religious Knowledge and Inquiry (https://catalog.luc.edu/undergraduate/university-requirements/university-core/core-area-and-courses/theological-religious-knowledge-inquiry/)
- Ethical Knowledge and Inquiry (https://catalog.luc.edu/undergraduate/university-requirements/university-core/core-area-and-courses/ethical-knowledge-inquiry/)

Transfer students who enter Loyola University from either in-state or out-of-state institutions will complete their mission-specific requirements in accordance with the guidelines below:

For Transfer Students Entering with 30 or More Credit Hours

1. Students entering Loyola with 4 or 5 of the mission-specific Core courses will have completed the mission-specific Core requirements.
2. Students entering with 2 or 3 of the mission-specific courses will take the new transfer student course, either PHIL 190 Loyola's Mission: The Philosophical Vision or THEO 190 Loyola's Mission: Ignatian Traditions.
3. Students entering with 0 or 1 of the mission-specific courses will take the new transfer student course (PHIL 190 Loyola's Mission: The Philosophical Vision or THEO 190 Loyola's Mission: Ignatian Traditions) **plus** one of the mission-specific courses not completed; one of these must be an Ethical Knowledge and Inquiry (https://catalog.luc.edu/undergraduate/university-requirements/university-core/core-area-and-courses/ethical-knowledge-inquiry/) course if they have not already taken an Ethics course.

For Students Entering with Fewer than 30 Credit Hours

Students will be required to satisfy the same set of Core Curriculum requirements as students who enter as freshmen.

Transfer Credit Policy for New (First Time) Freshman

Students entering as freshman are not transfer students. Please refer to the transfer credit policy for new (first time) freshman (p. 1919) administered by the Office of Registration and Records for more information on the credits that may count toward undergraduate degree requirements.

Diversity and the Core

The current Core, which was launched in Fall 2012, introduces students to ten central Core Areas of university learning, with a consistent focus on learning outcomes for those Areas. In addition to the content of the specific Core Areas (p. 989), Core courses integrate the understanding and promoting of values essential to a Loyola education, such as understanding diversity in the US or the world, understanding and promoting justice, and understanding spirituality or faith in action in the world.

With regard to *understanding diversity in the US or world*, many courses in the Core were specifically designed to address this important value

and allow students to develop the specific competencies that are shown below.

Demonstrate an understanding of diversity in the United States and the world.

***Competencies**: By way of example, Loyola graduates should be able to:*

1. Recognize that human diversity is complex and variegated.
2. Distinguish the various factors that inform and impact individual identity formation.
3. Comprehend how group identities are formed in a heterogeneous society.
4. Identify distinctive patterns of thought and behavior that contribute to the formation of a culture different from one's own.
5. Perceive the interdependence of cultures in domestic and global terms.

Currently one-third of all courses in the University Core Curriculum are diversity-designated, including all Tier 1 Societal and Cultural Knowledge and Inquiry courses. Courses with a Diversity Designation are indicated with a (D) next the course titles listed under Core Areas and courses (p. 989) so that they can be easily identified.

The Loyola University Chicago Core Curriculum is a critical element in a student's transformative education that serves as a framework for learning, reflecting and experiencing, as Loyola students prepare for lives seeking knowledge in the service of humanity. The integration of diversity as a core value in this curriculum is an essential component of this enterprise.

Core and Your Major and Minor

Some Core Area requirements can be satisfied by virtue of completing a major or minor program of study, given the extensive work a student must do in a particular knowledge area while pursuing such a program of study. These Core Areas satisfied by majors or minors are listed below. Please see your major or minor advisor for details about additional requirements for majors or minors.

If you change majors or minors, you may have completed some Core Curriculum requirements prior to the change. Please check with your academic advisor for confirmation of your remaining Core Curriculum requirements.

Honors and the Core

100-level Honors

Upon successful completion of HONR 101 Western Traditions - Antiquity to the Middle Ages and HONR D101 Developments Western Thought I Discussion, the following Core requirements are waived: Philosophical Knowledge and Inquiry Tier 1 (3 credit hours); Theological & Religious Knowledge and Inquiry Tier 1 (3 credit hours).

Upon successful completion of HONR 102 Western Traditions-Renaissance to Modernity and HONR D102 Developments in Historical Western Thought II Discussion, the following Core requirements are waived: Artistic Knowledge and Inquiry (3 credit hours); Literary Knowledge and Inquiry Tier 1 (3 credit hours).

Upon successful completion of HONR 101, HONR D101, HONR 102, and HONR D102, the requirement for College Writing Seminar, UCWR 110 Writing Responsibly, is waived. HONR D102 is a Writing Intensive course.

200-level Honors Courses

Honors students who successfully complete all four 200-level Honors requirements will receive four Core waivers as follows:

- Historical Knowledge and Inquiry Tier 2
- Societal and Cultural Knowledge and Inquiry Tier 2
- Literary Knowledge and Inquiry Tier 2
- Scientific Knowledge and Inquiry Tier 2

Please note: You must complete ALL FOUR 200-level Honors course requirements before the four Core course waivers are applied. Students who leave the Honors program before completing their Honors 200-level requirements must appeal to the Director of Core Curriculum (Core@luc.edu) to determine whether any of their 200-level Honors courses can lead to Core waivers.

Education students in Honors are not required to take HONR 203; and Engineering students in Honors are not required to take HONR 204.

Honors students can take a 200 or 300 level history course to fulfill their History Tier 1 requirement. To utilize this exception, the HIST course must be taken at a Loyola University Chicago campus and cannot be a transfer credit of any kind. Transfer credit for HIST 101, 102, 103, 104 can still be utilized to fulfill Tier 1 HIST requirement.

300-level Honors Capstone: Moral Responsibility

Upon successful completion of HONR 301 Honors Capstone: Moral Responsibility, the Core requirement for Ethical Knowledge and Inquiry (3 credit hours) is waived.

Be aware students will be required to fulfill the Quantitative Knowledge and Inquiry (3 credit hours); Historical Knowledge and Inquiry Tier 1 (3 credit hours); Philosophical Knowledge and Inquiry Tier 2 (3 credit hours); Scientific Knowledge and Inquiry Tier 1 (3 credit hours); Societal and Cultural Knowledge and Inquiry Tier 1 (3 credit hours); and Theological and Religious Knowledge and Inquiry Tier 2 (3 credit hours) outside of the Honors Program.

Engaged Learning in the Honors Program

All Honors students are required to take 3 credit hours of Engaged Learning coursework. These courses provide a core learning experience integrated into a course that engages students in learning outside the classroom. You can find more information on the Engaged Learning (p. 1000) page.

HONR 290 Literacy Center *does not* satisfy any requirements within the Honors program, but it can be taken to satisfy the Engaged Learning requirement.

Additional Information

Visit the Interdisciplinary Honors (p. 501) page for additional information about the program and requirements.

Engaged Learning

The Engaged Learning requirement supports the mission of Loyola University Chicago by embedding opportunities for students to explore the many different forms of experiential learning as part of their academic coursework. All undergraduate students are required to complete at least one Engaged Learning course/s totaling at least three (3) credit hours prior to graduation.

A list of course offerings can be found on the Center for Engaged Learning, Teaching, and Scholarship (CELTS) site (https://www.luc.edu/celts/).

Engaged Learning courses are those that provide all of the following:

- A structured learning experience integrated into a course that engages students in learning outside the classroom, such as in a community agency, professional organization, or in a research setting
- Critical reflection on that experience through various assignments in class
- Synthesis of the experience through a final project or learning portfolio (https://www.luc.edu/celts/programs/learningportfolio/).

Engaged Learning courses may be offered by either individual departments, academic programs, and the Center for Engaged Learning, Teaching, and Scholarship. This requirement may be satisfied by a course within the Core Curriculum, or in a student's major or minor, or through an elective course. Students may engage in these courses during the regular academic year, summer semester, J-Term, a capstone course or a study abroad experience.

Since a requirement of all Engaged Learning courses is for students to complete a final project or a learning porfolio, click here (https://www.luc.edu/celts/programs/learningportfolio/) to learn more about learning portfolios. Learning portfolios, often referred to as a ePortfolios, are high-impact tools for learning. They are a digital collection of students' demonstrated knowledge, competencies and skills represented through learning artifacts. Learning portfolios assist students to deepen critical reflections and integrate learning across course concepts, academic disciplines, and co-curricular experiences.

Upon designating a course as Engaged Learning, the course remains designated as Engaged Learning until notice is given otherwise. Academic departments and/or faculty instructors must communicate if a course changes (new course number, for example) or if a course retires the Engaged Learning designation; please communicate with the Director of Engaged Learning, Dr. Patrick Green (Executive Director, Center for Engaged Learning, Teaching, & Scholarship) at engagedlearning@luc.edu. You can also access Frequently Asked Questions about Engaged Learning? (https://www.luc.edu/media/celts/Engaged%20Learning%20FAQs.pdf).

Academic Internships

For a course to be designated as "Academic Internship", satisfying the University Engaged Learning requirement, it must meet all the criteria below. Criteria for academic internship courses are based on research and best practices, the CAS Standards for Internships (2009), and the National Association of Colleges and Employers (NACE) Position Statement on U.S. Internships (2011).

1. *The academic course in which students engage in an internship clearly states the hours requirement (minimum of 100 hours of work).*
2. *The internship must be approved by the faculty instructor, as it is the extension of the classroom and applying knowledge gained in the classroom.*
3. *The internship experience has a clear position description with a professional organization related to their field of study, educational goals and/or career and vocational aspirations.*
4. *The learning objectives related to the internship experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
5. *There is supervision and feedback by a professional with expertise related to their field of study, educational goals and/or career and vocational aspirations.*
6. *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*

All courses that have been approved to satisfy the University Engaged Learning Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

Please Note: *Past internships are not considered for Engaged Learning credit. Students with an approved internship must enroll in an academic internship course that has been designated for Engaged Learning by the University's Engaged Learning Subcommittee of the Board of Undergraduate Studies (BUS). The academic internship course and the internship experience are done concurrently (in the same semester).*

College of Arts and Sciences

AFR 397 Capstone/Internship (3 Credit Hours)
This capstone course may be completed in a variety of ways. This includes an internship at a business or organization that is related to the program, or a study abroad semester related to the program. Internships require a minimum of 10 hours/week verified service hours over the 15 week semester, amounting to 3 credit hours. Students may also make a 300 level AFR course into a "Capstone" by adding an additional, in-depth research assignment approved by the course instructor and the program director. Director approval is required for this course.
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.

ANTH 396 Internship in Anthropology (3-6 Credit Hours)
Pre-requisites: Students must receive instructor permission prior to enrolling and must complete (with signatures) the Course Contract Form
Enrollment is limited to Undergraduate Anthropology Majors/Minors.
This course is designed to enhance student engagement by facilitating internship experiences within the department or in museums, service-oriented organizations, businesses, and non-profit organizations. Experiential learning is combined with rigorous academic work. This course may serve, if appropriate, as a capstone experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will produce a research paper, project, proposal, or assessed piece that reflects the application and integration of anthropological theory, methods, or techniques, to the internship experience

BIOI 398 Bioinformatics Internship (1-4 Credit Hours)
An independent research experience involving laboratory experiments, computer program development, or statistical analysis or any combination of these performed off-campus under the mentorship of a Bioinformatics scientist not affiliated with Loyola.
Interdisciplinary Option: Bioinformatics
This course satisfies the Engaged Learning requirement.
Outcomes:
All students will acquire skills to perform and report on independent research and to be intellectually responsible for evaluating their own and related work; Other outcomes will include at least one of the following: Experimental expertise, statistical evaluation of data sets, design and use of computational tools

BIOL 398 Internship in Biology (1-3 Credit Hours)
Pre-requisites: Permission of Instructor; Contract required
A supervised field placement intended to give students training or work experience in aspects of biology that cannot be obtained on campus.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in biology-related job settings

CHEM 399 Internship in Biochemistry or Chemistry (2-3 Credit Hours)
A supervised field placement to give students training or work experience in aspects of biochemistry or chemistry that are not commonly available on campus. Students will work outside the classroom (e.g. industrial setting or national lab) applying and extending their biochemistry or chemistry skills, typically for at least 150 hours to receive 3 credits or for more than 100 hours for 2 credits. Permission of faculty advisor Students must complete a total of 3 credits to receive engaged learning credit.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in biochemistry or chemistry related job settings

CLST 382 Internship in Classical Studies (3 Credit Hours)
Students complete a semester-long internship (100 hours minimum) that builds on their training in Classical Studies.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain practical experience while applying theories and techniques gained from coursework

COMP 391 Internship in Computer Science (1-6 Credit Hours)
Students work outside the classroom applying and extending their computer science skills, typically for at least 150 hours for 3 credits. A memorandum of understanding is required between a student, his or her employer, and the Undergraduate Internship Coordinator, followed by final reports from the student and the employer.
This course satisfies the Engaged Learning requirement.
Outcomes:
Application of classroom skills to real-world situations

CJC 390 Capstone Experience Internship (1-6 Credit Hours)
Pre-requisites: CRMJ Majors and Minors, Psychology of Crime and Justice Minors, Forensic Science Majors
The purpose of this course is to enhance the student's development and learning through observational and participatory experience in criminal justice agencies.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency and be able to identify and describe the link between their field experience and prior courses

DANC 394 Internship in Dance (1-12 Credit Hours)
Dance students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a dance organization while reflecting on their work experience and applying theories and techniques acquired from their first dance courses

ENGL 393 Teaching English to Adults: Internship (1-3 Credit Hours)
Pre-requisites: Sophomore Standing or above
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program at Loyola University. Students examine literacy issues and write a research paper.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills

ENGL 394 Internship (3 Credit Hours)
Pre-requisites: Junior standing, six English courses
This course provides on-the-job experience for majors in adapting their writing and analytical skills to the needs of such fields as publishing, editing, and public relations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to analyze their experience in terms of the skills they brought to their jobs, what they learned about the fields they worked in, and what new skills they developed as a result of their experiences

FNAR 368 Fine Arts Internship (1-4 Credit Hours)
A comprehensive introduction to gallery and/or studio operations in the Fine Arts Division. Internships will provide opportunities in various aspects of administration, scholarship, teaching, and sustaining standards in studio and/or gallery performance. Gallery internships available at the Ralph Arnold Gallery. External internships upon approval. Teaching/studio assistantship based on class availability. Departmental consent required for enrollment.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop practical experience for the professional world and be able to demonstrate knowledge of gallery/museum administration, scholarship, exhibition production, and/or class preparation and teaching

FNAR 380 Internship I (1-4 Credit Hours)
Pre-requisites: FNAR 332 Visual Communication III; Fine Arts Majors only
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FNAR 381 Internship II (1-4 Credit Hours)
Pre-requisites: Permission of chairperson
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FREN 395 Internship (3 Credit Hours)
Pre-requisites: Completion of at least one 300-level French course and instructor's consent
Eligible students who have secured an internship related to the field of study may complete an internship for credit, with the approval of a faculty member. Students complete reflective assignments and a final project in French, in consultation with the faculty member.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience while working with the French language and Francophone cultures and applying skills they have learned in the classroom

FRSC 390 Forensic Science Internship (1-4 Credit Hours)
Pre-requisites: FRSC 342; Restricted to Forensic Science majors
The purpose of this course is to enhance the student's development and learning through observational and participatory experience in forensic focused criminal justice agencies.
Interdisciplinary Option: Forensic Science
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-FRSC 390/ANTH 396A
Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific forensic focused criminal justice agency and be able to identify and describe the link between their field experience and prior courses

HIST 398 History Internship (3 Credit Hours)
This course provides three hours credit for students engaged in history related internships in the public and private sectors.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to obtain an internship position, to learn on-the-job from an experienced practitioner in a wide variety of public and private sector settings, to draw links between their present situation and historical research, and to develop critical thinking and communication skills

HMSV 390 Supervised Fieldwork II (6 Credit Hours)
No course description is available
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.

GLST 370 Internship in Global Studies (3-6 Credit Hours)
Pre-requisites: Open to all GLST major and minors but requires instructor permission to enroll
Students enrolled in this course must secure an internship relevant to the field of global studies. Students not only engage in regular workplace activities but also attend class meetings, complete writing assignments reflecting on their internship placements, write a final paper, and submit a final evaluation from their workplace supervisor.
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, European Studies, Global Studies, Latin American Studies, Middle East and Islamic World Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate awareness of at least one important global concern or issue as addressed in the internship

ITAL 395 Internship (3 Credit Hours)
The internship will enable students to gain practical experience in working in Italian government institutions in Chicago (such as the Italian Cultural Institute) or working in businesses or education.
Interdisciplinary Option: Italian Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will work 4-8 per week and reflect on their experience in conversations with supervising professor and other interns

MUSC 394 Internship in Music (1-6 Credit Hours)
Music students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission required. No more than 6 credit hours of Internship or Fieldwork can be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a music organization while reflecting on their work experience and applying theories and techniques acquired from their music courses

PLSC 370 Fieldwork in Political Science-Internship (1-6 Credit Hours)
Practical experience in political and governmental agencies and organizations in Chicago and Washington, D.C.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students learn about different forms of public service and the ethical responsibilities of civic engagement; Working in a professional office for fifteen weeks allows students to experience the world of public service first-hand; Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

POST 395 Polish Studies Capstone (3 Credit Hours)
Capstone course to the POST Minor program. This is a tutorial course with a service learning component that serves an integrative purpose. In the tutorial students will focus on a specific issue or theme in POST. The syllabus will reflect the research interests of the faculty member who administers the course.
Interdisciplinary Option: Polish Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to integrate their coursework in the POST minor with their major concentration

PSYC 390 Internship in Psychology (3 Credit Hours)
Pre-requisites: PSYC 304 and approval via an internship application due on the 5th Friday of the previous semester
Capstone service-learning experience for psychology majors, involving application and development of psychological knowledge and skills through an internship (100 hours) in a human service organization or applied research setting, combined with regular class meetings, reading and writing assignments. Students arrange placements and complete a project on site. Application details may be found here: https://luc.edu/psychology/undergraduate/internshipinpsychology. Practical, pre-professional job skills, critical analysis and connection between theory and practice, on topics of: human service agency operation; effective working relationships; professional communication; cultural competence; values and ethics.
This course satisfies the Engaged Learning requirement.

SOCL 380 Internship (3-6 Credit Hours)
Pre-requisites: Permission of instructor or chair
Supervised field experience for students working in a selected community organization, government agency, social agency, or business.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students have opportunity to apply the skills and analysis of sociology to a concrete situation

SPAN 395 Internship (3 Credit Hours)
The internship will allow students to work in a variety of settings using Spanish - business, education, government, or social service agencies.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain practical experience in speaking and writing Spanish

STAT 391 Internship in Actuarial Science (1-3 Credit Hours)
Pre-requisites: STAT 304 and 396; approval of the internship director
This course offers an opportunity to obtain experience in actuarial science in a professional environment; placement requires approval of the internship coordinator and acceptance by an employer.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will obtain first hand experience doing actuarial work in a real world environment

THEO 348 Supervised Ministry (3 Credit Hours)
Placement in a ministerial position, on-site supervision, and biweekly individual or group meetings with the course director is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts

THTR 394 Internship in Theatre (1-6 Credit Hours)
Theatre students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department Permission Required. No more than 6 credit hours of Internship of Fieldwork may be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a theatrical organization while reflecting on their work experience and applying theories and techniques acquired from their theatre courses

WSGS 398 Women's Studies Internship (3 Credit Hours)
This course uses supervised project-based experiential learning to allow students the opportunity to apply feminist analysis and practical skills to a student-designed project that will be completed within the timeframe of a course term.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST398/WSGS398
Outcomes:
Students learn application of feminist concepts and principles to pragmatic outcomes; leadership, planning, time management, and assessment skills

Rome Campus

- GLST 370 Internship in Global Studies
- ITAL 395 Internship

Center for Engaged Learning, Teaching, & Scholarship/Office of the Provost

EXPL 390 Internship Seminar: Organizational Change and Community Leadership (3 Credit Hours)
This course is a seminar course focusing on organizational leadership and change through a 100 hour internship experience with a non-profit organization, government agency, or business organization, pre-approved by the Center for Experiential Learning.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Students will gain professional experience at an organization while reflecting on their work experience and applying theories of organizational leadership, civic engagement, community development, and leadership in the community

EXPL 393 Seminar in Integrative Leadership (3 Credit Hours)
This is a seminar course for students leaders in approved co-curricular programs (e.g., ABI leaders, student organization executive board, Loyola4Chicago leaders, etc.). Students in this course will complete at least 100 hours in a leadership experience in the context of integrative leadership theory culminating in a portfolio to demonstrate holistic leadership capacity.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Develop understanding of leadership theories, reflection on actions, and integrative leadership theories; 2) Enhance connection to the institution through leadership experience, and academic and professional learning and development; 3) Produce an integrative professional portfolio

Institute of Environmental Sustainability

ENVS 395 Environmental Internship (3 Credit Hours)
Students seek out and engage in a semester- or summer-long internship with a civic, business, governmental, or academic group providing hands-on experience in work on environmental issues.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate, through daily activity logs and a comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience

Interdisciplinary Honors Program

HONR 290 Literacy Center (3 Credit Hours)
Pre-requisites: Students in or beyond their second semester; UCWR 110 or equivalent
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program. Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills.
This course satisfies the Engaged Learning requirement.

HONR 370 Fieldwork in Honors - Internship (1-3 Credit Hours)
The main goal of this course is to provide students with valuable work experience in a professional field connected with their academic program. It allows students to apply and further develop their knowledge and skills through an internship in a non-academic setting. The course is also intended to serve as a "bridge" between college and career. This internship presents an opportunity for students to gain valuable professional experience as an intern in public or private institutions engaged in public service projects. HONR 370 will satisfy the "service" requirement for all Honors students.
This course satisfies the Engaged Learning requirement.

Parkinson School of Health Science and Public Health

EXCM 395 Clinical Internship and Patient Management (6 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L), 4 of 8 upper division EXCM courses
Practical experience working with exercise physiologists, physical therapists, occupational therapists, rehabilitation therapists, and others, in cardiac care and orthopedic rehabilitation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Understand development and implementation of population-based exercise science programs; Demonstrate competency in fitness assessments; Explain management structure(s), staffing patterns and operations of exercise and fitness sites; Implement regular and specific-focus exercise programs; Evaluate regular and specific-focus exercise programming; Demonstrate oral and written communication skills consistent with a leadership role in exercise science

HSM 360 Healthcare Administration Experiential Learning Practicum (6 Credit Hours)
Pre-requisites: HSM 310, HSM 315, HSM 330, HSM 338, HSM 345, HSM 358, HSM 368, and HSM 386
This course offers students an immersive professional experience within a healthcare setting, providing the opportunity to apply theoretical knowledge gained from prior healthcare administration coursework in a real-world context. Under the guidance of the course instructor(s) and a field preceptor, students collaborate with a healthcare organization to complete goal-oriented projects that align with the organization's needs and objectives. These projects are developed in partnership with the student, faculty advisor, and field preceptor, ensuring both practical relevance and academic rigor. Students are required to complete a minimum of 196 on-site hours, scheduled in coordination with the preceptor. This hands-on engagement allows students to refine their skills, deepen their understanding of healthcare administration, and contribute meaningful outcomes to their host organization.
This course satisfies the Engaged Learning requirement.
Outcomes:
Apply healthcare administration theoretical knowledge, concepts, and skills; Utilize analytical tools to address problems of practice; Exhibit critical thinking and advanced communication skills; Apply ethical reasoning to make at principled decisions in alignment with the Jesuit tradition; Incorporate feedback to enhance improve personal and professional effectiveness; Demonstrate independence, resourcefulness, and thoughtfulness in the workplace

PUBH 310 Public Health Internship (3 Credit Hours)
This practical internship course will integrate theory, where students will unpack the complexities of Public Health and gain an understanding of the roles and responsibilities of professionals. Careers in Public Health are multidimensional, students will integrate real world experience reflecting on experiences of leadership, health equity, community engagement, and professional development.
This course satisfies the Engaged Learning requirement.
Outcomes:
Integrate academic internship experience with course curriculum academic content through critical reflection of leadership theory and development; assess leadership identity, leadership behavior, and civic role in a public health framework

PUBH 399 Public Health Capstone Experience (3 Credit Hours)
This course is a cumulative, integrative and scholarly or applied experience or inquiry project. It may include internships, service-learning projects, senior seminars, portfolio projects, or research paper. The project provides the opportunity for students to demonstrate proficiency in effective communication skills through a written report and oral presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate in written report and oral presentation the knowledge and skills acquired during the undergraduate program through selected projects which translate gained information into public health practice, including research

School of Business

IBUS 370 Inernational Business Internship - Engaged Learning (3-6 Credit Hours)
Pre-requisites: Sophomore standing, Permission of Instructor
IBUS 370 is a seminar course that challenges students to analyze the theory and practices from the world of work that impact the ethics of leading, interpersonal and organizational dynamics, and competent work place contributions required for success in the modern business world. Concepts associated with internship/engaged learning as related to career development will be addressed. Students are required to work a minimum of 120 hours over the course of one semester. All internships must be supervised by professionals and may be paid or unpaid.
This course satisfies the Engaged Learning requirement.
Outcomes:
a) Developing a foundation on which a student may build a career; b) Understanding the role of the Jesuit tradition as it relates to leadership and service

School of Communication

COMM 391 Advertising/Public Relations Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Completed 18 credit hours in COMM courses; Restricted to ADPR majors; Instructor Consent; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 392 Multimedia Journalism Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to MJRN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 393 Communication Studies Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to CMAS and CMUN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 394 Film & Digital Media Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to FDMD majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

School of Continuing and Professional Studies

CPST 398 Professional Studies Internship Seminar (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 398 must take CPST 399 the following session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Applied experience in a professional setting

CPST 399 Professional Studies Internship Seminar II (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 399 must first take CPST 398 the previous session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Outcomes:
Applied experience in a professional setting

School of Education

ELPS 265 Cultural and Educational Policy Studies Internship (3 Credit Hours)
The Internship in Cultural and Educational Policy Studies course is intended to help students integrate theoretical and research coursework with a practical field-based experience to reflect on their own development as professionals working in the field of education.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students develop and refine their professional skills and competencies; Students will be able to identify key education issues domestically and/or internationally and critically analyze them in terms of the relationship(s) between policy and practice

School of Nursing

CMAN 380 Community Health (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 294, and GNUR 290 with a C- or better; Must also enroll in CMAN 380L
Nursing and public health concepts provide theoretical basis for care of families, aggregates, and communities outside institutional settings. Role of community health nurses in caring for specific aggregates is described. Clinical experiences are provided for application of concepts and implementation of nursing interventions in a variety of community settings.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN380/CMAN380A/CMAN375

School of Social Work

SOWK 330 Internship I and Simulated Experience (4 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate ethical and professional behavior in field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining professional responsibility in internship settings; Engage and assess individuals, families, groups, organizations, and communities using culturally responsive, anti-racist, and person-in-environment frameworks to inform social work practice and policy-relevant decision-making; Implement, evaluate, and advocate for evidence-informed and policy-relevant interventions in collaboration with clients and constituencies to achieve practice goals and improve outcomes

SOWK 340 Internship II and Simulated Experience (4 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, (SOWK 201 or 307), SOWK 370, SOWK 305, and SOWK 350
Co-requisites: SOWK 330
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate ethical and professional behavior in field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining professional responsibility in internship settings; Engage and assess individuals, families, groups, organizations, and communities using culturally responsive, anti-racist, and person-in-environment frameworks to inform social work practice and policy-relevant decision-making; Implement, evaluate, and advocate for evidence-informed and policy-relevant interventions in collaboration with clients and constituencies to achieve practice goals and improve outcomes

Fieldwork

For a course to be designated as “Fieldwork”, satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for field work courses are based on research and best practices in experiential learning:

1. *The field work (clinical placement, practicum) must be approved by the faculty instructor, as it is the extension of the classroom and applying knowledge gained in the classroom.*
2. *The academic course in which students engage in the field work clearly states the hours requirement (minimum of 100 hours of work).*
3. *The field work experience is with a professional organization related to their field of study, educational goals and/or career and vocational aspirations.*
4. *The learning objectives related to the field work experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
5. *There is supervision and feedback by a professional with expertise related to their field of study, educational goals and/or career and vocational aspirations.*
6. *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*

All courses that have been approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

College of Arts and Sciences

ANTH 399 Fieldwork in Anthropology (1-6 Credit Hours)
Pre-requisites: Permission of chairperson and faculty member
Application of anthropological concepts and methods to a specific field situation under the supervision of a faculty member.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn field techniques and data recovery and analysis techniques pertinent to the specific nature of their field experience

ARTS 397 Fieldwork in Arts Education (3 Credit Hours)
Credit given for arts education work outside the university undertaken under the guidance professional arts educators. Students keep an hour and activity log and write reflective evaluative papers. Permission of the Department of Fine and Performing Arts Specific outcomes and credit hours assigned to be determined by the student in consultation with the Teaching Artistry Faculty Coordinator and the project supervisor

DANC 397 Fieldwork in Chicago - Dance (1-12 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional dance organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Dance and the project supervisor

ENGR 391 Biomedical Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 381 during the same academic year, ENGR 342, concurrent enrollment in ENGR 343
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored medical device projects assigned in ENGR 381. Medical device product development or regulation topics are also introduced.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce medical device solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 392 Computer Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 382 during the same academic year, ENGR 352, concurrent enrollment in ENGR 353
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored design projects assigned in ENGR 382. Computer engineering or professional development topics are also introduced.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce computer engineering solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 393 Environmental Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: ENGR 383 (minimum C-)
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored design projects assigned in ENGR 383. Environmental engineering or professional development topics are also introduced. ENGR majors only.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce environmental engineering solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

GNUR 384 Clinical Role Transition (3 Credit Hours)
Pre-requisites: Must have taken and passed MCN 273, MCN 374, CMAN 272, CMAN 380, GNUR 360,with a C- or better; Must have taken and passed MCN 273L, MCN 374L, CMAN 272L, and CMAN 380L with a P; Must also enroll in GNUR 383
Through preceptor-based learning and seminars, this experience focuses on assimilating the role behaviors of a professional nurse as a provider, designer, manager, and coordinator of care in health care systems, and a member of a profession. Clinical reasoning, critical thinking, prioritization, and the integration of knowledge are emphasized in this experience, focusing on the provision of patient-centered, evidence-based care as a member of an interprofessional health care team.
This course satisfies the Engaged Learning requirement.
Outcomes:
Upon successful completion of this course, the student is able to: 1) Incorporate standards of practice into the development, implementation, and evaluation of evidence-based, patient-centered care; 2) Apply principles of quality and safety in patient care settings; 3) Apply knowledge of prioritization and delegation in the management of care; 4) Collaborate with patients, families, and members of the interprofessional health care team in the design, delivery, and evaluation of evidence-based, patient-centered care; 5) Exemplify role behaviors consistent with a member of a profession; 6) Incorporate ethical, legal, regulatory, financial, and economic considerations into the design, delivery, management, and evaluation of care

MLSC 302 Applied Leadership in Small Unit Operations (3 Credit Hours)
Pre-requisites: Restricted to ROTC students; MLSC 301 or departmental consent is required
MLSC 302 consists of both lecture and lab sections; focuses on applied leadership in small unit operations; analyze, test, and relate the fundamentals of direct level leadership and small unit tactics at the platoon level.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student who possesses enhanced individual and collective skills, effectively leads formations in various scenarios, effective at receiving and giving peer evaluations, committed and disciplined ethically, academically, physically, and socially; Successful completion of this course will help prepare contracted Army ROTC students for the Cadet Summer Training Advance Camp, which students normally attend summer of junior year at Fort Knox, KY

MUSC 397 Fieldwork in Chicago - Music (1-6 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional music organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours can be applied towards the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours to be assigned to be determined by the student in consultation with the Director of Music and the project supervisor

THTR 397 Fieldwork in Chicago - Theatre (1-6 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional theatre organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied towards the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Theatre and the project supervisor

WSGS 388 Women's Studies Practicum (3 Credit Hours)
This supervised field experience uses experiential learning at a wide variety uses experiential learning at a variety of women's political, cultural or educational organization as the basis for learning and refining skills which cab benefit gender equity.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST388/WSGS388
Outcomes:
Students demonstrate skill proficiency, professional conduct, and systematic reflection on their experience; Students learn about public and private sector responses to women's issues and concerns

School of Business

See Academic Internships (QUIN 351 Business Internship-Engaged Learning)

ISSCM 393 Requirements Analysis and Communication (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" or better in ISSCM 247
This course focuses on Information Systems requirements and related communication skills. Students will learn how to gather requirements for Information Systems from an organization's users and executives based on a general understanding of organizations and business goals. Students learn techniques of how to translate between organizational needs and requirements for systems and processes, and how to analyze, validate, and prioritize those requirements. A special focus of the course will be to improve business communication skills such as interviewing, listening, presenting and negotiating.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ISOM393 / MGSC393

School of Communication

COMM 315 Advanced Reporting Topics (3 Credit Hours)
Pre-requisites: COMM 205 and 362; Junior Standing and above
This course offers in-depth attention to the challenges of writing complex stories characterized by careful research, use of sources, interviewing, and reporting and writing. Students examine writing for a "lay" audience in such areas as science and technology, finance, government, and religion. Can be repeated once with a different topic. Second completion can count as major elective in MJRN.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will broaden their writing and research experience

COMM 345 Student Agency (3 Credit Hours)
Pre-requisites: COMM 175 and Instructor Consent
Course involves actual client work in Inigo, the student-run communications agency. Students gain skills/put theory into action as they provide public relations, digital communication, strategy and other services to companies and non-profits. Students apply prior semester. Contact instructor at cmcphil@luc.edu for details. All majors encouraged.
This course satisfies the Engaged Learning requirement.
Outcomes:
A fundamental understanding of what agencies are and how they function; A heightened sense of professionalism; Advanced-level teamwork; Increased written and verbal communication skills

COMM 381 Communication Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students gain advanced practical experience in service experiential learning projects. Student must develop a project with a full-time faculty member in COMM Studies. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf.
This course satisfies the Engaged Learning requirement.
Outcomes:
Create a capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public; Create and implement communication projects that are responsive to community needs and organizational goals in local and global contexts; Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media; Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community; Demonstrate the competencies to work as an entry-level professional in advertising or public relations

COMM 382 Multimedia Journalism Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students gain hands-on practical experience in developing multimedia journalism projects. Student must develop a project with a full-time faculty member in Multimedia Journalism. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf.
This course satisfies the Engaged Learning requirement.
Outcomes:
Create a capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public; Create and implement communication projects that are responsive to community needs; Produce journalistic stories to reach diverse publics and for distribution through multiple\ \nchannels, including both traditional and digital media; Practice ethical communication in professional practices that are socially responsible and\\nin the mutual interests of the organization and the community; Demonstrate the competencies to work as an entry-level professional in journalism

COMM 383 Radio Practicum (3 Credit Hours)
Pre-requisites: Department Consent
Students will work with WLUW radio station under the supervision of a faculty member participating in one or several of the following activities: generating story ideas, booking guests, interviewing guests, doing promotions using social networking and on-air productions, recording, editing and producing audio segments, and learning several facets of what it takes to produce a radio show.
This course satisfies the Engaged Learning requirement.
Outcomes:
Technical Proficiency: Operate studio and control-room equipment for live boards, automation, and remote recording, including digital audio workstations (eg, Adobe Audition, Pro Tools); Production Skills: Create, edit, and mix broadcast-ready content, including promos, PSAs, interviews, and news reports that meet industry loudness and quality standards; On-Air Performance: Demonstrate effective vocal techniques, interviewing skills, and show pacing while hosting live or pre-recorded shows; Content Creation: Develop and curate relevant, engaging content tailored for specific audiences

COMM 384 Film and Digital Media Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students will gain advanced practical experience creating digital cinema projects. They may choose to focus on a certain role and section: director/producer, writer, cinematographer, editor, production designer, sound designer, or publicist.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain advanced practical experience producing and collaborating on digital cinema projects

School of Education

TLSC 380 Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching (6-12 Credit Hours)
This module (course) represents the candidates' full-time student teaching experience. Candidates will complete three of the edTPA tasks required for certification (edTPA: Designing Instruction Task; edTPA: Assessing Learning Task; and edTPA: The Culminating Teaching Experience Task) in order to document and demonstrate each candidate's ability to effectively teach his/her subject matter. Candidates will also engage in focused reflection on student teaching and their entire teacher preparation program. Candidates will complete the School of Education's Professional Practice Profile (PPP) essay at the end of the module.
This course satisfies the Engaged Learning requirement.
Outcomes:
Utilize research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students EU3; Create and support safe and healthy learning environments for all students EU9; Utilize information from theories and related research based practices when making decisions and taking action in their professional practice EU10; Maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement EU11; Enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups EU1; Hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity) EU7; Engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students EU2; Design and implement standards-based units and lesson plans to maximize learning for all students by using an appropriate variety of assessments, culturally responsive practices, multiple resources/representations and questioning to encourage critical/high-order thinking inquiry and problem solving based on high expectations for each student's learning and behavior (3H, 3I, 3N, 3Q, 5I, 5L, 5M, 5Q, 5S, 7K, 7P, 8N, 9A) (IB) EU3 S2, S3, S5, S6, S9; Use data to evaluate and monitor students' needs, instruction and collaboration for impact on teaching and learning, (1C, 4L, 4N, 4Q, 5M, 5N, 5J, 8I, 8O, 8S, 9K, 9N) (IB) EU9 S7, S8; Demonstrate understanding and proficiency in core concepts, constructs and working principles from theories and research when making decisions and taking actions related to specific TLLSC EUs and EU indicators, (1C, 2A, 2B, 2C, 2I, 2J, 2G, 3A, 3Q, 4A, 4L, 5A, 5B, 5E, 5F, 5S, 6B, 6C, 7A, 7B, 7C, 7F, 9L) (IB) EU10 K1, K2, K3, K4, S1, S2; Demonstrate the ability to recognize and value student diversity and the differences in how students learn and provide instruction to accommodate such diversity, (1K, 2K, 5M, 7M, 8J) (IB) EU11 S2, S3, S4, S6; Support and deliver instruction in cooperation with their assigned co-teacher, (1H, 1I, 1L, 3I, 3J, 3M, 3P, 4C, 4K, 4N, 5I, 7P, 9J)(IB) EU1 S7, EU2 S8, EU4 S7; Provide a written analysis of each observed lesson, with a focus on their ability to make content accessible, the level of student engagement, the use of developmentally appropriate teaching practices, and the teaching of English language learners and students with special needs, (1H, 3J, 5H, 5K, 5M, 5P,7Q)(IB) EU3 S10, S11, S16, S18 EU4 S5; Reflect in writing and discussion on their ability to deliver and adapt relevant instruction and assessments, classroom management and professional interaction with teachers, students and families, (5H, 5J, 9K) (IB) EU6 S12 EU2 S9; Conduct regular pre- and post-observation conferences with Internship Coaches and Co-teachers to evaluate personal instructional style, preparation, use of technology, collaboration to promote learning and professional interactions to determine their

School of Nursing

CMAN 272 Mental Health Patterns (3 Credit Hours)
Co-requisites: CMAN 272L
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 272L Mental Health Patterns: Lab (3 Credit Hours)
Co-requisites: Must also enroll in CMAN 272
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 380L Community Health: Lab (3 Credit Hours)
Must also enroll in CMAN 380.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN375L/CMAN380C/CMAN380L

MCN 273 Family Health Patterns I (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, GNUR 294 with a C- or better; Must have taken and passed MSN 277L with a P; Must also enroll in MCN 273L
This course allows students to apply concepts from systems theory and the levels of prevention models to structure the presentation of selected concepts related to health promotion and health maintenance of childbearing and parenting families.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of childbearing and parenting families

MCN 273L Family Health Patterns I: Lab (3 Credit Hours)
Co-requisites: Must enroll on MCN 273
No course description is available

MCN 374L Family Health Patterns II: Lab (3 Credit Hours)
Co-requisites: Must also enroll in MCN 374
No course description is available

MSN 277 Medical/Surgical Nursing: Adult Health I (4 Credit Hours)
Pre-requisites: Must have taken and passed PSYC 273 or PSYC 274 and GNUR 294 with a C- or better OR Must have taken and passed PSYC 273 or PSYC 274 with a C- or better and be enrolled in GNUR 294
This course is designed to use levels of prevention to provide nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families and communities across the health care continuum.

MSN 277L Medical/Surgical Nursing: Adult Health Lab I (3 Credit Hours)
Must also enroll in MSN 277. This course is designed to apply levels of prevention in nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families, and communities across the health care continuum.

MSN 377 Adult Health II - Advanced Medical-Surgical (4 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 290, GNUR 294, GNUR 360,with a C- or better; Must also enroll in MSN 377L
This course builds on MSN 277, Adult Health I, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are incorporated into the identification of interventions within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.
Outcomes:
Nursing care of adults experiencing selected critical health issues

MSN 377L Adult Health II - Advanced Medical Surgical Clinical (3 Credit Hours)
Must also enroll in MSN 377. This course builds on MSN 277L, Adult Health I Clinical, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are obtained and interventions are provided within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.
Outcomes:
Nursing care of adults experiencing selected critical health issues - clinical

Public Performance

For a course to be designated as “Public Performance“, satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for public performance courses are based on research and best practices in experiential learning:

- *The experience (e.g. musical performance, dramatic performance, art exhibit) is the culmination of a student’s work presented publicly in a program or performance, as it is the extension of the classroom and applying knowledge gained in the classroom.*
- *The academic experience in which students engage in the performance work clearly states the hours requirement.*
- *The learning objectives related to the performance experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
- *There is supervision and feedback by a professional with expertise related to their field of study, educational goals and/or career and vocational aspirations.*
- *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*

All courses approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

College of Arts and Sciences

DANC 212 Ballet Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Students should be familiar with the five feet and arm positions and be able to work in 5th position of the feet. Dancers should demonstrate correct alignment of the pelvis and spine in plie and releve and while working at the barre. Dancer must be able to execute correct articulation of the feet and leg in tendu. They should be familiar with basic petite allegro and action of the feet, hips and legs while jumping. This is a continuing ballet class designed to build on established vocabulary and movement fundamentals with emphasis on ballet as a theatrical art form.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR212/DANC212
Outcomes:
This class further develops strength, posture, flexibility and coordination; Progressions include more work en relev at the barre, development of leg extensions, single leg jumping and more complex movement combinations; Students will develop awareness of a dancer's role in a ballet production

DANC 213 Ballet III: Advanced Continuing Ballet (2 Credit Hours)
Pre-requisite skills: Student must demonstrate correct alignment and articulation at the barre and in the center when standing in first or fifth position. Student should have introductory proficiency in pirouettes en dehors and en dedans as well as petit allegro. This course serves students who have achieved proficiency in the basic elements of Continuing Ballet, but need to develop skills to meet the Intermediate level. Course focuses on reinforcing foundational technique in alignment and articulation and provides opportunities to develop strength, coordination and vocabulary required to advance to 311 Intermediate Ballet.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will increase their awareness of overall dance alignment and articulation; They will develop strength, coordination and vocabulary preparing them for Intermediate Ballet; Students will enhance their ability to travel across the floor as well as conduct pirouettes; Adagio work in the center and grand allegro is introduced

DANC 222 Modern Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Dancers should be able to maintain correct alignment of the legs, back and pelvis standing and shifting their weight. Must be familiar with 1st and 2nd position of the legs and demonstrate basic articulation of the legs in tendu and jumping. This course is designed to further increase student's body awareness, strength, flexibility and musicality. We will study the technique and theory of Fall and Recovery developed by Doris Humphrey as well as learn short excerpts of repertory to be analyzed. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR222/DANC222
Outcomes:
Students will further develop their modern dance technique and be able to execute more physically challenging falls and longer and more complex movement combinations

DANC 232 Jazz Dance II: Theories and Techniques (2 Credit Hours)
Prerequisite Skills: Dancers should demonstrate correct placement of the legs, back and pelvis standing and in plié. They should be able to demonstrate basic jazz turns, jazz runs and pas de bourée. Dancers need to use correct position and opposition of the arms in combinations. Jazz II is designed to further develop student's technical ability and awareness of Jazz dance in theatrical productions. Students will learn about professional Jazz dance in Chicago and improve their strength, coordination, flexibility and correct posture in increasingly complex combinations applying the vocabulary and principles of jazz dance. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR232/DANC232
Outcomes:
Students will improve their dance technique, performance skills and appreciation of Chicago's rich tradition of Jazz dance performance

DANC 314 Pointe II: Continuing Pointework (1 Credit Hour)
This is a studio class that explores ballet technique en pointe. This course is to be taken concurrently with DANC 213 Ballet III, DANC 341 Ballet IV, or DANC 343 Ballet V. This course explores continuing ballet technique en pointe. It requires students to apply and synthesize all aspects of pointework studies including technique, spatial awareness, dynamics and group forms by preparing and presenting a public performance. It must be taken concurrently with Ballet III, Ballet IV or Ballet V. May be taken 8 times for credit.
Outcomes:
Students gain a deeper understanding of pointe technique, as well as demonstrate specific advanced skills required of the dance form; Students apply and synthesize material in a public performance

DANC 323 Rehearsal and Performance (1 Credit Hour)
Pre-requisites: Permission of the department
Dancing, choreographing, or stage managing, in a campus production. Completion of a journal or paper is required. May be repeated up to 12 times.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique into production practice

DANC 331 Jazz Dance III: Intermediate Jazz Dance Theories and Techniques (2 Credit Hours)
Pre-requisites: Permission of the Instructor
This course develops students' ability to execute Jazz dance technique at an intermediate level. Students improve their dance technique, dynamic, spatial and performance skills. Students apply and synthesize all aspects of jazz dance technique in public performance. This course may be taken six times for credit.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve core strength, coordination, flexibility and correct posture at the intermediate level, in increasingly complex combinations applying and synthesizing all concepts and technique in public performance

DANC 370 Dance Composition (3 Credit Hours)
Pre-requisites: Must be a Dance Major or Dance Minor to enroll; Placement in Level III or higher dance technique courses; Permission of the department required
This course takes students from an introduction to dance composition theory and techniques through the process of creating a group work for the stage. Course work includes lecture, discussion, selected readings, viewing of masterworks of dance composition, creation of several dance studies on various themes and culminates in the creation of a work for performance in the Student Choreographic Showcase.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through the development of short dance students learn the principles of dance composition and then apply them to their own creation performed for a public audience

FNAR 398 Fine Arts Capstone (3 Credit Hours)
Pre-requisites: Completion of the most advanced course in the student's FNAR concentration
The course serves as the culmination of each student's experience as a Fine Art major. Students will demonstrate the ability to produce work that exemplified the application and synthesis of the knowledge gained from the courses and experiences.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate the ability to produce art work suitable for exhibit

MUSC 104 Gospel Choir (1 Credit Hour)
Admission through audition. A mixed ensemble of singers performing primarily Gospel music (Spirituals, Blues, etc). Admission through audition. The choir participates in at least one public performance each semester. May be repeated to a limit of eight hours.
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-MUSC104/BWS 104
Outcomes:
Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance; They reflect on their personal and collective artistic growth through the process

MUSC 106 Guitar Ensemble (1 Credit Hour)
Admission through audition. For advanced guitarists. The study, rehearsal and performance of transcriptions and original works for guitar ensemble. Repertoire from the Renaissance through the present will be performed. Students must provide their own instruments. Gives at least one concert each semester.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper guitar technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the process

MUSC 107 Chorus (1 Credit Hour)
University Chorus is a topics course in ensemble singing devoted to the study, rehearsal and performance of standard choral literature of all periods. Admission through audition. Gives at least two performances each semester. Some sections require audition for admission.
Knowledge Area: Artistic Knowledge and Experience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve their vocal/choral technique and knowledge of the musical literature through rehearsal and performance; They reflect on their personal and collective artistic growth throughout the performance process

MUSC 108 Liturgical Choir: Cantorum (1 Credit Hour)
Admission through audition. An SATB ensemble providing music for the Sunday liturgies in Madonna della Strada Chapel and other university liturgical and choral functions and concerts. Repertoire includes both traditional and contemporary sacred music. Admission through audition.
Knowledge Area: Artistic Knowledge and Experience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic throughout the performance process

MUSC 109 Jazz Ensemble (1 Credit Hour)
Admission through audition. Rehearsal and performance of standard Jazz and Big Band music. Members must have previous Jazz Band experience. Performs publicly at least twice each semester of the academic year.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-MUSC109/BWS 109
Outcomes:
Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 207 Chamber Choir (1 Credit Hour)
Audition Required. An ensemble of advanced singers performing works written especially for the smaller choir. Performance of music from all historical periods suitable for this type of choir. The choir participates in at least two public performances each semester. Admission through audition. May be repeated for up to eight credit hours.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain knowledge of the musical literature offered through rehearsal and performance, while integrating proper vocal/choral technique; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 246 Composition I (3 Credit Hours)
Course deals with the study of music theory and simple and binary forms. In addition to that, students compose an original piece of music for two instruments that receives public performance.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through the study of relevant music scores, students learn the principles of composition and instrumentation to then apply them to their own compositions

MUSC 320 Rehearsal and Performance (1 Credit Hour)
This course allows students to receive credit for performing in an on-campus production during the semester. Completion and submission of a journal or paper is required. Permission of department is required.
This course satisfies the Engaged Learning requirement.

MUSC 374 Musical Theatre Repertoire (4 Credit Hours)
This capstone repertoire course synthesizes musical theatre history, theory and performance. It is designed to develop students' ability to perform vocally, dramatically and physically within the canon of musical theatre repertoire. It culminates in a musical theatre showcase which features student performance of the repertoire learned in class.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of the history of musical theatre performance by comparing the work of significant composers, directors and choreographers and demonstrate understanding of the intrinsic requirements for effective synthesis of vocal, dramatic and dance performance

MUSC 388 Lecture/Recital: MUSC Capstone (3 Credit Hours)
Pre-requisites: Music Major only
A directed studies capstone experience course. Project proposal must be approved by the course advisor by the end of the first week of the semester. A Public presentation of the project is required. Examples of appropriate capstone projects include, a performance of a composition, paper presentation, digital music design for a commercial product, conduct a chamber ensemble or the creation of a music installation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Synthesize previous course work into a public presentation in the students' area of interest

PLSC 202 Mock Trial (3 Credit Hours)
Students will study the trial as a process for finding truth and administering justice by learning the dynamics of the trial, by developing trial strategy, by learning how to conduct and respond to direct and cross examination and by delivering effective opening and closing arguments. Mock trial is an engaged learning course. Prior Permission is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Mock trials are an activity that promotes critical thinking and reasoning; They call upon students to employ their problem-solving and public-speaking skills, and students gain knowledge of legal practices and procedures

PLSC 203 Moot Court (3 Credit Hours)
Students will study the appeal as a process for finding truth and administering justice by learning the dynamics of appellate advocacy, by developing oral argument strategies, by learning how to respond to questions posed by judges in competition, and by delivering effective summations and rebuttal arguments. Moot court is an engaged learning course.
This course satisfies the Engaged Learning requirement.
Outcomes:
Moot court competitions are an activity that promotes critical thinking and reasoning; They will enhance their ability-to-think- on-their-feet skills, their legal research skills, and their public-speaking skills; Students gain knowledge of legal argumentation and constitutional law

THTR 204 Playwriting (3 Credit Hours)
This course is and introduction to the theories and techniques of playwriting with particular emphasis on the analysis of dramatic structure.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of the theories and techniques of playwriting and dramatic structure through application of these skills in several playwriting exercises and the development of a one act play

THTR 305 Theatre Workshop: Special Topics (3 Credit Hours)
This course introduces the student to a style, genre or method theatre making through active application in exercises, demonstrations, games and workshops.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop skills in applying performance theory to practice; develop performance skills in a particular style or genre; expand a repertoire of rehearsal techniques; and develop skills to create original theatre pieces

THTR 323 Rehearsal & Performance (1-12 Credit Hours)
Pre-requisites: permission of the instructor
This course allows students to receive credit for stage managing, acting in or directing a campus production during the semester. Completion and submission of a journal or paper is required. Course may be repeated up to 12 times for a total of no more than 12 credit hours.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique covered in coursework to production practice

THTR 324 Applied Design and Management (1-3 Credit Hours)
This independent study course supports student scene, costume, lighting, make-up, sound or property designers and stage managers selected by the faculty to design or manage for university productions. Department Permission Required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will deepen their understanding of a design process via first hand experience in our theatre

School of Communication

COMM 335 Creating ADPR Content with AI (3 Credit Hours)
Pre-requisites: (COMM 210 or COMM 211) and COMM 213
This course explores the current practices, opportunities, challenges, and ethics of strategic integration of Artificial Intelligence (AI) and Generative AI (GAI) into advertising, public relations, and communication workflows. Students learn various AI platforms and how to use AI for audience research, content creation, and campaign optimization while navigating the ethical and legal implications of automated communication.
Course equivalencies: COMM 335 / COMM 445
Outcomes:
Know the AI platforms and tools used for creating effective strategic communication content; Learn how to integrate AI to reduce creative production time; Understand the ethical implementations for AI use including navigating transparency, data privacy, and other issues; Know the skills of working effectively in teams to prepare marketing communication programs

COMM 339 Video Documentary (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X - COMM 339 / COMM 439
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 373 Digital Storytelling Abroad (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography, and editing skills within another country and cultural context.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 373/COMM 473
Outcomes:
The course will require students to enterprise and execute a range of multimedia skills that help participants tell stories; The course will have an emphasis on community engagement and social justice; The course will give students an opportunity to apply technical knowledge and skills to a uniquely-designed study abroad experience

Service-Learning

For a course to be designated as "Service-Learning", satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for service-learning courses are based on research and best practices, the CAS Standards for Service-Learning (2009), and the Principles of Good Practice for Service-Learning Pedagogy (Howard, 1993).

1. *The academic course establishes the service expectation of 20+ hours of service to work in the community or in the environment, or on a community-based project connected to the content of the course.*
2. *Learning objectives related to the service experiences are clearly articulated.*
3. *There is a clear articulation of the community partnership or project and how it addresses community-defined priorities.*
4. *The syllabus assignments and final projects synthesize classroom- and community-based learning.*
5. *Activities and assignments encourage students to reflect on larger community issues, sustainability issues, social structures, and/or topics of social justice (e.g. perpetuating dependence vs. building capacity within the community).*

The Center for Engaged Learning, Teaching, & Scholarship publishes a listing of ALL approved service-learning classes each semester. This list can be found on the Service-Learning Program website (https://www.luc.edu/celts/programs/service-learning/forstudents/courses.shtml/).

All courses that have been approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

Undergraduate Research

For a course to be designated as "Undergraduate Research", satisfying the University Engaged Learning requirement, it must meet all the following criteria. Criteria for undergraduate research courses are based on research, best practices, and the CAS Standards for Undergraduate Research (2009).

1. *The field research course engages students on an original research project (not a simulation), either contributing to a faculty research project or engaging in an independent research project with a mentor*
2. *Students conduct research on an ongoing basis, working an average of 5 – 10 hours/week.*
3. *Students gain knowledge of or experience in discipline-specific language, research ethics, skills in research methodologies, and important scholarship.*
4. *The learning objectives related to the research experience are clearly articulated related to their field of study, educational goals and/or career and vocational aspirations.*
5. *There is supervision and feedback by a mentor who has expertise related to their field of study, educational goals and/or career and vocational aspirations.*
6. *The syllabus assignments include reflection assignments and a final synthesis project integrated into the course.*
7. *There is an outlet to disseminate the original research (e.g., symposium, conference, scholarly article) integrated into the course.*

In addition to classes approved for EL credit in the area of Undergraduate Research, research projects students pursue under an Independent Study or Directed Readings course-number may be approved for EL credit if they meet the criteria. Students should follow the process to request EL credit on the "Requesting EL Credit (https://www.luc.edu/celts/programs/engagedlearning/studentresources/requestingelcredit/)" page.

All courses that have been approved to satisfy the Engaged Learning University Requirement are designated with an "E" appended to their section number, e.g. ANTH 301 01E. Comprehensive listings of all approved Engaged Learning classes offered each semester can be found in LOCUS (http://www.luc.edu/locus/).

[2] The Ramonat Seminar (http://ramonatseminar.com/) is an interdisciplinary, two-semester course that provides Loyola undergraduates with the unique opportunity to explore changing topics within American Catholic history, literature, and culture through hands-on research. Taught by a Loyola faculty member, the seminar is limited to 12 participants who pursue common readings in the fall semester and individual research projects in the spring semester. Unlike standard undergraduate courses, the Ramonat Seminar provides promising students, who will be named *Ramonat Scholars*, with resources for research, travel, and even publication in digital and print formats, all aimed at their general professional development.

UNIV 101

UNIV 101 First Year Seminar is a 1-credit, pass/no pass, extended-orientation course required for all first-year students at Loyola University Chicago. Each class consists of 22 students or fewer and is taught by a University faculty or staff member and an undergraduate Peer Advisor. The class meets for 50-minutes/week during the fall semester.

UNIV 101 First Year Seminar is a graduation requirement for all first-year degree-seeking undergraduate students. Students must pass UNIV 101 First Year Seminar during their first semester of enrollment at Loyola. Should a student not pass UNIV 101 First Year Seminar, they must re-enroll and pass the course during the subsequent semester.

For more information, click on any of the sections below:

Course Description, Goals, and Learning Outcomes

UNIV 101 First Year Seminar helps new students make a positive transition to Loyola University Chicago by helping them adjust to academic and student life. Students will develop relationships with their classmates, faculty/staff instructor, and Peer Advisor in order to foster an inclusive and welcoming community. To make the most of their experience at Loyola, students will participate in meaningful discussions, personal reflection, and engaging activities within and outside of the classroom to learn more about themselves, others, Loyola, and the City of Chicago.

Goals

1. Foster student academic success and the achievement of their academic goals
2. Connect students to Loyola University Chicago, our mission, and the City of Chicago
3. Support student wellbeing and sense of belonging at Loyola University Chicago

Learning Outcomes

As a result of engaging in UNIV 101 First Year Seminar, students will be able to:

1. Create an academic and co-curricular plan to make the most of their experience at Loyola.
2. Choose resources and opportunities, on- and off-campus, that help them achieve their academic, social, personal wellbeing, and career goals.
3. Describe how the Jesuit mission of Loyola University Chicago, and the City of Chicago, influence their experience at Loyola.

Section Types

Most students will enroll in a general section of UNIV 101 First Year Seminar, which consists of students from across campus with different majors and identities. In addition, some sections are available for students with specific majors, communities, and identities. These special UNIV 101 First Year Seminar sections may include:

Magis Sections, for Students Who Identify as…

- Asian students
- Commuters
- First-generation college students
- LGBTQ
- Pre-health
- Students of color
- Undecided/undeclared

Major Specific Sections, for Students Majoring in…

- Communications
- Engineering
- Helping Professions (Social Work, Education, etc.)
- Nursing
- Public Health
- Science, Technology, Engineering, or Math (STEM)

Program Specific Sections, for Students Involved in….

- Achieving College Excellence (ACE)
- First-Year Research Experience (FYRE)
- Interdisciplinary Honors Program
- Learning Communities
- NCAA Athletics
- Quinlan School of Business Honors Program
- Rambler Success Program (RSP)
- Student Diversity & Multicultural Affairs (SDMA) Mentorship Programs

GRADUATE AND PROFESSIONAL CATALOG

Graduate and Professional Catalog

Loyola University Chicago is an independent, Catholic and urban university with a Jesuit heritage, emphasizing the development of the intellectual, social and moral values, and character of its students. Dedicated to higher education and health care, the university has national, regional and international influence.

The Graduate and Professional catalog is issued annually, prior to the start of the Fall Term of the new academic year. Graduate students are governed by the degree requirements issued for the academic year in which they enter Loyola University Chicago, and by the Academic Standards and Regulations for their academic unit or school.

Graduate and Professional Academic Standards and Regulations (p. 1938)

Accreditation

Loyola University Chicago is accredited by The Higher Learning Commission (HLC). Contact HLC at 800.621.7440 or visit: https://www.hlcommission.org/.

Graduate and Professional Schools

- The Graduate School (p. 1019)
- Institute of Pastoral Studies (p. 1400)
- Marcella Niehoff School of Nursing (p. 1458)
- Parkinson School of Health Sciences and Public Health (p. 1507)
- Quinlan School of Business (p. 1544)
- School of Continuing and Professional Studies (p. 1601)
- School of Education (p. 1620)
- School of Environmental Sustainability (p. 1702)
- School of Law (p. 1714)
- School of Social Work (p. 1810)
- Stritch School of Medicine (p. 1858)
- Dual Degree Programs (p. 1858)

Non-Discrimination Policy

Loyola University Chicago will not discriminate in its programs and activities on the basis of race, color, religion, national origins, sex, age, ancestry, marital status, sexual orientation, arrest record, military status or unfavorable military discharge, physical or mental handicap or disability.

Confidentiality of Education Records

Loyola University Chicago complies with the provisions of the Family Education Rights and Privacy Act of 1974 ("FERPA") when releasing personally identifiable information concerning students. FERPA stipulates that a student's education record is confidential information and must not be released without prior written consent of the student. FERPA does permit the release of "Directory Information." Directory information is information which would not generally be considered harmful or an invasion of privacy if disclosed. Students have the right to withhold "directory Information." However, the student should consider the consequences of such a request as Loyola University Chicago will honor the request, until removed in writing by the student. Loyola University Chicago has determined directory information to consist of a student's:

- Name
- Address(es) and telephone number
- University e-mail address
- Photograph
- Major and minor field(s) of study, including the college, division, department, institute or program in which the student is enrolled
- Dates of attendance
- Grade level (Such as freshman, sophomore, junior, senior or graduate level)
- Enrollment status (Undergraduate or graduate, full-time or part-time)
- Date of graduation
- Degree(s) received
- Honors or awards received, including selection to a Dean's list or honorary organization
- Participation in officially recognized activities or sports
- Weight and height of members of athletic teams

Rights Reserved

The President and officers of Loyola University Chicago reserve the right to change information, regulations, requirements and procedures announced in this catalog; to change the requirements for admission, graduation or degrees; to change the arrangements, scheduling, credit or content of courses; and to change the fees listed in this catalog.

