In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon successful completion of the program, graduates will be able to:

- Conduct evidence-based health and fitness assessments
- Design individualized exercise programs to promote health, performance, and chronic disease management
- Develop lifestyle interventions that support health promotion, behavior change, and disease prevention across diverse populations.
- Demonstrate effective communication and coaching strategies.
- Evaluate scientific literature to critically analyze evidence-based findings to guide decision-making and problem-solving.

Health Informatics (MS)

As of Fall 2026, this program is no longer accepting applicants.

Create data-driven solutions to improve patient care.

With the abundance of data, particularly in health care, a Master of Science (MS) in Health Informatics & Data Science from Loyola University Chicago's Parkinson School of Health Sciences and Public Health will prepare students to understand how to use data to improve patient care and population health. Learn how to unlock the power of data through a wealth of career paths such as: Healthcare Data Analyst or Informaticist.

In our 100% online program, you will access real-world data through an internship or capstone project. Become a part of the new health care workforce trained in informatics and data science to improve outcomes and delivery, minimize health inequities, and achieve better care.

The Health Informatics (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Curriculum

Loyola's MS in Health Informatics is a two-year, 100% online program, with full- and part-time options available. You will start with foundational courses in health care informatics and data science, then hone in on your interests with elective courses. The program concludes with a capstone project and/or internship.

The program is 33 credit hours with a capstone project.

Besides the traditional Master's program, the Health Informatics (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Apply key health data science concepts to evaluate complexities within the U.S. healthcare and global public health systems with a strong emphasis on ethical consideration.
- Apply advanced computational techniques such as AI and Machine Learning to augment health information analyses and meet the needs of stakeholders in the healthcare system.
- Assess generative AI tools, health data quality, security, privacy, and informatics ethics, as well as effective strategies for data governance, evaluation, management, and workflow.
- Utilize ensemble databases to address real-world health challenges and for strategic problem-solving approaches.

- Apply theoretical, analytical, ethical, and communication skills to interpret and present health data effectively, using effective visualizations and other data presentation techniques to address complex healthcare challenges.

Health Informatics Certificate

As of Fall 2026, this program is no longer accepting applicants.

Learn how to unlock the power of data to improve health outcomes and patient care.

Electronic Health Records (EHRs) contain vast amounts of data. Yet typically, only 20 percent can be readily extracted.

In this certificate program, students learn how to apply machine learning, research methods, natural language processing, and database management to leverage the other 80 percent of "unstructured" health data. We work with our academic medical center partners to provide a hands-on, real-world healthcare database learning environment of more than two million patient encounters over 12 years (including structured and unstructured EHR data).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Graduates will be able to work with a multidisciplinary team of computer scientists, healthcare researchers, and data analysts to learn how to use open-source software packages to solve real healthcare programs.

Healthcare Administration (MHA)

The mission of the Department of Healthcare Administration (HCA) is to develop leaders to improve healthcare through education, research, and service, grounded in the Jesuit values of care for others and social justice.

Built on a thriving undergraduate Healthcare Administration (p. 737) (HCA) program and its strong national reputation within the Association of University Programs in Healthcare Administration (https://www.aupha.org/home/) (AUPHA), the new Healthcare Administration (HCA) graduate program is uniquely designed for aspiring professionals seeking the flexibility of part-time, online formats.

The program encourages individuals from diverse backgrounds and those with varied interests in health care. The department's vision is to be a national leader whose graduates are forces for positive change and leaders of teams that meet the challenges and opportunities of healthcare consistent with the highest ethical values.

The Healthcare Administration (MHA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Aligned with our Jesuit heritage, MHA students (and graduates) will have the skills and confidence to positively influence change in the healthcare industry. Through experiences such as the unique capstone project, students are asked to take initiative, analyze various types of information, and use evidence-based problem solving. In short, graduates are taught to be forces for positive change and leaders of teams that meet the

challenges and opportunities of healthcare consistent with the highest ethical values.

Specifically, graduates will be prepared to:

- Apply core business and financial principles to the healthcare environment
- Evaluate industry and organizational dynamics in the healthcare environment
- Drive operational and performance improvements in healthcare organizations
- Manage data to guide decision making in health services organizations
- Synthesize theoretical and analytical knowledge, critical thinking, and communication skills to solve problems in healthcare administration

Medical Laboratory Science (MS)

Medical Laboratory Scientists are at the heart of a patient-centered healthcare team, managing labs and running tests that will inform diagnosis and treatment.

A career in medical laboratory science combines the challenges of medicine, pathology, basic sciences, and clinical laboratory sciences. Students receive training in major disciplines of laboratory science, including Chemistry, Hematology, Hemostasis, Immunology, Immunohematology, Microbiology, Molecular Diagnostics, and Body Fluid Analysis. Using state-of-the-art biomedical instruments, critical thinking skills, and molecular techniques, medical laboratory scientists are the detectives of healthcare. Loyola's two-year Master of Science in Medical Laboratory Science will give you the tools you need to enter this low-profile, but critically important, aspect of the health care field.

This degree is geared towards those holding a baccalaureate degree in an area other than Medical Laboratory Science looking to expand their scientific career. Upon completion of the M.S. in Medical Laboratory Science degree, students will be eligible to sit for national Medical Laboratory Science certification exams.

The Loyola University Chicago Medical Laboratory Science program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). They can be contacted at: National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720 Rosemont, IL 60018; Ph: 773-714-8880; Fax: 773-714-8886; Email: info@NAACLS.org

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Demonstrate competency across major clinical laboratory disciplines to prepare for professional practice in medical laboratory science in accordance with established laboratory procedures.
- Apply critical thinking and evidence-based reasoning to interpret clinical data presented in assignments, case studies, and comprehensive exams.
- Communicate effectively in written and oral formats to serve the needs of patients, healthcare teams, scientific peers, and general public using clear, professional language.

Public Health (MPH)

How will you improve population health? As a public health professional, you can change lives by promoting and protecting the health and well-being of people and their communities locally, regionally, nationally, and globally.

The Master of Public Health program prepares students to promote health equity. We prepare future public health leaders through a competency-based and flexible community- engaged curriculum.

The Master of Public Health program is ideal for individuals seeking leadership careers in the diverse and growing field of public health.

The Public Health (MPH) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Accreditation

Loyola's BSPH and MPH programs are accredited by the Council on Education for Public Health (CEPH). CEPH accreditation provides assurance that the program has been evaluated and met accepted standards established by and with the public health profession. For question on accreditation, contact the MPH Program Director, Ruth Kafensztok (rkafens@luc.edu).

Curriculum

Offered in-person, online, or hybrid, Loyola's MPH is a 42-credit curriculum. Online courses include both synchronous and asynchronous components. We offer concentrations in four study tracks: Epidemiology, Policy and Management, Global Health Equity, and Biostatistics. The curriculum includes six core courses, concentration-specific courses, electives, and applied practice and integrative learning experiences.

Besides the traditional Master's program, the Public Health (MPH) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Online Learning

Convenient and rigorous, the online program is geared to working professionals, non-traditional students, and individuals who need a more flexible learning format. Loyola University Chicago faculty with expertise in Public Health, Public Health Policy and Management, Environmental Health, Bioethics, Epidemiology, and Biostatistics teach in this program. The vast resources of Loyola's Parkinson School and the Health Science Campus, along with the combined knowledge and experience of distinguished faculty from medicine, social work, bioethics, health policy and law, will help you take on many opportunities and challenges.

Code	Title	Hours
MPH Foundational Courses		
MPBH 400	Determinants of Population Health	3
MPBH 402	Public Health Practice and Management	3
MPBH 403	Introduction to Epidemiology	3
MPBH 404	Biostatistics for Health and Biological Science	3
or MPBH 409	Biostatistics I	
MPBH 407	Public Health Policy: Concepts and Practice	3
MPBH 499	Public Health in Action	3

MPH Track-Specific Curricula [1]		**15-18**
MPH Electives		**3-6**
Select two of the following: [2]		
MPBH 426	Infectious Disease Epidemiology	
MPBH 415	Non-Communicable Disease Epidemiology	
MPBH 432	Health Impact Assessment	
MPBH 495	Special Topics	
Applied Practice Experience		**1**
MPBH 410	MPH Practicum	
Integrated Learning Experience		**2**
MPBH 411	MPH Capstone	
Total Hours		**42**

1. Selected courses from other schools/programs may satisfy MPH elective requirements. Students in the Biostatistics track will take six (6) track courses instead of five (5).
2. Selected courses from other schools/programs may satisfy MPH elective requirements. Students in the Biostatistics track will take only one elective.

MPH Track-Specific Curricula (15-18 credit hours)

Epidemiology

This hybrid program combines online and evening classes. Epidemiology is the basic science of public health: it helps us understand the causes of and solutions to diseases. This track equips students to design, conduct, analyze, and interpret population health research, while they learn the basic principles of all public health disciplines.

Code	Title	Hours
MPBH 412	Intro to Statistical Computing for Public Health	2
MPBH 421	Biostatistics II	3
MPBH 423	Intermediate Epidemiology	3
MPBH 427	Advanced Statistical Methods	1
MPBH 431	Grant Writing	3
Select one Research Methods Course from the following:		3
MPBH 414	Introduction to Global Health	
MPBH 433	Clinical Trials	
MPBH 415	Non-Communicable Disease Epidemiology	
MPBH 434	Systematic Review and Meta-Analysis	
ENVS 480	Introduction to Geographic Information Systems	
Total Hours		**15**

Global Health Equity

This concentration is a hybrid program of online and evening classes. Study the health of global populations with the ultimate goal of identifying and eliminating structures and practices of inequity and injustice to advance health equity for individuals and populations.

Code	Title	Hours
MPBH 414	Introduction to Global Health	3
MPBH 417	Global Maternal and Child Health	3
MPBH 422	Population Health Planning & Management	3
MPBH 431	Grant Writing	3
Select one of the following: [1]		3
BEHL 407	Social Determinants of Health and Bioethics	
BEHL 432	Global Bioethics	
Total Hours		**15**

1. Students may choose an elective course not on this list with Track Director approval.

Public Health Policy and Management

This concentration can be completed entirely online, and also can be taken with in-person courses. This curriculum studies the organization, structure, and delivery of health-related services, and associated population health outcomes. Students may customize their academic focus in either public health policy, administration, or both.

Code	Title	Hours
MPBH 416	Health Services Research Methods	3
MPBH 425	Policy Analysis	3
Select one of the following:		3
BEHL 402	Justice & Health Care	
BEHL 404	Biomedical Ethics and Law	
BEHL 407	Social Determinants of Health and Bioethics	
BEHL 411	Systems Ethics Frameworks	
BEHL 412	Organizational Ethics I: Business, Professionalism, and Justice	
BEHL 432	Global Bioethics	
Select two of the following:		6
Policy-oriented		
MPBH 420	Public Health Law: Theories and Cases	
MPBH 424	Health Economics and Healthcare Financing	
Management-oriented		
CMAN 533	Fiscal Management in Health Care Organizations	
MPBH 422	Population Health Planning & Management	
Total Hours		**15**

Biostatistics

This track aims to equip students with advanced skills in statistical techniques and data analysis, with a particular emphasis on harnessing digital data for public health innovation. By integrating modern analytical methodologies tailored specifically to the digital data landscape of the public health domain, this track enhances the program's relevance and ensures our graduates are well-prepared to lead in the data-driven public health landscape.

Students in the Biostatistics track require the same 6 core MPH courses as the other three existing tracks as well as the Applied Practice Experience and Capstone Experience. They also select one elective course.

Code	Title	Hours
Track Requirements		
MPBH 412	Intro to Statistical Computing for Public Health	2
MPBH 421	Biostatistics II	3
MPBH 427	Advanced Statistical Methods	1
MPBH 449	Biostatistics for Public Health Interventions	3
MPBH 450	Biostatistics for Electronic Health Record (EHR) Data	3
MPBH 460	Public Health Data Visualization and Reporting	3
Electives		

Select one of the following:		3
ENVS 480	Introduction to Geographic Information Systems	
HIDS 411	Clinical Data Science	
MPBH 431	Grant Writing	
MPBH 433	Clinical Trials	
MPBH 434	Systematic Review and Meta-Analysis	
Total Hours		**18**

Applied Practice Experience (1 credit)

Also known as the MPH practicum, it provides the student with practical experience in a public health setting, requiring the student to apply and integrate skills and knowledge learned in courses. The applied practice experience (APE) must be 210 hours or more. Students must apply five program competencies to their APE and produce at least two deliverables, which will become part of their portfolio. Examples of APE sites include MRSA Research Center, North Shore Mosquito Abatement District, Summer Field Research in Ghana, Health and Medicine Policy Research Group, American Cancer Society, American Diabetes Association, Chicago Department of Public Health, and Mount Sinai Hospital.

Integrated Learning Experience (2 credits)

The integrated learning experience is a student-led capstone project culminating with a presentation and written manuscript. The project should demonstrate student's ability to apply acquired skills and competencies to a public health problem that simulates a professional practice experience. Depending on their interests, some students may analyze data collected during their practicum to help complete their capstone.

Dual Degrees and Other Programs

The needs of the public health workforce are diverse and ever-changing. Our students are diverse and pursue public health graduate studies at different points in their careers, from undergraduate through practicing nurses and physicians. To meet these needs, the Department of Public Health Sciences offers six additional programs:

- Accelerated Master's Pathway Five-Year Bachelor/MPH Degree
- Doctor of Medicine/ Master of Public Health (MD/MPH)
- Master of Social Work/Master of Public Health (MSW/MPH)
- MS in Clinical Research Methods and Epidemiology (CRME)
- Public Health Certificate

Note: Students entering the program may wish to pursue careers that may require licensure (e.g. Registered Environmental Health Specialist) or certification (e.g. Certified in Public Health or Certified Professional in Food Safety) upon or before employment. Loyola University Chicago cannot guarantee that the Master of Public Health will prepare students to meet the unique requirements for licensure or certification in their specific location and/or area of expertise. Students should check with their local licensing or certifying authority to determine what requirements are necessary.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term and the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Traditional Master's Program

Accelerated Master's Pathway

Students can take up to 15 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

The following courses could be taken in the senior year of the undergraduate program as part of the AMP program: MPBH 400, MPBH 402, MPBH 403, MPBH 407, MPBH 409, MPBH 414, MPBH 417, ENVS 480.

Below is a sample schedule:

Course	Title	Hours
Senior		
Fall		
MPBH 400	Determinants of Population Health	3
MPBH 403	Introduction to Epidemiology	3
MPBH 407	Public Health Policy: Concepts and Practice	3
	Hours	**9**

MPH Elective		3
MPBH 411	MPH Capstone	1
	Hours	**7**
	Total Hours	**42**

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate

degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

You will graduate with public health competencies in the areas of quantitative and qualitative data collection, evidence-based approaches, public health and health care systems, planning and management, policy, leadership, communication, interprofessional practice, and systems thinking. More specifically, **public health foundational competencies** attained through the MPH curriculum include:

- Analyze problems and data using epidemiological, biostatistical, qualitative, and/or systems-thinking methods to inform public health policy and practice.
- Design#population-based research, policies, programs, or interventions that are evidence-informed, equity-centered, and culturally responsive to population and community health needs.
- Apply#principles of leadership, communication, and interprofessional collaboration to the development, promotion,#delivery#or evaluation of public health solutions.

Public Health Certificate

As of Fall 2026, this program is no longer accepting applicants.

How will you help address health disparities? Loyola's commitment to serve people who live on the margins and suffer other injustices includes efforts to eliminate disparities in access to health care in Chicago and throughout the world. The Public Health Certificate (PHC) program trains students to address racial and economic health disparities through public health research, practice, and advocacy. Loyola's campuses, in racially and economically diverse communities, provide "real-world" experience during your certificate courses, and our health professionals and faculty are committed to promoting social justice in the Jesuit tradition.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The Public Health Certificate from Loyola will provide students with core public health knowledge and skills to address public health concerns in your field of practice or to further pursue a master's in public health. More specifically, by completion of the program students should:

- Acquire proficiency in the core public health disciplines, including epidemiology, biostatistics and public health practice/management.
- Have a foundation to explore further training in public health and/or global health.
- Develop skills in the areas of: Evidence-based approaches to research; Health care systems planning and management; and Leadership and communication.

Quinlan School of Business

From the smallest startups to the largest international corporations, the rapidly changing business world needs leaders who can anticipate change and innovate.

Loyola University Chicago's **Quinlan School of Business** helps prepare you for these leadership roles. Our top-ranked programs offer convenient MBA and MS programs in the heart of Chicago.

Flexible. Convenient. Transformative.

Through evening and weekend classes in downtown Chicago and online, you will be able to fit your graduate business program into your personal and professional life.

We offer a broad range of programs and specializations:

What Sets Us Apart

You have big plans for the future. Whether you're building a new career or enhancing the job you have, we can get you where you want to be. Loyola University Chicago's Quinlan School of Business offers top-ranked and respected graduate programs to make those big plans a fulfilling reality.

Sustainable Leadership

Extraordinary leaders are respected and trusted in their organizations as well as in their communities. At Quinlan, you will learn from the

successes and mistakes of business leaders and see how those principles translate into the work you are doing today and in your future.

Real-world Learning

All of our courses focus on real-world, hands-on business issues in a global context. You'll apply theory learned in the classroom to current business problems. Our faculty members are established business experts who enrich our graduate programs with their extensive knowledge and first-hand experiences.

Faculty

Quinlan students rely on the expertise of our instructors to gain a global perspective and to refine their analytical tools and managerial abilities, while sharpening critical thinking and leadership skills.

Mid-career professionals benefit from building their theoretical and practical know-how by analyzing case studies and developing real-world projects.

Our Alumni Network

Quinlan graduates join an impressive network of 30,000 alumni in Chicago, the U.S., and around the world—many of whom have achieved leadership positions, and the majority of whom continue to reside and work in the Chicagoland area.

Our Values

Our graduate business programs believe that it is possible to be successful in business while still operating in an ethical and responsible manner.

- **Community**: We value all members of our campus, local, and global community, and seek to develop involved and responsible community members.
- **Diversity**: We value civility, respect, appreciation, and an in-depth understanding of diversity, including the ability to put knowledge into meaningful action.
- **Ethics**: We focus on ethical issues and challenges in business to develop leaders who demonstrate ethical awareness, ethical judgment, and the ability to evaluate and make moral decisions in difficult scenarios.
- **Justice**: We value justice through service that uses learning and leadership in the pursuit of truth and care for others.
- **Leadership**: We value personal growth through leadership and seek to develop responsible leaders who are committed to the common good.
- **Sustainability**: We engage students in understanding and responding to local and global environmental issues by raising awareness, advancing our knowledge of environmental problems, developing solutions, encouraging action, and developing an environmentally conscious culture throughout the university.

Accounting (ACCT)

ACCT 400 Financial Accounting for Business Decisions (3 Credit Hours)
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400B Financial Accounting for Business Decisions (3 Credit Hours)
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400C Financial Accounting for Business Decisions (3 Credit Hours)
Pre-requisites: Enrollment is restricted to students in the Healthcare Management MBA Program
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400E Financial Statement Analysis and Decision Making (3 Credit Hours)
Pre-requisites: Restricted to the students enrolled in the Executive MBA program
Explores the development and application of financial statement information. Students will focus on basic concepts, standards, and practices of financial reporting to serve decision-making needs. Students will also work with financial ratio analysis software.

ACCT 402 Issues in Financial Reporting (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course stresses research of selected accounting issues and uses the authoritative pronouncements to better understand financial accounting and reporting. The course structure includes lectures, class discussion, case analysis, and research of timely accounting issues. Group interaction is heavily emphasized.
Outcomes:
Students will be able to demonstrate an understanding of the professional pronouncements as they relate to the recognition and measurement of selected accounting topics; Students will also be able to work as a team to research an accounting issue and professionally communicate their research findings

ACCT 404 Financial State Analysis (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course evaluates the information contained in the financial statements, footnotes, and management discussion and analysis for its usefulness in making investment and credit decisions. Students will synthesize these assessments via a comprehensive financial statement analysis project.
Outcomes:
Students will be able to assess the appropriateness of asset valuation, liability measurement, and equity values for judging the performance of an enterprise

ACCT 405 Accounting Theory I (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent with a grade of C- or better
The course involves a detailed study of the theory, concepts, and procedures of financial accounting. The course focuses on applications involved in accounting for assets, equities, and the valuation and measurement of related income items. It also focuses on the accounting model with emphasis on applying the accounting framework to revenue and asset valuation. Time is spent discussing the theory and logic behind the accounting model and how it impacts financial statements. Restricted to Graduate School of Business Students.

ACCT 406 Accounting Theory II (3 Credit Hours)
A continuation of ACCT 405, the course focuses on valuation issues related to liabilities and other special topics. Complex problems involving investments, earnings per share, pensions, leases, income taxes, bond valuation, and fair value accounting are studied.

ACCT 407 Tax Principles Applied to Individuals (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course provides detailed coverage of the key Federal income tax concepts and planning principles applicable to individual taxpayers.

ACCT 408 Tax Principles Applied to Entities (3 Credit Hours)
This course provides detailed coverage of the key Federal income tax concepts and planning principles applicable to various business entities and an overview of Federal transfer taxes.

ACCT 409 Audit I -Audit and Assurance (3 Credit Hours)
This course introduces the student to the environment in which Public Accounting exists as well as the standards, both AICPA and PCAOB, which firms must follow in rendering audit and assurance services. The course covers both the theoretical and practical issues involved in planning an engagement, risk assessment and the audit risk model, evidence gathering and internal control policies and procedures. The audit of major transaction cycles (i.e. the revenue cycle) and account groups (i.e. Cash) are then covered highlighting internal specific control policies, testing of controls and substantive audit procedures to gather evidence. Study of appropriate AICPA and PCAOB professional standards is an integral part of this course.

ACCT 410 Audit II-Advanced Audit and Professional Ethics (3 Credit Hours)
This course consists of an in-depth study of specific topics related to both attest and non-attest services rendered by public accounting firms. Topics include: Professional ethics and a study of the AICPA Code of Professional Conduct; Accountants legal liability, federal securities laws and cases related to CPA malpractice; The use of technology and sampling in an audit; Securities & Exchange Commission practice, the integrated audit and the Sarbanes-Oxley Act; and Audit and other reports. Study of appropriate AICPA and PCAOB professional standards is an integral part of this course.

ACCT 411 Business Law and Accountants (3 Credit Hours)
This course is designed to familiarize the student with aspects of the legal environment of special concern to accountants. With emphasis on the legal aspects of commercial transactions, the course examines the laws governing sales transactions and the instruments for financing those transactions. Topics include contract law, the Uniform Commercial Code (sale of goods, negotiable instruments, secured transactions), and creditor-debtor relations.

ACCT 412 Special Topics in Accounting (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ACCT 424 Managerial Accounting (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
Topics include product costing and activity based costing concepts, development and analysis of information for short-run and long-run decision making, the impact of accounting information on divisional performance, cost estimation and cost-volume-profit analysis, segment analysis, transfer pricing, budgeting concepts, and behavioral issues associated with accounting information.
Outcomes:
Develop and use managerial accounting information for operational and strategic decision making

ACCT 424E Strategic Cost Accounting (3 Credit Hours)
Pre-requisites: Restricted to the students enrolled in the Executive MBA Program
Explores the application of internal accounting information. Students will focus on traditional and contemporary managerial accounting practices. Students will work to (1) understand cost behavior, (2) conduct activity analysis, and (3) predict cost under different business decisions.

ACCT 425 International Accounting (3 Credit Hours)
This course explores the similarities and differences of accounting principles and procedures between the United States and other countries. Topics include consolidation of foreign subsidiaries, performance evaluation of foreign operations, translation issues, inflation accounting, and efforts at standardization of accounting rules.
Outcomes:
Students will become familiar with international accounting issues including accounting harmonization, pronouncements of the International Accounting Standards Board, transfer pricing, foreign currency financial statements, foreign exchange, and international taxation

ACCT 431 Tax Research (3 Credit Hours)
This course will provide graduate business students with the basic techniques of conducting federal tax research, and enable them to apply those techniques to a variety of research cases and communicate their research results in both written and oral formats. Includes establishing relevant facts; identifying tax issues; developing & communication conclusions and recommendations in writing and orally.

ACCT 432 State, Local and International Tax (3 Credit Hours)
Pre-requisites: ACCT 408 with a grade of C- or better or its equivalent; Department Consent Required
This course will provide graduate business students with a basic understanding and familiarity with the principles of U.S. multi-jurisdictional taxation. The first half of the course will focus on the various types of state and location taxation and their common themes and differences. The second half will address Federal income taxation of cross-border transactions, both inbound and outbound.
Outcomes:
Demonstrate the ability to properly allocate taxable income between different taxing jurisdictions; Understand the basic principles and policies underlying state, local, and international taxation; Develop a working knowledge of the different types of taxes

ACCT 435 Internal Audit (3 Credit Hours)
This course will expose students to the fundamentals of internal auditing with an emphasis on internal controls. Topics covered will include an overview of internal auditing theory and internal audit in practice. After these overviews, an in depth review of internal controls will be examined, including internal controls best practices, risk assessment, control identification, audit design, testing of controls and audit reporting. Finally, the class may include a hands-on internal audit engagement in a real life setting. Student must have completed 9 hours of undergraduate accounting or 6 hours of graduate accounting courses.
Outcomes:
Students should have a clear understanding of how internal controls are used throughout a company and how auditors help design, test and report on their effectiveness

ACCT 436 Forensic Accounting and Fraud (3 Credit Hours)
The purpose of the course is to familiarize students to the field of Forensic Accounting and sensitize them to: the prevalence of fraud in all forms of business activity; the methods people use in initiating/perpetuating fraud scheme; ways of staying out of or getting out of a fraud conspiracy. Students are presumed to have strong accounting and auditing skills. This course will be covering ethics, accounting, auditing, misappropriation of assets, fraudulent financial reporting, electronic fraud and other fraud investigation/forensic accounting topics.
Outcomes:
Students who successfully complete this course will be able to demonstrate: knowledge of the nature and magnitude of economic fraud as it affects a variety of entities; understanding of the role of the accounting profession in fraud prevention and detection; technical knowledge of forensic accounting, forensic investigations and research

ACCT 437 Advanced Forensic Accounting (3 Credit Hours)
This course will focus on fraud audits of private entities. In the course of financial reviews questions arise about complex financial transactions, employee dishonesty, collusion, and breakdowns in internal controls. Normal audit procedures may discover the issue but additional steps are necessary to quantify and detect the extent of the fraud.
Outcomes:
Students in this course will develop basic forensic skills via analytical training

ACCT 439 Independent Study (1-3 Credit Hours)
Independent study is in-depth research and/or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of accounting not otherwise covered by department course offerings. Student is typically expected to develop a manuscript worthy of publication. The project should require the workload associated with a graduate level course. Normally, this course may be taken one time for credit.
Outcomes:
Student must demonstrate a detailed understanding of the selected accounting topic

Business Administration (BSAD)

BSAD 400E Business Foundations (1.5 Credit Hours)
Enrollment limited to students enrolled in the EMBA or EMBA Health Care Management Programs. Introductory course delivered during initial residency/orientation week to lay foundation for business education in the EMBA and EMBA Health Care Management Programs. Course coverage includes: Jesuit traditions/values, Quantitative Methods, Business Communications, and current topical lecture.

BSAD 401E Effective Business Writing Workshop (0.75 Credit Hours)
Enrollment is restricted to the Executive MBA or Executive MBA Health Care Management program. This course introduces the fundamentals of good written and oral business communications. Course topics include: communicating strategically; making a business case (argumentation and persuasion); presenting data effectively; producing and delivering compelling PowerPoint presentations; and delivering a powerful presentation.

BSAD 402E Effective Business Presentation Skills Workshop (0.75 Credit Hours)
This course introduces the fundamentals of good oral business communications. Course topics include: presenting data effectively; producing and delivering compelling PowerPoint presentations; and delivering powerful presentations. Restricted to students enrolled in EMBA or MBA Health Care Management cohort

BSAD 409E Integrative Strategy (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Integrates functional area considerations with strategic decision-making at the end of the program.

BSAD 499E Special Topics (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Offers students opportunity to gain additional understanding on a special business topic not otherwise covered in the standard EMBA curriculum. The subject and content vary and are offered on an ad hoc basis.
Outcomes:
Students will demonstrate understanding of specialized topics not otherwise covered in EMBA curriculum

BSAD 601E Special Topics (1.5 Credit Hours)
Restricted to Executive MBA students. Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

BSAD 609E Integrative Strategy (1.5 Credit Hours)
Restricted to Executive MBA students. Integrates holistic and humanistic concepts (social justice, sustainability, greater good, Jesuit perspectives, etc.) into scientific business management and one's individual lifestyle. Students apply these perspectives by addressing recent developments in emerging topics. In addition, students will present final Capstone project.

Business Ethics (ETHC)

ETHC 441 Business Ethics (3 Credit Hours)
This course examines the ethical aspects of individual and corporate decision making in business and provides resources for making ethical decisions within the context of managerial practice.
Outcomes:
Students will be acquainted with the concepts and principles of ethical reasoning that have been developed in ethical theory; be aware of the specific ethical issues that arise in management and of the ways in which these issues are commonly analyzed; and be able to make sound ethical and managerial decisions and to implement those decisions within the context of an organization in a competitive marketplace

ETHC 441B Business Ethics (1.5 Credit Hours)
This course examines the ethical aspects of individual and corporate decision making in business and provides resources for making ethical decisions within the context of managerial practice.
Outcomes:
Students will be acquainted with the concepts and principles of ethical reasoning that have been developed in ethical theory; be aware of the specific ethical issues that arise in management and of the ways in which these issues are commonly analyzed; and be able to make sound ethical and managerial decisions and to implement those decisions within the context of an organization in a competitive marketplace

ETHC 441E Business Ethics and Values (1.5 Credit Hours)
Pre-requisites: Restricted to students in the Executive MBA Program
This course combines Quinlan's core business ethics course with contemporary instruction in leadership. Students will develop a framework for ethical decision making and the leadership strength needed to advance business decisions.
Course equivalencies: ETHC 600E/ETHC 441E

ETHC 441N Business Ethics (3 Credit Hours)
Students are introduced to theories about social and political institutions, and how they affect our ability to make moral decisions. Topics may include social psychology, capitalism and its critics, democratic theory, labor relations, and social inequalities. Classes are dedicated to understanding and engaging with social and political theory on this topic. Assignments will involve students using these theories to critically assess corporate practices and contexts. School of Business graduate degree students
Outcomes:
Global Perspective & Awareness of Diversity: developing a global perspective and appreciating diversity, including class, culture, race, religion, and gender; Communication Skills: communicating complex moral and philosophical ideas effectively and appropriately in an oral and written manner

ETHC 443 Global Environmental Ethics (3 Credit Hours)
This course develops an understanding of the ethical issues and responsibilities arising from human interaction with the non-human natural environment. Perspectives from various religious traditions, Western philosophy, and the science of ecology are considered.
Outcomes:
Students will be able to demonstrate ethical awareness, reflection, and application of ethical principles in decision making

ETHC 446 International Business Ethics (3 Credit Hours)
This is an advanced business ethics course that addresses the ethical challenges of international business for managerial decision making. The main emphasis of the course is on implementation, and standards, for operating ethically within multinational corporations and on ethical problems in specific countries or regions of the world.
Outcomes:
The course aims to equip managers with ethical decision-making skills in global business by understanding complex interactions among market, policy, and society, analyzing personal decision-making, and improving communication abilities

ETHC 499 Special Topics in Business Ethics (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Economics (ECON)

ECON 420 Managerial Economics (3 Credit Hours)
Pre-requisites: ISSCM 400 OR ISSCM 400N
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420B Managerial Economics (3 Credit Hours)
Pre-requisites: ISSCM 400 or ISSCM 400N
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions. Restricted to students in the Baumhart Scholars Program.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420C Managerial Economics (3 Credit Hours)
Pre-requisites: Enrollment is restricted to students in the Healthcare Management MBA Program
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420E Managers, Markets and Decision Making (3 Credit Hours)
Pre-requisites: Restricted to the students in the Executive MBA program
The purpose of this course is to guide students in recognizing, analyzing, and solving managerial problems related to firms and markets under conditions of uncertainty. The course uses economic analysis to understand demand, supply, profit, production, competition, pricing policies, and business criteria for investments. Strategic decisions using economic laws influenced by FED will also be examined.

ECON 421 Business Fluctuations (3 Credit Hours)
Pre-requisites: ECON 420
This course studies the economic environment's impact on the firm where topics include national income accounting, factors in economic fluctuations and growth, fiscal and monetary policies, economic forecasting, the relationship of foreign trade and balance of payments on economic activities, economic indicators and measures, and problems of public policy.
Outcomes:
Students learn to recognize the macro environment and the business cycles in which to operate in and to make learned forecasts

ECON 424 International Business Economics (3 Credit Hours)
Pre-requisites: ECON 420
This course analyzes topics in international economics, specialization and comparative advantage, balance of payments and foreign exchange, elements of commercial policy, and international investment.
Outcomes:
The students develop skills in this course in analytical and creative thinking, Communication and team-work in evaluating trade policies and opportunities, comparative advantage, exchange rate dynamics and fluctuations and risk management

ECON 424E Global Issues in Economics (1.5 Credit Hours)
Pre-requisites: Restricted to the students in the Executive MBA program
Examines the role of prices, incomes, interest rates, exchange rates, trade policy, and the global monetary system in determining the movement of outputs and inputs across national boundaries. The gains from trade and the conflicts created by the manner in which those gains are distributed provide a foundation for examining current issues.
Course equivalencies: ECON 424E/ECON 602E

ECON 429 Independent Study in Business Economics (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of economics not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in economics

ECON 522 Game Theory & Strategy (3 Credit Hours)
Pre-requisites: ECON 420
This course studies cooperative and non-cooperative games and winning strategies and discusses prisoners dilemma, tragedies of common resources, executive compensation and auctions as applied to mergers and acquisitions.
Outcomes:
Students learn to think systematically to set strategy for the modern corporate firm in both cooperative and non-cooperative situations and to solve conflicts arising from principal agent problems

ECON 599 Special Topics (3 Credit Hours)
Pre-requisites: ECON 420; Restricted to Graduate School of Business students
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ECON 602E Global Issues in Economics (1.5 Credit Hours)
Examines the role of prices, incomes, interest rates, exchange rates, trade policy, and the global monetary system in determining the movement of outputs and inputs across national boundaries. The gains from trade and the conflicts created by the manner in which those gains are distributed provide a foundation for examining current issues.
Course equivalencies: ECON 424E/ECON 602E

ECON 622 Derivative Securities (3 Credit Hours)
Pre-requisites: FINC 450
This course is a comprehensive introduction to the theory, use, and valuation of derivative securities, with particular emphasis on options and forward/futures contracts. A sound understanding of the intuition underlying option pricing is critical to a thorough understanding of modern finance and financial risk management. We may also look at other types of derivatives as well as some extensions of the most fundamental models.

ECON 625 Applied Econometrics (3 Credit Hours)
Pre-requisites: ECON 420 and ISSCM 491
The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects.
Course equivalencies: X-ECON625/FINC625

Finance (FINC)

FINC 450 Financial Management (3 Credit Hours)
Pre- or co-requisites: ACCT 400
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450B Finance for a Sustainable World (3 Credit Hours)
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450C Financial Management (3 Credit Hours)
Pre-requisites: Enrollment is restricted to students in the Healthcare Management MBA Program
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450E Financial Management (3 Credit Hours)
Pre-requisites: Restricted to the students in the Executive MBA program
Studies the functions, tools, and policies of financial, investment, and portfolio management. Students analyze the structure of financial markets, valuation of stocks and fixed income securities, risk and return relationships, and portfolio theory. Topics include investment and financial decision making under uncertainty.

FINC 451 Financial Markets & Institutions (3 Credit Hours)
Pre-requisites: FINC 450
Introduction to the financial system in the United States, including the fundamentals and role of money and capital markets, the institutions operating in these markets, the instruments traded, and the organization, functioning and operation of the Federal Reserve System.
Outcomes:
Students will be able to demonstrate an understanding of how financial markets and institutions work and are important to financial decision making, how interest rates and bond prices are determined and interrelated, why and how financial institutions are regulated by the government, and who the Federal Reserve is and how its actions affect the economy

FINC 452 Investment Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This course includes the topics of asset pricing models; risk and return analysis of stocks, bonds and cash equivalents; portfolio theory; bond pricing, the term structure of interest and immunization strategies in managing fixed income securities.
Outcomes:
Students will be able to demonstrate the analytical tools and finance theory necessary for making good investment decisions and for understanding the pricing of financial securities

FINC 453 Topics in Advanced Financial Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This is an advanced course in corporate finance where students are given a thorough grounding in firm valuation and exposed to various financial decisions including raising capital, mergers and acquisitions, leveraged buyouts, spin-offs, and carve-outs, all in the context of their impact on firm value.
Outcomes:
Students will be able to demonstrate an understanding of firm valuation, as well as the impact of various corporate decisions on firm value

FINC 455 International Financial Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This course examines the international dimensions of financial management. It introduces potential opportunities/challenges faced by multinational corporations as they expand their business overseas.
Outcomes:
Students will be able to demonstrate understanding of foreign exchange markets, fundamental international parity relationships, foreign exchange risk management strategies, and capital budgeting for multinational corporations

FINC 455E International Financial Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Examines foreign exchange rate exposure and hedging techniques to deal with exposure. Other topics include capital budgeting in an international framework and international financial markets.
Course equivalencies: FINC 455E/FINC 602E

FINC 456 Management of Financial Institutions (3 Credit Hours)
Pre-requisites: FINC 450
The course analyzes the importance played by financial institutions. This is a survey course that analyzes the present financial institutional structure with a special focus on managing risk.
Outcomes:
Students will demonstrate an understanding of the following topics: the role of financial intermediaries in managing interest rate, credit, market and international banking risks; Special attention will be given to procedures for measuring and managing these risks

FINC 459 Independent Study-Finance Management (3 Credit Hours)
Pre-requisites: FINC 450
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Finance not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in finance

FINC 470N Business Finance (3 Credit Hours)
Pre-requisites: FINC 450 or equivalent course
Exposure to international financial markets, international diversification, derivatives, risk management, asset valuation, multinational capital budgeting and more.
Outcomes:
Exposure to international diversification, derivatives, risk management, trading options, asset valuation and more

FINC 552 Emerging Markets (3 Credit Hours)
Pre-requisites: FINC 450 and ECON 420
An introduction to the contribution made by financial markets and institutions to economic growth and development in emerging market countries. Normally taught in Thailand, the course will provide a close look at a successful emerging market country.
Outcomes:
Students will demonstrate an understanding of the following topics: the contribution of financial institutions and markets to economic growth and development, the causes and effects of financial crises, the financial liberalization controversy, the impact of inflation, and the causes and effects of corruption; In addition, students will also demonstrate knowledge of Thailand's economic and financial systems

FINC 553 Applied Portfolio Management (3 Credit Hours)
Pre-requisites: FINC 452
This is a course in investment analysis and applied portfolio management. Topics will include investment policy and objectives, performance analysis and attribution, portfolio design, fixed income analysis and portfolio management, and equity analysis and portfolio management.
Outcomes:
At the conclusion of this course the student should be able to: 1) Create an investment policy statement; 2) Analyze and value fixed income securities; 3) Analyze and value equity securities; and 4) Develop and manage a portfolio of debt and equity securities

FINC 554 Fixed Income (3 Credit Hours)
Pre-requisites: FINC 450, or Quinlan Finance 450 Student Group Waiver; or B or better in FINC 335
This course provides an in-depth coverage of fixed income securities, and their markets. The course is an extension to other offerings in the finance program on futures, equities, and interest rate derivatives. The course is supplemented with hands-on applied sessions using Bloomberg, a leading global benchmark for data and analysis used by financial professionals worldwide.
Outcomes:
Identify the types, classifications, and characteristics of fixed income securities; Use Bloomberg and/or other resources to extract, interpret and aggregate key data; Analyze and price different types of fixed income securities

FINC 556 Investment Banking (3 Credit Hours)
Pre- or co-requisites: FINC 452; or prerequisite FINC 335 with minimum grade of " B"
This course provides a broad overview of the activities of investment banks, including venture capital fundraising, stock and bond underwriting, mergers and acquisitions, trading, asset securitization and money management.
Outcomes:
Students will understand how investment banks enhance capital markets by providing financing and investment services to companies, governments and individuals

FINC 599 Special Topics (3 Credit Hours)
Pre-requisites: FINC 450
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

FINC 602E International Financial Management (1.5 Credit Hours)
Examines foreign exchange rate exposure and hedging techniques to deal with exposure. Other topics include capital budgeting in an international framework and international financial markets.
Course equivalencies: FINC 455E/FINC 602E

FINC 620 Financial Mathematics and Modeling I (3 Credit Hours)
Pre-requisites: FINC 452 (co-requisite) and ISSCM 491 (pre-requisite); OR FINC 335 with a minimum grade of B (pre-requisite)
This course focuses on how to effectively use Python to build financial models. The course initially trains students to become sufficiently proficient to build financial models using Python, and then moves to its applications, such as translating raw data into meaningful indicators to help investment decisions. The course will examine financial securities, portfolio optimization, as well as valuation problems.

FINC 621 Financial Mathematics and Modeling II (3 Credit Hours)
Pre-requisites: FINC 620
Financial mathematics and modeling II is the second in a sequence of two courses. It is a combination of lecture and lab and will focus on the core mathematical, computational and practical modeling aspects encountered in modern financial applications. The programming languages of choice will be R and Excel/VBA. This course has a prerequisite of FINC 450, FINC 452, FINC 620, and ISOM 400. No prior R programming experience is required but familiarity with Excel/VBA is a pre-requisite.

FINC 622 Derivative Securities (3 Credit Hours)
Pre-requisites: FINC 450, or Quinlan Finance 450 Student Group Waiver
This course is a comprehensive introduction to the theory, use, and valuation of derivative securities, with particular emphasis on options and forward/futures contracts. A sound understanding of the intuition underlying option pricing is critical to a thorough understanding of modern finance and financial risk management. We may also look at other types of derivatives as well as some extensions of the most fundamental models.

FINC 624 Interest Rate Risk Management (3 Credit Hours)
Pre-requisites: FINC 622 or FINC 346 with minimum grade of "B"
Students are introduced to a plethora of financial derivatives, including both exchange-traded and OTC products, and then learn to use these products to hedge interest rate and other risks largely through the study of cases and detailed examples emphasizing the formation and use of synthetic positions.
Outcomes:
Students will be able to demonstrate an understanding of a wide variety of derivative products, as well as be able to use these products to manage interest rate and other risks

FINC 625 Applied Econometrics (3 Credit Hours)
Pre-requisites: ECON 420 and ISSCM 491
The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects.
Course equivalencies: X-ECON625/FINC625

FINC 626 Credit Risk Management and Structured Finance (3 Credit Hours)
Pre-requisites: FINC 622 or FINC 346 with minimum grade of "B"
We study credit risk and credit risk management. We examine a suite of financial securities which can be used to reduce (or magnify) credit risks, especially credit default swaps (CDS), asset-backed securities (ABS) and collateralized debt obligations (CDOs). We consider the role of these structured credit products in the global financial crisis.

FINC 628 Valuation (3 Credit Hours)
Pre-requisites: FINC 450 or Quinlan Finance 450 Student Group Waiver, or FINC 342 with the minimum grade of "B"; Restricted to Graduate School of Business or Undergraduate School of Business
This is an advanced course in valuation where students are given a thorough grounding in traditional valuation models (DCF and relative valuation) and also introduced to real option methods and ideas; a certain emphasis is placed on the valuation of start-ups and students are introduced to the venture capital markets.
Outcomes:
Students will be able to demonstrate an understanding of traditional valuation models as well as real options methods and ideas

FINC 630 Capstone Master of Science Finance (3 Credit Hours)
Pre-requisites: FINC 450 and any 3 additional 450 and above FINC courses
This course integrates theory, analytics, and modeling skills acquired in advanced finance courses. Subject matter will include topics and techniques in corporate finance, international financial management, risk management, and investments. It is intended for Master of Science in Finance (MSF) students and select MBAs concentrating in finance and who have satisfied the necessary prerequisites.
Outcomes:
Students will be able to perform a complicated valuation analysis of a public or private company; Students will understand different short and long-term financing techniques and their impact on a firm's cost of capital, capital structure, financial risk, credit, and business strategy; Students will be able to perform a complicated international capital budgeting analysis; Students will be able to evaluate public and private investments and assess their place in a portfolio

Healthcare Management (HCMT)

HCMT 501 Healthcare Finance and Accounting (3 Credit Hours)
Pre-requisites: Restricted to students enrolled in the MBA Health Care Management program
No course description is available

HCMT 502 Healthcare Economics (3 Credit Hours)
This course provides an understanding of the unique economic complexities of the health care industry, with a focus on consumer demand for health and the supply of health care services.

HCMT 505 Healthcare Business Ethics (3 Credit Hours)
This course examines the decision-making process in health care settings using an ethical framework that reconciles competing values and a mindset that prioritizes dwindling resources among a significant number of health care stakeholders.

HCMT 506 Healthcare Policy and Law (3 Credit Hours)
This course will introduce the student to the US Legal System and its application to the Healthcare Administrative environment. Topics covered will include the major legislative and regulatory standards of Health Care Law.

HCMT 507 Healthcare Risk Management (3 Credit Hours)
Students will learn to identify legal, ethical, administrative and compliance risk management and patient safety issues and to reach resolutions for the problems presented. Students will learn how to respond to various risk management issues from the perspective of clinicians, lawyers, administrators, managers and patients and appreciate how events are perceived and managed; and often how these perceptions are in conflict.

HCMT 508 Global Issues in Healthcare Management (3 Credit Hours)
This course provides students with an understanding of comparative global health care systems. Topics of study will include different models of funding health care services (via public and private health insurance systems), various models of organization of health care providers, and measures of population health in the visit countries.

HCMT 509 Special Topics in Health Care Management (1.5 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary. Enrollment is restricted to students enrolled in MBA-Health Care Management program.
Outcomes:
Students will be able to demonstrate understanding of specialized topics in health care

HCMT 510 Data Driven Decision Making in Healthcare Management (3 Credit Hours)
The intent of this course is to expand data literacy by learning about data tools and how pitfalls can occur in the process of creating them. This includes learning how data is defined, captured, analyzed, and cleaned. In addition, students will learn how data science tools are used within a healthcare setting and what ethical concerns may exist.

HCMT 512 Healthcare Marketing Management (3 Credit Hours)
This course will cover how marketing should be integrated across today's healthcare organizations, and give healthcare leaders a foundational understanding of the marketing concepts necessary for effectively defining their market, communicating with multiple customer groups, and ultimately driving customer loyalty and growth.

HCMT 513 HR Strategic Management (1.5 Credit Hours)
This course will help students understand and analyze the strategic HR challenges and decisions that organizations face today. The course will include lecture, readings, completion of case analysis in learning teams, a group presentation on one case, an individual paper, and a panel discussion with healthcare HR professionals.

HCMT 514 Healthcare Leadership (1.5 Credit Hours)
This course will help students expand their thinking on what it takes to be an effective leader in today's healthcare environment. It will also provide students an opportunity to gain insight on themselves as leaders, including their leadership purpose, values, style, talents, and development priorities.

HCMT 515 Project Management (3 Credit Hours)
Pre-requisites: Restricted to students enrolled in the MBA-HCM program
No course description is available

HCMT 516 Change Management (1.5 Credit Hours)
This course explores the complexity and dynamics of change in organizations, with a particular focus on the health care domain. Topics covered include organization development, managing resistance, and change leadership. Students will develop an awareness of the ethical issues of change and corporate social responsibility. Restricted to Healthcare Management cohort only (HCMC-MBA).
Outcomes:
Students will develop an awareness of the ethical issues of change and corporate social responsibility

HCMT 530 Capstone: Strategic Management (3 Credit Hours)
This is the capstone course of the Health Care MBA program, and is intended to be a bridge to working responsibly and effectively in the real world, particularly in the health care industry. This course will explore the fundamental frameworks for identifying, developing and implementing effective strategy for health care organizations.

Human Resources & Employment Relations (HRER)

HRER 413 Compensation (3 Credit Hours)
This course examines wage and salary policies and programs in private and public organizations. Legislative and social issues affecting pay decisions and the alignment of pay policies with the business strategy and other human resource programs are covered.
Outcomes:
Students will learn how to design and implement compensation policies and programs that will give their employers a competitive advantage; Students will learn how to resolve compensation problems from both a human resource professional and managerial perspective; Students will learn how to create pay policies that are perceived as just and equitable; Students will improve their team leadership, analytical, and writing skills

HRER 415 Internship (1 Credit Hour)
An internship provides the student with direct exposure to human resources and/or industrial relations functions as they are practiced in the real world.
Course equivalencies: HRIR415/HRER415
Outcomes:
Students will learn to practically apply the concepts and theories learned in the classroom to a real organizational work environment

HRER 417 Managing and Motivating in the Workplace (3 Credit Hours)
The course primarily explores the structure and function of human behavior in organizations. Students will be introduced to the principles of theory of perception, motivation, decision making, and job and organizational design as they relate to organizational realities such as power, politics, and change.
Course equivalencies: CORD/HRIR/TRDV/HRER417/MGMT470
Outcomes:
Students will gain a better understanding of both individual and group behavior in organizational settings and will be able to view organizational change through globalization, diversity, technology, and ethics

HRER 417B Managing and Motivating in the Workplace (3 Credit Hours)
Pre-requisites: Restricted to MBA Baumhart Scholars students
This course explores the structure and function of human behavior in organizations with a special focus on diversity, equity, and inclusion and on change management.
Outcomes:
Students will gain a better understanding of both individual and group behavior in organizational settings and will be able to view organizational change through globalization, diversity, technology and ethics

HRER 417N Managing and Motivating in the Workplace (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
This course introduces students to organizational behavior (OB) and human resource management (HRM). Students will learn theories and managerial perspectives relating to employee motivation, job attitudes, interpersonal relationships, and decision-making. These concepts will be applied to the HRM topics of job design, staffing, training, compensation, performance management, and employee relations. This course will equip students with the knowledge and skills needed to create a positive work environment as a manager, support meaningful work, and motivate extraordinary employee performance.
Outcomes:
Develop a global perspective and appreciation of culture and diversity in organizations; Integrate and apply OB and HRM with organizations' people management strategies

HRER 418 Human Resources Law (3 Credit Hours)
This course will introduce students, by a combination of statutory case law analysis and readings, to the substantive case law in the area of employee-employer relations' law. The statutes and case law encompass the following: National Labor Relations Act, Title VII of the Civil Rights Act of 1964, Age Discrimination in Employment Act (ADEA), Americans with Disabilities Act (ADA), Civil Rights Act of 1991, Illinois Human Rights Act, and Illinois Employment Law Statutes and Regulations.
Course equivalencies: HRIR418/HRER418
Outcomes:
The primary purpose of this course is to introduce graduate students to a practical examination of the principles of "employee-employer" relations law, also called human resources law or personnel law; Students will be exposed to the principal theories, policies and literature concerning the relevant federal and state (Illinois) court case law and government regulations of the employee-employer relationship in primarily the private sector

HRER 422 Global Human Resource Management (3 Credit Hours)
This course examines the critical roles of Human Resource professionals throughout the strategic globalization process, as well as the cross-cultural issues that affect organizational dynamics and behaviors central to Human Resource processes, such as staffing, training, motivation, negotiation, team building, and communication.
Outcomes:
To survey the three types of topics covered by the field of Global HRM: 1) management of human resources in global corporations, 2) management of expatriate employees, and 3) comparison of HRM practices in a variety of different countries; To consider special topics at the forefront of global HR, such as effects of NAFTA and the European Union, global ethics, and critiques of globalization

HRER 429 Human Resource Development (3 Credit Hours)
This course examines how organizations develop employees with the appropriate technical, interpersonal and leadership skills to be effective in their jobs.
Outcomes:
Students will learn how to conduct a training needs assessment, set learning objectives, establish evaluation criteria, select the best instructional methods, and to evaluate the impact of the program on the employee and organization; In addition to conducting formal training programs, students will learn how to use career planning, job rotation and performance feedback to develop employees and themselves; Students will improve their presentation, team leadership, analytical and writing skills

HRER 430 Leading Change in Organizations (3 Credit Hours)
The course focuses on enhancing managers' capabilities in integrating strategic issues with "people" issues, enabling them to effectively implement change initiatives within diverse global environments.
Course equivalencies: X - MGMT472 / HRER430
Outcomes:
Students will learn fundamental principles, theories, and generalizations needed for competent approaches to implement organizational change that prioritizes managing the "people" aspects of change, as participants or managerial change agents

HRER 433 Group Process and Facilitation (3 Credit Hours)
This course focuses on major concepts of group development and group dynamics. Other topics of discussion include communication patterns, authority relations, leadership, norms, stages of group behaviors, paradoxes of group life, and self-awareness within group settings.
Course equivalencies: HRIR433/HRER433
Outcomes:
Students learn the various tools and techniques of process consultation and also gain knowledge and competence for working with groups; The course combines cognitive and conceptual materials with experienced-based learning

HRER 442 Global Overseas Seminar (3 Credit Hours)
This course examines cross-cultural human resources topics both within the business organization and across the global marketplace.

HRER 452 Human Resources Information Systems (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
This course offers an in-depth look into the processes involved in implementing Human Resource Information Systems (HRIS) and how to use analytics to drive key business decisions.
Outcomes:
Understand how to prioritize needs and implement and use HRIS to support business decisions; Learn basic programming for analytics

HRER 453 Incentive Pay and Employee Benefit Programs (3 Credit Hours)
This course examines incentive pay and employee benefit programs in private and public organizations. Program design and the alignment of incentive pay and benefit programs with business strategy and human resource programs are covered.
Outcomes:
Students will learn to design and implement incentive pay and employee benefit programs that will give their employers a competitive advantage and be perceived as equitable among employees; Students will improve their team leadership, analytical, and writing skills

HRER 462 Employment Relations (3 Credit Hours)
This course examines critical labor laws in the United States and the structure and function of our employment relations system.
Outcomes:
Students will demonstrate understanding of basic case law in the field of labor relations and how unions, management representatives, and government dynamically interact to provide employee representation, balance group interests, and, ideally, avoid disruptive workplace conflict

HRER 463 Staffing (3 Credit Hours)
This course provides an overview of staffing processes in organizations, with an emphasis on recruitment and selection procedures. Other topics of discussion include legal and strategic issues in staffing and relevant statistical concepts.
Outcomes:
Students will become comfortable with the entire staffing process and be able to design and implement cutting-edge staffing systems, with an emphasis on business strategy

HRER 464 Negotiation and Conflict Management (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
Negotiation is the art and science of securing agreements and resolving disputes between two or more interdependent parties. The purpose of this course is to develop students' expertise in managing negotiations and conflicts in a variety of settings. It is designed to be relevant to a broad spectrum of problems faced by those working in management.
Outcomes:
Students will develop both analytical and interpersonal skills through engagement in a variety of negotiation exercises

HRER 490 Analytical Problem Solving (3 Credit Hours)
This course is designed as an introductory graduate level course in analytical problem solving, another name for research methods, and design. A basic understanding of, and general familiarity with, fundamentals of statistical concepts is assumed. However, where necessary, we will revisit these concepts briefly. Of course, this is not a course in statistics.
Course equivalencies: HRIR490/HRER490

HRER 498 Independent Study (3-6 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of human resources not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in human resources management

HRER 499 Special Topics in Human Resources and Employment Relations (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

HRER 500 Special Topics in Human Resources and Employment Relations (3 Credit Hours)
This course engages students in a chosen special topic in Human Resources and Employment Relations.
Outcomes:
In-depth understanding of a special topic in the area of Human Resources and Employment Relations

HRER 501 Performance Management (3 Credit Hours)
Designed to provide both current and future managers an in-depth understanding of performance appraisals and related issues, this course also emphasizes goal-setting, feedback, and the rating process.
Outcomes:
Students will learn to apply the various techniques used to conduct effective performance appraisal processes and design comprehensive performance management systems for their organizations

HRER 501E Performance Management (1.5 Credit Hours)
Examines the manner in which managers can assess the performance of their subordinates and provide feedback designed to maximize their performance and organizational effectiveness.

HRER 502 Global Employment Relations (3 Credit Hours)
This course introduces students to different employment relations systems in advanced industrial economies in North America, Europe, and Asia and to formats for resolving new types of labor problems that have emerged in a global economy.
Outcomes:
Students will be able to identify critical differentiating aspects of employment relations systems in the developed world and common pro and con arguments regarding proposed solutions to substandard working conditions in the developing world

HRER 511E Conflict Management and Negotiation (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Students participate in hands-on exercises designed to increase their knowledge of conflict resolution and negotiation techniques.
Course equivalencies: MGMT 605E/HRER 511E

HRER 513E Strategic Human Resource Management (1.5 Credit Hours)
As a leader or manager, it is your job to find the right people, engage and motivate them, and structure and operate the organization in a way that enables and inspires people to perform at their best; preserving the organization's financial health and protecting it from legal risks. This course focuses on how best to accomplish this. Enrollment limited to EMBA Cohort.
Outcomes:
Understand the role of HR in the successful execution of business strategy; Understand the importance of fit-driven strategic hiring; Understand the basic tactics of distributive and integrative bargaining

HRER 600E Performance Management (1.5 Credit Hours)
Examines the manner in which managers can assess the performance of their subordinates and provide feedback designed to maximize their performance and organizational effectiveness.

Information Systems (INFS)

INFS 400 Quantitative Methods (0 Credit Hours)
Introduces the non-math-oriented student to the use of mathematical modeling in business. This course begins with a review of topics from algebra, then covers concepts in calculus and applies them to the solving of business problems.
Outcomes:
Students will be able to apply algebraic, calculus, and optimization techniques to model and solve common business decision problems; Students will demonstrate proficiency in evaluating and interpreting functions - including linear, quadratic, exponential, logarithmic, and multivariable functions - to support data-driven managerial decisions

INFS 400C Quantitative Methods (0 Credit Hours)
Pre-requisites: Restricted to students in the Health Care Management MBA Program
Introduces the non-math-oriented student to the use of mathematical modeling in business. This course begins with a review of topics from algebra, then covers concepts in calculus and applies them to the solving of business problems.
Outcomes:
Students will be able to apply algebraic, calculus, and optimization techniques to model and solve common business decision problems; Students will demonstrate proficiency in evaluating and interpreting function, including linear, quadratic, exponential, logarithmic, and multivariable functions, to support data-driven managerial decisions

INFS 400E Quantitative Methods (1.5 Credit Hours)
Quantitative Methods is restricted to students enrolled in the Executive MBA or the Health Care Management MBA programs.
Outcomes:
Students will be able to apply algebraic, calculus, and optimization techniques to model and solve common business decision problems; Students will demonstrate proficiency in evaluating and interpreting functions - including linear, quadratic, exponential, logarithmic, and multivariable functions - to support data-driven managerial decisions

INFS 400N Quantitative Methods I (0 Credit Hours)
Introduces the non-math-oriented student to the use of mathematical modeling in business. This course begins with a review of topics from algebra, then covers concepts in calculus and applies them to the solving of business problems.
Outcomes:
Students will be able to apply algebraic, calculus, and optimization techniques to models and solve common business decision problems; Students will demonstrate proficiency in evaluating and interpreting functions - including linear, quadratic, exponential, logarithmic, and multivariable functions - to support data-driven managerial decisions

INFS 402N Quantitative Methods II - Statistics Primer (0 Credit Hours)
The fundamentals of managerial statistics are presented. Topics include descriptive statistics, regression, and correlation analysis.
Outcomes:
Students will be able to apply foundational statistical concepts - including descriptive statistics, normal distribution, the central limit theorem, and estimation - to summarize data and make evidence based managerial inferences; Students will be able to formulate and evaluate statistical models - such as hypothesis tests and simple/multiple regression - to support decision-making in business contexts

INFS 443 Business Analytics (3 Credit Hours)
Business analytics is the practice of using systematically collected data to support decision-making in business contexts. The goal of this course is to introduce students to the contemporary approaches, tools, and techniques used in business analytics. Because many concepts in this field are best learned through hands-on experience, the course emphasizes obtaining, processing, analyzing, and visualizing data drawn from a variety of business cases. Students will use a modern analytics language widely adopted by data scientists to perform these tasks. Throughout the course, students will develop practical analytic skills and strengthen their ability to generate meaningful business insights through data-driven analysis.
Outcomes:
Explain the key factors differentiating business intelligence from business analytics; Frame a problem in a business analytics context to drive insightful decisions and gain the competitive edge

INFS 484B Project Management (1.5 Credit Hours)
Pre-requisites: Completion of two introductory business courses (ACCT 400, MARK 460, FINC 450, ECON 420, SCMG 480)
The art and science of project management as applied to a variety of business and technical projects in commercial, public, and private sectors. Covers: project life cycle and methodology; teambuilding; project organization, stakeholders, and leadership; proposals and contracts; techniques for project planning, estimating, scheduling, and control; PMO.
Outcomes:
Understanding of the broader role of the project manager with regard to all project stakeholders, and of methods, tools, and procedures for initiating, defining, and executing projects

INFS 484E Project Management (3 Credit Hours)
Explores the art and science of project management and systems development, as applied to a variety of large and small project situations in commercial, public, and private sectors.
Course equivalencies: OPMG601E/ISOM484E
Outcomes:
Students will be able to communicate the value of project management to their staff and peers; Students will be able to describe the roles of the project manager, sponsor, and key stakeholders; Students will be able to coach project managers on the key project management responsibilities; Students will be able to manage a process for identifying, analyzing, and prioritizing a portfolio of projects; Students will be able to identify, engage, and partner with sponsors and key stakeholders; Students will be able to create a culture of project transparency and collaboration; Students will be able to provide project oversight by validating plans and evaluating status

INFS 484N Project Management (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
Project management is the art, craft, and occasional science of being intentional and systematic about transforming ideas into practice and realizing organizational value. We explore how to design and sequence tasks and deliverables, obtain resources, and manage to deadlines and value.
Outcomes:
Identify project management opportunities; Design executable project plans; Recognize and address risks that arise during execution

INFS 490E Fundamentals of AI for Business (3 Credit Hours)
This course provides a comprehensive overview of Artificial Intelligence (AI) designed for Executive MBA (EMBA) students who are mid-level to senior-level professionals. Students will explore foundational AI concepts, strategic and organizational use cases, and ethical implications through the lens of executive leadership. Emphasis is placed on real-world application, critical analysis, and experiential learning, with a focus on how AI supports enterprise-level decision-making, cross-functional leadership, and long-term competitive advantage.
Outcomes:
Define and explain core AI concepts and terminology; Critically evaluate AI trends, tools, and applications in business strategy; Develop AI integration plans for real-world organizational challenges

INFS 491 Managerial Statistics with Artificial Intelligence (AI) (3 Credit Hours)
Pre-requisites: Graduate School of Business student
This course examines the integration of statistical methods with artificial intelligence (AI) techniques to analyze and interpret complex data. Students will study key statistical concepts, including descriptive statistics, random variables, probability distributions, estimation, hypothesis testing, regression, correlation analysis, and model building. AI-driven approaches will be introduced for various topics. Emphasis is placed on using statistical software and AI to facilitate data analysis and address real-world problems effectively.
Course equivalencies: ISOM491 / MGSC491
Outcomes:
Students will gain a high-level understanding of common statistical tools used in AI and machine learning algorithms and they will be able to derive conclusions from statistical studies; Students will be able to describe data using visual and numerical summaries, analyze and interpret data effectively, perform estimation and hypothesis testing, develop and evaluate statistical models such as regression, apply statistical software for data analysis, and present statistical findings and AI results clearly and accurately

INFS 491C Managerial Statistics (3 Credit Hours)
Pre-requisites: Restricted to students in the Health Care Management MBA Program
The fundamentals of managerial statistics are presented. Topics may include descriptive statistics, random variables, probability distributions, estimation, hypothesis testing, regression, and correlation analysis. Statistical software is used to assist in the analysis of these problems.
Outcomes:
Students will be able to demonstrate understanding of statistical thinking and data analysis technique for decision-making purposes

INFS 492 Database Systems (3 Credit Hours)
This course uses database systems as the focus for studying concepts of data modeling and data manipulation. Procedures for creating, managing, sorting, and processing data are discussed. Concepts of relational database methods are covered as well as the issues that arise in managing information in a database and using it to support business processes.
Course equivalencies: ISOM492 / MGSC492
Outcomes:
Understanding the development and use of business database systems

INFS 492E Business Intelligence/Data Warehousing (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores concepts of data warehousing and business intelligence from a managerial perspective.
Course equivalencies: INFS600E/INFS492E

INFS 493 Database Analytics (3 Credit Hours)
Pre-requisites: INFS 492 This course focuses on practical methods for in-database data preparation and manipulation to extract analytical insights out of a large or big data repository
The concept of big data, distributed computing frameworks, and massively parallel processing databases are also covered. Students will become proficient using open source databases, performing extensive advanced SQL programming, writing scripts and manipulating strings, numbers, data, etc. within a database.
Outcomes:
Implement Advanced Data Queries: Conduct advanced searches, hierarchical queries, and implement range-based filtering to address complex data analysis requirements; Master Advanced SQL Techniques: Develop expertise in advanced SQL programming, including \\nstring manipulation, numerical calculations, date handling, and metadata queries; Analyze and Prepare Data for AI: Utilize in-database data preparation techniques to transform raw data into actionable insights, a critical step for AI model development and implementation

INFS 493E Strategic Use of Information Technology (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Focuses on the use of information technology for competitive advantage, including the management of information as a corporate resource, and information systems planning and its relationship to corporate planning.
Course equivalencies: ISOM601E / INFS601E/INFS493E

INFS 494 Applied Data Mining and Artificial Intelligence (AI) (3 Credit Hours)
Data Mining involves the search for patterns in large quantities of data using techniques such as clustering, decision trees, neural networks, and association analysis. Machine learning, the process of using mathematical models of data to help a computer learn without direct instruction, an important application of artificial intelligence (AI), is also introduced.
Outcomes:
The student will be able to build models using an industry-standard package and interpret the results; The student will be able to use AI-enabled tools to discover and extract implicit but potentially useful information from data

INFS 495 Forecasting Methods with Artificial Intelligence (AI) (3 Credit Hours)
Pre-requisites: INFS 402N or INFS 491
Restricted to Graduate School of Business students. Techniques of forecasting and model building are introduced. Methods covered are simple and multiple regression, introduction to time series components, exponential smoothing algorithms, and AIRMA models - Box Jenkins techniques. Business cases are demonstrated and solved using the computer.
Outcomes:
Students will be able to forecast business and economic variables to enhance business decisions; Students will learn how AI enhances forecasting techniques by uncovering complex patterns, automating model optimization, and improving forecast accuracy; Students will be equipped with the skills to create advanced, AI-augmented forecasting models, making them invaluable assets in data-driven decision-making environments

INFS 496 Systems Analysis and Design (3 Credit Hours)
Provides a core set of skills for planning, managing, and executing systems analysis and design processes in e-business and Web-based environments. Topics typically include project initiation and planning, methods used in the determination of information requirements, prototyping, techniques used in systems design, testing, and implementation strategies.
Outcomes:
Understanding of the development and implementation of business information systems

INFS 499 Independent Study (3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of information systems not otherwise covered by department course offerings.

INFS 590 Global Strategy and Data (3 Credit Hours)
This course introduces the student to economic and business practices of a foreign country using the analysis of data and on-site experiences. We will focus on business strategies, impediments, and challenges in light of the culture, politics, history, and institutions of a selected country. We will interact with a variety of local people, such as small business owners, firm managers, economists, journalists, and students, in order to inform our understanding and analysis.
Outcomes:
Students will gain knowledge and analytical skills that can assist them in facing the challenges of conducting business in global locations

INFS 592 Data Visualization (3 Credit Hours)
Co-requisites: INFS 492
The amount of data that our world generates is growing at a torrid pace. Sifting through and making sense of these humongous mountains of data is crucial to ensuring business growth, success and to making scientific discoveries and advancements. Data visualization plays an important role in this process.
Outcomes:
Students will be able to process and visualize large amounts of data in order to enable efficient and effective analysis using industry standard software

INFS 595B Decision Strategy Critical Thinking & Decision Analysis (3 Credit Hours)
Making good decisions in the face of uncertainty and risk is at the heart of successful management. This course provides a coherent set of critical thinking and decision analysis tools that are used to carve out well-structured decision models from ill-structured real-life problems and perform analyses to generate insights.
Outcomes:
The course introduces students to a variety of tools that will improve their critical reasoning skills and ultimately the ability to make effective decisions

INFS 596B Data-Driven Decision Making (3 Credit Hours)
Perhaps one of the biggest challenges facing organizations is bridging the gap between those who have technical expertise in information systems and those who are managerial decision makers. This course builds on the decision strategy course to help address that challenge.
Course equivalencies: INFS596N/ISSCM596B
Outcomes:
Understand the sources and limitations of data; Understand how databases organize data sets and the use of SQL to extract data; Increase facility with spreadsheets; Expose students to the issues that arise between those who provide data and those who use data to make business decisions

INFS 596N Data Driven Decision Making (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
Perhaps one of the biggest challenges facing organizations is bridging the gap between those who have technical expertise in information systems and those who are managerial decision makers. This course builds on the decision strategy course to help address that challenge.
Course equivalencies: INFS596N/ISSCM596B
Outcomes:
Understand the sources and limitations of data; Understand how databases organize data sets and the use of SQL to extract data; Increase facility with spreadsheets; Expose students to the issues that arise between those who provide data and those who use data to make business decisions

INFS 600E Business Intelligence & Data Warehousing (1.5 Credit Hours)
Explores concepts of data warehousing and business intelligence from a managerial perspective.
Course equivalencies: INFS600E/INFS492E

INFS 604E Business Data Analytics - Infrastructure (1.5 Credit Hours)
The course covers concepts related to data organizing and database modeling, and the managerial issues related to the design, implementation, and utilization of systems that support operational data use and provide infrastructure for business data analytics. Enrollment limited to EMBA Cohort.
Outcomes:
Students will learn how to gather, understand, manage, and act on information stored in databases, data warehouses, and Big Data repositories

INFS 605E Business Data Analytics - Application (1.5 Credit Hours)
The course covers the effective uses and applications of data analytics; including On-Line Analytic Processing/Business Intelligence, data mining techniques and their particular applications and data visualizations methods and tools. Enrollment limited to EMBA Cohort.
Outcomes:
Students will learn how business data analytics is applied to create competitive edge and business opportunities and how to understand and manage business data analytics applications projects

INFS 691 Principles of Analytic Programming (3 Credit Hours)
Pre-requisites: INFS 443
This course builds upon foundational knowledge from the Business Analytics course by advancing students' proficiency in analytic programming using a modern analytics language widely adopted by data scientists to perform these tasks. Students learn to manipulate and transform data into actionable insights, create advanced visualizations, write functions and control statements for repeatable analysis, build predictive and prescriptive models, and analyze unstructured text.
Outcomes:
Students will learn to clean, manipulate, transform, and visualize data; Students will be able to write control statements and functions for reproducible analysis as well as build predictive and prescriptive models; Students will use text mining and sentiment tools to analyze text data as well as apply simulation and probabilistic modeling to support business decisions

INFS 791 Programming for Business Decision Making (3 Credit Hours)
This course focuses on how to effectively use a computer programming language to support decision making in business. Examples include using Visual Basic for Applications (VBA) to create applications within Microsoft Excel or using Python for manipulating and analyzing data. In addition to covering the concepts of programming using the specified language, this course covers developing user interfaces, working with external data and debugging code. By the end of this course, the student will be able to build custom procedures and create user-defined functions in the programming language used.

INFS 795 Ethics and Data Analytics (3 Credit Hours)
The rapid advancement in technology necessitates an equally rapid advance in the ethics of data analytics. We will explore ethical questions in this field through the use of business case studies. We will also look at examples of ethical codes of conduct.
Outcomes:
Students will evaluate following ethical considerations: how data is collected, how it is interpreted, how it is applied, and with whom it is shared

INFS 796 Data Warehousing (3 Credit Hours)
Pre-requisites: INFS 492 Outcomes: Students will learn how data warehouses are used to help managers successfully gather, analyze, understand and act on information stored in data warehouses
The components and design issues related to data warehouses and business intelligence techniques for extracting meaningful information from data warehouses are emphasized. Oracle tools will be used to demonstrate design, implementation, and utilization issues.
Course equivalencies: X-ISOM796/MGSC796/CSIS796

INFS 797 Applications of Visualization (3 Credit Hours)
Students will explore human perception and cognition, the use of best design practices, and interacting/storytelling with data.
Outcomes:
This course will develop a vocabulary and framework for discussing, critiquing, assessing, and designing visual displays of quantitative data

INFS 798 AI Product Management (3 Credit Hours)
This 10-week intensive course aims at mastering the end-to-end process of discovering, designing, developing, delivering, and managing products in context to data, machine learning and artificial intelligence. The course concentrates on strategic thinking and tactical implementation of data driven products and provides skills needed to become a successful product manager.
Outcomes:
Apply product management principles to ideate and develop innovative AI tools and solutions; Utilize product management strategies to guide the development of AI tools that support data-driven decision-making; Prototype and validate AI solutions, using product management methodologies to efficiently design, test, and iterate AI prototypes for real-world applications

INFS 799 Special Topics in Information Systems (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Information Systems and Supply Chain Management (ISSCM)

ISSCM 486E Global Supply Chain Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the current business revolution in global logistics and partnering by members of the supply chain to more effectively provide products and services to customers.
Course equivalencies: ISOM486E/OPMG602E

ISSCM 491E Data Analysis for Managers (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Provides an in-depth treatment of computer-based data analysis, including sampling, estimation, hypothesis testing, regression, and time-series models. The emphasis is on managerial applications and on letting the data tell the story.
Course equivalencies: ISOM 600E/ISOM491E

ISSCM 595 Decision Analysis (3 Credit Hours)
Pre-requisites: Restricted to School of Business graduate degree students
Making good decisions in face of uncertainty and risk is at the heart of successful management. This course provides a coherent set of critical thinking and decision analysis tools that are used to carve out well-structured decision models from ill-structured real-life problems and perform analyses to generate insights.
Outcomes:
The course introduces students to a variety of tools that will improve their critical reasoning skills and ultimately the ability to make effective decisions

ISSCM 799 Special Topics- Information Systems & Supply Chain Management (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Course equivalencies: ISOM799 / MGSC799
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Legal Environment of Business (LREB)

LREB 443E Executive Legal Liability (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Treats selected areas of corporate activities in which officers and directors are subject to personal liability including conflicts of interest, security transactions, and provisions of the Foreign Corrupt Practices Act. Students will design company compliance programs related to such matters including anti-trust regulations.
Course equivalencies: LREB600E/LREB443E

LREB 445 Entrepreneurship Law (3 Credit Hours)
Pre-requisites: Quinlan School of Business graduate students
This course provides aspiring and established business owners with an understanding of the recurring legal issues at various stages in entrepreneurship. Comprehending these principles will assist business owners in better organizing their business structures and operations.
Outcomes:
The goal is to help increase a business' duration and profitability by implementing appropriate processes to reduce the potentially substantial costs and irreparable harm associated with failing to apply proper attention to foreseeable commercial risks

Marketing (MARK)

MARK 425N Business Communication (1.5 Credit Hours)
Effective communication skills are important because they give leaders and followers the ability to transmit and receive information with a high probability that the intended message is passed from sender to receiver. Good leaders communicate ideas, articulate arguments, advocate positions, solicit ideas from others, and persuade others. Restricted to School of Business graduate students.
Outcomes:
1) Learn to communicate effectively in an oral presentation; 2) Develop specific skills to enhance effective professional interpersonal communication as well as written and oral communication

MARK 460 Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MARK 460B Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MARK 460E Marketing Management (3 Credit Hours)
Pre-requisites: Restricted to students in the Executive MBA Program
Introduces use of strategic research, customer analysis, target market, and the application of marketing tools to a variety of case problems. Emphasis is placed on product planning, pricing policies, promotional methods, and distribution channels. Considers cultural, governmental, economic, business, and environmental factors affecting the marketing of goods and services globally.
Course equivalencies: MARK600E/MARK460E

MARK 461 Research Methods in Marketing (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the marketing research process and the role of survey research in it.
Outcomes:
Students formulate research problems and a design research study, including the development of a questionnaire, selection of an appropriate sample and data analysis

MARK 463 Sales and Strategic Leadership (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the tools and techniques required for developing a sales force and for managing revenue generation within organizations.
Outcomes:
Students apply processes for hiring and managing sales professionals; tools for successful account management; and skills in solving revenue generation problems facing profit and non-profit organizations

MARK 464 Integrated Marketing Communication (3 Credit Hours)
Pre-requisites: MARK 460; MARK 467 is recommended
This course develops an understanding of how advertising, sales promotion, public relations, personal selling and in same cases packaging decisions form a coordinated marketing communications plan.
Outcomes:
Students apply the elements of integrated marketing communications and develop a coordinated Marketing Communications plan for a project or case study

MARK 465 International Marketing (3 Credit Hours)
Pre-requisites: MARK 460 or by Department Consent
This course develops an understanding of marketing problems in an international context with particular attention given to how international factors impact consumers, competition, and marketing strategies. Students analyze cases and identify optimal solutions to international marketing problems.
Outcomes:
Students apply the principles of marketing to solve marketing problems in an international context

MARK 467 Consumer Behavior (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of how consumers behave before, during, and after the consumption process by exploring both the micro-level mental processes that impact consumer decision-making as well as the macro- level cultural and social influences on consumer behavior.
Outcomes:
Students apply course concepts and theories to develop a consumer analysis and marketing strategies for a firm or non-profit organization

MARK 468 Digital Marketing (3 Credit Hours)
Pre-requisites: MARK 460 or by Department Consent
This course develops an understanding of the Internet as part of an overall marketing strategy by considering the ways in which the Internet has changed marketing and business. The course covers topics such as online consumer behavior, web analytics, online advertising, email, social media, mobile, and search engine marketing (paid and organic). In addition to learning fundamental principles of digital channels, students will apply the learned principles in a class project; example projects include creating a paid search campaign for a client, running a digital marketing simulation, writing a digital marketing plan, or conducting a social media audit.
Outcomes:
Students develop the power to act effectively by using technology in increasingly complex buying environments

MARK 469 Independent Study-Marketing Management (3 Credit Hours)
Pre-requisites: MARK 460
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area not otherwise covered by department course offerings. Variable credit. Permission of area coordinator required. Special Topics are scheduled classes; specific titles and content will vary.
Outcomes:
Varies with course of study selected

MARK 470N Research, Insights and Storytelling (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent
Students will learn to monitor trends and shifts in the socio-cultural landscape, identify relevant market information, gather consumer research and translate into actionable strategies through storytelling. Enrollment limited to MBA Students. Collect, analyze & glean insights from data; Apply & translate insights into compelling stories for actionable business outcomes & social impact.
Outcomes:
Understand research process & approaches

MARK 472E Market Opportunity Analysis (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Enables students to discover market opportunities and business relationships that are critical to sustainable business growth. Course will challenge students to move away from "copy cat" business ideas to innovative business solutions.
Course equivalencies: MARK 604E/MARK472E

MARK 561 Comparative Consumer Behavior (3 Credit Hours)
This course develops an understanding of the marketing implications of cultural differences and similarities between the people of two or more nations and considers two opposing views of marketing scholars as to whether the similarities or the differences are the more important factor.
Outcomes:
Students apply methods of cross-cultural analysis as well as examine frameworks for assessing multinational strategies

MARK 562 Database Marketing Strategy (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the development and use of databases for marketing, retrieval of appropriate data and analysis of that data to increase marketing effectiveness.
Outcomes:
The student will perform database manipulation and analysis of data; Analysis includes at least univariate analysis, cross-tabulation, creation of new variables, regression analysis and recency-frequency-monetary analysis

MARK 564 Brand Equity and Marketing Strategy (3 Credit Hours)
Pre-requisites: MARK 460 or by Departmental Consent
This course develops an understanding of the way firms may increase their share of market and profits by creating, building, and managing strong, unique, and favorable brand equity for their products and services.
Outcomes:
Students develop a Brand Plan, evaluating the contributions of traditional brand elements, and develop a framework for creating the marketing strategies required for successfully building and managing brand equity

MARK 566 Integrated Media Planning (3 Credit Hours)
The course provides an overall understanding of media planning: basic media concepts, buying and selling of media, development and evaluating effective media strategies and plans, and the role that media plays in an integrated marketing and communications plan. The course is recommended for students with little or no media planning experience.

MARK 567 Customer Relationship Management (3 Credit Hours)
Pre-requisites: MARK 460; MARK 468 is recommended
This course develops an understanding of CRM as a business philosophy that involves acquiring new customers as well as maintaining long-term and profitable relationships with existing customers. Key concepts such as customer experience, customer satisfaction, loyalty, customer lifetime value, among others, will be explored.
Outcomes:
Students conduct an analysis and critique of a firm's CRM strategy and provide recommendations for improving the customer-firm/customer-brand relationship

MARK 568 Social Media & Content Marketing (3 Credit Hours)
Pre-requisites: MARK 460
This course examines the connection between social media and content marketing for the purposes of branding, acquisitions, customer retention, employee recruitment, and other important organizational initiatives. Assess, implement, and leverage tools to build community and attract customers. Prove the ROI of any social media or content marketing effort.
Outcomes:
Develop social media and content marketing strategies that drive value

MARK 569 Special Topics (3 Credit Hours)
Pre-requisites: MARK 460
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

MARK 660 Digital Marketing Analytics (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent
Restricted to Graduate Business students. This course is centered around decision-making based on data gathered from users' interactions with digital channels such as websites, online search (organic and paid), display media, social media, email, and mobile. Students will learn how to define objectives, collect, and analyze data, and recommend useful insights for more effective marketing strategies.
Outcomes:
Students will be able to understand how consumers interact with brands across owned, paid, and earned media; Students will be able to apply the digital marketing analytics process into various decision-making situations\\n; Students will be equipped to establish business measurement models and identify KPIs for various digital media; Students will have the ability to analyze the digital marketing strategies adopted by a firm and recommend data-driven decisions; Students will be able to evaluate the effectiveness of different digital media channels

MARK 661 Customer Analytics (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent and (ISSCM 402N or ISSCM 491); Restricted to Graduate Business students
In this course students will study how to use data analytics to learn about customer needs and improve targeting individual consumers. The course will encourage students to apply scientific methods and models to predict and respond to customer choices. This is the key part of learning Big Data. The term Big Data is viewed in the broad sense as it relates to various aspects of the consumer behavior, which may be captured, measured, and transformed to the digital form.
Outcomes:
Through applications of statistical models to the analysis of the real-world databases, the students will learn how firms may use customer data to serve customers better

MARK 662 Marketing Metrics (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent and (ISSCM 402N or ISSCM 491); Restricted to Graduate Business students
This course is designed with marketing managers in mind. As profession marketing is evolving, it is no longer based primarily on the conceptual content. Marketers get exposed to thousand times the volume of data she(he) saw five years ago. More data cannot lead to better decision making unless managers learn how to use that data in meaningful ways. In this course, students will be introduced to the analytical decision models that assist modern managers in making marketing decisions related to targeting, product design, communications, and more.
Outcomes:
Learn analytical techniques and decision models for enhancing marketing decision making in the modern organizations; Improve skills to viewing marketing processes and relationships systematically and analytically; Learn power of decision models applied in the real managerial contexts; Provide students with toolkit that may be used to assess, and measure return on marketing investments in organizations

Management (MGMT)

MGMT 400B Values-Based Leadership (1.5 Credit Hours)
This course will explore major approaches to leadership that are based on personal and organizational values. Students will have an opportunity to explore their own values and approach to leadership and be challenged to identify opportunities for improvement.
Outcomes:
Students will: 1) learn and understand fundamental and diverse principles and theories of leadership and management; 2) develop a clearer understanding of and commitment to personal values as a way of developing a sound basis for making personal and professional decisions; 3) apply what they learn in this course to clarify thinking on leadership and to solve problems in the future; 4) learn to analyze and critically evaluate different ideas, concepts and points of view on the concepts of leadership and management; 5) develop a personal style that will begin to answer the question "What kind of leader do I want to be?"; and 6) Understand the meaning of "vocation" and how it applies to each student's life

MGMT 401B Innovative Corporate Social Responsibility (1.5 Credit Hours)
This course will analyze why and how global businesses are innovating to address corporate responsibility expectations. The course will focus on companies that are co-creating value and will examine impacts from businesses, civil society and public policy that enhance (or detract from) competitiveness.
Outcomes:
Students will be able to: 1) examine the interaction between market and civil society institutions in the development of corporate responsibility initiatives; 2) demonstrate understanding of changing legal, social, and political environments as they affect organizations; and 3) analyze organizational situations, identify key issues, and formulate arguments and appropriate ways to innovatively implement changes

MGMT 402B Social Enterprise (1.5 Credit Hours)
Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.
Outcomes:
Students will demonstrate: 1) an understanding of the social enterprise sector, including what distinguishes social entrepreneurship from both traditional social services and traditional entrepreneurship; 2) a strategic understanding of how social enterprises succeed; 3) the ability to use analytical tools to develop and measure the impact of social enterprise models; and 4) the ability to formulate their ideas into a social enterprise model presentation

MGMT 403B Creating Ethical Work Environments (1.5 Credit Hours)
This course will explore how companies create and sustain ethical work environments and challenge students to systematically think about ethical dilemmas in human resources. The course will explore ethical practice across four areas of human resources: 1) acquiring employees (employment planning, recruitment, and selection); 2) developing employees (training, mentoring, performance feedback); 3) rewarding employees (salary, incentives, benefits); and 4) managing employment relations (unions, safety). The course will include an emphasis across these areas on diversity, inclusion, and social responsibility.
Outcomes:
Students will: 1) have familiarity with major ethical issues in human resources; 2) understand how companies make ethical human resources decisions aligned with their values; and 3) demonstrate knowledge of current human resource approaches to diversity, inclusion, and social responsibility

MGMT 404B ESG Investing (1.5 Credit Hours)
This course will explore the growing integration of environmental, social and governance (ESG) factors into global investment decision-making. Students will learn about: 1) the history and growth of ESG in investing; 2) how to assess a company's climate impact, water management, health and safety policies, supply chain integrity and other ESG factors in the context of financial risk and performance analysis; and 3) how companies can improve their ESG performance.
Outcomes:
Students will: 1) understand why ESG factors influence a company's financial performance; 2) assess a company's ESG performance; and 3) develop recommendations for ESG improvement

MGMT 405B Sustainable Business Management (1.5 Credit Hours)
No course description is available
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

MGMT 406B Influential Leadership (1.5 Credit Hours)
This course will equip students with the tools to be influential leaders by better understanding their own leadership styles, further developing their emotional intelligence, and learning how to best apply their styles effectively in the workplace. Students will be able to: 1) identify their personal leadership styles; 2) know how to apply their leadership most effectively in different organizational contexts with an emphasis on emotional intelligence; and 3) demonstrate familiarity with coaching techniques to improve personal and team performance.

MGMT 407B Impact Investing (3 Credit Hours)
This course will explore the rise of investments aimed simultaneously at social, environmental, and financial returns.
Outcomes:
Explore the rise of investments aimed simultaneously at social, environmental, and financial returns; Understand how impact investing works and the growing spectrum of investment firms with impact investing strategies; Evaluate an investment with an SROI (social return on investment) framework

MGMT 426N Leadership Development (1.5 Credit Hours)
Leader development is a systematic process that outlines self-improvement goals and strategies to assist leaders to take advantage of opportunities. Development planning consists of identifying development needs, prioritizing development needs, building a development plan, and modifying the development plan. Restricted to School of Business graduate students.
Outcomes:
1) Develop an understanding of the skills that are necessary to be an effective leader; 2) Create a development plan to become a more effective leader and responsible leader who exhibits personal integrity and ethical awareness

MGMT 430B Strategy and Leadership (3 Credit Hours)
The MBA Capstone explores the manner in which companies develop and implement a strategic plan and examines characteristics of effective general managers and leaders. This course is restricted to students in the MBA program and should be taken during the student's final quarter.
Outcomes:
Students will develop an explicit personal way of thinking about the business enterprise as a total system and the manner in which it can gain a sustainable competitive advantage by drafting a complete business plan for a start-up entity; Students will also sharpen their team, analytical, writing, and presentation skills and begin to evaluate the type of leadership skills they will need to move into increasingly more responsible positions inside organizations

MGMT 430E Capstone (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Brings all of the learning together from the program as it concludes. This course builds on the Entrepreneurship course by having teams prepare a complete business plan for the concept they have developed.
Course equivalencies: MGMT610E/MGMT430E

MGMT 430N Strategy and Leadership (3 Credit Hours)
Pre-requisites: MGMT 425N, MGMT 426N, MARK 470N, FINC 470N, and INFS 596N
The MBA Capstone explores the manner in which companies develop and implement a strategic business plan and also examines characteristics and responsibilities of effective general managers and strategic leaders in business organizations.
Outcomes:
An understanding about the business enterprise as a total system and the way it can gain a sustainable competitive advantage; Development of team, analytical, writing, and presentation skills, and the type of leadership skills they will need to move into organizations

MGMT 431N Business Consulting Course (3 Credit Hours)
Pre-requisites: MGMT 425N, MGMT 426N, MARK 470N, FINC 470N, and INFS 596N
This applied fieldwork project provides an opportunity to apply the knowledge and skills learned in the classroom to a client. The student teams will work directly with companies to create implementable business solutions.
Outcomes:
1) Increase proficiency in integrating the techniques, processes and procedures of the fundamental business disciplines; 2) Learn to apply the theory, skills, and knowledge from the business disciplines to business practice; 3) Demonstrate an innovative, entrepreneurial approach to management decisions

MGMT 444 Introduction to ESG - Expectations & Opportunities (3 Credit Hours)
Pre-requisites: Open to all graduate degree and graduate certificate students
Concepts and practices of ESG are introduced within the context of growing and emerging megatrends such as climate change and social justice concerns that presents companies with new risks and new opportunities. Themes related to private and public companies will be explored.
Outcomes:
Develop strong grounding in the overall themes of ESG; Develop an understanding of the core methods for assessing ESG outcomes; Establish the foundation for delivering ESG impact

MGMT 445 ESG in Practice-Business Leadership in Times of Change (3 Credit Hours)
Pre-requisites: MGMT 444
Class integrates the full knowledge of ESG by building on introductory course while encouraging students to integrate prior ESG knowledge from both practice and other classes. Students apply content and build out plans and pathways for a specific organization.
Outcomes:
Demonstrate understanding of reporting tools and approaches; Demonstrate applied understanding of ESG topics; Demonstrate understanding of ESG values based on leadership and change management

MGMT 460B Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MGMT 460E Values Based Leadership (1.5 Credit Hours)
This course is focused on "values-based" leadership. This is an umbrella term that covers a wide range of approaches to leadership, all of which have at their foundation a set of values or principles, or at least an examination of one's values and beliefs.
Outcomes:
To assist students in beginning to develop a personally relevant and valuable style of leadership and management that will positively impact them and their organizations in a complex, diverse, and interdependent world

MGMT 472 Leading Change in Organizations (3 Credit Hours)
The course focuses on enhancing managers' capabilities in integrating strategic issues with "people" issues, enabling them to effectively implement change initiatives within diverse global environments. Special Note: MGMT 472 is cross-listed with HRER 430.
Course equivalencies: X - MGMT472 / HRER430
Outcomes:
Students will learn fundamental principles, theories, and generalizations needed for competent approaches to implement organizational change that prioritizes managing the "people" aspects of change, as participants or managerial change agents

MGMT 472E Organizational Change and Development (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the complexity and dynamics of change in organizations. Topics covered include organization development, managing resistance, and change leadership.
Course equivalencies: MGMT 602E/MGMT 472M

MGMT 474E Strategic Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. This course introduces and develops strategic techniques to facilitate an organization's articulation of its mission and goals and its formation, implementation, and evaluation of key strategies. Additional topics include: strategic thinking, competitive advantage, vertical and horizontal integration, and planning horizon.
Course equivalencies: MGMT 604E/MGMT474E

MGMT 475 Cross-Cultural Dimensions of International Management & Marketing (3 Credit Hours)
This course examines cross-cultural management and marketing topics both within the business organization and across the global marketplace. Special note: MGMT 475 is cross-listed with MARK 475.
Course equivalencies: X-MARK475/MGMT475
Outcomes:
Students learn how differences in national and ethnic cultures affect the behavior of employees working in organizations, managers making business decisions and consumers making product choices

MGMT 477 Family Business (3 Credit Hours)
This course examines the family, ownership and management challenges involved in operating a family business, including governance and leadership succession.
Outcomes:
Students will be able to analyze the stumbling blocks to family business succession, compare differences between family and non-family owned firms and understand the impact of systems of family ownership and management on a firm's stakeholders and advisors

MGMT 479 Independent Study in Management (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of management not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in management

MGMT 481E Innovation and the Entrepreneurial Mindset (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Introduces the tools necessary for an individual to determine a relevant business concept and prepare to form a business to take that concept to market.
Course equivalencies: MGMT 607E/MGMT 481E

MGMT 482 Entrepreneurial Marketing (3 Credit Hours)
This course is about the marketing challenges in an entrepreneurial firm. Entrepreneurship is the discovery, enactment and pursuit of new business opportunities. Successful execution of an entrepreneurial idea requires a sound marketing plan. In this course, we will investigate how marketing tools can enable entrepreneurs to realize the full potential of their ideas."
Course equivalencies: X-MGMT 482/ENTR 482

MGMT 483 Strategic Entrepreneurship and Innovation Management (3 Credit Hours)
This course will focus on the application of strategic management tools to entrepreneurial situations with an emphasis on the early stages of new venture creation. We will discuss how new opportunities are discovered, how inventions are turned into innovations, and how societal value is created throughout this process. At the end of this course, you will be able to: Recognize and discover entrepreneurial opportunities; Manage the creation and appropriation of the value generated by innovations; Apply analytical and critical thinking skills in an uncertain business environment; Apply your learning in a real-life project.
Course equivalencies: X-MGMT 483/ENTR 483

MGMT 485 Social Enterprise (3 Credit Hours)
Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.

MGMT 499 Special Topics in Management (3 Credit Hours)
Pre-requisites: Graduate Business Student
No course description is available

MGMT 573 Business Strategy (3 Credit Hours)
This course analyzes the responsibilities of general management in formulating, communicating, and implementing a strategic plan. Whereas corporate strategy (MGMT 574) defines the vertical and horizontal scope of a firm, business strategy (MGMT 573) is concerned with how the firm generates and sustains competitive advantage within a particular industry or product market. Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole. Through case studies, students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the challenges of the business environment.

MGMT 574 Corporate Strategy (3 Credit Hours)
This course focuses on the strategic management of multi-business firms. Whereas business strategy or competitive strategy is concerned with how the firm competes within a particular industry or product market, corporate strategy defines the scope of the firm in terms of the industries and markets in which it competes.

MGMT 602E Organizational Change & Development (1.5 Credit Hours)
Explores the complexity and dynamics of change in organizations. Topics covered include organization development, managing resistance, and change leadership.
Course equivalencies: MGMT 602E/MGMT 472M

MGMT 605E Conflict Management & Negotiation (1.5 Credit Hours)
Students participate in hands-on exercises designed to increase their knowledge of conflict resolution and negotiation techniques.
Course equivalencies: MGMT 605E/HRER 511E

MGMT 606E International Immersion (3 Credit Hours)
Students take an international trip to two countries to gain a better understanding of the opportunities and challenges and opportunities related to international business endeavors.

MGMT 607E Entrepreneurship (1.5 Credit Hours)
Introduces the tools necessary for an individual to determine a relevant business concept and prepare a business concept for the marketplace.
Course equivalencies: MGMT 607E/MGMT 481E

MGMT 610E Capstone (1.5 Credit Hours)
Enrollment limited to students in MBA for Executives program. This course brings together all of the learning from the program as it concludes. Students prepare and present a complete business plan for the concept they developed in the Entrepreneurship course (MGMT 607E).
Course equivalencies: MGMT610E/MGMT430E

Quinlan Business (QUIN)

QUIN 401 US Culture & Academic Success Skills for International Students (0 Credit Hours)
This course is restricted to international students admitted to the Quinlan School of Business Graduate Programs. Verbal and nonverbal communication, active listening, participation in classroom discussions, collaborative group work, presentation skills, reading comprehension strategies, academic writing, understanding and avoiding plagiarism.
Outcomes:
International students will be better prepared for achieving success in graduate business studies by adapting to unfamiliar cultural differences in and out of the classroom

QUIN 403 Fundamentals of Business (3 Credit Hours)
Only students with undergraduate degrees other than business are eligible to take this course. This course examines essential topics in management, marketing, operations, information systems, accounting and finance. Within each discipline, we examine the key decisions that are made and how those decisions are or should be made. They will understand what decisions are made in each discipline and how those decisions should be made.
Outcomes:
By the end of this course, students will be familiar with the key discipline areas in business

QUIN 499 Special Topics (3 Credit Hours)
Enrollment is restricted to students in the Quinlan Graduate School of Business. This course offers students the opportunity to gain additional understanding of special business topics not otherwise addressed in the standard graduate business curriculum. The subject and content vary and are offered on an ad hoc basis.
Outcomes:
Students will demonstrate an understanding of a specialized topic not otherwise addressed in the standard graduate business curriculum

QUIN 501 Internship - Curriculum Practical Training (1-3 Credit Hours)
This is the companion course for any Graduate Business student concurrently engaged in an internship for 1 to 3 hours of elective academic credit. BSAD may be taken for academic credit up to three times for a total of 3 credit hours.
Outcomes:
Students will gain first-hand experience with a particular project or area of business operations, will engage in reflection on their contributions to the workplace and the overall internship experience

Supply Chain Management (SCMG)

SCMG 480 Intro to Operations Management (3 Credit Hours)
Introduction to concepts and methods for managing operations in manufacturing and service organizations. Topics typically include forecasting, capacity and aggregate planning, material requirements planning, scheduling, facility layout and location, inventory management, just-in-time, total quality management, project planning, and logistics.
Course equivalencies: ISOM480 / MGSC480
Outcomes:
Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

SCMG 480B Operations Management (3 Credit Hours)
Pre-requisites: Restricted to MBA Baumhart Scholars students
This course explores concepts and methods for managing operations, including forecasting, capacity and aggregate planning, sustainable management, material requirements planning, scheduling, project planning, logistics, supply chain transparency, and supplier diversity.
Outcomes:
Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

SCMG 480C Intro to Operations Management (3 Credit Hours)
Pre-requisites: Enrollment is restricted to students in the Healthcare Management MBA Program
Introduction to concepts and methods for managing operations in manufacturing and service organizations. Topics typically include forecasting, capacity and aggregate planning, material requirements planning, scheduling, facility layout and location, inventory management, just-in-time, total quality management, project planning, and logistics.
Outcomes:
Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

SCMG 481 Performance Improvement in Business Processes (3 Credit Hours)
Focuses on process view of the organization and provides students with a formal approach to designing, monitoring and improving business processes. The course provides the tools, methods and practical examples to help managers learn how to think from a process standpoint and how to ensure critical processes are controlled and functioning efficiently and effectively in their organization.
Course equivalencies: ISOM481 / MGSC481
Outcomes:
Understanding of the quality management concepts, performance improvement frameworks (Six Sigma, ISO, Baldridge), and process improvement practices using a step-by-step problem solving methodology

SCMG 481E Performance Improvement in Business Processes (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program.
Focuses on teaching students how to successfully analyze a business process, research methods for improving a process, and adapt/integrate the improvement methods into the business process in a prioritized and actionable manner. The course accomplishes this through the concepts of benchmarking, best practices, and performance improvement principles.
Course equivalencies: OPMG 603E/OPMG 481E

SCMG 482 Lean Production Concepts and Practices (3 Credit Hours)
Methods for managing manufacturing and service operations based upon Toyota Production System. Topics include the principles of JIT and lean production, pull production, setup reduction, preventive maintenance, cellular manufacturing, standard operations, visual management, employee empowerment, and supplier partnerships.
Course equivalencies: ISOM482 / MGSC482
Outcomes:
Understanding of concepts and tools for reducing waste and continuously improving operations based upon Toyota's success-proven approach

SCMG 483 Management of Service Operations (3 Credit Hours)
Pre-requisites: SCMG/ISSCM 480
This course explores the application of operations management concepts and techniques in service-sector organizations, and, in particular, how services are delivered to the customer.
Course equivalencies: OPMG483/CSIS483
Outcomes:
Understanding how service management requires unique tools for managing customer expectations while simultaneously delivering services that exceed those expectations

SCMG 486 Global Logistics (3 Credit Hours)
Pre-requisites: Graduate School of Business student
This course examines how business partners along the supply chain can work together to gain competitive advantage in moving products and services around the world to satisfy customers.
Outcomes:
Understanding best practices like vendor-managed inventory and category management, and the application of information technologies for sharing information

SCMG 486E Global Supply Chain Management (1.5 Credit Hours)
Explores the current business revolution in global logistics and partnering by members of the supply chain to more effectively provide products and services to customers. Must be part of the Cohort of Executive MBA (EMBA) students to enroll.

SCMG 487 Purchasing Management (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of organizational procurement processes and decision making framework. Topics include in-sourcing/out-sourcing decisions based on total cost of ownership; purchasing cycle and processes; developing material and technical specifications; supplier evaluation, selection and management; supplier quality management; purchasing capital goods and services; global sourcing and e-commerce; and purchasing tools and analytics.
Outcomes:
Students will have developed an understanding of fundamental and strategic issues in material planning and procurement, with the ability to source in a global marketplace

SCMG 488 Inventory Management (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of the fundamental principles of effective management of inventory with emphasis on inventory costs, product stratification, performance measures, demand forecasting, periodic and continuous review, safety stock, material requirements planning, customer service and use of technology in inventory management. Issues related to storage and handling of inventory stock are also studied.
Outcomes:
Students will have developed an understanding of the issues involved in planning, managing and control of inventories and materials in a supply chain

SCMG 489 Supply Chain Analytics (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of the design, development, and use of decision models for analysis of supply chain problems. This course provides an example-driven approach to learn about important supply chain models, problems, and solution methodologies. The objectives of this course are to develop valuable modeling skills that students can appreciate and use effectively.
Outcomes:
Students will have developed an understanding of the issues involved in the use of decision support tools for analysis of supply chain problems

SCMG 499 Independent Study-Production & Operations Management (3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of operations management not otherwise covered by department course offerings.

SCMG 589 Supply Chain Management Consulting (3 Credit Hours)
Pre-requisites: SCMG 480 Intro to Operations Mgmt; Graduate School of Business students
This course is the capstone of the Supply Chain Management Portfolio of the Master of Science in Supply Chain Management curriculum. As such, it is designed to integrate course topics covered in the foundation courses and engage students in discussions of critical supply chain leadership topics.
Outcomes:
Students will have developed an understanding of how to apply the concepts learned throughout the Supply Chain Management curriculum to a variety of full scale problems

SCMG 595 Risk Analysis for Business and Supply Chain Strategy (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
This course introduces students to practical tools for evaluating complex choices under uncertainty, quantifying trade-offs, and generating managerial insights. Students will learn how to structure decision problems, build decision trees, conduct scenario planning, and model uncertainty to support strategic business decisions. Through case studies - ranging from investment decisions and project management to new product launches - students will see how these methods are applied in practice. Emphasis is placed on using software to address real-world risk analysis problems commonly encountered in supply chain management, finance, accounting, marketing, and business analytics contexts.
Outcomes:
Students will be able to design advanced decision-analysis models - including decision trees, scenario plans, and quantitative risk assessments; Students will be able to implement advanced decision-analysis models to evaluate complex business choices under uncertainty and generate defensible, data-driven managerial recommendations across functional contexts; Students will be able to apply specialized software tools to analyze risk scenarios, quantify trade-offs, and synthesize insights that inform strategic business and supply chain decisions

SCMG 603E Performance Improvement in Business Processes (1.5 Credit Hours)
Restricted to Executive MBA students. This course focuses on the process view of the organization and provides students with a formal approach to designing, monitoring and improving business processes. The course provides tools, methods and practical examples to help managers learn how to think from a process standpoint and how to ensure critical processes are controlled and function efficiently and effectively.
Course equivalencies: OPMG 603E/OPMG 481E
Outcomes:
Understanding the quality management concepts, performance improvement frameworks (Six Sigma, ISO, Baldridge), and process improvement practices using a step-by-step problem solving methodology

SCMG 799 Special Topics in Supply Chain Management (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Sport Management (SPRT)

SPRT 532 Sport Law (3 Credit Hours)
This course examines and analyzes legal issues connected to amateur and professional sport associated with the fundamental concepts of law, sport business structure and legal authority and understanding the process of legal research. Students will comprehend the legal and court system, legal process, and the fundamental concepts of common, statutory, and constitutional law; perform and analyze sport law research; understand the elements of negligence; discuss recent court interpretations; and recommend a risk management standard of practice in the sport industry.

Accountancy (MSA)

With its emphasis on hands-on application of accounting principles and responsible leadership, Loyola's Master of Science in Accountancy program gives you the foundation you need to excel in today's constantly changing regulatory environment.

The Accountancy (MSA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Curriculum

The Master of Science in Accountancy (MSA) degree is a 12-course (36-credit hour) program that prepares graduates with the technical, analytical, and professional skills to pursue Certified Public Accountant licensure. MSA graduates are prepared for successful careers in public accounting, corporate accounting, forensic auditing and accounting, management accounting, investment banking, and governmental or not-for profit organizations.

For students seeking a STEM-designated option, the Accounting Analytics Track combines advanced accounting study with business analytics coursework in areas such as database systems, data warehousing, data mining, artificial intelligence, and data-driven decision making. The track emphasizes quantitative analysis, analytical modeling, technology-enabled problem solving, and the application of data analytics to accounting, auditing, taxation, risk assessment, and financial decision making.

The MSA is also offered through an Accelerated Master's Pathway (AMP), allowing qualified undergraduate students to begin graduate coursework during their senior year and complete the degree in an accelerated timeframe, typically within a fifth year of study. A suggested sequence for the AMP can be found below.

Students may begin the program in the fall or spring term. Those who have not taken accounting courses will have to take additional foundational courses (p. 1568) to prepare for further graduate study.

Regular Track Requirements

Code	Title	Hours

MSA Foundational Courses

For students who need additional foundational courses in accounting, the following course options will fulfill prerequisite requirements.

Code	Title	Hours
ACCT 303	Intermediate Accounting I	3
ACCT 311	Auditing & Internal Control Systems	3
ACCT 328	Concepts in Taxation	3
ACCT 400	Financial Accounting for Business Decisions	3

Suggested Sequence of Courses

Traditional Master's Program

In order to provide optimal flexibility in the Master's program, there is no required course sequence for the Regular Track or the Analytics Track. Students should work with the Graduate Program Director when selecting courses to choose those that are more relevant to their personal and professional needs.

Accelerated Master's Pathway

Students can take up to 9 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Suggested Sequence for BBA Student

Undergraduate BBA students from non-Accounting majors must take ACCT 303 Intermediate Accounting I, ACCT 304 Intermediate Accounting II, and ACCT 328 Concepts in Taxation in their Senior year as pre-requisites for the Accounting MS. These courses do not count toward the MS total credit hours.

Course	Title	Hours
Senior		
Fall		
ACCT 424	Managerial Accounting [1]	3
	Hours	**3**
Spring		
ACCT 400-Level Foundational Course [2]		3
ACCT 400-Level Foundational Course [2]		3
	Hours	**6**
Master's		
Additional coursework in the Accountancy (MS) is chosen in conjunction with the Graduate Program Director to choose courses relevant to their personal and professional needs.		27
	Hours	**27**
	Total Hours	**36**

[1] Undergraduate Accounting majors should take ACCT 424 or another required core courses. The Graduate Program Director recommends ACCT 404, ACCT 412, ACCT 425, ACCT 432, or ACCT 436 to fulfill these requirements.
[2] For the required core courses, the Graduate Program Director recommends ACCT 404, ACCT 412, ACCT 425, ACCT 432, or ACCT 436 to fulfill these requirements.

Suggested Sequence for Non-BBA Students

Due to the specialized nature of the Accountancy (MS), student coming from non-BBA degrees would only take pre-requisite courses in their Senior year that do not count toward the overall credit hours of the Master of Science.

Course	Title	Hours
Senior		
Fall		
Prerequisite Courses		
ACCT 400	Financial Accounting for Business Decisions [1]	
ACCT 303	Intermediate Accounting I [2]

	Hours	**0**
Master's		
Coursework in the Accountancy (MS) is chosen in conjunction with the Graduate Program Director to choose courses relevant to their personal and professional needs.		36
	Hours	**36**
	Total Hours	**36**

[1] ACCT 400 (https://catalog.luc.edu/search/?P=ACCT%20400) is required for non-Business majors and is a pre-requisite for this degree. Non-BBA AMP students may also take ACCT 201 (https://catalog.luc.edu/search/?P=ACCT%20201) to fulfill this requirement.

[2] Non-BBA students should take ACCT 303 in the fall and ACCT 304 in the Spring. ACCT 311 and ACCT 328 are secondary options for the Spring.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Master of Science in Accountancy (MSA) program, graduates are expected to have acquired essential skills in the areas of:

- Measurement: Graduate accounting students will demonstrate the ability to identify what needs to be measured, apply the appropriate measures, and recognize the strengths and weaknesses of the measures used.
- Decision Making: Graduate accounting students will demonstrate the ability to critically use financial and non-financial data in decision-making.
- Research: Graduate accounting students will demonstrate the ability to research new or existing accounting issues and topics, understand

the link between business and accounting, and apply the finding to the business condition.
- Risk Analysis: Graduate accounting students will demonstrate the ability to identify and manage risk.
- Communication: Graduate accounting students will possess the ability to communicate scope, findings and recommendations of accounting work.

Baumhart Scholars MBA (Social Impact MBA)

Baumhart Scholars MBA

We prepare leaders from the private, government, and social sectors to thrive at the intersection of profit and purpose.

Program Highlights

Baumhart Scholars is a highly selective, cohort-based MBA within Loyola's Quinlan School of Business for working professionals who seek to drive their careers and their social impact forward simultaneously. Scholars benefit from:

- Impact-driven curriculum: Scholars go through the MBA together, learning specialized leadership and impact skills alongside the fundamentals of business.
- Individualized mentorship: Scholars meet with professional mentors at the forefront of integrating business strategy and social purpose.
- Exceptional networks: Scholars get special access to Baumhart's leadership networks of higher ambition executives who are marrying profit and purpose.
- International recognition: Scholars receive their MBA from Quinlan, which has been recognized by the *Financial Times* as an international leader in sustainability, ethics, and social purpose in business education.
- Scholarship support: Scholars receive a $20,000 scholarship to celebrate their commitment to harness the power of their MBAs to advance the greater good.

Curriculum

Business Strategy + Social Purpose

Our 16-course, cohort-based approach to the MBA curriculum is designed to provide a solid foundation in all business disciplines, develop leadership skills, and deeply explore purpose in business.

The Baumhart Scholars curriculum has three parts:

- Foundational courses in business fundamentals, which prepare you to be a data-driven business leader with the ability to think critically and communicate effectively.
- Specialty courses in corporate social responsibility, social enterprise, impact investing, ESG, and values-based leadership, which equip you with the tools to marry profit and purpose.
- Elective courses in a wide array of disciplines, which enable you to dig deeper in areas that meet your individual learning goals.

Code	Title	Hours
MBA Requirements		
Foundational Courses		
Scholars go through Quinlan's core MBA experience as a cohort, taking courses aimed at developing foundational business knowledge, skills, and values. The faculty who teach these courses are committed to integrating environmental, social, and governance (ESG) issues into their learning objectives.		
ETHC 441B	Business Ethics	1.5
INFS 595B	Decision Strategy Critical Thinking & Decision Analysis	3
INFS 596B	Data-Driven Decision Making	3

Specialty Courses		
The program includes the specialty courses described below exploring values-based leadership, corporate social responsibility, social enterprise, influencing skills, ESG, and impact investing.		
MGMT 407B	Impact Investing	3
MGMT 406B	Influential Leadership	1.5
MGMT 401B	Innovative Corporate Social Responsibility	1.5
MGMT 402B	Social Enterprise	1.5
MGMT 400B	Values-Based Leadership	1.5
Elective Courses *(p. 1570)*		
Select three elective courses.		9
Total Hours		**48**

Note: INFS 400N Quantitative Methods I and INFS 402N Quantitative Methods II - Statistics Primer may also be required, depending on a student's undergraduate record.

Elective Courses

Through your three electives, you can customize your education to your personal career path and interests.

Elective courses can be taken within the Quinlan School of Business or from across Loyola colleges and schools (for example, School of Social Work (https://www.luc.edu/socialwork/academics/graduate/graduate-courses/) or School of Environmental Sustainability (https://www.luc.edu/sustainability/academics/graduatedegreeprograms/)) for flexibility and customization.

You can choose to have a concentration by taking all three elective courses in the same discipline. You can also use your electives to work toward a Graduate Certificate, such as the Environmental, Social,

and Governance Certificate (https://gpem.luc.edu/portal/program/?name=environmentalsocialandgovernancecertificate).

Suggested Sequence of Courses

Due to the specialized nature of this curriculum, the majority of courses are taken in a set schedule determined by the program. Scholars are encouraged to meet with their advisor each quarter to discuss their schedule and determine the best time to take electives. Courses typically take place during weekday evenings and occasional weekends. In addition to this core coursework, Scholars are expected to participate in an opening immersion weekend, ongoing leadership development programming, and monthly mentorship. Here is a sample program calendar.

Course	Title	Hours

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Provide a solid foundation in all business disciplines: Students in this MBA go through Quinlan's core MBA experience as a cohort, taking courses aimed at developing foundational business knowledge, skills, and values. Students take business ethics, data-driven decision-making, decision strategy, financial accounting for decision-making, financial management for a sustainable world, managerial economics, marketing management, operations management, project management and strategy and leadership.
- Develop leadership skills: Students in this MBA take courses in managing and motivating in the workplace, values-based leadership, and influential leadership.
- Deeply explore purpose in business: Specialty courses in corporate social responsibility, social enterprise, impact investing, and ESG equip students in this MBA with the tools to marry profit and purpose.

Baumhart Certificate in Environmental, Social, and Governance

The Baumhart Certificate in Environmental, Social, and Governance (ESG) will rapidly provide leaders with the knowledge and skills to be effective today as companies determine how they engage in broader societal issues – from climate change to water scarcity, from community stakeholders to internal diversity, equity and inclusion. The Certificate will equip leaders who are already working in companies to accelerate their personal and company's ESG journey by developing fundamental skills to navigate different ESG approaches, assess ESG risks and opportunities, implement ESG initiatives, and ultimately deliver and report financial and societal impacts.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Develop a strong grounding in the overall themes of ESG (Environment, Social and Governance). Provide all students with a required introductory class and a required capstone class that together establish the historical evolution of business, the linkage to all three themes in ESG and the relationship to the economy today. This is solidified in the capstone class, which links the students to examples of real world organizations engaged in ESG.
- Develop an understanding of the core methods for assessing ESG impact. Through the introductory and capstone classes, develop a strong foundation in the methods currently in use to identify ESG trends and impacts. This will connect both the ideas of identifying leadership organizations as well as the emerging ways to link actions to the underlying themes (i.e. Environment: climate and air pollution, etc.; Social: community health and DEI, etc.; Governance: organizational structure and internal policies, etc.)
- Establish an understanding of the current state of the industry and the opportunities to deepen on the ground impacts tied to the ESG high-level framework. Students will have the opportunity to go deep in all three areas by taking targeted classes that further define the ESG themes and are offered across the University. Students can take electives in the Quinlan School of Business, School of Environmental Sustainability, and Parkinson School of Health Sciences and Public Health. They will then go deeper on the impact through a capstone class with an applied project.

Business Analytics (MS)

The Master of Science in Business Analytics offers a unique blend of courses with a strong focus on data analytics–and it can be completed in one year.

This STEM-designated degree emphasizes important skills and tools in the information systems and analytics space such as SQL, Python, R, Tableau, database and data warehouse modeling, data mining, data visualization, and data storytelling.

The Business Analytics (MS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Certificate

- Business Analytics Certificate (p. 1575)

Combined

- Business Analytics (MBA/MS) (p. 1862)

Curriculum

The 12-course curriculum of the Master of Science in Business Analytics is a STEM-designated program that prepares you to be a responsible leader in the fast-growing information systems and analytics fields.

Courses are offered in online, hybrid, and in-class formats. Students can complete all 12 courses in one year and completely online.

All MS students will be awarded the Business Analytics Certificate (p. 1575) as well. The Business Analytics certificate is a 5-course graduate Quinlan program, and all its courses are a part of the MS program.

Students with previous information systems coursework and part-time students should contact Nenad Jukić (njukic@luc.edu), the program director, for more information on how their courses would be sequenced.

Besides the traditional Master's program, the Business Analytics (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Students can choose a required MSBA Core Course from the following in their Senior year: INFS 443, INFS 491, INFS 492, INFS 494, INFS 592, INFS 791, and ISSCM 484N. Any courses not taken in Senior year must be taken in the Master's year.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while

in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

At the completion of the program, graduates are expected to:

- Use data to drive strategic and tactical business decisions;
- Utilize sophisticated database, data warehousing, data mining, and data visualization methodologies and techniques to capture and apply data as a corporate asset;
- Demonstrate competence with various languages and tools, SQL, R, Tableau, and Python;
- Lead, supervise, and manage information systems projects of varying levels of complexity;
- Demonstrate effective communication skills with technical and non-technical individuals and groups;
- Show ability to effectively collaborate with and provide technical leadership to a variety of business units and organizations;
- Demonstrate a high level of technical aptitude in design, development, and use of information systems components;
- Integrate values and ethics into data analysis and information systems projects and solutions.

Business Analytics Certificate

The Business Analytics certificate is an excellent specialization if you are currently pursuing a Quinlan graduate degree or are a working professional who needs to better understand current business analytics methodologies. This certificate will strengthen your analytic skills, while also guiding you through the most contemporary software, languages, and methodologies for modeling and analyzing data.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the certificate program, you will be able to:

- Organize and analyze data in a professional manner using formal methods and techniques;
- Leverage data and analytics as a business asset;
- Use data and analytics to identify new business opportunities;
- Formulate strategic recommendations based on data and analytics;
- Use various languages and tools, including R, SQL, Tableau, and data modeling software

Business Ethics Certificate

As of Fall 2026, this program is no longer accepting admits.

Learn to do well, and good, with the support of the Business Ethics certificate program. The certificate explores ethical issues in business and the challenges of managing corporate ethics programs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

At the completion of the program, graduates are expected to:

- Develop an awareness of different ethical standards and perspectives as well as a tolerance for the conflicts and ambiguities within an organization to work respectfully, ethically, and professionally with people of diverse backgrounds, perspectives, and lived experiences.
- Develop, formulate and implement guidelines for personal and corporate decision-making.
- Understand principles of organizational relationships, and a sensitivity to the ethical concerns associated with dynamics like interpersonal influence, authority, and conflict.

- Demonstrate ability to think critically about managerial ethics, social responsibility, and environmental stewardship while articulating such concerns to various audiences—inside and outside of a business organization.

Executive MBA (EMBA)

In today's competitive business environment, you need a degree that sets you apart—and harnesses the power of your experience.

Our transformative 20-month program will help you hone your analytic capabilities, business knowledge, critical thinking, and management and leadership skills.

The Quinlan School of Business offers four MBA programs. Learn which one best fits your needs through our MBA guide (https://www.luc.edu/quinlan/academics/graduatedegrees/mba/pickinganmbaprogram/).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Quinlan Executive MBA (EMBA) program, graduates will have learned, achieved, or experienced the following:

- Core Business Fundamentals:
  1. Exposure to and be academically rooted in core business fundamental coursework in the areas of accounting, finance, data analytics, economics, management, marketing, human resource management, and operations management
  2. Develop an ability to integrate and see the interplay of core business fundamental coursework
- Entrepreneurship and Innovation:
  1. Anticipate the challenges of leading and managing evolving business and markets
  2. Demonstrate an innovative, entrepreneurial approach to strategy and decision making
- Global Perspective and Diversity:
  1. Equip or enhance global perspective by recognizing international business issues
  2. Understand, appreciate, and leverage individual, team, and organizational diversity
- Ethics and Values-Driven Leadership:
  1. Be exposed to and rooted in ethics and values-related coursework
  2. Demonstrate ability to operationalize ethics and values-related frames into business strategy
  3. Distinguish self as a leader in business who exhibits personal integrity and an ability to apply ethical principles to business practice
- Decision Making:
  1. Achieve a capacity for an integrated critical analysis of business opportunities, processes, and problems
  2. Develop an ability to understand, synthesize, and accordingly activate quantitative and qualitative information to improve managerial decision making
  3. Apply knowledge to solve for real-world business issues and areas of practice
  4. Develop and execute strategic approaches to lead, manage, and operationalize businesses and organizations

Finance (MSF)

You need a firm foundation to stay atop an ever-shifting global financial landscape. Our Master of Science in Finance (MSF) program will provide you with the understanding of financial principles and analytical skills to prepare you for a successful career.

Our curricula is closely linked to professional practice and vital industry connections. And industry leaders on our Financial Advisory Board ensure that our curriculum—and your MSF degree—remains relevant and cutting edge.

The Master of Science in Finance (MSF) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Major

- Accounting (BBA) (p. 775)

Master's

- Accountancy (MSA) (p. 1567)

Combined

- Finance (MBA/MSF) (p. 1869)

Curriculum

Completion of the Master of Science in Finance degree requires 12 courses, with additional prerequisite courses depending on academic background.

The curriculum is divided into three sets of courses: prerequisites, required courses, and electives. The required courses are designed to develop strong analytical and modeling skills. The electives enable students to explore topics in corporate finance, risk management, and asset management. Ethical decision-making is woven throughout the program, which will help position you as a responsible leader in your organization.

Besides the traditional Master's program, the Master of Science in Finance (MSF) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

	Total Hours	**36**

[1] This is a pre-requisite course for the degree. To take FINC 450, non-BBA students must take MATH 130 Business Calculus or MATH 131 Applied Calculus I. Students should also take STAT 103 or ISSCM 241 to fulfill the Quantitative Knowledge and Inquiry Core requirement.

[2] This is pre-requisite course. Non-BBA students may also take ACCT 201 (https://catalog.luc.edu/search/?P=ACCT%20201) to fulfill this requirement.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Our Master of Science in Finance program will provide you with specialized knowledge:

- Learn the concepts of risk and return relationship, diversification, micro and macro structure of global capital markets, and tools for stock and bond portfolio optimizations.
- Learn models and techniques for asset valuation, debt-equity decisions, real options, and cost of capital calculation.
- Learn the application of financial mathematic modeling techniques involving writing and implementing computer codes.
- Learn the concept and valuation of derivatives and their application to manage risk.
- Learn the concepts and application of responsible decision making.

Healthcare Management MBA (MBA-HCM)

Quinlan's MBA in Healthcare Management develops professionals who are effective, responsible leaders with the knowledge, skill, and understanding to successfully manage and lead in any segment of the dynamic healthcare industry.

Whether you are in the hospital or non-hospital sector, we will strengthen your business knowledge, management skills, and leadership capacity to improve the healthcare delivery system.

The Quinlan School of Business offers four MBA programs. Learn which one best fits your needs through our MBA guide (https://www.luc.edu/quinlan/academics/graduatedegrees/mba/pickinganmbaprogram/).

Master's

- Executive MBA (EMBA) (p. 1577)
- Supply Chain Management (MSSCM) (p. 1598)

Combined

- Supply Chain Management (MBA/MSSCM) (p. 1906)

Curriculum

Quinlan's executive MBA in Healthcare Management prepares professionals to strategically manage operations and lead change. Whether you are in the hospital or non-hospital sector, the program will strengthen your business knowledge, management skills, and leadership capacity to improve the healthcare delivery system.

Course Schedule for Loyola's Healthcare MBA

Our course schedule is designed for working professionals. Courses are offered over eight, 10-week quarters (the program is 24 months) and meet on Loyola's Water Tower Campus approximately twice per month with other weeks as asynchronous learning.

As a member of the Healthcare Management MBA program, you and your cohort will complete 49.5 credit hours (the equivalent of 17 graduate-level

courses; some courses are 3 credit hours while some courses are 1.5 credit hours).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Quinlan Healthcare Management MBA (MBA-HCM) program, graduates will have learned, achieved, or experienced the following:

- Core Business Fundamentals with a Focus on Healthcare: Exposure to and be academically rooted in core business fundamental coursework in the areas of accounting, finance, data analytics, economics, management, marketing, human resource management, and operations management; and Develop an ability to integrate and see the interplay of core business fundamental coursework.
- Decision Making: Achieve a capacity for an integrated critical analysis of business opportunities, processes, and problems in the healthcare industry; Develop an ability to understand, synthesize, and accordingly activate quantitative and qualitative information to improve healthcare industry-related decision making; Apply knowledge to solve for real-world healthcare industry issues and segments; and Develop and execute strategic approaches to lead, manage, and operationalize healthcare industry organizations.
- Ethics and Values-Driven Leadership: Be exposed to and rooted in ethics and values-related coursework; Demonstrate ability to operationalize ethics and values-related frames into healthcare

industry strategy; and Distinguish self as a leader in business who exhibits personal integrity and an ability to apply ethical principles to the healthcare industry.

- Global Perspective and Diversity: Equip or enhance global perspective by recognizing international healthcare-related topics and issues; Understand, appreciate, and leverage individual, team, and organizational diversity; and Lead and be a member of cross-functional, multi-expertise healthcare industry teams.
- Entrepreneurship and Innovation: Anticipate the challenges of leading and managing an evolving healthcare marketplace; and Demonstrate an innovative, entrepreneurial approach to strategy and decision making in the healthcare industry.

Human Resources (MSHR)

An organization is only as good as its people. The Quinlan MS in Human Resources program will give you the analytical, team, and communication skills you'll need.

You'll be well-prepared to recruit, select, develop, and reward the employees that ensure your company's success every day. You'll also gain access to a strong alumni and human resources network in Chicago, and the mentor program run by Loyola's Institute of Human Resources and Employment Relations.

The Human Resources (MSHR) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Certificate

- Human Resources and Employment Relations Certificate (p. 1585)

Combined

- Human Resources (MBA/MSHR) (p. 1870)

Curriculum

The M.S. in Human Resources can be pursued full-time or part-time. Students with three years of human resources experience take 12 classes. Students without experience take an internship class (HRER 415) in addition to the 12 classes.

Besides the traditional Master's program, the Human Resources (MSHR) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review

process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Understand the theoretical and practical demands of HR professional career and human relations requirements of being an effective manager; both of which involve attracting, engaging, and retaining talented employees.
- Develop and administer human resource strategies, programs and policies in the specific functional areas including talent acquisition/staffing (including employment planning, recruitment, and selection), HR development and training, compensation and benefits, performance management, and employment relations.
- Understand how the practice of effective human resource management can positively impact the business and result in a competitive advantage to the organization.
- Utilize critical thinking skills which involve complex human behavior and motivation.
- Appreciate of the value and methods for sustaining employee diversity including a global perspective as it relates to human resources.
- Develop research, written, and oral communications skills by preparing in-depth case presentations and reports.
- Appreciate ethical perspectives and support sustainable outcomes with respect to all aspects of HR management.

Human Resources and Employment Relations Certificate

Learn the foundations of recruiting, selecting, developing and rewarding employees through our Human Resources and Employment Relations certificate program.

This graduate-level, five-course certificate is ideal for students interested in the fundamentals of human resources management who have three or more years of professional work experience or have completed one HR course (graduate or undergraduate) within the last three years.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Completion of the HRER certificate allows you to leverage knowledge and skills to work as a highly effective human resources management professional or as a manager who partners effectively with human resources departments to acquire, develop, and reward talented employees.

Specific skills developed include:

- Distinguish the essentials of key human resource functions and how they are deployed in organizations. (Analyzing)
- Evaluate human resource policy and practice from an ethical perspective. (Evaluating)
- Design HR programs and policies that align with stakeholder goals and objectives. (Creating)
- Develop proficiency in building positive relationships across organizational functions and levels. (Creating)

Marketing (MSM)

Our Master of Science in Marketing (MSM) degree program integrates creativity with analytics and strategy with insight. You'll have the opportunity to accelerate your career in the dynamic fields of 21st century marketing.

Many students with undergraduate degrees in journalism, communications, advertising, and marketing enroll in the MSM program to advance their careers with additional credentials. Others with degrees in finance, economics, medicine, and engineering choose the MSM program as a pathway to career change.

The Marketing (MSM) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Business Analytics (MS) (p. 1572)

Combined

- Business Analytics (MBA/MS) (p. 1862)
- Marketing (MBA/MSM) (p. 1877)

Curriculum

The Masters in Marketing (MSM) program's strategic and creative curriculum builds the skills needed for strong brand management that addresses global challenges with thoughtful, actionable innovations for today's marketplace. The MSM can be completed in 12-16 months.

Besides the traditional Master's program, the Marketing (MSM) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Track Requirements

MSM students choose one of the following three tracks:

- Digital Marketing Analytics (STEM-designated)
- Integrated Marketing Communications
- Supply Chain (STEM-designated)

All three tracks have a 12-course curriculum with one prerequisite course.

Digital Marketing Analytics Track

The STEM-designated Digital Marketing Analytics track is devoted to engaging emerging capabilities built on the foundation of creative, digital, and analytical marketing skill sets.

Combining business goals with marketing decisions, this increasingly critical marketing function leverages consumer, retail, and category trend data to help marketers make informed marketing and business decisions through database models, improved sales forecasting, and data-driven tactics that enhance consumer loyalty, market share, and profitability.

1 This is a pre-requisite course. Students may take statistics courses such as STAT 103 or ISSCM 241 to fulfill this requirement.

2 Select Marketing elective course with the Graduate Program Director or academic advisor.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

As a Quinlan MSM student, you will:

- Develop the creative and strategic skills you need to lead and innovate in the diverse, digital, and dynamic field of marketing
- Learn marketing strategies that deliver brand growth and a competitive advantage in a time of sweeping economic, environmental, and social change
- Gain the technical business skills that are essential in today's global economy
- Learn to ask the questions that are important to humanity as you harness the power of marketing to promote positive social change
- You will also build a strong foundation in: Marketing finance; Strategic planning; Brand leadership; Digital and social content development; Leadership and ethics; Database analytics; Sustainable business leadership; and Global campaign development.

Next Generation MBA (MBA)

Meet the future of MBA programs.

The Next Generation MBA prepares you to be a data-driven business leader with the ability to think critically and communicate effectively. You'll also build a strong set of values to drive your business decisions and career.

The Quinlan School of Business offers four MBA programs. Learn which one best fits your needs through our MBA guide (https://www.luc.edu/quinlan/academics/graduatedegrees/mba/pickinganmbaprogram/).

The Next Generation MBA (MBA) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Certificate

- Baumhart Certificate in Environmental, Social, and Governance (p. 1571)
- Human Resources and Employment Relations Certificate (p. 1585)
- Supply Chain Fundamentals Certificate (p. 1597)

Curriculum

Two program tracks are offered:

- Students with a bachelor's degree in business or meeting program prerequisites can complete the Next Generation MBA program in one year of full-time study.
- Students with an undergraduate degree in any field or students who opt for a flexible pace can complete the MBA program in two years of part-time study.

Besides the traditional Master's program, the Next Generation MBA (MBA) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Tracks(Electives)

You can choose to have a track by taking three courses in any one of the twelve disciplines through elective options (four courses needed for accounting). The tracks available within the Next Generation MBA program are:

Accounting

The MBA with an accounting track paves the way for an exciting career in financial management, consulting, or your own business.

The MBA accounting track includes fundamental courses in ethics, leadership, and international business. Students may choose to customize their studies by focusing on select accounting concepts, procedures, and applications.

Elective Courses

Choose four of the following elective courses in order to complete the accounting track.

Code	Title	Hours
ACCT 404	Financial State Analysis	3
ACCT 424	Managerial Accounting	3
ACCT 425	International Accounting	3

ACCT 432	State, Local and International Tax	3
ACCT 436	Forensic Accounting and Fraud	3
ACCT 437	Advanced Forensic Accounting	3
ACCT 412	Special Topics in Accounting	3
LREB 445	Entrepreneurship Law	3

Artificial Intelligence

The MBA with artificial intelligence track positions you to lead at the forefront of business innovation.

Quinlan's AI track combines technical fluency, strategic insight, and ethical leadership to help you turn intelligent technologies into smarter decisions and stronger performance. Through applied coursework and industry engagement, you will build the skills to identify AI opportunities, guide responsible implementation, and drive meaningful transformation across your organization.

Elective Courses

Choose three of the following elective courses in order to complete the artificial intelligence track.

Code	Title	Hours
INFS 491	Managerial Statistics with Artificial Intelligence (AI)	3
INFS 494	Applied Data Mining and Artificial Intelligence (AI)	3
INFS 495	Forecasting Methods with Artificial Intelligence (AI)	3
INFS 798	AI Product Management	3
ETHC 499	Special Topics in Business Ethics	3
ENTR 499	Special Topics in Entrepreneurship	3
XXXX 499	AI-centric Special Topics Courses	3

Business Ethics

The MBA with business ethics track emphasizes the importance of having a moral code and behaving ethically in the business environment.

Loyola's business ethics courses are designed to help you meet all challenges head-on. Our practical curriculum based on responsible leadership aims to make you accountable, ethical, and trustworthy. You will learn the business imperative for treating all stakeholders—including customers, employees, and the community—with respect and integrity.

Elective Courses

Choose three of the following elective courses in order to complete the business ethics track.

Code	Title	Hours
ETHC 441N	Business Ethics (If ETHC 446 taken for MBA Core)	3
ETHC 443	Global Environmental Ethics	3
ETHC 446	International Business Ethics (If ETHC 441N taken for MBA Core)	3
ETHC 499	Special Topics in Business Ethics	3
INFS 795	Ethics and Data Analytics	3
MGMT 444	Introduction to ESG - Expectations & Opportunities	3
MGMT 445	ESG in Practice-Business Leadership in Times of Change	3
MGMT 485	Social Enterprise	3

Entrepreneurship

The MBA with an entrepreneurship track lays the groundwork for your future as a successful business owner. Experts predict that entrepreneurial opportunities will continue to grow in virtually every field of business. A solid knowledge of entrepreneurship principals, laws, and applications will enable you to hit the ground running.

Loyola's entrepreneurship courses provide you with complete hands-on training, often in partnership with local businesses. We offer a global perspective and a practical curriculum that prepares you to exercise sound judgment in recognizing lucrative entrepreneurial opportunities.

Elective Courses

Choose three of the following elective courses in order to complete the entrepreneurship track.

Code	Title	Hours
ENTR 480	Recognizing Entrepreneurial Opportunities	3
ENTR 481	Entrepreneurship	3
ENTR 482	Entrepreneurial Marketing	3
ENTR 483	Strategic Entrepreneurship and Innovation Management	3
MGMT 472	Leading Change in Organizations	3
MGMT 485	Social Enterprise	3
LREB 445	Entrepreneurship Law	3

[1] Required

Finance

The MBA with a finance track is one of the most popular areas in business studies today. Interest is driven by professional opportunities in business, investment, and finance.

Loyola's MBA with a finance track is well known for its practical curriculum, hands-on application, and partnered delivery with established Chicago businesses. In addition to studying relevant trends and current issues, you will employ a global perspective and gain a solid understanding of international and emerging financial systems.

Elective Courses

Choose three of the following elective courses in order to complete the finance track.

Code	Title	Hours
FINC 452	Investment Management	3
FINC 453	Topics in Advanced Financial Management	3
FINC 455	International Financial Management	3
FINC 456	Management of Financial Institutions	3
FINC 553	Applied Portfolio Management	3
FINC 556	Investment Banking	3
FINC 599	Special Topics	3
FINC 628	Valuation	3

Human Resources Management

The MBA with human resources track can bolster your ability to manage and motivate a company's most valuable asset—it's employees.

Loyola's professors demonstrate the application of key practices in developing, managing, recruiting, and leading staff. Our strong focus on

examining and understanding current issues impacting HR from a global perspective will put you at an advantage in the marketplace.

Elective Courses

Choose three of the following elective courses in order to complete the human resources track.

Code	Title	Hours
HRER 413	Compensation	3
HRER 418	Human Resources Law	3
HRER 422	Global Human Resource Management	3
HRER 429	Human Resource Development	3
HRER 430	Leading Change in Organizations	3
HRER 433	Group Process and Facilitation	3
HRER 453	Incentive Pay and Employee Benefit Programs	3
HRER 462	Employment Relations	3
HRER 463	Staffing	3
HRER 490	Analytical Problem Solving	3
HRER 500	Special Topics in Human Resources and Employment Relations	3
HRER 501	Performance Management	3

Information Systems

The MBA with an information systems track will advance your career in the arena of information technology. Every business relies on IT processes to stay competitive, improve efficiency, and enhance communication. Loyola's practical curriculum helps you develop advanced skills for improving organizational performance and consequently, profitability, allowing you to naturally progress into leadership or managerial roles.

Elective Courses

Choose three of the following elective courses in order to complete the information systems track.

Code	Title	Hours
INFS 443	Business Analytics	3
INFS 492	Database Systems	3
INFS 493	Database Analytics	3
INFS 494	Applied Data Mining and Artificial Intelligence (AI)	3
INFS 495	Forecasting Methods with Artificial Intelligence (AI)	3
INFS 592	Data Visualization	3
INFS 691	Principles of Analytic Programming	3
INFS 791	Programming for Business Decision Making	3
INFS 796	Data Warehousing	3
INFS 797	Applications of Visualization	3
INFS 798	AI Product Management	3

International Business

The MBA with an international business track gives you the competitive edge in a distinctly global economy. A growing number of businesses are competing in the international market; advanced knowledge of global practices enhances your opportunities significantly at home and abroad.

Elective Courses

Choose three of the following elective courses in order to complete the international business track.

Code	Title	Hours
ACCT 425	International Accounting	3
ACCT 432	State, Local and International Tax	3
FINC 455	International Financial Management	3
IBUS 455	International Strategies for Multinational Enterprises (if ENTR 480 taken for MBA Core)	3
IBUS 499	Special Topics in International Business	3
HRER 422	Global Human Resource Management	3
MARK 465	International Marketing	3
ETHC 443	Global Environmental Ethics	3
ETHC 446	International Business Ethics	3
SCMG 486	Global Logistics	3

Graduate Business Study Abroad

Management

The MBA with a management track will give your career the boost needed to secure leadership, managerial, or executive positions. Our program provides you the advanced knowledge necessary for successful career advancement. A practical curriculum enhanced with a global perspective and strong business ethics foundation affords you a distinct competitive edge.

Elective Courses

Choose three of the following elective courses in order to complete the management track.

Code	Title	Hours
ENTR 480	Recognizing Entrepreneurial Opportunities (If IBUS 455 taken for MBA Core)	3
ENTR 481	Entrepreneurship	3
ENTR 482	Entrepreneurial Marketing	3
ENTR 483	Strategic Entrepreneurship and Innovation Management	3
ETHC 443	Global Environmental Ethics	3
ETHC 446	International Business Ethics	3
IBUS 455	International Strategies for Multinational Enterprises (If ENTR 480 taken for MBA Core)	3
MGMT 472	Leading Change in Organizations	3
MGMT 477	Family Business	3
MGMT 485	Social Enterprise	3
MGMT 573	Business Strategy	3
MGMT 574	Corporate Strategy	3

Marketing

The MBA with a marketing track equips business managers with solid marketing skills to lead and grow brands and companies naturally.

Elective Courses

Choose three of the following elective courses in order to complete the marketing track.

Code	Title	Hours
MARK 461	Research Methods in Marketing	3
MARK 463	Sales and Strategic Leadership	3
MARK 464	Integrated Marketing Communication	3
MARK 465	International Marketing	3
MARK 467	Consumer Behavior	3
MARK 468	Digital Marketing	3

MARK 561	Comparative Consumer Behavior	3
MARK 562	Database Marketing Strategy	3
MARK 564	Brand Equity and Marketing Strategy	3
MARK 566	Integrated Media Planning	3
MARK 568	Social Media & Content Marketing	3
MARK 569	Special Topics	3
MARK 660	Digital Marketing Analytics	3

Supply Chain Management

The MBA with an supply chain management track teaches you advanced strategies to improve business performance and output. Our practical curriculum and hands-on approach contribute to effective and enhanced learning for you.

Elective Courses

Choose three of the following elective courses in order to complete the supply chain management track.

Code	Title	Hours
SCMG 481	Performance Improvement in Business Processes	3
SCMG 482	Lean Production Concepts and Practices	3
SCMG 483	Management of Service Operations	3
SCMG 486	Global Logistics	3
SCMG 487	Purchasing Management	3
SCMG 488	Inventory Management	3
SCMG 489	Supply Chain Analytics	3
SCMG 589	Supply Chain Management Consulting	3
INFS 495	Forecasting Methods with Artificial Intelligence (AI)	3

Suggested Sequence of Courses

Traditional Master's Program

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Two Year Completion

Course	Title	Hours
Year 1		
Fall		
INFS 400N	Quantitative Methods I	0

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Learning Goals for Master of Business Administration Program (MBA)

- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines. They will be able to apply theory, skills, and knowledge from these disciplines to business practice.
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making.
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing.
- Entrepreneurship and Innovation: Graduates will anticipate the challenges of leading and managing evolving business and markets and demonstrate an innovative, entrepreneurial approach to strategy and decision making.

Supply Chain Fundamentals Certificate

As of Fall 2026, this program is no longer accepting admits.

With markets that move at the speed of ecommerce, global companies must have a high-performing supply chain and logistics system. Learn the fundamentals in our Supply Chain Fundamentals certificate program.

Related Programs

Master's

- Supply Chain Management (MSSCM) (p. 1598)

Minor

- Supply Chain Management Minor (p. 817)

Combined

- Supply Chain Management (MBA/MSSCM) (p. 1906)

Curriculum

Students should have completed one course in statistics (or can complete a statistics course at Loyola before beginning the certificate program) and have the U.S. equivalent of a BA or BS degree.

Code	Title	Hours
Prerequisite Course		
INFS 491	Managerial Statistics with Artificial Intelligence (AI) [1]	3
Required Courses		
SCMG 480	Operations Management [2]	3
SCMG 486	Global Logistics	3
SCMG 487	Purchasing Management	3
SCMG 488	Inventory Management	3
Elective Courses (p.)		
Select one of the following: [3]		3
INFS 484N	Project Management	
INFS 495	Forecasting Methods with Artificial Intelligence (AI)	
SCMG 481	Performance Improvement in Business Processes	
SCMG 482	Lean Production Concepts and Practices	
SCMG 483	Management of Service Operations	
SCMG 489	Supply Chain Analytics	
Total Hours		**15**

1. This course may be waived if student has completed an equivalent course with a grade of "B" or higher in the last 5 years.
2. This course can be substituted, depending on academic background. If substituted, the student would take an additional elective course.
3. Select two if SCMG 480 has been waived.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
SCMG 480	Intro to Operations Management	3
Select one from list of Electives		3
	Hours	**6**
Winter		
SCMG 488	Inventory Management	3
	Hours	**3**
Spring		
SCMG 487	Purchasing Management	3
	Hours	**3**
Summer		
SCMG 486	Global Logistics	3
	Hours	**3**
	Total Hours	**15**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

At the completion of the program, graduates are expected to:

- Use advanced supply chain strategies and be able to implement these strategies in a variety of global business environments.
- Utilize sophisticated methodologies to improve or optimize operations across a wide range of industries.
- Execute advanced tasks associated with process design and improvement, transportation management, inventory management, and purchasing management.

Supply Chain Management (MSSCM)

The STEM-designated Master of Science in Supply Chain Management focuses on real world challenges related to moving goods globally – on time and on budget. This program will enable you to understand the issues and solve the complex challenges.

The Supply Chain Management (MSSCM) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Curriculum

The Master of Science in Supply Chain Management's 12-course curriculum[1] prepares you to be a responsible leader in the supply chain field. Students may be required to take INFS 491 in addition to the courses below, depending on their academic background.[2]

Besides the traditional Master's program, the Supply Chain Management (MSSCM) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours
Required Courses		
INFS 443	Business Analytics	3
INFS 495	Forecasting Methods with Artificial Intelligence (AI)	3
SCMG 480	Operations Management [3]	3
SCMG 486	Global Logistics	3
SCMG 487	Purchasing Management	3
SCMG 488	Inventory Management	3

SCMG 489	Supply Chain Analytics	3
Ethics Requirement		
Select one of the following:		3
ETHC 441N	Business Ethics	
ETHC 446	International Business Ethics	
INFS 795	Ethics and Data Analytics [4]	
Electives		
Select three (or four, if SCMG 480 is substituted)		9
FINC 620	Financial Mathematics and Modeling I	
INFS 484N	Project Management	
INFS 492	Database Systems	
INFS 493	Database Analytics	
INFS 494	Applied Data Mining and Artificial Intelligence (AI)	
INFS 592	Data Visualization	
INFS 596N	Data Driven Decision Making	
INFS 791	Programming for Business Decision Making	
INFS 795	Ethics and Data Analytics [4]	
INFS 796	Data Warehousing	
INFS 797	Applications of Visualization	
MGMT 573	Business Strategy	
or MGMT 574	Corporate Strategy

SCMG 482	Lean Production Concepts and Practices	
SCMG 483	Management of Service Operations	
SCMG 595	Risk Analysis for Business and Supply Chain Strategy	
Capstone Course		
SCMG 589	Supply Chain Management Consulting [5]	3
Total Hours		**36**

1 Program requirements are subject to change based on course/instructor availability.

2 The prerequisite requirement is met if you have completed a minimum of one undergraduate course (3 credit hours) of comparable content in the prerequisite subject area within the last seven years with a grade of B (or equivalent) or higher if the course is determined appropriate by their academic advisor.

3 This course can be substituted with a program elective by the approval of the academic director and depending on the academic background. Typically, you need to have completed a minimum of one undergraduate course (3 credit hours) of comparable content in the subject area within the last five years with a grade of B (or equivalent) or higher if the course is determined appropriate by their academic advisor.

4 INFS 795 may be taken to fulfill the Ethics requirement **OR** the Electives requirement, not both.

5 All required courses must be completed prior to or concurrently with SCMG 589.

Suggested Sequence of Courses

Traditional Master's Program

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Fall		
SCMG 480	Intro to Operations Management	3
SCMG 489	Supply Chain Analytics	3
Elective Course		3
	Hours	**9**
Winter		
SCMG 488	Inventory Management	3
SCMG 486	Global Logistics	3
Elective Course		3
	Hours	**9**

	Total Hours	**36**

[1] INFS 596N Data Driven Decision Making is recommended. Depending on academic background, students may choose another program elective in place of this course. Students should work with the Graduate Program Director or academic advisor when selecting electives.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation

of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Technical Knowledge: Graduates will be proficient in advanced knowledge of supply chain management and methodologies for optimization, transportation, inventory, purchasing management, supply chain analytics, and risk analysis. This comprehensive skill set will enable them to become effective leaders capable of optimizing operations and making informed decisions in a dynamic business environment.
- Critical Decision Making: Graduates will become adept at assessing risks, identifying opportunities for improvement, and devising innovative strategies to enhance supply chain efficiency and overall performance. Equipped with strong critical thinking skills, graduates will be well-prepared to tackle the complexities and uncertainties inherent in supply chain operations, contributing to the success and competitiveness of the organizations they serve.
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice.
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender.
- Communication: Graduates will be able to communicate effectively, orally and in writing.

School of Continuing and Professional Studies

The School of Continuing & Professional Studies (SCPS) at Loyola offers a diverse range of application-oriented graduate and post-baccalaureate programs designed to meet emerging labor market demands. Developed in collaboration with industry experts, these programs provide working adult learners with relevant skills and knowledge to advance their careers.

SCPS empowers adult learners through an accessible, impactful, and holistic education, fostering both personal and professional success. With fully online classes and flexible 8-week schedules, programs allow students to balance their studies with their life's other responsibilities. Additionally, the Urban Affairs and Public Policy program area follows a 16-week semester schedule, offering a mix of online and on-campus coursework to accommodate diverse learning preferences. Led by scholars and experienced practitioners, SCPS courses ensure students gain practical, career-ready expertise to thrive in their chosen fields.

Graduate Programs

- Foundations of Instructional Design Certificate (p. 1606)
- Information Technology Leadership and Strategy (MPS) (p. 1607)
- Instructional Design (MPS) (p. 1609)
- Professional Certificate in Instructional Design (p. 1614)
- Public Affairs and Management Certificate (p. 1614)
- Public Policy (MPP) (p. 1615)
- Public Policy/Law (MPP/JD) (p. 1893)
- Public Service Leadership (MPS) (p. 1617)
- Urban Affairs (MA) (p. 1619)

Post-Baccalaureate Programs

- Paralegal Studies - Corporate Practice Certificate (p. 1610)
- Paralegal Studies - Customized Certificate (p. 1611)
- Paralegal Studies - Litigation and Corporate Practice Certificate (p. 1612)
- Paralegal Studies - Litigation Practice Certificate (p. 1613)
- Public Service Leadership (MPS) (p. 1617)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Instructional Design (INDN)

INDN 420 Instructional Design Theories and Models (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
This course covers how theories of human learning can be applied to the instructional process to make it more effective, efficient, and appealing. The course has a two-fold focus: the theoretical principles that have contributed to the field of ID, and how those principles can be applied within practical settings.
Outcomes:
Differentiate/compare/contrast among learning theories, ID theories and ID models; Identify/describe the basic tenets of behavioral, cognitive, and constructivist theories; Identify/describe motivational theories; Select/apply principles in practical learning situations

INDN 421 Design & Development of Instructional Materials (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
This course builds upon instructional design theories and best practices introduced in the Principles of Instructional Design course. It provides an overview of a variety of instructional tools and technologies and allows students to implement design principles in the development of instructional materials.
Outcomes:
Recall/describe/apply learning theories and methodologies to design/develop instructional materials; Recognize/describe/apply visual literacy strategies and accessibility standards to create instructional materials; Design/develop/implement instructional materials using multiple media

INDN 430 Performance Improvement in Organizations (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
In this course, learners will identify a problem/cause/solution to a performance problem within an organization using the Human Performance Improvement model. Learners will select a learning intervention and create an evaluation plan to assess its effectiveness. Learners will compare/contrast the instructional design process within a variety of organizations.
Outcomes:
Compare/contrast ID teams in organizations; Analyze data to identify performance gaps/causes; Select a performance intervention based on needs analysis; Compose an evaluation plan; Identify Change Management strategies for implementation

INDN 431 Fundamentals of Learning Analytics (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
In this course, students will build a foundation for deploying learning analytics to be used in instructional design. The course employs a combination of theory and hands-on experience using business-intelligence tools. Emphasis will be centered on specific models and methodologies in data collection, normalization, visualization, and analysis.
Outcomes:
Explain learning analytics theory; identify recent trends; Use reporting tools to compile/isolate/summarize data; Differentiate between learning models; Align data models to assessments; Conduct predictive data analysis; Discuss ethics considerations

INDN 440 Applications of Human Centered Design Principles (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
Human-centered design places humans and their needs at the center of the design, compels us to take a holistic/thoughtful approach to our designs. This course uses these principles to examine the design process to create learning experiences that are inclusive and responsive. Learners will also craft their own design philosophy.
Outcomes:
Describe principles of human-centered design; Create a space for learning that incorporates principles of human-centered design; Critique the application and use of these principles; Formulate your own philosophy of design

INDN 490 Instructional Design Capstone (3 Credit Hours)
Pre-requisites: CIEP 470 Principles of Instructional Design, last semester of the program, program director approval; Corequisite: 8W1 remaining course requirements must be completed
Students will apply program outcomes to real-world settings in preparation for an ID career. The course combines research and service learning towards the creation of a project, portfolio and professional artifact. Students will partner with a SME to build a module tailored to their course or institution.
Outcomes:
Conduct a needs assessment, compose learning goals/outcomes, and create an evaluation plan by partnering with a subject matter expert; Create a training module incorporating SME content; Develop a professional portfolio

Master of Public Policy (MPP)

MPP 400 Policy Design and Analysis (3 Credit Hours)
Students will learn to analyze issues to determine if there is a role for government intervention, to evaluate public policy options that could address the identified problem, and to design programs that would target the specific issues. The role of political factors in affecting these decisions is also covered.

MPP 401 Analytical Tools in Public Policy (3 Credit Hours)
This class covers diverse modeling tools in public policy, drawing from fields such as economics, geography, demography, spatial analysis, risk analysis. decision theory. The emphasis is on applied analysis to address current public policy issues.

MPP 402 Cost Benefit Analysis (3 Credit Hours)
The course cover the basics of the CBA technique with applications in several policy areas. CBA is grounded in the policy evaluation framework, including discussion of ethical issues and the use of CBA information in policy and program decisions.
Outcomes:
Ability to conduct CBA analysis, understand its use in the policy process, including ethical issues

MPP 403 Public Budget and Finance (3 Credit Hours)
This course provides students with practical knowledge about the budget process and the tools to construct and analyze a public budget. General theories of public finance and the role of the budget as a political document are covered. Assignments will provide practice in the budgeting approaches covered in the readings.

MPP 404 Public Policy Process (3 Credit Hours)
This class provides an introduction to the major theories of the public policy process. We consider issues of problem definition, social construction, agenda setting, the role of government institutions and interest groups in determining policy outcomes.
Outcomes:
Students will understand how political considerations, institutions, and rules of government affect public policy outcomes

MPP 405 Statistical Methods & Analysis for Public Policy I (3 Credit Hours)
This course is an introduction to statistical modeling, and hypothesis testing for applied problems in urban affairs and public policy. This class will provide the foundation for thinking about casual relationships, determining differences among groups, and what might account for those differences.
Outcomes:
Students will learn to conduct basis statistical analysis and write literate data analysis reports

MPP 406 Statistical Methods & Analysis Public Policy II (3 Credit Hours)
Pre-requisites: MPP 405
This class develops the multiple linear regression model and extensions of it that are commonly used in the study of public policy. We investigate the relationships between the type of data available and the quantitative models to use, including logistic analysis and use of simultaneous equations.
Outcomes:
Students will learn to use the tools necessary to understand, critique, and conduct advanced statistics

MPP 407 Local Economic Development (3 Credit Hours)
Students will learn the current theories of local economic development, including the role of infrastructure, access to markets, workforce quality (human capital), technology development, the role of universities, and the value of networks among business actors. Students will use these theories to create a metropolitan benchmarking report and strategic plan.

MPP 408 Political Feasibility Analysis (3 Credit Hours)
Pre-requisites: Graduate Students Only
Students will analyze strategies for assessing the political feasibility of enacting and implementing public policies. Crafting a message, use of media to communicate that message, identification of allies and opponents, and how to navigate legislative and bureaucratic processes will be covered.
Outcomes:
Ability to craft and implement a comprehensive political strategy to change public policy outcomes; Includes: creating messages, use of media, development of grassroots campaign, work within legislatures and government agencies

MPP 409 Education Policy and Politics (3 Credit Hours)
Pre-requisites: Graduate Students Only
This seminar focuses on K-12 policy in the U.S. using a policy analysis framework. We evaluate alternative policy proposals related to different theories of equality and school quality. We examine market-driven, standards-based, human capital, fiscal, and community-based models of reform. The course concludes by examining the political context for reform.
Outcomes:
Develop analytical ability to identify the contemporary problems with education, what causes them, and what policy reforms could be used to address those problems

MPP 410 Special Topics in Public Policy (3 Credit Hours)
This seminar course will cover specialized topics in public policy in greater detail.
Outcomes:
Students will learn about current issues related to the topic, relevant theoretical approaches, and application of theories to the specific issue in order to develop policy solutions

MPP 411 Environmental Governance (3 Credit Hours)
Environmental governance examines the institutions used to manage the environment and natural resources. The class pulls from political, economic, sociological and ecological frameworks to develop an interdisciplinary examination of the management of resources, both in the US and abroad.

MPP 412 Urban Politics and Policy (3 Credit Hours)
The course examines sources of power in the city and their impact on city policies, including the role of economic power, federalism, government structures, neighborhood groups, and voting. The focus is on any systematic bias in city policies and how likely that the bias could be overcome.
Outcomes:
Understand the major theories of urban politics and use them to analyze potential policy outcomes in cities

MPP 413 Intergovernmental Relations (3 Credit Hours)
This class looks at what determines the allocation of responsibility and power across U.S. levels of government, how do the different levels interact with each other, and how does this system affect why some policy problems appear to receive a lot of attention and others do not. Department consent required.
Outcomes:
Understand how principles of federalism shape policy subsystems, which then affects who addresses policy problems and how outcomes are shaped by the various governments

MPP 414 Affordable Housing Finance and Policy (3 Credit Hours)
This course focuses on how affordable housing programs work - the policy side, the development side, the investment side, and the legal side. This requires an understanding of the legal principles underlying real estate finance, the principles of investment, impact of tax laws, and demographic and economic factors that affect the supply and demand for housing. Department Consent Required.
Outcomes:
Gain knowledge of affordable housing criteria, needs assessments, financial and investment factors that affect supply, structure of common affordable housing policies

MPP 461 Education Law & Policy (3 Credit Hours)
This seminar explores legal, political and practical issues confronting American education. The course begins with analysis of fundamental political and philosophical principles underlying the educational system. Students then apply these principles to areas of education law - such as school finance, governance, the balance between federal and state roles in curriculum. Department consent required for enrollment.
Course equivalencies: MPP 461/LAW 461
Outcomes:
Students will be able to: understand fundamental legal doctrines governing US education law, research legal and political issues in education policy; analyze education problems and develop policy options

MPP 499 Directed Readings (3 Credit Hours)
An independent study course provides the opportunity for a student to develop knowledge regarding a particular topic of interest, beyond that available in traditional courses. The student will develop a contract with the faculty member who supervises the independent study to specify the topics covered, the tasks to be performed, and the grading criteria. Students are expected to participate in development of a reading list. Regular meetings of the student and the faculty supervisor will occur throughout the semester.

MPP 500 Public Policy Evaluation (3 Credit Hours)
Pre-requisites: PLSC 476 or SOCL 414
This class covers basic methods of evaluating the impact of public policies. We will read examples of each type of evaluation and discuss the difficulties each case illustrates in doing applied research - including statistical problems, ethical issues, and the potential impact of the evaluation on policy change.

MPP 501 Public Policy Internship (3 Credit Hours)
Enrollment is restricted to students in MUAPP program. Students will work with an organization in the public sector (typically nonprofit or government) to apply concepts and skills from the first-year MUAPP curriculum. They will develop a portfolio of work products to demonstrate their competencies and interests to future employers. Students will gain relevant work experience; apply concepts and skills developed in other courses in the MUAPP curriculum; create a portfolio of work products to demonstrate abilities to future employers.

MPP 502 Professional Development Skills (1 Credit Hour)
Requirement for MPP graduate students. The class develops professional skills for students to identify and pursue internship and career options. Policy practitioners discuss their experiences, illustrating different work in the policy field. Job search strategies, resume writing, and informational interviews are covered.

MPP 503 Public Policy Practicum (3 Credit Hours)
Enrollment is restricted to students in MUAPP program. This is a capstone course for the masters degree in public policy or urban affairs. The goal is to gain experience working as a team conducting a policy analysis or program evaluation project. Faculty will determine the topic for the course, often based on a real world client's interests.
Outcomes:
Students apply concepts and skills developed in the MUAPP curriculum to a real world problem; work with a client and stakeholders; create a research report appropriate to an applied environment

MPP 606 Childlaw Legislation and Policy Clinic (3 Credit Hours)
Permission of instructor is required prior to registration. Students work on a legislative project under faculty supervision that involves: developing an advocacy and coalition building strategy, drafting bills, developing fact sheets and summaries for pending legislative in Springfield, visiting the state legislature to observe and participate in the process of policy advocacy regarding a child or family law issue.
Outcomes:
Develop skills necessary in policy advocacy: critiquing legislation, assessing a legislative problem, researching the problem, proposing solutions, and drafting materials and presenting information orally

Public Service Leadership (PSLD)

PSLD 400 Introduction to Public Service (3 Credit Hours)
Introduces students to organizational theories and practices useful to public service managers. Teaches students how to use structural, human resource, political and symbolic perspectives to rethink public service organizations. Provides an introduction to managerial issues including workforce diversity, decision making, and leadership; stresses critical thinking skills. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge of ethics, values, and skills for organizational leadership in human service and public service agencies; Knowledge of theory, organizational functions and structures, leadership styles, and value-driven leadership

PSLD 402 Foundations of Global Strategic Communication (3 Credit Hours)
Globalization challenges almost every aspect of communication from creating and delivering messages to spreading ideas that cross language, time, and cultural barriers. The course focuses on using strategies communication planning and management to guide communication activities in organizations. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge of critical communication skills and values; Understand the interplay between communication, technology, and culture

PSLD 403 Program Management and Development (3 Credit Hours)
There is an increasing demand for public service workers who can work with diverse communities through program management and development using strengths and empowerment perspectives and social and economic justice principles. This course builds on the ecological systems perspective that views program development as an arena for social change. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge and skills needed for planning new or adapting existing programs within the context of diverse communities; Develop skill set for program development and quality improvement

PSLD 404 Data, Visualization and Evaluation (3 Credit Hours)
Using Microsoft Excel, this course introduces students to the use of quantitative data in policy, public management, and non-profit decision making. Topics include causal inference, descriptive statistics, data visualization, probability, statistical inference, and regression analysis. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Hands-on knowledge and experience managing and analyzing data sets; Best practices for presenting data to diverse stakeholders

PSLD 405 Design Thinking in Mitigating Complex Social Problems (3 Credit Hours)
Design thinking is a way of working with user-centered innovation to address problems where not all knowledge is available at the outset, i.e. the problem itself is unknown (wicked problems). Design thinking rests on principles such as user involvement, problem framing, experimentation, visualization, and diversity. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Develop critical skills for management and innovation; Develop creative potential of individuals and enable them to deal with wicked problems

PSLD 420 Disaster Operations and Management (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
Introduction to emergency management theories and practices that are critical in the emergency management profession. Covers the phases of emergency management, human and political aspects, the importance of effective resource management, environmental concerns, and the threats and hazard identification and risk assessment process that is important to emergency management organizations. Introduces participants to issues related to managing personnel, including volunteers, workforce diversity, decision-making, leadership, and stresses critical thinking skills.
Outcomes:
Knowledge of theory, organizational functions and structures, phases of emergency management, resource management, ethics, politics, and threats and hazards; Develops ability to solve complex problems and engaged with a wide variety of organizations that support emergency management

PSLD 422 Disasters and Vulnerable Populations (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
Disasters create lasting impacts for communities large and small. This course introduces students to emergency management concepts that ensure the needs are being met for citizens with access and functional needs, those living in areas with high social vulnerability, and other vulnerable populations throughout the community. Teaches students to include vulnerable populations in all phases of emergency management and provides students with the opportunity to learn critical communication and problem-solving skills.
Outcomes:
Understand the make-up of the community being served, ensure plans, processes, and disaster response includes vulnerable populations within the community; Knowledge of tools and resources available to assist in preparedness activities to ensure they involve the community in its entirety

PSLD 423 Integrated Social-Medical Issues in Emergency Management (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA) Outcomes: Identify social and medical issues in EM practices; Apply the concepts of EM within a social-medical context; Describe EM social and medical organizations and structures and their relation to public service; Apply concepts of leadership to public service, EM, and other sectors
This course builds on existing leadership and public service knowledge with the application of emergency management principles under the shared perspectives of social-medical outlooks. It analyzes current trends and issues within emergency management through a social-medical paradigm and their impact on the public service models and leadership outcomes, including leadership challenges, ineffective communication and processes, and emergency response software, and their impact on medical and social infrastructure,

PSLD 430 Understanding and Mitigating Poverty (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
This course examines the nature, extent, and causes of poverty and inequality in the US while relying on literature from sociology, political science, economics, psychology and other disciplines. It analyzes the anti-poverty initiatives and policies launched over the past five decades and examines the role of culture, discrimination and classism as well as policy issues.
Outcomes:
Understand key issues regarding causes and consequences of poverty; Describe approaches to understanding and providing solutions to poverty; Explore the dynamics of commitment to social change and anti-poverty initiatives through grantmaking

PSLD 431 Foundations of Social and Sustainable Development (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
Addresses global design for economic and social development via the UN adoption of Sustainable Development Goals and targets. Examines policies and programs that aim to achieve inclusive, people-centered and sustainable development. Covers the basics of narrative policy analysis, measures and outcomes. Explores environmental, social, and economic concerns and their impact at local, national and global levels.
Outcomes:
Identify challenges in social and sustainable development especially in transition to renewable resource use in specific populations; Assess the complex overlap of current science, economics, and geopolitics underlying the overuse of resources, impact on population, and considerations of economic growth

PSLD 432 Gender Diversity & Sustainable Social Development (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
This course uses the UNWomen's approach to gender diversity and sustainable development to encompass the issues that hinder and those that contribute to the progress of women and gender diversity within sustainable development. The course reviews the environmental, social, and economic relevance and impact on gender. The specific topics will include, the intersectionality of gender and sustainability in the context of agriculture, forestry, water, health, investment and corporate social responsibility and each topic will highlight a specific region or nation. The course will provide an overview of the underlying intersectionalities of class, age, region within Asia, Latin America, and Africa.
Outcomes:
Describe sustainability and the significance of its interaction with gender; Critically review the history of global development agenda from a gendered perspective; Utilize interdisciplinary frameworks of gender inequity and sustainability; Assess variations in women's contributions to social development - historically, culturally, and politically; and Analyze women and gender within issues of Agriculture, Forestry, Water, Health and Investment in sustainable development

PSLD 433 Social Analysis Inequality Poverty and Development (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
This course will introduce students to some of these key concepts and debates to enable critical evaluation of how well sociological understandings of development inform the social analysis of exclusion, poverty and inequality, as well as what implications this might have for development policy especially when focusing on underserved communities.
Outcomes:
Describe the key concepts and debates surrounding poverty and inequality; Evaluate sociological understanding that inform the social analysis of exclusion; and Assess implications for policy regarding underserved communities

PSLD 441 Public Service Leadership Capstone Project Proposal (2 Credit Hours)
Pre-requisites: Last semester of the program and program director approval
Co-requisites: Summer 8wk session: elective course completed
The Public Service Leadership Capstone Project is an opportunity for students to integrate and synthesize the knowledge, values and skills developed in the program as they prepare for a career in public service leadership. The Capstone Project will showcase the student's skill as a leader in a chosen area of professional interest. From the perspective of a leadership role, students will design a public service project that is applicable to a real-world setting or population. Students' specific interests, backgrounds, previous coursework, and personal and professional goals will contribute to their further exploration of leadership. Selection and investigation of an area of interest will allow students to focus and deepen their understanding of the role(s) of leadership in that specific context. These may include such areas as social services, public administration, emergency management, healthcare, education. Projects may include case studies, program evaluations, policy analysis studies, organizational analyses, strategic plans.
Outcomes:
Apply knowledge gained throughout the MPS to a relevant public management, nonprofit management, or policy problem; Identify and define a topic /research question for the capstone project focusing on leadership roles; Practice leadership in planning a project in a chosen area of focus; Design a project that applies concepts and theories learned in the program

PSLD 442 Public Service Leadership Capstone Project Implementation (2 Credit Hours)
Pre-requisites: PSLD 441
Co-requisites: Summer 8wk session: elective course completed
The Public Service Leadership Capstone Project is an opportunity for students to integrate and synthesize the knowledge, values and skills developed in the program as they prepare for a career in public service leadership. The Capstone Project will showcase the student's skill as a leader in a chosen area of professional interest. The Capstone Project Implementation course allows students to apply many aspects of the program to a real-world setting and helps them prepare for a career in public service leadership. The capstone project will allow students practice leadership in executing a project of their design within a chosen professional setting. Students will showcase their skill as a leader through project presentation and reflection.
Outcomes:
Implement a project that applies concepts and theories learned in the program to a chosen area of focus; Practice leadership in executing the project; Present and reflect on leadership role

Foundations of Instructional Design Certificate

As of Fall 2026, this program is no longer accepting applicants.

The Foundations of Instructional Design (FIND) graduate professional certificate provides foundational knowledge and skills in instructional design for educational and organizational professionals seeking to enhance their current positions. This includes K-12 teachers and higher education faculty as well as organizational trainers. The certificate program is grounded in SCPS's well-established Master of Professional Studies (MPS) in Instructional Design program, which prepares students to become generalist instructional designers equipped to work in a variety of fields and professional settings.

Related Programs

Master's

- Instructional Design (MPS) (p. 1609)

Certificate

- Professional Certificate in Instructional Design (p. 1614)

Curriculum

The 12-credit hour certificate includes courses offered in 8-week sessions in a fully online format with evening synchronous meetings. Upon completing the certificate, students can apply for admission into the MPS in Instructional Design program, where their four graduate-level FIND certificate courses will count toward that graduate degree's requirements.

Certificate Requirements

Code	Title	Hours
CIEP 470	Principles of Instructional Design	3
INDN 420	Instructional Design Theories and Models	3
INDN 421	Design & Development of Instructional Materials	3
INDN 430	Performance Improvement in Organizations	3
or INDN 431	Fundamentals of Learning Analytics	
Total Hours		**12**

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
CIEP 470	Principles of Instructional Design	3
INDN 420	Instructional Design Theories and Models	3
	Hours	**6**
Spring		
INDN 421	Design & Development of Instructional Materials	3
INDN 430 or INDN 431	Performance Improvement in Organizations or Fundamentals of Learning Analytics	3
	Hours	**6**
	Total Hours	**12**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon successful completion of the MPS in Instructional Design candidates will be able to:

- Utilize instructional design processes and adapt appropriate theoretical approaches to a variety of professional settings (K-12 schools, corporate organizations, higher education institutions, etc.). while designing and creating effective and innovative learning experiences.
- Employ a variety of technologies and multimedia authoring tools to produce instructional materials.
- Apply culturally responsive and ethical practices while establishing collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) and building a network of industry colleagues.

Information Technology Leadership and Strategy (MPS)

This fully online and application-oriented master's degree will provide students with a professional background in Information Technology (IT) and technology related professions, including cybersecurity, software engineering, tech support, etc. to gain the leadership, strategic thinking, and critical thinking skills necessary for advancing in their career IT leadership tracks within small, midsize, and large organizations, with an emphasis on eventually reaching executive positions in the IT field.

The Information Technology Leadership and Strategy (MPS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Information Technology (MS) (p. 1179)
- Instructional Design (MPS) (p. 1609)
- Public Service Leadership (MPS) (p. 1617)

Curriculum

Thirty (30) credit hours are required to complete the degree.

Besides the traditional Master's program, the Information Technology Leadership and Strategy (MPS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours
Required Courses		
COMP 417	Social and Ethical Issues in Computing	3
COMP 477	IT Project Management	3
ITLS 445	Introduction to IT: Networking, Cloud & Security	3
ITLS 447	Cybersecurity Governance, Planning, and Incident Response	3
ITLS 449	Advanced Topics: Emerging Technologies	3
ITLS 451	Human-Centered Management	3
ITLS 453	Developing Strategic Plans	3
Select three (3) ITLS Electives courses - 400-level or above (p. 1607) [1]		9
Total Hours		**30**

[1] Electives will be selected from existing graduate courses (400 level or higher) at Loyola University Chicago. They will typically be chosen from SCPS (and may include courses in all graduate programs housed in SCPS) and the Computer Science Department. Electives will be determined in conjunction with the program director.

Electives

Code	Title	Hours
COMP 403	Operations Management	3
COMP 420	Software Systems Analysis	3
COMP 422	Software Development for Wireless and Mobile Devices	3
COMP 424	Client-Side Web Design	3

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon degree completion, graduates will be able to:

- Evaluate key policies, processes, and ethical decision making involved in the oversight of information technology within an organization in real world case studies.
- Apply project management principles to ensure successful implementation of core IT functions, such as network management, system administration, infrastructure integration, and mobile computing in coursework.
- Create business plans that incorporate IT strategies, employing creativity, innovation, and strategic thinking to identify opportunities, address challenges, build strong relationships, and drive organizational success.
- Analyze key performance indicators (KPIs) to measure the impact of IT management on organizational performance in written assignments and case studies.

Instructional Design (MPS)

As of Fall 2026, this program is no longer accepting applicants.

For educational enterprises as well as corporations, the need for those who can design effective and innovative learning experiences has never been greater, especially as online education and training becomes more prevalent in contemporary society.

A fully online and application-oriented degree, the Master of Professional Studies (MPS) in Instructional Design at Loyola University Chicago's School of Continuing and Professional Studies (SCPS) prepares students to become generalist instructional designers equipped to work in a variety of fields and professional settings.

The program offers students a sturdy foundation in instructional design as well as the tools and perspectives needed for flexible career paths and continuing professional development in the field. Rather than a focus on a narrower area of specialization within the field, our Instructional Design program provides a breadth of foundational knowledge and skills in different areas. As a result, you will be well positioned to work with technical specialists and subject matter experts and prepared to develop more specialized interests as you advance in your career.

Students who have earned their Foundations of Instructional Design Certificate (p. 1606) or Professional Certificate in Instructional Design (p. 1614) at SCPS can get a jumpstart on their MPS in Instructional

Design, too, as both certificates can be applied toward degree requirements.

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon successful completion of the MPS in Instructional Design candidates will be able to:

- Utilize instructional design processes and adapt appropriate theoretical approaches to a variety of professional settings (K-12 schools, corporate organizations, higher education institutions, etc). while designing and creating effective and innovative learning experiences.
- Employ a variety of technologies and multimedia authoring tools to produce instructional materials.
- Apply culturally responsive and ethical practices while establishing collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) and building a network of industry colleagues.
- Conduct research and predictive data set analysis to inform practice and stay abreast of emerging trends in the field of instructional design to make recommendations about instructional practices and performance gaps in an organization.

Paralegal Studies - Corporate Practice Certificate

The Corporate Practice Certificate is designed to prepare students to work in areas of law that are important in the transaction of business, such as corporate maintenance, due diligence, contracts, commercial transactions, and regulatory compliance.

Certificate applicants must hold a bachelor's degree from an accredited college or university and have a cumulative grade point average of 2.5 or higher on a 4.0 scale.

Note: Paralegals may not provide legal services directly to the public except as authorized by law.

Total Hours		**22**

Suggested Sequence of Courses

The Institute for Paralegal Studies provides a high-touch advising model in order to accommodate the professional experience and educational goals of each individual student. In order to provide students with maximum flexibility in their education, the Director will work directly with students to determine an appropriate sequence of courses starting at admission into their respective program based on their needs and career goals.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the certificate:

- Prepare summaries of court decisions, statutes, and administrative regulations.
- Develop legal arguments using court decisions, statutes, and administrative regulations.
- Locate relevant legal sources from federal and state jurisdictions.
- Apply paralegal and attorney code of ethics to situations typically encountered by paralegals.
- Demonstrate intermediate competence using typical office software including Word, Excel, Adobe and PowerPoint.
- Assist attorneys who work for corporate clients document the organization and operation of business entities.
- Retrieve information to conduct due diligence procedures for commercial and real estate transactions.
- Draft contract provisions and coordinate the administrative process for contracts.
- Help clients in regulated industries demonstrate compliance with government regulations.

Paralegal Studies - Customized Certificate

Students who wish to earn a customized certificate[1] may complete a specialized curriculum. This curriculum must be approved by the Director and will include courses in legal research, legal ethics, and technology skills.

Note: Paralegals may not provide legal services directly to the public except as authorized by law.

Related Programs

Certificate

- Paralegal Studies - Corporate Practice Certificate (p. 1610)
- Paralegal Studies - Litigation Practice Certificate (p. 1613)
- Paralegal Studies - Litigation and Corporate Practice Certificate (p. 1612)

[1] Certificate applicants must hold a bachelor's degree from an accredited college or university and have a cumulative grade point average of 2.5 or higher on a 4.0 scale.

- Demonstrate intermediate competence using typical office software including Word, Excel, Adobe and PowerPoint.
- Draft court pleadings and maintain case files and databases.
- Collect and organize information through investigation and the discovery process.
- Help prepare the case for trial, and often assist attorneys at trial by coordinating the case material.
- Assist attorneys who work for corporate clients document the organization and operation of business entities.
- Retrieve information to conduct due diligence procedures for commercial and real estate transactions.
- Draft contract provisions and coordinate the administrative process for contracts.
- Help clients in regulated industries demonstrate compliance with government regulations.

Paralegal Studies - Litigation Practice Certificate

Litigation Practice

The Litigation Practice Certificate[1] is designed to prepare students to work in civil litigation on the state and federal level. Special attention is given to strengthening legal technology skills. Electives offer students opportunities to explore different areas of law.

Note: Paralegals may not provide legal services directly to the public except as authorized by law.

Professional Certificate in Instructional Design

As of Fall 2026, this program is no longer accepting applicants.

The Professional Certificate in Instructional Design (PIND) graduate professional certificate provides a strong foundation in instructional design as well as the tools and perspective needed for flexible career paths and continuing professional development in the fast-evolving field. It prepares students to become generalist instructional designers equipped to work in a variety of industries and professional settings, including education and business environments.

Rather than focusing on a narrower area of specialization within the field, such as learning technologies, PIND delivers a breadth of foundational knowledge and skills in different areas. It prepares instructional designers to work with technical specialists as well as subject matter experts and also empowers them to develop more specialized interests as they grow in their profession.

Related Programs

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon successful completion of the MPS in Instructional Design candidates will be able to:

- Utilize instructional design processes and adapt appropriate theoretical approaches to a variety of professional settings (K-12 schools, corporate organizations, higher education institutions, etc). while designing and creating effective and innovative learning experiences.
- Employ a variety of technologies and multimedia authoring tools to produce instructional materials.
- Apply culturally responsive and ethical practices while establishing collaborative relationships with diverse stakeholders (e.g., administrators, faculty, students, technologists, project managers, public) and building a network of industry colleagues.
- Conduct research to inform practice and stay abreast of emerging trends in the field of instructional design to make recommendations about instructional practices in an organization.

Public Affairs and Management Certificate

As of Fall 2026, this program is no longer accepting applicants.

As a working professional, you may have a degree in your field but now realize you need additional skills to advance into an administrative or managerial position. The certificate program in public affairs and management can give you that background in only one year of work. The program helps you to develop a set of core skills needed in government

or nonprofit work, while providing some tailoring for your particular career needs.

Courses are offered in a mix of online and in-person formats. All in-person classes are taught at Loyola University's Water Tower Campus in the later afternoon or evening. Classes meet once a week for 2 and 1/2 hours for a 15-week semester.

Related Programs

Master's

- Public Policy (MPP) (p. 1615)
- Urban Affairs (MA) (p. 1619)

Combined

- Public Policy/Law (MPP/JD) (p. 1893)

Curriculum

To complete the Public Affairs and Management certificate, you will take 4 three-credit courses for a total of 12 credit hours. These requirements could be fulfilled in one year at full-time status of two classes per semester or two years at part-time status of one class per semester.

All courses are divided into two categories, as seen below. Students take at least one course from each category. This guarantees exposure to perspectives to understand the environment in which you work (political/organizational category) and exposure to new technical skills (skills category).

You will determine your course selection in consultation with an advisor from the MUAPP faculty to reflect your needs based on career stage and goals. Earlier career individuals may want to acquire more skills; mid-career individuals may focus more on the political and managerial environment.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the certificate, graduates will be able to:

- Develop additional technical skills in public policy and data analysis appropriate for the individual's career advancement. These could include: budgeting and finance, policy analysis and design, program evaluation, GIS, project management, or scenario planning.
- Understand the political factors that impact the environment of government agencies and nonprofit organizations.
- Identify relevant actors, their motivations, sources of power, and processes that lead to policy outcomes through the lens of various management theories.

Public Policy (MPP)

As of Fall 2026, this program is no longer accepting applicants.

Job growth, affordable housing, educational reform, environmental degradation—these are just a few of the significant challenges that face society today. The public policy program at Loyola can help students transform their interest in these types of problems into the ability to analyze and act upon them. The curriculum brings together knowledge about current government programs with the technical skills to assess how politics influence policy choices, how to design more effective programs, and how to evaluate the impacts of existing ones.

The Master of Public Policy (MPP) program at Loyola is a two-year professional degree focused on training students to assume leadership roles in government, non-profit organizations, or businesses. Part-time students typically finish in three years. Internships or capstone projects allow students to apply the skills developed in the program and gain work-related experience.

Related Programs

Master's

- Urban Affairs (MA) (p. 1619)

Combined

- Public Policy/Law (MPP/JD) (p. 1893)

Curriculum

The MPP degree program requires 37 credit-hours of coursework—11 three-credit courses, plus a three-credit internship or capstone experience, and a one-credit professional development course.

Required Coursework

Code	Title	Hours
Core Requirements		
MPP 400	Policy Design and Analysis	3
MPP 401	Analytical Tools in Public Policy	3
MPP 403	Public Budget and Finance	3
MPP 404	Public Policy Process	3

or MPP 503	Public Policy Practicum	
Electives (p. 1616)		
Select four from list of Electives		12
Total Hours		**37**

Electives

Students are required to take 12 hours of electives. Electives can be drawn from many departments across the university, including criminal justice, education, environmental studies, political science, public health, psychology, sociology and social work. These electives are where students can focus on their preferred field of policy. The following are some examples of optional courses:

Code	Title	Hours
Environment		
ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 412	Water Law & Policy	3
Public Health		
MPBH 400	Determinants of Population Health	3
MPBH 407	Public Health Policy: Concepts and Practice	3
Criminal Justice		
CJC 401	Politics and Policies in the Criminal Justice System	3
CJC 402	Theories of Criminal Behavior	3
Economic and Community Development		
MPP 407	Local Economic Development	3
MPP 414	Affordable Housing Finance and Policy	3
Education		
ELPS 405	Introduction to Educational Policy Analysis	3
ELPS 412		3
Immigration		
SOWK 730	Immigration Dynamics and U.S. Social Policy	3
SOWK 732	Migration, Social Justice, and Human Rights	3

Internship or Capstone Experience

For students without significant professional work experience prior to starting the program, an internship is required. Most students complete their internships in the summer between their first and second years. For students with professional work experience, a capstone project or policy clinic resulting in a major analytical report could be done instead.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MPP program, graduates will be able to:

- Design policy interventions and apply criteria to assess the best option in each specific case
- Understand a government budget and evaluate it from different stakeholder positions

- Understand the political process at the federal, state and local government levels
- Develop political messaging to advocate for policies and to build a political coalition of support for a program
- Apply appropriate statistical procedures used in public policy research and practice
- Design, conduct and critique program evaluations
- Experience working in the public policy arena in government agency, non-profit, research, or private sector organization

Public Service Leadership (MPS)

The program broadens the concept of public service, with a specific emphasis on leadership within governmental, non-profit, and human service organizations. Through assignments, exercises, and engaging discussions with fellow students and expert faculty, you will reflect critically on your "reason for being" and discern your unique gifts to put into service for others. This introspection, paired with practical skill-building, helps students achieve their personal and professional goals while addressing critical societal needs.

The program is problem- and solution-focused, emphasizing leadership roles across overlapping health and social sectors. It offers students adaptable values and skills suited to a wide variety of organizations, including public-private partnerships. By navigating the challenges of the modern world, students emerge as thoughtful, justice-oriented leaders prepared to tackle societal challenges.

The Public Service Leadership (MPS) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Public Policy (MPP) (p. 1615)
- Social Work (MSW) (p. 1831)

Curriculum

The MPS in Public Service Leadership comprises of 31 credit hours, 11 courses. Courses are offered in an 8-week session format with online, evening options.

Besides the traditional Master's program, the Public Service Leadership (MPS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given

explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon your successful completion of the MPS in Public Service Leadership program, you will have proven your ability to:

- Describe components and levels of leadership across public sectors
- Apply ethical reasoning to administrative design and decision-making in the current realm of public service leadership
- Analyze how systems of power, privilege, and oppression (e.g., racism, sexism, heterosexism, ableism) operate to create and maintain inequality as well as how resistance to these systems is enacted.
- Describe the experiences of underrepresented, marginalized, or oppressed communities within various contexts, including inequality in outcomes and resistance to systems of oppression.
- Collect and apply data in problem identification and problem solving
- Differentiate between non-crisis leadership and leadership in emergencies among public, social and economic sectors
- Apply fundamentals of communication appropriate to situation in both local and global situations.

Urban Affairs (MA)

As of Fall 2026, this program is no longer accepting applicants.

The Master of Arts (MA) in Urban Affairs is an interdisciplinary degree program focusing on how cities work and the challenges they face, such as economic growth or decline, globalization and immigration, and the impact of the housing market on neighborhood stability. The curriculum brings together viewpoints and analytical tools from multiple fields to provide different perspectives on the causes of urban problems and their possible solutions.

The Urban Affairs program at Loyola is a professional degree focused on training students to assume technical or leadership roles in government, nonprofit organizations, or business. Students develop skills in coursework and gain work-related experience through internships or capstone policy clinics.

Related Programs

Master's

- Public Policy (MPP) (p. 1615)

Certificate

- Public Affairs and Management Certificate (p. 1614)

Combined

- Public Policy/Law (MPP/JD) (p. 1893)

Curriculum

The MA in Urban Affairs requires 31 hours of coursework—10 three-credit courses, plus a one-credit Professional Development course where students attend a series of meetings covering critical professional skills such as resume and cover letter writing, informational interviews, self-assessments, and networking. Students also complete a required 3 credit hour internship or capstone policy clinic. Students can complete the program in 18-24 months.

Code	Title	Hours
Foundational Courses: Disciplinary Perspectives on Urban Areas		
Political Environment		
MPP 412	Urban Politics and Policy	3
or MPP 413	Intergovernmental Relations	
Sociology of Cities		
Select one of the following:		3
SOCL 461	Race & Ethnicity	
SOCL 462	The Urban Metropolis	
SOWK 502	Power, Oppression, Privilege, and Social Justice	
Analytical Tools		
MPP 403	Public Budget and Finance	3
MPP 405	Statistical Methods & Analysis for Public Policy I	3
Select one of the following: [1]		3
MPP 400	Policy Design and Analysis	
MPP 401	Analytical Tools in Public Policy	
MPP 406	Statistical Methods & Analysis Public Policy II	
MPP 500	Public Policy Evaluation	
ENVS 480	Introduction to Geographic Information Systems	
Professional Development and Internship		
MPP 501	Public Policy Internship	3
or MPP 503	Public Policy Practicum	
MPP 502	Professional Development Skills	1
Electives		
Electives (p. 1619) (12)		12
Total Hours		**31**

[1] In consultation with their advisor, students select at least one additional course that provides a foundation for their specific career goals.

Electives

Students are encouraged to select related courses in consultation with their advisor to develop expertise in a specific urban affairs area (e.g.

community development or education policy). Below is a list of common Elective courses.

Code	Title	Hours
Criminal Justice		
CJC 401	Politics and Policies in the Criminal Justice System	3
CJC 402	Theories of Criminal Behavior	3
Economic and Community Development		
MPP 407	Local Economic Development	3
MPP 414	Affordable Housing Finance and Policy	3
Education		
ELPS 410	Sociology of Education	3
ELPS 412		3
Environment		
ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 411	Natural Resources and Land Use Law & Policy	3
Immigration		
SOWK 730	Immigration Dynamics and U.S. Social Policy	3
SOWK 732	Migration, Social Justice, and Human Rights	3
Public Health		
MPBH 400	Determinants of Population Health	3
MPBH 407	Public Health Policy: Concepts and Practice	3

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
MPP 405	Statistical Methods & Analysis for Public Policy I	3
MPP 412	Urban Politics and Policy	3
MPP 502	Professional Development Skills	1
Select one from list of Electives		3
	Hours	**10**
Spring		
MPP 403	Public Budget and Finance	3
MPP 413	Intergovernmental Relations	3
Select one from the list of Electives		3
	Hours	**9**
Year 2		
Fall		
MPP 501	Public Policy Internship	3
SOWK 502	Power, Oppression, Privilege, and Social Justice	3
Select two from list of Electives		6
	Hours	**12**
	Total Hours	**31**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Master's degree, graduates will be able to:

- Draw on a variety of disciplinary perspectives, such as politics, economics, sociology, and history, to understand the complexity of urban issues.
- Identify sources of urban power and their impact on city conditions, on potential systematic biases, and how likely these biases could be overcome.
- Analyze a city budget and evaluate it from different stakeholder positions.
- Analyze urban issues using multiple technical approaches: statistical techniques; fiscal analysis; needs assessments, community impact studies, and program evaluations.
- Experience working in the public policy arena in a government agency, non-profit, research, or private sector organization.

School of Education

Mission and Vision

Our Vision

At the School of Education of Loyola University Chicago, future education leaders will have a transformational experience, one that prepares them to address social inequalities in both their local and global communities through the power of education and research.

Our Mission

The School of Education at Loyola University Chicago, a Jesuit Catholic urban university, supports the Jesuit ideal of knowledge in the service of humanity. We endeavor to advance equity in education in service of social justice, engaged with Chicago, the nation, and the world. In pursuit of our vision, the School of Education participates in the discovery, development, demonstration, and dissemination of professional knowledge and practice within a context of ethics, service to others, and social justice.

Our mission is social justice, but our responsibility is social action through education and research. We fulfill our responsibility by preparing professionals to serve as teachers, administrators, counselors, psychologists, and policymakers who work across the human developmental continuum, and by conducting research on issues of professional practice in schools, families, and communities. In our immersive learning environment, students gain both second-to-none foundational knowledge and a strategic system-wide vision working alongside some of the top scholars and teachers in the nation. Through our rigorous curriculum, students learn to be comfortable with the uncomfortable, supported by our passionate and dedicated faculty, staff, and administrators. And they leave with lasting relationships with each other and an extensive alumni network of leaders in education across Illinois, the U.S., and the world.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Counseling Psychology (CPSY)

CPSY 420 Counseling Skills (3 Credit Hours)
This course provides an introduction to counseling skills as they apply to the helping professions.
Outcomes:
Students will be able to demonstrate clinical attending, observing, and responding behaviors in one-to-one counseling interviews

CPSY 421 Professional Issues Counseling (3 Credit Hours)
The course will provide students with an overview of the current ethical, legal, and professional issues in the practice of counseling. The course will use American Counseling Association's Codes of Ethics and Standards of Practice as a foundation for examining ethical decision making.
Outcomes:
Students will demonstrate knowledge about the ethical standards of the counseling profession and will develop the ability to apply the knowledge base of their discipline in an ethical and reflective manner

CPSY 423 Theory Counseling and Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Course equivalencies: X - CPSY 323 / 423
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 424 Career Development and Counseling (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Course equivalencies: X - CPSY 324 / 424
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed; major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 425 Assessment in Counseling (3 Credit Hours)
This course provides an introduction to the basic principles involved in using tests, inventories, observational procedures, and other forms of assessment in counseling.
Outcomes:
Students will be able to demonstrate an understanding of the conceptual underpinnings of reliability, validity, and the use of norms and score transformations and how these apply to the professional and ethical use of assessment information in counseling

CPSY 426 Group Counseling: Theory and Practice (3 Credit Hours)
Pre-requisites: CPSY 423
This course provides an overview of prevailing group counseling models and theories and their application to conducting group counseling in various settings.
Outcomes:
Students will be able to understand and integrate various properties of groups into a meaningful theoretical framework, and develop and demonstrate an understanding of group process through participation in a group experience

CPSY 427 Clinical Mental Health Counseling (3 Credit Hours)
The first purpose is to conduct an in-depth examination of Community Counseling as a helping profession. Specifically, we will examine (a) historical, philosophical, and social/political influences on contemporary community counseling practices, (b) professional organizations to which community counselors belong, the settings in which they practice, and the roles of community counselors in those settings, (c) credentialing and licensing for community counseling practice, and (d) knowledge bases critical to community counseling. The second purpose is to provide students with an opportunity to develop their skills at presenting to professional audiences. Thus, students will have an opportunity to develop in-depth knowledge on a substantive topic relevant to the work of community counselors and present their findings to the class.
Outcomes:
Students will know the history of the counseling profession and current issues involved in the professional practice of counseling

CPSY 428 Foundations of Professional School Counseling (3 Credit Hours)
This course is designed to introduce students to the philosophy of a comprehensive, developmental K-12 school-counseling program and to the national standards for school counseling. The emphasis will be on school counselors' roles and functions as defined by the American School Counselor Association.
Outcomes:
Participants in this course will be able to develop and implement a school counseling program according to the American School Counselors Association's National Standards and the Illinois Developmental Counseling Model

CPSY 431 Advanced School Counseling & Consultation (3 Credit Hours)
Pre-requisites: CPSY 428 Intro to School Counseling
This course introduces the attitudes, concepts, and skills of indirect service delivery through consultation. This course is designed to produce consultation and organizational development skills that will facilitate effective professional school counseling practice. Reflection on the practice of consultation is also developed, as well as competencies for practice within a multiculturally diverse society.
Outcomes:
Students will understanding of the school culture and organizational and contextual factors to the consultation/intervention process and understand the consultative process

CPSY 433 Multicultural Counseling (3 Credit Hours)
The course provides an overview of the experiences of various cultural groups with the United States, concerning issues of oppression, identity development, and acculturation, for instance. The course aims to develop multicultural competence by increasing students' awareness, knowledge, and skill base.
Course equivalencies: X - CPSY 332 / 433
Outcomes:
Students will increase their awareness of their own cultural background, biases, and world view; Students will increase their knowledge of the world view of culturally diverse clients; Students will begin to develop appropriate interventions strategies to work effectively with diverse populations

CPSY 435 Selected Topics in Counseling (3 Credit Hours)
This is an advanced seminar on selected topics in counseling. Topics vary, but typically have included the following: school counseling, community counseling, psychology of oppression, prevention and outreach, and supervision.
Outcomes:
Outcomes vary with topic

CPSY 437 Addiction Counseling (3 Credit Hours)
This course is designed to provide an introduction to the fundamentals of addiction counseling. This course will supply students with the requisite knowledge relevant in this area.
Outcomes:
Students will demonstrate knowledge of the etiology and diagnosis of substance abuse problems and their treatment from major theoretical perspectives

CPSY 440 Practicum (3 Credit Hours)
Pre-requisites: Consent of Instructor
This course is a supervised experience in counseling taken for two semesters by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the ACA ethical standards of conduct, and participate in other professional roles required in their field placement

CPSY 441 Internship (3 Credit Hours)
This course is a supervised experience in counseling taken in a two semester sequence with CPSY 440 by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, and understand the APA code of ethics

CPSY 442 Doctoral Practicum (3 Credit Hours)
Pre-requisites: CPSY 441 and consent of instructor
This is an advanced doctoral-level supervised experience for counseling psychology students and is a continuation of CPSY 441.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the APA code of ethics, and participate in other professional roles related to the doctoral-level practice of counseling psychology

CPSY 443 Clerkship (1 Credit Hour)
Pre-requisites: CPSY 441 and 442
This is an elective supervised clinical experience in assessment or psychotherapy for doctoral students in counseling psychology. A field placement is required and all supervision is provided on site by a qualified supervisor employed by the agency in which the field work is taking place.
Outcomes:
Varies with goals of student and agreement with field site

CPSY 444 Family Therapy I (3 Credit Hours)
This course is designed to introduce students to foundational approaches and theories of family therapy.
Outcomes:
Students will be able to apply foundational theories and their corresponding interventions to clinical problems in a family context

CPSY 445 Family Therapy II (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 446 Marital/Couples Therapy (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 450 Research Methods in Counseling Psychology (3 Credit Hours)
The course is structured so that major quantitative research methods can be grasped by the student so that they can critically read and evaluate the professional literature and design their own study. The primary goal is for students to understand the fundamental ideas (i.e., big pictures of research methods) involved in each analytic tool and to be able to choose appropriate analyses for their research question. Added training/exercises might be needed for students to be able to apply analytic tools in a technically appropriate manner (i.e., technical procedures of research methods) but the focus of this course is to help students develop a strategic sense of research methods, based on which students can absorb detailed tactical procedures of research methods later.

CPSY 454 Human Development: Cognitive, Aff & Phys Bases (3 Credit Hours)
Restricted to Graduate Students. This course is a graduate-level survey of human development across the lifespan.
Course equivalencies: CPSY 454/454
Outcomes:
To build the students' foundational knowledge of lifespan developmental theories and research and to critically examine the extent to which cultural variation is included and/or excluded from developmental theories

CPSY 458 Adolescent Development and Counseling (3 Credit Hours)
Pre-requisites: CPSY 454
This course provides in-depth study of psychological theories and research relevant to adolescent development.
Outcomes:
Students will be able to apply relevant theories to promote well-being and academic success in adolescents and prevent psychological and academic problems

CPSY 461 Neuropsychology (3 Credit Hours)
This course is a survey of neuroanatomy and brain-behavior relationships.
Outcomes:
Students will be able to demonstrate knowledge of neuroanatomy and brain-behavior relationships

CPSY 482 Personality and Intellectual Assessment (3 Credit Hours)
This is a course in which students acquire basic proficiency in the administration and interpretation of objective and projective personality tests.
Course equivalencies: X-CIEP482/CPSY482
Outcomes:
Students will demonstrate skills with the administration, interpretation, and presentation of personality assessment results

CPSY 498 Independent Study (1-3 Credit Hours)
Topics chosen for individual study. Must be approved by an instructor and department chairperson.

CPSY 499 Independent Research (1-3 Credit Hours)
Research projects selected by the individual student, with the approval of the research supervisor and the department chairperson.
Outcomes:
Outcomes are chosen between the instructor and the student during the semester the student takes the course

CPSY 527 Prevention, Advocacy, and Outreach: Community-Based (3 Credit Hours)
This course will introduce students to the fundamentals of prevention, advocacy, and outreach work, components of a community counseling model. The course will integrate theory, practice, and evaluation research in its methods and will involve designing and implementing an actual community-based intervention program. A critical component of this course will be learning about the nuances of developing relationships with community systems.
Outcomes:
Students will be able to think critically about the conceptual and theoretical philosophies that underlie prevention practice and will be able to develop preventative interventions for use in school and community contexts

CPSY 528 Clinical Appraisal and Treatment Planning (3 Credit Hours)
This course focuses on developing intake interviewing skills, writing intake reports, conducting diagnoses, and developing treatment plans. Interviewing styles including social history interviews, mental status examinations, and behavioral interviews are explored.
Outcomes:
Students will be able to demonstrate the ability to collect useful information from clients through diagnostic interviews and mental status examinations, assign diagnoses, write treatment plans, and formulate treatment recommendations

CPSY 529 Psychology of Immigration (3 Credit Hours)
This course will cover such topics as the current status of U.S. immigrants, major theories and literature on immigration and acculturation, ethnic identity, social relationship issues, language issues, immigrant family issues, migratory loss, general and special topics for Latino/a immigrants, general and special topics for Asian immigrants, and special populations.
Outcomes:
1) develop skills, competencies, and points of view; 2) learn to analyze and critically evaluate ideas, arguments, and points of view; 3) acquire an interest in learning more by seeking answers

CPSY 530 Research Seminar in Counseling Psychology (3 Credit Hours)
Pre-requisites: consent of instructor
This doctoral seminar provides in depth coverage of important methodological issues involved in conducting research in counseling psychology and provides the student to develop a research proposal.
Outcomes:
Students will be able to demonstrate knowledge of methodological issues involved in conducting research in counseling psychology, including understanding and controlling threats to validity, understanding the limits of null hypothesis significance testing and the importance of effect size estimates to the interpretation of the results of individual experiments and to the accumulation of evidence across experiments; Students will also demonstrate the ability to translate a research interest into a researchable question and design a study to address the question

CPSY 531 Ethical and Legal Issues in Counseling Psychology (3 Credit Hours)
The course uses the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct as a framework, to examine representative ethical, professional and legal issues commonly encountered in the exercise of our professional responsibilities as clinicians, teachers, supervisors, and researchers.
Outcomes:
Students will be able to demonstrate knowledge about the contemporary ethical, professional and legal issues relevant to the practice of professional psychology and will be able think critically about ethical dilemmas to make ethical decisions,

CPSY 532 Advanced Theories in Psychotherapy (3 Credit Hours)
This is an advanced course in reading, understanding, and applying theories of counseling and psychotherapy. It was designed to stimulate multiple aspects of learning experiences: introduction to contemporary theories, review of empirical evidence, session role-play, and development of theoretical orientation. Through the course, students are expected to synthesize theoretical, empirical, practical, and personal information about change to further formulate their theoretical orientation. Therefore, this course has two learning goals, including: (1) gaining knowledge of counseling theories, and (2) learning to apply knowledge and experiences to formulate personal theoretical orientation.

CPSY 533 Proseminar (0 Credit Hours)
CIEP 533 is a seminar class intended to provide supervision to first year School Psychology students enrolled in CIEP 477 for the Fall term. CIEP 533 focuses on the completion of a long-term academic case study and intervention within a 5-step problem solving framework. The case study requires candidates, working in teams, to complete all steps of a problem-solving process: Problem Identification; Problem Analysis; Plan Development; Plan Implementation and Monitoring; and Plan Evaluation. Candidates will collect individual student academic data, determine the nature and magnitude of a student's academic difficulty using appropriate comparison standards, develop an intervention plan, implement the plan, collect progress-monitoring and implementation fidelity data, evaluate the outcome of the intervention, and share the outcomes in written and oral formats.

CPSY 535 Seminar in Supervision & Consultation (3 Credit Hours)
Pre-requisites: permission of instructor
This seminar exposes students to theory and research on clinical supervision relevant to training mental health professionals.
Outcomes:
Students will be able to apply theoretical and research knowledge to conceptualize the development of clinicians-in-training and generate interventions to promote their growth

CPSY 536 Supervision Practicum (3 Credit Hours)
This course is an advanced graduate-level course in supervision practicum. You will be asked to apply your knowledge of supervision process, theory, and counselor development to your supervision of entry-level counseling professionals in a practicum setting.
Outcomes:
Students will demonstrate clinical supervisory skills based on appropriate theory and the ability to conceptualize counselor trainee development

CPSY 595 Thesis Supervision (1 Credit Hour)
To be registered for while working on an approved thesis project.

CPSY 600 Dissertation Supervision (1 Credit Hour)
To be registered for while working on an approved dissertation project.

CPSY 605 Master's Study (1 Credit Hour)
To be registered for while preparing a thesis proposal.

CPSY 610 Doctoral Study (1 Credit Hour)
This course can only be taken two times during a doctoral student's career while preparing a dissertation proposal. Restrict enrollment to CPSY PhD students and allow students to complete twice in a career.

CPSY 615 Internship: Counseling Psychology (1 Credit Hour)
Please consult the Counseling Psychology Graduate Program Handbook for the complete description of the internship.

CPSY 620 Dissertation Research (3 Credit Hours)
The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation or capstone research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421) or RMTD 406, CIEP 448, and RMTD 400 and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods. Students are well positioned to complete culminating project for doctoral candidacy upon completion of this course.

Curriculum, Instruction & Educational Psychology (CIEP)

CIEP 401 The Exceptional Child (3 Credit Hours)
This course is designed to provide a psychological and educational examination of exceptionality as related to school- age children and youth.
Outcomes:
Students will articulate defining characteristics of a range of disabilities as well as knowledge of a range of educational modifications made for students with special needs

CIEP 409 Evidence Based Interventions (3 Credit Hours)
This course is designed to provide students with an introduction to evidence-based interventions used in school psychological service delivery. Course content includes definitions of evidence-based interventions, process for identifying evidence-based interventions in school psychology, and a review of well-established evidence-based academic and behavioral interventions used in school based settings. Restricted to EDS students.
Outcomes:
Upon completion of the course, students will be able to: Define "evidence-based intervention" and differentiate this concept from similar concepts (eg, empirically-supported intervention, evidence-based practice, etc); Identify organizational websites that collect, evaluate, and disseminate evidence-based academic and behavioral interventions for children and adolescents that can be used in school-based settings (eg, What Works Clearinghouse, Doing What Works, Johns Hopkins Best Evidence Encyclopedia, and SAMHSA's National Registry of Evidence-Based Programs and Policies); Interpret the foundational criteria that are used to evaluate the quality of research to determine the strength of an intervention's evidence; Identify several well-established academic and behavioral evidence-based interventions for children and adolescents in school-based settings; Understand the strengths and limitations of developing and implementing evidence- based interventions with minority populations

CIEP 410 Legal Issues - Educating Exceptional Children (3 Credit Hours)
Legal issues relevant to the education of persons with disabilities are examined.
Outcomes:
Students will demonstrate and understanding of legal issues that pertain to students with disabilities as well as other relevant case law in education

CIEP 412 Special Topics in Special Education (3 Credit Hours)
Seminar in Special Topics in Special Education. Topics will vary from term to term.

CIEP 413 Psychopathology & School Mental Health (3 Credit Hours)
Enrollment is limited to Graduate Students in the School Psychology Program The purpose of this course is to develop a working knowledge of childhood/adolescent psychopathology from multiple theoretical perspectives. The interactions of individuals, families, communities, schools and mental health providers in either etiology and/or treatment planning will be considered.
Outcomes:
Students will gain knowledge of child/adolescent psychopathology in terms of diagnosis, prevention and intervention

CIEP 414 Instructional Methods-Diverse Population (3 Credit Hours)
This course provides an analysis of and experimentation with various instructional strategies. Students learn how to develop strategies that are appropriate for their content area(s) and meet the needs of diverse learners.
Outcomes:
Students will design curriculum, practice instructional strategies, develop assessment tools, and examine school and community relationships for diverse settings

CIEP 415 Models of Instruction (3 Credit Hours)
This graduate course provides an analysis of and experimentation with various instructional strategies. Students learn how to develop strategies that are appropriate for their content area(s) and meet the needs of diverse learners.
Outcomes:
Students will design curriculum, practice instructional strategies, develop assessment tools, and examine school and community relationships for diverse settings

CIEP 416 SPED Administrator: Assessment of Atypical Child (3 Credit Hours)
This course is an introductory course in assessment principles and practices. It is designed to provide students obtaining certification as an administrator the foundation to understand the proper uses of assessment and data. Students will acquire a broad introduction to the topic of assessment. The introduction covers the knowledge of assessment principles and practices. This course will provide students the foundation to understand and discern the proper uses of assessment and data to make individual decisions and broad organizational decisions.

CIEP 417 Scientifically Based Research (3 Credit Hours)
No course description is available

CIEP 420 Multivariate Aspects of Research (3 Credit Hours)
No course description is available

CIEP 423 Advanced Literacy Instruction in the Content Area (3 Credit Hours)
This course focuses on the theoretical foundations of content instruction in the context of reading and writing to learn in the content areas. Current research on reading, writing, and thinking as well as topical issues related to teaching practices and state and professional guidelines and standards will be examined.
Outcomes:
Students will develop a knowledge base of current reading/writing/thinking theories which can be applied to the teaching of content areas in either elementary or secondary classrooms

CIEP 425 Theory and Practice in Assessment (3 Credit Hours)
This course addresses the purposes, methods, creation, and uses of assessments in a variety of learning contexts (e.g., classrooms, informal learning settings, workplace settings). The course will examine multiple assessment practices (e.g., testing, performance based, self-assessment, work based assessment). The course will also provide an introduction to the psychometrics of assessment.
Outcomes:
Candidates will be able to describe and explain the purposes, theories, and components of various assessment practices; Develop a variety of assessment practices to evaluate learning outcomes across different learning contexts; describe and explain the foundational aspects of psychometrics as it relates to assessment

CIEP 431 Three Tier Prevention: Advanced Primary Supports (3 Credit Hours)
This course focuses on universal preventions, which serve as the first tier of three levels of intervention.
Outcomes:
Candidates will learn skills to assist them in (a) identifying and assessing problem behaviors; (b) designing and implementing behavior interventions; (c) designing learning environments that prevent and remediate problem behaviors, and (d) involving key stakeholders to develop agreed upon expectations and strategies to facilitate success for all students

CIEP 432 Three Tier Prevention: Secondary and Tertiary Supports (3 Credit Hours)
This course will focus on the use of secondary and tertiary supports/interventions to enhance the capacity of schools, families, and communities to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will learn skills to assist them in designing and implementing evidenced-based behavior interventions to targeted groups or individuals that improve lifestyle results (personal, health, social, family, work, recreation) for all children and youth by making problem behavior less effective, efficient, and relevant, and desired behavior more functional

CIEP 433 Self-Determination: Self-Management and Transition Planning (3 Credit Hours)
This course will focus on increasing student self-determination through the use of behavioral principles to understand and address problems in self-management. In addition, the course will introduce current perspectives on self-determination and quality of life issues as they relate to individuals transitioning through the life-span.
Outcomes:
Candidates will learn how to apply behavioral principles to develop and implement an individual self-management plan to reach a particular short-term goal

CIEP 434 Practicum I: Consultation and Collaboration-School Personnel (3 Credit Hours)
This course will provide candidates with the opportunity to practice the use of primary supports/interventions to enhance the capacity of schools to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will demonstrate leadership when planning and implementing primary preventions strategies at the school-wide level across all students and will involve appropriate key stakeholders (school personnel, students, families, community members) to develop agreed upon school-wide expectations and strategies to facilitate success for all students

CIEP 435 Practicum II: Consultation and Collaboration-Family and Community (3 Credit Hours)
This course will provide candidates with the opportunity to practice the use of secondary and tertiary supports/interventions to enhance the capacity of schools, families, and communities to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will demonstrate leadership by providing guidance and modeling to school personnel, family, and community member in the use of behavior interventions to improve the quality of life for all children

CIEP 440 Critical Investigations in the Field of Curriculum (3 Credit Hours)
This course critically examines the foundations of curriculum from a critical lens on the field of curriculum. Students study controversial curriculum issues across schools and communities drawing from curriculum theory and policy in lived and specific historical contexts. It starts with the discussion of the history of the field, multiple definitions of curriculum, paradigms, and philosophies and then moves on to wonder about the prospects for the future. Students examine a broad range of historical documents and theoretical essays as they consider essential curriculum questions both in schools and communities.
Outcomes:
This course will educate students in historical and philosophical curriculum inquiry across schools and communities; Students explore curriculum issues in real and particular historical, philosophical contexts and apply them to contemporary curriculum discourses

CIEP 442 Culturally Sustainable Curriculum Development & Implementation (3 Credit Hours)
This course provides the basis for curriculum development and implementation in schools or other professional learning settings. Students will learn theories and practices of developing curriculum based on culturally responsive and sustainable frameworks and practice how to apply these principles in curriculum development. Students will design and implement social justice-oriented curriculum for schools and/or professional settings.
Outcomes:
Students will understand key curriculum development frameworks that integrate culturally sustainable pedagogy

CIEP 444 Social Justice, Service, Quality (3 Credit Hours)
No course description is available

CIEP 447 Technology-Enhanced Instruction: AI Integration in Education (3 Credit Hours)
The course critically examines the evolving role of technology, especially artificial intelligence (AI), in educational settings. Students will engage with theories and models of technology integration and explore how AI is used responsibly in education. They will develop strategies to integrate AI into education and address related complex challenges through critical perspectives. The course promotes a human-centered, ethical, and responsible approach to AI implementation. Students will become leaders in the ethical use of AI in education and participate meaningfully in an AI-saturated society.
Course equivalencies: CIEP492/CIEP447
Outcomes:
Explain the history and impact of technology on education; Apply theories and models of technology integration in education; Integrate AI into education in a human-centered, critical, ethical, and responsible way; Use AI ethically to enhance learning outcomes and manage its challenges; Redesign curriculum and assessments to support the ethical use of AI; Develop guidelines and instructional programs to foster critical AI literacy

CIEP 450 Educational Psychology (3 Credit Hours)
The psychological bases of educational theories and practices related to human learning, development and psychological research are studied and critically examined.
Outcomes:
Students will demonstrate knowledge of leading learning theories, human development and assessment of learning as it pertains to evidence-based instruction and practice

CIEP 451 Psychology of Learning (3 Credit Hours)
The dual study of theory and research in human learning is presented, with an emphasis on behavioral and cognitive science models, as well as memory and retrieval systems.
Outcomes:
Students will demonstrate knowledge of validated learning theories in the behavioral and cognitive science domains

CIEP 455 Advanced Curriculum & Teaching in the Middle School (3 Credit Hours)
This graduate level course examines middle school (MS) education (grades 6-8), emphasizing the need to respond in appropriate educational ways to the developmental characteristics of diverse young adolescents (ages 10-14).
Course equivalencies: X - CIEP 351 / CIEP 455
Outcomes:
Effective middle school teacher candidates understand the needs of their students and attend to the development of the whole child, including social and emotional learning; Effective middle school teacher candidates will understand the importance of culturally sustaining teaching; Candidates understand middle school philosophy outlines key components of culture, community, and curriculum that are needed in effective middle schools teaching; Candidates understand effective instruction for middle school students is responsive to their developmental needs and growing cognitive abilities

CIEP 457 Implementation Strategies, Planning, and Practices (3 Credit Hours)
Implementing innovations in schools, community and business organizations requires individuals to possess the knowledge and skills to work successfully as change agents. This course is a study of the science, theories, models and strategies that can be used across organizational settings to facilitate the implementation of innovative practices.
Outcomes:
Students will be able to utilize theories, models and strategies to facilitate the planning and implementation of innovations within organizational settings

CIEP 461 Practicum in School Psychology I (3 Credit Hours)
This pre-internship, field-based course deals with supervised experience in assessments, interventions, counseling, and consultation.
Outcomes:
Students will demonstrate initial proficiency in individualized behavioral, academic, learning assessments, interventions, counseling and consultation under supervision

CIEP 462 Ethics and Professional School Psychology (3 Credit Hours)
Enrollment is limited to Graduate Students in the School Psychology program. The course focuses on the professional, legal, and societal context in which school psychology practice takes place and the major functions and competencies of school psychologists.
Outcomes:
The expected outcomes of the course are an enhanced understanding of the roles and functions of school psychologists and models of service delivery

CIEP 463 Practicum Schl Psychology II (3 Credit Hours)
This pre-internship, field-based course deals with supervised experience in assessments, interventions, counseling, and consultation.
Outcomes:
Students will demonstrate initial proficiency in individualized behavioral, academic, learning assessments, interventions, counseling and consultation under supervision

CIEP 466 School Psychology Special Topics (3 Credit Hours)
This course is designed to provide students with the information on constructing a school-based, action-research project that addresses a problem of practice within a school system. Students will learn the fundamentals of defining a problem of practice in a school setting, developing a robust literature review, designing an evidence-based implementation plan to address the problem of practice, and designing data organization tools to evaluate the implementation plan. While much of the information provided can be used to develop any kind of action research or systems change project, there will be a focus on developing the Capstone Project. Through this course you will learn skills to address problems in schools and districts, as well as address the requirements for the Capstone. Students will receive primary assistance on their own Capstone Project with their project chair.

CIEP 469 Issues that Shape Teaching and Learning in Urban Schools and Communities (3 Credit Hours)
This course examines the social, economic, political, cultural and historical factors that impact communities and shape teaching and learning in urban settings. A field experience with a local community organization working on an educational initiative will provide students with the opportunity to participate in, research, and develop understandings around the relationship among organizations, communities, and schools.
Outcomes:
Students will be able to demonstrate a complex understanding of issues that face urban schools, their relationship to local communities and the educational resources that can be generated by partner ships between schools and communities

CIEP 470 Principles of Instructional Design (3 Credit Hours)
Through the development of an instructional product candidates will engage in the activities associated with each step of the ADDIE process. Emphasis is placed on a cognitive model of learning; however, other models/theories of learning may be applied. In addition candidates will use theories of instructional motivation, principles of instruction as well as instructional strategies relevant to the type of knowledge and cognitive domain level of their product to in order to enhance learning. Analysis, Design, Development, Implementation, Evaluation (ADDIE) process to develop an instructional product.
Outcomes:
Candidates will use the steps involved in systematic instructional design process

CIEP 471 Theoretical Foundations of ESL-Bilingual Education (3 Credit Hours)
This course introduces the integral theoretical, historical, political frameworks and ideological constructs that shape the contemporary educational practices for culturally and linguistically diverse students. Content delves into key principles, policies, and practices of language education, including the various models of bilingual education, English as a second language (ESL), English as a foreign language (EFL), and sheltered content instruction. The course builds background of language acquisition theories, key legal precedents, and educational and language policies that influence school programming, assessment, instruction, teaching, and learning.
Outcomes:
Participants will explain how students develop and maintain languages, describe the research basis for bilingual education, and demonstrate how various school stakeholders implement language policies and programs with bilingual students

CIEP 472 Methods and Materials for Teaching ESL/Bilingual Education (3 Credit Hours)
This course provides a comprehensive framework for teaching bilingual students across a range of educational settings and explores the various theories of language teaching and learning that have been promoted at different times. The content delves into various approaches to teaching in monolingual and bilingual instructional settings, as well as pedagogical strategies to support disciplinary learning, language development, and bilingualism/biliteracy. Course topics include instructional planning and implementation, as well as the selection of culturally, linguistically, and developmentally appropriate materials to enhance instruction, understanding, and achievement.
Outcomes:
Participants will design and implement instruction that responds to students' cultural and linguistic backgrounds, supports language development, fosters meaningful interaction with peers, and maintains rigorous expectations for disciplinary learning

CIEP 473 Instructional Leadership for Multicultural Schools (3 Credit Hours)
This course focuses on building capacity in schools to promote the learning, development, and achievement of students from diverse linguistic, cultural, and racial backgrounds, particularly framed within the context of a society faced with issues of poverty, discrimination, racism, and sexism. The course probes important topics such as teacher expectations, student identity construction, and utilization of the rich resources that students bring to educational settings from their homes and communities.
Course equivalencies: X- CIEP 473/ ELPS 465
Outcomes:
Participants will critically analyze their school settings for issues of race, class, culture, language, and gender and then design professional development efforts to promote change with teachers, leaders, families, and communities

CIEP 474 Assessment of Bilingual Students (3 Credit Hours)
This course prepares educators to utilize assessment to inform classroom instruction, specifically focused on authentic assessment of language and content. Targeting educators of bilingual students, the course emphasizes theoretical and practical study of instruments and procedures for assessing culturally and linguistically diverse students. Educators collect data and make instructional decisions based on students' abilities in English and other languages, which involves distinguishing between learning exceptionality and second language acquisition.
Course equivalencies: X-CIEP474/CIEP526
Outcomes:
Participants will design and utilize formal and informal methods of evaluation to assess students' social, emotional, cultural, linguistic, and academic development and achievement, including critical analyses of existing assessment tools for validity, reliability, and bias

CIEP 475 Curriculum Workshop (1-3 Credit Hours)
The course is designed to contextualize, introduce and/or deepen the understanding and appropriation of Ignatian/Jesuit Education/Pedagogy for people who are already engaged in it or planning to engage in it. The course is designed as a philosophy of education course emphasizing the philosophical approach and roots of Jesuit Education. The course can also assist people in the field of education that want to know about Ignatian Pedagogy or are looking for ways of recreating their pedagogical practice from the perspective of Jesuit Education. However, the course can also be accommodated to those looking for an applied approach to enrich and improve a specific pedagogical practice. In this case please indicate this intention to the instructor to make the necessary adjustments.

CIEP 477 Prevention, Assessment & Intervention: Academic (3 Credit Hours)
Enrollment is restricted to Graduate students in School Psychology. To provide candidates with the knowledge, skills, and dispositions necessary to assist school-aged students experiencing academic difficulties. They will utilize and evaluate evidence based interventions and learn to effectively communicate this information orally and in writing to help teachers and parents develop, modify academic intervention plans.
Outcomes:
Candidates will be able to evaluate and utilize appropriate academic interventions and identifying evidence based practices

CIEP 478 Behavioral Intervention: Assessment & Support (3 Credit Hours)
The aim of this course is to familiarize students with the professional literature in consultation and to employ data-based decision-making in the design and delivery of consultative interventions.
Outcomes:
Students will be able to design and evaluate two consultation cases; one at the individual level and the second on a classwide-level

CIEP 479 School-Based Consultation (3 Credit Hours)
This course will provide an overview of the knowledge and skills necessary for school psychologists to engage in consultation, collaborative problem solving, and systems level intervention in educational settings. Course content will focus on the collaborative consultation processes, theory and issues related to these processes, as well as relevant research. Content will include adopting a systems level perspective with change being viewed from a preventative framework. Consultation from a cross-cultural view will also be emphasized. This course will also include the opportunity to observe, practice and evaluate the skills required to engage in school-based collaborative consultative services through applied case work, practice, role play, self-reflection, feedback and class discussion.

CIEP 480 Assessment School-Age Students & Adults (3 Credit Hours)
The emphasis of the course is on assessment skills and interpretation of individual cognitive measures with school-age children and adults.
Outcomes:
Students will be able to demonstrate proficiency in the administration and interpretation of a wide variety of commonly used measures of cognitive functioning

CIEP 481 Prevention, Assessment & Intervention: Early Childhood (3 Credit Hours)
Enrollment is restricted to Graduate Students in the School Psychology program. This course provides insight into the developmental assessment of infants & preschool children, and the planning and development of intervention goals.
Outcomes:
Students will gain proficiency in standardized and authentic assessment of language and social-emotional development, cognitive ability, motor skills, achievement, and adaptive behavior in young children

CIEP 482 Prevention, Assessment & Intervention: Behavior (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology. This course is designed to provide students with an introduction to strategies for promoting positive behavior in the context of instructional environments through the use of applied behavior analysis principles and procedures. Course content includes multiple methods of behavioral assessment linked to intervention planning.
Course equivalencies: X-CIEP482/CPSY482
Outcomes:
The students will be able to use strategies for promoting positive behaviors for students in the schools and link their assessments to interventions

CIEP 484 Biological Foundation: Behavior in Schools (3 Credit Hours)
This is a seminar course on cognitive neuropsychological foundations in school psychology. The cognitive neuropsychological basis of educational theories and practices are studied and critically examined. Emphasis is given to current brain research, assessment based on the Cognitive Hypothesis Testing model (Hale & Fiorello, 2004) and resultant neuropsychological process assessment and how medications impact learning, social interactions, and behavioral functioning within the school setting. The course is for nonmedical professionals and provides a basic knowledge of cognitive neuropsychological principles of brain functioning, medications and psychopharmacological treatment.
Outcomes:
Students will demonstrate an understanding of the biological basis for behavior and how these issues relate to academic and behavioral challenges faced in schools

CIEP 485 Prevention, Assessment & Intervention: Social-Emotional (3 Credit Hours)
Enrollment is restricted to graduate students in School Psychology. The students will have an understanding of the theoretical foundations of emotional and behavioral disorders; the diagnostic/eligibility criteria for emotional and behavioral disorders; and the social and emotional assessment instruments and procedures. Students will be introduced to early identification and intervention strategies with regard to social/emotional/behavioral functioning.
Outcomes:
Students will be able to assess and link interventions to help students with social emotional needs in the schools

CIEP 486 Internship: School Psychology (3 Credit Hours)
This course provides university-based supervision for school psychology students completing a nine-month full-time experience conducted in an approved public school setting under a state-approved internship plan.
Outcomes:
Student apply skills in assessing students, consulting with school personnel and parents, counseling students as part of a state-approved internship plan

CIEP 487 Tests and Measurements (3 Credit Hours)
This is a course overview of the history, purposes, and uses of various types of tests along with a survey of available tests and criteria used to select assessment measures.
Outcomes:
Students will demonstrate an understanding of the basic purposes of various psychometric tests and will understand statistical criteria that are used to select tests

CIEP 488 Participatory Action Research (PAR) in Schools and Communities (3 Credit Hours)
This course will provide candidates with the knowledge and skills to use participatory action research (PAR) practices and approaches. Candidates will develop theoretical and practical knowledge related to a collaborative approach to research. The theoretical framework situates stakeholders in schools and community organizations as experts in their field and sees collaborative research between institutions of higher learning and schools and communities as an opportunity to authentically address germane problems and issues while promoting shared learning.
Outcomes:
This course emphasizes valuing the epistemic assets that local stakeholders bring to identifying and working toward solutions that benefit their missions and finding ways to bring attention to their work through research and publications

CIEP 489 Intro School-Based Network (3 Credit Hours)
No course description is available

CIEP 496 Educational Evaluation (3 Credit Hours)
This course provides students with an overview of program evaluation, particularly as it relates to the field of education. Throughout the course, students will be able to practice program evaluation. An assumption of this course is that "the pursuit of professional practice in evaluation requires developing a life of the mind for practice" (Schwandt, 2015, p. 143). Evaluation practices include considering the ethical issues surrounding the role of the evaluator, understanding the social and political dynamics of an evaluation context, determining which evaluation approach to use in a given context, identifying the various roles of the evaluator, developing an evaluation plan, generating and collecting data, valuing and making value judgments, and facilitating use of the evaluation.
Course equivalencies: RMTD406 / CIEP496

CIEP 498 Independent Study (1-3 Credit Hours)
In preparation for advanced degree writing and research, candidates will utilize readings, discussions, and appropriate computer applications to interpret, organize, display, and summarize quantitative study results. Course concepts include probability, normal distribution, tests of significance and correlation, simple regression, and multiple regression are among the tests that may be utilized.

CIEP 499 Directed Research (1-3 Credit Hours)
This course is Directed Research. Course Content, Course Objectives and Outcomes are collaboratively constructed with Research Student and Supervising FT SOE Faculty member. The Directed Research Projects are approved by SOE Program Area faculty and SOE Associate Dean of Academic Affairs.
Outcomes:
Outcomes chosen between the instructor and the student during the semester the course is taken

CIEP 500 Child Development and Cognition (3 Credit Hours)
The purpose of this course is to provide students with a graduate level overview of the key theories of development and cognition. Students will learn about critical issues in development and learning that they will encounter and need to deal with working as psychologists in applied settings. Throughout the course students will be asked to analyze, reflect upon, and critique how theories learned may apply, or not, to those learners whose primary culture may be different from the majority through case studies, online discussion boards (or in-class discussions), and a critical analysis of comparative field site visits.

CIEP 501 Exceptional Learner II (3 Credit Hours)
The purpose of this course is to provide in depth understanding of ethical, professional, and collaborative service provision for children with special needs within a multicultural framework.
Outcomes:
Students will understand the current trends in service delivery for students with low incidence/significant disabilities (eg, partial participation, natural proportions) and the need to expand curriculum, instruction, and assessment strategies to meet individual learning styles and instructional needs

CIEP 502 Trauma Sensitive Schools (3 Credit Hours)
Students will explore literature on trauma sensitive schools and the intersection with race and discrimination. They will use Multi-Tiered systems of support to support students at each tier and support staff and families.
Outcomes:
Gaining a basic understanding of the subject (eg, factual knowledge, methods, principles, generalizations, theories); Learning to apply course material (to improve thinking, problem solving, and decisions); Developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course; Learning to apply knowledge and skills to benefit others or serve the public

CIEP 503 Culturally Relevant Literature for Children & Adolescents (3 Credit Hours)
This course introduces participants to texts and classroom materials that authentically portray and reflect the cultural and linguistic diversity of classrooms and communities. The course focuses on analyzing materials for relevance and authenticity, learning about bilingual students through diverse stories, and using culturally relevant texts to support students' learning and development in classrooms.
Outcomes:
Participants will find, select, and utilize culturally relevant and authentic literature to support students' learning and development in culturally and linguistically diverse classrooms

CIEP 504 Applied Linguistics for Teachers (3 Credit Hours)
This course emphasizes the complex and dynamic role of language in teaching and learning, including implications for effective policy and practice in culturally and linguistically diverse classrooms. The course prompts participants to engage in applied linguistics research to solve problems of practice in the teaching of bilingual students.
Outcomes:
Participants will apply in-depth understandings of language acquisition and development to make informed decisions in practice with the goal to support the learning and language development of linguistically diverse students

CIEP 505 Literacy and Numeracy for Principals (3 Credit Hours)
Pre-requisites: ELPS 481; CIEP 442
The purpose of this course is to introduce principal candidates to the foundations of numeracy and literacy development across PK - 12 settings. Included will be a focus on the development of knowledge and skills required to provide leadership in PK - 12.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

CIEP 506 English Language Learning Practicum (3 Credit Hours)
The practicum experience serves to integrate learning from across the Masters program within authentic teaching and learning environments spanning PK-20 settings. The course involves formal observation, support, and evaluation during classroom teaching with bilingual students, guided by specific practicum assignments that center on backward design via data analysis, classroom environment, and instructional units of study.
Outcomes:
Participants will demonstrate competence, effectiveness, and responsiveness in daily classroom practice with bilingual students

CIEP 507 Language Demands and Development in Disciplinary Classrooms (3 Credit Hours)
Everything we do in classrooms and schools requires language, yet the nuances and complexities of language are rarely explored in educator-preparation programs. As the population diversifies and more students come to schools with competencies in languages other than English, teachers must understand how language works so that they can support students in developing language spanning grades and disciplines. In this course, teachers will explore the language demands within and across academic disciplines and enact scaffolds to support multilingual students' language development by attending to these demands. Course understandings and related pedagogical practices emphasize the value of students' multilingual repertoires and competencies with foci on building metalinguistic awareness and encouraging translanguaging with languages and language varieties. Pedagogical practices will focus primarily on building classroom environments to support students' language development, including contextual features, scaffolds, and procedures.
Outcomes:
Participants will: Describe the role of language(s) in teaching and learning, including how it develops; Distinguish the components of language (eg, phonology, morphology, syntax); Apply knowledge of language components in support of language development; Describe the language functions, features, and domains of disciplinary classrooms; Apply knowledge of language demands to support students' language development; Explain the interplay of home and school languages (eg, metalinguistic awareness); Apply knowledge of metalinguistic awareness in support of language development

CIEP 508 Social Justice for Multilingual Learners (3 Credit Hours)
This course introduces educators to foundational principles and practices for promoting social justice and educational equity while teaching multilingual learners in today's classrooms. A central component to teaching for social justice for students labeled as English learners (ELs), this course prompts educators to deconstruct their identities, experiences, and perspectives on cultural and linguistic diversity as a means to recognize and deconstruct language ideologies, deficit-based perspectives, personal biases, and institutionally driven assumptions. Framed by larger sociolinguistic and sociopolitical themes in the field of EL/bilingual education, educators explore students' diversity in their classrooms and schools and reflect upon current practice with that lens. Participants then draw from the literature to develop personal philosophy statements for serving multilingual learners with goals for their own professional learning.
Outcomes:
Participants will: Discern the central and active role of teachers as language policy actors and language decision makers in classrooms, schools, and communities; Reflect upon previous experiences with and perspectives on language learners, language education, and language diversity; Probe the role of language ideologies in institutional practices in education as a means to examine and deconstruct biases and assumptions; Explore the diversity of classrooms, schools, and communities, including cultural, linguistic, familial, academic, social, emotional, behavioral, and sociopolitical factors; Analyze historical and current practices in schools for multilingual students in line with research and theory of supporting and promoting equity for multilingual students; Define personal philosophies and professional goals for teaching multilingual students

CIEP 509 Literacy Teaching for Bilingual & Multilingual Students (3 Credit Hours)
Literacy is widely seen as one of the most important skills that children need in order to be successful in school and beyond, however the teaching of reading and writing are largely still approached from a monolingual paradigm even though the vast majority of classrooms have students who speak (and are often literate to varied degrees in that language) in at least one other language beyond the language of instruction. Therefore, it is essential that educators acquire the knowledge and skills to consider the development of literacy from a broader, less restrictive linguistic paradigm in order to engage and effectively teach reading and writing to their students who are bi/multilingual. Regardless of teaching context (e.g., grade level; bilingual or monolingual instructional setting, etc.) educators in this course are supported to move away from a monolingual paradigm in relation to literacy development in order to make strong and effective use of their students' literacy knowledge across languages. Participants will apply new learning to implement strategies (such as contrastive analysis, reading and writing opportunities in both languages, etc.) that supports the development and transference of literacy learning across languages.
Outcomes:
Participants will: Explain the relationships between oral language and literacy development and first and second literacy acquisition; Describe the relationships between literacy development, identity and motivation; Describe the different paths to literacy development specifically in relation to oracy and literacy in another language; Identify the ways in which knowledge of different orthographic systems can be beneficial to learning a new one; Apply knowledge of different orthographic systems to support students' literacy development through teaching strategies such as contrastive analysis; Apply knowledge of bilingualism to support students' literacy development across languages; Design strategies for teaching reading and writing that build on students' linguistic and cultural funds of knowledge; Identify the components of knowledge needed to become literate in another language and distinguish between those aspects of literacy that are common across all languages and those that are unique to certain languages; Create classroom environments and materials that support students' bi- or multilingual literacies and engage them in shared literacy events

CIEP 510 Accessing & Adopting General Education Curriculum (3 Credit Hours)
This course provides a review of standards for K -12 student learning with special emphasis on reading and mathematics.
Outcomes:
The student will be able to Assess the curricular, social-emotional/behavioral needs of students with diverse learning and curriculum needs, and develop pedagogical skills to address those differences

CIEP 511 Development Theory & Disabilities (3 Credit Hours)
The purpose of this course is to study the stages of physical, cognitive, social, and emotional development of infants, toddlers, young children, and adolescents with special attention to the similarities and differences among individuals with and without disabilities. The influence of sensory, cultural, and environmental issues on the developmental needs of children and adolescents will be explored. The Council for Exceptional Children (CEC) Ethical Standards for Special Educators and Teacher Preparation Standards will also be addressed.

CIEP 512 Special Education: The Profession (3 Credit Hours)
The purpose of this course is to examine, test, and clarify the student's commitment and understanding of the teaching profession.
Outcomes:
Students will reflect on their role in the classroom through journaling and sharing

CIEP 513 Ethics & Law for Administrators (3 Credit Hours)
This course will deal in depth with current and timely legal and ethical issues in the education of children with disabilities, diverse learners and other children identified as having additional needs in any area of instruction and development, focusing on the administration of special education services in public schools. The approach to and focus on these topics is designed for candidates seeking endorsement as Illinois State-approved Director of Special Education. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and the provision of a free appropriate public education in the least restrictive environment. The delivery of services to special needs children from early childhood through post-secondary transition will be addressed.
Outcomes:
The course will concentrate on statutory and regulatory compliance; fostering effective and productive relationships among administration, professional personnel, service providers and families in serving students with special needs; and timely, efficient, positive-focused dispute resolution

CIEP 514 Advanced Systems Consultation (3 Credit Hours)
As school psychologists who attend to issues of social justice, we sometimes find ourselves in positions where changes to systems need to be made in order to ensure that students' needs are being met. The purpose of this course is to explore systems change from the role of the school psychologist, including conducting a needs assessment and data-based decision-making, and the role of supervisors within school settings to support P-12 students and the professionals who serve them in evolving schools and districts.
Outcomes:
Gaining a basic understanding of the subject (eg, factual knowledge, methods, principles, generalizations, theories); Learning to apply course material (to improve thinking, problem solving, and decisions); Developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course; Learning to apply knowledge and skills to benefit others or serve the public

CIEP 518 Theories and Practices of Partnerships (3 Credit Hours)
This course explores current issues, literature bases, and practical examples related community-based and practice-oriented partnerships focused on improving learning opportunities for youth, their parents/guardians, and various stakeholders in the community.
Outcomes:
Teachers are vital to the success of the students in their classrooms, but we must recognize that teaching and learning happen across many time and spaces, and are influenced by a multitude of factors, beyond the classroom

CIEP 519 Data-based Decision Making (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology. The purpose of this course is for students to gain knowledge in universal behavioral and academic behavior data-based decision-making skills and ways to use these data to make informed curricular and intervention decisions that are of use to schools. The students will be able to use data-based and evidence-based decision-making in working with children and teachers in the schools.

CIEP 520 Doctoral Seminar (1 Credit Hour)
This course will provide doctoral students with an introduction and orientation to the Curriculum and Instruction EdD program as well as an introduction to the dissertation process. This course will focus on the methods and processes involved in developing a prospectus and review of the literature for a dissertation.
Outcomes:
Students will develop a plan of study for their degree as well as a prospectus for their dissertation

CIEP 521 Curr Theory & Rsrch Schools & Cmty:Positionalities,Prspctives,&Trnsformtns (3 Credit Hours)
The purpose of this course is to advance students' understanding of contemporary theoretical underpinnings of curriculum. In this course, the curriculum is understood as both the explicit planned course of learning put before students, and the hidden or latent experiences that students encounter in school and community settings. Students become familiar with the theoretical orientation of research on curriculum and to be able to evaluate the worth of research related to curriculum issues.
Outcomes:
Students will pose a problem, a question or a series of questions that would address the problem, collect data to facilitate answering some or all of the questions, analyze the data, and produce a series of reports on the state of their research in school and community settings

CIEP 522 Curriculum Policy Across Schools and Communities (3 Credit Hours)
This course offers a critical examination of the intersections of curriculum politics, policy, and practice in schools and communities. The goal is to increase students' understanding of the complexities of educational policy in practice as a means to assist them in becoming effective leaders and practitioners who influence and implement curricular policy in service of social justice.
Outcomes:
Students will examine historical and current trajectories of curricular policy spanning educational contexts, using various theoretical frameworks to probe how policy layers, locales, and actors influence the design and implementation in practice

CIEP 523 Curriculum Improvement and School-Community Change (3 Credit Hours)
Recognizing that the growth and development of schools and communities are inextricably linked, this course develops candidates' understanding of curriculum and school reform as well as community improvement. It examines historic school reform and contemporary school change models in addition to school-based reform strategies intended to improve teaching and learning in schools. The course further examines contemporary community development strategies such as community organizing, community economic development, and social service approaches in order to grant insights into the role communities play as potential partners in school improvement.
Outcomes:
Students will assess current research on curriculum reform and community development and their implications for improving student learning and achievement in school settings; Students will work with a local community organization or community schools' site in order to gain insights into how school and community organizations partner together to strengthen learning and developmental outcomes

CIEP 524 Prvlg, Power, & Possibilities: Teaching Soc Justice Schools & Communities (3 Credit Hours)
This course examines social justice issues through a critical lens. Readings focus on the role of race, ethnicity, and cultural contexts in the development of curriculum over time. The course emphasizes teaching for social justice through culturally and linguistically responsive and sustainable instructional and assessment practices.
Outcomes:
This course has been designed for graduate students who want to explore frameworks, perspectives, contexts, and strategies that will help them translate social justice in instruction and assessment practices

CIEP 525 Leading for Social Justice in School Psychology (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course provides an overview of individual, school-level, and national perspectives on leadership and systems change in school psychology, with an emphasis on strategies for bringing about socially just changes in schools.
Outcomes:
The intended outcome is the enhanced ability to lead for social justice as a school psychologist

CIEP 526 Assessment Culturally & Linguistically Diverse Populations (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course focuses on the socio-political issues that under-represented groups face in society including the historical misuses of tests in the placement of ethnic minority youth, and current legal and ethical standards for assessment and intervention with under-represented youth.
Course equivalencies: X-CIEP474/CIEP526
Outcomes:
To produce school psychologists who are aware of multicultural and diversity issues

CIEP 527 Ethics and Law for School Psychologists (3 Credit Hours)
Enrollment is restricted to Ed.D. Students in School Psychology This course focuses on the ethical standard for school psychologists. Students will explore the connection between the psychologist's vulnerabilities, ethical missteps and the development of ethical resilience.
Outcomes:
Students will identify and resolve ethical dilemmas and ethical violations in the practice of school psychology

CIEP 533 Proseminar: Educational Psychology/School Psychology (0 Credit Hours)
A required two-semester series of seminars designed for all students pursuing the Ph.D. degree in educational psychology or school psychology which focuses on critical issues in the field and the planning of a colloquium series
Outcomes:
Students will have an enhanced knowledge base of critical topic that drive the school psychology and educational psychology literature

CIEP 535 System Consultation in School Discipline Reform (2 Credit Hours)
Pre-requisites: Degree in Education or Law Related Field
The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and technical assistance and rooted beliefs and biases).
Course equivalencies: LAW 684 / CIEP 535
Outcomes:
Students will analyze system level factors and data

CIEP 537 School Discipline Reform: Linking Law Policy and Practice (2 Credit Hours)
Pre-requisites: Degree in Education or Law-Related Field
The course will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy and practice (e.g. racial and special education disparities, juvenile/criminal justice linkages and teacher).
Course equivalencies: CIEP 537 / LAW 686
Outcomes:
Participants will develop a three to five year action plan for school discipline reform

CIEP 540 Seminar Research Curriculum & Instruction (3 Credit Hours)
This course focuses on how current research in curriculum and instruction addresses key curricular questions such as, Does it work? For whom and under what conditions does it work? How does it work? Does a given theory hold?
Outcomes:
Students will be able to: 1) Understand key curricular questions and major areas of research in curriculum and instruction; 2) Evaluate a variety of professional articles and studies in terms of validity, methodology, findings, conclusions, alignment of various components with research question; 3) Synthesize research articles and studies into a coherent and appropriate literature review

CIEP 541 Seminar: Curriculum Issues (3 Credit Hours)
In this course students will study one aspect of current literature in the field of curriculum with intensity.
Outcomes:
Students will be able to apply the current research in an advanced curriculum situation; Students will be cognizant of current areas of curriculum research and be able to find references electronically

CIEP 544 Prevention, Assessment & Intervention: Advanced Skills (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology. This course will provide students with in-depth hands on introduction to evidence-based cognitive behavioral treatments. The course will also focus on adaptations to match client presentation, ethnicity, culture, and socioeconomic status.
Outcomes:
The course will involve the modeling and practicing treatments such as CBT, which students will learn and demonstrate competently

CIEP 545 Systems Consultation (3 Credit Hours)
This is an advanced course for doctoral level students. The course has two separate but related prongs. First, the students will develop a working understanding of Organizational Development Consultation, demonstrating the skills necessary to perform the role of organization development consultant and in determining when and how to carry out this role.

CIEP 546 School Psychology Advanced Practicum (1-3 Credit Hours)
Enrollment is limited to Doctoral Students in School Psychology The purpose of this course is for students to complete a supervised advanced practicum in a clinical setting that can include schools, clinical or hospital environments.
Outcomes:
Supervised clinical experience in applied school psychology practice

CIEP 547 Clerkship: School & Educational Psychology (1 Credit Hour)
This is a non-credit doctoral level course that provides advanced experience in university teaching, research or direct service to children/adolescents.
Outcomes:
Students will demonstrate proficiency in an advanced area of academic training, based on supervised experience and evaluation by a site supervisor

CIEP 548 Family, School and Community Collaboration (3 Credit Hours)
Enrollment is restricted to students in the Graduate Education program. Blending leading consultation approaches and ecological theory, this course provides an overview of the conceptual frameworks undergirding family/school community collaboration in schools.
Outcomes:
Students who take this course will leave with an enhanced ability to work effectively with families and communities across a wide spectrum of topics and opportunities

CIEP 550 Seminar Educational & School Psychology (3 Credit Hours)
This course is an overview of current topics in school and educational psychology with an emphasis given to the development of a plan for a program of scholarly activity.
Outcomes:
Students will write a research proposal as an entry point for a research program in a particular domain

CIEP 556 Seminar: Problem Solving Thinking & Creativity (3 Credit Hours)
This course focuses on the knowledge base related to human problem-solving, thinking and creating through the presentation of a variety of approaches as they relate to instructional design.
Outcomes:
Students will demonstrate an advanced theoretical understanding of current models of human problem-solving, thinking and creativity along with an understanding of how these approaches drive instructional interventions

CIEP 557 Seminar Learning Theory & Teaching (3 Credit Hours)
This course focuses on the analysis of advanced readings in behavioral and cognitive instructional technology.
Outcomes:
Students will have an enhanced ability critically examine the literature in behavioral and cognitive instructional technology

CIEP 558 Seminar Theories of Intelligence (3 Credit Hours)
No course description is available

CIEP 559 Seminar Theories of Learning (3 Credit Hours)
This course connects current learning theories with curriculum development, instruction, and assessment practices in the schools. Candidates examine school-based implications of theory and research in such areas as multiple intelligences, developmental stages, and ethical/moral development. This course is neither a methods course (focused on developing a repertoire of teaching and learning activities) nor an educational psychology course (focused on applying experimental research to instruction). It is a seminar in which students read the work of current theorists and practitioners in human learning and explore how knowledge of current of current research can impact educational decisions and instructional practice.

CIEP 563 Graduate Special Education-Student Teaching (6 Credit Hours)
Student teaching is the culminating experience of the Loyola University Teacher Education Program. This capstone course engages the student in the actual activity of teaching all day, everyday, during the semester. Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching.
Outcomes:
Students will demonstrate a basic level of competency in all aspects of full-time teaching including but not limited to lesson and curriculum planning, teaching, classroom management, formal and informal assessment, subject matter competency, and differentiated instruction

CIEP 571 School Discipline Workshop: Anti-Racism (0 Credit Hours)
As part of the Restorative Justice course, you must participate in an intensive on-campus weekend seminar on equity, anti-racism, and restorative justice. This seminar offers you the opportunity to network with other professionals and engage in exercises and skills-building related to the core principles and practices of restorative justice.
Outcomes:
Apply the principles of restorative practices to address challenges your school or district is facing; Develop an action plan to implement prevention-oriented alternatives to exclusionary school discipline practices in your respective setting

CIEP 586 Doctoral Internship: School Psychology (1 Credit Hour)
In collaboration with ISPIC and APPIC, the student will complete an advanced doctoral level 12 month supervised internship of 2000 hours.
Outcomes:
Students will follow a prescribed doctoral level internship plan to show advanced competencies as a school psychologist under the direction of a licensed clinical psychologist and certified school psychologist

CIEP 590 School Psychology - Supervision (0 Credit Hours)
The purpose of this course is to provide supervised teaching or field based experiences to SPYCH GRAD students. Students will learn to apply essential skills effectively to serve children in a school based setting.
Outcomes:
Develop specific school-based skills, competencies and points of views needed by professionals in the field of School Psychology

CIEP 600 Dissertation Supervision (1 Credit Hour)
To be registered for while working on an approved dissertation project.