The University reserves the right to refuse to admit or readmit any student at any time should it be deemed necessary in the interest of the student or of the University to do so and to require the withdrawal of any student at any time who fails to give satisfactory evidence of academic ability, earnestness of purpose, or active cooperation in all requirements for acceptable scholarship.

Catalog Disclaimer

This catalog is published for informational purposes. Although every attempt is made to ensure accurate information, the information provided should be used only as a reference and planning tool. While students are governed by the catalog that is in effect in the academic year in which they enter, students should not assume that the catalog is a contract between Loyola University Chicago and students. The Board of Trustees of Loyola University Chicago reserves the right to change, at any time, without notice, graduation requirements, fees and other charges, curriculum, course structure and content, and other such matters as may be within its control, notwithstanding any information set forth in this catalog. Students should always consult with their college advisors to confirm all information.

This Academic Catalog lists the approved courses for the plan of study during the published Catalog Year.

Final confirmation of all degree requirements is subject to department, school, and university approval.

The Graduate School

At Loyola University Chicago's Graduate School, we cultivate leaders—scholars who are motivated to make a real difference in the world. From academic fields to professional specialties, the Graduate School offers advanced study and research programs on the leading edge of a wide

variety of disciplines in the humanities, natural and biomedical sciences, social sciences and the professions. The Graduate School's inception in 1926 has been marked by innovation, excellence, and commitment to teaching, research, and service. Over the years, the Graduate School has witnessed relatively steady growth and its programs have reflected the university's response to societal needs, university resources, and shifting academic environments.

The programs that today fall under the aegis of the Graduate School represent a combination of programs with deep roots and those that are relatively young in the school's range of offerings. Approximately 1,500 graduate students are enrolled in 25 PhD programs, two professional doctorate programs, 39 master's programs, 9 dual degree programs, 10 certificates, and 20 advanced bachelor's/master's programs. They work with more than 600 graduate faculty members on three campuses. We are a dynamic community of researchers and scholars united in a commitment to developing new knowledge, providing high quality training, enhancing professional credentials, and fostering creativity.

Because Loyola graduate programs have an ethics component, the University's Graduate School provides both the opportunity and the impetus for students from a wide variety of disciplines to conduct research that directly benefits humanity. The Graduate School serves the needs of students and faculty who work at the highest level of excellence in their field and fosters projects that build communities, promote social justice, address the complex problems confronting society, and promote global awareness.

Why Loyola University Chicago? Graduate students at Loyola learn from faculty members who are as committed to mentoring, instruction and intellectual discourse with students as they are to research and scholarship. Our setting in the heart of Chicago allows students to apply their knowledge through outstanding internship and field study opportunities at leading institutions and research settings throughout the metropolitan area. The rigorous intellectual environment at Loyola is informed by our commitment to serving our community and our world, in keeping with Jesuit values, a tradition that has typified Loyola University Chicago since its founding in 1870.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Biochemistry & Molecular Biology (BMB)

BMB 400 Special Topics: Molecular Biology (1-3 Credit Hours)
Courses of half a semester to a semester on different topics of molecular biology, treated in depth with readings of the current literature.
Outcomes:
To learn about diverse areas of Molecular Biology which are not treated in regular courses

BMB 417 Molecular Biology (3 Credit Hours)
The Biochemistry and Molecular Biology course will cover diverse subjects of importance to modern cell an organismal biology from a molecular biology perspective.

BMB 471 Comp Molecular Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

BMB 490 Special Topics in Molecular Biology (1-3 Credit Hours)
This course covers a specific topic in molecular biology. The topics can vary among different special topics courses.

BMB 499 Research in Molecular Biology (1-9 Credit Hours)
The students do mentored work in a laboratory on a research project. Their performance is evaluated by their mentor at the end of the year, and is given a pass/not pass grade.
Outcomes:
To develop the ability to organize a research project proposing hypotheses and testing them in the laboratory and against the current literature

BMB 501 Molecular Biology Journal Club (0-1 Credit Hours)
This is a weekly course where students take turns to present a scientific paper. Following the presentation there is a discussion by students and faculty. Students prepare the presentation under the supervision of a faculty mentor.
Outcomes:
To develop the ability to read and analyze a scientific paper and to develop oral presentation skills and appropriate visual aids

BMB 502 Seminar in Molecular Biology (0 Credit Hours)
Biweekly seminars where invited speakers from outside the institution present their work. The presentation is followed by a discussion by students and faculty.
Outcomes:
To become familiar with current research in different molecular biology areas by listening to the actual scientist developing the work

BMB 524 Molecular Biology & Genetics of Development (2 Credit Hours)
This is a weekly course on Molecular aspects of Developmental Biology, with a mixture of lectures, discussions of original papers and presentations by external speakers.
Course equivalencies: X-BICH524/MBIO524
Outcomes:
An understanding of the principles of developmental biology with emphasis in the molecular genetics of development

BMB 526 DNA Repair & Recombination (2 Credit Hours)
This is a weekly course on mechanisms of mutagenesis, genetic repair and recombination. The course uses a mixture of lectures and discussions of original scientific papers.
Course equivalencies: X-MBIO526/BICH526
Outcomes:
An understanding of the basic mechanisms of mutagenesis, genetic repair, homologous recombination, and non-homologous end joining

BMB 590 Molecular Biology of Oncogenesis (3 Credit Hours)
The course will cover different subjects in cancer molecular biology with a combination of lectures and discussions of original scientific papers.
Outcomes:
A basic knowledge about mechanisms of oncogenesis and the biology of cancer, and an ability to search and understand the classic as well as modern literature on the subject

BMB 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

BMB 600 Dissertation Supervision (1 Credit Hour)
The students work on their dissertation under the supervision of their mentor and of their dissertation committee. Their progress is evaluated by their mentor and is given credit or no credit.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Bioethics & Health Care Leadership (BEHL)

BEHL 401 Clinical Topics in Bioethics (3 Credit Hours)
This course will provide an overview of the major areas of clinical biomedical ethics. Issues will be examined and analyzed including problem-solving, theory and practice, end-of-life decision making, etc. Extensive use of case discussion and analysis will help to develop participants' ethical problem-solving skills.
Course equivalencies: IPS 651/BEHP 401/BEHL 401
Outcomes:
Participants will gain familiarity with terminology, resources, and major frameworks of ethical analysis in biomedical ethics

BEHL 402 Justice & Health Care (3 Credit Hours)
This course provides an overview of justice and health care with a special emphasis upon the developing world by examining prevailing theoretical frameworks and how justice is played out in various health care systems.
Outcomes:
Participants will gain a better understanding of what justice means with regard to health care

BEHL 403 Ethics Care Continuum (3 Credit Hours)
This course prepares students to identify biomedical ethical issues in settings such as long-term care, rehabilitation care, mental health, and hospice, and to develop moral frameworks for addressing these issues.
Outcomes:
Participants will be able to analyze cases and issues regarding health-care delivery and adapt principle frameworks of biomedical ethics to these settings

BEHL 404 Biomedical Ethics and Law (3 Credit Hours)
This course serves as an introduction to biomedical ethics and the law and will introduce the history of bioethics and the US legal system by surveying a number of seminal legal cases.
Outcomes:
Participants will have a better understanding of how bioethics has been shaping legal decisions and legislation throughout history

BEHL 405 Research Ethics (3 Credit Hours)
This interactive seminar will explore the responsible conduct of science with a focus on ethical issues in clinical research involving human participants. We will review federal research policies related to investigator responsibilities and institutional review board (IRB) function.
Outcomes:
Students will become familiar with the history, terminology, and resources of research ethics as well as key debates that have occurred/are occurring in the research ethics literature

BEHL 406 Principles of Health Care Ethics (3 Credit Hours)
This course provides an overview of important ethical theories in bioethics. We will mainly examine major works in the field by leading bioethics scholars to become better familiar with different approaches in the field.
Outcomes:
Students should be able to identify and analyze ethical theories and become familiar with various ethical approaches

BEHL 407 Social Determinants of Health and Bioethics (3 Credit Hours)
This course will review the theoretical work on social science (anthropology, sociology) and moral reasoning as it pertains to the discipline of bioethics, its philosophical roots, and the body of social science works in bioethics.
Outcomes:
Students will learn how to use the technique of self-reflexivity to understand cultural values

BEHL 408 Ethics, Genetics and Health Policy (3 Credit Hours)
This course will provide an introduction to genetic ethics and a survey of topics that constitute the professional and popular literature in the field. Topics to be considered include, but are not limited to, gene patenting, human cloning, and race and genetics.
Outcomes:
Students will have an understanding of ethical questions that genetic technological advances pose to our understanding of human identity and social justice

BEHL 409 Religion and Bioethics (3 Credit Hours)
This course is a thematic exploration of religion and bioethics with a specific concentration on its implications at the end of life.
Outcomes:
Students will better understanding of suffering and death, and meaning that underlie these issues in bioethics, and the practice of healthcare at the end of life

BEHL 410 Ethics Consultation Simulation Seminar (1-3 Credit Hours)
This is a two-month course of online learning (June-July) including a 3-day on-campus intensive experience for students including didactic sessions and ethics consultation skills development.
Outcomes:
Students will improve communication and interaction skills while doing ethics consultation

BEHL 411 Systems Ethics Frameworks (3 Credit Hours)
The course introduces current ethical issues in public health research, practice, and policy. Public health frameworks and approaches will be used to explore prevention, social justice, and health equity.
Outcomes:
Participants will be familiar with key readings, ethical frameworks, and practical tools for assessing public health challenges

BEHL 412 Organizational Ethics I: Business, Professionalism, and Justice (3 Credit Hours)
This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians within a group practice, administrators within a health system, or advocates within a community.
Course equivalencies: IPS 652/BEHP 412/BEHL 412
Outcomes:
Participants will understand responsibilities social justice entails to self, one's profession, various institutions which a healthcare profession is a member, one's patients, and the underserved

BEHL 413 History of Medicine and Bioethics (3 Credit Hours)
This course seeks to situate and examine the emergence and development of the field of bioethics within the history of medicine and the ethical concerns embodied in medicine¿s practice.
Outcomes:
Participants will have an understanding of how bioethics emerged within the broader history of medicine and and continues today as a distinct discipline

BEHL 414 Moral Theology for Bioethics (3 Credit Hours)
This course provides an introduction to Catholic moral theology through a historical review of its development and a consideration of key documents, events, arguments and concepts beginning with the scriptural witness of Christ and concluding with the moral teaching of John Paul II as it bears upon contemporary Catholic moral theology.
Outcomes:
Its goal is to assist in establishing an historical and theoretical foundation for those who are interested in bioethics as it is considered and practiced in the Catholic tradition

BEHL 415 Ethical & Religious Directives for Catholic Healthcare Leadership (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics

BEHL 416 Catholic Bioethics and Social Justice (3 Credit Hours)
This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context

BEHL 417 Narrative Ethics (3 Credit Hours)
This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.
Outcomes:
This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics

BEHL 418 Advancing Health Equity Practice (3 Credit Hours)
This course introduces the frameworks and practice of health equity as it pertains to the field of bioethics. The tools and materials help students more effectively incorporate health equity into all aspects of their work. Topics include: community health, multi-sector community engagement, and innovative approaches to clinical and community work to improve populations health.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Effectively incorporate health equity into all aspects of bioethics practice

BEHL 419 Organizational Ethics II: Ethical Leadership Changing Healthcare Envrnmnt (3 Credit Hours)
This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined. Questions of leadership style and theories of what constitutes effective leadership are considered.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Key focus on communication strategies and methods of organizational change

BEHL 420 Advanced Topics in Bioethics and Law (3 Credit Hours)
This class will explore the historical relationship between law and bioethics and examine how law and bioethics come together or may be at odds. Recognize/discuss changing nature of physician-patient relationship, continuing evolution of informed consent, intersection of commerce and science, changing definition of death, growing complexity of reproduction.
Outcomes:
Resolve dilemmas raised by changing biotechnology

BEHL 421 Practicum in Clinical Ethics (3 Credit Hours)
Pre-requisites: Department Consent Required
The goal of the clinical ethics practicum is to provide doctoral students on the clinical ethics track the opportunity to use knowledge and skills acquired in the academic program in a clinical setting (e.g. community hospital or academic medical center), under the direction of a preceptor at that setting.
Outcomes:
This practicum will expose students to the practical applications of clinical ethics

BEHL 422 Practicum in Organizational/Public Health Ethics (3 Credit Hours)
Pre-requisites: BEHL 419
The practicum will enable the student to work on a project which translates both general and discipline-specific information into organizational ethics or public health practice. Students must demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding these topics, and exhibit leadership, creativity, and the ability to work well with others.
Outcomes:
Goal of the practicum is to provide students the opportunity to use knowledge and skills acquired in the academic program in a professional setting under the direction of a preceptor

BEHL 423 Doctoral Capstone I (3 Credit Hours)
Pre-requisites: Oral and Written Qualifying Exams
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Publishable peer-reviewed paper

BEHL 424 Doctoral Capstone II (3 Credit Hours)
Pre-requisites: BEHL 423
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Students will be required to appear on campus for a capstone presentation with faculty

BEHL 425 Empirical Bioethics (3 Credit Hours)
Provides an overview of empirical research in the increasingly interdisciplinary field of bioethics. Will examine the relationship between empirical data and normative claims and potential pitfalls that may arise when using information about what (is) to determine what (ought) to be done.
Outcomes:
Students will gain familiarity with the range of quantitative and qualitative research methods used in bioethics as well as academic disciplines, understanding of empirical studies on ethical problems in medicine, public health policy, and clinical research; Discussions will be relevant to a range of professional settings

BEHL 426 Ignatian Spirituality and Medicine (3 Credit Hours)
This course in will explore the roots of Ignatian Spirituality as presented in the Spiritual Exercise and other writings of Ignatius Loyola and the early Jesuits. From this historical starting point, the course will shift to explore key themes that have emerged from this spiritual tradition as it relates to medicine, paying special attention to the Spiritual Exercises.
Outcomes:
This course aims to assist students in establishing a substantive understanding of Ignatian spirituality and the tradition of Jesuit education in which they participate as a means for leading faithful, joyful, and hopeful lives as physicians

BEHL 427 Professionalism and Professional Ethics (3 Credit Hours)
This course will review and critically examine the professional codes of ethics of a variety of health-related professions: medicine, nursing, dentistry, social work, chaplaincy, risk management, and allied health. We will examine the growth of professionalism as a movement and answer questions related to this topic.
Outcomes:
Understand what is a profession, what are professional ethics; Difference between common morality and professional ethics, and difference between applied ethics and professional ethics; We will also discuss whether a pan-professional ethics code is needed for the health care professions

BEHL 428 Writing and Scholarship Skills (3 Credit Hours)
Writing skills are an essential form of communication not only between the instructor and students but also among and between the students themselves. Topics covered: Academic Integrity; Grammar; Resource Development/Citation; Clarity/Formality; Development of a Thesis and Writing of a Thesis Statement; Organization and Outlining; Critical Thinking/ Analysis/Reasoning; and Development of a Conclusion.
Outcomes:
This course will provide a review of basic writing skills as well help students develop analytical and communication skills that are critical to scholarly writing in the multidisciplinary field of bioethics

BEHL 429 Pediatric Ethics (3 Credit Hours)
This course will introduce ethical topics in the areas of pediatric medicine and research. Topics to be addressed may include decision making, neonatal issues, teens and decisional authority, research with minors.
Outcomes:
Discover aspects of the pediatric population that raise unique concerns, create novel moral environments, and thus require nuanced and sensitive attention to and tools of ethical inquiry

BEHL 430 Advanced Clinical Ethics Skills (3 Credit Hours)
Pre-requisites: BEHL 410 Ethics Consult Simulation Seminar
Two-month blended course of online learning and two-day intensive experience on Health Sciences Campus in Maywood. Course provides an opportunity for advanced graduate students to improve and refine clinical ethics skills. Participants will practice consultation skills, evaluate performance of others, and receive feedback from faculty reviewers.
Outcomes:
Students will develop their own portfolio for quality attestation

BEHL 431 Current Debates in Research Ethics (3 Credit Hours)
Pre-requisites: BEHL 405 or permission from instructor
This course will focus on unique ethical issues that arise in research with special populations. Included but not limited to children; women, fetuses, and embryos; prisoners; indigenous and racial/ethnic minority communities; healthy volunteers. Research in emergency and international settings as well as research at the end-of-life will be discussed.
Outcomes:
Material covered in this course will be relevant for ethicists, IRB members, and clinical investigators

BEHL 432 Global Bioethics (3 Credit Hours)
This course will survey major topics in global bioethics. Students will be introduced to global bioethics frameworks, practices, and governance bodies in order to place bioethical problems in a global context. Attention will be given to how the global realities of health disparities and neoliberal economic policies impact bioethical questions. Guest lecturers will share experiences working in clinical ethics, public health, social justice, health care policy, and research across the globe.
Outcomes:
Students will gain knowledge regarding clinical ethics, public health, social justice, health care policy, and research across the globe

BEHL 433 Mastering Clinical Ethics Consultation (3 Credit Hours)
Pre-requisites: BEHL 410 and BEHL 430
This 2 week on-campus course provides an opportunity for advanced bioethics doctoral students in the clinical ethics concentration to refine their clinical ethics skills to a mastery level. Students will participate in simulated ethics consultations, practice communication and interpersonal skills and receive feedback on their performance. With access to LUHS, students will participate in clinical rounds, case discussions, and active ethics consultations and debriefing sessions. This course will require students to reach a predefined mastery level of skill in simulated ethics case consultations using the Assessing Clinical Ethics Skills (ACES) evaluation tool. They will also be required to write chart notes for ethics consultations.
Outcomes:
Students will achieve mastery of clinical ethics consultation skills, written chart notes, and improve communication and interpersonal skills

BEHL 434 Oral Health Ethics (3 Credit Hours)
According to the CDC, "Oral health affects our ability to speak, smile, eat, and show emotions. It also affects self-esteem, school performance, and attendance at work and school. Oral diseases - which range from cavities to gum disease to oral cancer - cause pain and disability for millions of Americans." As with other areas of healthcare, ethical issues arise in oral health. Issues to be addressed in this course will include access to care, confidentiality, professional obligations of dentists, informed consent, treatment planning, and the importance of oral health to overall health and well-being.
Outcomes:
Participants will have a better understanding of ethical issues that arise within oral health care

BEHL 435 Disability Ethics (3 Credit Hours)
One in four individuals is considered disabled. What that means, however, differs from person to person, culture to culture, and environment to environment. Disability can be inborn or acquired, short-term or chronic, intellectual or not, etc. The term is broad in scope and is not subject to precise definition. Disability raises many bioethical issues across the lifespan. This course will examine definitions of disability as well as make distinctions between disability, disorder, disease, disfunction and identity. We will consider disability from the bio-medical model, psycho-social model, public health model and neurodiversity model. The lens through which we will explore disability is that of social justice. Readings, viewings and lectures will present a range of perspectives including historical framing, narrative of the lived experience, legal documents, theoretical and philosophical underpinnings and clinical discourse.
Outcomes:
Understand the complexities and variations in defining disability; Analyze disability through multiple models and frameworks; Explore the ethical implications of disability across different contexts; Engage critically with lived experiences and theoretical perspectives on disability; Develop a social justice-oriented approach to disability ethics

BEHL 436 Adolescent Health Ethics (3 Credit Hours)
This course will provide an overview of ethical issues in adolescent health and a survey of some topics that are unique to the field. This will build on concepts addressed in Pediatric Ethics and discuss how ethical decisions may change as children develop physically and psychologically. Classes will be topic driven and will draw upon a variety of sources including recent articles on a range of topics within the field, videos and cases. The ethical questions that are unique to adolescents will serve as the organizing themes of the course.
Outcomes:
Identify the unique ethical issues raised by adolescent patients; Understand how developing autonomy may impact healthcare decisions for adolescents distinct from children and adults; Consider the range of stakeholders involved in adolescent health care

BEHL 491 Special Topics (1-3 Credit Hours)
Provides an opportunity to introduce new courses.

BEHL 492 Master's Research - Capstone (3 Credit Hours)
The capstone course is the final course which provides an opportunity for the student to develop a paper of publishable quality.

BEHL 493 Independent Study (1-3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 500 Introduction to Healthcare Mission Leadership (3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 501 Church and Mission (3 Credit Hours)
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II and contemporary times

BEHL 502 Christian Doctrine (3 Credit Hours)
This course surveys the historical evolution of Christian doctrine and its theological interpretations from the early church through the 21st century. It assists students in understanding how theological doctrines apply to contemporary ministry contexts, particularly the work of Catholic health care. The course explores the early Christological controversies, the Trinity, Grace, liberationist theologies, and the role of dialogue as a fundamental feature of the development of doctrine.
Outcomes:
Students will understand theological doctrine and apply to contemporary ministry contexts in Catholic health care

BEHL 503 Foundations of Christian Spirituality (3 Credit Hours)
Christian spirituality (the 'lived experience of Christian faith') is a separate but partnered academic field with theology today. Key issues are: defining 'spirituality', methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

BEHL 504 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

BEHL 505 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

BEHL 506 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

BEHL 510 Integrated Doctoral Seminar in Ethics, Theology, and Healthcare (3 Credit Hours)
The Integrated Seminars in Ethics, Theology and Healthcare (ISETH) are the core of the Doctorate in Healthcare Mission Leadership (D.HMCL) degree program. Students in the DHCML program are required to complete three of these seminars, which will be offered every Fall and Spring term with variable topics, as part of their degree program. These courses will be primarily theoretical and methodological in focus, rather than practical.
Outcomes:
This course is designed to build on and integrate students' prior graduate coursework in theology and bioethics with their ongoing work in Catholic healthcare

BEHL 511 Mission, Leadership, and Spiritual Formation Seminar (3 Credit Hours)
This course explores the theology, traditions, and current practices foundational for understanding and achieving formation as an essential offering of Catholic health care ministries. By examining a Face to Face Online Hybrid (greater than 75% online) Blended (30%-70% online) variety of methods and models of formation programs of Catholic healthcare in the United States, students will cultivate personal practices that enhance their ability to design and operationalize experiences for persons in various roles within the ministries they serve - from new associate orientation to senior leadership.
Outcomes:
Gain an understanding and practical ability to ensure the programs, resources, and encounters they design and facilitate are grounded in tradition of Catholic ministry, inviting to diverse participant populations, and support the achievement of specified outcomes; In so doing, understand and develop skills necessary to implement integrative, professional, and valued programs of formation

BEHL 512 Canon Law, Sponsorship, and Church Relations (3 Credit Hours)
This two-month course explores the theology, traditions, and practical applications of canon law in the context of Catholic health care. The course will provide an overview of canon law, the emerging theology of sponsorship and ministerial juridic persons, and review a variety of models of church relations current in contemporary Catholic health care.
Outcomes:
Students will gain fluency in canon law, gain knowledge of the particular canons in Catholic health care, and develop a deeper understanding of sponsorship in order to understand the specific sponsorship model applicable to their own healthcare context

Bioinformatics (BIOI)

BIOI 400 Programming Biology (1 Credit Hour)
This is a 6-week course introduction to scripting programming languages within the framework of biological data analysis. Graduate-level standing required. Students will learn foundational methods and algorithms for analysis of biological data.

BIOI 494 Bioinformatics Research Design (1 Credit Hour)
Course Restricted to Bioinformatics MS students Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement experimental design practices in bioinformatics

BIOI 495 Special Topics in Bioinformatics (1-12 Credit Hours)
The field of bioinformatics is ever evolving. As new technologies develop, demand arises for new methods and tools. Courses will focus on emerging trends in bioinformatics. Restricted to Bioinformatics Graduate Students. Student will learn about emerging topics in the field.

BIOI 498 Bioinformatics Internship (1 Credit Hour)
Pre-requisites: BIOI 500, Limited to MS Bioinformatics Non-Thesis track students only
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning.
Outcomes:
Students can apply foundational principles in bioinformatics into practice

BIOI 499 Bioinformatics Research (1-12 Credit Hours)
Pre-requisites: Prerequisite: BIOI 494, Limited to MS Bioinformatics Thesis track students only
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for bioinformatics research

BIOI 500 Advanced Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOI 501 Bioinformatics Seminar (1-2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.
Course equivalencies: X-BIOI501/BIOL451
Outcomes:
Students can summarize, critique, and present bioinformatics research

BIOI 565 Exploring Proteins (3 Credit Hours)
Pre-requisites: Biochemistry, restricted to Bioinformatics Graduate Students
Proteins are polymer chains of amino acids that fold into compact states that differ in structure, size, shape, and dynamics. Computational tools are essential for the prediction of protein structures, protein interactions, and structure-based drug design.
Outcomes:
Students will learn the concepts of building blocks of protein structure, and protein folding

BIOI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: BIOI 499
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

BIOI 605 Master's Study (1 Credit Hour)
This course provides FT status for a student who needs to meet the continuous enrollment requirement of the Graduate School while completing program requirements.

Biology (BIOL)

BIOL 401 Medical Literature and Ethics (3 Credit Hours)
The course will include lectures on the foundational concepts of modern ethics, in class discussions of ethics primarily centered on discussion of cases from different ethical perspectives, quizzes to assess reading mastery and familiarity with material to qualify students on how to discuss cases and formal case presentations by student working groups.
Outcomes:
Understand and articulate the philosophical basis for different ethical frameworks; Have a firm command of the "four principles" of Benevolence, Non-maleficence, Justice and Autonomy and their clinical applications; Be able to resolve clinical ethical issues and back up your reasoning

BIOL 402 Microbiology (3 Credit Hours)
Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 405 Advanced Development (3 Credit Hours)
Developmental Biology draws from Genetics, Molecular Biology, Genomics, and Embryology and is a foundational science for understanding problems in Humans ranging from birth defects to cancer. Because of its multidisciplinary foundation, Developmental Biology is best thought of as a SYSTEM OF IDEAS, EXPERIMENTS AND OBSERVATIONS, as such you will greatly expand your scientific vocabulary and problem solving abilities during the course of this semester. Often you will need to draw on your stored knowledge from many disciplines to understand the topics we will cover. The course will comprise lectures on general development, evolution and developmental genetics, followed by discussions of papers on particular topics, and student presentations.

BIOL 408 Writing for the Medical Professions (3 Credit Hours)
This course will be required for the Master of Arts in Medical Sciences (MAMS) program. It will include readings related to developing the student's physician persona, and writings that are required for the medical school application process. Pre-requisites: Admission to the MA in Medical Sciences program.
Outcomes:
Students will be prepared to write effective primary and secondary essays for their medical school applications; communicate clearly their motivation to pursue a career in medicine and the relevance of their experiences to their pre-medical preparation

BIOL 409 Advanced Genetics (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program (Note: MAMS = MSCI-MA)
The course will comprise formal discussions on the molecular basis of information storage and retrieval in the cell, the role of genetics in human development and homeostasis, the mapping of human genes in familial or population contexts, and modern understanding of the connection between genotype, phenotype and human traits.

BIOL 410 Advanced Cell Biology (3 Credit Hours)
This course explores, in depth, the life cycle and activities of a typical eukaryotic cell. Some of the topics covered are cell polarity, cytoskeleton, plasma membrane, protein modifications and trafficking, extracellular matrix and cell death. Competencies to be gained in this course: To develop the skill of reading and analyzing the primary literature on topics pertaining to cell biology. Judging whether a conclusion is supported by sufficient data. Identifying the controls in published experiments. Exam-taking skill improvement using short reading passages from the scientific literature as topics.

BIOL 413 Advanced Immunology (3 Credit Hours)
Introduces innate and adaptive immunity, lymphocyte development, T-cell and B-cell mediated immunity, leukocyte trafficking, immunological memory hyperimmune reactions, autoimmunity, tumor and transplant immunity. Must be enrolled in the Master of Arts in Medical Sciences (MAMS) program.
Outcomes:
Students will acquire an overview of the human immune system that prepares them for success in a medical school immunology class

BIOL 415 Advanced Parasitology (4 Credit Hours)
Lecture and laboratory. A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.
Outcomes:
Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation

BIOL 416 Limnology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Students will learn to evaluate the trophic status and health of a lake by the end of the course.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions

BIOL 417 Wetland Ecology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the study of wetlands habitats. This course includes discussion of physical and chemical factors, biota, production and community dynamics. Laboratories include several field trips to regional wetland habitats.
Outcomes:
Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants

BIOL 418 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Lecture and laboratory. This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 422 Research (1-6 Credit Hours)
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 426 Entomology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.
Outcomes:
Students will learn to identify major insect groups in the field and in the laboratory

BIOL 430 Virology (3 Credit Hours)
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 450 Advanced Bioinformatics (2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOL 451 Bioinformatics Seminar (1 Credit Hour)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills. Students can summarize, critique, and present bioinformatics research.
Course equivalencies: X-BIOI501/BIOL451

BIOL 452 Human Anatomy and Physiology I (3 Credit Hours)
The course objectives are to learn the gross anatomical structures of the human body. To organize the relationships between these structures and systems using patterns of innervation and development. To be able to apply anatomical knowledge in ways pertinent to clinical issues.

BIOL 453 Human Anatomy and Physiology II (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program
This is the second semester of a 2 semester course. We will cover the physiology of the cardiovascular, respiratory, digestive, renal, reproductive, and endocrine systems, in addition to acid-base and fluid balance, temperature regulation, and exercise physiology. Functioning will be discussed from a systems level to a molecular level.

BIOL 455 Advanced Neuroscience (3 Credit Hours)
This course will focus on the cellular, anatomical, and functional organization of the human nervous system that range in topics from ion channel physiology to cognition. Students will survey the elements of the nervous system necessary for a foundation for medical school. An understanding of pathologies presented in disease, dysfunction, and injury will be included.
Outcomes:
Learn foundational neurological concepts presented to first year medical students; Learn the pathology of neurological disease, dysfunction, and injury through clinical cases; Understand the neurological basis of higher-order functions

BIOL 458 Developmental Neurobiology (3 Credit Hours)
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis. Students will also learn how to critically read primary research papers and present these papers to the class.
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles

BIOL 461 Advanced Neurobiology (3 Credit Hours)
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 466 Advanced Biochemistry (3 Credit Hours)
Life is based on four principle cellular components: proteins, lipids, carbohydrates, and nucleic acids. Biochemistry is concerned with the structure, function, and interactions of these compounds with one another and their environment. As such biochemistry plays a vital part in all aspects of the medical sciences since it not only helps us to understand how the (human) cell works on a molecular level but also how to decipher and possibly counter pathogenic conditions. Consider that almost all drugs used in medical treatment target proteins or groups of proteins to modulate their biochemical properties.

BIOL 470 Biostats & Exp Design Lec/Lab (4 Credit Hours)
This course is designed for students who are in, or plan to attend, graduate or professional school, and thus, will be working with their own data or critically analyzing existing data. This course will emphasize the theory and application of commonly used statistics in biology.

BIOL 479 Biology AP Workshop (3 Credit Hours)
No course description is available

BIOL 482 Advanced Molec Genetics (3 Credit Hours)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 483 Pop Genetics (3 Credit Hours)
Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations. They learn how to apply basic tools of population genetic analysis.
Outcomes:
Students develop knowledge and awareness of population genetic theory and information

BIOL 485 Prin Electron Microscopy Lec/Lab (4 Credit Hours)
Lecture and laboratory. This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques. Students will also learn how to correctly interpret their results, and properly present their data.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs

BIOL 488 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 493 Directed Reading (1-4 Credit Hours)
Student investigates a current topic in biology.

BIOL 495 Special Topics (1-4 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 495L Special Topics Lab (0 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered. Outcome: Students will master a unique topic in biology.

BIOL 500 Scientific Logic (3 Credit Hours)
The Scientific Logic course is designed to teach scientific literacy in terms of writing grant proposals, reading scientific literature, scientific presentations and debate. The course is framed within an evolutionary foundation.
Outcomes:
Students will gain knowledge in advanced evolutionary topics, while preparing a grant proposal and developing skills with respect to critical thinking and scientific inquiry

BIOL 501 Seminar (1 Credit Hour)
Students present specific, current research topics including their own research to the class and faculty.

BIOL 502 Department Seminar (1 Credit Hour)
Students meet and discuss the research presented by seminar speakers.

BIOL 510 Instructions in Teaching Biology (1 Credit Hour)
Introduction to the fundamentals of teaching biology.

BIOL 511 Biology Teaching Practicum (2 Credit Hours)
Students gain firsthand teaching experience by assisting in undergraduate courses.

BIOL 595 Thesis Supervision (1 Credit Hour)
Students conduct thesis research under the direction of their Thesis Director.

BIOL 605 Master's Study (1 Credit Hour)
Students conduct thesis research under the direction of their Thesis Director.

Biomedical Sciences (BMSC)

BMSC 402 Statistical Methods for Biomedical Science (2-3 Credit Hours)
This course covers a broad array of statistical methods for the biological and medical sciences. Topics include descriptive statistics, non-parametric methods, categorical data analysis, and regression methods for normal, non-normal, and repeated measures data. The course focuses on the analysis of real datasets using RStudio, although no previous programming experience is assumed.
Course equivalencies: CRME420/BMSC402/MPBH404

BMSC 405 Ethics in Biomedical Sciences (1 Credit Hour)
This is an interactive seminar course where students discuss and debate ethics in biomedical sciences to foster integrity, professional character, and ethical problem solving skills.

BMSC 406 Special Topics (1-3 Credit Hours)
This course covers a specific topic in biomedical sciences. The topics can vary among different special topics courses.

BMSC 410 Biochemistry and Molecular Biology (4 Credit Hours)
This course will give students a broad understanding of the synthesis and functions of the major macromolecules that comprise a cell, and the biochemical mechanisms by which these molecules interact to contribute to cellular function.

BMSC 412 Cell Biology (4 Credit Hours)
This course will provide students with knowledge of the structure and function of cells, including the experimental foundations of cell and molecular biology.

BMSC 414 Systems Biology (3 Credit Hours)
This course will provide first year graduate students with an introduction to human physiology. Emphasis is placed on the major organ systems including the nervous, cardiovascular, pulmonary, renal, gastrointestinal and endocrine systems. Basic physiology of blood, skin and bone, as well as introductory concepts in immunology and pharmacology are also covered.

BMSC 416 Methods Biomedical Science (1 Credit Hour)
This course will familiarize first year graduate students with various methods that are used in contemporary biomedical research. It will introduce methods relevant to molecular biology, tissue culture, transgenic model systems, imaging, biochemistry, bioinformatics, electrophysiology, and immunology.

BMSC 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

BMSC 499 Research (0-2 Credit Hours)
Pre-requisites: First year PhD students will register for one research rotation in the Fall semester (2 credit hours), and two research rotations in the Spring semester (3 credit hours)
Research rotation course for first year students in the Integrated Program in Biomedical Sciences.
Outcomes:
Research course will provide laboratory experience during the first year of study, expected to culminate in the selection of a dissertation research laboratory and mentor at the end of the first year

BMSC 600 Dissertation Supervision (1 Credit Hour)
Following completion of the required 48 credit hours in the first 2 years, IPBS PhD students maintain registration via BMSC 600.
Outcomes:
IPBS PhD students will work on their dissertation while registered for BMSC 600

Cellular & Molecular Oncology (CMO)

CMO 499 Research (1-9 Credit Hours)
Pre-requisites: Restricted to students enrolled in CMO MS program
CMO 499 is designed to give credit for laboratory research efforts that will result in a M.S. thesis. Students will learn theoretical and laboratory technical tools to investigate and test a hypothesis. Students will search the literature for background, rationale, and protocols for their research project. Students will communicate results and knowledge through written and oral communications.
Outcomes:
1) Clearly communicate, describe, and implement techniques used for a research problem; 2) Describe results-obtained; 3) Draw conclusions based on data-obtained; 4) List future directions; and 5) Understand the significance of the work

CMO 502 Seminar (0 Credit Hours)
A seminar will be held on a rotating basis once per week. CMO M.S. students will be required to attend seminars as part of the CMO 502 course. This course is designed to help students stay abreast of current topics in oncology. Students will attend weekly seminars, and are encouraged to interact with both invited and current faculty speakers by asking questions and contributing to group discussions. Upon completion of this course CMO 502, students will have gained a better understanding of current oncology research. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar, 3) Question new data or their interpretation

CMO 503 Special Topics in Oncology (0-1 Credit Hours)
CMO 503 will be a new journal club course-discussing and analyzing papers from presenters in CMO 502 Seminar Series one week in advance of their seminar. CMO 503 and CMO 502 will be aligned to expose students to oncology-focused scientists presenting a seminar the following week. Students will read an article by the seminar speaker, participate in discussion sessions, and ask questions during the seminars. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe cutting edge research in the particular area of investigation covered by the course; 2) Discuss limitations to experimental approaches; 3) Discuss real-world application of the research topic being studied; and 4) Critically read scientific literature on cancer biology

CMO 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: Completion of required coursework
Thesis supervision course for CMO MS students who have completed the required credit hours. Allows completion of thesis research and defense, required for degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Chemistry (CHEM)

CHEM 400 Chemistry Seminar (1 Credit Hour)
This weekly seminar series on current topics in Chemistry is presented by experts from outside Loyola.

CHEM 401 Chemistry Methodology and Communication (3 Credit Hours)
Pre-requisites: Graduate Standing
This is the common preparatory course providing all chemistry graduate students with the necessary skills to navigate towards their respective degrees and success post-degree. Topics include: notebooks, design of experiment, safety, ethics, effective communication of science, conflict resolution, and professional conduct.
Outcomes:
Students are prepared with the soft skills and formal training in research methodology and compliance expectations expected of a graduate student and a professional chemist in a senior role

CHEM 415 Special Topics in Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester.

CHEM 420 Advanced Organic Chemistry I: Struct-Stereo (3 Credit Hours)
Important organic chemical concepts. Includes discussion of the stereochemistry of carbon, organic quantum mechanics, chemical kinetics and related mechanistic concepts, and an introduction to synthetic methodology.

CHEM 422 Advanced Organic Chemistry III: Mechanism (3 Credit Hours)
This is an intensive review of the more general types of organic chemical mechanisms, such as electrophilic and nucleophilic additions, substitution reactions, elimination processes, and hemolytic processes. The experimental approach to mechanisms is emphasized.

CHEM 423 Medicinal Chemistry (3 Credit Hours)
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.
Outcomes:
1) Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window; 2) Summarize interactions of drugs with receptors, enzymes, or nucleotides; 3) Analyze structure-activity relationships given potency data

CHEM 424 Molecular Characterization Part A (3 Credit Hours)
Pre-requisites: Graduate Students Only
This course will include a closer look at the theory and applications of several spectroscopic methods used for analysis of organic as well as inorganic compounds, including 1D and 2D methods employing 1H and 13C NMR, in addition to other elements; UV/Vis, combined with mass spectrometry.
Outcomes:
Students will be able to identify a compounds molecular structure based of spectroscopic means and understand the working principles behind those spectroscopies

CHEM 425 Special Topics in Organic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are: natural products, free radicals, molecular rearrangements, photochemistry, heteronuclear NMR, carbocyclic chemistry, medicinal chemistry, synthetic organic methodology, pericyclic reactions, heterocycles.

CHEM 429 Research in Organic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 430 Physical Chemical Survey (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Covers chemical thermodynamics, molecular structure and spectra, and chemical kinetics. It includes review and survey of some recent research.

CHEM 431 Chemical Thermodynamics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
An extended study of the principles of the thermodynamic laws followed by applications to real and ideal systems of gases, liquids, and solids; partial molal properties; principles and applications of quantum statistical thermodynamics to gaseous equilibria

CHEM 433 Chemical Kinetics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Description of rates of chemical reactions and interpretations thereof; principal theories of bimolecular and unimolecular processes; chain reactions; development of absolute reaction rate theory and application to a number of chemical systems; potential energy surfaces; includes heterogeneous kinetics, solution phenomena, isotopic effects, flow systems, empirical kinetic relations.

CHEM 435 Special Topics in Physical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are NMR spectroscopy, photophysical processes, molecular spectroscopy, computational chemistry, molecular modeling, and spectroscopy of surfaces.

CHEM 436 Statistical Thermo Dynamics (3 Credit Hours)
Methods of classical and quantum statistical mechanics applied to thermodynamic problems; calculation of thermodynamic quantities from spectral data; properties of real gases; selected problems in the solid sate.

CHEM 437 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: CHEM 302 or equivalent; strong courses in calculus and modern physical chemistry, and some knowledge of computer programming
A thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 438 Quantum Mechanics II (3 Credit Hours)
Pre-requisites: CHEM 437
This course is a continuation of CHEM 437, which is a thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 439 Research in Physical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 441 Advanced Inorganic Chemistry (3 Credit Hours)
The important topics in inorganic and organometallic chemistry are surveyed.

CHEM 445 Special Topics in Inorganic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are organometallic chemistry and catalysis, bioinorganic chemistry, physical methods in inorganic chemistry, inorganic reaction mechanisms, non-metal chemistry, transition metal clusters and X-ray crystallography.

CHEM 449 Research in Inorganic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 451 Chemical Methods of Analysis (3 Credit Hours)
Topics covered include the statistical evaluation of analytical results and sources of errors, sampling and significance of proper samples, optimization of experiments, review of acid-base theory, chelometry and its applications, theory of precipitation, oxidation and reduction reactions and applications.

CHEM 452 Electrochemistry (3 Credit Hours)
Fundamentals of electrochemistry, the application of electrochemical techniques and current literature.

CHEM 454 Analytical Separations (3 Credit Hours)
Topics include aspects of chromatography, partition, thin layer, gas and liquid chromatography, mass spectroscopy and other techniques.

CHEM 455 Special Topics in Analytical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. This course may involve a lab. Some courses are analytical absorption and emission spectroscopy, electroanalytical methods, environmental chemistry, lasers in analytical spectroscopy, and mass spectroscopy.

CHEM 456 Analytical Spectroscopy (3 Credit Hours)
We will discuss photometric instrumentation, absorption, emission and fluorescence spectroscopy and types of analytical laser spectroscopy.

CHEM 459 Research in Analytical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 460 Biophysical Chemistry (3 Credit Hours)
This class will cover the role of molecular interactions in determining the structure and reactivity of complex biological molecules. Modern experimental techniques are used in studying these interactions in biological systems.

CHEM 461 Biochemistry (3 Credit Hours)
The conformation, dynamics and biological activities of macromolecules, generation and storage of metabolic energy, and genetic information and biosynthesis will be discussed.

CHEM 465 Special Topics in Biochemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are protein chemistry, sequence and 3D structure, magnetic resonance spectroscopy, protein crystallography, bio-inorganic chemistry, molecular biology, molecular dynamics of proteins, and current developments in biochemistry and related areas.

CHEM 469 Research in Biochemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 470 Biochemistry I (3 Credit Hours)
Pre-requisites: Completion of undergraduate organic chemistry
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 479 Research in Chemical Education (1-9 Credit Hours)
Co-requisites: RMTD 400 and CIEP 229; This course is restricted to Chemistry Ph.D. students
Prerequisites or This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills.
Outcomes:
Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field; *describe and apply methods for preparing research data collected for publication; *describe and apply methods for analyzing chemical education research projects & manuscripts

CHEM 480 Chemistry for Teachers I (3 Credit Hours)
This course focuses on aspects specific to the teaching and learning of chemistry at post- secondary levels. Geared towards graduate students, undergraduate seniors, or current educators who plan on instructing college students, it explores principles surrounding how people learn chemistry and how to align pedagogies and environments to optimize learning opportunities for students. Course activities and assignments are designed to initiate the building of an instructional portfolio to prepare enrolled students for potential academic careers.

CHEM 491 Laboratory Investigations in Chemistry C (1 Credit Hour)
A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts.
Outcomes:
Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district

CHEM 497 Organic and Bio Chemistry for Teachers (3 Credit Hours)
Pre-requisites: Must be enrolled in M.Ed. in Chem Ed program
A course designed for urban high school teachers to enhance knowledge of chemistry and chemistry teachers.
Outcomes:
Increased chemistry content knowledge, ability to teach inquiry based chemistry

CHEM 500 Graduate Student Seminar (1 Credit Hour)
This gives students an opportunity to prepare and present a professional chemistry seminar for other professional chemists. The presenter is trained in organizing materials for the 500 Graduate Student Seminar (1)presentation and has the experience of conveying high level technical information to a friendly audience in preparation for subsequent professional presentations in the industrial, academic, and/or scientific meeting arena. The topics of the seminar should not be related to the student's research. The course should be taken at least once by all degree-seeking students.

CHEM 501 Directed Study (1-6 Credit Hours)
A special reading project is undertaken by qualified students and directed by a faculty member of the department with chairperson's approval.

CHEM 509 Doctoral Research (0-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 595 Thesis Supervision (1 Credit Hour)
The course is for master's degree candidates after completion of course requirements.

CHEM 600 Dissertation Supervision (1 Credit Hour)
The course is for Ph.D. degree candidates after completion of courses, cumulative examinations, and research tool requirements.

CHEM 605 Master's Study (1 Credit Hour)
This course is for MS students in the (up to two) intervening semesters between completing coursework/research credits and beginning their thesis supervision.

CHEM 610 Doctoral Study (1 Credit Hour)
This course is for PhD students in the intervening two semesters (pre-candidacy) between completing coursework/research credits and beginning their dissertation supervision.

Classical Civilization (CLST)

CLST 499 Directed Study (1-3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving the ancient Mediterranean world, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Computer Science (COMP)

COMP 400A Object-Oriented Programming (3 Credit Hours)
This programming intensive course with its weekly lab component provides an exploration in problem solving for graduate-level courses, using object-oriented programming in a language such as Java.
Outcomes:
To analyze and decompose problems, specify algorithms, and construct solutions by synthesizing classes, objects and other components of object

COMP 400B Data Structures I (3 Credit Hours)
Pre-requisites: COMP 400A
This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.
Outcomes:
Students describe linear data structures and analyze the performance of their operations

COMP 400C Data Structures II (3 Credit Hours)
Pre-requisites: COMP 400B and COMP 400D
This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 400D Computing Tools and Techniques (1 Credit Hour)
This course introduces students to the Unix shell environment and essential tools.
Outcomes:
Students who complete this course will develop fluency in the Unix (Linux) environment

COMP 400E Discrete Structures (3 Credit Hours)
This course provides the mathematical foundations for graduate-level study in computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Outcomes:
To analyze properties of functions, relations, graphs, trees, paths; evaluate Boolean Expressions; apply induction towards proving correctness of algorithm and classifying resource usage; synthesize finite-state machines and logic circuits

COMP 401 Computer Security (3 Credit Hours)
Pre-requisites: COMP 400A or instructor permission
This is a foundations course on computer security, covering a comprehensive range of concepts and technologies, including security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The final project requires a presentation and technical report where the students will show and describe what they accomplished.
Outcomes:
Students will find and exploit vulnerabilities in computer and network systems; articulate cryptography and security goals, and synthesize the knowledge of different tools and techniques by applying them to an intensive real-world project

COMP 403 Operations Management (3 Credit Hours)
Pre-requisites: COMP 400A
Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support.
Outcomes:
Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making

COMP 404 Organizational Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course focuses on the manager's role in leading Organization Development and Change to maximize organization and individual effectiveness with a focus on Information Technology. The class explores Organization Development and Change theory, change practices, and discusses considerations a manager will face as a change agent in today's computing ecosystem.
Outcomes:
To understand the dynamics of change in organizations; learn techniques and strategies in managing change; develop skills that will enable a change agent mentality within the context of IT leadership

COMP 405 Database Administration (3 Credit Hours)
Pre-requisites: COMP 400B
Knowledge of the configuration and management skills needed for successful administration of a database server. The database administrator manages hardware, backup, security, tables and indexes, performance monitoring, query performance and optimization, and transaction performance. This course takes a user through the stages of maximizing the performance of a database server.
Outcomes:
Students will learn how to manage database performance, including topics such as the query optimizer, SQL EXPLAIN, table statistics, concurrency and transaction isolation levels, and security

COMP 406 Data Mining (3 Credit Hours)
Pre-requisites: COMP 400B
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP/MATH 215), MATH 212, and MATH 264
An introduction to advanced numerical analysis. Introduction to error analysis, numerical solution of equations, interpolation and approximation, numerical differentiation and integration, matrices, and solution of systems of equations, numerical solution of ordinary and partial differential equations.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will have an understanding of advanced numerical analysis and its applications

COMP 410 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 271 and COMP 264
The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes.
Outcomes:
Students will learn important topics in advanced operating systems and be able to make presentations on the topics

COMP 412 Open Source Computing (3 Credit Hours)
Pre-requisites: COMP 400B
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Outcomes:
Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively

COMP 413 Intermediate Object-Oriented Development (3 Credit Hours)
Pre-requisites: COMP 400B
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Outcomes:
Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development

COMP 417 Social and Ethical Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 418 Combinatorial Mathematics (3 Credit Hours)
Pre-requisites: MATH 313 or COMP 163
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Course equivalencies: X-COMP418/MATH418
Outcomes:
Students will learn mathematical techniques in discrete mathematics and applied combinatorics

COMP 420 Software Systems Analysis (3 Credit Hours)
Pre-requisites: COMP 400B or instructor permission
This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design.
Outcomes:
Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation

COMP 421 Math Models & Simulation (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
This course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered.
Course equivalencies: X-COMP421/MATH421/STAT421
Outcomes:
Student will learn foundations of discrete event simulation

COMP 422 Software Development for Wireless and Mobile Devices (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcomes:
Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming

COMP 424 Client-Side Web Design (3 Credit Hours)
Pre-requisites: COMP 400B
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.
Outcomes:
Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems

COMP 425 Rapid Applications Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.
Outcomes:
Students will create database applications and web applications using server-side technologies

COMP 428 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or Permission
In this course, major types of error-correcting codes, encoding and decoding , and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes.
Course equivalencies: X-COMP428/MATH428
Outcomes:
Students will learn both the theory and application of error-correcting codes

COMP 429 Natural Language Processing (3 Credit Hours)
Pre-requisites: ((COMP 400B or COMP 271) and (MATH 131 OR equivalent) and (STAT 103 OR equivalent)) OR instructor permission
In this course, students examine in depth the problems, methods, and applications of NLP. Topics will include information retrieval, sentiment analysis, machine translation, document classification, and question answering. We will also cover the underlying theory from probability, statistics, and machine learning that are crucial for the field.
Outcomes:
Students will explain areas of NLP such as information retrieval, sentiment analysis, machine translation, document classification, question answering; Students will apply tools of NLP to a domain of their choice

COMP 431 Cryptography (3 Credit Hours)
Pre-requisites: COMP 271 and (Comp 163 or MATH 313 or MATH 201) or Permission
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP431/MATH431
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 433 Web Services Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP.
Outcomes:
Students will learn the standards and protocols for deploying web services

COMP 434 Enterprise Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors.
Outcomes:
Students will learn the architecture of EJB, entity and message and session beans

COMP 435 Formal Methods in Software Engineering (3 Credit Hours)
Pre-requisites: COMP 400C
As embedded and distributed systems are becoming ever more ubiquitous, we depend increasingly on the correctness and security of the software that controls such systems. This course studies the formal specification, verification, and synthesis of software.
Outcomes:
An understanding of the role of formal methods in the construction of software systems; proficiency in representative methods and tools, such as static analysis, model checking, and runtime verification

COMP 436 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 437 Intro Concurrent Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 439 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 400D or equivalent and (COMP 400C or equivalent or COMP 413)
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.
Outcomes:
Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems

COMP 440 Computer Forensics Investigations (3 Credit Hours)
Pre-requisites: COMP 401
This course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 441 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.
Outcomes:
Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces

COMP 442 Server-Side Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264 and COMP 413
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 443 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
Students should also have completed COMP 400D or equivalent. This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 445 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course considers the safety, security, reliability, and privacy concerns of the embedded devices and cloud-based resources of the Internet of things. The course discusses methods for addressing these concerns.
Outcomes:
Design/implement secure software for embedded systems and the IoT; Establish safety, security, reliability, privacy goals for IoT-based systems; Understand security and privacy concerns of embedded systems and the IoT

COMP 446 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.
Outcomes:
Students will learn how telephone and data networks work; They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system

COMP 447 Intrusion Detection and Computer Forensics (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.
Outcomes:
Students will learn to configure ID systems (eg, snort) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 448 Network Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.
Outcomes:
Students will gain an understanding of how to secure computers and network environments

COMP 449 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 450 Applied Cryptography (3 Credit Hours)
This course covers the applications of modern Cryptography, while addressing theoretical foundations as necessary. The course begins by introducing modern Cryptographic notions of security in the form of adversary experiments/challenges. Practical applications of Cryptography using OpenSSL are discussed throughout the course. More recent advances in Cryptography are also discussed.
Outcomes:
Reason about the security of a cryptographic system under various assumptions; Implement and analyze various cryptographic protocols; Gain familiarity with OpenSSL; Understand the implications of Post-Quantum Cryptography and potential future avenues of application

COMP 451 Enterprise Networking (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent, and COMP 443, and COMP 400D or equivalent
Management of complex, high-speed, heterogeneous computer networks. Device management using SNMP and related protocols. Configuration and use of Network Management Systems. Data-flow management using LARTC and similar tools.
Outcomes:
Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms

COMP 452 Introduction to Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities; Describe how vulnerabilities can be leveraged into an attack; Describe a vulnerability or attack at the machine-code level

COMP 453 Database Programming (3 Credit Hours)
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.
Outcomes:
Students will learn application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 458 Big Data Analytics (3 Credit Hours)
Pre-requisites: At least a C in the following courses (COMP 405 or COMP 453) AND (COMP 406 or COMP 479 or STAT 408 or equivalent)
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 460 Algorithms & Complexity (3 Credit Hours)
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.
Outcomes:
Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 462 Advanced Computer Architecture (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.
Outcomes:
Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems

COMP 464 High-Performance Computing (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcomes:
Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems

COMP 468 Database System Design (3 Credit Hours)
The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases.
Outcomes:
Students learn the theory and practice of advanced database design and implementation; They will also gain an understanding of using commercial database environments such as Oracle

COMP 469 Product Invention and 3D printing (3 Credit Hours)
This course explores how things are made, including: physical design vs design on non-physical things; rapid prototyping; 3D printing; 2D conceptualization and sketching; modeling.
Outcomes:
Student will be able to: Visualize ideas via sketching basic shapes; Create 3D models using 3D modeling software; Use a 3D Printer; Give constructive feedback in peer review sessions

COMP 470 Software Quality and Testing (3 Credit Hours)
In this programming intensive course, students will learn effective automation, testing, and use of software metrics through the practices of Test Driven Development and Continuous Deployment.
Outcomes:
Students will be able to perform rigorous testing techniques that contribute to operational reliability, and identify programming practices that both contribute to software maintainability and help to avoid errors

COMP 471 Theory of Programming Languages (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

COMP 472 Compiler Construction (3 Credit Hours)
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn the theory and practice of how to build a compiler

COMP 473 Advanced Object Oriented Programming (3 Credit Hours)
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 474 Software Engineering (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP476/MATH476
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 477 IT Project Management (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 479 Machine Learning (3 Credit Hours)
Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 480 Computer Graphics (3 Credit Hours)
This course introduces advanced topics in modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 483 Computational Biology (4 Credit Hours)
Pre-requisites: BIOL 488
This course presents an algorithmic focus to problems in computational Biology. As such it is built on earlier courses on algorithms and bioinformatics. Current algorithmic approaches, software tools, and scientific literature are discussed.
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 484 Artificial Intelligence (3 Credit Hours)
This course advanced artificial intelligence concepts including theory, search techniques and programming.
Outcomes:
Student will learn the theory of artificial intelligence, search techniques, and be able to build small applications based on it

COMP 486 Computational Neuroscience (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques.
Outcomes:
Students will be able to adeptly apply mathematical and computational frameworks in the various domains of neuroscience

COMP 487 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 479
Deep learning is part of a broader family of machine learning methods based on artificial neural networks. This course will include key concepts of neural network algorithms as well as their applications in computer vision and natural language processing.
Outcomes:
Students will analyze popular modern neural architectures such as convolutional and recurrent neural networks, design and evaluate their own neural networks, and apply neural network models to a practical task

COMP 488 Computer Science Topics (1-4 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 490 Independent Project (1-6 Credit Hours)
Pre-requisites: Approval of the Computer Science faculty member supervisor
An independent project in computer science or related disciplines, under the supervision of a member of the faculty.

COMP 499 Internship (1-6 Credit Hours)
An opportunity to obtain experience in software development, design, networks, or related activities in computer science in a professional setting. The student must obtain the approval of the Graduate Program Director and the student's work supervisor. A final report from the student and the supervisor are required.

COMP 501 Equitable and Inclusive Computer Science Pedagogy (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers the design of computer science courses through an equity and inclusion lens, and covers evidence-based best practices as applied to specific student concerns. Includes basics of teaching and learning theory and pedagogical techniques, and equity, diversity, and justice concerns.
Outcomes:
Ability to explain justice-centered CS education; understand pedagogical frameworks; understand assessment approaches; understand Active Learning and Peer Instruction

COMP 502 Structure of Research Management and Funding (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers grant-proposal development, University compliance regulations, and laboratory and research management.
Outcomes:
Ability to create successful grant proposals and to understand research management

COMP 503 Technology Entrepreneurship (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This course provides aspiring researchers with the skills to pursue new ventures and technology commercialization. Students learn how to transition an innovation from the lab to the marketplace.

COMP 590 PhD Independent Study (3 Credit Hours)
Independent study for PhD research, for students who have not yet completed the required credit hours.
Outcomes:
This will depend on the exact study or research project the student engages in, but generically the outcome is to gain expertise in a study topic or obtain research results

COMP 595 Thesis Supervision (1 Credit Hour)
Supervision for students working on a thesis while not for other classes. Restricted to students enrolled in the MS in Computer Science.

COMP 600 Dissertation Supervision (1 Credit Hour)
Dissertation work under the supervision of a faculty member.
Outcomes:
This course is an independent study course supervised by a research advisor, the purpose of the course is to enable PhD students to maintain full-time status while they prepare their dissertation proposal, and specific goals will vary for individual students, but in general, PhD students should be maturing as researchers

COMP 605 Master of Science Study (1 Credit Hour)
Course for continuing master's degree students engaged in study.

COMP 610 Doctoral Study (1 Credit Hour)
Dissertation preparation course, for when student has completed coursework but before student has defended their dissertation proposal. Can be taken only twice during a doctoral student's career at LUC.
Outcomes:
This course is an independent study course supervised by a research advisor; The purpose of the course is to enable PhD students to maintain full-time status while they complete their dissertation; Specific goals will vary for individual students, but in general, PhD students should be maturing as researchers and beginning to establish intellectual independence

Criminal Justice & Criminology (CJC)

CJC 401 Politics and Policies in the Criminal Justice System (3 Credit Hours)
This course examines the interactional processes within and among the criminal justice system's components and their relationships to other public and private institutions. The role of politics in policy formulation, the policy making process, and the consequences of current policies on the operation of the criminal justice system are discussed.
Outcomes:
Students will understand the CJ policy-making process, including which factors facilitate/inhibit effective policy development and implementation, and how CJ research is used to formulate, implement, and evaluate CJ policies

CJC 402 Theories of Criminal Behavior (3 Credit Hours)
This is a comparative review of dominant contemporary theories and research on the causes of crime and delinquency. Competing theories on the causes of crime are analyzed, and their empirical support and implications for prevention programs and interventions are discussed.
Outcomes:
To analyze and discuss contemporary theories of criminal behavior

CJC 403 Research Methods and Program Evaluation (3 Credit Hours)
This course provides students with the substantive knowledge to be critical consumers of research studies and program evaluations. Students learn how to critique the internal, construct, and external validity of program evaluations and data collection efforts that seek to understand criminal behavior or the operation of the criminal justice system.
Outcomes:
To analyze and critique program evaluations and research designs

CJC 404 Applied Data Analysis and Interpretation (4 Credit Hours)
Students learn the skills and knowledge necessary to be critical consumers of statistical information often present in everyday criminal justice practice. Students learn which statistical tools are appropriate for specific measures and research questions, as well as how to generate and interpret statistical output using a statistical software package.
Outcomes:
Students will be able to select the correct statistical tools to use for conducting statistical analyses, use a statistical software package to analyze data, and interpret statistical output

CJC 408 Applied Research in Criminal Justice & Criminology (2 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404
In their final semester of the CJC graduate program, students complete a semester-long research project. This culminating experience is student-initiated and supervised by a member of the graduate faculty. This project encourages advanced students to approach the multifaceted problem of research as a set of interrelated issues ranging from tasks of concept formation and theory construction through research design and data collection to the assessment and analysis of the generated data.
Outcomes:
Students should be able to synthesize criminological theory, criminal justice policy, research methods, and data analysis into a final applied research project

CJC 410 Advanced Topics in Criminology (3 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on theories or contemporary issues concerning criminal and victim behavior. Examples of topics include: Drugs and Violence; Gender and Crime; Intimate Partner Violence; Sexual Violence; Human Trafficking; Environmental Crime; Victimology; International Criminology; Advanced Criminology; Race, Ethnicity, and Crime.
Outcomes:
Students will understand a contemporary issue in criminology with a special emphasis on research and theory developments

CJC 411 Advanced Topics in Policing (3 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of policing, including community- and problem-oriented policing, situational crime prevention, crime analysis, and Comp-Stat approaches to policing practice and management.
Outcomes:
Students will understand a contemporary issue in policing with a special emphasis on research and theory developments

CJC 412 Advanced Topics in Courts (3-6 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on contemporary issues in courts. Examples of topics include: International Criminal Law and Anti-Terrorism Enforcement, The American Jury; Death Penalty; International Criminal Law; Public Views of Justice; Media, Culture, and Criminal Law; Legal Rights of Children.
Outcomes:
Students will understand a contemporary issue in the court system with a special emphasis on research and theory developments

CJC 413 Advanced Topics in Corrections (3-6 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of corrections. Examples of graduate courses that will be offered as special topics courses under CJC 413 include: Principles of Punishment, Sentencing Policy, Restorative Justice, Risk Assessment, Re-Entry, What Works in Corrections, Mass Incarceration, and Juvenile Corrections.
Outcomes:
Students will understand a contemporary issue in corrections with a special emphasis on research and theory developments

CJC 414 General Special Topics (3 Credit Hours)
Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System.
Outcomes:
To analyze and discuss topics in criminal justice

CJC 415 Mental Illness and Crime (3 Credit Hours)
Pre-requisites: Graduate students only
This course explores the relationship of mental illness to crime and violence, the policies and programs concerning the treatment of individuals with mental illness in the criminal justice system, including the nature, prevalence and consequences of mental disorder among criminal offenders.
Outcomes:
Students will understand the history and development of research on mental illness and crime, assessments of risk for violence, as well as legal issues surrounding mentally disordered victims and offenders

CJC 416 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control.
Outcomes:
Students will understand how international legal and criminal justice systems interact to investigate, measure, and prosecute transnational crimes including trafficking, human rights violations, and war crimes

CJC 431 Criminal Victimization (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course critically explores the physical, emotional, and financial harm people suffer because of illegal criminal activities. The focus of the course is on the nature and extent of victimization, the estimation of risk, theories about the causes of victimization, and the consequences of victimization experiences. In addition, students will also study the emergence of special victims' groups, the implications of a victim-orientated perspective for the administration of justice, and system alternatives such as restitution and restorative justice.
Outcomes:
Articulate the history, nature, and magnitude of criminal victimization in the United States; Describe the theoretical underpinnings of victimization and current research on the risk and protective factors of criminal victimization; Differentiate the legal and social responses to criminal victimization; Describe the primary and secondary impact of criminal victimization on victims, their families, friends, and communities; Analyze data to examine trends and patterns of criminal victimization; Analyze data to examine the causes and correlates of criminal victimization; Identify which interventions and strategies offer the most promise for effective implementation and impact on preventing criminal victimization

CJC 432 Firearm Violence (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course will provide a comprehensive overview of the extent and nature of firearm violence, existing laws related to the acquisition, ownership and use of firearms, patterns and reasons for firearm ownership and acquisition, the various attempts to control access to firearms, and the effectiveness of such efforts. This course will explore both the criminal justice and public health perspectives and approaches to reducing firearm violence. Each discipline's framework, strategies, and challenges will be examined, with a focus on the opportunities and challenges of implementing interdisciplinary approaches in a "real world" setting. The class will emphasize the application of objective and rigorous scientific methods and research to understanding the extent and nature of firearm violence and evaluating interventions within the context of what is oftentimes a politically and emotionally charged debate.
Outcomes:
Articulate the extent and nature of firearm violence in the United States in a sophisticated way that illustrates an understanding of existing measures of firearm violence; Describe the strengths and limitations of existing data to measure the extent and nature of firearm violence, patterns and levels of firearm ownership, and firearm markets; Differentiate between the criminal justice and public health frameworks, and how each approaches firearm violence; Describe the importance and challenges of responding to complex issues like firearm violence from a multidisciplinary/intersectional/collaborative approach; Analyze data to examine trends and patterns of firearm violence; Analyze data to examine the correlates and causes of firearm violence; Describe evidence-based interventions and strategies to reduce firearm violence; Identify which interventions and strategies offer the most promise for effective implementation and impact on firearm violence

CJC 433 Wrongful Convictions and the Law (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
Wrongful convictions often include two types of errors, an innocent person is punished, and a guilty person escapes justice. In this class, we will explore how such errors occur by focusing on both investigation and adjudication practices. We will then apply what we have learned about criminal procedure to analyze individual wrongful conviction cases. This is an interactive course. Students will review case intake documents from a cooperating legal organization and help inform their case decisions. We will also work with the National Registry of Exonerations to draft case profiles for people who have already been exonerated. Ultimately, we will weigh the challenges of upholding defendants' rights without compromising public safety or producing additional errors.
Outcomes:
Evaluate criminal cases for potential errors, both episodic and systemic; Describe defendants' due process rights particularly under the 5th and 6th amendments and how these rights relate to criminal procedure in practice; Explain judicial opinions and their ability to remedy wrongful convictions; Identify the limitations of the appellate process and post-conviction review; Produce written content of publishable quality, with a special focus on accuracy and fact checking

CJC 499 Independent Study (1-6 Credit Hours)
Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic. Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

CJC 501 Thesis Research (2 Credit Hours)
Pre-requisites: Approval of Graduate Program Director and Grade of A- or better in CJC 403 and CJC 404
Supervision and guidance are given as students conduct their independent Masters' thesis research.
Outcomes:
Master's Thesis

CJC 502 Practicum in Criminal Justice (3-6 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404 Outcomes: Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency, and identify/describe the link between their field experience and prior courses through a research paper
This course enables the student to apply their knowledge (conceptual, theoretical, and methodological) in a practical agency setting.