CIEP 605 Master's Study (1 Credit Hour)
To be registered for while preparing a thesis proposal.

CIEP 610 Doctoral Study (1 Credit Hour)
This course can only be taken two times during a doctoral student's career while preparing a dissertation proposal.

CIEP 620 Legal Issues in School Discipline (2 Credit Hours)
The course will address the Constitutional implications of school discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about "zero tolerance" policies, the role that school discipline plays in the "school-to-prison pipeline," and the discriminatory impact of school discipline policies.
Course equivalencies: X-CIEP 620/LAW 683
Outcomes:
Develop a solid understanding of the fundamental legal principles and law that guide school discipline practices in public elementary and secondary schools, including constitutional law, federal and state statutory law and administrative regulations, and case law; Enhance understanding of the policy concerns that have arisen regarding school discipline practices and develop knowledge of alternative approaches

CIEP 625 Restorative Justice in Schools (2 Credit Hours)
This course begins with an immersion experience where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the immersion and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, connections between racial and restorative justice, and systems and structures to accommodate restorative practice within school life. Through additional online seminars, students will strengthen their knowledge of the history, theory, research, and practice of Restorative Justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.
Outcomes:
Distinguish between restorative and punitive motivations, techniques, strategies, and outcomes; Define a restorative mindset within a trauma framework by explaining the components of repairing harm between individuals and within communities; Plan, facilitate, and reflect on proactive and responsive circles (including those focused on: community building, healing, understanding, peace and mediation, celebration); Plan, facilitate, and reflect on effective restorative conversations; Plan, facilitate, and reflect on generating effective restorative consequences through a restorative conversation; Describe the connection between anti-racism and racial justice with principles of Restorative Justice; Identify systems, structures, and stakeholders to support the implementation of restorative justice principles to achieve school or district wide culture change

Educational Leadership & Policy Studies (ELPS)

ELPS 400 Inquiry Into Educational Policy (3 Credit Hours)
No course description is available

ELPS 403 Qualitative Research Methods in Education (3 Credit Hours)
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Course equivalencies: RMTD405 / ELPS403
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

ELPS 404 Entrepreneurial Approaches to Catholic Education (3 Credit Hours)
Mark Casson in his book The Entrepreneurs: An Economic Theory, says that the theory of entrepreneurship rests upon the following definition: "An entrepreneur is someone who specializes in making judgmental decision about the coordination of scarce resources." This could also be the definition of a Catholic school leader! Catholic education is the largest non-public education system in America. But it is also half the size it was in 1960. To stay relevant and thriving, Catholic education must become more innovative and entrepreneurial. We will investigate the process by which innovations are designed and will critically assess the efficacy of a wide range of innovations. What leads to innovation and how is it scaled effectively? We will read and talk to educators, entrepreneurs, and policy makers about design innovations, and will critically assess the efficacy and scalability of a wide range of innovations targeting students, teachers, and schools.

ELPS 405 Introduction to Educational Policy Analysis (3 Credit Hours)
This course is an introduction to educational policy analysis that allow students to critically access the underlying assumptions and politics that guide particular policy choices and evaluate their design, implementation, and impacts.
Outcomes:
Students will demonstrate the ability to critically examine and conceptualize policies, design alternatives and argue persuasively for these alternatives while gaining fluency in the current policy debates

ELPS 406 Foundations Using Data for Continuous Improvement (3 Credit Hours)
This is the foundation course for data-based decision making within the principal preparation series. This graduate course provides skill sets to help future school leaders and administrators to access, interpret, and encourage the use of data to improve student educational outcomes. Restricted to graduate students in the School of Education. Students will learn how to organize, analyze, and synthesize data in order to interpret student and teacher assessment results.

ELPS 407 Leading for Data-based Decision Making (3 Credit Hours)
The primary purpose of this course is to provide candidates with the knowledge, skills, and dispositions necessary to assist school-aged students to accomplish educational outcomes. Restricted to graduate students in the School of Education.
Outcomes:
Candidates will examine data and the use of data in making decisions on several different levels

ELPS 408 Leading for Diversity (3 Credit Hours)
This course focuses on meeting the needs of children from diverse linguistic, cultural, and racial backgrounds within the context of a society faced with issues of poverty, discrimination, racism, and sexism. This course explores issues of second language and second culture acquisition and consider the relationship between identity construction and school success.

ELPS 409 Fundamentals of Instructional Coaching (3 Credit Hours)
The instructional coach provides instructional leadership by supporting evidence-based instructional practices with classroom teachers. This course focuses on developing the elements of instructional coaching: assessment for learning, delivery of effective curriculum, enhancing classroom instruction, and effective classroom management. In developing the role of the instructional coach, candidates will develop skill in building trusting relationships, facilitating support from administrators, and providing confidential, non-evaluative job-embedded professional development for faculty. Models of coaching will be explored as well as a focus on conferencing and facilitation skills.

ELPS 410 Sociology of Education (3 Credit Hours)
This course introduces students to the field of the sociology of education. It examines the societal role of education and the enactment of education using macro-historical, meso-institutional and micro-interactional perspectives, and exposes students to major theoretical traditions in the discipline.
Outcomes:
Knowledge of theories and empirical research that can guide critical evaluation of 1) conditions and problems in K-12 schools 2) ideas, arguments, and points of view regarding K-12 schools

ELPS 413 Critical Social Theories (3 Credit Hours)
This survey course examines the foundations, applications, and practice of critical social theories in U.S. education. Through rigorous texts, engaged discussion, and reflective assignments, this course aims to address the following central questions: What is theory and who gets to define that?; What is social theory?; What is critical about critical social theories?; How is theory pertinent to practical, everyday educational practices?; How can and does education contribute to either reinforcing or challenging relations of power and domination in the modern era?; and What is your relationship to critical social theory?
Outcomes:
This course has been designed to meet the following objectives: Students will: 1) Use prior knowledge to make real-word connections to critical social theories; 2) Understand and apply critical social theories to their personal and professional contexts; 3) Increase their reflexivity with regards to critical social issues; 4) Engage in aesthetic educational practices; 5) Embrace conflict as a necessary part of the learning process; 6) Examine the hidden curriculum of higher education through the application of critical social theories; 7) Explore with "play" as a necessary aspect of authentic learning; 8) Experience multimodal approaches to engaging the course content

ELPS 418 Writing Workshop in Rome, Italy (1 Credit Hour)
Immersed in the city of Rome for 14 days, students will use historical and cultural site visits to inspire their daily research and writing sessions. Students will engage in the exploration of our rich Jesuit tradition by studying a brief history of St. Ignatius and the city of Rome and by examining basic Jesuit ideals and principles while using their reflections to support their daily writing sessions. This course is a graduate level course for graduate thesis, comprehensive exams, capstones, and dissertation writers. Academic projects may be completed during this course. This course is a one-credit hour self-guided writing course. This course is open to LUC graduate students and visiting students, Alumni, and faculty who are currently engaged in professional and academic writing and research.
Outcomes:
Students will demonstrate sustained writing productivity by producing measurable progress on a substantive writing project through disciplined daily writing, rigorous critical reflection, ethical research practice, and iterative faculty-guided feedback within an immersive international learning environment; Writers will have completed at least 50 hours of dedicated writing during this workshop - dissertation, defense presentation, academic project, or work project

ELPS 419 Leadership in Higher Education (3 Credit Hours)
This course is designed to provide foundational grounding in leadership theory and research. Specific attention is paid to the evolution of leadership theory, interdisciplinary conceptualizations, administrative applications, pedagogy for teaching and learning, and the leadership development process of college students.
Outcomes:
Students will be able to describe various historical and contemporary perspectives on administrative leadership and their application in higher education, including the influence of gender and culture on leadership development

ELPS 420 Philosophy of Education (3 Credit Hours)
This course examines the philosophical questions embedded in teaching, learning, and schooling.
Outcomes:
Students acquire familiarity with the history of philosophic thinking about education and develop an ability to formulate valid arguments about the fundamental issues in teaching, learning, and schooling

ELPS 421 Theories of Knowledge and Education (3 Credit Hours)
This course examines theories of knowledge and their implications for educational practice from a philosophic.
Outcomes:
Students understand different philosophic explanations of learning and knowledge and acquire the ability to interpret educational practices according to these explanations

ELPS 422 Modern Theories of Education (3 Credit Hours)
An examination of modern theories of education from a series of philosophical perspectives.
Outcomes:
Students develop a critical understanding of modern theories of education

ELPS 423 Value Theory and Education (3 Credit Hours)
Using various value theories, the course examines the practices of teaching, learning, and schooling.
Outcomes:
The student acquires familiarity with theories of value and is able to use them in critically examining the practices of teaching, learning, and schooling

ELPS 424 Jesus the Teacher: A Theology of Education (3 Credit Hours)
The course develops a theology of education based on the account of Jesus provided in the New Testament.
Outcomes:
The student is able to interpret the task of education in light of the life of Jesus

ELPS 425 Foundations in Student Affairs (3 Credit Hours)
This course provides an introduction to the college student affairs profession. Special attention is focused on historical and philosophical foundations, organizational structures, professional roles, functions, and services, and challenges, opportunities, and issues faced by professional staff.
Outcomes:
Students will be able to describe factors contributing to America's diverse system of higher education and its impact on the design and delivery of student affairs programs and services

ELPS 426 Student Affairs Administration Higher Education (3 Credit Hours)
No course description is available

ELPS 427 Foundations in Higher Education (3 Credit Hours)
The purpose of this new course is to provide a comprehensive examination of the foundations of higher education in the United States.
Outcomes:
This course is designed to help students critically engage with central features of higher education institutions, policies, and constituents; Of special interest is the evolution of policies, ideologies and practices that have a direct impact on social justice concerns

ELPS 428 The Junior and Community College (3 Credit Hours)
This course introduces the two-year college and its role in American higher education, including a focus on historical origins, characteristics of students and faculty, curriculum development, governance and collective bargaining, and contemporary issues.
Outcomes:
Students will be able to describe factors influencing the development of the two-year college within the broader system of higher education in the United States, and understand the special role that the two-year institution serves in American society

ELPS 429 Selected Topics in Higher Education (3 Credit Hours)
This course will discuss special topics in higher education policy and practice.
Outcomes:
Students will be able to identify, review and critically analyze significant higher education policy and practice issues

ELPS 430 Curriculum and Pedagogy in Higher Education (3 Credit Hours)
This course examines the notion of curriculum. This course will allow you to consider the following central questions: What are curriculum and pedagogy?; What has curriculum and pedagogy looked like in your schooling experiences?; What roles do curriculum and pedagogy play in the context of higher education & student affairs?; What are the explicit and implicit curricula of higher education & student affairs?; How is higher education & student affairs curriculum created, by whom, and for what purpose?; What is your own understanding and experiences with curriculum and pedagogy in your own life?
Outcomes:
This course aims to model effective curricular design course activities, assignments, readings, and relationships; While the explicit nature of such items is critical, the implicit framings of this course should prove even more impactful

ELPS 431 Evaluation in Higher Education (3 Credit Hours)
This course examines evaluation and assessment philosophy, approaches, models, and practice in higher education with focus on institutional accountability and assurance of quality programs.
Outcomes:
Students will gain an appreciation for the importance of evaluation and assessment of educational programs in higher education and understand strategies employed by institutions to achieve their goals and objectives; Students will also gain an understanding of the range of quantitative and qualitative tools available to measure student learning and developmental outcomes

ELPS 432 Multiculturalism for Social Justice in Higher Education (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course provides an introduction to theory and research related to multiculturalism and social justice. Learning is targeted at increasing students' multicultural awareness, knowledge, and skills in the context of higher education practice.
Outcomes:
Understand social justice conceptual foundations and the various ways in which oppression influences individuals, institutions, and the broader society

ELPS 433 Student Development in Higher Education (3 Credit Hours)
This course introduces cognitive and psychosocial research and theory focused on the maturation and development of traditional aged college students, particularly in the domains of identity, cognition, and moral reasoning.
Outcomes:
Students will demonstrate an understanding of key theories of college student development and their application in improving plans and policies implemented in the context of administration and/or teaching

ELPS 434 American College Student (3 Credit Hours)
This course explores who goes to college, and the affects of cultural background and campus environments on college student experiences.
Outcomes:
Students will be able to explain how campus environments influence student learning and identity including analyzing the experiences of different students and student groups using anthropological and sociological constructs

ELPS 435 Enrollment Management in Higher Education (3 Credit Hours)
This course examines research and theory focusing on student demand for higher education, college choice, recruitment and marketing, public aid policy, retention and student success, and best practices related to enrollment management.
Outcomes:
Students will demonstrate factors influencing both demand for higher education and student choice of institutions, with focus on the role of public financial aid policy in access and choice

ELPS 436 Women in Higher Education (3 Credit Hours)
This course explores issues unique to women as academic leaders and administrators in higher education. It examines the history and challenges that women have faced as students in higher education institutions, exploring the factors that have affected their participation, matriculation, and completion of programs, over time and today. Last, this course will explore gender and expanding issues around identification and sexual orientation, as related to institutional inclusiveness and student supportive services.

ELPS 437 Today's Community College Students (1 Credit Hour)
No course description is available

ELPS 438 Designing Effective Community College Courses (1 Credit Hour)
No course description is available

ELPS 439 Assessing Student Learning in Community Colleges (1 Credit Hour)
No course description is available

ELPS 440 Community College Students as Learners (1 Credit Hour)
No course description is available

ELPS 441 Community College Teaching (3 Credit Hours)
This course examines the curriculum and programs offered within community colleges and the instructional philosophies and strategies used to encourage student success. It will examine the heterogenous population of students who attend these institutions and their learning needs and preferences. The course will also require students to understand the curricular issues faced in today's colleges including elimination of developmental education, use of early college courses, articulation agreements and expanding offerings to include topics germane to diverse students.

ELPS 442 Humanistic Foundations of Education (3 Credit Hours)
No course description is available

ELPS 443 Educational Classics (3 Credit Hours)
Analysis of selected works of major importance in the development of educational theory.
Outcomes:
Student acquires an advanced understanding of the thinking of some persons who have made a major contribution to educational theory

ELPS 444 American Schooling and Social Policy: A Historical Perspective (3 Credit Hours)
A historical analysis of the economic, political, cultural, and social factors that helped to shape educational policy and schooling in the United States.
Outcomes:
Students will be able to demonstrate a historical understanding of the development of educational policy and schooling institutions and demonstrate a knowledge of the historiographic approaches and debates in the history of education

ELPS 448 International Higher Education (3 Credit Hours)
This course introduces students to the higher education systems of countries around the world, placing a particular emphasis on how each system is confronting the challenges of globalization.
Outcomes:
Students will understand how IHE's respond to challenges of internationalization, massification, scholar & student exchange, access challenges, accountability demands, was well as international trade agreements on the exchange of educational goods & services

ELPS 450 Finding Jesuit Jesus:Preparing Prof Life-Live Sprtual Exercise St. Ignatius (3 Credit Hours)
An adapted version of the Spiritual Exercises of St. Ignatius of Loyola, founder of the Jesuits, this 14-day course in Rome, Italy @JFRC provides students the structured time and study to reflect more deeply on faith, the power of God's love and relationships with others as they frame their professional life design. Time for personal prayer, reflection, liturgies, thematic walks and talks are embedded in this course and all of which will help assist students in their faith journey and as they discern, plan and prepare for a professional life. The course intends to advance opportunity for student exploration and understanding of Jesuit history, values and principles - what does it mean to walk, live, discern and work, as people of Ignatius regardless of faith origin. This course is an invitation to imagine and to plan to live a life of service regardless of profession or career choice.
Course equivalencies: ELPS 350/ELPS 450
Outcomes:
To further student understanding of diversity of ideas and beliefs in the world; To enhance student knowledge of concepts and designs of social justice while exploring the ancient history of Rome; To better understand Ignatian spirituality and faith in action in our global and diverse world; To engage in service learning to better understand the plight of refugees around the world and expand student knowledge in the service of humanity through learning, discerning and faith; To advance opportunity for student discernment and understanding of personal and professional vocation; what does it mean to walk, and work as people of and with Ignatius - regardless of faith origin

ELPS 453 Legal Aspects of American Higher Education (3 Credit Hours)
This course examines complex sources of law that impact higher education with a special focus on the student-institution and faculty-institution legal relationship.
Outcomes:
Students will demonstrate a heightened awareness of the key role that the law serves in its relationship with higher education administration and policy; Students will critically evaluate and implement preventative legal strategies on the campus and understand the ethical and social justice implications of such work

ELPS 454 Budgeting and Finance in Higher Education (3 Credit Hours)
This course examines finance-related issues and trends in higher education and reviews budgeting techniques used by colleges and universities.
Outcomes:
Students will demonstrate skills in analyzing higher education financial statements and other fiscal documents, and understand current patterns of higher education finance and their strengths and limitations

ELPS 455 Comparative Education (3 Credit Hours)
The application of historiographic and social scientific theories and methods to understanding international issues of education.
Outcomes:
Students will demonstrate a sound grasp of the field's major issues and perspectives, the nature of comparativist research, and the work of major figures

ELPS 456 Education & Democratization (3 Credit Hours)
This course will explore some of the conceptual underpinnings of democracy as they relate to contemporary education policy. Texts read include books by Richard Rorty, John Dewey, Cornell West Claudia Rankine and other contemporary writers who work on democracy and education. Themes to be addressed include citizenship education, identity politics, hyper-partisanship, and new nationalisms.

ELPS 457 Comparative Theory (3 Credit Hours)
Pre-requisites: ELPS 455 or consent of instructor
A course in the philosophy and sociology of comparative education knowledge.
Outcomes:
Students will demonstrate a sound grasp of the field's major epistemological issues and a sense of how their own work and that of others fit into the theoretical landscape of comparative education

ELPS 458 International Education (3 Credit Hours)
This Advanced Seminar, which is both theoretical and applied, introduces students to issues and institutions involved in international educational development. This course will provide students with a deep understanding of the changing role of educational development projects in light of the post-2015 development agenda, post-financial crisis and global recession, post-Ebola epidemic, and post-Arabic Spring periods. Students will spend time exploring and understanding how these many `post-contexts and settings¿ are changing the nature of development and the educational responses that are now coordinated across different scales and spaces (national, regional, and global levels). With the aid of class readings and paying particular attention to endogenous and exogenous challenges that Africa and the Middle East confront, discussions will be framed through a comparative and international educational perspective that exposes students to how different theories of education and development influence policy, priorities, and programs of international, national, and local institutions in these regions.

ELPS 459 Organization & Governance in Higher Education (3 Credit Hours)
This course examines the organizational and governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 460 School Administration (3 Credit Hours)
This course serves as an introduction to the administration and governance of American public schools. The course provides an overview of educational administration and the systemic forces that impact upon its functioning.
Outcomes:
Students will be able to apply a systems model approach to school leadership; Students will be able to articulate how to transform school inputs into successful school outputs that build positive will and capacity in order to accomplish the school's vision and mission

ELPS 461 Issues in School Law (3 Credit Hours)
An in-depth examination of current legal issues and their educational implications for district leaders. Emphasis is given to legal issues in personnel practices and district-wide compliance with state and federal laws and regulations. State standards affecting school administration are also examined.
Outcomes:
Students will become familiar with and be able to address school law decisions within the context of school leadership; Students will be able to lead district-wide compliance with state and federal laws and regulations

ELPS 462 The Principalship (3 Credit Hours)
Study of the leadership and administrative responsibilities of elementary and secondary school principals. Topics include: creating a learning community, team-building, school improvement planning, budgeting, staffing, scheduling, and ethical and operational issues in decision-making.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to the ethical and operational issues in decision-making inherent in the leadership role of the school principal as they pertain to various leadership tasks

ELPS 463 School Leadership and the Law (3 Credit Hours)
Provides prospective administrators with an overview of the legal system as it impacts school operations. Intended as a first course in school law, topics include: constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations, and implications for administrative practice.
Outcomes:
Students will be able to demonstrate understanding of an overview of the legal system as it impacts school operations including constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations from the lens of the educational leader

ELPS 464 Workshop: Superintendency (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences in District Leadership offices. This course provides students with the opportunity to develop skills, understandings, and dispositions required of a superintendent - collaborating with boards of education, citizens of the community, and other relevant stakeholders. Restricted to LUC Graduate students.
Outcomes:
Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate and engage in activities that utilize data gathering techniques and analysis to inform programmatic decisions; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs; Understand and can monitor and evaluate district management and operational systems

ELPS 465 Workshop (Variable Topics) (3 Credit Hours)
These workshops focus on specific areas of educational leadership, such as: Instructional Leadership, Equity and Justice, Collective Bargaining, Research in Educational Leadership, Cultural Context for Informed Decision Making, and The Superintendency.
Course equivalencies: X- CIEP 473/ ELPS 465
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the relevant workshop area

ELPS 466 School Finance and Budgeting (3 Credit Hours)
Study of the processes by which financial decisions are made by local school districts, with special emphasis on the roles of building and district administrators in the budgeting process. Included are the techniques of constructing and managing the budget, while addressing issues of need and equity in the school community. Also covered are the sources of school revenues and an introduction to the process and principles of facility planning. This course is intended as a first course in school finance.
Outcomes:
Students will be able to demonstrate understanding of and competencies pertinent to the school leader's role in building, maintaining, and managing the school budget while addressing issues of need and equity

ELPS 467 School Law & Government (3 Credit Hours)
The legal basis of public education in the United States, with special reference to Illinois major court decisions and statutes are reviewed through the lens of the district-wide leader. Due process, special education, multi-cultural differences, school board relations and other related legal matters will be examined through the role of the superintendent. This course is intended as a second course for a law minor.
Outcomes:
Students will be able to demonstrate an understanding of due process, special education, multi-cultural differences, school board relations and other related school legal matters through the lens of the superintendent

ELPS 468 Problems in Finance and Business Management (3 Credit Hours)
Examination of the social justice issues inherent in developing and evaluating state and local school finance policy, including equity, adequacy, the social and ethical issues associated with allocating resources and relating school costs to achievement. Selected problems of school district financial management are studied, including central office organization, financial management and control, securing and accounting for grant funds, debt financing, insurance and support services management. This course covers topics especially pertinent to district administrators and superintendents.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to district level leadership in financial management, control, and allocation through the lens of social justice issues

ELPS 469 Human Resources in Educational Organizations (3 Credit Hours)
This course explores various facets of human resource administration in educational organizations. Topics covered include organizational equity in strategic planning and compensation, employment justice in recruitment, selection, staff development, performance appraisal, discipline, and an introduction to unionism.
Outcomes:
Students will be able to create a strategic plan from recruitment through continual employment for both certified and classified personnel that supports the school's mission and promotes educational excellence for all

ELPS 470 School Supervision (3 Credit Hours)
This course is designed to examine school formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Students will be able to demonstrate understanding of the nature of teaching and learning, develop the skills for conducting the pre-conference, classroom observation, and post-conference of the clinical supervision model, and develop the capacity to facilitate action research, study teams and cooperative supervision

ELPS 471 MTSS for Instructional Leaders (3 Credit Hours)
The purpose of this course is to provide candidates with the skills to (a) identify and assess the universal level of academic and behavior programming (b) create and sustain secondary and tertiary systems of support (targeted group or individual interventions) (c) develop continuous improvement plans to support the development of the necessary MTSS systems, practices, and processes.

ELPS 472 Administration of Special Education and Pupil Services (3 Credit Hours)
An exploration of legal provisions governing the most current legal issues related to special education and No Child Left Behind, including state rules, regulations and case law. Also examined are the practical issues, such as administering fiscally and ethically responsible service delivery models at the local level. Leadership dimensions necessary to enhance the learning process in an inclusive setting are a special concern.
Outcomes:
Students will be able to demonstrate an understanding of legal provisions of special education and No Child Left Behind, as well as the practical issues, such as administering fiscally and ethically responsible inclusive service delivery models at the local school building level

ELPS 473 Problems in School Supervision (3 Credit Hours)
This course focuses on the critical skills of leading supervision for school leaders within districts and schools. Upon completion of this course, candidates will practice supervision and evaluative skills related to the delivery of curriculum and student outcomes.

ELPS 474 Curriculum Development for Instructional Leaders (3 Credit Hours)
This course focuses on the critical skills of leading curriculum development within schools. Upon completion of this course, candidates will practice leadership skills related to the delivery of curriculum.

ELPS 475 Human Resource Administration for the School District Leader (3 Credit Hours)
Within this course, students explore various facets of human resource administration in educational organizations at the district/macro level. Human resource leadership, as it specifically relates to promoting district vision and mission, will be researched and simulated to develop preferred professional practice that promotes integrity and social justice for the entire educational community.
Outcomes:
Students will demonstrate an understanding of: strategic planning, human resources' system auditing, supervision and evaluation of educational administrators, unions, and collective bargaining

ELPS 476 Technology in School Administration (3 Credit Hours)
A laboratory-based course on the issues and uses of technology and the related skills of applying technology to problem solving in school administration. This includes design of information systems, networks and data bases, software selection and use, instruction, student testing and program evaluation, scheduling, communications and managing school support services. This course includes examining issues with an emphasis on data based decision-making.
Outcomes:
Students will be able to examine school leadership issues through the use of technology in order to make data-driven decisions

ELPS 480 Residency Seminar for MEd Administration & Supervision (0-3 Credit Hours)
This course is part of a sequence of courses for students in the Master's Principal Preparation Program. Restricted to students in M.Ed. Administration and Supervision. Students will meet with their assigned university coach to make progress in completing the electronic onboarding plan.

ELPS 481 Mission Driven Leadership for Principals (3 Credit Hours)
This course will provide the basis for making sound theoretical, ethical, and practical administrative decisions with particular attention given to data-driven decision making to improve student outcomes.
Outcomes:
Candidates will gain an understanding of various leadership theories, adult learning theory and professional practice, and applying leadership theory to improve student outcomes

ELPS 482 School Supervision for Principals (3 Credit Hours)
This course is designed to examine the broad concept of supervision as well as formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions for supervision of teaching that supports the ongoing growth and professional learning of teachers, leading to improved student outcomes for every student

ELPS 483 Human and Fiscal Resource for Principals (3 Credit Hours)
This course explores various facet of human and fiscal resource management in educational organizations through theory and practical application.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to take a strategic approach to resource management in educational organizations

ELPS 484 School Law, Policy Formation, and Community Involvement (3 Credit Hours)
This course covers school law and policy formation designed for candidates seeking to become building leaders in schools.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to understand school law and ethical decision making with particular attention given to building safety, current legal "hot topics," understanding the governance of the local school board and working with the various communities associated with a school

ELPS 485 Instructional Leadership: Equity and Justice (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences. Students study community engagement, board relations development, cultural and community context through the lens of district instructional leadership. Scope: Access, equity and ethical leadership. Restricted to LUC Graduate students.
Outcomes:
Develop appropriate procedures and relationships for working with local governing boards; Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs

ELPS 490 Introduction to Educational Policy Studies (3 Credit Hours)
This policy analysis course examines the general conceptual, ethical, and empirical issues related to educational policy-making at both the macro (national, regional, and state) and micro (local and institutional) levels.
Outcomes:
Students will be able to demonstrate a knowledge of educational policy analysis strategies

ELPS 491 Issues in Educational Policy (3 Credit Hours)
Analysis of selected case studies of important policy issues from various levels of education.
Outcomes:
Students will be able to identify, review, and critically analyze significant educational policy issues

ELPS 498 Independent Study (1-3 Credit Hours)
Pre-requisites: consent of instructor
No course description is available

ELPS 499 Directed Research (1-3 Credit Hours)
Pre-requisites: Consent of instructor
In-depth independent research developed jointly by the student and a faculty director. The topic should be one with which the student has some familiarity so that the research can be an examination of it in-depth.
Outcomes:
Learning outcomes are created individually for each Independent Study

ELPS 500 Seminar in Current Educational Literature (3 Credit Hours)
Overview of methods and techniques of bibliographic research related to students' research material.

ELPS 501 Leadership / Capacity Building Organizations (3 Credit Hours)
M.Ed. IEPE Cohort: Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy. Emphasis will be placed on organizational cultures and organizational learning. Restricted to IEPE Cohort.
Outcomes:
Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy; Emphasis will be placed on organizational cultures and organizational learning

ELPS 503 Critical Perspectives on the Internationalization of Higher Ed (3 Credit Hours)
In this course, students will examine the following question, "What does meaningful, socially responsible internationalization look like?" The course will expose students to a diversity of approaches to internationalization and to prepare them to make informed decisions about internationalization strategies that are 1) congruent with their institutions' mission, constituencies, resources, and values; 2) informed by best practices and empirical research; and 3) rooted in principles of equity and inclusiveness.
Outcomes:
Upon completion of this course, students will be able to articulate the different modalities of internationalization and the main geopolitical, societal, and economic forces shaping the internationalization of higher education worldwide; reflect on how these forces translate into concrete strategies, expectations, and challenges surrounding internationalization at the institutional level; critically analyze the impact that internationalization can have on students, faculty, and other institutional actors, especially in terms of perpetuating inequitable, discriminatory, and exclusionary societal structures; and integrate this knowledge into empirically-supported recommendations for internationalization strategic planning in real-world settings

ELPS 504 Advanced Financial Strategies in Higher Education (3 Credit Hours)
The purpose of this course is to build on a basic understanding of program budgeting to examine institutional financial strategies; state, and federal institutional funding; and public and financial aid polices that effect who has access to higher education. Apply higher education budget fundamentals to gain insight on institutional financial challenges. 2. Identify and assess the impact of the macro-dimensions of finance and how they inform campus level dynamics (e.g., budgeting, planning, equity) that complicate institutional financial decision-making
Outcomes:
Students should be able to demonstrate observable growth in their ability to: 1

ELPS 505 Seminar in Leadership Theory (3 Credit Hours)
This course is designed to provide grounding in leadership theory and research. Critical perspectives will be used to examine the evolution of leadership theory, interdisciplinary conceptualizations of the topic, administrative applications of theory, and pedagogy for teaching and learning about leadership.
Outcomes:
Students will be able apply critical perspectives to the deconstruction and reconstruction of leadership in professional practice

ELPS 506 Strategic Executive Leadership in Higher Education (3 Credit Hours)
This course examines strategic executive leadership in higher education and in particular leader role performance in complex organizational structures. This exploration is grounded in the rich, interdisciplinary body of knowledge on leadership theory and complemented by the infusion of critical perspectives.
Outcomes:
Students will be able apply and engage in executive leadership from a perspective grounded in social justice

ELPS 507 Advanced Governance in Higher Education (3 Credit Hours)
This course examines the governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 508 Equity and Justice in Higher Education (3 Credit Hours)
his workshop/course focuses on diversity, equity, inclusion, and justice in higher education, providing a learning environment for advanced discussions, as well as opportunities for EdD doctoral students to apply learning to practice.
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the area of diversity, equity, inclusion and justice in higher education

ELPS 509 Introduction to Analytics in Higher Education (3 Credit Hours)
This course is designed to help students leverage data sets and systems in applied ways to improve their leadership. The course will cover key education data portals (e.g., IPEDS, Census data, proprietary systems) as well as introduce students to different data visualization techniques (e.g., geospatial mapping, infographics, etc.). Students will produce reports or grant proposals relevant to their career trajectory as a key deliverable.
Outcomes:
After taking a class on data analytics, students should have acquired a range of technical and nontechnical skills, as it relates to higher education as well as gained an understanding of the key concepts and methods used in data analytics

ELPS 512 Sociology of Teaching (3 Credit Hours)
This course investigates the practice and profession of teaching of teaching from a sociological perspective. Empirical data and social theory will guide students' learning about the practice and profession of teaching and how different demographic, professional, organizational, and political factors shape them. Students will expand their factual knowledge about the historical and contemporary topics related to the sociology of teaching, and will develop their ability to investigate, analyze and communicate effectively about topics related to the practice and profession of teaching.

ELPS 514 The School as Organization (3 Credit Hours)
This course will expose students to organization theory and its application to understanding the operation, performance, and effectiveness of educational organizations.
Outcomes:
Students will become familiar with foundational literature in organization theory and organizational behavior, and will develop their ability to apply concepts from organization theory and organizational behavior to their analysis to educational organizations

ELPS 515 Seminar in Education Policy (3 Credit Hours)
This course is an advanced seminar that will focus on a specific education policy topic. Students will read in-depth on the course topic (reading both theoretical literature and case material) and will develop their understanding of texts and the topic through intensive seminar discussion. Student develops an advanced understanding of the seminar topic and knowledge of the research literature related to it.

ELPS 520 Seminar in the Philosophy of Education (3 Credit Hours)
An in-depth examination of a topic in educational theory.
Outcomes:
Student develops an advanced understanding of the ways in which an educational issue can be analyzed

ELPS 525 Practicum Higher Education I (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 526 Practicum Higher Education II (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 527 Higher Education Capstone (3 Credit Hours)
ELPS 527 will be offered in both Fall and Spring semesters for all Higher Ed students. This course is a culminating seminar course that facilitates broad conversations, audits and guidance about values discernment, job search process, critical considerations for job fit and placement -successful transition to Higher Ed job market and Higher Ed work communities.

ELPS 528 Internship Higher Education II (1-3 Credit Hours)
Required Internship Experience for graduate Higher Education programs.

ELPS 529 Seminar in Higher Education (3 Credit Hours)
Pre-requisites: consent of instructor
This course is a topical seminar, typically for doctoral students, addressing one or more historical and/or contemporary topics or issues within higher education.
Outcomes:
Students will demonstrate a deepened understanding of one or more topics or issues and the ability to critically analyze these topics/issues using research and theory

ELPS 530 Proseminar: Higher Education (3 Credit Hours)
This course is restricted to Higher Education Doctoral Students

ELPS 550 Seminar on Globalization and Education (3 Credit Hours)
This advanced comparative education seminar examines globalization (economic, social and cultural) both as something that has a profound impact on schooling and as something that education produces. The course will focus on how globalization can be productively theorized and studied by social scientists.
Outcomes:
Students in the course will understand and be able to critically evaluate the diverse range of approaches used by comparative and international education scholars to study education and globalization

ELPS 560 Seminar in School Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course provides specific practical recommendations for those leaders who seek to transform their schools into professional learning communities. Students will analyze their current organizational culture and core beliefs through the reframing process.
Outcomes:
Using Wiggins and McTighe (2005 backwards-design model, students will create a needs assessment to gather data on one of their current organization's core beliefs; From this data, students will create a school improvement plan for the change process to close the gaps between the current and desired reality of their organization

ELPS 561 Seminar in Current Issues in Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is intended to provide future and practicing administrators with a mindful framework for raising the questions to realize the moral/ethical dimensions that are currently at stake in our educational institutions with an emphasis on ethical dilemmas involving human resource administration.
Outcomes:
Using professional obligations as a framework for dialogue, students will examine the philosophies of utilitarianism, deontology and ethic of care as they pertain to human resource management in schools; Based on these three ethical lenses, students will create their own professional code of conduct and apply it to resolve multiple ethical dilemmas surrounding human resource management and leadership in schools

ELPS 562 Practicum School Administration (3 Credit Hours)
Pre-requisites: consent of program director and must be either the last course or next to last course of a student's program
Required of all students seeking administrative certification, i.e. Illinois Type 75 Principal or Superintendent. This course involves students in leadership activities to be carried out at a work site under the supervision of the university instructor and a cooperating administrator at the work site. Students must complete a minimum of 100 hours of approved leadership activities. Students are required to attend an orientation session during the semester prior to the semester in which they enroll in the practicum. Practicum is offered only in the fall and spring semesters.
Outcomes:
Students will be able to demonstrate competencies in a myriad of leadership and administrative areas relevant to the leadership role appropriate to the certification sought, the school principal or the school superintendent

ELPS 563 Administrative Internship (3-6 Credit Hours)
This course is designed as a supervised internship to provide aspiring teacher leader an on-the-job leadership experience in an elementary, middle, or secondary school. The on-site administrative mentor will have appropriate credentials and experiences for the level and department in which the internship is scheduled and experienced. The internship provides the opportunity for teacher leader candidates to relate knowledge and skills acquired through formal course work, readings, research, and simulations to actual teacher leadership experiences. The internship is both an active and a reflective experience designed to encourage the intern to examine the potential role of teacher leaders and functions of schooling and education in light of changing demographics, current local and national trends, and global issues.

ELPS 564 Education Policy Internship (3 Credit Hours)
Pre-requisites: ELPS 405 & ELPS 410
This course provides Cultural & Educational Policy Studies graduate students with an engaged learning opportunity that integrates coursework with professional practice in the context of education policy information, analysis, implementation and/or evaluation and research. Students develop and refine professional skills as well as identify and reinforce connections between graduate coursework and professional experiences.

ELPS 565 International Education Internship (3 Credit Hours)
Supervised experience with an international governmental or non-governmental agency approved by the Director or Associate Director of the Center for Comparative Education.
Outcomes:
Students will demonstrate working knowledge of an internationally oriented organization whose activities are related to their area of scholarship

ELPS 566 Principal Internship One (3 Credit Hours)
This is the first of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 567 Principal Internship Two (3 Credit Hours)
This is the second of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.

ELPS 568 Principal Internship Three (3 Credit Hours)
This is the third of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 569 Principal Internship Four (3 Credit Hours)
This is the fourth of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 570 Supervision Seminar (3 Credit Hours)
Provides students with an in-depth examination into a special topic. Topics vary by section. Course may be repeated.

ELPS 571 Seminar in Current Issues in School Supervision (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is designed to examine current issues in supervision and their impact on providing instructional leadership directed toward school improvement and reform.
Outcomes:
Students will be able to demonstrate a critical examination of issues in the differentiated model of supervision, develop the skills for developing collaboratively a learning organization that frames, analyzes, and resolves problems in instructional improvement, and develop the capacity to work with faculty and other stakeholders to identify needs for professional development, to organize, facilitate, and evaluate professional development, and to ensure that professional development activities focus on improving student outcomes

ELPS 580 Residency Seminar for Students in Educational Leadership (0-4 Credit Hours)
A seminar taken to address the interests and needs of students during Ed Leadership studies. The topics include preparation for the comprehensive examination, Writing Workshop, Internship planning and on-boarding, planning and writing the capstone or dissertation and other topics planned by the EDLD faculty.
Outcomes:
EDLD Students will be able to demonstrate understanding of the various seminar topics presented - internships, dissertation, comprehensive exams

ELPS 595 Thesis Supervision (1 Credit Hour)
This course is a Thesis Research and Writing course. Student is engaged in thesis writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and thesis student. Culminating project is Thesis and thesis defense. Completion of all forms required for thesis completion are the responsibility of SOE graduate student.

ELPS 600 Dissertation Supervision (1 Credit Hour)
This course is a Dissertation Research and Writing course. Student is engaged in dissertation writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and dissertation student. Culminating project is Dissertation and Dissertation defense. Completion of all forms required for Dissertation completion are the responsibility of SOE graduate student.

ELPS 601 Capstone Supervision (1 Credit Hour)
This course is to develop a Capstone project. Students are engaged in planning and writing of the capstone project; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and capstone student. Culminating project is the Capstone Project and Capstone defense. Completion of all forms required for Capstone completion are the responsibility of SOE graduate student.
Outcomes:
School of Education students will complete and defend their required capstone project for an EdD degree; Students will research, write and defend their capstone project under the supervision of a Capstone Chair and Capstone committee

ELPS 605 Master's Study (1 Credit Hour)
This is Master's study course designed for in-depth study, writing and research.

ELPS 610 Doctoral Study (1 Credit Hour)
Restricted to School of Education Doctoral students (PhD & EdD). This course can only be taken two times during a doctoral student's career.

ELPS 620 Dissertation Research (3 Credit Hours)
Conducting research is a complex, demanding, and time-consuming task. The instructor suggests that while one can be familiar with different paradigms of inquiry, one may not necessarily know how to actually undertake the task of planning and effectively proposing an investigation (Locke, et al, 1987). Others assert that what is important and might be challenging is to frame a valid problem and a specific purpose, in addition to ask the right questions which will give direction to relevant research activities (McEwan & McEwan, 2003). Given the challenge and complexity of designing proposals and conducting research activities, it is anticipated that doctoral students may benefit from additional learning experiences that may lead to the successful completion of their research projects (Ovando, 2010) including a support team to facilitate the task of planning a dissertation proposal. As others note, "Having access to a group of peers who are also engaged in the doctoral studies journey provides an excellent source of moral support. In addition, cohort members provide empathetic listening, share resources and offer honest and constructive feedback" (Ovando, Ramirez & Shefelbine, 2008, p. 45). In the spirit of the writing workshop (Calkins, 1986) and the professional learning community (Kanold, 2010), it is expected that all students will engage in literature searches, scholarly writing, and collaborative inquiry in a respectful and productive way in order to enhance their research capacity (conceptual, technical and interactive skills), attitudes and dispositions. Such engagement will lead to the development of a sound dissertation proposal, CITI research approval as a researcher, and to the preparation for the rigor of conducting investigations The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421), and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods.

ELPS 621 EdD Capstone Research (3 Credit Hours)
This course focuses on the application of research understandings, knowledge, concepts and terminology so this is an opportunity for students to incorporate research information, foundational knowledge and conceptual understanding of research methods. While the nature of the capstone project is more personal, this scholarly work is a culmination of student learning. 2) Learn, design, and write the initial chapters of their capstone project. 3) Provide meaningful feedback to their peers regarding specific areas of their capstone project development and writing. 4) Understand the importance of the capstone committee chairperson and other members of the committee.
Outcomes:
1) Enhance their research inquiry capacity and ability to critically analyze research proposals, research reports and reviews of literature

ELPS 661 Internship in School Business Management I (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional capacities related to ethical school business management. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

ELPS 662 Internship in School Business Management II (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional related to ethical school business management. This course completes the state's required two semesters of CSBO Internship. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

Research Methods (RMTD)

RMTD 400 Introduction to Research Methodology (3 Credit Hours)
This course provides an introduction to research methods used in education and the social sciences including qualitative and quantitative research designs.
Course equivalencies: RMTD400 / CIEP495
Outcomes:
Students will be able to critique the argument and methods used in a primary research study, to integrate in a written literature review the results of studies in order to present an argument, and to understand the ethical issues involved in research with human subjects

RMTD 403 Survey Research (3 Credit Hours)
This course provides an introduction to the design and analysis of survey research, and the psychological foundations of questionnaire design.
Course equivalencies: RMTD403 / CIEP494
Outcomes:
Students will be able to develop a survey or questionnaire, design a study using a survey or questionnaire, gather and record data from a survey or questionnaire, analyze the resulting data from a survey or questionnaire, and present and interpret the results in oral and written form

RMTD 404 Introduction to Educational Statistics (3 Credit Hours)
This graduate course provides an introduction to descriptive and inferential statistical methods used in education, psychology and the health professions.
Outcomes:
Students will be able to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to understand the assumptions and limitations of using statistical methods for analysis

RMTD 406 Educational Evaluation (3 Credit Hours)
The course will focus on the theories, models, strategies and practices that are germane to educational evaluation, including the history of evaluation studies in the social sciences, the various roles of the evaluator in the development and assessment of programs, evaluation theory and social policy.
Course equivalencies: RMTD406 / CIEP496
Outcomes:
Students will be able to state the purposes, benefits and importance of evaluation research, describe the history and culture associated with evaluation in the US, to read and critique a range of evaluation proposals and reports, to compare and contrast different approaches to evaluation, to develop a proposal for a program evaluation including writing measurable program objectives, planning data collection methods and presenting results to consumers

RMTD 407 Introduction to Evaluation Theory (3 Credit Hours)
This course introduces students to program evaluation theory in the social sciences, including various conceptualizations of evaluation, historical development of the field, purposes of evaluation, and social and political contexts of evaluation practice.
Outcomes:
Students will engage major theoretical concepts of the field - methods, use, values, and practice - from the perspectives of various evaluation theorists; Throughout course readings, discussion and assignments, students will have the opportunity to critically reflect on understandings of social justice, implicitly and explicitly, evident in the evaluation theories

RMTD 408 Evaluation and Evidence in Cross Cultural Contexts (3 Credit Hours)
M.Ed. IEPE Cohort: Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders. Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence. Enrollment Restrictions: M. ED. Online Cohort IEPE.
Outcomes:
This course focuses on the writing, presentation and publication dimensions of evaluative work; Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders; Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence

RMTD 410 Communicating Research Findings (3 Credit Hours)
This course will expose students to strategies for developing clear arguments in engaging, relevant, content-rich papers and presentations. This course will familiarize students with conventions of written research that improve acceptance and publication rates. It will also explore alternative forms of representing research findings.
Outcomes:
Students will have enhanced skills in communicating research findings to diverse audiences, both verbally and in writing

RMTD 411 Introduction to Human Performance Technology (3 Credit Hours)
This course introduces students to the models, practices and competencies associated with field of Human performance improvement.
Outcomes:
Students will be able to apply the practices associated with the roles of an HPT professional; Students will conduct an analysis of an organizational problem and plan an appropriate intervention and change management strategy

RMTD 412 Needs Assessment (3 Credit Hours)
In this course, students will learn the principles of needs assessment to improve programs and organizations. Needs assessments are a systematic set of procedures to identify within an organization a set of priorities to improve programs and/or organizations.
Outcomes:
Students will plan a needs assessment, develop data collection tools and conduct a practice assessment

RMTD 415 Practicum in Organizational Evaluation (3 Credit Hours)
This practicum course is intended to help candidates integrate theoretical and research coursework with the practice of organizational evaluation and to reflect on their own development as professionals in the service of social justice. The practicum project involves the planning, conducting and reporting results of an evaluation, human performance improvement, or needs assessment project.
Outcomes:
During the course of the practicum candidates are expected to complete a practicum project

RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Method (3 Credit Hours)
Pre-requisites: RMTD 400 or equivalent
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

RMTD 421 Educational Research II: Building a Body of Evidence Quantitative Method (3 Credit Hours)
This course introduces students to the theories, traditions and components of quantitative research in the social sciences, integrating basic design principles of quantitative research with commonly used statistical methods for analyzing data from these designs.
Outcomes:
Students will be able to recognize and discuss various epistemologies, designs, theories and ethical issues in quantitative research, to critique quantitative studies in terms of design, methodology, validity, statistical analysis, results, ethics and conclusions in oral and written critiques, to apply statistical methods to quantitative data using a statistical analysis computer program, to understand and discuss the theoretical basis and underlying assumptions of various statistical methods in the context of common quantitative study designs, and to analyze, interpret and present the findings of a data analysis

RMTD 422 Single Subject Design (3 Credit Hours)
Pre-requisites: RMTD 400
This course will introduce students to single-case experimental designs as they apply to research and practice in special education and other educational settings. Methods for single-case experiments are applicable to monitoring response to intervention as well as research on low-incidence conditions. Students will learn to critique single-subject experimental research studies and to design studies to monitor treatment interventions in educational settings.

RMTD 430 Psychological Measurement (3 Credit Hours)
This course introduces the assumptions underlying measurement in psychology and education including types of measurements, test development, and theoretical, quantitative and practical issues of reliability, validity and scoring.
Course equivalencies: RMTD430 / CPSY430
Outcomes:
Students will be able to critique studies of the development, reliability and validity of measurement instruments, and to design and plan a study of the reliability and validity of a measurement instrument

RMTD 432 Item Response Theory (3 Credit Hours)
No course description is available
Course equivalencies: RMTD432 / CPSY488

RMTD 440 Mixed Methods Research (3 Credit Hours)
Pre-requisites: RMTD 420 and RMTD 421; Enrollment is restricted to Graduate Education Students
The course addresses the theory and practice of mixing inquiry methodologies in educational and social inquiry. The course covers selected roots of the contemporary interest in mixing methods, various conceptualizations of mixed methods design and analysis, and challenges of mixed methods practice. Students will develop a historical understanding of mixed methods and various frameworks for mixed methods, as well as basic competencies in mixed methods practice.

RMTD 470 Case Study Research (3 Credit Hours)
Pre-requisites: RMTD 420
This course in an in-depth study of a qualitative research methodology: case study. This course allows students to carry out a case study, as well as engage issues common across qualitative research methodologies, such as the flexibility in research design, the ethical dimensions of qualitative research, and qualitative data analysis. Course content is applicable to research and evaluation contexts in education as well as other social and human service practices.

RMTD 481 Advanced Educational Statistics (3 Credit Hours)
This course covers statistical inference, hypothesis testing, estimation of power, factorial analysis of variance, multiple regression and selected non-parametric statistical techniques.
Course equivalencies: RMTD481 / CPSY490
Outcomes:
Students will be able to identify and justify the use of particular statistical techniques for a given research question, to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to critique the assumptions and limitations of statistical techniques in a given analysis

RMTD 482 Introduction to Linear Models (3 Credit Hours)
This course covers simple/multiple regression, one- and two- way analysis of variance (ANOVA) followed by multiple comparisons, and analysis of covariance (ANCOVA). Knowledge of basic algebra is required; knowledge of calculus is not required.
Course equivalencies: RMTD482 / CPSY493
Outcomes:
Students will be able to identify and justify the use of particular univariate statistical techniques for a given research question, to analyze quantitative data using SPSS, and to interpret the results of a statistical analysis in written and oral presentations

RMTD 483 Multivariate Statistics (3 Credit Hours)
Pre-requisites: RMTD 421 (B or Better)
This course covers multiple regression, multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), repeated MANOVA, discriminant analysis, canonical correlation and possibly principal components/factors analysis. Knowledge of basic algebra and univariate inferential statistical techniques is required; knowledge of calculus is not required.
Course equivalencies: RMTD483 / CPSY492
Outcomes:
This course equips students with knowledge and hands-on experience for conducting valid quantitative research focusing on multivariate statistics; Students will be able to identify and justify the use of particular multivariate statistical techniques for a given research question, to analyze multivariate data using SPSS, and to interpret and communicate the results of a statistical analysis in written and oral presentations

RMTD 484 Hierarchical Linear Models (3 Credit Hours)
This course examines the conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities) using methods for hierarchical linear models.
Course equivalencies: RMTD484 / CPSY491
Outcomes:
Students will be able to identify and justify the use of hierarchical linear models for a given research question, to analyze multilevel data using a statistical computing package, to interpret and communicate the results of a hierarchical linear model in written and oral presentations, and to critique the assumptions and limitations of the use of hierarchical linear models in a given analysis

RMTD 487 Factor Analysis (3 Credit Hours)
No course description is available

RMTD 488 Meta-Analysis (3 Credit Hours)
This course introduces statistical methods in the design and analysis of quantitative research syntheses.
Outcomes:
Students will be able to design and plan a small-scale research review, to locate and evaluate the studies for a review, to code and organize the studies for a review, to analyze the effect sizes from a review, and to produce a comprehensive written synthesis of the study results

RMTD 520 Research Seminar I (3 Credit Hours)
This course will provide doctoral students with an intro to their PhD/EdD program as well as an intro to the dissertation process. The course will focus on methods and processes involved in developing a prospectus and review of literature for a dissertation.
Outcomes:
Students will develop a plan of study for their degree as well as prospectus for their dissertation

RMTD 530 Seminar in Tests & Measurements (3 Credit Hours)
Educational and psychological tests are commonly used to measure latent traits (e.g., knowledge, aptitude, achievement, attitude, and personality), often with the goal of making inferences on individuals or groups of individuals. Item response theory (IRT) measurement models are useful tools in examining the quality of the data that arises from the administration of such tests, which in turn allows us to make judgements about the validity of the test scores (or latent trait estimates) and the quality of the tests (are the items confusing and/or are they biased). This course will introduce students to commonly used IRT models for analyzing dichotomous (e.g., 0=incorrect and 1=correct) and polytomous (0=never, 1=sometimes, 2=always) test data. While much of the course will be application oriented, some technical details that facilitate the understanding of the IRT and highlight the advantages of it over classical test theory (CTT) will be provided. Knowledge of basic algebra, linear modeling, and CTT is required.
Course equivalencies: RMTD530 / CPSY590

RMTD 580 Selected Topics (3 Credit Hours)
What is the role of qualitative critical research when the need for social justice has never been greater? (p. 1) ask Denzin and Lincoln (2017). In this course, we will begin by reviewing systems of inquiry within research in general explore as a basis for our deep dive into the importance of qualitative critical inquiry. We will focus on the meaning and discourses around critical qualitative research by exploring four methodologies: counter-storytelling, PhotoVoice, Youth Participatory Action Research, and Portraiture. Guest scholars who specialize in such methods will describe their purpose and process with qualitative critical research. Students will reflect on readings, write an article critique, and collaboratively present on a methodology and conceptual framework. Students will leave this course able to speak the language of qualitative research in new, robust, and meaningful ways coupled with a better understanding of who they are as researchers and the possibilities of social transformation through qualitative design.

RMTD 590 Seminar:Advanced Mixed Methods (3 Credit Hours)
Pre-requisites: RMTD 420, 421
This course explores the theory and practice of mixed methods research in program evaluation and applied social science research.
Course equivalencies: RMTD590 / CPSY580
Outcomes:
Students will become familiar with selected roots of the contemporary interest in mixed methods research and evaluation, as well as various approaches to mixing research paradigms, purposes, designs, analyses, methods, and so on; Students will develop knowledge for identifying and critiquing mixed method research; They will also be able to develop a mixed methods study

Teaching, Learning & Leading (TLSC)

TLSC 401 Language, Learning & Development Theories in Practice (2 Credit Hours)
Students will learn key principles and stages of language acquisition, developmental and learning theories through clinical experiences with children from birth to grade 12. Field experiences provide opportunities to explore ways in which physical characteristics, communication skills, cognitive capacities, and the social-emotional needs of children are used to understand theory and inform adult-child interaction and developmentally appropriate practice.
Outcomes:
Students will explore the ways in which social, cultural, and environmental contexts shape language, development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with every age range from birth through grade 12

TLSC 403 Teaching for Social Justice and Equity (3 Credit Hours)
This module targets candidates' understandings of the School of Education's mission of professionalism in service of social justice, the core tenets of culturally responsive pedagogy, and the applications via backwards design and Universal Design for Learning. Candidates will explore their own identities as future teachers and consider how teachers' identities and experiences transfer into and influence instructional practice with students.
Outcomes:
Candidates will complete a self-documentation project in which they explore their own identities and recognize how their thinking, behavior, and being are influenced by their own personal experiences, race/ethnicity, social class, language, religion, age, etc

TLSC 404 Constructive Learning Environments for Diverse Students (3 Credit Hours)
This module is designed for candidates to discern and utilize students' needs and design classroom environment and instruction to support learning and development. In this module, candidates hone knowledge and skills for working with students with special needs, specifically taking the lens on social, emotional, and behavioral needs.
Outcomes:
Candidates will demonstrate learning through the completion of a functional behavioral analysis (FBA) of one student within the specific environmental and instructional classroom context

TLSC 406 Educational Policy for Diverse Students (3 Credit Hours)
This module specifically engages teachers in looking at the policy related to diverse students in schools, particularly language policy (affecting ELLs and bilingual students) and special education policy (affecting students with special needs).
Outcomes:
Teacher candidates will explain the role of policy in educational practice, including the role of the teacher in advocating for change within the educational institution

TLSC 407 Individualized Assessment and Instruction for Diverse Students (3 Credit Hours)
This module is specifically designed for teacher candidates to appreciate, discern, and utilize the individual needs of students to plan instruction and support student achievement. In this module, student achievement is not only conceptualized as academic, but also social, emotional, behavioral, cultural, and linguistic. Through the use of case study research to conduct individualized assessments with diverse students, candidates will be able to apply learning to the instructional context with culturally, linguistically, and cognitively diverse students, specifically working with a labeled English language learner (ELL) and a student with special needs.
Outcomes:
Through the use of case study research to collect individualized, authentic language and literacy assessments, candidates will apply learning through work a labeled English learner

TLSC 410 Language, Culture and Pedagogy in Bilingual Classrooms (3 Credit Hours)
This module deals with bilingual education, schools, classrooms and learners with an emphasis on building off of students' cultural and linguistic resources to utilize and maintain native language. In order to accomplish these important building blocks of bilingual education, teacher candidates will inquire into and analyze the school's approach to family and community involvement with a specific lens on L1 maintenance and bilingualism.
Outcomes:
Candidates will engage with parents, families and communities to inform the analysis of the school and classroom's alignment to language use in homes and communities

TLSC 420 Teaching Mathematics in Elementary Grade Classrooms (2 Credit Hours)
This module introduces teacher candidates (students) to developmentally appropriate instruction in mathematics in the elementary grades and how to use assessment data to inform instruction.
Outcomes:
Teacher candidates will develop, teach, and reflect upon mathematics instruction that develops conceptual understanding, targets the use of Specialized Content Knowledge, guides student problem solving through extended response questions, builds mathematical knowledge, strategies and explanation

TLSC 421 Teaching Science in Elementary Grade Classrooms (2 Credit Hours)
Pre-requisites: Graduate Education Students Only
This module introduces candidates to the discipline of science, providing them experiences engaging in the teaching and learning of elementary science, and specifically works to help candidates integrate literacy into their science instruction. Candidates develop knowledge and skills needed to teach science through an inquiry approach and integrate literacy into their science teaching.
Outcomes:
Candidates will set and work towards professional development goals related to science content, science pedagogy, and science assessment; They will compile a portfolio of evidence to show they have worked towards their goals and reflect on how their understanding of science teaching and learning has shifted throughout the module

TLSC 422 Teaching Social Studies in Elementary Grade Classrooms (2 Credit Hours)
Pre-requisites: Graduate School of Education Student Only
This module introduces candidates to the disciplines of the social studies, providing them experience in the teaching and learning of elementary social studies, and specifically helps candidates integrate literacy into their social studies instruction. Candidates develop knowledge and skills needed to teach social studies through an inquiry approach and integrate literacy into their social studies teaching.
Outcomes:
Teacher candidates will develop and implement an interdisciplinary social studies unit over the course of the module and will develop an essay of demonstrating their understanding of role social studies plays in the elementary school curriculum

TLSC 425 Teaching Internship in Informal Education Settings (3 Credit Hours)
The internship experience builds on experiences teacher candidates have in the TLLSC program working with local museums. Candidates will complete internship hours on site at assigned museum, working directly with the museum's Ed department. In addition, they will participate in online seminar meetings designed to make sense of the internship experiences , digest the relevant literature and draw research to practice connections. Develop and assess personal learning objectives following Loyola Center for Experiential Learning protocols.

TLSC 426 Informal Science Education Seminar (3 Credit Hours)
This course examines current issues around teaching and learning in informal science education (ISE). Students will develop and apply an understanding of learning theories related to learning in informal science, collaborations between informal and formal science education, issues around access and equity, and research and evaluation related to informal science education.
Outcomes:
Describe characteristics of teaching and learning in informal science settings; Describe practices that support learning and development in informal science settings; Summarize theories and frameworks relevant to understanding teaching, learning and development in informal science settings; Explain the ways in which out-of-school science programs collaborate with and support in-school science teaching and learning; Explain challenges and barriers to collaboration between in and out of school science teaching and learning; Debate the strengths and challenges of particular programs and/or institutions in terms of promoting science interest, engagement, and learning; Critique efforts to broaden participation in informal science and learning, including people with physical disabilities, diverse learning needs, and from minority backgrounds; Summarize current and historical research and evaluation priorities, approaches and findings related to informal science education

TLSC 430 Typical and A-Typical Development (2 Credit Hours)
This module further develops and deepens candidates' understanding and application typical and a-typical development of youth. Candidates use information about human development to develop individualized support plans for students with special needs.
Outcomes:
Teacher candidates will reflect information related to the ways children develop a-typically and develop a mock individualized support plan for review

TLSC 431 Significant Disabilities and Life Planning (2 Credit Hours)
This module further develops and deepens candidates' understanding and application of the develop support for people with disabilities. Candidates use information regarding special needs to identify appropriate support and intervention models.
Outcomes:
Teacher candidates will apply information related to students with significant support needs within individualize education plans

TLSC 432 Assistive and Adaptive Technology (2 Credit Hours)
This module further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to identify appropriate assistive and adaptive technology supports.
Outcomes:
Teacher candidates will apply information related to students with significant support needs when identifying assistive and adaptive technology to be incorporated within individualize education plans

TLSC 433 Transition Planning (2 Credit Hours)
This module further develops and deepens candidates' understanding of support for people with disabilities. Candidates use information regarding special needs to develop transition support plans.
Outcomes:
Teacher candidates will apply information related to students with significant support needs when supporting the development of the transition components of individualized education plans

TLSC 440 Language and Literacy (3 Credit Hours)
This module introduces candidates to the foundational knowledge for effective literacy instruction, including phonemic awareness, phonics, vocabulary, fluency, and comprehension. Candidates develop the knowledge and skills required for core curriculum based literacy instruction, then apply these skills and knowledge while designing and teaching lessons focused on supporting linguistically diverse students language and literacy development through the use of research based literacy strategies.
Outcomes:
Teacher candidates will learn to design and teach lessons, focusing on standard-based reading skills to linguistically diverse students through use of research based reading strategies

TLSC 442 Disciplinary Literacy (3 Credit Hours)
This module supports candidates in developing their knowledge and skills related to literacy in discipline specific contexts, with an emphasis on culturally responsive texts, evidence based strategies, data based decision making skills, and new literacies to target all students' literacy needs, including those with linguistically diverse backgrounds. Additionally, teacher candidates will collect, represent, and analyze classroom data, and use this analysis to adjust literacy instruction for students, as well as target individual students' needs. Teacher candidates will design and teach disciplinary literacy lessons using data based decision making, as well as technology during lesson delivery.
Outcomes:
Teacher candidates will apply understanding of literacy lesson design, assessment and instruction in discipline specific contexts; They will be required to collect and utilize data to teach targeted standards based reading skills to linguistically diverse students and to utilize technology in their lesson delivery

TLSC 443 Adolescent Literacy Instruction (3 Credit Hours)
This course focuses on developing effective instructional practices that promote the ongoing development of adolescent literac(ies) including essential reading skills, critical literacy skills, multimodal literacy skills, and disciplinary literacy skills. Foundational in the premise that all adolescents have and can develop a variety of literacies that facilitate reading the word to read the world, teacher candidates will develop a repertoire of strategies for building essential reading skills and developing academic language informed by CCSS and WIDA standards. They will also learn how to bring together their content knowledge, understandings of academic language and literacy, criticality, and the importance of using multimodal texts to create lessons that address the needs of all learners, including emerging bilinguals.
Outcomes:
Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity)

TLSC 450 Teaching and Learning in an Area of Specialization (3 Credit Hours)
This module further develops and deepens candidates' (students) understanding and application of designing instruction in an area of specialization. Candidates use data, select essential content, implement strategic pedagogy, and integrate technology to meet the needs of PreK-12 students in a particular curricular area.
Outcomes:
Teacher candidates will reflect on their implementation of the full instructional cycle and after analysis of the data generated from that instruction will identify research that informs instruction future teaching

TLSC 452 Advanced Foundations of Early Childhood Education (1 Credit Hour)

This course is an exploration of contemporary issues in early childhood programs for young children (both typically developing and those with disabilities) aged birth to eight and their families. In this course, graduate students will investigate the interlaced professions of early childhood education, early intervention, and early childhood special education. By learning about diverse settings in which young children and families are served, candidates gain an overview of early education, experience a variety of program models/types, and learn standards of ethical behavior and practice.

Outcomes:

Candidates will understand that effective educators enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups; Candidates will understand that effective educators engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students; Candidates will understand that effective educators use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Candidates will understand that effective educators use data to drive instruction and assess teaching and learning effectiveness; Candidates will understand that effective educators apply knowledge of policy and local, state, national, and international educational contexts to advocate with and for students and families; Candidates will understand that effective educators apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; Candidates will understand that effective educators hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity); Candidates will understand that effective educators explicitly integrate the teaching of reading, writing, communication and technology across content areas; Candidates will understand that effective educators create and support safe and healthy learning environments for all students; Candidates will understand that effective educators utilize information from theories and related research based practices when making decisions and taking action in their professional practice; Candidates will understand that effective educators maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement

TLSC 453 Early Childhood Development and Developmentally Appropriate Practices (2 Credit Hours)

This course provides a framework for understanding early childhood development and the role of early childhood educators in understanding individual development through authentic and other forms of assessment for children aged birth to 5 (including those with special needs) and their families. The course prepares candidates to understand and assess children's development, as well as to participate in developmentally appropriate assessment, select classroom environments, curriculum, and interventions/instructional strategies for infants, toddlers, and preschoolers. This course emphasizes that practices are only developmentally appropriate when families are included in these processes. Students will gain knowledge and skills required to serve as inclusive educators and assessment leaders in early childhood and special education.

Outcomes:

Candidates will understand that effective educators enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups; Candidates will understand that effective educators engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students; Candidates will understand that effective educators use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Candidates will understand that effective educators use data to drive instruction and assess teaching and learning effectiveness; Candidates will understand that effective educators apply knowledge of policy and local, state, national, and international educational contexts to advocate with and for students and families; Candidates will understand that effective educators apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; Candidates will understand that effective educators hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity); Candidates will understand that effective educators explicitly integrate the teaching of reading, writing, communication and technology across content areas; Candidates will understand that effective educators create and support safe and healthy learning environments for all students; Candidates will understand that effective educators utilize information from theories and related research based practices when making decisions and taking action in their professional practice; Candidates will understand that effective educators maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement

TLSC 455 Secondary Content Mthds: Currclm, Instrctn & Assmt Secondary Content Areas (6 Credit Hours)
This 6-credit course content-area methods course focuses on three primary areas: curriculum design, instruction, and assessment within the secondary content areas.
Outcomes:
This course module focuses on current bodies of knowledge in the field of Science Education; Candidates must demonstrate understanding of A Framework for K-12 Science Education and the Next Generation Science Standards], as well as current literature; They will also critically evaluate curriculum, instructional and assessment practices in a variety of diverse classroom and community settings, with a focus on equity

TLSC 456 Language & Literacy in the Secondary Content Area (3 Credit Hours)
This 3-credit course content-area methods course focuses on three primary areas: curriculum design, instruction, and assessment within the secondary content areas - language and Literacy.

TLSC 460 Developing Rigorous and Relevant Instruction and Assessment (2 Credit Hours)
This module requires candidates, with increasing independence and more limited support from a mentor teacher, to develop rigorous and relevant instruction and assessment. Candidates will demonstrate their ability to use individual student data to plan appropriate and relevant instruction and assessment for all.
Outcomes:
Teacher candidates will obtain and analyze a variety of individual and whole class data and use this data to inform their development of differentiated and rigorous instruction and assessment

TLSC 461 Designing and Implementing Rigorous and Relevant Instruction (3 Credit Hours)
This module requires candidates, with increasing independence and more limited support from a mentor teacher, to implement rigorous and relevant instruction and assessment. Candidates will be required to use a variety of assessments, provide reflection and feedback on the results of assessment using assessment data and make adaptations in order to improve student achievement.
Outcomes:
Teacher candidates will explain how what they have learned from the assessment data will influence their planning and future instruction for students

TLSC 462 Advanced Inclusive Practices in Early Childhood Education (3 Credit Hours)
This course focuses on the role of ECSE professionals in inclusive preschool programs, including the role of ECE and ECSE teachers in supporting tiered models in general education, and the development, implementation, and evaluation of individualized education plans. In addition, these personnel are called upon to provide services that are interdisciplinary, multicultural, family-centered, inclusive, and developmentally appropriate, and that prove effective regardless of family circumstances. Students will gain experience in developing strategies for meeting the educational and developmental needs of preschoolers who experience circumstances and conditions that potentially interfere with optimal growth and development.
Outcomes:
Candidates will understand that effective educators enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups; Candidates will understand that effective educators engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students; Candidates will understand that effective educators use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Candidates will understand that effective educators use data to drive instruction and assess teaching and learning effectiveness; Candidates will understand that effective educators apply knowledge of policy and local, state, national, and international educational contexts to advocate with and for students and families; Candidates will understand that effective educators apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; Candidates will understand that effective educators hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity); Candidates will understand that effective educators explicitly integrate the teaching of reading, writing, communication and technology across content areas; Candidates will understand that effective educators create and support safe and healthy learning environments for all students; Candidates will understand that effective educators utilize information from theories and related research based practices when making decisions and taking action in their professional practice; Candidates will understand that effective educators maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement

TLSC 463 Supporting and Serving Families in Early Childhood Education (2 Credit Hours)
In this course, students apply models, skills, and processes of teaming when collaborating to support and serve families in the role of an early childhood educator. and professionals. Culturally and linguistically responsive and affirming practices will be explored, in addition to family systems and family diversity, and students will explore a variety of collaborative strategies while working with and supporting families. Teaming models, skills, and processes, including appropriate uses of technology will also be explored as avenues for ensuring responsive early childhood education, early intervention, and early childhood special education. Students will learn about and engage directly with families as a result of this course.
Outcomes:
Candidates will understand that effective educators enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups; Candidates will understand that effective educators engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students; Candidates will understand that effective educators use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Candidates will understand that effective educators use data to drive instruction and assess teaching and learning effectiveness; Candidates will understand that effective educators apply knowledge of policy and local, state, national, and international educational contexts to advocate with and for students and families; Candidates will understand that effective educators apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; Candidates will understand that effective educators hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity); Candidates will understand that effective educators explicitly integrate the teaching of reading, writing, communication and technology across content areas; Candidates will understand that effective educators create and support safe and healthy learning environments for all students; Candidates will understand that effective educators utilize information from theories and related research based practices when making decisions and taking action in their professional practice; Candidates will understand that effective educators maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement

TLSC 470 Student Teaching for Change (7 Credit Hours)
This module represents the candidate's full-time student teaching experience. It serves as the culmination of candidate's full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.
Outcomes:
Candidates will complete the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter; Candidates also complete the School of Education's Professional Practice Profile essay

TLSC 470A Student Teaching for Change (1-6 Credit Hours)
This module represents the candidates full-time student teaching experience. It serves as the culmination of candidates full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.
Outcomes:
Candidates will complete part of the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter

TLSC 470B Student Teaching for Change (1-6 Credit Hours)
This module represents the candidates' full-time student teaching experience. It serves as the culmination of candidates' full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.
Outcomes:
Candidates will complete the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter; Candidates also complete the School of Education's Professional Practice Profile essay

TLSC 480 Teaching for Change Field Seminar (1 Credit Hour)
This module introduces teacher candidates' to learning and development through observation, investigation, and analysis of teaching practice and student learning in secondary-level classrooms. Candidates will complete a classroom profile assignment and develop a related action plan for enhancing a constructive classroom environment. Recognize the role of choice, motivation, and scaffolded support in creating a low-risk and positive social environment; (5F) Identify significant components of healthy learning environments (e.g., where students, teachers, and families feel safe, mutual respect, connected, and demonstrate high levels of self- efficacy). (4A, 4E) (IB)
Outcomes:
EU7K7 - Summarize the connection between teacher expectations and attitudes and student academic achievement, inclusion, and excellence; (3H)

Applied Behavior Analysis

- Applied Behavior Analysis (MEd) (p. 1653)

Applied Behavior Analysis (MEd)

Loyola University offers a master's degree in Applied Behavior Analysis. The program is designed to prepare students to work with individuals with Autism Spectrum Disorder (ASD) and other neurodivergent clients, patients, and students in primary care and health service delivery settings. Students will become Board Certified Behavior Analysts (BCBA). The program will be offered completely online, asynchronously.

The Applied Behavior Analysis (MEd) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Doctoral

- Counseling Psychology (PhD) (p. 1327)
- School Psychology (PhD) (p. 1334)

Combined

- School Psychology (MEd/EdS) (p. 1896)

Curriculum

Participating students will be expected to complete a total of 30 semester hours to earn the MEd degree. Of the 30 semester hours, 3 semester hours are related to the field-based/capstone course. The degree is designed to be completed within 18 to 24 months. The degree program will be delivered entirely online, asynchronously.

Besides the traditional Master's program, the Applied Behavior Analysis (MEd) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours
EABA 400	Concepts and Principles of Behavior Analysis	3
EABA 405	Behavioral Health and Neurodivergence	3
EABA 410	Single-Case Research Design in Applied Behavior Analysis	3

EABA 440	Organizational/Systemic Behavior and Supervision	3
EABA 560	Field-Based Experience and Capstone in Applied Behavior Analysis	3
Total Hours		**30**

Field-Based Hours

Students who are admitted to the program can start to acquire field-based hours under the supervision of a Board Certified Behavior Analyst. Students will acquire these hours independent of the program, except for when they are enrolled in EABA 560. Students will be responsible for identifying their field-based placement and supervisor. It is important to note the majority of students will already be working in the field and are already working under the supervision of an individual with the BCBA credential. By enrolling in an ABA program, their supervision hours will begin to count toward meeting the requirements for sitting for the BCBA exam. Specifically, students will be eligible to take the BCBA certification exam after completing the 30 hour master's program and after completing their supervised field-based hours. The field-based hours are often completed after graduating with the master's degree.

Suggested Sequence of Courses

Traditional Master's Program

The recommended sequence of the program is based on students enrolling in 9 credit hours each semester. The program will enroll a new cohort for the Fall, Spring, and Summer semesters. We recommended the following sequence:

Course	Title	Hours
Year 1		
Fall		
EABA 400	Concepts and Principles of Behavior Analysis	3
EABA 405	Behavioral Health and Neurodivergence	3
EABA 415	Ethics in Applied Behavior Analysis	3
	Hours	**9**
Spring		
EABA 410	Single-Case Research Design in Applied Behavior Analysis	3
EABA 425	Behavioral Assessment in Applied Behavior Analysis	3
EABA 435	Philosophical Underpinnings of Behavior Analysis	3
	Hours	**9**
Summer		
EABA 420	Experimental Analysis of Behavior	3
EABA 430	Facilitating Behavior Change in Applied Behavior Analysis	3
EABA 440	Organizational/Systemic Behavior and Supervision	3
	Hours	**9**
Year 2		
Fall		
EABA 560	Field-Based Experience and Capstone in Applied Behavior Analysis	3
	Hours	**3**
	Total Hours	**30**

Accelerated Master's Pathway

Students can take up to 15 credit hours in the senior year with admission to the AMP. These credits are shared between the Bachelor's and Master's programs.

Course	Title	Hours
Senior		
Fall		
EABA 400	Concepts and Principles of Behavior Analysis	3
EABA 405	Behavioral Health and Neurodivergence	3
	Hours	**6**
Spring		
EABA 410	Single-Case Research Design in Applied Behavior Analysis	3
EABA 415	Ethics in Applied Behavior Analysis	3
EABA 425	Behavioral Assessment in Applied Behavior Analysis	3
	Hours	**9**
Master's		
Fall		
EABA 420	Experimental Analysis of Behavior	3
EABA 430	Facilitating Behavior Change in Applied Behavior Analysis	3

EABA 440	Organizational/Systemic Behavior and Supervision	3
	Hours	**9**
Spring		
EABA 435	Philosophical Underpinnings of Behavior Analysis	3
EABA 560	Field-Based Experience and Capstone in Applied Behavior Analysis	3
	Hours	**6**
	Total Hours	**30**

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Apply behavior-analytic principles and concepts to analyze behavior and design evidence-based interventions that improve socially significant outcomes for individuals across educational, healthcare, and community settings.

- Conduct behavioral assessments and interpret data to identify the environmental variables influencing behavior and inform the development and evaluation of behavior intervention plans.
- Design, implement, and evaluate behavior analytic interventions using data-based decision making to promote skill development and reduce challenging behavior.
- Apply ethical, culturally responsive, and family-centered practices when working with individuals, families, and interdisciplinary teams to support inclusive and equitable service delivery.
- Use organizational and systems-level behavior analytic strategies to support supervision, team collaboration, and program improvement within educational, healthcare, and community organizations.

Counseling Psychology

- Clinical Mental Health Counseling (EdS) (p. 1656)
- Community Counseling (MEd) (p. 1657)
- School and Community Counseling (MEd) (p. 1659)
- School Counseling (MEd) (p. 1661)

Clinical Mental Health Counseling (EdS)

The education field needs professionals who can meet client concerns from diverse cultural perspectives. The EdS degree in Clinical Mental Health Counseling prepares professionals who are knowledgeable about cultural influences on human development.

As of Fall 2023, this program is no longer accepting admits. Students who wish to pursue this degree should apply to the M.Ed. in Community Counseling (https://catalog.luc.edu/graduate-professional/education/community-counseling-med/).

Related Programs

Master's

- Community Counseling (MEd) (p. 1657)
- School Counseling (MEd) (p. 1661)

Curriculum

For more information about the following items, please refer to the Counseling Student Handbook 2023-2024 (https://catalog.luc.edu/graduate-professional/education/counseling-psychology/clinical-mental-health-counseling-eds/2023_MASTERSHANDBOOK_CPSY.pdf).

Completion of the EdS degree program requires 60 semester hours of graduate study focused in two major areas: (1) counseling core and (2) specialty area. This includes 1,000 clock hours of practicum and internship experience (taken for nine semester hours of credit). Students must also take and pass a written comprehensive examination during their final semester of study. There is no thesis requirement.

Licensure

Graduates of this program are eligible to apply for licensing as a Licensed Professional Counselor (LPC) in Illinois upon graduation. Graduates are then subsequently eligible to apply for licensing as a Licensed Clinical Professional Counselor (LCPC) in Illinois after receiving two years of post-degree supervised experience.

The curriculum of the EdS program meets current requirements for licensure in the State of Illinois. Licensure is handled by individual states, and portability of licensure across state lines differs according to each state. The EdS may meet requirements for states whose licensure requires 60 hours.

The Department of Professional Regulation in the State of Illinois has adopted the certification exam developed and administered by the National Board of Certified Counselors. Many states use this exam for licensure purposes, so scores from the exam may be transferred. Coursework, including the number of hours required, differ across states. Students interested in completing licensure or certification in another state are must consult the professional regulation boards of other states to determine the appropriate course work required. Students should also stay apprised of licensure requirements throughout the program.

Practicum Sites

The Chicagoland area provides a wealth of clinical training opportunities for the students in community, school, and clinical mental health counseling programs. Students receive generalist training but through site selection can begin to acquire population-specific competencies in working with children, adolescents, families, gay/lesbian/bisexual clients, and other groups of individuals. Many of the practicum sites also contain APA-approved internship programs where trainees are provided with rigorous supervision and on-site seminars.

To discuss typical practicum settings and sites in Chicago and its suburbs, please contact Rufus Gonzales, Practicum Coordinator, at 312.915.6378

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Understand the knowledge bases of the counseling professions.
- Capable of applying the knowledge base of their disciplines in an ethical, reflective, and culturally-responsive manner.
- Evaluate research, appreciate the contribution of empirical inquiry to the solution of applied problems, and apply research findings to their practices.
- Knowledgeable of the social-cultural contexts of human development.
- Evaluate the outcomes of their interventions with empirically sound methods
- Participate in continuing professional education and supervision in their future professional lives and who involve themselves in activities of their professional associations.
- Committed to social justice in scientific and practice settings.

Graduates of this program are eligible to apply for licensing as a Licensed Professional Counselor (LPC) in Illinois upon graduation. Graduates are then subsequently eligible to apply for licensing as a Licensed Clinical Professional Counselor (LCPC) in Illinois after receiving two years of post-degree supervised experience.

Community Counseling (MEd)

The education field needs professionals who can meet client concerns from diverse cultural perspectives. The MEd in Community Counseling prepares professionals who are knowledgeable about cultural influences on human development.

Curriculum

For more information about the following items, please refer to the 2025-2026 Master's Handbook (https://catalog.luc.edu/graduate-

professional/education/counseling-psychology/community-counseling-med/AY2526_Masters_Handbook.pdf).

Completion of the MEd degree program requires 60 semester hours of graduate study focused in two major areas: counseling core and a specialty area. This includes 700 clock hours of practicum and internship experience (taken for six semester hours of credit). Students must also take and pass a comprehensive examination during their final semester of study. Students have five years from acceptance to complete the program.

Students should present transcript evidence of successful completion ("B" or better) of an introductory statistics course or its equivalent. Ideally, students will have completed this course prior to the start of the program.

This program meets Illinois requirements for LPC/LCPC (counseling compact included).

	Hours	**6**
	Total Hours	**60**

Program Length

Full-time students complete the program in two years, including at least one summer. Part-time study is also available.

Licensure

The curriculum of the MEd program reflects current requirements for licensure in the State of Illinois. Licensure is handled by individual states, and portability of licensure across state lines differs according to each state. The Department of Professional Regulation in the State of Illinois has adopted the certification exam developed and administered by the National Board of Certified Counselors. Many states use this exam for licensure purposes, so scores from the exam can be transferred. Coursework, including the number of hours required, differ across states. Students interested in completing licensure or certification in another state are strongly advised to consult the professional regulation boards prior to enrolling at Loyola to determine the appropriate coursework required. Students should also stay apprised of licensure requirements throughout the program.

Practicum Sites

The Chicagoland area provides a wealth of clinical training opportunities for the students in community, school, and clinical mental health counseling programs. Students receive generalist training, but through site selection can begin to acquire population-specific competencies in working with children, adolescents, families, gay/lesbian/bisexual clients, and other groups of individuals. Many of the practicum sites also contain American Psychological Association-approved internship programs where trainees are provided with rigorous supervision and on-site seminars.

To discuss typical practicum settings and sites in Chicago and its suburbs, please contact Rufus Gonzales, Practicum Coordinator, at (312) 915-6378.

Continuous Enrollments

MEd students in Community Counseling are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Understand the knowledge bases of the counseling professions.
- Capable of applying the knowledge base of their disciplines in an ethical, reflective, and culturally-responsive manner.
- Evaluate research, appreciate the contribution of empirical inquiry to the solution of applied problems, and apply research findings to their practices.
- Knowledgeable of the social-cultural contexts of human development.
- Evaluate the outcomes of their interventions with empirically sound methods
- Participate in continuing professional education and supervision in their future professional lives and who involve themselves in activities of their professional associations.
- Committed to social justice in scientific and practice settings.

Graduates of this program are eligible to apply for licensing as a Licensed Professional Counselor (LPC) in Illinois upon graduation. Graduates are then subsequently eligible to apply for licensing as a Licensed Clinical Professional Counselor (LCPC) in Illinois after receiving two years of post-degree supervised experience.

School and Community Counseling (MEd)

At the intersection of school and community life, an opportunity for you to support students and their families. Are you ready to work as a licensed professional counselor in schools or at community organizations? Our nationally recognized faculty are experts in social justice and ready to work with you to confront racism, achievement gaps, and other discrimination in our education system.

Additional Education Courses

School Counseling licensure in Illinois requires a teaching certificate or additional course work in education. Students in the M.Ed. program in School and Community Counseling who do not hold teaching certificates must complete the following additional course work to be license-eligible in Illinois. These courses are:

- CIEP 401 The Exceptional Child
- CIEP 414 Instructional Methods-Diverse Population
- ELPS 460 School Administration (or equivalent)

Comprehensive Assessment

Students will complete exams in school counseling and community counseling. See program handbook for details. Comprehensive examination application deadlines are as follows (see the School of Education Calendar for comprehensive exam dates).

[2] This course is only required for students who do not have a teaching license.

Program Length

Full-time students complete the program in two years, including summers. Part-time study is also available.

Licensure

The curriculum of the MEd program reflects current requirements for licensure in the State of Illinois. Licensure is handled by individual states, and portability of licensure across state lines differs according to each state. The Department of Professional Regulation in the State of Illinois has adopted the certification exam developed and administered by the National Board of Certified Counselors. Many states use this exam for licensure purposes, so scores from the exam can be transferred. Coursework, including the number of hours required, differ across states. Students interested in completing licensure or certification in another state are strongly advised to consult the professional regulation boards prior to enrolling at Loyola to determine the appropriate coursework

required. Students should also stay apprised of licensure requirements throughout the program.

The school counseling licensure exam must be taken in the semester prior to beginning CPSY 441 Internship, in the spring semester. The ISBE website (https://www.isbe.net/Pages/Professional-Educator-License.aspx) provides information on dates on which exams are given, fees, and registration procedures. Both exam TAP and school counseling) are administered by ISBE, not Loyola, and you must register with ISBE to take them.

Continuous Enrollments

MEd students in School and Community Counseling are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- By program completion, candidates will articulate and apply principles of social justice to critically reflect upon their own identities and emerging counseling practices as demonstrated by course-based assessments and observations of practice.
- By program completion, candidates will demonstrate counseling theory and counseling skills that enable them to appropriately serve diverse clients/students and concerns as demonstrated by course-based assessments and observations of practice.
- By program completion, candidates will demonstrate profession wide knowledge in the content areas covered by licensing exams as demonstrated by comprehensive exam performance.
- By program completion, candidates will collaborate with multiple constituents within a school setting as demonstrated by internship-based assessments.

School Counseling (MEd)

Support students as their school counselor, with a special emphasis on lifting up underserved and disenfranchised populations. Earn your professional license as a school counselor in a program committed to breaking barriers and disrupting the current inequities in our educational system.

- School and Community Counseling (MEd) (p. 1659)

Curriculum

For more information about the following items, please refer to the 2025-2026 Master's Handbook (https://catalog.luc.edu/graduate-professional/education/counseling-psychology/school-counseling-med/AY2526_Masters_Handbook.pdf).

Completion of the MEd degree program requires 48 semester hours, 700 clock hours of practicum/internship experience, and a comprehensive examination.

Undergraduate Prerequisites

Students should present transcript evidence of successful completion ("B" or better) of an introductory statistics course or its equivalent. Ideally, students will have completed this course prior to the start of the program.

Coursework

Code	Title	Hours
Required Foundational Courses		
CPSY 420	Counseling Skills	3
CPSY 421	Professional Issues Counseling	3
CPSY 423	Theory Counseling and Psychotherapy	3
CPSY 424	Career Development and Counseling	3
CPSY 425	Assessment in Counseling	3
CPSY 426	Group Counseling: Theory and Practice	3
CPSY 433	Multicultural Counseling	3
CPSY 454	Human Development: Cognitive, Aff & Phys Bases	3
RMTD 400	Introduction to Research Methodology	3
Specialty Courses		
CPSY 428	Foundations of Professional School Counseling	3
CPSY 431	Advanced School Counseling & Consultation	3
CPSY 458	Adolescent Development and Counseling	3
CPSY 440	Practicum	3
CPSY 441	Internship	3
CIEP 423	Advanced Literacy Instruction in the Content Area	3
Elective		
Select one elective, examples include:		3
CPSY 437	Addiction Counseling	
CPSY 444	Family Therapy I	
CPSY 485		
CIEP 401	The Exceptional Child	
CIEP 414	Instructional Methods-Diverse Population	
CIEP 478	Behavioral Intervention: Assessment & Support	
Total Hours		**48**

Additional Coursework

The school counselor endorsement in Illinois requires a teaching endorsement or additional coursework in education. Students in the MEd program in School Counseling who do not hold a teaching license must complete the following additional coursework to be eligible in Illinois. These courses are:

- CIEP 401 The Exceptional Child
- CIEP 414 Instructional Methods-Diverse Population
- ELPS 460 School Administration

Comprehensive Assessment

A school counseling exam is required during your practicum/internship. See program handbook for details. Comprehensive examination application deadlines are as follows (see the School of Education Academic Calendar for comprehensive exam dates).

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection. The courses below including the additional coursework for this who do not hold a teaching license.

Course	Title	Hours
Year One		
Fall		
CPSY 420	Counseling Skills	3
CPSY 428	Foundations of Professional School Counseling	3
CPSY 433	Multicultural Counseling	3
CPSY 454	Human Development: Cognitive, Aff & Phys Bases	3
	Hours	**12**
Spring		
CPSY 421	Professional Issues Counseling	3
CPSY 423	Theory Counseling and Psychotherapy	3
CPSY 431	Advanced School Counseling & Consultation	3
CIEP 401	The Exceptional Child [1, 2]	3
	Hours	**12**
Summer I		
CPSY 425	Assessment in Counseling	3
CPSY 458	Adolescent Development and Counseling	3
	Hours	**6**
Summer II		
CIEP 423	Advanced Literacy Instruction in the Content Area	3
RMTD 400	Introduction to Research Methodology	3
	Hours	**6**
Year Two		
Fall		
CPSY 440	Practicum	3
CPSY 426	Group Counseling: Theory and Practice	3
CPSY 424	Career Development and Counseling	3
	Hours	**9**
Spring		
CPSY 441	Internship	3
CIEP 414	Instructional Methods-Diverse Population [2]	3
ELPS 460	School Administration [2]	3
	Hours	**9**
	Total Hours	**54**

[1] Students who hold a teaching license take an elective, not CIEP 401 The Exceptional Child.

[2] This course is only required for students who do not have a teaching license.

Program Length

Full-time students will complete the program in two years, including at least one summer. Part-time study is also available. Students have five years from acceptance to complete the program.

Practicum

The Chicagoland area provides a wealth of clinical training opportunities for the students in community, school, and clinical mental health counseling programs. Students receive generalist training, but through site selection can begin to acquire population-specific competencies in working with children, adolescents, families, gay/lesbian/bisexual clients, and other groups of individuals. To discuss typical practicum settings and sites in Chicago and its suburbs, please contact Rufus Gonzales, Practicum Coordinator, at 312.915.6378

Licensure

The curriculum of the MEd program reflects current requirements for licensure in the State of Illinois. Licensure is handled by individual states, and portability of licensure across state lines differs according to each state. The Department of Professional Regulation in the State of Illinois has adopted the certification exam developed and administered by the National Board of Certified Counselors. Many states use this exam for licensure purposes, so scores from the exam can be transferred. Coursework, including the number of hours required, differ across states. Students interested in completing licensure or certification in another state are strongly advised to consult the professional regulation boards prior to enrolling at Loyola to determine the appropriate coursework required. Students should also stay apprised of licensure requirements throughout the program.

Students seeking school counseling licensure without a teaching endorsement must take the school counseling licensure exam in the semester prior to beginning CPSY 441 Internship, in the spring semester. The ISBE website (https://www.isbe.net/Pages/Professional-Educator-License.aspx) provides information on dates exams are administered, fees, and registration procedures. The school counseling is administered by ISBE (not Loyola), and you must register with ISBE to take the exam.

Continuous Enrollments

MEd students in School Counseling are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

1. By program completion, candidates will articulate and apply principles of social justice to critically reflect upon their own

identities and emerging counseling practices as demonstrated by course-based assessments and observations of practice.
2. By program completion, candidates will demonstrate counseling theory and counseling skills that enable them to appropriately serve diverse students and concerns as demonstrated by course-based assessments and observations of practice.
3. By program completion, candidates will demonstrate profession wide knowledge in the content areas covered by licensing exams as demonstrated by comprehensive exam performance.
4. By program completion, candidates will collaborate with multiple constituents within a school setting as demonstrated by internship-based assessments.

Educational Leadership

- Catholic Principal Preparation Program (MEd) (p. 1663)
- Catholic School Leadership (MEd) (p. 1664)
- Director of Special Education Endorsement Certificate (p. 1666)
- Educational Leadership-Principal Preparation (EdD) (p. 1667)
- Educational Leadership-Principal Preparation (MEd) (p. 1668)
- Educational Leadership-Superintendent Preparation (EdD) (p. 1670)
- Instructional Coaching Certificate (p. 1672)
- Principal Endorsement Certificate (p. 1673)
- Superintendent Endorsement Certificate (p. 1674)

Catholic Principal Preparation Program (MEd)

Central to the mission of the Church is the work of Catholic schools. The National Standards and Benchmarks for Effective Catholic Elementary and Secondary Catholic Schools state that "An excellent Catholic school has a qualified leader/leadership team empowered by the governing body to realize and implement the school's mission and vision."

The Loyola University Chicago Catholic Principal Preparation Program is

- designed to prepare future principals to meet the complex challenges of leading today's Catholic schools.
- uniquely designed to ensure each principal candidate becomes a mission-driven, faith-based instructional leader within the Catholic School context.

The Unique Coaching Model

This coaching model is based on the foundation of a "support team" to ensure candidates have the breadth of experiences to be able to lead. The support team is comprised of the candidate, the university faculty supervisor, the coordinator of coaches, the internship mentor principal, and the internship coach. The internship coach is a veteran Catholic school administrator with a proven record for leading effective Catholic schools.

	Hours	**6**
	Total Hours	**33**

Program Features

- Focused, in-depth coursework with coaching and immediate application for transforming Catholic schools to create increased student outcomes within a faith-based context.
- Program designed by Loyola's School of Education and community partners to ensure that all candidates acquire a solid foundation to be a Catholic school principal who is a mission-driven, faith-based instructional leader.
- Optional two-week summer course at Loyola University's Rome campus to develop global leadership perspectives.

Illinois Licensure

Students in this program must pass teacher evaluation modules through ISBE. Students must also pass ILTS exam 195/196 to receive their Principal Endorsement for the state of Illinois.

International and Out-of-State Students

A Principal Endorsement will not be issued to out-of-state students or international students who do not hold an IL Professional Educator License and/or meet all ISBE requirements for endorsement

Continuous Enrollments

Master's students in educational leadership are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Principal Preparation Program, candidates will:

- Mission-Driven Leadership: Demonstrate the knowledge, skills, and dispositions necessary to lead mission-centered schools that promote the spiritual, academic, and social-emotional growth of all students, grounded in Jesuit values and ethical leadership.
- Instructional and Academic Excellence: Lead high-quality instructional programs by supervising teaching and learning, implementing evidence-based practices, and fostering a culture of continuous improvement to advance student achievement in catholic schools.
- Data-Informed Decision Making: Facilitate collaborative, data-driven decision-making processes that use multiple sources of evidence to improve student outcomes, allocate resources strategically, and address achievement gaps in catholic schools.
- Community and Faith-Based Engagement: Cultivate inclusive, culturally responsive school communities by engaging families, faculty, and stakeholders in partnership, while integrating catholic faith formation and social justice principles into school leadership practices.
- Applied Leadership Practice and Reflective Growth: Apply leadership theory to practice through sustained, real-world internship experiences and principal coaching, demonstrating reflective practice, professional resilience, and the capacity to lead complex catholic school environments effectively.

Catholic School Leadership (MEd)

As of Fall 2026, this program is no longer accepting applicants.

Central to the mission of the Church is the work of Catholic schools. The National Standards and Benchmarks for Effective Catholic Elementary and Secondary Catholic Schools state that "An excellent Catholic school has a qualified leader/leadership team empowered by the governing body to realize and implement the school's mission and vision."

The Loyola University Chicago Catholic School Leadership program is:

- designed to prepare future principals to meet the complex challenges of leading today's Catholic schools.
- uniquely designed to ensure each principal candidate becomes a mission-driven, faith-based instructional leader within the Catholic School context.

The Unique Coaching Model

This coaching model is based on the foundation of a "support team" to ensure candidates have the breadth of experiences to be able to lead. The support team is comprised of the candidate, the university faculty supervisor, the coordinator of coaches, the internship mentor principal, and the internship coach. The internship coach is a veteran Catholic school administrator with a proven record for leading effective Catholic schools.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion, candidates will:

- Possess the knowledge, skills, and dispositions to be highly effective leaders to promote the spiritual, academic and social-emotional growth of their students.
- Be able to facilitate data-driven decision making in your school community, and engage in tangible, real-world internship experience to put these ideas into practice.

Director of Special Education Endorsement Certificate

The Director of Special Education endorsement (DOSE) program within the SOE sees the professionals of the future as thoughtful persons able to analyze situations, set goals, plan and monitor actions, evaluate results, and reflect on their own professional thinking.

This program utilizes a cohort model. Twelve students will make a cohort and a cohort is capped at 15 students. Enrollment in the program is contingent upon meeting the cohort minimum. If the minimum is not filled, students pursuing the DOSE endorsement will take courses with students in the School Psychology EdD program.

The SOE uses transformative education as a tool for challenging and inspiring students to improve the world around us. We view transformation on a continuum from a highly personal process (requiring risks, vulnerability, and trust) to the transformation of supports, services, and outcomes for our students, community partners, and those whom they serve. Each point on this continuum requires both reflection and a commitment to interdisciplinary and transdisciplinary collaboration that challenges our perceptions and decision-making. Programs incorporate Ignatian pedagogy and traditions, including the four processes of knowing: attention, reflection, judgment, and action and commitment. Transformative education does not have the narrow learning of a knowledge base as its outcome, but rather it prioritizes the notion of disruptive knowledge, a means or process of questioning knowledge and the valuing of learning more. The SOE prepares our candidates to critique the knowledge base and to question knowledge through a social justice lens, and simultaneously to use and contribute to knowledge for just purposes (Learn more about Transformative Education (https://jobs.luc.edu/media/lucedu/president/pdfs/FINAL-LoyolaTransformativeEducation-2015.pdf)).

Related Programs

Certificate

- Instructional Coaching Certificate (p. 1672)
- Principal Endorsement Certificate (p. 1673)
- Superintendent Endorsement Certificate (p. 1674)

Curriculum

The Director of Special Education Endorsement program provides 12 credit hours toward the 30 hours required by the Illinois School Board of Education (ISBE) for the endorsement. Applicants will complete 150 hours of field experience that are embedded in the program coursework. Students must complete the Director of Special Education (234) exam before being eligible for the endorsement from ISBE after completing coursework and field experience.

All students must pass ILTS 234 exam.

- Fast career advancement
- Learn from the best transformative leaders in local schools & districts
- Gain immediately applicable skills
- Complete the program in just 1 year
- Work on your endorsement while working full-time

Educational Leadership-Principal Preparation (EdD)

As a principal, you'll have the opportunity to lead a school community and create programs and initiatives with a last impact on students, tackling equity issues along the way.

Designed by Loyola's School of Education faculty along with community partners, the Educational Leadership Principal Preparation EdD ensures all candidates acquire the skills necessary to be effective, justice-oriented, school principals. Through focused, in-depth coursework, candidates gain skills, perspectives, and knowledge for immediate application towards positively transforming schools, and improving student performance.

	Total Hours	**49**

Program Features

- Successful completion of capstone project under the supervision of full-time faculty
- Two semesters of internship experience
- Earn ISBE Principal Endorsement

Program Format

The Principal Preparation EdD is an online program which means that all courses, including internship, are offered online. All advising sessions for leadership development and support will be hosted online.

Program Length

Most students complete the program in three years. Students take two courses per semester and are able to complete the required coursework in less than three years (including summer enrollment). The length of time for the capstone project depends upon the topic and the diligence of the student. Candidates for the Doctor of Education degree (EdD) have a maximum of seven years to complete the degree.

If students are unable to work on the degree for a period of more than one semester, they should request an official leave of absence from the program. Students who need more time to complete the degree must file for an official extension of time; the student's advisor will then recommend either a leave of absence or an extension.

Transfer/Advanced Standing Credits

Each student will have the opportunity to transfer a maximum of 36 semester hours of previous coursework towards the required 72 semester hours. Upon being accepted to the EdD program, each student may request the Educational Leadership Program Chair to review transcripts to determine which, if any, courses can count toward the EdD program.

Illinois Licensure Requirements

Candidates in all programs leading to Illinois licensure are required to pass an Illinois Test of Academic Proficiency (TAP), ILTS 195 and 196 through the Illinois State Board of Education, the appropriate endorsement exam, and a State Criminal Background Check.

Continuous Enrollments

Doctoral students in Educational Leadership are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Principal Preparation EdD Program, candidates will be eligible for an IL ISBE Principal Endorsement and also be prepared for:

- Mission-Driven Leadership: Demonstrate the knowledge, skills, and dispositions necessary to lead mission-centered schools that promote the spiritual, academic, and social-emotional growth of all students, grounded in Jesuit values and ethical leadership.
- Instructional and Academic Excellence: Lead high-quality instructional programs by supervising teaching and learning, implementing evidence-based practices, and fostering a culture of continuous improvement to advance student achievement.
- Data-Informed Decision Making: Facilitate collaborative, data-driven decision-making processes that use multiple sources of evidence to improve student outcomes, allocate resources strategically, and address achievement gaps.
- Community Engagement: Cultivate inclusive, culturally responsive school communities by engaging families, faculty, and stakeholders in partnership, while integrating Jesuit values and social justice principles into school leadership practices.
- Applied Research, Leadership Practice and Reflective Growth: Apply leadership theory to practice through sustained, real-world internship experiences and principal coaching, demonstrating reflective practice, professional resilience, and the capacity to lead complex school environments effectively.
- Design, conduct, and apply practice-based research to address authentic problems of practice, demonstrating the ability to generate actionable knowledge that advances school improvement and contributes to the field of educational leadership as an EdD completer.

Educational Leadership-Principal Preparation (MEd)

As a principal, you'll have the opportunity to lead a school community and create programs and initiatives with a last impact on students, tackling equity issues along the way.

Designed by Loyola's School of Education faculty along with community partners, the Educational Leadership Principal Preparation MEd ensures all candidates acquire the skills necessary to be effective, justice-oriented, school principals. Through focused, in-depth coursework, candidates gain skills, perspectives, and knowledge for immediate application towards positively transforming schools, and improving student performance.

ELPS 566	Principal Internship One	3
	Hours	**6**
Spring		
ELPS 407	Leading for Data-based Decision Making	3
ELPS 567	Principal Internship Two	3
	Hours	**6**
	Total Hours	**33**

Program Format

The Principal Preparation MEd is an online program which means that all courses, including internship, are offered online. All advising sessions for leadership development and support will be hosted online.

Program Length

The program is 33 credit hours and can be completed part-time in two years (including summers).

Program Requirements

MEd plus ISBE Principal Endorsement Option

- Must be a practicing teacher or administrator with at least two years of work experience in your field
- Will earn ISBE Principal Endorsement pending the passing of exam 195/196 (https://www.il.nesinc.com/TestView.aspx?f=HTML_FRAG/IL195_TestPage.html)
- Must pass teacher evaluation modules through ISBE
- 33 semester hours of completed coursework (6 credit hours per semester, summers included)
- 2 semesters of internship

MEd without Principal Endorsement Option

- Must have at least two years of work experience in your field (not-for-profit or community organization)
- Degree-seeking only. No ISBE Principal Endorsement.
- 33 semester hours of completed coursework (6 credit hours per semester, summers included)
- 2 semesters of internship

International and Out-of-State Students

A Principal Endorsement will not be issued to out-of-state students or international students who do not hold an IL Professional Educator License and/or meet all ISBE requirements for endorsement.

Continuous Enrollments

Master's students in Educational Leadership programs are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the Principal Preparation Program, candidates will be eligible for an IL ISBE Principal Endorsement and also be prepared for:

- Mission-Driven Leadership: Demonstrate the knowledge, skills, and dispositions necessary to lead mission-centered schools that promote the spiritual, academic, and social-emotional growth of all students, grounded in Jesuit values and ethical leadership.
- Instructional and Academic Excellence: Lead high-quality instructional programs by supervising teaching and learning, implementing evidence-based practices, and fostering a culture of continuous improvement to advance student achievement.
- Data-Informed Decision Making: Facilitate collaborative, data-driven decision-making processes that use multiple sources of evidence to improve student outcomes, allocate resources strategically, and address achievement gaps.
- Community Engagement: Cultivate inclusive, culturally responsive school communities by engaging families, faculty, and stakeholders in partnership, while integrating Jesuit values and social justice principles into school leadership practices.
- Applied Leadership Practice and Reflective Growth: Apply leadership theory to practice through sustained, real-world internship experiences and principal coaching, demonstrating reflective practice, professional resilience, and the capacity to lead complex school environments effectively.

Educational Leadership-Superintendent Preparation (EdD)

Become a change agent in education, leading schools as an innovative district leader. Loyola University Chicago seeks to prepare district-level leaders to be responsive and adaptive, viewing superintendent candidates as apprentice professionals from the time they enter the program and fostering their development of reflective learning and transformative leadership skills. Because superintendent candidates are in school districts observing, learning, and honing their own skills in Chicagoland's diverse school districts, candidates gain extensive experiences engaging with diverse populations, including diverse learners, special needs and English learners programs.

Loyola's Superintendent EdD is designed for students who will demonstrate the knowledge, skills, and dispositions to be highly effective district leaders. Students pursuing this degree have worked for at least 2 years as a licensed educator or administrator and wish to gain their Superintendent Endorsement/License in the state of Illinois.

We strive to purposefully dismantle traditional boundaries between institution-based and field-based scholarly work and service; to build trust and deep, lasting relationships with our partners in education; to understand that we must work not for communities but to be of those communities; working shoulder to shoulder with partners, communities and families, sharing their commitment and responsibility to address their needs, priorities, and goals from a social justice perspective.

Program Features

- Two years of school supervisory or administrative experience and a Type 75 General Administrative or ISBE Principal Endorsement on PEL
- Study Abroad - Complete ELPS 465 Workshop (Variable Topics) – Two-week Residency course in Rome, Italy

Program Length

Students have a maximum of seven years to complete the degree. Most students complete the required coursework in less than three years, including summer enrollment. Completion time for the capstone project varies.

Program Format

The Superintendent EdD is an online program which means that all courses, including field supervision, are offered online. All advising sessions for leadership development and support will be hosted online for district leadership candidates.

Program Requirements

For Superintendent Endorsement

- Successful completion of Loyola's ISBE-approved course sequence – 33 credit hours (includes internship)
- Successful completion of supervised yearlong internship – PK-12
- Successful completion of IPA or AA Learning Modules: Principal Evaluators Training
- Passing score on Illinois' Superintendent Exam 225.
- Submitted proof of 2 years of experience working full time as a principal, director of special education, chief school business official, or other administrative position while holding a valid administrator license.

For EdD

- Successful completion of Loyola's ISBE-approved course sequence - 48 credit hours of transformative district leadership curriculum.
- Successful completion of written Capstone Project – Problem of Practice
- Successful Oral Defense of approved Capstone Project – Problem of Practice

Illinois Licensure Requirements

Students in the Superintendent Preparation Program are required to pass the ILTS 225 exam through the Illinois State Board of Education.

Transfer/Advanced Standing Credits

Each student will have the opportunity to transfer a maximum of 36 semester hours of previous coursework towards the required 72 semester hours. Upon being accepted to the EdD program, each student may request the Educational Leadership Program Chair to review transcripts to determine which, if any, courses can count toward the EdD program.

Continuous Enrollments

Doctoral students in Educational Leadership are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Loyola's Superintendent EdD program is designed to:

- Prepare district leaders who will successfully construct and apply knowledge to positively impact the lives of individuals, families, organizations, and school communities;
- Provide diverse learning opportunities for district leadership candidates to develop and demonstrate collaboration and communication skills to work with diverse communities and to build partnerships;
- Cultivate, supervise and assess field-based learning opportunities to analyze problems of practice and use multiple administrative frameworks and leadership lens' to develop meaningful solutions;
- Develop a professional knowledge base that integrates both practical and research knowledge, links theory to systemic and systematic inquiry, and emphasizes the generation, transformation, and use of professional knowledge and practice to address educational inequities in our field.
- Upon successful completion of this doctoral program in district leadership, students will be eligible for the ISBE Superintendent Endorsement; and equipped to design, conduct, and apply practice-based research to address authentic problems of practice, demonstrating the ability to generate actionable knowledge that advances school district improvement and contributes to the field of educational leadership.

Instructional Coaching Certificate

As of Fall 2026, this program is no longer accepting applicants.

Teacher leaders are crucial for the success of the entire school. Often, they are not given formal training. This certificate aims to empower teacher leaders to support and guide their colleagues to improve teaching and learning through instruction, curriculum, and using information and data. This certificate will also focus on effective methods of leading professional learning.

Related Programs

Certificate

- Director of Special Education Endorsement Certificate (p. 1666)
- Principal Endorsement Certificate (p. 1673)

Curriculum

With the Instructional Coaching Certificate at Loyola University Chicago, you will gain the knowledge and skills you need as a teacher leader to help your colleagues improve their teaching and learning through instruction, curriculum, and using information and data.

Courses for this fully online coaching certificate are taught by dedicated faculty who have direct experience in school settings. They are focused on excellence in curriculum and instruction strategies and have years of experience guiding and supporting students just like you through the coaching certificate program.

Over the course of the coaching certificate, you will create an implementation plan for instructional coaching at your school.

	Hours	**6**
Spring		
ELPS 471	MTSS for Instructional Leaders	3
ELPS 474	Curriculum Development for Instructional Leaders	3
	Hours	**6**
	Total Hours	**12**

Program Requirements

To enroll in the coaching certificate online at Loyola Chicago University, you must have a teaching license, credential, or certificate or comparable credential as well as two years of teaching experience.

Program Structure

The program consists of four 3-credit courses, all offered online in English. Over these courses, candidates will create an implementation plan for instructional coaching within their schools. Candidates will also develop the elements of instructional coaching: assessment for learning, delivery of effective curriculum, enhancing classroom instruction, and effective classroom management all through an inclusive, continuous improvement lens. Upon completion of this program, candidates will understand how to develop supportive, confidential, and trustworthy relationships with teachers, distinguish between coaching and evaluating, explore conferencing and feedback loops, facilitation, presentation, and best practices in professional learning.

Continuous Enrollment

Students in certificate/endorsement only programs are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Services.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Build a repertoire of strategies to support teachers in their classrooms;
- Develop leadership skills to support continuous improvement efforts in their schools;
- Design and deliver job-embedded professional development;
- Establish and nurture trusting relations with instructional staff and administration.

Principal Endorsement Certificate

As a principal, you'll have the opportunity to lead a school community and create programs and initiatives with a last impact on students, tackling equity issues along the way.

Designed by Loyola's School of Education faculty along with community partners, the Educational Leadership Principal Endorsement-only pathway ensures all candidates acquire the skills necessary to be effective, justice-oriented, school principals. Through focused, in-depth coursework, candidates gain skills, perspectives, and knowledge for immediate application towards positively transforming schools, and improving student performance.

- Higher Education (EdD) (p. 1676)
- Higher Education (MEd) (p. 1677)
- International Higher Education (MEd) (p. 1680)

Curriculum and Pedagogy in Higher Education Certificate

The Certificate in Curriculum and Pedagogy in Higher Education is designed for higher education instructors who want to improve their pedagogical practice as well as those with future plans to teach in institutions of higher education. The program is completely online, allowing students to complete their coursework from anywhere around the world.

You'll be prepared to effectively teach adult learners in the post-secondary student populations. This certificate develops pedagogical and curricular skills based on the Jesuit principles of context, experience, reflection, action, and evaluation. This is the only Jesuit institution to offer such a certificate.

By engaging in reflective, action-oriented classrooms with a focus on social justice – we prepare visionary graduates to make a difference in their worlds through the implementation of socially just pedagogical practices.

Related Programs

Master's

- Higher Education (MEd) (p. 1677)
- International Higher Education (MEd) (p. 1680)

Doctoral

- Higher Education (PhD) (p. 1330)

Curriculum

The program consists of four required core courses along with a final capstone project. All of following coursework is completed fully online.

Foundational Courses

Code	Title	Hours
ELPS 430	Curriculum and Pedagogy in Higher Education	3
ELPS 432	Multiculturalism for Social Justice in Higher Education	3
ELPS 433	Student Development in Higher Education	3
ELPS 502		3
Total Hours		**12**

Final Capstone Project

Students must also complete the final capstone project that will:

- Identify the experiences, people, and places in the program that have impacted them personally and professionally

- Analyze their program experiences and articulate the major takeaways from their learning
- Examine, apply, and address the impact of the certificate program on their practice as a social justice educator

Students must complete the final capstone project in conjunction with the last required course they take in consultation with Dr. Valerie Roberson (Program Chair).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Provide the tools to effectively teach future global and local leaders and influencers
- Learning undergirded by the Jesuit tenet of cura personalis, care for the whole person
- Gain an understanding of the ways in which the strengths, challenges, and issues that adult learners face impact teaching and learning
- Develop pedagogical and curricular skills based in Ignatian pedagogical principles
- Develop skills in effectively working with diverse adult learners

Higher Education (EdD)

Earn an education doctorate as preparation for an executive-level administrative career in higher education.

The EdD in Higher Education focuses on supporting problem-posing research and the critical development of a practitioner-scholar for executive-level administrative leadership within postsecondary contexts. This hybrid-delivery, weekend format program focuses on coursework that draws from students' significant professional/lived experience connected to theoretical frameworks and concepts, providing additional skills, competencies, and knowledge needed to be social justice change-agents. Through a dissertation project, students will carry out a mode of inquiry that connects theory and practice, and fosters analytic actions around a critical issue in the field of higher education.

Program Length

This program is offered as a cohort where all students enroll in 6 credit hours per semester, including summer sessions. Students can complete coursework in 3 years. The length of the dissertation study can add an additional 6 to 18 months depending on the pace of the student.

Continuous Enrollment

EdD students in Higher Education are required to maintain continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence (https://www.luc.edu/education/studentexperience/resources/academicpolicies/) may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion, our students will be able to:

- Apply scholarly knowledge and research skills to address complex problems of practice
- Lead constructive conversations that shape equity-minded policies across multiple levels of an organization
- Partner with diverse constituents to shape sustainable institutional change for inclusive excellence
- Integrate theoretical and conceptual understandings with practice-based solutions

Higher Education (MEd)

As of Fall 2026, this program is no longer accepting applicants.

The MEd in Higher Education program prepares scholar-practitioners to make a meaningful impact in promoting access, equity, and social justice in post-secondary contexts and offers a rigorous curriculum rooted in social justice and critical thinking.

Through a comprehensive curriculum and experiential learning opportunities, students will gain a deep understanding of curriculum, identity, organizational development, advocacy, and activism in higher education to serve and support students as a leading scholar-practitioner at the forefront of positive change.

The MEd in Higher Education program equips students with the knowledge and skills necessary to navigate the complexities of the field of higher education through a combination of course content in student affairs and higher education administration. The program explores areas that include student development, pedagogy, critical theory, policy, research within the field, and diversity, equity, and inclusion in education.

Whether you're looking to lead institutional change, advocate for marginalized communities, or engage in critical scholarship, our program will help you develop the tools to make a lasting impact.

The Higher Education (MEd) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- International Higher Education (MEd) (p. 1680)

Doctoral

- Higher Education (PhD) (p. 1330)

Curriculum

Completion of the MEd in higher education requires 30 semester hours, an internship, and a final capstone project. The degree is structured in a supportive cohort model, and all classes are offered online. Students also have the opportunity to complete a summer elective on Loyola's Rome, Italy campus during SOE@JFRC.

Besides the traditional Master's program, the Higher Education (MEd) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Spring		
ELPS 527	Higher Education Capstone	3
ELPS 454	Budgeting and Finance in Higher Education	3
	Hours	**6**
	Total Hours	**30**

Program Length

This part-time program can be completed in two years, including summers. Students have the opportunity to take the summer courses during a two-week summer study abroad program in Rome, Italy.

Certificate Opportunities

In addition to their program curricula, students are encouraged to explore opportunities to gain enhanced credentials through our Curriculum and Pedagogy in Higher Education Online Certificate (p. 1675). This interdisciplinary certificate has stackable credit opportunities in conjunction with the MEd in Higher Education program. By earning this certificate, students will be able to get ahead of the curve and meet the constantly evolving field of education.

Continuous Enrollments

Master's students in Higher Education are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Services.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate

program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon successful completion of the MEd in Higher Education program, students will have the ability to:

- Apply scholarly knowledge and assessment skills to address complex problems of practice
- Lead constructive conversations that shape equity-minded policies across multiple levels of an organization
- Integrate theoretical and conceptual understandings with practice-based solutions

International Higher Education (MEd)

Join a global scholar-practitioner community and make a difference in international higher education.

The IHE MEd program at Loyola's School of Education offers a rigorous curriculum rooted in Social Justice and critical thinking. The IHE MEd program is designed to prepare students for leadership roles in the dynamic and diverse field of higher education, emphasizing the critical importance of promoting equity, inclusion, and social justice within international higher education contexts.

This innovative program combines academic rigor with practical experiences to equip students with the knowledge, skills, and perspectives needed to address complex global challenges and advance social justice within higher education institutions and organizations worldwide. Graduates are prepared to assume leadership roles in higher education institutions, governmental agencies, non-profit organizations, and international education settings. They possess the knowledge, skills, and commitment to advance social justice, diversity, and inclusion within higher education systems worldwide.

The International Higher Education (MEd) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Higher Education (MEd) (p. 1677)

Doctoral

- Higher Education (PhD) (p. 1330)

Curriculum

The IHE M.Ed. is designed to be completed in two years, including summers. Most of the courses take place online in an asynchronous format; the study abroad course - ELPS 529: US Students Abroad, Cultural Immersion Abroad - will take place in person at Loyola's John Felice Rome Center. Program requirements include 30 semester hours and completion of a final electronic portfolio with an optional Internship. All courses must be completed within the predetermined curricular sequence.

Besides the traditional Master's program, the International Higher Education (MEd) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Travel & Visa

Securing the necessary visas to travel along with related expenses are the student's responsibility.

Cohort Model

Our program has been set up as a cohort because we find that students benefit greatly from joining a learning community and from networking and bonding with one another during the course of their program. Once a cohort is formed, the students participate together in all of the required courses leading to the MEd degree.

As part of a global cohort program, students in the IHE MEd receive the following benefits:

- A 20 percent tuition discount across the entirety of the program
- Exemption from proof-of-immunization and proof-of-health-insurance requirements that apply to Chicago-based students.

A student may petition the IHE Program Director to be allowed to take a course out-of-sequence, yet remain a cohort member. Only one course may be taken out of sequence during a cohort student's course of study. We cannot guarantee that seats will be available in an out-of-sequence course, nor that all required IHE courses will be offered in an online format. Taking a course out of sequence may result in a student being unable to complete the degree in two years. Permission to take a course out of sequence will be granted at the discretion of the Program Director.

Continuous Enrollments

Master's students in international higher education are required to maintain continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Services.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate

program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Graduates of the program will be reflective leaders able to work in diverse cultural contexts to better understand, analyze, evaluate and advance the missions and programs of higher education institutions around the globe.
- Graduates of the program will be able to develop and undertake effective, high quality assessments and program evaluations.
- Graduates will demonstrate an understanding of social justice and the application of social justice concerns in the domain of higher education, particularly in regard to student development, the advancement of intercultural understanding and (relatedly) with respect to education abroad programs.

Research Methodology

- Measurement and Quantitative Methodology Certificate (p. 1682)
- Organizational Evaluation Certificate (p. 1683)

Measurement and Quantitative Methodology Certificate

As of Fall 2026, this program is no longer accepting applicants.

This program offers a curriculum for training students to have expertise in applying measurement and quantitative techniques in a research setting. Students will be able to choose an emphasis of measurement or quantitative methods and will receive a certificate upon completion of the requirements to validate their skills and efforts. This graduate-level program will prepare students for a variety of career opportunities that require training in measurement and/or quantitative techniques.

This program accommodates students with varying levels of quantitative background, thus allowing them to join the program at the level that is appropriate for them. It is particularly beneficial for current students at Loyola who have taken basic quantitative courses and want to enhance their skills and highlight their expertise in contributing to methodological aspects of research when applying for jobs.

Curriculum

This certificate program is a five-course (15 credit hours) program that leads to a certificate in Measurement & Quantitative Methodology.

Code	Title	Hours
Foundational Curriculum		
The core courses include 2-3 courses, depending on the student's research background. Students who have taken courses in quantitative research can waive/transfer in a maximum of six credits to cover the core courses of this certificate program and start with elective courses. The waived courses can only be the core courses.		
RMTD 400	Introduction to Research Methodology	3
RMTD 404	Introduction to Educational Statistics	3
RMTD 421	Educational Research II: Building a Body of Evidence Quantitative Method	3
Elective Courses		
After completing the core courses, students will take elective courses based on their needs and interests. They can choose either measurement or quantitative methods oriented courses. Students who have taken some of the elective courses will have to choose different elective courses to fulfill the requirements of the certificate program.		
Select 2-3 courses: [1]		6-9
Measurement Oriented		
RMTD 430	Psychological Measurement	
RMTD 530	Seminar in Tests & Measurements	
Quantitative Methods		
Choose one of the following:		
RMTD 403	Survey Research	
RMTD 483	Multivariate Statistics	
RMTD 484	Hierarchical Linear Models	
RMTD 488	Meta-Analysis	
STAT 388	Topics [2]	
Total Hours		**15**

1. Students who took two core courses will choose three elective courses; students who took three core courses will have to take two elective courses.
2. This course is an option for pre-Master's students admitted to the program.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Sequence 1		
Fall		
RMTD 400	Introduction to Research Methodology	3
RMTD 404	Introduction to Educational Statistics	3
RMTD 488	Meta-Analysis	3
	Hours	**9**
Spring		
RMTD 421	Educational Research II: Building a Body of Evidence Quantitative Method	3
RMTD 483	Multivariate Statistics	3
	Hours	**6**
	Total Hours	**15**

Continuous Enrollments

Students in endorsement only programs are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Associate Dean of Student Academic Services.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon the completion of the certificate, students will be prepared to:

- Have theoretical knowledge of measurement/psychometric theories and quantitative methods.
- Understand the assumptions of different quantitative techniques and learn to handle the violations of these assumptions.
- Select and apply appropriate measurement and quantitative methods to answer research questions.
- Use computer software to implement a wide range of quantitative analyses.
- Interpret statistical evidence appropriately.

Organizational Evaluation Certificate

As of Fall 2026, this program is no longer accepting applicants.

This certificate program prepares students for roles as evaluators and change agents in a range of organizations such as schools and school districts and non-profit agencies. Evaluation refers to a systematic process that involves collecting data about organizations and their programs for enhancing knowledge and decision making to promote organizational learning and development. This graduate-level certificate program is ideal for current students and professionals who are looking for career opportunities in or are currently employed in, school districts, social service organizations, private foundations, research firms, and human resources or training departments.

Transferring Credits

Students who have taken elective courses as part of their program requirements will be allowed to transfer a maximum of six (6) credit hours to the certificate.

Continuous Enrollments

Students in certificate/endorsement only programs are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Associate Dean of Student Academic Services.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon the completion of the certificate, students will be able to:

- Understand evaluation as a field of professional practice.
- Conduct all aspects of a systematic inquiry, utilizing a variety of research practices, as relevant to the substantive area.
- Engage in reflective practice.
- Demonstrate interpersonal competence.

School Psychology

- School Psychology (EdD) (p. 1684)
- School Psychology (MEd/EdS) (p. 1896)

School Psychology (EdD)

The Ed.D. program in School Psychology utilizes a scientist-practitioner model as the foundation for the coursework students are asked to complete. The scientist-practitioner model is also combined with a systems-change lens to enhance one's understanding of using data-based decision-making and evidence-based practice to address issues of social justice and inequity. The courses in this program have been developed to attain these objectives and provide candidates with the necessary tools to lead for change in schools and communities. To accomplish these overarching objectives, there is a clear focus on assisting candidates to acquire the skills to:

1. Think systematically within the education system
2. Analyze and interpret systems-level data
3. Implement and evaluate evidence-based practices
4. Develop leadership potential

5. Further knowledge of inequity within the larger educational community and develop skills to become agents of change

See important statements and positions from the School Psychology faculty (https://www.luc.edu/education/academics/areasofstudy/schoolpsychology/)

Curriculum

More information can be found in the EdD in School Psychology Handbook (https://catalog.luc.edu/graduate-professional/education/school-psychology/school-psychology-edd/SPSY_EdD_Handbook_2024-2025.pdf).

The EdD program of studies consists of a total of 72 graduate semester hours (36 of which are typically transferred from prior graduate coursework). The program is designed for practicing school psychologists who are interested in obtaining a doctoral degree with a focus in data-based decision making and systems change in schools. This program is designed as a cohort model with entering students moving through the program together. It is delivered fully online with courses being offered primarily asynchronously, with some synchronous classes, and it is thoughtfully designed to meet the needs of working professionals.

Courses

Code	Title	Hours
Required Courses		
CIEP 409	Evidence Based Interventions	3
CIEP 466	School Psychology Special Topics (Capstone Prep)	3
CIEP 514	Advanced Systems Consultation	3
CIEP 527	Ethics and Law for School Psychologists	3
CIEP 548	Family, School and Community Collaboration	3
RMTD 400	Introduction to Research Methodology	3
RMTD 406	Educational Evaluation	3
Track Courses		**15**
All students choose either a District Administrator or Advanced Practitioner track.		
District Administrator Track Courses		
CIEP 502	Trauma Sensitive Schools	
ELPS 408	Leading for Diversity	
ELPS 468	Problems in Finance and Business Management	
ELPS 472	Administration of Special Education and Pupil Services

CPSY 426	Group Counseling: Theory and Practice	
CPSY 437	Addiction Counseling	
CPSY 444	Family Therapy I	
Total Hours		**36**

Capstone

Each student will complete a Capstone Project in lieu of a dissertation. Candidates are responsible for the initiation and completion of their Capstone Project and our faculty serve as supports to help candidates complete their Capstone. The process that all candidates must follow for successful completion is delineated in the program handbook. All candidates must begin the Capstone process during the Spring semester of Year 1.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

District Administrator Track

	Hours	**6**
	Total Hours	**36**

Program Length

Students can complete all coursework in two years while attending part-time. Students will take two courses each Fall semester of the program, two courses each Spring, and up to four courses each summer. You'll take courses together as a cohort and follow the same course sequence.

Transfer Credit

Each student will have the opportunity to transfer a maximum of 36 semester hours of previous coursework towards the required 72 semester hours. Upon being accepted to the EdD program, each student will meet with the School Psychology Program Director to review transcripts to determine which, if any, courses can count toward the EdD program.

Continuous Enrollments

Doctoral students in School Psychology are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Services.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- You'll learn how to implement and evaluate evidence-based practices, knowing that your job as a school psychologist is not simply about assessment and placement, but to also address issues of inequity.
- You'll focus on consultation, education, and intervention.

Teaching & Learning

- Curriculum, Culture, and Communities (EdD) (p. 1686)
- Curriculum, Culture, and Communities (MEd) (p. 1689)
- Elementary Education (MEd) (p. 1691)
- ESL Endorsement Certificate (p. 1694)
- Language, Culture, and Curriculum (MEd) (p. 1695)
- Secondary Education (MEd) (p. 1697)
- Special Education (MEd) (p. 1700)
- Special Education Endorsement Certificate (p. 1701)

Curriculum, Culture, and Communities (EdD)

The EdD in Curriculum, Culture, and Communities (3Cs) is designed within a social justice framework across schools and communities to prepare educators, community organizers, faith-based leaders, nonprofit leaders, and others to take on new challenges as socially-just educators and researchers in institutions of higher education, schools, and communities. The targeted audience of the program will be:

- Current teachers
- Those seeking positions in preparing future teachers in the university (teacher educators)
- Non-profit organization leaders and educators (CSI resource coordinators, stakeholders, community activists)
- Faith-based organization leaders and educators (including priests, pastors, sisters, and other laypeople)
- Professions that involve education and professional development in their organizations (medical professionals, social work, legal, law enforcement, environmental studies, etc.)
- University staff/professionals

- Curriculum, Culture, and Communities (MEd) (p. 1689)
- Elementary Education (MEd) (p. 1691)
- Language, Culture, and Curriculum (MEd) (p. 1695)

Curriculum

Completion of the EdD in 3Cs requires

1. 60 semester hours of which 42 must be completed at Loyola University,
2. a comprehensive assessment after the successful completion of the coursework, and
3. One of three options for a culminating project: a dissertation and oral defense; three-article research; or a Dissertation in Practice (DiP).

[3] At least 6 semester hours of required elective courses.

[4] The total of 33 Semester hours should be completed with advisor's approval among recommended elective courses. Transferred courses, if eligible, will be counted as electives upon advisor's approval.

Comprehensive Assessment

Candidates must write a scholarly literature review that is assessed by their dissertation committee prior to developing their proposal.

Suggested Sequence of Courses

Upon completion of below coursework, students will enroll in Doctoral Study and Dissertation Supervision until defense of the dissertation.

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Total Hours	**60**

Length of the Program

Typically, full-time students can complete the coursework between two and three academic years depending on summer enrollment. The dissertation takes another 1.5 to 2 years. Assuming normal progress, it is reasonable to expect part-time students who have completed all prerequisites and enroll in six semester hours during each Fall, Spring, and Summer semester could complete coursework in approximately three academic years and dissertation in approximately 2 years. Time for degree completion, including the dissertation, is four to six years.

Candidacy

The requirements for doctoral candidacy are

1. successful completion of all specifically required coursework;
2. successful completion of all comprehensive assessment,
3. approval of the dissertation proposal by the approved dissertation committee and Institutional Review Board (IRB).

Course Transfer

With the advisor's approval, students may apply credits from a master's degree or prior coursework. The three scenarios include:

1. If a student completes a Master's degree in a designated Loyola program they may be able to transfer up to 30 credit hours to the doctoral program.
2. If a student completes a Master's degree at an accredited institution, not Loyola they may be able to transfer up to 18 credit hours to the doctoral program.
3. If a student has a Bachelor's plus 5+ years of professional experience, they should complete a Master's as part of their coursework towards earning a doctorate in the program.

Continuous Enrollments

Doctoral students in 3Cs (Curriculum, Culture, and Communities) are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students will be able to generate original research or practice that informs and transforms curriculum, pedagogy, and educational policy to advance systemic, equitable, educational experiences across local, state, national, and international contexts.
- Students will be able to critically evaluate systems and power structures in order to support the design of community-engaged research or practice that advances equitable partnerships and systemic change for marginalized communities.
- Students will be able to design and conduct independent research using appropriate and rigorous methods to investigate critical questions addressing instructional practices, curriculum, and/or relationships across school,#community#and university settings.
- Students will be able to evaluate practice-based innovations that establish sustainable, equity-centered partnerships advancing academic and social-emotional outcomes in local and global communities.
- Students will be able to evaluate and implement research, theories, policies, and educational practices through a social justice lens to advance more equitable practices in learning, instruction, and/or university-school-community collaborations.

Enduring Understandings & Program Outcomes

MEd & EdD in 3Cs is founded upon six enduring understandings (EUs)

EU1: Theories and Practices about Curriculum, Pedagogy, and Policy

Students will develop understandings of curriculum, pedagogy, and policy and apply knowledge on transformative curriculum and pedagogy for innovative policy in the local, state, national, and international educational contexts to advocate with and for students, families, and communities.

EU2: Ecology of Communities

Students will understand that effective educators comprehend the historical, political, socioeconomic, and cultural realities and funds of knowledge of local communities as well as relationships, practices, and systems. Further, students will understand that effective educators seek to engage multiple stakeholders toward creating that promote equity and social justice of society's most vulnerable groups.

EU3: Research, Evaluation & Change Practices

Students will understand and use appropriate and rigorous research methods (e.g., qualitative, mixed, quantitative) and research types (e.g., basic, action, evaluation) to investigate critical questions that contribute to the development and improvement in instructional practices, transformative curriculum, and the improvement of relationships across school, community and university settings. Emphasis will be placed on the use of participatory and collaborative research approaches.

EU4: Critical perspectives on Language, Culture, and Literacy

Students will understand and apply an approach to language and literacy that is heteroglossic, a view of language and literacy as dynamic, and an understanding of the acquisition of language and literacy as a process that occurs within and is influenced by cultural systems and structures including (but not limited to) those of the family, the school, and the surrounding community.

EU 5: Collaboration and Partnership

Students will understand that effective teaching and learning is situated in local and globalized communities and incorporates assets of students, families, and broader communities into learning. Students will understand that transformative learning engages in collaborative, mutually beneficial, and sustainable relationships among school, communities, and multiple stakeholders to ensure the academic success and social & emotional learning of all students.

EU6: Principles and Practices of Social Justice

Students will develop their ability to apply principles and practices of a social justice lens in relation theories and practices of schools and communities by focusing on transformative teaching and learning, university-school-community collaborations, mitigating inequities and disrupting power structures and practices that have contributed to the marginalization of communities and people around the world through research and pedagogy.

Curriculum, Culture, and Communities (MEd)

The MEd in Curriculum, Culture, and Communities (3Cs) is designed within a social justice framework across schools and communities to prepare educators, community organizers, faith-based leaders, policy-makers, and others to take on new challenges as socially-just curriculum specialists in institutions of higher education, schools, and communities.

MEd in 3Cs is designed for an applicant who has less than 5 years of professional experience with BA/BS. Applicants with BA/BS with 5+ years of professional experience are eligible to apply for both MEd and Ed.D. in 3Cs. Those students who complete an MEd in 3Cs will have an option to matriculate into an Ed.D. program if they are in good academic standing.

	Total Hours	**30**

Length of the Program

Typically, students coursework takes two academic years.

Course Transfer

All MEd in 3Cs coursework is transferred as part of their coursework towards earning a doctorate in the program.

Continuous Enrollments

Master's students in 3Cs are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Students will be able to analyze theories of curriculum, pedagogy, and policy to advocate for equitable educational practices in local, state, national, and international contexts.
- Students will be able to synthesize and analyze historical, political, socioeconomic, and cultural contexts and apply community funds of knowledge frameworks to support equitable stakeholder engagement.
- Students will be able to develop/ plan appropriate#research methods that can contribute to the improvements in instructional practices, curriculum, and/ or relationships across school,#community,#and university settings.
- Students will be able to analyze asset-based, community-centered approaches that support collaborative partnerships and promote academic and social-emotional development.
- Students will be able to summarize how using a social justice lens can improve theories and educational practices to address iniquities in learning, instruction, and/or university-school-community collaborations.

Enduring Understandings & Program Outcomes

MEd & EdD in 3Cs is founded upon six enduring understandings (EUs)

EU1: Theories and Practices about Curriculum, Pedagogy, and Policy

- Students will develop understandings of curriculum, pedagogy, and policy and apply knowledge on transformative curriculum and pedagogy for innovative policy in the local, state, national, and international educational contexts to advocate with and for students, families, and communities.

EU2: Ecology of Communities

- Students will understand that effective educators comprehend the historical, political, socioeconomic, and cultural realities and funds of knowledge of local communities as well as relationships, practices, and systems. Further, students will understand that effective educators seek to engage multiple stakeholders toward creating that promote equity and social justice of society's most vulnerable groups.

EU3: Research, Evaluation & Change Practices

- Students will understand and use appropriate and rigorous research methods (e.g., qualitative, mixed, quantitative) and research types (e.g., basic, action, evaluation) to investigate critical questions that contribute to the development and improvement in instructional practices, transformative curriculum, and the improvement of relationships across school, community and university settings. Emphasis will be placed on the use of participatory and collaborative research approaches.

EU4: Critical perspectives on Language, Culture, and Literacy

- Students will understand and apply an approach to language and literacy that is heteroglossic, a view of language and literacy as dynamic, and an understanding of the acquisition of language and literacy as a process that occurs within and is influenced by cultural systems and structures including (but not limited to) those of the family, the school, and the surrounding community.

- Students will develop their ability to apply principles and practices of a social justice lens in relation theories and practices of schools and communities by focusing on transformative teaching and learning, university-school-community collaborations, mitigating inequities and disrupting power structures and practices that have contributed

to the marginalization of communities and people around the world through research and pedagogy.

Elementary Education (MEd)

The MEd in Elementary Education is designed for individuals looking to make a difference in the lives of children.

The program is designed for maximum flexibility to complete coursework on your schedule with courses offered in the evening using a hybrid format, allowing you to keep working while pursuing your degree.

In this program, you will focus on inclusive education and develop pedagogical and advocacy skills to promote equity and social justice for all learners in your classroom. Graduates receive a Professional Educator License (PEL) with elementary and ESL endorsements with the potential to add bilingual, learning behavior specialist (LBS1), and middle grades endorsements.

This program is designed for individuals seeking to secure an initial teaching license to teach in elementary schools, whether that be in general education, special education, or ESL and bilingual education. An integral component of our teacher preparation program is classroom experience where candidates engage directly with students and educators while developing their pedagogical expertise.

The Elementary Education (MEd) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Higher Education (MEd) (p. 1677)
- School Counseling (MEd) (p. 1661)
- Secondary Education (MEd) (p. 1697)

Curriculum

The Elementary Education MEd program offers several options for candidates interested in working with Elementary aged students and beyond. Upon successful completion of the 13-month Elementary MEd program (42 credit hours), candidates are eligible for an Illinois Professional Educator License with endorsements in Elementary Education and an English-as-a-Second Language (ESL) endorsement.

Additional tracks are available for for those candidates interested in a chosen area of specialization and include:

- Elementary Education with Endorsement in Dance, Theatre, Physical Education, Music, World Language, Health Education, Library Information, Technology, or Visual Arts (42 credit hours)
- Elementary Education with Learning Behavior Specialist I Endorsement (49 credit hours)
- Elementary Education with Learning Behavior Specialist I & Bilingual (52 credit hours)

All courses are hybrid, meaning that some class sessions are held in-person while other sessions are conducted on-line. Cohorts will meet one evening per week across the semester; this will be established prior to the start of the cohort. The course list below is for candidates seeking licensure in Elementary Education and ESL only.

Besides the traditional Master's program, the Elementary Education (MEd) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours
TLSC 401	Language, Learning & Development Theories in Practice [1]	2
TLSC 403	Teaching for Social Justice and Equity [1]	3
TLSC 404	Constructive Learning Environments for Diverse Students [1]	3

[1] This course may be used by students in the Accelerated Master's Pathway in their senior year.

Additional 13-Month Accelerated Specialty Tracks

Track 1: Elementary Education with Endorsement in Dance, Theatre, Physical Education, Music, World Language, Health Education, Library Information, Technology, or Visual Arts (MEd)

Candidates who are interested in completing Track 1 need to complete the 42 credit hour program curriculum listed above and must have at least 18 credit hours of previous coursework completed in their chosen area of concentration prior to entering the program to receive the additional endorsement in Track 1.

Track 2: Elementary Education with Learning Behavior Specialist I Endorsement (MEd)

Candidates who are interested in completing Track 2 will also need to complete the following course in addition to the core program curriculum for Elementary Education (MEd) listed above for 49 credit hours total.

Code	Title	Hours
CIEP 432	Three Tier Prevention: Secondary and Tertiary Supports	3

Program Length

This is a 2-year program beginning in the summer, designed for flexible options for you to complete your coursework and fieldwork in a variety of ways. With a blend of in-person and online sessions, as well as evening coursework, the program allows working professionals to seek out their degree and teaching licensure while remaining in current positions. Students will receive placement in school settings for fieldwork alongside related coursework. Students have five years from acceptance to complete the program.

Graduation Requirements

- Maintain overall GPA of 3.0 for graduation
- Complete student teaching experience
- Complete all degree requirements
- Complete comprehensive assessments

Licensure Requirements

- Complete coursework with related fieldwork
- Complete student teaching experience
- Complete required assessments

Continuous Enrollment

Master's students in Elementary Education are required to maintain continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional

Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Candidates will design, implement, and evaluate cohesive, culturally responsive instructional plans that integrate content knowledge, developmental theory, literacy and technology skills, and evidence-based pedagogical strategies to promote student growth at the elementary level as demonstrated by instructional plans, performance-based assessments, and clinical observations of their practice.
- Candidates will synthesize multiple forms of student data to evaluate instructional effectiveness, make informed pedagogical decisions, and develop targeted interventions that improve academic, social, and emotional outcomes for elementary school learners as demonstrated by instructional plans, performance-based assessments, and clinical observations of their practice.
- Candidates will evaluate educational policies and contextual factors at local, national, and global levels in order to collaboratively design advocacy, communication, and partnership strategies that promote equity and support elementary level students and families as demonstrated by in-class assignments and performance-based assessments.
- Candidates will design equitable, inclusive, and developmentally appropriate learning environments that leverage students' cultural and linguistic assets while fostering safety, belonging, and agency for elementary school learners as demonstrated by in-class assignments and instructional plans created for clinical experiences.

ESL Endorsement Certificate

As of Fall 2026, this program is no longer accepting applicants.

Classrooms continue to be more diverse than ever before, with a range of languages and cultures enriching the possibilities for learning and teaching. This growing linguistic diversity has prompted much-needed attention to the large and growing sub-group of students labeled as English learners or emergent bilinguals. Spanning urban, suburban, and rural areas across the United States and beyond, educational stakeholders recognize the need for all teachers to integrate and support students' languages and cultural backgrounds into curriculum and instruction.

The English as a Second Language (ESL) endorsement program prepares teachers to teach students labeled as emergent multilinguals in grades preK-12. The standalone endorsement program consists of 18 credits (6 courses) spread across 3 semesters. Additionally, our online cohort program can offer wide flexibility for completion of the coursework from anywhere in the world. Our top-notch professors in the field of ESL/Bilingual Education took great care to design an asynchronous curriculum that is purposeful and authentic. The project-based focus in the program allows for targeted online learning and is responsive to your individual goals and needs as teachers in diverse contexts worldwide.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Holistically support students' social, emotional, cultural, linguistic, and academic development and achievement.
- Align curriculum and instruction with the cultural and linguistic goals and resources of families and communities.

- Plan and implement classroom instruction and assessment that integrates language into rigorous literacy and content area teaching.
- Find and utilize culturally and linguistically relevant literature, materials, and technology to support learning, literacy, and biliteracy.
- Involve parents, families, and communities in meaningful ways to support students' learning, development, and achievement.

Language, Culture, and Curriculum (MEd)

As of Fall 2026, this program is no longer accepting applicants.

This program seeks to develop expert educators capable of serving in a variety of settings, including English as a Second Language (ESL), English as a Foreign Language (EFL), Teaching English to Speakers of Other Languages (TESOL), Bilingual Education, and general education classrooms with students labeled as English learners (ELs).

Classrooms and communities are more diverse than ever before, with a multitude of languages and cultures enriching the possibilities for learning and instruction. This increasing linguistic diversity has prompted much-needed attention to the large and growing sub-group of students labeled as English learners or *emergent* bilinguals. Spanning urban, suburban, and rural areas across the United States and beyond, educational stakeholders recognize the need for *all* teachers to integrate and support students' languages and cultural backgrounds into curriculum and instruction.

With this context in mind, we designed the Language, Culture, and Curriculum program at Loyola University Chicago to equip all teachers with the pertinent understandings and pedagogical practices to push forward emergent bilinguals' learning and language development across settings, including literacy, mathematics, science, social studies, world languages, and fine arts classrooms with children, adolescents, and adults. Since students develop and use language while engaged in learning, all educators can enhance their practice by adding lenses on language and culture to their curriculum.

Commitment to Social Justice

Reflecting our deep commitment to social justice, this program promotes equity for emergent bilinguals. We embrace as asset- based approach, recognizing that all students have resources that must be integrated into rigorous and engaging instruction to create inclusive and welcoming learning communities. We challenge institutional constructs that marginalize students and focus on developing teacher expertise and advocacy to leverage change in their unique contexts. To accomplish this, the backward designed curriculum first focuses on classroom practice before considering application in schools and communities. Graduates leave with the ability to support emergent bilinguals in their classrooms, while promoting broader change for equity and justice.

Loyola faculty designed this program with the classroom teacher in mind. The 10-course Master's degree program can be completed in 1.5 years while teaching, drawing from your current expertise and directly applying learning to your daily practice. Reflecting the responsive approach that we emphasize in our curriculum, we recognize the knowledge and experience that you bring to the program and make course learning applicable to your setting. The curriculum focuses on solving problems of practice, with each course centering on an authentic project that directly connects to and informs your teaching. There course projects consist of meaningful applications of your learning that immediately enhance and support your classroom practice with students.

To meet the widespread demand for well-prepared teachers of emergent bilinguals, we have an online cohort option that allows completion of the degree program from anywhere in the world on flexible time schedules. Mirroring the content of our in-person cohort offering in the Chicagoland area, we meticulously designed the asynchronous online curriculum to be purposeful and authentic, allowing the top-notch professors and experts in the field of EL/Bilingual Education to respond to your goals and needs as teachers in diverse contexts across the globe. The project-based focus allows for targeted online learning and support, rather than busywork and endless discussion boards.

Program Overview

In addition to completing your Master's degree from Loyola University Chicago, the coursework also meets the requirements for the English as a Second Language (ESL) endorsement and the Bilingual Endorsement in the state of Illinois. If you work in one of the 43 states that has reciprocity agreements with the state of Illinois, both the ESLand Bilingual endorsements can transfer to your teaching license if first attached to the Illinois license. We look forward to supporting your learning and professional development in the Language, Culture, and Curriculum program.

Program Benefits

- Enhance your expertise and practice to work in settings including ESL, EFL, TESOL, bilingual, and general education.
- Earn your Master's degree, which includes required coursework for the ESL endorsement and the bilingual endorsement.
- Develop in-depth expertise to support the learning and language development of all students with targeted focus on emergent bilingual learners.
- Complete coursework online from anywhere in the world or take courses in-person on our Chicago campus.
- Immediately apply your leaning to your classroom practice via the project-based approach that prioritizes both you and your students' growth.
- Engage in collaborative learning with other educators via structured cohorts that move through the strategically sequenced 10-course program together.
- Complete the degree program in less than 1.5 years by taking two courses per semester – ideal for the busy classroom teacher looking for flexibility and applicability.

Program Faculty

Our dedicated Teaching and Learning Faculty (https://www.luc.edu/education/directory/) are experts in their fields who will support students throughout each stage of the program.

Program Advisor

Amy Heineke (https://www.luc.edu/education/directory/profiles/heinekeamyj.shtml/)

Faculty Expertise

- Curriculum foundations-practice-policies
- Field-based teacher education and teacher advocacy
- Collaborative school-community partnerships
- Language, literacy, and culture
- Culturally responsive practice and curriculum reform

- Spirituality & transformative curriculum leadership
- Disciplinary expertise: Math, Science, ELA, Social Studies, Elementary Ed, Special Ed, and Early Childhood

International Students

International Students: Educators from countries around the world are encouraged to apply to Loyola's Language, Culture and Curriculum Master's Program to develop their asset-based linguistically and culturally responsive practice and explore new ideas. Courses focus on theories, concepts, and skill development applicable to schools with bilingual and multilingual student populations in any context.

For more information on taking part in this program as an international student, please visit: International Students (https://www.luc.edu/undergrad/letsgetstarted/international/).

CIEP 509	Literacy Teaching for Bilingual & Multilingual Students	3
Total Hours		**30**

Clinical Experiences

Students will complete clinical experiences integrated within individual courses. For students who are not currently teaching, additional clinical hours may be required outside of coursework.

Comprehensive Assessment

The comprehensive portfolio for this program will be completed throughout the program. The professional portfolio includes the focal project from each practice-based course, including:

- Personal philosophy for teaching emergent bilingual students
- Community study and culturally relevant library list
- Parent guide to federal, state, and local language policies
- Classroom displays for students' metalinguistic awareness
- Student case study and assessment portfolio
- Literacy and biliteracy student intervention plan
- Disciplinary unit plan with language lens
- Co-planning and co-teaching unit of study
- Applied linguistics problem and action plan
- Professional development plan for school change

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year One		
Summer		
CIEP 508	Social Justice for Multilingual Learners	3
CIEP 503	Culturally Relevant Literature for Children & Adolescents	3

CIEP 473	Instructional Leadership for Multicultural Schools	3
	Hours	**6**
	Total Hours	**30**

Licensure

Students interested in pursuing the MEd in Language, Culture, and Curriculum are not required to hold a teaching license.

Students will need to hold a valid teaching license should they wish to formally attach the ESL endorsement that is a part of this larger Master's degree program.

This program will provide the coursework needed to receive an ESL endorsement if candidates hold an Illinois teaching license. The endorsement is for the grade range of the license with the exception of the middle grades. Adding the middle grade ESL endorsement may require additional course work if the middle grade endorsement is not currently on the license.

Applicants licensed to teach outside of the state of Illinois may be able to receive the ESL endorsement through the Language, Culture, and Curriculum program through reciprocity agreements.

- The following states have reciprocity agreements with Illinois: Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

For more information, please visit: Illinois Licensure (https://www.luc.edu/education/academics/illinoisstatelicensure/)

Length of Program

Students complete the program in 1.5 years, takings two classes each semester for five semesters (i.e., Spring, Summer, Fall, Spring, Summer). Should the need arise to deviate from the cohort, students have five years from acceptance to complete the program.

Continuous Enrollments

Master's students in Language, Culture, and Curriculum are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- By program completion, teachers will design, implement, and evaluate policies, programs, or services for multilingual learners to demonstrate effective enactment of educational policy in school and classroom contexts.
- By program completion, teachers will design and implement authentic assessments of language development across listening, speaking, reading, and writing domains to analyze data and plan responsive instruction.
- By program completion, teachers will plan and implement instruction that integrate students' cultural background knowledge and language development to support rigorous literacy and content-area learning.
- By program completion, teachers will identify, evaluate, and use culturally and linguistically relevant literature, materials, and technologies to promote learning, literacy, and biliteracy for multilingual learners.
- By program completion, teachers will develop schoolwide action plans and professional learning experiences to promote equity and improve educational outcomes for multilingual learners.

Secondary Education (MEd)

Earn a degree and certification to teach at the high school level at Loyola, a longtime partner of Chicago-area schools.

As a high school teacher, you will have the opportunity to support and influence students at a critical, formative time in their life. Here at Loyola, earn a master's degree through an immersive curriculum that places you directly in Chicago's classrooms, learning from other teachers and making a difference for students right away.

The Secondary Education (MEd) also offers an Accelerated Master's Pathway for Undergraduate students to complete their Graduate studies in a fifth year. Further details of the AMP, including the suggested sequence of courses, can be found under the Curriculum tab.

Related Programs

Master's

- Elementary Education (MEd) (p. 1691)

Certificate

- ESL Endorsement Certificate (p. 1694)

Curriculum

Accredited by the Council for the Accreditation of Educator Preparation (CAEP (http://caepnet.org/)) and by the Illinois State Board of Education (ISBE (https://www.isbe.net/)), Loyola's MEd in secondary education requires 37 semester hours. Upon successful completion of the program, candidates are eligible for an Illinois Professional Educator License with endorsements in their specific major and an English-as-a-Second Language (ESL) teacher.

Candidates who complete the program for English, Math, History or Science will be licensed to teach grades 9-12.

Candidates who complete the program for Dance, Theatre, Physical Education, Music, World Language, Health Education, Library Information, Technology, or Visual Arts will be licensed to teach grades PK-12.

The program offers an additional track for candidates who wish to add the middle grades endorsement for grades 5-8 (40 semester hours).

Besides the traditional Master's program, the Secondary Education (MEd) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours
TLSC 401	Language, Learning & Development Theories in Practice [1]	2
TLSC 403	Teaching for Social Justice and Equity [1]	3
TLSC 404	Constructive Learning Environments for Diverse Students [1]	3

TLSC 470B	Student Teaching for Change	4
TLSC 480	Teaching for Change Field Seminar	1
Total Hours		**37**

[1] This course may be used by students in the Accelerated Master's Pathway in their senior year.

Additional Tracks

Track 1: Secondary Education with Middle Grades (MEd)

Candidates who are interested in completing Track 1 will also need to complete the following course in addition to the core program curriculum for Secondary Education (MEd) listed above.

Code	Title	Hours
CIEP 455	Advanced Curriculum & Teaching in the Middle School	3

Track 2: Secondary Education with Endorsement in Dance, Theatre, Physical Education, Music, World Language, Health Education, Library Information, Technology, or Visual Arts (MEd)

Candidates who are interested in completing Track 2 need to complete the 37 credit hour program curriculum listed above and must have at least 18 credit hours of previous coursework completed in their chosen area of concentration prior to entering the program to receive the additional endorsement in Track 2.

Suggested Sequence of Courses

Traditional Master's Program

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

	Hours	**9**
Year 2		
Summer		
TLSC 470B	Student Teaching for Change	4
	Hours	**4**
	Total Hours	**37**

Length of Program

Candidates complete the program in one year (Summer, Fall, Spring, and Summer). This is a full-time, field-based program. Students have five years from acceptance to complete the program.

Licensure Requirements

Candidates must meet all Licensure Requirements (https://www.luc.edu/education/academics/illinoisstatelicensure/) including the Educational Teacher Performance Assessment (edTPA), which demonstrates expertise in content areas and pedagogy, as well as a reflection on classroom and clinical experiences.

Continuous Enrollments

Master's students in Secondary Education are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

This program follows a cohort model, enrolling a group of students who attend all of the required courses leading to a degree together. In this model, students benefit from networking and building professional relationships with one another during the course of their program. Once a cohort is formed, the students remain together for the duration of their program. The development of the cohort is contingent upon reaching the required numbers of enrolled students.

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate

program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Candidates will design, implement, and evaluate cohesive, culturally responsive instructional plans that integrate deep disciplinary knowledge, adolescent developmental theory, secondary-level literacy practices, technology, and evidence-based pedagogical strategies to promote student growth.
- Candidates will synthesize multiple forms of student data to evaluate instructional effectiveness, make informed pedagogical decisions, and develop targeted interventions that improve the academic, social, and emotional outcomes of high school learners.
- Candidates will critically evaluate educational policies and contextual factors at local, national, and global levels and collaboratively design advocacy, communication, and partnership strategies that promote equity and support high school students and their families
- Candidates will design equitable, inclusive, and developmentally appropriate secondary learning environments that leverage adolescents' cultural, linguistic, and individual assets while fostering safety, belonging, and agency for high school learners.

Special Education (MEd)

The MEd in Special Education is a graduate program designed to prepare you to serve as a licensed special education teacher in Illinois. Whether you see yourself supporting students in inclusive classrooms, resource settings, or specialized programs, you will develop the instructional expertise, assessment skills, and professional values needed to help students with disabilities thrive academically, socially, and behaviorally.

As a long-standing partner of Chicago-area and Illinois school districts, Loyola University Chicago offers a practice-based curriculum grounded in real classroom experience. Through a learn-and-earn apprenticeship model, you will remain embedded in your school community while completing coursework and clinical experiences under the mentorship of experienced special educators. With Loyola's nationally respected School of Education, you will build the confidence and competence to lead inclusive, equity-centered learning environments that make a lasting difference for students and families.

This program pathway includes both the Special Education Endorsement Certificate (Learning Behavior Specialist I – LBS1) and the option to complete a full Master of Education degree.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Apply evidence-based academic and behavioral strategies to design, implement, and monitor interventions for learners with disabilities across K–12 settings, ensuring alignment with Illinois Learning Standards and individualized education program (IEP) goals.
- Analyze multiple sources of assessment data—including curriculum-based measures, functional behavior assessments, and standardized assessments—to develop data-driven instructional plans and progress monitoring systems.
- Evaluate the effectiveness of instructional environments, including general and special education settings, and create adapted materials, supports, and assistive technology plans that promote access, engagement, and positive behavior.
- Evaluate collaborative, culturally responsive practices for working with families, educators, and related service providers to support effective IEP development, implementation, and compliance with Illinois and federal special education law.

Special Education Endorsement Certificate

The Special Education Endorsement Certificate is designed for paraprofessionals currently employed in Illinois school districts who are seeking licensure in special education. This 24-credit-hour graduate certificate integrates coursework in assessment, curriculum adaptations, academic and behavioral intervention, and special education law with hands-on clinical practice. Candidates must also pass the LBS1 content exam and meet Illinois licensure requirements.

A key component of the program is the apprenticeship structure, which allows candidates to learn, earn, and apply new strategies immediately within their school settings while receiving ongoing faculty and mentor support.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Instructional Planning and Delivery: Candidates will plan and deliver effective, evidence-based instruction for students with disabilities, as measured by mentor rubrics, faculty observations, and the adapted edTPA.
- Behavior Management: Candidates will implement positive behavioral interventions and supports in diverse classroom settings, evaluated through structured observations and milestone assessments
- Collaboration and Professional Practice: Candidates will collaborate effectively with mentor teachers, colleagues, and families to support student learning, as assessed by rubrics and reflective assignments.
- Assessment Competence: Candidates will design, administer, and interpret multiple forms of assessment to inform instruction, measured by course assignments, mentor/faculty evaluations, and adapted edTPA artifacts.
- Teaching Preparedness: Candidates will apply evidence-based instructional strategies, design and implement lesson plans, and assess student learning

- Reflective Practice and Professional Growth: Candidates will develop their professional reflective skills through guided reflections and milestone reviews, integrating theory and practice.

School of Environmental Sustainability

Empowering the Next Generation of Environmental Leaders

Graduate programs in the School of Environmental Sustainability equip students with the knowledge and skills to find sustainable solutions to environmental challenges. At SES you can:

- Expand your professional impact and strengthen your interdisciplinary expertise through our Master of Science in Environmental Science and Sustainability program. Learn the skills needed to join the growing number of researchers and environmental science and sustainability specialists, while earning a degree that can advance your professional standing.
- Examine research questions in pressing environmental issues such as environmental conservation, environmental economics, invasive species, climate change, and sustainability.
- Analyze the intersection of environmental science, social justice, business practices, economic structures, and legal systems.
- Explore the United Nations' Sustainable Development Goals and Ecosystem Assessment Report that address global and interdisciplinary aspects of environmental sustainability in science and society.
- Design your own personal curriculum to gain practical knowledge and skills in this rapidly expanding career field.
- Learn from experts and researchers working together in a truly interdisciplinary team.

Program Outcomes

The SES graduate programs prepare students for careers in the sustainability field and to live integrated, environmentally sustainable lives with careers in positions such as:

- Research Associate
- Grants Manager
- Sustainable Supply Chain Manager
- Energy and Sustainability Researcher
- ESG Coordinator/Analyst
- Environmental Policy Analyst
- Project Manager
- Sustainability Manager
- Communications Manager
- Environmental Educator

SES graduates work in nonprofits, businesses, cultural and educational institutions, and government agencies such as:

- Midwest Energy Efficiency Alliance
- Natural Resources Defense Council
- EPA
- Environmental Defense Fund
- WWF
- Citizens Climate Lobby
- City of Chicago
- Chicago Botanic Garden
- The Field Museum

Graduate Programs

- Environmental Law and Policy Certificate (p. 1706)
- Environmental Science and Sustainability (MS) (p. 1707)
- Geographic Information Systems (GIS) Certificate (p. 1713)
- Sustainability Assessment and Planning Certificate (p. 1713)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

ENVS 401 Sustainable Systems - Natural Science Perspectives (3 Credit Hours)
This required core course provides an integrated overview of environmental science and sustainability which connect to sustainable development and ecological economics goals to define a just and safe space for the equitable distribution of life's essential re-sources that does not exceed the Earth's capacity to provide and replenish them. Restricted to GRAD students.
Outcomes:
Students will be able to make logical connections between environmental science and sustainability and evaluate data and primary literature in learning best practices for making evidence-based decisions

ENVS 402 Sustainable Systems - Social Science Perspectives (3 Credit Hours)
This required core course examines theoretical perspectives on and practical examples of sustainable development at both global and local/regional scales. Restricted to GRAD students.
Outcomes:
Students learn concepts of sustainable development and system ,resilience, including history, contested meanings, strengths, and limitations of each; How change towards sustainability occurs at multiple scales using social sciences research

ENVS 410 Introduction to Environmental Law & Policy (3 Credit Hours)
This introduction to environmental law surveys some critical federal environmental statutes, rules, and regulations in the United States; important case law decided under those statutes; interaction between federal, state, and local jurisdictions; and impacts on air, land, water, and natural resources. Restricted to GRAD students.
Outcomes:
Understand how the natural environment is controlled, managed and promoted through the legal system

ENVS 411 Natural Resources and Land Use Law & Policy (3 Credit Hours)
Focus on legal and policy processes used to govern pollution, water use, endangered species, toxic substances, and environmental impact and risk. Restricted to GRAD students.
Outcomes:
Students will understand how the natural environment is controlled, managed and promoted through the legal system and how land use laws and policy impact social and economic issues

ENVS 412 Water Law & Policy (3 Credit Hours)
This course looks at how the law allocates and protects one of our most crucial natural resources -- water. Understanding development and regulation of water ownership and use and how those decisions impact current environmental and socio-economic issues. Restricted to GRAD students.
Outcomes:
Understand how key laws and policies impact protection and use of water in the United States; understand key legal concepts that shape the management of our water resources

ENVS 413 Energy Law & Policy (3 Credit Hours)
This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy. Restricted to GRAD students.
Outcomes:
Understand how key laws and policies impact production and use of energy; and how energy is controlled by federal and local regulations and policies

ENVS 420 Conservation Biology (3 Credit Hours)
Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change. Restricted to GRAD students.
Outcomes:
Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems

ENVS 422 Invasive Species (3 Credit Hours)
Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause. Restricted to GRAD students.
Outcomes:
Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem

ENVS 423 Environmental Microbiology (3 Credit Hours)
This course introduces the significant role of microorganisms in numerous environmental and human-engineered processes. It covers microbiology and its basic methods to orient students to this field of science and the importance of microbial diversity relevant to agriculture, public health, and ecological restoration. Restricted to Graduate Students in the ENSS-MS program.
Course equivalencies: ENVS 323/ENVS 423
Outcomes:
Students will learn to isolate and characterize environmental microorganisms; Students will investigate the role of microorganisms in nutrient cycling, remediation of soils, and transmission of existing and emerging pathogens

ENVS 425 Sustainable Agriculture (3 Credit Hours)
This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored. Restricted to GRAD students.
Outcomes:
Students will be able to explain the characteristics of the US agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system

ENVS 426 Agroecosystems (3 Credit Hours)
In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad. Restricted to GRAD students.
Outcomes:
Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating scientific information to diverse audiences

ENVS 427 Food Systems Analysis (3 Credit Hours)
This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change. Restricted to GRAD students.
Outcomes:
Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis

ENVS 430 Restoration Ecology (3 Credit Hours)
This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types. Restricted to GRAD students.
Outcomes:
Students will apply knowledge from ecology and other disciplines to the practice of ecosystem restoration, and learn to integrate information from multiple disciplines, and stakeholder input, to design/manage restoration projects

ENVS 433 Introduction to the Circular Economy (3 Credit Hours)
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. Restricted to graduate students.
Outcomes:
Understand role of design in creating a sustainable future; Understand and apply: (1) circular design methods; (2) biomimicry design methods; and (3) human-centered design (design thinking) methods

ENVS 435 Ecological Economics (3 Credit Hours)
Ecological Economics is a trans disciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges. Restricted to GRAD students.
Outcomes:
Understanding of ecological economics history, conceptual foundations, principles, tools, indicators, and applications; Topics include sustainable scale, just distribution, efficient allocation and relationships between economic

ENVS 436 Design for Circular & Sustainable Business (3 Credit Hours)
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. ENVS 436 Restricted to graduate students.
Outcomes:
Understand the role of design in creating a sustainable future; Understand and apply: (1) circular design methods (2) biomimicry design methods; and (3) human-centered design (design thinking) methods

ENVS 438 Climate Change and Human Health (3 Credit Hours)
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing. Restricted to GRAD students.
Outcomes:
1) Outline fundamental public health concerns associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

ENVS 451 Introduction to Sustainability Concepts & Impacts (3 Credit Hours)
Examines environmental, economic, social and political impacts of sustainable practices on general public and global and local organizations. Provides students with understanding of importance to corporations and other entities of measuring, monitoring, and reporting resource use to customers and stakeholders. Restricted to GRAD students.
Outcomes:
Explaining basic concepts of sustainability and how they relate to operations and goals of institutions and organizations; interaction of social, economic, and ecological systems to influence sustainability challenges and solutions

ENVS 452 Sustainability Assessment & Reporting I (3 Credit Hours)
Pre-requisites: ENVS 451; GRAD students
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of energy, air, buildings and transportation.
Outcomes:
Ability to assess and report sustainability metrics related to energy, air, buildings, and transportation

ENVS 453 Sustainability Assessment & Reporting II (3 Credit Hours)
Pre-requisites: ENVS 451; GRAD students
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of water, land, food and waste. Environmental and social impacts of water use and sources, land use practices, food sourcing and production, and waste production and recovery.
Outcomes:
Ability to assess and report sustainability metrics related to water, land, food, and waste

ENVS 454 Sustainability Plan Development & Reporting (3 Credit Hours)
Pre-requisites: ENVS 451, 452, and 453; GRAD students
Capstone course in the four course sequence on Sustainability Assessment & Planning. Using concepts and methodology to create a comprehensive sustainability plan including stakeholder engagement, life cycle analyses, set resource baselines, short- and long-term sustainability goals, budgets and draft sustainability plan for a representative entity.
Outcomes:
Learn best practices to inspire and engage partners and stakeholders to advance environmental sustainability in different types of organizations; Ability to create a comprehensive sustainability plan for organizations and institutions

ENVS 463 Sustainable Business Management (3 Credit Hours)
Co-requisites: ENVS 410
To introduce students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, moral, business, and economic cases for adopting sustainability. This course fulfills a MGMT elective.
Course equivalencies: MGMT/ENVS 363/ENVS 463
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

ENVS 467 Mammalogy (3 Credit Hours)
Pre-requisites: Graduate students only
This course will focus on the ecology, evolution, behavior, and conservation of the class, Mammalia. Students will gain insight how this unique group evolved over time and became the dominate lineage over the Tertiary period. Furthermore, we will investigate how mammals hold special social and cultural relationship with humans, and why we have such complicated relationships with mammals, from revering them in religious contexts, to keeping them in our homes, to consuming them as nutrition.
Outcomes:
Working knowledge and mastery of the traits, evolutionary timescale, ecology, and conservation of mammals; Students will also gain experience collecting data (on museum samples as well as observations of living samples) to learn current techniques scientists and conservationists use to advance our understanding of this group

ENVS 469 Field Ornithology (3 Credit Hours)
Field ornithology is an intensive 3-week engaged-learning course at the Loyola University Retreat and Ecology Campus during the peak of the migratory season intended to provide an introduction to the theory and practice of field ornithology. Emphasis will be on field identification and song recognition, census techniques, and avian behavior. Restricted to GRAD students.
Outcomes:
Students will become skilled in critical reasoning, field techniques, and scientific investigation that demonstrate an understanding of knowledge and techniques used in field ornithology

ENVS 480 Introduction to Geographic Information Systems (3 Credit Hours)
Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations. Restricted to GRAD students.
Course equivalencies: ENVS380/ENVS480
Outcomes:
Describe the conceptual/theoretical and practical/technological background of GIS; describe ethical issues germane to GIS; prepare/analyze GIS data in research; apply GIS in community-service projects

ENVS 481 Advanced GIS Applications (3 Credit Hours)
Pre-requisites: ENVS 480
Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data.
Outcomes:
Understand various spatial relationship concepts and their applications; identify and address common methodological challenges; understand how to use spatial data to make sound arguments in spatial problem solving and planning/policy

ENVS 482 Remote Sensing (3 Credit Hours)
Science of obtaining information about objects or areas using data from remote sensors on satellites or mounted on aircraft that can detect energy reflected from Earth. Topics include data collection; digital image processing, assessment, evaluation, and enhancement; display alternatives and visualization; electromagnetic radiation principles and radiometric correction; and geometric correction. Restricted to GRAD students.
Outcomes:
Understand concepts, data, and methods of remotely sensed geographic data; Learn how to obtain and analyze remote sensing data, produce thematic maps, learn landscape patterns, and methods to decipher them

ENVS 483 Human Dimensions of Conservation (3 Credit Hours)
This course will increase student knowledge of the social, political, economic, psychological, and cultural dimensions that influence the success of conservation projects and develop skills in conducting human dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute to preparation for employment in the conservation field and/or graduate study. Restricted to GRAD students.
Outcomes:
Students will understand the importance of treating the human dimensions of conservation problems with the same scientific rigor customarily given to the ecological dimensions

ENVS 484 Conservation Economics (3 Credit Hours)
Explores resource conservation issues using economic principles. Topics include management of forests, wildlife and mineral resources; the demand for parks and outdoor recreation; the debate between environmental preservation and conservation; valuation of ecosystem services; the economics of biodiversity and endangered species; and policies to promote conservation in agriculture. Restricted to Grad students.
Outcomes:
Students will learn how natural resource use is affected by economic values, how to critically evaluate natural resource management problems, and evaluate models of dynamic resource extraction and user preferences

ENVS 486 Python Programming for GIS (3 Credit Hours)
Pre-requisites: Graduate Student Standing
This course aims to provide students with a comprehensive understanding of Python programming for Geographic Information Systems. Through a combination of lectures, hands-on exercises, and projects, students will develop the skills necessary to leverage Python in GIS applications, automate geospatial workflows, and analyze spatial data. ENVS 480 pre- or co-requisite
Outcomes:
Understand Python programming language, loops and conditional statements; acquire a foundation knowledge of GIS; apply Python programming skills to perform spatial analysis; develop Python scripts to automate common GIS tasks

ENVS 487 Principles of Ecotoxicology (3 Credit Hours)
This course will provide information on how pollutants affect ecosystems and how we might ameliorate their negative effects in our world. The emphasis of this course will be the fate and effects of pollutants in the ecosystem. The effects will be from molecular level to individual organism, community, and ecosystem levels. Restricted to GRAD students.
Outcomes:
This course will provide students with scientific knowledge in the cause and effects of pollutants in ecosystems

ENVS 489 Ecological Risk Assessment (3 Credit Hours)
This course covers the area of potential effects of pollutants to ecosystems and practices on risk assessment for pollutants based on exposure and effect data in the literature. Different approaches for assessing the potential ecological impacts and risks of pollutants in support of environmental management will be discussed and practiced. Restricted to Graduate students.
Outcomes:
Learn toxic effects of pollutants, acquire, organize, and synthesize monitoring and effect data using advanced analysis methods and skills in support of environmental impact and risk assessment via case studies

ENVS 490B Integral Ecology First Studies Program: Biodiversity (1 Credit Hour)
This course explores the environmental crisis of the loss of biodiversity. It covers the evolutionary origin of biodiversity, the importance and glory of biodiversity, and how ecosystem structure and function collapses when we reach the tipping point of species extinction. The course is intended for Jesuit men in formation in the First Studies Program, and is limited to them. No prerequisites are required.
Outcomes:
First Studies men will grasp the scientific concepts of biodiversity, explore the ethical and spiritual dimensions of biodiversity loss, and take actions to lessen the loss of biodiversity

ENVS 490C Integral Ecology First Studies Program: Climate Change (1 Credit Hour)
This course covers the science of climate change including the physical and chemical underpinnings of fossil fuels and greenhouse gases and their impact on trapping solar infrared radiation within the Earth's atmosphere and causing subsequent warming of the land and oceans. Warming of the planet increases the frequency and intensity of storms like hurricanes, cyclones, typhoons, it melts glaciers and causes sea levels to rise. Climate change is modifying the planetary distribution of precipitation which can produce water scarcity in some parts of the world, and leads to flooding and poor water quality in other locations. This course will study the scientific drivers of climate change, and the social and ethical ramifications of how the marginalized are disproportionately impacted. It will touch on environmental justice, water, land and food insecurity, and solutions to the climate crisis in first world countries as well as in developing countries. The course is intended for Jesuit men in formation in the First Studies Program, and is limited to them. No prerequisites are required.
Outcomes:
Understand the chemical composition of the three main classes of fossil fuels and connect the chemistry to greenhouse gases and the greenhouse effect; Explore the many ways in which climate change is impacting the planets' hydrologic cycle, the melting of polar ice caps and glaciers, rising sea levels, increased frequency and intensity of droughts, floods, wildfires and storm events worldwide; Understand the benefits and challenges of clean energy technologies, and where solar, geothermal, wind, biofuels and hydro are good solutions, and the geopolitical environment around clean energy technologies; Analyze key ethical challenges arising from climate change that human beings are confronting with in the world today and understand the moral principles, goals, and virtues important for guiding decisions about making a just transition to a clean energy economy; Discover ways in which spirituality has influenced the human understanding and use of fossil fuels, and recognize the importance of spirituality for responding constructively to today's climate crisis

ENVS 490W Integral Ecology First Studies Program: Water (1 Credit Hour)
This course covers the science of water - physical and chemical properties of water, how the hydrologic cycle distributes water across the planet, how climate change is modifying the distribution of water which can produce water scarcity in some parts of the world, and leads to flooding and poor water quality in other locations, and how the marginalized are disproportionately water insecure. It will touch on environmental justice and water insecurity, and some technologies for cleaning waste water and finishing drinking water in first world countries as well as in developing countries. The course is intended for Jesuit men in formation in the First Studies Program, and is limited to them. No prerequisites are required.
Outcomes:
First Studies men will explore the structure of the water molecule, the water cycle, and the changing water content in the atmosphere; Understand the sources of water, the distribution of water on Earth, and the effect of human activities on distribution cycles; Explore wastewater treatment plants and/or drinking water finishing plants in the city of Chicago to learn how water can be cleaned and reused for human consumption; Analyze key ethical challenges about water that human beings are confronting in the world today and understand the moral principles, goals, and virtues important for guiding water decisions; Discover ways in which spirituality has influenced the human understanding and use of water, and recognize the importance of spirituality for responding constructively to today's water crisis

ENVS 491 Independent Environmental Research (1-4 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. Post-baccalaureate students only.
Outcomes:
Dependent on the specific research project and goals

ENVS 495 Environmental Internship (3 Credit Hours)
Students seek out and engage in a semester -or summer-long internship with a civic, business, governmental, or academic group providing hands on experience in work on environmental issues. Post-baccalaureate students only.
Outcomes:
Students demonstrate, through daily activity logs and comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience

ENVS 496 Research (3-12 Credit Hours)
Restricted to GRAD students.

ENVS 498 Special Topics (1-12 Credit Hours)
Pre-requisites: Post-baccalaureate students only
Specific titles and contents vary from semester to semester. Variable credit hours.
Outcomes:
Dependent on the specific course content and goals

ENVS 498L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes a lab component. Variable credit hours. Post-baccalaureate students only.
Outcomes:
Dependent on the specific course content and goals

ENVS 499 Directed Readings (1-3 Credit Hours)
Directed by an SES faculty member, students will read, analyze, and discuss a publications focusing on different aspects of a specific environmental issue or theme. Post-baccalaureate students only.
Outcomes:
Students demonstrate comprehension, ability to apply information from scientific literature and synthesize information to produce cogent, synthetic analysis of their topic based on these readings

ENVS 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: Restricted to SES, GRAD students
Students will make supervised progress towards completion of their theses.
Outcomes:
Conduct individual research projects

ENVS 605 Master's Study (1 Credit Hour)
Pre-requisites: Restricted to GRAD students
No course description is available

Environmental Law and Policy Certificate

This certificate program offers essential knowledge of critical issues in environmental law and policy. Students expand their understanding of the roles of government, industry, nonprofit organizations, and other institutions involved in environmental regulation, advocacy, consulting, and compliance.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Understand how the legal process works as it relates to the environment, and how the process creates challenges and benefits to making good decisions
- Learn how the natural environment is controlled, managed and promoted through the US legal system through the key foundations of environmental law principles and how they have been applied and developed over time
- Gain appreciation for how environmental law and policy can impact social justice

Environmental Science and Sustainability (MS)

The SES Master of Science in Environmental Science & Sustainability takes a whole-systems, interdisciplinary approach to global environmental and sustainability challenges. The program offers a choice of two tracks, Research and Professional, and can be pursued by students of any academic background.

Students in both tracks will complete 30 credit hours of instruction, including 6 credit hours in two core courses. Research Track students will pursue an original, in-depth research project, culminating in the writing and defending of a thesis. Professional Track students will complete coursework in one of four professional concentration areas, Environmental Law & Policy, Geographic Information Systems, Sustainable Assessment & Planning and Sustainable Business.

Curriculum

The Environmental Science and Sustainability (MS) is a 30 credit hour program.

Besides the traditional Master's program, the Environmental Science and Sustainability (MS) is also offered as an Accelerated Master's Pathway where exceptional students can complete the program in a fifth year. A suggested sequence for the AMP can be found below.

Code	Title	Hours
Required Courses		
ENVS 401	Sustainable Systems - Natural Science Perspectives	3
ENVS 402	Sustainable Systems - Social Science Perspectives	3
Track Specific Curricula		**24-25**
Research Track Curriculum		
Electives		
Students choose 12 credit hours of electives from either of the following in conjunction with their advisor:		
Natural Science and Quantitative Electives; or (p. 1708)		
Sustainable Society and Business Electives (p. 1709)		
Thesis Research		
Students take 12 credit hours of research to design and conduct research thesis work under the guidance of a thesis advisor and thesis committee. Research track students are required to complete and defend their thesis to graduate.		
ENVS 496	Research	
ENVS 595	Thesis Supervision	
Professional Track Curriculum		
Students choose from one of the following concentration areas: Environmental Law and Policy, Geographic Information Systems, Sustainable Assessment Planning, or Sustainable Business (p. 1708)		
Electives		
Students choose electives from either of the following lists in conjunction with their advisors to complete requirements:		
Natural Science and Quantitative Electives; or (p. 1708)		
Sustainable Society and Business Electives (p. 1709)		
Total Hours		**30-31**

Professional Track Curriculum Concentrations

Environmental Law and Policy

This Concentration provides essential knowledge in relevant areas of environmental law and policy for professionals who want to better understand the role of government, industry, non-profit, and other institutions involved in environmental advocacy, consulting, and compliance.

Code	Title	Hours
ENVS 410	Introduction to Environmental Law & Policy	3
ENVS 411	Natural Resources and Land Use Law & Policy	3

ENVS 413	Energy Law & Policy	3
Natural Science and Quantitative Elective		3
Natural Science and Quantitative Elective		3
Environmental Elective		3
Environmental Elective		3

Geographic Information Systems (GIS)

This Concentration provides essential knowledge on Geographic Information Systems (GIS) - a compilation of sophisticated, multidimensional software and tools used to capture, store, analyze, manage and present geospatial data. This curriculum provides essential training in the fundamental principles and concepts behind contemporary geographic mapping technology needed to solve complex geospatial problems commonly encountered in environmental sciences, urban planning, social sciences, public health, as well as business, engineering, and many more fields.

Code	Title	Hours
ENVS 480	Introduction to Geographic Information Systems	3

Guidelines for Accelerated Master's Pathways

In Accelerated Master's Pathways, students share limited, authorized credits between their Undergraduate and Graduate degrees to facilitate completion of both degrees in a shorter amount of time. Shared credits are Graduate level credit hours (400-level or higher) taken during the Undergraduate career and then applied both to the Undergraduate degree and towards Graduate program requirements.

Admission and Matriculation

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's Undergraduates. Admission to these programs is competitive and will depend upon a positive review of credentials by the Graduate program. Accordingly, the admission requirements for these programs may be higher than those required if the Master's degree were pursued entirely after the receipt of a Bachelor's degree.

Students enrolled in an Accelerated Master's Pathway who choose not to continue to the Master's degree program upon completion of the Bachelor's degree will face no consequences.

Ideally, a student will apply for admission to an AMP program as they approach 90 credit hours in their Undergraduate career.

Students will not officially matriculate into the Master's degree program and be labeled as a Graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the Undergraduate degree has been awarded. Once admitted to the Graduate program, students must meet the academic standing requirements of their Graduate program as they complete the program curriculum.

Advising and Registration

Students in their final Undergraduate year will work with Advising in the home School of their Bachelor's program(s), as well as the Graduate Program Director of the Master's program. Any 400-level or higher courses that the student plans to enroll in should be reviewed by both advisors to ensure that these courses will complete requirements for both degrees.

Registration in Graduate level courses during the Undergraduate year may require assistance from the Graduate Program Director and/or the student's current academic advisor to enroll.

Shared Credits

Only courses taken at the 400-level or higher will count toward the Graduate program. At the Undergraduate level, students are restricted to enrolling in and sharing up to the number of Graduate level credits explicitly indicated in the catalog for their selected AMP program.

In general, Graduate level coursework should not be taken prior to admission into the Accelerated Master's Pathway. Exceptions may be granted for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier. On the recommendation of the program's Graduate Program Director, students may take one of their Graduate level courses before they are admitted to the Accelerated Master's Pathway if they have advanced abilities in their discipline and course offerings warrant such an exception.

Degree Requirements and Conferral

Undergraduate degree requirements are in no way impacted by admission to an Accelerated Master's Pathway. Students should not, for example, attempt to negotiate themselves out of a writing intensive requirement on the basis of admission to a Graduate program.

The program's Graduate Program Director will designate credit hours to be shared through the advising form and Master's degree conferral review process. Graduate credit hours taken during the Undergraduate career will not be included in the Graduate GPA calculation.

If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus or syllabi to determine whether it meets the criteria for a 400-level course or higher.

Programs with specialized accreditation requirements that allow programs to offer Graduate curriculum to Undergraduate students will conform to those specialized accreditation requirements.

Degrees are awarded sequentially. All details of Undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once matriculated in the Graduate

program, students abide by the graduation deadlines set forth by the Graduate program. Students in these programs must be continuously enrolled from Undergraduate to Graduate degree program unless given explicit permission by their program for a gap year or approved leave of absence. In offering the option of an Accelerated Master's Pathway, the university is making possible the acceleration of a student's Graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their Graduate studies after earning the Undergraduate degree, they may apply for admission to the traditional Master's degree program. Any application of Graduate credit earned while in the Undergraduate program is subject to the policies of the Graduate degree granting school.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Deepen your understanding of complex socio-ecological systems and their connection with sustainable development goals.
- Increase your ability to make accurate and ethical evidence-based decisions from scientific literature.
- Expand your capacity to communicate environmental science and sustainability issues to the scientific community, professional colleagues, policy makers, and the general public.
- Demonstrate competence of in-depth knowledge and skills through completion of an original research project and thesis.

Geographic Information Systems (GIS) Certificate

Geographic information systems are compilations of sophisticated software and tools used to capture, store, analyze, manage, and present geospatial data. The GIS certificate program provides training in the use of contemporary geographic mapping technology to solve complex geospatial problems commonly encountered in environmental sciences, urban planning, social sciences, public health, business, and engineering.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Understand the practical, conceptual, and technological application of GIS, including ethical issues germane to GIS; research through the use of GIS data; and use of GIS in community-service projects.
- Understand various spatial relationship concepts and their applications, including identifying methodological challenges and understanding the use of spatial data to make sound arguments in spatial problem solving and planning and policy.
- Understand the fundamental principles of remote sensing theory, including understanding the properties of light and platforms used to analyze it; understanding the concepts of landscape patterns; producing thematic maps; and becoming proficient in using ERDAS Imagine to analyze digital satellite images and scanned aerial photographs.

Sustainability Assessment and Planning Certificate

Students in the certificate program in sustainability assessment and planning develop valuable skills to help organizations measure, regulate, and report their natural resource use and environmental impact. Students learn to apply approaches that sustainability professionals in government, industry, nonprofit, and other sectors use to document and improve sustainability practices.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Understand the foundations of sustainability science and its economic and ethical values.
- Learn common methods for gathering data on an organizations' baseline environmental footprint (water, energy, food, transportation, landscaping, waste, etc.) and the most effective strategies for improving environmental sustainability.
- Gain experience in these skills by crafting sustainability assessments, calculations, project pitches, and sample reports.

School of Law

Academic excellence. Service for others. A focus on values and ethics.

It adds up to a superior legal education at Loyola University Chicago's School of Law. Combined with top-notch, accessible faculty who provide support and encouragement to students, Loyola University Chicago's legal education prepares you for a successful career as a practitioner, judge, legislator, administrator, business person or other endeavors.

The Loyola University Chicago School of Law curriculum:

- Provides you with the substantive knowledge required for effective and responsible participation in the legal profession
- Fosters your appreciation of the increasingly complex, global, diverse and interdisciplinary nature of law and legal practice
- Promotes your development in a range of lawyering and professional skills
- Provides substantial opportunities for your participation in real-life practical experiences and pro bono activities
- Develops your understanding of the fundamental values of the legal profession
- Promotes the Jesuit values of social justice and service to others
- Instills the idea of law as a learned profession that requires a lifelong commitment to learning, leadership and professional development
- Serves the School of Law academic mission (https://www.luc.edu/law/about/mission/)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Law (LAW)

LAW 100 Well-Law for Students (2 Credit Hours)
The purpose of Law School is to equip students for the practice of law. We now know, however, that for many, the law school experience comes at a high cost to their personal wellness. The goal of this course is to provide students with the introductory knowledge and tools necessary to begin to manage the stresses of school, work, and life in healthy ways. The blended learning design includes content accessed asynchronously along with live online interaction. The on-demand content consists of course readings, group discussions, wellness and meditation videos, and other self-care resources.

LAW 107 Illinois Litigation Racism, Injustice & Poverty (2 Credit Hours)
This course will explore why well over fifty percent of the cases pending in Illinois courts involve taking liberty, money, or homes from poor people and how race factors into this reality. While the course will explore the interrelationship of racism, injustice, and poverty, the course will be focused on training students to try cases is these courts and win cases for poor people. The objectives of this course are to (1) to prepare Loyola students to represent poor people in Illinois courts and (2) excite their imagination about social and legal change, while empowering them to see the law as a vehicle for change.

LAW 108 American Indian Law: Indigenous Justice (3 Credit Hours)
This course examines the legal, regulatory, ethical, policy and pragmatic aspects of indigenous cultural heritage and the role of anthropology and archaeology in the United States and globally. Topics include cultural resource management in public and private contexts, participation of stakeholders, and expert anthropological knowledge in legal contexts and public participation. Topics include: the Native American Graves Protection and Repatriation Act (NAGPRA); cultural patrimony; museums; the role of government; the role of the courts; the role of the United Nations; postcolonialism; decolonizing methodologies; social justice issues; tourism, environmental and cultural relationships; oral sources; case studies and other ways of knowing the past that are embedded in law and policy.

LAW 110 Labor and Employment Law in the Education Workplace (2 Credit Hours)
.This course, which meets once a week for two hours, will explore in depth labor and employment issues in the 21st century education workplace. Students will form teams -- representing individual employees, the union, and management- and advocate their respective positions in a variety of contexts, including collective bargaining, unfair labor practice proceedings, teacher discipline and dismissal proceedings, and contract grievance arbitration. Current events and contemporaneous developments will provide the backdrop for the course materials and class activities. Topics will include: tenure, reduction-in-force and seniority rights, and teacher accountability and evaluation of professional personnel under new education reform legislation; public sector bargaining trends in Illinois and nationally; the 2012 Chicago Public Schools teachers strike; LGBT issues, free speech, and workplace right of privacy.

LAW 111 Practical Skills Boot Camp (1 Credit Hour)
Loyola has prepared you to think like a lawyer. In this intensive Boot Camp legal practice seminar, learn to be a lawyer. This seminar will help bridge the gap as you transition from law school into private practice. You will gain the personal skills, practical skills, and business sense to succeed in your legal practice from day one. Among other things, you will learn to think and behave like a practicing attorney. You will learn how to create professional correspondence, organize your practice, interact with colleagues and staff, and build a consistent book of work. You will also learn substantive litigation and transactional skills that will enhance the quality of your legal practice from day one. And you will hear from prominent attorneys in the community as to what they look for in new lawyers and what makes a successful new lawyer.

LAW 113 Civil Procedure (4 Credit Hours)
An introduction to and analysis of the concepts and doctrines that govern the procedure followed in civil litigation, with a focus primarily on litigation pre-trial, reflecting reality. For example, various aspects of jurisdiction to bring suit, choice of law (Erie), as well as pre-trial process, including joinder of claims, parties, and discovery and motion practice are covered. Emphasis is placed on practice in the federal trial courts.

LAW 114 Advanced Legal Analysis (1 Credit Hour)
The class will strengthen students' analytical and reasoning skills. By the end of the course students will have a better understanding of how to read and extract information from cases, and synthesize multiple cases into law, as well as apply that law to new fact patterns.

LAW 117 Philosophy of Law (3 Credit Hours)
Philosophy of Law: Legal and Moral Issues of Economic Sanctions. This course will start with a brief overview of economic sanctions in the contexts of international relations and global governance, and will then look closely at the issues of effectiveness and humanitarian impact. Throughout the course we will draw on materials from a number of sanctions regimes, including South Africa, Cuba, Iraq, and Iran. We will examine a number of ethical topics, looking at the issues of intent, consent, and moral agency in the context of economic sanctions. We will also look at a number of legal issues: whether sanctions come into conflict with international human rights law, such as the International Covenant on Economic, Social, and Cultural Rights; the problem of extraterritoriality; and the recent cases coming out of the European Courts on asset freezes, such as the Kadi case.

LAW 122 Constitutional Law (4 Credit Hours)
An introduction to the United States Constitution. Subjects include the role of the United States Supreme Court, federalism, separation of powers, and individual rights under the Constitution. Particular attention is paid to judicial power and judicial review, national legislative power including commerce power, commerce clause limitations upon state power to regulate, and presidential power and authority in both international and domestic affairs. In addition, the course covers individual rights under the equal protection and due process clauses of the 14th Amendment to the Constitution.

LAW 124 Rapid Response Refugee Clinic (2 Credit Hours)
This one-time experiential offering will pull students into the fast-moving world of refugee law, policy, and practice. Students will join a lecture, held once a week, as they take on refugee cases in a "pop-up clinic" setting. Three day-long weekend clinical sessions will be held throughout the semester.

LAW 125 Sexuality and the Law (2 Credit Hours)
No course description is available

LAW 126 Corporate Compliance Programs (2 Credit Hours)
This is a Skills course. The course will cover the elements necessary to implement a basic compliance and ethics program in a company. Students will become familiar with the basic principles of the Federal Sentencing Guidelines that define an "effective" compliance program. Students will learn the fundamentals of the job of Chief Compliance Officer by working with compliance issues in the media, commercially available compliance training programs and compliance techniques used in major corporations.

LAW 127 Law and Psychology (2-3 Credit Hours)
For many years, the field of psychology focused primarily on mental illness. But more recently, many psychologists have begun to analyze happiness and to study the ways in which all people, healthy or ill, can increase their enjoyment of life. This course will explore the new field of hedonic psychology, evaluating its methods and examining its findings. We will consider whether legal policy can or should be shaped by these findings in an effort to help people become happier.
Outcomes:
Students will learn how the law affects people and will develop their own capacities to work in the law via an improved understanding of themselves and others; Through class discussion and projects, they will hone their abilities to make decisions in work and life and will ideally become more fulfilled and productive future members of the legal profession

LAW 128 Interprofessional Writing and Communication for Hlth Literacy & Hlth Equity (1 Credit Hour)
Students from various disciplines including communications, law, medicine, nursing, public health, and/or social work will learn the fundamental components for good writing and communication with patients. With a focus on low health literacy populations, students will review various documents that patients need to understand for making decisions about their health and wellness, for realizing their health care rights, as well as for ensuring their safety while using health care products. Students will have an opportunity to identify poor communications illustrated within medical appointment details and medication instructions, informed consent documents, medical power of attorney forms, arbitration agreements, and healthcare marketing material. Students will write collaboratively, and problem solve through simulated exercises and hypotheticals to determine how their respective professions can work together for addressing issues of low health literacy and in doing so enhance health equity. Relevant learning outcomes and skill development include: interprofessional teamwork, analysis, as well as written and oral communications.

LAW 130 Transactional Skills Seminar (2 Credit Hours)
The course will examine the lawyer's role in business transactions by looking at examples of two decidedly different transactions - the negotiation of commercial real estate leases and the structure of the purchase, ownership, and operation of a corporate aircraft. The practical skills and knowledge acquired by examining these examples can be applied to virtually all commercial transactions. The class will consider the art of negotiating those transactions - and will focus on the role of the lawyer in those negotiations. We will consider a variety of negotiating strategies and how to deal effectively with opposing counsel who may, or may not, share your particular strategy. In addition, the class will examine a corporate aircraft transaction - with a myriad of parties and opposing interests and regulations - with the goal of appreciating the juggling and balancing necessary to achieve the best result possible. Along the way, we will look at how there is not ONE way to do things, rather there are many ways and many strategies. The rules and processes taught in law school are there to provide guidance; they are not hard and fast rules about the way that a transaction must be done. That's one of the benefits of being a transactional lawyer - the rules are set by the parties as they negotiate. Students will be evaluated on the basis of classroom participation and attendance, a paper, and , in lieu of final exam, a one-on-one negotiation session with the instructor. Regular attendance is expected; if a student cannot attend class, please notify the instructor.

LAW 132 Contracts (4 Credit Hours)
An analysis of the formation, transfer and termination of contract rights and duties, and the legal and equitable remedies available upon breach of contract. This is a Juris Doctor Required course.

LAW 133 Judicial Practicum (2-3 Credit Hours)
The objectives of the course are to hone research skills, learn judicial writing skills, observe the rules of civil procedure in action, follow judicial ethics, and learn the appropriate etiquette in working with a judge and judicial law chambers staff. Students will work in a judicial chambers for 2 or 3 credits (110 hours or 165 hours of work respectively) and also complete the weekly course. The course will focus on building the skills to make this a successful experience by providing research, writing, and ethical scenarios and to translate the experience for future career planning. Students will present on a topic approved by the course instructor related to the judiciary.

LAW 135 Copyright (3 Credit Hours)
No course description is available

LAW 136 Law & Catholic Social Thought (2-3 Credit Hours)
On its website Loyola University Chicago defines itself as "Chicago's Jesuit, Catholic university." It also makes clear that Loyola is fiercely dedicated to promoting "social justice." Likewise, in its Mission Statement, the Law School claims to be "inspired by the Jesuit tradition" and that it seeks "to prepare graduates who will be ethical advocates for justice and equity." Did you ever wonder what this means? What is the justice that Loyola claims to support? There are, of course, many ways of defining justice, and many critical perspectives through which law may be examined: Law & Economics, Legal Positivism, Classical Liberalism, Rawlsian Welfare State Liberalism, Legal Feminism, Legal Realism (and its successor Critical Legal Studies) and Critical Race Theory. For each of these schools of thought there is a whole body of literature that addresses the basic questions of jurisprudence: What is law? What is justice? And what is the relationship between the two? What are rights? And where do they come from? How are law and morality alike, and how are they different? Is law simply the exercise of coercive power or is it something more? There is, in fact, an older school of thought from which these others are derived - a tradition that matches them in depth and rigor. The Judeo-Christian tradition has been thinking about questions of law and justice for well over two millennia. Moreover, since the late 19th century, with the advent of industrialization and urbanization and the new social problems brought on by these phenomena, the Catholic Church has been offering its reflections on questions of law and justice in a body of thought known as Catholic Social Teaching. This literature is composed of papal letters (called encyclicals), documents from the Second Vatican Council, and other magisterial texts. In the course we will read samples of this literature as we think about contemporary problems and possible legal solutions: poverty, racism, capital and labor, globalization, war and peace, environmental deterioration, the family, marriage and sexuality, cultural and religious pluralism. The course will not, however, simply be an historical review of abstract concepts and ideas within the tradition. Law is a practical art, and legal concepts and theories have meaning in application. They are best understood when their consequences are laid bare. Thus, in conjunction with the various documents from Catholic Social Teaching described above, students will also read a number of cases that will help them examine the meaning of these ideas in concrete terms. The aim of this two credit course is philosophical analysis and critical reflection. To this end, students will be required to submit a 2-4 page reflection paper every other week. The goal is for students to emerge from the course not only with a better understanding of law and justice, but with an appreciation for what their own beliefs might mean in the practice of law. The option of a third course credit is available for students who are willing to write an additional paper of at least 20-pages.

LAW 139 The Art of In-House Counseling (3 Credit Hours)
This course will introduce students to the evolving history, roles and responsibilities of in-house legal counsel. Students will investigate the skills and characteristics that contribute to successful and effective practice as an in-house counsel and explore the similarities and differences between in-house legal practice and outside legal practice. Topics covered during the course will include: the relationship between in-house counsel and his/her client; in-house counsel's role in adding value to his/her organization; advising and counseling clients; fact gathering and investigation; managing an in-house counsel to address a variety of situations in which an in-house counsel would be expected to act. Students also will observe experienced, practicing in-house counsel address similar situations and analyze the factors and considerations that contribute to effectively addressing the situations. Students will be expected to regularly attend and participate in class. There will not be a final exam in this course. Students will be evaluated on the basis of a final project (which will involve a class presentation and a written assignment or assignments) and class participation.
Outcomes:
Students will demonstrate the ability to analyze problems that in-house counsel comes across in the course of their employment

LAW 140 Criminal Law (3 Credit Hours)
This course introduces the elements of crime by teaching principles that apply to many crimes. These principles include the nature of criminal acts and of criminal fault, as well as defenses such as self-protection. Homicide and other specific crimes may also be discussed, as may theories of punishment. The primary materials are statutes -- in particular, the Model Penal Code and/or the Illinois Criminal Code. This is a Juris Doctor Required course.

LAW 141 Asylum Law (2 Credit Hours)
This course will provide an overview of U.S. asylum law and procedure, as well as international refugee law. Additionally, we will explore the politics and ethics of bordering practices, both domestically and internationally and within our own communities. In lieu of an exam, students will write a final paper.

LAW 143 Environmental Justice: Race, Class and the Environment (2-3 Credit Hours)
This course explores the disproportionate environmental burdens borne by communities of color and low-income people in the United States and the role of law in contributing to these inequities and in addressing them.
Outcomes:
After taking this course, students will understand the underlying causes and consequences of the disproportionate concentration of polluting industry in low-income communities and communities of color; After taking this course, students will be familiar with a variety of legal strategies and tools that can be used to combat environmental injustice

LAW 145 Gender Based Violence: Law, Practice, and Policy (2 Credit Hours)
Pre-requisites: None, except no 1L
The objective of GBV: Law, Practice, and Policy is to expand students' knowledge and understanding of the web of laws addressing gender-based violence while building practical civil litigation skills The course will begin by reviewing principles of gender- based violence and protections around safety, while also working with students on how to provide trauma-informed advocacy in intaking and representing a GBV survivor in practice. The course will cover civil state and federal housing and family law protections available to survivors of GBV while working through the building blocks of litigation in Illinois circuit courts: drafting a petition, motion to dismiss, and other responsive pleadings, and conducting an in-class oral argument and mediation. This course will help students understand not only the existence and purpose of laws protecting survivors of gender-based violence, but will also give students the opportunity to experience the challenges and considerations in the practical application of these laws in representing survivors in civil court.

LAW 146 Mass Incarceration (2 Credit Hours)
The class covers the rise of the carceral state from the 1970s onward, with a particular focus on the disproportionate impact on Black and Brown people. We trace the roots of the carceral state to slavery and its end, and then move into the war on drugs and war on crime. We will spend the semester exploring the causes of the carceral state (or mass incarceration), its consequences, particularly with respect to families and children and public health, and then we focus on how to address changes to it. Readings vary from poems and law review articles by people who have been formerly incarcerated to scholarship by historians and activists, and political scientists, and a few cases from the Supreme Court. We will have a few guest speakers throughout, as well. There are two short reflection papers assigned (6 pages each) and students are expected to participate in class discussion.

LAW 149 International Intellectual Property Law (3 Credit Hours)
Examines the growing importance of intellectual property in the international context. Covers the scope of protection granted trademarks, copyrights and patents in foreign jurisdictions so that effective comparisons can be made between foreign and domestic law. Explores the scope and substance of international treaties. Strategies for obtaining cost effective intellectual property protection in the global economy will be examined.

LAW 152 Property (4 Credit Hours)
The study of the legal principles governing intellectual property, personal property and real property, including the study of conveyancing, co-ownership, donative transfers, eminent domain, estates and future interests, landlord-tenant, land use controls and title assurance.

LAW 156 Abolition and Movement Lawyering (2 Credit Hours)
This class is designed to be a space for reimagining our world, and how we, as lawyers and future lawyers, can work to dismantle the systems of White supremacy and oppression that incarcerate, punish, and harm Black and brown people in the U.S. while failing to prevent, address, or repair harm or facilitate accountability. Abolition is not just about the dismantling or absence of systems, but as Ruth Wilson Gilmore states, abolition is about presence. Movement lawyering/community lawyering is about taking direction from directly impacted communities and from organizers, as opposed to imposing our leadership or expertise as legal advocates. What can we work to build that is life-affirming instead of life-destroying, that is in solidarity and not another manifestation of the underlying problems? This class will discuss the difference between reform and abolition, the history of abolitionist organizing in Chicago, and the historical and current role of lawyers in social movement.

LAW 158 Comparative Mass Incarceration (1 Credit Hour)
This course will explore mass incarceration and conditions of confinement globally, and compare and contrast racial and ethnic disparities in incarcerated populations, the global use of pretrial detention, its disproportionate impact and use on marginalized populations, and the sentencing and prison practices of countries such as Germany, the Netherlands, and the United States. The course will focus on the disproportionate impact of punishment and incarceration on those from Black and Brown communities and on migrant and refugee populations.

LAW 159 Tax Policy and Inequity (2 Credit Hours)
The objective of this course is to explore the history, evolution, and racial impact of tax policy in the United States. Students will explore the various theories of taxation's role in modern day society; examine the purpose and intent of tax on incomes, consumption, "sins" and assets; highlight the role interest groups play in tax policy and discuss the disparate impact such policy has on communities of color (namely black and brown). Students will be tasked with learning and discussing the intricacies of federal and state and local tax law. They will also write a tax policy that seeks to encourage and/or discourage a societal behavior, which will be discussed and analyzed from various stakeholders' perspectives.

LAW 162 Torts (4 Credit Hours)
A basic course in the substantive law governing compensation for injuries to property and to the person. Considered are intentional wrongs, negligence, malpractice, products liability and strict liability; invasions of personal integrity and emotional well-being; injury to tangible and intangible rights in property; liability insurance and alternatives; and damages. Other risk-bearing alternatives are considered and contrasted with the traditional common law theories. This is a Juris Doctor Required Course.

LAW 163 Climate Justice, Racial Justice, and International Law (1 Credit Hour)
The climate crisis is in the news on a regular basis, as wildfires, melting glaciers, mega-storms, floods, droughts, heat waves, and rising sea levels wreak havoc all over the world. While the climate crisis has often been depicted as a technical problem requiring technical solutions, this course will examine the emerging body of legal scholarship, reports by UN human rights experts, and case studies on the relationship among climate change, racial injustice, and international law. It will analyze the ways that international law contributes to these intersecting injustices and how international law can be used as a tool of transformation and resistance. Caused primarily by the greenhouse gas emissions of the world's most affluent inhabitants, climate change is an injustice because its impacts are experienced most acutely by those who contributed least to the problem and have the fewest resources to protect themselves from harm. These include Indigenous peoples, the small island states, racial and ethnic minorities, poor people, and those who reside in climate-vulnerable geographic regions, including tropical, coastal, and agriculture-dependent low-income countries. While most analyses of climate injustice focus on the impacts of climate change, this course will take a deeper dive into the origins of the fossil fuel-based global economy, and the harms it inflicts on states and peoples racialized as inferior throughout its life cycle historically and currently. For example, the Industrial Revolution, which launched the age of fossil fuels, was made possible by colonialism, slavery, and the international law doctrines that justified and facilitated these practices. In the post-colonial period, international law gave primacy to the rights of foreign investors engaged in natural resource exploitation, at the expense of the states and local communities in which these projects were located. These doctrines enabled European and settler colonial states to control the world's petroleum reserves in collusion with autocratic petro-states and transnational corporations. They also produced corporate impunity for human rights and environmental violations. Today, the extraction, processing, and combustion of fossil fuels has created "sacrifice zones" all over the world in territories belonging to peoples and nations that were colonially designated as inferior.

LAW 164 Mergers and Acquisitions (3 Credit Hours)
This course will introduce students to the issues that arise in merger and acquisition transactions. Students will study the legal framework within which merger and acquisition transactions and the negotiation and documentation of such transactions take place. Students will analyze the considerations involved in selecting various structural alternatives for merger and acquisition transactions, examine the dynamics of the merger and acquisition transactions negotiation process, investigate the various stages of merger and acquisition transactions and focus on the lawyer's role in adding value to such transactions. Students will also have the opportunity to study, evaluate, draft and/or negotiate various types of documents that are commonly encountered in merger and acquisition transactions (such as, confidentiality agreements, employee retention agreements, investment banker engagement letters, letters of intent and purchase and sale agreements.) There will be a take-home final examination. Students taking this class would benefit by having previously taken Business Organizations and Securities Regulation; these classes are not, however, required to take the course.

LAW 166 Education Law Practicum (1-4 Credit Hours)
Law 166-001 (Seminar): This online seminar addresses substantive education law issues and skill development tailored to the practice of education law. Topics to be explored may include systemic reform litigation in education law, special education litigation, school discipline reform, the role of implicit bias in school decision-making, litigation related to trauma-informed practices, bullying litigation, and receiving feedback. This seminar may optionally be paired with a field placement in the area of education law. Placement options include local organizations, school districts, law firms and government agencies. Students must separately register for the field placement component for 1-3 credits (Law 166-002). No permission is required for the seminar portion of this class. Students may enroll in this seminar without registering for the field placement component. Students registering for the field placement component (166-002) must enroll in the seminar component (166-001). This course satisfies the Skills and the Bias, Cross-Cultural Competency and Racism (BCCR) requirements. Law 166-002 (Field Placement): This section is the field work component of the Education Law Practicum. Students have the option to work in one of a variety of local placements where they will work under the supervision of practicing attorneys. Students may choose to provide either: (1) direct representation and legal assistance to children and families in need of special education services; or (2) representation of school districts in education law matters. Students may also work on educational policy matters. Placement options include local organizations, school districts, law firms and government agencies. Students may also participate in Loyola¿s Educational Advocacy Project as an alternative to an external field placement. For part-time students interested in placements outside of the Chicagoland area, additional placements can be identified and approved on a case-by-case basis. Students may register for 1 to 3 credits, depending on their level of time commitment to the field work and agreement of the placement supervisor. Because you will need to identify and obtain a field placement, permission of the instructor is required. If you are interested in participating in the Education Law Practicum, please complete this form: https://luclawschool.formstack.com/forms/application_for_the_education_law_practicum&r=&t=0&bc= . You will need to separately apply for a field placement, which you may do in advance of applying for the Practicum or after applying for the Practicum and receiving additional information on placement options. This course counts as an Experiential Learning (Live Client Experience) and a Skills Course. Law 166-003 (SUFEO): This section of the Education Law Practicum is restricted to students working on education law cases through Stand Up for Each Other Chicago (SUFEO). The course seminar will provide skills-building tailored to direct representation of students and families on school discipline, bullying, special education cases, and other education law matters. Students will be provided with guidance and supervision regarding practical and ethical issues related to representing children and families in these cases. Students will also work on aspects of the SUFEO project, including client intake, case advocacy, legal drafting, outreach to local organizations, know-your-rights trainings, training and mentoring to law student volunteers working on the project, and policy and systemic advocacy to address the barriers experienced by SUFEO¿s clients. (Ross/Moran) Stand Up for Each Other (SUFEO) Board Members will automatically be granted permission to enroll in this class. Other students who would like to seek academic credit for their participation in SUFEO's educational advocacy work should complete this form: https://luclawschool.formstack.com/forms/application_for_the_education_law_practicum&r=&t=0&bc

LAW 170 Race and Real Estate (2 Credit Hours)
The objective of this course is to understand the laws and policies, politics and financial systems in our country that established and sustained segregation, creating our cities' black slums, ghettos and urban neighborhoods. The course would address federal, state and local legal systems, with particular emphasis on Illinois and Chicago. It would cover the Fair Housing Act as well as the Kerner Report; FHA policies, including the Underwriting Manuals that led to redlining; zoning laws and urban planning; public housing and HUD's HOPE VI program; the legality of restrictive covenants; as well as case law related to each of these areas. And finally, this course would address where this has led us to today: the policies, laws and regulations that have attempted to reverse segregation, and those that continue to allow discrimination to continue by exploiting and financially devastating minority neighborhoods.

LAW 173 Advanced Education Law Practicum (1-4 Credit Hours)
This course is for students who have already completed the Education Law Practicum seminar course and field placement. Students will build on the knowledge and skills gained through the Education Law Practicum by engaging in a second field placement, either with an organization or firm where they have been placed previously or with a new education law-related placement. More information about available placements is available on Pearson. The application form is available here. The seminar component of this class will be conducted in-person for 6-8 sessions; the days and times will be selected based on instructor and student availability. This course includes an instructional component that includes seminar discussions and individual meetings with a faculty member to develop skills, enhance understanding of ethical and other practice issues, and discuss cases and legal issues in students field placements. The class aims to deepen students knowledge of current legal and policy issues related to educational inequity, with a focus on race, ethnicity, disability, gender, and their intersection and the role of lawyers in addressing educational inequities. Students have the option to work in one of a variety of local placements where they will work under the supervision of practicing attorneys. Students may choose to provide either: (1) direct representation and legal assistance to children and families in need of special education services; or (2) representation of school districts in education law matters. Students may also work on educational policy matters. Placement options include local organizations, school districts, law firms and government agencies. Students may participate in Loyola's Educational Advocacy Project as an alternative to an external field placement. Students may register for 1 to 3 credits, depending on their level of time commitment to the field work and agreement of the placement supervisor.

LAW 175 Natural Resource Law (3 Credit Hours)
This is the broad survey course on Natural Resources Law. We will explore the protection and multiple uses of natural resource systems; regulation of federal public lands; forests; the National Park System; the Wilderness Preservation System; tribal lands; fish and wildlife management (including the Endangered Species Act and other sources of protection for fisheries and marine mammals); and rangelands. There will be a take-home final exam and in-class presentations.

LAW 176 International Trade Law (1-3 Credit Hours)
The primary goal of this course is to learn the fundamental or basic principles of the international trading system contained in the General Agreement on Tariffs and Trade (GATT) and the treaties of the World Trade Organization (WTO). Students will learn how rules of the GATT/WTO legal system are made and how they are used in domestic legal systems such as the United States. There are five additional learning goals in this course. First, students will gain factual knowledge about how the WTO is run and how disputes are resolved among WTO member countries. Second, students will learn to analyze and critically evaluate how GATT/WTO legal rules are applied in specific cases with a view to gaining and improving their problem solving skills in international trade law. Third, students will gain a broader understanding of how law works in an increasingly global and heterogeneous world and how the proliferation of mega-regional trade agreements and trade wars and COVID-19 have affected the global trading regime. Fourth, the course will promote student interest in learning more about international law on their own including where to find the resources they need for further study. Finally, the paper requirement in the course will develop writing and argument skills.

LAW 178 Antiracism Under Law (2 Credit Hours)
This course will examine the role of the law in replicating our nation's racial hierarchy as manifest across indicia of socio-economic well-being. The class will also analyze various legal means for disrupting this hierarchy. In particular the court will assess the underlying legal dynamics of all material racial disparities along with legal solutions for the diminution of such disparities. The course will take a social justice approach to the continued influence of race on social well-being. As such, the course will focus on the legal system's ability to secure broad-based and sustainable human development, and to actualize the full potential of the entire US population. The course will consider theories suggesting that law should promote the common welfare and secure liberty for all.

LAW 179 The Law of Jury Selection (2 Credit Hours)
This course will focus on the various legal and practical considerations that attorneys must face both during and following the jury selection process. The course will cover: constitutional issues; what must be proven to establish bias; the role of trial consultants (particularly in high profile cases); challenges to the array, challenges for cause and peremptory challenges; timing and procedural limitations; the significance of group dynamics; questioning techniques and the use of questionnaires; problems at trial and during deliberations; and the extent to which the parties may be entitled to examine prospective jurors in various areas of inquiry (such as occupation, education, knowledge of the case, legal and government experience, religious and educational beliefs). Students will participate in mock voir dire, prepare a draft questionnaire, and complete a final paper (7-10 pages).

LAW 184 Advanced Litigation Skills (2 Credit Hours)
Learning litigation skills task-by-task can leave the young practitioner with little guidance on how to form the overall strategy necessary to develop and present an effective civil case. While covering a wide range of specific skills, including opening statement and closing argument, the careful researching of local rules, techniques for examining witnesses, techniques for oral argument and applying a structured approach to settlement negotiations, this course will emphasize the aspects of these skills that support an overall civil litigation strategy. This course will require students to review a variety of materials in preparation for class, to participate in in-class exercises and to submit written work that displays the learning acquired through the in-class exercises. Evaluation of each student's performance will be based primarily on the student's written work.

LAW 185 Business and the Law (2 Credit Hours)
The majority of practicing lawyers represent businesses or individuals with business or investment interests. Unfortunately, the majority of law students have had limited exposure to business law and the first year curriculum offers few opportunities to explore this area. This course is intended to expose first year law students to the fundamental issues and perspectives that pervade business law. The goal is to make these topics accessible to all students, particularly those who have not taken many, if any, undergraduate courses in business, economics or accounting. The course will be divided into three segments. The first segment, entitled "The Law of Business," will introduce students to fundamental business and tax law concepts as well as transactional issues that business lawyers confront. These issues include the alternative ways of organizing a business (corporation, partnership or limited liability company) and the alternative ways of structuring a business acquisition or merger. The second segment, entitled "The Ethical Practice of Business Law" will explore the pressures on new lawyers to conform to an existing culture, how lawyers get into trouble, and how business law can be practiced in an ethical manner. The third segment, entitled "Developing a Financial Mindset" will introduce planning tools (e.g., the time value of money, compound interest) and the planning process in the context of both personal financial planning and business planning. Certain classes may be taught with other professors and practicing lawyers. There will be no final exam in this course. Students will be required to take a mid-term exam and to submit a short final paper. Class participation may also be taken into account. Students will also be expected to read the Wall Street Journal on a daily basis. This course is available to first-year students only.

LAW 189 Employment in the Gig Economy (3 Credit Hours)
No course description is available

LAW 190 Legal Writing I (2 Credit Hours)
Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. Second semester, the course builds on the basic writing, analysis, and research skills students have learned first semester and introduces persuasive writing skills. Students also learn how to present an oral argument to the court. Computerized research techniques are included in the course. In order to provide significant opportunities for instructor feedback, the first-year writing classes are organized into sections of approximately twelve students. Each section is staffed by both a legal writing instructor and a student tutor. This is a JD Required Course.

LAW 190R Basic Legal Research (0 Credit Hours)
This course is an introduction to the tools and sources of legal information you will need during your first year of law school and beyond. This course is a pass/fail component of Legal Writing I.

LAW 191 International Human Rights in Rome: Field Study (1 Credit Hour)
This 1-credit International Human Rights field study course will be co-taught by the School of Law and the School of Education to gain an interdisciplinary perspective on the advocacy work of international sites such as NGOs, schools, and international organizations in Rome. These sites are at the forefront of promoting and protecting human rights and fundamental freedoms of individuals or groups within the city of Rome, Italy and the Mediterranean. This is a pass/no pass course that will be delivered with the materials covered asynchronously for a total of 8 hours prior to May 25th followed by applied learning during specific site visits to be conducted on tentatively Sunday, May 26, the afternoons of May 28 and 29th. This course will have a 5 pages or 2500 word paper requirement due 4 weeks after the Rome Program ends.

LAW 192 Legal Writing II (2 Credit Hours)
Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. Second semester, the course builds on the basic writing, analysis, and research skills students have learned first semester and introduces persuasive writing skills. Students also learn how to present an oral argument to the court. Computerized research techniques are included in the course. In order to provide significant opportunities for instructor feedback, the first-year writing classes are organized into sections of approximately twelve students. Each section is staffed by both a legal writing instructor and a student tutor. This is a JD Required Course.
Course equivalencies: LAW 192 / LAW 591

LAW 193 Diversity and Inclusion: A Professional and Social Responsibility (2 Credit Hours)
This 2 hour course will examine the legal profession which remains one of the least diverse of American professions. Lawyers have unique and varying roles as counselors, advocates, confidants, government officials, adjudicators, and civic leaders. In this course, students will have an opportunity to learn about the legal profession's diversity and inclusion history and challenges, organizational and individual roles and strategies, and current research. This course will engage students with lectures, guest speakers, group discussion, and readings--all materials will be provided by instructors. There will be no cost to the students for materials utilized in this course. There will be a final presentation where students can discuss and elaborate on important topics in the legal profession. Students will gain a deeper understanding of how diversity and inclusion efforts intersect with professional responsibility and its impact on social justice.

LAW 194 Bar Exam Writing Skills (1-2 Credit Hours)
The Bar Exam Writing Skills courses focus on refining your memorization, analytical and writing skills and all skills that are necessary for the bar exam. Whether you need practice writing essays or synthesizing the facts and law and producing a legal work product, these courses will help you master your test-taking skills. This is a Bar course.

LAW 198 The Fundamentals of School Law (2 Credit Hours)
This course provides an overview of statutory, administrative and case law affecting Illinois school districts. Legal issues addressed include: powers and duties of the school board; compliance with open records and open meetings laws; teacher tenure, evaluation, reduction-in-force, and for cause dismissal; collective bargaining and labor dispute resolution; legal aspects of supervision, teacher/school liability, common law and statutory immunities; mandated child abuse reporting. Student issues include state law requirements pertinent to residency; discipline, drugs/weapons offenses, suspension and expulsion; federal and state student confidentiality laws.

LAW 201 Academic Tutor (2 Credit Hours)
Academic tutors assist first-year students with their doctrinal courses. This assistance includes holding office hours, reviewing outlines, and conducting skills workshops. Tutors are selected through an interview process. Academic Tutors receive up to two hours of ungraded credit for each semester in which they tutor.

LAW 202 Human Trafficking Seminar (2 Credit Hours)
The sexual exploitation and trafficking of minors has reached a crisis point, both in the United States and abroad. The United States Congress has responded to this ever-increasing threat by passing extensive legislative enactments aimed at deterring this pernicious activity, providing severe - and often controversial - punishment for those who engage in it. While federal and state prosecutions in this area are at an all-time high, law enforcement and prosecutors continue to miss critical opportunities because they fail to fully understand the nature of the threat, and lack a solid grasp on the integrated arsenal of statutory tools at their disposal. Similarly, members of the judiciary, as well as victim advocates and pretrial service officers, may appreciate the laws on the proverbial books, but often lack familiarity with the sophisticated means employed by organized criminal group and the role of public corruption involved in the large-scale exploitation of children. They also misunderstand the rationalization through which individuals engaged in the exploitation of children tend to self justify their conduct, and have never confronted the statistical realities challenging the belief in meaningful rehabilitation of sex offenders. Put simply, although the complex and inter-related legislative anti-exploitation and anti-trafficking framework is now the firmly established law of the land, its theoretical and practical nuances are widely misunderstood, and indeed are all too frequently not understood at all, by the very professionals entrusted with the difficult task of protecting humanity's most vulnerable. This seminar will start with the statutory analysis rendered more comprehensible through the vehicle of real-world examples from the experience of Judge Kendall who will explain the history and present-day reality of the federal response to child exploitation. The seminar will analyze the various laws that govern the roles of the stakeholders: prosecutors, defense attorneys, judges, immigration officials, pretrial services officers, and victim advocates. The seminar will further explore all of the victim issues that make these cases complex and challenging. Students will explore victims' needs, rights, and opportunities for redress including restitution and expungement of criminal records. Students will hear first hand from federal agents who have prosecuted human trafficking cases; will see and hear the evidence presented to federal juries, will hear from a victim of the crime, and will learn from those victim advocates who seek to redress the harms inflicted upon victims. The seminar will span two days and have multiple speakers and employ an interactive question and answer format. Students will be required to submit a 15 page paper on a topic of interest from the seminar for a final grade. This is a Skills course.

LAW 206 Sex Trafficking: International Comparative Law (1 Credit Hour)
This class will examine the ways countries attempt to regulate sex trafficking. This class will compare and contrast the Nordic and Dutch models of sex trafficking legislation. This class will engage a comparative analysis of each of the aforementioned nation's attempts to regulate sex trafficking, as well as relevant statistics.

LAW 208 Advanced Criminal Law (2 Credit Hours)
In this course, you make the choices that lawyers make in real-world cases. We break down how to apply statutes to fact patterns in a repeatable, step-by-step method, using excerpts from the Model Penal Code. We also hone skills such as eliminating errors in writing. Finally, we question some of the core values underlying our laws. There is no exam, and the grade is based primarily on class participation and on a final presentation in which you discuss a topic of your choice.

LAW 209 Law, Life and Jesuit Spirituality (2 Credit Hours)
Drawing from their legal and personal experiences the students will actively participate in this seminar styled course which examines complementary articles, films, Jesuit documents and Sacred Scripture as objective criteria for their personal reflection and class discussion. The goal of the course is to formulate and hone the skills of reflection, meditation and contemplation as means of developing a spirituality garnered from a Jesuit perspective. Students will be expected to present and lead classroom discussion, submit a brief weekly reflection paper, and present a summary at the end of the course. (Costello)

LAW 210 Evidence (4 Credit Hours)
An evaluation of the rules used to present information to a fact finder in a trial. The three primary units are the rules of relevancy, the rules governing witnesses, and the rule against hearsay. In addition, time is spent on privileges, writings, and demonstrative evidence. The Federal Rules of Evidence provide the focus. This is a Bar course.

LAW 212 Civil Rights (2 Credit Hours)
Pre-requisites: Constitutional Law
The course will focus on the post Civil War constitutional amendments (13th, 14th and 15th Amendments) and the various federal civil rights statutes that have been enacted thereafter in both the 19th and 20th centuries. These laws as a whole are designed to guarantee that all Americans receive equal treatment under law.

LAW 214 Race and the Law (2-3 Credit Hours)
This course covers interdisciplinary, critical perspectives on race and racism and the roles of law and history in shaping the meanings of race in the United States. We will study the histories of the major racialized groups in the United States: African Americans, Indians, Latinos/Latinas, Asian Americans, and Whites. We will also study the differing implications of enslavement, conquest, colonization, and immigration. We will explore how race and racism play out in selected areas such as equality, education and crime and explore significant current events and findings such as: important studies of implicit bias; the Voting Rights Act and allegedly race-neutral restrictions on voting; disparate treatment of minorities in the criminal justice system; and demographic changes and their implications. I expect each student to complete a 25-page research paper on a subject of her choice related to the course. I will work with you to develop a topic and to organize your research in productive ways. Your final grades will be based primarily on your papers, together with your preparation for and participation in class. I.E., you must also do the reading for the course to get anything out of it. There is no final exam in this course. This is a Skills course.

LAW 215 Domestic Violence Practicum (1-3 Credit Hours)
The Domestic Violence Law Practicum provides students with a live-client experience (LCE) through the provision of legal advice and brief services to families served by supervised visitation-exchange centers as part of the Justice for Families program. Student LCE work will be supervised by an experienced domestic relations attorney. Students who participate will be required to attend a seminar designed to complement the LCE work. Students will gain experience with a range of lawyering skills including client counseling, case planning, and written and oral advocacy. The practicum will provide students with training on the substantive law of domestic violence, family law and other areas of law that are likely to impact clients served by the supervised visitation centers. Supervised visitation center clients will sign up for advice an counseling sessions with law students on weekends and possible weeknight appointments. Parents who are utilizing any of the supervised visitation centers will need advice and brief service regarding modification or adjustments to the visitation related remedies in their Order of Protection. Any motions which follow this limited pro se support are filed on a self-represented basis and will not include student court appearances. Referrals for legal representation will be offered in instances in which this is appropriate.

LAW 216 Women and Leadership (1-2 Credit Hours)
Women & Leadership is a 1-2 credit, 7-week seminar course for second- and third-year law students that examines the obstacles that prevent women from reaching leadership positions in proportional numbers, and examines solutions and strategies for overcoming these obstacles. Over the course of 7-weeks, students will engage in dialogue in response to assigned readings, hypotheticals, podcasts, and video presentations such as TED Talks. Students also hear from guest speakers who will discuss their experiences and the decisions that helped shape their careers.
Outcomes:
Understand the status of women in the legal profession and the unique challenges might women face when navigating their career; Define different styles of leadership and how leadership impacts office culture and norms; Identify socioeconomic hinderances and strategies for overcoming these barriers; Attain a basic understanding of privilege and intersectionality and why these concepts are important in a discussion of women and leadership

LAW 217 International Climate Change Policy (1 Credit Hour)
Anthropogenic climate change has become one of the most significant environmental, economic, and societal challenges confronting the global community. This seminar will explore the legal, political, and scientific challenges involved in addressing and responding to climate change. The class will consider international strategies and laws, including the Kyoto Protocol, the Paris Agreement, emissions trading schemes, and approaches to involving the developing world in climate change mitigation.

LAW 220 First Amendment Rights (3 Credit Hours)
This course examines the history, theory, and jurisprudence of the First Amendment, with particular emphasis on the speech, press and religion clauses.

LAW 221 Administrative Law (3 Credit Hours)
This course examines the rules by which federal administrative agencies operate, including the source of administrative authority and procedures governing the exercise of that authority, and considers problems of delegation, agency rulemaking, adjudication and enforcement powers, judicial review of administrative action, and due process requirements.

LAW 224 Student Initiated Capstone Project II (1-4 Credit Hours)
This variable credit course may be repeated for a maximum of four credits.

LAW 231 Secured Transactions (3 Credit Hours)
This course examines the law of consensual liens on personal property under Article 9 of the Uniform Commercial Code. (I know; it sounds boring, but it's actually pretty cool.) The course deals with the use of personal property (both tangible and intangible) as collateral to secure payment or performance obligations. Course materials cover creation of the security interest, effectiveness of the security interest as against the claims of third parties, priorities of claims between competing secured parties and other lien holders and rights upon foreclosure. Having spent my career as a partner-level transactional lawyer (corporate matters, secured debt work, securitization, bankruptcy) at two large firms (Mayer Brown and Kirkland & Ellis) as well as several years as general counsel at a NASDAQ-listed company, I want students to get a deep sense of the practical considerations that should inform their work with the UCC. Article 9 is also tested for the bar exam, so this course will have some immediate pay-offs for law students, irrespective of their intended career path. I will use anonymous polling software to facilitate class discussions. Class time will be split between lectures that give the essential principles of each topic we study and interactive question periods as we work through hypothetical problems contained in the text book.

LAW 232 Bar Exam Fundamentals (2 Credit Hours)
Bar Exam Fundamentals is a two-credit course that will teach you the analytical and organizational skills necessary to enhance your bar exam preparation. In this pass/fail course, we will focus on a combination of substance and skill through the presentation of specific techniques for maximizing performance on all parts of the bar exam. The course will focus on the most heavily tested doctrine in three bar exam topics, exhibiting how those topics have been tested on the Multistate Bar Exam (MBE) and on the Multistate Essay Exam (MEE). In this class, you will learn and review heavily tested subtopics, learn essay and MBE test-taking strategies, increase proficiency in taking MBE questions, and learn how to write a passing bar exam essay answer. You will receive individualized feedback on written assignments that will help you hone your writing skills and give you the tools you need to successfully self-grade during bar prep.

LAW 233 Bankruptcy (3 Credit Hours)
This course will provide a comprehensive survey of basic bankruptcy law. We will devote roughly equal time to consumer bankruptcy and business bankruptcy. Throughout the course, we will touch on the economic, political, and ethical issues underlying bankruptcy's competing goals: providing overextended consumer and business debtors with a fresh start and satisfying creditors' claims in an orderly, fair way. There are no prerequisites. Students' grades will be based on classroom participation and a take-home final exam. (Krivinskas-Shepard) This course will provide a comprehensive survey of basic bankruptcy law. There are no prerequisites. Students' grades will be based on a take-home final exam. (Rosenberg)

LAW 236 Entertainment and Sports Law (2 Credit Hours)
This seminar will introduce students to the real world(s) of sports and entertainment law, examining the separate and distinct bodies of law and practices of both, while giving due to the many commonalities between the two fields, from intellectual property to professional contracts. As legal issues in both sports and entertainment law frequently appear in the headlines, this course will address up-to-the minute issues, while covering the seminal topics and cases within each, both in litigation and transaction. Guest lecturers may participate, as their schedules permit. As there will be efforts made to accommodate guests relevant to this course, the syllabus will be in flux. Further, attendance and class participation are required, making up a significant portion of the grade along with a take-home final examination. Reading assignments can be significant on a weekly basis relevant to the upcoming week's topic.

LAW 240 Criminal Procedure:Investigation (3 Credit Hours)
This course provides a general overview of the criminal justice process, and focuses on the constitutional and other legal requirements that affect law enforcement practices and procedures. Specific topics may include confessions and interrogations, identification procedures, arrest, search and seizure, surveillance, police entrapment, and the right to counsel. This is a Bar course.

LAW 241 Criminal Procedure: Adjudication (3 Credit Hours)
This course is designed to provide a detailed examination of the criminal judicial process, pre-trial to post-trial, and includes an examination of: prosecutorial discretion, right to bail, pre-trial motions, double jeopardy, plea bargaining, discovery, jury selection, various trial issues, appeals, and post-trial remedies. This is a Bar course.

LAW 242 International Criminal Law (1-3 Credit Hours)
This course will explore the main differences in European and American Criminal Law and Procedure. It will feature a discussion of the Amanda Knox case, and discuss the different aspects of trial procedure in both systems.

LAW 244 Cyberlaw (2-3 Credit Hours)
The emergence of the Internet and digital technologies that enhance human abilities to access, store, manipulate, and transmit information has brought with it a host of new legal issues that lawyers preparing to practice in the 21st century will need to understand and address. This survey course will introduce and explore specific problems in applying law to issues arising on the Internet. Topics expected to be covered include the bounds of jurisdiction, privacy, governance and regulation, online commercial transactions, content protection (through intellectual property, contract, and technological means), and cybercrime. There are no prerequisites. Grades for the course will be based on a take home exam and class participation.

LAW 245 Family Law (3 Credit Hours)
This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, annulment, divorce, division of property incident to divorce, maintenance, custody, visitation, child support, adoption, termination of parental rights, and ethical issues. (R. Anderson) This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, annulment, and divorce, division of property incident to divorce, maintenance, custody, visitation, child support, tax law, and ethical issues. (S. Coupet) This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, and divorce, division of property incident to divorce, maintenance, custody, visitation, child support, reproductive technologies, adoption, and termination of parental rights. (K. Baker)

LAW 246 Advanced Mediation Advocacy Practicum (1-4 Credit Hours)
Students will represent pro se clients pursuing employment discrimination claims at mediations taking place at the Equal Employment Opportunity Commission (EEOC) or the Illinois Department of Human Rights (IDHR). Under the supervision of an experienced attorney, students will work in pairs and conduct an interview and counseling session, develop a negotiation strategy and represent the client at the mediation conference. Representation is limited to the mediation. Class time will be devoted to discussions of pending cases and assigned readings in client counseling, mediation advocacy, and basic employment law. This course, which has won high praise from both students and clients, is open to students who have some prior experience with interest - based dispute resolution through a negotiation, mediation, client counseling or ADR course or through participation on a team. LLM students are also eligible for this class. Eligibility for a Supreme Court Rule 711 student license (43 credit hours completed) is preferred but not required. This course counts as a Skills and Live Client Experience course.

LAW 249 Human Trafficking: Advancing Protections for Children Practicum (1-2 Credit Hours)
Section 001 (2 credits) Human trafficking is one of the most egregious crimes that occurs both globally and domestically. While there have been improvements to both global and domestic responses to human trafficking, children who are compelled into forced labor and sexual exploitation continue to be the least identified cohort of survivors. This interactive and interdisciplinary seminar will explore the legal, social, and practical issues confronting children who are survivors of human trafficking, as well as an examination of efforts to prevent and intervene in this social problem. While the seminar will focus on unique issues affecting (international and US citizen) survivors of child trafficking, students will gain knowledge and skills that are applicable to other marginalized populations of children and youth, as well as adult trafficking survivors. The seminar will begin with an overview of a history of anti-slavery statutes and case law to provide a foundation for contemporary international human rights and domestic laws addressing human trafficking. Students will be introduced to various frameworks, including criminal justice, public health, gender-based, human rights, and abolitionist, to combat human trafficking. Students will analyze current research in the field, and explore interventions utilized by both legal, social and public health providers. Assignment and exercises will include mock interviews, critical analysis of legislation, and a final project addressing ways to advance the movement to combat child trafficking in the United States. Scholars and practitioners in the field will provide occasional guest lectures. Section 002 (1-2 credits) The live client experience (LCE) component of this course is available for a select number of students who are interested in augmenting the seminar with experiential work (legal research, advocacy, direct services) that intersects with child trafficking. This can include working on projects at the Center for the Human Rights of Children (CHRC), or placement at an off-site organization providing legal services to human trafficking survivors. Applications for Section 002 are required, and student selection will depend on the number of positions available at selected external sites and CHRC (minimum 6). Participants will be selected by Katherine Kaufka Walts, Director, Center for the Human Rights of Children. While students with a demonstrated interest in this topic will be prioritized, no prior training or experience is required. Note: 1L students are not eligible for LCE credits.

LAW 250 Estates (3 Credit Hours)
This course is a study of the basic legal devices available for transmission of wealth at death: intestate succession, the will, "non-probate" transfers, and trusts. Recurring themes include the special role of lawyers representing clients in these matters, the advantages and disadvantages of different wealth transmission techniques, and the social ramifications of our wealth transmission policies and laws. This is a Bar course.

LAW 251 Commercial Real Estate Transactions (2 Credit Hours)
Commercial Real Estate Transactions focuses on the basic principles of commercial real estate acquisition, financing, and development (including leasing). The course follows a mixed use commercial development project through acquisition (letter of intent through purchase contract and closing) and development (leasing/sale of condominium units). The course highlights the purchase and sale contract, easements, zoning and environmental regulations and closing; the loan process and financing issues; as well as leasing. The course emphasizes the role of the lawyer in real estate transactions and the broad issues involved in modern real estate practice.

LAW 254 Consumer Law (2-3 Credit Hours)
The course surveys consumer law from a transactional perspective, beginning with issues of deception, including false advertising, related to consumer purchases. There is coverage of the law of consumer credit, including issues of discrimination, overpriced credit and deceptive credit practices, and standard form contracts of adhesion and recent Supreme Court rulings covering binding arbitration and class actions. Consumer remedies and special issues of consumer fraud on the Internet complete course coverage. The course is especially recommended for students interested in public interest law.

LAW 255 Business Skills for Name, Image, and Likeness and the Law (1 Credit Hour)
While Name Image Likeness (NIL) is primarily associated with sports, it touches a broad spectrum of individuals; businesses, retailers, fashion designers, magazines and museums; and agencies and organizations that represent musicians, athletes, artists and businesses. This course will examine the intersection of multiple disciplines through exercises in the NIL landscape.

LAW 258 International Cross-Cultural Negotiation and Communication Skills (1 Credit Hour)
This course will introduce students to practical cross-cultural negotiation and communication skills useful in international settings. The course will address the work of Geert Hofstede and the 6D cultural dimensions model as well as the writings of Edward T. Hall regarding high and low context communicators. Learning objectives include: understand basic interest-based negotiation theory; apply negotiation techniques to engage in a problem-solving conversation; identify culture clusters based on the Hofstede 6D model; understand personal cultural preferences in comparison to a country of interest; and use appropriate questions, listening skills and other communication strategies to increase understanding and obtain results that meet client needs and interests. Students will learn though assigned readings, simulated negotiations, feedback, and guest speaker(s).

LAW 262 Genetics Law and Policy (2 Credit Hours)
This course will examine a variety of legal, policy, scientific, social, and ethical issues relating to genetics and genomics. This course will take an interdisciplinary approach to examination of these issues, drawing upon a diverse set of reading materials within the casebook. Topics to be covered include the intersection of law and science generally; genetics research and bioethical issues in human subject research; commercialization, ownership, and patenting; genetic testing and reproduction; gene therapy research and gene editing; access and liability issues; clinical applications of genetics research; and genetic privacy.

LAW 265 Black Traditions in International Law (1-2 Credit Hours)
International Law has neglected the experiences and perspectives of African Americans, in particular, and of black peoples more generally. Yet, international law was central to justifying black subjugation through slavery, colonialism, and their aftermaths today. The purpose of this course is to uncover those hidden histories. In doing so, Black Traditions in International Law will express and foreground the goals, histories and thoughts of black struggle that are not represented in journals, books and other materials of international law that we use to teach international law today. The premise of the proposed course is that Black traditions have long offered visions of global order that challenge the color blindness embedded in accounts of international law. Black traditions counter visions of international law that order the world in accordance with predominantly European and white conceptions of hierarchy and order. They challenge distortions black and non-white peoples as inferior and therefore fair game for subjugation and dehumanization through practices such as slavery and colonialism and the continuing legacies of these practices to date. Learning (c) To unearth the various ways is obscured or how it becomes invisible in international law and what international lawyers are doing about it.
Outcomes:
(a) To demonstrate the centrality of international law both as a site that legally justified black disempowerment but also as a resource for black empowerment including through efforts by African Americans today through United Nations processes such as those established under the United Nations Convention on the Elimination of Racial Discrimination; (b) To demonstrate how racial differences have been mobilized to create and sustain inequality in a wide variety of places through rules of international law and why this is very important for understanding how domestic law intersects with race

LAW 266 Intl Law Review Executive Editors (1-3 Credit Hours)
Students enroll in this course to receive credit for their work as Executive Editors on the International Law Review.

LAW 267 International Law Review Senior Editors (1-2 Credit Hours)
Students enroll in this course to receive credit for their work as Senior Editors on the International Law Review.

LAW 268 International Law Review Members (1 Credit Hour)
Students enroll in this course to receive credit for their work as Members on the International Law Review.

LAW 270 Business Organizations (4 Credit Hours)
This course gives brief treatment to agency and covers partnership as an alternative to the corporate form. Principal emphasis is on the law as it applies to the organization and functioning of corporations. The course focuses on structure and mechanics, capitalization, distributions, organic changes, and duties and liabilities of directors, officers, and controlling shareholders. The federal securities acts are introduced with particular attention to Rule 10b-5. Substantial attention is given to the special problems of the close corporation. This course counts as a Bar course.

LAW 272 Educational Advocacy Practicum (1-3 Credit Hours)
Students study education law in a weekly seminar while also getting live client experience working on education cases supervised by ChildLaw clinical faculty. Students help represent low- and mid-income families in a range of educational disputes including discipline, special education, and bullying.
Outcomes:
Advocate effectively for preK-12th grade students by conducting culturally responsive client intakes, identifying relevant education-law issues, and implementing appropriate legal and non-legal remedies; Communicate and collaborate with stakeholders to advance client interests: present clear, evidence-based arguments in school meetings and written correspondence

LAW 273 Refugee Law and Policy: Welcoming the Stranger (2 Credit Hours)
Refugee law is one of the most dynamic and rewarding areas of law. Nonetheless, in observing the administration of refugee law, we bear witness to some of the United States' most egregious human rights abuses and the abandonment, in some cases, of the rule of law. The goal of this course is to teach students the history of the norm of non-refoulement, in doing so to understand how political, religious, racial and other minority groups are intended to be protected (from persecution, from torture, and from death). Students will learn the history of the Refugee Convention-for whom the document was written, and, consequently, who is left out of protection (considering for example the treatment of victims of private-sphere persecution or climate refugees). Students will learn the role of xenophobia, racism, and subjugation of the "other" in this case the "alien"-other in administering the rule of asylum law. The class will contain a comparative analysis of refugee law under various international and domestic systems. Finally, students will learn about the treatment of child asylum seekers in the United States-namely, the treatment of children as adults in miniature and the "othering" that facilitates this deviant practice.

LAW 276 Criminal Law Practicum (1-3 Credit Hours)
This 2 to 4 credit course will help students develop a broader understanding of the criminal justice landscape. Students will be exposed to practical and substantive issues, garner a better understanding for what it means to practice criminal law, and be exposed to current and historical policies that have helped to shape our criminal justice systems. This course includes a mandatory weekly classroom seminar as well as either a field placement or research component. Students who pursue the field placement option will work in an approved agency under the supervision of practicing attorneys. Students must secure unpaid externships on their own using each agency's own hiring procedures for law students. Past field placements have included the Cook County State's Attorneys Office, The Law Office of the Public Defender - Cook County, and Office of the State Appellate Defender, as well as various legal aid agencies and law firms that have criminal law as a practice area. Approved field placements are available on the Pearson system (https://law-luc.12twenty.com/Login). You may also contact the course instructor at bkantor@luc.edu for additional options or if you have questions about the placement component. Field placement students should register for section 1 seminar (one credit hour) & as well as section 2 (live client experience). Students seeking live client experiential (LCE) credit must enroll in the field placement section 2. Students must complete 55 hours at their placement for each hour of live client credit sought. Accordingly, students may register for up to 3 credit hours of section 2 if they anticipate completing 165 hours at the placement over the course of the semester. Students do not need to have a field placement to participate in this course. Students who do not to work at an approved field placement site will conduct in-depth research on an approved criminal law or policy matter during the semester. Students who pursue the research component will present their findings to the class at the end of the semester. Research students only need to register for section 1 (for 2 credit hours). Whether the student elects to do a field placement or research, each student will have the opportunity to observe courtroom proceedings during the semester. This is a graded course. There is no final exam.

LAW 277 Intellectual Property Litigation (2 Credit Hours)
This advanced intellectual property seminar course uses a simulated litigation format to implement the fundamental concepts introduced in the survey IP class. The goal is to provide students with "real-world" intellectual property litigation experience. Students will be divided into plaintiffs and defendants and will participate in various aspects of a theoretical dispute including prefiling investigations, discovery, claim construction for patents, and summary judgment. Through this process the course will cover both practical and substantive aspects of pre-trial intellectual property litigation practice.

LAW 279 International Data Protection and Artificial Intelligence Law (1 Credit Hour)
This course will explore data protection, informational privacy, and cybersecurity laws around the world, and their intersection with civil rights. We will focus on laws that regulate technologies that can be used unfairly and discriminatorily, as in artificial intelligence, as well as policy strategies to promote fair and safe AI.

LAW 280 Federal Income Tax (3 Credit Hours)
This course introduces and analyzes the basic concepts underlying the law of federal income taxation. Topics include gross income, identification of the taxpayer, deductions, and timing of income, characterization and recognition. These concepts are developed through the study of the Internal Revenue Code, Treasury Regulations and case law. Students who might be interested in pursuing the Tax Certificate MUST take this course in the Fall of their 2nd year. Prof. Kwall's section of this course is only open to first year full-time students who are rising to second year full-time status.

LAW 281 Corp & Partnership Tax (3 Credit Hours)
Pre-requisites: Federal Income Tax (mandatory); Business Organizations is recommended
This course is intended to follow Federal Income Tax. It focuses on the income tax consequences associated with the three principal business forms: the corporation, the partnership, and the limited liability company. The tax issues confronted at the start-up, operating and winding-down phases are examined for each business form.

LAW 282 Law and Accounting (2 Credit Hours)
This course is intended to provide an understanding of basic accounting principles and their practical application in connection with the practice of law. There are no prerequisites and no requirement of a business background. Topics covered include fundamental principles of accounting for business enterprises; how to analyze and understand an income statement, balance sheet, and statement of cash flow; basic concepts of revenue recognition; conventions for capitalization versus expenses; and how to recognize possible manipulation of financial and accounting statements. Recent high profile accounting scandals such as Enron and WorldCom will also be explored.
Outcomes:
Students will become equipped with essential knowledge of the laws and accounting concepts concerning Generally Accepted Accounting Principles (GAAP)

LAW 285 International Law Review Associate Editor (1 Credit Hour)
Students enroll in this course to receive credit for their work as Associate Editors on the International Law Review.

LAW 287 Separation of Powers (3 Credit Hours)
This course will consider the dynamic nature of separation of powers in the American constitutional system, particularly with respect to the relationship between the executive and legislatives branches of the national government, but consideration will also be given to the role of the judicial branch and its interactions with the executive and legislative branches (to which the courts typically refer as the "political branches"). The readings will include some of the founding era documents, constitutional cases, materials such as presidential messages and statements, executive branch legal opinions, and secondary materials. Students will gain a working knowledge of the field through the required readings and develop seminar paper topics during the first part of the semester; they will present the results of their research to the class in the latter part of the semester and will submit papers at the end of the semester. The goal of the course is to provide students with a fundamental understanding of the separation of powers doctrine in the American system of government. They will be expected to show that mastery through classroom participation, oral research presentations, and the submission of final written papers.

LAW 289 Advanced Legal Research: Special Topics (1-2 Credit Hours)
This course is designed to help students learn how to perform legal research in specialized areas of law. The course will introduce students to statutes, legislative history, case law, regulations, state law, international law, and/or treatises and other secondary sources. The course will also help student learn and develop research strategies and techniques.
Outcomes:
By the end of the class, students should be able to identify different types of legal resources, recognize when to use those resources, know how to use them, and describe in writing and verbally their research results

LAW 290 Advanced Legal Research (1 Credit Hour)
In this course, you will explore more sophisticated and advanced areas of legal research, including judicial, administrative, legislative, and subject-specialized research resources. You will also learn about non-legal research resources which can be of value to attorneys.