CJC 595 Thesis Supervision (1 Credit Hour)
This is a non-credit course. Students who are working on approved master's thesis research and are not registered for any course are required to register for thesis supervision.

CJC 605 Master's Study (1 Credit Hour)
Pre-requisites: Completion of the graduate core courses; This course is a non-credit means of permitting students to be formally enrolled at Loyola while completing their culminating experience (i.e
, 408 project or thesis).

Data Science (DSCI)

DSCI 401 Introduction to Data Science (4 Credit Hours)
Pre-requisites: Restricted to Graduate students
This course provides students with an introduction to data science using the R programming language covering such topics as data wrangling, data visualization, interacting with databases, principles of reproducible research, building simple statistical models/machine learning and data science ethics.
Outcomes:
Students will obtain an extensive background in the basic tools used in the field

DSCI 470 Data Science Consulting (2 Credit Hours)
Pre-requisites: STAT 408
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
Outcomes:
Students will apply methods learned in prior classes to address a real-world problem, gain oral and written presentation skills, and improve collaboration skills

DSCI 494 Data Science Research Design (2 Credit Hours)
Restricted to DSCI Graduate students. Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement research design practices in data science

DSCI 499 Data Science Research (1-8 Credit Hours)
Restricted to DSCI Graduate students. Students will conduct independent hypothesis-driven data science research under faculty guidance. Research efforts will include literature surveys, research design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for data science research

DSCI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: DSCI 499
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

Digital Humanities (DIGH)

DIGH 400 Introduction to Digital Humanities Research (3 Credit Hours)
Enrollment in DIGH 400 is the prerequisite for DIGH 401, 402, 500, 595. An introduction to the digital humanities, work in a variety of humanities disciplines--literature, art, philosophy, theology, and history--that involves computer assistance in conducting or presenting research. This includes, for example, digitizing, markup, editing, publishing, archiving, analyzing, visualization, modeling, interpretive gaming, and instructional and interface design. This course will emphasize research questions and methods from a range of humanities disciplines--not computer technology per se but ways that computing can further humanities research agendas.
Outcomes:
Knowledge of how computing affects research in humanities, critical thinking about technology and humanities, awareness of broad social and ethical questions surrounding old and new, print and digital, media in contemporary culture

DIGH 401 Introduction to Computing (3 Credit Hours)
Pre-requisites: DIGH 400 co-enrollment
Primarily for DH students, the course combines historical study with a hands-on approach to computers their growing role in academic research, publishing, libraries, and the arts. Topics will include the structure of computers, the relation of hardware and software, text and image markup and publishing, database theory and design, modeling and visualization, text analytics, procedural logic, and the basic concepts of programming, artificial intelligence, and the social, ethical, and intellectual contexts for computing.
Outcomes:
Procedural literacy, historical knowledge of hardware and software platforms, ability to be a scholar-programmer or to collaborate fruitfully with scholar-programmers

DIGH 402 Digital Humanities Design (3 Credit Hours)
Introduces students to design and human computer interaction.
Outcomes:
Students gain practical experience with design, testing, and building ethical digital projects

DIGH 403 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: DIGH 400, DIGH 401, DIGH 402
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks

DIGH 405 Special Topics in Digital Humanities (3 Credit Hours)
Special topics in Digital Humanities or new approaches of current interest to the instructor.
Outcomes:
Dependent upon course topic; must be approved by GPD

DIGH 499 Independent Study in Digital Humanities (1-3 Credit Hours)
Students work under the direction of a faculty member on a particular area of interest within Digital Humanities.
Outcomes:
Students advances their research projects with direct and regular input from a faculty member

DIGH 500 Digital Humanities Practicum (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.
Outcomes:
A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

DIGH 501 Digital Humanities Project (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
In this capstone, students will apply skills they've learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.
Outcomes:
A working, practical final digital humanities project published online

DIGH 605 Master's Study (1 Credit Hour)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up any MA requirements, such as their field examinations and research project.
Outcomes:
Advancement to degree completion

English (ENGL)

ENGL 400 Intro to Graduate Study (3 Credit Hours)
The course serves as an introduction to the profession of literary studies for students new to the graduate programs in English. It offers a review of current critical theories and methodologies, research techniques, bibliographic methods, and issues in textual criticism.

ENGL 402 Teaching College Composition (3 Credit Hours)
The course deals with practical matters related to the teaching of college composition. It is organized around an examination of recent theories, methods, and materials used in the teaching of writing.

ENGL 403 Composition Theory (3 Credit Hours)
This course examines major and current advances in composition theory and reviews current scholarship in the teaching of writing, with some attention to the relationship between composition and literary theory.

ENGL 404 Pedagogy: Theory and Practice (3 Credit Hours)
Pre-requisites: ENGL 402
This course is designed to help students integrate theory and practice in teaching literature and cultural studies courses at the college level.
Outcomes:
Students will demonstrate an understanding of pedagogical theories by writing a teaching philosophy in which they explain and defend their theoretical approach; students will put their theory into practice by preparing a course proposal for a literature course, which includes a description and goals, syllabus and guidelines, classroom format, and assignments and evaluations procedures

ENGL 406 History of the English Language (3 Credit Hours)
The course is a study of the causes, mechanisms and consequences of language variation over time, with prominent examples taken from the history of English and its parent languages. All major areas of linguistic theory are considered: phonology, lexis, morphology, syntax, and semantics.
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 410 Contemporary Literary Criticism (3 Credit Hours)
This course presents studies in major contemporary theoretical and critical issues through a survey of major types of critical analysis, such as formalism, structuralism, semiotics, reader-response, deconstruction, psychoanalysis, and feminist criticism.

ENGL 412 History of the Book to 1800 (3 Credit Hours)
Pre-requisites: Graduate status
This course will examine the history of written and printed texts from their beginnings to 1800, including such topics as book production and distribution, early ideas about textual editing, literacy, copyright, and censorship.
Outcomes:
Students will be able to relate textual forms to cultural practices

ENGL 413 Textual Criticism (3 Credit Hours)
An introduction to major textual theories and their history. Topics may include such issues as analytic and descriptive bibliography, theories of copy-text, theoretical and practical issues in editing, and forms of textuality, including manuscript, print and digital.

ENGL 415 Media and Culture (3 Credit Hours)
This course examines the important and evolving roles that media plays in the construction, reformulation, and critique of contemporary culture. Topics will vary but may include digital textuality; visual culture studies; information technologies; postcoloniality and globalization; and web-based communities.

ENGL 419 Contemporary Issues in Literature and Culture (3 Credit Hours)
The course is an intensive study of a particular cultural issue in relation to literature.

ENGL 420 Topics in Critical Theory (3 Credit Hours)
Focused study of a particular problem or movement within critical theory–for example, globalization; the "new aesthetics"; high and low culture; psychoanalytic theory; whiteness studies.

ENGL 422 Postcolonial Theory (3 Credit Hours)
This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said, Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

ENGL 423 Marxist Literary Theory (3 Credit Hours)
Intensive study of selected writers and issues within the Marxist tradition of literary and cultural criticism.

ENGL 424 Cultural Studies (3 Credit Hours)
An examination of the theory and practice of cultural studies, with special attention to the role of literary and critical theory in its development.

ENGL 426 Feminist Theory and Criticism (3 Credit Hours)
An intensive study of recent feminist theory in a range of disciplines--including literature, philosophy, history, and law--and covering a variety of approaches, such as psychoanalysis, post-structuralism, post-colonialism, queer theory, and cultural studies.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 427 Dramatic Theory (3 Credit Hours)
This course presents selected theoretical approaches to drama from the Greeks to the present. Readings may include both theoretical works and plays. Topics may include genre, dramaturgies such as realism, epic theatre, and theatre of the absurd, reception, semiotics, feminist dramatic theory, and performance theory.

ENGL 428 Postmodernism (3 Credit Hours)
Pre-requisites: Graduate status
This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.
Outcomes:
Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams

ENGL 430 Topics in Literature Studies (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in literature.

ENGL 433 Seminar in Individual Authors (3 Credit Hours)
Intensive study of a single author. Includes a comprehensive reading of the author's major works, and a review of the critical reception.

ENGL 436 Women Writers in English (3 Credit Hours)
This course focuses on significant issues raised in and by women-authored works, including representations of gender roles and sexualities, and the cultural status and uses of women's literature. Authors from any period(s) in British, American and World literature may be included.

ENGL 437 Topics in Drama (3 Credit Hours)
This course may deal with topics that cut across historical and national boundaries, such as dramatic genres, women in drama, modern reappropriations of earlier drama; with more specialized topics such as performance or feminist dramatic theory; or with historical movements in drama.

ENGL 440 Topics in Medieval Literature (3 Credit Hours)
Studies in a range of Middle English writing serve as a focus for special topics, including mysticism and historical prose from the thirteenth to the fifteenth centuries.

ENGL 441 Old English Language & Literature (3 Credit Hours)
This course introduces Old English language and literature through readings in poetry and prose, with attention, as time allows, to major critical issues in texts of the period.

ENGL 443 Middle English Literature (3 Credit Hours)
This course may address texts that bridge the Old and Middle English periods or texts (excluding Chaucer) that date from the fourteenth-century, such as Langland, Malory, the Gawain-poet, Gower, and women writers.

ENGL 444 Medieval Drama (3 Credit Hours)
The course focuses on English drama from its beginnings to the early Renaissance, including liturgical drama, saints' plays, miracle plays, the cycles, and interludes.

ENGL 447 Chaucer (3 Credit Hours)
This course may focus on the Canterbury Tales or Troilus and Criseyde and the dream visions, and may include some of Chaucer's less frequently studied texts (e.g., his translation of the Consolation of Philosophy).

ENGL 450 Topics in Early Modern Literature & Culture (3 Credit Hours)
This course presents selected studies in poetry and prose of the English Renaissance.

ENGL 455 Shakespeare (3 Credit Hours)
The philosophical, esthetic, and historical problems of Shakespeare's plays are covered in this course, which also focuses on Shakespearean scholarship.

ENGL 456 Early Modern Drama (3 Credit Hours)
This course presents English drama of the period 1550 to 1642. Among the topics to be covered are the rise of the permanent theaters; Elizabethan and Jacobean contemporaries of Shakespeare; Caroline plays and masques. Historical background, theatrical developments, and critical approaches are also studied.

ENGL 457 Seventeenth-Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in seventeenth-century literature. Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 458 Milton (3 Credit Hours)
Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 460 Topics in Restoration & 18th Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in Restoration and eighteenth-century literature.

ENGL 470 Topics in Romanticism (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in Romantic literature.

ENGL 471 Poetry of Romantic Period (3 Credit Hours)
The poetry of major and minor Romantic figures is studied in this course, which includes a critical study of their esthetics, philosophical concepts, and critical standards.

ENGL 475 Topics in Victorian Literature (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme, or body of work in Victorian literature.

ENGL 476 Victorian Poetry (3 Credit Hours)
This course presents the historical, political, social, and intellectual influences on Victorian poetry and examines its artistic and formal innovations and achievements. The authors studied include: Tennyson, Browning, Arnold, Swinburne, and the Rossettis.

ENGL 477 Victorian Prose (3 Credit Hours)
The course examines the major critical and philosophical prose writers of the years 1837-1900: Macaulay, Carlyle, Arnold, Ruskin, Newman, and Pater. It also explores the intellectual, social, and political backgrounds of the period, and identifies Victorian prose styles.

ENGL 478 Victorian Novel (3 Credit Hours)
The course examines the major Victorian novelists: Dickens, Thackeray, the Brontes, Trollope, Eliot, Meredith, and Hardy; religious, social, scientific, historical, and philosophical influences on the novel are also explored.

ENGL 480 Topics in Modernism (3 Credit Hours)
Topics include modernism, the Symbolist movement, Edwardian Period, and other contextual issues that transcend genre boundaries and address larger concerns of social and intellectual history.

ENGL 481 Modern Poetry (3 Credit Hours)
The course examines tradition and experiment in modern poetry and includes English, Irish, and American poets.

ENGL 482 Modern Drama (3 Credit Hours)
This course presents selected studies in dramatists from Ibsen on, including British, American, Continental, and Irish dramatists.

ENGL 483 Modern Novel (3 Credit Hours)
The course concentrates on selected studies in Conrad, Galsworthy, Bennett, Wells, Joyce, Lawrence, Huxley, Woolf, Maugham, Forster and other novelists, but may include additional American, Irish, and Continental novelists.

ENGL 484 Literature and Culture of the Jazz Age (3 Credit Hours)
Taking an interdisciplinary approach to a crucial era, this course will consider such topics as the construction of race in literature and popular culture, the rise of the New Woman, the Harlem Renaissance, and the relationship of jazz to aesthetic modernism.

ENGL 485 Contemporary Literature (3 Credit Hours)
This course concentrates on literature and literary movements of the second half of the twentieth century. Possible topics include postcolonialism (Achebe, Jhabvala, Naipaul, Soyinka, Walcott), postmodernism (Acker, Calvino, Pynchon, Reed), and African-American writing (Baldwin, Morrison, Walker).
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in contemporary literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 487 Postcolonial Literature (3 Credit Hours)
This course examines the issues of modern-day colonization as depicted in selected fiction, drama, and poetry from Africa, South Asia, the West Indies, and Australia.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in postcolonial literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 488 20th Century Literature in English (3 Credit Hours)
Focusing on the relation between texts and their literary and cultural contexts, this course may include any twentieth-century text written in English and may address a particular theme, literary movement, period, nation, or historical event. We may also interrogate the foundation of such categories.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in 20th-century literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 489 Magic Realism (3 Credit Hours)
Fusing realistic and symbolic forms, "Magic Realism" raises boundary issues of many kinds, between history and myth, empirical and non-empirical experience, objective and subjective knowledge. This course examines magic realism from its modernist origins to contemporary postmodern and postcolonial fiction in many countries.

ENGL 490 Topics in American Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme, or body of work in American literature.

ENGL 491 Early American Literature (3 Credit Hours)
This course examines Hispanic, native American, Puritan, colonial, and early nationalist literature in the United States, and explores its American and European backgrounds.

ENGL 492 American Romanticism (3 Credit Hours)
The course includes selected studies in Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and others.

ENGL 493 American Realism (3 Credit Hours)
The course features selected studies in American realism, tracing its origins and development as a national literary movement, and reviewing its regional variations and sub-genres, with special attention to Twain, Howells, and James.

ENGL 494 American Literature Since 1914 (3 Credit Hours)
The course is composed of selected studies in representative American writers of poetry, fiction, drama, and prose in the twentieth century.

ENGL 495 Latino/a Literature (3 Credit Hours)
Pre-requisites: Graduate standing and consent of the GPD in English
Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a Literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 496 African American Literature (3 Credit Hours)
This course focuses on African-American literature over a range of periods and genres including 19th-century slave narratives (Douglass, Jacobs), the fiction and poetry of the Harlem Renaissance (Hurston, Hughes, McKay) and contemporary literature (Ellison, Shange, Morrison).

ENGL 500 Capstone Seminar (3 Credit Hours)
Pre-requisites: 18 credit hours in 400-level courses; GPA of 3 or above
This capstone seminar provides a sustained, semester-long experience of research and writing on a topic in literary studies. A statement of topic is due on the first day of class. Research and writing are supported by scaffolded assignments, peer community, and a syllabus of shared readings drawn from practical guidebooks and exemplars of literary criticism, theory, and scholarship. Students develop an original article-length research paper suitable for submission to a journal in the field of literary studies.
Outcomes:
Assess and intervene in existing scholarly discourses in the field, by developing an\\noriginal article-length research paper suitable for submission to a journal in the field of\\nliterary studies; Write effectively about texts in English, by supporting an interpretative argument with\ \nclose reading

ENGL 501 Directed Readings (3 Credit Hours)
An independent study course supervised by a faculty member with the approval of the program director. Readings are initiated by the student.

ENGL 502 Independent Study-Doctoral Qualification (3 Credit Hours)
The course is composed of special readings in the field of the student's specialization under the supervision of a faculty member with the approval of the chair. Normally the director will be the professor with whom the student plans to write the dissertation. The written outcome of the course will be a draft of a proposal for the dissertation. The course is graded on a credit/no-credit basis.

ENGL 540 Newberry Seminar (3 Credit Hours)
Special topics in literary study offered by the Newberry Library.

ENGL 595 Thesis Supervision (1 Credit Hour)
Directed studies for students working toward a master's thesis.

ENGL 600 Dissertation Supervision (1 Credit Hour)
Directed studies for students working toward a doctoral dissertation.

ENGL 605 Master's Study (1 Credit Hour)
Directed studies for students working toward a master's thesis.

ENGL 610 Doctoral Study (1 Credit Hour)
Directed studies for students working toward a doctoral dissertation.

Erikson Institute (ERIK)

ERIK E421 Social and Emotional Development I (3 Credit Hours)
This course focuses on the study of social and emotional development in children from birth through age eight. It primarily considers how children experience themselves and others; the role of relationships in development; and the interaction of biological, psychological and social forces. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE121 / ERIKE21 /ERIKE421

ERIK E426 Cognitive Development (3 Credit Hours)
This course provides students with a basic knowledge of cognitive development in children from birth through age eight and fosters awareness of the application of this knowledge to children with diverse abilities and varying cultural and linguistic backgrounds. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE126 / ERIKE26 / ERIKE426

ERIK E477 Seminar Children-At-Risk (3 Credit Hours)
This course examines the concept of risk and how it impacts child development. We will use multiple frameworks to examine risk, including public health, developmental psychopathology, and education. Attention will be focused on biological/genetic (such as prematurity and temperament), family (such as parent mental health and child maltreatment), and environmental (such as poverty and neighborhood violence) factors. The consequences of growing up in the context of chronic adversity will be explored, as well as the factors that lead some children to cope with and show resilience in these circumstances. The challenges of understanding risk in current research, as well as the implications of this research for programs and policy will also be discussed.
Course equivalencies: ERIKE477 / ERIKE77

ERIK E479 Teaching & Learning: Linking Theory & Research to Practice (3 Credit Hours)
An understanding of the two domains of learning and teaching is fundamental to the field of child development and education. This course examines these issues through investigating and analyzing exemplary models of recent and influential theory and research. A dialogue-based approach to learning will be used throughout the course to encourage personal involvement in exploring and explaining the science of learning and teaching. Students will also engage in fieldwork, such as on-site observations, conversations with practitioners, and a research project, to gain first-hand experience of these issues.
Course equivalencies: ERIKE479 / ERIKE79

ERIK E481 Seminar Social & Cultural Contexts (3 Credit Hours)
Through an examination of current theory and multidisciplinary social science research, this course explores the influence of contextual factors on the development of children. Socially and culturally constructed factors (such as gender, race, ethnicity and social class) and institutions (such as family, schools, and organized child care) will be discussed in terms of their influence on child rearing and child development. Through course lectures, discussion, and assignments, students will gain an understanding of the variability of child rearing strategies and outcomes across cultural communities; the role of historical and ecological factors in child rearing and family functioning; identity development in complex societies; and sources of possible tensions between different cultural communities and societal institutions (such as schools, social service providers, and child care programs).
Course equivalencies: ERIKE481 / ERIKE81

ERIK E482 Program Evaluation and Implementation Science (3 Credit Hours)
This course provides an advanced introduction to evaluating social services and education programs, including the study of factors leading to better program outcomes (i.e., implementation science). Restricted to Erikson graduate students.
Course equivalencies: ERIKE482 / ERIKE82

ERIK E485 Research Internship (3 Credit Hours)
The student will work either with an Erikson faculty member, research scientist, or research associate, or on a research project at another institution.
Course equivalencies: ERIKE485 / ERIKE85

ERIK E486 Teaching Internship (3 Credit Hours)
The student will teach or assist in teaching a college course in child development or a related topic.
Course equivalencies: ERIKE486 / ERIKE86

ERIK E489 Special Topics in Child Development (3 Credit Hours)
Enrollment for this course should be considered in close consultation with the faculty advisor. This course allows doctoral students to select from a range of applied child development courses at Erikson Institute that are taught by a member of the doctoral program faculty. Examples include Physical Growth and Development; Language Development; and Working with Adults. Students will gain deep understanding of the theories, research, and issues with regard to a special content area in child development and early education.

ERIK E497 Doctoral Study (1 Credit Hour)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations.
Course equivalencies: ERIKE497 / ERIKE97

ERIK E499 Dissertation Supervision (1 Credit Hour)
Course for continuing students engaged in dissertation research under advisor's supervision.
Course equivalencies: ERIKE499 / ERIKE99

ERIK E501 First Year Doctoral Seminar (0 Credit Hours)
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; and 5) Explore various career paths both in academia and non-academia

ERIK E502 First Year Doctoral Seminar (1 Credit Hour)
Pre-requisites: Graduate students only
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; 5) Explore various career paths both in academia and non-academia

ERIK E503 Scholarship Skills I (1 Credit Hour)
This course is designed to help graduate students develop their skills in finding, collating, and summarizing scholarly literature in relation to a topic of interest/future research. AI tools will also be explored and interrogated. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E504 Scholarship Skills 2 (1 Credit Hour)
Pre-requisites: Graduate Students only
This course is designed to help graduate students develop their skills in synthesizing and critiquing others' research, thereby providing support to their comprehensive exam milestone as well as helping prepare them for the literature review sections of their thesis or dissertation. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E505 Scholarship Skills 3 (1 Credit Hour)
Pre-requisites: Grad Students only
This course is designed to help graduate students develop their skills in writing, publishing, and disseminating their own research. This will include conference submissions and presentations, grant proposals, manuscripts and articles for peer review. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

Graduate School Seminar (GSSM)

GSSM S59 Thesis Supervision-Summer (1 Credit Hour)
Course for continuing students engaged in thesis research and writing under advisor's supervision during summer.

GSSM S60 Dissertation Supervision-Summer (1 Credit Hour)
Course for continuing students engaged in dissertation research under advisor's supervision during summer.

GSSM S61 Doctoral Study-Summer (1 Credit Hour)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations in summer.

GSSM S65 Master's Study-Summer (1 Credit Hour)
Course for continuing master's degree students engaged in study for comprehensive or qualifying examinations during summer.

Greek (GREK)

GREK 412 Readings in Hellenistic Authors (3 Credit Hours)
This course centers on works in Greek of the Hellenistic period, particularly at the intellectual center of Alexandria.
Outcomes:
Students should demonstrate knowledge in detail about the authors, works, and literary enterprise pursued; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, and intellectual contexts and influences pertaining to them

GREK 415 The Greek Fathers (3 Credit Hours)
This course centers on the writings of the early church fathers such as Athanasius, Basil, and John Chrysostom, through which it looks to the historical background of Eastern patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the writings, their authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, cultural, theological, and intellectual contexts and influences pertaining to them

GREK 425 The Attic Orators (3 Credit Hours)
This course examines the works of Attic orators such as Antiphon, Lysias, and Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should demonstrate knowledge in detail of the genre, the authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, political, legal, and intellectual contexts and influences pertaining to them

GREK 431 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Herodotus, his project, and his milieu

GREK 435 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War by Thucydides, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Thucydides, his project, and his milieu

GREK 441 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 442 The Odyssey (3 Credit Hours)
This course centers on Homer's Odyssey, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 443 Pindar (3 Credit Hours)
This course centers on Pindar and on ancient Greek lyric poetry more generally, potentially including consideration of additional authors such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should demonstrate knowledge in detail about the authors, their works, and ancient lyric; They should engage critically with current scholarship relating to ancient lyric's historical, social, literary, and intellectual contexts

GREK 451 Greek Comedy (3 Credit Hours)
This course may focus on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E., or consider the development of New Comedy from Old in the more broadly cosmopolitan Hellenistic world.
Outcomes:
Students should demonstrate knowledge in detail about authors, plays, and the comedic forms; They should engage with current scholarship addressing Greek comedy's historical, social, and intellectual contexts and influences

GREK 453 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 454 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 455 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 462 Plato (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic and/or other philosophical dialogues.
Outcomes:
Students should demonstrate knowledge in detail about the author and his work; They should engage critically with current scholarship concerned with Platonic thought and the historical, social, and intellectual contexts and influences pertaining to it

GREK 473 New Testament Language (3 Credit Hours)
This course centers on study of the language and literary expression of selections from the New Testament.
Outcomes:
Students should demonstrate knowledge and understanding of the texts; They should engage critically with current scholarship exploring the linguistic, historical, social, literary, and intellectual contexts of the New Testament

GREK 488 Readings in Greek Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 489 Readings in Greek Lit II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving ancient Greek language or literature, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Healthcare Professions Education (HPE)

HPE 400 Research Methods in Health Professions Education (4 Credit Hours)
Introduction for Health Professions Education (HPE) students to the fundamentals of research design for education and scholarship in teaching and learning. This course offers a deep dive into educational research, covering problem identification, literature review, research question formulation, and the critical evaluation and synthesis of existing studies. It provides a solid foundation in quantitative research (including reliability, validity, survey construction, and validation), qualitative research (focusing on interviews and focus groups), and mixed methods research. The course emphasizes ethical principles in research and teaches effective data interpretation and presentation. Additionally, students will be introduced to grant development and introduced to their capstone project which is a research proposal. This course will equip students with the skills needed to excel in educational research., reliability, validity, survey construction, and survey validation), qualitative research (as it relates to interviews and focus groups) and mixed methods research (how to manage and use more than one method of data collection); Analyze data and ethical research practices that guide educational research; Illustrate grant development with an introduction of the capstone project research proposal.
Outcomes:
Identify a research problem and method of literature review; Formulate research questions and hypothesis; Distinguish between quantitative, qualitative, and mixed methods research; Describe fundamentals of quantitative research (e.g

HPE 401 Fundamentals of Learning and Teaching Modalities in Health Professions (3 Credit Hours)
Introduction to a range of teaching modalities, including large group lectures, small group teaching, case-based, problem-based, and team-based learning, flipped classrooms, standardized patients, simulation, e-learning, procedural, chalk talks, and clinical and bedside teaching. Ignatian Pedagogy will be threaded throughout the course. Rooted in adult learning theories and human cognition, students will review these fundamental concepts and seamlessly apply them throughout the course. There is a strong focus on practical application, enabling participants to create innovative and engaging learner-centered experiences, establish supportive learning environments, and adeptly integrate feedback. As a culmination of their learning, students will craft a final project, utilizing one of these teaching modalities to instruct peers on a relevant topic, applying the skills in a real-world educational context., large group lecture, small group teaching, cased-based, problem based and team-based learning, flipped classroom, standardized patients, simulation, e-learning and clinical and bedside teaching); Define the concepts of adult learning theories (e.g., learning theory, human cognition); Apply knowledge and understanding of androgyny to class work during this course; Demonstrate course skills, including the creation of innovative and engaging learner-centered experiences which will be showcased in the teaching portfolio project; Appraise experience with teaching modalities in education through reflective writing.
Outcomes:
Categorize different teaching modalities (e.g

HPE 402 Technology in Education and Effective Lecture Skills (4 Credit Hours)
In this engaging course, through a series of hands-on activities, participants will design and produce an electronic lecture that skillfully incorporates critical components of effective instruction. Students will not only create an educational presentation, but also assess its effectiveness through peer review, showcasing their critical evaluation skills and the ability to use feedback for continuous improvement. By the course's conclusion, participants implement peer-reviewed feedback and integrate best practices to refine their lecture into a polished, pedagogically effective resource.
Outcomes:
Produce an engaging and impactful electronic lecture that incorporates critical components of effective instruction; Demonstrate critical evaluation skills through peer review of educational content; Use peer feedback to revise and enhance their lecture; Appraise use of technology in education with discussion posts

HPE 403 Principles of Curriculum Design (4 Credit Hours)
The course will focus on the formal process of curriculum development. Much of the course will cover the standard medical education curriculum development process developed by Kern and Thomas (Thomas PA, Kern DE et al. Curriculum Development for Medical Education: A Six-Step Approach. 3rd ed. The Johns Hopkins University Press). Throughout this course, students will delve into essential theoretical literature specific to healthcare education, equipping participants with a solid foundation. They will learn to pinpoint educational challenges through needs assessment and distinguish between learning goals and objectives. Furthermore, students will master the art of crafting effective learning objectives using Bloom's Taxonomy and selecting fitting evaluation designs. Participants will learn educational strategies that will allow them to achieve their curriculum objectives. Finally, students will gain practical strategies for collecting and leveraging educational data to continuously enhance pedagogy, ensuring their healthcare education practices are informed, effective, and patient centered.
Outcomes:
Develop familiarity with essential theoretical literature of Kern's Six-Step Approach to Medical Education curriculum development; Identify curricular problems; Formulate a needs assessment; Recall the fundamental differences between learning goals and objectives; Illustrate how to create learning objectives for courses and educational sessions utilizing Bloom's Taxonomy; Select an appropriate evaluation design based on the identified objectives; Evaluate the effectiveness and impact of various educational technologies on learning outcomes and instructional design; Develop strategies to gather, review, and utilize educational data to improve pedagogy

HPE 404 Statistical Methods for Educational Research (4 Credit Hours)
This course offers a foundational understanding of statistical analysis within the context of research in clinical and health professions education. Through a blend of theoretical knowledge and hands-on practice, students will become proficient in defining core statistical concepts, applying statistical methods to diverse data types, and recognizing statistical analysis as a versatile toolkit for uncovering insights in data. Additionally, they will explore how statistical thinking enhances problem-solving skills in health professions education research and gain an understanding of the purpose and proper application of statistical techniques. Practical skills include conducting statistical tests, interpreting their outcomes, and translating results into meaningful conclusions. By the course's conclusion, students will be well-prepared to engage in evidence-based research, make informed decisions, and contribute to advancements in both clinical practice and medical education.
Outcomes:
Define basic statistical concepts; Analyze statistics from clinical and educational data; Classify statistical analysis as a collection of techniques that are intended to uncover information in data; Discuss how statistical methodology is used to aid thinking in health professions education research; Describe proper use of the statistical techniques that are presented in this course; Compute statistical tests of research hypotheses using methods presented in this course; Interpret the meaning of tests of hypotheses and other statistical computations

HPE 405 Strategies in Assessment, Implementation, and Evaluation in HPE (4 Credit Hours)
This course is designed to equip students with the advanced skills and knowledge required to navigate the evolving landscape of healthcare education. This program offers a dynamic blend of theory and practice. Dive deep into the art and science of designing effective assessment strategies, implementing innovative educational techniques, and rigorously evaluating the outcomes in health professions education. Through critical analysis and synthesis, students will gain the skills to create holistic, evidence-based educational approaches.
Outcomes:
Apply advanced theoretical knowledge to real-world scenarios within the evolving landscape of healthcare education; Employ a blend of theory and practice to effectively address complex challenges and opportunities; Analyze the art and science of effective assessment strategies, innovative educational techniques, outcomes evaluations in health professions education; Demonstrate an understanding of various assessment and testing methods; Appraise educational practices, leveraging advanced skills and knowledge to lead positive change and innovation in healthcare education

HPE 406 Leadership in Health Professions Education (3 Credit Hours)
This course is designed to provide students with an understanding of the various theories that underpin leadership education and practice within the context of health professions education. As an active participant in this class, students will explore the presented leadership theories to shape their approach as an educator but also examine how these theories inform their interactions and engagement with the world within and beyond the healthcare and education domains. Participants will gain insights into how leadership principles can be applied to address the unique challenges and opportunities faced by health professions educators, helping them become a more effective leader and educator in the healthcare field, ultimately contributing to the advancement of healthcare education and practice.
Outcomes:
Review the fundamental concepts of leadership and the theories in the context of health professions education; Analyze ideas, arguments, and viewpoints related to leadership theories within healthcare and educational settings; Assess the effectiveness of different leadership styles, change agent qualities, and approaches in various organizational contexts, especially in the context of driving change; Articulate how one's personal developmental perspective influences both philosophical beliefs and practical applications in healthcare leadership and education

HPE 407 Administrative Skills and Organizational Change (3 Credit Hours)
This course has a clear focus on two main aspects: understanding how organizations undergo transformations and equipping individuals to drive change within an organization. It covers several key areas, including the driving forces behind change, the process of implementing change, the qualities, and skills necessary for effective change agents, and the behavioral theory explaining how both individuals and organizations evolve. A comprehensive grasp of the various theoretical frameworks shaping the organization and structure of higher education is integral to achieving proficiency in these areas. The goal of this course is to provide students with valuable insights into the major functions and structures within higher education. In essence, it's not focused on teaching administrative or faculty tasks but rather on helping participants understand the context within which they operate within higher education. This course introduces students to important concepts, theories, and fiscal practices in higher education. Moreover, it offers opportunities for students to analyze, test, and receive feedback on their financial decision making and its impact on critical higher education issues.
Outcomes:
Explain the significance of theoretical frameworks in shaping the structure of higher education and organizational dynamics; Apply knowledge of organizational change forces; Analyze real-world scenarios of organizational transformation; Examine the various factors contributing to the success or failure of change initiatives within organizations; Demonstrate competence in financial decision-making processes by making informed decisions that address critical higher education issues; Develop innovative approaches for implementing change within an organization

HPE 408 Health Professions Education Capstone Project (3 Credit Hours)
In this course students craft a research proposal primed for submission to the Institutional Review Board (IRB). Guided by seasoned educators and researchers, participants skillfully construct essential components of a robust research proposal that fills a current gap in the literature. Proposals will include an introduction, background, significance, thorough literature review, research methods, budget, and thoughtful implications and conclusions. By course end, students will not only have a well prepared research proposal but also the knowledge and confidence to undertake impactful research in the dynamic landscape of health professions education.
Outcomes:
Demonstrate a grasp of health professions education research principles; Construct an effectively structured research proposal that includes a well-defined introduction, background/significance, and literature review; Develop the research methods, implications, and conclusion sections of a health professions educational research proposal; Generate a coherent, complete, well-structured, and insightful proposal ready for IRB submission

Hebrew (HEBR)

HEBR 499 Directed Study (3 Credit Hours)
Pre-requisites: Graduate Status; Department Consent required
Independent/directed study of Modern Hebrew, spoken and written.
Outcomes:
Phonetics, grammar, syntax, vocabulary of Modern Hebrew will be learned

History (HIST)

HIST 400 Contemporary Approaches to History (3 Credit Hours)
The course focuses on twentieth-century historical writing, emphasizing changing interpretive paradigms and innovative methodologies, and will introduce students to the range of topics and influences that now shape the discipline.
Outcomes:
Students will demonstrate their ability to analyze historical interpretations, while honing their skills in writing and oral presentation

HIST 403 Professional Lives of Historians (3 Credit Hours)
This course explores pedagogical, professional, and ethical issues of importance to historians. We will examine the many identities of historians and the relationship between training in history and career pathways. Students will explore the history of the historical profession, approaches to teaching history, ethical issues in history as well as the diverse pathways available to those with training in history. Each student will complete a pedagogical activity, a career exploration report, and a professionalizing project. Required of all first year PhD students. Open to all other students as an elective.
Outcomes:
Recognize the application of historical training in many arenas; Understand the ethical challenges facing historians

HIST 410 Topics (3 Credit Hours)
Topics vary as this course allows for the offering of specialized topics designed to enhance the graduate curriculum. Students will be demonstrate knowledge of the key features of the topic, analyze and debate the various historical themes concerning it, and complete a historiographical or research paper related to the theme of the class.

HIST 441 Women's & Gender History: Europe (3 Credit Hours)
This course provides an introduction to the major themes and scholarship in women's and gender history. It examines a variety of debates about and methodological approaches to the historical construction of gender, ranging from histories of the body and sexuality to analyses of culture, politics, and the economy. It explores how gender identities were produced and contested at specific historical moments and in different locations.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST441/WOST441/WSGS441

HIST 442 Women's & Gender History: U.S.A. (3 Credit Hours)
The course explores the literature on women and gender in US history with attention to theoretical issues, a broad chronological scope, and cultural diversity. Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history while honing their skills in writing and oral presentation.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST442/WOST442/WSGS442
Outcomes:
Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history, while honing their skills in writing and oral presentation

HIST 450 Nineteenth Century America (3 Credit Hours)
This course focuses on major historiographical questions reflecting the diversity of inquiry in the field of nineteenth century U.S. history. Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century. Students learn to critique recent historical literature through discussion and reflective essays.
Outcomes:
Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century; Students learn to critique recent historical literature through discussion and reflective essays

HIST 459 Environmental History (3 Credit Hours)
Environmental history expands the customary framework of historical inquiry, incorporating such actors as animals, diseases, and climate alongside more familiar human institutions and creations. This course will expose students to the major concepts, tools, and sources in the field. It will equip students to describe major changes in approaches to environmental history. It will prepare students to write, teach, and develop research projects on environmental history.
Outcomes:
1) Exposure to the major concepts, tools, & sources in the field; 2) Ability to describe major changes in approaches to environmental history

HIST 460 Urban America (3 Credit Hours)
This course examines the evolution of the United States from a rural and small-town society to an urban and suburban nation. Cities, and especially Chicago, have long offered some of the best laboratories for the study of American history, social structure, economic development and cultural change. This colloquium will provide a historiographical introduction to the major questions and issues in the culture and social life of American cities.

HIST 461 Twentieth Century America (3 Credit Hours)
Reading and discussion seminar. Students will read monographs and articles in 20th century U.S. history, including social, cultural, intellectual, and other approaches. The final assignment will be a long historiographic paper.

HIST 464 Transnational Urban History (3 Credit Hours)
This class exposes students to the history of cities across a broad spectrum of time and place. The level of analysis is both more global and more local than traditional narratives of the nation state. This course explores the recurring challenges and possibilities of urban life and urban governance across cultures and time. An emphasis on reading and writing will help students develop the skills of critical analysis. Restricted to Graduate Students.
Outcomes:
Appreciation for the recurring challenges and possibilities of urban life and urban governance across cultures and time; An emphasis on reading and writing will help students develop the skills of critical analysis

HIST 479 Public History Media (3 Credit Hours)
An introduction to the field of digital humanities and public media. Through a series of assignments and in-class labs centered around common Digital Humanities tools and platforms, the class will explore current and historical conversations in digital humanities and new media and address theoretical and practical problems involved in digital humanities-based methods and methodology. The final product of each assignment will be a collaborative digital public humanities project.
Outcomes:
Possess an introductory technical knowledge of digital tools or methods; Ability to apply technical knowledge about digital history tools to historical questions; Familiarity with managing and creating a team-based digital humanities project

HIST 480 Public History: Method & Theory (3 Credit Hours)
This course explores the field of public history with special emphasis on the theoretical and methodological challenges faced when preserving or presenting history outside of a formal classroom environment. Also under consideration will be the professional and ethical responsibilities of the historian both inside and outside of the university setting. Students will be able to understand the theoretical and methodological issues of importance to the field of public history, reflect upon ethical issues involved in the collection, curation, and presentation of history, and participate in applied projects drawing upon public history methodologies and presentation modes.

HIST 481 Management of Historic Resources (3 Credit Hours)
This class is an introduction to historic preservation. The class will review the way public historians work to protect the material culture of the built environment on a local, state, and national level. The class will consist of lectures on aspects of historic preservation, the discussion of weekly readings, and the execution of a preservation project. The project will be to prepare a National Register of Historic Places nomination on a single property or historic district.
Outcomes:
Understand the types of practice that characterizes the field of historic preservation; Understand current emerging issues in historic preservation from an ethical perspective; Experience carrying out the role of the public historian in historic preservation, ability to identify and explain the cultural value of what should be preserved

HIST 482 Archives and Record Management (3 Credit Hours)
This course introduces basic archival theory and methodology. Particular emphasis will be placed on ethics, best practices, and the relationship of archives to allied fields.
Outcomes:
Communicate what archives are and the basic tenants of the profession to a lay audience; Apply archival terminology and concepts to real world scenarios; Identify opportunities in the archival field that are appropriate for their career goals and level of experience; Apply the basics of collection care principles to any given collection at an institution; Understand the components of arrangement and description

HIST 483 Oral History: Method and Practice (3 Credit Hours)
This course will give students a basic understanding of oral history by asking several questions of the discipline, including: What exactly is oral history and what sets it apart from other historical research methodologies? What are the ethical issues involved in undertaking oral history? How does one conduct, record, and archive an interview? What steps are necessary in constructing an oral history project? What are the merits of the various products that can be derived from oral history in both texts and multimedia? In addition to reading oral historical texts and theory, students will conduct at least two interviews and participate in an ongoing oral history project. Students will learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition.
Outcomes:
Ability to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition

HIST 484 Material Culture (3 Credit Hours)
This class is restricted to Graduate students. This course is an introduction to approaches to the study of American material culture in its many forms, including decorative arts and mass-produced consumer objects; urban form, vernacular architecture, commemorative landscapes; the body and dress; foodways; and the material culture of childhood. The course will consider the ways scholars use material culture to "do" history, with an emphasis on artifacts as evidence.
Outcomes:
1) Students will understand the theory and practice of material culture study; 2) Students will gain experience in artifactural analysis; 3) Students will research and interpret material culture

HIST 487 Public History: Museums (3 Credit Hours)
This course introduces graduate students to issues involved in the management of history museums while considering many questions about the role and function of museums in American society. What does it mean to say that museums serve the public? How can museums become more diverse, equitable, accessible, and inclusive institutions? How do museums tell stories and who gets to decide what stories to tell? How and why do museums collect, care for, and display some objects and not others? Why do people visit museums, what do they experience there, and what do those visits mean to them? What does "success" look like and how does one measure it? What financial, administrative, and ethical issues do museums face? How can museums critically address today's complex political, cultural, and social realities?
Outcomes:
Possess introductory knowledge of the issues involved in the management and operation of history museums; Understand the historic and current role and function of museums in American society; Familiarity with various aspects of museum practice through hands-on activities and project-based coursework

HIST 496 Race, Violence & Memory (3 Credit Hours)
Pre-requisites: Graduate Student status
In the last generation, historians, literary scholars, and other humanists have intensified the study of historical memory and commemoration, even as public demonstrations, debates, and legislation over historical markers and monuments have proliferated. This course examines the ways that Americans have remembered, forgotten, and argued over violent episodes that have played important roles in their history. We will examine three aspects of historical memory: how individuals, institutions, and movements created and silenced historical memories; how these memories were embodied in the commemorative landscape; and how memories and public landscapes have changed over time.
Outcomes:
The course¿s primary goals are provide students with an understanding of these changing historical memories and the tools to incorporate them into the their future professional lives

HIST 498 Dissertation Research (3 Credit Hours)
Students register for this course once they begin work on their dissertation and have not yet completed the sixty hours required for the PhD degree. If necessary, this course can be taken up to three times.

HIST 499 Directed Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest. There is a form that must be completed and submitted prior to course registration. There are limits on how many of these can be taken over the course of a student's career: MA (2 times) and PhD (3 times).

HIST 510 Research Seminar - Special Topics (3 Credit Hours)
Research seminar using primary sources in cultural, social, technological, intellectual, and institutional history. Topics vary according to the interest of the instructor. Students will learn how to local and analyze archival material to develop an original article-length research paper. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 555 US Social & Intellectual History (3 Credit Hours)
Research seminar that focuses on different topics relating to the social and intellectual history of the United States. Students learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 558 Studies in American Cultural History (3 Credit Hours)
Research seminar focused on primary sources in American cultural history. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 561 Seminar-Gender & Women's History (3 Credit Hours)
This seminar focuses on the use of gender as a category of analysis in history and is particularly appropriate for those who have taken courses in Women's and Gender History or Women's Studies. Students will produce a research paper; they may choose any topic relevant to issues of gender or women for any time period or society, as long as adequate primary sources are available.

HIST 581 Practicum in Public History (3 Credit Hours)
Pre-requisites: HIST 480
Practicums provide students with specific exposure to an aspect of the practice of public history. Practicums are undertaken either under the direct supervision of Loyola faculty or the joint supervision of a Loyola faculty member and a cooperating off-campus supervisor.
Outcomes:
Strengthen skills used in the classroom, including teamwork and reflective practice in praxis situations; Gain experience in communication, collaboration, and intellectual self-confidence; Possess the opportunity to produce a public history work product; Broaden the public history toolkit

HIST 582 Public History Internship (1-3 Credit Hours)
The internship will provide an extended practical experience in the field of public history. Internships are tailored to fit the needs of the individual student and the needs of the off-campus agency involved. As part of their program, all public history students must undertake an internship either doing public history in the private sector or with a public agency. The internship is available during any semester and its timing is related to an individual student's progress in the program. This is a variable credit course. Students in the MA Public History program take a 1-hour internship (50 hours minimum). Students in the PhD program, the MA Program or the dual MAPH/MILS Program take a 3-hour internship (150 hours).
Outcomes:
Enhanced skills learned via program coursework, including teamwork and reflective practice, in praxis situations; Ability to synthesize out-of-classroom and in-classroom learning through practice; Ability to synthesize out-of-classroom learning through reflection; Possess the opportunity to produce a work product appropriate to their particular internship

HIST 584 U.S. Local History (3 Credit Hours)
Research Seminar that explores the nature and practice of local history and explores various methods and approaches central to local history research. This course will introduce students to the literature on local history, acquaint them with the methodology critical to local history research, and have them conduct original research on a local history topic.
Outcomes:
This course has three objectives: 1. to introduce students to the literature on local history; 2. to acquaint students with the methodology critical to local history research, 3. to conduct original research on a local history topic

HIST 585 Career Diversity Internship (3 Credit Hours)
An elective course that allows PhD and MA students explore a career pathway and have the opportunity to see how the skills gained in History can be applied to diverse career settings. Students will gain an exposure to a non-academic career, develop new skills, and gain experience is communication, collaboration, and intellectual self-confidence.
Outcomes:
Exposure to a non-academic career; development of new skills; gain experience in communication, collaboration, & intellectual self-confidence

HIST 598 Dissertation Proposal Seminar (3 Credit Hours)
Students work closely with an advisor to prepare their dissertation proposal.

HIST 599 Directed Primary Research (3 Credit Hours)
Students work under the direction of an advisor on a specific research project and produce a Master's Essay in lieu of the seminar requirement. There is a form that must be completed and submitted prior to course registration.

HIST 600 Dissertation Supervision (1 Credit Hour)
Students take this course once they complete all requirements for the PhD except the dissertation. The purpose of this course is to maintain active enrollment in the Graduate School during the fall and spring semesters. No credit hours are associated with this course and students receive a grade of CR.

HIST 605 Master's Study (1 Credit Hour)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

HIST 610 Doctoral Study (1 Credit Hour)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

Infectious Disease & Immunology (IDIM)

IDIM 400 Infections and Immunology (3 Credit Hours)
IDIM 400 integrates basic knowledge of infectious microorganisms with an understanding of innate and adaptive immune systems that react against them. Following a review of infections caused by specific infectious organisms, IDIM 400 will focus on specific aspects of immune systems and how they interact to remove these infectious microorganisms.
Outcomes:
1) Explain the cellular basis of immune development; 2) Differentiate between the mechanisms of activation of immune systems; 3) Analyze the mechanisms involved in combating bacterial and viral infections

IDIM 401 Conceptual Bases of Infectious Diseases (2 Credit Hours)
IDIM 401 integrates a basic science understanding of microorganisms with an understanding of their role in human health. Following a review of bacterial physiology and gene expression, the focus will be on bacterial disease, including basic strategies used to cause disease and details of pathogenesis by medically important bacterial pathogens.
Outcomes:
1) Describe differences between bacteria and eukaryotes; 2) Understand mechanisms by which bacteria cause disease; 3) Understand limitations of current antimicrobial therapies; 4) Differentiate between similar diseases with different causes

IDIM 403 Parasitology and Virology (2 Credit Hours)
Pre-requisites: IDIM 400
The Parasitology and Virology course IDIM 403 is designed to describe infections caused by microorganisms and animal diseases transmissible to man, with a primary focus on parasites and viruses. We will emphasize the pathophysiology of these diseases in humans of various ages. This course will promote an understanding of how the properties of certain infectious agents can in some cases avoid an adequate immune response.
Outcomes:
1) Explain the mechanisms of pathogenicity of various infectious agents; 2) Analyze the mechanisms by which emerging viruses arise; 3) Apply knowledge to viral vaccine development

IDIM 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

IDIM 492 Research (1-8 Credit Hours)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. IDIM 492 is designed to give credit for the research efforts that will result in the Master's thesis.

IDIM 501 Seminar (1 Credit Hour)
IDIM 501 is designed to help students stay abreast of current topics in infectious disease and immunology. Students will attend weekly seminars and are encouraged to interact with invited seminar speakers by asking questions and contributing to group discussions. Upon completion students will have enhanced their understanding of current research.
Outcomes:
1) Describe the results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar; 3) Question new data or their interpretation

IDIM 502 Special Topics in Infectious Disease and Immunology (0-5 Credit Hours)
IDIM is designed to immerse students in current literature, with new topics chosen each year. Students will read the primary literature and participate in discussion sessions. The course will enhance the ability of the student to critically read and interpret scientific literature in infectious disease and immunology.
Outcomes:
1) Critically read and discuss scientific literature in the area covered by the course; 2) Discuss experimental approaches, their limitations, and the conclusions that can be drawn from observed results

IDIM 595 Thesis Supervision (1 Credit Hour)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. This course is similar to IDIM 492, except that students are expected to perform at an advanced level in all aspects.
Outcomes:
Understand the significance and clearly communicate the research problem; Describe the approaches used and results obtained; Draw conclusions and identify future directions

Integrative Cell Biology (ICB)

ICB 401 Gross Anatomy (6 Credit Hours)
The student develops a knowledge and understanding of the basic concepts and facts of human gross anatomy as it relates to function and clinical problems. Lectures, clinical case-based and problem-based learning, computer-aided instructional materials, and cadaver dissection serve as guides to laboratory study.

ICB 403 Graduate Histology (3 Credit Hours)
The course is designed to provide the student with a basic knowledge and understanding of the structure and function of the human body at the light and electron microscopic level. The interdependence between structure and function in the different tissues and organs of the body is emphasized. Clinical and research application of the course material are also stressed.

ICB 411 Advanced Gross Anatomy (2 Credit Hours)
The study of the gross structure of the human body at an advanced level presented at conference sessions. Registrants for this course may include graduate students, advanced medical students, as well as those who hold the M.D. degree and are concurrently registered for advanced work in one of the clinical departments.

ICB 445 Scientific Literature: Review & Critique (0-1 Credit Hours)
Students are taught critical evaluation of scientific literature, hypothesis testing, and presentations. This course involves attendance at scientific presentations by students and outside speakers and a journal club component. Both staff and students participate and the class is only offered during the fall semester. This course alternates with ICB 446 - Review and Seminar.
Outcomes:
Be competent with public speaking and broaden scientific knowledge; Learn to understand and evaluate the scientific contribution of the paper

ICB 446 Review Seminar (0-1 Credit Hours)
The student participates in a series of seminars and journal clubs that provide a forum for intensive review of scientific topics. Research progress reports of the students is incorporated into this course as a part of the scientific presentation. This course alternates with ICB 445 - Scientific Literature: Review & Critique and is only offered during the spring semester.
Outcomes:
Gained exposure to research scientists from outside Loyola University Chicago; Obtained opportunities to network with established scientists

ICB 459 Research (1-8 Credit Hours)
Independent research for thesis or dissertation under the supervision of an appointed faculty adviser. Credit various upon assigned effort and time spent in the laboratory. Requires a written report.

ICB 462 Teaching of Anatomy I (0-2 Credit Hours)
A practical experience in the teaching of Gross Anatomy to graduate and medical students. Students assist in the planning, preparation, and teaching of laboratory sessions. The course allows students to place the experience of teaching gross anatomy on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 463 Teaching Anatomy II (0-2 Credit Hours)
A practical experience in the teaching of histology to graduate and medical students. Students assist in the planning, preparation and teaching of laboratory sessions. The course allows students to place the experience of teaching histology on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 501 Special Topics in Anatomy (1-2 Credit Hours)
Occasionally specific faculty members may offer a specialized seminar course. The purpose of such courses is to further graduate student's knowledge in a specialized current scientific research area. The graduate students explore in detail one or more areas of special interest through seminars, conferences, library and laboratory work.

ICB 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

ICB 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Interdisciplinary Studies (INDS)

INDS 400X TBA-Foreign Stdy (0.5-15 Credit Hours)
Temporary indicator course for the duration of the study abroad program.

International Affairs (INTA)

INTA 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems. Restricted to Graduate School students.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

INTA 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics. Restricted to Graduate School students.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

INTA 470 Fieldwork in PLSC-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

INTA 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science. Restricted to Graduate School students.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

Latin (LATN)

LATN 415 The Latin Fathers (3 Credit Hours)
This course examines the writings of the early church fathers such as Ambrose, Jerome, and Augustine, looking through them to the historical and intellectual background of Western patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the texts, their authors, and their times; They should engage critically with current scholarship of the field

LATN 418 St Augustine (3 Credit Hours)
This course focuses on selected works of Augustine, set against the backdrop of Roman society and Mediterranean Christianity in the later Roman period.
Outcomes:
Students should demonstrate knowledge in detail about Augustine, his world, and his works; They should engage with current scholarship addressing Augustine's religious, intellectual, literary, social, and historical contexts and influences

LATN 431 Caesar (3 Credit Hours)
This course focuses on Julius Caesar's Commentaries on his Gallic War and the Civil War against Pompey the Great. It examines the texts within multiple frameworks in order to understand the political, military, intellectual, and historical contexts of Caesar's writing.
Outcomes:
Students should demonstrate detailed understanding of Caesar, his texts, and contexts; Additionally, students should engage critically with scholarship relating to Caesar and his place in the world

LATN 432 Livy (3 Credit Hours)
This course focuses on Livy's Ab Urbe Condita and the historical, intellectual, literary, and cultural contexts of this work. It considers Livy's place in Rome's historiographical tradition and the relationship of his work to the emerging imperial government.
Outcomes:
Students should demonstrate detailed understanding of Livy and his historical and cultural context; Additionally, students should engage critically with scholarship on Livy and his work

LATN 435 The Annals of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 436 The Histories of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 438 Suetonius (3 Credit Hours)
This course focuses on Suetonius's Lives and the historical, intellectual, literary, and cultural contexts of his writing. It examines the genre of biography in the ancient historiographical tradition and explores Suetonius's depiction of the Roman Emperors as both biographical and literary creations.
Outcomes:
Students should demonstrate detailed understanding of Suetonius and his historical and cultural context; They should engage critically with current scholarship on Suetonius, his project, and his milieu

LATN 441 The Aeneid of Virgil (3 Credit Hours)
This course centers on Vergil's Aeneid. It examines the poem's place in the tradition of Latin epic poetry with attention to Vergil's literary technique. It explores the poem's participation in and resistance to the Augustan imperial political program. It will touch on the enduring influence of the poem.
Outcomes:
Students should demonstrate detailed understanding of Vergil and the Aeneid; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 442 Earlier Works of Virgil (3 Credit Hours)
This course centers on Vergil's Eclogues and/or Georgics. It examines the genre(s) of bucolic and/or didactic poetry, focusing on Vergil's developing technique, especially his commitment to Alexandrian and Neoteric principles. It will explore how these poems respond to the uncertainty of the political moment and emergence of Imperial rule.
Outcomes:
Students should demonstrate detailed understanding of Vergil and his early poems; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 443 Catullus (3 Credit Hours)
This course centers on Catullus, the literary genres and traditions in which he worked, and the particular moment of late-Republican neoteric poetry. It considers Catullus' importance as an innovator in Latin poetry, his place in the social fabric of aristocratic Roman culture and how his poetry reflects that culture.
Outcomes:
Students should demonstrate detailed understanding of Catullus' works, literary technique, and world; They should engage critically with scholarship relating to Catullus' historical, social, literary, and intellectual contexts

LATN 444 Roman Elegy (3 Credit Hours)
This course focuses on Latin elegiac poetry through selections from Catullus, Tibullus, Propertius, and/or Ovid. The course explores elegy as a peculiarly Roman literary tradition linked closely to the Late Republic and Early Empire. It examines the recurrent themes and techniques of Latin Elegy.
Outcomes:
Students should demonstrate detailed understanding of Latin elegy; They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre

LATN 445 Ovid (3 Credit Hours)
This course centers on the poetry of Ovid, the genres in which he wrote, and the cultural, social, and historical contexts in which he worked. It explores Ovid's role as both a continuator and innovator within the Roman literary tradition and how his poetry responds to his socio-political moment.
Outcomes:
Students should demonstrate detailed understanding of Ovid and his work; They should engage critically with scholarship concerned with Ovid's social, cultural, and literary contexts and influences

LATN 446 The Odes of Horace (3 Credit Hours)
This course centers on the Odes of Horace, their relationship with traditions of lyric poetry and Roman Alexandrianism, and the cultural, social, and historical contexts to which Horace responded. The course examines Horace's poetic technique and his engagement with the emerging Augustan imperial regime.
Outcomes:
Students should demonstrate detailed understanding of Horace's Odes and their place in Roman poetry; They should engage critically with scholarship addressing Horace's work and various contexts

LATN 451 Roman Comedy (3 Credit Hours)
This course focuses on Roman comedy, including selected plays of Plautus and/or Terence. It examines the place of these works in the traditions of New Comedy more generally, exploring how they are produced in Latin as theater in the context of Roman Republican society.
Outcomes:
Students should demonstrate detailed understanding of the authors, the comedies, and their traditions; They should engage critically with scholarship addressing the plays multiple contexts and influences

LATN 455 Tragedies of Seneca (3 Credit Hours)
This course focuses on selected tragedies of Seneca. It examines these works in light of the traditions of ancient tragic drama and Latin literature more generally. It also explores the connection of these plays to Seneca's Stoic philosophy and the imperial regimes of Claudius and Nero.
Outcomes:
Students should demonstrate detailed understanding of Seneca's tragedies; They should engage critically with scholarship addressing Seneca's literary, philosophical, cultural, and historical contexts and influences

LATN 461 Lucretius (3 Credit Hours)
This course centers on the De Rerum Natura of Lucretius. It examines Lucretius' literary technique and his place in the Roman tradition of hexametric poetry. It also explores Lucretius as a major exponent of Epicurean philosophy and the scientific world view of that philosophical tradition.
Outcomes:
Students should demonstrate detailed understanding of Lucretius' work and its significance; They should engage critically with scholarship addressing Lucretius' literary, philosophical, cultural, and historical contexts and influences

LATN 462 Philosophy of Cicero (3 Credit Hours)
This course focuses on the philosophical works of Cicero and the Roman reception of Greek philosophical thought. It explores Cicero's role as a conduit into the Roman world for Greek ideas, including his contribution to the establishment of a philosophical vocabulary, and the enduring influence of his work.
Outcomes:
Students should demonstrate detailed understanding of individual works and Cicero's greater project; They should engage critically with scholarship addressing the various contexts and influences of Cicero's treatises

LATN 488 Readings in Latin Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 489 Readings in Latin Literature II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving Latin language or literature written in Latin, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATN 546 Seminar in Roman Satire (3 Credit Hours)
This course investigates Roman verse satire and its traditions through selections from Horace, Persius, and/or Juvenal, considered in their social, historical, and literary contexts. The Romans claimed satire as the one truly Roman genre: this course will explore the key themes and techniques animating the genre and its tradition. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.
Outcomes:
Students should demonstrate detailed understating about Roman Satire

Mathematical Sciences (MATH)

MATH 401 Introduction to Graduate Study in Mathematics (1 Credit Hour)
Pre-requisites: Graduate Student status
This is a professional development seminar for the beginning graduate student. Through short lectures, faculty panels, career panels, regular reading and writing assignments, and assorted workshops, it provides the student with the tools they need to succeed in the program, and beyond.
Outcomes:
Students will: gain practice reading, writing, listening to, and summarizing advanced mathematics; learn the pedagogical, ethical, and DEI matters associated with careers in the mathematical sciences; gain practice giving lectures, writing problem-sets, and grading mathematics; explore possible career trajectories

MATH 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

MATH 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

MATH 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

MATH 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: Some background in programing, linear algebra and differential equations
An introduction to numerical techniques for solving mathematical problems where exact solutions are impractical or computationally intensive. Topics include numerical errors, root finding, interpolation and approximation, methods for solving systems of linear equations, high order numerical differentiation and integration, eigenvalue problems, numerical solutions to ordinary and partial differential equations, and other selected topics.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will obtain an understanding of theoretical concepts and rigorous analytical skills for the use of numerical methods to analyze and solve complex mathematical and real-world problems

MATH 413 Algebra I (3 Credit Hours)
Pre-requisites: Graduate standing
This course covers basic algebraic structures, focused mainly on groups. Topics include normal subgroups, isomorphism theorems, and actions on sets. Additional topics chosen from the theory of groups or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about groups and their actions, preparing them for further advanced work in mathematics

MATH 414 Algebra II (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 413 or permission from the Graduate Program Director
This course covers basic algebraic structures, focused mainly on rings, fields and Galois theory. Additional topics chosen from the theory of rings fields or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about rings and fields, preparing them for further advanced work in mathematics

MATH 415 Topics in Linear Algebra (3 Credit Hours)
Pre-requisites: Graduate standing
An abstract approach to the study of finite- and infinite-dimensional vector spaces and their transformations. Selected topics may include similarity, duality, canonical forms, singular value decomposition, inner products, discrete Fourier transform, bilinear forms, Hermitian and unitary spaces.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about finite- and infinite-dimensional vector spaces and their transformations, preparing them for further advanced work in mathematics

MATH 416 Survey of Algebra (3 Credit Hours)
Pre-requisites: Graduate Student status
A survey course in three parts. I: the theorems of Burnside, Sylow, and Jordan-Holder, toward the classification of finite simple groups. II: (noncommutative) rings and modules over PIDs, including applications to classification problems. III: additional topic chosen by instructor, e.g., category theory, homological algebra, division rings, and representation theory.
Outcomes:
Students will demonstrate facility with standard proof techniques in abstract algebra, and the ability to work with algebraic structures (including actions, morphisms, and quotients; concretely and abstractly); Students will recognize the common theme of classification uniting the course topics

MATH 418 Combinatorial Mathematics (3 Credit Hours)
An introduction to the basic methods of counting and generation, including: induction, pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, and inclusion-exclusion principle. Topics drawn from partitions, graph theory, graph coloring, and combinatorial design, Polya's theory, Ramsey's theorem, and optimization problems.
Course equivalencies: X-COMP418/MATH418

MATH 420 Topics in Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 351 or permission of the instructor
This course will be a mathematical study of the concepts of truth and proof and how they relate to each other. The main topics to be covered are propositional logic, first order predicate logic, computability and undecidability results.
Outcomes:
Students will develop proof writing skills, expand mathematical literacy, understand the expressive power and limitations of propositional and predicate logics and learn the mathematical meaning of "truth" and "proof"

MATH 422 Advanced Topics in Number Theory (3 Credit Hours)
Pre-requisites: MATH 201 or the equivalent or permission of the instructor
Topics chosen from: Pythagorean triples, Fermat's Last Theorem, Pell's equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others.
Outcomes:
Understand the importance of historically significant concepts and problems in number theory; Understand the proofs of related theorems; Solve problems and prove theorems from topics covered in class

MATH 428 Algebraic Coding Theory (3 Credit Hours)
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, quadratic residue codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-COMP428/MATH428

MATH 431 Cryptography (3 Credit Hours)
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Additional topics may include more modern cryptosystems, such as those based on elliptic curve and lattices.
Course equivalencies: X-COMP431/MATH431

MATH 443 Intro to Algebraic Topology (3 Credit Hours)
In the study of topology, algebraic constructions (called "invariants") are used to help determine whether two differently presented topological spaces are indeed different. In this course, we introduce various topics related to this endeavor, including homotopy equivalence of topological spaces, group presentations, homomorphisms of spaces and of groups, covering spaces, the fundamental group, and homology theories. Time permitting, the cohomology ring of a space will also be introduced.