LAW 293 Advanced Writing for Legal Practice (1-3 Credit Hours)
This skills-based course simulates a legal practice environment. Students complete a series of writing projects related to simulated case files or legal problems. Students are permitted to take multiple sections of this course, as different sections incorporate different practice areas and experiences. Advanced Legal Writing: Business Practice This course emphasizes and builds effective writing and communications skills in the transactional, business practice setting. The course will focus on a range of formal and informal documents and communication formats: drafting contract provisions and letters to clients and counterparties in transactional and pre-contentious settings; reviewing, interpreting, and editing the (often imperfect) contracts submitted by opposing counsel; preparing transaction task lists, due diligence memoranda or other internal communications for use by colleagues; and presentations to a board of directors or other client audience supported by written materials including PowerPoint visuals with substantive content and impact. Some attention will be given to ethics and professionalism in written content, including in the context of engagement letters with clients, declination letters with prospective clients, and conflict waivers among clients. Several sessions will also focus on special considerations when working and communicating with clients and counterparties in or from other countries where the laws, customs, practices, and language are different from our own. In-class sessions will typically be used for lecture and discussion to develop concepts and facts from selected readings and materials, which students will then incorporate in brief written assignments before the next class. There may be occasional in-class brief, flash quizzes based on the assigned readings to launch our discussions. Students will be graded based on written assignments, quizzes and exercises, and class participation. Advanced Writing for Legal Practice: Illinois Civil and Criminal Litigation The preparation of a case for trial calls upon a powerful kind of thinking that is useful in any field of law, as well as necessary to present the case at trial. This course provides specific training in advanced legal writing to build strength and maturity in the kind of analysis that a trial lawyer performs. The course focuses on the development of skills necessary for particular writing assignments that arise in the course of civil and criminal litigation. Students learn how to perform these skills through in-class discussion of the assignments and through the writing necessary to complete the assignments. Because practice in oral advocacy highlights ways in which a lawyer's writing can be improved, this course will call on you to participate in oral advocacy exercises as well as undertake the specific writing assignments. The course covers a wide range of skills, including the drafting of legal memoranda and pleadings, the preparation and presentation of motions, opening statements and closing arguments, the development of outlines to examine or interview witnesses, the use of discovery tools, and the application of a structured approach to settlement negotiations.

LAW 294 International Human Rights (1-3 Credit Hours)
This course offers an introduction to the theory and practice of international human rights law. Through course readings and rigorous discussion, students will learn about international and domestic laws and institutions responsible for the creation and operation of the human rights regime. The course will examine sources of international human rights laws including treaties, customary international law, and domestic law. The course will evaluate international mechanisms involved in human rights protection including the United Nations, regional mechanisms (such as the Inter-American, European and African systems) and various national courts and hybrid tribunals tasked with enforcing international human rights law. In addition to legal theory, the course will help students understand the practice of human rights law with an eye toward understanding the place of the United States in the support of and adherence to human rights norms.

LAW 296 Legal Writing Tutors (1-2 Credit Hours)
Legal Writing tutors work with students in the first-year writing program. They attend all classes of their Legal Writing section, hold regular office hours, and help students develop their research and writing skills.

LAW 297 Legal Technology (1 Credit Hour)
This course will introduce students to a wide variety of law office technologies, including law firm use of everyday software programs like Adobe Acrobat and Microsoft Word, Excel, and Outlook, plus law-firm-specific programs for document automation and assembly, time and billing, case management, e-discovery, and others as time permits.

LAW 301 Police Accountability (3 Credit Hours)
This course examines how the law regulates policing in the United States. We will spend part of the class exploring important court decisions related to police accountability. We will also study other legal mechanisms designed to combat police misconduct, like civil litigation, criminal prosecution, and federal oversight. Ultimately, this course will encourage students to consider whether existing regulatory tools effectively combat police misconduct, and whether these regulations impair the ability of law enforcement to fight crime.

LAW 302 Intellectual Origins of "Othering" in the Law of Nations (2 Credit Hours)
Today, many nations and peoples with formal legal equality are not, in practice, treated equally in international relations. One reason for this is that some nations and peoples were once unequal under prevailing law and legal theory. This course surveys key Western political and legal thought that led to "othering," or legal inequality, in the "Law of Nations," which was a general body of law that eventually became what we today call "international law." After setting out key concepts and themes, the course traces the evolution of thought regarding: the nature of human societies, the interrelationship of human societies, the rights and rules of war, and the acquisition and possession of land by peoples and nations. As necessary, students will be required to review relevant geopolitical history that both influenced and resulted from this evolution. A note of caution: this course will encounter detestable concepts, such as the persistent idea that some humans were "natural slaves," "infidels," "savages," or "barbarians" unworthy of equal legal or moral status or treatment. These concepts played a significant role in legal and moral justifications for colonization and other subjugation, including dispossessing indigenous peoples of their native lands. During the course, students will be required to independently research (at least 1 book or 3 significant scholarly articles) and consider the influences of this history on a contemporary issue in the U.S. or international legal system. The final grade will be determined by a student's effort in completing short reflection papers for each reading assignment, and the quality of a final seminar reflection paper that considers the course as a whole in relation to the student's independent research.

LAW 306 Intellectual Property Colloquium (1 Credit Hour)
This a unique course offered once a year to a select group of students from Loyola and Chicago-Kent. Enrolled students read and discuss draft articles of nationally renowned professors in the field of intellectual property; the articles are typically draft law review articles. The discussions are focused on helping the professors to refine and improve their articles, such that a strong foundation of intellectual property is expected, even though there is no official pre-requisite. This course meets every week, but the students only meet in person roughly half the time, with the other half of the sessions done by videoconference. Three of the in-person classes will be at Chicago-Kent; for those days, the class will begin at 4:10 pm and end by 5:50pm to allow students adequate travel time. There is no final exam or research project required for this class. Instead, students are required to attend and actively participate in all classes. Students are selected based on an application that is available at: www.chicagoip.com.

LAW 310 Special Topics in Law (1-4 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate an understanding of specialized topics not otherwise covered by department regular course offerings

LAW 310B Special Topics in Law (1-4 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate an understanding of specialized topics not otherwise covered by department regular course offerings

LAW 310P Special Topics in Law (1-4 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate an understanding of specialized topics not otherwise covered by department regular course offerings

LAW 311 Advanced Evidence (2 Credit Hours)
This course offers an in-depth study of three important areas in the presentation of evidence at trial: character (e.g., habit, routine and prior bad acts, as well as traditional character traits), hearsay, and expert testimony. Although not a "techniques" course, students will be called upon to participate actively in the class discussions and simulation.

LAW 312 Street Law (3 Credit Hours)
Second- and third-year students teach about law and the legal system in Chicago area elementary and high schools. Students attend a weekly seminar and teach classes in their assigned school. In some schools, students have the option of preparing high school students for a mock trial competition. For that experience, prior or current enrollment in Trial Practice is advisable, but not required. This is a Skills and Comprehensive Simulation course.

LAW 314 Housing, Race, and Poverty (3 Credit Hours)
This course will focus on the enduring impacts of systemic racism and other structural inequities on access to housing. It will proceed in three stages: We begin with a historical review, during which we will explore the myriad laws, policies, and subsidies over the past century in particular, but also throughout American history, that have served to entrench racial segregation and ensure white dominance in access to housing. Next, we take a deep dive into the impacts of this history and the struggles of housing insecurity in the modern era. In addition to our failure to ensure housing to those in poverty, this portion of the course will also review the impacts of discrimination in housing based on race, gender, or LGBTQIA + status. In the final month of the semester we will turn to the topic of modern policy development, especially at the local level, to enable students to interrogate zoning policies and development patterns that have formed the context of their lives so far. We will take a critical lens to these routine practices and empower students to seek out better choices for their communities now and in their future. This is a 3-unit elective course, with substantial class discussion, that will culminate in a take-home exam.
Outcomes:
Prepare students to advocate for policies that provide equitable, safe, and quality housing opportunities to all, reduce car-dependency, and ensure access to resources for all households; Understand the history of racially discriminatory housing policies, including public housing, zoning laws, and other federal and local policies

LAW 315 Cybersecurity (3 Credit Hours)
In a seminar format, this course will introduce tenets of cybersecurity as it unfolds in multiple contexts: from legal, business, economic, and technical perspectives. This course takes an interdisciplinary approach to explain how cybersecurity law has developed and the challenges all attorney face in this rapidly developing area. This class also provides theoretical and practical introductions to the distinctions between privacy and cybersecurity, technical foundations needed to understand the challenges of securing complex systems, and an introduction to the legal concepts that motivate cybersecurity law and policy. This class also introduces processes and frameworks used by private and public institutions to manage cybersecurity programs as industry standards and best practices, and will help students engage in discussion about cybersecurity from a risk management perspective, essential both to business decisions and court outcomes.

LAW 319 Jurisprudence I (3 Credit Hours)
This course will consider a number of topics residing at the cutting edge where law and legal philosophy meet, including: What is law? Must law be related to morality? What is the interpretative function of courts? Should integrity constrain what courts decide? From whence does the duty to obey law come? Are there any human rights? Might some of these rights by manifested by our ideas of liberty, privacy and freedom of expression? Need we respond to terrorism by changing our values? What is distributive justice as compared with corrective or retributive justice? Are distributive justice questions implicated by court decisions involving affirmative action, gender, and sexual orientation? How is corrective justice manifested in tort and contract law? What is ownership? Is ownership of intellectual property morally justified? What is the relationship of causation to responsibility, and what is punishment and how is it justified. Students may take this three hour course either as a lecture course with a midterm and final exam or a seminar with a 20 page research paper due at the end.

LAW 323 Business Skills for New Lawyers (1 Credit Hour)
Currently, the legal marketplace requires new lawyers to have more skill sets than just the traditional one's law schools have provided in the past. To be competitive, 21st century lawyers will require a level of knowledge and proficiency in new areas including, but not limited to, fundamental financial matters, marketing and communication, and how to add value for clients. This course is an introduction to necessary business skills for new lawyers.

LAW 325 Conflict of Laws (3 Credit Hours)
Conflict of Laws considers what law to apply when two or more states or other jurisdictions have connections to a dispute. Suppose that a court has concluded that it has subject matter and personal jurisdiction, so it can "speak law" or "speak rights" to the parties before it (as the term "jurisdiction" suggests) but faces two or more sovereigns whose law arguably might apply. At its most basic, this course addresses the next question: which sovereign's law should the court speak? The course explores this and related questions in many contexts and the various methods that courts and scholars have proposed and adopted to answer them. We consider contrasting points of view regarding choice of law, jurisdiction, and recognition of foreign judgments, asking which policies best promote fairness and harmony both nationally and internationally and meet the federal constitutional requirements of due process of law and full faith and credit for the judgments of other states. A remarkable aspect of this course is the way it cuts across time and many practice areas, probably first introducing you to some of those areas and inviting you to wrestle both with historical legal questions and cutting-edge, or even future, issues.

LAW 326 Reviewing and Righting Wrongful Convictions (2 Credit Hours)
The course explores and addresses the causes of wrongful convictions. We will also explore how the law has changed in response to what we've learned about wrongful convictions. Among other factors, the course will specifically consider interrogations and false confessions, forensics and their (mis)use in the criminal law, and eyewitness testimony and memory and factors that may make it fallible. The course will draw from case law, national academy of science reports and related research, and multidisciplinary research in the areas of psychology, social sciences, and the law. The course will also focus on solutions: how have system actors responded? What changes in law have emerged? What changes in practice, including practices in prosecution or police departments. We address the systemic causes of wrongful convictions and consider the impact of such convictions on men and women of color, particularly on Black men and teenagers, who have been disproportionately impacted. In addition to the seminar component, the course will provide students experience addressing and advising the Minnesota Conviction Review Unit (CRU.) The Minnesota CRU is one of a handful of state-wide conviction review units in the country. In the wake of the murder of George Floyd, community members, legislatures, and policy makers sought ways to address the harms created by the criminal legal system. The CRU formed in 2020, when its partnership with the Great North Innocence Project led to grant funding from the U.S. Department of Justice. That same year, Attorney General Keith Ellison created an advisory board composed of diverse legal and community experts with direct experience in the Minnesota criminal legal system. Students in the course will work directly with the Minnesota CRU to assist the CRU in designing protocol and a prioritization of the hundreds of cases it has been asked to review. Students will not be involved in direct representation of any individuals, nor in the investigation of any individual claims. Rather, students will assist in reviewing and identifying the claims presented for review, and devising a system for their review. Students will work on the issues in small groups during every class. Assessments will be conducted in the following manner: Students will ask to write two short (3 pages) response papers during the semester; students' participation will also be considered; finally, the preparation and development of the experiential work will also be considered and weigh heavily in the grading.

LAW 330 Remedies (3 Credit Hours)
This course examines what courts, including juries, have the power to do in civil cases once a litigant shows he or she has been legally wronged or is threatened with legal wrong. The subject matter of Remedies, now a required subject of inquiry on most state bar examinations, is very broad, meaning, in part, that it draws on many topics of legal study. Constitutional Law, Torts, Contracts, and Federal Civil Procedure, in particular, bear directly on the subject matter of the course. Remedies is therefore sometimes called a "capstone course," because it provides students an opportunity to bring together what they have learned in other courses on substantive and procedural law. One important component of the course is review problem sets (problems similar to examination questions and often presaging them) that are discussed in class. Another is an emphasis on how the remedial issues that become the subject of appellate opinions arise in the first instance, and are presented and play out at the trial court level. Open to all second and third year students. This is a Bar course.

LAW 335 Labor Law (3 Credit Hours)
Labor Law provides students with a comprehensive review and study of United States labor history and policy, with an emphasis on the National Labor Relations Act and its amendments (NLRA), as well as the rights and obligations of individuals, employers and unions under the NLRA, unfair labor practices under the NLRA, the National Labor Relations Board and its enforcement and policy-making powers, a thorough review of how employees select and de-select a bargaining representative (a union), the collective bargaining process, and the role of arbitration in effectuating national labor policy. The course also includes related constitutional, preemption and state law issues.

LAW 337 Employment Law (2-3 Credit Hours)
The law governing the employment relationship is not limited to the union management confrontation of traditional labor law and the proscriptions of employment discrimination statutes. Both common law claims and other statutes have become major sources in challenging, e.g., drug testing, plant closings, lie detectors, whistleblowers, wrongful discharge. This course explores those legal problems. This is not a duplication of either Labor Law or Employment Discrimination; neither is a pre-requisite. The course focuses on the total configuration of statutes regulating employment as well as the emerging common law principles affecting employment relationships.

LAW 339 Biodiversity and Ecosystem Management (2 Credit Hours)
This course will review the issues impacting biodiversity and ecosystems in the 21st century, as well as the policy choices that federal, state, and local governments have made to address these concerns. We will cover biodiversity law, ecosystem management methods, and the emerging relationships these areas have with climate change law and renewable energy development. The grade will be based on a 20-25 page paper, presentation of that paper, and class participation.

LAW 340 Patent Law (2-3 Credit Hours)
Pre-requisites: Intellectual Property is recommended, but not required
This course is designed to expose students to legal issues concerning patents. The substantive law governing patents, including how they are obtained and enforced, is addressed. The format of the class includes lecture/discussions, as well as problem-solving and practical/clinical exercises. No technical background is required (although students should be aware that some patent cases may involve technical subject matter).

LAW 341 Educational Advocacy Lab (2 Credit Hours)
This experiential course explores the intersections between racism, poverty, disability, mental health, gender, and juvenile justice through the lens of education law. As part of their work in this class, law students will participate in simulations and exercises as well as conducting intakes with parents and students who seeking assistance from a free legal helpline for K-12 families facing educational barriers in school. The goal of the intakes is to identify families' legal issues relating to education and support advocacy related to children's educational rights in discipline, special education, bullying, language access, and school enrollment. These intakes will help elucidate the topics covered in the seminar portion of the class which grapples with how school systems historically oppressed low-income students of color and students with disabilities, the laws that were put in place in an attempt to mitigate these harms, and the practices that continue to disproportionately disengage vulnerable populations from school. By the end of the course, you should be able to: 1) describe the laws that protect students in K-12 schools; 2) conduct a culturally competent intake; and 3) illustrate ways that one can effectively advocate for educational equity in schools. This Educational Advocacy Lab course is a prospective elective course and is open to 1Ls, 2Ls, 3Ls, and 4Ls.

LAW 342 IP Bytes (1 Credit Hour)
Students in this course will be writing blog posts and/or editing blog posts for Loyola's IP Bytes blog under supervision of Prof. Ho.

LAW 343 Aviation Law (2 Credit Hours)
This course will serve as both an introduction to the laws of aviation and space in their broadest sense, as well as a survey of legal issues associated with, and bearing on modern aviation and space issues against the backdrop of fundamental business principles. It will incorporate all areas of law covered in the first-year law school curriculum to cover the basic legal frameworks of aviation and space law, including: international treaties; federal and state statutes; federal and state regulations; government regulation of aircraft including drones, air carriers, pilots, airspace, and airports (including land use); choice of law issues relating to all aviation and space related litigation; and case law. Current international space law in U.N. resolutions, treaties, and customary law will be identified as will the legal theory and principles used in the advancement of civil, military, and commercial space activities. Recent developments and more specific topics in space law will be covered, including: property rights and claim of sovereignty over outer space and celestial bodies, Outer Space Treaty requirement applicable to new proposed activities in space, commercialization and privatization of low earth orbit, orbital debris--legal issues and governance, intellectual property, and export control laws as applicable to space activities. Materials will consist of a textbook, as well as cases, statutes, treaties, regulations, and policy statements. Based on availability, guest speakers, employed in key aviation and space related positions internationally, will share perspectives, wisdom, and experiences.

LAW 346 State & Local Taxation (2-3 Credit Hours)
Pre-requisites: Federal Income Tax (Law 280) Recommended: Corporate and Partnership Tax (Law 281)
State and local taxes in the United States are numerous, diverse and constantly evolving. These taxes are also the source of some of the most significant controversies in tax practice today. This course explores the federal and state constitutional and statutory frameworks that underlay state and local income tax (corporate and personal), sales and use taxes, and as time permits, the other significant types of state and local taxes (property taxes, capital based franchise taxes and gross receipts taxes, etc.). While there is a special focus on Illinois, the course is designed to equip a tax practitioner with the tools to approach and understand the tax regimes in most states and localities.

LAW 347 Title IX Compliance in Higher Education (2 Credit Hours)
Students will learn the historical foundations and regulatory evolution of Title IX of the Education Amendments Act of 1972, tracing Title IX and its related regulations from their civil rights origins through the contemporary application of Title IX to admissions, athletics, sexual harassment, and employment. The course invites students to examine and critique all aspects of this important and controversial law, while also introducing the practical knowledge and skills needed by lawyers and education administrators to ensure (or challenge) Title IX compliance in higher education.

LAW 348 Law & Poverty (3 Credit Hours)
This course concerns those areas of civil law which most affect low income persons: landlord/tenant, federal housing, welfare, social security, Medicaid, Medicare, unemployment compensation, and civil rights. Other systemic issues will be explored, such as wealth discrimination, use of legal remedies to promote social change, and the delivery of legal services to low income persons. This is a Perspective Elective course.

LAW 349 Environmental Law (3 Credit Hours)
An introductory course aimed at introducing the major federal environmental statutes and the types of analytical and practical problems encountered in the practice of environmental law and in environmental litigation. The course is devoted to reading and discussion of statutes, cases, articles, and problems in the various environmental media: air, water, and land disposal of waste. The course examines the environmental justice implications of these statutes. Some technical science and economics concepts are included.

LAW 350 Land Use (2-3 Credit Hours)
This course explores land use controls such as zoning and subdivision regulations as exercised by local and state governmental units. The course analyzes the history of land use controls and explores topics such as flexibility and discretion, improper influence and corruption, alternative land use control schemes, suburban zoning and racial/economic exclusion, environmental protection by land use schemes, and growth control. In the process of exploring land use controls, the course analyzes the local institutions and procedures, constitutional issues, and the question of when an improper taking of property occurs in our legal system.

LAW 353 Bankruptcy Litigation Skills Seminar (3 Credit Hours)
This course will explore principles of Federal Bankruptcy Law, with particular emphasis on corporate reorganization under Chapter 11 of the Bankruptcy Code. The course will involve simulated law practice problems and other exercises to provide a hands-on approach to bankruptcy issues.

LAW 354 American Legal History (2 Credit Hours)
Deep controversies over political issues present now: immigration, health care, the power of states, even presidential power will be shaped and possibly resolved by law. This has been so from the Colonial era until this moment. The fundamental idea of this course is that, seen through the lens of history, law has molded and been molded by our social, political and economic relations. American law has been essential in determining the most fundamental questions affecting us: slavery, voting, property-holding, the status of women, the role of religion, what agreements we may make, who is responsible for accidents, whether wealth may be taxed, pollution, and countless other topics. The class critically surveys the legal concepts, forms and institutions that have shaped and been shaped by American society throughout its history.

LAW 355 Privacy Law (2 Credit Hours)
This course is designed to give students an in-depth introduction to the law of data and information privacy around the world as well as practical experience regarding how data privacy issues arise and are resolved. The course will follow a lecture and discussion format focusing on fundamental principles of data privacy and how they apply to various jurisdictions around the world with a particular focus on the United States and Europe. Along the way, students will be given a series of small assignments tied to the substance of the class material and structured around privacy-related problems with which a practicing privacy attorney might be faced.

LAW 356 Storytelling and Presentation Skills for Lawyers (2 Credit Hours)
This course is designed to train student lawyers in the art of storytelling and persuasive presentation for the courtroom. This course will focus on the goal of persuading juries by presenting complex material in narrative form with the ease of a conversation. Students will learn how to construct powerful stories that illustrate critical aspects of the case, using simple language, effective pacing, and vivid character development. Students will also learn how to use vocal inflection and body language to tell the story between the words, project confidence, and how to make a mental/emotional connection with the jury. Courtroom delivery is examined through principles that apply to all spoken interaction: use of space, use of visuals, and use of time. The course focuses concepts drawn from literature, theatre, and public speaking. Students learn the practical storytelling skills that apply to openings, closings, and other forms of legal presentation. Lectures will be viewed in advance of the course in a series of short videos. Each class day includes group work, solo work, and multiple short presentations. Students will study one case file before class and come prepared to develop the facts into a story.
Outcomes:
Ability to construct engaging narratives from case facts; Ability to speak with professional confidence; Ability to use common language for complex legal concepts; Ability to employ voice and body language to aid juror comprehension

LAW 357 Bar Exam Multistate Workshop (1-2 Credit Hours)
This unique workshop will help to prepare students for the Multistate Bar Examination (MBE). The MBE contains 200 multiple choice questions in the areas of constitutional law, contracts, criminal law and procedure, evidence, property and torts. In most states, including Illinois, the MBE constitutes one-half of the entire bar exam. Each workshop will focus on three of the substantive areas tested on the MBE. Students will receive test taking strategies, guidance in answering commonly tested questions, practice answering questions and analysis of their performance. This is a Bar course.

LAW 358 The Quest for Racial Justice in the Long 1960s (3 Credit Hours)
This course will consider the legal and social history of the quest for racial justice in the aftermath of Brown, primarily as it was experienced in the Fifth Circuit, which covered the entire of the Deep South and the Panama Canal Zone at that time.

LAW 361 Insurance Law (2 Credit Hours)
This course offers a basic study of the legal aspects of insurance. Problems common to all types of insurance are considered, including problems of policy interpretation, rights and liabilities of parties and companies, and the regulation of the insurance industry. In addition, special problems raised by particular types of insurance policies are considered. Course covers the comprehensive overview of laws, standards, concepts and remedies related to insurance, including: interests protected by insurance; selection and control of risks; insurable interest; the principle of indemnity; types and classifications of insurance; making, dealing with and termination of insurance contracts; agency, underwriting and claims handling; insurance regulation; subrogation; and extra-contractual liability.

LAW 362 Workers Compensation (2 Credit Hours)
This course will study the rights and responsibilities of injured employees and their employers under workers' compensation and occupational diseases statutes. Third-party actions also are examined.

LAW 366 Immigration Law and Policy (2 Credit Hours)
This course is a survey of U.S. immigration law with an emphasis on immigration policy and current developments. This class is intended to provide a foundation on which to understand immigration law as it currently exists. Topics include the history and legal foundations of U.S. immigration law and will cover family and employment-based immigration benefits, criminal immigration provisions, grounds of inadmissibility, detention/removal, refugee and asylum law, and U.S. citizenship.

LAW 367 Adv Electronic Discovery Skills (1 Credit Hour)
Electronic discovery ("e-discovery" or "eDiscovery" for all the hipsters that joined the practice after 2008 including Professor Tilot) is a discipline required to work with digital evidence during litigation, arbitration, and investigations. It is arguably the most complex part of modern civil litigation in the United States. Fast paced advancement in information technology and the resulting tsunami of digital evidence have proven to be profoundly challenging to the judicial system. The enormous volumes of data generated by litigants and the resultant costs of eDiscovery drive litigation and settlement strategy. The law, the courts and legal practitioners have all had to adjust. Both knowledge of eDiscovery and practical application of eDiscovery are differentiators for many clients choosing counsel and for law firms hiring litigation attorneys. This course will provide you with practical skills that will help you advocate for your clients and be cognizant of the challenges that eDiscovery can create from a litigation and cost perspective. These are must-have skills for litigators regardless of the area of practice. Law 367 will focus on early stage eDiscovery practice. Development of an eDiscovery strategy and negotiation of discovery protocols are two particularly challenging and vitally important aspects of litigation practice. The decisions and concessions made during these early stage tasks ripple throughout the course of a lawsuit. Law 367 will focus on developing the legal acumen and practice skills necessary to successfully navigate these two areas. The purpose of the course is twofold, providing students with a practical understanding of: ¿ eDiscovery concepts that are critical to discovery planning and successful conduct of party negotiations including Meet & Confer Sessions (Rule 26(f) Conferences) ¿ The impacts that early eDiscovery decisions have on case strategy and downstream outcomes

LAW 368 Higher Education Law (2 Credit Hours)
The administration of each college and university in the United States undeniably intersects with the American legal system in multiple ways. Indeed, in today's increasingly regulated and politically charged context, the enterprise of higher education may now be more impacted by the law than ever before. Students in this course will learn how foundational concepts across traditional legal areas (e.g., administrative law, civil rights, torts, intellectual property, etc.) apply to the unique domain of "higher education law" and will explore hot topics such as student discipline, free speech, diversity & inclusion, sexual misconduct/Title IX, and faculty and student unionization - to name a few. Course format will be entirely online, with most weeks taught synchronously and occasional class content delivered asynchronously.

LAW 370 Securities Regulation (3 Credit Hours)
This course introduces students to U.S. regulation of securities and securities markets. It focuses on, among other things, federal regulation of the offer and sale of securities and the public offering process under the Securities Act of 1933; exemptions from federal registration; the reporting obligations of public companies under the Securities Exchange Act of 1934; and antifraud and insider trading doctrine.
Outcomes:
At the end of the course, you will have acquired facility in reading and analyzing the securities laws and associated rules and applying those laws and rules to facts

LAW 371 International Business Trans (1-3 Credit Hours)
An introduction to the legal aspects of international business. The course emphasizes what lawyers need to know to represent clients doing business in the 21st century. It covers international treaties like the Convention on International Sales of Goods (CISG), international letters of credit, international commercial terms, conflicts of laws, international trade policy, the Foreign Corrupt Practices Act, international corruption, international arbitration, and import and export issues and how to draft international agreements. Students will actually draft an international distribution agreement, and will also deal with drafting issues for international agency agreements, international licensing agreements and international franchise agreements. A focus will be on advising clients who are doing international business, in order to help them engage in best practices and avoid pitfalls. (Moses)

LAW 372 International Law and Practice (3 Credit Hours)
This course introduces the structure of the international legal system, examining the sources of international law; the roles of states, individuals and other actors; methods of dispute resolution; and the status of international law in the U.S. The course examines topics of substantive law, including the use of force. Finally, the course examines how international law affects, and can be used in, domestic practice.

LAW 375 Antitrust (3 Credit Hours)
This course treats in depth many aspects of the Sherman and Clayton Acts. Emphasis is placed on an understanding of the policies and objectives underlying the antitrust laws and the extent to which enforcement of the antitrust laws has fulfilled those objectives. Areas examined include monopolies, price fixing, division of markets, exclusive dealing arrangements, boycotts, resale price maintenance, and mergers. Recent trends in sports and health care industry antitrust cases may be discussed. The impact of economic analysis in the antitrust area is also examined.

LAW 376 Student Initiated Capstone Project I (1-4 Credit Hours)
Student Initiated Capstone Project: Engaged Learning (comprehensive simulation and skills) This variable credit course may be repeated for a maximum of four credits. This course is limited to 3L students or rising 3Ls unless exceptional circumstances apply to allow 2L enrollment. The student-initiated capstone project provides students an opportunity to synthesize and apply substantive knowledge, legal analysis, skills and professionalism to a complex legal issue and receive feedback that facilitates their move to practice. Students may propose the provision of project-based legal assistance to a public, non-governmental or professional organization or another proposal that allows students an opportunity to exercise planning, project-management, problem-solving and other skills in a real-world setting, while at the same time developing the capacity for self-directed learning. Project requirements: Students must submit a written proposal for review and approval to the Associate Dean for Academic Affairs in the semester prior to enrollment in the course setting forth the following: - A description of the project, including its purpose and potential impact on the organization on whose behalf the project is being undertaken; - An implementation work plan, including time line and progress benchmarks; - The number of students participating in the project; - A plan for faculty supervision (student must seek out and secure the participation of a faculty adviser); - Memorandum of understanding from the relevant organization (if applicable); - The specific knowledge, skills and values that would be needed to bring the project to successful completion; - Proposed deliverables, which should include a mechanism for student reflection on the capstone experience; - Proposed criteria for evaluating student performance. Examples of approved Capstone projects: SUFEO (Stand Up For Each Other) suspension advocacy project, Dialogue De Novo a Loyola Law community and legal interview podcast, and Legislative Advocacy Supporting the LGBTQ+ Community project.

LAW 377 Intellectual Property Law (3 Credit Hours)
The course is an introduction to the law of intellectual property. This course is a pre-requisite for advanced courses in IP, but also a good survey of the area for students interested in pursuing other legal careers. The focus of the course is on understanding the distinctions and similarities between the various aspects of intellectual property law. The predominate focus on the course is on trademark, patent and copyright law (in about equal proportions), with some attention also devoted to the law of trade secrets. No technical background is expected or required.

LAW 380 Estate & Gift Tax (3 Credit Hours)
The course examines the basic components of the federal transfer tax system (estate tax, gift tax and generation skipping tax), and as their interrelationship. The course emphasizes the structure of the federal transfer tax system and includes suggestions for revision. Students who intend to take Estate Planning must complete this course. Federal Income Tax is highly recommended.

LAW 382 International Tax Law (3 Credit Hours)
Pre-requisites: Federal Income Tax or Permission Required This course focuses on U.S. income tax issues with respect to the foreign activities of U.S. taxpayers and U.S. activities of foreign taxpayers
Particular emphasis is placed on the corporate taxpayer. Foreign tax systems are not addressed specifically except to highlight differences from the U.S. system. Specific topics include the foreign tax credit, sourcing rules, the "effectively connected" doctrine, the concept of trade or business in the U.S. Code section 482 allocations, subpart F income, and tax treaties.

LAW 384 Tax Controversy Practice and Procedure (2 Credit Hours)
Pre-requisites: Federal Income Tax
This course covers procedures and strategies for representing clients and resolving Federal civil tax controversies arising from Internal Revenue Service audits and appeals, including litigation. The course also includes a discussion of tax penalty provisions and the ethical issues faced by advisors in structuring tax motivated transactions and resolving tax controversies.

LAW 385 Nonprofits (3 Credit Hours)
Nonprofit organizations play a crucial part in the U.S. economy. Among other things, they account for almost 10 percent of the wages paid in the United States, and they account for more than 5 percent of the country's GDP. This class will go over the laws that govern this nonprofit activity, including the organization and operation of nonprofit organizations under state law, the rules governing federal tax exemption and charitable deductions for donors, and the laws that govern noncharitable nonprofit organizations. By the end of this class, you should have basic knowledge that you will need to advise nonprofit boards of directors of their legal obligations and ensure that nonprofit organizations comply with relevant federal and state laws.

LAW 386 Advanced Corporate Tax (3 Credit Hours)
This course follows Corporate and Partnership Tax. The principal focus is on taxable and nontaxable acquisitions of a corporate business. The first part of the course focuses on taxable asset sales and stock sales; the second part explores and analyzes the detailed statutory and common law requirements with respect to "non-taxable" acquisitive reorganizations (mergers, stock/asset acquisitions), "nontaxable" divisive reorganizations (spinoffs, split-offs, split-ups) and other nontaxable corporate adjustments (recapitalizations, reincorporations). Please note: Corporate and Partnership Tax is a pre-requisite for this course.

LAW 387 International Environmental Law (3 Credit Hours)
International Environmental Law introduces some of the legal and policy responses to global environmental degradation. The course begins with an introduction to the international legal framework within which international environmental law has developed and provides an overview of the major environmental problems confronting the international community. The course then examines a variety of global environmental problems and the legal regimes that have developed to address these problems. The emphasis throughout the course is on the relationship among environmental protection, economic development, and social development (the three pillars of sustainable development) and on the conflicting goals and priorities of affluent countries (the Global North) and middle- and low-income countries (the Global South). The North-South divide will serve as the key analytical framework through which the course will examine global environmental governance - with particular emphasis on environmental justice and on the perspectives and concerns of historically marginalized states and peoples.

LAW 388 Global Access to Medicine: A Patent Perspective (3 Credit Hours)
This course considers how patents impact access to medicine in today's global economy. While there are many issues that impact access to medicine, patents are the highlight here because patents are often poorly understood, yet have an enormous impact on access to medicine. After all, the existence of a life-saving or sustaining drug is essentially of no utility if it is priced beyond reach. This class aims to broaden students' consideration of different views of patents in the context of exploring a growing web of international agreements that require nations to adopt specific types of patent laws that have implications for the cost of drugs. No prior knowledge of patents or international law is required, although students will learn some aspects of each by the conclusion of the course. Student grades will be based on class participation, as well as a final project and presentation; there will be no final exam.

LAW 389 Public Interest Law Seminar (1-2 Credit Hours)
2L, 3L, and 4L students may enroll in the Public Interest Law Seminar for 1-2 credits. The seminar is a survey of social justice issues, including mass incarceration and the prison industrial complex; inequities relating to education, the environment, health care, and housing; economic justice and labor rights; voting rights and public participation; and migration and immigration, among other topics. Additionally, the course examines how the topics discussed impact communities and intersect with various social identities and systems of oppression. The Public Interest Law Seminar is required to obtain a Public Interest and Social Justice Certificate. At the time of enrollment in the Seminar, students shall have completed or be in the process of completing the 30 required volunteer service hours. In addition, at the time of enrollment in the Seminar, students shall have completed or be in the process of completing a clinical program, practicum, or externship. During the Seminar, students will either write a publishable article on a public interest topic or complete a project related to the public interest. The length of the paper or hours committed to the project will depend on whether the student is enrolled for 1 or 2 credits.

LAW 392 Consumer Law Review Associate Editors (1 Credit Hour)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 394 Consumer Law Review Senior Editor (1-2 Credit Hours)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 395 Consumer Law Review Executive Editors (1-3 Credit Hours)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 396 Consumer Law Review Members (1 Credit Hour)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 399 Financial Wellness for New Lawyers (1 Credit Hour)
The purpose of this course is to prepare students for the opportunities and personal financial challenges they will encounter during their legal careers. My goal is to show each student that strong financial habits are crucial and beneficial for all types of attorneys and all levels of income. Students will learn that it is possible for all of us to obtain financial freedom, which translates into the power of choice. When we have the power to choose, we have the power to live a life that conforms to our personal values, including the strong values instilled upon us at Loyola. When we are not encumbered by poor financial choices, we are free to choose our professional focus, to share our talents with the disadvantaged members of our community, and to work on passion projects. Importantly, we can choose to spend more time with loved ones.

LAW 400 Corboy Fellows I (3 Credit Hours)
Corboy I is a graded course available to students in their first year of the Corboy Fellowship program. Instructor permission is required for enrollment. In the Corboy I course students earn 3 graded units in the Fall and 3 graded units in the Spring which includes mandatory participation in the evidence/trial practice boot camp at the start of each semester in addition to successful completion of course work in trial practice as required by the syllabus provided by the instructor. In the Fall semester of the course students develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. In the Spring semester of the course students build upon the basic trial advocacy skills developed in the Fall through in-depth case analysis and strategy, advanced direct and cross examination including expert witnesses, and use of the motions in limine to support the basis for evidentiary objections and foundations for admissibility of evidence. Each Fellow is required to apply their learned skills in a local, regional, national or invitation mock trial competition. The Corboy I course satisfies the requirements for Trial Practice I (LAW 411 or LAW 416) and Trial Practice II (LAW 412). Credit: Graded 3 units Fall; Graded 3 units Spring Permission is Required.

LAW 401 Corboy Fellows II (2-3 Credit Hours)
Corboy II is a graded course available to students after their first year in the fellowship program. Only students who have successfully completed the Corboy I course are eligible to enroll in the Corboy II course with instructor permission. In the Corboy II course students earn a maximum of 6 hours of graded credit for participation in mock trial competitions. Graded 3 units Fall; Graded 3 units Spring Permission Required
Outcomes:
Students will become more effective advocates

LAW 402 "Say Her Name:" Intersectional Feminism & Police Violence (4 Credit Hours)
Drawing on literature from criminology, Critical Race Theory, social ethics, and feminist/womanist thought, this seminar will apply an intersectional lens to state violence, from mass incarceration to police shootings of racialized people. This course will introduce students to the foundational concepts of Critical Race Theory and Intersectional Feminism. The course will reflect on the legal and intellectual context out of which white supremacy, white heteropatriarchy, hypermasculinity, and economic exploitation pervade our understanding of normativity as law and order. Students will map and critically examine the multiple trajectories along which the moral and legal authority of the state and its justifications for violence against its most vulnerable are engendered by the convergence of racism, sexism, and classism under the guise of normality, social order, common good, and even the will of God. Further, we will explore how to develop social interventions that disrupt these normative patterns of racialized state violence and facilitate the elimination of racially based, gender biased structures and practices in order to facilitate critical pedagogy, moral leadership, legal practice, and social movement organizing.

LAW 404 Client Counseling (3 Credit Hours)
This class will focus on the attorney client relationship, from interviewing perspective clients to counseling clients throughout the representation process from the perspective of the advocate. In addition to interviewing and counseling skills this course will focus on negotiation skills in the context of negotiation process that occurs between lawyer and client, and with opposing counsel from the perspective of the advocate. The goal is for students to gain an understanding of the best practices for client interviewing, counseling, and negotiation. As a part of this focus, students will learn a variety of models, strategies, tactics and conceptual frameworks to use when they analyze legal matters, counsel clients, and negotiate with their attorney counterparts in a matter. The course will emphasize communication and problem-solving skills with particular attention to communication, cognitive and emotional obstacles to effective negotiation and counseling. The course will also address public policy, legal and ethical issues that arise during legal representation. Interviewing, counseling, and negotiation skills are best learned from hands-on experience. Therefore, a substantial portion of this class will involve in-class exercises and role-playing simulations in small groups. Over the course of this class, you will have the opportunity to serve as advocates, clients, and observers. Every student will be assigned a role for each exercise and will be expected to contribute meaningfully to the learning experience through their role.

LAW 405 Business Practice Transactional Skills (3 Credit Hours)
This course counts as a Comprehensive Simulation and Skills Course
This course will promote skills essential to successful lawyers in business transactional practice: evaluating facts; understanding the central business objectives of clients as well as the goals of other parties to the proposed transaction or relationship; issue spotting and problem solving; and developing, advocating for, and implementing responsive strategies. Three parallel case studies will run through the course, illustrating the application of each topic to different types of client organizations: a Fortune 500 industrial company, an entrepreneurial family-owned business, and a medium-sized not-for-profit organization. The class will be presented with a series of problem simulations built around diverse, realistic business situations for these mock clients. Topics may include structuring; due diligence; letters of intent and similar preliminary documentation; suggesting changes to sample transactional documents that protect and advance clients' objectives; and deal implementation. The course will use traditional learning techniques as well as simulations throughout the semester to explore the role of the transactional lawyer in both a familiar, domestic U.S. context and an increasingly global marketplace. More than ever, business lawyers are afforded the opportunity - and the challenge - of coordinating and planning projects abroad in markets unfamiliar to them, as well as advising international clients with in-bound investments in the lawyer's home market. There are frequent occasions to interact with people whose experience, way of doing business, and goals are different from our own. They may be clients, partners, or counterparties. The professional opportunity in law practice is to become progressively adept at discarding jargon and misconceptions and bridging expectations among transactional participants and their advisors. The course will use primarily real estate project fact situations, since most students can easily imagine and relate to client objectives involved in buying, selling, leasing, or otherwise occupying real property, and since in the international aspects of the course the approaches to property rights and occupancy are so fascinatingly different country to country. But the course's learning points will also have general application in other types of commercial transactions. The course's emphasis on case studies and commercial transaction scenarios is also designed to act as a capstone course which complements and draws upon the students' prior coursework in contracts, real estate and commercial transactions, ethics, and government regulation. Students will be graded based on written assignments and exercises and class participation. There is no final examination for this course. (Hagy)

LAW 406 Mediation Advocacy (2-3 Credit Hours)
This course is designed to give you an important skill set: preparing for and negotiating on behalf of a client in a mediation setting. Unlike a trial, arbitration or appellate setting, where the people listening to you are neutral, in a mediation you are dealing with the decision makers on the other side, people who often behave in a hostile manner towards you and your client. Through practice you can acquire skills that will make you an effective advocate in a mediation setting, including learning to communicate information to the other side in a way they can hear it, identifying the various needs and interests of the parties (as opposed to just the positions), and approaching a dispute as an opportunity to solve a problem creatively. We will touch on the decision science (neuroscience, psychology, and behavioral economics) and cultural competency tools that can make you more effective, and also explore Online Dispute Resolution (ODR), which is quickly emerging as a way to resolve disputes using AI in combination with human mediators. The problem solving skills you will learn in this class can be tremendously helpful whether you are representing a client in a mediation, negotiating a deal in a business or government setting, or settling a case in a pre-trial conference with a judge. Clients appreciate lawyers with these skills because they are able to preserve business and family relationships while still obtaining results that protect client interests at a reasonable cost. Conflict management skills are also highly valued in non-traditional legal careers. The course will also prepare you to represent a client in positional negotiations where the mediator provides an evaluation of the case. Mediation skills are best learned from hands-on experience. Therefore, a substantial portion of this class will involve role-playing simulations. Over the course of this class, you will have the opportunity to serve as mediators, represent clients, be clients, and give feedback as observers.

LAW 407 Immigration Litigation: Admin Law Challenges to Immigration Policy (2 Credit Hours)
Pre-requisites: None, except no 1L
The objectives of the course are to learn how to apply principles of administrative law in the immigration context, in both individual immigration cases and systemic challenges to the immigration system. As to individual claims, students will learn about the numerous limits on judicial review and will study recent Supreme Court decisions that implicate federal court jurisdiction over immigration matters. As to systemic claims, students will learn about how to apply the Administrative Procedure Act to immigration policies, arguing for example that a particular policy is arbitrary and capricious and/or contrary to law, Finally, students will come away with an additional understanding of the pragmatic concerns regarding client standing and the availability of various remedies in the immigration context. The course will use a real world immigration policy as the foundation for this learning. Students will learn about a contemporary immigration policy and develop arguments to challenge or defend it. The principle assignments will be to draft a motion for summary judgment as well as a legal memorandum that addresses the issues that would likely be raised by opposition and potential responses to those arguments. During the classroom sessions, students will read and discuss recent cases challenging administrative policy changes in the immigration space in anticipation of the application of those cases in their final paper.

LAW 408 Restorative Justice Workshop (1 Credit Hour)
In recent decades, courts, communities and schools are returning to restorative methods to address family issues such as child guardianship; escalating violence in our schools and streets; reintegrating prisoners into their communities; making decisions about appropriate sentencing; and the role of victims in the process. In each context, the same issues must be addressed: who is involved, what are the needs of the parties, and what can be done to resolve the issues at hand. This one credit course will be conducted in workshop format over the course of one weekend. Students will be able to identify the core principles underlying the restorative justice paradigm, compare and contrast restorative and retributive justice models, and learn the basic elements of conflict resolution techniques through a restorative lens. We will address the history of restorative justice and students will be trained on a restorative dialogue process.

LAW 409 Negotiation Weekend Workshop (1 Credit Hour)
This skills training course is conducted in an intensive workshop format over the course of one weekend. Students will learn basic negotiation principles and skills and apply them during a series of simulated negotiations where they will play the roles of counsel and clients. The course will explore the negotiation process from negotiation planning to the execution of a final agreement. The course will cover concepts including, but not limited to, needs and interests, BATNA, information-gathering, dealing with emotions and option development. The course is ungraded; however, students will be evaluated by in class performance to determine a grade of pass or fail. Students may register for the Negotiation Weekend Workshop to receive one credit. It is an option to also register for the Client Counseling Weekend Workshops to receive a total of two credits for participating in both weekends. Registration in both courses is not a requirement and each course does stand-alone.

LAW 410 Legal Writing III (2 Credit Hours)
This course focuses on persuasive written and oral communication skills which are necessary for critical analysis and the competent representation of all clients. Students will explore all sides of an argument, provide evaluations of the merits of particular cases, and persuade the reader/listener of the student's position. Pre-requisites: successful completion of Legal Writing I and II. This is a Juris Doctor Required course.

LAW 411 Trial Practice I (3 Credit Hours)
Pre-requisites: Evidence
This graded 3 unit course offers the opportunity to develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a bench trial and a jury trial during the course of the semester.

LAW 412 Trial Practice II (3 Credit Hours)
Pre-requisites: Evidence and Trial Practice I
Law 412 Trial Practice II, Section One This graded 3 unit course offers the opportunity to build upon the basic trial advocacy skills developed in the Trial Practice I course through in-depth case analysis and strategy, advanced direct and cross examination including expert witnesses, and use of the written and oral motions in limine to support the basis for evidentiary objections and foundations for admissibility of evidence. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a two bench trials and a jury trial during the course of the semester. Law 412 Trial Practice II, Section Two TRIAL PRACTICE II: A SECURITIES FRAUD TRIAL This semester-long course provides a unique opportunity to try a securities fraud case to verdict culminating in a full-day mock jury trial as the final. Students in this class, limited to 8 students, will try one complex civil case: a private claim of securities fraud alleging that the Defendants operated a Ponzi scheme in violation of Rule 10b-5 under the Securities Exchange Act of 1934. Students will work with a complex case file, including deposition transcripts, sworn statements, an expert report, investment offering materials, correspondence, bank records, and accounting records. Students will create their own summary and demonstrative exhibits to better inform and persuade the jury, and learn how to persuasively use courtroom technology to use exhibits at trial. Leading up to trial, the students will submit brief written motions in limine and responses; these and other pretrial matters will be addressed at a pretrial conference the week before trial. This course satisfies the Trial Practice II requirement.

LAW 414 Professional Responsibility (3 Credit Hours)
This course, required of all students focuses on ethical questions in the practice of law, and examines the basic premises underlying the lawyer-client relationship and the duties assumed by the members of the legal profession, including duties to clients, the public, the courts, and other professionals. Materials consist of the ABA Model Rules of Professional Conduct, and other pertinent standards regarding lawyers' ethics. This is a Juris Doctor Required course.

LAW 415 Trial of a Business Dispute (2 Credit Hours)
This course will focus on trials and arbitrations of complex commercial disputes, including breach of contract and fraud claims. Students will develop skills examining witnesses, deliver opening/closing, discussing specific pre-trial and trial issues relevant to business disputes, and conduct a full trial of a breach of contract or fraud action.

LAW 416 Trial Practice I (Intensive) (3 Credit Hours)
Pre-requisites: Evidence Corequisite: Evidence, Summer term only
This intensive eight day course is a 3 unit graded course that offers the opportunity to develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a bench trial and a jury trial during the course.

LAW 417 Advanced Business Law (3 Credit Hours)
This course teaches corporate business law and negotiation skills through a simulated class in which Northwestern and Loyola law students represent either a US pharmaceutical company or an African agricultural production company. The two companies are interested in working together to exploit a new technology and the form of their collaboration will consist of drafting and negotiating a non-disclosure agreement, letter of intent, a joint venture agreement, a licensing agreement, and a long-term supply contract. The negotiations will take place through written exchanges and live negotiations that will be conducted via zoom.

LAW 418 Pre-Trial Litigation (2 Credit Hours)
This course integrates a theoretical and practical approach to the pretrial components of litigation. Students gain an understanding of the purpose of pleadings, pretrial motions, depositions, and settlement conferences, and extend their knowledge through practical experience. The second portion of the course complements the courses in trial practices by investigating the psychology of courtroom communication and its related effects. Overall, students should develop a more well-rounded perspective of the pretrial aspects of litigation.

LAW 419 Business Skills in Sports and Entertainment Law: The Introductory Skill Set (2 Credit Hours)
This course will use current trends, current business practices and the experience of current practitioners in the Sports & Entertainment Industry to introduce, examine and understand Business Skills which are necessary for success in these fields. The use of past deals, structures and documentation from current practitioners will give insight, strategy and the thought process of the facets and nuances to complete a transaction. Engagement via technology or classroom presentation from practitioners in Sports & Entertainment will provide context to course material and provide students a "real world perspective" of the Business Skills necessary for success. Students will be required to draft legal documents and create oral presentations to demonstrate their ability to apply concepts presented during the course.

LAW 424 Professional Identity Formation (1 Credit Hour)
Loyola's mission is to educate diverse, talented students to be responsible leaders in a rapidly changing, interdependent world, to prepare graduates who will be ethical advocates for justice and the rule of law, and to contribute to a deeper understanding of law and legal institutions through a commitment to research, scholarship and public service. The Professional Identity Formation course seeks to advance the mission of the law school by fulfilling two of the main education goals as Loyola Law: advancing the Jesuit tradition of social justice and ethics and law; and to prepare students to be accomplished and ethical leaders in the legal profession and the larger community. The individual development of a professional identity is critical to meeting these goals. This required 1 credit, 5 week first year course seeks to assist students in the recognition and elimination of personal bias and building awareness of how diversity and inclusion of others whose world view is different from one's own is critical to professional development and success in the practice of law. The course objectives include the education and development of professionals prepared to enter the workplace with the tools needed to successfully engage and manage diverse environments with the ability to think critically about various legal issues, problems and solutions and how they impact different groups of people and communities differently based on identity, privilege and oppression. This course is only open to incoming first year Juris Doctor students.

LAW 426 Special Education Law and Advocacy (2-3 Credit Hours)
This course will be offered as a 2-credit course, online only, in Spring 2019. This online course will deal in depth with current and timely issues in the education of children with disabilities. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and provision of services in the least restrictive environment. The education of special needs children from early childhood through post-secondary transition will be addressed. The course will focus on advocacy, statutory and regulatory compliance, and dispute resolution. Students will assume the roles of parent/student advocate, school administrator, third-party mediator, and school service provider in a variety of online activities, including: participation in eligibility and IEP conferences; disciplinary manifestation determination reviews; resolution sessions, mediation, and pre-hearing due process procedures; and determining Section 504 eligibility and developing and implementing a Section 504 service plan.

LAW 427 Public Interest Law Reporter Executive Editor (1-3 Credit Hours)
Students enrolled in this course receive credit for their work as the executive editors of the law school's Public Interest Law Reporter.

LAW 428 Pub Int Law Reporter Associate Editors (1 Credit Hour)
Students enrolled in this course receive credit for their work as the associate editors of the law school's Public Interest Law Reporter.

LAW 429 Pub Int Law Reporter Members (1 Credit Hour)
Students enrolled in this course receive credit for their work as the members of the law school's Public Interest Law Reporter.

LAW 431 Documenting and Negotiating Finance Transactions (2 Credit Hours)
Pre-requisites: Students taking this class will be expected to have taken Business Organizations
This course offers students an opportunity to focus on the legal issues that arise between borrowers and their financial advisor/banker. Topics covered include a focus on commercial loan agreements, other capital raising vehicles and mergers and acquisitions. The course also focuses on the perspective of the CFO and the banker in deciding when and how to raise additional capital, expansion through acquisition and partnership/joint-ventures with other entities. Students also study examples of actual loan agreements and other related documents as well as analyzing case law involving financial institutions and loan agreements. This course uses practical examples of actual transactions including details of their negotiation and execution with the student actively involved on a case study basis. Knowledge of Secured Transactions and Federal Income Tax would greatly assist the student; these classes are not, however, required to take the course. This is a Skills course.

LAW 435 Deposition Advocacy Workshop (2 Credit Hours)
This Skills and Comprehensive Simulation Program is designed to teach students about Illinois and Federal deposition practice. Topics covered will include: effective deposition questioning strategies and techniques; thorough deponent preparation; efficient and technical use of exhibits; proper objections; methods of rehabilitating your witness; ethical considerations; and how to deal with the most difficult opposing counsel. This class will have lectures, but primarily focus on in class participation and interaction. The grade for this course will be based on individual mock deposition performances, in class participation, and overall contribution to self-critique and classmate critique.

LAW 437 Public Interest Law Reporter Senior Editors (1-2 Credit Hours)
Students enrolled in this course receive credit for their work as the senior editors of the law school's Public Interest Law Reporter.

LAW 438 Dispute Resolution Skills Teams (1-3 Credit Hours)
This is a non-graded course that requires instructor permission to enroll. The course is limited to students that are currently or previously enrolled in the LAW 400, 401, 438, or 499. Students are required to prepare and compete in one or more advocacy competitions. Variable non-graded credit is available from one to three units depending on circumstances as determined by the instructor. Credit: Non-Graded 1-3 units

LAW 440 Advanced Criminal Procedure (2-3 Credit Hours)
Pre-requisites: One other Criminal Procedure course
This unprecedented course will prepare you for criminal law practice by revealing the reality missing from doctrinal courses and most experiential programs. We will dig into that reality in exercises and class discussion rooted in behavioral research on prosecutors, defense attorneys, police officers, judges, and juries. Interesting guest speakers will guide you through the difficulties and dilemmas of contemporary practice. Past guests have said, "I wish I had something like this in law school." You do.
Outcomes:
Evaluate critically the operation of the legal rules presented in the class in light of how the law works in practice; Demonstrate substantial knowledge of challenges faced in the operation of the criminal justice system; Identify the roles and interaction of a variety of actors in the criminal court system--including lawyers, judges, police officers, court personnel and juries; Show how empirical research shows them operating and delineate the impact of how they carry out their jobs has on defendants

LAW 445 Humanitarian Law and Conflict (3 Credit Hours)
This seminar examines the international rules regulating armed conflicts and other armed violence. Topics include the rights and responsibilities of states and individuals under international law, armed conflict identification and classification, the law of the sea, and rules regulating the conduct of fighters and other aspects of armed hostilities, and international human rights law. The course is designed to prepare students for competitions and/or future practice in these areas of law, such as in a government/military or non-governmental organization setting. The final grade is determined by group projects that include answering scenario-based humanitarian law questions and a research project to be selected and completed by assigned student groups. LLM students may enroll in this course with permission.
Outcomes:
Understand the origins, theory, sources and important principles of international law, including the basic attributes of states and of the international legal system; Recognize when conduct is or may be attributable to a state under international law

LAW 446 Mini MBA for Law Students (1 Credit Hour)
Since the onset of the global financial crisis, the role of the lawyer has expanded. Law firms and their clients alike expect new lawyers to not only understand the law but the basics of accounting and finance as well. This intensive pass/no pass course in accounting and finance is designed to help prepare law students for the demands of a career within a law firm. Topics covered include: How to read and analyze financial statements How to calculate returns on investments How to value companies How to structure securities Goal: To prepare law students for careers in a changing economy in which lawyers will be expected, and even obligated, to understand the intricacies of the business world. Description: This Unique program was designed to bring the world of finance and accounting to aspiring lawyers. It seeks to offer law students an overview of business concepts most relevant to legal professionals and relates these concepts to a broad array of practice areas. The course progresses in order of difficulty beginning with basic elements of accounting and concluding with more advance concepts related to securities pricing. Agenda Financial Statements: Analyzing financial statements has been a tsk traditionally performed by investment bankers and accountants. However, with accounting scandals threatening to erode confidence in corporate America, attorneys are taking on a prominent role in preparing and analyzing financial statements. Including the Balance Sheet, Income Statement, and Cash Flow Statement, this course is designed to give students an overview of accounting techniques and their relevance. Financial Analysis: The process of analyzing financial statements is involved in virtually every business decision. As corporate managers and bankers rely more on the advice of their inside and outside counsel, it is now imperative that an attorney better understand basic business decision making tools. This course will allow students to understand different methods of analyzing financial statements, what they are used for, and who uses them. Issues in Financial Reporting: In the wake of the massive corporate accounting scandals such as Enron, WorldCom, and Parmalat, the importance of detecting such fraud has taken on new proportions. No longer a matter reserved exclusively for accounts and financial analysts, accounting fraud is a concern of most attorneys who must be able to detect and report any suspicious of questionable reporting practices. This course is designed to equip students with the basic skills to determine signs of corporate accounting fraud along with guidance on what to do when confronted with such matters. Corporate Finance: With Issues related to corporate finance becoming more relevant today than ever, the role a lawyer plays in structuring transactions, negotiating deal terms, and coordinating the underwriting process is becoming increasingly important. This course provides the basic tools to understand, apply and challenge most aspects of financial management. Valuation: Valuation forms the cornerstone of nearly every business transaction. Whether it involves mergers and acquisitions, leveraged buyouts, venture capital, or real estate, a solid understanding of valuation will ensure an equitable transaction. Attorneys play an active role in these transactions but all too often become entrenched in the purely legal aspects of them. This course will help students to better understand the methodology and techniques behind various forms of valuation and in turn, better serve the needs of their clients. Securities: Attorneys play a vital role in capital formation and deal structuring for companies of all sizes. This course is designed to offer students a better understanding of the financial instruments they help structure. Topics covered will include stocks bonds, and derivatives. Additionally, the course will explore these concepts in the context of real cases drawn from recent transactions. Students will be responsible for class participation and a review project.

LAW 447 Federal Indian Law (3 Credit Hours)
Federal Indian law examines the jurisdictional balance between tribes, states, and the federal government. The course explores the historical development of Indian law, highlighting its relevance to contemporary tribal sovereignty. Topics covered include criminal law, natural resources, taxation, and gaming.

LAW 449 Negotiations Seminar (3 Credit Hours)
Negotiating effectively is one of the most important qualities of a successful lawyer. This course seeks to help you move from negotiating by instinct, as most people do, to negotiating more thoughtfully, more comfortably and with a clearer sense of purpose. This course merges theory with practice to: (1) develop your understanding of negotiation, and your awareness as a negotiator; (2) give you tools and concepts for analyzing and preparing for negotiations; (3) enhance your negotiating skills through frequent role plays, analysis, and feedback; and (4) teach you how to keep learning from your own negotiation experience. In addition to negotiation skills and theory, you will be introduced to issues of representation, ethics, and the place of negotiation in our legal system. The Negotiation Seminar is a highly rewarding and interactive course. The course syllabus consists of assigned readings, simulations, and written assignments almost every class, and attendance at one video debrief where we will analyze your skill set.

LAW 450 Independent Study: Mock Trial Witness (1 Credit Hour)
In this course students participate as witnesses and bailiff/timekeepers during a mock trial, moot court or dispute resolution competition. Students must complete their assigned role as determined by the instructor. Students are required to read, review and learn material in order to perform role. Students are required to adhere to competition rules for the particular role assignment.

LAW 451 Estate Planning (3 Credit Hours)
Pre-requisites: Estate and Gift Tax; Estates is highly recommended
This seminar attempts to simulate the day-to-day practice of an estate planner. The topics range from the initial client interview to the formulation of sophisticated estate plans for those with substantial property, such as a successful business. The goal is to provide exposure to a broad range of client situations with supervised formulation and implementation of estate plans. Students generally work in teams of two or three and submit several drafting assignments throughout the semester. You may not also take Wills and Trust Drafting.

LAW 453 Legal Writing Tutors - Senior Tutors (1-2 Credit Hours)
Pre-requisites: Legal Writing Tutor (LAW 296)
No course description is available

LAW 455 Appellate Advocacy-Intellectual Property (2 Credit Hours)
Pre-requisites: None, except no 1L
This course will teach writing an appellate brief to the U.S. Court of Appeals for the Federal Circuit. The problem will involve one patent law issue and one other related intellectual property issue. The problem is designed to teach an aspect of patent litigation beyond basics covered in introductory doctrinal courses by focusing appealable issues on real-world, common litigation issues such as: claim construction, admissibility of experts in IP cases, damages, and the intersection of patents and antitrust law. The goals of the course are to encourage students to think critically about issues and to evaluate complex issues, learn to organize thoughts around those issues, and learn to communicate clearly, conclusively and with credibility in writing and through oral presentation.

LAW 456 Mediation Seminar (1-2 Credit Hours)
Mediation is a dispute resolution process that enables parties to negotiate their own settlement with the assistance of an impartial third party neutral (the mediator), instead of having a judge decide the outcome for them. As it has become increasingly institutionalized within the legal system, it is important that lawyers be familiar with its benefits, as well as with how it works. This course will offer an overview of mediation theory, techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of dispute resolution processes, how mediation styles differ from one another, in what different contexts mediation is used (including commercial, divorce, community, and employment conflicts), and what the role of the attorney-advocate is during mediation. Mediation techniques and skills are extremely beneficial to attorneys. It makes them more effective problem solvers when dealing with a case; it helps them communicate more effectively with opposing counsel; and it helps them in their interviewing skills so that they can better understand the needs and interests of their clients.

LAW 459 Intro to English Legal Profession (1 Credit Hour)
This lecture series is a mandatory preparatory course for students who have been selected to participate in the annual London Comparative Advocacy Program. It explores a variety of issues pertaining to the English history and its legal professions. Topics include the history of the common law, the development of the English legal profession, English civil and criminal procedure, the modern legal professions and the history of London. (Permission is required) This is a Perspective Elective course.

LAW 460 Humanitarian Law in Practice (2 Credit Hours)
Pre-requisites: Humanitarian Law and Conflict
This seminar meets for four hours each week during the first half of the spring semester. It is a scenario-driven course that further deepens a student's knowledge, understanding and practical application of international humanitarian and human rights law. Students are required to prepare group presentations on assigned legal topics (Thursdays) and then participate in scenario-based, role-playing exercises that require practical application of the law (Saturdays). The final grade is determined by contributions to and performance during student group presentations on assigned international humanitarian and human rights law topics and role-playing practical exercises.

LAW 461 Education Law and Policy (2-3 Credit Hours)
This seminar will explore the difficult legal, political and practical issues currently confronting American education. The course will begin with an analysis of the fundamental political and legal principles underlying the American public education system. Students will then be challenged to apply these principles to difficult areas of education law, such as: (1) the adequacy and equity of school funding; (2) the nature of a constitutional right to education; (3) the relationship between public education and religious institutions and practices; (4) legal issues relating to curriculum; (5) equal educational rights, including issues of desegregation and affirmative action; (6) the constitutional rights of students; (7) special education; and (8) the rights and responsibilities of educators. Students will be required to participate actively in class, to facilitate class discussion of a selected topic, and to submit a paper which analyzes critically an important issue raised in the class. There will be no final examination. This course counts as a Perspective Elective course.
Course equivalencies: MPP 461/LAW 461

LAW 463 Mindfulness and Well-Being (1 Credit Hour)
Are you stressed? Would you like improve your focus and memory? Prioritizing a healthy brain is important not only because learning the law is intellectually challenging, but also because lawyers suffer from anxiety, stress and substance abuse at an alarming rate. The objectives of this course include learning how mindfulness meditation, food choices, exercise, and various stress reduction techniques can improve brain health and well-being. You will practice meditating regularly both in class and on your own and will be introduced to science that demonstrates how mindfulness meditation can physically change your brain in a short period of time. This course will also cover using mindfulness to heal from technology and other addictions. You will also learn how mindfulness practice builds a variety of human capacities and skills that can be consciously applied with clients, colleagues, staff, opposing counsel, judges, juries and others. We will make these connections throughout the course using readings, meditation (together and apart), videos, class discussion, in-class exercises, personal journaling and guest speakers. You will also learn about recent advances in scientific research on the human microbiome, the mind-gut connection, and how to improve your well-being and brain performance through eating an anti-inflammatory diet. We will also explore the impact of exercise, gratitude practices, and quick stress reduction techniques. Students will also examine the stress response, brain biases (including implicit racial bias), and techniques to improve emotional intelligence in stressful conflict situations. Developing these skills will help you gain resilience to flourish in a demanding profession and bring your best self to serve your clients and communities. (Disclaimer: I am not a therapist, or a certified nutritionist, and I encourage students with mental health concerns to seek/continue treatment as needed with their therapists and/or physicians. The university Wellness Center also provides services and guidance for students with mental health concerns.)

LAW 464 Information Technology and Human Rights Practicum (1-3 Credit Hours)
In light of the ongoing digital transformation, societies are more reliant than ever on innovative technological solutions and ICT to address modern-day challenges. At the same time, this can raise fundamental rights issues in the digital space that confront companies and require highly skilled legal counsel to guide companies in their risk and impact assessments, due diligence and compliance processes, and government relations. The course examines timely human rights issues pertaining to digital technologies (especially ICT) in the areas of data privacy, content regulation, and other on- and offline fundamental rights issues in a US, transatlantic and international context. The goal is to provide students with the knowledge and tools to advise corporate clients on how to navigate these cutting-edge legal challenges. There are many highly topical and timely human rights issues pertaining to digital technologies and ICT confronting companies and their legal counsel, that this course will cover. Challenges around these emerging issues dominate the headlines almost on a daily basis and include biases in artificial intelligence, privacy issues in cross-border data transfers and innovative technologies (i.e. IoT, digital identity), disinformation and election integrity, government access to personal data (on public policy grounds, including public health, national security, etc.), hate speech and other harmful online content, cyberattacks (including during armed conflicts), and internet shutdowns. The course also features an optional practicum component (for one additional credit hour) providing interested students with the opportunity to become engaged in a real-life project on the topic with a relevant entity involving ICT companies and intersecting in a systemic and impactful way with human rights issues in IT, domestically or internationally. The class will be held synchronously via Zoom every Saturday from 9.30am to 11.30am CST. This will enable live class discussions with students and the instructor. Guest speakers from the industry, international organizations, law firms, and/or civil society may occasionally join the class discussion. For any questions about the course, please email Dr. Caroline Kaeb at ckaeb@luc.edu; Dr. Kaeb is a policy officer on digital issues at the European Commission in Brussels and you can find more information about Dr. Kaeb's profile at https://www.luc.edu/law/faculty/facultyandadministrationprofiles/kaeb-caroline.shtml

LAW 467 Advocacy Competition Supplement (1-3 Credit Hours)
This is a non-graded course that requires instructor permission to enroll. The course is limited to students that are currently or previously enrolled in the LAW 400, 401, 438, or 499. Students are required to prepare and compete in one or more advocacy competitions. Variable non-graded credit is available from one to three units depending on circumstances as determined by the instructor. Credit: Non-Graded 1-3 units

LAW 470 Immigration Practicum Advancing (1-4 Credit Hours)
Immigration law is one of the most complex, dynamic, and rewarding areas of practice. Yet, it is often viewed as a specialized field that rarely is connected to other public interest areas of law, including child and family law, poverty law, housing, education, health, and criminal justice. The goal of this course is to teach the current realities of immigration law as experienced in practice, and to show how it intersects other field of public interest law in the pursuit of social justice. This unique course has a classroom component and a field-work component. The class meets formally two hours per week in the evening to cover substantive immigration law issues, current topics/changes in immigration practice, and to develop practical skills tailored to the practice of immigration law practice and advocacy, with an emphasis on issues affecting families and children. Topics include family-based petitions, persons fleeing persecution, unaccompanied children, forced family separation, providing trauma informed services, intersection of family law and immigration law, and deportation defense. The course includes in-class simulations and role-plays. One course is NOT required to take the other. Students are expected to work at their extern field placement site a minimum of 55 hours in order to earn 1 academic credit hour, or 110 hours in order to earn 2 academic credit hours. Instructors may vary across terms, and are experienced professionals with diverse areas of practice in immigration law. You are required to complete assigned readings before class. Readings will also be posted to TWEN. If you are interested in pursuing externship credits, please contact the Director of the Immigration Law Practicum, Katherine Kaufka Walts.

LAW 471 Teaching Assistants (1-3 Credit Hours)
Course enrollment requires permission of the instructor or Academic Dean. Teaching assistants receive academic credit for serving in a tutor capacity for identified courses not otherwise within the jurisdiction of the academic tutor program.

LAW 472 Structured Finance (2 Credit Hours)
Securitization is a form of highly sophisticated business transaction in which a company seeking financing gathers together pools of its financial assets, such as auto loans, deposits them in a bankruptcy remote subsidiary and causes the subsidiary to issue securities or borrow loans that are backed by the pool of financial assets. Well-known types of securitizations include mortgage-backed securities and collateralized debt obligations. Although these types of transactions received a great deal of scrutiny during and after the financial crisis, securitization also includes other forms of asset-backed securities that are an essential component of modern financial markets. As this course will demonstrate, a successful securitization integrates a bunch of different bodies of commercial law, including securities law, bankruptcy law, secured transactions, corporation law, tax, and regulatory acts such as Dodd-Frank and ERISA. This course uses an actual securitization transaction to illustrate the interplay of these bodies of law. The course also looks at the greater legal implications of these transactions on the financial markets in the wake of the financial crisis. 2L and 3L students that have an interest in corporate or transactional law, general business law or finance should consider this course I shall assign homework problems for most classes, which we shall discuss in the next class. The course grade will be based on participation in this class discussion and on the results of a take-home examination. This course also counts as an elective course for the Certificate in Transactional Law.

LAW 473 Class Actions (2 Credit Hours)
Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert). Students will be given a hypothetical class action highlighting key issues and tensions within class, and brief and argue their positions on (1) class certification and (2) class settlement approval.

LAW 475 Multistate Bar Exam Fundamentals (2 Credit Hours)
This is a Bar course.

LAW 476 Art Law (3 Credit Hours)
Art Law and Transactions is a study of the main legal issues involved in the acquisition, ownership and disposition of works of art. The primary perspective is that of an attorney in the representation of an art collector, and how the transactional arc involves regular concerns, such as contract law, as well as art specific concerns, such as Nazi-era looted art. Part I Acquisition begins with a focus on the legal issues raised by the various venues for art purchases (art commissions, through a dealer, at auction) and follows with the two core issues of authenticity and good title. Part II Ownership concerns three topics that could arise during the ownership phase: crossing borders, moral rights and art loans. Part III Disposition completes the transactional loop with a discussion of how one transfers works of art during life or at death, whether by sale or gratuitous transfers, including valuation concerns. The course will include several drafting exercises (some of which will be done in teams) and a one-hour in-class final.

LAW 478 Real Estate Transactions (2-3 Credit Hours)
Real Estate Transactions focuses on the basic principles of commercial real estate transfer, development, finance and leasing. The course follows a multi-party commercial development project through acquisition, financing and leasing. The course highlights the purchase and sale contract, easements, zoning and environmental regulations and closing; the loan process and financing issues; as well as leasing. The course also addresses the role of the lawyer in real estate transactions and the broad issues involved in modern real estate practice.

LAW 480 Business Planning (3 Credit Hours)
Business Organizations is a prerequisite for Business Planning, but is recommended for Business Planning: Transactions. Business Planning: Transactions A business lawyer needs to know, or at least be generally familiar with, many areas of law. Therefore, the purpose of this course is to teach many legal issues, including: (1) the organization of a business (e.g., the types of legal entities including "C" corporation, "S" corporation, partnership, and limited liability company), organizational documents for a corporation and a limited liability company, control issues including the problems of a minority shareholder in a privately owned business, and understanding balance sheets and income statements; (ii) the financing of that business (including compliance with the federal securities laws in connection with private offerings and public offerings, bank borrowing and granting collateral pursuant to Article 9 of the UCC); (iii) certain key day-to-day transactions (including intellectual property, environmental law, labor law, real estate law, and sales of personal property as regulated by Article 2 of the UCC); (iv) buying and selling a business (including certain tax and non tax issues, documentation, hostile tender offers, going private and leveraged buyouts); and (v) the financially trouble business (including workouts and the rudiments of securitization). There is a large handout, but the substance of the course is contained primarily in the lectures. Therefore, regular attendance is expected. There is no prerequisite for this course but some prior exposure to business law (e.g., Business Organizations) is desirable.

LAW 481 Employee Benefits Law (3 Credit Hours)
No course description is available

LAW 482 Advising Not-For-Profit Organizations (3 Credit Hours)
This course counts as a Comprehensive Simulation and Skills Course There are more than 1.5 million not-for-profit organizations in the United States alone, and more throughout the world. Not-for-profit organizations contribute to society in many ways, through diverse missions from education and research, to social services, relief, and advocacy, to religion, to arts and culture. In addition to the impact made through their missions, not-for-profits as a group are significant as employers and for their contribution to the general economy as well. Not-for-profit organizations exist to further their charitable purposes, do not distribute dividends or net revenues (having no private shareholders or owners), and often are formed and operated to qualify for Federal income tax exemption under Section 501(c)(3) or other provisions of the Internal Revenue Code. Nonetheless, they have many of the same operational needs and characteristics of any other business. They occupy space (whether owned, leased, or hosted by others). They purchase and consume goods and services from vendors and suppliers. They manage and cope with attendant risks. Interestingly, commentators suggest that not-for-profits can be more complex to manage, and to advise, than a for-profit business. The organization may have funding constraints, staff constraints, and knowledge constraints, particularly when coping with transactions or situations that arise only occasionally or where the organization is governed or operated in whole or in part by volunteers. Not-for-profit facilities and operations can be uniquely complex (think for example about a museum, a zoo, a hospital, or a cathedral), and their diverse sources of governmental and private funding can come with extensive conditions, restrictions, and reporting requirements. They may even be offered (or accept) donated goods or services in kind, gifts that come with their own implications. This course will explore the opportunities and challenges for lawyers involved with not-for-profit organizations, whether as paid or pro bono legal advisors, or as board members or volunteers. The course will use a combination of traditional lecture and discussion, case study simulations, and guest speakers, as well as individual meetings with students on directed work. The course will be centered around a recurrent series of fictional clients, each a not-for-profit organization, engaged in a variety of operational and transactional situations. Each client organization will have a different mission, size, and resources, as well as mock client representatives who will have different business and style preferences, which the class will need to accommodate and will come to anticipate in fashioning and recommending solutions for each client. Each student will be invited to select and imagine a mock client organization with a not-for-profit mission suited to the student's interest and will have the opportunity to identify and explore individual topics relevant to not-for-profit transactions, operations, and governance. The course will also consider issues of legal ethics and professional conduct, as well as governance and fiduciary duty of board members, in the not-for-profit context. The course's emphasis on case studies and commercial transaction scenarios is also designed to act as a capstone course which complements and draws upon the students' prior coursework in contracts, real estate and commercial transactions, ethics, and government regulation. In these ways, the course emphasizes skills relevant in any transactional project, for-profit or otherwise. Students will be graded based on class participation, written assignments and exercises, and a paper and presentation resulting from research and study on their chosen mock client and individual study topics. There is no final examination for this course. (Hagy)

LAW 483 Federal Tax Clinic I (2-4 Credit Hours)
The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. The tax clinic is neither exclusively a "skills center" nor a "theory center." Instead, all the numerous components of tax law practice are integrated in the curriculum of both classroom study and legal practice with actual clients. Some of the subjects include client interviewing and counseling, negotiations, and tax litigation. Students handle cases at the IRS and Tax Court level on a clinical basis and, with the clinic attorneys, prepare all appropriate written responses to the IRS, prepare Tax Court petitions, and litigate tax cases. Federal Income Tax is a prerequisite. This is a Skills and Live Client Experience course.

LAW 485 Journal of Regulatory Compliance Executive Editor (1-3 Credit Hours)
The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis.

LAW 486 Federal Tax Clinic II (1-2 Credit Hours)
The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. Federal Tax Clinic II affords students from the tax clinic the opportunity to carry their cases through to completion. It is more independent and sophisticated than tax clinic I. Students continue to develop the skills that they learned in tax clinic I, including client interviewing, negotiations, tax litigation, correspondence with the IRS, and preparation of petitions to Tax Court. Federal Income Tax and Tax Clinic I are prerequisites. This is a Skills and Live Client Experience course.

LAW 487 Law Journal Members (1 Credit Hour)
Law Journal Members are responsible for editing, cite checking, page-proofing and proofreading articles selected for publication in the Loyola University Chicago Law Journal under the supervision of Executive Editors and Senior Editors. Each Law Journal Member must also prepare and submit an original note or comment of publishable quality.

LAW 488 Journal of Regulatory Compliance Senior Editor (1-2 Credit Hours)
The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis.

LAW 489 Journal of Regulatory Compliance Associate Editor (1 Credit Hour)
The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School, Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis.

LAW 490 Law Journal Executive Editors (1-3 Credit Hours)
Law Journal Executive Editors are ultimately responsible for the publication of the Loyola University Chicago Law Journal. They oversee the selection, editing, cite checking, page-proofing and proofreading of articles chosen for publication in the Journal. They also oversee Law Journal Members and Senior Editors in the performance of their responsibilities. Law Journal Executor Editors are also responsible for planning and hosting the Law Journal's annual symposium conference.

LAW 491 Law Journal Senior Editors (1-2 Credit Hours)
Law Journal Members are responsible for editing, cite checking, page-proofing and proofreading articles selected for publication in the Loyola University Chicago Law Journal under the supervision of Executive Editors. Law Journal Senior Editors are also responsible for other tasks assigned to them by Executive Editors that contribute to the operation of the Journal.

LAW 493 Adult Guardianship Project (3 Credit Hours)
This course offers 3 graded experiential learning credits for weekend JD students and students whose non-traditional schedules do not allow them to participate in a legal clinic or externship. The Adult Guardianship Project allows 711-license eligible law students the opportunity to represent real clients seeking guardianship of adult family members. The course requires three two-hour lecture components covering the requisite substantive areas of law as well as biweekly office hours for individual casework instruction. Lectures include client interviewing, case management procedures, substantive issues in the Probate Division, hearing advocacy, as well as best practices for working with diverse populations. To be inclusive of more law students, this course is designed to accommodate remote participation as needed given all client meetings and court appearances will be held on Zoom. Students must be eligible to appear in Court under Supreme Court Rule 711. Students who have successfully completed a minimum of 43.0 credit hours at the School of Law may enroll in the course.
Outcomes:
Conduct client interviews and develop rapport critical to advocating for real clients; Develop sufficient knowledge of adult guardianship of the person under the Illinois Probate Statute; Learn to draft and file the legal pleadings necessary in adult guardianship matters; Use 711 license to appear at all court dates on behalf of clients under the supervision of a licensed attorney

LAW 494 Law Journal Associate Editors (1 Credit Hour)
This is the course to provide credit to student editors of the Loyola University Chicago Law Journal.

LAW 495 ABA Tax Section Law Student Tax Challenge (1 Credit Hour)
An alternative to traditional moot court competitions, the Law Student Tax Challenge (LSTC) is organized by the Section¿s Young Lawyers Forum. The LSTC asks two-person teams of students to solve a complex business problem that might arise in everyday tax practice. Teams are initially evaluated on two criteria: a memorandum to a senior partner and a letter to a client explaining the result. Based on the written work product, six teams from the J.D. Division and four teams from the LL.M. Division receive a free trip to the Section¿s Midyear Meeting, where each team presents its submission before a panel of judges consisting of the country¿s top tax practitioners and government officials, including tax court judges. The competition is a great way for law students to showcase their knowledge in a real-world setting and gain valuable exposure to the tax law community. The problem is released in September and the written submissions are due in November. Teams are notified in December if they have been selected to present their papers at the ABA Tax Section Midyear meeting which happens at the end of January or beginning of February.

LAW 498 Corporate Governance Law and Practice (2 Credit Hours)
Pre-requisites: Business Organizations
In this course students will study and analyze the law and practice of corporate governance law for publicly-held corporations. Introductory sessions will detail corporate governance law and regulation, with a specific focus on the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. Thereafter, a number of alternative proposed reforms will be assessed Finally, the course will address practical element of corporate governance practice including professional responsibility issues, the director selection process, board diversity, and empirical learning regarding the best corporate governance practices.

LAW 499 Trial Practice I Applied (1-3 Credit Hours)
This graded 3 unit course requires instructor permission to enroll. Students develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. Students are required to participate in the mandatory evidence boot camp at the start of the semester. Each student is required to apply their learned skills in one or more local, regional, national or invitation mock trial competition. This course satisfies the requirements of Trial Practice I (LAW 411 or LAW 416).

LAW 504 Lawyers as Leaders (2 Credit Hours)
No course description is available

LAW 506 Patent Prosecution Seminar (2 Credit Hours)
During the Patent Prosecution Seminar, students will learn the requirements needed to procure a patent and navigate through the different stages of the patent examination process with the U.S. Patent and Trademark Office. Skills that are developed during the Seminar include conducting an Inventor Interview, drafting claims of a patent, responding to an Office Action, conducting an Examiner Interview, and drafting a petition or preliminary response for an Inter Partes Review proceeding. After taking the seminar, students are confident in their skills to procure a patent on behalf of clients.

LAW 509 Federal Courts (2-3 Credit Hours)
This course builds on the knowledge gained in constitutional law and civil procedure. One of the most important features of our constitutional system is the general division of governmental authority between state and national governments, and nowhere is that division of authority more important to practicing lawyers than in the allocation of judicial power between the state and federal courts. The former are, of course, courts of general jurisdiction, while the latter are courts of limited jurisdiction. The overall design of the course seeks to assist students in thinking about this allocation of power, not as a merely theoretical matter, but as one of real practical consequence in connection with a client's substantive goals and how best to serve them. Litigants typically want access to the federal courts for very specific (and often very important) reasons: to obtain remedies for violations of federal constitutional and statutory law, or, in some cases, to secure a forum that they believe will be more hospitable to their claims. Seen in this way, the law of the federal courts consists of doctrines that either facilitate or frustrate litigants in achieving their substantive goals in the federal (and state) courts. The aim of the course is to provide students with a basic framework for thinking effectively about these problems. This course may be offered only every other year.

LAW 510 Graduate Fellowship Independent Research (1-4 Credit Hours)
With the consent of a faculty member supervising the research, a student may earn credit. The scope and subject is arranged between the student and the faculty member.

LAW 511 London Comparative Advocacy Prgrm (1 Credit Hour)
Each year, students are selected to travel to London for about two weeks between semesters. In London, students engage in a number of activities focusing on the British legal professions, the system of advocacy in the U.K., and legal history. For students who hope to be selected for the program, completion of Evidence is recommended. Applications for the program are due each April and the program faculty selects the participants for the following year. There are always far more applicants to the program than available space. This course is the second credit of a two-credit ungraded program. To prepare for the visit to London, students are required to take "Introduction to the English Legal Profession" (1 credit) during the fall semester prior to the trip. Participants are then required to register for this course in the spring semester after the conclusion of the trip to London. Students are required to submit a 20 page research paper by a deadline in May on a topic approved by the instructor.

LAW 515 Special Topic: Alternative Energy (2 Credit Hours)
No course description is available

LAW 516 Prisoner Constitutional Rights Litigation (3 Credit Hours)
Pre-requisites: None, except no 1L
Prisoner Rights Litigation is enormous. It accounts for up to twenty percent of cases filed in federal courts; indeed, over 300 of the roughly 1,500 civil cases filed in the U.S. Court of Appeals for the Seventh Circuit in 2022 were brought by prisoners alleging unconstitutional conditions of confinement (lack of healthcare or dental care, cell infestations, inhumane temperatures, discipline without due process, suppression of religion or speech, or inadequate diet-to name some). And in this area, access to counsel is a critically unmet legal need, forcing many prisoners to litigate potentially meritorious claims without counsel. Yet this absence of counsel is perplexing given that this practice area can be lucrative for attorneys due to the guarantee of attorneys' fees under the Civil Rights Attorneys Fees Act. To resolve that discrepancy, this course is intended to prepare students for practice in prisoner's rights cases. This course will benefit students whether they practice in this area full time or on a pro-bono basis. The topics this course will cover include the federal rights that individuals retain while detained pending trial and after conviction, as well as areas of practice unique to litigating prisoners' constitutional claims. Students will also have an opportunity during the semester to hear from a guest speaker (TBA) who was formerly incarcerated and will discuss common issues of living in prison, including physical conditions, medical and mental health care, access to the grievance process and the courts in general. Course formative and evaluative assessments will provide students opportunities to learn the material, demonstrate understanding, and hone writing skills for practice. The primary method to assess student learning in this course will be the preparation of both a trial brief and an appellate brief. Students will also undergo four unannounced quizzes that will measure how well they understand the material. In addition to these assignments, class participation is critical and will be part of the final course grade.

LAW 518 Advanced Mediation and Courthouse Practicum (1-3 Credit Hours)
This course is for students who have already taken and passed the Mediation Certification & Courthouse Practicum. Students in this course will further develop and build upon their mediation skills by mediating actual long model cases at the Center for Conflict Resolution, as well as short model cases at the Cook County courts. Students will turn in written case summaries and assessments after the mediations and use the classroom time to discuss and learn from each other's mediation experiences. This is a 1-3-credit course. Grading is based on participation in mediations, class discussions and written work. Professor permission is required. This is a Skills and Experiential Learning course.

LAW 519 National Security Law (2 Credit Hours)
This course examines the current constitutional and statutory framework guiding government institutions tasked with national security responsibilities, as well as their historical roots. It covers such themes as the allocation and interplay of power between the Congress and the President on matters of war making, emergency powers, intelligence gathering, targeted killing, indefinite detention, Military Commissions, and the looming prospect of a statutory schema for addressing the rising threat of domestic terrorism. Conventional wisdom overweighs 9/11 and its aftermath as the anchor point for examination of this field of law. In fact, and as the course explores, its roots must be traced from 19th century conflicts with native peoples to slavery and the Civil War, and then coursing through industrial and social strife in the early 20th century, Cold War anti-Communism and the 1947 National Security Act, to the ongoing War on Terror - foreign in the wake of 9/11 to which paralleling concerns of domestic forms now proliferate, with each draw on organizing tenets involving the othering of minorities. To the extent that "national security law," can be said to cogently exist as a discreet field, it operates from the underpinnings of a complex mix of legal and political theory under the penumbra of Emergency Powers or, more classically, The State of Exception made famous by Weimar jurist and political theorist Carl Schmitt, with antecedents in the work of John Locke and Thomas Hobbes. The mix is inextricably intertwined with U.S. foreign policy concerns and their historical fluctuations. These theoretical considerations therefore frame and inform the course's interrogation of the legal structures and doctrines. It also engages with the topic of how ideas of membership and belonging have shaped our judgments as a world power nation-state about who and what counts as an external threat.

LAW 522 Election Law (2-3 Credit Hours)
Election Law will introduce students to the legal regulation of elections and politics. It will cover major Supreme Court cases with respect to the right to vote, regulation of political parties and candidates, redistricting, race and representation, and campaign finance. This course provides a good foundation for students interested in the law of democracy.
Outcomes:
Understand the legal limitations on governmental infringements of electoral rights; Understand how constitutional guarantees like the freedom of speech intersect with the nontextual constitutional right to vote

LAW 524 Sales (3 Credit Hours)
Sales is an advanced contracts course and offers an opportunity to develop drafting, contractual and statutory interpretation, and client counseling skills. Students will gain an in-depth understanding of the law governing sales of goods and Article 2 of the UCC.

LAW 525 Law, Politics, and Society (2 Credit Hours)
This seminar focuses on the relationship between law, politics, and society in one particular area - the criminal justice system. Drawing on a variety of sources, including court decisions and empirical studies, we will examine how the criminal law works, "on the ground." The seminar is organized in the following manner: after a brief introduction to some socially created bases for popular notions of criminality and lawbreaking, we will focus on socio-legal studies in six areas: criminal courts and criminal justice personnel, criminal trials, prosecutors, defense attorneys, the police and punishment. Issues we will consider include the disparity between what the law says and what happens in reality; the role of race, class, and gender in the decisions made by those whose job it is to enforce the criminal law; the role the criminal justice system is intended to play in society, and finally whether the criminal justice system lives up to the goal of balancing the interests of justice, order, and liberty.

LAW 530 International Law Colloquium (2 Credit Hours)
This seminar will examine select topics in contemporary international law practice and scholarship. Approximately every other week, the course will feature presentations of papers or works in progress by a leading international law scholar or practitioner. Students will submit short written comments of each paper in advance of its presentation. These comments will be sent to the speaker and the two hour session will be devoted to discussion of the paper and these comments.

LAW 531 The Administrative State (2-3 Credit Hours)
Pre-requisites: Preference will be given to 1LFT students
2L and 3L students may enroll on a space available basis. This 1L perspective elective seminar examines the role of executive branch and independent federal agencies (like the Federal Trade Commission) under our Constitution. These agencies regulate much of the economy and much of our daily lives far more than the state and federal court systems. Despite being critical to our individual liberties, health, and economic well-being, the work of such agencies is under attack. The seminar will look at recent Supreme Court cases which challenge in different ways the work and very existence of such agencies.
Outcomes:
Understand the role of administrative agencies in our legal system; Prepare a thoughtful 20 page page on one or more of the legal challenges such agencies face under current and anticipated Supreme Court litigation; This course may be used to satisfy the upper class writing requirement with permission of instructor for 3 credit hours upon completion of a more substantial seminar paper meeting the requirements of the writing requirement

LAW 536 Legislative Drafting (1-2 Credit Hours)
The Legislative Drafting Workshop will provide law students with an introduction to legislative drafting with a specific focus on the unintended consequences that can result from well-meaning legislation. Students will learn the basics of how to draft a law for enactment in the state of Illinois. We will analyze several statutes to identify common problems, and other well-known unforeseen issues. There are several types of unintended consequences, and students will learn how to identify and prevent them. The course will consist of several in-class assignments where students will be given proposed legislation and they will identify many possible unintended consequences of the law and they will then correct them either by rewriting the law or drafting an amendment. The course will be taught by legal professionals with extensive experience in legislative drafting and litigation. The students will gain practical skills by learning from two practicing litigators who experience the effects of unintended consequences every day.

LAW 538 Critical Race Theory (2 Credit Hours)
Critical Race Theory teaches analytical tools to study how law can create and cure racism. The course re-examines the first year curriculum (e.g., torts, contracts, criminal law, property, and civil procedure) to show that the law is conscious of race, and to explore how seemingly neutral application of the law can have devastating consequences for racial minorities.The course puts Critical Race Theory in conversation with other critical approaches like feminist theory and class studies. Our course goal is to address the following question: What would the legal landscape look like if society were to account for (and address) racial oppression?

LAW 539 Affordable Housing Law & Policy (2 Credit Hours)
The course will a provide an historical overview of federal housing statutes and programs to lay the groundwork for understanding how these programs and their successors are being utilized today to preserve and construct affordable rental housing. Case studies analyzing the legal organizational and financing structure of mixed income public housing developments in Chicago will demonstrate how public-private partnerships work in practice. Supreme Court and lower court cases that have impacted the course of affordable housing will be analyzed particularly in relation to the Fair Housing Act of 1968. The course will conclude with a review of employment opportunities in this field and how most effectively to pursue them.

LAW 540 Community Law Center Clinic III (2 Credit Hours)
Pre-requisites: Must have previously taken Community Law Center Clinic I
This course is open to returning Community Law Center Clinic I students seeking 2 credit hours. .

LAW 542 Trademark Law Seminar (2 Credit Hours)
Pre-requisites: Intellectual Property or Instructor Permission
No course description is available

LAW 549 Antitrust & Intellectual Property Seminar (2 Credit Hours)
Pre-requisites: Intellectual Property, Copyright or Antitrust Law or instructor permission
This seminar focuses on the interface between Intellectual Property (IP) and antitrust law. Patents, copyrights and trademarks and other IP regimes confer exclusionary rights. Exclusive rights provide incentives and serve other ends, but their exercise can also impede competition distort otherwise competitive markets. This seminar will address the intersection of IP and Antitrust with respect to issues such as standard setting, licensing, corporate strategy, product design, efforts to increase market share and mergers and acquisitions.

LAW 551 eDiscovery and Problem Solving (2 Credit Hours)
Pre-requisites: Civil Procedure, Criminal Law, Constitutional Law
Electronic discovery ("eDiscovery") is the practice of working with digital evidence during legal proceedings. It is at the intersection of law and such information technology disciplines as computer forensics, information governance, data analytics, machine and rule based learning, and artificial intelligence (and so that we do not scare anyone away, we expect that most students will have little experience with these concepts). Proficiency in e-discovery has become a must-have skill set for litigators. The Federal Rules of Civil Procedure and Evidence have already been modified multiple times in the last few years to try to address e-discovery concerns, and additional changes are under review by the drafters. The states have followed suit with their own rules. A burgeoning body of case law comes down each year, attempting to define the legal and ethical obligations of parties and counsel when preserving, collecting, reviewing, and producing electronically stored information. The result is a fundamental change in litigation practice. For example: the enormous costs of e-discovery drive settlement strategy in commercial litigation; divorce and trade-secret cases hinge on the contents of a party's cloud email account; product liability and personal injury cases focus on output from the Internet of Things; prosecutors and criminal defense attorneys fight to balance the wealth of evidence available from mobile phones with privacy rights; legal privilege protections are diminished because it is difficult to find attorney/client communications among large volumes of email; technology-savvy attorneys use their expertise to contest the authenticity and probative value of key pieces of evidence based on arcane metadata; parties seek arbitration or trial venues based on the protections and burden of local discovery rules; international reaction to US cyber-snooping hindered the ability of US litigants to obtain information from foreign parties; and, attorneys and litigants are sanctioned with alarming frequency for failure to properly manage e-discovery. Mastery of e-discovery is a differentiator for clients choosing counsel and for law firms in the hiring of new attorneys.
Law 551 is a survey course, to familiarize students with foundational concepts, and to delve into some of the more challenging questions that e-discovery poses. It will also look at creative and strategic ways that lawyers use digital evidence to advance their cases. The course will include a combination of lecture, discussion, and practical application, allowing students an opportunity to explore issues and practice their advocacy and problem solving skills. Readings will consist of case law, statutory and regulatory guidelines, ethical guidelines, research, and white papers. Grading will be based on class participation, a mid-term exam and a theme paper.
Outcomes:
Understanding eDiscovery workflows and best practices; Understanding governing rules and case law regarding eDiscovery

LAW 552 Political Civil Rights (1 Credit Hour)
The purpose of this course is to provide students with a survey of current and emerging issues in American civil rights litigation. It defines civil rights broadly and incorporates issues related to food justice as well as traditional doctrines addressing discrimination based on race, gender and other identities. As a start, the materials on racial discrimination serve as an anchor. The foundational framework for our civil rights laws is directly related to our racially discriminatory laws. For that reason, the course starts with landmark cases and historical developments impacting the social and legal treatment of blacks and other communities of color. Additionally, it asks students to think about what law is, what law is doing, and what it should be. The coverage, then, expands to the diverse areas of civil rights laws. Throughout, students will learn the contours of each doctrine, the principles that form it and their practical relevance. This begins with a discussion of racial discrimination as the catalyst for civil rights jurisprudence in America. The Civil Rights Act and relevant doctrines of the 14th Amendment are important to understanding the development of civil rights litigation. Ongoing and emerging issues affecting gay, transgender, women, nonconforming individuals, and poor classes are also covered as vibrant parts of civil rights jurisprudence. To this end, the course's materials are divided into three parts: the first part deals with foundational and historical issues that impact today's jurisprudence. Chapters in this first section examine the road to Brown and the struggle for desegregation in school systems nationally. It also discusses pre and post Reconstruction cases and statutes still relevant today. The second part examines in detail the cases and laws that make up the modern civil rights landscape. As such, it starts with the Civil Rights Act and a close examination of Title VII, Tile IX and Title VI. This section also includes cases that make up the voting rights canon as well as chapters on disability law, language minorities, and gender discrimination. The third section delves into a study of emerging issues in the twenty-first century. In these materials, relevant issues include the struggle for sustainability as civil rights issues, food justice, gender identity, sexual orientation, and same sex marriage.

LAW 553 Sex Trafficking (3 Credit Hours)
This seminar will explore sex trafficking as a structural problem of intersectional inequality and sexualized violence. This class will combine theory with a comprehensive overview of legal doctrine in areas of substantive criminal law and procedure. Students will also read several articles addressing intersectional feminism and critical race theory approaches to law, hierarchy, and vulnerability.

LAW 554 Family Law Practicum (1 Credit Hour)
Students in this practicum will administer a skills component of the traditional Family Law foundational course, focusing specifically on the drafting of an antenuptial agreement in a complex case hypothetical. Practicum students will serve as clients in the drafting exercise. In this capacity, students will meet face-to-face with the collective group of student attorneys representing each client and engage in ongoing, timely and detailed electronic communication with student attorney teams throughout the course of the skills exercise. Practicum students will also assist in evaluating the client counseling facet of the exercise, and in reviewing each prenup for its substantive terms. Each practicum student will spend approximately 40 hours engaged in work related to the exercise. Students may enroll in this practicum only with permission from the instructor.

LAW 555 Children and the Law (2 Credit Hours)
This course adopts a novel Critical Youth Theory approach to address a range of legal claims grounded in substantive due process from a child-centered perspective. We will explore the various ways in which child-centeredness shapes the legal discourse and how centering children invites us to think differently about legal problem-solving. Topics include: Voting, Right to Identity, Climate Crises, Global Perspectives on Children, Gun Violence, Poverty among others.

LAW 556 Alternative Dispute Resolution (2-3 Credit Hours)
This course aims to help law students become effective problem solvers through development of their knowledge and skills in negotiation, mediation, and arbitration as applied to a range of legal disputes. Students will learn to assist clients in identifying their goals and searching for creative solutions that produce efficient, expansive and effective outcomes. Students will learn about negotiation, mediation, and arbitration through lectures, but primarily through case simulations followed by critical feedback. Class attendance is critical. Class focus will be on the mediation and collaborative legal forums of Alternative Dispute Resolution, with an emphasis on learning procedural aspects of mediation and arbitration, and the collaborative skills of negotiation. This course will provide students with the opportunity to gain practical knowledge and familiarity with the different methods of alternatives to litigation. Classes will include lectures, simulations, role-playing, and outcome-based actual case studies. This is a Skills course.

LAW 558 Comparative Freedom of Speech (1-2 Credit Hours)
This course will explore the first amendment provisions dealing with free speech, freedom of association and religion with particular emphasis on free speech and association in a time of terror. We will also study the European counterpart protections with significant stress on civil and criminal defamation.

LAW 560 International Research (1-2 Credit Hours)
With the consent of a faculty member supervising the research, a student may earn credit for a project related to an international law subject. The scope and subject is arranged between the student and the faculty member.

LAW 564 Animal Law and Policy (2-3 Credit Hours)
Animals (meaning comprehensively for this purpose non-human mammals, birds, reptiles, fish, and insects) are central to our world in a myriad of ways. Historically, and still today (not without controversy and for better or worse depending both on degree and on your perspective), animals were and are a major source of food, as well as a tool of production as farm labor, transportation, policing and security, military activities, and entertainment and education, an object of scientific and medical research, and work as service and support animals. Animals are also key components - and participants - in our ecology and environment; after all, they have been on the planet in one form or another 500 million years before the first humans are believed to have emerged (and, even then, Darwin might point out that we have them to thank). Moreover, companion animals have been sources of friendship, companionship, and love throughout centuries and especially in modern society where they are often viewed as family members and not as possessions. These attachments, and public concern for the welfare of animals, also result in a determination to protect animals (although arguably in some contexts but not others) from neglect and abuse. For all of these reasons, animals intersect with virtually every aspect of legal concept and practice: property law, contracts, tort, criminal law, environmental law, wills and trusts, constitutional law, international law and trade, and more. And, like every area of law, animal law continues to evolve through legislative and regulatory action, judicial decision, and societal sentiment. That change can be complex, involving considerations of both human and non-human safety and wellbeing, ethical and moral beliefs, and economic interests. In this course, together we will explore themes across the spectrum of how the law touches and treats animals in our society, in our economy, in our homes, and in the wild. We will use a textbook as a starting resource, supplemented by materials from primary and real-world sources and contexts, as points of discussion and discernment. Each class member will also select an individual topic in an area of personal interest to develop in further depth and to share with the class to expand our knowledge. Coursework on which the performance assessment is based will be composed of a series of objective or short-answer written assignments throughout the course, a concise paper and class presentation on the student's chosen individual in-depth topic, a brief take home final examination that also serves as a summative reflection on the course, and class participation.

LAW 566 Blockchain & the Law (2 Credit Hours)
No course description is available

LAW 568 European Union Law (1-3 Credit Hours)
This seminar will provide a survey of the key Treaty provisions and legislation of the European Union (EU) and the key institutions of the EU that enforce these provisions. The course will focus on the so-called four freedoms of EU law - the free movement of goods, services, people, and investments. The course will also discuss the progress of the EU towards its long term goal of the completion of a single European market and discuss selected areas of the substantive law of the EU including competition law (antitrust). Students will prepare a paper on a mutually agreeable topic and submit an outline, first draft, and final version as well as present their topic in class toward the end of the seminar.

LAW 572 Special Education Dispute Resolution (1 Credit Hour)
This one credit hour weekend course will provide students with an intensive simulated experience in the various processes of resolution of special education disputes. Areas addressed will include some or all of the following: contested IEP meetings, manifestation determination reviews, resolution meetings, mediation, and due process hearings. Assuming the roles of parent¿s counsel and school district counsel, students will develop a practical working knowledge of federal and Illinois statutes and regulations governing special education dispute resolution; develop a legal understanding of, and working familiarity with, student special education records and documents; and learn how to interview and prepare clients, witnesses, school personnel, experts, and others for their respective roles in the dispute resolution process.

LAW 573 Terrorism Prosecution: Civil Rights & Executive Power in Theory & Practice (2 Credit Hours)
This class will examine how terrorism cases are investigated, prosecuted, defended and punished. It will address how suspected terrorists are targeted and captured, including surveillance methods and interrogation techniques, as well as the questions of whether these measures are effective and potentially undermine well-established and deeply in-grained constitutional liberties and culture. It will cover classified evidence in the adversarial process -- including how it is gathered, how it impacts charging decisions and trial strategies, and how courts manage it in adversarial proceedings. In addition to drawing out these issues as they operate in civilian courts, the course will also examine judicial alternatives, including the use of military tribunals or national security adjudicative systems in other constitutional democracies, as well as extra-judicial and judicially pre-emptive measures such as preventative detention, designations and the freezing of assets. Overarching issues that will animate our exploration will be the need for emergency rules and powers, the role(s) of the courts and counsel, and how well the U.S. legal system faces the challenge of balancing rule of law and civil liberty principles with the national security concerns in countering terrorism, both internationally and domestically. This is a non-exam course. Grades will be based (i) short written impression statements on assigned weekly readings which will be used as prompts for class discussion; (ii) classroom participation, and; (iii) a 15-20 page paper on a topic of choice in the field. The class will include participation by guest speakers, including scholars and practitioners in the field. This is a Skills course.

LAW 575 Futures, Swaps, & Other Derivatives (2 Credit Hours)
No course description is available

LAW 576 The Corporation and the Constitution (2 Credit Hours)
This class will investigate the origin in law of the corporate form and explore the challenges presented by the modern corporation, both from the standpoint of its legal structure as a business organization formed by law, and the rights and privileges afforded corporations under case law that interprets the corporation as a jural "person." Readings will be considered from colonial charters to the recent U.S. Supreme Court decision in Citizens United v. FEC (2010). There will be special emphasis on the contracts and commerce clauses of the Constitution, as well as the 14th Amendment. This course is not so much concerned with corporate responsibility as it is with corporate governance and accountability. We will explore the concept of limited liability, trace the evolution of legal personhood, examine the original public purpose requirement of the corporate entity as contemplated in law, and consider the role of public law in the world of the self-regulating market.(Class will meet at Chicago Kent Law School.)

LAW 578 Student Disciplinary Hearing Workshop (1 Credit Hour)
This one credit weekend course will provide students with an intensive simulated experience in conducting a student disciplinary administrative hearing. Assuming the roles of counsel for the student and counsel for the school district, workshop participants will prepare for and represent their respective clients in a school expulsion hearing. Participants will develop an understanding of the constitutional principles of due process, freedom of speech, and search and seizure as they pertain to students in the public school setting; as well as Illinois School Code statutory provisions regarding student discipline, suspension and expulsion.
In the course of preparing for the culminating disciplinary hearing, participants will gain a working familiarity with student codes of conduct and student school records and documents, and they will hone their skills in interviewing and preparing clients, witnesses, and school personnel for their respective roles in the discipline process and administrative hearing. Students will also deliver opening and/or closing statements and conduct direct and cross-examinations of witnesses and, through this process, will enhance skills applicable to a variety of court and administrative hearing settings. This is a Skills and Experiential Learning course.

LAW 584 Mediation Certification & Courthouse Practicum (4 Credit Hours)
Students in this course will be trained to become certified mediators and then develop their mediation skills through hands-on experience mediating in court. The course starts with a mandatory intensive mediation skills training conducted by the Center for Conflict Resolution (CCR) at the beginning of the semester. The course will thereafter meet once a week as part of CCR's certification process to discuss, practice and improve upon student mediation skills. Students who meet all of CCR's certification requirements will be certified as CCR volunteer mediators and mediate actual cases in Cook County courts, while continuing to meet in class to discuss and build on what they learn in the mediations. Upon completion of this course and the CCR certification process, students will be able to continue volunteering as mediators for CCR, as long as they continue to meet CCR's volunteer requirements. Instructor Permission Required. Spots are limited so students are encouraged not to delay seeking permission to register for the course. To apply, email Professors Block and Eatherton. Preference will be given to students who have already completed a mediation or negotiation course, whose fall schedules are compatible with the court mediation schedule, and who are in their final year of school. Those who do not get a spot may request to be put on the waitlist. Enrollment Requirements: Restricted to J.D. and LL.M. students

LAW 586 Community Law Center Clinic Veterans Practicum (2-4 Credit Hours)
Pre-requisites: 44 credit hours completed
The Veterans Practicum is a cross-disciplinary effort in partnership with the School of Social Work designed to better address veterans' social and legal needs. Senior law students will use 711 license to represent veterans and their families in a myriad of civil legal matters under the supervision of the director, Emily Vaughan. Students who enroll in this course must be available to be for office hours one morning or one afternoon each week (Monday-Friday). The Practicum also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that will be required of them in their casework.

LAW 590 Victims and the Criminal Process (2 Credit Hours)
This course tracks the victim's role and the rights of and responsibilities to victims. The course considers the different stages of the criminal process, from investigation through sentence and post-sentence matters, and the law of victims' rights through that process. It examines state constitutions and federal statutory victims' rights. The course also examines definitions of "victim" to see who is included and excluded; examines gender and racial bias in criminal justice and how these impact response to crime; it examines historical and comparative responses to victims of crime, and analyzes how the law serves different kinds of victims, including victims of wrongful convictions, victims of financial fraud, and other classes of victims. The course will require a research paper. No exam.
Outcomes:
Students will learn the statutory and constitutional rights and laws pertaining to victims; Students will examine and consider policy implications related to the rights of victims; Students will collaborate with colleagues to present on at least one area of victims' rights and proposed reforms

LAW 592 Independent Research (1-2 Credit Hours)
With the consent of a faculty member supervising the research, a student may earn one or two units of ungraded credit. The scope and subject is arranged between the student and the faculty member. It is expected that for each hour of academic credit the student will produce a scholarly work of publishable quality of approximately 30 pages in length. The project that is the subject of the Independent Research must be completed during the semester in which the registration occurs. This variable credit course may be repeated for a maximum of six (ungraded) credits. (For additional requirements see the associate dean.) This is a Non-Graded Course.

LAW 593 Graduate Fellowship Extern (1-4 Credit Hours)
Students may earn externship credit for working at an approved externship site. This program is designed to offer students practical experience.

LAW 594 Directed Study (1-2 Credit Hours)
A student may earn up to two units of ungraded credit for undertaking a research project for a faculty member. The scope and subject is chosen by the faculty member, who exercises control over the project. It is expected that for each hour of academic credit the student will engage in substantial legal work for at least fifty-five (55) hours during the semester. The project that is the subject of the Directed Study must be completed during the semester in which the registration occurs. This variable credit course may be repeated for a maximum of six (ungraded) credits. (For additional requirements see the Associate Dean.)

LAW 595 Community LawCtr Clinic I (4 Credit Hours)
The Community Law Center Clinic (LUCLC) course is designed to teach students the essential skills involved in the practice of law, including client interviewing and counseling, hearing advocacy, negotiation and practice management. These skills are taught in conjunction with the representation by students of clients in civil cases under the supervision of Professor Theresa Ceko and the law school's clinical faculty. The Law Center is located in Room 1005 of the law school. Students who enroll in the clinic course must be available to be in the clinic either one morning or one afternoon each week (Monday-Friday). The course also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that they perform at the clinic. In addition to regular clinic hours and classroom work, clinic students work on their cases during an additional 6 hours a week, most of this work done on the student's own time. Any student who has completed the first year of law school can enroll in the clinic course. Students in the LUCLC represent children in contested guardianship cases and clients in civil cases involving landlord/tenant, family and elder law problems. Many of LUCLC's clients are low income persons. Serving persons who cannot afford legal services sensitizes students to the special ways that the law affects the lives of the indigent. Another important aspect of the LUCLC course is the opportunity for students to develop their own sense of the lawyer's professional role. Students experience the complexity of the attorney-client relationship and the myriad ethical dimensions of lawyering. Students are exposed for the first time to the conflicts, frustrations and rewards inherent in legal practice. Enrollment in the Community Law Center Clinic course also helps students prepare for the performance tests that have been added to many state bar examinations, including Illinois. The skills that these performance tests measure are the same skills that students learn through their client representation. The Community Law Center Clinic course is an excellent bridge from the law school classroom to the law office. It allows students to begin to learn how to practice law in a reflective environment.

LAW 596 Community Law Center Clinic II (3 Credit Hours)
Students in the LUCLC represent children in contested guardianship cases and clients in civil cases involving landlord/tenant, family and elder law problems. Many of LUCLC's clients are low income persons. Serving persons who cannot afford legal services sensitizes students to the special ways that the law affects the lives of the indigent. Another important aspect of the LUCLC course is the opportunity for students to develop their own sense of the lawyer's professional role. Students experience the complexity of the attorney-client relationship and the myriad ethical dimensions of lawyering. Students are exposed for the first time to the conflicts, frustrations and rewards inherent in legal practice. Enrollment in the Community Law Center Clinic course also helps students prepare for the performance tests that have been added to many state bar examinations, including Illinois. The skills that these performance tests measure are the same skills that students learn through their client representation. The Community Law Center Clinic course is an excellent bridge from the law school classroom to the law office. It allows students to begin to learn how to practice law in a reflective environment.

LAW 597 The Use of Force in International and Domestic Law (2 Credit Hours)
This course introduces students to constraints on the use of force in international and U.S. domestic law. International law topics include: (1) a brief introduction to international law and legal theory; (2) the United Nations Charter and limits on the use of force between states; (3) the difference between armed conflict and law enforcement matters; (4) rules regulating the conduct of fighters during an armed conflict; (5) human rights law, and; (6) the law of the sea. Domestic law topics include: (1) the general relationship between international law and the U.S. legal system; (2) the allocation of authority to use and limit the use of force under the U.S. Constitution; (3) domestic law regulating the conduct of armed hostilities, and; (4) domestic statutes regulating the use of the armed forces for domestic law enforcement and other emergencies. The final grade is determined by a take-home final exam, class preparation and participation, and contributions to in-class group work.

LAW 598 Appellate Advocacy Honors Program (2 Credit Hours)
The Appellate Advocacy Honors Program is the classroom component of Loyola's Moot Court Program. Students will learn effective appellate advocacy through lectures and workshops. Work completed in the classroom will not only prepare students for their competitions, but also strengthen written and oral advocacy skills for legal practice. This is a Skills and Comprehensive Simulation course.

LAW 599 Externship Intensive Field Placement (1-3 Credit Hours)
Externship - Intensive Field Placement - Chicago (1-3) Skills, Live Client Experience Students enrolled in the JD program who have completed all required first year courses may apply for an externship at an approved field placement site. Certain field placements may limit eligibility to students who have completed certain course work or who have obtained their Illinois Supreme Court Rule 711 license. Students in the externship program may earn 2 or 3 hours of non-graded credit for supervised work performed at an approved field placement site. Students participating in the externship program are also enrolled in a contemporaneous and competency based seminar course. The classroom component of the course has been designed to complement the legal work performed by the student in the field. The focus of the seminar course is on professional identity formation, professional skills, ethics, and cultural competence. The goal of the course is to assist students as they transition to the practice of law. There is no final examination in this course. This course is offered each semester. Externship: Intensive Field Placement - Washington, DC (2-3) Skills, Live Client Experience Students enrolled in the JD program who have completed all required first year courses may apply for an externship at an approved field placement site. Certain field placements may limit eligibility to students who have completed certain course work. Students in the externship program may earn 2 or 3 hours of non-graded credit for supervised work performed at an approved field placement site. Students participating in the externship program are also enrolled in a contemporaneous and competency based seminar course. The classroom component of the course has been designed to complement the legal work performed by the student in the field. The focus of the seminar course is on professional identity formation, professional skills, ethics, and cultural competence. The goal of the course is to prepare students who expect to practice law in the DC area with their transition to the practice. There is no final examination in this course. There is no final examination in this course. This course is offered only during the summer semester.
Outcomes:
Students will integrate substantive law and legal skills learned in the classroom into real-world legal settings through supervised practice, reflection, and feedback; Students will exhibit professionalism by adhering to ethical obligations, communicating effectively with supervisors and clients, managing time and workload expectations, and engaging in reflective practice to improve their lawyering skills

LAW 601 Child, Family, and the State (2 Credit Hours)
This course examines the legal relationships among children, families, and the state. Areas of law to be examined include child welfare, education, and juvenile justice. The course will explore Supreme Court jurisprudence on the issue of parental rights and family privacy as well as the doctrine of children's rights. Attention will be paid to the role of race, gender, and class and their intersection in shaping the ways in which children and families interface with governmental systems. Students in the course will be asked to grapple with critiques of governmental systems impacting children and families, explore calls to reconstruct and reconstitute these systems, and examine the role of lawyers working from within and outside these systems.

LAW 602 ChildLaw Trial Practice (Intensive) (3 Credit Hours)
This is Trial Practice I with an emphasis on those issues important to advocacy in cases involving children. The course is taught by a team of lawyers and judges experienced in child advocacy, with a student/faculty ratio of no more than 8 to 1. The principal objective is to introduce students to litigation principles, and to teach them advocacy skills in an intensive learn-by-doing environment. The case files from which exercises are drawn also enable students to prepare for the special challenges involved in the representation of children (child witnesses, unique problems in expert testimony, special evidentiary issues, etc.). At the end of the course each student conducts a complete trial before a mock jury at the Daley Center. Evidence is a prerequisite and the course requires instructor permission. This is a Skills and Experiential Learning course.

LAW 606 Legislation and Policy Clinic (2-4 Credit Hours)
The ChildLaw Legislation and Policy Clinic is part of the Civitas ChildLaw Center. Students in this Clinic have an opportunity to work, under the supervision of a faculty member, on a legislative or policy project that may involve any or all of the following: critiquing pending bills or existing legislation, drafting bills, developing summaries and fact sheets about pending bills, and building and working with coalitions to develop legislative ideas and consensus. Topics cover a range of child and family issues. Spring semester students primarily work on projects begun during the Fall Clinic, including researching and drafting legislation concerning child protection and juvenile justice reform issues. Students work in teams and must have sufficient time or flexibility during the work day to participate in some internal team meetings as well as attend meetings outside the Law School, as needed. (Instructor permission required.)

LAW 608 Juvenile Justice (2 Credit Hours)
In this course, we will explore legal and policy questions centered on how society should respond to children, adolescents and youth adults who commit crimes. To what degree should developmental differences between youth and adults be reflected in law and policy? Are legislators or individual judges in the best position to decide how to meet the needs of youthful offenders while at the same time protecting the interests of victims and the larger community? What responsibility do parents and communities bear in providing children and opportunity to change their behavior? How should the justice system interact with other systems, including education, mental health and child welfare? Summative assessment in the course will be measured by student performance on a midterm exam and a final paper, together with exemplary preparation, attendance and participation.

LAW 613 ChildLaw Fellows Seminar (1 Credit Hour)
This seminar serves as a capstone opportunity for ChildLaw Fellows to contextualize their interdisciplinary legal education and to explore their roles as advocates in working in and reforming the complex and evolving systems that affect children and their families.

LAW 615 Child and Family Law Mediation (2 Credit Hours)
This course will explore the use of mediation in disputes involving children and families. Students will survey various models and uses of mediation and related dispute resolution processes in the following contexts: divorce, custody and visitation issues; child protection; juvenile delinquency; balanced and restorative justice; adult guardianships; youth violence prevention and peer mediation; and special education. Further, students will consider the impact of domestic violence and other impairments on the child and family mediation process. In addition to reviewing basic mediation skills, students will participate in classroom exercises designed to develop their ability to think critically about issues, as well as apply mediation strategies to dispute resolution scenarios. This is an Experiential Learning course.

LAW 617 Policy Practicum: Issues in Childlaw (1-3 Credit Hours)
Instructor Permission Required

LAW 620 Civitas ChildLaw Clinic (1-4 Credit Hours)
The Civitas ChildLaw Clinic represents children in a variety of settings including child protection (abuse and neglect), family separation (custody and visitation), education, and other kinds of cases involving children and youth. Students typically work on at least two cases during the course of a semester, under the supervision of at least one member of the Clinic faculty. The Clinic also includes a weekly seminar that addresses relevant substantive law, advocacy skills, and ethical issues in the representation of children. Students will learn about the law governing their areas of practice and gain experience with a range of lawyering skills, including client interviewing and counseling, case planning, and written and oral advocacy. While the subject matter of the Clinic's cases focuses on children's issues, students should expect to develop skills transferrable to any practice setting. The course is open to all students eligible for a student practice license under Illinois Supreme Court Rule 711, and no prior experience in working with children is required. Instructor permission is required for enrollment, and the application for the course can be found here: https://www.luc.edu/media/lucedu/law/experiental/pdfs/childlaw-clinicapplication_fillable.pdf. Professor Bruce Boyer (bboyer@luc.edu) serves as the Clinic Director, and Professor Stacey Platt (splatt@luc.edu) serves as Associate Director. Students receive four credits for their first semester enrolled in the course; students repeating the Clinic for a second semester receive three credits, with other credit options available with permission of the instructor. This is a Skills and Live Client Experience course.

LAW 622 Operationalizing Treaties (2 Credit Hours)
Operationalizing Treaties probes the relationship between multilateral treaty implementation and economic, social, and institutional development at the domestic level. Particular attention will be devoted to treaties involving arms control, the environment, human rights, labor, and transnational crime for which economic considerations offer limited motivation for state compliance. A central theme of the course is the relation of treaty operationalization to national development.

LAW 625 Mediation Workshop (1 Credit Hour)
Mediation is an alternative to litigation which enables disputing parties to negotiate their own agreed settlement. It involves an impartial third party neutral, the mediator, who assists disputing parties in this alternative dispute resolution (ADR) process. This course will offer an overview of mediation techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of ADR processes, how mediation styles and models differ from one another, and how the role of the attorney-advocate changes during mediation. This course will be conducted in an intensive workshop format over the course of one weekend where students will role play as client and attorney. No textbook is required, nor is there a first assignment. This is a Skills and Experiential Learning course.

LAW 631 ChildLaw Graduate Extern (1-3 Credit Hours)
Students seeking credit for successful completion of an experiential learning opportunity (externship) may register for up to 3 credits. Students are responsible for securing an externship placement that focuses on issues impacting children and families. Prior to accepting the placement, a student must receive prior approval from the Academic Director of Child and Family Law Programs. Students must commit to work 60 hours per credit at the approved internship site. At the end of the externship, students must submit a short paper describing the nature of the work performed and how the externship experience advanced their understanding of child and family law.

LAW 641 Childlaw Directed Study (1-3 Credit Hours)
Students have the option of working individually on a research project with a faculty member on a credit/no credit basis. An interested student must first identify a faculty member willing to supervise the project and submit an abstract of proposed work to the faculty member. The project must relate to issues of child and/or family law. If the faculty member agrees to supervise the project for the requested credit hours, he or she will work with the student to develop a supervision schedule to ensure successful completion of the project.

LAW 643 Children's Legal Rights Executive Journal Editor (1-3 Credit Hours)
The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 644 Chldrn Leg Rights Jrnl Assoc Editors (1-3 Credit Hours)
The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 645 Children's Legal Rights Journal Senior Editors (1-2 Credit Hours)
The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 651 LL.M. Childlaw Thesis (3 Credit Hours)
Students enrolled in the Child and Family Law LLM degree program must enroll in this course in order to graduate. Working with a thesis supervisor, students have the option of completing a research paper of publishable quality. Students and their supervisor work together to agree on a topic and supervision schedule. LLM students must complete all required elective credits before enrolling.
Outcomes:
Develop focused, original research topic in partnership with the thesis supervisor that aligns with academic interests and scholarly standards, demonstrating potential for academic contribution and publication; Create a comprehensive research plan in collaboration with the thesis supervisor, outlining clear research questions, methodologies, and a timeline that supports the completion of a publishable paper; Execute independent research through the selection of appropriate methodologies, critical analysis of existing literature, and data gathering to address defined research questions; Apply critical thinking to the work, with integration of supervisor feedback to refine and strengthen the research findings, methodology, and overall structure, enhancing the clarity and depth of the paper

LAW 652 LL.M. Paper Completion-Childlaw (1 Credit Hour)
Students who are unable to complete their thesis in the LLM ChildLaw Paper course in a timely manner must enroll in this course. Depending on the status of research and writing completed during the LLM ChildLaw Paper course, the faculty supervisor will, in consultation with the student, agree on the required number of credits needed for successful completion of the course requirement.

LAW 654 Current Issues in Children's Law Seminar (2 Credit Hours)
This interdisciplinary seminar is designed to give students an opportunity to engage in an in-depth exploration of current and emerging issues in children's law. The seminar will focus on the legal implications of current child welfare policy and practice, ongoing efforts at child welfare and juvenile justice reform through state and federal initiatives, the use of empirical research in guiding child welfare and juvenile justice initiatives, and long term implications for families and children. Specific topics include, among others, an introduction to the concept of therapeutic jurisprudence, advocacy for children in the child welfare and juvenile justice systems, the role of race and class in permanency planning for children, the legal and ethical implications of privatized child welfare services, and ancillary domestic relations issues that often arise within child welfare.

LAW 663 Children's Summer Institute (3 Credit Hours)
The focus of this year's class is on the safety nets in place - and needed - to support children and families and prevent entry into our child welfare and juvenile justice systems. Over the course of the week, students from different graduate programs will engage in an interdisciplinary exploration of a series of complex questions involving children's best interests, and the policy and practice considerations and challenges impacting government decision making when it comes to reimagining our current structures. Instructor Permission Required

LAW 665 Introduction to the Study of Law and Legal Systems (2 Credit Hours)
This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then lean to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses child and family law cases and problems and provides students with the background they will need for future children's law and policy studies. MJ students should take Law 665 in conjunction with Law 667 in their first term.

LAW 667 Introduction to Children's Law, Policy and Practice (2 Credit Hours)

Co-requisites: MJ students should take LAW 667 in conjunction with LAW 665

This required course is designed to give students an introductory overview of the law as it affects children. It begins with a discussion of the constitutional relationship among children, parents and the state, as well as the respective roles of the federal and state governments in the regulation of children and families. The course then introduces students to the principal areas of civil and criminal law that affect children and families. With this baseline of understanding, students can choose elective courses that provide a more in-depth study of a particular topic (e.g. education law, child welfare, etc.).

Outcomes:

Create a community of learners and leverage shared experiences in an online forum; Understand the difference between rights granted to adults compared to children; Apply leading US Supreme Court cases affecting children's law through discussions and course writing assignments; Remember Juvenile Court's jurisdiction over: 1) abused/neglected/dependent youth, 2) delinquent children, and 3) children who commit status offenses; Evaluate general facets of educational law including students' rights, schools' rights, and private education; Analyze general facets of mental health law including voluntary and involuntary treatment or institutionalization of minors; Understand general facets of family law including marriage, divorce, child support, and "best interest" custody determinations; Evaluate general facets of children's international law and international treaties affecting children, including the United Nations Convention on the Rights of the Child; Remember ethical and liability issues in practice including areas such as confidentiality, record-keeping, responses to a subpoena, and testifying as an expert; Create ways to be a trauma-informed advocate and understand expectations in the courtroom when testifying as an expert witness or lay person

LAW 668 Leadership Development (4 Credit Hours)

Pre-requisites: For Child Law MJ students: LAW 665 and LAW 667

One of the distinguishing features of the Online MJ in Children's Law and Policy is its focus on the development of leadership skills for child advocates across a range of disciplines and organizations. This required cornerstone course begins with an introduction to different types and styles of leadership before turning to a more practice-based preparation for leadership in such areas as operations, human resources, finance, and communications.

Outcomes:

Define "management" and "leadership" and discriminate between them; Observe and grasp the bigger picture of the global trends and leadership challenges that call for servant leadership in today's world-especially concerning child and family welfare; Define and provide examples of the basic concept of "servant leadership"; Understand what motivates people and discern what motivates them as individuals; Be familiar with the history of organization development and dynamics and where the field of organization behavior is in today's environment; Understand why people resist change and the barriers to making it happen for people and systems; Apprehend how adults learn and how this is relevant to leadership, to "unlocking the human equation" and to aligning others to transformational change; Define the concept and role of "culture" in organizations and systems and understand the leader's role in shaping the values and ethos of an organization or group; Learn their own personality "type" and understand how personality affects behavior in the workplace; Demonstrate commitment to treating differences in the workplace such as generational gender, ethnic, religious, sexual preference, class, country of origin, educational background, etc, with sensitivity and mindfulness; Be exposed to the disciplinary approaches and tools of "organization development" as a tool for strategic leadership and change; Master the "leaders' tool chest"-a variety of tools, templates and models that leaders use to diagnose leverage points in organizations, engage in problem finding and definition and then utilize a strategic blueprint to manifest change; Can name the most popular organizational large scale approaches to lead change in organizations and systems; Know what strategic thinking is and how the ability to take a strategic viewpoint translates into change initiatives; Demonstrate outcomes oriented strategic thinking by drafting SMART goals-specific, measurable, achievable, realistic and timely; Name a variety of leadership models, including situational leadership, servant leadership, authentic leadership, transactional vs transformational, 5th level leadership, leading with soul and leadership as jazz; Develop and articulate the key elements of their own unique leadership brand or "identity", building from the models studied and reflecting on their own mission and leadership "journey"; Reflect on their own life story, career lifeline and values to create a vision and mission statement for their own leadership agenda; Define the elements of two way communication and how to listen actively as well as conduct "fierce or powerful conversations"; Knows the value using story to align others to their vision-can demonstrate how telling a powerful story can be a valuable tool for persuasion for leaders; Complete several self assessments and determine how self-awareness is a vital part of the EQ and CQ-and essential to being a successful servant leader; Articulate a leadership "mantra" and life's mission statement; Understand the concept of creating a learning organization and know a variety of ways to develop the talents and human potential in staff, colleagues and themselves (aka demonstrate a commitment to lifelong development and learning); Demonstrate the ability to find and define a problem or challenge in their own field or discipline and create a compelling proposal for a project, innovation or initiative that creates change or improves the welfare of the target group of children and or families; Demonstrate curiosity about cutting edge thinking in leadership-such as "anti-fragility" training, neuro-science brain research, how AI will impact the workplace, leadership as jazz, Positivist Psychology and Appreciative Inquiry, etc; Envision how they will apply the insights from this course to their own leadership agenda and utilize their insights about change both personally and professionally

LAW 669 Education Law and Policy (3 Credit Hours)
Pre-requisites: LAW 665, 667 & 668
This course explores some of the challenging legal and practical issues confronting education in America, including the uncertain boundaries between public and private education, the constitutional and statutory rights of students, including equal access and treatment, the increasingly fluid constitutional and statutory rights of teachers, and the structure of educational governance, including the role of the federal government, local control, school board powers and even strategic planning.

LAW 670 Child Welfare Law and Policy (2-3 Credit Hours)
Pre-requisites: Law 665, 667 and 668
This course focuses on federal and state legal and policy efforts to protect children from abuse, neglect and other forms of maltreatment. Topics include mandatory reporting laws, liability issues, the general structure and content of child protection laws, including permanency planning termination of parental rights. Students will explore the concept of the best interest of the child in a legal context and review laws and research aimed at promoting children's welfare.

LAW 671 Juvenile Justice Law and Policy (2-3 Credit Hours)
This course explores the law, policies and practices of the American juvenile justice system, past, present and future. The focus is on children who are in conflict with the law and those who, by virtue of their status as children, are subject to the jurisdiction of the juvenile court for engaging in conduct such as curfew violations, running away, and other forms of potentially harmful adolescent behavior. Among other issues, the course will examine how juvenile justice law and policy has been shaped by new research on adolescent development, including brain research.

LAW 672 Family Law and Policy (3 Credit Hours)
The focus of the course is on the rapidly changing legal, social, and scientific landscape of family law. The course covers traditional areas such as marriage formation and dissolution, support, child custody and the role of the child's attorney, as well as emerging areas such as same-sex marriage, collaborative law, and defacto and equitable parenthood.

LAW 673 Mental Health Law and Children (2 Credit Hours)
Pre-requisites: LAW 665, LAW 667 and LAW 668
Mental health and substance abuse impacts everyone. According to the National Institute of Mental Health, in a given year approximately one quarter of adults in the United States are diagnosable for one or more mental illnesses. Additionally, one out of five children, either currently or at some point during their life, are diagnosed with a mental illness. Mental illness has a profound impact on children and families, including the legal response to these issues. Students will study the cases, statutes, and legal doctrines relating to the rights and inpatient/outpatient treatment of persons with mental illness or a developmental disability, with a special emphasis on children, youth, and parents and/or legal guardians. Topics covered include: informed consent to outpatient and inpatient treatment, admission/transfer/discharge, confidentiality of mental health records, litigation issues addressed by practitioners, and risk management strategies for mental health practitioners. This course will use cases and examples to compare and contrast application of the law and policies.

LAW 674 Law, Poverty and Public Benefits (2 Credit Hours)
According to the National Center for Children in Poverty, children are disproportionately impacted by poverty, especially children of color and immigrant children. These risks are greatest for children who experience poverty when they are young and/or experience deep and persistent poverty. This course concerns those areas of civil law which most affect low income children and families, including public benefits such as welfare, housing, education, and health care. Other systemic issues will be explored, such as wealth discrimination, use of legal remedies to promote social change, and the delivery of legal and other services to children.

LAW 675 Legislation and Law Reform (2 Credit Hours)
This course introduces students generally to the legislative process and more specifically to federal and state laws and policies that affect children and families. Students will have an opportunity to draft model legislation, critique existing or proposed legislation, and learn techniques for educating lawmakers and policies makers about children's needs and the importance of research and data in formulating child-centered and effective laws an policies.

LAW 676 Conflict Resolution in Child and Family Law (2 Credit Hours)
One of the newest trends in children's law is the effort to find ways to resolve disputes without resort to the adversary system. Examples include restorative justice initiatives in schools and the juvenile justice systems, collaborative decision-making in family law, and mediation in the health care and child protection contexts. in this course students learn about the various types of alternative dispute resolution (ADR) (e.g., mediation, negotiation, collaborative dissolution) through a series of case examples and practical exercises.

LAW 677 ChildLaw Thesis/Capstone (4 Credit Hours)
Pre-requisites: Law 665, 667, 668, and required elective credits
Students are expected to complete either a thesis or capstone project of substantial depth that explores a specific area of children's law and policy and that integrates subject matter and/or leadership skills learned in the M.J. curriculum. The project is completed in close cooperation with a faculty advisor. Students are required to present their thesis or capstone project to faculty and fellow students during their graduation (Educational Immersion) weekend.

LAW 678 International Children's Rights (2-3 Credit Hours)
Pre-requisites: LAW 665, LAW 667, and LAW 688
This 3-credit elective course serves as an introduction to international children's rights. It provides an overview of international human rights principles and procedures affecting children, with special emphasis on the UN Convention on the Rights of the Child. With this baseline understanding, you will explore thematic topics affecting children, including issues such as corporal punishment, child marriage, child labor, international adoption and abduction, discrimination, child soldiers, environmental challenges and child participation. Issues of equity, leadership and advocacy are identified and discussed throughout the course. As you proceed through the material, you are asked to remember and reflect on the fact that the world's most vulnerable children, those who most need the protection of international human rights law, are poor children of color. Please hold that thought near to you as you examine the range of issues that children experience around the globe and the potential for international human rights to respond to those issues.
Outcomes:
Identify human rights that all children should enjoy; Articulate the nature and scope of challenges children face around the world; Assess ways in which globalization has impacted children and families positively and negatively

LAW 679 Children's Health Law and Policy (2 Credit Hours)
Pre-requisites: LAW 665, LAW 667 & LAW 668
The purpose of this course is to teach interested students the application of law to critical public health issues that affect children and youth. Students will first learn basic principles of public health including the distinction between health promotion, disease prevention, and health protection. Next, the course will address the constitutional and statutory foundation of public health law, how legislative and regulatory decisions must negotiate the balance between individual rights and public good, and how the principles of parents patriae and state police powers affect child health. Cases studies in the areas of obesity, reproductive health rights of minors, mandatory school immunizations, student drug testing, and violence prevention will illustrate the application of public health jurisprudence from the national to the state levels.

LAW 680 ChildLaw MJ Independent Study (1-4 Credit Hours)
Pre-requisites: LAW 665, LAW 667, LAW 668 Research paper/project to be approved by a Child Law faculty member and Director before enrolling
The student will be engaged in research and in initiating the development of a curriculum targeted to a teen audience that educates teens about local and federal laws that have an impact on their lives as adolescents, including juvenile justice issues, mental health laws, custody issues, drinking and driving. The student has been working with adolescents on psychological issues as part of her field placement for the Masters of Social Work degree. This course will allow her to broaden that focus to include legal considerations that play an important role in helping teens who will soon be emancipated and facing lives as adults. The first part of the course will require the student to identify the specific issues and laws that will be included in the curriculum and to explore resources, both in law journals and in interviews with teaching faculty, that will inform her presentation of the issues. The second part of the course will be devoted to developing the format for the curriculum that will be most effective in reaching this media savvy audience. The format will be informed by the student's knowledge from the field of social work of the psychological development of adolescents and their needs, supported by current research. The goal of the course is to begin a project which will be fully completed at the end of the thesis capstone course in the Master's in Jurisprudence Degree.

LAW 682 Education Immersion Weekend Seminar (0-2 Credit Hours)
In addition to the required curriculum, students are required to travel to Loyola's Chicago campus at least once during their tenure in the program for an Education Immersion Weekend (EIW). During the weekend, students gather in person to workshop or present their thesis/capstone project, attend experiential learning workshops, and meet with faculty, students and alumni.

LAW 683 Legal Issues in School Discipline (2 Credit Hours)
The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about `zero tolerance' policies, the role that school discipline plays in the `school-to-prison pipeline' and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include disciplinary-related challenges that arise in the context of protecting vulnerable children, including issues of harassment and bullying of LGBT students and students with disabilities, and the legal tenets governing school districts' responses to cyberbullying and the rise of social networks and digital media. Emerging trends in alternatives to punitive school discipline practices, such as human rights approaches, positive behavior interventions and supports, and restorative justice, will be examined.
Course equivalencies: X-CIEP 620/LAW 683

LAW 684 System Consultation in School Discipline Reform (2 Credit Hours)
The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and technical assistance and rooted beliefs and biases).
Course equivalencies: LAW 684 / CIEP 535

LAW 685 Restorative Justice (2 Credit Hours)
This course begins with an intensive in-person weekend retreat where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the retreat and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, and systems and structures to accommodate restorative practice within school life. Through additional seminars, students will strengthen their knowledge of the history, theory, research, and practice of restorative justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.

LAW 687 Introduction to Legislative and Policy Advocacy (3 Credit Hours)
The purpose of this course is to provide tools and strategies for students interested in learning the techniques for effective advocacy at the state and federal levels. The first portion of the course will provide historical context on the three branches of governments' ability to make policy. The course will then examine the processes that turn a problem into a legislative solution, including how to move a bill into law. The These tools include identifying an issue, conducting national surveys, building a base through community organizing, drafting, lobbying, and offering testimony in committee. A recurring theme in the course is the need to examine external obstacles that impact policy making. Students will also learn how to conduct racial equity impact assessments and how the absence of this work has impacted policy decisions in the United States in the past.

LAW 689 Family Law (3 Credit Hours)
This 3-credit elective course in family law specifically designed for post J.D. students provides an overview of the laws and court decisions in the United States that have shaped family life and the institutions of marriage and parenthood, with a special emphasis on the role of the legal system as it affects children's rights and welfare within these institutions. With a base line understanding of the general principles of constitutional law in family law cases, students then turn to an exploration of thematic topics, including evolving standards for child custody and the factors in custody decisions, including race, religion and domestic violence and the formation of multiple- parent families and child custody. We also explore corporal punishment and other parental decisions of child rearing, including emerging issues of children's privacy in the age of social media and the increasing recognition in family law of children's rights to be heard in decisions affecting their welfare.

LAW 690 Financial Aspects of Divorce (3 Credit Hours)
The Financial Aspects of Divorce is a 3 credit course designed for students practicing in the area of family law that will cover what a practitioner needs to know from both theoretical and pragmatic perspectives. The course will explore the historical background of divorce law and the jurisdictional limitations on resolving financial issues in divorce litigation. We will study the establishment, modification and enforcement of child support and spousal maintenance obligations. We will examine numerous aspects of property distribution, including determining the marital or nonmarital character of property, equitable distribution of marital property, valuation and treatment of specific types of property such as real estate, retirement accounts and business interests, and dissipation of marital assets. The course will also include discussions of financial discovery and awards of attorneys fees in divorce litigation.

LAW 691 Domestic Violence: Theories, Policies and Societal Impact (2-3 Credit Hours)
Domestic Violence (Theory, Polices and Societal Impact) will provide students with an understanding of the evolution of domestic violence theory; an overview of what acts constitute domestic violence; myths surrounding the causes of domestic violence; common misconceptions regarding the types of people who abuse and are abused; the various state and federal laws that affect domestic violence arrests, police liability, prosecution, and services; and the impact of domestic violence in family law, child welfare, and immigration proceedings. Through weekly modules incorporating readings, lectures, videos and supplemental materials, students will become familiar with the many components (social and legal) of this complex subject.

LAW 692 Special Education Law and Advocacy (2 Credit Hours)
This online course will deal in depth with current and timely issues in the education of children with disabilities. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and provision of services in the least restrictive environment. The education of special needs children from early childhood through post-secondary transition will be addressed. The course will focus on advocacy, statutory and regulatory compliance, and dispute resolution. Students will form teams assuming the roles of parent/student advocate, school administrators, and school service providers in a variety of simulated activities throughout the semester, including: participation in eligibility and IEP conferences; disciplinary manifestation determination reviews; resolution sessions, mediation, and pre-hearing due process procedures; and determining Section 504 eligibility and developing and implementing a Section 504 service plan.

LAW 703 Informed Consent Law and Patient Rights (3 Credit Hours)
This introduces students to the legal, ethical, and practical issues related to physicians' duty to secure patient consent to medical treatment, addressing (1) historical injustices, (2) common law doctrine, (3) current controversies implicating constitutional law, and (4) practical challenges of implementing informed consent for diverse patient populations.
Outcomes:
Describe the historical injustices and unethical medical practices that led to the development of informed consent law in the US; Identify the elements of a cause of action for breach of informed consent and critically evaluate whether these elements adequately protect patients' rights; Demonstrate the interplay between the common law of informed consent and constitutional principles of equal protection, substantive due process, and free speech; Reflect on complex challenges relating to informed consent and patient rights in the context of end-of-life, reproductive, sexual, and mental health care; Propose changes to the law and practice of informed consent that would more effectively meet the needs of vulnerable patients, particularly patients with low health literacy

LAW 710 Health Law: Patients and Populations (3 Credit Hours)
This course provides a broad survey of the most fundamental legal issues surrounding the delivery of health care in America. No prior knowledge of health law is required. Major topics include state and federal regulation of health care providers and institutions; tort liability in the context of medical care; patient and provider rights and obligations; public and private insurance systems; and basic issues in bioethics and public health. By the end of this course, students should understand both the current state of American health law, and the social forces that have shaped its historical development.

LAW 711 Corporate Transactions in Health Law (2-3 Credit Hours)
This course addresses key corporate and regulatory concepts impacting the delivery of health care. The course focus will be transactional, with students first gaining an understanding of basic corporate law and regulatory principles, and then learning to integrate core federal and state laws into choice and use of corporate structures and operational strategies. The course will examine health care transactions from the perspectives of a hospital, physicians and other providers. It is recommended that students take Health Law: Business & Finance and Business Organizations prior to taking this course.

LAW 712 Legal Writing for Medical Malpractice Trial: The Expert (2 Credit Hours)
Pre-requisites: None, except no 1L
The course is designed to provide second-year students who are interested in health law litigation-or civil litigation and trial work generally-the opportunity to analyze medical expert opinions and challenge them by motion. A medical malpractice trial often becomes a "battle of the experts". If the trial is the battle, then pre-trial motion practice defines the battlefield. Students will research both the Frye standard that applies to challenges in Illinois, and the subsequent Daubert standard that applies to challenges in federal court and most state courts. Students will be provided with a closed "record" that includes a complaint, answer, selected written discovery, excerpts from depositions of treating physicians, and a full deposition of the expert to be challenged. The exact facts and opinions will need to be developed over the spring and summer but could include a dispute based on the preferred approach for a surgical procedure, the process for extracting and freezing eggs for fertility treatment, best practices for preventing falls in a nursing faculty, the use of homeopathic medicine, or off-label use of prescription medicine. The course will be mindful that most (if not all) second-year students have not taken Evidence but will include some discussion of motions to exclude expert opinions in the context of pre-trial motions in limine and pre-trial preparation. The course will culminate in a final motion to exclude using the Daubert standard and a mock hearing of that motion. Learning objectives include understanding how trial judges use Frye or Daubert to review proposed expert opinions to determine if sufficiently reliable, analyzing expert opinions and testimony, preparing oral arguments against opposing expert testimony, writing persuasively about medical opinions using case law, medical literature, evidentiary standards and policy, and gaining practical experience about the type of writing that trial lawyers do before trial. Learning objectives include understanding how trial judges use Frye or Daubert to review proposed expert opinions to determine if sufficiently reliable, analyzing expert opinions and testimony, preparing oral arguments against opposing expert testimony, writing persuasively about medical opinions using case law, medical literature, evidentiary standards, and policy, and gaining practical experience about the type of writing that trial lawyers do before trial.

LAW 713 Health Law Directed Study (1-3 Credit Hours)
Pre-requisites: none
Open to: LLM, MJ, SJD, and DLaw students. LLM, MJ, SJD, and DLaw students may earn credit for participation in a targeted research tutorial. The scope and subject are chosen with the guidance of a faculty member who directs the students. (JD students can research in the health law field, but must register for the JD Directed Study.) This is a Non-Graded Course.

LAW 714 Health Law Graduate Externship (1-3 Credit Hours)
Open to: LLM students enrolled in campus courses. Students enrolled in the LLM in Health Law degree program may earn externship credit for working at an approved health law externship site. This program is designed to offer students practical experience to further develop lawyering skills and health law expertise. Students may receive up to three credits. This is a Non-Graded course.

LAW 715 Bioethics, Law & Policy (2-3 Credit Hours)
This course provides an overview of American law as it relates to emerging ethical issues in medicine and health care. It is intended to give students an appreciation of the ways in which medical practice and decision-making are guided by modern American principles of constitutional, tort, administrative, and criminal law. Students will learn how the law's regulatory powers have been used to set boundaries in medicine, and, in turn, how theories of medical ethics and practice have informed modern legal developments. Topics covered vary from year to year, but may include issues in end-of-life care, research ethics, reproductive autonomy, distributive justice, and genetic technology. This course counts as a Perspective Elective course.

LAW 717 Mental Health Law (2 Credit Hours)
This course introduces students to the cases, statutes, and legal doctrines relating to the rights, treatment, and commitment of persons with mental illness, developmental disabilities, or intellectual disabilities. Topics covered include: confidentiality of mental health records, forms of surrogate decision-makers (i.e. guardianship, powers of attorney), mental health treatment for minors, right to refuse treatment, special education, and the Americans with Disabilities Act (ADA). Students will discuss real-life cases and examples to compare and contract application of the law and policies.

LAW 718 Food and Drug Law (3 Credit Hours)
This course provides an overview of the regulation of a variety of health care and medical products overseen by the Food & Drug Administration, including foods, dietary supplements, pharmaceuticals, medical devices, and tobacco products. The course will explore topics regarding premarket research and development, clinical trials, review and approval, and post-marketing monitoring and reporting. Legal concepts of agency rulemaking, products liability, commercial free speech, human subjects research, state regulation and preemption, civil and criminal remedies, and enforcement mechanisms will also be explored. A science background is not required for this course.

LAW 720 Health Care Payment and Policy (2 Credit Hours)
Health Care Payment and Policy is a course which focuses on the roles of payers, purchasers, providers and consumers in the shifting arena of health care coverage. Throughout the course, we will consider the Affordable Care Act and the regulations implemented over the past decade to implement that law and set in motion the health care industry's move to value-based care. The first part of the course will explore the development of health insurance, the growth of managed care models and the role of employers in shaping health benefits. The second portion of the course will explore the evolution of Medicare and Medicaid. The final portion of the course will consider the ongoing transition to value-based care payment and delivery models. This will include an evaluation of new payment models such as Accountable Care Organizations and Patient Centered Medical Homes. Students will also examine value-based strategies that drive better quality outcomes, enhance patient experiences and lower health care costs, including those needed to improve health and wellness of individuals and address the social determinants of health across communities.

LAW 722 Health Care Innovation & Regulatory Compliance (1 Credit Hour)
The health care sector features rapid changes in technology, business models, patient needs, and payor requirements. Innovation can create potential risk under legal frameworks that were not designed with a modern health system in mind. While it is important to identify these legal risks, clients often want lawyers to go a step further to design legally-compliant solutions to facilitate innovation. This course will help students learn practical skills to evaluate and manage legal risk for novel or developing health care concepts. These skills may include: evaluating exposure under anti-fraud laws like the Anti-Kickback Statue to scenarios where no safe harbor applies, understanding implications of different uses or transfers of Personal Health Information, understanding the role of coverage policies (Medicare, Medicaid, commercial), and evaluating FDA guidance concerning Software as a Medical Device. For example, students may be asked to write an Advisory Opinion request or other request for guidance from an applicable Federal or State agency regarding an innovative model, or a draft policy memo identifying applicable legal risks and potential.

LAW 726 Health Law Competition Team (1 Credit Hour)
This course is to be taken by students selected to compete on Loyola's health law competition teams. A JD student representing Loyola at either the L. Edward Bryant, Jr. National Health Law Competition OR at the Maryland Health Law Regulatory & Compliance Competition may register for one ungraded credit. This course will count for skills credit.

LAW 727 Annals of Health Law Executive Editors (1-3 Credit Hours)
Pre-requisites: none
Open to: JD students by permission only. Annals of Health Law Executive Editors are solely responsible for the management of the entire process of publication of the Annals, including selecting the staff, communicating with authors, and performing final edits on all articles before publication. Additionally, Executive Editors oversee the planning of the annual symposium, maintain the website, and work on other special projects. These selected positions require immense dedication and responsibility. Executive Editors must possess superior legal knowledge and editing/ writing skills. Additionally, the abilities to manage, delegate and supervise others are essential. This is a Non-Graded course.

LAW 729 Health Care Litigation and Medical Malpractice (2 Credit Hours)
This course will cover key areas of health care litigation. Students will explore the substantive and procedural law of medical negligence litigation and learn about pretrial matters such as drafting pleadings, motions and deposing experts. Students will have the opportunity to develop trial techniques including preparing direct and cross examinations. They will also be able to participate in a medical negligence mock trial. Additional topics will include compliance and internal investigations, licensing procedures, technology litigation, managed care litigation, and ERISA preemption. This is a Skills course.

LAW 730 Health Justice Practicum (3 Credit Hours)
Students will address the health harming legal needs of vulnerable low-income families and individuals by conducting holistic client intake interviews with patients referred to Legal Aid Chicago's medical-legal partnership projects. Students will engage in issue spotting, legal research, identifying appropriate resources, and drafting intake memos and advice and referral letters to clients. Students may also participate in pro se outreach at health clinics, providing direct support to patients preparing pro se legal documents. Students may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own intakes, collaborate with health partners, and be responsive to supervising attorneys. The Health Justice Practicum is geared towards weekend students and consists of a bi-weekly four-hour seminar, remote weekly intakes and research on cases, and remote supervision with an adjunct instructor from Legal Aid Chicago. Students should expect to spend 4 hours weekly on intake activities and 3 hours per week on readings and assignments. The Health Justice Practicum is open to 2L, 3L and 4L students.
Outcomes:
Develop and improve fundamental lawyering skills including issue spotting, case analysis, investigation, and legal research and writing

LAW 733 Annals of Hlth Law Senior Editors (1-2 Credit Hours)
Pre-requisites: none
Open to: JD students by permission only. Annals of Health Law Senior Editors prepare each article for publication. They generally supervise the editing work of Annals members. They manage and oversee the cite-checking process. This is a Non-Graded course.

LAW 734 Annals of Health Law Members (1 Credit Hour)
Pre-requisites: none
Open to: JD students by permission only. The members of the Annals of Health Law are responsible for editing and cite-checking article submissions, including providing substantive recommendations. They generally assist the Senior Members with the preparation of articles for publication. Members must be organized, detail-oriented, and dedicated to their role in the Annals publication process. They must possess superior cite-checking and editing skills. Additionally, each member must write an article of publishable quality for Advance Directive, the Annals online counterpart. This is a Non-Graded course.

LAW 739 Health Information Privacy and Technology (1-2 Credit Hours)
This course covers the Health Insurance Portability and Accountability Act and the statutory and regulatory framework for the privacy and security of health information. Students will learn about the historical basis of privacy and global comparisons. Topics will include data privacy, security, oversight, and breaches of protected health information.

LAW 741 Health Law: Business and Finance (3 Credit Hours)
In a survey format, this course will introduce tenets of healthcare business, and how operations and business status introduce potential legal issues. In order to explore these issues, we will introduce the variety and types of healthcare businesses and organizations and their attendant financial operations, as well as the types of relationships and situations that give rise to potential lawsuits (including fiduciary trust relationships between physicians and patients and insurers and their customers, and the government and its citizens or residents).

LAW 745 Access to Health Care (2-3 Credit Hours)
Access to Health Care is a seven-week course exploring the legal, political, environmental, financial and medical issues surrounding access to health in the United States and internationally, with particular emphasis on people who are experiencing poverty and the uninsured. The course is complemented with a required spring break field study to an impoverished region in the United States or abroad.

LAW 746 Women's Health: Law & Policy (1 Credit Hour)
In this course, students will evaluate the laws and policies that have impacted the heallth of women in the United States. The first part of the course will be an introduction to women's health law and policy. Discussion will focus on the challenges, opportunities, and existing efforts to improve access to health, healthcare, innovation, and research for women including the laws and policies that influence women's health. This course will cover topics including equal pay and the wage gap; clinical research; reproductive health; maternal health; sexual health and menopause, menstruation and period poverty. This will be an interactive, discussion-based, weekend seminar that offers an opportunity to learn from leading women's health experts from across the country.

LAW 748 Public Health Law (3 Credit Hours)
No course description is available

LAW 750 Health Law LLM Thesis Project, Term 2 (2 Credit Hours)
LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the campus LLM program.

LAW 751 LL.M. Paper Supervision (3 Credit Hours)
Open to: LLM students only with permission. LLM students who do not complete the LL.M. Paper within the requisite period of time must register for this class each semester until the paper has been accepted by the advisor. This is a Non-Graded course.

LAW 754 Health Justice Lab (3 Credit Hours)
This interprofessional and experiential course will bring together students from law, public health, and medicine to explore racism and its impact on health.

LAW 755 Health Justice Project (3-4 Credit Hours)
The Health Justice Project is a medical-legal partnership clinic that provides law students with an intensive, challenging education in the fundamentals of legal practice, interdisciplinary collaboration, creative upstream problem solving, poverty law, systemic advocacy, and professionalism. Through collaborative and holistic representation of vulnerable low-income families and individuals, student attorneys will address the social, legal and systemic barriers that prevent long-term health and stability. HJP student attorneys may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own cases in teams of two, maintain client relationships, attend hearings and court appearances, collaborate with interdisciplinary partners, and tend to other client matters throughout the semester. Students must be available to participate in a mandatory orientation prior to the start of the semester. LAW 755-022 Student attorneys will address the health harming legal needs of vulnerable low-income families and individuals by conducting holistic client intake interviews with patients referred by HJPs health partners, issue spotting, engaging in legal research, identifying appropriate resources, and drafting intake memos and advice and referral letters to clients. Students may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own intakes, collaborate with HJP partners, and be responsive to supervising attorneys.

LAW 757 Advanced Health Justice Project (2-4 Credit Hours)
Students who have successfully completed the Health Justice Project clinic may enroll in the Advanced Health Justice Project, in which they will continue to represent clients and complete projects to improve the health and well-being of vulnerable low income families and individuals in Chicago through holistic, collaborative, and systemic advocacy. Faculty permission required.

LAW 760 Disability Law (2 Credit Hours)
This class focuses on the large issues of doctrine, theory, and policy that disabled persons and disability rights law raise in employment, government services, public accommodations, health care, housing, and education. We will address key theoretical and policy questions, as well as remedies under the Americans with Disabilities Act (As Amended), the Rehabilitation Act, and the Individuals with Disabilities Education Act, in light of recent Supreme Court decisions, as well as recent judicial and regulatory developments relating to deinstitutionalization. The class will survey the history of the disability rights movement, and trace the development of legal and social thinking about disability and disabled persons, from frameworks of affliction, to charity/medicalization, through civil rights, human variation, and contemporary intersectional and critical disability theories.
Outcomes:
Students will be able to express, orally and in writing, how the development of US law regarding disabled persons reflects evolving understandings of disability; Students will be able to evaluate critically (positively and negatively), orally and in writing, selected major contemporary legal developments affecting the life prospects of disabled persons

LAW 765 Constitutional Issues in Health Law (2 Credit Hours)
The Supreme Court's recent decision upholding the major provisions of the Patient Protection and Affordable Care Act has brought new attention to the intersection between constitutional law and health care. This seminar gives students the opportunity to engage deeply with some of the most compelling constitutional issues of our time, including the use of federal spending powers to expand state Medicaid programs; the health insurance mandate as a regulation of interstate commerce; federalism conflicts in the medicalization of marijuana; medical providers' free speech rights; compelled commercial speech in the tobacco industry; religious objections to controversial medical procedures; cruel and unusual medical treatment of prisoners; as well as substantive due process challenges relating to public health, end of life care, and reproductive autonomy.

LAW 770 Doctoral Dissertation Research I (2 Credit Hours)
Pre-requisites: none
Open to: SJD and DLaw students only. Candidates will be required to rework the doctoral proposal s/he submitted with his/her admission application into a 30-40 page summary paper which shall serve as a roadmap for the first draft of the dissertation. Students must also make a presentation on an aspect of their research to a group of doctoral students and advisors. This is a Non-Graded course.

LAW 772 Doctoral Dissertation Research II (2 Credit Hours)
Pre-requisites: Doctoral Dissertation Research I
Open to: SJD and DLaw students only. Candidates must draft a detailed dissertation outline, have it evaluated by his/her advisor, and incorporate any necessary changes into a final outline. Once the dissertation outline is approved, the first draft of the dissertation should be completed and submitted to the advisor. This is a Non-Graded course.

LAW 773 Doctoral Dissertation Supervision (1 Credit Hour)
Pre-requisites: Doctoral Dissertation Research I and II, Bibliography Tutorial
Open to: SJD and DLaw students only. The dissertation advisor will work with the candidate to form a doctoral committee comprised of the advisor and two outside readers. (In the case of foreign students, one outside reader may be sufficient.) The committee will assist the student by consulting on dissertation substantive issues, reviewing the working draft and approving the final product. Dissertations should represent important contributions to the field, (minimum length 150 pages and double spaced) but specific format and content needs to be clarified between the candidate, the advisor, and the committee. Once clarified, the suggested format must be followed. Once the dissertation has been completed, it must be presented at an open forum to be attended by interested members of the law school community. Students must enroll in this course during both fall and spring semesters of his/her second year. This is a Non-Graded course.

LAW 777 Doctoral Dissertation Supervision and Completion (1 Credit Hour)
Pre-requisites: Doctoral Dissertation Research I and II, Bibliography Tutorial
The dissertation advisor will work with the candidate to form a doctoral committee comprised of the advisor and two outside readers. (In the case of foreign students, one outside reader may be sufficient.) The committee will assist the student by consulting on dissertation substantive issues and reviewing the working draft. Students must enroll in this course during the fall semester of his or her second year. Open to: S.J.D. and D.Law students only

LAW 779 Current Topics in Pandemic Law and Policy (2 Credit Hours)
This course examines the legal and ethical foundations of pandemic and emergency preparedness, intervention, and evaluation in the context of the ongoing SARS-CoV-2/COVID-19 pandemic. Using open-access resources developed by health law experts, students will study the pandemic from multi-doctrinal (e.g., constitutional, criminal, administrative, health, employment, privacy, and civil rights) perspectives.

LAW 793 Administrative Law and Health Care Regulation (2 Credit Hours)
Administrative Law (Law 221) is a pre-requisite.

LAW 797 Risk Management, Patient Safety & Quality (2 Credit Hours)
Students will utilize reading materials, case studies, hospital risk management scenarios and data sets provided in class to apply knowledge to specific RM and patient safety scenarios and to use critical thinking skills to solve problems. Through the readings and case study analysis students will learn to identify legal, ethical, administrative, compliance, risk management and patient safety issues and to reach resolutions for the problems presented, even when a clear legal response may not be available or in the best interests of the patient. We will be learning how to respond to a variety of risk management issues from the perspective of clinicians, lawyers, administrators, managers and patients and appreciate how events are perceived and managed. We will also discuss how these perceptions of key stakeholders are in conflict and how those conflicts can be managed. Finally, students will also learn how principles of risk management have changed since the 1998 IOM Report and how the changes in our current health care system will further challenge both patients and providers. This report called for increased focus on systemic failures and moving away from a culture of blame and shame to a culture of transparency and learning. With the passage of the ACA and not efforts to repeal and replace we will also discuss how risk management, safety and compliance are likely to further change as our health care delivery system evolves.

LAW 798 Health Care Compliance (2 Credit Hours)
This course is designed to expose law students to key legal concepts in the health care corporate compliance and ethics fields, which may be broadly defined as the application of internal corporate initiatives to ensure compliance with applicable federal and state laws and regulations. Health care is a highly regulated industry, and a health care attorney must have a broad understanding of compliance issues. Through readings and class discussion on common health law topics such as the Anti-kickback Statute, the Stark law, the False Claims Act and its whistleblower provisions, students will develop an understanding of the need for and the role of the Compliance Officer in a health care institution. Students also will begin to explore recent movement toward more broadly-based organizational integrity and ethics programs. Underlying course themes will include how to structure an effective compliance program and the role of government enforcement in controlling health care costs. Readings will derive from various sources. There is no required book. Case law, legislation, regulations, government reports and legal articles will be available on Sakai. As in any graduate-level course, thinking about and discussing the issues with an open and creative mind is actively encouraged.

LAW 803 Business Organizations (3 Credit Hours)
This course is taken in the second semester of study and introduces agency law, partnership law, corporate law and the LLC. Principal emphasis is on the law as it applies to the organization and functioning of business entities, including the duties and obligations of managers of such entities. The course focuses on structure and mechanics, capitalization, distribution, organic changes, and duties and liabilities of directors, officers, and controlling shareholders. The federal securities acts are introduced with particular attention to Rule 10b-5. Substantial attention is given to the special problems of the close corporation.
Outcomes:
Evaluate the rationale behind businesspersons' choice of a particular business entity in a given business context; Assess the relative merits of general partnerships, corporations, limited liability companies, and limited partnerships as business entities; Analyze shareholder rights and directors' and officers' powers and duties; Examine the relationships between principals and agents; Describe various filing policies and processes for business entities at secretary of states' offices; Explore key facets of federal securities regulation

LAW 806 Introduction to Business Law Clinic for International LLM Students (1-2 Credit Hours)
This course is designed to introduce international students to clinical work with for profit and not for profit businesses in the Chicagoland area, developing their counseling and drafting skills.

LAW 808 Governance, Ethics, & Compliance (3 Credit Hours)
This course emphasizes the importance of legal compliance and ethics to the mission of the corporation and the business entrepreneur. Students will write a paper undertaking a legal case study of losses sustained by actual business (in reputation or otherwise) from acting in an unethical or illegal manner. The role of the corporation and the business leader in society is examined.
Outcomes:
Understand the importance of legal compliance and ethical practices in ensuring the long-term success of corporations and business entrepreneurs; Analyze the impact of unethical and illegal business practices by examining real-world case studies of businesses that sustained losses in reputation, financial stability, or legal standing; Evaluate the role of business leaders in promoting ethical decision-making and legal compliance within their organizations and in society; Develop critical thinking skills by researching and writing a paper on a legal case study, highlighting the consequences of ethical and legal failures in business; Apply legal and ethical frameworks to assess the social responsibility of corporations, emphasizing the interconnectedness of business practices and societal well-being; Enhance communication skills through written analysis, demonstrating the ability to clearly present and support arguments regarding legal and ethical issues in business

LAW 812 Financial Institution Regulation (2 Credit Hours)
The course has two objectives. First, it will examine and analyze the current bank regulatory system. Consideration will be given to the function and regulation of depository institutions, as well as, that of various classes of affiliated entities such as those involved in the issuance of securities, insurance and merchant banking. Second, the course will examine the mechanics of key bank operations including, syndicated lending, underwriting and the securitization of debt securities.

LAW 814 Business Law Graduate Externship (1-3 Credit Hours)
Open to: LLM students enrolled in campus courses. Students enrolled in the LLM in Business Law degree program may earn externship credit for working at an approved business law externship site. This program is designed to offer students practical experience to further develop lawyering skills and business law expertise. Students may receive up to three credits.

LAW 816 Racial Justice Seminar Series (3 Credit Hours)
This course exposes students to seven unique and emerging racial justice in health care or compliance. Each emerging issue is selected based on its likely impact on the industry and its timeliness, given current political, business or health care challenges. This course is structured over 13 weeks, in which we alternate between reading weeks, where students are given reading material to introduce them to each issue, and synchronous classroom lectures by national experts on each subject. At the end of the course, each student is asked to write a reflective paper on one of the issues presented and describe the impact that they believe it will have on their practice.

LAW 817 Compliance and Securities Regulation (3 Credit Hours)
This course will focus on the basic principles of the Securities Act of 1933, which sets forth the requirements for registration of all securities sales unless an exemption is available. The course will cover the concept of what is a security, the registration requirements of Section 5 of the '33 Act, the exemptions from registration, particularly the intrastate offering exemption (Section 3 (a)(11) and Rule 147); Section 4(1) and 4(2) (and Regulation D) regarding private offerings; Rule 144A "big boy" transactions and certain other exemptions; the timing and rules for preparation of registration statements and prospectuses under Section 5; key aspects of Regulation S-X; the consequences of the failure to register (Sections 11, 12, 13 and 17); jurisdiction; and other similar topics.

LAW 819 Diversity, Inclusion, and the Law (2 Credit Hours)
This course will cover skills used in cultural competency and diversity, equity, and inclusion (DEI) positions in an organization. Students will learn about organizational context and structure, leadership and communication styles, and sources of workplace disputes. Students will also learn about conflict prevention strategies.

LAW 820 Compliance and Culture (2-3 Credit Hours)
The course will study the best practices in the compliance industry and lessons learned from corporate scandals. The faculty will share examples how to deal with "compliance issues" across multiple industries. The course will be organized as a series of hypotheticals presented to the students who will work through issue spotting regulatory and compliance concerns, developing an audit plan for the issues, protocols, identifying needed policies and procedures, and establishing corrective actions for remediation.
Outcomes:
Understanding of the Federal Sentencing Guidelines and their application to the development of appropriate corporate compliance programs; Recognition of the importance of a company's culture and the relationship between corporate culture and an effective compliance program; Understanding of basic corporate laws and ability to identify possible violations of those laws; Development of appropriate compliance plans and actions to address the improvement of a company's culture; Recognition of and understanding of lessons learned from the major corporate scandals, attendant investigations and corrective actions taken studied in the class; Recognize the concept of institutional fairness and understand and apply ethics as a foundation to a successful corporate compliance program

LAW 821 International Business Transactions (2 Credit Hours)
This course serves as an introduction to the background and legal framework of international business transactions. Students will: - study the business and legal issues that impact international business transactions; - gain insight into the dynamics of structuring international business transactions; - learn about the role that lawyers and legal professionals play in international business; - examine key legal topics that often arise in international business transactions; and - explore careers in international business law.

LAW 823 Privacy and Security of Corporate Information (2 Credit Hours)
This course provides an overview of compliance issues and requirements in information management, including information technology and record keeping requirements.

LAW 825 Business Law Center Clinical & Seminar (2-4 Credit Hours)
The Business Law Clinic (the "BLC") is a live client transactional legal clinic that represents for profit and not for profit businesses in the Chicagoland area. Student clinicians work with several BLC clients during the course of a semester. All work is overseen by BLC faculty. In addition to client work, the BLC includes a weekly seminar (Tuesday, 10:00am - 12:00 p.m.), which covers relevant substantive law, ethical issues and pragmatic lawyering skills, such as drafting, negotiating and client counseling. The work in the BLC is completely transactional in nature. The BLC does not handle contested matters or complex tax. Participation in the BLC requires a significant time commitment (a minimum of 3 hours per week per credit hour, in addition to the seminar), and a degree of flexibility in the student's schedule. All student clinicians are expected to communicate with their clients regularly, meet with their clients as needed, efficiently and effectively perform the related transactional work, maintain their client's files in an organized and professional manner, regularly attend the seminar classes and participate in various seminar exercises. Recommended courses, in order of preference, are Business Organizations, Federal Income Tax and Corporate & Partnership Tax. Class is limited to 14-16 students and instructor permission and an application is required. This is a Skills and Live Client Experience course.

LAW 826 Business Law Clinic II (1-3 Credit Hours)
Pre-requisites: Business Law Clinic and Seminar I, Permission Required
Business Law Clinic II is a continuation of Business Law Clinic I. Student clinicians will continue working with for profit and not for profit businesses in the Chicagoland area. Learning from their experience in Clinic I, Clinic II students have the opportunity to further develop their counseling and drafting skills. Clinic II student clinicians have the same hourly requirements as Clinic I, however, there is no seminar component.

LAW 828 LLM Externship Field Placement (1-3 Credit Hours)
Open to: LLM students enrolled in campus courses. Students enrolled in any campus based LLM program may earn between one to three externship credits for working at an approved LLM externship site. This externship is designed to offer practical experience to further develop law related skills and expertise in various legal fields. A maximum of 3 credit hours can be attained during the LLM program. This is an Experiential Learning course.

LAW 829 Global Compliance (2-3 Credit Hours)
This course will offer students the opportunity to study significant areas of law from foreign jurisdictions that impact doing business abroad or foreign companies doing business in the U.S. A selection of areas of law that will be covered include the UK Bribery Act, European Union privacy regulation, technology transfer laws (including U.S. import-export controls), national security issues associated with doing business in certain companies, and developing laws of emerging markets in Asia.

LAW 832 Contracts (3 Credit Hours)
This course describes the basic anatomy of a contract, including the key components of contracts and how they are organized. The course then uses multiple exercises to teach how to review, negotiate, and draft provisions of business contracts. Students will also learn how to manage risk through careful drafting.

LAW 833 Securities Regulation for Lawyers (2 Credit Hours)
This course will provide attorneys with an overview of securities regulation as well as case studies and practical drafting exercises designed for the securities attorney.

LAW 835 Compliance Training Methods (3 Credit Hours)
This course is designed to provide students with practical experience in developing training and education material. An emphasis will be placed on explaining complex regulations and laws to a workforce. The course will also explore varying pedagogical methods for delivering compliance education.

LAW 836 Compliance Seminar Series (1 Credit Hour)
This course is designed to provide an overview of recent developments in corporate compliance. The course will feature bi-weekly guest speaker on topics of interest to the compliance community. Students will be assessed through short written responses to each lecture and a final essay.

LAW 837 Breach Incident Management and Reporting (3 Credit Hours)
A breach of privacy is considered inappropriate use or disclosure of personal data. Numerous laws regulate what constitutes a breach and the legal obligations if there is a breach. This course will examine: (a) what constitutes a "breach" or "incident" under a variety of scenarios and industries, (b) what legal obligations regulated entities have to act on a breach or incident, (c) what liabilities in tort or contract may exist as the result of breaches, (d) corrective actions to manage breaches and minimize recurrence, (e) electronic security measures to minimize breaches and incidents, (f) a survey of the most common cyberattacks for students to gain familiarity with trends in electronic breaches, and (g) practice in drafting notices, incident reports, and corrective actions.

LAW 838 European Union Privacy Law (3 Credit Hours)
European Union Regulation 2016/679 was adopted by the European Parliament and European Council in 2016 and has world-wide privacy law implications, not merely for activities inside the European Union. The law seeks to protect natural persons when their personal data is used by any regulated entity doing business in the EU. The law also requires regulated entities to have organized compliance efforts on a global scale. The course will examine: (a) the history of privacy law in the EU, (b) the response of the EU member states to past EU privacy directives and the current law, (c) the current EU privacy law's impact on business and data storage around the world, (d) the compliance organizational structures needed to respond to the law, and (e) liability associated with non-compliance. No background on EU law is needed; the course will begin with teaching the basic legal and constitutional structure of the European Union in order to situate the course privacy law material.

LAW 839 Corporate Compliance (2-3 Credit Hours)
This course will cover the elements necessary to implement a basic compliance and ethics program in a company. Students will become familiar with the basic principles of the Federal Sentencing Guidelines that define an effective compliance program. Students will learn the fundamentals of the job of Chief Compliance Officer by working with compliance issues in the media, commercially available compliance training programs and compliance techniques used in major corporations.
Outcomes:
Understand the role of Compliance in an organization and its effect upon an organization's culture; Comprehend the legal underpinnings for a corporate compliance program, including the Federal Sentencing Guidelines, as well as the key frameworks for a corporate compliance program such as COSO;Learn and understand the seven elements of an effective compliance program and how they work to create and influence an organizations culture and its employees' behavior; Appreciate the relationship between ethics and compliance and how both concepts contribute to an organization's well-being, as well as recognize how each corporate function like Legal, HR, Audit and Compliance must be responsible for some part of a company's compliance program

LAW 841 Intntl Commercial Arbitration & the CISG (1-3 Credit Hours)
The course uses as a focus the Willem C. Vis International Moot Arbitration Competition. Sponsored by Pace Law School, the Vis Moot is based on a problem governed by the U.N. Convention on Contracts for the International Sale of Goods (CISG). In the spring, an oral competition is held in two different venues, Vienna and Hong Kong. Recently, Loyola has been able to send a different team of students to each of the venues. The course includes about three weeks of study of the CISG, as well as approximately three weeks of study of international commercial arbitration, including basic laws and rules, how to draft an arbitration clause, how to choose an arbitrator, and how to participate in an arbitration as an advocate and as an arbitrator. While the first half of the semester is spent learning about the CISG and arbitration, the second half is spent putting that knowledge into practice. When the problem on which the Moot Competition is based comes on line in October, students work collaboratively to draft Claimants' and Respondents' memoranda. The Claimant's memorandum is due in early December, and the Respondent's memorandum is due in late January. Students also present tow oral arguments: one at the law school before a panel of moot alumni, and one before arbitrators from Chicago law firms, at the offices of the respective law firms. At the end of the semester, eight students are chosen who will have the opportunity to compete in Vienna and Hong Kong during the spring semester, for an additional two hours of credit. Through the emphasis on both brief writing and oral arguments, students make significant progress in their skills as advocates, as well as their understanding of dispute resolution in an international context. Their accomplishments have been well recognized in both competitions. More information about the Vis Moot is on the Pace Law School Website: www.cisg.law.pace.edu/vis.html. Eligibility: If a student is part of a moot court team that will be arguing in the fall semester, he or she is not eligible to take this course, since this is a skills-based course requiring substantial out of class effort in both brief writing and oral argument. If a student is part of a moot court team that will be arguing in the spring semester, he or she is eligible to take the course in the fall, but will not be eligible to compete to be an oralist in the Vienna or Hong Kong competition. Corboy Fellows are not permitted to take this course. Important: Permission of the professor is required. In order to apply, please submit a resume and a statement of interest by mid-April to Professor Moses, mmoses1@luc.edu explaining a little about your background, and why you are interested in taking this course.

LAW 842 International Commercial Arbitration (1-2 Credit Hours)
The course uses as a focus the Willem C. Vis International Moot Arbitration Competition. Sponsored by Pace Law School, the Vis Moot is based on a problem governed by the U.N. Convention on Contracts for the International Sale of Goods (CISG). In the spring, an oral competition is held in two different venues, Vienna and Hong Kong. Recently, Loyola has been able to send a different team of students to each of the venues. The course includes about three weeks of study of the CISG, as well as approximately three weeks of study of international commercial arbitration, including basic laws and rules, how to draft an arbitration clause, how to choose an arbitrator, and how to participate in an arbitration as an advocate and as an arbitrator. While the first half of the semester is spent learning about the CISG and arbitration, the second half is spent putting that knowledge into practice. When the problem on which the Moot Competition is based comes on line in October, students work collaboratively to draft Claimants' and Respondents' memoranda. The Claimant's memorandum is due in early December, and the Respondent's memorandum is due in late January. Students also present an oral argument before arbitrators from Chicago law firms, at the offices of the respective law firms. At the end of the semester, a second oral argument is held at the law school, after which students are chosen who will have the opportunity to compete in Vienna and Hong Kong during the spring semester, for an additional two hours of credit. Through the emphasis on both brief writing and oral arguments, students make significant progress in their skills as advocates, as well as their understanding of dispute resolution in an international context. Their accomplishments have been well recognized in both competitions. More information about the Vis Moot is on the Pace Law School Website: www.cisg.law.pace.edu/vis.html. Eligibility: If a student is part of a moot court team that will be arguing in the fall semester, he or she is not eligible to take this course, since this is a skills-based course requiring substantial out of class effort in both brief writing and oral argument. If a student is part of a moot court team that will be arguing in the spring semester, he or she is eligible to take the course in the fall, but will not be eligible to compete to be an oralist in the Vienna or Hong Kong competition. Corboy Fellows are not permitted to take this course. Important: Permission of the professor is required. In order to apply, please submit a resume and a statement of interest to Professor Moses, mmoses1@luc.edu explaining a little about your background, and why you are interested in taking this course

LAW 844 Advanced Trial Practice (3 Credit Hours)
This course will teach students the law and techniques used during the trial process. The course will instruct students and require them to simulate jury selection and voir dire, opening statements, witness examinations, exhibits, objections, and closing statements.

LAW 845 The Foreign Corrupt Practices Act (3 Credit Hours)
This course will examine the FCPA in-depth from the perspective of U.S. companies doing business in foreign jurisdictions and interacting with public officials and regulatory bodies. The course will also examine how companies that might consider themselves a "U.S.-only" business could find themselves with FCPA risk. The course will examine both the law and enforcement actions. The course will also review ways to incorporate FCPA risk into a compliance program so that a company's workforce is educated on FCPA risk and examine how to remediate potential non-compliance with FCPA.

LAW 847 Business Law Graduate Directed/Independent Study (1-3 Credit Hours)
Open to campus based LLM or MJ students. Students will work under the supervision of a member of the Loyola law faculty for purposes of completing scholarly work as defined by the supervising faculty member. This may include but is not limited to assisting a faculty member on an article for publication or on the development of new teaching methods particularly those using technology as part of instructional practices, or producing a scholarly proposal or paper, relating to business law topics, which can be counted as preliminary work towards the completion of a the LLM or MJ thesis requirement. Students may receive up to three credits.

LAW 857 Leadership and Strategy (3 Credit Hours)
As a leader or manager in your organization, it is your job to find the right people, engage and motivate them, and structure and operate the organization in a way that enables and inspires people to perform at their best. And, you have to do this in a way that preserves the organization's financial health and protects it from legal risks. Your professional success depends directly on your ability to make the right strategic decisions, and effectively lead and inspire individuals, teams and projects. This course is designed to enhance your ability to do this. This course also will enable students to examine varied approaches to leadership that are based on personal and organizational mission, vision and values. Students will have an opportunity to explore their own values and approach to leadership and accountability.
Outcomes:
By the end of this class students will be able to: Model the characteristics and skills of visionary leaders; Critically define and analyze business problems and formulate data- and information-driven business decisions; Articulate the responsibility leaders have to all stakeholders and the application of ethical principles to business practices; Successfully participate in and lead multi-functional team projects; and Demonstrate proficiency in the various forms of communication

LAW 858 Cybersecurity Management (2-3 Credit Hours)
This course will introduce students to the key legal, business and ethical issues related to cybersecurity. Students will gain familiarity with a framework for approaching cybersecurity through evaluating threats, risks and vulnerabilities and developing appropriate and proportional policies, processes and countermeasures to maintain the integrity of computers, systems and data.
Outcomes:
Students will gain familiarity with a framework for the management of cybersecurity through evaluating threats, risks and vulnerabilities and developing appropriate and proportional policies, processes and countermeasures; Be able to maintain the integrity of computers, systems, devices and data

LAW 859 Environmental Enforcement and Compliance (2 Credit Hours)
This class will provide an overview of corporate compliance principles applied in the environmental context, as well as to provide a general overview of federal environmental law compliance. This course will examine the principles of an "effective" corporate environmental compliance program and will provide a framework for students to identify, prevent, detect, respond and correct any environmental non-compliance.

LAW 860 LLM Tax Seminar (2 Credit Hours)
In the LLM Tax Seminar, tax LL.M. students will research a topic in tax deeply and write a thesis on that topic.

LAW 866 Antitrust & Intellectual Property (2 Credit Hours)
This seminar focuses on the interface between Intellectual Property (IP) and antitrust law. Patents, copyrights and trademarks and other IP regimes confer exclusionary rights. Exclusive rights provide incentives and serve other ends, but their exercise can also impede competition distort otherwise competitive markets. This seminar will address the intersection of IP and Antitrust with respect to issues such as standard setting, licensing, corporate strategy, product design, efforts to increase market share and mergers and acquisitions.

LAW 874 Environmental, Social, and Governance (ESG) (3 Credit Hours)
This course explores the relationship between corporate compliance and Environmental, Social, and Governance (ESG) principles. ESG has gained importance in recent years as a framework for businesses striving to be profitable and socially responsible. The course will analyze the application of Compliance principles from the Federal Sentencing Guidelines to the ESG model, covering aspects such as climate change, sustainability, workers' rights, diversity, and governance ethics. Students will trace the evolution of ESG from the Triple Bottom Line to Corporate Social Responsibility and examine the viability of the Friedman Model. Additionally, the course will explore ESG reporting models and their impact on governance and investing. Upon completion, students will understand ESG principles, their relation to compliance, and best practices for corporate governance and ESG reporting.
Outcomes:
Summarize the background and key milestones of the ESG movement, and the key drivers; Articulate the basic elements of a corporate ESG program (generally), as well as the benefits of an effective ESG program, and the risks arising from a poor one; Articulate/explain the various definitions, reporting standards and individual parameters/criteria that are commonly used (and tailored) within a Corporation's Environmental, Social and Governance ("ESG") program; Review and assess the adequacy of a Corporation's ESG strategy, internal policies, disclosures, and related initiatives by applying an understanding of both applicable regulatory requirements and program best practices; Understand the role of standard setting and rating agencies; Locate, assemble and compare ESG reports (and the various evaluative criteria) for various companies within different industry sectors - that were prepared by the top four ESG rating agencies for various industry sectors (eg MSCI, Sustainalytics, Bloomberg and ISS); Recommend the processes, the supporting initiatives, the supporting players (from various corporate departments), as well as outside ESG experts and advisors that must be engaged and coordinated to develop and implement an effective ESG program; Forecast some of the upcoming issues in the future of ESG, and how companies can best be prepared

LAW 878 Orientation Program for International LLM Students (1 Credit Hour)
Introduction to Core Concepts of Common Law and Studying Techniques for International LLM Students This online summer course is limited to international LLM students. The orientation is an immersive preparation for students and lawyers trained abroad who will learn what to expect from their law school courses and how they can meet the expectations of their professors. We will introduce core common law concepts and structure of US legal institutions. Students will hone their written and oral communication skills and train practice skills critical to success in law school.

LAW 880 Introduction to U.S. Law and the Legal System (1 Credit Hour)
This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then learn to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses cases from various fields and provides students with the background they will need for understanding American law.
Outcomes:
Describe the structure, functions, and traditions of the American court system, including the roles of various courts and legal actors in the administration of justice; Develop the ability to read and critically analyze judicial opinions, statutes, and other legal texts, identifying key legal principles, issues, and reasoning used in reaching decisions; Identify and explain the primary sources of American law (statutes, case law, and regulations) and understand their interrelationship within the legal system; Use case examples from various fields of law to understand how legal principles are applied in different contexts, including civil, criminal, and administrative law

LAW 881 Legal Research and Writing for Foreign Lawyers I (2 Credit Hours)
This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. During the fall semester, students take Legal Research and Writing I and are introduced to legal research methods and the fundamentals of legal writing. Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda and exam writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. During the spring semester, students take Legal Research and Writing II which builds on the basic writing, analysis, and research skills learned in the first semester. In the spring semester, students are also introduced to persuasive writing and learn how to present an oral argument to the court. Computerized research techniques are included in the course.
Outcomes:
Identify and apply various legal research tools and strategies to locate relevant case law, statutes, and secondary sources; Interpret and analyze legal texts, including cases, statutes, and secondary sources, to understand their relevance and application to specific factual situations; Apply legal research findings to hypothetical factual scenarios, demonstrating a solid understanding of how to structure legal arguments

LAW 882 Legal Research and Writing for Foreign Lawyers II (2 Credit Hours)
This course is required for international students in the LL.M. and U.S. Law or the LL.M. in International Law. During the fall semester, students take Legal Research and Writing I and are introduced to legal research methods and the fundamentals of legal writing. Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda and exam writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. During the spring semester, students take Legal Research and Writing II which builds on the basic writing, analysis, and research skills learned in the first semester. In the spring semester, students are also introduced to persuasive writing and learn how to present an oral argument to the court. Computerized research techniques are included in the course.
Outcomes:
Develop the ability to present oral arguments clearly and persuasively to a court; Synthesize legal research, analysis, and writing in the context of real-world legal practice, preparing them for future legal internships and employment

LAW 883 Introduction to the Law of the United States II (1 Credit Hour)
This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. It is taught as a 1-credit hour course in the spring semester (I) and in the fall semester (II). This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then learn to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses cases from various fields and provides students with the background they will need for understanding American law.

LAW 884 Doctoral Dissertation Research and S.J.D. Colloquium I (1 Credit Hour)
This course will consist of three distinctive components: 1. Doctoral Research: Candidates will learn research methods as well as get thoroughly acquainted with the variety of research materials, (on-campus, online and otherwise) that will aid them in the development of their dissertation projects. 2. Legal Theory: Candidates will learn the fundamentals of current legal academic thought in areas such as comparative law, law and economics, legal theory, legal realism, and critical race theory. 3. Scholars Forum: Candidates will discuss their research with their peers and others and elicit feedback on drafts of their work at various stages.

LAW 885 Doctoral Dissertation Research and S.J.D. Colloquium II (1 Credit Hour)
Pre-requisites: (LAW 884) Doctoral Dissertation Research and S.J.D
This course will allow further development of the three distinctive components from part one of this course: 1. Doctoral Research: Candidates will continue to learn research methods as well as get thoroughly acquainted with the variety of research materials, (on-campus, online and otherwise) that will aid them in the development of their dissertation projects. 2. Legal Theory: Candidates will continue to learn the fundamentals of current legal academic thought in areas such as comparative law, law and economics, legal theory, legal realism, and critical race theory. 3. Scholars Forum: Candidates will continue to discuss their research with their peers and others and elicit feedback on drafts of their work at various stages. Colloquium I

LAW 886 Doctoral Dissertation Supervision (1 Credit Hour)
Pre-requisites: (LAW 885) Doctoral Dissertation Research and S.J.D
This course will allow candidates to focus on developing their dissertation and building on the preliminary research they conducted during the first year. Candidates will continue to meet, either in person or by remote means, with their Advisory Committee twice a year. Colloquium II

LAW 887 Doctoral Dissertation Supervision and Completion (1 Credit Hour)
Pre-requisites: (LAW 877) Doctoral Dissertation Supervision II
This course will allow candidates to continue to develop and complete the dissertation.

LAW 900 Introduction to Legal Study and Legal Writing (4 Credit Hours)
This foundation course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure of the American court system. Students then learn to read and brief cases, synthesize cases, and develop basic legal writing and analysis skills. Through multiple short writing assignments, students learn to construct a legal office memorandum, the final course requirement. The course utilizes health law cases and problems and provides students with background for future health law studies. This course is open to online Master of Jurisprudence students in the Health Law and Business Law programs.

LAW 901 Introduction to Legal Research (3 Credit Hours)
This course provides an overview of the legal research process. The student will learn basic legal research skills with a focus on online legal sources. Students will search for health law cases, statutes, regulations and law journal articles. They will learn how to use citators to verify that a case or statute is still good law and also learn the proper form for citation of legal authorities.
Outcomes:
Explain the fundamental principles underlying legal research; Use LexisNexis to find cases, statutes, regulations and secondary sources; Explain the importance of using citations and avoiding plagiarism

LAW 902 Introduction to Health Law and Policy (3 Credit Hours)
Co-requisites: Health Law LLM students should take Law 902 in conjunction with Law 903 in their first term
This course is designed to expose students to the legal issues that arise from the relationship between and among patients and health care providers. Primary areas include: conflicts between cost effective and high quality health care; access to care; individual and institutional liability; public and private regulation; accreditation and licensure; hospital/medical staff relationships; patient rights, with a special focus on informed consent; and other legal issues in the acute care setting.
Outcomes:
Identify and explain the key legal principles that govern the relationship between patients and health care providers, including the roles of individual and institutional liability; Synthesize theoretical legal concepts and practical applications in health law, utilizing case studies and real-world scenarios to understand how laws affect health care decisions; Cultivate the ability to reason ethically and legally through complex health care issues, making informed decisions that balance patient rights, provider responsibilities, and institutional obligations; Evaluate the tension between cost-effective health care delivery and maintaining high-quality care, and explore the legal implications of these conflicts for health care providers and patients; Discuss the legal challenges related to equitable access to health care, including the impact of public and private regulations on health care delivery and patient access; Critically assess the legal principles surrounding individual and institutional liability in health care settings, including the identification of negligent conduct, vicarious liability, and the allocation of responsibility between health care providers, institutions, and patients; Compare and contrast public and private regulations that govern health care practices, including federal and state laws, and their impact on health care providers, patients, and institutions; Describe the processes and legal requirements for health care provider accreditation and licensure, and the implications for compliance and accountability in the health care system; Investigate the legal dynamics between hospital administrators, medical staff, and other stakeholders in acute care settings, focusing on their respective responsibilities and liabilities; Analyze the legal standards surrounding patient rights, with a special focus on the doctrine of informed consent, and its application in acute care settings; Critically assess the role of law in the acute care setting, including legal risk management, liability concerns, and the rights of patients and health care providers

LAW 903 Health Care Financing (3 Credit Hours)
Pre-requisites: Prerequisite for Health Law MJ students: Law 900, 901, and 902
Health Law MJ students should take Law 903 in conjunction with Law 904. Health Law LLM students should take Law 903 in conjunction with 902 in their first term. Students explore the general principles and techniques of financial management and accounting as applied to health care organizations. Considerable focus is placed upon definition, history, and methods by which providers of health care services are reimbursed by third parties., insurance companies, government programs) impact financial operations of health care organizations; Examine common reimbursement methods, such as capitation, bundled payments, and Medicare/Medicaid; Identify financial challenges faced by health care providers due to third-party reimbursement; Investigate the impact of underpayment or delayed payments on health care organizations' financial health.
Outcomes:
Define key financial management concepts and principles as they apply to health care organizations; Analyze the role of financial management in ensuring the sustainability of health care providers ; Identify the historical developments that have shaped reimbursement systems in health care; Understand how reimbursement models have evolved over time, from fee-for-service to modern value-based care structures; Demonstrate proficiency in applying basic accounting techniques, including budgeting, forecasting, and financial reporting, within health care organizations; Understand how financial statements (balance sheets, income statements, cash flow statements) are used in health care decision-making; Analyze how third-party payers (e.g

LAW 904 Health Care Regulation and Policy (3 Credit Hours)
Pre-requisites: Prerequisites for Health Law MJ students: LAW 900, 901, and 902
Health Law MJ students should take LAW 904 in conjunction with LAW 903. This course looks at patient representation issues in the context of judicial advocacy and public policy formation and explores patient rights in the context of federal opinions and strategies they utilize. The role of government in health care is explored through a review of major government health programs, particularly Medicare and Medicaid, with a focus on the fundamentals of legislative and administrative processes in health policy development and implementation. Issues to be explored will be drawn from the wide array of health matters in which governments are involved.
Outcomes:
Describe the three separate branches of government and the role each plays in the policymaking process; Identify five specific reasons achieving meaningful health care reform is so difficult in the United States; Research a health policy issue that negatively impacts citizens of the US or of the state where you live; Advocate for necessary policy change by providing a balanced analysis of available and best options for advancing a specific health policy option

LAW 907 Bioethics & Social Justice (3 Credit Hours)
Students investigate issues arising from advances in biological science and technology and learn about their impact on the legal rights and of patients, health providers, and government policy makers. Issues explored range from legal and ethical dilemmas in the treatment of individuals to broader societal issues addressing the allocation of health care resources.
Outcomes:
Identify and evaluate key legal and ethical dilemmas arising from advances in biological science and technology, such as gene editing, AI integration, stem cell research, and personalized medicine; Discuss the balance between innovation in health technologies and the protection of individual patient rights; Explore how emerging biological sciences and AI impact the legal rights of patients, including issues of consent, privacy, and autonomy; Investigate the legal implications of patient data use and the role of artificial intelligence in clinical decision-making; Analyze the responsibilities and legal liabilities of health care providers in the use of advanced technologies, including AI-driven diagnostics and treatment protocols; Explore issues of malpractice and negligence in the context of innovative treatment methods and technologies; Investigate the role of government policy in regulating emerging technologies, such as biotechnology, AI, and digital health tools; Examine the regulatory frameworks for ensuring safety, efficacy, and ethical use of new technologies in health care; Articulate the need for an effective compliance program, and the legal and business benefits of having an effective compliance program; Describe the elements of a successful corporate compliance program designed to deter, and to detect and remedy fraudulent or abusive practices; Discuss the fundamental health care fraud and abuse and related laws, privacy and security laws, and research laws that apply to most health care providers in the context of "compliance"

LAW 909 Risk Management, Patient Safety and Quality (2 Credit Hours)
This course is designed as a general survey course to provide you with an introduction to the concepts associated with managing risk, promoting quality and enhancing safety in the health care industry. The course begins with a general description of traditional risk management and then proceeds to discussion the various aspects of risk management, patient safety and quality that influence the delivery of health care.

LAW 910 Health Care Compliance (2-3 Credit Hours)
This course will progress from the basics of a compliance program, including the compliance operations and the Code of Conduct, to specific issues facing the healthcare industry such as anti-kickback, Stark, False Claims Act, and civil monetary penalties; conflicts of interest and governance; tax; coding and billing; privacy, technology, data, and security; and the link between regulatory issues and quality of care. Students will be assigned projects to show them how to implement in a practical setting the various laws, regulations, and standards as well as understand the enforcement environment. THIS CLASS IS ONLY AVAILABLE ONLINE AND WITH PERMISSION.

LAW 912 Liability & Dispute Resolution in Health Care (2 Credit Hours)
In this course students will take an in-depth look at both the substantive and procedural law of medical negligence litigation and ways to avoid litigation through communication and resolution processes and the use of other alternative means of reconciliation following harm. Students will also review and discuss the motivations behind medical malpractice litigation and will include detailed discussions about the comprehensive, principled, and systematic approach to the prevention and response to patient harm including communication and resolution programs such as the Michigan Model, CANDOR, and the BETA HEART program. Students will discover, during the course, the impact of medical harm and litigation on patients, families, caregivers and society. Case-based videos involving actual patient harm events and demonstrating the power of empathic communication are used throughout the course.

LAW 916 Telemedicine (3 Credit Hours)
This class will explore the evolution of Telemedicine to Telehealth. It will begin by describing the legal and regulatory framework which governs all Telehealth encounters and the reimbursement and coverage parity issues which have, for years, limited growth in this critical aspect of health care. The course will also cover the impact of state licensing compacts, the challenges associated with technology, HIPAA and privacy concerns and how Telehealth can serve to reduce health care disparities and issues associated with access to needed health care services for geriatric and other patients.
Outcomes:
Analyze the legal and regulatory landscape governing Telehealth, including the key laws, policies, and guidelines that shape Telehealth practice, and evaluate their impact on the growth and implementation of Telemedicine services; Evaluate the technological barriers and challenges that impact Telehealth, including issues related to connectivity, platform accessibility, and the integration of health information technologies and examine HIPAA regulations and privacy concerns in the context of Telehealth services; Examine the potential benefits and drawbacks of Telehealth in improving patient care, focusing on patient outcomes, continuity of care, and the quality of healthcare delivered remotely; Discuss the ethical issues surrounding Telehealth, including equity, informed consent, and the challenges of ensuring the security and confidentiality of patient information in virtual care settings; Propose strategies and solutions for overcoming the challenges faced by Telehealth, including addressing regulatory, technological, and access issues, and ensuring the equitable delivery of Telehealth services across diverse patient populations

LAW 917 Public Health and the Law (3 Credit Hours)
Public Health Law is a two-credit survey course that covers core legal issues encountered in regulation and public policy affecting population health. The course will provide students with an overview of topics that concern regulatory theory, administrative law, legislation, and individual rights' concerns. As public health authorities are confronted with ever complex challenges, the role of law is pivotal in both directing regulatory responses, as well in shaping strategies to combat perceived abuses of government power. Few areas of law and policy are as dynamic as public health law as the field plays a central role in major, ongoing areas of population health such as Covid-19, opioid abuse, climate change, disaster preparedness and response, etc. The course will focus on four themes: (1) the structure and powers of public health agencies in confronting traditional and evolving health threats, (2) the challenge of balancing individual rights against population health concerns, (3) the role of civil litigation in influencing changes in public health with a focus on legal settlements in the areas of tobacco and opioids, (4) international and comparative law approaches to meeting cross border health challenges. The course is taught online and combines several live class sessions with programmed modules. Students will be required to make several in-class presentations that will be the basis of three required essay assignments.
Outcomes:
Develop an understanding of legal issues concerning vaccines, and how regulators need to balance public need with individual rights in this context particularly in relation to Covid-19; Appreciate key legal issues that concern the adoption of isolation and quarantine measure, as well as travel restrictions that can be invoked to protect population health, drawing on both domestic and international law principles; Explore the role of regulators in developing policies to deal with population health disparities, focusing on the issue of obesity and its implications in minority populations; Describe the key variables in the formation of public health regulation including risk assessment, cost benefit analysis, transparency and the application of the precautionary principle; Demonstrate a mastery of the Bill of Rights' issues that impact public health regulation and have an appreciation of the legal tension between individual liberty and population health, of particular importance will be an understanding of due process and equal protection, and how those principles are manifest in public health case law, and students will be expected to have a solid understanding of the elements of Jacobson v Massachusetts and an awareness of how those elements can serve as a basis of regulatory analysis; Understand how the issue of federalism is central to public health law; Develop a familiarity with public health activities regarding access to clean water; Appreciate the role tort law plays in public health law with a special focus on tobacco and opioids

LAW 918 Health Care Privacy and Security (3 Credit Hours)
This course is an overview of Health Information Law and Policy as it pertains to data security and privacy of electronic health records here in the United States. Students will examine how individual health information is collected, maintained, and transferred in this electronic information age, and the ramifications when such information is improperly protected, stolen, and misused.
Outcomes:
Identify the key federal laws and regulations related to the privacy and security of electronic health records (EHRs), such as HIPAA (Health Insurance Portability and Accountability Act) and the HITECH Act; Understand the role of state laws and regulations in complementing federal health information privacy and security requirements; Analyze the processes by which health care organizations collect, store, and transfer electronic health records (EHRs) across different systems and platforms; Discuss the challenges and opportunities presented by health information technology, including electronic health records, health information exchanges, and patient portals; Assess the legal consequences and regulatory responses to breaches of electronic health information, including data theft, unauthorized access, and misuse; Explore the ethical dilemmas surrounding the protection of patient privacy in the context of health information technology; Understand the compliance mechanisms, such as audits, risk assessments, and security protocols, that organizations use to ensure adherence to health information privacy and security regulations; Analyze case studies of organizations that have successfully implemented privacy and security measures and those that have faced significant challenges or penalties; Engage with current issues such as the growing concern over cyberattacks, data sharing across organizations, and health data interoperability; Explore potential future developments in health information law and policy, considering technological advancements, evolving legal frameworks, and new public health concerns

LAW 920 Health Law Seminar Series (1 Credit Hour)
This course exposes students to seven unique and emerging issues impacting the health care industry. Each issue has the potential to impact providers, health care organizations, health care attorneys, and consumers. Each emerging issue is selected based on its likely impact on the industry and its timeliness, given current political and health care challenges. This course is structured over 14 weeks, in which we alternate between reading weeks, where students are given reading material to introduce them to each issue, and synchronous classroom lectures by national experts on each subject. At the end of the course, each student is asked to write a reflective paper on one of the issues presented and describe the impact that they believe it will have on their practice or the delivery of health care in general. This course is graded pass/fail.
Outcomes:
Increase knowledge of emerging issues in health law; Increase understanding of the complexity and importance of health care law and compliance

LAW 921 Health Insurance and Health Care Regulation (2 Credit Hours)
This course is designed around the regulation of health insurance companies in the United States with an eye toward the coming changes brought about by the Affordable Care Act. Although the Affordable Care Act (ACA) is federal, its implementation is reliant on the states. This course will address how the current regulatory system will adapt to the new federal health care scheme.

LAW 922 Advanced Health Care Compliance (2 Credit Hours)
Pre-requisites: LAW 910 - Health Care Compliance (Online)
This course explores advanced concepts in health care compliance. This course will present a complex health care compliance scenario each module which the student must analyze and comment upon. The scenarios will cover a broad array of regulatory subject matters which must be analyzed in the context of compliance program principles.
Outcomes:
Gain experience unpacking complex compliance scenarios; Put into practice regulatory compliance knowledge gained in compliance curriculum

LAW 923 Privacy Program Management (2 Credit Hours)
Pre-requisites: LAW 918 or LAW 823 is a prerequisite
If working on the Certificate in Privacy Law, no prerequisites are required for this course. This course explores advanced concepts in privacy and security law and is designed as a continuation of either of the introductory privacy courses (LAW 918 or LAW 823). This course will present a complex compliance privacy and security scenarios each module which the student must analyze and comment upon.
Outcomes:
Understand and apply the 7 elements of a compliance program to the analysis and formation of an effective privacy compliance program; Apply basic legal and regulatory principles to the evaluation of issues in complex scenarios related to privacy and security issues; Demonstrate an understanding of the risks and mitigation tactics needed to enhance privacy/security program management

LAW 924 Conducting Internal Investigations (2-3 Credit Hours)
This course will cover practical techniques in responding to suspected non-compliance as well as liability exposure in how investigations are handled. The course will also discuss resolution of identified non-compliance and methods for discharging an organization's legal obligations to correct non-compliance, including self-disclosures and refunds. Additionally, the course will cover responding to government inquiries and audits.
Outcomes:
Students will understand the context for internal investigations; Students will learn practical skills for planning and conducting internal investigations; Students will learn how internal investigations are resolved; Students will understand how to identify and access the information available on websites of relevant regulatory/accreditation agencies; Students will understand how to respond to government inquiries, audits, and investigations (including those of government contractors); Students will understand the interplay between government and internal investigations

LAW 925 Drafting Policies and Procedures (3 Credit Hours)
This course is designed to provide practical experience in drafting operational policies from compliance regulations. Having clear policies and procedures is an essential element of an effective compliance program. The course will explore liability associated with how policies are drafted as well as non-compliance with an institution's policy commitment. The course will teach skills and techniques for turning complex regulations into accessible policies for the workforce.
Outcomes:
Understand the types and roles of written standards; Understand the considerations for writing and editing written standards; Articulate the process for deploying and managing effective written standards

LAW 926 Human Subjects Protection (3 Credit Hours)
This course will cover the law of protecting human subjects in clinical research. Federal agencies require institutions conducting research to have a study approved by an Institutional Review Board (IRB), obtain informed consent from the human subject, and self-disclose to the government various events. The course will review the regulations governing IRBs, the content of informed consent forms, the monitoring of research studies, and the disclosure of unanticipated events and significant non-compliance. The course will look at enforcement cases as well as tort liability. Financial relationships between investigators and sponsors will also be covered.
Outcomes:
Examine the regulatory requirements governing human research; Gain a thorough understanding of how to apply the regulations to clinical research protocols; Understand the operational and regulatory requirements of research ethics committees; Examine the role of Legal Counsel to institutions conducting human research

LAW 927 Food and Drug Law (2 Credit Hours)
This course will cover advanced topics in the law governing development and approval of devices, drugs, and biologics under the jurisdiction of the U.S. Food and Drug Administration. The course will review regulatory obligations for both manufacturers and providers conducting FDA-regulated clinical research. The course will also cover enforcement of non-compliance and how organizations develop compliance infrastructure to manage the highly detailed FDA regulations.
Outcomes:
Discuss the background of drug/device regulation in the U.S. and the structure of the FDA; Discuss basic terms used in drug pricing; Distinguish among drugs, devices, biologics, dietary supplements and food; Discuss FDA inspections and enforcement mechanisms; Discuss the various approval pathways for "new drugs," and regulation of over-the-counter drugs; Discuss FDA patent concepts and market exclusivities; Discuss the various approval pathways for devices; Describe FDA regulatory paradigm for biologics; Describe the process for the conduct of clinical investigations in humans of drugs and devices and identify common compliance issues arising in the context of these investigations; Discuss FDA regulations for ensuring quality and consistency (eg, GMP, GLP, QSR); Describe FDA's processes for post-market surveillance of drugs and devices, including recalls; Discuss FDA's labeling and advertising requirements, and understand interaction between FDA and FTC; Describe off-label promotion and the intersection of FDA promotional requirements with First Amendment law and the False Claims Act

LAW 929 Enterprise Risk Management (2-3 Credit Hours)
Enterprise Risk Management (ERM) provides a comprehensive framework for making strategic decisions, taking into consideration concepts of both value creation and value protection. The approach looks at strategies for managing risk, uncertainty and growth and their relationship to total value. This course will cover the specific skills and techniques necessary to manage risk across increasingly complex organizations and to align business strategies with goals and culture. Prerequisites for Compliance and Enterprise Risk Management MJ students: Law 900, 901, and 903. CERM MJ students should take Law 929 in conjunction with Law 839. CERM LLM students should take Law 929 in conjunction with Law 839 in their first term.

LAW 930 Leadership and Management Seminar Series (1 Credit Hour)
This course is comprised of a series of lectures on topics in leadership and management by different experts in the field. Every other week students attend a live synchronous class on a leadership or management topic. Topics vary each term and are intended to cover hot topics and essential skills in leadership and management. The course is open to students in online business and health law programs.

LAW 937 Dispute System Design (2 Credit Hours)
This course will focus on the theory and practice dispute system design. Through the semester we will explore dispute systems, analyze design processes, and advance practical skills. Students will participate in simulated dispute resolution processes as a party and analyze real-world dispute systems.

LAW 938 Mediation & Turning Conflict Convo into Dialogue (2 Credit Hours)
This course will focus on the theory and practice of mediation. Through the semester we will explore mediation models and skills. Students will participate in simulated mediations as mediators and parties. Students will learn mediation skills to manage challenging conversations and conflicts and assist others in conflict situations.

LAW 939 Problem-Solving Negotiation Skills (2 Credit Hours)
The purpose of this course is to study and practice effective negotiating strategies and techniques, as well as improve students¿ understanding of negotiation and their effectiveness as negotiators. The readings and class discussions will provide students with a theoretical framework to prepare, conduct, and review negotiations and several strategies to enhance their abilities as negotiators. Through participation in a series of negotiation simulations and critical reflection in class, students will increase awareness of their negotiation behavior and their ability to negotiate more skillfully. This course seeks to help you move from negotiating by instinct, as most people do, to negotiating more thoughtfully, more comfortably and with a clearer sense of purpose. This course merges theory with practice to: (1) develop your understanding of negotiation, and your awareness as a negotiator; (2) give you tools and concepts for analyzing and preparing for negotiations; (3) enhance your negotiating skills through frequent role plays, analysis, and feedback; and (4) teach you how to keep learning from your own negotiation experience. In addition to negotiation skills and theory, you will be introduced to issues of representation, ethics, and the place of negotiation in our legal system. The course syllabus consists of assigned readings, simulations, and written assignments for almost every class, and attendance and one video debrief where we will analyze your skill set.

LAW 940 Restorative Processes in Conflict Resolution (2 Credit Hours)
This course prepares community members and professionals from all fields to apply Restorative Practices to their contexts. The curriculum focuses on proactive techniques to mitigate harm and responsive techniques to address harm, connecting anti-oppression and Restorative Justice, and leadership methods to implement systemic organizational restorative change. Specific restorative practices which students will learn include self-regulation, restorative mindsets and language, facilitation of a variety of Circles, restorative conversations, restorative mediation, and contracting. Through additional online seminars, students will strengthen their knowledge of the history, theory, research, and practice of Restorative Justice. The culminating focus of the course invites students to apply restorative principles and practices in their own setting.

LAW 951 MJ Thesis/Capstone Term One (2 Credit Hours)
Pre-requisites: Students must successfully complete 26 credit hours to be eligible to enroll in 951; Prerequisites for Health Law MJ students: Law 900, 901, 902, 903, 904,910 and required elective credits; Prerequisites for Compliance and Enterprise Risk Management MJ students: Law 900, 901, 803, 839, 929, and required elective credits
MJ students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This first thesis course will focus on topic selection, thesis creation, detailed outline, research methodology, introduction, and writing a partial draft. This course is for students in the online MJ program.
Outcomes:
Produce a final submission of publishable quality, demonstrating strong research, writing, and analytical skills; Conduct independent research, critically analyze data, and present their findings clearly and concisely in a scholarly thesis format; Receive and apply personalized feedback to make meaningful improvements in their writing and research processes; Engage with selected readings and resources to enhance their research and writing, tailoring their use based on individual needs and topics

LAW 952 MJ Thesis Project Term Two (2 Credit Hours)
Pre-requisites: Law 951
MJ students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the online MJ program.

LAW 955 Administrative Law and Health Care Regulation (3 Credit Hours)
The course focuses on the role of federal and state agencies and government branches in regulating health care. Students will learn the fundamentals of administrative law through a health care lens. Topics covered will include government rulemaking, investigations, and enforcement. Students will learn how to locate and understand the interplay of sources of administrative law and analyze statutes and regulations.

LAW 956 Health Care Payment and Policy (3 Credit Hours)
This course covers the types of health care payors and the relationships between them, including HMOs, PPOs, CMPs, Medicare and Medicaid, and other managed care arrangements. Topics will include utilization review, ERISA, agency doctrine and payor operational and contracting issues. Students will become familiar with managed care and analyze healthcare plans and policies. (LLM only or with permission)) will likely affect access to care and health care spending; Explain the major drivers of cost growth and the factors that threaten the sustainability and solvency of the US health care system.
Outcomes:
Describe the structure and organization of the US health care system; Identify basic concepts related to health insurance coverage; Explain how both private health insurance and public health insurance function and how they are financed; Compare and contrast health care delivery models; Identify the various determinants of access to care for low-income and vulnerable populations; Evaluate how specific policy considerations (including quality of care, aging population, technology, etc

LAW 957 Corporate Health Care Transactions (2 Credit Hours)
This course overs the business and legal issues that arise in health care transactions and the business and regulatory environment surrounding transactions. Topics covered will include organizational operations, the contents and role of organizational documents, and the application of tax laws to transactions. Students will analyze organizational documents and prepare presentations on issues presented by transactions (LLM only or with permission.)

LAW 958 Clinical Research Compliance (2 Credit Hours)
This course serves as an introduction to the growing area of health law known as "life sciences". The theme for this course centers on the research and development of pharmaceutical drugs and devices and the role of the FDA in regulating this process. Topics covered will include genomics, personalized medicine, the FCPA, basic patent and intellectual property issues, and financing. Students will learn to analyze the FDA approval process (LLM only or with permission.)

LAW 959 Physician Regulation & Practice Management (2 Credit Hours)
This course is designed to introduce students to the laws, agencies, and other bodies that license, regulate and discipline physicians. Topics covered will include licensing proceedings and hearings and health care entity policies addressing these issues (LLM only or with permission.)

LAW 960 Fraud and Abuse - Stark Intensive (3 Credit Hours)
This course covers federal physician self-referral law, commonly known as stark law, and fraud and abuse law. Students will learn about the statutes, regulations and advisory opinions that define the parameters of physician referrals and anti-kickback laws, analyzing case studies for fraud and self-referral issues. Students will also familiarize themselves with the laws, regulations and government regulatory actions designed to combat false claims and other types of fraudulent activities. (LLM only or with permission.)

LAW 981 Advocacy Dynamics: Legislating for Equity (2 Credit Hours)
The purpose of this course is to provide tools and strategies for students interested in learning the techniques for effective advocacy at the state and federal levels. The first portion of the course will provide historical context on the three branches of governments¿ ability to make policy. The course will then examine the processes that turn a problem into a legislative solution, including how to move a bill into law. These tools include identifying an issue, conducting national surveys, building a base through community organizing, drafting, lobbying, and offering testimony in committee. A recurring theme in the course is the need to examine external obstacles that impact policy making.

LAW 982 Advancing DEI in the Corporate Compliance Program (2 Credit Hours)
This course will examine the relationship between corporate Compliance and the emerging corporate governance principles known as Environmental, Social and Governance (ESG). ESG represents a set of operating principles assist business entities as they strive to be both profitable and socially responsible. The ESG model has grown in use and popularity over the past decade and now is considered essential for many businesses. This course will examine the application of Compliance principles as outlined in the Federal Sentencing Guidelines to the ESG framework. It will examine 8 discreet elements of each principle, such as climate change, sustainability and emission standards for Environmental, workers and human rights, equality and fairness and diversity and inclusion for Social and board independence, fair compensation and ethics and compliance for Governance. It will trace the roots of the ESG movement from the Triple Bottom Line to sustainability to Corporate Social Responsibility to ESG. It will also examine the fundamental purposes of corporations and whether the Friedman Model from the Chicago School remains viable. The course will also consider various reporting models for ESG elements and their impact upon corporate governance and investing.

LAW 983 Advancing Social Justice in the HC Industry (2 Credit Hours)
This is a survey course covering a range of topics including: ethical theory, end of life care issues, informed consent, assisted reproduction, research ethics, social justice, and health care reform and related impacts on public health issues. Due to the breadth of the subject, a thorough consideration of each topic listed cannot be achieved and certain important topics, such as genetics issues, will not be addressed here. Broad health care policy issues are also covered in other Loyola courses, so that content will not be duplicated in this course.

LAW 995 LLM Thesis Project Term One (2 Credit Hours)
Pre-requisites: This course is for students in the online LLM program; Students must successfully complete 20 credit hours to be eligible to enroll in 995, which is the final course in the program; Prerequisites for Health Law LLM students: Law 902, 903, 910 and required elective credits; Prerequisites for Compliance and Enterprise Risk Management LLM students: Law 839, 929, and required elective credits
LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking, and clear, concise writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This first thesis course will cover all the vital parts of a thesis which includes topic selection, thesis creation, detailed outline, research methodology, introduction, and writing a partial draft.
Outcomes:
Develop focused, original research topic in partnership with the thesis supervisor that aligns with academic interests and scholarly standards, demonstrating potential for academic contribution and publication; Create comprehensive research plan in collaboration with the thesis supervisor, outlining clear research questions, methodologies, and a timeline that supports the completion of a publishable paper; Execute independent research through the selection of appropriate methodologies, critical analysis of existing literature, and data gathering to address defined research questions; Apply critical thinking to the work, with integration of supervisor feedback to refine and strengthen the research findings, methodology, and overall structure, enhancing the clarity and depth of the paper

LAW 996 LLM Thesis Project Term Two (2 Credit Hours)
Pre-requisites: Law 995
LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the online LLM program.

ProLaw (PLAW)

PLAW 101 Comparative and Ethical Lawyering for the Rule of Law (3 Credit Hours)
This course will develop the students' knowledge and skills required to provide advice and assistance in a country with a culture and a legal tradition different from the culture and legal system in which they received their education. The course will examine and compare the main elements of particular relevance to rule of law assistance work in major world legal traditions: common law, civil law, Islamic law, customary law and mixed legal traditions. It will also explore how the force of their normativity is effectively applied and how institutional frameworks deal with overlaps. Finally, the course will encourage students to consider the ethical dimension of cross-systems rule of law advising.

PLAW 102 History, Theory and Practice of Rule of Law for Development (3 Credit Hours)
This course provides an overview of the main intellectual foundations supporting the view that law and development are linked. While this connection may appear obvious, the course seeks to show that the relationship may not be as straightforward as first impressions might lead one to believe. Indeed, proponents of the presumed relation between law and development must confront two important distinctions well known to social scientists: causation versus correlation. Evidence that societies, which have achieved high levels of development, typically have good legal systems is incontrovertible. What is less clear is how they got where they are and in what sequence. Put differently, do good laws and institutions generate good development outcomes or does development lead to good laws and institutions? The course applies interdisciplinary and comparative research in history, economics, sociology, political science, regulatory theory, and philosophy to questions of law and the development of legal institutions and does not assume any prior knowledge in any field outside of law.

PLAW 103 Theory and Practice of Assessments in Rule of Law Advising (2 Credit Hours)
This course will provide students with the knowledge and skills required to undertake assessments, the crucial lynchpin which supports the design of specific policies, legal and regulatory reforms and administrative actions. The course demonstrates how developing a clear understanding of problems facing a society is fundamental to good governance and the rule of law. The course assumes that such understanding can be facilitated through professionally prepared assessments which identify the root causes of problems facing a country in a given area and put forward options for remedial action. Students will learn how to use the rich body of documented experience and guidance available on structuring and preparing assessments by learning how to plan and carry out assessments linked, for instance, to justice sector reform, access to justice, the improvement of the legal framework for investment and sustainable business and the control of human trafficking.

PLAW 104 International Development Architecture (3 Credit Hours)
This course covers the rule of law and governance dimensions to international development assistance. It examines both the institutional frameworks and legal mechanisms by which international development assistance is distributed for rule of law and state-building activities and the legal and regulatory structures that apply to development assistance. The course begins by considering the reasons that donors provide aid generally and for rule of law, followed by the examination of the normative frameworks and standards that shape the manner in which aid is distributed, institutions and actors, mechanisms by which aid is programmed and actual use of aid by recipients. The overall approach begins at the global level and follows the chain of development aid through its various elements down to the national level. A key theme of the course is that the approach to international development assistance is broadening. Historically, financing for development was understood primarily in terms of public sector resources. As a result of a confluence of factors, development institutions have been seeking to gather resources from the private sector to supplement official development aid.

PLAW 105 Sustainable Development Through International Commerce and Investment (2 Credit Hours)
International commercial transactions and investments can serve as the vehicles for sustainable development that respects economic, social, environmental, and other important values of the parties involved. Modern-day corporations have enormous resources and, when properly deployed, significant capabilities to promote sustainable development. This course explains the life cycle and range of international transactions and investment - from procurement of goods and services and licensing of technology to large infrastructure and public-private partnership projects. It sets out how properly structured transactions can promote prudent and sustainable development in developing and emerging economies. It describes how private companies, investors, regulators, financiers, governments, NGOs, and other stakeholders can work for the mutual benefit of the communities and countries involved as well as responsible long-term goals.

PLAW 106 Design of Rule of Law Programs and Proposal Preparation (2 Credit Hours)
This course will build the understanding and skills of students in project design and the preparation of written proposals related to rule of law assistance, which can be carried out either in the context of an internationally financed assistance arrangement or as a nationally-driven and self-financed initiative. Building on the needs assessments PROLAW course, the course will position project design as it fits into the overall project lifecycle, as well as its relationship with results-based management. The course will allow the student to understand the theory behind and the methods for conducting problem, stakeholder and risk analyses, designing a logical intervention including project objectives, outcomes, outputs and activities, setting a budget, performance indicators, and means of measuring project progress, and applying theory of change and other logical framework tools. In the second half of the course students will out their newly acquired knowledge and skills to use by preparing a full written project proposal. The course will examine donor thinking behind requirements and how to respond to them, examine current thinking concerning the effectiveness of the project approach to rule of law reform and consider the meaning of innovation, such as problem-driven iterative approaches.

PLAW 107 Rule of Law in Conflict Prevention and Peacebuilding (2 Credit Hours)
This course explores the relationship between rule of law, conflict prevention, mitigation and peacebuilding for development. Drawing from ongoing case studies and international practice, the course examines the drivers of conflict, the dynamics and changes in the social fabric during conflict and how rule of law addresses those challenges. Focus is on justice as foundational to establishing the security and institutional legitimacy necessary for human development. The course will examine how unaccountable and ineffective law enforcement and governance institutions contribute to conflict. Given an understanding of the context, course discussions will seek to identify practical modalities for strengthening rule of law and justice reform, including transitional justice. Course materials include case studies, evidence-based analyses and commentary. Students will be called upon to apply the course learning to a specific conflict affected context. Drawing on other courses in the program such as assessment, program design, implementation and oversight, students will identify opportunities for rule of law engagement in conflict contexts and propose relevant strategies and adaptive programming.

PLAW 108 Legal Systems and Methods (3 Credit Hours)
This course aims at providing those PROLAW students with first degrees in other than law with a framework for understanding the central features, branches, functions and notions of law and the evolution of legal systems and their influence on systems of governance. After a general introduction on legal methods and the sources of law in the main legal traditions, the course will examine the interaction between norms, policies and societal values in different branches of the law. Students will learn key law-related skills such as legal reasoning, analysis, planning and problem solving and how law influences advising, negotiating and mediation.

PLAW 110 Principles of International Economic Law (3 Credit Hours)
Principles of International Economic Law is a required PROLAW course covering selected topics in the law governing international business transaction, international trade law, alternative dispute resolution, and international litigation. It is an asynchronous online course with two modules per week of recorded video lectures, required readings, and follow up assignments with feedback from the instructors. The course is also available as an elective for JD and other LLM students with permission of instructor.

PLAW 250 Research and Writing on the Rule of Law (3 Credit Hours)
.This course is designed to assist lawyers and other professionals working with the law in developing the techniques of researching and writing in relation to rule of law development. The primary objective of this course is to enable students to apply research skills, which will be instrumental for conducting in depth studies on rule of law development topics for major papers during the PROLAW Program and for the final capstone project. With a focus on development issues, substantial emphasis is given to socio-legal and empirical legal research methodologies. A secondary objective is that students will acquire writing skills that can be used in various practice settings involving legal and policy analysis, policymaking, and implementation of rule of law development research studies. Students will also gain expertise on how to research and analyze issues from other disciplines that contribute to the processes and dynamics of legal and institutional reform. This knowledge is foundational for developing theories of change and is critical to formulating strategies, plans, and analyses of rule of law advocacy and reform programs.

PLAW 251 Rule of Law Thesis Supervision and Completion (3 Credit Hours)
Open to LLM students only by permission provided by Program Director.

PLAW 252 PROLAW Completion (0 Credit Hours)
Open to: Students within the LLM and MJ programs in Rule of Law for Development (PROLAW program). Students who do not complete their capstone project or thesis paper within the requisite period of time set by the PROLAW Program must register for this course. Permission to register is required.

PLAW 253 Rule of Law Capstone Project (2-3 Credit Hours)
The Rule of Law Capstone Project is the culmination of the student's academic and personal experiences in the PROLAW program. In carrying out the Capstone Project, students will have the opportunity to consolidate everything they have learned in the PROLAW curriculum and reinforce their practical experience in applying this knowledge and skills through a final multi-faceted exercise. The final outcome of this course will enable each student to demonstrate in relation to a specific real-world law and governance reform process that he or she is capable of using what was learned in PROLAW to produce useful and professional documentation and communicate this content to clients and stakeholders effectively. In some cases, students may develop or have a preexisting relationship with an external organization, which provides an opportunity for the student to work on their particular topic. Students may alternatively decide to conduct research and determine the need and feasibility of a possible initiative to address the problem they identify. Likewise, students can also choose to develop a project to implement an existing agenda or initiative at the national or international levels. Each student will be supervised by a Capstone Project advisor.

PLAW 907 Rule of Law Project Management, Monitoring & Evaluation (3 Credit Hours)
This course will analyze the main principles, tasks and tools commonly used to manage a rule of law project, particularly in comparison to other types of project management. Topics will include the control of the timing of various steps in implementation (start up, work planning, activities, monitoring and evaluation, reporting, and close out), human resource management, stakeholder management, procurement, inventory, and budgeting. The course will also address common challenges including managing a project with weak design or insufficient budget, managing conflicts, dealing with emergencies and mid-course corrections, and the key requirements for successful project management, teamwork, accountability, leadership, substantive knowledge and skills, and cultural literacy. Students will have an opportunity to apply their knowledge and skills by working through a model project in teams and producing a sample deliverable on time, on budget, and according to specifications.

Advocacy Certificate

Setting the bar for courtroom-ready skills.

You will benefit from a wealth of expertise as distinguished academics and experienced attorneys teach courses in trial advocacy, appellate advocacy, and dispute resolution. And you'll sharpen your practical skills through externships and clinics. Earning an Advocacy Certificate means you have developed the litigation and dispute resolution skills that will set you apart.

Total Hours		**18**

[1] Completion of three graded credit hours of Corboy Fellowship or Trial Practice I Applied may substitute for Trial Practice I or Trial Practice II. Completion of six graded credit hours of the Corboy Fellowship or Trial Practice I Applied may substitute for both Trial Practice I and Trial Practice II.

Suggested Sequence of Courses

Courses can be taken in any semester after your first year of law school. The three required courses must be taken in sequential order as LAW 210 Evidence is a prerequisite for LAW 411 Trial Practice I, and LAW 411 Trial Practice I is a prerequisite for LAW 412 Trial Practice II. The Extracurricular Event requirement can be completed anytime throughout your years of study.

Extracurricular Event

Additionally, you must attend at least one event sponsored by the Advocacy Center, including, but not limited to: conferences, lectures, colloquia, or advocacy competitions (volunteering).

Applying For Your Certificate

After completing all requirements, during your final semester you must complete an online application (https://luclawschool.formstack.com/forms/loyola_university_chicago_school_of_law_application_for_certificate_in_advocacy_fo

for the Certificate in Advocacy. You are required to submit your online application according to the following deadlines:

- Winter graduates: December 1 (Extracurricular Event Attendance can be submitted with your online application or as an amendment by December 15 to ggerardi@luc.edu)
- Spring graduates: March 1 (Extracurricular Event Attendance can be submitted with your online application or by as an amendment by May 1 to ggerardi@luc.edu)

You should submit your online application pursuant to these deadlines even if you are currently enrolled in certificate coursework and/or if you have yet to attend an approved Extracurricular Event. You are required to present a draft of your application to the Registrar during your graduation interview and this Sample Certificate in Advocacy (https://www.luc.edu/media/lucedu/law/centers/advocacy/pdfs/sample_certificate_in_advocacy.pdf) may be helpful in that regard. The Advocacy Center Assistant Director will approve your online application and submit it to the Law School Registrar's Office upon completion of your last semester of schooling.

Please contact the Advocacy Center Assistant Director, Gina Gerardi, at ggerardi@luc.edu with any questions related to the Certificate in Advocacy.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Each student graduating with the Certificate in Advocacy will be able to:

- Learning Outcome (Core): Demonstrate knowledge and understanding of the substantive and procedural law of evidence.
- Learning Outcome (Core): Conduct a case before a court of law in a bench trial and jury trial setting.
- Learning Outcome (Advanced Litigation): Identify, formulate and analyze advanced litigation principles as applied in a substantive area of law, including evidentiary issues, complex litigation strategies, theories and concepts, and issues of professional and ethical responsibility.
- Learning Outcome (Trial or Appellate Advocacy with Writing Focus): Draft, present and defend a persuasive written document in the context of litigation at the pretrial, trial or appellate court setting.
- Learning Outcome (Alternative Dispute Resolution): Recognize and advocate for client goals in any dispute resolution setting by analyzing party interests and crafting creative solutions in a mediation or settlement negotiation, or employ oral and written advocacy skills in an arbitration setting.
- Learning Outcome (Co-Curricular): Demonstrate advocacy skills in a live-client or simulated practice setting.

Child and Family Law (LLM)

What defines a family? How are children's rights evolving? The practice of child and family law requires both a sensitive manner and a discerning legal mind. The Master of Laws (LLM) in Child and Family Law degree program is designed to sharpen and inform both needs. We offer a comprehensive study of the latest in child law trial practice and legislation, international rights for children, adoption law, and domestic violence.

The opportunity to work closely with nationally-recognized faculty members and experienced practitioners in the field means you'll be well-versed in this evolving discipline.

Education Immersion Weekend

In addition to the required curriculum, students are highly encouraged to travel to Loyola's Chicago campus during their tenure in the program for an Education Immersion Weekend (EIW). Each year a current event topic is selected which intersects with our Child, Compliance, and Health Law Programs to present significant findings and similarities from a legal perspective. During the weekend, students gather in person to workshop, thesis/capstone project, attend experiential learning workshops, and meet with faculty, students and alumni. This event provides students an opportunity to further network and connect with faculty, students, staff, and alumni.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours

Electives (p.)		2
	Hours	**4**
Term 5		
LAW 651	LL.M. Childlaw Thesis	3
	Hours	**3**
	Total Hours	**24**

Degree Requirements

To earn an LLM in Child Law degree, you must compete a total of 24 hours, including the 3 credit hour LLM thesis. Visit our Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. You may access full course descriptions here (p. 1715).

Learning Outcomes

You will be able to:

- Conduct complex and specialized legal research and analysis
- Participate in scholarship that contributes to the greater understanding of law and policy as it affects children and families
- Explain how child development and family dynamics influence child and family law and policy
- Compare perspectives on issues facing children and families in a global environment
- Describe the historical, socio-economic and cultural context in which child and family laws, policies and practices are developed and implemented
- Identify and articulate areas in which laws and policies should be improved to promote positive outcomes for children, families and communities
- Identify the unique legal and ethical needs and circumstances of child and adolescent clients

Child and Family Law Certificate

Prepare to defend those least able to defend themselves.

If justice for children and their families is driving your passion for the law, the Certificate in Child and Family Law can help focus your studies and your career.

Loyola offers an extensive array of courses in child and family law, including courses on child welfare, domestic relations, juvenile justice, education, and children's human rights. And your participation in either the Law School clinical offerings or volunteer, credited, or other employment opportunities will provide the "hands-on" experience to give you the skills to advocate for those most in need.

Related Programs

LAW 679	Children's Health Law and Policy
LAW 689	Family Law
LAW 717	Mental Health Law
LAW 760	Disability Law
Total Hours	**12**

Suggested Sequence of Courses

There is no sequence of courses required for this certificate. Students should consult their advisor to craft a plan for completion of requirements.

Practical Experience

To earn the certificate, you must complete at least one experiential learning requirement. This experience may be satisfied through participation in the ChildLaw Clinic,[1] Legislation and Policy Clinic,[1] or other "hands-on" experience in the field of child and family law. Other "hands-on" experience must be approved in advance by the ChildLaw Program Coordinator.

[1] One semester of Clinic experience cannot be used to satisfy both the coursework and practical experience requirements. You may, however, meet both requirements by taking two semesters of either of the two Clinics, or alternatively, by successfully completing one semester each of the Civitas ChildLaw Clinic and the Legislation and Policy Clinic.

Extracurricular Activities

Additionally, you must participate in six or more activities sponsored by the Civitas ChildLaw Center, including attendance at conferences, symposia, or the weekly Coffee Talk Series. Participation as a member (including editors and executive staff) of the Children's Legal Rights Journal counts as one extracurricular activity. Students should keep a record of their fulfillment of this requirement, which will be verified by the Program Coordinator. Students should meet with the Program Coordinator over the course of law school to confirm that their activities meet this requirement.

Applying for your Certificate

After satisfaction of all your requirements, you must complete an application (https://www.luc.edu/law/academics/areasofstudy/specializations/childandfamilylaw/) for the Certificate in Child and Family Law, and submit it to the Program Coordinator at ktatumfutterman@luc.edu

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Each student graduating with the Certificate in Child and Family Law must demonstrate:

- competence in child and family law as covered by the Child, Family, and the State course
- competence in the breadth of laws, policies, and practices that are intended to serve children and families and the ways in which they may sometimes cause harm
- competence in the skills needed to represent clients in child and family law matters, including interviewing, counseling, negotiating, and communicating with clients, supervising attorneys, and other individuals or partners, whether in a litigation or policy and legislation context
- competence in identifying and addressing ethical issues in child and family law issues
- competence in identifying and addressing the impact of racial, ethnic, and other inequities on children and families in existing or proposed practices, policies, and laws

Children's Law and Policy (MJ)

Advocating for children and families takes more than a good heart. You need a firm understanding of the law and an ability to function effectively in the legal system.

The Master of Jurisprudence (MJ) in Children's Law and Policy is a degree program tailored to help nonlegal professionals better serve children and families. Whether your field is social work or education, health care or law enforcement, a deeper knowledge of family law enables you to make a difference while it prepares you for a leadership position.

Education Immersion Weekends

In addition to the required curriculum, students are highly encouraged to travel to Loyola's Chicago campus during their tenure in the program for an Education Immersion Weekend (EIW). Each year a current event topic is selected which intersects with our Child, Compliance, and Health Law Programs to present significant findings and similarities from a legal perspective. During the weekend, students gather in person to workshop, thesis/capstone project, attend experiential learning workshops, and meet with faculty, students and alumni. This event provides students an opportunity to further network and connect with faculty, students, staff, and alumni.

Degree Requirements

To earn an MJ in Children's Law & Policy, students must complete a total of 30 credit hours, including the completion of a final program project. Students are encouraged to attend Education Immersion Weekends at Loyola's Water Tower campus. Visit our Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. You may access full course descriptions here (p. 1715).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

You will be able to:

- Articulate substantive and procedural laws of relevance to child-serving professionals
- Participate in various forms of legal research, including electronic research
- Analyze statutes, rules, and cases in the field of child and family law
- Write analytically sound and persuasive documents (letters, memoranda, reports, etc.) appropriate to the goals of child-serving professionals
- Analyze and apply professional leadership skills

Competition and Consumer Protection Law Certificate

Competition is vital to the global economy

Consumers and competitors rely on antitrust and consumer protection laws to promote and protect competition. Loyola's competition and consumer protection law curriculum will empower you to understand and advocate for checks and balances on economic power. Your coursework will complement the extracurricular activities and practical experience you will gain as part of the certificate program.

Related Programs

Master's

- Compliance and Enterprise Risk Management (LLM) (p. 1783)

Certificate

- Advocacy Certificate (p. 1777)
- Compliance Studies Certificate (p. 1786)

Curriculum

There are three requirements for the JD Certificate in Competition and Consumer Protection Law: coursework; practical experience; and extracurricular activities.

Coursework

To be eligible for the JD Certificate, you must complete at least 12 credits in the competition and consumer law curriculum, including

two required courses, and must receive a grade of B or better in each course. Students should monitor their progress on the Competition and Consumer Protection Law Certificate Application by completing curricular counseling each year.

Courses

Total Hours		**12**

[1] Subject to administrative approval for campus JD students to enroll in these courses.

JD students may also be able to count other campus or online coursework toward the JD Certificate in Competition and Consumer Protection Law with permission of the Institute's Director or Associate Director.

Practical Experience

Each student must complete a Consumer Protection/Antitrust Law Externship or clinical or work experience. All clinical experiences and volunteer/employment experiences must be approved in advance. Pre-approved paid work, work as a research assistant, or volunteer work all count toward the experiential requirement. Alternatively students may hold Consumer Law Review positions.

Suggested Sequence of Courses

There is no sequence of courses required for this certificate. Students should meet with their advisor to plan completion of requirements.

Extracurricular Activities

Second and third year students must attend at least 2 competition and consumer protection law events per academic year, including speakers and conferences.

Applying for Your Certificate

After completion of all requirements, you must complete an application (https://www.luc.edu/media/lucedu/law/centers/antitrust/pdfs/Application_for_Certificate_Competition_Law.docx) for the Certificate in Competition and Consumer Protection Law. Submit your application to the Institute's Associate Director for approval, who will then submit the application to the Registrar.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Each student graduating with the Competition and Consumer Protection Law Certificate must demonstrate:

- Competence in the competition and consumer law subject areas covered by the following required courses: Antitrust Law and Consumer Law;
- A sophisticated ability to interpret and consider current issues and debates in the field through completion of additional course work including certain electives such as: Administrative Law, Corporate Compliance, Law and Economics, and Class Actions;
- Practical experience in the field through the completion of an externship, independent study, or independent research supervised by a faculty member;
- Involvement in the profession through attendance at two or more antitrust or consumer protection events or programs at the law school or approved bar association and similar events and programs; and
- Competence in identifying ethical issues, economic justice, and social justice in antitrust and consumer protection law.

Compliance and Enterprise Risk Management (LLM)

Government and industry operate in a complex world of rules. Your skills in navigating the latest regulations and related compliance can help you map a strong career opportunity.

The Master of Laws (LLM) in Compliance & Enterprise Risk Management is a post-JD master's degree program tailored for attorneys seeking to develop or sharpen a special expertise in transactional law or compliance. You'll learn the practical skills for advising clients on best practices across a wide range of industries. Should you choose to focus in compliance, through our accredited program you will be eligible to sit for compliance industry examinations.

Education Immersion Weekends

In addition to the required curriculum, students are highly encouraged to travel to Loyola's Chicago campus during their tenure in the program for an Education Immersion Weekend (EIW). Each year a current event topic is selected which intersects with our Child, Compliance, and Health Law Programs to present significant findings and similarities from a legal perspective. During the weekend, students gather in person to workshop, thesis/capstone project, attend experiential learning workshops, and meet with faculty, students and alumni. This event provides students an opportunity to further network and connect with faculty, students, staff, and alumni.

CCB Exams

Students who earn an MJ in Compliance and Enterprise Risk Management are eligible to sit for CCB examinations. For more information on the exams, see the webpage for your interest area - healthcare (https://www.hcca-info.org/apply-exam/), corporate (https://www.corporatecompliance.org/certification/become-certified/exam-information/).

Degree Requirements

To earn an LLM in Compliance and Enterprise Risk Management, students must complete a total of 24 credit hours, including two final program project courses. Students are encouraged to attend Education Immersion Weekends at Loyola's Water Tower campus. Visit the Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. Full course descriptions are available here (p. 2428).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

You will be able to:

- Analyze ways in which governmental, institutional, and professional policies directly and indirectly influence various business sectors and can give rise to ethical or compliance violations;
- Integrate laws and regulations to operational policies and procedures to yield best practice and affirm ethical business conduct;
- Draft and negotiate transactional documents for clients across industries;
- Develop skills and knowledge necessary to pass the Compliance Certification Board Certified Compliance and Ethics Professional (CCEP) certification exam (for students enrolled in the compliance certificate);
- Communicate according to professional and credible manner; and
- Serve as a compliance professional across industries.

Compliance and Enterprise Risk Management (MJ)

By staying ahead of the changing regulatory landscape, you can position yourself and your business for the future. In Loyola's Master of Jurisprudence (MJ) degree program in Compliance and Enterprise Risk Management you will focus on learning key compliance and risk management concepts across industries.

This online program is designed to help you build the legal knowledge and develop the skill set to create proactive solutions to day-to-day business challenges. You'll also be eligible to sit for compliance industry examinations to earn additional credentials to advance your career.

Education Immersion Weekends

In addition to the required curriculum, students are highly encouraged to travel to Loyola's Chicago campus during their tenure in the program for an Education Immersion Weekend (EIW). Each year a current event topic is selected which intersects with our Child, Compliance, and Health Law Programs to present significant findings and similarities from a legal perspective. During the weekend, students gather in person to workshop, thesis/capstone project, attend experiential learning workshops, and meet with faculty, students and alumni. This event provides students an opportunity to further network and connect with faculty, students, staff, and alumni.

CCB Exams

Students who earn an MJ in Compliance and Enterprise Risk Management become eligible to sit for CCB examinations. Graduating students receive a CCB eligibility letter. For more information on the exams, see the webpage for your interest area - healthcare (https://www.hcca-info.org/apply-exam/), corporate (https://www.corporatecompliance.org/certification/become-certified/exam-information/).

Degree Requirements

To earn an MJ in Compliance and Enterprise Risk Management, students must complete a total of 30 credit hours, including two final program project courses. Students are encouraged to attend Education Immersion Weekends at Loyola's Water Tower campus. Visit our Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. You may access full course descriptions here (p. 1715).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completing this program, you will be able to:

- Analyze ways in which policies directly and indirectly influence various business sectors and can give rise to ethical or compliance violations
- Apply laws and regulations to operational policies and procedures to yield best practice and affirm ethical business conduct
- Develop skills and knowledge necessary to pass the Compliance Certification Board Certified Compliance and Ethics Professional (CCEP) certification exam
- Communicate effectively in a professional and credible manner
- Serve as a compliance professional across a number of industries

Compliance Studies Certificate

The rules are constantly evolving. Stay ahead of the changes.

The role of regulatory compliance is a major feature of today's business landscape. Our curriculum is focused on current real-world business and legal issues, including more than 40 compliance courses taught by respected academics and practitioners in the field. You'll develop the skills you need to explore and create ethical solutions within a business and regulatory context. The Certificate in Compliance Studies (available to students in the JD, MJ in Health Law, and LLM in Health Law programs) will enhance your credentials and expertise.

Students who earn the Certificate in Compliance Studies are eligible to sit for CCB examinations. After degree conferral, eligible students receive a CCB eligibility letter. For more information on the exams, see the webpage for your interest area - healthcare (https://www.hcca-info.org/apply-exam/), corporate (https://www.corporatecompliance.org/certification/become-certified/exam-information/).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Design a program to prevent, detect, and remedy Compliance risks;
- Identify and develop the structure of a successful compliance program;
- Maintain a comprehensive understanding of regulatory frameworks;
- Identify, analyze and assess relevant Compliance risks to an organization;
- Develop and implement appropriate risk mitigation strategies for an organization;
- Analyze the principles of corporate governance and their role in managing risk effectively;
- Identify and implement relevant data protection laws;
- Develop effective communications and awareness programs to implement these measures

Conflict Management Certificate

Conflict Management and Negotiation skills are essential skills for leaders, managers and anyone seeking to understand, manage, resolve, and prevent conflict.

Designed for legal and non-legal learners, the Certificate in Conflict Management focuses on negotiation, conflict management, mediation, dispute system design and restorative justice.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Examine the processes that turn a problem into a legislative solution, including how to move a bill into law.
- Analyze discreet elements of emerging corporate governance principles, such as climate change, sustainability and emission standards for environmental; workers and human rights, equality and fairness and diversity and inclusion for Social and board independence, fair compensation and ethics and compliance for Governance.
- Develop an understanding of the interrelationship between law and bioethics and the role of bioethics in the development of current laws,
  policies and practices in the United States.
- Demonstrate an understanding of equity literacy and how social justice works in conjunction with legislative issues.
- Interpret the relationship between corporate Compliance and the emerging corporate governance principles known as Environmental, Social and Governance (ESG).

Health Law (LLM)

As a practicing attorney, you know the need for learning and career development never stops. The Master of Laws (LLM) in Health Law program is designed for busy attorneys like yourself who wish to develop or enhance a special expertise in health law.

This 24-credit degree program can be completed on-campus or online. However you choose to complete the program, your courses will be led by Loyola's nationally recognized full-time and practitioner faculty. You'll follow a course of study developed alongside leading health lawyers, industry professionals and legal experts. So you'll learn the very latest legal, regulatory, political, ethical, and economic aspects of health care delivery.

Should you choose to focus in compliance, through our accredited program you will be eligible to receive a Certificate in Compliance, enabling you to sit for compliance industry examinations.

Health Law Certificate

A highly-ranked program for a widely-needed legal field

Loyola's course offerings in health law are as diverse as the field itself. From health care financing to patient safety, from compliance to bioethics, from public health to fraud and abuse, JD students can jump-start their career in health law with over 40 course offerings. You'll complete coursework, a practical experience, and engage in extracurricular activities to increase your exposure to the field.

Related Programs

Master's

- Health Law (LLM) (p. 1789)
- Health Law (MJ) (p. 1790)

Doctoral

- Law (JD Full time) (p. 1795)

Curriculum

There are three requirements for the JD Certificate in Health Law: coursework; practical experience; and extracurricular activities.

Coursework

To be eligible for the JD Certificate, you must complete at least 12 credits in the health law curriculum, including two required courses, and must receive a grade of B or better in each course.

After completion of all requirements, you must complete an application for the Certificate in Health Law. Submit your application (https://luclawschool.formstack.com/forms/health_law_certificate_application/) to the Beazley Institute Director for approval, who will then submit the application to the Registrar.

LAW 798	Health Care Compliance	
Total Hours		**12**

Each term, select online courses in health law are available and may be taken and applied toward the elective course requirement (900 level courses).

Practical Experience

To earn the Health Law Certificate, you must complete a Health Law Externship, an approved clinical experience, or demonstrate experience in the field of health law. Clinical experiences and volunteer/employment experiences must be approved in advance.

Extracurricular Activities

You must participate in six or more health law activities or events. These include, but are not limited to: speakers, conferences, Health Law Society programs, or participating in the *Annals of Health Law* as senior editorial staff.

Note for *Annals of Health Law* Members: Participation as a member of the Annals will count as one extracurricular activity. Serving on the Executive Board or as a Senior Editor will count as one additional extracurricular activity.

Applying for Your Certificate

After completion of all requirements, you must complete an application (https://luclawschool.formstack.com/forms/health_law_certificate_application/) for the Certificate in Health Law. Submit your application to the Beazley Institute Director for approval, who will then submit the application to the Registrar.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Each student graduating with the Certificate in Health Law will be able to:

- Explain the various ways in which health care is financed and delivered in the United States, and analyze the complex relationship between cost, quality, and access.
- Identify key social trends and health policy issues confronting health care providers, payors, and patients.
- Identify social determinants of health, recognize how social disparities impact health at both the individual and population levels, and describe the government's role in ensuring population health.
- Recognize how entities within the health care industry are impacted by laws relating to participation in Medicare and Medicaid, state licensure, corporate structure and taxation, fraud and abuse, employment, antitrust, and intellectual property; and describe the role of attorneys in ensuring compliance with these laws and regulations.
- Explain the systemic barriers to achieving health care quality, the role of the government in promoting quality improvement, and health care organizations' operational approaches to quality assurance and risk management.
- Identify the statutes, regulations, tort doctrines, federal agencies, and constitutional principles that define the rights of patients within the health care system – including, among others, EMTALA, HIPAA, PPACA; ADA, Nursing Home Reform Act; malpractice law and informed consent law; laws relating to mental health treatment, reproductive care, and end-of-life care; and laws and regulations that ensure the safety and efficacy of drugs, medical devices, and other technologies.

International Law and Practice Certificate

A legal education without borders.

In a global economy, legal practice in all areas extends beyond national borders. In business and tax practice, legal concerns are inherently international. International considerations affect every area of law, from criminal law to estate planning to child and family issues. In your legal studies, your increased ability to respond to the challenges of an international legal environment can only enhance your career.

The school's curriculum, in Chicago and abroad, continually expands and deepens to respond to developing areas of professional interest to include courses in international trade, dispute resolution, and the rule of law. Electives focus on important issues such as human rights, access to medicine, and issues of war, peace, and terrorism.

Study Abroad and Field Study Courses

Any Loyola law course taken in conjunction with a Loyola study abroad or field study related to international law will also qualify as an elective course.

Prior Elective Courses

Students who took any of the following courses in the past can still apply the credits towards the J.D. Certificate in International Law and Practice.

- Family and Fundamental Rights
- Foreign Corrupt Practices Act
- Human Rights in the Global Economy

Applying for your Certificate

After completion of all requirements, you must complete an application (https://www.luc.edu/media/lucedu/law/registrar/pdfs/certificate/app-cert-int-law-practice.pdf) for the Certificate in International Law and Practice. Submit your completed application to Professor Margaret Moses or Professor James Gathii for signature. You must submit your signed application form to the Law School Registrar's Office.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Each student graduating with the Certificate in International Law and Practice will be able to:

- Identify sources of International Law.
- Recognize and apply the intersecting bodies of international law relevant to a particular legal issue.
- Analyze the application of hard law and soft law in an international context.
- Describe the distinctive fields of international law and the role of international lawyers in those fields.