MATH 444 Topics in Geometry (1-3 Credit Hours)
An axiomatic approach to the study of geometry. While Euclidean geometry will be the main focus, elliptic and hyperbolic geometries will also be studied in detail. Additional non-Euclidean geometries (including projective, metric, and finite) and additional approaches (such as transformations and synthetic treatments) will also make an appearance.

MATH 445 Financial Math Derivatives (3 Credit Hours)
A first course in the mathematics of derivatives pricing. Topics include options markets, Black-Scholes pricing formulas, stochastic calculus, hedging schemes, binomial option pricing, exotic options, and more general derivatives.

MATH 451 Analysis I (3 Credit Hours)
Pre-requisites: Graduate Standing
A rigorous review of the topology of, and of the functions on, the real line and more general metric spaces. Topics include sequences, including sequences of functions, completeness, compactness, continuity, uniform continuity, and differentiation.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 452 Analysis II (3 Credit Hours)
Pre-requisites: MATH 451 or MATH 351 or permission from the Graduate Program Director
A continuation of MATH 451. A rigorous treatment of Riemann and elements of Lebesgue integration, series, including series of functions, and select topics in continuity and differentiation of multivariable functions, fixed point, implicit and inverse function theorems.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 453 Complex Analysis (3 Credit Hours)
Pre-requisites: MATH 351 or MATH 451 or permission from the Graduate Program Director
A rigorous introduction to the algebra and geometry of complex numbers, topology of the complex plane, and the theory of functions of a complex variable, including: analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, conformal mapping, analytic continuation, transfer theory, etc.
Outcomes:
Students will master the mathematical rigor behind undergraduate complex analysis, gain exposure to advanced topics in complex analysis, and obtain preparation for further graduate courses in analysis and its applications

MATH 454 Survey of Analysis (3 Credit Hours)
Pre-requisites: Graduate Student status
An introduction to advanced topics in analysis, including measure theory, functional analysis and partial differentials equations. Measurable sets; the Lebesgue integral in Rn; Lp and other function spaces; weak convergence; Lax-Milgram Theorem; and the calculus of variations. These topics are then applied to the study of linear PDEs. Students will be able to apply these concepts to study PDEs.
Outcomes:
Students will understand the central elements of Lebesgue integration (from measurable sets to the fundamental theorem of calculus for Lebesgue integrals) and of Lp spaces (including Minkowski and Hölder inequalities)

MATH 456 Mathematical Modeling (3 Credit Hours)
Pre-requisites: Graduate standing
This course will involve students using various areas of mathematics, such as vector calculus, linear algebra, and differential equations, to formulate and analyze mathematical models in, for example, mechanics, physics, biology, economics, etc.
Outcomes:
Students will gain experience using the tools from previous mathematics classes to formulate models of real world phenomena

MATH 458 Optimization (3 Credit Hours)
Pre-requisites: MATH 351 or permission from the Graduate Program Director
The course is a rigorous treatment of linear, nonlinear, and integer optimization, and may include optimization on graphs, stochastic optimization, etc. Modeling of real-life problems as optimization problems, mathematical analysis of resulting optimization problems, including proving existence of solutions, optimality conditions, convergence of algorithms, and computational approaches to solving the problems will be covered.
Course equivalencies: X-MATH458/STAT458/428
Outcomes:
Students will learn how to recognize optimization problems, model real-life challenges as optimization problems, solve the problems using computational methods, and perform rigorous mathematical analysis of the problems and prove convergence of the computational methods

MATH 460 Game Theory (3 Credit Hours)
Pre-requisites: Graduate standing
The theory and applications of noncooperative and cooperative games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.
Outcomes:
Students will obtain an understanding of the fundamentals of mathematical game theory, including the theoretical underpinnings of this theory, and will be able to apply this knowledge in a variety of settings

MATH 465 Introduction to Partial Differential Equations (3 Credit Hours)
This course is an introduction to the subject of partial differential equations. Focus will be on studying linear partial differential equations, such as the wave equation, that appear ubiquitously in nature. To solve these equations we will use techniques such as separation of variables and Fourier series. We will also discuss different boundary conditions, and their physical interpretation.

MATH 466 Dynamical Systems (3 Credit Hours)
Pre-requisites: Graduate standing
Modeling, rigorous analysis, and prediction of short-term and asymptotic behavior of dynamical systems is studied. Continuous-time and discrete-time dynamical systems are considered, and modeled by usually nonlinear differential and difference equations, respectively. Motivation comes from biological, chemical, mechanical, and engineering systems.
Outcomes:
Students will be able to model dynamical systems, perform rigorous mathematical analysis of them, and predict their behavior

MATH 475 Functional Analysis (3 Credit Hours)
Metric, normed, Banach, Hilbert, and sequence spaces. Linear operators and Fourier analysis. Hahn-Banach extension principle, Baire category, and uniform boundedness. Selected applications to economics, physics, engineering, and quantum theory.

MATH 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
No course description is available
Course equivalencies: X-COMP476/MATH476

MATH 486 General Topology (3 Credit Hours)
Pre-requisites: Graduate standing
This course builds on the basics of point-set topology and discusses topological spaces, continuity, connectedness and path-connectedness, compactness, product spaces, quotient spaces, metric spaces, countability and separation axioms. Further topics may include category theory and basic homotopy theory.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about general topological spaces, preparing them for further advanced work in mathematics

MATH 488 Special Topics in Mathematics (1-4 Credit Hours)
Selected topics in mathematics not covered in the department's regular course offerings. May be repeated for credit.

MATH 495 Graduate Practicum in Mathematics (2 Credit Hours)
Pre-requisites: MATH 401 and (MATH 414 or MATH 452 or MATH 416 or MATH 454); Graduate Student status
A project-based course. Under faculty consultation, students will design and independently carry out a research project devoted to the development, pedagogy, or application of mathematics. To earn credit for this course, the student will deliver both an oral presentation and technical paper at the level expected in the professional workplace.
Outcomes:
Students will have: analyzed professional literature from multiple sources, resulting in a motivating question for the project; gained practice communicating clearly, concisely, and in-step with discipline norms; and contributed to the learning, teaching, or application of mathematics through their findings

MATH 498 Independent Study (1-6 Credit Hours)
This is a directed study course undertaken by advanced students and supervised by a member of the graduate faculty.

MATH 595 Thesis Supervision (1-6 Credit Hours)
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.

MATH 605 Master's Study (1 Credit Hour)
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the final practicum.

Microbiology and Immunology (MIIM)

MIIM 411 Basic Molecular Microbiology (2-3 Credit Hours)
This course is an introduction to fundamental concepts in microbiology
Outcomes:
Students will be able to demonstrate an understanding of the morphology, growth, division, development, molecular biology, genetics and physiology of microorganisms

MIIM 413 Basic Concepts of Immunology (3 Credit Hours)
This course is an introduction to the concepts of host immunity and defense.
Outcomes:
Students will be able to understand the fundamental principles of immunobiology, immunochemistry and immunogenetics, host immunity and defense, and the basic concepts of normal host defense versus the untoward responses (hypersensitivity) and their consequences

MIIM 414 Virology (3 Credit Hours)
This is a survey course that examines animal viruses and their interactions with host cells.
Course equivalencies: X-MBIO414/MIIM414
Outcomes:
Students will be able to demonstrate an understanding of viral structure and multiplication, and molecular interactions of important animal viruses with their host cells

MIIM 415 Medical Immunology (2 Credit Hours)
Pre-requisites: General Biology and/or Cell Biology Course is open to all Integrated Program in Biomedical Sciences PhD and MS students, graduate Nursing students, medical students, and advanced undergraduate students
The medical immunology course provides an in depth description of the components of the innate and adaptive immune system and how they interact to protect humans against infectious microorganisms. The course will have two 3 hour sessions per week for 8 weeks as well as 2 written exams.
Outcomes:
Be able to describe the development and mechanism(s) of activation of the innate and adaptive immune systems, their regulation and outcomes of their inability to do so

MIIM 420 Methods & Techniques in Microbiology Research (1 Credit Hour)
This course is an introduction to the theory of techniques used for research in microbiology and immunology.
Outcomes:
Students will be able to demonstrate competency with various research techniques including spectrophotometry, centrifugation, chromatography, photography, as well as other methods necessary for the study of microbiology, immunology or virology

MIIM 431 The Molecular Biology of Viruses (3 Credit Hours)
Pre-requisites: Include undergraduate or graduate-level courses in cell biology and biochemistry, graduate course 402 Microbes and Hosts, and / or prior approval from the course director(s)
The course will cover molecular biology and biochemistry of virus infections. Current understanding of virus-cell entry, replication, and assembly will be prominent themes. Course will include lectures on viral evolution, ecology, pathogenesis and viral immunology. The interactive course will include lectures, review of current virology literature, and student-led presentations.
Course equivalencies: MBIO431/MIIM431
Outcomes:
Detailed understanding of virology; be able to integrate concepts in this field with chemistry and health science; comprehend and appreciate current literature; be prepared for lab studies

MIIM 441 Immunology-Immunochemistry (3 Credit Hours)
This is an advanced immunology course that emphasizes structural concepts in immunology. Review and discussion of current literature exemplifies concepts presented in lecture.
Outcomes:
Students will demonstrate an understanding of the chemical definition of antigens, immunogens, structural concepts in immunology, immunoglobulin structure, structure of antigens and their interactions, and recognition of antigen by T-cells and B-cells

MIIM 442 Cell & Molecular Immunology (3 Credit Hours)
This is an advanced immunology course that examines the cellular and molecular basis of the immune response.
Outcomes:
Students will be able to demonstrate an understanding of the cellular and molecular basis of the immune response, as well as the cellular cooperation essential to the nature of immunology

MIIM 443 Molecular B-Cell Immunology (4 Credit Hours)
This is an advanced molecular immunology course with emphasis on proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system. Course includes critical evaluation of recent literature.
Outcomes:
Students will demonstrate an understanding of proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system

MIIM 461 Microbiological Cytology & Ultrastructure (3 Credit Hours)
This is an advanced course that presents the principles and application of light and electron microscopes for the study of cell structure and function.
Outcomes:
Students will demonstrate an understanding of the principles of light and electron microscopes and their use as tools in cellular and molecular biology

MIIM 471 Molecular Microbial Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

MIIM 490 Molecular Biology of Oncogenesis (2 Credit Hours)
This course is an advanced course that provides a detailed analysis of molecular events that result in the tumorigenic transformation of eukaryotic cells.
Outcomes:
Students will demonstrate an understanding of oncogenesis by DNA and RNA tumor viruses, the role of oncogenesis and their relationship to normal genes, hormonal effects, and chromosomal abnormalities

MIIM 492 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.
Outcomes:
Students will learn how to perform laboratory work, including how to appropriately control their experiments, how to interpret results, and what conclusions they may draw

MIIM 501 Seminar (0 Credit Hours)
This course provides opportunities for students to hear about cutting-edge research being conducted nationally and internationally.
Outcomes:
Students will be able to demonstrate a general awareness of current research in the area of microbiology, immunology and virology

MIIM 502 Special Topics (1-4 Credit Hours)
This course is covers a specific topic in microbiology, immunology or virology.
Outcomes:
Students will be able to able to articulate a general understanding of the selected topic

MIIM 503 Current Literature (0-1 Credit Hours)
This course is a paper-driven course in which papers of current interest are read and discussed.
Outcomes:
Students will demonstrate an ability to identify, critically analyze and articulate key concepts of scientific papers

MIIM 595 Thesis Supervision (1 Credit Hour)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor.
Outcomes:
Students will contribute to the existing body of scientific knowledge and/or methodology in their thesis area; They will defend their results to their committee members

MIIM 600 Dissertation Supervision (1 Credit Hour)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor.
Outcomes:
Students will add new knowledge to the existing body of scientific knowledge in their dissertation area; They will defend their results in a public forum

Neuroscience (NRSC)

NRSC 410 Cellular & Molecular Neurobiology (3 Credit Hours)
This course will review current knowledge of the morphological, biophysical and biochemical properties of neurons. Fundamental neuronal network processes such as stimulus transduction, neuronal plasticity, information processing, and learning and memory will be reviewed.
Outcomes:
An advanced knowledge of the biophysical and biochemical properties of nerve cells and fundamental aspects of more global central nervous system function

NRSC 415 Neurochemistry (3 Credit Hours)
This course is a team-taught neurochemistry course that integrates basic biochemical mechanisms of neurotransmitter synthesis, storage, reuptake, and inactivation with applied correlates to central and peripheral nervous system neurodegenerative disorders. Organic chemistry and neurobiology/neurophysiology are required prerequisite courses. Emphasis is placed on student participation including a student-held lecture series covering a contemporary neurochemical topic of their choosing.
Interdisciplinary Option: Neuroscience

NRSC 421 Neuroscience Teaching (1 Credit Hour)
This course consists in serving as a Teaching Assistant in the medical Neuroscience course labs and proctoring the medical neuroscience course exams. It also includes a weekly pre-lab meeting in which the material for that week's lab is discussed.
Outcomes:
Experience in teaching neuroanatomy for Neuroscience Graduate Program students

NRSC 422 Behavioral Neuroscience (2 Credit Hours)
This course discusses the brain's role in sensory perception, higher perceptual functions, attention, learning and memory, executive function, and emotion. It consists of weekly lectures given by the professor or by one or two students.
Outcomes:
An understanding of higher brain function and experience giving presentations

NRSC 423 Special Topics in Neuroscience (3 Credit Hours)
Restricted to Graduate level students. This course explores a wide spectrum of neuroscience-related topics, and the subject matter will vary with each offering.
Outcomes:
Measures include exam performance, in-class participation, and student presentation

NRSC 499 Research (1-9 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

NRSC 502 Neuroscience Journal Club (0-1 Credit Hours)
Pre-requisites: Must be member of the Neuroscience Graduate Program
One hour weekly course during which all students in the Neuroscience Graduate Program meet to discuss and critically evaluate recent, high impact journal articles covering varied neuroscience topics under the direction of two faculty mentors with neuroscience expertise.
Outcomes:
Students will advance their knowledge of new neuroscience concepts and methods; Students will gain experience in presenting in front of a group; Students will gain confidence in their abilities to critically evaluate experimental design and statistical methods

NRSC 503 Neuroscience Seminar (0-1 Credit Hours)
In both the fall and spring this course includes monthly Neuroscience seminar presentations by internal and external speakers. In the fall, the course also includes weekly journal club presentations by the graduate students: in the spring the course also includes weekly research progress reports by the graduate students.
Outcomes:
A broad overview of current topics in the field and experience giving research presentations

NRSC 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

NRSC 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Pharmacology (PHAR)

PHAR 405 Pharmacology Journal Club (0-1 Credit Hours)
This course involves students in reading and presenting the scientific literature in journal club format with the goals of learning to, i) evaluate the pharmacological literature and voice a critique in a constructive manner, ii) present such literature in a peer-context, and iii) assimilate information presented by other speakers and formulate, ask, and discuss around relevant appropriate questions.

PHAR 406 Special Problems in Pharmacology (1-4 Credit Hours)
This course covers a specific topic in pharmacological or biomedical sciences. The topics can vary among different special topics courses.

PHAR 407 Fundamentals of Drug Discovery and Development (3 Credit Hours)
This course introduces the process of drug discovery, and students will explore the theoretical and practical aspects of the entire process from concept to clinical trials. Topics include selection, design and use of disease models, current methods and strategies of drug target identification, lead molecule identification, the clinical trial process and pre- and post-market safety.
Outcomes:
Upon completion of this course, the students will have sufficient understanding of the drug discovery process to: 1) Discuss the methods and strategies used to identify potential drug targets; 2) Describe approaches used to screen for lead molecules; 3) Articulate the general FDA regulatory requirements encountered in bringing a new drug to market; 4) Identify requirements for pre-clinical assessment of potential compounds; 5) Define and describe the steps of the clinical trials process; and 6) Articulate and discuss ethical aspects in drug development, including, but not limited to, animal use, clinical trials, intellectual property and research design and integrity

PHAR 408 Molecular Basis of Disease and Therapeutics (3 Credit Hours)
The course focus is on understanding contemporary research in the pathophysiology of major human diseases and in the development of respective therapeutic treatment strategies. Emphasis will be on cutting edge studies in molecular medicine, including topics in cardiology, endocrinology, oncology, inflammatory diseases and in the neurosciences. There are no prerequisites, but students should have a solid understanding of cell and molecular biology, biochemistry and systems physiology.
Outcomes:
Understand contemporary research strategies applicable to investigating the molecular basis of disease and therapeutics and develop critical thinking and writing skills in hypothesis testing, experimental design and data analyses

PHAR 409 Principles of Pharmacology (3 Credit Hours)
This course introduces students to the fundamental principles of pharmacology and the clinical use of the major classes of drugs currently used with a focus upon fundamental concepts. Topics include drugs and their receptors, molecular aspects of drug targets and drug action, pharmacodynamics and the quantitative aspects of drug-receptor interactions, pharmacokinetic properties of drugs influencing drug distribution and drug dosing, drug metabolism and the effects of genetics on drug action, mechanisms of drug toxicity, and scientific approaches to the discovery of new drugs. Finally, the pharmacology and clinical uses of the major classes of drugs, including drugs used to treat diseases of various systems including cardiovascular, central nervous system, endocrine/reproductive systems, and cancer are covered.

PHAR 410 Signal Transduction (3 Credit Hours)
This course is open to all Ph.D., M.D./Ph.D., and M.S. students. Students will gain a theoretical and practical understanding of how extracellular signals are transduced through receptors into metabolic events. It is designed for second year PhD students who have completed the Biomedical Sciences core curriculum. The format is one lecture followed by one research paper discussion for each topic. Students will also gain in-depth knowledge of the signal transduction topics covered in the course.
Outcomes:
Students will be able to interpret data and design experiments examining signal transduction pathways

PHAR 415 Current Topics in Pharmacology and Epidemiology of Disease (2 Credit Hours)
This advanced graduate level course will cover an up-to-date overview of topics directly relevant to pharmacovigilance, pharmacoepidemiology, and the factors that play a role in success or failure of approved therapeutic agents.
Outcomes:
Students who complete this course will gain knowledge of major epidemiology concepts and statistical principles used in epidemiology and pharmacovigilance

PHAR 420 Pharmacovigilance: A Practical Approach (4 Credit Hours)
This advanced graduate level course will provide an up-to-date and in-depth understanding of pharmacovigilance in the context of modern pharmaceutical drug development and pharmacology. Pharmacovigilance is the pharmacological science relating to the detection, collection, assessment, monitoring, and prevention of adverse effects associated with pharmaceutical products. Enrollment Condition: Drug Discovery (PHAR 407), recommended but not required Students will be able to identify and describe the regulatory environment and product safety as it pertains to the collection, assessment, reporting and analysis of adverse events.
Outcomes:
Upon completion of this course, students will demonstrate an understanding of pharmacovigilance and patient safety

PHAR 453 The Teaching of Pharmacology (0-1 Credit Hours)
This course teaches the practice and pedagogy of graduate level teaching. Students work under supervision to prepare and present a didactic lecture which is reviewed by faculty and students.

PHAR 499 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.
Outcomes:
Generate, analyze, and interpret original research data using appropriate analytical and statistical approaches; Apply appropriate experimental methodologies to investigate the hypotheses in your proposal, including, if appropriate, therapeutic discovery/development, molecular mechanisms of disease and drug action, toxicology, and drug safety/pharmacovigilance; Integrate findings from experimental studies with current scientific literature to advance understanding of pharmacological mechanisms; Demonstrate independence, professionalism, and ethical conduct in the planning, execution, and reporting of your research

PHAR 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Develop and write a research thesis proposal addressing a significant question in molecular pharmacology; Generate, analyze, and interpret original research data using appropriate analytical and statistical approaches; Integrate findings from experimental studies with current scientific literature to advance understanding of pharmacological mechanisms; Demonstrate independence, professionalism, and ethical conduct in the planning, execution, and reporting of your research

PHAR 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Develop and write a research dissertation proposal addressing a significant question in molecular pharmacology; Apply appropriate experimental methodologies to investigate the hypotheses in your proposal, including, if appropriate, therapeutic discovery/development, molecular mechanisms of disease and drug action, toxicology, and drug safety/pharmacovigilance; Generate, analyze, and interpret original research data using appropriate analytical and statistical approaches; Integrate findings from experimental studies with current scientific literature to advance understanding of pharmacological mechanisms; Demonstrate independence, professionalism, and ethical conduct in the planning, execution, and reporting of your research

Philosophy (PHIL)

PHIL 400 Philosophy Research Tools (3 Credit Hours)
This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Plato
Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)
Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)
Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)
Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)
Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)
Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)
Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 417 Classical German Philosophy (3 Credit Hours)
Pre-requisites: Graduate student status
Classical German Philosophy begins with Kant and his immediate predecessors, and extends to the early mid-19th century, including figures such as Herder, Fichte, Schelling, Goethe, Schiller , and Hegel, Feurebach, and Marc, among others. This course may include critiques of developments out of classical German philosophy. Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical Philosophy. Students will also become competent in engaging basic research in the philosophy of this era.
Outcomes:
Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical philosophy

PHIL 419 Aesthetics (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in aesthetics.
Outcomes:
Students will become conversant with the major projects and schools of thought in the field of aesthetics; Students will also gain knowledge of contemporary scholarship and develop basic research skills in this field

PHIL 420 Hegel (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)
Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)
Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)
Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)
Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)
Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Philosophy (3 Credit Hours)
Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)
Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)
Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)
Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)
Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)
Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)
Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 453 Philosophy of Technology (3 Credit Hours)
Pre-requisites: Restricted to Graduate Philosophy students, Other graduate students may enroll with Graduate Program Director permission
Introduces students to key issues, debates, and figures in the philosophy of technology, including both metaphysical and ethical issues related to computation, artificial intelligence, and human versus machine personhood.
Outcomes:
Interpret and compare the work of major figures in the philosophy of technology; Analyze and evaluate the ethical implications of technology on human persons and society; Analyze and evaluate theories of the ontology of technology; Produce original arguments based on the text, figures, and themes engaged in the course and apply these arguments to contemporary technological issues

PHIL 454 Philosophy of Religion (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)
Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)
Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)
Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)
Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)
Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)
Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)
Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)
Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 478 Research Methods in Social Justice (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course looks at several different methodological approaches to social justice issues: broad ethical frameworks; specific ethical issues, such as intent and volition; quantitative analysis; US law; and international law.
Outcomes:
Students are expected to know how to conduct literature reviews, how to use these approaches in analyzing social justice issues, and how to write up and present their research

PHIL 479 Issues in Applied Ethics (3 Credit Hours)
Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)
Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)
This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.
Outcomes:
Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)
Introduces students to philosophical issues concerning the social sciences.

PHIL 483 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 484 Philosophical Anthropology (3 Credit Hours)
Prepares students for advanced work about philosophical conceptions of human existence.
Interdisciplinary Option: Women & Gender Studies

PHIL 485 International Ethics (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 487 Moral and Legal Issues of Economic Sanctions (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course will provide an introduction to economic sanctions in the context of foreign relations and global governance. We will look closely at the issues of effectiveness and humanitarian impact. We will also look at legal issues, such as the problem of extraterritoriality.
Outcomes:
It is expected that students will have an overview of how sanctions interact with international law, institutions of global governance, and human rights law

PHIL 490 Current Philosophical Issues (3 Credit Hours)
Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (0-3 Credit Hours)
This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of social ethics. the student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)
This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (1 Credit Hour)
This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.
Outcomes:
The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (1 Credit Hour)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (1 Credit Hour)
This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (1 Credit Hour)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (1 Credit Hour)
This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Physics (PHYS)

PHYS 495 AP Physics Workshop (3 Credit Hours)
This graduate level course offers pedagogical content knowledge training for in-service high school teachers preparing to teach AP Physics.

Physiology (PIOL)

PIOL 401 Physiology (4 Credit Hours)
This course integrates the contents of two sections of the medical school (M1) course Function of the Human Body course (PIO L301); with additional meetings to present discuss papers at graduate level (2 paper presentations per graduate student). In the Fall semester, students will review cell physiology and autonomic neuroscience, and will learn cardiovascular and renal physiology in depth. The course topics will include introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations, and renal physiology. In the Spring semester, students will learn pulmonary, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. Instructor Consent Required.
Outcomes:
Students familiar with introductory physiology are expected to learn and understand cardiovascular, reproductive and endocrine systems in an integrative fashion in this course; Emphasis will be placed on understanding key concepts of normal physiological and biochemical systems in healthy humans; Selected aspects of pathophysiological processes will be discussed to illustrate how an understanding of normal function can be applied to clinical medicine

PIOL 410 Intro to Research (1-3 Credit Hours)
This course provides an introduction to a wide variety of commonly used techniques in cell and molecular physiology research, with concomitant laboratory rotations to learn those techniques.

PIOL 412 Research (1-6 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PIOL 414 Graduate Colloquy (1-8 Credit Hours)
Special advanced topics course with variable credit. Paper discussion and instructor-led presentations.

PIOL 416 Research Seminar (1 Credit Hour)
Seminar presentation on PhD candidate's dissertation topics advance.

PIOL 417 Cellular Physiology (3 Credit Hours)
Pre-requisites: Restricted to Master of Physiology Program students
The major goal of the Cellular Physiology course is to define the molecular and cellular basis of systems Physiology and Pathophysiology. The course consists in distinct sessions of teaching, problem solving, and reviews.
Outcomes:
- Understand the relationships among molecular, cellular and systems physiology; - Understand membrane structure and function; - Understand distinct metabolic and signaling pathways

PIOL 418 Teaching of Physiology (0 Credit Hours)
Teaching training and practice opportunities for upper level PhD candidates.

PIOL 420 Methods/Technical in Physiological Research (2 Credit Hours)
This course is intended for students seeking advanced knowledge of cutting-edge experimental approaches currently used in cardiovascular, metabolic, and neuroscience research. These topics will be discussed in both a technical/methodological sense, and in the context of the current scientific literature.

PIOL 421 Function of the Human Body I (4 Credit Hours)
This course will present the basic concepts and principles of human physiology. The course topics will include: introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations and pulmonary physiology. The format will be lectures, simulations, small group problem sessions and scheduled reviews. Small group problem sessions will be held after each subject area and will focus on clinical application and integration of conceptual information presented in lectures. Small group sessions and reviews also will provide the student with the opportunity to obtain clarification from instructors of any outstanding questions and are designed to encourage active learning, as well as develop critical thinking and problem solving skills. Students will be evaluated by multiple choice and essay exams given after each of the 5 major topic areas. Course material will be geared toward non-thesis Masters students. Given that physiology is the basis of medicine, this course will prepare students with the basic science knowledge to successfully continue their professional development in future biomedical programs.
Outcomes:
Students will be able to describe the cellular mechanisms responsible for cardiac, skeletal and smooth muscle contraction and the factors that regulate their activity

PIOL 422 Function of the Human Body II (4 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course presents the basic concepts and principles of human physiology. The course will be presented over one semester and the topics include: renal, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. The format will be lectures, small group problem sessions and scheduled reviews.
Outcomes:
Students will be able to explain the cellular mechanisms responsible for normal renal, acid-base, endocrine, gastrointestinal and reproductive physiology

PIOL 423 Biochemical Physiology (3 Credit Hours)
Biochemical Physiology will give students knowledge of foundational processes that dictate cellular physiologic processes. Topics include the structure and properties of nucleic acids, amino acids, protein structure and folding, enzyme kinetics, metabolic pathways and intracellular signal transduction. The course will present the biochemical physiology.
Outcomes:
Student completing this course should: - Understand the biochemical mechanisms which underlie physiological processes; - Understand protein structure dynamics and how these structures are dictated by second

PIOL 425 Physiology of Aging (3 Credit Hours)
Pre-requisites: BMSC 410, BMSC 412, BMSC 416
The focus of this special topics course is on the unique physiological changes that occur with aging. Didactic instruction will be supplemented with readings from current primary literature in the field. Students will be responsible for reading and presenting articles for group discussion.
Outcomes:
1) Acquire advanced knowledge of aging processes; 2) Identify key gaps in knowledge in the aging field; 3) Engage in transformational/critical discussion of seminal papers in the aging field

PIOL 426 Biophysical Research Methods (3 Credit Hours)
Pre-requisites: IPBS Core curriculum The focus of this special topics course is to introduce students to the field of biophysics, with special focus on practical applications of biophysical methods in research Didactic instruction will be supplemented with readings from current primary literature in the field. Students will be responsible for reading and presenting articles for group discussion.
Outcomes:
Demonstrate a general understanding of the field of biophysics; Demonstrate deep knowledge and understanding of fundamental aspects cell mechanics, muscle mechanics, and integrated biomechanics; Demonstrate knowledge of current biophysical methods used in research; Demonstrate knowledge of fluorescence spectroscopy; Demonstrate knowledge of microscopy; Demonstrate understanding of computational biology approaches; Critically evaluate biophysical data from the literature; Interpret biophysical data for a general audience and effectively communicate biophysical information in both oral and written forms; Incorporate high standards of ethics into data interpretation and presentation

PIOL 430 Basic Human Anatomy (2 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course will provide students with the basic concepts and facts of human gross anatomy as they related to physiology and function. Specific sections include the musculo-skeletal components of the extremities, trunk and head, the peripheral nervous system to include both the somatic and autonomic systems, the cardiovascular system, respiratory system, digestive system, urinary system and reproductive system. Each system will integrate embryology, radiology and basic clinical applications.
Outcomes:
Students will be able to describe and integrate basic human anatomy of the major organ systems to physiology and clinical medicine

PIOL 446 Cardiovascular Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on cardiovascular physiology topics.

PIOL 450 Fundamentals Of Neurophysiology (4 Credit Hours)
This course imparts the basic concepts and fundamentals of Neurophysiology, with emphasis on concepts relevant to human neuroscience. Students will learn Neurophysiology fundamentals at the cellular, structural and physiological levels of various complex systems in the brain, with specific discussion of clinical correlates of Pathophysiological conditions.
Outcomes:
Students successfully completing this course will be able to understand and explain neurophysiological mechanisms relevant to normal and abnormal conditions

PIOL 461 Introduction to Human Pathophysiology (5 Credit Hours)
Restricted to students in the Masters of Science in Physiology program. This course presents the basic concepts and principles of human pathophysiology. The course will be presented over one semester and the topics include: clinical evaluation of cardiac structure and function followed by a review of the major disorders of cardiovascular function.
Outcomes:
Students will be able to critically evaluate basic pathophysiological mechanisms underlying the most common forms of adult human cardiovascular disease

PIOL 468 Neurophysiology Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on neurophysiology topics.

PIOL 470 Excitability & Ion Transport (1-4 Credit Hours)
The course focuses on basic concepts of the physical movement of ions during activation of voltage- and ligand- gated ion channels.

PIOL 472 Structure/Function Membrane Proteins (3 Credit Hours)
The course explores basic and advanced concepts of membrane proteins structure, cell biology and function.

PIOL 500 Professional Development I (3 Credit Hours)
Must be enrolled in the MSP program. Professional Development will meet once/month throughout the one-year MSP program. Students will receive information about the options available for a career in the health sciences and will enhance their professional portfolio by participating in a variety of workshops designed to better equip them for a health science career.
Outcomes:
Students will be able to understand the curriculum and admission requirements of the various professional health programs and gain an understanding of the interview process

PIOL 501 Professional Development II (1 Credit Hour)
Pre-requisites: PIOL 500
Professional Development will meet and have self-directed study time throughout the spring semester of the MSMP program. Students will receive bi-weekly, specific individualized one-on-one mentoring from their academic advisors and also meet with the course director for specific lectures on their AMCAS and AACOMAS applications for medical and DO schools. Students will continue to enhance their knowledge of the admissions process by having general lectures and individual sessions discussing their motivation, enhancing their self-awareness, writing their personal statements, their selection of appropriate medical schools, selection of activities (community and medical volunteering, health care exposure (shadowing, scribing, etc.), research for their application, overall discussions on writing their secondary statements, choice of letters of recommendation, etc. MSMP students only.
Outcomes:
Following successful completion of this course, the MSMP student will: 1) Demonstrate enhanced ability for self-awareness and analysis regarding their medical school application; 2) Demonstrate self-reflection in the selection of target medical schools, discussing their fit in terms of each medical school's mission statement; 3) Continue working with their academic advisor to prepare a well-written personal statement appropriately tailored to the professional program of choice; 4) Demonstrate understating of the application process and preparation of application forms

PIOL 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

PIOL 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

PIOL 605 Physiology Study (0 Credit Hours)
Must be enrolled during fall semester of MS program in Physiology. Holding course to keep the student active in the program while completing MS degree requirements.

Political Science (PLSC)

PLSC 400 Scope and Methods of Political Science (3 Credit Hours)
This is a broad course that lays out the main approaches to political science.

PLSC 401 Intro to Research Design & Method (3 Credit Hours)
This course is an introduction to principles of research design in political science. The main objective of this course is to familiarize students with the social scientific approach to studying politics.
Outcomes:
Students will learn how to ask empirical questions about the political world, how to develop theories and generate testable hypotheses, how to collect appropriate types of evidence, how to answer research questions scientifically using such evidence, and how to clearly convey their evidence and argument to others

PLSC 402 Seminar on Empirical Analysis (3 Credit Hours)
The course allows students to develop additional methods to empirical analysis.

PLSC 404 Selected Problems in American Politics (3 Credit Hours)
This course focuses on selected problems in the study of American politics and the American Political system.
Outcomes:
Gain an in-depth understanding of selected problems in American politics and the American Political system

PLSC 405 American Executive Branch (3 Credit Hours)
This course relies on historical and contemporary scholarly literature on the American presidency to analyze the development and scope of rhetorical and party leadership, legislative relations, the commander-in-chief and diplomatic roles as well as the growth of the institutionalized presidency.
Outcomes:
Students will master the key literature on the American presidency as well as conduct research on a particular aspect of the US presidency

PLSC 406 American Legislative Branch (3 Credit Hours)
This course focuses on the organization of and decision-making in the US legislative branch.
Outcomes:
Students will fully understand how the US Congress is structured and legislates, as well as its interactions with other US institutions and with American society

PLSC 407 Public Policy-Making & Implementation (3 Credit Hours)
This course examines the process and dynamics of US policy-making systems.
Outcomes:
Students will understand the development of the public sector agenda, the policy formation and legitimation processes, and the role of implementation functions, as these relate to substantive issues or policy arenas

PLSC 409 Organizational Theory (3 Credit Hours)
The course offers a broad approach to the various theoretical and practical approaches to the study of organizations.

PLSC 410 Urban Politics (3 Credit Hours)
This course addresses the major theories, studies and issues of urban politics.
Outcomes:
Students will understand "political machines", parties, interest groups, voting, protests, minority and ethnic groups, city councils, mayors, bureaucrats and community power structures

PLSC 411 American Political Parties/Electoral Process (3 Credit Hours)
This course analyzes the roles and functions of the party system and voting behavior in the United States.
Outcomes:
Students will understand the role of mass communication and issues in elections, the impact of party identification, and the impact of the electoral system on behavior of party and voter

PLSC 412 Constitutional Politics (3 Credit Hours)
This course examines constitutional policy-making in the United States.
Outcomes:
Students will understand the political role of the Supreme Court, judicial values in constitutional adjudication, and the impact of court decisions

PLSC 416 US Political Institutions (3 Credit Hours)
The course surveys academic literature on political institutions in the United States including the legislative, executive, and judicial branches of the federal government, state and local governments, parties, interest groups, media organizations, and civic organizations.
Outcomes:
Students will gain an in-depth understanding of a wide variety of political institutions and how they interact with one another

PLSC 417 The American Legal System (3 Credit Hours)
This course examines the structure, functions, interrelationships, dynamics, and decision-making processes of the US legal system.
Outcomes:
Students will understand the major components of the American legal system - legislatures, administrative agencies, and courts

PLSC 418 Political Psychology & Socialization (3 Credit Hours)
This course examines psychological, social and environmental influences on political attitudes and behavior.
Outcomes:
Students will understand the psychodynamics of political development and socialization as they interact with opinion formation and political participation

PLSC 419 Managing Urban Government (3 Credit Hours)
This course studies the politics of urban government management.
Outcomes:
Students will understand the environments in which the urban manager functions

PLSC 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

PLSC 421 Democratic Political Systems (3 Credit Hours)
This course examines selected democratic political systems.
Outcomes:
Students will understand how selected democratic systems operate, focusing on their similarities and differences

PLSC 422 Authoritarian Political Systems (3 Credit Hours)
This is a graduate-level seminar on authoritarian political systems. The course explores theoretical perspectives on authoritarianism, political institutions in non-democracies, and paths to democratization.
Outcomes:
Students will become familiar with concepts and theories of authoritarianism, gain knowledge about different types of authoritarian rule, and learn about how authoritarian governments work and perpetuate power

PLSC 423 Soviet & Post-Soviet Politics (3 Credit Hours)
This course analyzes the development of Soviet and post-Soviet politics since 1917.
Outcomes:
Students will understand the emergence and development of Soviet politics, as well as its decline in the mid-1980s

PLSC 424 Politics of Developing Areas (3 Credit Hours)
This course examines the politics of the "developing world."
Outcomes:
Students will understand the methods used to analyze politics in the developing and underdeveloped nation-states

PLSC 425 Sub-Saharan Africa (3 Credit Hours)
This course examines politics in Africa from the pre-colonial period to the present.
Outcomes:
Students will understand issues relating to decolonization, ethnicity, class, political economy, democratization, and regime transition in Sub-Saharan Africa

PLSC 426 Latin American Politics (3 Credit Hours)
This course examines important themes in the study of politics in Latin America.
Outcomes:
Students will understand the current scholarship and methodologies in the study of Latin American politics

PLSC 427 Politics of the Middle East (3 Credit Hours)
Enrollment Conditions: Permission of the instructor required. This course offers a historical and thematic approach to study the society and politics of the contemporary Middle East. Two central aims of the course are to cultivate critical perceptions regarding widespread images and descriptions of the region and to bolster students' historical, socioeconomic and political knowledge of the region.
Outcomes:
Students will master important political science literature on the Middle East and be well positioned to pursue original research

PLSC 428 Political Violence (3 Credit Hours)
This course offers a thematic approach to the study of political violence with a particular focus on armed conflicts involving non-state actors (i.e., civil wars). It addresses a wide variety of questions informed by the cutting-edge research in political science and other disciplines.
Outcomes:
Students will develop an understanding of the causes of different forms of violence in different parts of the world, motivations of people who participate in violence, and solutions to armed conflicts

PLSC 429 Comparative Politics Selected Problems (3 Credit Hours)
This course examines selected issues in comparative politics.
Outcomes:
Students will master the literature or conduct research in a particular area of comparative politics

PLSC 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

PLSC 431 Formulation US Foreign Policy (3 Credit Hours)
This course examines how US foreign policy is made.
Outcomes:
Students will understand the decision-making institutions and their interaction in the formulation and execution of political, military and economic foreign policy

PLSC 432 Comparative Foreign Policy Analysis (3 Credit Hours)
This course examines contemporary policy positions of major blocs of nations as well as specific nations.
Outcomes:
Students will understand how foreign policy is made in countries other than the United States, as well as the policy of blocs of nations

PLSC 433 International Organization (3 Credit Hours)
This course examines the development and role of international organizations.
Outcomes:
Students will understand the political and administrative principles and problems of various types of international organizations, including the United Nations, the World Trade Organization, the World Bank, the International Monetary Fund and other key global and regional organizations

PLSC 435 International Political Economics (3 Credit Hours)
This course examines global economic systems.
Outcomes:
Students will understand global political-economic relations in the post-WWII period, including international monetary relations, international trade, regional integration, direct investment, debt, and development assistance

PLSC 436 International Conflict (3 Credit Hours)
This course focuses on concepts and approaches related to the causes of war, conflict and peace in the international system.

PLSC 437 Selected Problems International Law (3 Credit Hours)
This course examines selected issues or problems in international law.
Outcomes:
Students will understand contemporary theories of international law and the relationships among the various traditional and contemporary areas of international law

PLSC 439 Selected Problems in International Politics (3 Credit Hours)
This course examines important themes and theories in international politics.
Outcomes:
Students will master a specific body of literature or conduct research in a particular area of international relations

PLSC 440 Ancient Political Thought (3 Credit Hours)
This course examines the major works of the most important theorists within the classical tradition.
Outcomes:
Students will master key writings of Thucydides, Plato, Aristotle, and other theorists

PLSC 442 Modern Political Thought (3 Credit Hours)
This course examines major modern political thinkers.
Outcomes:
Students will master key works of from the Italian Renaissance to the French Revolution

PLSC 444 Great Authors (3 Credit Hours)
This course focuses on the works of political theorists in the western tradition.
Outcomes:
Students will master key works of theorists in the western tradition

PLSC 446 Political Ethics (3 Credit Hours)
This course surveys classic debates on ethics - such as utilitarianism and deontological ethics - to provide students with analytical tools to answer the deceptively simple question "What is the right thing to do?" The course draws on classical readings of political philosophy, while seeking to make those abstract problems tangible by applying them to real world cases and examples.

PLSC 447 American Political Thought to Civil War (3 Credit Hours)
This course examines pre-Civil War US political thought.
Outcomes:
Students will master the works of key thinkers from the American founding to the Civil War

PLSC 449 19th Century Political Thought (3 Credit Hours)
This course examines key theorists in the nineteenth century.
Outcomes:
Student will master the works of key theorists beginning with the French Revolution and through the nineteenth century

PLSC 470 Fieldwork in Political Science-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

PLSC 476 Political Analysis II (3 Credit Hours)
This is an intermediate course in data analysis methods in political science.
Outcomes:
Students will master intermediate research and quantitative methods in political science

PLSC 499 Directed Readings (3-6 Credit Hours)
This course involves specialized study under the supervision of a faculty member.
Outcomes:
Students will master a particular segment of academic literature or conduct in-depth research on a specific topic

PLSC 502 Seminar in Political Behavior (3 Credit Hours)
This course examines selected topics in the development and shaping of political behavior.
Outcomes:
Students will master the political behavior literature and conduct research in specific areas of the discipline

PLSC 503 Seminar: Law & Political Behavior (3 Credit Hours)
This course analyzes selected topics concerning the relationship between legal processes, policies, and politics.
Outcomes:
Students will understand a particular topic in law and political behavior

PLSC 504 Seminar: American Public Policy (3 Credit Hours)
This seminar analyzes the American public policy.
Outcomes:
Students will understand the formation, implementation, and evaluation of public policies in the United States

PLSC 505 Seminar in Urban Problems (3 Credit Hours)
This course analyzes selected policies in urban and state politics.
Outcomes:
Students will understand the politics of specific urban and state policies

PLSC 506 Seminar State & Urban Policy Analysis (3 Credit Hours)
This course examines current perspectives and techniques in the analysis of state and urban policies.
Outcomes:
Students will understand contemporary policy analysis perspective and techniques as well as methods in policy analysis

PLSC 515 Seminar-Public Administration (3 Credit Hours)
This is an upper-level seminar on complex questions related to public administration.

PLSC 520 Seminar: Comparative Politics (3 Credit Hours)
This course examines an important, contemporary area of research in comparative politics.
Outcomes:
Students will master a specific body of literature and conduct research in a specific area in comparative politics

PLSC 521 Seminar Western European Politics (3 Credit Hours)
This course examines contemporary politics in Western European countries.
Outcomes:
Students will understand political and policy developments in Western Europe, as well as the structures of the European Union and the North Atlantic Treaty Organization

PLSC 531 Seminar: International Politics (3 Credit Hours)
This course examines various research topics in international politics.
Outcomes:
Students will master a particular body of work or conduct research in a specific area of international politics

PLSC 532 Soviet/Post-Soviet Foreign Policy (3 Credit Hours)
This course examines the foreign policies of the Soviet Union and the post-Soviet states.
Outcomes:
Students will understand the formulation and application Soviet and post-Soviet foreign policies

PLSC 533 U.S. National Security (3 Credit Hours)
This course examines the U.S. security establishment and the national security process.
Outcomes:
Students will understand how US security policy is made, including the defense budget, US force structure, intelligence, covert operations, and the role of Congress

PLSC 543 Liberalism (3 Credit Hours)
This course analyzes liberal political thought.
Outcomes:
Students will master key works and theorists focusing on equality, liberty, natural rights, utilitarianism, and idealistic bases of modern liberal society

PLSC 546 Political Philosophy Selected Problems (3 Credit Hours)
This course examines a selected theoretical issue in the history of political thought.
Outcomes:
Students will master the writings and theories in a particular theme of political theory

PLSC 595 Thesis Supervision (1 Credit Hour)
The is the first course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 596 Thesis Research (3 Credit Hours)
The is the second course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 597 Dissertation Research (3-6 Credit Hours)
The course is for students researching a thesis topic towards writing a dissertation prospectus.

PLSC 598 Teaching Internship (3 Credit Hours)
The course allows students to complete an internship focused on teaching.

PLSC 600 Dissertation Supervision (1 Credit Hour)
The course is for students researching a dissertation towards earning a PhD.

PLSC 605 Master's Study (1 Credit Hour)
The course is for students researching a thesis towards earning a Master's degree.

PLSC 610 Doctoral Study (1 Credit Hour)
The course is for students researching a dissertation towards earning a PhD.

Psychology (PSYC)

PSYC 401 History & Systems of Psychology (3 Credit Hours)
History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.
Outcomes:
Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology; The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure

PSYC 412 Introduction to the Profession of Clinical Psychology (3 Credit Hours)
Required course for PhD program in Clinical Psychology-an introduction to our field. This course provides an introduction to the profession of Clinical Psychology by focusing on basic research and clinical skills necessary for a career as a clinical scientist and practitioner.
Outcomes:
Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences

PSYC 420 Research Methods in Psychology (3 Credit Hours)
An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.
Outcomes:
Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports

PSYC 432 Intellectual & Personality Assessment (3 Credit Hours)
This course covers the psychometric properties, administration procedures, and applications of the most common adult psychological measures. Students will gain an understanding of psychometric theory.
Outcomes:
Students will be able to administer and become familiar with how to interpret a WAIS-III, the MMPI-2, the Sentence Completion Test, and the TAT

PSYC 435 Seminar in Cognitive Neuroscience (3 Credit Hours)
The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

PSYC 436 Psychopharmacology (3 Credit Hours)
The types and mechanisms of medications used in the treatment of mental disorder are reviewed. Emphasis is given to behavioral effects and treatment effectiveness of drugs. Psychopharmacological research design and literature are reviewed.
Outcomes:
Students will learn basics of neurotransmission and be informed about medications including antidepressants, mood stabilizers, anti-psychotics, and substance abuse

PSYC 438 Principles of Psychological Assessment Child & Adult (3 Credit Hours)
This course is designed to expose students to a variety of assessment tools and tests available for children ranging from 1 month to 18 years of age.
Outcomes:
Students will develop competence in the administration and write-up of basic intelligence, achievement, and visual motor tests for children presenting with, for example, learning disabilities, mental retardation, social/communication disorders

PSYC 440 Theory & Research in Psychology of Language (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language.

PSYC 446 Psychopathology (3 Credit Hours)
This course reviews concepts, research, and theory (historical and current) in psychopathology and emphasizes diagnosis and etiology.
Outcomes:
Students will gain an appreciation for the major issues in the area of psychopathology, the ability to think clearly and scientifically about these issues, and an understanding of major mental disorders

PSYC 451 Psychopathology of Childhood & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on adjustment problems during childhood and adolescence using an ecological-developmental perspective.
Outcomes:
By gaining insight into the factors that enhance or interfere with positive developmental processes, students learn how to apply research and theory to improve the services they will offer to children and families in their professional careers

PSYC 452 Clinical Treatment of Children & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on empirically-supported interventions for children and families.
Outcomes:
Students learn how to select and evaluate needed prevention programs and interventions for children and families to achieve therapeutic goals

PSYC 455 Developmental Psychology (3 Credit Hours)
This course provides an overview of theory and research on developmental psychology.

PSYC 460 Social Psychological Theory (3 Credit Hours)
Survey of basic concepts, theories, and research in social psychology. Contents include foundations of social psychology; broad theoretical orientations (e.g., evolutionary, behavioral, cognitive, affective, individual, societal, cultural); specific theories at the intrapersonal, interpersonal, intra-group, and inter-group levels of analysis.
Outcomes:
Knowledge and skills in theory construction and criticism; understanding relation between theory and research methods; applying theories to social problems

PSYC 461 Attitude and Attitude Change (3 Credit Hours)
Survey of attitude formation and change literature. Topics include the nature and measurement of attitudes, explicit versus implicit attitudes, effects of attitudes on cognition and behavior.
Outcomes:
Knowledge and skills that enable the integration of multiple theories to conceptualize attitudinal phenomena, critical evaluation of research, written and oral expression about attitude topics, application of attitude theories to practical problems

PSYC 462 Cognitive Social Psychology (3 Credit Hours)
In depth examination of the human cognition within its social context; including topics such as impression formation, attribution, stereotyping, prejudice, social information processing, mental control, affect and social information processing, unconscious social cognition.
Outcomes:
An understanding of basic theoretical approaches and scientific methods of hypothesis testing within social cognition; Development of skills needed to perform research within social cognition

PSYC 464 Practicum in Psychotherapy I (3 Credit Hours)
This two semester practicum course provides applied experience conducting psychotherapy at Loyola University Chicago's Wellness Center.
Outcomes:
For client populations seeking psychotherapy, practicum students will be able to develop a treatment plan, articulate treatment goals, develop a working therapeutic alliance, and execute elementary psychotherapeutic techniques

PSYC 472 Organizational Psychology (3 Credit Hours)
Covers theory, research, and methods associated with behavior in organizational settings. Learning outcomes include knowledge of theory and methods of personnel selection, performance measurement and appraisal, knowledge and skills training; theory and research on leadership, motivation, group behavior, etc.

PSYC 473 Social Development (3 Credit Hours)
This course is designed to provide an advanced level introduction and discussion of critical issues essential to the study of social development. The contribution of multiple contexts (e.g., family, peers, culture) to social development is a major focus of this class.
Outcomes:
Students will become familiar with the several theoretical accounts as well as major empirical findings in the core areas of social development

PSYC 474 Research in Group Dynamics (3 Credit Hours)
Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research.

PSYC 475 Cognitive Development (3 Credit Hours)
This course is designed to provide an advanced level introduction to critical issues in the study of cognitive development from infancy through childhood.
Outcomes:
Students will be expected to draw connections between the major theoretical accounts of cognitive development and the empirical literature in core areas of children's cognition

PSYC 477 The Self and Self-Esteem (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the self and self-esteem. Course will focus on where self knowledge comes from and how it affects human behavior.
Outcomes:
Knowledge of psychological theory and research on the self and self-esteem

PSYC 479 Cognition and Emotion (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the role that emotion plays in cognitive activity and behavior. Course will focus on how emotion affects cognition and how different emotions have different effects.
Outcomes:
Knowledge of psychological theory and research on cognition and emotion

PSYC 482 Advanced Statistics (3 Credit Hours)
Covers analysis of factorial designs and other multifactor data sets.
Outcomes:
Learning outcomes include theory and assumptions underlying analysis of variance and multiple regression; ability to use SPSS to analyze data from factorial designs and other multifactor research endeavors

PSYC 484 Prejudice and Intergroup Relations (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on intergroup relations, stereotyping and prejudice. Course will focus on the perceptions, cognitions and behaviors toward members of our own group and members of outgroups.
Outcomes:
Knowledge of psychological theory and research on intergroup relations and prejudice

PSYC 485 Psychology and Law (3 Credit Hours)
Application of social psychological theory and research to criminal behavior and the criminal justice system. Specific topics include crime causation, mass media effects, jury selection, eyewitness accuracy, and crime prevention.
Outcomes:
An understanding of core theoretical and methodological approaches to criminal justice research, development of skills needed to perform psychologically oriented criminal justice research

PSYC 486 Methods of Program Evaluation (3 Credit Hours)
Overview of program evaluation methods, politics, ethics, and applications; including topics such as quasi-experimental design, statistical analysis issues, ethical guidelines, implementation strategies, and presentation styles.
Outcomes:
An understanding of the methods, strategies, ethical issues, and implementation obstacles of evaluation research; Development of skills needed to perform high quality evaluation research in a variety of applied settings

PSYC 489 Political Cognition (3 Credit Hours)
Examination of the cognitive determinants of political judgments and decision; including topics such as political information processing, voting preference, political stereotyping, racism, ideology and public opinion, and media effects.
Outcomes:
An understanding of core theoretical approaches within political psychology, scientific methods of hypothesis testing within political psychology, and the development of skills needed to perform research within political psychology

PSYC 491 Multivariate Analysis (3 Credit Hours)
An introduction to the theory and application of multivariate statistical techniques in psychology.
Outcomes:
Students will learn the conceptual underpinnings (including matrix algebra) and will also learn to conduct analyses for the following procedures: multiple and logistic regression, MANOVA, loglinear analysis, canonical correlation, factor analysis, and cluster analysis

PSYC 493 Structural Equation Modeling (3 Credit Hours)
An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.
Outcomes:
An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses

PSYC 509 Seminar on Teaching Psychology (0 Credit Hours)
This course provides an introduction to the psychology teaching and learning.

PSYC 510 Ethics & Professional Practice (3 Credit Hours)
The ethical standards and practice of psychologists, including basic principles of ethics, application of ethics to professional practice and to research, and professional problems and practices are reviewed.
Outcomes:
Students will learn to manage complex ethical problems encountered in psychological practice, research, and education

PSYC 513 Adolescence (3 Credit Hours)
This course offers an in-depth study of adolescence from a psychological as well as cultural and historical perspective, with a focus on biological, cognitive, psychological, and social changes.
Outcomes:
Students will learn important components of psychological health and maladaptation during the adolescent developmental period and how family, peer, and school contexts affect adolescent development

PSYC 514 Research in Development Psychology (3 Credit Hours)
The goal of this course is to survey important methods, issues, research designs, and other topics specific to research in developmental psychology and cultivate students¿ scientific skills like critical thought and evaluation of research.
Outcomes:
Students will be able to demonstrate understanding of developmental methodology, design, ethical concerns, and other issues relevant to developmental science

PSYC 515 Infancy (3 Credit Hours)
The goal of this course is to survey important topics in the field of infancy, the period of development from birth through approximately 3 years.
Outcomes:
Students will demonstrate understanding of infant developmental science in particular content areas and the processes underlying change

PSYC 518 Seminar Selected Topics-Clinical Psychology (3 Credit Hours)
This course provides an overview of selected topics in clinical psychology.

PSYC 525 Seminar in Social Psychology (3 Credit Hours)
This course provides an overview of theory and research on social psychology.

PSYC 535 Internship in Applied Social Psychology (1 Credit Hour)
Students complete an applied social psychology internship during this course.

PSYC 540 Psychology of Language Development (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language development.

PSYC 545 Select Topics in Developmental Psychology (3 Credit Hours)
This course provides an overview of selected topics in developmental psychology.

PSYC 548 Risk and Opportunity in Childhood and Adolescence (3 Credit Hours)
This course provides an overview of theory and research on risk an opportunity in childhood and adolescence.

PSYC 552 Neuropsychology (3 Credit Hours)
Neuropsychology involves the interdisciplinary study of the relations between human brain function and behavior.

PSYC 553 Neuropsychological Assessment (3 Credit Hours)
This course covers the major areas of neuropsychological assessment, including major assessment techniques, interviewing, report writing, and psychometric issues.
Outcomes:
Students will learn major issues and topic areas in neuropsychological assessment (eg, attention, language, memory, visual perception, motor functioning, executive functioning, and emotional functioning)

PSYC 555 Social Psychology Research and Professional Development (0 Credit Hours)
Pre-requisites: Graduate student standing in Social Psychology
Course will involve research presentations and other forms of professional development.
Outcomes:
Course will involve research presentations and other forms of professional development

PSYC 556 Developmental Psychology Research and Professional Development (0 Credit Hours)
Pre-requisites: Restricted to graduate students in Developmental Psychology
This course will involve research presentations and other forms of professional development.
Outcomes:
Students will gain the skills and knowledge necessary to present their research to colleagues; Students will possess greater readiness for their post-graduate career

PSYC 560 Human Diversity (3 Credit Hours)
This course provides a foundation in human diversity as it relates to the practice of clinical psychology. The course will examine theoretical perspectives and research findings related to human diversity. The goal of this course is to challenge students to think critically about the influence of human diversity on their psychological practice, research, and teaching.

PSYC 568 Evidence-Based Practice in Clinical Psychology (3 Credit Hours)
Pre-requisites: PSYC 412, or approval of instructor
This course provides a theoretical and skills-based overview of evidence-based practice (EBP) in clinical psychology, and surveys the theoretical and applied aspects of various evidence-based intervention approaches in psychology, including Motivational Interviewing (MI), Interpersonal Therapy (IPT), Cognitive Behavior Therapy (CBT), and Dialectical Behavior Therapy (DBT). Students will demonstrate an understanding of current theories and methods in evidence-based psychotherapy.

PSYC 595 Thesis Supervision (1-3 Credit Hours)
Pre-requisites: Enrollment is Restricted to Psychology graduate students
Students will make supervised progress towards completion of their theses.

PSYC 596 Internship in Clinical Psychology (1 Credit Hour)
Students complete a full time APA approved clinical internship during this course.

PSYC 597 Integrative Readings in Psychology (3 Credit Hours)
Students complete integrated readings under the supervision of a faculty member.

PSYC 598 Research (3-6 Credit Hours)
Students complete research under supervision of a faculty member.

PSYC 599 Directed Readings (3-6 Credit Hours)
Students complete directed readings under the supervision of a faculty member.

PSYC 600 Dissertation Supervision (1 Credit Hour)
Students complete dissertation research under the supervision of a faculty member.
Outcomes:
Students will make progress on their dissertation research

PSYC 605 Master's Study (1 Credit Hour)
Students complete master's thesis readings and research under the supervision of a faculty member.
Outcomes:
Students will make progress on their MA thesis proposal

PSYC 610 Doctoral Study (1 Credit Hour)
Students complete dissertation readings and research under the supervision of a faculty member.

Sociology (SOCL)

SOCL 403 Sociological Perspectives I (3 Credit Hours)
Important theoretical and methodological concerns will be discussed with particular attention paid to how these concerns affect substantive areas in sociology.
Outcomes:
Students will gain familiarity with major themes that will shape their graduate education in sociology

SOCL 404 Sociological Perspectives II (3 Credit Hours)
Faculty will discuss their intellectual biographies and work that is of current interest to them.
Outcomes:
Students will gain familiarity with the range of substantive, theoretical and methodical concerns of the department's faculty

SOCL 405 History Sociological Thought (3 Credit Hours)
This course looks at the intellectual roots and expressions of the foundations of sociological theory in the 19th and early 20th century.
Outcomes:
Students will gain familiarity with the classical texts in sociological theory that established some of the basic perspectives, issues and debates that inform contemporary social theory and research

SOCL 406 Modern Sociological Theory (3 Credit Hours)
This course examines some of the dominant perspectives and trends of modern social theory.
Outcomes:
Students will develop familiarity with the primary sources that represent current trends in modern and postmodern theories

SOCL 410 Logic of Sociological Inquiry (3 Credit Hours)
This course explores the structures of sociological research, analyses, and explanations. Several major types of data collection will be examined and evaluated.
Outcomes:
Students will be able to formulate sociological problems, understand the relationship between problem formulation and data collection, measurement and analyses and develop the capacity to utilize different social scientific methods

SOCL 412 Qualitative Methods in Social Research (3 Credit Hours)
This course is an introduction to the major qualitative methods of social inquiry and the ethical issues raised by qualitative research.
Outcomes:
Students learn the skills of participant observation, interviewing, historical analysis, building theory from qualitative data, coding and content analysis

SOCL 413 Sociological Practicum (3 Credit Hours)
The class examines theoretical issues and past research relating to a particular social topic and then designs and completes a collective research project. Topics vary.
Outcomes:
Students gain facility with research design and group research practices

SOCL 414 Statistical Methods Analysis I (3 Credit Hours)
After a review of bivariate regression and cross-tabular analysis, the course provides an extended treatment of the general linear model. Topics include model construction, interpretation of results, partitioning of variance, tests of statistical significance and interactions.
Outcomes:
Students will be able to employ general linear models in original research and critically evaluate existing empirical research

SOCL 415 Statistical Methods of Analysis II (3 Credit Hours)
The course extends the applications of the general linear model to topics including path analysis, logistic regression, factor analysis and spatial and cluster analysis.
Outcomes:
Student will: understand the techniques with enough clarity to recognize when they are appropriate research tools; gain sufficient expertise to apply the techniques to moderately complex research problems; be able critically review the relevant literature

SOCL 418 Demography (3 Credit Hours)
This course examines the basic techniques used to assemble, analyze, and present demographic information. It also examines U.S. and world demographic trends and the causes and consequences of such demographic change.
Outcomes:
Students will gain an in-depth knowledge of demographic trends and an understanding of the sources, limitations, and advantages of various types of demographic data

SOCL 421 Theories Social Change (3 Credit Hours)
The course will critically appraise major theories of social change and examine different methodologies on both the macro- and micro-sociological levels.
Outcomes:
Students will gain a working knowledge of the major theoretical and methodological issues in the field

SOCL 423 Social Movements (3 Credit Hours)
This course will use case studies of contemporary social movements to examine collective efforts to promote social or cultural change. They will gain an understanding of the recursive relationship between empirical research and theory development.
Outcomes:
Students will be able to apply major theoretical perspectives on social movements to a variety of historical cases

SOCL 425 Inequality and Society (3 Credit Hours)
This is an empirical and theoretical inquiry into the causes, consequences, and dynamics of social inequality in modern societies.
Outcomes:
Student will be able to explain the distribution of economic, political, and social resources in society; the processes of class formation and the role of race and gender

SOCL 426 Sociology of Gender (3 Credit Hours)
This course surveys sociological and related scholarship on women and gender relations.
Outcomes:
Students will come to understand the social construction of gender and its centrality to studies of identity and sexuality, the division of labor, families and reproduction, violence, poverty, race, class and globalization

SOCL 427 Political Sociology (3 Credit Hours)
The course examines major theories of political action and change. Particular attention is paid to policy development.
Outcomes:
Students will develop an empirical and theoretical knowledge of the working of political systems and to be able to apply that knowledge to the development of social policy

SOCL 428 Poverty and Social Welfare (3 Credit Hours)
This course examines the development of poverty and social welfare efforts over time in the United States, with some comparisons to other industrial societies.
Outcomes:
Students will understand the character and consequences of poverty and social welfare policies in the United States, emphasizing current conditions and possibilities for the future

SOCL 431 Social Structure and Personality (3 Credit Hours)
This course examines the relationships between the individual and larger social structure and social trends.
Outcomes:
Students will gain familiarity with current research and theory concerning the relationship of self identity and personal narratives to socialization and structural factors, and the ways in which social class, work, race and nation construct age, gender and sub-cultural forms of subjectivity

SOCL 432 Socialization Thru Life Cycle (3 Credit Hours)
This course traces the nature of socialization and development of the individual through the life cycle.
Outcomes:
Students will become familiar with research and theory concerning the processes by which persons are socialized into sexual, racial, religious, occupational, marital, and parental social roles, identities and patterns of interactions at various stages of life

SOCL 435 Adult Development and Aging (3 Credit Hours)
The older adult population and adult development is examined from social and cultural perspectives.
Outcomes:
Studies will develop a knowledge of gerontological theories and research which pertain to the family, the community, political life, the economy, work and retirement, religious life, and other social institutions

SOCL 438 The Family (3 Credit Hours)
This course explores families, their changing internal structures, and their roles in contemporary societies.
Outcomes:
Students will develop an understanding of the household division of labor, mothering, the shifting character of marriage, the paid and unpaid work of care, dual career families, single parent households, racial/ethnic families, adoption, blended families, welfare policies, families in the class structure, and global issues

SOCL 439 Community Change (3 Credit Hours)
Contemporary communities are examined from a sociological perspective. Both geographic communities and communities of interest are studied.
Outcomes:
Students gain an understanding of how research can be used to facilitate social change in community settings; and an awareness of how community organizations, informal networks, and broader social forces shape the character and sustainability of particular communities

SOCL 440 Organizations & Organizational Change (3 Credit Hours)
This course examines the structures and processes that typify contemporary organizations, with particular attention to how organizations change.
Outcomes:
Students will be able to apply sociological methods to analyze organizations, and will develop an understanding of bureaucracy and alternative structures; the effect of organizational structure on administrators, workers, and clients; and how organizations are affected by their social environment

SOCL 441 Sociology of Religion (3 Credit Hours)
This course studies the relationship between religion and society, and explores central topics in the sociology of religion.
Outcomes:
Students will learn to define and explain religious organizations, beliefs, and practices as distinctly social phenomena, and understand how social processes both shape the form and content of religious life and in turn are shaped by them

SOCL 442 Religious Conflict & Change (3 Credit Hours)
This course will explore the complex reciprocal relationship between religion and historical processes of social change.
Outcomes:
Students will be able to analyze historical instances of religious conflict and change in the U.S. and other regions of the world; They will gain an understanding of how religion both affects and is affected by historical, political, and social change

SOCL 446 Knowledge, Power & Expertise (3 Credit Hours)
This course focuses on the relationship between knowledge, expertise and power in societies and how this relationship has consequences for the structure of knowledge and the organization of society.
Outcomes:
Students will be able to demonstrate a sociological understanding of the construction of knowledge and the organization of authority and expertise

SOCL 447 Sociology of Culture (3 Credit Hours)
This course will examine the relationship between social phenomena and cultural expressions, and the various ways sociologists have conceived of those relationships.
Outcomes:
Students will learn to apply sociological theories and methods to an analysis of cultural fields and understand the diversity of contemporary cultural objects and expressions, and how they are produced and used in social action

SOCL 448 Technology & Material Culture (3 Credit Hours)
This course will serve as an introduction to the sociology of things, most notably the sociology of technology, design and the built environment.
Outcomes:
Students will develop an understanding of both cultural, constructivist and political-economic approaches to the construction of technology and artifacts, and of a variety of theoretical approaches to the study of their impact and audience-response

SOCL 452 Complex Organizations (3 Credit Hours)
Formal organizations treated comparatively and systematically as major components of modern social organization are featured.
Outcomes:
Students will develop an understanding of leading theoretical traditions, historical and cross-national variation, organization-environment relations, and selected internal processes in the field of complex organizations

SOCL 453 Occupations and Professions (3 Credit Hours)
This course focuses on the structure of paid work in modern society, and its relationship to unpaid work and to self-employment. Special attention is given to the role of skills and knowledge in the structuring of work.
Outcomes:
Students will develop an understanding of how both macro and micro factors structure work; from capitalism, industrialism, gender, race and globalization to workplace interaction and culture

SOCL 461 Race & Ethnicity (3 Credit Hours)
This course explores the construction, meaning, uses and consequences of racial and ethnic identity in American society over time.
Outcomes:
Students will understand the role of migration and immigration on the construction of identity; analyze prejudice, discrimination, and inter-group conflict; and explore how social movements have and are changing these group relationships

SOCL 462 The Urban Metropolis (3 Credit Hours)
This course examines urbanization and its consequences through social theory and empirical studies emphasizing the modern European and American experience.
Outcomes:
Students will understand ecological and political economy perspectives on metropolitan development; changing regional patterns of population, housing, and employment; and urban governance, planning, and policies for the future

SOCL 463 Sociology & Natural Environment (3 Credit Hours)
This course examines the relationship between social life and the natural environment.
Outcomes:
Students will be able to demonstrate a sociological understanding of the relationship of humans to the natural environment and draw connections between basic ecological understandings of nature and the human impact on the natural world

SOCL 471 Sociology of Deviance & Control (3 Credit Hours)
This course is a socio-historical look at definitions of forms of deviant behavior and the identification of individuals as deviant.
Outcomes:
The student will learn how history and philosophy shape the definitions of deviant behavior and the methods used to control it; They will develop a sociological imagination to perceive the meaning of deviance beyond the superficialities of today's headlines

SOCL 473 Criminology (3 Credit Hours)
This course examines modern and traditional theories of criminology and their implications for social control, with emphasis on current work in criminology theory, social planning, and evaluation research.
Outcomes:
The student will acquire knowledge of the relationship between the various explanations of crime patterns and how these theories work to reduce or fail to reduce the level of criminal behavior

SOCL 481 Medical Sociology (3 Credit Hours)
This course will examine critical factors affecting mortality and morbidity; mental health; health services; community health; cross-cultural differences; aging and the strategy and conduct of socio-medical research.
Outcomes:
The student will be able to critically analyze the social components of illness and of health and to integrate theory and research in the study of health care institutions globally

SOCL 482 Education in Society (3 Credit Hours)
This course focuses on the social processes that affect both the means and ends of education. It has three units: Schools as Organizations; Inequality in Education; and Education and Cultural Reproduction. Open to all Graduate students.
Outcomes:
Improved understanding of the social processes and outcomes of education

SOCL 483 Teaching Sociology (3 Credit Hours)
Pre-requisites: Completion of at least one semester of graduate coursework
Students will learn to identify good teaching practices, to practice relevant skills, and to begin a lifelong process of professional development. They will develop materials for an undergraduate course.
Outcomes:
Students will create a portfolio of materials for an undergraduate course that reflect "best practices" in education

SOCL 490 Workshop: Applied Sociology (1 Credit Hour)
This focuses on special issues for methods used by applied sociologists, and topics vary from semester to semester. Most workshops involve presentations by faculty or applied sociologists from outside the university.
Outcomes:
Students will develop expertise in, for example: survey research, evaluation research, use of population data in policy making, focus groups, and developing community leadership

SOCL 491 Sociological Discourse (3 Credit Hours)
The course examines the nature of sociological argumentation in existing scholarly and popular literature and in the students' own writing.
Outcomes:
Students will be able to formulate and present sociological arguments in both oral and written forms, and to demonstrate their understanding of the relationship between problem formulation, data collection and measurement and analysis in their own and others' work

SOCL 494 Internship (3 Credit Hours)
Placements are typically in non-academic settings, e.g., government agencies, community organizations, businesses, or labor organizations. Students are expected to work a minimum of 100 hours and write an internship report.
Outcomes:
Students will develop skills in applying sociological methods and theoretical perspectives to the understanding and ameliorating of social issues in real world settings

SOCL 497 Independent Research (3 Credit Hours)
Students registered for independent study will meet as a workshop, under the guidance of a faculty member, at least three times per semester. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 498 Independent Research (1-3 Credit Hours)
Work on an individual research project under the supervision of a faculty member. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 499 Directed Study (3 Credit Hours)
Develop a reading list and paper under the supervision of a faculty member.

SOCL 500 Seminar-Applied Sociology & Social Policy (3 Credit Hours)
This course examines the use of sociology in determining and selecting alternative social policies.
Outcomes:
Students will develop knowledge about the roles that applied sociologists play in society; the relationship between sociologists and clients or organizations; the social research process and how it affects the research product; and ethical considerations of applied sociologists

SOCL 505 Controversery Current Social Thought (3 Credit Hours)
This is a seminar in which students and faculty will examine in detail particular controversies that are emerging in theoretical approaches to sociology. Topics will vary.
Outcomes:
Students will develop advanced skills in theoretical discourse

SOCL 510 Research Special Areas (3 Credit Hours)
Advanced methodology seminar in special topics.
Outcomes:
Students will develop advanced skills in the special area

SOCL 520 Topics in Contemporary Society (3 Credit Hours)
Various topics in the study of modern society
Outcomes:
Students will develop advanced skills in the particular area

SOCL 525 Seminar in Comparative Studies (3 Credit Hours)
The seminar will expose participants to comparative approaches in defining issues, topics or institutions, researched by comparative sociologists and cultural anthropologists. Specific topics for consideration will vary.
Outcomes:
Students will acquire knowledge of the utility of comparative approaches to cultural and social structures in developing greater definition and clarity, and a deeper understanding of a given topic

SOCL 540 Issues: Sociology of Religion (3 Credit Hours)
Focused study on a variable topic in the sociology of religion.

SOCL 560 Seminar-Issues in Communities & Urban Sociology (3 Credit Hours)
This course explores current issues in cities and in the sociological study of cities.
Outcomes:
Students will become familiar with current debates in urban sociology and apply sociological theories and analysis to contemporary issues in cities

SOCL 580 Seminar: Issues in Medical Sociology (3 Credit Hours)
This course explores a specialized topic in the sociology of health and medicine. Restricted to Graduate Students.
Outcomes:
Ability to analyze individual, social and institutional effects on health and medicine

SOCL 595 Thesis Supervision (1 Credit Hour)
Write a thesis under the supervision of a faculty member.

SOCL 600 Dissertation Supervision (1 Credit Hour)
Write a dissertation under the supervision of a faculty member.

SOCL 605 Master's Study (1 Credit Hour)
Develop a reading list and paper for an MA project under faculty supervision.

SOCL 610 Doctoral Study (1 Credit Hour)
This course can only be taken two times during a doctoral student's career.

Spanish (SPAN)

SPAN 402 Methods of Teaching Spanish (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. Students will explore theoretical, investigative, and practical issues of communicative language teaching that will help them develop communicative classroom environments that blend listening, speaking, reading, and writing.
The material in this course should encourage students to question assumptions and begin to formulate their own ideas about what goes on in their classrooms and in second language learning in general.

SPAN 403 Structure of Modern Spanish (3 Credit Hours)
An introduction to Spanish linguistics to provide a general understanding of phonology, morphology and syntax, as well as a history of Spanish grammar including variation and change.
Outcomes:
Students will understand the rules that govern sounds, word and sentence structure, and the dynamic interaction between Spanish and its neighboring languages

SPAN 405 Critical Methods (3 Credit Hours)
This course provides training in the application of contemporary critical methods with attention to the development of greater proficiency in literary analysis and written expression.
Outcomes:
Students will be able to discuss and write about knowledgeably works from the major literary genres: drama, prose fiction, essay, and poetry

SPAN 410 General Linguistics & Romance Languages (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in heritage language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. The material in this course should encourage students to question assumptions and begin to formalize their own ideas about what goes on in their classrooms and in heritage language learning in general.
Course equivalencies: X-SPAN410/CLST410/FREN410

SPAN 415 Medieval Spanish Literature (3 Credit Hours)
This course studies the development of Spanish medieval literature from the jarchas through the Celestina.
Outcomes:
Along with increasing their knowledge of Spanish history in the medieval period, students will be able to appreciate how the literature reflects the culture of the period

SPAN 416 Golden Age of Spanish Literature (3 Credit Hours)
This course is a graduate seminar whose primary focus is the literary production of the Spanish Golden Age, which dates from the second half of the sixteenth century to the end of the seventeenth. Students will analyze works of various genres - autobiography, prose, drama, poetry and the novel - by the most prominent authors of the time, including Teresa of Ávila, John of the Cross, Miguel de Cervantes, Baltasar Gracián, Francisco de Quevedo, Luis de Góngora, Félix Lope de Vega, Pedro Calderón de la Barca, Tirso de Molina and María de Zayas. We will give special attention to the historical, social and cultural context of early modern Spain, and students will gain exposure to the major critical trends and interpretation of Golden Age literature. The authors to be studied confront readers with the complex social fabric of pre-modern Spain and immerse us in the religious and economic realities of the Iberian Peninsula, the Mediterranean world and Europe. Our close reading of the texts will allow us to explore how early modern Spanish writers reflect the spiritual, intellectual and political currents of their time, especially as they shed light upon the network of institutions, practices, and beliefs that constituted Spanish culture.

SPAN 419 Romanticism in Spanish Literature (3 Credit Hours)
This course is a survey of Romanticism as a literary movement including its influence upon nineteenth-century culture.
Outcomes:
Students will be able to understand the philosophical, artistic, and esthetic tenents of Romanticism and their representation in a series of Hispanic texts from prose fiction to poetry and drama

SPAN 420 Realism & Naturalism (3 Credit Hours)
This course focuses on the various political, ideological, and intellectual trends that have shaped nineteenth-century Spanish literature and emphasizes the aesthetic and cultural influences that made the Spanish literary universe unique. It also takes up the question of the ways in which the literature of nineteenth-century Spain might be compared to that of Latin America and of the Western world generally. It will provide an overview of the key topics, writers, and literary genres of nineteenth-century Spanish literature, with particular emphasis on novels, poetry, folletines, short stories and, to a lesser extent, visual art. We will discuss the complexities of Spanish modernity using current theoretical perspectives in addition to various historical approaches, while emphasizing the way in which these texts offer multiple views of Spanish national identity and the construction of different models of the modern self.

SPAN 421 Theatre of Twentieth Century (3 Credit Hours)
The evolution of theatrical modes in 20th Century Spain. Authors: M. Mihura, Benavente, Valle Inclán, Arniches, García Lorca, Buero Vallejo, etc.
Outcomes:
Students will be able to explain how theater has dealt with contemporary experiences such as the Spanish Civil War, civil war, the polarization of society, group thinking, dictatorship, the inception of new mores and the inevitability of change

SPAN 426 Theater of The Golden Age (3 Credit Hours)
This course is a graduate seminar with a primary focus on theatrical works written in the Spanish Golden Age, which began in the mid-sixteenth century with the dramatist Lope de Rueda and ended in the late seventeenth century with the death of Calderón de la Barca. It combines the study of shorter works, entremeses, and full-length plays, or comedias, written by the most renowned playwrights of early modern Spain, including Cervantes, Lope de Vega and Tirso de Molina. Through the reading of these authors, students will explore the themes and social factors which shaped the plays of the Golden Age and will become familiar with the theatrical tradition that impacted Spanish society at all levels. Attention will also be given to the role of gender, religion, and socio-economic status in pre-modern Spanish society. We will use these texts in order to understand the historical context and the main currents of thought in early modern Spain.

SPAN 431 Poetry of The 20th Century (3 Credit Hours)
This course traces developments in Spanish poetry through a study of the works of selected poets, with special emphasis on the writers of the Generation of 1927.
Outcomes:
Students will understand the relationship between modernism and the avant garde, as well as the turn toward free verse and social poetry in the post-war period

SPAN 436 Poetry of The Golden Age (3 Credit Hours)
This course covers poetic theory and practice from Garcilaso to Góngora. It presents the classic modes as they were imitated and transformed to create a new poetic language.
Outcomes:
Students will be able to recognize the distinct styles and forms of Golden Age poetry

SPAN 437 Golden Age-Spanish Mysticism (3 Credit Hours)
This course is a survey of the most prominent authors of the Spanish Golden Age mystics - Ignatius of Loyola, Teresa of Avila, and John of the Cross, whose writings reflect the religious, spiritual, and intellectual currents of Counter-Reformation Spain. In the form of an independent study, students will examine the ascetical, mystical, and Illuminist trends of the sixteenth and seventeenth centuries, as well as the most important themes these writers developed in early modern Iberia: conversion and authority, vice and virtue, penance and pilgrimage, devotion and humor. These themes will be explored in the majors works (primary sources) of these authors, which will be complemented by secondary source readings and each student's independent research. The writers studied in this course and their texts will also be viewed in the context of the greater literary and artistic production of the Spanish Golden Age.

SPAN 441 Prose of The 20th Century (3 Credit Hours)
This course studies the development of Spanish prose from the Generation of 1898/ Modernism through Post-modernism, with emphasis on the novel, short story, and essay.
Outcomes:
Students will better appreciate and understand the complex literature of modern Spain

SPAN 446 Prose of The Golden Age (3 Credit Hours)
The course studies representative selections from the pastoral and the picaresque novel, the short novel, and didactic works of the period (Gracián and Quevedo).
Outcomes:
Students will understand how these authors expressed colliding sensibilities, and incorporated traditional themes-love, knowledge, deception, violence-through parody and satire

SPAN 447 Don Quijote (3 Credit Hours)
This course is a graduate seminar and its primary focus is the literary masterpiece of Miguel de Cervantes, El ingenioso hidalgo don Quijote de la Mancha (1605, 1615). Students will analyze the work that has come to be known as the first modern novel of Europe, and, through a close reading of the text, study the novel in relation to the literary traditions of the Renaissance: novella, the pastoral romance, the romance of chivalry, the humanist dialogue, the picaresque novel, including poetry and the comedia. We will give special attention to the historical, social and cultural context of Cervantes' world, and students will gain exposure to the major critical trends and interpretations surrounding his novel. Cervantes confronts readers with the complex social fabric of early modern Spain, and immerses us in the religious and economic realities of the Iberian Peninsula and the Mediterranean world. Our close reading of Don Quijote will explore its links to the network of institutions, practices, and beliefs that constituted early modern Spanish culture.

SPAN 470 Hispanic-American Poetry (3 Credit Hours)
The course traces the development of Latin American poetry in such representative poets as Rubén Darío, Gabriela Mistral, and Octavio Paz.
Outcomes:
Students will recognize the major themes and forms of Latin American poetry with a special emphasis on the 19th and 20th centuries

SPAN 480 Hispanic-American Novel (3 Credit Hours)
Pre-requisites: graduate standing
Analyzes salient themes and formal features of twentieth-century novel. Taught in Spanish. Prerequisite: graduate standing.
Outcomes:
Students will identify stylistic and thematic contours of the modern Latin American novel and draw connections between works of literature and the broader culture

SPAN 487 La Novela De La Revolucion Mexico (3 Credit Hours)
Pre-requisites: graduate standing
An analysis of representative works and themes of the Mexican Revolution, its mystique, critique, and legacy. Taught in Spanish.
Outcomes:
Students will comprehend main features of literature of the Revolution and draw relationships to contemporary Mexican cultural themes

SPAN 489 Cuento Hispano-Americano (3 Credit Hours)
The development of the Hispanic short story is studies in this course. Authors included are Quiroga, Cortázar, García Márquez, Castellanos, Valenzuela, and Ferré.
Outcomes:
Students will be able to contextualize the stories, analyze them both formally and thematically, and recognize the different types of short story written in Latin American: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 490 Hispanic Culture & Civilization (3 Credit Hours)
Pre-requisites: graduate standing
Interdisciplinary seminar brings to bear perspectives of literary intellectuals, anthropologists, sociologists, educators, and theologians on the topic. Visions of America. Taught in Spanish.
Outcomes:
Students will understand significance and many facets of theme of cultural identity in Latin America as expressed in various disciplines

SPAN 499 Graduate Internship (1-6 Credit Hours)
A course designed to provide students with the opportunity to make a connection between Hispanic Studies and its praxis in a professional work environment.

SPAN 500 Directed Readings (3 Credit Hours)
The course is composed of special readings undertaken only by highly qualified students and supervised by a member of the department.
Outcomes:
Students will be able to work individually on a research project of their own selection

SPAN 501 Thesis Research (3 Credit Hours)
Pre-requisites: Completion of initial thesis forms appearing on the GS website; permission of thesis director
Designed for graduate students who wish to write an M.A. thesis, and therefore conduct, and receive credit for, thesis-related research under the direction of the thesis director.
Outcomes:
To advance the student's knowledge in the area of focus; to enhance research skills and allow the student to develop bibliographies and a research paper

SPAN 595 Thesis Supervision (1 Credit Hour)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their MA thesis.

SPAN 599 Directed Primary Research (3 Credit Hours)
Pre-requisites: Students must have the permission of the Instructor of Record to enroll in this course
This course will culminate in the completion and presentation of a well-polished article-length paper in modern languages, literatures and linguistics to faculty members in the form of an oral defense. This course fulfills the Masters Essay.
Outcomes:
To refine and articulate a specific article-length research project in Hispanic Studies, and to research, write and defend this successfully completed project

SPAN 605 Master's Study (1 Credit Hour)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their Masters' essay.

Statistics (STAT)

STAT 401 Introduction to Applied Statistics Using R (1 Credit Hour)
Pre-requisites: Limited to Graduate Students Only
This course covers the basics of applied statistics including descriptive statistics and visualization (including graphing), univariate methods, inference, hypothesis testing and confidence intervals, two-sample and paired analyses, simple and multiple linear regression, ANOVA and logistic regression. The course introduces and uses the R freeware package.
Outcomes:
Upon completion of this course, it is expected that students will skillfully and accurately perform real-time data analysis using R and R/Studio

STAT 403 SAS Program & Applied Statistics (3 Credit Hours)
While simultaneously reviewing basic statistical methods (t tests, regression, ANOVA, interaction, etc.), this course introduces statistical modelling using the SAS program, involving the DATA step and various SAS procedures. Working on hands-on projects using real datasets, students present their final project results.

STAT 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

STAT 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

STAT 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov chains, classification of states, long-run behavior, birth and death processes, random walks, Poisson processes and their variations, and Brownian motion. In addition to applications, some theoretical derivations/proofs will also be emphasized.
Course equivalencies: X-MATH406/STAT406
Outcomes:
Students mastery of methods in stochastic processes and the ability to apply these in areas like biology, social science, sports, and finance

STAT 407 Statistical Design (3 Credit Hours)
This course provides students with a thorough introduction to statistical experimental design and to the statistical methods used to analyze the resulting data. The concepts of comparative experiments, ANOVA and mean separation procedures will be reviewed; blocking (complete and incomplete) will be discussed, as will be factorial designs, fractional factorial designs, and confounding. The course will focus on biometric applications such as clinical trials, HIV studies, and environmental and agricultural research, but industrial and other examples will occasionally be provided to show the breadth of application of experimental design ideas.

STAT 408 Applied Regression Analysis (3 Credit Hours)
This course provides students with a thorough introduction to applied regression methodology. The concept of simple linear regression will be reviewed and discussed using matrices, and multiple linear regression, transformations, diagnostics, polynomial regression, indicator variables, model building and multicolinearity will be discussed, as will be nonlinear and generalized linear regression. The course will focus on applications such as those from biometry and biostatistics (clinical trials, HIV studies, etc.), sports, engineering, agriculture and environmental science.

STAT 410 Categorical Data Analysis (3 Credit Hours)
This course provides an introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modeling techniques based on generalized linear models. Specialized methods for ordinal data, small samples, multi-category data, and matched pairs will also be discussed. The focus throughout this course will be on applications and real-life data sets.

STAT 411 Applied Survival Analysis (3 Credit Hours)
Modern statistical methods are covered to analyze data that is right, left and/or interval-censored. Nonparametric approaches such as the Kaplan-Meier estimation technique, log-rank test and proportional-hazards model are considered as are parametric methods such as those based on the Exponential and Weibull distribution. Accelerated failure time models and nonlinear models are also discussed.

STAT 421 Math Modeling & Simulation (3 Credit Hours)
This course uses SAS, R and high-level languages to perform statistical modelling by conducting statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or otherwise intractable.
Course equivalencies: X-COMP421/MATH421/STAT421

STAT 426 Advanced Statistical Inference (3 Credit Hours)
This course presents the role of likelihood methods in a whole range of statistical problems. The course reviews theoretical developments such as efficiency, completeness, and the Cramer-Rao lower bound, and shows how the likelihood approach is used to surpass these methods and to analyze regression problems, to deal with nuisance parameters by using marginal likelihood methods, and to deal with complex data structures such as censored and spatial data.

STAT 436 Topics in Biostatistics (3 Credit Hours)
This course covers experimental design (including interaction, analysis of covariance, and crossover designs) and the analysis of designed studies, simple and multiple linear regression, generalized linear and nonlinear regression, bioassay, relative potency and drug synergy, multivariate analysis (including MANOVA and multivariate regression), repeated measures (designs and analysis), and survival analysis (Cox proportional odds, log-rank tests, Kaplan-Meier estimation) of censored data. The emphasis of the course will be on applications instead of statistical theory, and students will be required to analyze real-life datasets using popular statistical packages.

STAT 437 Quantitative Bioinformatics (3 Credit Hours)
This course explores recently developed mathematical, probabilistic and statistical methods currently used in the fields of bioinformatics and DNA microarray and protein array data analysis. These include stochastic processes, (hidden and traditional) Markov chains, tree- and clustering techniques (including principal components analysis and biplots), discriminant analysis, experimental design strategies and ANOVA methods. Our focus in this course is on the application of these techniques and on meaningful interpretation of results.

STAT 438 Introduction to Predictive Analytics (3 Credit Hours)
Pre-requisites: Graduate students only
This course focuses on finding patterns, associations, and relationships in data. In examining real-world datasets, this course highlights, develops and applies methods in simple and multiple linear and logistic regression, classification and discriminant analysis, resampling methods, model selection, additive models and splines, tree-based methods, support vector machines, and unsupervised learning techniques such as clustering and PCA.
Outcomes:
Upon completion of this course, it is expected that students will master applied methods in predictive analytics (using R and/or Python) with applications to real data-sets

STAT 444 Longitudinal Data Analysis and Mixed Modeling (3 Credit Hours)
Pre-requisites: Graduate Students only
This course focuses on repeated measures, longitudinal, hierarchical and mixed modeling data analysis with an eye to applications, model identification, software implementation, and interpretation of computer results.
Outcomes:
Upon completion of this course, it is expected that students will master applied mixed-modelling methods (using R and/or SAS) with applications to real data-sets

STAT 451 Applied Nonparametric Methods (3 Credit Hours)
Pre-requisites: Graduate Students only
Many basic statistical techniques are based upon normal or binomial distributional assumptions which may not be appropriate in practice. This course introduces and illustrates rank-based methods, permutation tests, bootstrap methods, and curve smoothing useful to analyze data when normal and/or binomial assumptions are not valid.
Outcomes:
Upon completion of this course, it is expected that students will master applied nonparametric statistical methods (using R and/or SAS) with applications to real data-sets

STAT 460 Bayesian Statistical Methods (3 Credit Hours)
Pre-requisites: STAT 308 or STAT 408
A graduate-level treatment of Bayesian methods for data analysis focusing on the theoretical foundations and computational strategies for modern Bayesian inference. Topics include the formulation and analysis of single- and multi-parameter Bayesian models, hierarchical and multilevel structures, and Bayesian generalized linear models. The course will also consider advanced Markov Chain Monte Carlo computational techniques such as Gibbs sampling, Metropolis-Hastings algorithm, and Hamiltonian Monte Carlo. Emphasis is placed on both the mathematical underpinnings of Bayesian analysis and the implementation of complex models using contemporary software tools.
Outcomes:
By the end of the course, students will be able to: formulate and analyze complex Bayesian models; compare and select complex Bayesian models; critically interpret and communicate Bayesian analyses in research settings; extend basic Bayesian methods to advanced/nonstandard models

STAT 464 Multivariate Statistical Methods (3 Credit Hours)
Pre-requisites: STAT 308 or STAT 408
The course emphasizes both the theoretical foundations and applied aspects of multivariate analysis. Students will examine data exploration, inference, and model-based approaches, including principal components, factor and canonical correlation analysis, discriminant and cluster analysis, MANOVA, and modern dimensionality reduction techniques. The course will also introduce extensions of these methods and encourage critical evaluation of their assumptions and limitations. Statistical software, such as R, will be used for implementation and analysis.
Outcomes:
By the end of the course students will be able to: explain and analyze the theoretical framework underlying common multivariate methods; derive and interpret results from principal component and factor analyses; apply and critique modern dimensionality reduction and visualization techniques

STAT 465 Actuarial Theory I (0 Credit Hours)
This course provides an introduction to the models and methods used in actuarial mathematics and risk theory. Students are expected to gain a broad understanding of frequency and severity modelling, pricing, and accumulated risk. This course includes a blend of theory and applications.
Course equivalencies: X-MATH465/STAT465

STAT 466 Actuarial Theory II (0 Credit Hours)
With an introductory background in the field provided in STAT 465, this course thoroughly explores modelling and estimation techniques in actuarial mathematics and risk theory.
Course equivalencies: X-STAT466/MATH466

STAT 468 Risk Theory (0 Credit Hours)
With a focus on insurance, pensions and investments, this course provides an overview of the theory of risk, emphasizing the statistical challenges and assumptions inherent in models and methods.
Course equivalencies: X-STAT468/MATH468

STAT 488 Topics in Statistics (1-3 Credit Hours)
This topics course provides the means for new courses on current or 'hot' topics to be offered to students, with the topics being crafted to the given topic at hand. As such, the course may be taken repeatedly.

STAT 495 Statistical Consulting Capstone (2 Credit Hours)
Pre-requisites: Graduate Students only
Students enrolled in this course will be introduced to statistical consulting techniques useful for work with researchers and decision-makers in university, medical, financial and industrial settings; students will engage in actual hands-on statistical consulting with administrators, researchers, or students at one of Loyola's lakeside campuses or remotely.
Outcomes:
Upon completion of this course, it is expected that students will master the soft-skills of statistical consulting, communication, active listening, and real-time data analysis

STAT 498 Independent Study Statistics (1-6 Credit Hours)
Working with a statistics faculty member on a one-on-one or small group format, this course affords students the opportunity to thorough explore a statistical topic at greater depth. Generally, it involves a good deal of outside reading and/or programming, and weekly meetings with the professor.

Theology (THEO)

THEO 401 Tutorial in Biblical Studies (3 Credit Hours)
A reading course with variable content and readings in the area of biblical studies.

THEO 403 Topics in Rabbinic & Medieval Literature (3 Credit Hours)
Topics in post-biblical Jewish literature and thought, covering texts from approximately 200 to 1600.

THEO 404 History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution, in the context of the ancient Near East.
Course equivalencies: IPS 440/THEO 404
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 405 Formation of The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament, in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition.
Course equivalencies: IPS441/THEO 405
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 406 Basic Hebrew Grammar (3 Credit Hours)
Study of the fundamental elements of classical Hebrew.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 407 Hebrew Exegesis (3 Credit Hours)
Introduction to the fundamentals of classical Hebrew, including the Hebrew alphabet, basic syntax, and the basic grammatical forms of the language, designed to advance reading knowledge of the Old Testament.

THEO 418 Theological Prophets-Ancient Israel (3 Credit Hours)
This course examines the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by contemporary sociological and anthropological perspectives. Standard historical-critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 420 Seminar (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 421 Directed Reading in Bible Studies (1-3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 422 Directed Reading in Bible Studies (3 Credit Hours)
Independent research in topics in bible studies according to program developed jointly by the student & faculty director.

THEO 424 The Synoptic Gospels (3 Credit Hours)
Study of the diversity of early Christianity as represented in the Synoptic Gospels, particularly the commonalities and contrasts in the worldviews operative in Mark, Luke, and Matthew.
Course equivalencies: IPS 445/THEO 424

THEO 425 Luke-Acts & New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view.
Course equivalencies: IPS 446/THEO 425
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 427 St Paul's Contribution to Christianity (3 Credit Hours)
Examination of Paul's thought through exacting analysis of Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity.
Course equivalencies: IPS 448/THEO 427
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 429 Person of Jesus in New Testament (3 Credit Hours)
In this course, attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities.
Course equivalencies: IPS 449/THEO 429
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 436 Christology (3 Credit Hours)
This course will study the speculations and formulations concerning the person of Christ and the redemptive incarnation from the early fathers and councils up to and including modern times.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 437 Mystery of God in Christian Theology (3 Credit Hours)
The Christian church has insisted, from the beginning, that Jesus Christ is decisive in humanity's access to, and understanding of, God. This realization was expressed in the doctrine of the Trinity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 440 Seminar in Systematic Theology (1-12 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 441 Directed Reading in Systematic Theology (3 Credit Hours)
Independent research in topics in systematic theology according to program developed jointly by the student & faculty director.

THEO 447 Philosophical Theology (3 Credit Hours)
A study of the ways in which philosophical assumptions, systems, and methodologies shape theological reflection.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 449 Phenomenology of Religion (3 Credit Hours)
This course will examine religion from a phenomenological point of view, allowing the methods and texts of phenomenology to shape our understanding of religious phenomena, such as revelation, givenness, metaphysics, incarnation, etc.. Topics may also include investigations of the borders between phenomenology and theology.

THEO 459 Contemporary Theology (1-12 Credit Hours)
Advanced study of readings and themes in contemporary theology, in conversation with a variety of disciplines.

THEO 460 Seminar in History of Theology (1-12 Credit Hours)
A consideration of the organizing models characteristic of theology in particular periods. The seminar is organized around a specific doctrinal theme determined, in part, by the specialized interests of the students.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 461 Directed Readings in History of Theology (3 Credit Hours)
Independent research in topics in history of theology according to program developed jointly by the student and faculty director.

THEO 464 Religion & Politics in Christian History (3 Credit Hours)
Exploration of the intersections of religious and political thought in Christian history from the 19th century to today.

THEO 470 Foundations Crititical Issues Theological Ethics (1-12 Credit Hours)
Devoted to a critical analysis of theological ethics firmly rooted in the historical method, studying the various methodologies, critical issues and the personalities.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 475 Natural Law & Theological Ethics (3 Credit Hours)
Some of the many theological interpretations of natural law developed in Western Christian thought will be examined. The issue of a specific Christian ethic vis-à-vis a universal humanistic ethic will be investigated.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 477 Feminist Issues in Theology and Ethics (3 Credit Hours)
Designed around current issues in feminist theology and ethics. Issues include the role of the Bible in feminist theology, hermeneutics, theological education, church and sacraments, as well as normative theory, sexuality and reproduction, and ecology.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-THEO477/WOST468/WSGS468
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 478 Issues in Medical Ethics (3 Credit Hours)
The course will deal with the problems of abortion, genetic engineering, technological reproduction, sterilization of the handicapped, prolonging life, etc.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 480 Seminar in Christian Ethics (1-12 Credit Hours)
In-depth study of select topics in contemporary Christian ethics. Topics vary from faith and morality, religion and politics, church-state relations, and work to ecology, sexuality, and eschatology.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 481 Directed Readings Christian Ethics (3 Credit Hours)
Independent research in topics in Christian ethics according to program developed jointly by the student and faculty director.

THEO 500 Theological Pedagogy I (0 Credit Hours)
Theological Pedagogy is designed for graduate students interested in teaching theology courses at LUC. The hope is to help future instructors succeed in the classroom with a thoughtful reflection on course learning goals and then constructing a syllabus that reflects those individual goals - all while discussing and keeping in focus the "special" nature of theology and religious studies.
Outcomes:
Students will reflect on course learning goals for their own future courses; Students will produce a syllabus for their own future courses

THEO 502 Theological Pedagogy II (0 Credit Hours)
Theological Pedagogy is designed for graduate students to take simultaneously with their first semester as an instructor of record for a core Theology course. Among other goals, students are encouraged to develop a greater sense of one's own personal identity in the classroom through the crafting of a Teaching Philosophy, foster a community of support and critical reflection with other first-time instructors, and participate in the culminating Symposium on the Teaching of Theology and Religious Studies.
Outcomes:
Students will craft a Teaching Philosophy that reflects on their personal identity in the classroom; Students will reflect on their teaching in the classroom through presenting in a Symposium on the Teaching of Theology and Religious Studies

THEO 515 Gospels in Early Christianity (3 Credit Hours)
This course will focus on the study of one or the other of the four gospels.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 517 Early Christian Letters (1-12 Credit Hours)
This course studies letters from Christian leaders of the first two centuries A.D. in their original Greek language.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 519 Latr Nt-Subapost Writ (3 Credit Hours)
This course studies New Testament and non-canonical Christian writings in their original Greek language from the late first and early second century A.D.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 523 Cultural-Religious Environment Early Christianity (3 Credit Hours)
This course examines specific aspects of the cultural and religious environment of the Mediterranean world between 200 B.C. and A.D. 300 relevant to early Christianity. Outcomes A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 527 Various Community Early Christianity (3 Credit Hours)
The course will examine the identity, cohesion, and institutions of various communal groups in early Christianity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 530 Seminar - Variable Titles (1-12 Credit Hours)
Extensive and in-depth study of selected topic.

THEO 536 Christian Doctrine-Catholic Theology (3 Credit Hours)
This course will examine the dialectical relationships between Christian doctrine and theological learning.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 560 Contemporary Authors (1-12 Credit Hours)
This course will examine the methods, concerns, major issues, achievements, and lasting influence of twentieth century writers whose work has significantly shaped theology today.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 570 Fundamental Issues in Christian Ethics (1-12 Credit Hours)
Fundamental issues raised in defining Christian ethics, delineating its sources and methods, developing normative theories, and analyzing processes of moral decision-making.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 573 Roman Catholic Ethics (3 Credit Hours)
This course will concentrate on one or more classic topics in Roman Catholic ethics.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 575 Religious Ethics and Social Theory (3 Credit Hours)
This course investigates what religious ethics gains from and contributes to basic concerns.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 580 Christian Social Ethics (3 Credit Hours)
The course will examine the sources, transformation, problematics, and potential directions in developing the middle principles which articulate the interaction of theological ethics and social questions.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 585 Issues Applied Theology Ethics (3 Credit Hours)
An examination in depth one or more areas which have traditionally engaged religious ethicists.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 590 Directed Readings and Research (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 592 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 593 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 600 Dissertation Supervision (1 Credit Hour)
Students who have filed the dissertation paperwork and are currently writing, should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 605 Master's Study (1 Credit Hour)
Students who have completed their Master's level course work and are preparing for the comprehensive exams should enroll in this course, unless they plan to take the exam while taking courses. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 610 Doctoral Study (1 Credit Hour)
Students who have completed their doctoral level course work and are studying for the written and oral comprehensive exams should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

Women and Gender Studies (WSGS)

WSGS 401 History of Feminist Thought (3 Credit Hours)
This course surveys the historical development of feminist thought from Mary Wollstonecraft to second wave feminism and beyond and analyzes the impact of feminism on the general culture.
Course equivalencies: WOST401/WSGS401

WSGS 402 Foundations of Women's Studies (3 Credit Hours)
This course investigates how gender has become a critical category in education and knowledge and traces the institutional and intellectual development of women's and gender studies as a field, focusing on the evolution of WGS in the academy (here and in other countries) and on the changes in concepts of knowledge, in methodologies, and in pedagogy that women's studies scholarship has produced in various fields.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST402/WSGS402

WSGS 450 Global Feminisms (3 Credit Hours)
This course is a course that explores feminism and the study of gender in a global dimension. Chosen texts privilege the study of women, gender, and sexuality from an international perspective. The course highlights the intimate relationship between the study of feminism, (post/de)colonialism, and racism.
Course equivalencies: WOST450/WSGS450

WSGS 455 Feminist Pedagogy (3 Credit Hours)
Pre-requisites: Graduate Status
This course will focus on distinctly feminist ways of learning and teaching. As with feminist theory and research methods, feminist pedagogy has been understood to include characteristics like self-reflexivity, de-centered authority, standpoint epistemologies, examinations of power dynamics, and attention to embodied ways of learning and knowing.
Outcomes:
Understand the foundational principles of feminist pedagogy and related approaches to teaching; Develop skills to analyze and produce sound teaching practices within a feminist intersectional framework

WSGS 460 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: Graduate Status
We will explore how crossing borders, identity politics, gender, and sexuality intersect to produce a conversation on contemporary global immigration issues. Focus is on movement from three geographic locations from/to the Global South and North: Latin America to the US and Europe; Africa to Europe; Europe to Latin America and back.

WSGS 470 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: Graduate Status
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Course equivalencies: WOST370/WSGS370/WGSG470
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 475 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: Graduate Status
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 480 Queer Theory (3 Credit Hours)
Pre-requisites: Graduate status
This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications. Outcome: Students will acquire and utilize theoretical concepts in queer studies, develop cultural competency in queer studies and present information about the field orally and in writing.
Interdisciplinary Option: Women & Gender Studies

WSGS 497 Topics in Women's Studies and Gender Studies (3 Credit Hours)
This topics course may originate in Women's Studies and Gender Studies or as a cross-listed course and deals with women's and gender topics including identity, sexuality, diversity, relationships of power in national, transnational and international contexts. The ethical and social justice implications of topics include feminist perspectives.
Course equivalencies: WOST497/WSGS497
Outcomes:
Students understand feminist perspectives on gender in literature; Students connect theory and practice in writing, performance, action or in combined formats

WSGS 498 Practicum (1-3 Credit Hours)
WSGS Practicum gives students the option of doing an internship, teaching assistantship, or research assistantship under the supervision of a faculty member. This practicum counts as an elective credit towards the student's MA degree.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST498/WSGS498
Outcomes:
Develop intersectional research and critical thinking skills in academic/socio-cultural contexts while being fully engaged in Practicum; Enhance written and verbal communication through creative use of Feminist pedagogy and methodology to enhance classroom education and public/academic presentations

WSGS 499 Independent Study (1-3 Credit Hours)
An independent study provides students with the opportunity to work closely and one-on-one with a faculty member. The student can choose her/their/his topic or creative project. The independent study should be comparable to a graduate-level course.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST499/WSGS499

WSGS 500 Thesis Research (3 Credit Hours)
A Thesis Research course allows graduate students to fine tune their research skills, academic writing, and independent thought while they are preparing their thesis proposal and/or writing their thesis.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST500/WSGS500

WSGS 595 Thesis Supervision (1 Credit Hour)
The focus of a Thesis Supervision is to help students better strategize, structure, and organize themselves as they write their thesis. Students will also be advised about how to prepare for a successful oral defense.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST595/WSGS595

WSGS 599 Capstone Presentation (0 Credit Hours)
Pre-requisites: Successful completion of 12 hours in the MA program in WSGS
WSGS 599 is the culmination of the Master's program in Women's Studies and Gender Studies. Requirements include a 10 page synthesis paper or detailed outline, annotated bibliography, and public presentation at our biannual capstone ceremony.
Outcomes:
Synthesis of the students' graduate coursework; performance of the diversity of outcomes in WSGS; celebration of students' achievements; networking

WSGS 605 Master's Study (1 Credit Hour)
Continuing work on completion of the Master's Degree in Women's Studies and Gender Studies.
Interdisciplinary Option: Women & Gender Studies

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Bioinformatics (BIOI)

BIOI 400 Programming Biology (1 Credit Hour)
This is a 6-week course introduction to scripting programming languages within the framework of biological data analysis. Graduate-level standing required. Students will learn foundational methods and algorithms for analysis of biological data.

BIOI 494 Bioinformatics Research Design (1 Credit Hour)
Course Restricted to Bioinformatics MS students Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement experimental design practices in bioinformatics

BIOI 495 Special Topics in Bioinformatics (1-12 Credit Hours)
The field of bioinformatics is ever evolving. As new technologies develop, demand arises for new methods and tools. Courses will focus on emerging trends in bioinformatics. Restricted to Bioinformatics Graduate Students. Student will learn about emerging topics in the field.

BIOI 498 Bioinformatics Internship (1 Credit Hour)
Pre-requisites: BIOI 500, Limited to MS Bioinformatics Non-Thesis track students only
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning.
Outcomes:
Students can apply foundational principles in bioinformatics into practice

BIOI 499 Bioinformatics Research (1-12 Credit Hours)
Pre-requisites: Prerequisite: BIOI 494, Limited to MS Bioinformatics Thesis track students only
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for bioinformatics research

BIOI 500 Advanced Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOI 501 Bioinformatics Seminar (1-2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.
Course equivalencies: X-BIOI501/BIOL451
Outcomes:
Students can summarize, critique, and present bioinformatics research

BIOI 565 Exploring Proteins (3 Credit Hours)
Pre-requisites: Biochemistry, restricted to Bioinformatics Graduate Students
Proteins are polymer chains of amino acids that fold into compact states that differ in structure, size, shape, and dynamics. Computational tools are essential for the prediction of protein structures, protein interactions, and structure-based drug design.
Outcomes:
Students will learn the concepts of building blocks of protein structure, and protein folding

BIOI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: BIOI 499
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

BIOI 605 Master's Study (1 Credit Hour)
This course provides FT status for a student who needs to meet the continuous enrollment requirement of the Graduate School while completing program requirements.

Biology (BIOL)

BIOL 401 Medical Literature and Ethics (3 Credit Hours)
The course will include lectures on the foundational concepts of modern ethics, in class discussions of ethics primarily centered on discussion of cases from different ethical perspectives, quizzes to assess reading mastery and familiarity with material to qualify students on how to discuss cases and formal case presentations by student working groups.
Outcomes:
Understand and articulate the philosophical basis for different ethical frameworks; Have a firm command of the "four principles" of Benevolence, Non-maleficence, Justice and Autonomy and their clinical applications; Be able to resolve clinical ethical issues and back up your reasoning

BIOL 402 Microbiology (3 Credit Hours)
Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 405 Advanced Development (3 Credit Hours)
Developmental Biology draws from Genetics, Molecular Biology, Genomics, and Embryology and is a foundational science for understanding problems in Humans ranging from birth defects to cancer. Because of its multidisciplinary foundation, Developmental Biology is best thought of as a SYSTEM OF IDEAS, EXPERIMENTS AND OBSERVATIONS, as such you will greatly expand your scientific vocabulary and problem solving abilities during the course of this semester. Often you will need to draw on your stored knowledge from many disciplines to understand the topics we will cover. The course will comprise lectures on general development, evolution and developmental genetics, followed by discussions of papers on particular topics, and student presentations.

BIOL 408 Writing for the Medical Professions (3 Credit Hours)
This course will be required for the Master of Arts in Medical Sciences (MAMS) program. It will include readings related to developing the student's physician persona, and writings that are required for the medical school application process. Pre-requisites: Admission to the MA in Medical Sciences program.
Outcomes:
Students will be prepared to write effective primary and secondary essays for their medical school applications; communicate clearly their motivation to pursue a career in medicine and the relevance of their experiences to their pre-medical preparation

BIOL 409 Advanced Genetics (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program (Note: MAMS = MSCI-MA)
The course will comprise formal discussions on the molecular basis of information storage and retrieval in the cell, the role of genetics in human development and homeostasis, the mapping of human genes in familial or population contexts, and modern understanding of the connection between genotype, phenotype and human traits.

BIOL 410 Advanced Cell Biology (3 Credit Hours)
This course explores, in depth, the life cycle and activities of a typical eukaryotic cell. Some of the topics covered are cell polarity, cytoskeleton, plasma membrane, protein modifications and trafficking, extracellular matrix and cell death. Competencies to be gained in this course: To develop the skill of reading and analyzing the primary literature on topics pertaining to cell biology. Judging whether a conclusion is supported by sufficient data. Identifying the controls in published experiments. Exam-taking skill improvement using short reading passages from the scientific literature as topics.

BIOL 413 Advanced Immunology (3 Credit Hours)
Introduces innate and adaptive immunity, lymphocyte development, T-cell and B-cell mediated immunity, leukocyte trafficking, immunological memory hyperimmune reactions, autoimmunity, tumor and transplant immunity. Must be enrolled in the Master of Arts in Medical Sciences (MAMS) program.
Outcomes:
Students will acquire an overview of the human immune system that prepares them for success in a medical school immunology class

BIOL 415 Advanced Parasitology (4 Credit Hours)
Lecture and laboratory. A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.
Outcomes:
Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation

BIOL 416 Limnology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Students will learn to evaluate the trophic status and health of a lake by the end of the course.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions

BIOL 417 Wetland Ecology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the study of wetlands habitats. This course includes discussion of physical and chemical factors, biota, production and community dynamics. Laboratories include several field trips to regional wetland habitats.
Outcomes:
Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants

BIOL 418 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Lecture and laboratory. This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 422 Research (1-6 Credit Hours)
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 426 Entomology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.
Outcomes:
Students will learn to identify major insect groups in the field and in the laboratory

BIOL 430 Virology (3 Credit Hours)
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 450 Advanced Bioinformatics (2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOL 451 Bioinformatics Seminar (1 Credit Hour)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills. Students can summarize, critique, and present bioinformatics research.
Course equivalencies: X-BIOI501/BIOL451

BIOL 452 Human Anatomy and Physiology I (3 Credit Hours)
The course objectives are to learn the gross anatomical structures of the human body. To organize the relationships between these structures and systems using patterns of innervation and development. To be able to apply anatomical knowledge in ways pertinent to clinical issues.

BIOL 453 Human Anatomy and Physiology II (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program
This is the second semester of a 2 semester course. We will cover the physiology of the cardiovascular, respiratory, digestive, renal, reproductive, and endocrine systems, in addition to acid-base and fluid balance, temperature regulation, and exercise physiology. Functioning will be discussed from a systems level to a molecular level.

BIOL 455 Advanced Neuroscience (3 Credit Hours)
This course will focus on the cellular, anatomical, and functional organization of the human nervous system that range in topics from ion channel physiology to cognition. Students will survey the elements of the nervous system necessary for a foundation for medical school. An understanding of pathologies presented in disease, dysfunction, and injury will be included.
Outcomes:
Learn foundational neurological concepts presented to first year medical students; Learn the pathology of neurological disease, dysfunction, and injury through clinical cases; Understand the neurological basis of higher-order functions

BIOL 458 Developmental Neurobiology (3 Credit Hours)
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis. Students will also learn how to critically read primary research papers and present these papers to the class.
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles

BIOL 461 Advanced Neurobiology (3 Credit Hours)
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 466 Advanced Biochemistry (3 Credit Hours)
Life is based on four principle cellular components: proteins, lipids, carbohydrates, and nucleic acids. Biochemistry is concerned with the structure, function, and interactions of these compounds with one another and their environment. As such biochemistry plays a vital part in all aspects of the medical sciences since it not only helps us to understand how the (human) cell works on a molecular level but also how to decipher and possibly counter pathogenic conditions. Consider that almost all drugs used in medical treatment target proteins or groups of proteins to modulate their biochemical properties.

BIOL 470 Biostats & Exp Design Lec/Lab (4 Credit Hours)
This course is designed for students who are in, or plan to attend, graduate or professional school, and thus, will be working with their own data or critically analyzing existing data. This course will emphasize the theory and application of commonly used statistics in biology.

BIOL 479 Biology AP Workshop (3 Credit Hours)
No course description is available

BIOL 482 Advanced Molec Genetics (3 Credit Hours)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 483 Pop Genetics (3 Credit Hours)
Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations. They learn how to apply basic tools of population genetic analysis.
Outcomes:
Students develop knowledge and awareness of population genetic theory and information

BIOL 485 Prin Electron Microscopy Lec/Lab (4 Credit Hours)
Lecture and laboratory. This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques. Students will also learn how to correctly interpret their results, and properly present their data.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs

BIOL 488 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 493 Directed Reading (1-4 Credit Hours)
Student investigates a current topic in biology.

BIOL 495 Special Topics (1-4 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 495L Special Topics Lab (0 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered. Outcome: Students will master a unique topic in biology.

BIOL 500 Scientific Logic (3 Credit Hours)
The Scientific Logic course is designed to teach scientific literacy in terms of writing grant proposals, reading scientific literature, scientific presentations and debate. The course is framed within an evolutionary foundation.
Outcomes:
Students will gain knowledge in advanced evolutionary topics, while preparing a grant proposal and developing skills with respect to critical thinking and scientific inquiry

BIOL 501 Seminar (1 Credit Hour)
Students present specific, current research topics including their own research to the class and faculty.

BIOL 502 Department Seminar (1 Credit Hour)
Students meet and discuss the research presented by seminar speakers.

BIOL 510 Instructions in Teaching Biology (1 Credit Hour)
Introduction to the fundamentals of teaching biology.

BIOL 511 Biology Teaching Practicum (2 Credit Hours)
Students gain firsthand teaching experience by assisting in undergraduate courses.

BIOL 595 Thesis Supervision (1 Credit Hour)
Students conduct thesis research under the direction of their Thesis Director.

BIOL 605 Master's Study (1 Credit Hour)
Students conduct thesis research under the direction of their Thesis Director.

Chemistry (CHEM)

CHEM 400 Chemistry Seminar (1 Credit Hour)
This weekly seminar series on current topics in Chemistry is presented by experts from outside Loyola.

CHEM 401 Chemistry Methodology and Communication (3 Credit Hours)
Pre-requisites: Graduate Standing
This is the common preparatory course providing all chemistry graduate students with the necessary skills to navigate towards their respective degrees and success post-degree. Topics include: notebooks, design of experiment, safety, ethics, effective communication of science, conflict resolution, and professional conduct.
Outcomes:
Students are prepared with the soft skills and formal training in research methodology and compliance expectations expected of a graduate student and a professional chemist in a senior role

CHEM 415 Special Topics in Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester.

CHEM 420 Advanced Organic Chemistry I: Struct-Stereo (3 Credit Hours)
Important organic chemical concepts. Includes discussion of the stereochemistry of carbon, organic quantum mechanics, chemical kinetics and related mechanistic concepts, and an introduction to synthetic methodology.

CHEM 422 Advanced Organic Chemistry III: Mechanism (3 Credit Hours)
This is an intensive review of the more general types of organic chemical mechanisms, such as electrophilic and nucleophilic additions, substitution reactions, elimination processes, and hemolytic processes. The experimental approach to mechanisms is emphasized.

CHEM 423 Medicinal Chemistry (3 Credit Hours)
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.
Outcomes:
1) Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window; 2) Summarize interactions of drugs with receptors, enzymes, or nucleotides; 3) Analyze structure-activity relationships given potency data

CHEM 424 Molecular Characterization Part A (3 Credit Hours)
Pre-requisites: Graduate Students Only
This course will include a closer look at the theory and applications of several spectroscopic methods used for analysis of organic as well as inorganic compounds, including 1D and 2D methods employing 1H and 13C NMR, in addition to other elements; UV/Vis, combined with mass spectrometry.
Outcomes:
Students will be able to identify a compounds molecular structure based of spectroscopic means and understand the working principles behind those spectroscopies

CHEM 425 Special Topics in Organic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are: natural products, free radicals, molecular rearrangements, photochemistry, heteronuclear NMR, carbocyclic chemistry, medicinal chemistry, synthetic organic methodology, pericyclic reactions, heterocycles.

CHEM 429 Research in Organic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 430 Physical Chemical Survey (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Covers chemical thermodynamics, molecular structure and spectra, and chemical kinetics. It includes review and survey of some recent research.

CHEM 431 Chemical Thermodynamics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
An extended study of the principles of the thermodynamic laws followed by applications to real and ideal systems of gases, liquids, and solids; partial molal properties; principles and applications of quantum statistical thermodynamics to gaseous equilibria

CHEM 433 Chemical Kinetics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Description of rates of chemical reactions and interpretations thereof; principal theories of bimolecular and unimolecular processes; chain reactions; development of absolute reaction rate theory and application to a number of chemical systems; potential energy surfaces; includes heterogeneous kinetics, solution phenomena, isotopic effects, flow systems, empirical kinetic relations.

CHEM 435 Special Topics in Physical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are NMR spectroscopy, photophysical processes, molecular spectroscopy, computational chemistry, molecular modeling, and spectroscopy of surfaces.

CHEM 436 Statistical Thermo Dynamics (3 Credit Hours)
Methods of classical and quantum statistical mechanics applied to thermodynamic problems; calculation of thermodynamic quantities from spectral data; properties of real gases; selected problems in the solid sate.

CHEM 437 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: CHEM 302 or equivalent; strong courses in calculus and modern physical chemistry, and some knowledge of computer programming
A thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 438 Quantum Mechanics II (3 Credit Hours)
Pre-requisites: CHEM 437
This course is a continuation of CHEM 437, which is a thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 439 Research in Physical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 441 Advanced Inorganic Chemistry (3 Credit Hours)
The important topics in inorganic and organometallic chemistry are surveyed.

CHEM 445 Special Topics in Inorganic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are organometallic chemistry and catalysis, bioinorganic chemistry, physical methods in inorganic chemistry, inorganic reaction mechanisms, non-metal chemistry, transition metal clusters and X-ray crystallography.