LLM Program for International Lawyers (LLM)

In today's legal world, lawyers are increasingly engaged in international and cross-border practice. We admit only a select small group of students and focus on providing you with the tools to succeed in the US and global legal arena. Loyola's faculty are noted researchers, inspiring teachers, and engaged advisors who deeply care about their students' progress.

Outstanding lawyers from over 55 countries have chosen Loyola to boost their career with a master's degree. Individualized academic and career counseling, supportive faculty, and access to Loyola's worldwide legal networks are just a few benefits of our LLM Program for International Lawyers. Your educational experience and intercultural skills will be further enhanced through full immersion in our welcoming and diverse community.

As a Loyola student, you will study with leading researchers and practitioners in the same doctrinal, upper-level, and skills classes as your U.S. peers. You may choose to complete one of two tracks: Immersion in U.S. Law OR International Law with a Certificate Focus.

Related Programs

Doctoral

- Law (JD Full time) (p. 1795)

Certificate

- International Law and Practice Certificate (p. 1793)

Curriculum

You can choose to start the program in the fall semester (mid-August) or spring semester (mid-January). The program is designed to be completed within one year, but you may complete the program part-time over up to two years. Flexible curriculum options include our weekend-program and evening classes that allow students to continue their employment while completing the LLM degree.

You will enroll in two mandatory classes that are designed exclusively for all international LLM students to introduce core concepts of the U.S. legal system and legal research and writing methods. We work with you to select the courses that suit your academic interests and professional goals best.

Track 1: Immersion in U.S. Law

Designed for foreign lawyers who seek to develop an expertise in American law, the rigorous curriculum immerses you in the foundations of U.S. law and legal thought and provides a thorough training in legal skills critical to advising clients in the U.S. or globally. The students in this track plan to sit for a bar exam and/or pursue a legal career in the US.

Track 1: Immersion in U.S. Law Courses

The curriculum for Track I is designed to include the core courses currently required by the New York State Board of Law Examiners for foreign lawyers obtaining an LLM degree. While we provide you with the required courses to satisfy the eligibility and admissions requirements to sit for New York's and select other bar exams, we make no representation or guarantee that any student or graduate of our LLM Program for International Lawyers will be qualified or eligible to sit for the New York or any other state bar examination.

Code	Title	Hours
Required Courses		
LAW 880	Introduction to U.S. Law and the Legal System	1
LAW 881	Legal Research and Writing for Foreign Lawyers I	2
LAW 882	Legal Research and Writing for Foreign Lawyers II	2
LAW 883	Introduction to the Law of the United States II	1
LAW 414	Professional Responsibility	3
Select six credits of subjects tested on the New York bar examinations:		**6**
LAW 221	Administrative Law	
LAW 185	Business and the Law	
LAW 270	Business Organizations	
LAW 601	Child, Family, and the State	

LAW 113	Civil Procedure

LAW 524	Sales
LAW 231	Secured Transactions
LAW 162	Torts
Elective Coursework	**9**
Round off your education by selecting nine credit hours from the over 200 courses and seminars we offer each year. Additionally, we offer non-credit workshops to introduce you to bar exam and professional skills.	
Total Hours	**24**

Track 2: International Law with a Certificate Focus

Designed for students interested in private and public international law, you may earn a focus certificate in any of Loyola's specialty areas, all of which include strong international and comparative components: arbitration, mediation, negotiation; business and corporate; child and family; competition; environmental; health; human rights; immigration; intellectual property; tax; or trade law. Under the guidance of our engaged international faculty, you also may develop your own focus to match your academic interests and professional goals.

Track 2: International Law with a Certificate Focus Option Courses

In Track 2, you will enjoy flexibility in designing your own curriculum to match your academic interests and professional goals. You must complete the required courses and at least 7 credits in international law and 7 credits in any specialty area.

Code	Title	Hours
Required Courses		
LAW 880	Introduction to U.S. Law and the Legal System	1
LAW 881	Legal Research and Writing for Foreign Lawyers I	2
LAW 882	Legal Research and Writing for Foreign Lawyers II	2
LAW 883	Introduction to the Law of the United States II	1
Elective Coursework		
Complete 18 credits of elective coursework, tailored to match your interests and career goals:		18
International Law (7 credits) [1]		
Area of Focus Courses (7 credits)		
Additional Courses (4 credits)		
Total Hours		**24**

[1] LAW 371 International Business Trans (or other international law course with approval)
LAW 372 International Law and Practice (or other international law course with approval)

Degree Requirements

To earn your degree, you must complete at least 24 credit hours of coursework, while maintaining the GPA requirement. Visit our Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. You may access full course descriptions here (p. 1715).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

You will be able to:

- Analyze and apply U.S. legal authority and perform legal analysis and problem-solving methods employed by U.S. lawyers
- Develop proficiency in Legal English, in both written and oral communications
- Illustrate professionalism standards consistent with the U.S. legal profession's values and standards

Law (JD Full time)

There's more to a legal education than mastering "black letter" law.

Loyola's Juris Doctor (JD) program combines the academic rigor you expect with the practical experience you'll need to rise above the competition. Working with our nationally-recognized faculty, you'll learn to effectively apply the law to real-world scenarios. As a Loyola graduate, you'll be prepared for practice from day one, ready to meet (and exceed) the demands of prospective clients and employers.

Doctoral

- Law (Weekend Part-Time JD) (p. 1798)

Combined

- Law/Business (JD/MBA) (p. 1874)
- Political Science/Law (MA/JD) (p. 1888)

Curriculum

To earn a JD degree, you must complete a minimum of 86 credit hours of coursework, 74.0 hours must be graded. Students may take up to 28.0 hours of distance learning credits. A minimum of 6 credit hours of experiential learning are required. Your first year coursework provides a strong, structured foundation. During the next two years you will tailor your courses, experiential learning, and course delivery to meet your goals and interests. Visit our Registrar webpage (https://

www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration information.

In your first year at Loyola, you'll work closely with our highly regarded faculty to learn the art of legal analysis and foundations of the American legal system. You're also eligible to choose an elective course of interest to you. If you decide to specialize, our programs offer everything you need.

Upper Level Required Courses

- Skills Training Course (2 credits)
  A skills class is one that offers substantial instruction in the professional skills generally regarded as necessary for effective and responsible participation in the legal profession. All JD students are required to complete the skills course requirement prior to graduation. This requirement no longer applies to students starting their JD Fall 2023 or later.
- Experiential Learning (6 credits)
  Experiential learning classes enable students to perform their legal knowledge, skills and values in a real or simulated practice setting with intense, ongoing law school supervision and assessment. Examples include live-client clinics, judicial or non-judicial externships, practica, or comprehensive simulations. At least three of these credits must involve work with live clients. The remaining three credits can involve comprehensive simulations.
- LAW 414 Professional Responsibility (taken after first year)
- BCCR Elective (2-3 credits)
  One course that involves substantial instruction in bias, cross-cultural competency, and racism.
- Rigorous Writing Elective (2-3 credits)
  Rigorous Writing courses all provide students with the opportunity to draft, edit, polish and produce one or more advanced writing projects that are assessed by the faculty through detailed individualized feedback at each stage of the writing process.

[1] To be taken first year full-time/second year part-time.

[2] Students who have a GPA below 2.9 after their second, third, or fourth semester of law school must complete "BAR EXAM FUNDAMENTALS" (LAW 232) in order to graduate. This class should be taken in the Fall or Spring of their third year for full-time students, and in the Fall or Spring of their fourth year for Weekend JDs.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

You will be able to:

- Utilize skills derived from participation in supervised live-client experiences, externships, or litigation and transactional practice simulations, such as interviewing, counseling, negotiation, mediation, fact development and analysis, problem solving, design thinking, trial practice, document drafting, and collaborative work
- Determine your clients' needs and objectives
- Determine relevant facts and understand their relevance to your client's legal position
- Conduct legal research
- Analyze and apply relevant legal principles
- Find solutions to legal problems
- Communicate legal concepts clearly and effectively, both orally and in writing

Law (Weekend Part-Time JD)

Imagine a part-time JD program that fits into your busy schedule.

A program combining on-campus classes with one of the leading providers of online legal education in the country. A program that features nationally renowned professors in a world-class city. Now, imagine that program meeting just every other weekend. This is Loyola's Weekend (part-time) JD program—thoughtfully designed to turn your law school ambitions into reality.

Upper Level Required Courses

- Skills Training Course (2 credits)
  A skills class is one that offers substantial instruction in the professional skills generally regarded as necessary for effective and responsible participation in the legal profession. All JD students are required to complete the skills course requirement prior to graduation. This requirement no longer applies to students starting their JD Fall 2023 or later.
- Experiential Learning (6 credits)
  Experiential learning classes enable students to perform their legal knowledge, skills and values in a real or simulated practice setting with intense, ongoing law school supervision and assessment. Examples include live-client clinics, judicial or non-judicial externships, practica, or comprehensive simulations. At least three of these credits must involve work with live clients. The remaining three credits can involve comprehensive simulations.
- LAW 414 Professional Responsibility (taken after first year)
- BCCR Elective (2-3 credits)
  One course that involves substantial instruction in bias, cross-cultural competency, and racism.
- Rigorous Writing Elective (2-3 credits)
  Rigorous Writing courses all provide students with the opportunity to draft, edit, polish and produce one or more advanced writing projects that are assessed by the faculty through detailed individualized feedback at each stage of the writing process.

Highly Recommended Courses

Code	Title	Hours
LAW 221	Administrative Law	3
LAW 280	Federal Income Tax	3

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
First Year		
Fall

[1] To be taken first year full-time/second year part-time.

[2] Students who have a GPA below 2.9 after their second, third, or fourth semester of law school must complete "BAR EXAM FUNDAMENTALS" (LAW 232) in order to graduate. This class should be taken in the Fall or Spring of their third year for full-time students, and in the Fall or Spring of their fourth year for Weekend JDs.

Flexible Course Options

In addition to an array of electives, many flexible course options will be available, including summer coursework, independent study, intersession courses, and fully online courses (as many as 28-credit hours of fully online coursework).

Degree Requirements

To earn a JD degree, you must complete a minimum of 86 credit hours of coursework, 74.0 hours must be graded. Students may take up to 28.0 hours of distance learning credits. A minimum of 6 credit hours of experiential learning are required. Your first four semesters provide a strong, structured foundation. During the next two years you will tailor your courses, experiential learning, and course delivery to meet your goals and interests. Visit our Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. You may access full course descriptions here (p. 1715).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

You will be able to:

- Utilize skills derived from participation in supervised live-client experiences, externships, or litigation and transactional practice simulations, such as interviewing, counseling, negotiation, mediation, fact development and analysis, problem solving, design thinking, trial practice, document drafting, and collaborative work
- Determine your clients' needs and objectives
- Determine relevant facts and understand their relevance to your client's legal position
- Conduct legal research
- Analyze and apply relevant legal principles
- Find solutions to legal problems
- Communicate legal concepts clearly and effectively, both orally and in writing

Privacy Law Certificate

In a globally connected world, privacy law expertise is in high demand.

Designed for legal and non-legal professionals, the Certificate in Privacy Law focuses on security regulations, U.S. and international data privacy law and breach management.

Related Programs

Doctoral

- Law (JD Full time) (p. 1795)

Combined

- Political Science/Law (MA/JD) (p. 1888)
- Public Policy/Law (MPP/JD) (p. 1893)

Curriculum

To successfully complete the Certificate in Privacy Law, you must complete 8 credit hours from among the courses listed below (substitute courses approved on a case-by-case basis). You may start your studies during any of our three terms (spring, summer, or fall) and pace your studies as you wish, completing 8 credits in two to three terms or a minimum of 2 credits (one course) per term. The program is offered exclusively online.

Code	Title	Hours
First Term		
Electives	Choose 4 Credits of Elective Options	4
Second Term		
Electives	Choose 4 Credits of Elective Options	4
Total Hours		**8**

Degree Requirements

To earn a Certificate in Privacy Law, students must complete a total of 8 credit hours. Visit the Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. Full course descriptions are available here (p. 1715).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By the end of this program, you will be able to:

- Describe international and domestic privacy and information security laws and regulations.
- Integrate laws and regulations into operational policies and procedures to yield best practices for data privacy and information security.
- Respond to a variety of privacy breach scenarios and demonstrate improvement in skills necessary for success in a variety of privacy industry roles.
- Demonstrate the skills necessary for basic industry certification exams by the International Association of Privacy Professionals and other professional organizations.

Public Interest and Social Justice Certificate

Join our tradition of expanding knowledge in the service of humanity

Rooted in our Jesuit identity, Loyola's JD Certificate in Public Interest and Social Justice prepares you for practice settings in government and the non-profit arena where you will advocate and work in service to others. You'll find robust coursework, many clinical opportunities and resources, and co-curricular activities that will provide you with legal skills to help those in need. Our graduates work in civil and criminal law, represent underserved populations, and work to protect legal rights.

Total Hours	**12-14**

[1] Must enroll in during your second or third year of law school, when you have completed or are in the process of completing your 30 required volunteer service hours and a clinical program or externship.

[2] Must earn a B or better in each of the four public interest elective courses.

Clinic or Externship Experience

You must complete a clinic, practica, or externship at a government agency or agency that serves, represents, or advocates on behalf of indigent persons, disadvantaged groups, or inadequately protected interests:

- Business Law Clinic
- ChildLaw Clinic
- Community Law Center Clinic
- Education Law Practicum
- Externship (government agency or non-profit organization)
- Federal Tax Clinic
- Health Justice Project
- Life After Innocence Project

Co-Curricular Experience

You must complete 30 hours of public service work. This work does not need to be at one organization and it need not be completed prior to enrolling in the Public Interest Law Seminar.

Applying for your Certificate

After completion of all requirements, you must complete an application (https://luclawschool.formstack.com/forms/public_interest_and_social_justice_certificate/) for the Certificate in Public Interest and Social Justice. Submit a completed application to the Director of Public Interest Programming for signature. You must then submit your signed application form to the Law School Registrar's Office.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Each student graduating with the Certificate in Public Interest and Social Justice must demonstrate that they:

- Possess substantive knowledge in areas of public interest law;
- have an understanding of marginalized populations and the intersectionality of issues among those populations;
- have had practical experience in working within a not-for-profit or governmental entity under the supervision of a licensed attorney; and
- have volunteered to work with or on behalf of underserved individuals or communities.

Rule of Law for Development (PROLAW) (MJ)

To overcome the world's challenges—violence, infringements of human rights, environmental destruction, poverty and hunger—rule of law is essential. Rule of law is also essential to supporting commerce, attracting investment, and achieving sustainable economic growth.

The Master of Jurisprudence (MJ) in Rule of Law for Development (PROLAW) is a practice-oriented degree program for non-legal professionals, which will prepare you to become a leader, reformer and driver of change in the expanding effort to advance the rule of law throughout society and across sectors, within your own country and around the world.

Related Programs

Master's

- Rule of Law for Development (PROLAW) (LLM) (p. 1805)

Doctoral

- Law (JD Full time) (p. 1795)

Curriculum

You can complete this 30 credit MJ degree in one academic year, or over two years. This blended virtual and in-person degree includes both online study and a term at our Loyola Rome Center campus in Italy. There is one annual program intake each year, in the fall.

The curriculum combines theory with practice in the course work, allowing you to gain both the knowledge of key topics and issues, and the skills all rule of law professionals need to work effectively on rule of law and development matters. Your courses will be taught by experienced practitioners who have multijurisdictional experience in supporting national initiatives aimed at improving the rule of law.

	Hours	**3**
	Total Hours	**30**

Degree Requirements

To earn a PROLAW MJ, you must complete 30 credit hours of coursework, including ten courses and a major rule of law capstone project. Visit our Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. You may access full course descriptions here (p. 1715).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

You will be able to:

- Conduct research and assess rule of law problems.
- Draft rule-of-law-related documents.
- Develop a theory of change/sequencing of legal reform.
- Implement rule of law initiatives across legal cultures.
- Develop and manage rule of law programs and projects.
- Advise on institutional and legal frameworks.
- Devise strategies for international/inter-organizational cooperation in governance, conflict prevention, and peacebuilding.

Rule of Law for Development (PROLAW) (LLM)

To overcome the world's challenges—violence, infringements of human rights, environmental destruction, poverty and hunger—rule of law is essential. Rule of law is also essential to supporting commerce, attracting investment, and achieving sustainable economic growth.

The Master of Laws (LLM) in Rule of Law for Development (PROLAW) is a practice-oriented degree program for law graduates and lawyers. You will receive the advanced training and skills you need to inspire, lead, and manage efforts to strengthen both the rule of law and prospects for national development in your country and geographical region.

- Advise on institutional and legal frameworks.
- Devise strategies for international/inter-organizational cooperation in governance, conflict prevention, and peacebuilding.

Tax Law (LLM)

Tax law is complicated and getting more so. Working in this area requires a thorough understanding of all legal nuances. The LLM in Tax Law degree program offers valuable training for practicing attorneys looking to stay on top of the latest in tax law, corporate law or general business law. You'll be ready to offer the tax planning and compliance advice your individual corporate clients need, enhancing your skill set and areas of practice.

Related Programs

Certificate

- Tax Law Certificate (p. 1806)
- Transactional Law Certificate (p. 1807)

Curriculum

To develop the specialized knowledge and skills that will help you as a tax attorney, you will complete a mix of required and elective courses in one to two years of study. Courses are offered on-campus at Loyola's Water Tower Campus.

Code	Title	Hours
Required Courses		
LAW 280	Federal Income Tax	3
LAW 281	Corp & Partnership Tax	3
LAW 380	Estate & Gift Tax	3
LAW 386	Advanced Corporate Tax	3
LAW 860	LLM Tax Seminar	2
Elective Courses		**12**
LAW 346	State & Local Taxation	
LAW 382	International Tax Law	
LAW 451	Estate Planning	
LAW 481	Employee Benefits Law	
LAW 483	Federal Tax Clinic I	
Total Hours		**26**

Degree Requirements

To earn the Tax Law LLM degree, you must complete 26 credit hours, including the LLM Tax Research and Tax Seminar courses. Visit our Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. You may access full course descriptions here (p. 2428).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

You will be able to:

- Apply the relevant statutory rules in a variety of situations;
- Describe and analyze tax issues, the role of case law in the development of tax law and the impact of administrative pronouncements on tax law.
- Analyze tax issues; and
- Describe and act in the role of a tax planner.

Tax Law Certificate

Prepare to excel as a corporate, tax, or estate planning attorney by taking part in Loyola's deep tax curriculum.

Our alumni are proof of our success. Loyola alums are among the top business, tax, and estate planning attorneys in Chicago and beyond. The JD Certificate in Tax Law is a big reason. Our accomplished full-time faculty, along with top tax and estate planning practitioners, offer an unusually deep curriculum. And our Federal Tax Law Clinic and Business Law Clinic provide opportunities for students to get hands-on experience as an integral part of their education. The combination means graduates will be ready to excel as corporate, tax and estate planning attorneys.

	Total Hours	**14**

Applying for Your Certificate

At the beginning of your third year, you must complete an application (https://luclawschool.formstack.com/forms/application_for_certificate_in_tax_law_for_j_d_students/) for the Certificate in Tax Law. Submit your completed application to an approved tax law faculty member for signature. You must then submit your signed application form to the Law School Registrar's Office.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Tax Law Certificate recipients will become equipped with essential knowledge of the Federal tax law that applies to individuals, corporations, partnerships, limited liability companies, trusts, and estates.
- Tax Law Certificate recipients will understand the procedural rules that apply when a taxpayer is audited by the Internal Revenue Service as well as basic controversy negotiation strategies.
- Tax Law Certificate recipients will develop fundamental lawyering skills including developing and evaluating strategies for solving problems, analyzing and applying legal rules and principles, learning to read and analyze a statute, developing a planning perspective, and being attuned to ethical issues.
- Tax Law Certificate recipients will be capable of identifying and diagnosing problems, developing strategies for solving a problem, identifying legal issues, and applying statutes and legal doctrines to those issues.

Transactional Law Certificate

Learn from experts. Be practice-ready.

Transactional lawyers need strong analytical, drafting, writing, and negotiation skills so they can counsel organizations and individuals on a variety of legal and business issues. Loyola's JD Certificate in Transactional Law provides you with the valuable training and experience to be successful in firms of all sizes and in various corporate law settings.

The Center for Business Law

The Transactional Law Certificate is administered by the following faculty members:

Patricia Hureston Lee
Clinical Professor of Law; Executive Director, Center for Business Law; Director, Business Law Clinic
Suite 1005
plee12@luc.edu

Steven Ramirez
Professor of Law; and Director, Center for Business Law
Suite 1005
sramir3@luc.edu

[1] Second Year for JD students, Weekend JD Students in the Third Year

[2] These courses can be taken in any term.

[3] You must complete a business law externship, clinical, or work experience. All externship experiences and volunteer/employment experiences must be approved in advance. Pre-approved paid work, work as a research assistant, or volunteer work count toward the experiential requirement.

Applying for the Certificate

At the beginning of your third year, you must complete an application (https://luclawschool.formstack.com/forms/certificate_in_transactional_law_copy/) for the Certificate in Transactional Law. You must submit a completed application to the Center for Business Law faculty member for consultation and signature. You must then submit your signed application form to the Law School Registrar's Office.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Each student graduating with the Certificate in Transactional Law must demonstrate:

- competence in the business and transactional law subject areas covered by the following required courses: Business Organizations, Federal Income Tax and Corporate or Partnership Tax;
- competence in reading, interpreting, and considering basic financial statements and other basic financial literacy skills in deals as covered by the following required courses: Business Organizations, Federal Income Tax and Business Law Clinic;
- competence in securities regulation subject area as covered by the following required course: Securities Regulation;
- competence in interviewing, counseling, and communicating with clients, supervising attorneys, and other deal team members in the context of a business deal through the law school's experiential program (the business law clinic or externship); and
- competence in identifying ethical issues in business transactions through Externships and the Business Law Clinic.

Trial Advocacy, Appellate Advocacy, and Alternative Dispute Resolution (LLM)

As of Fall 2026, this program is no longer accepting applicants.

Crafting an opening statement. Studying the evidence. Delivering oral arguments. Perfecting these skills (and many more) can transform an attorney into a great advocate. The Masters of Laws (LLM) in Trial Advocacy, Appellate Advocacy, and Alternative Dispute Resolution degree program is designed for practicing attorneys refocusing their careers toward litigation or dispute resolution as well as recent graduates who wish to sharpen the skills developed in a JD or equivalent degree program.

Your coursework combines lectures, faculty demonstrations, and student presentations. And you'll gain invaluable experience through simulated depositions, jury trials, oral arguments, arbitrations, and mediations. All three areas of dispute resolution will be covered.

Degree Requirements

To earn an LLM in Trial Advocacy, Appellate Advocacy, and Alternative Dispute Resolution, you must complete 24 credits of course work. Visit our Registrar (https://www.luc.edu/law/currentstudents/registrar/) for a complete list of degree requirements, academic calendars, and registration process. You may access full course descriptions here (p. 1715).

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

You will be able to:

- Try a complex case before a court of law in a bench trial and jury trial setting;
- Engage in critical case analysis that leads to the development of a persuasive theory of the case;
- Conduct challenging witness examinations that adhere to the rules of evidence for direct and cross examination of lay and expert witnesses;
- Develop a communication style that results in the delivery of persuasive opening statements and closing arguments;
- Lay the foundation for admissibility for all forms of evidence, including electronic, and make and respond to evidentiary objections;
- Analyze and compose a substantial written work of advocacy, including motions, briefs, position papers and research papers in a complex litigation, appellate setting;

- Draft, present, and defend a persuasive written advocacy document in the context of complex litigation at the appellate court setting;
- Build upon the fundamentals of mediation, negotiation, arbitration and other dispute resolution venues and assess the dispute resolution process appropriate to the situation; and
- Assist clients in achieving goals in any dispute resolution setting by analyzing party interests and crafting and designing creative solutions in a mediation or settlement negotiation or employ oral and written advocacy skills in an arbitration setting.

School of Social Work

About Us

Founded in 1914, Loyola University Chicago's School of Social Work educates students to become leaders in the profession. Within a learning community dedicated to excellence in scholarship and service, students select a curriculum focused on clinical, organizational, community, and social justice issues.

Accreditation

Loyola's Master of Social Work (MSW) degree program has been continuously accredited by the Council on Social Work Education (https://www.cswe.org/) since 1921. Loyola's Bachelor of Social Work (BSW) degree program has been continuously accredited by the Council on Social Work Education since 1976.

MSW Program Specializations

For the Master's in Social Work (p. 1831) program, two specializations are available: Micro Practice and Leadership, Mezzo, and Macro Practice.

Internship Experiences

Through relationships with over 1,500 agencies, non-profit organizations, hospitals, and schools in the Chicagoland area, Loyola provides outstanding access to supervised internships (https://www.luc.edu/socialwork/student-support/internship/).

Ph.D.

The Ph.D. in Social Work (p. 1398) trains scholars adept in clinical research, scholarship, and teaching. The School and the University embrace ideals of social justice and service to others, commitments that inform the program's examination of clinical theories, practices, and systems of service delivery.

School of Social Work Graduate Programs

- Post-MSW Professional Educator License: School Social Worker Endorsement (p. 1830)
- Social Work (MSW) (p. 1831)
- Social Work Advanced Standing Program (MSW) (p. 1837)
- Social Work Online (MSW) (p. 1839)
- Social Work Advanced Standing Online Program (MSW) (p. 1841)
- Social Work/Children's Law and Policy (MSW/MJ) (p. 1898)
- Social Work/Law (MSW/JD) (p. 1900)
- Social Work/Public Health (MSW/MPH) (p. 1904)
- Social Work: Online Bilingual Program (MSW) (p. 1842)
- Social Work: Advanced Standing Online Bilingual Program (MSW) (p. 1844)
- Women's Studies and Gender Studies (MA)/Social Work (MSW) (p. 1907)

MSW Specializations & Tracks

- Leadership, Mezzo, and Macro Practice (LMMP) Specialization with Leadership, Community, Advocacy, and Policy (LCAP) Track (p. 1846)
- Micro Practice Specialization with Advanced Clinical Practice Track (p. 1849)
- Micro Practice Specialization with Certified Alcohol and Other Drugs Counselor Training Program (CADC) Track (p. 1852)
- Micro Practice Specialization with Migration Studies Track (p. 1855)
- Micro Practice Specialization with Schools/Professional Educator License (PEL) Track (p. 1858)

Graduate School Programs

- Social Work (PhD) (p. 1398)

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Social Work

SOWK 500 Life Span Development, Human Behavior, Trauma, & Theory (3 Credit Hours)
This course will consider bio-psycho-social-spiritual theories across the life-course, with a focus on trauma and resilience and an understanding of the role of neuroscience in development.
Course equivalencies: SOWK 305/SOWK 500
Outcomes:
1) Analyze how racism, oppression, cultural context, and structural inequities influence human development and adaptation across the life span using biopsychosocial spiritual and life course perspectives; 2) Apply theories of human development, trauma, resilience, and neuroscience to explain engagement with individuals and families within their social and environmental contexts; 3) Assess developmental strengths, stressors, risk and protective factors, and environmental influences affecting individuals and families at different life stages using relevant social work theories and empirical literature

SOWK 501 Assessment of Client Concerns in Context (3 Credit Hours)
Course will teach students to conduct a strengths-based and contextual assessment of client concerns. Students will learn to conduct a culturally informed bio-psycho-social-spiritual assessment in which they gather information about presenting concerns from the perspective of clients and collateral sources.
Course equivalencies: SOWK 380/SOWK 501
Outcomes:
1) Demonstrate and apply knowledge and skills for conducting a biopsychosocial-spiritual assessment; 2) Conceptualize culturally-informed diagnostic assessment; 3) Develop and apply DSM-5-TR diagnostic assessment to a simulated patient, producing a culturally-informed DSM-5-TR diagnosis

SOWK 502 Power, Oppression, Privilege, and Social Justice (3 Credit Hours)
This course is designed to assist social work students with understanding the concepts of power, privilege, oppression, and social justice in their work with historically marginalized and oppressed populations.
Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50
Outcomes:
Analyze how personal identities, values, and biases influence professional behavior, and apply ethical principles and cultural humility to evaluate practice within diverse and oppressive systems; Evaluate how systems of power, privilege, and oppression shape human rights and opportunities, and create strategies to advance social, economic, and environmental justice through advocacy and allyship at the micro, mezzo, and macro levels; Synthesize theoretical frameworks (critical race theory, intersectionality, anti-oppressive and strengths-based practice) to design and apply culturally responsive, collaborative interventions that promote empowerment and systemic change

SOWK 503 Practice Skills with Individuals and Families (3 Credit Hours)
Pre-requisites: Corequisite is SOWK 501; Restricted to Graduate Social Work students
This introductory micro practice course begins by focusing on the development of core skills for social workers in their encounters with individuals and families.
Course equivalencies: SOWK 301/SOWK 503
Outcomes:
1) Analyze biopsychosocial-spiritual development across the life span by examining how trauma, resilience, culture, and social environments influence individuals and families at different developmental stages; 2) Apply human development and social work theories to real-life contexts in order to interpret individual and family experiences across the life course, with attention to diversity, oppression, and resilience; 3) Evaluate how social work knowledge of life span development informs ethical, culturally responsive practice and contributes to effective engagement, assessment, and intervention across systems

SOWK 504 Integrated Micro/Mezzo/Macro Theory and Practice (3 Credit Hours)
This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community engaged practices. While integrating theories of sociology, political science, anthropology, public health, and urban studies, as well as practice knowledge, the class examines relationships between social, economic, political, and cultural structures, collective action, and individual attitudes and behaviors.
Outcomes:
1) Understand integrated practice models that apply across micro, mezzo, and macro domains, 2) appraise the quality and utility of empirical research related to the key theories, topics, and problems examined

SOWK 505 Group Work Practice in Social Work: Micro/Mezzo/Macro (3 Credit Hours)
This course presents theoretical and practical approaches to social work with groups, with a focus on group development, dynamics, and processes.
Course equivalencies: SOWK 303/SOWK 505
Outcomes:
1) Demonstrate and apply ethical and professional behavior by integrating social work values, self-awareness, and group facilitation skills that promote inclusivity, collaboration, and mutual support among diverse group members; 2) Analyze and synthesize group dynamics, theories, and evidence-based practices to assess group needs, develop goals, and implement interventions that foster empowerment and social justice; 3) Engage and collaborate with individuals and groups to plan, lead, and evaluate group processes that enhance collective well-being, inclusion, and effective problem-solving across diverse settings

SOWK 506 Research and Evaluation in Social Work Practice (3 Credit Hours)
This course introduces the methods of social work research, including problem formulation, research ethics, research designs, measurement, data collection, sampling, and data analysis through a social justice/anti-racist/global perspective.
Course equivalencies: SOWK 390/SOWK 506
Outcomes:
1) Critically analyze social work research studies for ethical rigor, cultural responsiveness, anti-racist practice, and methodological quality using established research standards; 2) Apply practice-informed research principles to formulate research questions, select appropriate qualitative, quantitative, or mixed-methods designs, and justify methodological choices relevant to social work practice; 3) Design and evaluate a research or program evaluation proposal that includes ethical considerations, sampling strategies, data collection plans, and analysis approaches to assess practice and program effectiveness

SOWK 508 Integrated Micro, Mezzo, and Macro Practice (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work Students
This course focuses on integrated practice approaches that span three frameworks, including micro (e.g. individuals, families, and groups), mezzo (e.g. communities), and macro (e.g. systems, society) levels. It will examine various theories and models, the quality and utility of empirical research, as well as the impact of interprofessional and interdisciplinary collaboration efforts.
Outcomes:
1) Apply ethical, professional, and anti-oppressive social work values to engage individuals, families, groups, organizations, and communities using integrated micro, mezzo, and macro practice frameworks that advance human rights and social justice; 2) Assess social problems, client systems, and policy contexts using person-in-environment, systems, and policy-aware frameworks to identify strengths, risks, and structural influences across micro, mezzo, and macro levels of practice; 3) Design and implement integrated intervention strategies that address social problems through coordinated micro, mezzo, and macro actions to promote equitable, sustainable change

SOWK 509 Social Work Policy and Community Intervention (3 Credit Hours)
Drawing from social work theory, research, and practice, Social Work Policy and Community Interventions examines the roles of social workers in policy practice as well as change agents within community and organizational contexts.
Outcomes:
1) Analyze how social, racial, economic, and environmental injustices are embedded in existing policies and evaluate their impacts on individuals, families, and communities; 2) Design and advocate for equitable, evidence-informed policies that promote social change and address systemic inequities at local, national, and global levels; 3) Apply policy analysis frameworks and research evidence to assess the effectiveness of policy interventions and design strategies for implementation that improve service delivery and community well-being

SOWK 600 Dissertation Supervision (1 Credit Hour)
Students register for this course once they have finished their core curriculum, passed their comps, and have an approved dissertation proposal.\\n
Outcomes:
Design and defend a dissertation proposal and prepare and submit an application for Institutional Review Board (IRB) approval; Implement original research by executing the approved study and defending the final dissertation according to program standards

SOWK 602 Health and Behavioral Health Policy and Systems (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides students with frameworks for understanding the interrelationship between developments in health and behavioral health policy, delivery systems, and social work practice on micro, mezzo, and macro levels. Practice issues associated with organizational structure, patient-centered care, team and interdisciplinary relations, as well as collaboration and conflict, are considered.
Outcomes:
Analyze and evaluate the structure and financing of US health and behavioral health systems to identify disparities and propose strategies that promote equitable access to care; Critically assess and apply theories and models of health policy to develop evidence-informed recommendations that address systemic inequities in health and behavioral health service delivery; Design and advocate for policy and organizational changes that advance social, racial, and economic justice within health and behavioral health systems through interdisciplinary collaboration and stakeholder engagement

SOWK 603 Seminar in Brief Treatment (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This seminar builds on the student's knowledge of short-term treatment, expanding this knowledge and skill toward understanding, and the practice of brief treatment as a modality of social work intervention. It examines the essential components of brief treatment (task-centered, crisis intervention, brief psychotherapy) with individual clients.
Outcomes:
Demonstrate ethical and culturally responsive professional behavior by applying social work values, self-reflection, and critical thinking to diverse brief treatment settings and client populations; Integrate and apply evidence-informed theories and research to assess client needs and formulate treatment goals within brief therapeutic frameworks such as psychodynamic, cognitive-behavioral, and solution-focused models; Design, implement, and evaluate time-limited interventions that promote client empowerment, well-being, and measurable progress within ethical and evidence-based social work practice

SOWK 604 Advanced Clinical Social Work Practice with Groups (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The course focuses on multiple theoretical approaches in group work practice with diverse and at-risk populations with an emphasis on social and economic justice
Although the focus is on treatment groups, content will include the structure, function and techniques of intervention with all types of groups, emphasizing the conscious use of self. The method of instruction is interactive, collaborative, and experientially based.
Outcomes:
Demonstrate and apply ethical, reflective, and culturally responsive professional behavior by integrating social work values, group work standards, and anti-oppressive frameworks in diverse group settings; Analyze and synthesize theories, research, and policies that inform group work practice, and design interventions that promote human rights, social, racial, economic, and environmental justice within therapeutic and community groups; Engage, assess, intervene, and evaluate group processes by applying evidence-informed models, facilitating collaboration, and evaluating outcomes to strengthen group cohesion and empower members

SOWK 605 Human Sexuality and Sexual Dysfunction (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, SOWK 506, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides basic knowledge about the physiology and psychology of human sexuality as well as consideration of some areas of sexual dysfunction. Attention is also focused on cultural, societal, and personal attitudes which may affect the student's response to this area of practice.
Outcomes:
Analyze how their own identities, values, and biases influence perceptions of human sexuality and evaluate how ethical principles and cultural humility can be applied to promote sex-positive, inclusive, and affirming practice across client systems; Evaluate how intersecting systems of power, privilege, and oppression shape sexual health outcomes and create strategies to advance human rights and sexual justice through advocacy, policy development, and macro-level interventions; Synthesize research, theory, and clinical frameworks to design and implement evidence-informed interventions that address sexuality-related issues across the lifespan and promote empowerment, advocacy, and systemic change

SOWK 606 Practicum in Research & Evaluation (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 506, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is designed to introduce MSW students to a range of philosophies, methods, and techniques that are useful for evaluating human service programs and practice interventions. The course is intended to help you become more aware of the range of evaluation activities conducted in health care and human service agencies and to prepare you to conduct your own small and mid-range evaluations of programs and practice.

SOWK 609A School Social Work Policy and Practice I (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course is the first of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education.
Outcomes:
Demonstrate and apply ethical, anti-racist, and equity-informed professional behavior by analyzing the roles and responsibilities of school social workers within P-12 systems and adhering to NASW standards and school-based policies; Critically analyze and synthesize school and education policies to evaluate their impact on student well-being, access, and equity, and propose strategies that promote human rights and social, racial, and economic justice; Design and evaluate evidence-informed, systemic interventions that address barriers to learning and promote inclusive, trauma-informed, and data-driven practices in school settings

SOWK 609B School Social Work Policy and Practice II (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course is the second of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education.
Outcomes:
Demonstrate and apply ethical, reflective, and culturally responsive professional behavior in school settings by integrating anti-racist, anti-oppressive, and evidence-informed principles in their assessment and intervention practices; Analyze and synthesize data from multiple sources to assess student strengths and needs, design functional behavioral analyses, and develop evidence-informed intervention plans that promote equity and positive student outcomes; Evaluate and advocate for policies and crisis intervention strategies that advance human rights, social and racial justice, and systemic well-being within educational environments

SOWK 611 Social Work Practice with Couples (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course explores clinical models and techniques for the treatment of couples with relationship problems
Primary attention is given to the integration of systemic and analytical theories. Specific strategies and techniques are presented and demonstrated. Attention is given to the range of symptomatology and challenges including sexual dysfunction.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and equity-based perspectives in analyzing relational dynamics, power imbalances, and cultural influences in couple therapy; Integrate and synthesize evidence-informed theories, research findings, and systemic frameworks to assess couple functioning and develop treatment plans responsive to diverse relational contexts; Design, implement, and evaluate therapeutic interventions using multiple couple therapy models to promote emotional connection, relational resilience, and positive outcomes for diverse and non-traditional couples

SOWK 612 Family Assessment and Intervention (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The course examines different theoretical approaches to assessment and intervention with families
The focus will be on interpersonal interaction patterns and on systems rather than on individual feelings and behaviors, although those aspects of working with family members are not excluded. Different models of family therapy will be described, applied to case problems, compared with other models and/or theories, and evaluated for their effectiveness.
Outcomes:
Demonstrate and apply ethical and culturally responsive professional behavior by integrating anti-racist, anti-oppressive, and equity-based principles into family assessment and intervention practices; Analyze and evaluate family dynamics, structures, and systems through evidence-informed frameworks to develop assessment plans and advocate for policies that promote human rights, justice, and equitable access to family support resources; Design, implement, and evaluate family-centered interventions that promote communication, resilience, and systemic change within diverse, nontraditional, and intergenerational family systems

SOWK 613 Advanced Family Treatment (3 Credit Hours)
This course deepens students clinical practice competence in family therapy. Through discussion and experiential exercises, use of case vignettes and films, it will refine understanding of the therapeutic process and the development of treatment skills. Students will advance their understanding of the relationship between treatment goals and treatment techniques.

SOWK 614 Clinical Social Work Practice in Health Care (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will view the practice of social work in health care as the integration of physical and mental health. We will explore in depth the biopsychosocial concomitants of physical and mental disorders. The integration of both health and mental health has implications for assessment and intervention and relies upon a person-centered/relation-centered framework.
Outcomes:
Demonstrate and apply ethical, professional, and collaborative behavior by integrating social work values, standards, and interprofessional communication skills in healthcare settings to support holistic client care; Analyze and evaluate health disparities and systemic inequities by applying evidence-informed research and policy frameworks that advance human rights, social, racial, and economic justice in healthcare practice; Design, implement, and assess biopsychosocial-spiritual interventions that address the complex needs of individuals and families across diverse healthcare contexts through culturally responsive and client-centered practice

SOWK 615 Social Work Practice with Adolescents (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Social workers encounter adolescents in a variety of settings, including schools, mental health, child welfare, medical, juvenile justice, and substance abuse treatment. This course seeks to prepare students for direct intervention with adolescents and their families in these settings and within young people's own social contexts.
Outcomes:
Integrate and apply research-informed theories and evidence-based frameworks to understand adolescent developmental processes (neurobiological, cognitive, emotional, and social) in order to differentiate normative behavior from indicators of psychological distress or maladjustment; Evaluate how environmental, cultural, and systemic factors influence adolescent identity formation, risk-taking, and resilience within diverse social contexts; Design and implement developmentally appropriate, strengths-based intervention strategies to support adolescents and their families across multiple practice settings, including schools, mental health, and other child-serving systems

SOWK 616 Psychotherapy with Adults (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This practice course focuses on the content and processes of psychotherapy and the strategic use of therapeutic communications with adults. The focus will include psychotherapy informed by psychodynamic and developmental frameworks.
Outcomes:
Demonstrate and apply ethical, reflective, and culturally responsive professional behavior by integrating social work values and anti-oppressive principles into psychotherapy with diverse adult populations; Analyze and evaluate the impact of systemic inequities, intersectionality, and human rights concerns on adult mental health to develop psychotherapeutic approaches that promote social, racial, and economic justice; Design, implement, and assess evidence-informed psychotherapeutic interventions that enhance client well-being and strengthen therapeutic relationships through engagement, assessment, intervention, and evaluation processes

SOWK 618 The Role of Religion and Spirituality in Psychotherapy (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course examines the predominant practice theories regarding religion and spirituality for the "person-in-the-situation". Included in the course material are relevant neurological, psychological, philosophical, theological, and sociocultural understandings of the interface between social work practice and religion and spirituality.
Outcomes:
Demonstrate and apply ethical and professional behavior by integrating social work values, critical self-reflection, and cultural humility in the assessment and understanding of how clients' religious practices and spiritual beliefs interface with mental health disorders; Analyze and evaluate the impact of systemic oppression, social inequities, and human rights issues on mental health to develop culturally responsive and justice-oriented approaches to clinical practice and psychopathology; Apply and integrate evidence-informed theories and diagnostic frameworks to assess, formulate, and intervene effectively with individuals and families experiencing mental health challenges within diverse social, religious, and spiritual contexts

SOWK 619 Issues in Treatment of Women (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The focus of the course is the identification and application of clinical social work assessment and intervention relevant to practice with women. The circumstances of women are directly relevant to the studies of children and families, as well as health and mental health since they generally are the primary caregivers for others in our society.
Outcomes:
Analyze and apply feminist, intersectional, and research-informed frameworks to evaluate gendered experiences and inform evidence-based clinical and advocacy practices with cisgender women; Demonstrate and integrate engagement strategies that build collaborative, culturally responsive, and trauma-informed relationships with women and their families in diverse practice settings; Design, implement, and evaluate feminist-informed interventions that promote empowerment, resilience, and systemic change to improve well-being and advance social justice for women

SOWK 620 Clinical Social Work Practice with Children (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course focuses on learning about clinical social work with children through helping students deeply understand a clinical relationship that children find meaningful in advancing their self-determination. In keeping with the present and future of clinical social work, this course includes a multicultural and global focus.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and equity-centered perspectives to analyze how cultural, developmental, and systemic factors influence social work practice with children and their families; Integrate and implement evidence-informed theories, developmental frameworks, and assessment tools to engage, assess, and intervene effectively with children and their families across diverse contexts; Evaluate and reflect on practice outcomes by measuring intervention effectiveness and adapting strategies to enhance trauma-informed, ethical, and strengths-based practice with children and families

SOWK 621 Clinical Practice in Addiction (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This advanced-level course is associated with counseling clients affected by Substance Use Disorders (SUD). The core Functions and skills examined include: screening, intake, orientation, assessment, treatment planning, counseling (individual, family and group), case management, crisis intervention, client education, referral, reports and recordkeeping, consultation with other professionals and intervention.
Outcomes:
Demonstrate and apply ethical decision-making frameworks and professional standards to analyze complex situations involving clients with substance use disorders, ensuring integrity and accountability in practice; Integrate and evaluate research-informed theories, diagnostic criteria, and assessment tools to develop individualized, evidence-based treatment plans that promote client recovery and resilience; Design, implement, and assess intervention strategies that enhance client engagement, family support, and community collaboration to promote sustainable recovery and systemic change

SOWK 622 Substance Abuse Treatment in Groups (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will focus on the many applications of group work to serve substance use disorder (SUD) affected clients. Through a combination of assigned readings, attendance at group meetings, and hands-on participation in small groups within the class, students will gain a working knowledge of how groups function to assist those recovering from SUDs.
Outcomes:
Demonstrate and apply ethical, culturally responsive, and evidence-informed professional behavior by integrating social work values and anti-oppressive principles into group treatment with individuals experiencing substance use disorders; Analyze and synthesize theoretical models and research evidence to design and facilitate effective, trauma-informed, and strengths-based group interventions that promote recovery and resilience among diverse populations; Implement and evaluate group-based interventions by applying motivational interviewing, mutual aid, and empowerment-focused strategies to enhance client engagement, well-being, and sustained behavioral change

SOWK 626 Social Work with Severely Mentally Ill (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course offers students the chance to learn about leading-edge social work approaches providing humane care for severely mentally ill clients, especially those clients with concomitant substance abuse, developmental disabilities, and severe socioeconomic disadvantage. Working with the client's environment, collaboration with other systems, advocacy and program development are considered.
Outcomes:
Demonstrate ethical, culturally responsive, and anti-oppressive social work practice with individuals, families, groups, organizations, and communities affected by severe mental illness and upholding human rights, equity, and social justice; Analyze and integrate research-informed and practice-informed evidence to assess, intervene, and evaluate services for individuals and families experiencing severe mental illness, applying critical thinking and reflective judgment to improve outcomes; Design advocacy strategies, policy initiatives, and community-based interventions that address systemic barriers and promote inclusion, empowerment, and recovery among people with severe mental illness

SOWK 631 Clinical Social Work Practice with Family Violence (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will focus primarily on interpersonal and family violence between partners and the impact of violence on the family. It will examine the various epistemological conceptualizations of violence, and the treatment of violence as it is experienced by and from various family members within an ecological framework with consideration of micro, mezzo, and macro areas of practice.
Outcomes:
Analyze family violence using ethical reasoning and an intersectional, justice-oriented lens to demonstrate professional behavior, uphold human rights, and integrate anti-racism, diversity, equity, and inclusion in clinical decision-making; Apply research-informed theories, policies, and evidence-based frameworks to engage, assess, and intervene with individuals, families, groups, organizations, and communities affected by violence across the lifespan; Evaluate clinical, policy, and programmatic responses to family violence and construct informed recommendations while maintaining reflective awareness of professional values, biases, and well-being, Aligned with: Competencies 1-8 (integrated and holistic alignment)

SOWK 632 Clinical Social Work with Older Adults (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course includes a review of the basic concepts of gerontology/geriatric practice, mental health issues, and interventions. The content of the course is intended to challenge students to move beyond basic levels of knowledge. It is intended to help students adapt social work theory (person-in-environment), practice principles, standards, and values to practice with older adults.
Outcomes:
Demonstrate knowledge of theories and practice concepts regarding the unique and diverse needs and capacities of older adults and their families, including mental health, substance abuse, and neurological challenges; Identify diversity, social justice, and human rights challenges for older adults with attention to the unique challenges of aging for groups that have been marginalized and discriminated against during their lifetimes; Utilize the elements of a biopsychosocial assessment and apply relevant laws, policies, and knowledge of resources to social work practice with older adults

SOWK 634 Special Topics (1-3 Credit Hours)
Topics for these courses are diverse. The purpose of having these courses is to expand the curriculum content and expose students to new and innovative subject matter. The topic of the course will be included in the class notes.

SOWK 637 Neurodevelopment and Trauma (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is an advanced concentration year practice elective focused on assessing the neurodevelopmental impact of trauma and selecting interventions consistent with this assessment. Students will learn to identify major regions of the brain, appreciate the sequential nature of brain development, and determine which areas of the brain have likely been affected by developmental trauma. Consistent with a neurosequential understanding of development, students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma. This assessment and intervention process occurs within the frameworks of systems and attachment theories, which recognize that the relational environments and communities in which clients live must be adequately safe and supportive for any intervention to be effective. This course is a hybrid course, incorporating recorded material supplied by The Child Trauma Academy. By the end of the course, students will have completed the majority of the requirements for Phase I Certification in the Neurosequential Model of Therapeutics. Because of this, the reading and out-of-class workload for this course is heavier than usual.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and equity-centered perspectives to analyze how social, cultural, and systemic factors influence neurodevelopmental and trauma-related outcomes across the lifespan; Integrate and synthesize neuroscience-informed theories and trauma assessment tools to assess the developmental, relational, and environmental impacts of trauma on individuals and families; Design and evaluate evidence-informed, brain-based, and relationally focused interventions that promote resilience, recovery, and healing for individuals and communities affected by trauma

SOWK 645 Crisis Intervention (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course provides students with the theoretical bases and practical skills for working with clients in crisis. This course focuses on general crisis theories, assessment models, and treatment/ intervention strategies. Students will concentrate on the application of these theories, models, and strategies in various practice settings.
Outcomes:
Demonstrate and apply ethical and professional behavior by integrating the NASW Code of Ethics, professional values, and self-reflective practice when assessing individual crises through an intersectional, culturally responsive, and anti-oppressive lens; Analyze and evaluate how political, systemic, and cultural factors contribute to crises in order to inform holistic, equitable, and evidence-informed crisis interventions with individuals, groups, families, and communities; Identify and implement evidence-based, trauma-informed crisis interventions that promote stabilization and enhance the well-being of individuals, groups, families, and communities

SOWK 650 Leadership & Supervision in Service Organizations (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Course content focuses on providing knowledge, values, ethics, and skills in guiding the work of others within social service organizations. Content areas include but are not limited to staff management, administrative supervision principles, models and styles, staff development, clinical supervision, teamwork, staff selection, legal and ethical issues, evaluation and termination, mediation, and conflict resolution.
Outcomes:
Demonstrate and apply ethical, inclusive, and socially just leadership behaviors by integrating professional values, anti-oppressive principles, and human rights frameworks into supervision and organizational practice; Analyze and synthesize research-informed theories and models of leadership, supervision, and organizational behavior to assess group and organizational dynamics and develop effective strategies for staff engagement, communication, and change management; Design, implement, and evaluate leadership and supervision practices that enhance team effectiveness, promote equity and professional growth, and improve outcomes across organizational systems

SOWK 652 Organizations, Program Development, and Evaluation (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course builds knowledge and skills in the areas of program development, sustainability, and evaluation. Program development is presented using an approach that also highlights the role of power, values, needs, and resources in decision-making processes. Grant-writing skills are developed alongside a critical analysis of social entrepreneurship and longstanding models of philanthropy. Knowledge and application of technology-based strategies to monitoring, evaluation and program improvement through data collection, data analysis, and data presentation are covered as well.
Outcomes:
Demonstrate and apply ethical and culturally responsive professional behavior by integrating anti-racist, inclusive, and justice-oriented principles into the design, implementation, and evaluation of social service programs; Analyze and synthesize research-informed theories, organizational models, and policy frameworks to develop logic models, evaluation plans, and funding strategies that strengthen organizational effectiveness and sustainability; Design, implement, and evaluate evidence-informed programs and fiscal strategies that enhance community impact, promote equity, and improve outcomes through ethical decision-making and continuous program improvement

SOWK 653 Community Organizing and Policy Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course focuses on the practice of community and political organizing designed to bring about social, economic, and racial justice. It explores interdisciplinary theories relating to processes of social change, representation, and power.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and justice-oriented approaches to analyze systemic inequities and advocate for policies and practices that promote human rights and social, racial, economic, and environmental justice; Integrate and synthesize community organizing, policy practice, and participatory frameworks to assess power structures, identify community needs and assets, and develop strategies for collective social action; Design, implement, and evaluate community-based and policy-driven interventions that empower marginalized groups, mobilize resources, and advance structural change through collaborative organizing and advocacy

SOWK 656 Social Work Practice with LGBTQ Populations (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is designed to provide students with an in-depth and critical understanding of social work practice issues related to individuals who are lesbian, gay, bisexual, transgender, and queer (+) (LGBTQ+), which includes intersex, two-spirit, demisexual, asexual, pansexual, omnisexual, their families, and the communities in which they live.
Outcomes:
Analyze how personal values, biases, and social identities influence professional relationships with LGBTQ+ clients and apply ethical decision-making frameworks to evaluate culturally responsive and affirming interventions across micro, mezzo, and macro levels of practice; Evaluate how intersecting systems of power, oppression, and privilege shape the lived experiences of LGBTQ+ individuals and create strategies that advance human rights, social, economic, and environmental justice through policy practice, advocacy, and coalition-building; Synthesize theories, research, and clinical frameworks (eg, minority stress theory, intersectionality, and trauma-informed care) to design and implement affirming, evidence-informed interventions that promote resilience, empowerment, and systemic change in LGBTQ+ communities

SOWK 662 Professional Development (3 Credit Hours)
This course focuses on the student's development as a social work professional and as a potential leader within the field, and the opportunities and strategies for personal professional impact. It is designed for the student who wants to develop a vision for advancing within the profession.

SOWK 670 Bridging Psychodynamic Theory and Cognitive Behavioral Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Psychodynamic theory and cognitive-behavioral theory are each associated with methods of intervention that have consistently been found to have therapeutic value for clients with a variety of psychosocial problems.
Outcomes:
Demonstrate and apply ethical, professional, and culturally responsive practice by integrating psychodynamic and cognitive-behavioral theories into clinical assessment and intervention with diverse client populations; Analyze and synthesize psychodynamic and cognitive-behavioral theoretical frameworks to assess client needs, formulate treatment goals, and select evidence-informed strategies that promote growth and resilience; Design, implement, and evaluate integrated treatment plans that enhance client well-being and advance effective therapeutic outcomes through the combined use of psychodynamic and cognitive-behavioral approaches

SOWK 680 Advanced Micro-Level Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
Micro Practice extends foundation knowledge of generalist practice and requires critical understanding of diverse theories and their related evidence-informed practice models. Critical analysis examines these models from an anti-racist and strengths perspective in order to intervene effectively using a variety of systems perspectives in situations of increased complexity.
Outcomes:
Demonstrate ethical, professional, and culturally responsive behavior by integrating anti-oppressive frameworks, critical self-reflection, and respect for diversity to advance human rights and equitable clinical social work practice with individuals, families, and groups; Assess clinical cases using clinical theories and policy-aware frameworks, develop treatment plans grounded in research-informed practice, and effectively engage with individuals, families, and groups in clinical settings; Implement evidence-based clinical interventions that improve client functioning and evaluate intervention outcomes across diverse individuals and families

SOWK 681 Advanced Mezzo & Macro Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course will focus on integrated practice approaches that span the micro (e.g., individuals/families/groups), mezzo (e.g., communities), and macro (e.g., systems, societal) frameworks. Numerous theories and models will be examined throughout the semester. The course also explores the role of the social work profession in creating social and organizational change, as well as interprofessional and interdisciplinary efforts.
Outcomes:
Demonstrate self-awareness and professional behavior in engaging with individuals, teams, community groups and organizations; Understand and demonstrate effective group and team facilitation and mediation process skills that facilitate engagement and collaboration

SOWK 682 Advanced Mezzo and Macro Practice (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work students, Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community-engaged practices and considers the community as a place of practice and source of social change and discusses the role. Emphasis is given to philanthropy and its critiques, as well as grant-writing. In addition, the course will provide(s) practical experience such as creating work team contracts, articulating the elements of a typical grant proposal, and reviewing grant proposals.
Outcomes:
Demonstrate and apply ethical, professional, and justice-oriented practice by integrating diverse theoretical frameworks and engaging in advocacy to promote equity and inclusion across systems of care; Analyze and synthesize policy, research, and practice perspectives to assess problems across micro, mezzo, and macro contexts and develop interventions that address the complex needs of individuals, families, and communities; Design, implement, and evaluate integrated practice interventions that promote collaboration, empowerment, and sustainable change within and across systems

SOWK 689 Arts-Based and Experiential Approaches to Social Work (3 Credit Hours)
Pre-requisites: SOWK 501 and SOWK 503 (Grade of C or better), or Advanced Standing or 5-Year SOWK Students
Students learn about arts-based and experiential approaches in social work practice, the theories that drive and support their use, and the evidence that supports their use throughout all levels of social work practice, including the micro, mezzo, and macro levels.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and inclusive practice by integrating arts-based and experiential approaches to promote social justice, equity, and empowerment among diverse client populations; Engage and collaborate with individuals, families, groups, organizations, and communities to incorporate creative, somatic, and expressive interventions that enhance engagement, communication, and healing across social work contexts; Design, implement, and evaluate arts-based and experiential treatment plans that promote resilience, growth, and transformation through innovative and culturally responsive interventions

SOWK 690 Independent Study (1-3 Credit Hours)
Independent studies generally consist of research, activities, and papers. Dependent on a student's needs, the course can be either 1, 2 or 3 credit hours and the requirements are adjusted accordingly. Students need to find a full-time faculty member willing to teach this course, obtain approval from the faculty member, as well as the Program Director to register for this course.

SOWK 714 Philanthropy, Public Policy, and Community Change (3 Credit Hours)
Pre-requisites: Graduate Social Work; Or Advanced Standing Students or 5-Year Social Work Students
This course examines the roles that philanthropy and foundations play in advancing, influencing, and preventing social and community change. It explores relationships between public policy and philanthropic giving. Patterns of giving, policy intervention strategies, structural issues, and programmatic opportunities and constraints will be illuminated.
Course equivalencies: PHPY402/SOWK714
Outcomes:
Engage with individuals, groups, organizations, and communities to critically examine philanthropy, public policy, and social change and reflect on their own positionality within systems of power and funding; Assess the roles, impacts, and accountability of philanthropic foundations and public policies by applying research, theory, and critical analysis to social welfare systems and community change efforts; Intervene and evaluate strategies for philanthropy-driven and policy-informed social change by analyzing evidence, engaging community perspectives, and assessing outcomes of alternative funding and advocacy approaches

SOWK 722 Introduction to Alcohol and Other Drug Disorders (3 Credit Hours)
This course will inform students about the prevalence of substance use disorders. These disorders are a part of the broad spectrum of social work practice. An assumption of the course is that SUD manifests in a variety of social work practice settings, therefore all social workers must have basic skills to identify, intervene with and refer to SUD-involved clients.
Outcomes:
Apply ethical, professional, and anti-oppressive social work principles to substance use practice by examining social justice, diversity, and human rights issues affecting individuals, families, and communities impacted by substance use disorders; Analyze substance use patterns, cultural contexts, and policy influences to assess the impact of alcohol and other drugs on individuals, families, and communities across micro, mezzo, and macro levels of practice; Evaluate substance use interventions, prevention strategies, and recovery-oriented approaches by integrating research-informed knowledge, experiential learning, and reflective practice to inform social work responses to substance use disorders

SOWK 730 Immigration Dynamics and U.S. Social Policy (3 Credit Hours)
This course also offers an exploration into some of the social policy and social welfare concerns associated with contemporary migration. This examination considers the social, political, environmental, and economic causes and consequences of migration; public policy regarding migration and the rights of immigrants; and the roles of governmental and nongovernmental local, national, and international organizations. Social justice themes related to migration are also explored.
Outcomes:
Analyze how US migration laws, policies, and historical practices produce and reproduce social, racial, economic, and environmental injustices, and apply that analysis to explain implications for immigrant well-being and service access; Apply anti-racist, diversity, equity, and inclusion principles to critically evaluate immigration-related programs, case materials, and classroom discussions, and to design culturally responsive teaching cases or interventions; Evaluate policy options and synthesize research, primary sources, and community perspectives to propose evidence-informed policy or practice recommendations and to assess their likely effects on individuals, families, and communities

SOWK 731 Social Work Practice with Refugees and Immigrants (3 Credit Hours)
This course focuses on identification and application of clinical social work assessment and intervention with major migrant groups. It considers immigrant and refugee individuals and families currently living in the U.S., helping students build a knowledge base for effective work, especially with those experiencing violence and trauma.
Outcomes:
Analyze and apply anti-racist, culturally responsive, and trauma-informed frameworks to advance human rights and social, racial, economic, and environmental justice in clinical practice with immigrants and refugees; Integrate research evidence, theoretical perspectives, and client narratives to develop and evaluate practice-informed interventions that promote resilience and empowerment among immigrant and refugee individuals, families, and communities; Design and implement collaborative, multi-level intervention strategies that strengthen engagement, assessment, and advocacy with immigrant and refugee populations while fostering sustainable change in organizational and community contexts

SOWK 732 Migration, Social Justice, and Human Rights (3 Credit Hours)
This course offers an exploration into some of the human rights and social justice concerns associated with global migration. It addresses distinct perspectives and practices of justice as they relate to concrete ethical and justice dilemmas posed by contemporary migration, immigration policies, and the social, political, and environmental factors that contribute to voluntary and forced migration.
Outcomes:
Evaluate and apply social work ethical principles and professional standards to complex human rights and migration scenarios, demonstrating integrity, critical reflection, and ethical decision-making in practice; Analyze and advocate for equitable social policies and practices that promote human rights, anti-racism, and social justice for migrants and refugees across micro, mezzo, and macro levels of practice; Design and propose policy-informed interventions that address human insecurities and systemic inequities affecting immigrant and refugee communities, integrating diverse social justice frameworks and evidence-informed approaches

SOWK 733 North American Migration Dynamics, Challenges & Opportunity (1-3 Credit Hours)
This course is offered in Mexico in collaboration with IberoAmericana an opportunity for Loyola students to come together with Mexican students to study migration related issues affecting our respective countries and shared continent. Specifically, the course will focus on central themes concerning the opportunities as well as challenges to fundamental social institutions and migration dynamics of policies for North America.

SOWK 734 Social Policy and Older Adults (3 Credit Hours)
This course will focus on services issues related to geriatric case management, home care and the continuum of community based services as well as the relationship between informal and formal support. In addition to exploring direct services and programs for older adults, there will be consideration of the needs and services for family caregivers.
Outcomes:
Students in this class will demonstrate the capacity to engage in critical thinking, apply knowledge of human behavior and the social environment, engage in policy practice to advance social and economic well-being and to deliver effective social work services; and respond to contexts that shape practice

SOWK 735 Loss, Grief, and Dying (3 Credit Hours)
Losses, followed by grief reactions are present in nearly every clinical situation that Social Workers encounter. This course will help students acquire skills in helping clients (and themselves) transition through grief in response to non-death and death experiences. The course builds on knowledge of direct practice, human behavior theory, life span development, and cultural diversity.
Outcomes:
Evaluate ethical and professional responsibilities in social work practice with loss, grief, and bereavement across diverse cultural and social contexts; Assess individual, family, and community responses to loss and grief using culturally responsive and theoretically informed social work frameworks; Apply and evaluate intervention strategies that support healing, meaning-making, and resilience in individuals and communities experiencing loss and bereavement

SOWK 754 Global Social Work: Reflective Practice for Justice and Peace (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work students
This course provides an introduction to social work practice in an international context. The emphasis is on understanding cross-cultural peace-building practices using clinical skills and community action activities that build civil society structures and promote peaceful resolution of socially traumatized experiences. This course includes video conferencing.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and human rights-based frameworks to analyze global issues of oppression, inequality, and justice across diverse cultural contexts; Integrate and synthesize policy, advocacy, and global practice models to develop strategies that influence international social welfare systems and promote equitable and sustainable community development; Design and evaluate culturally responsive and collaborative interventions that strengthen cross-national partnerships and promote social change, peace-building, and community resilience

SOWK 763 Women in a Global Context (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work students
This course covers understanding women in a global context, social development institutions, and women's representation within them and in related media and social media. It builds the knowledge of relevance to students of social work, women's studies, international studies, migration, and communication.
Outcomes:
By the end of this course, students will be able to: 1) Critically analyze global social policies through a feminist lens to evaluate their impact on women's rights and social, racial, economic, and environmental justice (Aligned with Competency 2 - Advance Human Rights and Social, Racial, Economic, and Environmental Justice); 2) Assess and interpret diverse cultural, social, and political perspectives influencing women's lived experiences globally to enhance cross-cultural understanding and advocacy in social work practice (Aligned with Competency 5 - Engage Diversity and Difference in Practice)\\n; 3) Create evidence-informed media or policy advocacy products that promote equitable representation and justice for women in global and local contexts (Aligned with Competency 2 - Advance Human Rights and Social, Racial, Economic, and Environmental Justice and Competency 5 - Engage Diversity and Difference in Practice)

SOWK 780 Integrative Seminar I Advanced School Mental Health Program (1 Credit Hour)
Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. This is the first semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar.

SOWK 781 Integrative Seminar II Advanced School Mental Health Program (2 Credit Hours)
Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 780 prior to taking this course. This is the second semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program.
Outcomes:
Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 782 Integrative Seminar III Advanced School Mental Health Program (1 Credit Hour)
This is the first semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students must be enrolled in the Advanced School Mental Health Certificate program.
Outcomes:
Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 783 Integrative Seminar IV Advanced School Mental Health Program (2 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 782. This is the second semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program.
Outcomes:
Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 784 Evidence Based Practice in Schools (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of evidence based practice techniques in the school setting.
Outcomes:
Students will have an increased ability to apply EBP interventions in educational settings

SOWK 785 Solution-Focused Brief Therapy Techniques (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of solution-focused brief therapy techniques in school settings.
Outcomes:
Students will have an increased ability to apply solution-focused brief therapy techniques in educational settings

SOWK 786 Special Topics in School Social Work (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course will focus on different critical issues related to social work interventions in school settings.
Outcomes:
Students will gain expertise in various interventions of importance to effective social work in school settings

SOWK 787 Special Topics in School Social Work - Immersion Weekend (1 Credit Hour)
This is a one credit course that compliments SOWK 786 and provides an immersion experience related to the special topic course for that year. Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed or be concurrently enrolled in SOWK 786.
Outcomes:
Students will gain additional expertise in various interventions of importance to effective social work in school settings

SOWK 788 SMHAPP Independent Study (2 Credit Hours)
Independent study for students admitted into the SMHAPP certificate program. Restricted to SMHAPP certificate program.

SOWK 800 Statistics (3 Credit Hours)
Pre-requisites: Restricted to Social Work PhD students; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course is the first in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers basic statistical concepts of probability, sampling distributions, confidence intervals, and statistical inference. The focus for the course is the applied use of statistical methods for the analysis of social science data using SPSS and manual calculations. In addition to covering applied statistical concepts and their application to data, the course will also critically examine the question of causality.
Outcomes:
Understand basic statistical concepts of probability, sampling distributions, confidence intervals, and statistical inference, including z-tests, t-tests, ANOVA, and Chi-square; Examine critically the question of causality; Demonstrate critical thinking around how statistics and quantitative analysis can be used to both marginalize and empower racial, ethnic, and other identity and/or geographic community groups

SOWK 801 Historical & Contemporary Issues in Social Work Practice (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
The course will provide a critical review and analysis of the historical development of social work practice and identify and explore contemporary issues that impact the current delivery of social work practice services. Students will read from the professional literature ranging from the early 1900s to the present; critically evaluate the development of social work practice theory, knowledge, and skills as the profession sought to define what constitutes social work practice; examine the broader social, cultural, political, economic, and other contextual forces that shaped (and were shaped by) the development of social work practice and the provision of services to individuals, families, groups, and communities.
Outcomes:
Evaluate the general historical development of social work practice in the 19th, 20th, and 21st centuries, and its impact upon the empowerment and oppression of historically marginalized communities; Evaluate how historically marginalized communities created systems of mutual aid to support each other outside of the profession of social work; Identify the domains of social work practice knowledge and the intellectual currents which have influenced its ongoing development

SOWK 802 Grand Theories & Perspectives in Social Work Knowledge (3 Credit Hours)
Pre-requisites: Restricted to Social Work PhD students; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course focuses on grand theories and perspectives which guide social work practice, research, and policy. Students in this course will critically examine the grand theories and perspectives which have influenced social work in the past, currently influence social work, and will likely shape the profession of social work in the future. Through examining and critiquing the grand theories and perspectives, students will be challenged to think about how these theories do and do not address social and economic justice while also acquiring more knowledge regarding how these theories and perspectives help students better understand their substantive areas.
Outcomes:
Examine various theoretical models and perspectives of practice in social work; Explore the advantages and limitations of social work paradigms; Understand the utility and difficulties associated with a multi-theoretical approach to social work practice and research

SOWK 803 Advanced Statistics (3 Credit Hours)
Pre-requisites: Restricted to students in the Social Work PhD program; Completion of SOWK 800 with a grade of B- or higher; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director; Completion of a course comparable to SOWK 800 with a grade of B- or higher is required; Interested non-social work PhD students are to submit the comparable course syllabus to the social work Doctoral Program Director for review and approval
This is the second in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers various multivariate statistical analysis techniques to test hypotheses that are most relevant to issues of social, economic, racial, and environmental justice.
Outcomes:
Understand correlation, two-way ANOVA, linear, multiple, and logistic regression; Apply these techniques, test assumptions, and interpret results using statistical software; Promote critical thinking around how statistics can be used to both marginalize and empower racial, ethnic, and other identity and/or geographic community groups, and around ethics in quantitative analysis

SOWK 804 Qualitative Research (3 Credit Hours)
Pre-requisites: Restricted to students in the Social Work PhD program with completion of SOWK 818 with a grade of B- or higher; For non-social work PhD students, completion of a course comparable to SOWK 818 with a grade of B- or higher and approval from the School of Social Work Doctoral Program Director; Interested non-social work PhD students are to submit the comparable course syllabus to the social work Doctoral Program Director for review and approval
This course provides an overview of the fundamentals of qualitative research. It provides a detailed consideration of knowledge and skills in qualitative inquiry. The science and paradigms for qualitative inquiry in social work are examined as well as principles for qualitative inquiry design including data collection, analysis, and writing.
Outcomes:
Articulate the connections between paradigm, research question, qualitative method, and methods for data analysis; Design and implement a qualitative research project that appropriately matches research questions; Describe the development and usefulness of different qualitative research methods, including ethnography and ethnomethodology, grounded theory, phenomenological approaches, historical research, and constructivist inquiry

SOWK 805 Research Practicum I (3 Credit Hours)
Pre-requisites: Doctoral student standing in the School of Social Work at Loyola University Chicago; Completion of SOWK 800, SOWK 803, SOWK 804, SOWK 818 with a grade of B- or higher
This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals.
Outcomes:
Critique research articles or their designs that demonstrate various methodologies and identify their strengths and weaknesses, as well as their contributions to social work practice; Identify a research problem and select an appropriate design and analysis plan; Create at least 2 manuscripts for publication or other similar documents reporting on the findings of their project

SOWK 806 Research Practicum II (3 Credit Hours)
Pre-requisites: Doctoral student standing in the School of Social Work at Loyola University Chicago; Completion of SOWK 805 with a grade of B- or higher
This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals.
Outcomes:
Critique research articles or their designs that demonstrate various methodologies; Identify strengths, weaknesses, and contributions of research articles to social work; Complete a research project that identifies a research problem and select an appropriate design and analysis plan

SOWK 808 Integration of Research, Practice, & Theory in Social Work Scholarship (3 Credit Hours)
Pre-requisites: Completion of SOWK 800, SOWK 803, SOWK 804, SOWK 818 with a grade of B- or higher and Social Work PhD Student; For non-social work PhD students, completion of comparable courses with a grade of B- or higher; Interested non-social work PhD students are to submit the comparable course syllabi to the social work Doctoral Program Director for review and approval
This course focuses on the examination of research, practice, and theory as well as the integration of these focal areas in doctoral students' substantive areas. Students will examine the research, theories, and practices that have been used in their substantive areas to gain further knowledge of the current state of their substantive areas and address key research questions.
Outcomes:
Examine research, theories, and practices in student's own substantive areas; Identify gaps in knowledge in student's own substantive areas of research; Explore ideas for future research and scholarship; Critically evaluate existing evidence in student's own areas of research

SOWK 817 The Nature of Social Work Knowledge (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course aims to help students understand the variety of contemporary understandings of science in the social and behavioral sciences and foundational aspects of designing research to develop conceptual frameworks for social work practice. Emphasis will be on science as a problem-solving process, with scientific knowledge development being a major link for the social worker between the roles of practitioner and researcher.
Outcomes:
Evaluate key aspects in philosophy of research for the social and behavioral sciences; Evaluate and analyze the major paradigms of knowledge generation in social work; Formulate an approach to scientific knowledge, with a focus on emancipation, anti-oppression as values key to the mission of social work, considering how approaches to science support or undermine those goals

SOWK 818 Social Work Research Methodology: Overview of the Fundamentals (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course presents an overview and critical analysis of the research methods commonly used in social work and other related disciplines. The course will involve reading about these research methods, critically analyzing a variety of research reports, and applying research methods to an area relevant to the advancement of knowledge about social work selected by each student.
Outcomes:
Understand the epistemological bases of various approaches to research on the research process and knowledge development in the social sciences; Understand the variety of traditions of research in and relevant to the social work profession, with an emphasis on research about practice, to identify and analyze the research and evaluation designs or strategies of inquiry; Understand problem formulation process, including engaging in the process of identifying and refining the description of a study issue, the statement of a research question, and the connection of it to a strategy of inquiry

SOWK 820 Social Theory & Social Change (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course will explore the evolution and development of macro practice in the United States with a focus on theory and methods that undergird community practice and policy practice. Course content will include a conceptual history of macro practice within social work, including the unique role of macro practice methods in carrying out the mission of the social work profession. The role of different forms of power, at the institutional and social level, as well as values and ethical dilemmas associated with macro practice and their relation to social work, will also inform the course.
Outcomes:
Evaluate the use of macro practice, including community practice (ie, development, planning, organization) and policy practice in the United States; Critically analyze how macro practice evolved within the social work profession, including the degree to which macro practice methods and models have advanced social work's historic mission and values; Identify how macro practice methods are used to address forms of social, political, and economic inequality, promote social justice, and secure human rights

SOWK 822 Organizational Analysis (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course explores the ways in which an organizational lens can be usefully applied in the context of social welfare-related research. The course will provide an overview of the ways in which scholars have approached the study of organizations and highlight theoretical traditions useful for understanding the work of human service organizations.
Outcomes:
Apply an organizational lens to analyze the roles and functions of human service organizations-such as social service agencies, schools, and advocacy organizations-in addressing social problems; Critically evaluate major theoretical traditions in organizational studies and assess their relevance to contemporary social welfare research contexts; Integrate organizational theory into original research designs, selecting appropriate theoretical frameworks and methodological approaches to explore questions related to social welfare and human service delivery

SOWK 827 Doctoral Study (1 Credit Hour)
Students register for this course during the semester they are taking their comprehensive exams and any semesters they do not yet have an approved proposal.
Outcomes:
Evaluate and demonstrate mastery of core disciplinary knowledge by successfully completing the comprehensive examination according to program criteria; Design a dissertation proposal plan and select a dissertation chair/adviser in collaboration with the doctoral program director

SOWK 828 Teaching Seminar and Practicum I (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course is designed to provide doctoral students with a thorough overview of teaching within a university setting from social justice and anti-racist perspective and the practical experience of preparing and teaching a course. This course focuses on theories of learning, the application of these theories to the teaching process, and the teaching process itself. SOWK 829 is a continuation of this content.
Outcomes:
Identify, discuss and analyze various teaching activities in relation to theories of learning and antiracist pedagogy; Identify and know how to develop a course in an area of specific academic interest and professional expertise; Develop a personal pedagogical style and accompanying statement, supplemented by additional relevant technological expertise which will support a sense of competence in your own ability to teach

SOWK 829 Teaching Seminar & Practicum II (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago and completion of SOWK 828 with a grade of B- or higher; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course is designed to provide doctoral students with a thorough overview of teaching within a university setting from a social justice and anti-racist perspective with the practical experience of preparing and teaching course content. SOWK 829 also continues focus on integrating material from SOWK 828 and creating and managing an inclusive environment via a variety of learning platforms with diverse students.
Outcomes:
Identify one's own biases and triggers to include and conduct class discussions on issues of social justice and diversity as it relates to the various topics in all social work courses; Develop ability to manage conflict around issues of diversity, whether it be political, theoretical, or personal issues raised in class discussion; Assess and critique their own and their colleagues' teaching style, instructional methods, and general strengths and weaknesses as a social work instructor

Social Work Internship Instruction

SWII 530 Internship I & Simulated Experience (1 Credit Hour)
The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
Demonstrate ethical and professional behavior in field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining professional responsibility in internship settings; Engage and assess individuals, families, groups, organizations, and communities using culturally responsive, anti-racist, and person-in-environment frameworks to inform social work practice and policy-relevant decision-making; Implement, evaluate, and advocate for evidence-informed and policy-relevant interventions in collaboration with clients and constituencies to achieve practice goals and improve outcomes

SWII 531 Internship II & Simulated Experience (1 Credit Hour)
The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
1) Demonstrate ethical and professional behavior in field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining professional responsibility in internship settings; 2) Engage and assess individuals, families, groups, organizations, and communities using culturally responsive, anti-racist, and person-in-environment frameworks to inform social work practice and policy-relevant decision-making; 3) Implement, evaluate, and advocate for evidence-informed and policy-relevant interventions in collaboration with clients and constituencies to achieve practice goals and improve outcomes

SWII 630 Field Instruction III & Simulated Experience (1 Credit Hour)
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SWII 630S Integrative Seminar (2 Credit Hours)
This course is the second of two seminars that serve to enrich students' field experience. The focus of this course is upon experiences and progress of the student in the first semester of advanced field and the relationship of the field experience to specific advanced practice class content.
Outcomes:
1) Integrate classroom knowledge and skills into the field setting, 2) reflect on field learning experiences and growth of professional sense of self

SWII 631 Field Instruction IV & Simulated Experience (1 Credit Hour)
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SWII 632 Internship Instruction III & Simulated Experiences (1 Credit Hour)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, Students or 5 Year Social Work Students
The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
Demonstrate ethical and professional behavior in specialized field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining accountability and professionalism in internship settings; Advance human rights and social, racial, economic, and environmental justice by applying anti-racist, culturally responsive, and inclusive frameworks within specialized internship settings; Engage, assess, intervene, and evaluate practice with individuals, families, groups, organizations, and communities by integrating theory, research, and practice-informed strategies within specialized field settings

SWII 633 Internship Instruction IV & Simulated Experiences (1 Credit Hour)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, Students or 5 Year Social Work Students
Co-requisites: SWII 632
The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
Demonstrate ethical and professional behavior in specialized field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining accountability and professionalism in internship settings; Advance human rights and social, racial, economic, and environmental justice by applying anti-racist, culturally responsive, and inclusive frameworks within specialized internship settings; Engage, assess, intervene, and evaluate practice with individuals, families, groups, organizations, and communities by integrating theory, research, and practice-informed strategies within specialized field settings

Post-MSW Certified Alcohol and other Drugs Counselor Training Program (CADC) Certificate

NOTE: As of Fall 2026, this program is no longer accepting applicants.

Loyola University Chicago's School of Social Work is accredited by the Illinois Certification Board, ICB (Formally IAODAPCA) as an Advanced Accredited Training Program, preparing social work students and practitioners to become Certified Alcohol and Other Drug Counselors (CADC).

Upon completion of the training program (see below for program requirements), students are eligible to submit their application to ICB to take the CADC exam. A passing grade on the ICB-administered exam is required for official CADC certification.

Student eligibility to take the exam is contingent upon the completion of the required classes and internship hours.

Related Programs

Certificate

- Post-MSW Professional Educator License: School Social Worker Endorsement (p. 1830)

Curriculum

The following courses are required by Loyola and to fulfill state requirements.

Code	Title	Hours
SOWK 722	Introduction to Alcohol and Other Drug Disorders	3
SOWK 621	Clinical Practice in Addiction	3
SOWK 622	Substance Abuse Treatment in Groups	3
SWII 730		1
Total Hours		**10**

Internship

Students in the CADC certificate must secure an internship at a site that has been approved by Loyola as a CADC site. Students are required to complete a total of 500 internship hours.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

MSW Program Generalist Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas.

Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, anti- racist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work. Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

1. make ethical decisions by applying the standards of the National Association of Social Workers Code of Ethics, relevant laws and regulations, models for ethical decision making, ethical conduct of research, and additional codes of ethics within the profession as appropriate to the context;
2. demonstrate professional behavior; appearance; and oral, written, and electronic communication;
3. use technology ethically and appropriately to facilitate practice outcomes; and
4. use supervision and consultation to guide professional judgment and behavior.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history that result in oppression and racism, including social work's role and response.

Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably, and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

1. advocate for human rights at the individual, family, group, organizational, and community system levels; and
2. engage in practices that advance human rights to promote social, racial, economic, and environmental justice.

Competency 3: Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

1. demonstrate anti-racist and anti-oppressive social work practice at the individual, family, group, organizational, community, research, and policy levels; and
2. demonstrate cultural humility by applying critical reflection, self-awareness, and self- regulation to manage the influence of bias, power, privilege, and values in working with clients and constituencies, acknowledging them as experts of their own lived experiences.

Competency 4: Engage in Practice-informed Research and Research-informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

1. apply research findings to inform and improve practice, policy, and programs; and
2. identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affect well-being, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand and critique the history and current structures of social policies and services and the role of policy in service delivery through rights- based, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

1. use social justice, anti-racist, and anti-oppressive lenses to assess how social welfare policies affect the delivery of and access to social services; and
2. apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, racial, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

1. apply knowledge of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, to engage with clients and constituencies; and
2. use empathy, reflection, and interpersonal skills to engage in culturally responsive practice with clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in culturally responsive assessment with clients and constituencies, including individuals, families, groups, organizations, and communities. Assessment involves a collaborative process of defining presenting challenges and identifying strengths with individuals, families, groups, organizations, and communities to develop a mutually agreed-upon plan. Social workers recognize the implications of the larger practice context in the assessment process and use interprofessional collaboration in this process. Social workers are self-reflective and understand how bias, power, privilege, and their personal values and experiences may affect their assessment and decision making.

Social workers:

1. apply theories of human behavior and person-in-environment, as well as other culturally responsive and interprofessional conceptual frameworks, when assessing clients and constituencies; and
2. demonstrate respect for client self-determination during the assessment process by collaborating with clients and constituencies in developing a mutually agreed-upon plan.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior, person-in-environment, and other interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in selecting culturally responsive interventions with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions and participate in interprofessional collaboration to achieve client and constituency goals. Social workers facilitate effective transitions and endings.

Social workers:

1. engage with clients and constituencies to critically choose and implement culturally responsive, evidence-informed interventions to achieve client and constituency goals; and
2. incorporate culturally responsive methods to negotiate, mediate, and advocate with and on behalf of clients and constituencies.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of diverse individuals, families, groups, organizations, and communities. Social workers evaluate processes and outcomes to increase practice, policy, and service delivery effectiveness. Social workers apply anti-racist and anti-oppressive perspectives in evaluating outcomes. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers use qualitative and quantitative methods for evaluating outcomes and practice effectiveness.

Social workers:

1. select and use culturally responsive methods for evaluation of outcomes; and
2. critically analyze outcomes and apply evaluation findings to improve practice effectiveness with individuals, families, groups, organizations, and communities.

MSW PROGRAM SPECIALIZED MICRO LEARNING OUTCOMES

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, antiracist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work. Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

- Demonstrate professional use of self as a social worker, reflecting knowledge of personal professional strengths, limitations, challenges, and cooperatively resolving interpersonal conflicts.
- Demonstrate ethical use of advanced modalities in practice and any related technological applications in the micro field of social work.
- Recognize and manage ethical violations and resolve conflicting ethical obligations.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history that result in oppression and racism, including social work's role and response. Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

- Articulate human rights violations the client and client's system are experiencing, including environmental and economic issues that endanger the health of the client system.
- Demonstrate understanding of the impact of intersectionality of marginalized identities, systemic racism, and associated oppressions and plan practice accordingly.
- Demonstrate ways in which social workers can advocate for human rights at the individual, family, group, organizational, and community system levels as it relates to the micro field of social work practice.

Competency 3: Engage in Anti-racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

- Understand and demonstrate an understanding of anti-racism practice at the individual, group, organizational, community, research, and policy levels that will allow for diversity, equity, and inclusion practice in the micro-level field of social work.
- Demonstrate an understanding of discrimination patterns in society and how micro-level oppression impacts micro-level social work practice regarding race, class, gender, sexual orientation, gender identity, ability, age, and any other social categories in which oppression occurs.
- Demonstrate the ability to formulate how an anti-racist practice will advance the client and client system's human rights.

Competency 4: Engage In Practice-Informed Research and Research-Informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

- Demonstrate understanding of and be able to contribute to the evaluation of social research regarding advanced micro practice.
- Critically evaluate and select potential practice models relevant to the client's systems.
- Use their experience from their internship or practicum placement to identify real-life challenges and address the practical needs of clients
- Engage in partnerships with experienced social workers to help bridge the gap between theory and practice and broaden knowledge of social work practice as it relates to the micro field of social work.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affects wellbeing, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand and critique the history and current structures of social policies and services and the role of policy in service delivery through rightsbased, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

- Communicate to stakeholders and policymakers the implications of policies and policy change in the lives of clients.
- Conduct and design a plan for organizational analysis and change, working with relevant constituencies to evaluate interventions that impact clients and communities utilizing best practice models reflecting social work values, ethics, and the organization's mission.
- Collect, maintain, interpret, and analyze data from both internal and external organizational environments, the community of stakeholders, and diverse client groups to identify and prioritize social problems.
- Recognize how oppression and social injustice affect client groups, organizations, and communities and intervene proactively for human rights and justice.
- Understand strategies and techniques for advocating at local, state, and federal levels in policy development.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

- Apply culturally appropriate resources available to assist with problem-solving.
- Recognize and describe self-reflective competency in identifying bias, countertransference, and potential microaggressions when engaging diverse client systems.
- Implement and describe the use of reflective listening tools when needed to engage and empower members of families and groups.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in culturally responsive assessment with clients and constituencies, including individuals, families, groups, organizations, and communities. Assessment involves a collaborative process of defining presenting challenges and identifying strengths with individuals, families, groups, organizations, and communities to develop a mutually agreed-upon plan. Social workers recognize the implications of the larger practice context in the assessment process and use interprofessional collaboration in this process. Social workers are self-reflective and understand how bias,

power, privilege, and their personal values and experiences may affect their assessment and decision making.

Social workers:

- Collect and organize data to support their professional decision-making as well as demonstrate critical thinking to interpret information from clients and constituencies.
- Illustrate knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies, understanding the lack of political neutrality in their work.
- Exemplify a process in which mutually agreed-on intervention goals and objectives are generated based on the critical assessment of strengths, needs, and challenges within clients and constituencies in their social environment; and
- Convey a deeper understanding of how to select appropriate intervention strategies informed by assessment, research knowledge, and values and preferences of clients and constituencies through the exercise of antiracist practice principles.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand they have a plethora of treatment models from which to choose in tailoring interventions to be maximally effective with clients. Remaining up to date about the multiple forms of available evidence concerning the effectiveness of these models for client systems, social workers choose models that are most suited to advance the client's self-determination and to empower the client in relation to larger social systems that often are oppressive. Social workers co-formulate intervention goals with clients, ensuring those are revised as the client accomplishes one goal and seeks to move on to the next. Social workers consider how the client responds to different ways social workers use themselves (active expressions empathy v. quiet listening, degrees of self-disclosure and reticence for instance) and examine how the client responds so as to offer the client a relationship that fosters engagement and client progress. Social workers attend to the powerful meaning the relationship can have for the client, understand dynamics of transference, relate using cultural humility so as to learn from clients about cultures different than the social worker's, refrain from words or actions that can hurt the client, and carry out treatment respectfully to advance the client's dignity and resilience.

1. Self-reflective understanding of the professional use of self in interventions with diverse types of client systems in order to understand and challenge oppressive social forces as well as to avoid perpetuating racist biases, microaggressions, and disempowerment of clients.
2. Using supervision and consultation appropriate to developing skills for advanced and interdisciplinary practice.
3. Demonstrating an ability to intervene collaboratively and collectively with clients in choice of treatment plans and their implementation.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation of practice is an ongoing activity. Social workers plan ahead for evaluating the treatment by reflectively articulating choice of intervention theory and model, formulating intervention goals that are amenable to evaluation, and planning how to keep notes that foster reflection about client progress. Social workers understand evaluation is participatory -- it occurs with clients in various ways both spontaneous and planned -- and so the social worker pays attention to client's opinions about whether and how the intervention is helpful. Social workers make use of a diversity of models for evaluating treatment, such as participatory consumer evaluation interviews with groups, organizations, and communities; process notes with individual clients, families, and groups; engaging communities and smaller systems in reflecting on those relationship processes that bring about desired changes. Social workers understand that interventions can unintentionally include discriminations (microaggressions) and continually evaluate their practice with an eye to remedying and avoiding those discriminations.

1. Demonstrate understanding of the logic and method of single case evaluation of practice from diverse theoretical and methodological perspectives.
2. Competently demonstrate case evaluation, including identifying problems and their resolution, the fulfillment of goals co-identified with client, and managing systemic problems that impinge on client well-being.
3. Demonstrates competence in incorporating client feedback processes in planning and carrying out the intervention plan.

Post-MSW Professional Educator License: School Social Worker Endorsement

As of Fall 2026, this program is no longer accepting applicants.

This program is for graduates with a MSW degree from an accredited School of Social Work that are seeking to obtain a Professional Educator License (PEL) with a School Social Work endorsement.

Pre-requisites

- Master's degree in Social Work from an accredited program
- Please review the substitution rules as outlined in the section entitled applying for full admission to an Illinois Educator Preparation Program from ISBE at:
  - Illinois State Board of Education (https://www.isbe.net/Pages/Educator-Licensure-Testing-Info.aspx)
  - Schools PEL Information (https://catalog.luc.edu/graduate-professional/social-work/professional-educator-license-school-social-worker-endorsement-certificate/Procedures_for_Receiving_Your_License.pdf)

Related Programs

Master's

- Social Work (MSW) (p. 1831)
- Social Work Online (MSW) (p. 1839)

Certificate

- Post-MSW Certified Alcohol and other Drugs Counselor Training Program (CADC) Certificate (p. 1825)

Curriculum

Program Requirements

Successful completion of 13 credits (3 required classes and one externship with a concurrent Integrative Seminar). Classes may be

completed online or in the classroom. Student must receive a grade of "C" or better in each class.

Code	Title	Hours
SOWK 609A	School Social Work Policy and Practice I	3
SOWK 609B	School Social Work Policy and Practice II	3
CIEP 401	The Exceptional Child	3
Externship Requirements		
SWII 640		0
SWII 640S		2
SWII 641		0
SWII 641S		
Total Hours		**11**

- Pass the ISBE Content Exam for School Social Work (ISBE #238) prior to eligibility for the PEL. Submit verification to **Amy Greenberg at** agreenberg2@luc.edu. All content exams are administered only in computer-based testing (CBT) format, external to Loyola.

Externship Requirements

- Externships must be completed in a ***traditional*** Illinois public school (non-charter, non-therapeutic and/or non-alternative) for a full academic year aligned with the district's calendar (August to June) for a minimum of two or three days per week.
- Students apply to their externship through the SONIA database and then sign up for a placement interview to receive referrals from the PEL team.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Conduct comprehensive and culturally responsive student assessments
- Provide direct and indirect services to students
- Demonstrate leadership and supervision skills in school settings
- Design, implement, and evaluate school social work programs and services
- Engage in community organizing and policy practice for social justice
- Integrate social work values and ethics in complex and challenging situations

Social Work (MSW)

The Master of Social Work degree is a two-year program offering advanced practice training in clinical, school, and community settings. Graduates of this program are well positioned for leadership roles in clinical, human services, outreach, and development settings. Learn more about course offerings for Master of Social Work students (https://www.luc.edu/socialwork/academics/graduate/graduate-courses/).

An alternative pathway to earning a Master of Social Work (MSW) is the **Intensive Weekend Program (IWP)**. The key difference is structure. The IWP is a cohort-based, in-person program designed for working professionals. The IWP spans three years over eight semesters (including summers) with fall entry. Students take two courses per semester, meet in person once a month, and complete asynchronous work between sessions. Internship hours are distributed across the program, allowing for a manageable workload alongside full-time employment.

Upon completing the program, students have completed the education requirements for both the LSW and the LCSW licenses. The LSCW requires post-graduate clinical supervision hours by a Licensed Clinician and a passing score on the licensure exam, or an extended period of post-graduate supervision.

Specialization and Track Options

Students in the Master of Social Work Program can select an area of specialization in:

- Micro Practice Specialization
- Leadership, Mezzo, & Macro Practice Specialization (LMMP)

Students in the **Micro Practice Specialization** can choose a track from the following:

- Advanced Clinical Practice (p. 1849)
- Certified Alcohol and other Drugs Counselor training program (CADC) (p. 1852)
- Migration Studies (p. 1855)
- Schools/Professional Educator License (PEL) (p. 1858)

The **Leadership, Mezzo, & Macro Practice (LMMP)** area of specialization offers a track in:

- Leadership, Community, Advocacy, and Policy (LCAP) (p. 1846)

Related Programs

Doctoral

- Social Work (PhD) (p. 1398)

Combined

- Social Work/Law (MSW/JD) (p. 1900)

Curriculum

Master of Social Work (MSW)

The MSW program requires the completion of 49 credit hours, including two internships totaling 1,000 hours.

The traditional program takes two years to complete for students who attend full-time or four years to complete for students who are attending part-time during the week (two classes per semester).

We also offer an Intensive Weekend program (IWP) that is part-time (two classes per semester) and takes three years to complete.

Coursework

There are no prerequisites for the MSW program. The MSW curriculum is split up by year with generalist and specialized courses.

Code	Title	Hours
Generalist MSW Courses		
Community Immersion Program (1-Week Community Immersion Program)		0
SOWK 500	Life Span Development, Human Behavior, Trauma, & Theory	3
SOWK 501	Assessment of Client Concerns in Context	3
SOWK 502	Power, Oppression, Privilege, and Social Justice	3
SOWK 503	Practice Skills with Individuals and Families	3

SOWK 653	Community Organizing and Policy Practice	
Electives		
All students will choose to take two electives. Any 600 or 700-level course may be considered an elective.		6
Total Hours		**49**

[1] Students who matriculated before Fall 2025 should take SOWK 504 and SOWK 681. Student who matriculated in Fall 2025 or after should take SOWK 508 and SOWK 682.

[2] Course Options (p. 1849)

Internships

The first internship is 400 hours, performed at the rate of 16 hours per week on Tuesday and Thursday during normal business hours. The second internship is 600 hours performed at the rate of 24 hours per week on Monday, Wednesday, and Friday during normal business hours.

There are three internship timeframes: fall-spring, spring-summer, or summer block. The summer block consists of 35-40 hours per week, Monday–Friday, during normal business hours.

Specializations & Tracks Options

The Master of Social Work program have the following specialization and track options:

- Leadership, Mezzo, and Macro Practice (LMMP) Specialization (available to traditional students only)
  - Leadership, Community, Advocacy, and Policy (LCAP) Track (p. 1846)
- Micro Practice Specialization
  - Advanced Clinical Practice Track (p. 1849)
  - Certified Alcohol and Other Drugs Counselor Training Program (CADC) Track (p. 1852)
  - Migration Studies Track (p. 1855)
  - Schools/Professional Educator License (PEL) Track (p. 1858)

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Demonstrate ethical and professional behavior.
- Engage diversity and difference in practice, including promoting social and economic justice.
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities.

Social Work Advanced Standing Program (MSW)

The MSW program requires the completion of 23 credit hours, including a 600-hour internship. The program takes 10 months to complete for students that attend full-time (four classes per semester plus internship) or two years to complete for students who attend part-time (two courses per semester). The Advanced Standing MSW program begins in the Fall semester.

Eligibility

To be considered for the Advanced Standing program, the following requirements must be met:

- The applicant has earned a BSW from an institution accredited by the CSWE within the last five years prior to the start of the term to which they are applying, OR
- If the BSW has been received from an institution accredited by the CSWE more than five years prior to applying to the Advanced Standing program, the applicant must prove an active involvement in practicing the social work profession during the time between graduation and application to the program. Examples of how to prove this active involvement are certifications of employment and/or volunteer work and some level of officially recognized licensure in social work.
- 3.0 or higher overall GPA

Total Hours		**23**

[1] Students who matriculated before Fall 2025 should take SOWK 681. Student who matriculated in Fall 2025 or after should take SOWK 682.

[2] See Course Options (p. 1849) for the Advanced Clinical Track.

Internship

The MSW Advanced Standing program requires a 600-hour internship, performed at the rate of 24 hours per week. Internships are typically on Monday, Wednesday, and Friday during regular business hours.

Students may pursue an internship from fall-spring, spring-summer, or a limited number of summer block internships are available. A summer block consists of 35-40 hours per week, Monday-Friday, during regular business hours.

Specializations & Tracks Options

The Master of Social Work program have the following specialization and track options:

- Leadership, Mezzo, and Macro Practice (LMMP) Specialization
  - Leadership, Community, Advocacy, and Policy (LCAP) Track (p. 1846)
- Micro Practice Specialization
  - Advanced Clinical Practice Track (p. 1849)
  - Certified Alcohol and Other Drugs Counselor Training Program (CADC) Track (p. 1852)
  - Migration Studies Track (p. 1855)
  - Schools/Professional Educator License (PEL) Track (p. 1858)

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Demonstrate ethical and professional behavior.
- Engage diversity and difference in practice, including promoting social and economic justice.
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities.

Social Work Online (MSW)

The Online MSW program curriculum requires 49 credit hours of coursework, equivalent to 8 consecutive semesters including summer terms, and follows a cohort model for the Foundation portion of the program. The coursework for the program offers fully online content with synchronous class sessions. The required internships are in-person in the student's home state.

The program offers advanced practice training in clinical and school settings. Graduates of this program are well positioned for roles in direct social work practice in community, hospital, child welfare, school and private practice settings.

Students in the Master's in Social Work Program can select an area of specialization in:

- Micro Practice Specialization
- Leadership, Mezzo, & Macro Practice Specialization (LMMP) *Currently paused*

Students in the **Micro Practice Specialization** can choose a track from the following:

- Advanced Clinical Practice
- Schools/Professional Educator License (PEL) (for students in Illinois only)

The **Leadership, Mezzo, & Macro Practice (LMMP)** area of specialization offers a track in:

- Leadership, Community, Advocacy, and Policy (LCAP) *Currently paused*

Upon completing the program, students have completed the education requirements for the LSW and the LCSW licenses. The LSCW requires post-graduate clinical supervision hours by a Licensed Clinician and a passing score on the licensure exam, or extended post-graduate supervision.

Elective Courses		**6**
All students will take two electives.		
Advanced Clinical Practice students take SOWK 621 and SOWK 645.		
Schools students take SOWK 603 and SOWK 645.		
Total Hours		**49**

[1] Students who matriculated before Fall 2025 should take SOWK 504 and SOWK 681. Students who matriculated in Fall 2025 or after should take SOWK 508 and SOWK 682.

[2] Students who matriculated before Fall 2024 should take SOWK 632. Students who matriculated Fall 2024 or after should take SOWK 612.

Specializations & Tracks Options

The Master of Social Work program has the following specialization and track options:

- Micro Practice Specialization
  - Advanced Clinical Practice Track (p. 1849)
  - Schools/Professional Educator License (PEL) Track (p. 1858) (Illinois only)

Internships

Students are required to complete two internships during their program. For the first year of the program, students focus on coursework only and do not complete an internship. However, at the start of the program, students are required to work with the Regional Coordinators to actively participate in locating internship sites in their home state for their generalist and specialized internships. Students apply to sites and interview to secure an internship. Internships are from Fall to Spring only.

The generalist internship is 400 hours, performed at the rate of 10-15 hours per week. The specialized internship is 600 hours, performed at 24 hours per week, and is aligned with the student's area of specialization.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Demonstrate ethical and professional behavior.
- Engage diversity and difference in practice, including promoting social and economic justice.
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities.

Social Work Advanced Standing Online Program (MSW)

The MSW program requires the completion of 23 credit hours, including a 600-hour internship. The program takes 10 months to complete for students that attend full-time (four classes per semester plus internship) or two years to complete for students who attend part-time (two courses per semester). The Advanced Standing MSW program begins in the Fall semester.

Eligibility

To be considered for the Advanced Standing program, the following requirements must be met:

- Earned a BSW from an institution accredited by the CSWE within the last five years prior to the start of the term in which you are applying to
- If the BSW has been received from an institution accredited by the CSWE more than five years prior to applying to the Advanced Standing program, the applicant must prove an active involvement in practicing the social work profession during the time between graduation and application to the program. Examples of how to prove this active involvement are certifications of employment and/or volunteer work and some level of officially recognized licensure in social work.
- 3.0 or higher overall GPA

Schools students take SOWK 603 and SOWK 645.		
LCAP students take SOWK 616 and SOWK 645.		
Total Hours		**23**

[1] Students who matriculated before Fall 2025 should take SOWK 681. Student who matriculated in Fall 2025 or after should take **SOWK 682**.

[2] Students who matriculated before Fall 2024 should take **SOWK 632**. Students who matriculated Fall 2024 or after should take **SOWK 612**.

Internship

Advanced Standing students are required to complete one internship during their program. For the first year of the program, students focus on coursework only and do not complete an internship. However, at the start program, students are required to work with the Regional Coordinators to actively participate in locating internship sites in their home state for their specialized internship. Students apply to sites and interview to secure an internship. Internships are from Fall to Spring only. The specialized internship is 600 hours performed at 24 hours per week and is aligned with the student's area of specialization.

Specializations & Tracks Options

The Master of Social Work program have the following specialization and track options:

- Micro Practice Specialization
  - Advanced Clinical Practice Track (p. 1849)
  - Schools/Professional Educator License (PEL) Track (p. 1858)

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours

[2] Students who matriculated before Fall 2024 should take **SOWK 632**. Students who matriculated Fall 2024 or after should take **SOWK 612**.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Through the application of the 9 competencies required by the Council of Social Work Education, upon completion of the program students will be able to:

- Demonstrate ethical and professional behavior.
- Engage diversity and difference in practice, including promoting social and economic justice.
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities.

Social Work: Online Bilingual Program (MSW)

The mission of the Master of Social Work program of Loyola University Chicago School of Social Work is to prepare students for leadership and service to others as professional social workers and as actively engaged scholars of social work practice.

- The entire program can be completed in 8 consecutive semesters (3 years).
- All courses are **online** and include synchronous (real-time) courses and have asynchronous content.
- Required supervised internship that can be completed in your own community.

Master's

- Social Work Advanced Standing Online Program (MSW) (p. 1841)
- Social Work Online (MSW) (p. 1839)

Curriculum

The Online Bilingual Master's in social work degree is a three-year program offering advanced practice training. The program was designed to address the unmet service needs for health, behavioral health, and mental services for the Latinx/e community. The curriculum was adapted to prepare students to have the relevant linguistic, cultural, and migration focused knowledge and skills.

The course content and training will enable you to sit for the licensure exam in your respective state. The MSW program curriculum requires 49 credit hours of coursework, equivalent to 8 consecutive semesters, including summer terms.

[1] Students who matriculated before Fall 2025 should take SOWK 504 and SOWK 681. Student who matriculated in Fall 2025 or after should take SOWK 508 and SOWK 682.

[2] Students who matriculated before Fall 2024 should take **SOWK 632**. Students who matriculated Fall 2024 or after should take SOWK 616.

Internships

Students complete two required internships (generalist and specialized). The internship timeline for the Online Bilingual MSW Program for both internships is Fall- Spring.

- The generalist internship requires students complete a total of 400 hours over the course of two consecutive semesters, requiring approximately 12-15 hours per week. The generalist internship provides students with the opportunity to explore broad social work practice activities with individuals, families, groups, organizations, and communities. Appropriate tasks include (but not limited to): learning and practicing documentation, providing case management services and supports, conducting community outreach, co-facilitating groups/ workshops, etc. Students are not expected to provide clinical therapy in the generalist internship.
- The specialized internship offers students the opportunity to practice advanced clinical skills, including providing individual and group therapy services. Students are required to complete a total of 600 hours over the course of two consecutive semesters, requiring approximately 20-24 hours per week. Of the 600 hours, 50-70% of the hours should be focused on clinical work and in direct service to clients.
- Students work with Latinx/ Migrant populations during internships.
- Students are required to be supervised during internships by a professional that has an MSW with two years post masters experience or Licensed Clinical Social Worker. Students should receive weekly supervision from the site supervisor.
- Internship schedules are determined together by the student and site and should be discussed during the interview process. Start dates, end dates, and number of hours worked per week should be discussed. Students should determine with the site a consistent schedule for the internship.

For additional information related to internship policies and requirements, please review the School of Social Work's Internship Manual available to view here: https://www.luc.edu/socialwork/student-support/internship/

Specialization & Track

This degree program is only compatible with the Micro Practice Specialization with Migration Studies Track (p. 1855).

[1] Students who matriculated before Fall 2025 should take SOWK 504 and SOWK 681. Student who matriculated in Fall 2025 or after should take SOWK 508 and SOWK 682.

[2] Students who matriculated before Fall 2024 should take **SOWK 632**. Students who matriculated Fall 2024 or after should take **SOWK 616**.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Through the application of the 9 competencies required by the Council of Social Work Education, upon completion of the program students will be able to:

- Demonstrate ethical and professional behavior.
- Engage diversity and difference in practice, including promoting social and economic justice.
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities.

Master of Social Work - Advanced Standing Online Bilingual Program (MSW)

The Advanced Standing Online Bilingual Master of Social Work (MSW) is an innovative offering by the School of Social Work to ensure that communities have professional social workers who are linguistically competent and culturally aware of the nuances faced by individuals, families, groups, and communities when faced with receiving services. This unique program seeks to enhance the knowledge, values, and skills in order to work with vulnerable, disenfranchised individuals in society. The program is part of the Micro Specialization with a Migration Studies track and focuses on Latinx/e communities. Advanced Standing Students will complete a total of 23 credit hours to earn their MSW degree.

The courses are taught in both English and Spanish by faculty who are language proficient in Spanish. It is important that students are proficient in both languages for the coursework as well as the internship settings. Meaningful, application-oriented coursework and assignments will ensure that you are prepared to join the workforce with confidence and serve the people that need your support towards leading a sustained, fruitful, healthy life.

Curriculum

If you have earned a Bachelor of Social Work (BSW), you can apply for the Advanced Standing program. Visit the MSW Advanced Standing Option page (https://gpem.luc.edu/portal/program/?name=socialworkmswonline) to see if you qualify. Our curriculum is a well-thought-out sequence of courses that prepares you to practice as a professional social worker in your community. The course content and training will also enable you to sit for the licensure exams in your respective states.

The academic curriculum of the Advanced Standing Bilingual MSW program is only 23 credit hours. This option allows BSW graduates to complete an MSW in just 4 consecutive semesters, including a Summer semester.

Internship

Basic Information about Internships

Completion of the internship requirements in the indicated time is required for graduation.

Advanced Standing Program - One Internship Required

- Specialized internship – 600 hours to be completed in 2 semesters

SPECIALIZED INTERNSHIP: DESCRIPTION

- The specialized internship offers students the opportunity to practice advanced clinical skills, including providing individual and group therapy services. Students are required to complete a total of 600 hours over the course of two consecutive semesters, requiring approximately 20-24 hours per week. Of the 600 hours, 50-70% of the hours should be focused on clinical work and in direct service to clients.
- Internship begins in the seventh semester of the program.
- The student receives weekly clinical supervision at their internship site.
- Students work with Latinx/ Migrant populations during internships.
- Students are required to be supervised during internships by a professional that has an MSW with two years post masters experience or Licensed Clinical Social Worker. Students should receive weekly supervision from the site supervisor.
- Internship schedules are determined together by the student and site and should be discussed during the interview process. Start dates, end dates, and number of hours worked per week should be discussed. Students should determine with the site a consistent schedule for the internship.

For additional information related to internship policies and requirements, please review the School of Social Work's Internship Manual available to view here: https://www.luc.edu/socialwork/student-support/internship/

Specialization & Track Option

This degree program is only compatible with the Micro Practice Specialization with Migration Studies Track (p. 1855).

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. Students must adhere to the course sequence. Students must maintain a 3.0 cumulative GPA to remain in good academic standing. A grade of "C" or higher is required to pass a course. A "F" grade in any course will result in dismissal from the program.

1 Students who matriculated before Fall 2025 should take SOWK 681. Students who matriculated Fall 2025 or after should take SOWK 682.

2 Students who matriculated before Fall 2024 should take **SOWK 632**. Students who matriculated Fall 2024 or after should take **SOWK 616.**

3 SWII 632/SWII 633 - 600 hours

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Through the application of the 9 competencies required by the Council of Social Work Education, upon completion of the program students will be able to:

- Demonstrate ethical and professional behavior.
- Engage diversity and difference in practice, including promoting social and economic justice.
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities.

MSW Specializations & Tracks

The Master of Social Work program have the following specialization and track options:

- Leadership, Mezzo, and Macro Practice (LMMP) Specialization
  - Leadership, Community, Advocacy, and Policy (LCAP) Track (p. 1846)
- Micro Practice Specialization
  - Advanced Clinical Practice Track (p. 1849)
  - Certified Alcohol and Other Drugs Counselor Training Program (CADC) Track (p. 1852)
  - Migration Studies Track (p. 1855)
  - Schools/Professional Educator License (PEL) Track (p. 1858)

Specializations and tracks are not available to all MSW programs. Available options are listed on the program pages.

Leadership, Mezzo, and Macro Practice (LMMP) Specialization with Leadership, Community, Advocacy, and Policy (LCAP) Track

Within the Leadership, Mezzo, and Macro Practice (LMMP) area of specialization is the Leadership, Community, Advocacy, and Policy (LCAP) track. This track prepares students for a range of mezzo and macro practice roles within a variety of organizational and community settings. Historically social workers have been called upon to assume leadership and facilitative roles in areas related to personnel supervision and development, program management, agency/organizational administration, community organizing, policy development, and advocacy.

Whether rooted in a generalist or clinical model of professional education, social workers must have the requisite knowledge, skills, and values to perform their roles and have an impact as leaders, advocates, organizers, and administrators. Social work supervisors, program managers, administrators, community organizers, policy developers, and advocates must know how to work with diverse and multicultural communities, organizations, personnel, and clients. For social workers providing leadership in organizations that provide direct services, they must ensure quality and affirming service provision for all client populations.

The advanced track in Leadership, Community, Advocacy, and Policy is critical to effectively prepare the social work profession to maintain expertise in the operation of human service organizations, mobilization of communities in creating change, creation of policy, and promotion of legislation that promotes equity.

Curriculum

Students are required to complete the following courses:

Code	Title	Hours
SOWK 650	Leadership & Supervision in Service Organizations	3
SOWK 652	Organizations, Program Development, and Evaluation	3
SOWK 653	Community Organizing and Policy Practice	3
Total Hours		**9**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

MSW Program Specialized LMMP Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, antiracist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work. Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

- Practice self-reflection and self-evaluation in working through competing personal and professional values.

- Apply and anti-racist and anti-oppressive framework to macro practice decision-making, considering NASW and IFSW ethical codes, research and practice-based knowledge, and applicable legal and policy information.
- Promote policies for organizational, community, and policy change that reflect social work values and challenge inequities.
- Demonstrate an understanding of social work supervision as an accountability mechanism in supporting ethical and professional social work practice.
- Identify discrimination and marginalization and prioritize the voices of affected populations.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history that result in oppression and racism, including social work's role and response. Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

- Integrate knowledge of international human rights conventions and covenants, as well as human rights theories and frameworks, into practice that addresses social, economic, and environmental justice.
- Critically examine the political process to participate in organizational, community, and policy change addressing human rights and social justice
- Identify human rights and justice issues of clients and constituents.
- Develop strategies to address human rights and justice issues and to evaluate outcomes with key stakeholders.

Competency 3: Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

- Demonstrate proficiency in choosing and using a variety of communication styles to engage with people of various political ideologies, religious and cultural backgrounds, and points of view.
- Create engagement strategies that are inclusive and consider systems of power and intersectional identities, including areas of racism, sexism, nativism, etc.
- Recognize the discrepancies that may arise between respecting cultural differences of clients and constituencies and the Universal Declaration of Human Rights
- Develop leadership and other teams that reflect the diversity of the communities in which they work.

Competency 4: Engage in Practice-Informed Research and Research-Informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

- Critically analyzes research results on best practices in management and supervision from a variety of disciplines.
- Develop research questions with input from stakeholders and analysis of how the research process may impact, both positively and negatively, clients, programs, organizations, communities, and/or policies. Intentionally include the voices and experiences of those most affected by any type of inequality into the research process
- Critically analyze research findings and practice models to inform practice at all levels of macro practice, including teams, organizations, community, and policy
- Identify possible barriers and resistance to the conduct and dissemination of research, as well as any ethical, political, and other dilemmas that may arise.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affects wellbeing, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand

and critique the history and current structures of social policies and services and the role of policy in service delivery through rights-based, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

- Communicate to stakeholders and policymakers the implications of policies and policy change in the lives of clients.
- Conduct and design a plan of organizational analysis and change, working with relevant constituencies, to evaluate interventions that impact clients and communities utilizing best practice models reflecting social work values, ethics, and the mission of the organization.
- Collect, maintain, interpret, and analyze data from both internal and external organizational environments, the community of stakeholders and diverse client groups to identify and prioritize social problems.
- Recognize how oppression and social injustice affects client groups, organizations and communities and being proactive in intervening for human rights and justice.
- Understand strategies and techniques for advocating at local, state, and federal levels in policy development.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

- Demonstrate ability to identify a comprehensive range of stakeholders in the relevant practice setting: organization, community, and/or policy.
- Demonstrate self-awareness and professional behavior in engaging with individuals, teams, community groups and organizations.
- Demonstrate verbal, written, and digital skills to engage multiple, diverse constituencies.
- Understand and demonstrate effective group and team facilitation and mediation process skills that facilitate engagement and collaboration.
- Define and recognize their own and others' leadership skills to effectively promote stakeholder engagement and change.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in culturally responsive assessment with clients and constituencies, including individuals, families, groups, organizations, and communities. Assessment involves a collaborative process of defining presenting challenges and identifying strengths with individuals, families, groups, organizations, and communities to develop a mutually agreed-upon plan. Social workers recognize the implications of the larger practice context in the assessment process and use interprofessional collaboration in this process. Social workers are self-reflective and understand how bias, power, privilege, and their personal values and experiences may affect their assessment and decision making.

Social workers:

- Analyze power distributions to identify influential decision-makers, whether formal or informal, among individuals, teams, organizations, communities, and other institutional entities
- Identify and create mezzo and macro interventions based on an assessment and analysis of assets, needs, benefits, service gaps, rights, and power and resource distributions.
- Demonstrate ability to collaborate with stakeholders throughout the assessment process.
- Analyze collected data and communicate summaries of the data in written and oral form as appropriate.
- Present options for intervention based on data-informed assessments.
- Articulate the benefits and drawbacks of various metrics, analytical methods and tools, and data sources (primary & secondary, quantitative & qualitative)

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior, person-in-environment, and other interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in selecting culturally responsive interventions with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions and participate in interprofessional collaboration to achieve client and constituency goals. Social workers facilitate effective transitions and endings.

Social workers:

- Articulates ethically sound, social work value-centered supervision strategies for employees, including performance reviews and corrective action plans.
- Engage with stakeholders in the identification of issues and policies that impact individual well-being and the communities and organizations that support them.
- Mobilize constituents to participate and lead in issue analysis and formulation of corresponding advocacy agendas with effective

strategies and tactics to advance meaningful change for social justice, equity, and inclusion.
- Participate in coalitions, networks, professional associations, and community based organizing efforts to leverage political capital to challenge unjust structures of power and effect positive change.
- Formulate and persuasively communicate cogent arguments through effective written and oral formats that reach diverse audiences and utilize varied platforms.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of diverse individuals, families, groups, organizations, and communities. Social workers evaluate processes and outcomes to increase practice, policy, and service delivery effectiveness. Social workers apply anti-racist and anti-oppressive perspectives in evaluating outcomes. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers use qualitative and quantitative methods for evaluating outcomes and practice effectiveness.

Social workers:

- Demonstrate ethical knowledge and awareness of evaluation guidelines that can be employed in assessment of practice and ensure confidentiality of engaged participants.
- Comprehend evaluation norms, benchmarks and guidelines as approved by NASW and CSWE that allow accurate and impartial assessments at all levels of social work practice.
- Illustrate comprehensive knowledge of human rights-based understanding of evaluation design, methods, approaches, and analysis that can be applied in simple to complex settings within social work mezzo and macro policy and organizational environments.
- Distinguish, explain, and apply various types of theories of change and logic models to understand systems thinking to identify and facilitate growth-oriented evaluative mindsets among all stakeholders.

Micro Practice Specialization with Advanced Clinical Practice Track

The Advanced Clinical Practice track prepares students for micro-level clinical practice across a variety of settings, including hospitals, outpatient practice, extended care facilities, and community mental health agencies. This track is consistent with Loyola University School of Social Work's mission to provide a transformative education for practice-informed social work.

Students will choose 9 credit hours of courses from the Advanced Clinical Practice track. Courses include a variety of modalities, populations, and client concerns, including individuals, groups, families, children, adolescents, adults, older adults, loss and grief, trauma, and more. All courses integrate content on policy and research as relevant to the course topic.

Curriculum

Students can select any three courses from this list for the Advanced Clinical Practice Track:

Code	Title	Hours
Select three of the following:		9
SOWK 602	Health and Behavioral Health Policy and Systems	
SOWK 603	Seminar in Brief Treatment (starting Spring 2023)	
SOWK 604	Advanced Clinical Social Work Practice with Groups	
SOWK 605	Human Sexuality and Sexual Dysfunction	
SOWK 611	Social Work Practice with Couples	
SOWK 612	Family Assessment and Intervention	
SOWK 614	Clinical Social Work Practice in Health Care	
SOWK 615	Social Work Practice with Adolescents	
SOWK 616	Psychotherapy with Adults	
SOWK 618	The Role of Religion and Spirituality in Psychotherapy	
SOWK 619	Issues in Treatment of Women	
SOWK 620	Clinical Social Work Practice with Children	
SOWK 621	Clinical Practice in Addiction	
SOWK 622	Substance Abuse Treatment in Groups	
SOWK 626	Social Work with Severely Mentally Ill	
SOWK 631	Clinical Social Work Practice with Family Violence	
SOWK 632	Clinical Social Work with Older Adults	
SOWK 637	Neurodevelopment and Trauma	
SOWK 645	Crisis Intervention	
SOWK 656	Social Work Practice with LGBTQ Populations	
SOWK 670	Bridging Psychodynamic Theory and Cognitive Behavioral Practice	
SOWK 722	Introduction to Alcohol and Other Drug Disorders	
SOWK 731	Social Work Practice with Refugees and Immigrants	
SOWK 735	Loss, Grief, and Dying	
SOWK 754	Global Social Work: Reflective Practice for Justice and Peace	
Total Hours		**9**

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

MSW Program Specialized Micro Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by

principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, antiracist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work. Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

- Demonstrate professional use of self as a social worker, reflecting knowledge of personal professional strengths, limitations, challenges, and cooperatively resolving interpersonal conflicts.
- Demonstrate ethical use of advanced modalities in practice and any related technological applications in the micro field of social work.
- Recognize and manage ethical violations and resolve conflicting ethical obligations.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history that result in oppression and racism, including social work's role and response. Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

- Articulate human rights violations the client and client's system are experiencing, including environmental and economic issues that endanger the health of the client system.
- Demonstrate understanding of the impact of intersectionality of marginalized identities, systemic racism, and associated oppressions and plan practice accordingly.
- Demonstrate ways in which social workers can advocate for human rights at the individual, family, group, organizational, and community system levels as it relates to the micro field of social work practice

Competency 3: Engage in Anti-racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

- Understand and demonstrate an understanding of anti-racism practice at the individual, group, organizational, community, research, and policy levels that will allow for diversity, equity, and inclusion practice in the micro-level field of social work.
- Demonstrate an understanding of discrimination patterns in society and how micro-level oppression impacts micro-level social work practice regarding race, class, gender, sexual orientation, gender identity, ability, age, and any other social categories in which oppression occurs.
- Demonstrate the ability to formulate how an anti-racist practice will advance the client and client system's human rights.

Competency 4: Engage In Practice-Informed Research and Research-Informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

- Demonstrate understanding of and be able to contribute to the evaluation of social research regarding advanced micro practice.
- Critically evaluate and select potential practice models relevant to the client's systems.

- Use their experience from their internship or practicum placement to identify real-life challenges and address the practical needs of clients
- Engage in partnerships with experienced social workers to help bridge the gap between theory and practice and broaden knowledge of social work practice as it relates to the micro field of social work.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affects wellbeing, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand and critique the history and current structures of social policies and services and the role of policy in service delivery through rightsbased, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

- Communicate to stakeholders and policymakers the implications of policies and policy change in the lives of clients.
- Conduct and design a plan for organizational analysis and change, working with relevant constituencies to evaluate interventions that impact clients and communities utilizing best practice models reflecting social work values, ethics, and the organization's mission.
- Collect, maintain, interpret, and analyze data from both internal and external organizational environments, the community of stakeholders, and diverse client groups to identify and prioritize social problems.
- Recognize how oppression and social injustice affect client groups, organizations, and communities and intervene proactively for human rights and justice.
- Understand strategies and techniques for advocating at local, state, and federal levels in policy development.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

- Apply culturally appropriate resources available to assist with problem-solving.
- Recognize and describe self-reflective competency in identifying bias, countertransference, and potential microaggressions when engaging diverse client systems.
- Implement and describe the use of reflective listening tools when needed to engage and empower members of families and groups.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in culturally responsive assessment with clients and constituencies, including individuals, families, groups, organizations, and communities. Assessment involves a collaborative process of defining presenting challenges and identifying strengths with individuals, families, groups, organizations, and communities to develop a mutually agreed-upon plan. Social workers recognize the implications of the larger practice context in the assessment process and use interprofessional collaboration in this process. Social workers are self-reflective and understand how bias, power, privilege, and their personal values and experiences may affect their assessment and decision making.