CHEM 449 Research in Inorganic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 451 Chemical Methods of Analysis (3 Credit Hours)
Topics covered include the statistical evaluation of analytical results and sources of errors, sampling and significance of proper samples, optimization of experiments, review of acid-base theory, chelometry and its applications, theory of precipitation, oxidation and reduction reactions and applications.

CHEM 452 Electrochemistry (3 Credit Hours)
Fundamentals of electrochemistry, the application of electrochemical techniques and current literature.

CHEM 454 Analytical Separations (3 Credit Hours)
Topics include aspects of chromatography, partition, thin layer, gas and liquid chromatography, mass spectroscopy and other techniques.

CHEM 455 Special Topics in Analytical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. This course may involve a lab. Some courses are analytical absorption and emission spectroscopy, electroanalytical methods, environmental chemistry, lasers in analytical spectroscopy, and mass spectroscopy.

CHEM 456 Analytical Spectroscopy (3 Credit Hours)
We will discuss photometric instrumentation, absorption, emission and fluorescence spectroscopy and types of analytical laser spectroscopy.

CHEM 459 Research in Analytical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 460 Biophysical Chemistry (3 Credit Hours)
This class will cover the role of molecular interactions in determining the structure and reactivity of complex biological molecules. Modern experimental techniques are used in studying these interactions in biological systems.

CHEM 461 Biochemistry (3 Credit Hours)
The conformation, dynamics and biological activities of macromolecules, generation and storage of metabolic energy, and genetic information and biosynthesis will be discussed.

CHEM 465 Special Topics in Biochemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are protein chemistry, sequence and 3D structure, magnetic resonance spectroscopy, protein crystallography, bio-inorganic chemistry, molecular biology, molecular dynamics of proteins, and current developments in biochemistry and related areas.

CHEM 469 Research in Biochemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 470 Biochemistry I (3 Credit Hours)
Pre-requisites: Completion of undergraduate organic chemistry
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 479 Research in Chemical Education (1-9 Credit Hours)
Co-requisites: RMTD 400 and CIEP 229; This course is restricted to Chemistry Ph.D. students
Prerequisites or This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills.
Outcomes:
Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field; *describe and apply methods for preparing research data collected for publication; *describe and apply methods for analyzing chemical education research projects & manuscripts

CHEM 480 Chemistry for Teachers I (3 Credit Hours)
This course focuses on aspects specific to the teaching and learning of chemistry at post- secondary levels. Geared towards graduate students, undergraduate seniors, or current educators who plan on instructing college students, it explores principles surrounding how people learn chemistry and how to align pedagogies and environments to optimize learning opportunities for students. Course activities and assignments are designed to initiate the building of an instructional portfolio to prepare enrolled students for potential academic careers.

CHEM 491 Laboratory Investigations in Chemistry C (1 Credit Hour)
A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts.
Outcomes:
Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district

CHEM 497 Organic and Bio Chemistry for Teachers (3 Credit Hours)
Pre-requisites: Must be enrolled in M.Ed. in Chem Ed program
A course designed for urban high school teachers to enhance knowledge of chemistry and chemistry teachers.
Outcomes:
Increased chemistry content knowledge, ability to teach inquiry based chemistry

CHEM 500 Graduate Student Seminar (1 Credit Hour)
This gives students an opportunity to prepare and present a professional chemistry seminar for other professional chemists. The presenter is trained in organizing materials for the 500 Graduate Student Seminar (1)presentation and has the experience of conveying high level technical information to a friendly audience in preparation for subsequent professional presentations in the industrial, academic, and/or scientific meeting arena. The topics of the seminar should not be related to the student's research. The course should be taken at least once by all degree-seeking students.

CHEM 501 Directed Study (1-6 Credit Hours)
A special reading project is undertaken by qualified students and directed by a faculty member of the department with chairperson's approval.

CHEM 509 Doctoral Research (0-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 595 Thesis Supervision (1 Credit Hour)
The course is for master's degree candidates after completion of course requirements.

CHEM 600 Dissertation Supervision (1 Credit Hour)
The course is for Ph.D. degree candidates after completion of courses, cumulative examinations, and research tool requirements.

CHEM 605 Master's Study (1 Credit Hour)
This course is for MS students in the (up to two) intervening semesters between completing coursework/research credits and beginning their thesis supervision.

CHEM 610 Doctoral Study (1 Credit Hour)
This course is for PhD students in the intervening two semesters (pre-candidacy) between completing coursework/research credits and beginning their dissertation supervision.

Classical Civilization (CLST)

CLST 499 Directed Study (1-3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving the ancient Mediterranean world, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Computer Science (COMP)

COMP 400A Object-Oriented Programming (3 Credit Hours)
This programming intensive course with its weekly lab component provides an exploration in problem solving for graduate-level courses, using object-oriented programming in a language such as Java.
Outcomes:
To analyze and decompose problems, specify algorithms, and construct solutions by synthesizing classes, objects and other components of object

COMP 400B Data Structures I (3 Credit Hours)
Pre-requisites: COMP 400A
This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.
Outcomes:
Students describe linear data structures and analyze the performance of their operations

COMP 400C Data Structures II (3 Credit Hours)
Pre-requisites: COMP 400B and COMP 400D
This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 400D Computing Tools and Techniques (1 Credit Hour)
This course introduces students to the Unix shell environment and essential tools.
Outcomes:
Students who complete this course will develop fluency in the Unix (Linux) environment

COMP 400E Discrete Structures (3 Credit Hours)
This course provides the mathematical foundations for graduate-level study in computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Outcomes:
To analyze properties of functions, relations, graphs, trees, paths; evaluate Boolean Expressions; apply induction towards proving correctness of algorithm and classifying resource usage; synthesize finite-state machines and logic circuits

COMP 401 Computer Security (3 Credit Hours)
Pre-requisites: COMP 400A or instructor permission
This is a foundations course on computer security, covering a comprehensive range of concepts and technologies, including security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The final project requires a presentation and technical report where the students will show and describe what they accomplished.
Outcomes:
Students will find and exploit vulnerabilities in computer and network systems; articulate cryptography and security goals, and synthesize the knowledge of different tools and techniques by applying them to an intensive real-world project

COMP 403 Operations Management (3 Credit Hours)
Pre-requisites: COMP 400A
Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support.
Outcomes:
Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making

COMP 404 Organizational Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course focuses on the manager's role in leading Organization Development and Change to maximize organization and individual effectiveness with a focus on Information Technology. The class explores Organization Development and Change theory, change practices, and discusses considerations a manager will face as a change agent in today's computing ecosystem.
Outcomes:
To understand the dynamics of change in organizations; learn techniques and strategies in managing change; develop skills that will enable a change agent mentality within the context of IT leadership

COMP 405 Database Administration (3 Credit Hours)
Pre-requisites: COMP 400B
Knowledge of the configuration and management skills needed for successful administration of a database server. The database administrator manages hardware, backup, security, tables and indexes, performance monitoring, query performance and optimization, and transaction performance. This course takes a user through the stages of maximizing the performance of a database server.
Outcomes:
Students will learn how to manage database performance, including topics such as the query optimizer, SQL EXPLAIN, table statistics, concurrency and transaction isolation levels, and security

COMP 406 Data Mining (3 Credit Hours)
Pre-requisites: COMP 400B
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP/MATH 215), MATH 212, and MATH 264
An introduction to advanced numerical analysis. Introduction to error analysis, numerical solution of equations, interpolation and approximation, numerical differentiation and integration, matrices, and solution of systems of equations, numerical solution of ordinary and partial differential equations.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will have an understanding of advanced numerical analysis and its applications

COMP 410 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 271 and COMP 264
The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes.
Outcomes:
Students will learn important topics in advanced operating systems and be able to make presentations on the topics

COMP 412 Open Source Computing (3 Credit Hours)
Pre-requisites: COMP 400B
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Outcomes:
Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively

COMP 413 Intermediate Object-Oriented Development (3 Credit Hours)
Pre-requisites: COMP 400B
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Outcomes:
Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development

COMP 417 Social and Ethical Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 418 Combinatorial Mathematics (3 Credit Hours)
Pre-requisites: MATH 313 or COMP 163
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Course equivalencies: X-COMP418/MATH418
Outcomes:
Students will learn mathematical techniques in discrete mathematics and applied combinatorics

COMP 420 Software Systems Analysis (3 Credit Hours)
Pre-requisites: COMP 400B or instructor permission
This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design.
Outcomes:
Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation

COMP 421 Math Models & Simulation (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
This course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered.
Course equivalencies: X-COMP421/MATH421/STAT421
Outcomes:
Student will learn foundations of discrete event simulation

COMP 422 Software Development for Wireless and Mobile Devices (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcomes:
Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming

COMP 424 Client-Side Web Design (3 Credit Hours)
Pre-requisites: COMP 400B
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.
Outcomes:
Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems

COMP 425 Rapid Applications Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.
Outcomes:
Students will create database applications and web applications using server-side technologies

COMP 428 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or Permission
In this course, major types of error-correcting codes, encoding and decoding , and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes.
Course equivalencies: X-COMP428/MATH428
Outcomes:
Students will learn both the theory and application of error-correcting codes

COMP 429 Natural Language Processing (3 Credit Hours)
Pre-requisites: ((COMP 400B or COMP 271) and (MATH 131 OR equivalent) and (STAT 103 OR equivalent)) OR instructor permission
In this course, students examine in depth the problems, methods, and applications of NLP. Topics will include information retrieval, sentiment analysis, machine translation, document classification, and question answering. We will also cover the underlying theory from probability, statistics, and machine learning that are crucial for the field.
Outcomes:
Students will explain areas of NLP such as information retrieval, sentiment analysis, machine translation, document classification, question answering; Students will apply tools of NLP to a domain of their choice

COMP 431 Cryptography (3 Credit Hours)
Pre-requisites: COMP 271 and (Comp 163 or MATH 313 or MATH 201) or Permission
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP431/MATH431
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 433 Web Services Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP.
Outcomes:
Students will learn the standards and protocols for deploying web services

COMP 434 Enterprise Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors.
Outcomes:
Students will learn the architecture of EJB, entity and message and session beans

COMP 435 Formal Methods in Software Engineering (3 Credit Hours)
Pre-requisites: COMP 400C
As embedded and distributed systems are becoming ever more ubiquitous, we depend increasingly on the correctness and security of the software that controls such systems. This course studies the formal specification, verification, and synthesis of software.
Outcomes:
An understanding of the role of formal methods in the construction of software systems; proficiency in representative methods and tools, such as static analysis, model checking, and runtime verification

COMP 436 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 437 Intro Concurrent Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 439 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 400D or equivalent and (COMP 400C or equivalent or COMP 413)
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.
Outcomes:
Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems

COMP 440 Computer Forensics Investigations (3 Credit Hours)
Pre-requisites: COMP 401
This course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 441 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.
Outcomes:
Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces

COMP 442 Server-Side Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264 and COMP 413
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 443 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
Students should also have completed COMP 400D or equivalent. This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 445 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course considers the safety, security, reliability, and privacy concerns of the embedded devices and cloud-based resources of the Internet of things. The course discusses methods for addressing these concerns.
Outcomes:
Design/implement secure software for embedded systems and the IoT; Establish safety, security, reliability, privacy goals for IoT-based systems; Understand security and privacy concerns of embedded systems and the IoT

COMP 446 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.
Outcomes:
Students will learn how telephone and data networks work; They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system

COMP 447 Intrusion Detection and Computer Forensics (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.
Outcomes:
Students will learn to configure ID systems (eg, snort) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 448 Network Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.
Outcomes:
Students will gain an understanding of how to secure computers and network environments

COMP 449 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 450 Applied Cryptography (3 Credit Hours)
This course covers the applications of modern Cryptography, while addressing theoretical foundations as necessary. The course begins by introducing modern Cryptographic notions of security in the form of adversary experiments/challenges. Practical applications of Cryptography using OpenSSL are discussed throughout the course. More recent advances in Cryptography are also discussed.
Outcomes:
Reason about the security of a cryptographic system under various assumptions; Implement and analyze various cryptographic protocols; Gain familiarity with OpenSSL; Understand the implications of Post-Quantum Cryptography and potential future avenues of application

COMP 451 Enterprise Networking (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent, and COMP 443, and COMP 400D or equivalent
Management of complex, high-speed, heterogeneous computer networks. Device management using SNMP and related protocols. Configuration and use of Network Management Systems. Data-flow management using LARTC and similar tools.
Outcomes:
Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms

COMP 452 Introduction to Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities; Describe how vulnerabilities can be leveraged into an attack; Describe a vulnerability or attack at the machine-code level

COMP 453 Database Programming (3 Credit Hours)
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.
Outcomes:
Students will learn application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 458 Big Data Analytics (3 Credit Hours)
Pre-requisites: At least a C in the following courses (COMP 405 or COMP 453) AND (COMP 406 or COMP 479 or STAT 408 or equivalent)
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 460 Algorithms & Complexity (3 Credit Hours)
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.
Outcomes:
Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 462 Advanced Computer Architecture (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.
Outcomes:
Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems

COMP 464 High-Performance Computing (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcomes:
Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems

COMP 468 Database System Design (3 Credit Hours)
The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases.
Outcomes:
Students learn the theory and practice of advanced database design and implementation; They will also gain an understanding of using commercial database environments such as Oracle

COMP 469 Product Invention and 3D printing (3 Credit Hours)
This course explores how things are made, including: physical design vs design on non-physical things; rapid prototyping; 3D printing; 2D conceptualization and sketching; modeling.
Outcomes:
Student will be able to: Visualize ideas via sketching basic shapes; Create 3D models using 3D modeling software; Use a 3D Printer; Give constructive feedback in peer review sessions

COMP 470 Software Quality and Testing (3 Credit Hours)
In this programming intensive course, students will learn effective automation, testing, and use of software metrics through the practices of Test Driven Development and Continuous Deployment.
Outcomes:
Students will be able to perform rigorous testing techniques that contribute to operational reliability, and identify programming practices that both contribute to software maintainability and help to avoid errors

COMP 471 Theory of Programming Languages (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

COMP 472 Compiler Construction (3 Credit Hours)
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn the theory and practice of how to build a compiler

COMP 473 Advanced Object Oriented Programming (3 Credit Hours)
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 474 Software Engineering (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP476/MATH476
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 477 IT Project Management (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 479 Machine Learning (3 Credit Hours)
Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 480 Computer Graphics (3 Credit Hours)
This course introduces advanced topics in modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 483 Computational Biology (4 Credit Hours)
Pre-requisites: BIOL 488
This course presents an algorithmic focus to problems in computational Biology. As such it is built on earlier courses on algorithms and bioinformatics. Current algorithmic approaches, software tools, and scientific literature are discussed.
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 484 Artificial Intelligence (3 Credit Hours)
This course advanced artificial intelligence concepts including theory, search techniques and programming.
Outcomes:
Student will learn the theory of artificial intelligence, search techniques, and be able to build small applications based on it

COMP 486 Computational Neuroscience (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques.
Outcomes:
Students will be able to adeptly apply mathematical and computational frameworks in the various domains of neuroscience

COMP 487 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 479
Deep learning is part of a broader family of machine learning methods based on artificial neural networks. This course will include key concepts of neural network algorithms as well as their applications in computer vision and natural language processing.
Outcomes:
Students will analyze popular modern neural architectures such as convolutional and recurrent neural networks, design and evaluate their own neural networks, and apply neural network models to a practical task

COMP 488 Computer Science Topics (1-4 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 490 Independent Project (1-6 Credit Hours)
Pre-requisites: Approval of the Computer Science faculty member supervisor
An independent project in computer science or related disciplines, under the supervision of a member of the faculty.

COMP 499 Internship (1-6 Credit Hours)
An opportunity to obtain experience in software development, design, networks, or related activities in computer science in a professional setting. The student must obtain the approval of the Graduate Program Director and the student's work supervisor. A final report from the student and the supervisor are required.

COMP 501 Equitable and Inclusive Computer Science Pedagogy (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers the design of computer science courses through an equity and inclusion lens, and covers evidence-based best practices as applied to specific student concerns. Includes basics of teaching and learning theory and pedagogical techniques, and equity, diversity, and justice concerns.
Outcomes:
Ability to explain justice-centered CS education; understand pedagogical frameworks; understand assessment approaches; understand Active Learning and Peer Instruction

COMP 502 Structure of Research Management and Funding (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers grant-proposal development, University compliance regulations, and laboratory and research management.
Outcomes:
Ability to create successful grant proposals and to understand research management

COMP 503 Technology Entrepreneurship (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This course provides aspiring researchers with the skills to pursue new ventures and technology commercialization. Students learn how to transition an innovation from the lab to the marketplace.

COMP 590 PhD Independent Study (3 Credit Hours)
Independent study for PhD research, for students who have not yet completed the required credit hours.
Outcomes:
This will depend on the exact study or research project the student engages in, but generically the outcome is to gain expertise in a study topic or obtain research results

COMP 595 Thesis Supervision (1 Credit Hour)
Supervision for students working on a thesis while not for other classes. Restricted to students enrolled in the MS in Computer Science.

COMP 600 Dissertation Supervision (1 Credit Hour)
Dissertation work under the supervision of a faculty member.
Outcomes:
This course is an independent study course supervised by a research advisor, the purpose of the course is to enable PhD students to maintain full-time status while they prepare their dissertation proposal, and specific goals will vary for individual students, but in general, PhD students should be maturing as researchers

COMP 605 Master of Science Study (1 Credit Hour)
Course for continuing master's degree students engaged in study.

COMP 610 Doctoral Study (1 Credit Hour)
Dissertation preparation course, for when student has completed coursework but before student has defended their dissertation proposal. Can be taken only twice during a doctoral student's career at LUC.
Outcomes:
This course is an independent study course supervised by a research advisor; The purpose of the course is to enable PhD students to maintain full-time status while they complete their dissertation; Specific goals will vary for individual students, but in general, PhD students should be maturing as researchers and beginning to establish intellectual independence

Criminal Justice & Criminology (CJC)

CJC 401 Politics and Policies in the Criminal Justice System (3 Credit Hours)
This course examines the interactional processes within and among the criminal justice system's components and their relationships to other public and private institutions. The role of politics in policy formulation, the policy making process, and the consequences of current policies on the operation of the criminal justice system are discussed.
Outcomes:
Students will understand the CJ policy-making process, including which factors facilitate/inhibit effective policy development and implementation, and how CJ research is used to formulate, implement, and evaluate CJ policies

CJC 402 Theories of Criminal Behavior (3 Credit Hours)
This is a comparative review of dominant contemporary theories and research on the causes of crime and delinquency. Competing theories on the causes of crime are analyzed, and their empirical support and implications for prevention programs and interventions are discussed.
Outcomes:
To analyze and discuss contemporary theories of criminal behavior

CJC 403 Research Methods and Program Evaluation (3 Credit Hours)
This course provides students with the substantive knowledge to be critical consumers of research studies and program evaluations. Students learn how to critique the internal, construct, and external validity of program evaluations and data collection efforts that seek to understand criminal behavior or the operation of the criminal justice system.
Outcomes:
To analyze and critique program evaluations and research designs

CJC 404 Applied Data Analysis and Interpretation (4 Credit Hours)
Students learn the skills and knowledge necessary to be critical consumers of statistical information often present in everyday criminal justice practice. Students learn which statistical tools are appropriate for specific measures and research questions, as well as how to generate and interpret statistical output using a statistical software package.
Outcomes:
Students will be able to select the correct statistical tools to use for conducting statistical analyses, use a statistical software package to analyze data, and interpret statistical output

CJC 408 Applied Research in Criminal Justice & Criminology (2 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404
In their final semester of the CJC graduate program, students complete a semester-long research project. This culminating experience is student-initiated and supervised by a member of the graduate faculty. This project encourages advanced students to approach the multifaceted problem of research as a set of interrelated issues ranging from tasks of concept formation and theory construction through research design and data collection to the assessment and analysis of the generated data.
Outcomes:
Students should be able to synthesize criminological theory, criminal justice policy, research methods, and data analysis into a final applied research project

CJC 410 Advanced Topics in Criminology (3 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on theories or contemporary issues concerning criminal and victim behavior. Examples of topics include: Drugs and Violence; Gender and Crime; Intimate Partner Violence; Sexual Violence; Human Trafficking; Environmental Crime; Victimology; International Criminology; Advanced Criminology; Race, Ethnicity, and Crime.
Outcomes:
Students will understand a contemporary issue in criminology with a special emphasis on research and theory developments

CJC 411 Advanced Topics in Policing (3 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of policing, including community- and problem-oriented policing, situational crime prevention, crime analysis, and Comp-Stat approaches to policing practice and management.
Outcomes:
Students will understand a contemporary issue in policing with a special emphasis on research and theory developments

CJC 412 Advanced Topics in Courts (3-6 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on contemporary issues in courts. Examples of topics include: International Criminal Law and Anti-Terrorism Enforcement, The American Jury; Death Penalty; International Criminal Law; Public Views of Justice; Media, Culture, and Criminal Law; Legal Rights of Children.
Outcomes:
Students will understand a contemporary issue in the court system with a special emphasis on research and theory developments

CJC 413 Advanced Topics in Corrections (3-6 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of corrections. Examples of graduate courses that will be offered as special topics courses under CJC 413 include: Principles of Punishment, Sentencing Policy, Restorative Justice, Risk Assessment, Re-Entry, What Works in Corrections, Mass Incarceration, and Juvenile Corrections.
Outcomes:
Students will understand a contemporary issue in corrections with a special emphasis on research and theory developments

CJC 414 General Special Topics (3 Credit Hours)
Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System.
Outcomes:
To analyze and discuss topics in criminal justice

CJC 415 Mental Illness and Crime (3 Credit Hours)
Pre-requisites: Graduate students only
This course explores the relationship of mental illness to crime and violence, the policies and programs concerning the treatment of individuals with mental illness in the criminal justice system, including the nature, prevalence and consequences of mental disorder among criminal offenders.
Outcomes:
Students will understand the history and development of research on mental illness and crime, assessments of risk for violence, as well as legal issues surrounding mentally disordered victims and offenders

CJC 416 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control.
Outcomes:
Students will understand how international legal and criminal justice systems interact to investigate, measure, and prosecute transnational crimes including trafficking, human rights violations, and war crimes

CJC 431 Criminal Victimization (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course critically explores the physical, emotional, and financial harm people suffer because of illegal criminal activities. The focus of the course is on the nature and extent of victimization, the estimation of risk, theories about the causes of victimization, and the consequences of victimization experiences. In addition, students will also study the emergence of special victims' groups, the implications of a victim-orientated perspective for the administration of justice, and system alternatives such as restitution and restorative justice.
Outcomes:
Articulate the history, nature, and magnitude of criminal victimization in the United States; Describe the theoretical underpinnings of victimization and current research on the risk and protective factors of criminal victimization; Differentiate the legal and social responses to criminal victimization; Describe the primary and secondary impact of criminal victimization on victims, their families, friends, and communities; Analyze data to examine trends and patterns of criminal victimization; Analyze data to examine the causes and correlates of criminal victimization; Identify which interventions and strategies offer the most promise for effective implementation and impact on preventing criminal victimization

CJC 432 Firearm Violence (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course will provide a comprehensive overview of the extent and nature of firearm violence, existing laws related to the acquisition, ownership and use of firearms, patterns and reasons for firearm ownership and acquisition, the various attempts to control access to firearms, and the effectiveness of such efforts. This course will explore both the criminal justice and public health perspectives and approaches to reducing firearm violence. Each discipline's framework, strategies, and challenges will be examined, with a focus on the opportunities and challenges of implementing interdisciplinary approaches in a "real world" setting. The class will emphasize the application of objective and rigorous scientific methods and research to understanding the extent and nature of firearm violence and evaluating interventions within the context of what is oftentimes a politically and emotionally charged debate.
Outcomes:
Articulate the extent and nature of firearm violence in the United States in a sophisticated way that illustrates an understanding of existing measures of firearm violence; Describe the strengths and limitations of existing data to measure the extent and nature of firearm violence, patterns and levels of firearm ownership, and firearm markets; Differentiate between the criminal justice and public health frameworks, and how each approaches firearm violence; Describe the importance and challenges of responding to complex issues like firearm violence from a multidisciplinary/intersectional/collaborative approach; Analyze data to examine trends and patterns of firearm violence; Analyze data to examine the correlates and causes of firearm violence; Describe evidence-based interventions and strategies to reduce firearm violence; Identify which interventions and strategies offer the most promise for effective implementation and impact on firearm violence

CJC 433 Wrongful Convictions and the Law (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
Wrongful convictions often include two types of errors, an innocent person is punished, and a guilty person escapes justice. In this class, we will explore how such errors occur by focusing on both investigation and adjudication practices. We will then apply what we have learned about criminal procedure to analyze individual wrongful conviction cases. This is an interactive course. Students will review case intake documents from a cooperating legal organization and help inform their case decisions. We will also work with the National Registry of Exonerations to draft case profiles for people who have already been exonerated. Ultimately, we will weigh the challenges of upholding defendants' rights without compromising public safety or producing additional errors.
Outcomes:
Evaluate criminal cases for potential errors, both episodic and systemic; Describe defendants' due process rights particularly under the 5th and 6th amendments and how these rights relate to criminal procedure in practice; Explain judicial opinions and their ability to remedy wrongful convictions; Identify the limitations of the appellate process and post-conviction review; Produce written content of publishable quality, with a special focus on accuracy and fact checking

CJC 499 Independent Study (1-6 Credit Hours)
Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic. Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

CJC 501 Thesis Research (2 Credit Hours)
Pre-requisites: Approval of Graduate Program Director and Grade of A- or better in CJC 403 and CJC 404
Supervision and guidance are given as students conduct their independent Masters' thesis research.
Outcomes:
Master's Thesis

CJC 502 Practicum in Criminal Justice (3-6 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404 Outcomes: Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency, and identify/describe the link between their field experience and prior courses through a research paper
This course enables the student to apply their knowledge (conceptual, theoretical, and methodological) in a practical agency setting.

CJC 595 Thesis Supervision (1 Credit Hour)
This is a non-credit course. Students who are working on approved master's thesis research and are not registered for any course are required to register for thesis supervision.

CJC 605 Master's Study (1 Credit Hour)
Pre-requisites: Completion of the graduate core courses; This course is a non-credit means of permitting students to be formally enrolled at Loyola while completing their culminating experience (i.e
, 408 project or thesis).

Data Science (DSCI)

DSCI 401 Introduction to Data Science (4 Credit Hours)
Pre-requisites: Restricted to Graduate students
This course provides students with an introduction to data science using the R programming language covering such topics as data wrangling, data visualization, interacting with databases, principles of reproducible research, building simple statistical models/machine learning and data science ethics.
Outcomes:
Students will obtain an extensive background in the basic tools used in the field

DSCI 470 Data Science Consulting (2 Credit Hours)
Pre-requisites: STAT 408
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
Outcomes:
Students will apply methods learned in prior classes to address a real-world problem, gain oral and written presentation skills, and improve collaboration skills

DSCI 494 Data Science Research Design (2 Credit Hours)
Restricted to DSCI Graduate students. Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement research design practices in data science

DSCI 499 Data Science Research (1-8 Credit Hours)
Restricted to DSCI Graduate students. Students will conduct independent hypothesis-driven data science research under faculty guidance. Research efforts will include literature surveys, research design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for data science research

DSCI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: DSCI 499
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

Digital Humanities (DIGH)

DIGH 400 Introduction to Digital Humanities Research (3 Credit Hours)
Enrollment in DIGH 400 is the prerequisite for DIGH 401, 402, 500, 595. An introduction to the digital humanities, work in a variety of humanities disciplines--literature, art, philosophy, theology, and history--that involves computer assistance in conducting or presenting research. This includes, for example, digitizing, markup, editing, publishing, archiving, analyzing, visualization, modeling, interpretive gaming, and instructional and interface design. This course will emphasize research questions and methods from a range of humanities disciplines--not computer technology per se but ways that computing can further humanities research agendas.
Outcomes:
Knowledge of how computing affects research in humanities, critical thinking about technology and humanities, awareness of broad social and ethical questions surrounding old and new, print and digital, media in contemporary culture

DIGH 401 Introduction to Computing (3 Credit Hours)
Pre-requisites: DIGH 400 co-enrollment
Primarily for DH students, the course combines historical study with a hands-on approach to computers their growing role in academic research, publishing, libraries, and the arts. Topics will include the structure of computers, the relation of hardware and software, text and image markup and publishing, database theory and design, modeling and visualization, text analytics, procedural logic, and the basic concepts of programming, artificial intelligence, and the social, ethical, and intellectual contexts for computing.
Outcomes:
Procedural literacy, historical knowledge of hardware and software platforms, ability to be a scholar-programmer or to collaborate fruitfully with scholar-programmers

DIGH 402 Digital Humanities Design (3 Credit Hours)
Introduces students to design and human computer interaction.
Outcomes:
Students gain practical experience with design, testing, and building ethical digital projects

DIGH 403 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: DIGH 400, DIGH 401, DIGH 402
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks

DIGH 405 Special Topics in Digital Humanities (3 Credit Hours)
Special topics in Digital Humanities or new approaches of current interest to the instructor.
Outcomes:
Dependent upon course topic; must be approved by GPD

DIGH 499 Independent Study in Digital Humanities (1-3 Credit Hours)
Students work under the direction of a faculty member on a particular area of interest within Digital Humanities.
Outcomes:
Students advances their research projects with direct and regular input from a faculty member

DIGH 500 Digital Humanities Practicum (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.
Outcomes:
A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

DIGH 501 Digital Humanities Project (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
In this capstone, students will apply skills they've learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.
Outcomes:
A working, practical final digital humanities project published online

DIGH 605 Master's Study (1 Credit Hour)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up any MA requirements, such as their field examinations and research project.
Outcomes:
Advancement to degree completion

English (ENGL)

ENGL 400 Intro to Graduate Study (3 Credit Hours)
The course serves as an introduction to the profession of literary studies for students new to the graduate programs in English. It offers a review of current critical theories and methodologies, research techniques, bibliographic methods, and issues in textual criticism.

ENGL 402 Teaching College Composition (3 Credit Hours)
The course deals with practical matters related to the teaching of college composition. It is organized around an examination of recent theories, methods, and materials used in the teaching of writing.

ENGL 403 Composition Theory (3 Credit Hours)
This course examines major and current advances in composition theory and reviews current scholarship in the teaching of writing, with some attention to the relationship between composition and literary theory.

ENGL 404 Pedagogy: Theory and Practice (3 Credit Hours)
Pre-requisites: ENGL 402
This course is designed to help students integrate theory and practice in teaching literature and cultural studies courses at the college level.
Outcomes:
Students will demonstrate an understanding of pedagogical theories by writing a teaching philosophy in which they explain and defend their theoretical approach; students will put their theory into practice by preparing a course proposal for a literature course, which includes a description and goals, syllabus and guidelines, classroom format, and assignments and evaluations procedures

ENGL 406 History of the English Language (3 Credit Hours)
The course is a study of the causes, mechanisms and consequences of language variation over time, with prominent examples taken from the history of English and its parent languages. All major areas of linguistic theory are considered: phonology, lexis, morphology, syntax, and semantics.
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 410 Contemporary Literary Criticism (3 Credit Hours)
This course presents studies in major contemporary theoretical and critical issues through a survey of major types of critical analysis, such as formalism, structuralism, semiotics, reader-response, deconstruction, psychoanalysis, and feminist criticism.

ENGL 412 History of the Book to 1800 (3 Credit Hours)
Pre-requisites: Graduate status
This course will examine the history of written and printed texts from their beginnings to 1800, including such topics as book production and distribution, early ideas about textual editing, literacy, copyright, and censorship.
Outcomes:
Students will be able to relate textual forms to cultural practices

ENGL 413 Textual Criticism (3 Credit Hours)
An introduction to major textual theories and their history. Topics may include such issues as analytic and descriptive bibliography, theories of copy-text, theoretical and practical issues in editing, and forms of textuality, including manuscript, print and digital.

ENGL 415 Media and Culture (3 Credit Hours)
This course examines the important and evolving roles that media plays in the construction, reformulation, and critique of contemporary culture. Topics will vary but may include digital textuality; visual culture studies; information technologies; postcoloniality and globalization; and web-based communities.

ENGL 419 Contemporary Issues in Literature and Culture (3 Credit Hours)
The course is an intensive study of a particular cultural issue in relation to literature.

ENGL 420 Topics in Critical Theory (3 Credit Hours)
Focused study of a particular problem or movement within critical theory–for example, globalization; the "new aesthetics"; high and low culture; psychoanalytic theory; whiteness studies.

ENGL 422 Postcolonial Theory (3 Credit Hours)
This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said, Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

ENGL 423 Marxist Literary Theory (3 Credit Hours)
Intensive study of selected writers and issues within the Marxist tradition of literary and cultural criticism.

ENGL 424 Cultural Studies (3 Credit Hours)
An examination of the theory and practice of cultural studies, with special attention to the role of literary and critical theory in its development.

ENGL 426 Feminist Theory and Criticism (3 Credit Hours)
An intensive study of recent feminist theory in a range of disciplines--including literature, philosophy, history, and law--and covering a variety of approaches, such as psychoanalysis, post-structuralism, post-colonialism, queer theory, and cultural studies.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 427 Dramatic Theory (3 Credit Hours)
This course presents selected theoretical approaches to drama from the Greeks to the present. Readings may include both theoretical works and plays. Topics may include genre, dramaturgies such as realism, epic theatre, and theatre of the absurd, reception, semiotics, feminist dramatic theory, and performance theory.

ENGL 428 Postmodernism (3 Credit Hours)
Pre-requisites: Graduate status
This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.
Outcomes:
Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams

ENGL 430 Topics in Literature Studies (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in literature.

ENGL 433 Seminar in Individual Authors (3 Credit Hours)
Intensive study of a single author. Includes a comprehensive reading of the author's major works, and a review of the critical reception.

ENGL 436 Women Writers in English (3 Credit Hours)
This course focuses on significant issues raised in and by women-authored works, including representations of gender roles and sexualities, and the cultural status and uses of women's literature. Authors from any period(s) in British, American and World literature may be included.

ENGL 437 Topics in Drama (3 Credit Hours)
This course may deal with topics that cut across historical and national boundaries, such as dramatic genres, women in drama, modern reappropriations of earlier drama; with more specialized topics such as performance or feminist dramatic theory; or with historical movements in drama.

ENGL 440 Topics in Medieval Literature (3 Credit Hours)
Studies in a range of Middle English writing serve as a focus for special topics, including mysticism and historical prose from the thirteenth to the fifteenth centuries.

ENGL 441 Old English Language & Literature (3 Credit Hours)
This course introduces Old English language and literature through readings in poetry and prose, with attention, as time allows, to major critical issues in texts of the period.

ENGL 443 Middle English Literature (3 Credit Hours)
This course may address texts that bridge the Old and Middle English periods or texts (excluding Chaucer) that date from the fourteenth-century, such as Langland, Malory, the Gawain-poet, Gower, and women writers.

ENGL 444 Medieval Drama (3 Credit Hours)
The course focuses on English drama from its beginnings to the early Renaissance, including liturgical drama, saints' plays, miracle plays, the cycles, and interludes.

ENGL 447 Chaucer (3 Credit Hours)
This course may focus on the Canterbury Tales or Troilus and Criseyde and the dream visions, and may include some of Chaucer's less frequently studied texts (e.g., his translation of the Consolation of Philosophy).

ENGL 450 Topics in Early Modern Literature & Culture (3 Credit Hours)
This course presents selected studies in poetry and prose of the English Renaissance.

ENGL 455 Shakespeare (3 Credit Hours)
The philosophical, esthetic, and historical problems of Shakespeare's plays are covered in this course, which also focuses on Shakespearean scholarship.

ENGL 456 Early Modern Drama (3 Credit Hours)
This course presents English drama of the period 1550 to 1642. Among the topics to be covered are the rise of the permanent theaters; Elizabethan and Jacobean contemporaries of Shakespeare; Caroline plays and masques. Historical background, theatrical developments, and critical approaches are also studied.

ENGL 457 Seventeenth-Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in seventeenth-century literature. Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 458 Milton (3 Credit Hours)
Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 460 Topics in Restoration & 18th Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in Restoration and eighteenth-century literature.

ENGL 470 Topics in Romanticism (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in Romantic literature.

ENGL 471 Poetry of Romantic Period (3 Credit Hours)
The poetry of major and minor Romantic figures is studied in this course, which includes a critical study of their esthetics, philosophical concepts, and critical standards.

ENGL 475 Topics in Victorian Literature (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme, or body of work in Victorian literature.

ENGL 476 Victorian Poetry (3 Credit Hours)
This course presents the historical, political, social, and intellectual influences on Victorian poetry and examines its artistic and formal innovations and achievements. The authors studied include: Tennyson, Browning, Arnold, Swinburne, and the Rossettis.

ENGL 477 Victorian Prose (3 Credit Hours)
The course examines the major critical and philosophical prose writers of the years 1837-1900: Macaulay, Carlyle, Arnold, Ruskin, Newman, and Pater. It also explores the intellectual, social, and political backgrounds of the period, and identifies Victorian prose styles.

ENGL 478 Victorian Novel (3 Credit Hours)
The course examines the major Victorian novelists: Dickens, Thackeray, the Brontes, Trollope, Eliot, Meredith, and Hardy; religious, social, scientific, historical, and philosophical influences on the novel are also explored.

ENGL 480 Topics in Modernism (3 Credit Hours)
Topics include modernism, the Symbolist movement, Edwardian Period, and other contextual issues that transcend genre boundaries and address larger concerns of social and intellectual history.

ENGL 481 Modern Poetry (3 Credit Hours)
The course examines tradition and experiment in modern poetry and includes English, Irish, and American poets.

ENGL 482 Modern Drama (3 Credit Hours)
This course presents selected studies in dramatists from Ibsen on, including British, American, Continental, and Irish dramatists.

ENGL 483 Modern Novel (3 Credit Hours)
The course concentrates on selected studies in Conrad, Galsworthy, Bennett, Wells, Joyce, Lawrence, Huxley, Woolf, Maugham, Forster and other novelists, but may include additional American, Irish, and Continental novelists.

ENGL 484 Literature and Culture of the Jazz Age (3 Credit Hours)
Taking an interdisciplinary approach to a crucial era, this course will consider such topics as the construction of race in literature and popular culture, the rise of the New Woman, the Harlem Renaissance, and the relationship of jazz to aesthetic modernism.

ENGL 485 Contemporary Literature (3 Credit Hours)
This course concentrates on literature and literary movements of the second half of the twentieth century. Possible topics include postcolonialism (Achebe, Jhabvala, Naipaul, Soyinka, Walcott), postmodernism (Acker, Calvino, Pynchon, Reed), and African-American writing (Baldwin, Morrison, Walker).
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in contemporary literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 487 Postcolonial Literature (3 Credit Hours)
This course examines the issues of modern-day colonization as depicted in selected fiction, drama, and poetry from Africa, South Asia, the West Indies, and Australia.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in postcolonial literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 488 20th Century Literature in English (3 Credit Hours)
Focusing on the relation between texts and their literary and cultural contexts, this course may include any twentieth-century text written in English and may address a particular theme, literary movement, period, nation, or historical event. We may also interrogate the foundation of such categories.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in 20th-century literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 489 Magic Realism (3 Credit Hours)
Fusing realistic and symbolic forms, "Magic Realism" raises boundary issues of many kinds, between history and myth, empirical and non-empirical experience, objective and subjective knowledge. This course examines magic realism from its modernist origins to contemporary postmodern and postcolonial fiction in many countries.

ENGL 490 Topics in American Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme, or body of work in American literature.

ENGL 491 Early American Literature (3 Credit Hours)
This course examines Hispanic, native American, Puritan, colonial, and early nationalist literature in the United States, and explores its American and European backgrounds.

ENGL 492 American Romanticism (3 Credit Hours)
The course includes selected studies in Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and others.

ENGL 493 American Realism (3 Credit Hours)
The course features selected studies in American realism, tracing its origins and development as a national literary movement, and reviewing its regional variations and sub-genres, with special attention to Twain, Howells, and James.

ENGL 494 American Literature Since 1914 (3 Credit Hours)
The course is composed of selected studies in representative American writers of poetry, fiction, drama, and prose in the twentieth century.

ENGL 495 Latino/a Literature (3 Credit Hours)
Pre-requisites: Graduate standing and consent of the GPD in English
Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a Literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 496 African American Literature (3 Credit Hours)
This course focuses on African-American literature over a range of periods and genres including 19th-century slave narratives (Douglass, Jacobs), the fiction and poetry of the Harlem Renaissance (Hurston, Hughes, McKay) and contemporary literature (Ellison, Shange, Morrison).

ENGL 500 Capstone Seminar (3 Credit Hours)
Pre-requisites: 18 credit hours in 400-level courses; GPA of 3 or above
This capstone seminar provides a sustained, semester-long experience of research and writing on a topic in literary studies. A statement of topic is due on the first day of class. Research and writing are supported by scaffolded assignments, peer community, and a syllabus of shared readings drawn from practical guidebooks and exemplars of literary criticism, theory, and scholarship. Students develop an original article-length research paper suitable for submission to a journal in the field of literary studies.
Outcomes:
Assess and intervene in existing scholarly discourses in the field, by developing an\\noriginal article-length research paper suitable for submission to a journal in the field of\\nliterary studies; Write effectively about texts in English, by supporting an interpretative argument with\ \nclose reading

ENGL 501 Directed Readings (3 Credit Hours)
An independent study course supervised by a faculty member with the approval of the program director. Readings are initiated by the student.

ENGL 502 Independent Study-Doctoral Qualification (3 Credit Hours)
The course is composed of special readings in the field of the student's specialization under the supervision of a faculty member with the approval of the chair. Normally the director will be the professor with whom the student plans to write the dissertation. The written outcome of the course will be a draft of a proposal for the dissertation. The course is graded on a credit/no-credit basis.

ENGL 540 Newberry Seminar (3 Credit Hours)
Special topics in literary study offered by the Newberry Library.

ENGL 595 Thesis Supervision (1 Credit Hour)
Directed studies for students working toward a master's thesis.

ENGL 600 Dissertation Supervision (1 Credit Hour)
Directed studies for students working toward a doctoral dissertation.

ENGL 605 Master's Study (1 Credit Hour)
Directed studies for students working toward a master's thesis.

ENGL 610 Doctoral Study (1 Credit Hour)
Directed studies for students working toward a doctoral dissertation.

Erikson Institute (ERIK)

ERIK E421 Social and Emotional Development I (3 Credit Hours)
This course focuses on the study of social and emotional development in children from birth through age eight. It primarily considers how children experience themselves and others; the role of relationships in development; and the interaction of biological, psychological and social forces. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE121 / ERIKE21 /ERIKE421

ERIK E426 Cognitive Development (3 Credit Hours)
This course provides students with a basic knowledge of cognitive development in children from birth through age eight and fosters awareness of the application of this knowledge to children with diverse abilities and varying cultural and linguistic backgrounds. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE126 / ERIKE26 / ERIKE426

ERIK E477 Seminar Children-At-Risk (3 Credit Hours)
This course examines the concept of risk and how it impacts child development. We will use multiple frameworks to examine risk, including public health, developmental psychopathology, and education. Attention will be focused on biological/genetic (such as prematurity and temperament), family (such as parent mental health and child maltreatment), and environmental (such as poverty and neighborhood violence) factors. The consequences of growing up in the context of chronic adversity will be explored, as well as the factors that lead some children to cope with and show resilience in these circumstances. The challenges of understanding risk in current research, as well as the implications of this research for programs and policy will also be discussed.
Course equivalencies: ERIKE477 / ERIKE77

ERIK E479 Teaching & Learning: Linking Theory & Research to Practice (3 Credit Hours)
An understanding of the two domains of learning and teaching is fundamental to the field of child development and education. This course examines these issues through investigating and analyzing exemplary models of recent and influential theory and research. A dialogue-based approach to learning will be used throughout the course to encourage personal involvement in exploring and explaining the science of learning and teaching. Students will also engage in fieldwork, such as on-site observations, conversations with practitioners, and a research project, to gain first-hand experience of these issues.
Course equivalencies: ERIKE479 / ERIKE79

ERIK E481 Seminar Social & Cultural Contexts (3 Credit Hours)
Through an examination of current theory and multidisciplinary social science research, this course explores the influence of contextual factors on the development of children. Socially and culturally constructed factors (such as gender, race, ethnicity and social class) and institutions (such as family, schools, and organized child care) will be discussed in terms of their influence on child rearing and child development. Through course lectures, discussion, and assignments, students will gain an understanding of the variability of child rearing strategies and outcomes across cultural communities; the role of historical and ecological factors in child rearing and family functioning; identity development in complex societies; and sources of possible tensions between different cultural communities and societal institutions (such as schools, social service providers, and child care programs).
Course equivalencies: ERIKE481 / ERIKE81

ERIK E482 Program Evaluation and Implementation Science (3 Credit Hours)
This course provides an advanced introduction to evaluating social services and education programs, including the study of factors leading to better program outcomes (i.e., implementation science). Restricted to Erikson graduate students.
Course equivalencies: ERIKE482 / ERIKE82

ERIK E485 Research Internship (3 Credit Hours)
The student will work either with an Erikson faculty member, research scientist, or research associate, or on a research project at another institution.
Course equivalencies: ERIKE485 / ERIKE85

ERIK E486 Teaching Internship (3 Credit Hours)
The student will teach or assist in teaching a college course in child development or a related topic.
Course equivalencies: ERIKE486 / ERIKE86

ERIK E489 Special Topics in Child Development (3 Credit Hours)
Enrollment for this course should be considered in close consultation with the faculty advisor. This course allows doctoral students to select from a range of applied child development courses at Erikson Institute that are taught by a member of the doctoral program faculty. Examples include Physical Growth and Development; Language Development; and Working with Adults. Students will gain deep understanding of the theories, research, and issues with regard to a special content area in child development and early education.

ERIK E497 Doctoral Study (1 Credit Hour)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations.
Course equivalencies: ERIKE497 / ERIKE97

ERIK E499 Dissertation Supervision (1 Credit Hour)
Course for continuing students engaged in dissertation research under advisor's supervision.
Course equivalencies: ERIKE499 / ERIKE99

ERIK E501 First Year Doctoral Seminar (0 Credit Hours)
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; and 5) Explore various career paths both in academia and non-academia

ERIK E502 First Year Doctoral Seminar (1 Credit Hour)
Pre-requisites: Graduate students only
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; 5) Explore various career paths both in academia and non-academia

ERIK E503 Scholarship Skills I (1 Credit Hour)
This course is designed to help graduate students develop their skills in finding, collating, and summarizing scholarly literature in relation to a topic of interest/future research. AI tools will also be explored and interrogated. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E504 Scholarship Skills 2 (1 Credit Hour)
Pre-requisites: Graduate Students only
This course is designed to help graduate students develop their skills in synthesizing and critiquing others' research, thereby providing support to their comprehensive exam milestone as well as helping prepare them for the literature review sections of their thesis or dissertation. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E505 Scholarship Skills 3 (1 Credit Hour)
Pre-requisites: Grad Students only
This course is designed to help graduate students develop their skills in writing, publishing, and disseminating their own research. This will include conference submissions and presentations, grant proposals, manuscripts and articles for peer review. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

Graduate School Seminar (GSSM)

GSSM S59 Thesis Supervision-Summer (1 Credit Hour)
Course for continuing students engaged in thesis research and writing under advisor's supervision during summer.

GSSM S60 Dissertation Supervision-Summer (1 Credit Hour)
Course for continuing students engaged in dissertation research under advisor's supervision during summer.

GSSM S61 Doctoral Study-Summer (1 Credit Hour)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations in summer.

GSSM S65 Master's Study-Summer (1 Credit Hour)
Course for continuing master's degree students engaged in study for comprehensive or qualifying examinations during summer.

Greek (GREK)

GREK 412 Readings in Hellenistic Authors (3 Credit Hours)
This course centers on works in Greek of the Hellenistic period, particularly at the intellectual center of Alexandria.
Outcomes:
Students should demonstrate knowledge in detail about the authors, works, and literary enterprise pursued; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, and intellectual contexts and influences pertaining to them

GREK 415 The Greek Fathers (3 Credit Hours)
This course centers on the writings of the early church fathers such as Athanasius, Basil, and John Chrysostom, through which it looks to the historical background of Eastern patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the writings, their authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, cultural, theological, and intellectual contexts and influences pertaining to them

GREK 425 The Attic Orators (3 Credit Hours)
This course examines the works of Attic orators such as Antiphon, Lysias, and Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should demonstrate knowledge in detail of the genre, the authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, political, legal, and intellectual contexts and influences pertaining to them

GREK 431 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Herodotus, his project, and his milieu

GREK 435 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War by Thucydides, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Thucydides, his project, and his milieu

GREK 441 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 442 The Odyssey (3 Credit Hours)
This course centers on Homer's Odyssey, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 443 Pindar (3 Credit Hours)
This course centers on Pindar and on ancient Greek lyric poetry more generally, potentially including consideration of additional authors such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should demonstrate knowledge in detail about the authors, their works, and ancient lyric; They should engage critically with current scholarship relating to ancient lyric's historical, social, literary, and intellectual contexts

GREK 451 Greek Comedy (3 Credit Hours)
This course may focus on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E., or consider the development of New Comedy from Old in the more broadly cosmopolitan Hellenistic world.
Outcomes:
Students should demonstrate knowledge in detail about authors, plays, and the comedic forms; They should engage with current scholarship addressing Greek comedy's historical, social, and intellectual contexts and influences

GREK 453 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 454 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 455 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 462 Plato (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic and/or other philosophical dialogues.
Outcomes:
Students should demonstrate knowledge in detail about the author and his work; They should engage critically with current scholarship concerned with Platonic thought and the historical, social, and intellectual contexts and influences pertaining to it

GREK 473 New Testament Language (3 Credit Hours)
This course centers on study of the language and literary expression of selections from the New Testament.
Outcomes:
Students should demonstrate knowledge and understanding of the texts; They should engage critically with current scholarship exploring the linguistic, historical, social, literary, and intellectual contexts of the New Testament

GREK 488 Readings in Greek Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 489 Readings in Greek Lit II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving ancient Greek language or literature, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Hebrew (HEBR)

HEBR 499 Directed Study (3 Credit Hours)
Pre-requisites: Graduate Status; Department Consent required
Independent/directed study of Modern Hebrew, spoken and written.
Outcomes:
Phonetics, grammar, syntax, vocabulary of Modern Hebrew will be learned

History (HIST)

HIST 400 Contemporary Approaches to History (3 Credit Hours)
The course focuses on twentieth-century historical writing, emphasizing changing interpretive paradigms and innovative methodologies, and will introduce students to the range of topics and influences that now shape the discipline.
Outcomes:
Students will demonstrate their ability to analyze historical interpretations, while honing their skills in writing and oral presentation

HIST 403 Professional Lives of Historians (3 Credit Hours)
This course explores pedagogical, professional, and ethical issues of importance to historians. We will examine the many identities of historians and the relationship between training in history and career pathways. Students will explore the history of the historical profession, approaches to teaching history, ethical issues in history as well as the diverse pathways available to those with training in history. Each student will complete a pedagogical activity, a career exploration report, and a professionalizing project. Required of all first year PhD students. Open to all other students as an elective.
Outcomes:
Recognize the application of historical training in many arenas; Understand the ethical challenges facing historians

HIST 410 Topics (3 Credit Hours)
Topics vary as this course allows for the offering of specialized topics designed to enhance the graduate curriculum. Students will be demonstrate knowledge of the key features of the topic, analyze and debate the various historical themes concerning it, and complete a historiographical or research paper related to the theme of the class.

HIST 441 Women's & Gender History: Europe (3 Credit Hours)
This course provides an introduction to the major themes and scholarship in women's and gender history. It examines a variety of debates about and methodological approaches to the historical construction of gender, ranging from histories of the body and sexuality to analyses of culture, politics, and the economy. It explores how gender identities were produced and contested at specific historical moments and in different locations.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST441/WOST441/WSGS441

HIST 442 Women's & Gender History: U.S.A. (3 Credit Hours)
The course explores the literature on women and gender in US history with attention to theoretical issues, a broad chronological scope, and cultural diversity. Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history while honing their skills in writing and oral presentation.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST442/WOST442/WSGS442
Outcomes:
Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history, while honing their skills in writing and oral presentation

HIST 450 Nineteenth Century America (3 Credit Hours)
This course focuses on major historiographical questions reflecting the diversity of inquiry in the field of nineteenth century U.S. history. Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century. Students learn to critique recent historical literature through discussion and reflective essays.
Outcomes:
Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century; Students learn to critique recent historical literature through discussion and reflective essays

HIST 459 Environmental History (3 Credit Hours)
Environmental history expands the customary framework of historical inquiry, incorporating such actors as animals, diseases, and climate alongside more familiar human institutions and creations. This course will expose students to the major concepts, tools, and sources in the field. It will equip students to describe major changes in approaches to environmental history. It will prepare students to write, teach, and develop research projects on environmental history.
Outcomes:
1) Exposure to the major concepts, tools, & sources in the field; 2) Ability to describe major changes in approaches to environmental history

HIST 460 Urban America (3 Credit Hours)
This course examines the evolution of the United States from a rural and small-town society to an urban and suburban nation. Cities, and especially Chicago, have long offered some of the best laboratories for the study of American history, social structure, economic development and cultural change. This colloquium will provide a historiographical introduction to the major questions and issues in the culture and social life of American cities.

HIST 461 Twentieth Century America (3 Credit Hours)
Reading and discussion seminar. Students will read monographs and articles in 20th century U.S. history, including social, cultural, intellectual, and other approaches. The final assignment will be a long historiographic paper.

HIST 464 Transnational Urban History (3 Credit Hours)
This class exposes students to the history of cities across a broad spectrum of time and place. The level of analysis is both more global and more local than traditional narratives of the nation state. This course explores the recurring challenges and possibilities of urban life and urban governance across cultures and time. An emphasis on reading and writing will help students develop the skills of critical analysis. Restricted to Graduate Students.
Outcomes:
Appreciation for the recurring challenges and possibilities of urban life and urban governance across cultures and time; An emphasis on reading and writing will help students develop the skills of critical analysis

HIST 479 Public History Media (3 Credit Hours)
An introduction to the field of digital humanities and public media. Through a series of assignments and in-class labs centered around common Digital Humanities tools and platforms, the class will explore current and historical conversations in digital humanities and new media and address theoretical and practical problems involved in digital humanities-based methods and methodology. The final product of each assignment will be a collaborative digital public humanities project.
Outcomes:
Possess an introductory technical knowledge of digital tools or methods; Ability to apply technical knowledge about digital history tools to historical questions; Familiarity with managing and creating a team-based digital humanities project

HIST 480 Public History: Method & Theory (3 Credit Hours)
This course explores the field of public history with special emphasis on the theoretical and methodological challenges faced when preserving or presenting history outside of a formal classroom environment. Also under consideration will be the professional and ethical responsibilities of the historian both inside and outside of the university setting. Students will be able to understand the theoretical and methodological issues of importance to the field of public history, reflect upon ethical issues involved in the collection, curation, and presentation of history, and participate in applied projects drawing upon public history methodologies and presentation modes.

HIST 481 Management of Historic Resources (3 Credit Hours)
This class is an introduction to historic preservation. The class will review the way public historians work to protect the material culture of the built environment on a local, state, and national level. The class will consist of lectures on aspects of historic preservation, the discussion of weekly readings, and the execution of a preservation project. The project will be to prepare a National Register of Historic Places nomination on a single property or historic district.
Outcomes:
Understand the types of practice that characterizes the field of historic preservation; Understand current emerging issues in historic preservation from an ethical perspective; Experience carrying out the role of the public historian in historic preservation, ability to identify and explain the cultural value of what should be preserved

HIST 482 Archives and Record Management (3 Credit Hours)
This course introduces basic archival theory and methodology. Particular emphasis will be placed on ethics, best practices, and the relationship of archives to allied fields.
Outcomes:
Communicate what archives are and the basic tenants of the profession to a lay audience; Apply archival terminology and concepts to real world scenarios; Identify opportunities in the archival field that are appropriate for their career goals and level of experience; Apply the basics of collection care principles to any given collection at an institution; Understand the components of arrangement and description

HIST 483 Oral History: Method and Practice (3 Credit Hours)
This course will give students a basic understanding of oral history by asking several questions of the discipline, including: What exactly is oral history and what sets it apart from other historical research methodologies? What are the ethical issues involved in undertaking oral history? How does one conduct, record, and archive an interview? What steps are necessary in constructing an oral history project? What are the merits of the various products that can be derived from oral history in both texts and multimedia? In addition to reading oral historical texts and theory, students will conduct at least two interviews and participate in an ongoing oral history project. Students will learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition.
Outcomes:
Ability to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition

HIST 484 Material Culture (3 Credit Hours)
This class is restricted to Graduate students. This course is an introduction to approaches to the study of American material culture in its many forms, including decorative arts and mass-produced consumer objects; urban form, vernacular architecture, commemorative landscapes; the body and dress; foodways; and the material culture of childhood. The course will consider the ways scholars use material culture to "do" history, with an emphasis on artifacts as evidence.
Outcomes:
1) Students will understand the theory and practice of material culture study; 2) Students will gain experience in artifactural analysis; 3) Students will research and interpret material culture

HIST 487 Public History: Museums (3 Credit Hours)
This course introduces graduate students to issues involved in the management of history museums while considering many questions about the role and function of museums in American society. What does it mean to say that museums serve the public? How can museums become more diverse, equitable, accessible, and inclusive institutions? How do museums tell stories and who gets to decide what stories to tell? How and why do museums collect, care for, and display some objects and not others? Why do people visit museums, what do they experience there, and what do those visits mean to them? What does "success" look like and how does one measure it? What financial, administrative, and ethical issues do museums face? How can museums critically address today's complex political, cultural, and social realities?
Outcomes:
Possess introductory knowledge of the issues involved in the management and operation of history museums; Understand the historic and current role and function of museums in American society; Familiarity with various aspects of museum practice through hands-on activities and project-based coursework

HIST 496 Race, Violence & Memory (3 Credit Hours)
Pre-requisites: Graduate Student status
In the last generation, historians, literary scholars, and other humanists have intensified the study of historical memory and commemoration, even as public demonstrations, debates, and legislation over historical markers and monuments have proliferated. This course examines the ways that Americans have remembered, forgotten, and argued over violent episodes that have played important roles in their history. We will examine three aspects of historical memory: how individuals, institutions, and movements created and silenced historical memories; how these memories were embodied in the commemorative landscape; and how memories and public landscapes have changed over time.
Outcomes:
The course¿s primary goals are provide students with an understanding of these changing historical memories and the tools to incorporate them into the their future professional lives

HIST 498 Dissertation Research (3 Credit Hours)
Students register for this course once they begin work on their dissertation and have not yet completed the sixty hours required for the PhD degree. If necessary, this course can be taken up to three times.

HIST 499 Directed Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest. There is a form that must be completed and submitted prior to course registration. There are limits on how many of these can be taken over the course of a student's career: MA (2 times) and PhD (3 times).

HIST 510 Research Seminar - Special Topics (3 Credit Hours)
Research seminar using primary sources in cultural, social, technological, intellectual, and institutional history. Topics vary according to the interest of the instructor. Students will learn how to local and analyze archival material to develop an original article-length research paper. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 555 US Social & Intellectual History (3 Credit Hours)
Research seminar that focuses on different topics relating to the social and intellectual history of the United States. Students learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 558 Studies in American Cultural History (3 Credit Hours)
Research seminar focused on primary sources in American cultural history. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 561 Seminar-Gender & Women's History (3 Credit Hours)
This seminar focuses on the use of gender as a category of analysis in history and is particularly appropriate for those who have taken courses in Women's and Gender History or Women's Studies. Students will produce a research paper; they may choose any topic relevant to issues of gender or women for any time period or society, as long as adequate primary sources are available.

HIST 581 Practicum in Public History (3 Credit Hours)
Pre-requisites: HIST 480
Practicums provide students with specific exposure to an aspect of the practice of public history. Practicums are undertaken either under the direct supervision of Loyola faculty or the joint supervision of a Loyola faculty member and a cooperating off-campus supervisor.
Outcomes:
Strengthen skills used in the classroom, including teamwork and reflective practice in praxis situations; Gain experience in communication, collaboration, and intellectual self-confidence; Possess the opportunity to produce a public history work product; Broaden the public history toolkit

HIST 582 Public History Internship (1-3 Credit Hours)
The internship will provide an extended practical experience in the field of public history. Internships are tailored to fit the needs of the individual student and the needs of the off-campus agency involved. As part of their program, all public history students must undertake an internship either doing public history in the private sector or with a public agency. The internship is available during any semester and its timing is related to an individual student's progress in the program. This is a variable credit course. Students in the MA Public History program take a 1-hour internship (50 hours minimum). Students in the PhD program, the MA Program or the dual MAPH/MILS Program take a 3-hour internship (150 hours).
Outcomes:
Enhanced skills learned via program coursework, including teamwork and reflective practice, in praxis situations; Ability to synthesize out-of-classroom and in-classroom learning through practice; Ability to synthesize out-of-classroom learning through reflection; Possess the opportunity to produce a work product appropriate to their particular internship

HIST 584 U.S. Local History (3 Credit Hours)
Research Seminar that explores the nature and practice of local history and explores various methods and approaches central to local history research. This course will introduce students to the literature on local history, acquaint them with the methodology critical to local history research, and have them conduct original research on a local history topic.
Outcomes:
This course has three objectives: 1. to introduce students to the literature on local history; 2. to acquaint students with the methodology critical to local history research, 3. to conduct original research on a local history topic

HIST 585 Career Diversity Internship (3 Credit Hours)
An elective course that allows PhD and MA students explore a career pathway and have the opportunity to see how the skills gained in History can be applied to diverse career settings. Students will gain an exposure to a non-academic career, develop new skills, and gain experience is communication, collaboration, and intellectual self-confidence.
Outcomes:
Exposure to a non-academic career; development of new skills; gain experience in communication, collaboration, & intellectual self-confidence

HIST 598 Dissertation Proposal Seminar (3 Credit Hours)
Students work closely with an advisor to prepare their dissertation proposal.

HIST 599 Directed Primary Research (3 Credit Hours)
Students work under the direction of an advisor on a specific research project and produce a Master's Essay in lieu of the seminar requirement. There is a form that must be completed and submitted prior to course registration.