Social workers:

- Collect and organize data to support their professional decision-making as well as demonstrate critical thinking to interpret information from clients and constituencies.
- Illustrate knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies, understanding the lack of political neutrality in their work.
- Exemplify a process in which mutually agreed-on intervention goals and objectives are generated based on the critical assessment of strengths, needs, and challenges within clients and constituencies in their social environment; and
- Convey a deeper understanding of how to select appropriate intervention strategies informed by assessment, research knowledge, and values and preferences of clients and constituencies through the exercise of antiracist practice principles.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior, person-in-environment, and other interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in selecting culturally responsive interventions with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions and participate in interprofessional collaboration to achieve client and constituency goals. Social workers facilitate effective transitions and endings.

Social workers:

- Practices self-reflective understanding of the professional use of self in interventions with diverse types of client systems in order to understand and challenge oppressive social forces as well as to avoid

perpetuating racist biases, microaggressions, and disempowerment of clients.
- Use supervision and consultation appropriate to developing skills for advanced and interdisciplinary practice.
- Demonstrate an ability to intervene collaboratively and collectively with clients in choosing treatment plans and their implementation.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of diverse individuals, families, groups, organizations, and communities. Social workers evaluate processes and outcomes to increase practice, policy, and service delivery effectiveness. Social workers apply anti-racist and anti-oppressive perspectives in evaluating outcomes. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers use qualitative and quantitative methods for evaluating outcomes and practice effectiveness.

Social workers:

- Demonstrate understanding of the logic and method of single case evaluation of practice from diverse theoretical and methodological perspectives.
- Competently demonstrate case evaluation, including identifying problems and their resolution, the fulfillment of goals co-identified with client, and managing systemic problems that impinge on client well-being.
- Demonstrate competence in incorporating client feedback processes in planning and carrying out the intervention plan.

Micro Practice Specialization with Certified Alcohol and Other Drugs Counselor Training Program (CADC) Track

Loyola University Chicago's School of Social Work is accredited by the Illinois Certification Board, ICB (Formally IAODAPCA) as an Advanced Accredited Training Program, preparing social work students and practitioners to become Certified Alcohol and Other Drug Counselors (CADC).

Upon completion of the training program (see below for program requirements), students are eligible to submit their application to ICB to take the CADC exam. A passing grade on the ICB-administered exam is required for official CADC certification.

Student eligibility to take the exam is contingent upon the completion of the required classes and internship hours.

Curriculum

Coursework

The following courses are required by Loyola and to fulfill state requirements

Code	Title	Hours
SOWK 722	Introduction to Alcohol and Other Drug Disorders	3
SOWK 621	Clinical Practice in Addiction	3
SOWK 622	Substance Abuse Treatment in Groups	3
Total Hours		**9**

Internship

Students in the Micro Practice Specialization in the CADC track must secure an internship at a site that has been approved by Loyola as a CADC site. The internship requirement is 600 hours.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

MSW Program Specialized Micro Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, antiracist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work. Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

- Demonstrate professional use of self as a social worker, reflecting knowledge of personal professional strengths, limitations, challenges, and cooperatively resolving interpersonal conflicts.
- Demonstrate ethical use of advanced modalities in practice and any related technological applications in the micro field of social work.
- Recognize and manage ethical violations and resolve conflicting ethical obligations.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history that result in oppression and racism, including social work's role and response. Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

- Articulate human rights violations the client and client's system are experiencing, including environmental and economic issues that endanger the health of the client system.
- Demonstrate understanding of the impact of intersectionality of marginalized identities, systemic racism, and associated oppressions and plan practice accordingly.
- Demonstrate ways in which social workers can advocate for human rights at the individual, family, group, organizational, and community system levels as it relates to the micro field of social work practice

Competency 3: Engage in Anti-racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

- Understand and demonstrate an understanding of anti-racism practice at the individual, group, organizational, community, research, and policy levels that will allow for diversity, equity, and inclusion practice in the micro-level field of social work.
- Demonstrate an understanding of discrimination patterns in society and how micro-level oppression impacts micro-level social work practice regarding race, class, gender, sexual orientation, gender identity, ability, age, and any other social categories in which oppression occurs.
- Demonstrate the ability to formulate how an anti-racist practice will advance the client and client system's human rights.

Competency 4: Engage In Practice-Informed Research and Research-Informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

- Demonstrate understanding of and be able to contribute to the evaluation of social research regarding advanced micro practice.
- Critically evaluate and select potential practice models relevant to the client's systems.
- Use their experience from their internship or practicum placement to identify real-life challenges and address the practical needs of clients
- Engage in partnerships with experienced social workers to help bridge the gap between theory and practice and broaden knowledge of social work practice as it relates to the micro field of social work.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affects wellbeing, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand and critique the history and current structures of social policies and services and the role of policy in service delivery through rightsbased, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

- Communicate to stakeholders and policymakers the implications of policies and policy change in the lives of clients.
- Conduct and design a plan for organizational analysis and change, working with relevant constituencies to evaluate interventions that

impact clients and communities utilizing best practice models reflecting social work values, ethics, and the organization's mission.
- Collect, maintain, interpret, and analyze data from both internal and external organizational environments, the community of stakeholders, and diverse client groups to identify and prioritize social problems.
- Recognize how oppression and social injustice affect client groups, organizations, and communities and intervene proactively for human rights and justice.
- Understand strategies and techniques for advocating at local, state, and federal levels in policy development.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

- Apply culturally appropriate resources available to assist with problem-solving.
- Recognize and describe self-reflective competency in identifying bias, countertransference, and potential microaggressions when engaging diverse client systems.
- Implement and describe the use of reflective listening tools when needed to engage and empower members of families and groups.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in culturally responsive assessment with clients and constituencies, including individuals, families, groups, organizations, and communities. Assessment involves a collaborative process of defining presenting challenges and identifying strengths with individuals, families, groups, organizations, and communities to develop a mutually agreed-upon plan. Social workers recognize the implications of the larger practice context in the assessment process and use interprofessional collaboration in this process. Social workers are self-reflective and understand how bias, power, privilege, and their personal values and experiences may affect their assessment and decision making.

Social workers:

- Collect and organize data to support their professional decision-making as well as demonstrate critical thinking to interpret information from clients and constituencies.
- Illustrate knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies, understanding the lack of political neutrality in their work.
- Exemplify a process in which mutually agreed-on intervention goals and objectives are generated based on the critical assessment of strengths, needs, and challenges within clients and constituencies in their social environment; and
- Convey a deeper understanding of how to select appropriate intervention strategies informed by assessment, research knowledge, and values and preferences of clients and constituencies through the exercise of antiracist practice principles.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior, person-in-environment, and other interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in selecting culturally responsive interventions with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions and participate in interprofessional collaboration to achieve client and constituency goals. Social workers facilitate effective transitions and endings.

Social workers:

- Practices self-reflective understanding of the professional use of self in interventions with diverse types of client systems in order to understand and challenge oppressive social forces as well as to avoid perpetuating racist biases, microaggressions, and disempowerment of clients.
- Use supervision and consultation appropriate to developing skills for advanced and interdisciplinary practice.
- Demonstrate an ability to intervene collaboratively and collectively with clients in choosing treatment plans and their implementation.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of diverse individuals, families, groups, organizations, and communities. Social workers evaluate processes and outcomes to increase practice, policy, and service delivery effectiveness. Social workers apply anti-racist and anti-oppressive perspectives in evaluating outcomes. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers use qualitative and quantitative methods for evaluating outcomes and practice effectiveness.

Social workers:

- Demonstrate understanding of the logic and method of single case evaluation of practice from diverse theoretical and methodological perspectives.
- Competently demonstrate case evaluation, including identifying problems and their resolution, the fulfillment of goals co-identified with client, and managing systemic problems that impinge on client well-being.
- Demonstrate competence in incorporating client feedback processes in planning and carrying out the intervention plan.

Micro Practice Specialization with Migration Studies Track

In response to global trends and the associated human, social, political, and spiritual challenges that migration presents, the Loyola University School of Social Work responded with the development of a Migration Studies track. This track is designed to prepare social work professionals for international, transnational, and domestic practice with internally displaced persons, immigrants, and refugees.

Curriculum

Code	Title	Hours
Required Courses		
Select three of the following: [1]		9
SOWK 730	Immigration Dynamics and U.S. Social Policy (Spring only)	
SOWK 731	Social Work Practice with Refugees and Immigrants (Spring only)	
SOWK 732	Migration, Social Justice, and Human Rights (Fall only)	
SOWK 733	North American Migration Dynamics, Challenges & Opportunity [2]	
Total Hours		**9**

[1] Can be taken during any year of study.

[2] Summer in Mexico only; the course is taught in English by an SSW professor and is the equivalent of SOWK 730 Immigration Dynamics and U.S. Social Policy

Study Abroad Internship (Optional)

The study abroad program in Mexico (classes and internship) complements this track but is not required. For information and application forms, see Study Abroad: Mexico (https://www.luc.edu/socialwork/student-support/study-abroad/mexico/). The Mexico internship can be completed as a generalist or specialized internship (except for students pursuing a Schools specialization; a school internship must be done in the U.S.). Interested students will need to complete the application materials and be interviewed by Dr. Maria Vidal de Haymes. Information and application materials can be retrieved from Study Abroad: Mexico (https://www.luc.edu/socialwork/student-support/study-abroad/mexico/). A minimum of conversational Spanish is required. Students who want to pursue an internship in Mexico will meet for a second in-person interview with Dr. Vidal de Haymes.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

MSW Program Specialized Micro Learning Outcomes

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant policies, laws, and regulations that may affect practice with individuals, families, groups, organizations, and communities. Social workers understand that ethics are informed by principles of human rights and apply them toward realizing social, racial, economic, and environmental justice in their practice. Social workers understand frameworks of ethical decision making and apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize and manage personal values and the distinction between personal and professional values. Social workers understand how their evolving worldview, personal experiences, and affective reactions influence their professional judgment and behavior. Social workers take measures to care for themselves professionally and personally, understanding that self-care is paramount for competent and ethical social work practice. Social workers use rights-based, antiracist, and anti-oppressive lenses to understand and critique the profession's history, mission, roles, and responsibilities and recognize historical and current contexts of oppression in shaping institutions and social work. Social workers understand the role of other professionals when engaged in interprofessional practice. Social workers recognize the importance of lifelong learning and are committed to continually updating their skills to ensure relevant and effective practice. Social workers understand digital technology and the ethical use of technology in social work practice.

Social workers:

- Demonstrate professional use of self as a social worker, reflecting knowledge of personal professional strengths, limitations, challenges, and cooperatively resolving interpersonal conflicts.
- Demonstrate ethical use of advanced modalities in practice and any related technological applications in the micro field of social work.
- Recognize and manage ethical violations and resolve conflicting ethical obligations.

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights. Social workers are knowledgeable about the global intersecting and ongoing injustices throughout history that result in oppression and racism, including social work's role and response. Social workers critically evaluate the distribution of power and privilege in society in order to promote social, racial, economic, and environmental justice by reducing inequities and ensuring dignity and respect for all. Social workers advocate for and engage in strategies to eliminate oppressive structural barriers to ensure that social resources, rights, and responsibilities are distributed equitably and that civil, political, economic, social, and cultural human rights are protected.

Social workers:

- Articulate human rights violations the client and client's system are experiencing, including environmental and economic issues that endanger the health of the client system.
- Demonstrate understanding of the impact of intersectionality of marginalized identities, systemic racism, and associated oppressions and plan practice accordingly.
- Demonstrate ways in which social workers can advocate for human rights at the individual, family, group, organizational, and community system levels as it relates to the micro field of social work practice

Competency 3: Engage in Anti-racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Social workers understand how racism and oppression shape human experiences and how these two constructs influence practice at the individual, family, group, organizational, and community levels and in policy and research. Social workers understand the pervasive impact of White supremacy and privilege and use their knowledge, awareness, and skills to engage in anti-racist practice. Social workers understand how diversity and intersectionality shape human experiences and identity development and affect equity and inclusion. The dimensions of diversity are understood as the intersectionality of factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that this intersectionality means that a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege and power. Social workers understand the societal and historical roots of social and racial injustices and the forms and mechanisms of oppression and discrimination. Social workers understand cultural humility and recognize the extent to which a culture's structures and values, including social, economic, political, racial, technological, and cultural exclusions, may create privilege and power resulting in systemic oppression.

Social workers:

- Understand and demonstrate an understanding of anti-racism practice at the individual, group, organizational, community, research, and policy levels that will allow for diversity, equity, and inclusion practice in the micro-level field of social work.
- Demonstrate an understanding of discrimination patterns in society and how micro-level oppression impacts micro-level social work practice regarding race, class, gender, sexual orientation, gender identity, ability, age, and any other social categories in which oppression occurs.
- Demonstrate the ability to formulate how an anti-racist practice will advance the client and client system's human rights.

Competency 4: Engage In Practice-Informed Research and Research-Informed Practice

Social workers use ethical, culturally informed, anti-racist, and anti-oppressive approaches in conducting research and building knowledge. Social workers use research to inform their practice decision making and articulate how their practice experience informs research and evaluation decisions. Social workers critically evaluate and critique current, empirically sound research to inform decisions pertaining to practice, policy, and programs. Social workers understand the inherent bias in research and evaluate design, analysis, and interpretation using an anti-racist and anti-oppressive perspective. Social workers know how to access, critique, and synthesize the current literature to develop appropriate research questions and hypotheses. Social workers demonstrate knowledge and skills regarding qualitative and quantitative research methods and analysis, and they interpret data derived from these methods. Social workers demonstrate knowledge about methods to assess reliability and validity in social work research. Social workers can articulate and share research findings in ways that are usable to a variety of clients and constituencies. Social workers understand the value of evidence derived from interprofessional and diverse research methods, approaches, and sources.

Social workers:

- Demonstrate understanding of and be able to contribute to the evaluation of social research regarding advanced micro practice.
- Critically evaluate and select potential practice models relevant to the client's systems.
- Use their experience from their internship or practicum placement to identify real-life challenges and address the practical needs of clients
- Engage in partnerships with experienced social workers to help bridge the gap between theory and practice and broaden knowledge of social work practice as it relates to the micro field of social work.

Competency 5: Engage in Policy Practice

Social workers identify social policy at the local, state, federal, and global level that affects wellbeing, human rights and justice, service delivery, and access to social services. Social workers recognize the historical, social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy. Social workers understand and critique the history and current structures of social policies and services and the role of policy in service delivery through rightsbased, anti-oppressive, and anti-racist lenses. Social workers influence policy formulation, analysis, implementation, and evaluation within their practice settings with individuals, families, groups, organizations, and communities. Social workers actively engage in and advocate for anti-racist and anti-oppressive policy practice to effect change in those settings.

Social workers:

- Communicate to stakeholders and policymakers the implications of policies and policy change in the lives of clients.
- Conduct and design a plan for organizational analysis and change, working with relevant constituencies to evaluate interventions that impact clients and communities utilizing best practice models reflecting social work values, ethics, and the organization's mission.
- Collect, maintain, interpret, and analyze data from both internal and external organizational environments, the community of stakeholders, and diverse client groups to identify and prioritize social problems.
- Recognize how oppression and social injustice affect client groups, organizations, and communities and intervene proactively for human rights and justice.
- Understand strategies and techniques for advocating at local, state, and federal levels in policy development.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of individuals, families, groups, organizations, and communities.

Social workers value the importance of human relationships. Social workers understand theories of human behavior and person-in-environment and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers are self-reflective and understand how bias, power, and privilege as well as their personal values and personal experiences may affect their ability to engage effectively with diverse clients and constituencies. Social workers use the principles of interprofessional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Social workers:

- Apply culturally appropriate resources available to assist with problem-solving.
- Recognize and describe self-reflective competency in identifying bias, countertransference, and potential microaggressions when engaging diverse client systems.
- Implement and describe the use of reflective listening tools when needed to engage and empower members of families and groups.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in culturally responsive assessment with clients and constituencies, including individuals, families, groups, organizations, and communities. Assessment involves a collaborative process of defining presenting challenges and identifying strengths with individuals, families, groups, organizations, and communities to develop a mutually agreed-upon plan. Social workers recognize the implications of the larger practice context in the assessment process and use interprofessional collaboration in this process. Social workers are self-reflective and understand how bias, power, privilege, and their personal values and experiences may affect their assessment and decision making.

Social workers:

- Collect and organize data to support their professional decision-making as well as demonstrate critical thinking to interpret information from clients and constituencies.
- Illustrate knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies, understanding the lack of political neutrality in their work.
- Exemplify a process in which mutually agreed-on intervention goals and objectives are generated based on the critical assessment of strengths, needs, and challenges within clients and constituencies in their social environment; and
- Convey a deeper understanding of how to select appropriate intervention strategies informed by assessment, research knowledge, and values and preferences of clients and constituencies through the exercise of antiracist practice principles.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice. Social workers understand theories of human behavior, person-in-environment, and other interprofessional conceptual frameworks, and they critically evaluate and apply this knowledge in selecting culturally responsive interventions with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of identifying, analyzing, and implementing evidence-informed interventions and participate in interprofessional collaboration to achieve client and constituency goals. Social workers facilitate effective transitions and endings.

Social workers:

- Practices self-reflective understanding of the professional use of self in interventions with diverse types of client systems in order to understand and challenge oppressive social forces as well as to avoid perpetuating racist biases, microaggressions, and disempowerment of clients.
- Use supervision and consultation appropriate to developing skills for advanced and interdisciplinary practice.
- Demonstrate an ability to intervene collaboratively and collectively with clients in choosing treatment plans and their implementation.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with and on behalf of diverse individuals, families, groups, organizations, and communities. Social workers evaluate processes and outcomes to increase practice, policy, and service delivery effectiveness. Social workers apply anti-racist and anti-oppressive perspectives in evaluating outcomes. Social workers understand theories of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers use qualitative and quantitative methods for evaluating outcomes and practice effectiveness.

Social workers:

- Demonstrate understanding of the logic and method of single case evaluation of practice from diverse theoretical and methodological perspectives.
- Competently demonstrate case evaluation, including identifying problems and their resolution, the fulfillment of goals co-identified with client, and managing systemic problems that impinge on client well-being.
- Demonstrate competence in incorporating client feedback processes in planning and carrying out the intervention plan.

Micro Practice Specialization with Schools/Professional Educator (PEL) Track

Individuals who wish to practice social work in a public school in Illinois must possess a Professional Educator's License (PEL) endorsed in School Social Work. In order to qualify for licensure in Illinois, Loyola students in the Micro Practice area of specialization and Schools Track receive specialized curriculum, training and support to fulfill Illinois's requirements to become eligible for a PEL with an endorsement in School Social Work. Eligibility for the PEL is based on successful completion of the requirements of the Loyola School of Social Work, the Council for Social Work Education (CSWE), and the Illinois State Board of Education (ISBE).

Curriculum

Coursework

The following courses are required by Loyola and fulfill state requirements.

Code	Title	Hours
SOWK 609A	School Social Work Policy and Practice I (Fall)	3
SOWK 609B	School Social Work Policy and Practice II (Spring)	3
CIEP 401	The Exceptional Child (offered through the School of Education)	3
Total Hours		**9**

Internship

Students in the Micro Practice in Schools Track must secure an internship at a site that has been approved by Loyola School of Social Work as a PEL-eligible school. Students are directed to these sites through placement interviews conducted by the Schools/PEL team. For the internship, students are required to follow the academic calendar of the school district in which they intern. To that end, the internship may not follow Loyola's academic calendar year. Students must complete at least 600 internship hours in a traditional public school setting. The internship will also fulfill the Council of Social Work Education's required competencies.

Content Exam

Students must pass a Illinois State Board of Education content exam in School Social Work (ISBE #238 or #184). The Schools/PEL team will provide students with information about the exam as well as help students meet deadlines and criteria mandates from ISBE.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Demonstrate ethical and professional behavior.
- Engage diversity and difference in practice, including promoting social and economic justice.
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities.

Stritch School of Medicine

Loyola University Chicago Stritch School of Medicine is committed to scholarship and the education of medical professionals and biomedical scientists. Our faculty, trainees, students, and staff, are called to go beyond facts, experimentation, and treatment of disease to prepare people to lead extraordinary lives and treat the human spirit in an environment that encourages innovation, embraces diversity, respects life, and values human dignity.

Academic information for programs in the Stritch School of Medicine can be found on their website (https://www.luc.edu/stritch/).

Dual Degree Programs

Graduate Programs

- Accounting (MBA/MSA) (p. 1859)
- Biochemistry and Molecular Biology (MD/PhD) (p. 1860)
- Business Analytics (MBA/MS) (p. 1862)
- Cell and Molecular Physiology (MD/PhD) (p. 1864)
- Divinity and Pastoral Counseling (MDiv/MA) (p. 1866)
- Divinity and Social Justice (MDiv/MA) (p. 1867)
- Finance (MBA/MSF) (p. 1869)
- Human Resources (MBA/MSHR) (p. 1870)
- Integrative Cell Biology (MD/PhD) (p. 1872)
- Law/Business (JD/MBA) (p. 1874)
- Marketing (MBA/MSM) (p. 1877)
- Medicine/Public Health (MD/MPH) (p. 1879)
- Microbiology and Immunology (MD/PhD) (p. 1881)
- Molecular Pharmacology and Therapeutics (MD/PhD) (p. 1883)
- Neuroscience (MD/PhD) (p. 1885)
- Pharmacology/Business (MS/MBA) (p. 1887)
- Political Science/Law (MA/JD) (p. 1888)
- Public Policy/Law (MPP/JD) (p. 1893)
- School Psychology (MEd/EdS) (p. 1896)
- Social Work/Children's Law and Policy (MSW/MJ) (p. 1898)
- Social Work/Law (MSW/JD) (p. 1900)
- Social Work/Public Health (MSW/MPH) (p. 1904)
- Supply Chain Management (MBA/MSSCM) (p. 1906)
- Women's Studies and Gender Studies (MA)/Social Work (MSW) (p. 1907)

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Accounting (MBA/MSA)

The dual MBA/MS in Accounting degree provides students with a depth of knowledge in financial and public accounting, and the breadth of business acumen sought by accounting and financial professionals.

Related Programs

Master's

- Accountancy (MSA) (p. 1567)

Combined

- Business Analytics (MBA/MS) (p. 1862)
- Finance (MBA/MSF) (p. 1869)

Curriculum

Degree Requirements

The dual degree in business and accounting requires four fewer courses than if each degree were earned separately. Students completing the dual-degree program will earn an MBA (p. 1590) with a specialization in accounting and an MSA degree (p. 1567).

A maximum gap of three years is allowed between the completion of one program and the start of the other.

Code	Title	Hours
MBA Prerequisites [1]		
INFS 400N	Quantitative Methods I	0
INFS 402N	Quantitative Methods II - Statistics Primer	0
MBA Introductory Courses [1]		
ACCT 400	Financial Accounting for Business Decisions	3
ECON 420	Managerial Economics	3
FINC 450	Financial Management	3
MARK 460	Marketing Management	3
SCMG 480	Operations Management	3
Required MBA Foundational Coursework		
ENTR 480	Recognizing Entrepreneurial Opportunities	3
or IBUS 455	International Strategies for Multinational Enterprises	
MARK 425N	Business Communication	1.5
MGMT 426N	Leadership Development	1.5
INFS 596N	Data Driven Decision Making	3
or MARK 470N	Research, Insights and Storytelling	
FINC 470N	Business Finance	3
MGMT 430N	Strategy and Leadership	3
HRER 417N	Managing and Motivating in the Workplace	3
MGMT 431N	Business Consulting Course	3
Ethics Requirement (Choose one)		
ETHC 441N	Business Ethics	3
or ETHC 446	International Business Ethics	
or INFS 795	Ethics and Data Analytics	
MSA Foundational Courses		
Choose six (6) of the following courses:		18
ACCT 402	Issues in Financial Reporting	
ACCT 404	Financial State Analysis	
ACCT 412	Special Topics in Accounting	
ACCT 424	Managerial Accounting	
ACCT 425	International Accounting [2]	
ACCT 431	Tax Research [3]	
ACCT 432	State, Local and International Tax [3]	
ACCT 435	Internal Audit	
ACCT 436	Forensic Accounting and Fraud [4]	
ACCT 437	Advanced Forensic Accounting [5]	
LREB 445	Entrepreneurship Law	
Three (3) ACCT from the list above or Graduate Business course elective [6]		9
Total Hours		**66**

1. Students may be granted a waiver of prerequisite and introductory MBA courses based upon academic work completed in the last 5 years with students earning the grade(s) of "B" or higher within a discipline.
2. Prerequisite of ACCT 406 Accounting Theory II.
3. Prerequisite of ACCT 408 Tax Principles Applied to Entities.
4. Prerequisite of ACCT 409 Audit I -Audit and Assurance.
5. Prerequisite of ACCT 409 Audit I -Audit and Assurance or ACCT 436 Forensic Accounting and Fraud.
6. NOTE: Introductory Core courses (ACCT 400, ECON 420, FINC 450, MARK 460, SCMG 480) may not be taken to fulfill the or general elective requirements.

Suggested Sequence of Courses

Students in a dual program should seek guidance from their assigned Academic Advisor each quarter to build a course sequence. This ensures appropriate courses to fulfill requirements and electives while maintaining pace toward program completions.

Course	Title	Hours
Year 1		
Term 1		
ACCT 400	Financial Accounting for Business Decisions	3
FINC 450	Financial Management	3
SCMG 480	Intro to Operations Management	3
	Hours	**9**
Term 2		
MARK 460	Marketing Management	3
ECON 420	Managerial Economics	3
ACCT 425	International Accounting	3
	Hours	**9**
Term 3		
MARK 425N	Business Communication	1.5
MGMT 426N	Leadership Development	1.5
INFS 596N or MARK 470N	Data Driven Decision Making or Research, Insights and Storytelling	3

ACCT 404	Financial State Analysis	3
	Hours	**9**
Term 4		
ACCT 424	Managerial Accounting	3
ETHC 441N or ETHC 446	Business Ethics or International Business Ethics	3
HRER 417N	Managing and Motivating in the Workplace	3
	Hours	**9**
Year 2		
Term 1		
ACCT 412	Special Topics in Accounting	3
ACCT 436	Forensic Accounting and Fraud	3
ENTR 480 or IBUS 455	Recognizing Entrepreneurial Opportunities or International Strategies for Multinational Enterprises	3
	Hours	**9**
Term 2		
MGMT 431N	Business Consulting Course	3
ACCT 437	Advanced Forensic Accounting	3
	Hours	**6**
Term 3		
MGMT 430N	Strategy and Leadership	3
Elective [1]		3
	Hours	**6**
Term 4		
FINC 470N	Business Finance	3
Electives (2) [1]		6
	Hours	**9**
	Total Hours	**66**

[1] Consult with Academic Advisor to select elective courses.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice. [MBA]
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making. [MBA]
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice. [MBA]
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender. [MBA]
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing. [MBA]
- Measurement: Graduate accounting students will demonstrate the ability to identify what needs to be measured, apply the appropriate measures, and recognize the strengths and weaknesses of the measures used. [MSA]
- Decision Making: Graduate accounting students will demonstrate the ability to critically use financial and non-financial data in decision-making. [MSA]
- Research: Graduate accounting students will demonstrate the ability to research new or existing accounting issues and topics, understand the link between business and accounting, and apply the finding to the business condition. [MSA]
- Risk Analysis: Graduate accounting students will demonstrate the ability to identify and manage risk. [MSA]
- Communication: Graduate accounting students will possess the ability to communicate scope, findings and recommendations of accounting work. [MSA]

Biochemistry, Molecular, and Cancer Biology (MD/PhD)

The PhD program in Biochemistry, Molecular, & Cancer Biology is part of the Integrated Program in Biomedical Sciences at Loyola University's Health Sciences campus. The goal of this program to train students as independent investigators who will go on to post-doctoral fellowships following the completion of the degree, and eventually become independent academic researchers and teachers.

Related Programs

Master's

- Biochemistry and Molecular Biology (MS) (p. 1352)

Combined

- Biochemistry, Molecular, and Cancer Biology (MD/PhD) (p. 1860)
- Microbiology and Immunology (MD/PhD) (p. 1881)

MD/PHD at Loyola University Chicago

Loyola University Chicago Stritch School of Medicine offers a program designed for exceptional students to earn both an MD and a PhD degree, in preparation for a career in academic medicine. The program is flexible, individually tailored, and provides an opportunity to work concurrently

toward an MD and a PhD degree in one of the six academic tracks available to Integrated Program in Biomedical Science (IPBS) PhD students:

- Biochemistry, Molecular, and Cancer Biology
- Cell and Molecular Physiology
- Integrative Cell Biology
- Molecular Pharmacology and Therapeutics
- Microbiology and Immunology
- Neuroscience

Ideal candidates for this program should demonstrate a strong interest in and exceptional motivation toward research. Our MD/PhD candidates undergo a challenging and excellent research training experience tailored to the interests and goals of each student. Students actively participate in presenting their respective research and/or clinical work at appointed monthly MD/PhD meetings.

The MD/PhD Program benefits from all the biomedical science disciplines of the Graduate School located at Loyola University Chicago Health Sciences Campus. Their teaching programs are integrated with those of the medical school. The PhD degree may be earned in any of the academic tracks listed for the IPBS.The ultimate goal is for the student to achieve both degrees in seven to eight years, depending on the student's goals, background, workload, and specific course schedule.

Curriculum

The MD/PhD curriculum consists of the first two years of medical school, then three to four years of graduate school in one of the IPBS tracks, followed by two more years of medical school. MD/PhD students must complete all degree requirements for the MD degree and the PhD degree with the IPBS. In addition, MD/PhD students must submit a competitive NIH F30/F31 or similar fellowship or funding consideration. The MD curriculum can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/). The degree requirements for the PhD in Biochemistry, Molecular, and Cancer Biology portion of this dual degree program can be found below.

Course Requirements

The PhD in Biochemistry, Molecular, and Cancer Biology requires a total of 48 credit hours. Students in the MD/PhD program will complete at least 24 credit hours in the PhD program and transfer 24 hours from their MD coursework to fulfill PhD requirements. Core IPBS requirements and track courses are detailed below.

Code	Title	Hours
Foundational Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
Track Required Courses		
Select two Biochemistry, Molecular, and Cancer Biology Electives		*6*
BMB 417	Molecular Biology	
BMB 490	Special Topics in Molecular Biology	
BMB 590	Molecular Biology of Oncogenesis	
ICB 403	Graduate Histology	
MIIM 411	Basic Molecular Microbiology	
MIIM 413	Basic Concepts of Immunology	
MIIM 431	The Molecular Biology of Viruses	
MIIM 442	Cell & Molecular Immunology	
NRSC 410	Cellular & Molecular Neurobiology	
PIOL 401	Physiology	
PIOL 417	Cellular Physiology	
PIOL 421	Function of the Human Body I	
PIOL 422	Function of the Human Body II	
PIOL 423	Biochemical Physiology	
PIOL 450	Fundamentals Of Neurophysiology	
PIOL 461	Introduction to Human Pathophysiology	
PHAR 408	Molecular Basis of Disease and Therapeutics	
PHAR 409	Principles of Pharmacology	
PHAR 410	Signal Transduction	
BMB 499	Research in Molecular Biology	1-9
BMB 501	Molecular Biology Journal Club	1
BMB 502	Seminar in Molecular Biology	0
BMB 600	Dissertation Supervision	1
Total Hours		**24**

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the first year of their PhD coursework for MD/PhD students. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo one laboratory rotation, usually during the summer between their first and second year of medical school to identify a research advisor. Students select a rotation laboratory from a list of available advisors and in consultation with the Director of the MD/PhD program and the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the second year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a public seminar, approved by the Dissertation Committee and deposited in a public database.

Suggested Sequence of Courses

Course	Title	Hours
Year 1		
Fall		
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 416	Methods Biomedical Science	1
BMB 499	Research in Molecular Biology	2

1. Research credits are variable (1-9 credit hours) and fewer can be taken to accommodate additional elective courses.
2. Elective Courses (6 credits hours) may be taken in anytime in the first three years of the program, depending on their offering.
3. Students enroll in BMB 501 Molecular Biology Journal Club, BMB 502 Seminar in Molecular Biology, and BMB 600 Dissertation Supervision each semester for the remainder of time in the program.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MD/PhD program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge in Biochemistry, Molecular Biology and/or Cancer Biology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Business Analytics (MBA/MS)

Loyola students may choose to combine an MBA (p. 1590) with a Master of Science in Business Analytics (p. 1572) to provide the breadth and depth of knowledge often required of information systems and business data analytics professionals.

Related Programs

Master's

- Business Analytics (MS) (p. 1572)

Certificate

- Business Analytics Certificate (p. 1575)

Curriculum

Students completing the dual degree will earn an MBA with a specialization in information systems and an MS degree.

Code	Title	Hours

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice. [MBA]
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making. [MBA]
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice. [MBA]
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender. [MBA]
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing. [MBA]
- Use data to drive strategic and tactical business decisions [MS]
- Utilize sophisticated database, data warehousing, data mining, and data visualization methodologies and techniques to capture and apply data as a corporate asset [MS]
- Demonstrate competence with various languages and tools, SQL, R, Tableau, and Python [MS]
- Lead, supervise, and manage information systems projects of varying levels of complexity [MS]
- Demonstrate effective communication skills with technical and non-technical individuals and groups [MS]
- Show ability to effectively collaborate with and provide technical leadership to a variety of business units and organizations [MS]
- Demonstrate a high level of technical aptitude in design, development, and use of information systems components [MS]
- Integrate values and ethics into data analysis and information systems projects and solutions [MS]

Cell and Molecular Physiology (MD/PhD)

Physiology is the study of the function of living organisms. The PhD in Cellular and Molecular Physiology trains students to acquire, analyze and integrate data obtained from their basic research into a physiological context to understand the molecular basis of cell function and dysfunction within the organism. With cardiovascular research and neurosciences & metabolism as main research topics, students receive a solid integrated training in basic medical sciences including biochemistry, biophysics, cell biology, molecular biology, physiology and pathophysiology.

MD/PHD at Loyola University Chicago

Loyola University Chicago Stritch School of Medicine offers a program designed for exceptional students to earn both an MD and a PhD degree, in preparation for a career in academic medicine. The program is flexible, individually tailored, and provides an opportunity to work concurrently toward an MD and a PhD degree in one of the six academic tracks available to Integrated Program in Biomedical Science (IPBS) PhD students:

- Biochemistry, Molecular, and Cancer Biology
- Cell and Molecular Physiology
- Integrative Cell Biology
- Molecular Pharmacology and Therapeutics

- Microbiology and Immunology
- Neuroscience

Ideal candidates for this program should demonstrate a strong interest in and exceptional motivation toward research. Our MD/PhD candidates undergo a challenging and excellent research training experience tailored to the interests and goals of each student. Students actively participate in presenting their respective research and/or clinical work at appointed monthly MD/PhD meetings.

The MD/PhD Program benefits from all the biomedical science disciplines of the Graduate School located at Loyola University Chicago Health Sciences Campus. Their teaching programs are integrated with those of the medical school. The PhD degree may be earned in any of the academic tracks listed for the IPBS.The ultimate goal is for the student to achieve both degrees in seven to eight years, depending on the student's goals, background, workload, and specific course schedule.

Curriculum

The MD/PhD curriculum consists of the first two years of medical school, then three to four years of graduate school in one of the IPBS tracks, followed by two more years of medical school. MD/PhD students must complete all degree requirements for the MD degree and the PhD degree with the IPBS. In addition MD/PhD students must submit a competitive NIH F30/F31 or similar fellowship or funding consideration. The MD curriculum can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/). The degree requirements for the PhD in Cellular and Molecular Physiology portion of this dual degree program can be found below.

Course Requirements

The PhD in Cell and Molecular Physiology requires a total of 48 credit hours. Students in the MD/PhD program will complete at least 24 credit hours in the PhD program and transfer 24 hours from their MD coursework. Core IPBS requirements and track courses are detailed below.

Code	Title	Hours
Foundational Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
Track Required Coursework		
PIOL 416	Research Seminar	1
PIOL 446	Cardiovascular Journal Club	1
PIOL 414	Graduate Colloquy	3
PIOL 420	Methods/Technical in Physiological Research	2
PIOL 412	Research	1-6
GSSM S61	Doctoral Study-Summer	1
PIOL 600	Dissertation Supervision	1
Total Hours		**24**

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the first year of their PhD coursework for MD/PhD students. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo one laboratory rotation, usually during the summer between their first and second year of medical school to identify a research advisor. Students select a rotation laboratory from a list of available advisors and in consultation with the Director of the MD/PhD program and the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the second year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Suggested Sequence of Courses

Year 3		
Students enroll in PIOL 416 Research Seminar and PIOL 600 Dissertation Supervision each semester for the remainder of time in the program. They also enroll in GSSM S61 Doctoral Study-Summer each summer. Students will accumulate more than 24 credit hours for the PhD in years 3 and 4.		
	Hours	**0**
	Total Hours	**24**

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MD/PhD program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge of cell and molecular physiology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Divinity and Pastoral Counseling (MDiv/MA)

This dual-degree program provides the student with a comprehensive background in ministerial leadership (through the Master of Divinity, M.Div. (p. 1419) and specialist competencies in spiritually-integrated psychotherapy (through the MA in Pastoral Counseling, MAPC (p. 1415)). Notably, the MAPC degree prepares students for licensure with the State of Illinois (and most other states). A "Licensed Professional Counselor" (LPC) is qualified as a clinical mental health worker in a variety of contexts.

It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

By completing the program, students will be able to demonstrate:

- The ability to interpret pastoral circumstances in relation to scripture, tradition, and human sciences; (Theology/Religious Heritage). [MDiv]
- The ability to engage, transform, and/or critique social, economic, political, and ecclesial realities of our day in order to address the changing landscape of ministry. (Cultural Context) [MDiv]
- The ability to engage the relevant dimensions of Christian faith, discipleship and ministry with interpersonal, spiritual, and ecclesial maturity. (Maturity/Personal Formation) [MDiv]
- The ability to be present to the person and community's condition and environments by developing skills to discern and describe the ministry required; (Skills/Ministerial Leadership) [MDiv]
- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation. [MDiv]
- The ability to pastorally and clinically engage human psychological, relational, and contextual distress in therapeutic ways. (Cultural Context) [MA]
- The ability to interpret, engage, and expand psycho-spiritual meaning making in relation to the pastoral legacy of faith communities. (Theology /Spirituality/Religious Heritage) [MA]
- The ability to offer competent therapeutic services in secular and/or faith-based contexts based on personal, interpersonal, and spiritual maturity. (Maturity/Personal Formation) [MA]
- The ability to appropriately assess and diagnose personal and relational life conditions that contribute to human distress and break down, with the skills needed to discern and effectively pastoral engage the identified dilemmas. (Skills/Ministerial Leadership) [MA]

Divinity and Social Justice (MDiv/MA)

As of Fall 2026, the Social Justice MA and dual-degree described on this page are no longer accepting applicants.

Those interested in the MDiv degree and Social Justice ministries should apply to the Master of Divinity (MDiv) (p. 1419) program, into which social justice ministry courses can be directly integrated.

This dual-degree program provides the student with a comprehensive background in ministerial leadership (through the Master of Divinity, M.Div. (p. 1419)) and specialist competencies in the field of social justice (through the MA in Social Justice (p. 1446)).

To learn more about the M.Div. and the MASJ degrees, please complete our request for information form (https://www.luc.edu/ips/rfi/) or attend an online information session (https://www.luc.edu/ips/admission/visit/).

- The ability to construct ministerial vision and formulate ministerial strategies to effect personal and community transformation. [MDiv]
- The ability to critically analyze and apply principles of social analysis to interpret contemporary justice issues and propose ethically grounded responses. [MA]
- The ability to conduct a contextual social analysis of a justice issue, identifying structural causes, institutional dynamics, and power relations, and synthesize relevant evidence to inform strategies for social change in diverse settings. [MA]
- The ability to design, facilitate, and assess a community organizing or organizational change initiative using broad-based organizing methods and adaptive leadership practices appropriate to faith-based and nonprofit contexts. [MA]
- The ability to integrate academic learning with reflective practice and articulate one's vocational identity and a practical approach to justice-rooted leadership. [MA]

Finance (MBA/MSF)

Loyola students may choose to combine an MBA (p. 1590) with a Master of Science in Finance (MSF) (p. 1578) to provide the breadth and depth of knowledge often required of finance professionals. The dual degree MBA / MSF offers students an opportunity to complete 2 business degrees with few course requirements than if they were completed independently.

Related Programs

Major

- Accounting (BBA) (p. 775)

Master's

- Accountancy (MSA) (p. 1567)
- Finance (MSF) (p. 1578)

Curriculum

The dual degree in business and finance requires four fewer courses than if each degree were earned separately. Students completing the dual degree will earn an MBA (p. 1590) with a specialization in finance and an MSF degree (p. 1578).

A maximum gap of three years is allowed between the completion of one program and the start of the other.

[1] Prerequisite: ISSCM 400N Quantitative Methods I

[2] Corequisite: ACCT 400 Financial Accounting for Business Decisions

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice. [MBA]
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making. [MBA]
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice. [MBA]
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender. [MBA]
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing. [MBA]
- Learn the concepts of risk and return relationship, diversification, micro and macro structure of global capital markets, and tools for stock and bond portfolio optimizations. [MSF]
- Learn how to apply state-of-the-art techniques and models in the valuation of equities, fixed income, and derivatives securities such as options, interest and exchange rate swaps, collateralized debt obligations, among others. [MSF]
- Understand how to optimize a firm's financing and investment decisions in a global setting (debt-equity choices, asset-liability restructuring, capital budgeting, cost of capital, mergers and acquisitions, among others) to maximize its value and realize long-run growth opportunities. [MSF]
- Identify and assess a firm's risk from all sources both to mitigate threats using key risk management techniques (including options, swaps, and asset-liability duration) and exploit opportunities to realize competitive advantages. [MSF]
- Exhibit mastery of various statistical models and analytics, including simulation, econometrics, and financial mathematics to assess the financial consequences of actions by investors and firms. [MSF]
- Master emerging modeling techniques involving writing and implementing computer codes and pulling and working with data resources from different platforms, such as Bloomberg. [MSF]
- Learn effective communication skills aimed at shareholders, regulatory bodies, and the community at large. [MSF]
- Attain the knowledge needed to succeed in passing the examination requirements for professional certifications such as the Certified Financial Analyst (CFA), Certified Alternative Investment Analyst (CAIA), and Certified Financial Planner (CFP). [MSF]
- Incorporate transparency and social justice in all domestic and global financial decisions. [MSF]

Human Resources (MBA/MSHR)

Loyola offers the option for students to earn the Master of Science in Human Resources and an MBA concurrently. Students may choose to earn the unique credential.

Related Programs

Master's

- Human Resources (MSHR) (p. 1583)
- Next Generation MBA (MBA) (p. 1590)

Curriculum

Students will earn an MBA with a specialization in human resource management and an MSHR degree.

A maximum gap of three years is allowed between the completion of one program and the start of the other.

[1] Consult the Academic Advisor to select two elective courses.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Learning Outcomes

- Goal 1: Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice. [MBA]
- Goal 2: Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and

managing the quantitative and qualitative information necessary for effective managerial decision making. [MBA]

- Goal 3: Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice. [MBA]
- Goal 4: Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender. [MBA]
- Goal 5: Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing. [MBA]
- Understand the theoretical and practical demands of HR professional career and human relations requirements of being an effective manager; both of which involve attracting, engaging, and retaining talented employees. [MSHR]
- Develop and administer human resource strategies, programs and policies in the specific functional areas including talent acquisition/staffing (including employment planning, recruitment, and selection), HR development and training, compensation and benefits, performance management, and employment relations. [MSHR]
- Understand how the practice of effective human resource management can positively impact the business and result in a competitive advantage to the organization. [MSHR]
- Utilize critical thinking skills which involve complex human behavior and motivation. [MSHR]
- Appreciate of the value and methods for sustaining employee diversity including a global perspective as it relates to human resources. [MSHR]
- Develop research, written, and oral communications skills by preparing in-depth case presentations and reports. [MSHR]
- Appreciate ethical perspectives and support sustainable outcomes with respect to all aspects of HR management. [MSHR]

Integrative Cell Biology (MD/PhD)

The PhD in Integrative Cell Biology offers students a flexible curriculum focused on learning cell biology in a comprehensive scope, ranging from the molecular biology of cells and cell structures to cellular functions in various biological contexts, like cancer, inflammation, and immunology.

Related Programs

Doctoral

- Biochemistry, Molecular and Cancer Biology (PhD) (p. 1353)
- Cell and Molecular Physiology (PhD) (p. 1356)

Combined

- Integrative Cell Biology (MD/PhD) (p. 1872)

MD/PHD at Loyola University Chicago

Loyola University Chicago Stritch School of Medicine offers a program designed for exceptional students to earn both an MD and a PhD degree, in preparation for a career in academic medicine. The program is flexible, individually tailored, and provides an opportunity to work concurrently toward an MD and a PhD degree in one of the six academic tracks available to Integrated Program in Biomedical Science (IPBS) PhD students:

- Biochemistry, Molecular, and Cancer Biology
- Cell and Molecular Physiology
- Integrative Cell Biology
- Molecular Pharmacology and Therapeutics
- Microbiology and Immunology
- Neuroscience

Ideal candidates for this program should demonstrate a strong interest in and exceptional motivation toward research. Our MD/PhD candidates undergo a challenging and excellent research training experience tailored to the interests and goals of each student. Students actively participate in presenting their respective research and/or clinical work at appointed monthly MD/PhD meetings.

The MD/PhD Program benefits from all the biomedical science disciplines of the Graduate School located at Loyola University Chicago Health Sciences Campus. Their teaching programs are integrated with those of the medical school. The PhD degree may be earned in any of the academic tracks listed for the IPBS.The ultimate goal is for the student to achieve both degrees in seven to eight years, depending on the student's goals, background, workload, and specific course schedule.

Curriculum

The MD/PhD curriculum consists of the first two years of medical school, then three to four years of graduate school in one of the IPBS tracks, followed by two more years of medical school. MD/PhD students must complete all degree requirements for the MD degree and the PhD degree with IPBS. In addition MD/PhD students must submit a competitive NIH F30/F31 or similar fellowship or funding consideration. The MD curriculum can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/). The degree requirements for the PhD in Integrative Cell Biology portion of this dual degree program can be found below.

Course Requirements

The PhD in Integrative Cell Biology required a total of 48 credit hours. Students in the MD/PhD program will complete at least 24 hours in the PhD program and transfer 24 hours from their MD coursework. Core IPBS requirements and track courses are detailed below.

Code	Title	Hours
Foundational Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
Track Required Courses		
ICB 403	Graduate Histology	3
ICB 463	Teaching Anatomy II	1
One Integrative Cell Biology Elective		*3*
BMB 417	Molecular Biology	
BMB 590	Molecular Biology of Oncogenesis	
PHAR 410	Signal Transduction	
MIIM 442	Cell & Molecular Immunology	
ICB 445	Scientific Literature: Review & Critique	1

ICB 446	Review Seminar	1
ICB 459	Research	1-8
GSSM S61	Doctoral Study-Summer	1
ICB 600	Dissertation Supervision	1
Total Hours		**24**

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the first year of their PhD coursework for MD/PhD students. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo one laboratory rotation, usually during the summer between their first and second year of medical school to identify a research advisor. Students select a rotation laboratory from a list of available advisors and in consultation with the Director of the MD/PhD program and the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the third year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a public seminar, approved by the Dissertation Committee and deposited in a public database.

Suggested Sequence of Courses

Course	Title	Hours
Year 1		
Fall		
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 416	Methods Biomedical Science	1
ICB 445	Scientific Literature: Review & Critique	1
ICB 459	Research	2
ICB 446	Review Seminar	0

ICB 446	Review Seminar	0
ICB 459	Research	1
ICB 600	Dissertation Supervision	1
	Hours	**2**
Year 3		
Students enroll in ICB 445 Scientific Literature: Review & Critique, ICB 446 Review Seminar and ICB 600 Dissertation Supervision each semester for the remainder of time in the program. They also enroll in GSSM S61 Doctoral Study-Summer each summer. Students will accumulate more than 24 credit hours for the PhD in years 3 and 4.		
	Hours	**0**
	Total Hours	**24**

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MD/PhD program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge of cell biology.

- Propose original biomedical research questions and design experiments to address these questions.Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution,data interpretation and presentation.

Law/Business (JD/MBA)

In a growing global economy, the career paths of business and law professionals have become increasingly convergent. The role of an attorney in the day-to-day management of businesses has become vital, as the modern business professional needs immediate access to sound legal advice.

The JD/MBA dual-degree program in business and law enables the student to complete both degrees with six fewer courses than would be required if the degrees were pursued separately. Students completing the dual degree will earn an MBA with a specialization in business law (p. 1590) as well as the JD degree (p. 1795).

Related Programs

Master's

- Executive MBA (EMBA) (p. 1577)

Certificate

- Baumhart Certificate in Environmental, Social, and Governance (p. 1571)
- Business Ethics Certificate (p. 1576)

Curriculum

- During the completion of the JD/MBA program, the equivalent of nine credit hours from each degree program are counted toward the other degree program. This feature enables the student to complete both degrees with fewer courses than would be required if the degrees were pursued separately.
- The course sharing feature of this program allows students to earn a MBA specialization in legal environment. Any three courses taken at the law school are applied towards the completion of the MBA, granting the legal environment concentration. Students work with an advisor in each school to plan their respective programs of study.
- Generally, a total of 9 to 13 MBA courses are required for the completion of the MBA, plus the nine credit hours transferred from the School of Law.
- Students must complete at least 15 quarter hours (generally five courses) in the Quinlan School of Business before completing their law coursework in order to earn the "course sharing" benefits of the MBA/JD program.
- See JD Full-time degree requirements (https://www.luc.edu/law/currentstudents/registrar/registrationplanning/degreerequirements/) for a list of courses that satisfy the electives option.

[1] This requirement only applies to students beginning their JDs in Fall 2023 or later.

[2] This requirement only applies to students beginning their JDs in Fall 2022 or later. For students beginning their JDs in Fall 2023 or later, students must take this BCCR course before, concurrently with, or as part of their enrollment in any clinic or externship field placement.

[3] Students who have a GPA below 2.9 after their second, third, or fourth semester of law school must complete "BAR EXAM FUNDAMENTALS" (LAW 232) in order to graduate. This class should be taken in the Fall or Spring of their third year for full-time students, and in the Fall or Spring of their fourth year for Weekend JDs.

[4] 2 or 3 credit hours in Spring semester of first year for full-time students; part- time students must take perspective elective after the first year.

[5] At least one class with an RW designation after 1L year and before graduation. Prior completion of Legal Writing III will satisfy the RW requirement. A student cannot use their RW course to concurrently satisfy any other of their other graduation requirements.

[1] Students can choose from an elective course that examines perspectives on the law and justice. All students must complete a perspective elective before graduation.
[2] Students can choose electives from numerous courses, which are offered on a rotating basis.
[3] Consult with Academic Advisor to select elective courses.
[4] Students who have a GPA below 2.9 after their second, third, or fourth semester of law school must complete LAW 232 Bar Exam Fundamentals in order to graduate. This class should be taken in the Fall or Spring of their third year for full-time students, and in the Fall or Spring of their fourth year for Weekend JDs.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

You will be able to:

- Utilize skills derived from participation in supervised live-client experiences, externships, or litigation and transactional practice simulations, such as interviewing, counseling, negotiation, mediation, fact development and analysis, problem solving, design thinking, trial practice, document drafting, and collaborative work [JD]
- Determine your clients' needs and objectives [JD]
- Determine relevant facts and understand their relevance to your client's legal position [JD]
- Conduct legal research [JD]
- Analyze and apply relevant legal principles [JD]
- Find solutions to legal problems [JD]
- Communicate legal concepts clearly and effectively, both orally and in writing [JD]
- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice. [MBA]
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making. [MBA]
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice. [MBA]
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender. [MBA]
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing. [MBA]

Marketing (MBA/MSM)

Loyola students may choose to combine an MBA (p. 1590) with a Master of Science in Marketing (MSM) (p. 1586) to provide the breadth and depth of knowledge often required of marketing professionals.

Related Programs

Master's

- Business Analytics (MS) (p. 1572)
- Marketing (MSM) (p. 1586)

Combined

- Business Analytics (MBA/MS) (p. 1862)

Curriculum

The dual degree in business and marketing requires fewer courses than if each degree were earned separately. Students completing the dual degree will earn an MBA with a specialization in marketing and an MSM degree.

A maximum gap of one quarter is allowed between the completion of one program and the start of the other program.

[1] Consult the Academic Advisor to select an elective course.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Learning Outcomes

- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice. [MBA]
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making. [MBA]
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice. [MBA]
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender. [MBA]
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing. [MBA]
- Develop the creative and strategic skills you need to lead and innovate in the diverse, digital, and dynamic field of marketing [MSM]
- Learn marketing strategies that deliver brand growth and a competitive advantage in a time of sweeping economic, environmental, and social change [MSM]
- Gain the technical business skills that are essential in today's global economy [MSM]
- Learn to ask the questions that are important to humanity as you harness the power of marketing to promote positive social change [MSM]
- You will also build a strong foundation in: Marketing finance; Strategic planning; Brand leadership; Digital and social content development; Leadership and ethics; Database analytics; Sustainable business leadership; and Global campaign development [MSM]

Medicine/Public Health (MD/MPH)

Combine medical training with public health knowledge.

A degree in public health provides a broader lens through which to examine individual patient care. Physicians with a public health background look at how environments and community resources can contribute – or detract from – overall health and wellness. Our dual MD/MPH degree is offered by the Parkinson School of Public Health and the Stritch School of Medicine, and can be completed in five years. The MPH is accredited by the Council on Education for Public Health (CEPH).

Related Programs

Master's

- Public Health (MPH) (p. 1540)

Certificate

- Dietetic Internship Certificate (p. 1526)
- Public Health Certificate (p. 1544)

Curriculum

The MD/MPH requires 42 credit hours towards the Master of Public Health program (six of which are transferred from electives in the MD program), practical experience in public health, and a capstone project.

Doctor of Medicine Requirements

Degree requirements for the MD can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/).

Students will begin the MPH curriculum during the summer before the first year of medical school (M0) and complete all eleven (11) didactic courses (33 credit hours). Six (6) credits are transferred from electives taken during year M3 or M4 in the MD program. A two-credit capstone project completed during a Stritch research elective or discretionary time in the M3 or M4 year. An applied practice experience in public health is required and can be completed during the M0 year.

The dual MD/MPH program focuses on health disparities and identifying strategies to minimize them. Loyola's Health Sciences Campus is located in Maywood. This underserved community provides a unique opportunity to promote health equity in our own community and collaborate with local groups to improve public health.

Master of Public Health Requirements

Offered in-person, online, or hybrid, Loyola's MPH is a 42-credit curriculum. Online courses include both synchronous and asynchronous components. We offer concentrations in three study tracks: Epidemiology, Policy and Management, and Global Health Equity. The curriculum includes six core courses, concentration-specific courses, electives, and applied practice and integrative learning experiences.

Online Learning

Convenient and rigorous, the online program is geared to working professionals, non-traditional students, and individuals who need a more flexible learning format. Loyola University Chicago faculty with expertise in Public Health, Public Health Policy and Management, Environmental Health, Bioethics, Epidemiology, and Biostatistics teach in this program. The vast resources of Loyola's Parkinson School and the Health Science Campus, along with the combined knowledge and experience of distinguished faculty from medicine, social work, bioethics, health policy and law, will help you take on many opportunities and challenges.

Code	Title	Hours
MPH Foundational Courses		
MPBH 400	Determinants of Population Health	3
MPBH 402	Public Health Practice and Management	3
MPBH 403	Introduction to Epidemiology	3
MPBH 404	Biostatistics for Health and Biological Science	3

Integrated Learning Experience (p. 1881)		**2**
MPBH 411	MPH Capstone	
Total Hours		**42**

[1] Selected courses from other schools/programs may satisfy MPH elective requirements.

MPH Track-Specific Curricula (15 credits)

Epidemiology

This hybrid program combines online and evening classes. Epidemiology is the basic science of public health: it helps us understand the causes of and solutions to diseases. This track equips students to design, conduct, analyze, and interpret population health research, while they learn the basic principles of all public health disciplines.

Code	Title	Hours
MPBH 412	Intro to Statistical Computing for Public Health	2
MPBH 421	Biostatistics II	3
MPBH 423	Intermediate Epidemiology	3
MPBH 427	Advanced Statistical Methods	1
MPBH 431	Grant Writing	3
Choose One Research Methods Course from the following:		3
MPBH 414	Introduction to Global Health	
MPBH 433	Clinical Trials	
MPBH 434	Systematic Review and Meta-Analysis	
ENVS 480	Introduction to Geographic Information Systems	
Total Hours		**15**

Global Health Equity

This concentration is a hybrid program of online and evening classes. Study the health of global populations with the ultimate goal of identifying and eliminating structures and practices of inequity and injustice to advance health equity for individuals and populations.

Code	Title	Hours
MPBH 414	Introduction to Global Health	3
MPBH 417	Global Maternal and Child Health	3
MPBH 422	Population Health Planning & Management	3
MPBH 431	Grant Writing	3
Choose one of the following: [1]		3
BEHL 407	Social Determinants of Health and Bioethics	
BEHL 432	Global Bioethics	
Total Hours		**15**

[1] Students may choose an elective course not on this list with Track Director approval.

Public Health Policy and Management

This concentration can be completed entirely online, and also can be taken with in-person courses. This curriculum studies the organization, structure, and delivery of health-related services, and associated population health outcomes. Students may customize their academic focus in either public health policy, administration, or both.

Code	Title	Hours
MPBH 416	Health Services Research Methods	3
MPBH 425	Policy Analysis	3
Choose one of the following		3
BEHL 402	Justice & Health Care	
BEHL 404	Biomedical Ethics and Law	
BEHL 407	Social Determinants of Health and Bioethics	
BEHL 411	Systems Ethics Frameworks	
BEHL 412	Organizational Ethics I: Business, Professionalism, and Justice	
BEHL 432	Global Bioethics	
Choose two of the following		6
Policy-oriented		
MPBH 420	Public Health Law: Theories and Cases	
MPBH 424	Health Economics and Healthcare Financing	
Management-oriented		
MPBH 422	Population Health Planning & Management	
CMAN 533	Fiscal Management in Health Care Organizations	
Total Hours		**15**

Applied Practice Experience (1 credit)

Also known as the MPH practicum, it provides the student with practical experience in a public health setting, requiring the student to apply and integrate skills and knowledge learned in courses. The applied practice experience (APE) must be 210 hours or more. Students must apply five program competencies to their APE and produce at least two deliverables, which will become part of their portfolio. Examples of APE sites include MRSA Research Center, North Shore Mosquito Abatement District, Summer Field Research in Ghana, Health and Medicine Policy Research Group, American Cancer Society, American Diabetes Association, Chicago Department of Public Health, and Mount Sinai Hospital.

Integrated Learning Experience (2 credits)

The integrated learning experience is a student-led capstone project culminating with a presentation and written manuscript. The project should demonstrate student's ability to apply acquired skills and competencies to a public health problem that simulates a professional practice experience. Depending on their interests, some students may analyze data collected during their practicum to help complete their capstone.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing the MPH coursework. An individual student's completion of requirements depends on course offerings in a given term and the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

Course	Title	Hours
Year 1		
Fall		
MPBH 400	Determinants of Population Health	3
MPBH 402	Public Health Practice and Management	3
MPBH 404 or MPBH 409	Biostatistics for Health and Biological Science or Biostatistics I	3
MPH Track-Specific Curricula Course		3
	Hours	**12**
Spring

MPBH 411	MPH Capstone	2
MPH Elective		3
	Hours	**6**
	Total Hours	**42**

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Learning Outcomes

- You will combine patient care training with public health competencies in the areas of evidence-based approaches, public health and health care systems, planning and management, policy, leadership, communications, inter-professional practice, and system-wide approaches.

Microbiology and Immunology (MD/PhD)

The PhD in Microbiology and Immunology trains students for a career in research and teaching in microbiology, virology, immunology or molecular biology. The Department of Microbiology and Immunology creates and environment through courses, laboratory work, and other activities to allow students to acquire the tools necessary to work independently and to think critically. The department instills a sense of thoroughness, accuracy, and knowledge of common research tools that is indispensable. Students will able to independently analyze and evaluate scientific problems and be responsible for their research by the end of their program.

MD/PHD at Loyola University Chicago

Loyola University Chicago Stritch School of Medicine offers a program designed for exceptional students to earn both an MD and a PhD degree, in preparation for a career in academic medicine. The program is flexible, individually tailored, and provides an opportunity to work concurrently toward an MD and a PhD degree in one of the six academic tracks available to Integrated Program in Biomedical Science (IPBS) PhD students:

- Biochemistry, Molecular, and Cancer Biology
- Cell and Molecular Physiology
- Integrative Cell Biology
- Molecular Pharmacology and Therapeutics

- Microbiology and Immunology
- Neuroscience

Ideal candidates for this program should demonstrate a strong interest in and exceptional motivation toward research. Our MD/PhD candidates undergo a challenging and excellent research training experience tailored to the interests and goals of each student. Students actively participate in presenting their respective research and/or clinical work at appointed monthly MD/PhD meetings.

The MD/PhD Program benefits from all the biomedical science disciplines of the Graduate School located at Loyola University Chicago Health Sciences Campus. Their teaching programs are integrated with those of the medical school. The PhD degree may be earned in any of the academic tracks listed for the IPBS.The ultimate goal is for the student to achieve both degrees in seven to eight years, depending on the student's goals, background, workload, and specific course schedule.

Curriculum

The MD/PhD curriculum consists of the first two years of medical school, then three to four years of graduate school in one of the IPBS tracks, followed by two more years of medical school. MD/PhD students must complete all degree requirements for the MD degree and the PhD degree with the IPBS. In addition MD/PhD students must submit a competitive NIH F30/F31 or similar fellowship or funding consideration. The MD curriculum can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/). The degree requirements for the PhD in Microbiology and Immunology portion of this dual degree program can be found below.

Course Requirements

The PhD in Microbiology and Immunology requires a total of 48 credit hours. Students in the MD/PhD program will complete 24 credit hours in the PhD program and transfer 24 hours from their MD coursework. Core IPBS requirements and track courses are detailed below.

Code	Title	Hours
Foundational Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3
BMSC 405	Ethics in Biomedical Sciences	1
BMSC 416	Methods Biomedical Science	1
BMSC 418	Presentation skills	1
Track Requirements		
Microbiology and Immunology Electives: select two		5-6
MIIM 411	Basic Molecular Microbiology	
MIIM 413	Basic Concepts of Immunology	
MIIM 442	Cell & Molecular Immunology	
MIIM 471	Molecular Microbial Genetics	
MIIM 431	The Molecular Biology of Viruses	
MIIM 492	Research (hours may vary--see note below)	1-9
MIIM 501	Seminar	0
MIIM 502	Special Topics (Student must take this course twice)	1
MIIM 503	Current Literature	1
GSSM S61	Doctoral Study-Summer	1
MIIM 600	Dissertation Supervision	1
Total Hours		**24**

Note: Students must take 15 didactic credits; they may choose to take additional courses and reduce research credit accordingly to total 24 credits.

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the first year of their PhD coursework for MD/PhD students. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo one laboratory rotation, usually during the summer between their first and second year of medical school to identify a research advisor. Students select a rotation laboratory from a list of available advisors and in consultation with the Director of the MD/PhD program and the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the second year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the MD/PhD program, students will be able to:

- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular and cellular processes and common biomedical research methods.
- Demonstrate a deep knowledge of Microbiology and Immunology.
- Propose original biomedical research questions and design experiments to address these questions.
- Execute critical experiments to address the relevant biomedical research questions.
- Search and critically evaluate the scientific literature and scientific data.
- Clearly and effectively communicate scientific information in both oral and written forms.
- Incorporate high standards of ethics into research design, execution, data interpretation and presentation.

Molecular Pharmacology and Therapeutics (MD/PhD)

The PhD in Molecular Pharmacology & Therapeutics is dedicated to training outstanding scientists in the pharmacological sciences. After successful completion of formal course work students will have acquired in-depth knowledge of pharmacology and basic knowledge of molecular and cellular biology, biochemistry, and physiology. Our training provides a solid foundation for successful scientific careers in a wide range of areas, including academia, government, and the pharmaceutical industry.

MD/PHD at Loyola University Chicago

Loyola University Chicago Stritch School of Medicine offers a program designed for exceptional students to earn both an MD and a PhD degree, in preparation for a career in academic medicine. The program is flexible, individually tailored, and provides an opportunity to work concurrently toward an MD and a PhD degree in one of the six academic tracks available to Integrated Program in Biomedical Science (IPBS) PhD students:

- Biochemistry, Molecular, and Cancer Biology
- Cell and Molecular Physiology
- Integrative Cell Biology
- Molecular Pharmacology and Therapeutics
- Microbiology and Immunology
- Neuroscience

Ideal candidates for this program should demonstrate a strong interest in and exceptional motivation toward research. Our MD/PhD candidates undergo a challenging and excellent research training experience tailored to the interests and goals of each student. Students actively participate in presenting their respective research and/or clinical work at appointed monthly MD/PhD meetings.

The MD/PhD Program benefits from all the biomedical science disciplines of the Graduate School located at Loyola University Chicago Health Sciences Campus. Their teaching programs are integrated with those of the medical school. The PhD degree may be earned in any of the academic tracks listed for the IPBS.The ultimate goal is for the student to achieve both degrees in seven to eight years, depending on the student's goals, background, workload, and specific course schedule.

Curriculum

The MD/PhD curriculum consists of the first two years of medical school, then three to four years of graduate school in one of the IPBS tracks, followed by two more years of medical school. MD/PhD students must complete all degree requirements for the MD degree and the PhD degree with the IPBS. In addition MD/PhD students must submit a competitive NIH F30/F31 or similar fellowship or funding consideration. The MD curriculum can be found on the Stritch School of Medicine website (https://www.luc.edu/stritch/education/doctorofmedicine/). The degree requirements for the PhD in Molecular Pharmacology and Therapeutics portion of this dual degree program can be found below.

Course Requirements

The PhD in Molecular Pharmacology and Therapeutics requires a total of 48 credit hours. Students in the MD/PhD program will complete 24 credit hours in the PhD program and transfer 24 hours from their MD coursework. Core IPBS requirements and track courses are detailed below.

Code	Title	Hours
Foundational Curriculum		
BMSC 402	Statistical Methods for Biomedical Science	3

PHAR 415	Current Topics in Pharmacology and Epidemiology of Disease	
PHAR 420	Pharmacovigilance: A Practical Approach	
PHAR 405	Pharmacology Journal Club	0
PHAR 499	Research	1-9
PHAR 600	Dissertation Supervision	1
GSSM S61	Doctoral Study-Summer	1
Total Hours		**24**

Comprehensive Examination

In addition to the course work, students must pass a Comprehensive Exam which involves preparing a mock grant proposal. The Comprehensive Exam also tests the student's understanding of the scientific method, oral and written communication skills and general biomedical research knowledge. The Comprehensive Exam usually is taken during the summer of the first year of their PhD coursework for MD/PhD students. The written mock grant proposal is presented to the student's Comprehensive Exam Committee and evaluated during a meeting with the Committee. Students who pass their Comprehensive Exam are permitted to continue in the IPBS.

Research and Dissertation

The Integrated Program in Biomedical Sciences is a research-intensive PhD program. Students are expected to undertake an independent, original experimental study resulting in new and significant contributions to knowledge in the biomedical sciences.

Lab Rotations: Students undergo one laboratory rotation, usually during the summer between their first and second year of medical school to identify a research advisor. Students select a rotation laboratory from a list of available advisors and in consultation with the Director of the MD/PhD program and the Associate Dean for Graduate Education. After identifying an advisor, students select a specialization track and begin attending the Journal Clubs, Seminars and taking track-specific electives. Each track has a Graduate Program Director to advise students.

Dissertation Research: After students pass their Comprehensive Exam, they form a Dissertation Committee and meet with the Committee starting in the second year to receive approval of their Dissertation Proposal. Research on the dissertation continues with regular Dissertation Committee meetings until the completion of the dissertation. The final dissertation must be presented in a pubic seminar, approved by the Dissertation Committee and deposited in a public database.

Neuroscience (MD/PhD)

The Neuroscience PhD Program provides students with a fundamental understanding of nervous system structure and function as well as the opportunity to develop the analytical and communication skills necessary to independently and collaboratively ask and answer novel and impactful research questions that advance our current understanding of central and peripheral nervous system function, disease processes and potential therapeutic targets.

Pharmacology/Business (MS/MBA)

The Department of Molecular Pharmacology & Neuroscience and the Loyola University Chicago Quinlan School of Business offer full time 2.5-year and part-time 4-year dual degree programs leading to a Master of Science (MS) in Pharmacology degree and a Master of Business Administration (MBA) degree. This program is especially designed for individuals who are planning a career in the pharmaceutical, biotechnology, or other health-related industries. The ability of our graduates to understand both the science and business aspects of developing and marketing a new product or therapy gives them a competitive advantage in obtaining a position in industry and advancing their careers. This dual degree program also allows students to earn the two degrees in a shorter period of time than completing each one separately.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice. [MBA]
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making. [MBA]
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice. [MBA]
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender. [MBA]
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing. [MBA]
- Demonstrate a general knowledge base in the biomedical sciences with an understanding of fundamental biochemical, molecular, and cellular processes and common biomedical research methods. [MS]
- Demonstrate an understanding of the molecular, cellular, and physiological mechanisms underlying the pathophysiological changes that occur in disease etiology and describe how targeting these mechanisms with drug(s) can act to effectively treat the disease. [MS]
- Understand, assess, and draw conclusions from published research. [MS]
- Describe various approaches by which new drugs are discovered and developed and the process by which drugs are approved for clinical use. [MS]
- Propose original biomedical research by forming an hypotheses, designing experiments, critically evaluating experimental results, interpreting data, and drawing appropriate conclusions. [MS]
- Design and effectively present scientific presentations, write scientific papers and grants. [MS]
- Articulate and discuss ethical aspects in drug development and pharmacovigilance, including, but not limited to, animal use, clinical trials, intellectual property, benefit-risk analysis, and research design and integrity. [MS]

Political Science/Law (MA/JD)

The dual JD/MA program permits students enrolled in Loyola's Law School to complete both a JD degree and an MA in Political Science in a shorter period of time than if both programs were pursued separately.

Students typically complete the joint program in 4 years, as opposed to the typical 5 years for the individual programs.

How Does This Program Work?

Students interested in this program must apply to the Loyola University Law School under the dual JD/MA in Political Science program. If accepted by the Law School, the student will then be also accepted into the MA program. Students must then satisfy the academic requirements of the School of Law for the JD degree and the academic requirements of the Department of Political Science for the MA degree, with an arrangement allowing several shared courses between the two.

Related Programs

Master's

- International Affairs (MA) (p. 1248)
- Political Science (MA) (p. 1251)

Doctoral

- Law (JD Full time) (p. 1795)
- Political Science (PhD) (p. 1254)

Curriculum

The Department of Political Science will accept four Law School courses to be applied to the 30 credit hours required for the MA. The Law School will accept 9.0 Political Science credit hours toward the JD degree. Students should work in close concert with their Graduate Program Director and Law School advisor to ensure effective degree planning.

The Department of Political Science will accept four Law School courses to be applied to the 30 credit hours required for the MA. The Law School will accept 9.0 Political Science credit hours to be applied toward the 86 credit hours required for the JD degree. As a result, 95 total credits are required for the JD/MA program. Students should work in close concert with their Graduate Program Director and Law School advisor to ensure effective degree planning.

Law Rigorous Writing Elective (p. 1891) [5]		2-3
Total Hours		**107**

1. This requirement only applies to students beginning their JDs in Fall 2023 or later.
2. This requirement only applies to students beginning their JDs in Fall 2022 or later. For students beginning their JDs in Fall 2023 or later, students must take this BCCR course before, concurrently with, or as part of their enrollment in any clinic or externship field placement.
3. Students who have a GPA below 2.9 after their second, third, or fourth semester of law school must complete "BAR EXAM FUNDAMENTALS" (LAW 232) in order to graduate. This class should be taken in the Fall or Spring of their third year for full-time students, and in the Fall or Spring of their fourth year for Weekend JDs.
4. 2 or 3 credit hours in Spring semester of first year for full-time students; part- time students must take perspective elective after the first year.
5. At least one class with an RW designation after 1L year and before graduation. Prior completion of Legal Writing III will satisfy the RW requirement. A student cannot use their RW course to concurrently satisfy any other of their other graduation requirements.

MA Subfield Areas

Students may choose from the subfields of International Relations, Comparative Politics, American Politics, and Political Theory. With approval of the Graduate Program Director, up to six (6) hours may be at the graduate level in related disciplines.

Capstone Requirement: Thesis, Comprehensive Exams, or Internship

Thesis

Students may satisfy six hours (2 courses) by writing a thesis. Students who choose this option will take PLSC 596 Thesis Research for two semesters (a total of 6 credit hours, which count as electives) and take PLSC 595 Thesis Supervision until they are done with the thesis.

Code	Title	Hours
Take for two semesters (may satisfy 6 elective hours)		
PLSC 596	Thesis Research	
Take until done with thesis		
PLSC 595	Thesis Supervision	

Comprehensive Exam

MA students can choose to take a written comprehensive examination. The student will select five courses from the substantive courses they have taken on which they will be tested. Prior to taking the exam students must finish all incompletes. Students may be currently registered for courses necessary for the degree in the semester in which they take the exam. If the student has fulfilled all degree requirements except for the comprehensive exams, they should register for PLSC 605 Master's Study in the semesters leading up to and including the exam. Students taking comprehensive examinations at the master's degree level are expected to answer theoretical and substantive questions from a range of five courses they have taken in their coursework. Once a student knows that s/he will take the exam in a particular semester, we highly recommend that they discuss the exam with the faculty members with whom they have taken the five chosen courses. Comprehensive exams will take place during the second half of the fall and spring semesters. Students will answer three questions over a weekend, receiving the exam on a Friday at 5:00 PM and returning the completed examination the following Monday, at 9:00 AM. All three answers must be written during the specified weekend with no outside assistance. Students will write a maximum of 21, double-spaced pages (normal formatting: 1" margins, Times New Roman, 12 pitch font). Each answer should be approximately six or seven pages. Prior to taking comprehensive exams, students must submit to the Graduate Program Director a departmental "MA Requirements and Comprehensive Examination Form," that lists all of the courses the student has taken and identifies on which courses the student would like to be tested. At the beginning of each semester the Graduate Program Director will distribute this form to all students who will take the exam

Internship

PLSC 470 Fieldwork in Political Science-Internship offers academic credit toward your major or minor while interning and gaining professional experience at one of several organizations, either here in Chicago or elsewhere. The intent is for students to 1) apply their education to date in a professional setting, 2) gain valuable experience at the start of their professional careers, 3) to explore a particular area of professional interest before embarking on their careers, and 4) to potentially "get a foot in the door" within a particular field or employer with the hope of landing a permanent position upon graduation. While past interns have received job offers from organization where they have interned, there are no guarantees or promises of employment that accompany taking this course.

Upper Level Required Courses

- Skills Training Course (2 credits)
  A skills class is one that offers substantial instruction in the professional skills generally regarded as necessary for effective and responsible participation in the legal profession. All JD students are required to complete the skills course requirement prior to graduation.
- Experiential Learning (6 credits)
  Experiential learning classes enable students to perform their legal knowledge, skills and values in a real or simulated practice setting with intense, ongoing law school supervision and assessment. Examples include live-client clinics, judicial or non-judicial externships, practica, or comprehensive simulations. At least three of these credits must involve work with live clients. The remaining three credits can involve comprehensive simulations.
- LAW 414 Professional Responsibility (taken after first year)
- BCCR Elective (2-3 credits)
  One course that involves substantial instruction in bias, cross-cultural competency, and racism.
- Rigorous Writing Elective (2 credits)
  Rigorous Writing courses all provide students with the opportunity to draft, edit, polish and produce one or more advanced writing projects that are assessed by the faculty through detailed individualized feedback at each stage of the writing process.

[1] Students have the flexibility during this point in the program to choose electives either in the Political Science Department or the School of Law as long as minimum electives are met for both programs. Students should consult an advisor for any assistance on elective selection.

Responsible Conduct of Research

All PhD students and students in thesis-based Master's degree programs must successfully complete UNIV 370 Responsible Conduct in Research and Scholarship or other approved coursework in responsible conduct of research as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and

Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

The dual JD/MA in Political Science offers students:

- Specialized training appropriate for careers in the public sector or for law practices involving administrative agencies or processes, by combining the study of law with an exploration of the political context within which domestic and international legal systems operate
- An overview of the theories and scholarly literature devoted to four major Political Science subfields: American Politics (study of U.S. institutions and political processes); Comparative Politics (study of political processes in various regions of the world, such as Africa, Asia, Europe, Latin America, and the Middle East); International Relations (study of global processes throughout the international system); or Political Theory (study of political philosophy ranging from Ancient to Modern and Contemporary political thought).
- Methods training, including research design and statistical analysis, that will enable the successful candidate to effectively design and conduct research.
- Enhanced ability to express their thoughts in writing (all Political Science graduate classes include a significant writing component).
- The ability to pursue careers in politics, government, international affairs, law, the non-profit world, journalism, business, education, social services, and other professions, as well as for further graduate (PhD) study at professional schools and institutions of higher learning, both in the U.S. and abroad.
- We also encourage our dual degree students to take advantage of additional learning opportunities: Advanced methodological training; Advanced language training/proficiency in a language other than English; Advanced research skills; International, cross-cultural experience; Professional development and experience; and Networking opportunities

Public Policy/Law (MPP/JD)

As of Fall 2026, this program is no longer accepting applicants.

It's all about solutions. In the JD/Master of Public Policy program, you will learn to design effective solutions in the creation, implementation and enforcement of government policies. As an advocate in a variety of settings (legislative, judicial, or executive), you will use the tools of law in public service. You will be equipped to work in multiple venues, including the courtroom, legislative offices, and public policy institutes on a wide variety of issues.

Graduates will be prepared to work in government agencies, nonprofit organizations, advocacy and lobbying positions, as well as private sector firms.

Related Programs

Master's

- Public Policy (MPP) (p. 1615)

Curriculum

Students in their first year will take the required law school coursework. In their second and third years, they will take six credits of MPP courses each semester in addition to their law school requirements.

To earn a dual JD/MPP degree, you must complete a total of 89 credit hours, including 65 law school credit hours and 24 MPP credit hours. A minimum of 74 graded hours are required for this degree. With careful planning, you can earn both degrees in three years of study. You will spend your first year as a full-time law student. JD foundational course requirements and skills and experiential course requirements will be taken in the second and third years, concurrent with several MPP courses. A public service externship will be completed in either the summer following the first or second year.

1 Students may take Graduate level courses in other schools with the permission of the Program Director.
2 This requirement only applies to students beginning their JDs in Fall 2023 or later.
3 This requirement only applies to students beginning their JDs in Fall 2022 or later. For students beginning their JDs in Fall 2023 or later, students must take this BCCR course before, concurrently with, or as part of their enrollment in any clinic or externship field placement.
4 Students who have a GPA below 2.9 after their second, third, or fourth semester of law school must complete "BAR EXAM FUNDAMENTALS" (LAW 232) in order to graduate. This class should be taken in the Fall or Spring of their third year for full-time students, and in the Fall or Spring of their fourth year for Weekend JDs.
5 Student must complete MPP course to satisfy PER ELEC requirement.
6 At least one class with an RW designation after 1L year and before graduation. Prior completion of Legal Writing III will satisfy the RW requirement. A student cannot use their RW course to concurrently satisfy any other of their other graduation requirements.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both

of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon completion of the joint JD/MPP degree program, students will be able to:

- Design effective solutions in the creation, implementation and enforcement of government policies.
- Work as an advocate in a variety of settings (legislative, judicial, or executive).
- Use the tools of law in public service.
- Understand the political process in development of policies, including the role of the judiciary with other branches of government and within the intergovernmental context.
- Understand a government budget and evaluate it from different stakeholder positions.
- Develop political messaging to advocate for policies and to build a political coalition of support for a program.
- Apply appropriate analytical procedures used in public policy research and practice.

School Psychology (MEd/EdS)

The School Psychology program is a dual degree program (MEd/EdS) that equips you to be a school psychologist with the tools to advocate for the best interests of students and their families – confronting the inequities of our education system along the way. You'll learn skills and strategies to support students both in and outside the classroom, enabling them to have the most successful learning experience possible.

See important statements and positions from the School Psychology faculty (https://www.luc.edu/education/academics/areasofstudy/schoolpsychology/)

Related Programs

Doctoral

- School Psychology (PhD) (p. 1334)

Curriculum

More information about this program can be found in the School Psychology EDS Handbook (https://catalog.luc.edu/graduate-professional/dual-degree-programs/school-psychology-med-eds/SPSY_MED-EDS_Program_Handbook_LUC_2024Cohort.pdf).

Completion of the MEd/EdS degree program in school psychology requires 66 graduate semester hours, including a full-time internship and two comprehensive portfolio examinations. No thesis is required. The program is approved by the National Association of School Psychologists (NASP (https://www.nasponline.org/)) and aligns with the Illinois State Board of Education (ISBE (https://www.isbe.net/)) School Psychology Standards.

An MEd degree in educational psychology is earned after the first year of study, leading to entrance to the EdS portion of the program. The EdS degree is earned after the third year of study. Students may transfer in a maximum of six graduate semester hours.

Course Requirements

The courses are designed to provide a sequential learning path to prepare to become a licensed school psychologist.

Continuous Enrollments

Master/Doctoral students in School Psychology are required to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in at least one course. A formal leave of absence may be granted upon request and the approval of the School of Education's Assistant Dean of Student Academic Affairs.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- The Educational Specialist (Ed.S.) program of study in school psychology at Loyola University Chicago provides a sequential set of experiences that have been carefully planned with reference to the standards of the National Association of School Psychologists (NASP), as well as the certification requirements promulgated by the Illinois State Board of Education. The program is designed to emphasize a curriculum that provides for basic knowledge in psychology, an organized sequence of courses and experiences, and a program developed in response to the training needs demanded by the current roles and functions of school psychologists. Although some graduates go on to obtain advanced doctoral degrees in school psychology and related areas, the majority of the specialist degree recipients obtain employment in the public schools. Therefore, the specialist degree program of studies emphasizes those skills and objectives that we believe best prepare the candidate for employment immediately upon completion of the program.

The primary goal of the Loyola University Chicago program is to train professional school psychologists with a strong basic theoretical knowledge base in psychology and the essential competencies to provide school psychological services in the schools. We emphasize the social justice responsibilities of school psychologists, including how to advocate and promote equity, access, respect and fairness for all students, particularly those who are marginalized. In order to reach this goal, the Loyola University Chicago program of studies includes a combination of theoretical and application components tied together within the context of a carefully planned sequence of courses and field experience offerings.

You will gain a comprehensive set of knowledge and skills that align with the National Association of School Psychologist's 10 Domains of Professional Practice (https://www.nasponline.org/standards-and-certification/nasp-2020-professional-standards-adopted/nasp-2020-domains-of-practice/): Domain 1: Data-Based Decision Making; Domain 2: Consultation and Collaboration; Domain 3: Academic Intervention and Instructional Supports; Domain 4: Mental and Behavioral Health Sciences and Interventions; Domain 5: School-Wide Practices to Promote Learning; Domain 6: Services to Promote Safe and Supportive Schools; Domain 7: Family, School and Community Collaboration; Domain 8: Equitable Practices for Diverse Learners; Domain 9: Research and Evidence-Based practice; and Domain 10: Legal, Ethical and Professional Practice.

Social Work/Children's Law and Policy (MSW/MJ)

The School of Law at Loyola offers the Master of Jurisprudence (M.J.) degree to professionals working in the field of child welfare who do not want to practice law but who wish to seek a deeper understanding of the laws affecting children and families. This program focuses on the complex social and legal issues affecting children and families in child welfare.

This program allows those seeking leadership positions in child and family welfare and advocacy to earn their MSW in tandem with their MJ degree. The MJ degree is offered 100% online. The Social Work courses are offered in-person with daytime and evening options, and some courses are offered online. Both degrees can be earned in a total of three years for full-time students.

Related Programs

Master's

- Children's Law and Policy (MJ) (p. 1781)

Certificate

- Public Interest and Social Justice Certificate (p. 1802)

Combined

- Social Work/Law (MSW/JD) (p. 1900)

Curriculum

The MSW/MJ in Child and Family Law program blends coursework from both the School of Social Work and the School of Law. MJ students may receive a dual MJ/MSW degree in three years of concentrated study rather than the four years it would take if each degree were pursued separately. Students must apply and be accepted by both programs.

Instead of the 49 required MSW credit hours and 30 required MJ credit hours, dual degree students are required to complete a total of 49 MSW credit hours and 21 MJ credit hours. For the MJ portion of the program, students are still required to take 4 of the required foundational courses from the MJ program (LAW 665 Introduction to the Study of Law and Legal Systems, LAW 667 Introduction to Children's Law, Policy and Practice, LAW 668 Leadership Development), and LAW 677 ChildLaw Thesis/Capstone.

Total Dual Hours: 70
Please note: This is a sample course schedule and may depend on course availability.
Reminder: MJ students must consult with both their law school thesis advisor and social work instructor to ensure their research practicum meets the requirement for both schools.

[2] Students who matriculated before Fall 2025 should take SOWK 504 and SOWK 681. Student who matriculated in Fall 2025 or after should take SOWK 508 and SOWK 682.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Demonstrate ethical and professional behavior. [MSW]
- Engage diversity and difference in practice, including promoting social and economic justice. [MSW]
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities.[MSW]

Social Work/Law (MSW/JD)

Offered jointly with the Loyola University Chicago School of Law, this dual degree gives clinical skills and a broader understanding of the human concerns in legal interventions to practicing lawyers. Students in this program gain psychological and social perspectives that come into play when representing and advocating for children, families, women, and the elderly.

Curriculum

MSW/JD Dual-Degree Program

The MSW/JD combines courses offered by the School of Law's JD program with courses offered by the School of Social Work's MSW program. In the School of Social Work, students are required to complete

all foundation courses. In addition, advanced practice courses are taken according to specialization area and electives.

1 This requirement only applies to students beginning their JDs in Fall 2023 or later.

2 This requirement only applies to students beginning their JDs in Fall 2022 or later. For students beginning their JDs in Fall 2023 or later, students must take this BCCR course before, concurrently with, or as part of their enrollment in any clinic or externship field placement.

3 Students who have a GPA below 2.9 after their second, third, or fourth semester of law school must complete "BAR EXAM FUNDAMENTALS" (LAW 232) in order to graduate. This class should be taken in the Fall or Spring of their third year for full-time students, and in the Fall or Spring of their fourth year for Weekend JDs.

4 2 or 3 credit hours in Spring semester of first year for full-time students; part- time students must take perspective elective after the first year.

5 At least one class with an RW designation after 1L year and before graduation. Prior completion of Legal Writing III will satisfy the RW requirement. A student cannot use their RW course to concurrently satisfy any other of their other graduation requirements.

6 Students who matriculated before Fall 2025 should take SOWK 504 and SOWK 681. Student who matriculated in Fall 2025 or after should take SOWK 508 and SOWK 682.

- JD = 77 Credit Hr. Required (Plus 9 hrs. transfer in from MSW to equal 86 JD hours)
- MSW = 49 Credit Hr. Program (43 MSW credits on template, plus 6 hrs. transfer in from JD equals 49 MSW hours)
- This template is only a suggestion, but the order and the semester in which courses can be taken can vary. Please consult with MSW Advisor and JD liaison to the School of Social Work before making changes.
- Child Law Fellows need to work with their child law advisors to determine required Law classes and schedule.
- Any Law students seeking a specialization certificate need to meet with an administrator from the specialization program to determine required courses and schedule.

[1] Students who matriculated before Fall 2025 should take SOWK 504 and SOWK 681. Student who matriculated in Fall 2025 or after should take SOWK 508 and SOWK 682.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both

of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Demonstrate ethical and professional behavior.
- Engage diversity and difference in practice, including promoting social and economic justice.
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities.

Social Work/Public Health (MSW/MPH)

The MSW/MPH dual degree program provides a multidisciplinary education covering both client-centered and population-based health perspectives to train those who will work to address the health and social needs of vulnerable populations. The dual degree program is designed to prepare social work and public health leaders who understand and respond to social and health issues in order to promote the well-being of communities at local and global levels. The program will have an emphasis on eliminating social and health inequities through transformative education, rigorous research, and active community engagement.

Related Programs

Certificate

- Public Health Certificate (p. 1544)

Combined

- Medicine/Public Health (MD/MPH) (p. 1879)

Curriculum

MSW/Master of Public Health

The MSW/MPH program blends coursework from the School of Social Work and the Master of Public Health (MPH) program.

Students in the dual degree will select the Micro Practice Specialization with Advanced Clinical Practice Track (p. 1849). Within the MPH program, students complete the Public Health Policy and Management (p. 1540) track.

The focus of the **MSW Program** is to prepare students to become practicing social workers in a variety of settings. The curriculum of the MSW program is designed to prepare students to have the knowledge and skills necessary for them to effectively intervene with and on behalf of the client systems that they serve.

The **MPH Program** provides students with the theoretical, methodological, and practical experience relevant to addressing contemporary public health issues. The MPH curriculum consists of required course work in all five areas of concentration in public health (Health Services Administration, Epidemiology, Biostatistics, Environmental Health, and Social/Behavioral Health), track-specific and elective courses, and a practicum training experience, and a capstone project.

The dual degree has been carefully crafted to fulfill both program requirements while maximizing opportunities for curriculum integration through shared content. The resulting curriculum requires 75 credit hours which can be completed within three years on a full-time basis.

[1] MSW
[2] MPH
[3] Counts for SOWK 602 Health and Behavioral Health Policy and Systems
[4] Shared credit
[5] MPBH 416 Health Services Research Methods substitutes for SOWK 506 Research and Evaluation in Social Work Practice
[6] MPBH 410 MPH Practicum (1 hr credit sharing it will map to both SWII 530 Internship I & Simulated Experience and SWII 531 Internship II & Simulated Experience)

[7] MPBH 499 Public Health in Action substitutes for SOWK 509 Social Work Policy and Community Intervention

[8] MPBH 422 Population Health Planning & Management is equivalent to SOWK 606 Practicum in Research & Evaluation-counts as a Social Work elective

[9] Students who matriculated before Fall 2025 should take SOWK 504 and SOWK 681. Students who matriculated in Fall 2025 or after should take SOWK 508 and SOWK 682.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Analyze problems and data using epidemiological, biostatistical, qualitative, and/or systems-thinking methods to inform public health policy and practice. [MPH]
- Design#population-based research, policies, programs, or interventions that are evidence-informed, equity-centered, and culturally responsive to population and community health needs.#[MPH]
- Apply#principles of leadership, communication, and interprofessional collaboration to the development, promotion,#delivery#or evaluation of public health solutions.##[MPH]
- Demonstrate ethical and professional behavior. [MSW]
- Engage diversity and difference in practice, including promoting social and economic justice. [MSW]
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities. [MSW]

Supply Chain Management (MBA/MSSCM)

Loyola students wishing to combine focused expertise in supply chain management with a breadth of business knowledge can enroll in a dual-degree program comprised of an MBA (p. 1590) and a Master of Science in Supply Chain Management (MSSCM) (p. 1598).

Related Programs

Master's

- Business Analytics (MS) (p. 1572)
- Supply Chain Management (MSSCM) (p. 1598)

Certificate

- Supply Chain Fundamentals Certificate (p. 1597)

Curriculum

The dual degree program can be completed by taking courses from the MBA and MSSCM curriculum at the same time. Students completing the dual degree will earn an MBA with a specialization in supply chain management and an MSSCM degree.

A maximum gap of one quarter is allowed between the completion of one degree program and the start of the other program.

Code	Title	Hours

1 May be waived at time of admission with relevant coursework with the grade "B" or above in the last 5 years.
2 Pre-Requisite: ISSCM 400N Quantitative Methods I
3 Co-Requisite: ACCT 400 Financial Accounting for Business Decisions Students completing INFS 492, INFS 494, INFS 796 as electives are eligible for the Business Analytics Certificate.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

- Integrative Business Knowledge: Graduates will be proficient in integrating the techniques, processes, and procedures of the fundamental business disciplines (accounting, economics, finance, marketing, management, human resource management, operations management, and information technology). They will be able to apply theory, skills, and knowledge from these disciplines to business practice. [MBA]
- Critical Decision Making: Graduates will demonstrate their capacity for critical analysis in processing, interpreting, and managing the quantitative and qualitative information necessary for effective managerial decision making. [MBA]
- Ethics and Responsible Leadership: Graduates will understand how to be a leader in business who exhibits personal integrity, ethical awareness, and an ability to apply ethical principles to business practice. [MBA]
- Global Perspective and Awareness of Diversity: Graduates will have a global perspective by recognizing international business issues and appreciating diversity, including culture, race, religion, and gender. [MBA]
- Communication: Graduates will be able to communicate effectively, orally. Graduates will be able to communicate effectively, in writing. [MBA]

Women's Studies and Gender Studies (MA)/Social Work (MSW)

Loyola University Chicago is one of a very few institutions offering a dual degree in Social Work and Women's Studies and Gender Studies. Earning both an MA in Women's Studies and Gender Studies and an MSW in Social Work together allows students to complete these degrees more quickly by taking courses that carry credit in both fields. This dual degree program enables women's studies students to utilize their course work in an applied setting and allows social work students to enhance their capacity to work with women in social work settings after graduation.

Students interested in the dual degree in Social Work and Women's Studies and Gender Studies must apply to each school simultaneously and be admitted based on the criteria for admission to each school.

Electives		
All students will choose to take two electives. Any 600 or 700-level course may be considered an elective.		6
Total Hours		**67**

1 The third core requirement is a course that explores feminism in a global dimension; a number of different courses can satisfy this requirement.

2 Some graduate level electives are offered through other departments, including English, History, Philosophy, Sociology, Political Science, Theology, Communications, Law, and Social Work. Electives recommended for students in the MA/MSW program include WSGS 480 Queer Theory, SOCL 426 Sociology of Gender, and THEO 480 Seminar in Christian Ethics.

3 **Course Options**

4 Students who matriculated before Fall 2025 should take SOWK 504 and SOWK 681. Student who matriculated in Fall 2025 or after should take SOWK 508 and SOWK 682.

Specializations & Tracks Options

The Master of Social Work program have the following specialization and track options:

- Leadership, Mezzo, and Macro Practice (LMMP) Specialization
  - Leadership, Community, Advocacy, and Policy (LCAP) Track (p. 1846)
- Micro Practice Specialization
  - Advanced Clinical Practice Track (p. 1849)
  - Certified Alcohol and Other Drugs Counselor Training Program (CADC) Track (p. 1852)
  - Migration Studies Track (p. 1855)
  - Schools/Professional Educator License (PEL) Track (p. 1858)

Social Work Internship

Students in the dual degree program must complete two social work internships, one each year, which involve a focus or some aspect that focuses on issues of gender or sexual orientation This means that the internships must provide students with experience in modalities of treatment or opportunities for program development that are focused on or relate to gender and/or involve students in advocacy activities in areas of concern that are gender related. While there are some agencies that clearly meet these criteria by virtue of their focus and service population, other agencies may be considered if at least 50% of the student's activities in these agencies meet the required criteria. All internships must be supervised by LCSW or MSW with 2 years post Master's experience.

Capstone Requirement

The required SOWK internships fulfill the required WSGS capstone experience for dual-degree students, but you must take WSGS 599 Capstone Presentation, the zero-credit-hour course that corresponds with the final capstone presentation, during your final semester. Upon completion of the program, all WSGS students do a capstone presentation, reflecting on the culmination of their work in the program as well as future applications of their WSGS curriculum, at the biannual WSGS capstone ceremony and celebration. Along with the capstone presentation, students are required to submit a brief synthesis paper and annotated bibliography of ten sources in Women's Studies and Gender Studies that have been influential to their work.

Suggested Sequence of Courses

The below sequence of courses is meant to be used as a suggested path for completing coursework. An individual student's completion of requirements depends on course offerings in a given term as well as the start term for a major or graduate study. Students should consult their advisor for assistance with course selection.

[1] Students who matriculated before Fall 2025 should take SOWK 504 and SOWK 681. Student who matriculated in Fall 2025 or after should take SOWK 508 and SOWK 682.

Dual Degree Programs

Students in dual degree programs are responsible for abiding by academic policies and graduation requirements of both academic units to which they are enrolled. It is strongly recommended that students schedule regular meetings with academic advisors from both units to ensure timely degree completion. Dual degree programs may have slightly different degree requirements from the standard for one or both

of the degrees earned. Students should closely read through all degree requirements and ask for clarification as needed.

Graduate & Professional Standards and Regulations

Students in graduate and professional programs can find their Academic Policies in Graduate and Professional Academic Standards and Regulations (p. 1938) under their school. Any additional University Policies supersede school policies.

Learning Outcomes

Upon graduating from this program, students will be able to:

- Demonstrate ethical and professional behavior. (MSW)
- Engage diversity and difference in practice, including promoting social and economic justice. (MSW)
- Engage, assess, and intervene with individuals, families, groups, organizations, and communities. (MSW)
- Analyze major influences within key historic feminist/gender studies movements in a global landscape. (MA)
- Explain how women's studies and gender studies are distinct and fundamental fields of study intimately connected to each other and other interdisciplinary academic disciplines across the university. (MA)
- Examine the intersections of identities (e.g., gender, race, ethnicity, class, sexuality, nationality, etc.) and the ways in which they contribute to instances of privilege and power dynamics across global cultures, space, and time. (MA)
- Understand their own relationship within their communities and that actions (or inactions) and cultural competencies are integral to addressing inequalities. (MA)
- Conduct research by privileging Feminist, Queer, and/or other Gender Studies theories and methodologies through both an intersectional and social justice lens. (MA)

- Accelerated Master's Pathway (p. 1936)
- Graduate and Professional (p. 1938)

Arrupe

Arrupe College Student Academic Policies

Mission

Arrupe College is a two-year college of Loyola University Chicago that continues the Jesuit tradition of offering a rigorous liberal arts education to a diverse population, many of whom are the first in their family to pursue higher education.

Using an innovative model that ensures affordability while providing care for the whole person – intellectually, morally, and spiritually – Arrupe prepares graduates to continue on to a bachelor's program or move into meaningful employment. Heeding the call of its namesake, renowned Jesuit leader Pedro Arrupe, S.J., the college inspires its students to strive for excellence, work for justice, and become "persons for others."

Overview

We are delighted that you have joined Arrupe College! Arrupe College is a collaborative and engaging community of students, staff and faculty dedicated to transformative education. At Arrupe College, you will have the opportunity to attain the knowledge, skills and values to thrive academically, professionally and personally so that you can help make our city, nation, and world more just and peaceful.

We understand that adjusting to college can be exciting but also stressful as you set academic and professional goals, develop new schedules, routines and helpful habits, and seek to balance academic and other responsibilities like caring for your health, working, and spending time with friends and family. The purpose of these academic standards and regulations is to communicate important information and expectations about academic policies and procedures that will help you to be successful! You will find helpful information on curriculum and degree requirements, registration, grades and academic progress, academic integrity and misconduct, and transfer credit. Please review the contents of these standards and regulations and please reach out to your advisor or academic dean(s) if you have questions.

Arrupe College is named after Father Pedro Arrupe, S.J., a Jesuit priest and former Superior General, who dedicated his life to helping others.

It is the goal of the program to offer a rigorous two-year curriculum promoting the Jesuit ideals of *cura personalis* (concern for the individual), acquisition and development of knowledge, and social justice while providing three core benefits:

- **Affordability** – The institution's tuition structure is designed to ensure students whose families have an Expected Family Contribution (EFC) at or near $0 graduate with an Associate's degree with minimal debt.
- **Accessibility** – Near the intersection of CTA and METRA transit lines, Loyola University's Water Tower Campus is a commuter-friendly ecosystem for learning, working, and personal development.
- **Achievability** – The curriculum aligns with the requirements of the Illinois Articulation Initiative (IAI), which allows students to transfer their credits upon competition to any institution part of the state-wide agreement.

Arrupe students have access to the University's Wellness Center, tutoring and writing services, libraries, gyms, computer labs, and most student organizations at the Lakeshore and Water Tower campuses. Within Arrupe, students enjoy on-site tutoring, transfer- and career-counseling, social work services, and academic advising.

Academic Grievance Policy

The Arrupe College process for resolving academic grievances complies with the University's academic grievance procedures (p. 1919). The purpose of an academic grievance policy is to ensure fairness and consistency in the management of all academic disputes involving course grades and accusations of academic misconduct.

Grade Appeals

If a student believes a grade to have been assigned by mistake or unfairly, they have the right to appeal the grade. The student must first contact the instructor to discuss the grade. If the instructor determines that a change of grade is warranted, the instructor shall submit a change of grade request via LOCUS. If the instructor denies the appeal, or fails to respond to the student's request, the student may request a formal hearing to have the appeal reviewed in an impartial and thorough manner.

In order to request a grade review, the student must submit a formal grade change request to the Office of Academic Affairs by no later than 30 days into the next semester indicating why the assigned grade is arbitrary or capricious. The Assistant Dean for Academic Affairs will determine if there are grounds for an appeal and whether to convene a hearing board. The Assistant Dean's decision or that of the hearing board is final in all cases except expulsion.

Please refer to the Undergraduate Academic Catalog (p. 1919) for more information about the Academic Grievance Policy's grade appeal process.

Academic Misconduct Appeals

If a student believes they were wrongly accused of academic misconduct such as cheating or plagiarism, they must first discuss the matter with the instructor. According to the University's academic grievance procedures (p. 1919), if the instructor denies the appeal, the student may request an impartial review of the accusation by filing a formal appeal with the Office of Academic Affairs. The Assistant Dean for Academic Affairs will determine whether there are grounds for an appeal and whether to convene a hearing board. Notably, a student's misunderstanding about academic policy (i.e. they did not understand they were committing academic misconduct) is not, by itself, grounds for an appeal. The Assistant Dean's decision or that of the hearing board is final in all cases except expulsion.

Academic Integrity

Arrupe College values participation, truth, and honesty in personal, professional, and academic communication and endeavors. In particular, as a community of scholars and learners, Arrupe College requires its members to understand and abide by Loyola's policies and procedures regarding academic honesty.

Some examples of academic dishonesty include:

- Plagiarism, including the use of artificial intelligence
- Multiple submissions of the same work for credit for more than one assignment
- Fabricating data
- Collusion without instructor permission
- Cheating
- Aiding and abetting the academic misconduct of others

Faculty members are responsible for identifying acts of academic dishonesty within their courses. They are also responsible for assigning penalties when they encounter these incidents. At minimum, acts of academic dishonesty will result in the student receiving a grade of "F" for the assignment or exam.

All incidents of academic dishonesty must be reported by the faculty member to the Office of Academic Affairs, which reserves the right to impose further sanctions depending on the infraction's severity and frequency.

For more information regarding academic policies as they relate to academic honesty, sanctions, and appeals, please see the Undergraduate Studies Catalog (p. 1919).

Academic Probation

At the end of each term, students with a cumulative GPA below a 2.0 are placed (or continued) on academic probation and shall be notified of their status by the Office of Academic Affairs. Students with incompletes will be reviewed at the time their grades become final to determine their academic standing, and may be placed on probation mid-semester.

First Probation

The first time a student is placed on academic probation, they must actively participate in a process designed to help them raise their GPA and return to good academic standing. They will be automatically enrolled in ACUNI 102: Academic Success Strategies if the course is offered during the term of their probation, and they must take the following steps.

1. Complete an Academic Improvement Plan (AIP). This is an electronic document completed by the student in consultation with their advisor to help ensure they have reflected on what barriers to academic success existed in the previous term, and to establish tangible plans to improve academic performance in the current term. A student on probation must complete Part I of the AIP, which should then be forwarded to the advisor.
2. Next, the student should contact their advisor to schedule a meeting to take place no later than within the first three weeks of the new term. In this meeting, the student and advisor will review Part I of the AIP and develop an action plan (Part II).
3. At the week 5-7 mark of the semester, the student should make an appointment with the Retention and Learning Coordinator to review the progress towards your academic plan and potential next steps.

Multiple Probations

Students on academic probation for more than one term do not need to complete the Academic Improvement Plan a second time. Exceptions may include students who were dismissed and reinstated, students returning from a Leave of Absence, and/or when an advisor believes the student will benefit from completing an updated plan. Students who have been on academic probation for multiple semesters must meet with their academic advisor within the first two weeks of the subsequent term to discuss their goals and progress. They must also continue to schedule at least one academic progress appointment per semester with the Retention and Learning Coordinator.

Academic Dismissal

Students on probation are subject to dismissal for poor academic scholarship from Arrupe College if they do not either return to good standing by earning a cumulative GPA of 2.0 by the end of their term or probation, or by earning at least a term GPA of 2.33 thereby demonstrating satisfactory academic progress. A student's career course completion rate of at least 67 percent (grades of "F," "W," "WE," and "NR" count against this calculation) and a student's reasonable ability to achieve a final GPA of 2.0 after completing all remaining degree requirements are also considered in reviewing students for dismissal.

Academic Standing

Good academic standing is defined by the College as a 2.0 ("C") cumulative grade point average (GPA) or higher. Academic standing is assessed by the college at the end of each term.

Separately, to remain eligible for financial aid, students must meet the 2.0 GPA requirement while successfully completing at least 67 percent of attempted coursework in an academic year. The Office of Financial Aid assesses student academic progress at the end of each semester and will place students falling below this target on probation. Students who do not meet requirements by the end of the subsequent semester must file an appeal with Financial Aid. If the appeal is granted, students have until the end of their second semester on Financial Aid probation to meet Satisfactory Academic Progress (SAP). Students who fail to do this may lose their financial aid package permanently.

Dean's List

Students who earn a term GPA of 3.5 or higher on a completed full-time schedule of classes (at least 12 credits) shall be added to the Dean's List for that term, recognizing them for their academic achievement. Students with incompletes will be reviewed for Dean's List eligibility once their incomplete grades have been finalized.

Phi Theta Kappa (PTK) Honor Society

Students who receive a cumulative GPA of 3.5 or higher and complete at minimum 12 credit hours will receive an invitation to the College's honor society – Phi Theta Kappa (PTK) from the PTK Advisor.

ACUNI 101 First Year Seminar & ACUNI 102 Academic Success Strategies

ACUNI 101 First Year Seminar

ACUNI 101: First-Year Seminar is a one-credit course and a graduation requirement for all incoming first year students during the fall term. The course is designed to provide a comprehensive extended orientation that is holistic and focuses on academic success and the transition from high school to college. The course is pass/no pass (P/NP), in which students must attain a grade of 70 percent or higher in the course in order to pass.

ACUNI 101 is only offered in the fall semester; students who do not pass or who withdraw from the course may satisfy this graduation requirement by successfully completing ACUNI 102: Academic Success Strategies, which is offered in the spring term.

ACUNI 102 Academic Success Strategies

ACUNI 102: Academic Success Strategies is a one-credit course designed to strengthen students' academic skills so that they can become more effective learners. ACUNI 102 is graded and does impact a student's GPA. Enrollment in ACUNI 102 is required of students who are on academic probation after their first semester, who did not pass ACUNI

101, or both. If a student does not pass ACUNI 101 or 102, they must meet with the Assistant Dean for Academic Affairs to determine an alternative to satisfy this graduation requirement.

Attendance

Arrupe has an in-person class teaching and learning model. The College sees in-person teaching and learning as a significant factor in a student's academic and personal development. Consistent attendance helps ensure that students are building relationships with peers and faculty, that they are engaged at a higher level, and learning concepts outside the classroom that will benefit them in their future pursuits. Consistent attendance and participation in class will maximize student's chances to learn and be successful at the College.

Students with multiple absences face an increased chance they will underperform in their courses, fall behind, and lose important connections within the Arrupe community. While the College appreciates that students may get sick, have personal emergencies and other important responsibilities, it is essential to follow certain fundamental steps if an absence becomes unavoidable:

1. **Understand** class policy. Each professor has their own attendance and participation policy. Students should review these policies at the start of a term and ask any questions if there are misunderstandings about how absences can impact exams, deadlines for assignments (and possible submission of late work), and final grades.
2. **Communicate** with professor(s) in advance of an absence, or as soon as actually possible if the absence was unexpected.
3. **Follow up** with professors upon return to class. Students are strongly encouraged to arrange a time to connect with professors to discuss work that may be missed in class. Similarly, students should connect with classmates for any notes and insights on classes that are missed.

Students who may need to miss multiple classes over multiple days are also strongly encouraged to not only communicate with their professors, but also consider utilizing resources available at Arrupe for additional support, which may include the student's advisor, the Office of Student Services, and the Office of Academic Affairs.

Cohorts

In their first two (fall and spring) terms, Arrupe College students are part of and take classes as morning or afternoon cohorts. Though incoming students may indicate their cohort preference, cohort placement is at the discretion of the College. After their first two terms, a student may enroll in any open class that meets their degree requirements.

Bridging Cohorts

In some instances, the Office of Academic Affairs may allow a first-year student to take classes across cohorts; that is, classes in both the morning and afternoon. In these cases, students will remain affiliated with their original cohort and return to their intended schedule for subsequent terms.

Changing Cohorts

First-year students are allowed to submit a request to change cohorts in writing to the Office of Academic Affairs, which may be considered based on a student's individual needs but also on enrollment capacity.

Curriculum Components

Arrupe College's curriculum consists of three components:

1. Illinois Articulation Initiative (IAI) General Education Core Curriculum (GECC) Requirements (37-38 credit hours)
2. Arrupe Mission Core Requirements (10 credit hours)
3. Pre-Major Concentration and/or Electives (15 credit hours)

In order for a student to receive an Associate of Arts degree from Arrupe College, they must:

1. Complete all required courses, including the General Education Core Curriculum, Arrupe Mission Core, and Electives. Please see the Arrupe College catalog for a current list of classes that satisfy these requirements.
2. Earn a minimum of 62 credit hours, which must include:
    1. At least nineteen courses worth three credits or more,
    2. At least one science course with lab worth four credits, and
    3. At least one ACUNI seminar course worth one credit

Discontinuation

Voluntary Discontinuation

If a student withdraws and indicates they do not plan to return Arrupe by the following term or at all, they will be discontinued in their academic program and must apply for re-admission if they wish to return in the future.

The College underscores the importance of students who are withdrawing from some or all of their courses in any capacity to consult with their advisor to discuss their academic plans as well as with their financial aid counselor to determine if the withdrawal will impact their eligibility for aid or result in any financial liability.

Discontinuation for Academic Dismissal

Students on probation who do not return to good standing within the designated requirements and timeframe may be dismissed for poor academic scholarship and will be notified via email before the start of the following academic term. If a student is dismissed for poor scholarship they will be discontinued in their academic program, and may apply for readmission only after earning at least six credits at another accredited institution while meeting all the following guidelines:

- Must be taken during a traditional fall or spring term (typically lasting more than 12 weeks)
- Must be taken primarily in-person/not online
- Must satisfy General Education Core Curriculum (GECC) or Arrupe Core requirements
- Must result in a cumulative GPA of 2.33 ("C+" average) or higher

A student who is readmitted after being dismissed for poor scholarship shall return on academic probation based on their previous GPA earned at Arrupe College and will be subject to all the original probation requirements.

Discontinuation for Non-Enrollment

Students may choose at their own discretion to take a Leave of Absence from Arrupe College for one single fall, spring, or summer term. Students wishing to do so should consult with their advisor to discuss their plans, and they must complete the *Request for Leave of Absence* form and submit to the Office of Academic Affairs. Students may not enroll or pursue course work at another accredited institution elsewhere during their term away. Students are responsible for reaching out to their advisor to discuss registration for the next available academic term.

If a student does not enroll for two consecutive terms, they will be

discontinued from their program and must apply for re-admission if they wish to return in the future.

Discontinuation for Enrollment Elsewhere

Students may not enroll in coursework elsewhere while enrolled at Arrupe College or Loyola University Chicago, nor may they enroll elsewhere during a Leave of Absence. Students who do so will be discontinued from their program at Arrupe College and must apply for re-admission if they wish to return in the future.

Re-Admission Policy

Any student who leaves Arrupe College and is not enrolled for two consecutive terms, **or** who completes course work at another institution during a Leave of Absence shall be required to apply for re-admission through the Office of Admission if they wish to return. Students applying for re-admission after being dismissed for poor scholarship are subject to additional requirements outlined in the **Discontinuation for Academic Dismissal**.

Full-Time Enrollment Requirements

Students at the College are required to enroll full-time: at least 12 credit hours (typically four courses) per fall and spring term, and at least six credit hours (typically two courses) per summer term. A student's eligibility for financial aid may be adversely impacted by enrolling on a part-time basis.

FAFSA Verification

If a student is selected by the Office of Financial Aid to verify their FAFSA, they must complete the verification process before registering for subsequent sessions. Failure to complete verification will result in a tuition balance and registration hold. Outstanding verification documentation is itemized under the “To Do” banner in LOCUS.

Outstanding Account Balances

Students with an outstanding balance, who are not on a payment plan (iPlan), may not register until the account balance is settled in accordance with the Office of the Bursar’s policies and practices.

Part-Time Registration Appeal

Students who intend to enroll in fewer than 12 credits in a fall or spring term or fewer than six credits in a summer term must submit the *Request for Class Withdrawal & Part-Time Enrollment* to the Office of Academic Affairs.

Students understand that part-time status can impact financial aid, tuition charges, and path to a timely graduation.

Request for Leave of Absence

In cases where extenuating circumstances significantly impact a student’s ability to attend class, they may request to take a leave of absence for one semester by submitting a *Request for Leave of Absence* to the Office of Academic Affairs.

A student granted a Leave of Absence will not register for classes for the term in question. Therefore, financial aid will not be disbursed, nor will the student be assessed tuition or fees for that term.

Students should maintain contact with their advisor during their Leave of Absence to ensure they are ready to register for their returning term in a timely manner. If a student does not enroll for a coursework in the term after their approved Leave of Absence, or if they enroll in coursework at another institution during their leave, they will be discontinued from their program and must apply for re-admission.

Repetition of Course(s)

For courses where a student has previously received a grade of "W" or "WE," they may enroll in that course without any special permission.

For required courses where a student has previously received a grade of "F" or a grade of "D" that does not adequately satisfy a pre-requisite, they must request authorization to retake the course from the Office of Academic Affairs.

For elective courses where a student has previously received an "F," permission may only be granted if the student has an academically necessary reason for repeating the course (i.e. it is a course likely to be required for the student's future degree program).

For any other courses where a student has previously received a "D," permission may only be granted if retaking the course benefits their future degree plans (i.e. they must raise their GPA for bachelor's program admission, or must have a higher grade in a course to satisfy future degree requirements).

The grade in a repeated course does not replace the original grade earned; the grades in both courses are essentially averaged together. For example, if a student received a "D" in a three-credit course and a "B" in the repeat attempt, the quality points are added together and divided by the total credit hours of both courses. In this example, the student would effectively have a "C" in the course, but both grades would appear on the student's official transcript.

In an authorized repeat of a course, the student will not receive additional credit towards graduation for multiple attempts. The student will only receive credit hours toward graduation for equivalent to one of the attempts (in most cases, three credit hours) since credit hours in the course have already been earned. The repeated course, however, is counted for attempted hours and quality points for the accurate computation of grade point average for the term in which it is taken. Students should consult with their advisor or visit the Office of Academic Affairs for further clarification.

Cross-College Enrollment

Enrollment in coursework outside the Loyola University Chicago community is strictly prohibited while enrolled at Arrupe College. Students may take coursework at another College or School within Loyola University Chicago (such as the College of Arts and Sciences or the Quinlan School of Business) to fulfill a future program or degree requirement. Eligible students must meet the following criteria:

1. A cumulative GPA of a 3.0 or higher
2. 25 or more earned credit hours by the time the desired course begins
3. Permission from both the Office of Academic Affairs at Arrupe College as well as from the Dean’s Office of the receiving College or School

Grading System

Letter grades and plus/minus indicators (suffixes) are used by instructors to indicate a student's quality of achievement in a given academic course. The letter grades A, A-, B+, B, B-, C+, C, C-, D+, D, F are assigned the following credit points for purposes of grade point average (GPA) calculations:

Grade	Grade Points
A	4.0
A-	3.67
B+	3.33

B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
F	0

Incomplete Grades

An incomplete ("I") grade is a temporary mark that may be offered later in a semester (typically after the withdrawal deadline) at the discretion of an instructor and with consent from the Office of Academic Affairs. Students may request an incomplete when they have experienced unexpected personal events that make it exceptionally difficult or impossible to finish work associated with a course by the time final grades are due. Examples of circumstances that warrant an incomplete may include, but are not limited to:

- Student Illness or injury requiring hospitalization or documented medical intervention
- Death or illness of a loved one
- Sudden change in personal circumstances, such as housing insecurity or other traumatic event

Students who wish to pursue an incomplete must fill out the "Undergraduate Request for a Mark of Incomplete" form (accessible on the Arrupe College website) and present it to their instructor. The instructor has sole discretion to offer an incomplete and set the timeline for which work must be submitted, which cannot be later than six weeks into the following Fall or Spring semester. Common reasons an instructor may decline an incomplete request may include, but are not limited to:

- Final exam or final project deadline has already passed and/or final grade has already been submitted
- Request is submitted too early in the semester to reasonably be considered
- Student has already missed too much classroom instruction and/or assignments to catch up

If an instructor agrees to offer an incomplete, they will submit the completed request form to the Office of Academic Affairs for final approval. If a student does not complete any or all outstanding work by the agreed upon deadline or by six weeks into the next Fall or Spring semester (whichever comes first), a final grade will be calculated and entered by the instructor based only on whatever work has been submitted up to that point. Extensions to incompletes are typically not offered, nor should they be expected, and can only be granted in consultation with the Office of Academic Affairs.

Withdrawal Grades

If a student withdraws enrollment from a class or classes, they will earn a withdrawal grade of W, WE, or NR, depending on the circumstances. Withdrawal within the first two weeks of the fall or spring term or first week of the summer term (refer to the University Academic Calendar for exact timing) will result in no financial responsibility for the dropped class(es). More information regarding this process can be found under "Voluntary Withdrawal."

If a student withdraws from a course after the first two weeks, they may retain full or partial financial responsibility for the withdrawn course. If a student withdraws from one or more classes after these dates, it could result in a proration of tuition charges and, potentially, a recalculation of Financial Aid Title IV funds, meaning they could potentially owe money to the university. If a student is contemplating withdrawal, they should first refer to the Office of the Bursar's tuition schedule to calculate financial responsibility and speak with a financial aid counselor to determine what effects, if any, the withdrawal would have their aid.

Students who are enrolled but receive no course credit for a semester or session (for example, earning grades of "F" or "W" in all courses) may be audited by the Financial Aid Office at the end of an academic term. This audit could result in a return of Title IV funds without any tuition reimbursement, meaning the student could owe money to the university.

Withdrawal for a "W"

A grade of "W" (withdrawal) is assigned for withdrawal after the first and through the tenth week of the 16-week semester, and after the first and through fifth week of the nine-week session (please refer to the University Academic Calendar for exact timing). This grade will appear on the student's transcript but will have no impact on the student's grade point average.

Withdrawal for an "NR"

A notation of "NR" is assigned in instances where the student is registered for a course but never attended or submitted work for the course in question. An "NR" grade does not impact the student's GPA, but may result in an audit by the Office of Financial Assistance.

Withdrawal for a "WE"

If a student is facing significant hardship and considering withdrawal from all classes, particularly after the last day to withdraw with a mark of "W," they should meet with their advisor and refer to the University's "Emergency Withdrawal" policy, which results in a grade of "WE" for **all** courses - students are not eligible to receive "WE" marks in some courses but not others in a given term. A grade of "WE" does not impact GPA but may change a student's financial aid eligibility.

Illinois Articulation Agreement (IAI) Grade Requirements

If a student plans to transfer to an IAI receiving school, at least a "C" is required for satisfactory completion of each of the two courses in the writing sequence (ACWRI 105 College Writing I and ACWRI 110 College Writing II). Students should know, however, that some participating institutions and some baccalaureate majors already require a "C" or better for completion of the writing courses and the oral communication course (ACCOM 101 Public Speaking & Critical Thinking).

Aside from the two writing courses, the IAI agreement permits students to count a course in which they earned a grade of "D" towards fulfilling the other General Education Core Curriculum requirements because most bachelor's degree-granting institutions permit students who begin at the institution as freshmen to do so. Your baccalaureate Major, however, may require a "C" or better in any General Education Core Curriculum course also used to satisfy a major requirement.

Students should know they need at least a cumulative "C" average (2.00) to meet graduation requirements for an associate's degree. As students prepare to transfer, they should understand that, although the policy permits a course in which they earned a grade of "D" to count towards an associate's, admission to most degree-granting institutions – and to specific bachelor's degree majors – is often highly competitive.[1]

Schedule

Unless otherwise approved (see “Enrollment”), a student is required to maintain continuous, full-time enrollment through four, 16-week terms (fall/spring) and two, nine-week summer terms. Following this enrollment pattern will allow a student to complete their associate's degree in two years, as long as they do not withdraw or need to repeat any courses (see ”Repetition of Courses”). If a student would like to preserve a summer term to complete an internship or research opportunity, they should consult with their advisor to discuss an alternative schedule and path to graduation.

Transfer Credit

Arrupe abides by Loyola University Chicago’s Advanced Placement (AP), College- Level Examination Program (CLEP), International Baccalaureate (IB), and dual credit transfer policies. For more information, visit the Undergraduate Studies Catalog (p. 1919).

The associate's degree awarded by Arrupe College consists of at least 62 credit hours with some programs requiring a greater number of credits. Of these 62+ credit hours, students must complete at least 32 credit hours in residence at Arrupe College in order to receive their associate's degree. Students may apply up to 30 credit hours, or approximately a year’s worth of coursework, towards the completion of their associate's degree.

Process for Transferring Back Credits

A student who has earned at least 56 college credits and holds a 2.0 GPA or above is eligible to apply to transfer back two academic courses (for a maximum of seven credits) from another postsecondary institution or another college at Loyola University Chicago to complete their associate's degree from Arrupe College. This policy allows the student to fulfill their degree requirements and achieve timely graduation. The total number of credits transferred back plus the total number of credits transferred in cannot exceed 33 credit hours total.

Students must have approval from the Office of Academic Affairs prior to the end of their final semester at Arrupe and, *in most cases*, are encouraged to complete all transferable credit in the first semester at the other postsecondary institution.

Students awarded an associate's degree from Arrupe College are recognized as "Core Complete" at any of the Illinois Articulation Initiative receiving institutions including all of Loyola University Chicago’s undergraduate colleges.