HIST 600 Dissertation Supervision (1 Credit Hour)
Students take this course once they complete all requirements for the PhD except the dissertation. The purpose of this course is to maintain active enrollment in the Graduate School during the fall and spring semesters. No credit hours are associated with this course and students receive a grade of CR.

HIST 605 Master's Study (1 Credit Hour)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

HIST 610 Doctoral Study (1 Credit Hour)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

Interdisciplinary Studies (INDS)

INDS 400X TBA-Foreign Stdy (0.5-15 Credit Hours)
Temporary indicator course for the duration of the study abroad program.

International Affairs (INTA)

INTA 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems. Restricted to Graduate School students.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

INTA 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics. Restricted to Graduate School students.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

INTA 470 Fieldwork in PLSC-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

INTA 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science. Restricted to Graduate School students.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

Latin (LATN)

LATN 415 The Latin Fathers (3 Credit Hours)
This course examines the writings of the early church fathers such as Ambrose, Jerome, and Augustine, looking through them to the historical and intellectual background of Western patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the texts, their authors, and their times; They should engage critically with current scholarship of the field

LATN 418 St Augustine (3 Credit Hours)
This course focuses on selected works of Augustine, set against the backdrop of Roman society and Mediterranean Christianity in the later Roman period.
Outcomes:
Students should demonstrate knowledge in detail about Augustine, his world, and his works; They should engage with current scholarship addressing Augustine's religious, intellectual, literary, social, and historical contexts and influences

LATN 431 Caesar (3 Credit Hours)
This course focuses on Julius Caesar's Commentaries on his Gallic War and the Civil War against Pompey the Great. It examines the texts within multiple frameworks in order to understand the political, military, intellectual, and historical contexts of Caesar's writing.
Outcomes:
Students should demonstrate detailed understanding of Caesar, his texts, and contexts; Additionally, students should engage critically with scholarship relating to Caesar and his place in the world

LATN 432 Livy (3 Credit Hours)
This course focuses on Livy's Ab Urbe Condita and the historical, intellectual, literary, and cultural contexts of this work. It considers Livy's place in Rome's historiographical tradition and the relationship of his work to the emerging imperial government.
Outcomes:
Students should demonstrate detailed understanding of Livy and his historical and cultural context; Additionally, students should engage critically with scholarship on Livy and his work

LATN 435 The Annals of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 436 The Histories of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 438 Suetonius (3 Credit Hours)
This course focuses on Suetonius's Lives and the historical, intellectual, literary, and cultural contexts of his writing. It examines the genre of biography in the ancient historiographical tradition and explores Suetonius's depiction of the Roman Emperors as both biographical and literary creations.
Outcomes:
Students should demonstrate detailed understanding of Suetonius and his historical and cultural context; They should engage critically with current scholarship on Suetonius, his project, and his milieu

LATN 441 The Aeneid of Virgil (3 Credit Hours)
This course centers on Vergil's Aeneid. It examines the poem's place in the tradition of Latin epic poetry with attention to Vergil's literary technique. It explores the poem's participation in and resistance to the Augustan imperial political program. It will touch on the enduring influence of the poem.
Outcomes:
Students should demonstrate detailed understanding of Vergil and the Aeneid; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 442 Earlier Works of Virgil (3 Credit Hours)
This course centers on Vergil's Eclogues and/or Georgics. It examines the genre(s) of bucolic and/or didactic poetry, focusing on Vergil's developing technique, especially his commitment to Alexandrian and Neoteric principles. It will explore how these poems respond to the uncertainty of the political moment and emergence of Imperial rule.
Outcomes:
Students should demonstrate detailed understanding of Vergil and his early poems; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 443 Catullus (3 Credit Hours)
This course centers on Catullus, the literary genres and traditions in which he worked, and the particular moment of late-Republican neoteric poetry. It considers Catullus' importance as an innovator in Latin poetry, his place in the social fabric of aristocratic Roman culture and how his poetry reflects that culture.
Outcomes:
Students should demonstrate detailed understanding of Catullus' works, literary technique, and world; They should engage critically with scholarship relating to Catullus' historical, social, literary, and intellectual contexts

LATN 444 Roman Elegy (3 Credit Hours)
This course focuses on Latin elegiac poetry through selections from Catullus, Tibullus, Propertius, and/or Ovid. The course explores elegy as a peculiarly Roman literary tradition linked closely to the Late Republic and Early Empire. It examines the recurrent themes and techniques of Latin Elegy.
Outcomes:
Students should demonstrate detailed understanding of Latin elegy; They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre

LATN 445 Ovid (3 Credit Hours)
This course centers on the poetry of Ovid, the genres in which he wrote, and the cultural, social, and historical contexts in which he worked. It explores Ovid's role as both a continuator and innovator within the Roman literary tradition and how his poetry responds to his socio-political moment.
Outcomes:
Students should demonstrate detailed understanding of Ovid and his work; They should engage critically with scholarship concerned with Ovid's social, cultural, and literary contexts and influences

LATN 446 The Odes of Horace (3 Credit Hours)
This course centers on the Odes of Horace, their relationship with traditions of lyric poetry and Roman Alexandrianism, and the cultural, social, and historical contexts to which Horace responded. The course examines Horace's poetic technique and his engagement with the emerging Augustan imperial regime.
Outcomes:
Students should demonstrate detailed understanding of Horace's Odes and their place in Roman poetry; They should engage critically with scholarship addressing Horace's work and various contexts

LATN 451 Roman Comedy (3 Credit Hours)
This course focuses on Roman comedy, including selected plays of Plautus and/or Terence. It examines the place of these works in the traditions of New Comedy more generally, exploring how they are produced in Latin as theater in the context of Roman Republican society.
Outcomes:
Students should demonstrate detailed understanding of the authors, the comedies, and their traditions; They should engage critically with scholarship addressing the plays multiple contexts and influences

LATN 455 Tragedies of Seneca (3 Credit Hours)
This course focuses on selected tragedies of Seneca. It examines these works in light of the traditions of ancient tragic drama and Latin literature more generally. It also explores the connection of these plays to Seneca's Stoic philosophy and the imperial regimes of Claudius and Nero.
Outcomes:
Students should demonstrate detailed understanding of Seneca's tragedies; They should engage critically with scholarship addressing Seneca's literary, philosophical, cultural, and historical contexts and influences

LATN 461 Lucretius (3 Credit Hours)
This course centers on the De Rerum Natura of Lucretius. It examines Lucretius' literary technique and his place in the Roman tradition of hexametric poetry. It also explores Lucretius as a major exponent of Epicurean philosophy and the scientific world view of that philosophical tradition.
Outcomes:
Students should demonstrate detailed understanding of Lucretius' work and its significance; They should engage critically with scholarship addressing Lucretius' literary, philosophical, cultural, and historical contexts and influences

LATN 462 Philosophy of Cicero (3 Credit Hours)
This course focuses on the philosophical works of Cicero and the Roman reception of Greek philosophical thought. It explores Cicero's role as a conduit into the Roman world for Greek ideas, including his contribution to the establishment of a philosophical vocabulary, and the enduring influence of his work.
Outcomes:
Students should demonstrate detailed understanding of individual works and Cicero's greater project; They should engage critically with scholarship addressing the various contexts and influences of Cicero's treatises

LATN 488 Readings in Latin Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 489 Readings in Latin Literature II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving Latin language or literature written in Latin, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATN 546 Seminar in Roman Satire (3 Credit Hours)
This course investigates Roman verse satire and its traditions through selections from Horace, Persius, and/or Juvenal, considered in their social, historical, and literary contexts. The Romans claimed satire as the one truly Roman genre: this course will explore the key themes and techniques animating the genre and its tradition. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.
Outcomes:
Students should demonstrate detailed understating about Roman Satire

Mathematical Sciences (MATH)

MATH 401 Introduction to Graduate Study in Mathematics (1 Credit Hour)
Pre-requisites: Graduate Student status
This is a professional development seminar for the beginning graduate student. Through short lectures, faculty panels, career panels, regular reading and writing assignments, and assorted workshops, it provides the student with the tools they need to succeed in the program, and beyond.
Outcomes:
Students will: gain practice reading, writing, listening to, and summarizing advanced mathematics; learn the pedagogical, ethical, and DEI matters associated with careers in the mathematical sciences; gain practice giving lectures, writing problem-sets, and grading mathematics; explore possible career trajectories

MATH 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

MATH 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

MATH 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

MATH 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: Some background in programing, linear algebra and differential equations
An introduction to numerical techniques for solving mathematical problems where exact solutions are impractical or computationally intensive. Topics include numerical errors, root finding, interpolation and approximation, methods for solving systems of linear equations, high order numerical differentiation and integration, eigenvalue problems, numerical solutions to ordinary and partial differential equations, and other selected topics.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will obtain an understanding of theoretical concepts and rigorous analytical skills for the use of numerical methods to analyze and solve complex mathematical and real-world problems

MATH 413 Algebra I (3 Credit Hours)
Pre-requisites: Graduate standing
This course covers basic algebraic structures, focused mainly on groups. Topics include normal subgroups, isomorphism theorems, and actions on sets. Additional topics chosen from the theory of groups or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about groups and their actions, preparing them for further advanced work in mathematics

MATH 414 Algebra II (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 413 or permission from the Graduate Program Director
This course covers basic algebraic structures, focused mainly on rings, fields and Galois theory. Additional topics chosen from the theory of rings fields or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about rings and fields, preparing them for further advanced work in mathematics

MATH 415 Topics in Linear Algebra (3 Credit Hours)
Pre-requisites: Graduate standing
An abstract approach to the study of finite- and infinite-dimensional vector spaces and their transformations. Selected topics may include similarity, duality, canonical forms, singular value decomposition, inner products, discrete Fourier transform, bilinear forms, Hermitian and unitary spaces.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about finite- and infinite-dimensional vector spaces and their transformations, preparing them for further advanced work in mathematics

MATH 416 Survey of Algebra (3 Credit Hours)
Pre-requisites: Graduate Student status
A survey course in three parts. I: the theorems of Burnside, Sylow, and Jordan-Holder, toward the classification of finite simple groups. II: (noncommutative) rings and modules over PIDs, including applications to classification problems. III: additional topic chosen by instructor, e.g., category theory, homological algebra, division rings, and representation theory.
Outcomes:
Students will demonstrate facility with standard proof techniques in abstract algebra, and the ability to work with algebraic structures (including actions, morphisms, and quotients; concretely and abstractly); Students will recognize the common theme of classification uniting the course topics

MATH 418 Combinatorial Mathematics (3 Credit Hours)
An introduction to the basic methods of counting and generation, including: induction, pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, and inclusion-exclusion principle. Topics drawn from partitions, graph theory, graph coloring, and combinatorial design, Polya's theory, Ramsey's theorem, and optimization problems.
Course equivalencies: X-COMP418/MATH418

MATH 420 Topics in Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 351 or permission of the instructor
This course will be a mathematical study of the concepts of truth and proof and how they relate to each other. The main topics to be covered are propositional logic, first order predicate logic, computability and undecidability results.
Outcomes:
Students will develop proof writing skills, expand mathematical literacy, understand the expressive power and limitations of propositional and predicate logics and learn the mathematical meaning of "truth" and "proof"

MATH 422 Advanced Topics in Number Theory (3 Credit Hours)
Pre-requisites: MATH 201 or the equivalent or permission of the instructor
Topics chosen from: Pythagorean triples, Fermat's Last Theorem, Pell's equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others.
Outcomes:
Understand the importance of historically significant concepts and problems in number theory; Understand the proofs of related theorems; Solve problems and prove theorems from topics covered in class

MATH 428 Algebraic Coding Theory (3 Credit Hours)
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, quadratic residue codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-COMP428/MATH428

MATH 431 Cryptography (3 Credit Hours)
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Additional topics may include more modern cryptosystems, such as those based on elliptic curve and lattices.
Course equivalencies: X-COMP431/MATH431

MATH 443 Intro to Algebraic Topology (3 Credit Hours)
In the study of topology, algebraic constructions (called "invariants") are used to help determine whether two differently presented topological spaces are indeed different. In this course, we introduce various topics related to this endeavor, including homotopy equivalence of topological spaces, group presentations, homomorphisms of spaces and of groups, covering spaces, the fundamental group, and homology theories. Time permitting, the cohomology ring of a space will also be introduced.

MATH 444 Topics in Geometry (1-3 Credit Hours)
An axiomatic approach to the study of geometry. While Euclidean geometry will be the main focus, elliptic and hyperbolic geometries will also be studied in detail. Additional non-Euclidean geometries (including projective, metric, and finite) and additional approaches (such as transformations and synthetic treatments) will also make an appearance.

MATH 445 Financial Math Derivatives (3 Credit Hours)
A first course in the mathematics of derivatives pricing. Topics include options markets, Black-Scholes pricing formulas, stochastic calculus, hedging schemes, binomial option pricing, exotic options, and more general derivatives.

MATH 451 Analysis I (3 Credit Hours)
Pre-requisites: Graduate Standing
A rigorous review of the topology of, and of the functions on, the real line and more general metric spaces. Topics include sequences, including sequences of functions, completeness, compactness, continuity, uniform continuity, and differentiation.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 452 Analysis II (3 Credit Hours)
Pre-requisites: MATH 451 or MATH 351 or permission from the Graduate Program Director
A continuation of MATH 451. A rigorous treatment of Riemann and elements of Lebesgue integration, series, including series of functions, and select topics in continuity and differentiation of multivariable functions, fixed point, implicit and inverse function theorems.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 453 Complex Analysis (3 Credit Hours)
Pre-requisites: MATH 351 or MATH 451 or permission from the Graduate Program Director
A rigorous introduction to the algebra and geometry of complex numbers, topology of the complex plane, and the theory of functions of a complex variable, including: analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, conformal mapping, analytic continuation, transfer theory, etc.
Outcomes:
Students will master the mathematical rigor behind undergraduate complex analysis, gain exposure to advanced topics in complex analysis, and obtain preparation for further graduate courses in analysis and its applications

MATH 454 Survey of Analysis (3 Credit Hours)
Pre-requisites: Graduate Student status
An introduction to advanced topics in analysis, including measure theory, functional analysis and partial differentials equations. Measurable sets; the Lebesgue integral in Rn; Lp and other function spaces; weak convergence; Lax-Milgram Theorem; and the calculus of variations. These topics are then applied to the study of linear PDEs. Students will be able to apply these concepts to study PDEs.
Outcomes:
Students will understand the central elements of Lebesgue integration (from measurable sets to the fundamental theorem of calculus for Lebesgue integrals) and of Lp spaces (including Minkowski and Hölder inequalities)

MATH 456 Mathematical Modeling (3 Credit Hours)
Pre-requisites: Graduate standing
This course will involve students using various areas of mathematics, such as vector calculus, linear algebra, and differential equations, to formulate and analyze mathematical models in, for example, mechanics, physics, biology, economics, etc.
Outcomes:
Students will gain experience using the tools from previous mathematics classes to formulate models of real world phenomena

MATH 458 Optimization (3 Credit Hours)
Pre-requisites: MATH 351 or permission from the Graduate Program Director
The course is a rigorous treatment of linear, nonlinear, and integer optimization, and may include optimization on graphs, stochastic optimization, etc. Modeling of real-life problems as optimization problems, mathematical analysis of resulting optimization problems, including proving existence of solutions, optimality conditions, convergence of algorithms, and computational approaches to solving the problems will be covered.
Course equivalencies: X-MATH458/STAT458/428
Outcomes:
Students will learn how to recognize optimization problems, model real-life challenges as optimization problems, solve the problems using computational methods, and perform rigorous mathematical analysis of the problems and prove convergence of the computational methods

MATH 460 Game Theory (3 Credit Hours)
Pre-requisites: Graduate standing
The theory and applications of noncooperative and cooperative games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.
Outcomes:
Students will obtain an understanding of the fundamentals of mathematical game theory, including the theoretical underpinnings of this theory, and will be able to apply this knowledge in a variety of settings

MATH 465 Introduction to Partial Differential Equations (3 Credit Hours)
This course is an introduction to the subject of partial differential equations. Focus will be on studying linear partial differential equations, such as the wave equation, that appear ubiquitously in nature. To solve these equations we will use techniques such as separation of variables and Fourier series. We will also discuss different boundary conditions, and their physical interpretation.

MATH 466 Dynamical Systems (3 Credit Hours)
Pre-requisites: Graduate standing
Modeling, rigorous analysis, and prediction of short-term and asymptotic behavior of dynamical systems is studied. Continuous-time and discrete-time dynamical systems are considered, and modeled by usually nonlinear differential and difference equations, respectively. Motivation comes from biological, chemical, mechanical, and engineering systems.
Outcomes:
Students will be able to model dynamical systems, perform rigorous mathematical analysis of them, and predict their behavior

MATH 475 Functional Analysis (3 Credit Hours)
Metric, normed, Banach, Hilbert, and sequence spaces. Linear operators and Fourier analysis. Hahn-Banach extension principle, Baire category, and uniform boundedness. Selected applications to economics, physics, engineering, and quantum theory.

MATH 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
No course description is available
Course equivalencies: X-COMP476/MATH476

MATH 486 General Topology (3 Credit Hours)
Pre-requisites: Graduate standing
This course builds on the basics of point-set topology and discusses topological spaces, continuity, connectedness and path-connectedness, compactness, product spaces, quotient spaces, metric spaces, countability and separation axioms. Further topics may include category theory and basic homotopy theory.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about general topological spaces, preparing them for further advanced work in mathematics

MATH 488 Special Topics in Mathematics (1-4 Credit Hours)
Selected topics in mathematics not covered in the department's regular course offerings. May be repeated for credit.

MATH 495 Graduate Practicum in Mathematics (2 Credit Hours)
Pre-requisites: MATH 401 and (MATH 414 or MATH 452 or MATH 416 or MATH 454); Graduate Student status
A project-based course. Under faculty consultation, students will design and independently carry out a research project devoted to the development, pedagogy, or application of mathematics. To earn credit for this course, the student will deliver both an oral presentation and technical paper at the level expected in the professional workplace.
Outcomes:
Students will have: analyzed professional literature from multiple sources, resulting in a motivating question for the project; gained practice communicating clearly, concisely, and in-step with discipline norms; and contributed to the learning, teaching, or application of mathematics through their findings

MATH 498 Independent Study (1-6 Credit Hours)
This is a directed study course undertaken by advanced students and supervised by a member of the graduate faculty.

MATH 595 Thesis Supervision (1-6 Credit Hours)
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.

MATH 605 Master's Study (1 Credit Hour)
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the final practicum.

Philosophy (PHIL)

PHIL 400 Philosophy Research Tools (3 Credit Hours)
This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Plato
Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)
Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)
Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)
Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)
Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)
Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)
Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 417 Classical German Philosophy (3 Credit Hours)
Pre-requisites: Graduate student status
Classical German Philosophy begins with Kant and his immediate predecessors, and extends to the early mid-19th century, including figures such as Herder, Fichte, Schelling, Goethe, Schiller , and Hegel, Feurebach, and Marc, among others. This course may include critiques of developments out of classical German philosophy. Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical Philosophy. Students will also become competent in engaging basic research in the philosophy of this era.
Outcomes:
Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical philosophy

PHIL 419 Aesthetics (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in aesthetics.
Outcomes:
Students will become conversant with the major projects and schools of thought in the field of aesthetics; Students will also gain knowledge of contemporary scholarship and develop basic research skills in this field

PHIL 420 Hegel (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)
Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)
Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)
Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)
Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)
Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Philosophy (3 Credit Hours)
Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)
Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)
Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)
Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)
Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)
Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)
Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 453 Philosophy of Technology (3 Credit Hours)
Pre-requisites: Restricted to Graduate Philosophy students, Other graduate students may enroll with Graduate Program Director permission
Introduces students to key issues, debates, and figures in the philosophy of technology, including both metaphysical and ethical issues related to computation, artificial intelligence, and human versus machine personhood.
Outcomes:
Interpret and compare the work of major figures in the philosophy of technology; Analyze and evaluate the ethical implications of technology on human persons and society; Analyze and evaluate theories of the ontology of technology; Produce original arguments based on the text, figures, and themes engaged in the course and apply these arguments to contemporary technological issues

PHIL 454 Philosophy of Religion (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)
Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)
Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)
Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)
Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)
Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)
Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)
Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)
Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 478 Research Methods in Social Justice (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course looks at several different methodological approaches to social justice issues: broad ethical frameworks; specific ethical issues, such as intent and volition; quantitative analysis; US law; and international law.
Outcomes:
Students are expected to know how to conduct literature reviews, how to use these approaches in analyzing social justice issues, and how to write up and present their research

PHIL 479 Issues in Applied Ethics (3 Credit Hours)
Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)
Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)
This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.
Outcomes:
Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)
Introduces students to philosophical issues concerning the social sciences.

PHIL 483 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 484 Philosophical Anthropology (3 Credit Hours)
Prepares students for advanced work about philosophical conceptions of human existence.
Interdisciplinary Option: Women & Gender Studies

PHIL 485 International Ethics (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 487 Moral and Legal Issues of Economic Sanctions (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course will provide an introduction to economic sanctions in the context of foreign relations and global governance. We will look closely at the issues of effectiveness and humanitarian impact. We will also look at legal issues, such as the problem of extraterritoriality.
Outcomes:
It is expected that students will have an overview of how sanctions interact with international law, institutions of global governance, and human rights law

PHIL 490 Current Philosophical Issues (3 Credit Hours)
Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (0-3 Credit Hours)
This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of social ethics. the student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)
This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (1 Credit Hour)
This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.
Outcomes:
The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (1 Credit Hour)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (1 Credit Hour)
This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (1 Credit Hour)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (1 Credit Hour)
This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Physics (PHYS)

PHYS 495 AP Physics Workshop (3 Credit Hours)
This graduate level course offers pedagogical content knowledge training for in-service high school teachers preparing to teach AP Physics.

Political Science (PLSC)

PLSC 400 Scope and Methods of Political Science (3 Credit Hours)
This is a broad course that lays out the main approaches to political science.

PLSC 401 Intro to Research Design & Method (3 Credit Hours)
This course is an introduction to principles of research design in political science. The main objective of this course is to familiarize students with the social scientific approach to studying politics.
Outcomes:
Students will learn how to ask empirical questions about the political world, how to develop theories and generate testable hypotheses, how to collect appropriate types of evidence, how to answer research questions scientifically using such evidence, and how to clearly convey their evidence and argument to others

PLSC 402 Seminar on Empirical Analysis (3 Credit Hours)
The course allows students to develop additional methods to empirical analysis.

PLSC 404 Selected Problems in American Politics (3 Credit Hours)
This course focuses on selected problems in the study of American politics and the American Political system.
Outcomes:
Gain an in-depth understanding of selected problems in American politics and the American Political system

PLSC 405 American Executive Branch (3 Credit Hours)
This course relies on historical and contemporary scholarly literature on the American presidency to analyze the development and scope of rhetorical and party leadership, legislative relations, the commander-in-chief and diplomatic roles as well as the growth of the institutionalized presidency.
Outcomes:
Students will master the key literature on the American presidency as well as conduct research on a particular aspect of the US presidency

PLSC 406 American Legislative Branch (3 Credit Hours)
This course focuses on the organization of and decision-making in the US legislative branch.
Outcomes:
Students will fully understand how the US Congress is structured and legislates, as well as its interactions with other US institutions and with American society

PLSC 407 Public Policy-Making & Implementation (3 Credit Hours)
This course examines the process and dynamics of US policy-making systems.
Outcomes:
Students will understand the development of the public sector agenda, the policy formation and legitimation processes, and the role of implementation functions, as these relate to substantive issues or policy arenas

PLSC 409 Organizational Theory (3 Credit Hours)
The course offers a broad approach to the various theoretical and practical approaches to the study of organizations.

PLSC 410 Urban Politics (3 Credit Hours)
This course addresses the major theories, studies and issues of urban politics.
Outcomes:
Students will understand "political machines", parties, interest groups, voting, protests, minority and ethnic groups, city councils, mayors, bureaucrats and community power structures

PLSC 411 American Political Parties/Electoral Process (3 Credit Hours)
This course analyzes the roles and functions of the party system and voting behavior in the United States.
Outcomes:
Students will understand the role of mass communication and issues in elections, the impact of party identification, and the impact of the electoral system on behavior of party and voter

PLSC 412 Constitutional Politics (3 Credit Hours)
This course examines constitutional policy-making in the United States.
Outcomes:
Students will understand the political role of the Supreme Court, judicial values in constitutional adjudication, and the impact of court decisions

PLSC 416 US Political Institutions (3 Credit Hours)
The course surveys academic literature on political institutions in the United States including the legislative, executive, and judicial branches of the federal government, state and local governments, parties, interest groups, media organizations, and civic organizations.
Outcomes:
Students will gain an in-depth understanding of a wide variety of political institutions and how they interact with one another

PLSC 417 The American Legal System (3 Credit Hours)
This course examines the structure, functions, interrelationships, dynamics, and decision-making processes of the US legal system.
Outcomes:
Students will understand the major components of the American legal system - legislatures, administrative agencies, and courts

PLSC 418 Political Psychology & Socialization (3 Credit Hours)
This course examines psychological, social and environmental influences on political attitudes and behavior.
Outcomes:
Students will understand the psychodynamics of political development and socialization as they interact with opinion formation and political participation

PLSC 419 Managing Urban Government (3 Credit Hours)
This course studies the politics of urban government management.
Outcomes:
Students will understand the environments in which the urban manager functions

PLSC 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

PLSC 421 Democratic Political Systems (3 Credit Hours)
This course examines selected democratic political systems.
Outcomes:
Students will understand how selected democratic systems operate, focusing on their similarities and differences

PLSC 422 Authoritarian Political Systems (3 Credit Hours)
This is a graduate-level seminar on authoritarian political systems. The course explores theoretical perspectives on authoritarianism, political institutions in non-democracies, and paths to democratization.
Outcomes:
Students will become familiar with concepts and theories of authoritarianism, gain knowledge about different types of authoritarian rule, and learn about how authoritarian governments work and perpetuate power

PLSC 423 Soviet & Post-Soviet Politics (3 Credit Hours)
This course analyzes the development of Soviet and post-Soviet politics since 1917.
Outcomes:
Students will understand the emergence and development of Soviet politics, as well as its decline in the mid-1980s

PLSC 424 Politics of Developing Areas (3 Credit Hours)
This course examines the politics of the "developing world."
Outcomes:
Students will understand the methods used to analyze politics in the developing and underdeveloped nation-states

PLSC 425 Sub-Saharan Africa (3 Credit Hours)
This course examines politics in Africa from the pre-colonial period to the present.
Outcomes:
Students will understand issues relating to decolonization, ethnicity, class, political economy, democratization, and regime transition in Sub-Saharan Africa

PLSC 426 Latin American Politics (3 Credit Hours)
This course examines important themes in the study of politics in Latin America.
Outcomes:
Students will understand the current scholarship and methodologies in the study of Latin American politics

PLSC 427 Politics of the Middle East (3 Credit Hours)
Enrollment Conditions: Permission of the instructor required. This course offers a historical and thematic approach to study the society and politics of the contemporary Middle East. Two central aims of the course are to cultivate critical perceptions regarding widespread images and descriptions of the region and to bolster students' historical, socioeconomic and political knowledge of the region.
Outcomes:
Students will master important political science literature on the Middle East and be well positioned to pursue original research

PLSC 428 Political Violence (3 Credit Hours)
This course offers a thematic approach to the study of political violence with a particular focus on armed conflicts involving non-state actors (i.e., civil wars). It addresses a wide variety of questions informed by the cutting-edge research in political science and other disciplines.
Outcomes:
Students will develop an understanding of the causes of different forms of violence in different parts of the world, motivations of people who participate in violence, and solutions to armed conflicts

PLSC 429 Comparative Politics Selected Problems (3 Credit Hours)
This course examines selected issues in comparative politics.
Outcomes:
Students will master the literature or conduct research in a particular area of comparative politics

PLSC 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

PLSC 431 Formulation US Foreign Policy (3 Credit Hours)
This course examines how US foreign policy is made.
Outcomes:
Students will understand the decision-making institutions and their interaction in the formulation and execution of political, military and economic foreign policy

PLSC 432 Comparative Foreign Policy Analysis (3 Credit Hours)
This course examines contemporary policy positions of major blocs of nations as well as specific nations.
Outcomes:
Students will understand how foreign policy is made in countries other than the United States, as well as the policy of blocs of nations

PLSC 433 International Organization (3 Credit Hours)
This course examines the development and role of international organizations.
Outcomes:
Students will understand the political and administrative principles and problems of various types of international organizations, including the United Nations, the World Trade Organization, the World Bank, the International Monetary Fund and other key global and regional organizations

PLSC 435 International Political Economics (3 Credit Hours)
This course examines global economic systems.
Outcomes:
Students will understand global political-economic relations in the post-WWII period, including international monetary relations, international trade, regional integration, direct investment, debt, and development assistance

PLSC 436 International Conflict (3 Credit Hours)
This course focuses on concepts and approaches related to the causes of war, conflict and peace in the international system.

PLSC 437 Selected Problems International Law (3 Credit Hours)
This course examines selected issues or problems in international law.
Outcomes:
Students will understand contemporary theories of international law and the relationships among the various traditional and contemporary areas of international law

PLSC 439 Selected Problems in International Politics (3 Credit Hours)
This course examines important themes and theories in international politics.
Outcomes:
Students will master a specific body of literature or conduct research in a particular area of international relations

PLSC 440 Ancient Political Thought (3 Credit Hours)
This course examines the major works of the most important theorists within the classical tradition.
Outcomes:
Students will master key writings of Thucydides, Plato, Aristotle, and other theorists

PLSC 442 Modern Political Thought (3 Credit Hours)
This course examines major modern political thinkers.
Outcomes:
Students will master key works of from the Italian Renaissance to the French Revolution

PLSC 444 Great Authors (3 Credit Hours)
This course focuses on the works of political theorists in the western tradition.
Outcomes:
Students will master key works of theorists in the western tradition

PLSC 446 Political Ethics (3 Credit Hours)
This course surveys classic debates on ethics - such as utilitarianism and deontological ethics - to provide students with analytical tools to answer the deceptively simple question "What is the right thing to do?" The course draws on classical readings of political philosophy, while seeking to make those abstract problems tangible by applying them to real world cases and examples.

PLSC 447 American Political Thought to Civil War (3 Credit Hours)
This course examines pre-Civil War US political thought.
Outcomes:
Students will master the works of key thinkers from the American founding to the Civil War

PLSC 449 19th Century Political Thought (3 Credit Hours)
This course examines key theorists in the nineteenth century.
Outcomes:
Student will master the works of key theorists beginning with the French Revolution and through the nineteenth century

PLSC 470 Fieldwork in Political Science-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

PLSC 476 Political Analysis II (3 Credit Hours)
This is an intermediate course in data analysis methods in political science.
Outcomes:
Students will master intermediate research and quantitative methods in political science

PLSC 499 Directed Readings (3-6 Credit Hours)
This course involves specialized study under the supervision of a faculty member.
Outcomes:
Students will master a particular segment of academic literature or conduct in-depth research on a specific topic

PLSC 502 Seminar in Political Behavior (3 Credit Hours)
This course examines selected topics in the development and shaping of political behavior.
Outcomes:
Students will master the political behavior literature and conduct research in specific areas of the discipline

PLSC 503 Seminar: Law & Political Behavior (3 Credit Hours)
This course analyzes selected topics concerning the relationship between legal processes, policies, and politics.
Outcomes:
Students will understand a particular topic in law and political behavior

PLSC 504 Seminar: American Public Policy (3 Credit Hours)
This seminar analyzes the American public policy.
Outcomes:
Students will understand the formation, implementation, and evaluation of public policies in the United States

PLSC 505 Seminar in Urban Problems (3 Credit Hours)
This course analyzes selected policies in urban and state politics.
Outcomes:
Students will understand the politics of specific urban and state policies

PLSC 506 Seminar State & Urban Policy Analysis (3 Credit Hours)
This course examines current perspectives and techniques in the analysis of state and urban policies.
Outcomes:
Students will understand contemporary policy analysis perspective and techniques as well as methods in policy analysis

PLSC 515 Seminar-Public Administration (3 Credit Hours)
This is an upper-level seminar on complex questions related to public administration.

PLSC 520 Seminar: Comparative Politics (3 Credit Hours)
This course examines an important, contemporary area of research in comparative politics.
Outcomes:
Students will master a specific body of literature and conduct research in a specific area in comparative politics

PLSC 521 Seminar Western European Politics (3 Credit Hours)
This course examines contemporary politics in Western European countries.
Outcomes:
Students will understand political and policy developments in Western Europe, as well as the structures of the European Union and the North Atlantic Treaty Organization

PLSC 531 Seminar: International Politics (3 Credit Hours)
This course examines various research topics in international politics.
Outcomes:
Students will master a particular body of work or conduct research in a specific area of international politics

PLSC 532 Soviet/Post-Soviet Foreign Policy (3 Credit Hours)
This course examines the foreign policies of the Soviet Union and the post-Soviet states.
Outcomes:
Students will understand the formulation and application Soviet and post-Soviet foreign policies

PLSC 533 U.S. National Security (3 Credit Hours)
This course examines the U.S. security establishment and the national security process.
Outcomes:
Students will understand how US security policy is made, including the defense budget, US force structure, intelligence, covert operations, and the role of Congress

PLSC 543 Liberalism (3 Credit Hours)
This course analyzes liberal political thought.
Outcomes:
Students will master key works and theorists focusing on equality, liberty, natural rights, utilitarianism, and idealistic bases of modern liberal society

PLSC 546 Political Philosophy Selected Problems (3 Credit Hours)
This course examines a selected theoretical issue in the history of political thought.
Outcomes:
Students will master the writings and theories in a particular theme of political theory

PLSC 595 Thesis Supervision (1 Credit Hour)
The is the first course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 596 Thesis Research (3 Credit Hours)
The is the second course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 597 Dissertation Research (3-6 Credit Hours)
The course is for students researching a thesis topic towards writing a dissertation prospectus.

PLSC 598 Teaching Internship (3 Credit Hours)
The course allows students to complete an internship focused on teaching.

PLSC 600 Dissertation Supervision (1 Credit Hour)
The course is for students researching a dissertation towards earning a PhD.

PLSC 605 Master's Study (1 Credit Hour)
The course is for students researching a thesis towards earning a Master's degree.

PLSC 610 Doctoral Study (1 Credit Hour)
The course is for students researching a dissertation towards earning a PhD.

Psychology (PSYC)

PSYC 401 History & Systems of Psychology (3 Credit Hours)
History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.
Outcomes:
Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology; The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure

PSYC 412 Introduction to the Profession of Clinical Psychology (3 Credit Hours)
Required course for PhD program in Clinical Psychology-an introduction to our field. This course provides an introduction to the profession of Clinical Psychology by focusing on basic research and clinical skills necessary for a career as a clinical scientist and practitioner.
Outcomes:
Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences

PSYC 420 Research Methods in Psychology (3 Credit Hours)
An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.
Outcomes:
Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports

PSYC 432 Intellectual & Personality Assessment (3 Credit Hours)
This course covers the psychometric properties, administration procedures, and applications of the most common adult psychological measures. Students will gain an understanding of psychometric theory.
Outcomes:
Students will be able to administer and become familiar with how to interpret a WAIS-III, the MMPI-2, the Sentence Completion Test, and the TAT

PSYC 435 Seminar in Cognitive Neuroscience (3 Credit Hours)
The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

PSYC 436 Psychopharmacology (3 Credit Hours)
The types and mechanisms of medications used in the treatment of mental disorder are reviewed. Emphasis is given to behavioral effects and treatment effectiveness of drugs. Psychopharmacological research design and literature are reviewed.
Outcomes:
Students will learn basics of neurotransmission and be informed about medications including antidepressants, mood stabilizers, anti-psychotics, and substance abuse

PSYC 438 Principles of Psychological Assessment Child & Adult (3 Credit Hours)
This course is designed to expose students to a variety of assessment tools and tests available for children ranging from 1 month to 18 years of age.
Outcomes:
Students will develop competence in the administration and write-up of basic intelligence, achievement, and visual motor tests for children presenting with, for example, learning disabilities, mental retardation, social/communication disorders

PSYC 440 Theory & Research in Psychology of Language (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language.

PSYC 446 Psychopathology (3 Credit Hours)
This course reviews concepts, research, and theory (historical and current) in psychopathology and emphasizes diagnosis and etiology.
Outcomes:
Students will gain an appreciation for the major issues in the area of psychopathology, the ability to think clearly and scientifically about these issues, and an understanding of major mental disorders

PSYC 451 Psychopathology of Childhood & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on adjustment problems during childhood and adolescence using an ecological-developmental perspective.
Outcomes:
By gaining insight into the factors that enhance or interfere with positive developmental processes, students learn how to apply research and theory to improve the services they will offer to children and families in their professional careers

PSYC 452 Clinical Treatment of Children & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on empirically-supported interventions for children and families.
Outcomes:
Students learn how to select and evaluate needed prevention programs and interventions for children and families to achieve therapeutic goals

PSYC 455 Developmental Psychology (3 Credit Hours)
This course provides an overview of theory and research on developmental psychology.

PSYC 460 Social Psychological Theory (3 Credit Hours)
Survey of basic concepts, theories, and research in social psychology. Contents include foundations of social psychology; broad theoretical orientations (e.g., evolutionary, behavioral, cognitive, affective, individual, societal, cultural); specific theories at the intrapersonal, interpersonal, intra-group, and inter-group levels of analysis.
Outcomes:
Knowledge and skills in theory construction and criticism; understanding relation between theory and research methods; applying theories to social problems

PSYC 461 Attitude and Attitude Change (3 Credit Hours)
Survey of attitude formation and change literature. Topics include the nature and measurement of attitudes, explicit versus implicit attitudes, effects of attitudes on cognition and behavior.
Outcomes:
Knowledge and skills that enable the integration of multiple theories to conceptualize attitudinal phenomena, critical evaluation of research, written and oral expression about attitude topics, application of attitude theories to practical problems

PSYC 462 Cognitive Social Psychology (3 Credit Hours)
In depth examination of the human cognition within its social context; including topics such as impression formation, attribution, stereotyping, prejudice, social information processing, mental control, affect and social information processing, unconscious social cognition.
Outcomes:
An understanding of basic theoretical approaches and scientific methods of hypothesis testing within social cognition; Development of skills needed to perform research within social cognition

PSYC 464 Practicum in Psychotherapy I (3 Credit Hours)
This two semester practicum course provides applied experience conducting psychotherapy at Loyola University Chicago's Wellness Center.
Outcomes:
For client populations seeking psychotherapy, practicum students will be able to develop a treatment plan, articulate treatment goals, develop a working therapeutic alliance, and execute elementary psychotherapeutic techniques

PSYC 472 Organizational Psychology (3 Credit Hours)
Covers theory, research, and methods associated with behavior in organizational settings. Learning outcomes include knowledge of theory and methods of personnel selection, performance measurement and appraisal, knowledge and skills training; theory and research on leadership, motivation, group behavior, etc.

PSYC 473 Social Development (3 Credit Hours)
This course is designed to provide an advanced level introduction and discussion of critical issues essential to the study of social development. The contribution of multiple contexts (e.g., family, peers, culture) to social development is a major focus of this class.
Outcomes:
Students will become familiar with the several theoretical accounts as well as major empirical findings in the core areas of social development

PSYC 474 Research in Group Dynamics (3 Credit Hours)
Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research.

PSYC 475 Cognitive Development (3 Credit Hours)
This course is designed to provide an advanced level introduction to critical issues in the study of cognitive development from infancy through childhood.
Outcomes:
Students will be expected to draw connections between the major theoretical accounts of cognitive development and the empirical literature in core areas of children's cognition

PSYC 477 The Self and Self-Esteem (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the self and self-esteem. Course will focus on where self knowledge comes from and how it affects human behavior.
Outcomes:
Knowledge of psychological theory and research on the self and self-esteem

PSYC 479 Cognition and Emotion (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the role that emotion plays in cognitive activity and behavior. Course will focus on how emotion affects cognition and how different emotions have different effects.
Outcomes:
Knowledge of psychological theory and research on cognition and emotion

PSYC 482 Advanced Statistics (3 Credit Hours)
Covers analysis of factorial designs and other multifactor data sets.
Outcomes:
Learning outcomes include theory and assumptions underlying analysis of variance and multiple regression; ability to use SPSS to analyze data from factorial designs and other multifactor research endeavors

PSYC 484 Prejudice and Intergroup Relations (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on intergroup relations, stereotyping and prejudice. Course will focus on the perceptions, cognitions and behaviors toward members of our own group and members of outgroups.
Outcomes:
Knowledge of psychological theory and research on intergroup relations and prejudice

PSYC 485 Psychology and Law (3 Credit Hours)
Application of social psychological theory and research to criminal behavior and the criminal justice system. Specific topics include crime causation, mass media effects, jury selection, eyewitness accuracy, and crime prevention.
Outcomes:
An understanding of core theoretical and methodological approaches to criminal justice research, development of skills needed to perform psychologically oriented criminal justice research

PSYC 486 Methods of Program Evaluation (3 Credit Hours)
Overview of program evaluation methods, politics, ethics, and applications; including topics such as quasi-experimental design, statistical analysis issues, ethical guidelines, implementation strategies, and presentation styles.
Outcomes:
An understanding of the methods, strategies, ethical issues, and implementation obstacles of evaluation research; Development of skills needed to perform high quality evaluation research in a variety of applied settings

PSYC 489 Political Cognition (3 Credit Hours)
Examination of the cognitive determinants of political judgments and decision; including topics such as political information processing, voting preference, political stereotyping, racism, ideology and public opinion, and media effects.
Outcomes:
An understanding of core theoretical approaches within political psychology, scientific methods of hypothesis testing within political psychology, and the development of skills needed to perform research within political psychology

PSYC 491 Multivariate Analysis (3 Credit Hours)
An introduction to the theory and application of multivariate statistical techniques in psychology.
Outcomes:
Students will learn the conceptual underpinnings (including matrix algebra) and will also learn to conduct analyses for the following procedures: multiple and logistic regression, MANOVA, loglinear analysis, canonical correlation, factor analysis, and cluster analysis

PSYC 493 Structural Equation Modeling (3 Credit Hours)
An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.
Outcomes:
An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses

PSYC 509 Seminar on Teaching Psychology (0 Credit Hours)
This course provides an introduction to the psychology teaching and learning.

PSYC 510 Ethics & Professional Practice (3 Credit Hours)
The ethical standards and practice of psychologists, including basic principles of ethics, application of ethics to professional practice and to research, and professional problems and practices are reviewed.
Outcomes:
Students will learn to manage complex ethical problems encountered in psychological practice, research, and education

PSYC 513 Adolescence (3 Credit Hours)
This course offers an in-depth study of adolescence from a psychological as well as cultural and historical perspective, with a focus on biological, cognitive, psychological, and social changes.
Outcomes:
Students will learn important components of psychological health and maladaptation during the adolescent developmental period and how family, peer, and school contexts affect adolescent development

PSYC 514 Research in Development Psychology (3 Credit Hours)
The goal of this course is to survey important methods, issues, research designs, and other topics specific to research in developmental psychology and cultivate students¿ scientific skills like critical thought and evaluation of research.
Outcomes:
Students will be able to demonstrate understanding of developmental methodology, design, ethical concerns, and other issues relevant to developmental science

PSYC 515 Infancy (3 Credit Hours)
The goal of this course is to survey important topics in the field of infancy, the period of development from birth through approximately 3 years.
Outcomes:
Students will demonstrate understanding of infant developmental science in particular content areas and the processes underlying change

PSYC 518 Seminar Selected Topics-Clinical Psychology (3 Credit Hours)
This course provides an overview of selected topics in clinical psychology.

PSYC 525 Seminar in Social Psychology (3 Credit Hours)
This course provides an overview of theory and research on social psychology.

PSYC 535 Internship in Applied Social Psychology (1 Credit Hour)
Students complete an applied social psychology internship during this course.

PSYC 540 Psychology of Language Development (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language development.

PSYC 545 Select Topics in Developmental Psychology (3 Credit Hours)
This course provides an overview of selected topics in developmental psychology.

PSYC 548 Risk and Opportunity in Childhood and Adolescence (3 Credit Hours)
This course provides an overview of theory and research on risk an opportunity in childhood and adolescence.

PSYC 552 Neuropsychology (3 Credit Hours)
Neuropsychology involves the interdisciplinary study of the relations between human brain function and behavior.

PSYC 553 Neuropsychological Assessment (3 Credit Hours)
This course covers the major areas of neuropsychological assessment, including major assessment techniques, interviewing, report writing, and psychometric issues.
Outcomes:
Students will learn major issues and topic areas in neuropsychological assessment (eg, attention, language, memory, visual perception, motor functioning, executive functioning, and emotional functioning)

PSYC 555 Social Psychology Research and Professional Development (0 Credit Hours)
Pre-requisites: Graduate student standing in Social Psychology
Course will involve research presentations and other forms of professional development.
Outcomes:
Course will involve research presentations and other forms of professional development

PSYC 556 Developmental Psychology Research and Professional Development (0 Credit Hours)
Pre-requisites: Restricted to graduate students in Developmental Psychology
This course will involve research presentations and other forms of professional development.
Outcomes:
Students will gain the skills and knowledge necessary to present their research to colleagues; Students will possess greater readiness for their post-graduate career

PSYC 560 Human Diversity (3 Credit Hours)
This course provides a foundation in human diversity as it relates to the practice of clinical psychology. The course will examine theoretical perspectives and research findings related to human diversity. The goal of this course is to challenge students to think critically about the influence of human diversity on their psychological practice, research, and teaching.

PSYC 568 Evidence-Based Practice in Clinical Psychology (3 Credit Hours)
Pre-requisites: PSYC 412, or approval of instructor
This course provides a theoretical and skills-based overview of evidence-based practice (EBP) in clinical psychology, and surveys the theoretical and applied aspects of various evidence-based intervention approaches in psychology, including Motivational Interviewing (MI), Interpersonal Therapy (IPT), Cognitive Behavior Therapy (CBT), and Dialectical Behavior Therapy (DBT). Students will demonstrate an understanding of current theories and methods in evidence-based psychotherapy.

PSYC 595 Thesis Supervision (1-3 Credit Hours)
Pre-requisites: Enrollment is Restricted to Psychology graduate students
Students will make supervised progress towards completion of their theses.

PSYC 596 Internship in Clinical Psychology (1 Credit Hour)
Students complete a full time APA approved clinical internship during this course.

PSYC 597 Integrative Readings in Psychology (3 Credit Hours)
Students complete integrated readings under the supervision of a faculty member.

PSYC 598 Research (3-6 Credit Hours)
Students complete research under supervision of a faculty member.

PSYC 599 Directed Readings (3-6 Credit Hours)
Students complete directed readings under the supervision of a faculty member.

PSYC 600 Dissertation Supervision (1 Credit Hour)
Students complete dissertation research under the supervision of a faculty member.
Outcomes:
Students will make progress on their dissertation research

PSYC 605 Master's Study (1 Credit Hour)
Students complete master's thesis readings and research under the supervision of a faculty member.
Outcomes:
Students will make progress on their MA thesis proposal

PSYC 610 Doctoral Study (1 Credit Hour)
Students complete dissertation readings and research under the supervision of a faculty member.

Sociology (SOCL)

SOCL 403 Sociological Perspectives I (3 Credit Hours)
Important theoretical and methodological concerns will be discussed with particular attention paid to how these concerns affect substantive areas in sociology.
Outcomes:
Students will gain familiarity with major themes that will shape their graduate education in sociology

SOCL 404 Sociological Perspectives II (3 Credit Hours)
Faculty will discuss their intellectual biographies and work that is of current interest to them.
Outcomes:
Students will gain familiarity with the range of substantive, theoretical and methodical concerns of the department's faculty

SOCL 405 History Sociological Thought (3 Credit Hours)
This course looks at the intellectual roots and expressions of the foundations of sociological theory in the 19th and early 20th century.
Outcomes:
Students will gain familiarity with the classical texts in sociological theory that established some of the basic perspectives, issues and debates that inform contemporary social theory and research

SOCL 406 Modern Sociological Theory (3 Credit Hours)
This course examines some of the dominant perspectives and trends of modern social theory.
Outcomes:
Students will develop familiarity with the primary sources that represent current trends in modern and postmodern theories

SOCL 410 Logic of Sociological Inquiry (3 Credit Hours)
This course explores the structures of sociological research, analyses, and explanations. Several major types of data collection will be examined and evaluated.
Outcomes:
Students will be able to formulate sociological problems, understand the relationship between problem formulation and data collection, measurement and analyses and develop the capacity to utilize different social scientific methods

SOCL 412 Qualitative Methods in Social Research (3 Credit Hours)
This course is an introduction to the major qualitative methods of social inquiry and the ethical issues raised by qualitative research.
Outcomes:
Students learn the skills of participant observation, interviewing, historical analysis, building theory from qualitative data, coding and content analysis

SOCL 413 Sociological Practicum (3 Credit Hours)
The class examines theoretical issues and past research relating to a particular social topic and then designs and completes a collective research project. Topics vary.
Outcomes:
Students gain facility with research design and group research practices

SOCL 414 Statistical Methods Analysis I (3 Credit Hours)
After a review of bivariate regression and cross-tabular analysis, the course provides an extended treatment of the general linear model. Topics include model construction, interpretation of results, partitioning of variance, tests of statistical significance and interactions.
Outcomes:
Students will be able to employ general linear models in original research and critically evaluate existing empirical research

SOCL 415 Statistical Methods of Analysis II (3 Credit Hours)
The course extends the applications of the general linear model to topics including path analysis, logistic regression, factor analysis and spatial and cluster analysis.
Outcomes:
Student will: understand the techniques with enough clarity to recognize when they are appropriate research tools; gain sufficient expertise to apply the techniques to moderately complex research problems; be able critically review the relevant literature

SOCL 418 Demography (3 Credit Hours)
This course examines the basic techniques used to assemble, analyze, and present demographic information. It also examines U.S. and world demographic trends and the causes and consequences of such demographic change.
Outcomes:
Students will gain an in-depth knowledge of demographic trends and an understanding of the sources, limitations, and advantages of various types of demographic data

SOCL 421 Theories Social Change (3 Credit Hours)
The course will critically appraise major theories of social change and examine different methodologies on both the macro- and micro-sociological levels.
Outcomes:
Students will gain a working knowledge of the major theoretical and methodological issues in the field

SOCL 423 Social Movements (3 Credit Hours)
This course will use case studies of contemporary social movements to examine collective efforts to promote social or cultural change. They will gain an understanding of the recursive relationship between empirical research and theory development.
Outcomes:
Students will be able to apply major theoretical perspectives on social movements to a variety of historical cases

SOCL 425 Inequality and Society (3 Credit Hours)
This is an empirical and theoretical inquiry into the causes, consequences, and dynamics of social inequality in modern societies.
Outcomes:
Student will be able to explain the distribution of economic, political, and social resources in society; the processes of class formation and the role of race and gender

SOCL 426 Sociology of Gender (3 Credit Hours)
This course surveys sociological and related scholarship on women and gender relations.
Outcomes:
Students will come to understand the social construction of gender and its centrality to studies of identity and sexuality, the division of labor, families and reproduction, violence, poverty, race, class and globalization

SOCL 427 Political Sociology (3 Credit Hours)
The course examines major theories of political action and change. Particular attention is paid to policy development.
Outcomes:
Students will develop an empirical and theoretical knowledge of the working of political systems and to be able to apply that knowledge to the development of social policy

SOCL 428 Poverty and Social Welfare (3 Credit Hours)
This course examines the development of poverty and social welfare efforts over time in the United States, with some comparisons to other industrial societies.
Outcomes:
Students will understand the character and consequences of poverty and social welfare policies in the United States, emphasizing current conditions and possibilities for the future

SOCL 431 Social Structure and Personality (3 Credit Hours)
This course examines the relationships between the individual and larger social structure and social trends.
Outcomes:
Students will gain familiarity with current research and theory concerning the relationship of self identity and personal narratives to socialization and structural factors, and the ways in which social class, work, race and nation construct age, gender and sub-cultural forms of subjectivity

SOCL 432 Socialization Thru Life Cycle (3 Credit Hours)
This course traces the nature of socialization and development of the individual through the life cycle.
Outcomes:
Students will become familiar with research and theory concerning the processes by which persons are socialized into sexual, racial, religious, occupational, marital, and parental social roles, identities and patterns of interactions at various stages of life

SOCL 435 Adult Development and Aging (3 Credit Hours)
The older adult population and adult development is examined from social and cultural perspectives.
Outcomes:
Studies will develop a knowledge of gerontological theories and research which pertain to the family, the community, political life, the economy, work and retirement, religious life, and other social institutions

SOCL 438 The Family (3 Credit Hours)
This course explores families, their changing internal structures, and their roles in contemporary societies.
Outcomes:
Students will develop an understanding of the household division of labor, mothering, the shifting character of marriage, the paid and unpaid work of care, dual career families, single parent households, racial/ethnic families, adoption, blended families, welfare policies, families in the class structure, and global issues

SOCL 439 Community Change (3 Credit Hours)
Contemporary communities are examined from a sociological perspective. Both geographic communities and communities of interest are studied.
Outcomes:
Students gain an understanding of how research can be used to facilitate social change in community settings; and an awareness of how community organizations, informal networks, and broader social forces shape the character and sustainability of particular communities

SOCL 440 Organizations & Organizational Change (3 Credit Hours)
This course examines the structures and processes that typify contemporary organizations, with particular attention to how organizations change.
Outcomes:
Students will be able to apply sociological methods to analyze organizations, and will develop an understanding of bureaucracy and alternative structures; the effect of organizational structure on administrators, workers, and clients; and how organizations are affected by their social environment

SOCL 441 Sociology of Religion (3 Credit Hours)
This course studies the relationship between religion and society, and explores central topics in the sociology of religion.
Outcomes:
Students will learn to define and explain religious organizations, beliefs, and practices as distinctly social phenomena, and understand how social processes both shape the form and content of religious life and in turn are shaped by them

SOCL 442 Religious Conflict & Change (3 Credit Hours)
This course will explore the complex reciprocal relationship between religion and historical processes of social change.
Outcomes:
Students will be able to analyze historical instances of religious conflict and change in the U.S. and other regions of the world; They will gain an understanding of how religion both affects and is affected by historical, political, and social change

SOCL 446 Knowledge, Power & Expertise (3 Credit Hours)
This course focuses on the relationship between knowledge, expertise and power in societies and how this relationship has consequences for the structure of knowledge and the organization of society.
Outcomes:
Students will be able to demonstrate a sociological understanding of the construction of knowledge and the organization of authority and expertise

SOCL 447 Sociology of Culture (3 Credit Hours)
This course will examine the relationship between social phenomena and cultural expressions, and the various ways sociologists have conceived of those relationships.
Outcomes:
Students will learn to apply sociological theories and methods to an analysis of cultural fields and understand the diversity of contemporary cultural objects and expressions, and how they are produced and used in social action

SOCL 448 Technology & Material Culture (3 Credit Hours)
This course will serve as an introduction to the sociology of things, most notably the sociology of technology, design and the built environment.
Outcomes:
Students will develop an understanding of both cultural, constructivist and political-economic approaches to the construction of technology and artifacts, and of a variety of theoretical approaches to the study of their impact and audience-response

SOCL 452 Complex Organizations (3 Credit Hours)
Formal organizations treated comparatively and systematically as major components of modern social organization are featured.
Outcomes:
Students will develop an understanding of leading theoretical traditions, historical and cross-national variation, organization-environment relations, and selected internal processes in the field of complex organizations

SOCL 453 Occupations and Professions (3 Credit Hours)
This course focuses on the structure of paid work in modern society, and its relationship to unpaid work and to self-employment. Special attention is given to the role of skills and knowledge in the structuring of work.
Outcomes:
Students will develop an understanding of how both macro and micro factors structure work; from capitalism, industrialism, gender, race and globalization to workplace interaction and culture

SOCL 461 Race & Ethnicity (3 Credit Hours)
This course explores the construction, meaning, uses and consequences of racial and ethnic identity in American society over time.
Outcomes:
Students will understand the role of migration and immigration on the construction of identity; analyze prejudice, discrimination, and inter-group conflict; and explore how social movements have and are changing these group relationships

SOCL 462 The Urban Metropolis (3 Credit Hours)
This course examines urbanization and its consequences through social theory and empirical studies emphasizing the modern European and American experience.
Outcomes:
Students will understand ecological and political economy perspectives on metropolitan development; changing regional patterns of population, housing, and employment; and urban governance, planning, and policies for the future

SOCL 463 Sociology & Natural Environment (3 Credit Hours)
This course examines the relationship between social life and the natural environment.
Outcomes:
Students will be able to demonstrate a sociological understanding of the relationship of humans to the natural environment and draw connections between basic ecological understandings of nature and the human impact on the natural world

SOCL 471 Sociology of Deviance & Control (3 Credit Hours)
This course is a socio-historical look at definitions of forms of deviant behavior and the identification of individuals as deviant.
Outcomes:
The student will learn how history and philosophy shape the definitions of deviant behavior and the methods used to control it; They will develop a sociological imagination to perceive the meaning of deviance beyond the superficialities of today's headlines

SOCL 473 Criminology (3 Credit Hours)
This course examines modern and traditional theories of criminology and their implications for social control, with emphasis on current work in criminology theory, social planning, and evaluation research.
Outcomes:
The student will acquire knowledge of the relationship between the various explanations of crime patterns and how these theories work to reduce or fail to reduce the level of criminal behavior

SOCL 481 Medical Sociology (3 Credit Hours)
This course will examine critical factors affecting mortality and morbidity; mental health; health services; community health; cross-cultural differences; aging and the strategy and conduct of socio-medical research.
Outcomes:
The student will be able to critically analyze the social components of illness and of health and to integrate theory and research in the study of health care institutions globally

SOCL 482 Education in Society (3 Credit Hours)
This course focuses on the social processes that affect both the means and ends of education. It has three units: Schools as Organizations; Inequality in Education; and Education and Cultural Reproduction. Open to all Graduate students.
Outcomes:
Improved understanding of the social processes and outcomes of education

SOCL 483 Teaching Sociology (3 Credit Hours)
Pre-requisites: Completion of at least one semester of graduate coursework
Students will learn to identify good teaching practices, to practice relevant skills, and to begin a lifelong process of professional development. They will develop materials for an undergraduate course.
Outcomes:
Students will create a portfolio of materials for an undergraduate course that reflect "best practices" in education

SOCL 490 Workshop: Applied Sociology (1 Credit Hour)
This focuses on special issues for methods used by applied sociologists, and topics vary from semester to semester. Most workshops involve presentations by faculty or applied sociologists from outside the university.
Outcomes:
Students will develop expertise in, for example: survey research, evaluation research, use of population data in policy making, focus groups, and developing community leadership

SOCL 491 Sociological Discourse (3 Credit Hours)
The course examines the nature of sociological argumentation in existing scholarly and popular literature and in the students' own writing.
Outcomes:
Students will be able to formulate and present sociological arguments in both oral and written forms, and to demonstrate their understanding of the relationship between problem formulation, data collection and measurement and analysis in their own and others' work

SOCL 494 Internship (3 Credit Hours)
Placements are typically in non-academic settings, e.g., government agencies, community organizations, businesses, or labor organizations. Students are expected to work a minimum of 100 hours and write an internship report.
Outcomes:
Students will develop skills in applying sociological methods and theoretical perspectives to the understanding and ameliorating of social issues in real world settings

SOCL 497 Independent Research (3 Credit Hours)
Students registered for independent study will meet as a workshop, under the guidance of a faculty member, at least three times per semester. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 498 Independent Research (1-3 Credit Hours)
Work on an individual research project under the supervision of a faculty member. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 499 Directed Study (3 Credit Hours)
Develop a reading list and paper under the supervision of a faculty member.

SOCL 500 Seminar-Applied Sociology & Social Policy (3 Credit Hours)
This course examines the use of sociology in determining and selecting alternative social policies.
Outcomes:
Students will develop knowledge about the roles that applied sociologists play in society; the relationship between sociologists and clients or organizations; the social research process and how it affects the research product; and ethical considerations of applied sociologists

SOCL 505 Controversery Current Social Thought (3 Credit Hours)
This is a seminar in which students and faculty will examine in detail particular controversies that are emerging in theoretical approaches to sociology. Topics will vary.
Outcomes:
Students will develop advanced skills in theoretical discourse

SOCL 510 Research Special Areas (3 Credit Hours)
Advanced methodology seminar in special topics.
Outcomes:
Students will develop advanced skills in the special area

SOCL 520 Topics in Contemporary Society (3 Credit Hours)
Various topics in the study of modern society
Outcomes:
Students will develop advanced skills in the particular area

SOCL 525 Seminar in Comparative Studies (3 Credit Hours)
The seminar will expose participants to comparative approaches in defining issues, topics or institutions, researched by comparative sociologists and cultural anthropologists. Specific topics for consideration will vary.
Outcomes:
Students will acquire knowledge of the utility of comparative approaches to cultural and social structures in developing greater definition and clarity, and a deeper understanding of a given topic

SOCL 540 Issues: Sociology of Religion (3 Credit Hours)
Focused study on a variable topic in the sociology of religion.

SOCL 560 Seminar-Issues in Communities & Urban Sociology (3 Credit Hours)
This course explores current issues in cities and in the sociological study of cities.
Outcomes:
Students will become familiar with current debates in urban sociology and apply sociological theories and analysis to contemporary issues in cities

SOCL 580 Seminar: Issues in Medical Sociology (3 Credit Hours)
This course explores a specialized topic in the sociology of health and medicine. Restricted to Graduate Students.
Outcomes:
Ability to analyze individual, social and institutional effects on health and medicine

SOCL 595 Thesis Supervision (1 Credit Hour)
Write a thesis under the supervision of a faculty member.

SOCL 600 Dissertation Supervision (1 Credit Hour)
Write a dissertation under the supervision of a faculty member.

SOCL 605 Master's Study (1 Credit Hour)
Develop a reading list and paper for an MA project under faculty supervision.

SOCL 610 Doctoral Study (1 Credit Hour)
This course can only be taken two times during a doctoral student's career.

Spanish (SPAN)

SPAN 402 Methods of Teaching Spanish (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. Students will explore theoretical, investigative, and practical issues of communicative language teaching that will help them develop communicative classroom environments that blend listening, speaking, reading, and writing.
The material in this course should encourage students to question assumptions and begin to formulate their own ideas about what goes on in their classrooms and in second language learning in general.

SPAN 403 Structure of Modern Spanish (3 Credit Hours)
An introduction to Spanish linguistics to provide a general understanding of phonology, morphology and syntax, as well as a history of Spanish grammar including variation and change.
Outcomes:
Students will understand the rules that govern sounds, word and sentence structure, and the dynamic interaction between Spanish and its neighboring languages

SPAN 405 Critical Methods (3 Credit Hours)
This course provides training in the application of contemporary critical methods with attention to the development of greater proficiency in literary analysis and written expression.
Outcomes:
Students will be able to discuss and write about knowledgeably works from the major literary genres: drama, prose fiction, essay, and poetry

SPAN 410 General Linguistics & Romance Languages (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in heritage language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. The material in this course should encourage students to question assumptions and begin to formalize their own ideas about what goes on in their classrooms and in heritage language learning in general.
Course equivalencies: X-SPAN410/CLST410/FREN410

SPAN 415 Medieval Spanish Literature (3 Credit Hours)
This course studies the development of Spanish medieval literature from the jarchas through the Celestina.
Outcomes:
Along with increasing their knowledge of Spanish history in the medieval period, students will be able to appreciate how the literature reflects the culture of the period

SPAN 416 Golden Age of Spanish Literature (3 Credit Hours)
This course is a graduate seminar whose primary focus is the literary production of the Spanish Golden Age, which dates from the second half of the sixteenth century to the end of the seventeenth. Students will analyze works of various genres - autobiography, prose, drama, poetry and the novel - by the most prominent authors of the time, including Teresa of Ávila, John of the Cross, Miguel de Cervantes, Baltasar Gracián, Francisco de Quevedo, Luis de Góngora, Félix Lope de Vega, Pedro Calderón de la Barca, Tirso de Molina and María de Zayas. We will give special attention to the historical, social and cultural context of early modern Spain, and students will gain exposure to the major critical trends and interpretation of Golden Age literature. The authors to be studied confront readers with the complex social fabric of pre-modern Spain and immerse us in the religious and economic realities of the Iberian Peninsula, the Mediterranean world and Europe. Our close reading of the texts will allow us to explore how early modern Spanish writers reflect the spiritual, intellectual and political currents of their time, especially as they shed light upon the network of institutions, practices, and beliefs that constituted Spanish culture.

SPAN 419 Romanticism in Spanish Literature (3 Credit Hours)
This course is a survey of Romanticism as a literary movement including its influence upon nineteenth-century culture.
Outcomes:
Students will be able to understand the philosophical, artistic, and esthetic tenents of Romanticism and their representation in a series of Hispanic texts from prose fiction to poetry and drama

SPAN 420 Realism & Naturalism (3 Credit Hours)
This course focuses on the various political, ideological, and intellectual trends that have shaped nineteenth-century Spanish literature and emphasizes the aesthetic and cultural influences that made the Spanish literary universe unique. It also takes up the question of the ways in which the literature of nineteenth-century Spain might be compared to that of Latin America and of the Western world generally. It will provide an overview of the key topics, writers, and literary genres of nineteenth-century Spanish literature, with particular emphasis on novels, poetry, folletines, short stories and, to a lesser extent, visual art. We will discuss the complexities of Spanish modernity using current theoretical perspectives in addition to various historical approaches, while emphasizing the way in which these texts offer multiple views of Spanish national identity and the construction of different models of the modern self.

SPAN 421 Theatre of Twentieth Century (3 Credit Hours)
The evolution of theatrical modes in 20th Century Spain. Authors: M. Mihura, Benavente, Valle Inclán, Arniches, García Lorca, Buero Vallejo, etc.
Outcomes:
Students will be able to explain how theater has dealt with contemporary experiences such as the Spanish Civil War, civil war, the polarization of society, group thinking, dictatorship, the inception of new mores and the inevitability of change

SPAN 426 Theater of The Golden Age (3 Credit Hours)
This course is a graduate seminar with a primary focus on theatrical works written in the Spanish Golden Age, which began in the mid-sixteenth century with the dramatist Lope de Rueda and ended in the late seventeenth century with the death of Calderón de la Barca. It combines the study of shorter works, entremeses, and full-length plays, or comedias, written by the most renowned playwrights of early modern Spain, including Cervantes, Lope de Vega and Tirso de Molina. Through the reading of these authors, students will explore the themes and social factors which shaped the plays of the Golden Age and will become familiar with the theatrical tradition that impacted Spanish society at all levels. Attention will also be given to the role of gender, religion, and socio-economic status in pre-modern Spanish society. We will use these texts in order to understand the historical context and the main currents of thought in early modern Spain.

SPAN 431 Poetry of The 20th Century (3 Credit Hours)
This course traces developments in Spanish poetry through a study of the works of selected poets, with special emphasis on the writers of the Generation of 1927.
Outcomes:
Students will understand the relationship between modernism and the avant garde, as well as the turn toward free verse and social poetry in the post-war period

SPAN 436 Poetry of The Golden Age (3 Credit Hours)
This course covers poetic theory and practice from Garcilaso to Góngora. It presents the classic modes as they were imitated and transformed to create a new poetic language.
Outcomes:
Students will be able to recognize the distinct styles and forms of Golden Age poetry

SPAN 437 Golden Age-Spanish Mysticism (3 Credit Hours)
This course is a survey of the most prominent authors of the Spanish Golden Age mystics - Ignatius of Loyola, Teresa of Avila, and John of the Cross, whose writings reflect the religious, spiritual, and intellectual currents of Counter-Reformation Spain. In the form of an independent study, students will examine the ascetical, mystical, and Illuminist trends of the sixteenth and seventeenth centuries, as well as the most important themes these writers developed in early modern Iberia: conversion and authority, vice and virtue, penance and pilgrimage, devotion and humor. These themes will be explored in the majors works (primary sources) of these authors, which will be complemented by secondary source readings and each student's independent research. The writers studied in this course and their texts will also be viewed in the context of the greater literary and artistic production of the Spanish Golden Age.

SPAN 441 Prose of The 20th Century (3 Credit Hours)
This course studies the development of Spanish prose from the Generation of 1898/ Modernism through Post-modernism, with emphasis on the novel, short story, and essay.
Outcomes:
Students will better appreciate and understand the complex literature of modern Spain

SPAN 446 Prose of The Golden Age (3 Credit Hours)
The course studies representative selections from the pastoral and the picaresque novel, the short novel, and didactic works of the period (Gracián and Quevedo).
Outcomes:
Students will understand how these authors expressed colliding sensibilities, and incorporated traditional themes-love, knowledge, deception, violence-through parody and satire

SPAN 447 Don Quijote (3 Credit Hours)
This course is a graduate seminar and its primary focus is the literary masterpiece of Miguel de Cervantes, El ingenioso hidalgo don Quijote de la Mancha (1605, 1615). Students will analyze the work that has come to be known as the first modern novel of Europe, and, through a close reading of the text, study the novel in relation to the literary traditions of the Renaissance: novella, the pastoral romance, the romance of chivalry, the humanist dialogue, the picaresque novel, including poetry and the comedia. We will give special attention to the historical, social and cultural context of Cervantes' world, and students will gain exposure to the major critical trends and interpretations surrounding his novel. Cervantes confronts readers with the complex social fabric of early modern Spain, and immerses us in the religious and economic realities of the Iberian Peninsula and the Mediterranean world. Our close reading of Don Quijote will explore its links to the network of institutions, practices, and beliefs that constituted early modern Spanish culture.

SPAN 470 Hispanic-American Poetry (3 Credit Hours)
The course traces the development of Latin American poetry in such representative poets as Rubén Darío, Gabriela Mistral, and Octavio Paz.
Outcomes:
Students will recognize the major themes and forms of Latin American poetry with a special emphasis on the 19th and 20th centuries

SPAN 480 Hispanic-American Novel (3 Credit Hours)
Pre-requisites: graduate standing
Analyzes salient themes and formal features of twentieth-century novel. Taught in Spanish. Prerequisite: graduate standing.
Outcomes:
Students will identify stylistic and thematic contours of the modern Latin American novel and draw connections between works of literature and the broader culture

SPAN 487 La Novela De La Revolucion Mexico (3 Credit Hours)
Pre-requisites: graduate standing
An analysis of representative works and themes of the Mexican Revolution, its mystique, critique, and legacy. Taught in Spanish.
Outcomes:
Students will comprehend main features of literature of the Revolution and draw relationships to contemporary Mexican cultural themes

SPAN 489 Cuento Hispano-Americano (3 Credit Hours)
The development of the Hispanic short story is studies in this course. Authors included are Quiroga, Cortázar, García Márquez, Castellanos, Valenzuela, and Ferré.
Outcomes:
Students will be able to contextualize the stories, analyze them both formally and thematically, and recognize the different types of short story written in Latin American: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 490 Hispanic Culture & Civilization (3 Credit Hours)
Pre-requisites: graduate standing
Interdisciplinary seminar brings to bear perspectives of literary intellectuals, anthropologists, sociologists, educators, and theologians on the topic. Visions of America. Taught in Spanish.
Outcomes:
Students will understand significance and many facets of theme of cultural identity in Latin America as expressed in various disciplines

SPAN 499 Graduate Internship (1-6 Credit Hours)
A course designed to provide students with the opportunity to make a connection between Hispanic Studies and its praxis in a professional work environment.

SPAN 500 Directed Readings (3 Credit Hours)
The course is composed of special readings undertaken only by highly qualified students and supervised by a member of the department.
Outcomes:
Students will be able to work individually on a research project of their own selection

SPAN 501 Thesis Research (3 Credit Hours)
Pre-requisites: Completion of initial thesis forms appearing on the GS website; permission of thesis director
Designed for graduate students who wish to write an M.A. thesis, and therefore conduct, and receive credit for, thesis-related research under the direction of the thesis director.
Outcomes:
To advance the student's knowledge in the area of focus; to enhance research skills and allow the student to develop bibliographies and a research paper

SPAN 595 Thesis Supervision (1 Credit Hour)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their MA thesis.

SPAN 599 Directed Primary Research (3 Credit Hours)
Pre-requisites: Students must have the permission of the Instructor of Record to enroll in this course
This course will culminate in the completion and presentation of a well-polished article-length paper in modern languages, literatures and linguistics to faculty members in the form of an oral defense. This course fulfills the Masters Essay.
Outcomes:
To refine and articulate a specific article-length research project in Hispanic Studies, and to research, write and defend this successfully completed project

SPAN 605 Master's Study (1 Credit Hour)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their Masters' essay.

Statistics (STAT)

STAT 401 Introduction to Applied Statistics Using R (1 Credit Hour)
Pre-requisites: Limited to Graduate Students Only
This course covers the basics of applied statistics including descriptive statistics and visualization (including graphing), univariate methods, inference, hypothesis testing and confidence intervals, two-sample and paired analyses, simple and multiple linear regression, ANOVA and logistic regression. The course introduces and uses the R freeware package.
Outcomes:
Upon completion of this course, it is expected that students will skillfully and accurately perform real-time data analysis using R and R/Studio

STAT 403 SAS Program & Applied Statistics (3 Credit Hours)
While simultaneously reviewing basic statistical methods (t tests, regression, ANOVA, interaction, etc.), this course introduces statistical modelling using the SAS program, involving the DATA step and various SAS procedures. Working on hands-on projects using real datasets, students present their final project results.

STAT 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

STAT 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

STAT 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov chains, classification of states, long-run behavior, birth and death processes, random walks, Poisson processes and their variations, and Brownian motion. In addition to applications, some theoretical derivations/proofs will also be emphasized.
Course equivalencies: X-MATH406/STAT406
Outcomes:
Students mastery of methods in stochastic processes and the ability to apply these in areas like biology, social science, sports, and finance

STAT 407 Statistical Design (3 Credit Hours)
This course provides students with a thorough introduction to statistical experimental design and to the statistical methods used to analyze the resulting data. The concepts of comparative experiments, ANOVA and mean separation procedures will be reviewed; blocking (complete and incomplete) will be discussed, as will be factorial designs, fractional factorial designs, and confounding. The course will focus on biometric applications such as clinical trials, HIV studies, and environmental and agricultural research, but industrial and other examples will occasionally be provided to show the breadth of application of experimental design ideas.

STAT 408 Applied Regression Analysis (3 Credit Hours)
This course provides students with a thorough introduction to applied regression methodology. The concept of simple linear regression will be reviewed and discussed using matrices, and multiple linear regression, transformations, diagnostics, polynomial regression, indicator variables, model building and multicolinearity will be discussed, as will be nonlinear and generalized linear regression. The course will focus on applications such as those from biometry and biostatistics (clinical trials, HIV studies, etc.), sports, engineering, agriculture and environmental science.

STAT 410 Categorical Data Analysis (3 Credit Hours)
This course provides an introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modeling techniques based on generalized linear models. Specialized methods for ordinal data, small samples, multi-category data, and matched pairs will also be discussed. The focus throughout this course will be on applications and real-life data sets.

STAT 411 Applied Survival Analysis (3 Credit Hours)
Modern statistical methods are covered to analyze data that is right, left and/or interval-censored. Nonparametric approaches such as the Kaplan-Meier estimation technique, log-rank test and proportional-hazards model are considered as are parametric methods such as those based on the Exponential and Weibull distribution. Accelerated failure time models and nonlinear models are also discussed.

STAT 421 Math Modeling & Simulation (3 Credit Hours)
This course uses SAS, R and high-level languages to perform statistical modelling by conducting statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or otherwise intractable.
Course equivalencies: X-COMP421/MATH421/STAT421

STAT 426 Advanced Statistical Inference (3 Credit Hours)
This course presents the role of likelihood methods in a whole range of statistical problems. The course reviews theoretical developments such as efficiency, completeness, and the Cramer-Rao lower bound, and shows how the likelihood approach is used to surpass these methods and to analyze regression problems, to deal with nuisance parameters by using marginal likelihood methods, and to deal with complex data structures such as censored and spatial data.

STAT 436 Topics in Biostatistics (3 Credit Hours)
This course covers experimental design (including interaction, analysis of covariance, and crossover designs) and the analysis of designed studies, simple and multiple linear regression, generalized linear and nonlinear regression, bioassay, relative potency and drug synergy, multivariate analysis (including MANOVA and multivariate regression), repeated measures (designs and analysis), and survival analysis (Cox proportional odds, log-rank tests, Kaplan-Meier estimation) of censored data. The emphasis of the course will be on applications instead of statistical theory, and students will be required to analyze real-life datasets using popular statistical packages.

STAT 437 Quantitative Bioinformatics (3 Credit Hours)
This course explores recently developed mathematical, probabilistic and statistical methods currently used in the fields of bioinformatics and DNA microarray and protein array data analysis. These include stochastic processes, (hidden and traditional) Markov chains, tree- and clustering techniques (including principal components analysis and biplots), discriminant analysis, experimental design strategies and ANOVA methods. Our focus in this course is on the application of these techniques and on meaningful interpretation of results.

STAT 438 Introduction to Predictive Analytics (3 Credit Hours)
Pre-requisites: Graduate students only
This course focuses on finding patterns, associations, and relationships in data. In examining real-world datasets, this course highlights, develops and applies methods in simple and multiple linear and logistic regression, classification and discriminant analysis, resampling methods, model selection, additive models and splines, tree-based methods, support vector machines, and unsupervised learning techniques such as clustering and PCA.
Outcomes:
Upon completion of this course, it is expected that students will master applied methods in predictive analytics (using R and/or Python) with applications to real data-sets

STAT 444 Longitudinal Data Analysis and Mixed Modeling (3 Credit Hours)
Pre-requisites: Graduate Students only
This course focuses on repeated measures, longitudinal, hierarchical and mixed modeling data analysis with an eye to applications, model identification, software implementation, and interpretation of computer results.
Outcomes:
Upon completion of this course, it is expected that students will master applied mixed-modelling methods (using R and/or SAS) with applications to real data-sets

STAT 451 Applied Nonparametric Methods (3 Credit Hours)
Pre-requisites: Graduate Students only
Many basic statistical techniques are based upon normal or binomial distributional assumptions which may not be appropriate in practice. This course introduces and illustrates rank-based methods, permutation tests, bootstrap methods, and curve smoothing useful to analyze data when normal and/or binomial assumptions are not valid.
Outcomes:
Upon completion of this course, it is expected that students will master applied nonparametric statistical methods (using R and/or SAS) with applications to real data-sets

STAT 460 Bayesian Statistical Methods (3 Credit Hours)
Pre-requisites: STAT 308 or STAT 408
A graduate-level treatment of Bayesian methods for data analysis focusing on the theoretical foundations and computational strategies for modern Bayesian inference. Topics include the formulation and analysis of single- and multi-parameter Bayesian models, hierarchical and multilevel structures, and Bayesian generalized linear models. The course will also consider advanced Markov Chain Monte Carlo computational techniques such as Gibbs sampling, Metropolis-Hastings algorithm, and Hamiltonian Monte Carlo. Emphasis is placed on both the mathematical underpinnings of Bayesian analysis and the implementation of complex models using contemporary software tools.
Outcomes:
By the end of the course, students will be able to: formulate and analyze complex Bayesian models; compare and select complex Bayesian models; critically interpret and communicate Bayesian analyses in research settings; extend basic Bayesian methods to advanced/nonstandard models

STAT 464 Multivariate Statistical Methods (3 Credit Hours)
Pre-requisites: STAT 308 or STAT 408
The course emphasizes both the theoretical foundations and applied aspects of multivariate analysis. Students will examine data exploration, inference, and model-based approaches, including principal components, factor and canonical correlation analysis, discriminant and cluster analysis, MANOVA, and modern dimensionality reduction techniques. The course will also introduce extensions of these methods and encourage critical evaluation of their assumptions and limitations. Statistical software, such as R, will be used for implementation and analysis.
Outcomes:
By the end of the course students will be able to: explain and analyze the theoretical framework underlying common multivariate methods; derive and interpret results from principal component and factor analyses; apply and critique modern dimensionality reduction and visualization techniques

STAT 465 Actuarial Theory I (0 Credit Hours)
This course provides an introduction to the models and methods used in actuarial mathematics and risk theory. Students are expected to gain a broad understanding of frequency and severity modelling, pricing, and accumulated risk. This course includes a blend of theory and applications.
Course equivalencies: X-MATH465/STAT465

STAT 466 Actuarial Theory II (0 Credit Hours)
With an introductory background in the field provided in STAT 465, this course thoroughly explores modelling and estimation techniques in actuarial mathematics and risk theory.
Course equivalencies: X-STAT466/MATH466

STAT 468 Risk Theory (0 Credit Hours)
With a focus on insurance, pensions and investments, this course provides an overview of the theory of risk, emphasizing the statistical challenges and assumptions inherent in models and methods.
Course equivalencies: X-STAT468/MATH468

STAT 488 Topics in Statistics (1-3 Credit Hours)
This topics course provides the means for new courses on current or 'hot' topics to be offered to students, with the topics being crafted to the given topic at hand. As such, the course may be taken repeatedly.

STAT 495 Statistical Consulting Capstone (2 Credit Hours)
Pre-requisites: Graduate Students only
Students enrolled in this course will be introduced to statistical consulting techniques useful for work with researchers and decision-makers in university, medical, financial and industrial settings; students will engage in actual hands-on statistical consulting with administrators, researchers, or students at one of Loyola's lakeside campuses or remotely.
Outcomes:
Upon completion of this course, it is expected that students will master the soft-skills of statistical consulting, communication, active listening, and real-time data analysis

STAT 498 Independent Study Statistics (1-6 Credit Hours)
Working with a statistics faculty member on a one-on-one or small group format, this course affords students the opportunity to thorough explore a statistical topic at greater depth. Generally, it involves a good deal of outside reading and/or programming, and weekly meetings with the professor.

Theology (THEO)

THEO 401 Tutorial in Biblical Studies (3 Credit Hours)
A reading course with variable content and readings in the area of biblical studies.

THEO 403 Topics in Rabbinic & Medieval Literature (3 Credit Hours)
Topics in post-biblical Jewish literature and thought, covering texts from approximately 200 to 1600.

THEO 404 History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution, in the context of the ancient Near East.
Course equivalencies: IPS 440/THEO 404
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 405 Formation of The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament, in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition.
Course equivalencies: IPS441/THEO 405
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 406 Basic Hebrew Grammar (3 Credit Hours)
Study of the fundamental elements of classical Hebrew.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 407 Hebrew Exegesis (3 Credit Hours)
Introduction to the fundamentals of classical Hebrew, including the Hebrew alphabet, basic syntax, and the basic grammatical forms of the language, designed to advance reading knowledge of the Old Testament.

THEO 418 Theological Prophets-Ancient Israel (3 Credit Hours)
This course examines the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by contemporary sociological and anthropological perspectives. Standard historical-critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 420 Seminar (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 421 Directed Reading in Bible Studies (1-3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 422 Directed Reading in Bible Studies (3 Credit Hours)
Independent research in topics in bible studies according to program developed jointly by the student & faculty director.

THEO 424 The Synoptic Gospels (3 Credit Hours)
Study of the diversity of early Christianity as represented in the Synoptic Gospels, particularly the commonalities and contrasts in the worldviews operative in Mark, Luke, and Matthew.
Course equivalencies: IPS 445/THEO 424

THEO 425 Luke-Acts & New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view.
Course equivalencies: IPS 446/THEO 425
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 427 St Paul's Contribution to Christianity (3 Credit Hours)
Examination of Paul's thought through exacting analysis of Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity.
Course equivalencies: IPS 448/THEO 427
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 429 Person of Jesus in New Testament (3 Credit Hours)
In this course, attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities.
Course equivalencies: IPS 449/THEO 429
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 436 Christology (3 Credit Hours)
This course will study the speculations and formulations concerning the person of Christ and the redemptive incarnation from the early fathers and councils up to and including modern times.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 437 Mystery of God in Christian Theology (3 Credit Hours)
The Christian church has insisted, from the beginning, that Jesus Christ is decisive in humanity's access to, and understanding of, God. This realization was expressed in the doctrine of the Trinity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 440 Seminar in Systematic Theology (1-12 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 441 Directed Reading in Systematic Theology (3 Credit Hours)
Independent research in topics in systematic theology according to program developed jointly by the student & faculty director.

THEO 447 Philosophical Theology (3 Credit Hours)
A study of the ways in which philosophical assumptions, systems, and methodologies shape theological reflection.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 449 Phenomenology of Religion (3 Credit Hours)
This course will examine religion from a phenomenological point of view, allowing the methods and texts of phenomenology to shape our understanding of religious phenomena, such as revelation, givenness, metaphysics, incarnation, etc.. Topics may also include investigations of the borders between phenomenology and theology.

THEO 459 Contemporary Theology (1-12 Credit Hours)
Advanced study of readings and themes in contemporary theology, in conversation with a variety of disciplines.

THEO 460 Seminar in History of Theology (1-12 Credit Hours)
A consideration of the organizing models characteristic of theology in particular periods. The seminar is organized around a specific doctrinal theme determined, in part, by the specialized interests of the students.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 461 Directed Readings in History of Theology (3 Credit Hours)
Independent research in topics in history of theology according to program developed jointly by the student and faculty director.

THEO 464 Religion & Politics in Christian History (3 Credit Hours)
Exploration of the intersections of religious and political thought in Christian history from the 19th century to today.

THEO 470 Foundations Crititical Issues Theological Ethics (1-12 Credit Hours)
Devoted to a critical analysis of theological ethics firmly rooted in the historical method, studying the various methodologies, critical issues and the personalities.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 475 Natural Law & Theological Ethics (3 Credit Hours)
Some of the many theological interpretations of natural law developed in Western Christian thought will be examined. The issue of a specific Christian ethic vis-à-vis a universal humanistic ethic will be investigated.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 477 Feminist Issues in Theology and Ethics (3 Credit Hours)
Designed around current issues in feminist theology and ethics. Issues include the role of the Bible in feminist theology, hermeneutics, theological education, church and sacraments, as well as normative theory, sexuality and reproduction, and ecology.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-THEO477/WOST468/WSGS468
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 478 Issues in Medical Ethics (3 Credit Hours)
The course will deal with the problems of abortion, genetic engineering, technological reproduction, sterilization of the handicapped, prolonging life, etc.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 480 Seminar in Christian Ethics (1-12 Credit Hours)
In-depth study of select topics in contemporary Christian ethics. Topics vary from faith and morality, religion and politics, church-state relations, and work to ecology, sexuality, and eschatology.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 481 Directed Readings Christian Ethics (3 Credit Hours)
Independent research in topics in Christian ethics according to program developed jointly by the student and faculty director.

THEO 500 Theological Pedagogy I (0 Credit Hours)
Theological Pedagogy is designed for graduate students interested in teaching theology courses at LUC. The hope is to help future instructors succeed in the classroom with a thoughtful reflection on course learning goals and then constructing a syllabus that reflects those individual goals - all while discussing and keeping in focus the "special" nature of theology and religious studies.
Outcomes:
Students will reflect on course learning goals for their own future courses; Students will produce a syllabus for their own future courses

THEO 502 Theological Pedagogy II (0 Credit Hours)
Theological Pedagogy is designed for graduate students to take simultaneously with their first semester as an instructor of record for a core Theology course. Among other goals, students are encouraged to develop a greater sense of one's own personal identity in the classroom through the crafting of a Teaching Philosophy, foster a community of support and critical reflection with other first-time instructors, and participate in the culminating Symposium on the Teaching of Theology and Religious Studies.
Outcomes:
Students will craft a Teaching Philosophy that reflects on their personal identity in the classroom; Students will reflect on their teaching in the classroom through presenting in a Symposium on the Teaching of Theology and Religious Studies

THEO 515 Gospels in Early Christianity (3 Credit Hours)
This course will focus on the study of one or the other of the four gospels.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 517 Early Christian Letters (1-12 Credit Hours)
This course studies letters from Christian leaders of the first two centuries A.D. in their original Greek language.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 519 Latr Nt-Subapost Writ (3 Credit Hours)
This course studies New Testament and non-canonical Christian writings in their original Greek language from the late first and early second century A.D.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 523 Cultural-Religious Environment Early Christianity (3 Credit Hours)
This course examines specific aspects of the cultural and religious environment of the Mediterranean world between 200 B.C. and A.D. 300 relevant to early Christianity. Outcomes A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 527 Various Community Early Christianity (3 Credit Hours)
The course will examine the identity, cohesion, and institutions of various communal groups in early Christianity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 530 Seminar - Variable Titles (1-12 Credit Hours)
Extensive and in-depth study of selected topic.

THEO 536 Christian Doctrine-Catholic Theology (3 Credit Hours)
This course will examine the dialectical relationships between Christian doctrine and theological learning.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 560 Contemporary Authors (1-12 Credit Hours)
This course will examine the methods, concerns, major issues, achievements, and lasting influence of twentieth century writers whose work has significantly shaped theology today.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 570 Fundamental Issues in Christian Ethics (1-12 Credit Hours)
Fundamental issues raised in defining Christian ethics, delineating its sources and methods, developing normative theories, and analyzing processes of moral decision-making.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 573 Roman Catholic Ethics (3 Credit Hours)
This course will concentrate on one or more classic topics in Roman Catholic ethics.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 575 Religious Ethics and Social Theory (3 Credit Hours)
This course investigates what religious ethics gains from and contributes to basic concerns.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 580 Christian Social Ethics (3 Credit Hours)
The course will examine the sources, transformation, problematics, and potential directions in developing the middle principles which articulate the interaction of theological ethics and social questions.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 585 Issues Applied Theology Ethics (3 Credit Hours)
An examination in depth one or more areas which have traditionally engaged religious ethicists.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 590 Directed Readings and Research (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 592 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 593 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 600 Dissertation Supervision (1 Credit Hour)
Students who have filed the dissertation paperwork and are currently writing, should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 605 Master's Study (1 Credit Hour)
Students who have completed their Master's level course work and are preparing for the comprehensive exams should enroll in this course, unless they plan to take the exam while taking courses. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 610 Doctoral Study (1 Credit Hour)
Students who have completed their doctoral level course work and are studying for the written and oral comprehensive exams should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

Women's and Gender Studies (WSGS)

WSGS 401 History of Feminist Thought (3 Credit Hours)
This course surveys the historical development of feminist thought from Mary Wollstonecraft to second wave feminism and beyond and analyzes the impact of feminism on the general culture.
Course equivalencies: WOST401/WSGS401

WSGS 402 Foundations of Women's Studies (3 Credit Hours)
This course investigates how gender has become a critical category in education and knowledge and traces the institutional and intellectual development of women's and gender studies as a field, focusing on the evolution of WGS in the academy (here and in other countries) and on the changes in concepts of knowledge, in methodologies, and in pedagogy that women's studies scholarship has produced in various fields.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST402/WSGS402

WSGS 450 Global Feminisms (3 Credit Hours)
This course is a course that explores feminism and the study of gender in a global dimension. Chosen texts privilege the study of women, gender, and sexuality from an international perspective. The course highlights the intimate relationship between the study of feminism, (post/de)colonialism, and racism.
Course equivalencies: WOST450/WSGS450

WSGS 455 Feminist Pedagogy (3 Credit Hours)
Pre-requisites: Graduate Status
This course will focus on distinctly feminist ways of learning and teaching. As with feminist theory and research methods, feminist pedagogy has been understood to include characteristics like self-reflexivity, de-centered authority, standpoint epistemologies, examinations of power dynamics, and attention to embodied ways of learning and knowing.
Outcomes:
Understand the foundational principles of feminist pedagogy and related approaches to teaching; Develop skills to analyze and produce sound teaching practices within a feminist intersectional framework

WSGS 460 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: Graduate Status
We will explore how crossing borders, identity politics, gender, and sexuality intersect to produce a conversation on contemporary global immigration issues. Focus is on movement from three geographic locations from/to the Global South and North: Latin America to the US and Europe; Africa to Europe; Europe to Latin America and back.

WSGS 470 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: Graduate Status
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Course equivalencies: WOST370/WSGS370/WGSG470
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 475 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: Graduate Status
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 480 Queer Theory (3 Credit Hours)
Pre-requisites: Graduate status
This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications. Outcome: Students will acquire and utilize theoretical concepts in queer studies, develop cultural competency in queer studies and present information about the field orally and in writing.
Interdisciplinary Option: Women & Gender Studies

WSGS 497 Topics in Women's Studies and Gender Studies (3 Credit Hours)
This topics course may originate in Women's Studies and Gender Studies or as a cross-listed course and deals with women's and gender topics including identity, sexuality, diversity, relationships of power in national, transnational and international contexts. The ethical and social justice implications of topics include feminist perspectives.
Course equivalencies: WOST497/WSGS497
Outcomes:
Students understand feminist perspectives on gender in literature; Students connect theory and practice in writing, performance, action or in combined formats

WSGS 498 Practicum (1-3 Credit Hours)
WSGS Practicum gives students the option of doing an internship, teaching assistantship, or research assistantship under the supervision of a faculty member. This practicum counts as an elective credit towards the student's MA degree.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST498/WSGS498
Outcomes:
Develop intersectional research and critical thinking skills in academic/socio-cultural contexts while being fully engaged in Practicum; Enhance written and verbal communication through creative use of Feminist pedagogy and methodology to enhance classroom education and public/academic presentations

WSGS 499 Independent Study (1-3 Credit Hours)
An independent study provides students with the opportunity to work closely and one-on-one with a faculty member. The student can choose her/their/his topic or creative project. The independent study should be comparable to a graduate-level course.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST499/WSGS499

WSGS 500 Thesis Research (3 Credit Hours)
A Thesis Research course allows graduate students to fine tune their research skills, academic writing, and independent thought while they are preparing their thesis proposal and/or writing their thesis.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST500/WSGS500

WSGS 595 Thesis Supervision (1 Credit Hour)
The focus of a Thesis Supervision is to help students better strategize, structure, and organize themselves as they write their thesis. Students will also be advised about how to prepare for a successful oral defense.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST595/WSGS595

WSGS 599 Capstone Presentation (0 Credit Hours)
Pre-requisites: Successful completion of 12 hours in the MA program in WSGS
WSGS 599 is the culmination of the Master's program in Women's Studies and Gender Studies. Requirements include a 10 page synthesis paper or detailed outline, annotated bibliography, and public presentation at our biannual capstone ceremony.
Outcomes:
Synthesis of the students' graduate coursework; performance of the diversity of outcomes in WSGS; celebration of students' achievements; networking

WSGS 605 Master's Study (1 Credit Hour)
Continuing work on completion of the Master's Degree in Women's Studies and Gender Studies.
Interdisciplinary Option: Women & Gender Studies

Bioinformatics

ABOUT US

Bioinformatics is a highly interdisciplinary STEM field that integrates computational and statistical methods for analyzing large biological data sets. Bioinformaticians apply their biological and computational sciences backgrounds to develop, utilize, and optimize new computational tools to organize, synthesize, and analyze the rapidly increasing amount of biological and biomedical data.

The Bioinformatics Program includes Loyola faculty from the Departments of Biology, Chemistry, Computer Science, and Mathematics and Statistics. While these faculty have a vast area of research interests, all require interdisciplinary approaches.

The Bioinformatics Program at Loyola is part of the College of Arts and Sciences. The program provides students with unique preparation for professional careers by offering both integrated and project-based learning with courses that feature the latest developments in the field.

Graduate Programs

- Bioinformatics (MS) (p. 1140)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

BIOI 400 Programming Biology (1 Credit Hour)
This is a 6-week course introduction to scripting programming languages within the framework of biological data analysis. Graduate-level standing required. Students will learn foundational methods and algorithms for analysis of biological data.

BIOI 494 Bioinformatics Research Design (1 Credit Hour)
Course Restricted to Bioinformatics MS students Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement experimental design practices in bioinformatics

BIOI 495 Special Topics in Bioinformatics (1-12 Credit Hours)
The field of bioinformatics is ever evolving. As new technologies develop, demand arises for new methods and tools. Courses will focus on emerging trends in bioinformatics. Restricted to Bioinformatics Graduate Students. Student will learn about emerging topics in the field.

BIOI 498 Bioinformatics Internship (1 Credit Hour)
Pre-requisites: BIOI 500, Limited to MS Bioinformatics Non-Thesis track students only
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning.
Outcomes:
Students can apply foundational principles in bioinformatics into practice

BIOI 499 Bioinformatics Research (1-12 Credit Hours)
Pre-requisites: Prerequisite: BIOI 494, Limited to MS Bioinformatics Thesis track students only
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for bioinformatics research

BIOI 500 Advanced Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOI 501 Bioinformatics Seminar (1-2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.
Course equivalencies: X-BIOI501/BIOL451
Outcomes:
Students can summarize, critique, and present bioinformatics research

BIOI 565 Exploring Proteins (3 Credit Hours)
Pre-requisites: Biochemistry, restricted to Bioinformatics Graduate Students
Proteins are polymer chains of amino acids that fold into compact states that differ in structure, size, shape, and dynamics. Computational tools are essential for the prediction of protein structures, protein interactions, and structure-based drug design.
Outcomes:
Students will learn the concepts of building blocks of protein structure, and protein folding

BIOI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: BIOI 499
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

BIOI 605 Master's Study (1 Credit Hour)
This course provides FT status for a student who needs to meet the continuous enrollment requirement of the Graduate School while completing program requirements.

Bioinformatics (MS)

Bioinformatics is a highly interdisciplinary STEM field that integrates computational and statistical methods for analyzing large biological data sets. Bioinformaticians apply their biological and computational sciences backgrounds to develop, utilize, and optimize new computational tools for organizing, synthesizing, and analyzing the rapidly increasing amount of biological and biomedical data.

Prospective students choose between the **Thesis-based track** and the **Non-thesis track**.

The Bioinformatics (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Thesis-Based Track

Students will be trained and mentored in conducting independent hypothesis-driven research, including experimental design, data analysis, and interpretation of results. They will also learn scientific writing and presentation design and delivery. After graduation, students are primed for competitive Ph.D. programs and positions at research institutions, in government agencies and other public sectors, as well as in the private sector.

Non-Thesis Track

Students gain real-world experience in an internship environment and are exposed to a breadth of coursework in the field of bioinformatics.

At the conclusion of their studies, graduates are competitive for employment in the biotech industry, as well as in bioinformatics positions in academia, government agencies, hospitals, and related public and private institutions.

Related Programs

Master's

- Biology (MS) (p. 1147)
- Computer Science (MS) (p. 1172)
- Data Science (MS) (p. 1191)

Curriculum

Degree Requirements

Applicants pursuing the Master of Science in Bioinformatics select the **Thesis-based track** or the **Non-Thesis track**. Students must complete 30 credit hours. Six (6) courses, worth a total of 17 credit hours, comprise the ***Foundational Curriculum***, and the remaining 13 credit hours will consist of track-specific courses.

Besides the traditional Master's program, the Bioinformatics (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Foundational Curriculum

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

LEARNING OUTCOMES

In Loyola's M.S. in Bioinformatics program you will gain fundamental skills that will help you be an inquisitive scientist, including:

- Demonstrate Advanced Interdisciplinary and Computational Expertise - Integrate advanced knowledge in genomics, molecular biology, statistics, and computer science to develop and evaluate computational methods and analyze complex, high-dimensional biological datasets.
- Conduct an Independent, Scholarly Project in Academic Research (Thesis) or Internship (Non-thesis) - Formulate original research questions, design rigorous studies, implement analytical pipelines, interpret results critically, and contribute to the scientific literature.
- Communicate and Collaborate Professionally - Present research effectively to scientific and interdisciplinary audiences and function as a collaborative leader in team-based research environments.
- Exemplify Ethical and Thoughtful Leadership - Practice responsible data stewardship, uphold integrity and reproducibility, engage in reflective inquiry, promote justice and the common good, and pursue excellence in scholarship and professional practice.

Biology

Overview

The Biology Department offers Masters programs in Biology and Medical Sciences. Our faculty members are well-respected leaders in their fields and publish extensively. They also attract a significant amount of external grant support which allows them to pursue research projects that are at the forefront of modern biology. Students receive individual attention as they pursue their own research and work toward their master's degree.

Graduate Programs

- Biology (MS) (p. 1147)
- Medical Sciences (MA) (p. 1149)

Biology (BIOL)

BIOL 401 Medical Literature and Ethics (3 Credit Hours)
The course will include lectures on the foundational concepts of modern ethics, in class discussions of ethics primarily centered on discussion of cases from different ethical perspectives, quizzes to assess reading mastery and familiarity with material to qualify students on how to discuss cases and formal case presentations by student working groups.
Outcomes:
Understand and articulate the philosophical basis for different ethical frameworks; Have a firm command of the "four principles" of Benevolence, Non-maleficence, Justice and Autonomy and their clinical applications; Be able to resolve clinical ethical issues and back up your reasoning

BIOL 402 Microbiology (3 Credit Hours)
Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 405 Advanced Development (3 Credit Hours)
Developmental Biology draws from Genetics, Molecular Biology, Genomics, and Embryology and is a foundational science for understanding problems in Humans ranging from birth defects to cancer. Because of its multidisciplinary foundation, Developmental Biology is best thought of as a SYSTEM OF IDEAS, EXPERIMENTS AND OBSERVATIONS, as such you will greatly expand your scientific vocabulary and problem solving abilities during the course of this semester. Often you will need to draw on your stored knowledge from many disciplines to understand the topics we will cover. The course will comprise lectures on general development, evolution and developmental genetics, followed by discussions of papers on particular topics, and student presentations.

BIOL 408 Writing for the Medical Professions (3 Credit Hours)
This course will be required for the Master of Arts in Medical Sciences (MAMS) program. It will include readings related to developing the student's physician persona, and writings that are required for the medical school application process. Pre-requisites: Admission to the MA in Medical Sciences program.
Outcomes:
Students will be prepared to write effective primary and secondary essays for their medical school applications; communicate clearly their motivation to pursue a career in medicine and the relevance of their experiences to their pre-medical preparation

BIOL 409 Advanced Genetics (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program (Note: MAMS = MSCI-MA)
The course will comprise formal discussions on the molecular basis of information storage and retrieval in the cell, the role of genetics in human development and homeostasis, the mapping of human genes in familial or population contexts, and modern understanding of the connection between genotype, phenotype and human traits.

BIOL 410 Advanced Cell Biology (3 Credit Hours)
This course explores, in depth, the life cycle and activities of a typical eukaryotic cell. Some of the topics covered are cell polarity, cytoskeleton, plasma membrane, protein modifications and trafficking, extracellular matrix and cell death. Competencies to be gained in this course: To develop the skill of reading and analyzing the primary literature on topics pertaining to cell biology. Judging whether a conclusion is supported by sufficient data. Identifying the controls in published experiments. Exam-taking skill improvement using short reading passages from the scientific literature as topics.

BIOL 413 Advanced Immunology (3 Credit Hours)
Introduces innate and adaptive immunity, lymphocyte development, T-cell and B-cell mediated immunity, leukocyte trafficking, immunological memory hyperimmune reactions, autoimmunity, tumor and transplant immunity. Must be enrolled in the Master of Arts in Medical Sciences (MAMS) program.
Outcomes:
Students will acquire an overview of the human immune system that prepares them for success in a medical school immunology class

BIOL 415 Advanced Parasitology (4 Credit Hours)
Lecture and laboratory. A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.
Outcomes:
Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation

BIOL 416 Limnology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Students will learn to evaluate the trophic status and health of a lake by the end of the course.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions

BIOL 417 Wetland Ecology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the study of wetlands habitats. This course includes discussion of physical and chemical factors, biota, production and community dynamics. Laboratories include several field trips to regional wetland habitats.
Outcomes:
Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants

BIOL 418 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Lecture and laboratory. This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 422 Research (1-6 Credit Hours)
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 426 Entomology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.
Outcomes:
Students will learn to identify major insect groups in the field and in the laboratory

BIOL 430 Virology (3 Credit Hours)
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 450 Advanced Bioinformatics (2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOL 451 Bioinformatics Seminar (1 Credit Hour)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills. Students can summarize, critique, and present bioinformatics research.
Course equivalencies: X-BIOI501/BIOL451

BIOL 452 Human Anatomy and Physiology I (3 Credit Hours)
The course objectives are to learn the gross anatomical structures of the human body. To organize the relationships between these structures and systems using patterns of innervation and development. To be able to apply anatomical knowledge in ways pertinent to clinical issues.

BIOL 453 Human Anatomy and Physiology II (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program
This is the second semester of a 2 semester course. We will cover the physiology of the cardiovascular, respiratory, digestive, renal, reproductive, and endocrine systems, in addition to acid-base and fluid balance, temperature regulation, and exercise physiology. Functioning will be discussed from a systems level to a molecular level.

BIOL 455 Advanced Neuroscience (3 Credit Hours)
This course will focus on the cellular, anatomical, and functional organization of the human nervous system that range in topics from ion channel physiology to cognition. Students will survey the elements of the nervous system necessary for a foundation for medical school. An understanding of pathologies presented in disease, dysfunction, and injury will be included.
Outcomes:
Learn foundational neurological concepts presented to first year medical students; Learn the pathology of neurological disease, dysfunction, and injury through clinical cases; Understand the neurological basis of higher-order functions

BIOL 458 Developmental Neurobiology (3 Credit Hours)
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis. Students will also learn how to critically read primary research papers and present these papers to the class.
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles

BIOL 461 Advanced Neurobiology (3 Credit Hours)
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 466 Advanced Biochemistry (3 Credit Hours)
Life is based on four principle cellular components: proteins, lipids, carbohydrates, and nucleic acids. Biochemistry is concerned with the structure, function, and interactions of these compounds with one another and their environment. As such biochemistry plays a vital part in all aspects of the medical sciences since it not only helps us to understand how the (human) cell works on a molecular level but also how to decipher and possibly counter pathogenic conditions. Consider that almost all drugs used in medical treatment target proteins or groups of proteins to modulate their biochemical properties.

BIOL 470 Biostats & Exp Design Lec/Lab (4 Credit Hours)
This course is designed for students who are in, or plan to attend, graduate or professional school, and thus, will be working with their own data or critically analyzing existing data. This course will emphasize the theory and application of commonly used statistics in biology.

BIOL 479 Biology AP Workshop (3 Credit Hours)
No course description is available

BIOL 482 Advanced Molec Genetics (3 Credit Hours)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 483 Pop Genetics (3 Credit Hours)
Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations. They learn how to apply basic tools of population genetic analysis.
Outcomes:
Students develop knowledge and awareness of population genetic theory and information

BIOL 485 Prin Electron Microscopy Lec/Lab (4 Credit Hours)
Lecture and laboratory. This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques. Students will also learn how to correctly interpret their results, and properly present their data.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs

BIOL 488 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 493 Directed Reading (1-4 Credit Hours)
Student investigates a current topic in biology.

BIOL 495 Special Topics (1-4 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 495L Special Topics Lab (0 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered. Outcome: Students will master a unique topic in biology.

BIOL 500 Scientific Logic (3 Credit Hours)
The Scientific Logic course is designed to teach scientific literacy in terms of writing grant proposals, reading scientific literature, scientific presentations and debate. The course is framed within an evolutionary foundation.
Outcomes:
Students will gain knowledge in advanced evolutionary topics, while preparing a grant proposal and developing skills with respect to critical thinking and scientific inquiry

BIOL 501 Seminar (1 Credit Hour)
Students present specific, current research topics including their own research to the class and faculty.

BIOL 502 Department Seminar (1 Credit Hour)
Students meet and discuss the research presented by seminar speakers.

BIOL 510 Instructions in Teaching Biology (1 Credit Hour)
Introduction to the fundamentals of teaching biology.

BIOL 511 Biology Teaching Practicum (2 Credit Hours)
Students gain firsthand teaching experience by assisting in undergraduate courses.

BIOL 595 Thesis Supervision (1 Credit Hour)
Students conduct thesis research under the direction of their Thesis Director.

BIOL 605 Master's Study (1 Credit Hour)
Students conduct thesis research under the direction of their Thesis Director.

Biology (MS)

Our faculty members are well-respected leaders in their fields and publish extensively. They also attract a significant amount of external grant support which allows them to pursue research projects that are at the forefront of modern biology. Students receive individual attention as they pursue their own research and work toward their master's degree.

The MS in Biology degree program focuses on the development of experimental and intellectual skills required for vigorous research. Our program is research/thesis-based and takes most students two to three years to complete.

Students are assigned an advisor to help them develop an individualized curriculum. Once a curriculum is selected, students join the labs of their thesis directors and begin their research.

The Biology (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Curriculum

The Master of Science in Biology requires 31 hours of coursework and a formal research thesis.

Besides the traditional Master's program, the Biology (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Course Requirements

To become an official candidate for the MS degree, students must earn 31 credit hours and show satisfactory performance in course work and thesis research.

Code	Title	Hours
Required Courses		
BIOL 470	Biostats & Exp Design Lec/Lab [1]	4
BIOL 500	Scientific Logic [2]	3
BIOL 510	Instructions in Teaching Biology	1
BIOL 511	Biology Teaching Practicum [3]	2
BIOL 501	Seminar	1
BIOL 502	Department Seminar	1
BIOL 422	Research	1-6
	Hours taken for Research vary per term. Students will earn 3-9 hours over the course of the program.	
Graduate level BIOL electives		*9-15*
BIOL 402	Microbiology	
BIOL 405	Advanced Development	
BIOL 409	Advanced Genetics	
BIOL 410	Advanced Cell Biology	
BIOL 413	Advanced Immunology	
BIOL 415	Advanced Parasitology	
BIOL 416	Limnology Lec/Lab	
BIOL 417	Wetland Ecology Lec/Lab	
BIOL 418	Aquatic Insects Lecture & Laboratory	
BIOL 426	Entomology Lec/Lab	
BIOL 482	Advanced Molec Genetics	
BIOL 483	Pop Genetics	
BIOL 485	Prin Electron Microscopy Lec/Lab	
BIOL 488	Bioinformatics	
BIOL 493	Directed Reading	
BIOL 495	Special Topics	
BIOL 595	Thesis Supervision	1
Total Hours		**31**

1. BIOL 470 must be completed with a grade of B or higher to demonstrate proficiency in experimental design and analysis.
2. BIOL 500 must be completed with a grade of B or higher to demonstrate proficiency in scientific writing and reading scientific literature.
3. University-funded students must take BIOL 511 Biology Teaching Practicum twice (4 credit hours). Grant-funded or externally-funded students take BIOL 511 Biology Teaching Practicum once (2 credit hours).

Thesis Requirements

Research is the focus of the master's degree program at Loyola University Chicago. Faculty engage students in ongoing studies and students are well-supported when taking on new projects and challenges. Students work with their thesis advisors to develop and conduct a specialized research project. Based on this work, students write and defend a master's thesis. Students in the MS program must write and present a thesis outline to their faculty committee. The proposal outline must be approved by February 1 of the student's first year in the program. Following this approval, students will write and defend the master's thesis. The final thesis will be deposited in a publicly accessible database in accordance with Graduate School policy.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Traditional Master's Program

Course	Title	Hours
Year One		
Fall		
BIOL 500	Scientific Logic	3
BIOL 510	Instructions in Teaching Biology	1
Elective		0-5
	Hours	**7**
Spring		
Electives or Research		0-6
BIOL 511	Biology Teaching Practicum [1]	2
	Hours	**8**
Year Two		
Fall		
BIOL 470	Biostats & Exp Design Lec/Lab [2]	4
BIOL 501	Seminar	1
BIOL 502	Department Seminar	1
Electives or Research		0-3
	Hours	**9**
Spring		
Electives or Research		6-7
BIOL 595	Thesis Supervision	1
	Hours	**7**
	Total Hours	**31**

[1] Students on University Scholarships must take BIOL 511 Biology Teaching Practicum two times. Unsupported students, students supported through an advisor's grant, and students supported by their own grants take BIOL 511 one time.

[2] BIOL 470 Biostats & Exp Design Lec/Lab is offered every other year and alternates with BIOL 500 Scientific Logic.

Accelerated Master's Pathway

Students can take up to 15 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Course	Title	Hours
Senior		
Fall		
BIOL 500 or BIOL 470	Scientific Logic or Biostats & Exp Design Lec/Lab	3
BIOL 510	Instructions in Teaching Biology	1
400-Level Elective [1]		3
	Hours	**7**
Spring		
400-Level Elective Courses [1]		8
	Hours	**8**
Master's		
Fall		
BIOL 470 or BIOL 500	Biostats & Exp Design Lec/Lab or Scientific Logic	4
BIOL 501	Seminar	1
BIOL 502	Department Seminar	1
400-Level Electives or Research		0-3
	Hours	**8**
Spring		
BIOL 511	Biology Teaching Practicum	2
BIOL 595	Thesis Supervision	1
400-Level Electives or Research		5-6
	Hours	**8**
	Total Hours	**31**

[1] Electives can be chosen from the 400-Level Additional Courses listed below.

Additional Course Options

Code	Title	Hours
BIOL 402	Microbiology	3
BIOL 405	Advanced Development	3
BIOL 413	Advanced Immunology	3
BIOL 415	Advanced Parasitology	4
BIOL 416	Limnology Lec/Lab	4
BIOL 417	Wetland Ecology Lec/Lab	4
BIOL 418	Aquatic Insects Lecture & Laboratory	4
BIOL 426	Entomology Lec/Lab	4
BIOL 430	Virology	3
BIOL 450	Advanced Bioinformatics	2
BIOL 451	Bioinformatics Seminar	1
BIOL 458	Developmental Neurobiology	3
BIOL 470	Biostats & Exp Design Lec/Lab	4
BIOL 482	Advanced Molec Genetics	3
BIOL 483	Pop Genetics	3
BIOL 485	Prin Electron Microscopy Lec/Lab	4
BIOL 488	Bioinformatics	3
BIOL 493	Directed Reading	1-4
BIOL 495	Special Topics	1-4
BIOL 495L	Special Topics Lab	0
BIOL 500	Scientific Logic	3

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MS in Biology, students will be able to demonstrate:

- Proficiency in experimental design and analysis.
- Proficiency in scientific writing and reading scientific literature.
- Communication skills in both teaching and presenting research.
- The ability to critically think, analyze data and write scientifically.
- The ability to interact as an independent researcher.

Medical Sciences (MA)

The Master of Arts in Medical Sciences program is a special master's program (SMP) that prepares students to build a compelling medical school application. MAMS is a record enhancement program and not a career changer program, and as such, all pre-medical prerequisites must be completed. Our graduate post-baccalaureate is known for the rigor and quality of our coursework leading to a master's degree. Also, we have a long-term commitment to advising our students and assisting them at every stage of the medical school application process. We are dedicated to promoting the personal and professional development of each student, facilitating their entry and assuring their future success in Medical School. We maintain a student-centered, non-competitive environment that allows each student to capitalize on their strengths as they build their medical school credentials. We are guided by the Jesuit values of "seeking knowledge in the service of humanity; preparing to live in a shared, global community; and building on the desire to always do and become more."

In support of our mission, Loyola's MAMS program:

- Provides students with a high-quality educational experience from dedicated faculty recruited from some of the best medical schools in the US.
- Offers substantial office hours contact with faculty.
- Provides premedical advising upon entry to the program, through post-graduation, on every aspect of a student's medical school application. Students enjoy a full-time pre-medical advisor who works solely with MAMS students.
- Provides support for medical school applications with letters of recommendation.
- Fosters an active community in which students support each other through collaborative learning and group study.
- Facilitates access to Chicago-area hospitals and clinics with opportunities to work with underserved populations, sensitizing students to social justice issues, especially regarding the availability of medical care.
- Offers professional development seminars to familiarize students with individual medical schools, to strengthen their medical school applications, and to discuss ethical issues and social justice efforts with experts in the field.
- Values diversity in our student, professional and social communities.

Curriculum

To receive the MA in Medical Sciences degree, students must complete 30 credit hours in a curriculum drawn each year from courses listed below. However new courses are added on a routine basis and students should confirm course selections with their MAMS advisor.

Courses

Code	Title	Hours
BIOL 401	Medical Literature and Ethics	3
BIOL 408	Writing for the Medical Professions	3
BIOL 409	Advanced Genetics	3
BIOL 410	Advanced Cell Biology	3
BIOL 413	Advanced Immunology	3
BIOL 452	Human Anatomy and Physiology I	3
BIOL 453	Human Anatomy and Physiology II	3
BIOL 455	Advanced Neuroscience	3
BIOL 466	Advanced Biochemistry	3
BIOL 495	Special Topics	3
Total Hours		**30**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the program and implementing advice received from the program, students will have strengthened their medical school candidacy by demonstrating to medical schools that:

- They can succeed in rigorous science courses
- They can secure and maintain a volunteer position in a hospital or clinic
- They embody the characteristics of professionalism and leadership necessary in the medical profession.

Chemistry and Biochemistry

The Department of Chemistry provides graduate students in our MS and PhD programs a unique atmosphere, with state of the art instrumentation, accomplished professors, and motivated researchers. Much of the current research transcends traditional boundaries to include fields such as surface chemistry of organic electronic materials, quantifying physiological processes via synthesis of optical probes, applied information theory to thermodynamic systems, and metal analysis in retina causing cataract development. Weekly seminars and the annual Denkewalter Lecture (https://www.luc.edu/chemistry/events/denkewalterlecture/), which brings the winner of either the American Chemical Society's Pure Chemistry or Eli Lilly awards (https://www.acs.org/content/acs/en/funding/technical-divisions.html) to campus, provide opportunities to learn about recent advances from respected academic and industrial scientists.

Graduate Programs

- Chemistry (MS) (p. 1153)
- Chemistry (PhD) (p. 1158)

Chemistry (CHEM)

CHEM 400 Chemistry Seminar (1 Credit Hour)
This weekly seminar series on current topics in Chemistry is presented by experts from outside Loyola.

CHEM 401 Chemistry Methodology and Communication (3 Credit Hours)
Pre-requisites: Graduate Standing
This is the common preparatory course providing all chemistry graduate students with the necessary skills to navigate towards their respective degrees and success post-degree. Topics include: notebooks, design of experiment, safety, ethics, effective communication of science, conflict resolution, and professional conduct.
Outcomes:
Students are prepared with the soft skills and formal training in research methodology and compliance expectations expected of a graduate student and a professional chemist in a senior role

CHEM 415 Special Topics in Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester.

CHEM 420 Advanced Organic Chemistry I: Struct-Stereo (3 Credit Hours)
Important organic chemical concepts. Includes discussion of the stereochemistry of carbon, organic quantum mechanics, chemical kinetics and related mechanistic concepts, and an introduction to synthetic methodology.

CHEM 422 Advanced Organic Chemistry III: Mechanism (3 Credit Hours)
This is an intensive review of the more general types of organic chemical mechanisms, such as electrophilic and nucleophilic additions, substitution reactions, elimination processes, and hemolytic processes. The experimental approach to mechanisms is emphasized.

CHEM 423 Medicinal Chemistry (3 Credit Hours)
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.
Outcomes:
1) Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window; 2) Summarize interactions of drugs with receptors, enzymes, or nucleotides; 3) Analyze structure-activity relationships given potency data

CHEM 424 Molecular Characterization Part A (3 Credit Hours)
Pre-requisites: Graduate Students Only
This course will include a closer look at the theory and applications of several spectroscopic methods used for analysis of organic as well as inorganic compounds, including 1D and 2D methods employing 1H and 13C NMR, in addition to other elements; UV/Vis, combined with mass spectrometry.
Outcomes:
Students will be able to identify a compounds molecular structure based of spectroscopic means and understand the working principles behind those spectroscopies

CHEM 425 Special Topics in Organic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are: natural products, free radicals, molecular rearrangements, photochemistry, heteronuclear NMR, carbocyclic chemistry, medicinal chemistry, synthetic organic methodology, pericyclic reactions, heterocycles.

CHEM 429 Research in Organic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 430 Physical Chemical Survey (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Covers chemical thermodynamics, molecular structure and spectra, and chemical kinetics. It includes review and survey of some recent research.

CHEM 431 Chemical Thermodynamics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
An extended study of the principles of the thermodynamic laws followed by applications to real and ideal systems of gases, liquids, and solids; partial molal properties; principles and applications of quantum statistical thermodynamics to gaseous equilibria

CHEM 433 Chemical Kinetics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Description of rates of chemical reactions and interpretations thereof; principal theories of bimolecular and unimolecular processes; chain reactions; development of absolute reaction rate theory and application to a number of chemical systems; potential energy surfaces; includes heterogeneous kinetics, solution phenomena, isotopic effects, flow systems, empirical kinetic relations.

CHEM 435 Special Topics in Physical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are NMR spectroscopy, photophysical processes, molecular spectroscopy, computational chemistry, molecular modeling, and spectroscopy of surfaces.

CHEM 436 Statistical Thermo Dynamics (3 Credit Hours)
Methods of classical and quantum statistical mechanics applied to thermodynamic problems; calculation of thermodynamic quantities from spectral data; properties of real gases; selected problems in the solid sate.

CHEM 437 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: CHEM 302 or equivalent; strong courses in calculus and modern physical chemistry, and some knowledge of computer programming
A thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 438 Quantum Mechanics II (3 Credit Hours)
Pre-requisites: CHEM 437
This course is a continuation of CHEM 437, which is a thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 439 Research in Physical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 441 Advanced Inorganic Chemistry (3 Credit Hours)
The important topics in inorganic and organometallic chemistry are surveyed.

CHEM 445 Special Topics in Inorganic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are organometallic chemistry and catalysis, bioinorganic chemistry, physical methods in inorganic chemistry, inorganic reaction mechanisms, non-metal chemistry, transition metal clusters and X-ray crystallography.

CHEM 449 Research in Inorganic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 451 Chemical Methods of Analysis (3 Credit Hours)
Topics covered include the statistical evaluation of analytical results and sources of errors, sampling and significance of proper samples, optimization of experiments, review of acid-base theory, chelometry and its applications, theory of precipitation, oxidation and reduction reactions and applications.

CHEM 452 Electrochemistry (3 Credit Hours)
Fundamentals of electrochemistry, the application of electrochemical techniques and current literature.

CHEM 454 Analytical Separations (3 Credit Hours)
Topics include aspects of chromatography, partition, thin layer, gas and liquid chromatography, mass spectroscopy and other techniques.

CHEM 455 Special Topics in Analytical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. This course may involve a lab. Some courses are analytical absorption and emission spectroscopy, electroanalytical methods, environmental chemistry, lasers in analytical spectroscopy, and mass spectroscopy.

CHEM 456 Analytical Spectroscopy (3 Credit Hours)
We will discuss photometric instrumentation, absorption, emission and fluorescence spectroscopy and types of analytical laser spectroscopy.

CHEM 459 Research in Analytical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 460 Biophysical Chemistry (3 Credit Hours)
This class will cover the role of molecular interactions in determining the structure and reactivity of complex biological molecules. Modern experimental techniques are used in studying these interactions in biological systems.

CHEM 461 Biochemistry (3 Credit Hours)
The conformation, dynamics and biological activities of macromolecules, generation and storage of metabolic energy, and genetic information and biosynthesis will be discussed.

CHEM 465 Special Topics in Biochemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are protein chemistry, sequence and 3D structure, magnetic resonance spectroscopy, protein crystallography, bio-inorganic chemistry, molecular biology, molecular dynamics of proteins, and current developments in biochemistry and related areas.

CHEM 469 Research in Biochemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 470 Biochemistry I (3 Credit Hours)
Pre-requisites: Completion of undergraduate organic chemistry
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 479 Research in Chemical Education (1-9 Credit Hours)
Co-requisites: RMTD 400 and CIEP 229; This course is restricted to Chemistry Ph.D. students
Prerequisites or This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills.
Outcomes:
Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field; *describe and apply methods for preparing research data collected for publication; *describe and apply methods for analyzing chemical education research projects & manuscripts

CHEM 480 Chemistry for Teachers I (3 Credit Hours)
This course focuses on aspects specific to the teaching and learning of chemistry at post- secondary levels. Geared towards graduate students, undergraduate seniors, or current educators who plan on instructing college students, it explores principles surrounding how people learn chemistry and how to align pedagogies and environments to optimize learning opportunities for students. Course activities and assignments are designed to initiate the building of an instructional portfolio to prepare enrolled students for potential academic careers.

CHEM 491 Laboratory Investigations in Chemistry C (1 Credit Hour)
A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts.
Outcomes:
Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district

CHEM 497 Organic and Bio Chemistry for Teachers (3 Credit Hours)
Pre-requisites: Must be enrolled in M.Ed. in Chem Ed program
A course designed for urban high school teachers to enhance knowledge of chemistry and chemistry teachers.
Outcomes:
Increased chemistry content knowledge, ability to teach inquiry based chemistry

CHEM 500 Graduate Student Seminar (1 Credit Hour)
